PUAPRO001B Promote a learning environment in the workplace

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency to promote a workplace learning environment in which work and learning are integrated to support the achievement of individual and organisation objectives.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to all Public Safety workers who have leadership roles in their organisation, but is particularly relevant to those workers with supervisory or managerial responsibilities for teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Create learning opportunities	1.1 Workplace environments which facilitate learning are developed and supported. 1.2 Learning plans are developed as an integral part of individual/team performance plans. 1.3 Learning plans reflect the diversity of learning styles, development needs and ***learning opportunities.*** 1.4 Individual/team access to, and participation in, learning opportunities is facilitated. 1.5 Consultation with training and development specialists results in the planning and provision of learning which enhances individual, team and organisation performance.
2. Facilitate and promote learning	2.1 Workplace activities are used as opportunities for learning. 2.2 Coaching and mentoring is used to develop workplace knowledge, skills and attitudes. 2.3 The benefits of learning are shared with others in the team/organisation. 2.4 Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards.
3. Monitor and improve learning effectiveness	3.1 Performance of individuals/teams is monitored to determine the type and extent of additional work based support. 3.2 Feedback from individuals/teams is used to identify and introduce improvements in future learning arrangements. 3.3 Change in the workplace environment is facilitated to promote learning. 3.4 Records and reports of competency are documented

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and maintained within the organisation's systems and procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- develop learning plans
- develop links between work and learning
- promote collaborative processes in developing a learning environment
- promote the achievement of competencies in the workplace
- provide leadership and support to individuals and teams to develop and maintain a flexible learning environment
- provide or arrange support for those who have learning difficulties
- support and encourage learning by individuals and teams

Required Knowledge

- group dynamics
- learning strategies
- organisation records and reports of competency procedures
- principles of adult learning

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Knowledge and application of strategies which facilitate and promote an effective workplace learning environment. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Evidence in facilitating and promoting a learning environment in the workplace Knowledge may be assessed through: • written assignment • debriefings and action learning projects.

© Commonwealth of Australia, 2025 Public Skills Australia

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Learning opportunities arise from organisation may include:	• objectives • plans • systems • processes • performance plans • quality and continuous improvement processes and standards • resources • participation in committees • managing projects • developing plans • analysis of incidents/response/emergency • organisation's approach to environmental management and sustainability
Learning strategies may include:	• coaching • mentoring • exchange/rotation • action learning • structured training programs

PUASAR011C Search as a member of an aquatic search team

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to search for and locate lost persons and/or items as a member of an aquatic search team including inland rivers, lakes, dams, surf zones and oceans, in a range of ***search terrain***.

While normally undertaken in boats, ***aquatic searches*** may also include cliff searches and searches assisted by aerial support or other craft.

Search operations are normally conducted in support of police and may include searches for missing persons, objects and/or evidence.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Participating in an aquatic search operation, generally as a member of a team, will require the effective application of a variety of skills. Competence in this unit will include appropriate preparedness, response, direct participation in the search, and appropriate post-search recovery. Successful achievement of this unit will require practical and effective application of skills in a real or simulated search operation.

This unit is typically relevant for lifesavers, lifeguards or other personnel who are required to perform or participate in a search (regularly or occasionally) in an aquatic environment.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for aquatic search	1.1 Search operation information and ***task information*** is obtained and discussed with team members. 1.2 Task information is used to determine personal equipment needed for search operation. 1.3 ***Search equipment*** is selected and checked for serviceability, and is stored/packed for use. 1.4 Faulty equipment is reported to supervisor.
2. Participate in aquatic search	2.1 Specified team roles and functions are carried out in accordance with operational and task information. 2.2 ***Search formation*** or grids are used to locate missing persons or objects. 2.3 Search boundaries are marked in line with task requirements. 2.4 ***Observation skills*** are applied, and any clues or objects located are reported immediately in accordance with organisational procedures. 2.5 ***Communication*** is maintained with team members throughout the search. 2.6 Personal capabilities and limitations are recognised and referred to team leader.
3. Maintain aquatic search	3.1 Search safety procedures are implemented.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
safety	3.2 ***Survival techniques*** are applied when necessary. 3.3 Lost searcher procedures are implemented when necessary.
4. Recover person or findings	4.1 Team leader is immediately advised of located persons or findings in accordance with organisational procedures. 4.2 Persons or findings are recovered and treated using appropriate search safety procedures. 4.3 Initial preservation procedures are implemented to maintain integrity of evidence. 4.4 Initial scene preservation is conducted in line with organisational requirements.
5. Complete recall and stand down procedures	5.1 Search equipment is recovered, cleaned and maintained in accordance with manufacturers' guidelines and organisational procedures. 5.2 Operational debriefing is participated in and ***operational documentation*** is completed to organisational standards. 5.3 Where identified, symptoms of ***operational stress*** are recognised and reported.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- deal with clues and location of objects or causalities
- implement lost searcher procedures
- implement survival techniques
- maintain search information
- mark and space boundaries
- observe the situation/environment
- use personal protective equipment correctly
- work in a team

Required Knowledge

- composition of team, and roles and responsibilities of team members
- duty of care
- local documentation requirements

© Commonwealth of Australia, 2025 Public Skills Australia

- local hazards and environmental threats
- local operational briefing and debriefing procedures
- local operating procedures
- lost searcher procedures
- map reading
- object recovery procedures
- recall procedures
- relevant state/territory search management arrangements
- relevant occupational health and safety principles and practices
- requirements to preserve a crime scene and the preservation of evidence
- search formations
- signs and symptoms of operational stress
- survival techniques
- verbal and non-verbal communication techniques including hand signals and language style

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • comply with search orders • observe the safety of self and others at all times during the search • search during the day and night • correctly apply survival techniques, search safety procedures and lost searcher procedures throughout the search when required **Consistency in performance** Competency should be demonstrated over time during an extended day/night activity during which a variety of searches for persons and objects are undertaken.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual or simulated search environment by observing the individual carry out a number of search activities relating to various search scenarios. **Specific resources for assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

	Access is required to: • appropriate environment to conduct the search operation • other organisations in the operation such as police, helicopter rescue, marine search and rescue, other aquatic organisations - as required
Method of assessment	This unit may be assessed with the following unit/s: • PUATEA001B Work in a team. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Search terrain may include:	• Bays and rivers • Lakes and dams • Ocean • Sand • Steep rock areas • Surf

Aquatic searches may be conducted under conditions such as:	• Hazardous environmental conditions including:
	  • adverse weather
	  • after dark operations

© Commonwealth of Australia, 2025 Public Skills Australia

	• difficult sea and surf conditions • time pressure • dangerous marine creatures
	• Ocean or inland environments
	• Operating as part of a multi-agency response
Task information may include:	• Emergency rendezvous points
	• Number, nature and description of persons or objects that are the focus of the search
	• Command, control and coordination arrangements
	• Ocean, surf and sea environmental information
	• Operating area
	• Potential hazards
	• Time constraints
	• Weather forecast
Search equipment may include:	• Compass or other positioning equipment
	• Food
	• Maps and charts
	• Notebook and pencil
	• Personal first aid equipment
	• Personal hygiene items
	• Personal protective equipment, especially lifejackets, EPIRBs, wet weather gear, cold weather clothing, sun protection
	• Radio communications equipment
	• Water
Search formations may include:	• Creeping line search pattern
	• Square search pattern
Observation skills may include:	• Picking up on physical cues
	• Scanning
Communication may include:	• Auslan gestures
	• Calming and reassuring a casualty
	• Face-to-face
	• Facsimile
	• Feedback of information
	• Information technology systems
	• Land line telephone
	• Mobile telephone
	• Radio
	• Signalling systems
	• Written
Survival techniques may include:	• Conserving water, food and energy

© Commonwealth of Australia, 2025 Public Skills Australia

	• Constructing temporary shelters • Locating other craft • Locating shelter • Obtaining water • Skills relevant to the local areas (such as cold, heat, sea conditions, aquatic conditions)
Operational documentation may include:	• Notes or sketches of findings • Other relevant information required for potential coronial or other legal proceedings
Operational stress symptoms may include:	• Fatigue • Headaches • Illness • Indecision • Intolerance • Lack of focus • Nausea

PUASAR012C Apply surf awareness and self-rescue skills

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required to deal with surf awareness and self-rescue skills to safely participate in activities in the surf environment.

Application of the Unit

Participating in any potentially hazardous aquatic operation will require the effective application of a variety of skills and knowledge. Competence in this unit will include appropriate application of surf awareness, and effective application of self-rescue skills. Successful achievement of this unit will require practical and effective application of skills in a real or simulated activity in a surf environment.

This unit is typically relevant for lifesavers, lifeguards, search and rescue officers or other rescue personnel who are required to perform or participate in activities (regularly or occasionally) in a surf environment.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Apply knowledge of the surf environment	1.1 Potential ***hazards and environmental conditions*** of the surf environment are identified. 1.2 ***Characteristics of different types of waves*** and their impact on surf safety are used to identify safe surfing locations. 1.3 ***Distinguishing features of rips***, gutters and sweeps are identified and used to determine the most suitable surfing venue. 1.4 Different types of beaches and the safety aspects of the beach structure are identified.
2. Apply surf skills and techniques	2.1 ***Techniques for survival*** in the water are implemented. 2.2 ***Personal safety and environmental hazards*** are avoided while in the water.
3. Implement self-rescue techniques	3.1 Surf is negotiated in ***prevailing conditions*** using ***craft*** and without craft. 3.2 Return to shore in prevailing conditions is achieved, using craft and without craft. 3.3 ***Strategies when not able to self-rescue*** or return to shore unassisted are implemented.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- paddle surf craft and use rescue tubes

© Commonwealth of Australia, 2025 Public Skills Australia

- swim in the surf in moderate conditions
- use recognised signals

Required Knowledge

- effects of wind, tide, swell and ocean floor on surf conditions
- features and signs of rips, gutters, sweeps and currents
- surf awareness including beach safety zones
- surf hazards
- surf survival techniques
- self-rescue techniques
- types of waves and their characteristic features

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply sufficient knowledge of surf conditions, factors that affect these conditions and survival techniques • apply this knowledge to negotiate the surf and return through the surf **Consistency in performance** Competency should be demonstrated over time in order to ensure consistency of performance over the Range Statement and contexts applicable to surf lifesaving.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed while participating in lifesaving activities or in a simulated environment and under a range of weather conditions. **Specific resources for assessment** Access is required to: • surf beach with prevailing conditions appropriate to the level of activity and suitable craft
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of

© Commonwealth of Australia, 2025 Public Skills Australia

assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards and environmental conditions may include:

- Dumping waves
- Large waves
- Lateral currents
- Marine creatures
- Other surfers or swimmers
- Other equipment
- Own equipment
- Rips
- Sandbars
- Shorebreaks

Characteristics of different types of waves may include:

- Impact of white wash higher than wave itself
- Plunging (dumping)
- Steep, powerful, dangerous
- Shallow water depth
- Spilling (crumbling):
  - deeper water
  - wave face less steep
  - wave slower to break

Distinguishing features of rips include:

- Darker blue/green foam or debris
- Lack of waves
- Rippled surface

Techniques for survival may include:

- Attracting attention of lifesaver/lifeguard or others who may be able to help
- Floating and treading water
- Recognising hazards and keeping a safe distance

© Commonwealth of Australia, 2025 Public Skills Australia

	from hazards • Swimming or paddling diagonally across rips
Personal safety and environmental hazards may include:	• Hydration • Hypothermia • Sun safety
Prevailing conditions are influenced by:	• Availability of assistance • Imminent hazards • Imminent risks • Size of surf
Craft may include:	• Bodyboards • Handboards • Hard surfboards • Sitting on top of kayaks • Soft surfboards
Strategies when not able to self-rescue may include:	• Floating and treading water • Remaining with craft where possible • Using recognised signals for assistance

PUASAR013A Participate in an aquatic rescue operation

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Replaced PUASAR009B
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to participate in rescue operations as a member of an aquatic rescue team, including inland rivers, lakes, dams, surf zones and oceans. This unit underpins specialist rescue operations.

Participation in a rescue operation may involve working with personnel who are trained appropriately to treat casualties including first aid officers, lifesavers, lifeguards, ambulance crew, doctors, nurses and paramedics.

This unit replaces PUASAR009B Participate in an aquatic rescue operation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Participating in an aquatic rescue operation, normally as a member of a team, will require the effective application of a variety of skills. Competence in this unit will include appropriate preparedness, response, direct participation in the rescue and appropriate post-rescue recovery. Successful achievement of this unit will require practical and effective application of skills in a real or simulated rescue operation.

This unit is typically relevant for lifesavers, lifeguards or other rescue personnel who are required to perform or participate in rescues (regularly or occasionally) in an aquatic environment.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and respond to rescue	1.1 Operation and task information is obtained and discussed with team members. 1.2 Appropriate ***rescue equipment*** is identified and selected based on task information as directed by supervisor. 1.3 ***Personal protective equipment*** is selected based on the nature of the ***rescue operation.*** 1.4 Any further details of the nature of the rescue are received en route.
2. Participate in assessing the rescue scene	2.1 ***Hazards*** are identified on approach to rescue scene. 2.2 Methods for minimising hazards are discussed and agreed to by team members. 2.3 Hazards and ***environmental conditions*** are minimised or controlled. 2.4 ***Communication*** with other team members is maintained using appropriate techniques and terminology. 2.5 Health, safety and security procedures are correctly followed in accordance with organisational policy and relevant legislation. 2.6 Personal capabilities and limitations are recognised

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	and referred to supervisor.
	2.7 Need for additional personnel and/or specialist equipment is reported to supervisor.
3. Perform rescue	3.1 Access to incident and/or casualties is gained using techniques and equipment in accordance with organisational procedures.
	3.2 Rescue procedures are conducted in accordance with supervisor's instructions and organisational procedures.
	3.3 Casualties are prepared for removal in accordance with organisational policy and procedures.
	3.4 Casualties are extricated safely using appropriate equipment, rescue techniques and organisational procedures.
4. Conclude rescue operations	4.1 Equipment is recovered, cleaned and maintained to organisational standards and manufacturers' procedures, and is restored to maintain operational readiness.
	4.2 Where identified, signs and symptoms of operational stress in self and others are reported to relevant personnel.
	4.3 Operational debriefing is participated in and ***operational documentation*** is completed to organisational standards.
	4.4 ***Hygiene precautions*** are implemented in accordance with organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- participate as a team member
- use rescue equipment
- work on a constantly moving platform

Required Knowledge

- capabilities and limitations of rescue equipment
- casualty handling techniques
- composition of team, and roles and responsibilities of team members

© Commonwealth of Australia, 2025 Public Skills Australia

- environmental hazards
- manual handling techniques
- nationally agreed hazard marking systems
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- personal hygiene
- procedures for reporting injuries and accidents
- relevant legislative and regulatory requirements
- safety precautions
- surface search and surface clearance of casualties
- techniques and aids
- verbal and non-verbal communication techniques including hand signals and language style

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply safe work practices in rescue operations • use equipment in accordance with organisational procedures • respond and react to instructions in a safe, correct and timely manner • correctly select and wear personal protective equipment in accordance with organisational requirements **Consistency in performance** Competency should be demonstrated across a range of rescue operations over time to ensure identified situational variables are consistently achieved
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in a range of rescue operations while on the job or in a simulated environment and under a variety of weather conditions. **Specific resources for assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

	Access is required to: • rescue and personal protective equipment listed in the Range Statement • suitable environment necessary to conduct a range of rescue operations listed in the Range Statement
Method of assessment	This unit may be assessed with the following unit/s: • PUATEA001B Work in a team. In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Rescue operations may include participation in:	• Aquatic search and rescue • Bar rescue • Boating rescue • Cliff rescue • Open water sea rescue • River, lake or dam rescue • Surf rescue
Rescue equipment may include:	• Boards • Flotation equipment • Hand tools • Life rafts

© Commonwealth of Australia, 2025 Public Skills Australia

	• Lighting equipment • Rescue vessels • Ropes • Tubes • Winch
Personal protective equipment may include:	• Appropriate protective clothing • Ear protection • Helmet • Infection protection • Personal floating devices • Reflective vests • Respiratory protection • Safety glasses • Safety gloves • Sun protection • Wetsuits
Hazards may include:	• Adverse weather • Cliffs and rocks • Hazardous creatures • Hazardous materials • Insufficient light • Other craft and users • Pollution • Piers • Sandbanks, bars and rips • Sea conditions • Surf type
Environmental conditions may include:	• Effects of weather • Sea, surf and ocean conditions • Shallow water, bars and rips • Tides
Communication techniques may include:	• Non-verbal • Signs and signals • Touch • Verbal • Written
Operational documentation may include:	• Incident reports • Legislation • Organisational policies and procedures
Hygiene precautions may include:	• Avoiding contact with body fluids • Washing hands

PUASAR014A Operate and maintain a small powercraft and motor for rescue operations

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to maintain a small powercraft and motor, to operate a small powercraft and to direct crew during rescue operations.

This unit replaces PUASAR010B Undertake a rescue operation in a small powercraft.

No licensing, legislative, regulatory or certification reuirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers a range of open water rescue situations using small boats.

This unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations where surveillance and rescue operation in open water is required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare powercraft and motor for operations	1.1 ***Relevant logbooks*** are reviewed for previous ***operational feedback*** and pre-use information is completed in accordance with organisational requirements. 1.2 ***Pre-launch check of motor and fuel cell*** is completed and motor and fuel cell is installed on powercraft in accordance with organisational procedures and manufacturer's guidelines. 1.3 Crewperson is overseen in ***pre-launch checking of powercraft*** and ***ancillary equipment.*** 1.4 Own personal protective equipment (PPE) is applied or stowed as appropriate and application or stowing of PPE by crewperson is overseen. 1.5 Two way radio equipment is prepared for operational communications.
2 Transport powercraft to launch site	2.1 Powercraft is ***transported*** to launch site ensuring safe manual handling by crew and other support personnel. 2.2 Powercraft is unloaded and positioned at water's edge ready for operational activities in accordance with organisational procedures. 2.3 Safety brief is completed with crewperson and other team members.
3 Launch and operate powercraft through surf	3.1 Own level of competence and that of crewperson is reviewed in relation to ***surf conditions.*** 3.2 Powercraft is lead, lifted and dragged to water with crewperson. 3.3 Motor is started when appropriate and safe to do so. 3.4 Powercraft is boarded safely and a ***secure position*** is assumed.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.5 Crewperson is instructed to enter craft when appropriate in accordance with surf conditions.
	3.6 ***Instructions*** are communicated to crewperson as required.
4 Maintain a safe working environment for self and crew	4.1 Powercraft is operated safely around bathing public in accordance with prevailing surf conditions.
	4.2 Safe distances from bathing public and ***hazards*** in the water are maintained.
	4.3 Communication is maintained with shore and crewperson.
	4.4 Smooth and safe operational conditions of powercraft is maintained in accordance with prevailing surf conditions.
	4.5 ***Emergency procedures*** are implmented in accordance with organisational procedures.
	4.6 Powercraft is safely ***manoeuvred*** without operational motor.
5 Perform rescue and operational task	5.1 Requests for ***assistance***/***tasks*** from supervisor or ***communicator*** are acknowledged.
	5.2 Rescue/task information is communicated to crewperson.
	5.3 Operational tasks are safely performed in accordance with organisational policies and procedures.
	5.4 Crewperson is directed to retrieve casualty/object using appropriate ***retrieval techniques.***
6 Return powercraft to shore safely	6.1 Safety and security of powercraft, powercraft driver, crewperson and casualty/cargo for beaching is maintained.
	6.2 Permission to return to shore is signalled in accordance with organisational procedures.
	6.3 Observation for hazards is maintained.
	6.4 Craft is beached on shoreline with appropriate speed/direction.
	6.5 Casualty is lead/cargo is lifted and removed from powercraft.
	6.6 Safe position of craft is maintained in accordance with organisational procedures and operational readiness.
7 Recover and restore powercraft	7.1 Powercraft is transported to storage using safe manual handling techniques.
	7.2 ***Post-operational checks and maintenance of motor***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	are performed according to operational procedures and manufacturer's guidelines.
	7.3 Post-operational checks are supervised, powercraft is washed down and ancillary equipment is stored by crewperson.
	7.4 Powercraft and motor are stored in accordance with organisational requirements.
	7.5 Crewperson is debriefed and operational documentation is completed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively with colleagues
- handle boats confidently and safely (specifically when coming alongside and towing)
- lead crew
- safely handle casualty
- secure small boats using knots and lashings
- swim in the surf in moderate conditions
- use radio communication
- use rescue tubes
- use recognised signals

Required Knowledge

- basic motor faults and associated repairs such as:
  - restarting a motor after capsize
  - loose ignition leads
  - air in fuel cell and motor
  - loose components
- duties of a powercraft crewperson
- effects of wind, tide, swell and ocean floor on surf conditions
- features and signs of rips, gutters, sweeps and currents
- local hazards and environmental threats
- local operating procedures and organisational standards
- onboard fire drill
- organisational policies and procedures (such as relevant legislation; operational,

© Commonwealth of Australia, 2025 Public Skills Australia

corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- pre- and post-operational maintenance of powercraft and motor
- self-rescue techniques
- surf awareness including beach safety zones
- surf hazards
- surf survival techniques
- types of waves and their characteristic features

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • operate a powercraft during rescue operations in a range surf conditions **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated surf conditions.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed by completing rescue boat operations, exercises or scenarios. **Specific resources for assessment** Access is required to: • equipment used in rescue boat operations • open water • range of challenging surf conditions relevant to the area of operations
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of

	assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Relevant logbooks may include:	• Equipment service logs • Patrol/service logs • Powercraft operations logs
Operational feedback may include:	• Equipment damage • New or variations to hazards in the local environment • Operational readiness of equipment
Pre-launch checking of motor and fuel cell may include:	• Correct operation of cooling system • Efficient starting of motor • Engine cowling securely attached • Engine runs and idles satisfactorily • Ensuring sufficient fuel for proposed operation • No damage or leaking from fuel cell or hoses • Operation of forward and reverse gears • Propeller safety guard securely attached in accordance with organisational requirements • Propeller undamaged and securely attached
Pre-launch checking of powercraft may include:	• Checking handles and footstraps are secure • Checking pressure of inflatable pontoons • Ensuring all ancillary equipment is operational and correctly stowed • Ensuring no sharp areas • Ensuring no wear
Ancillary equipment may include:	• Knife • Paddles

© Commonwealth of Australia, 2025 Public Skills Australia

	• Rescue tube • Tow rope • Two way radio • Whistle
Transport may include:	• Carrying craft • Moving on a beach trolley • Towing with an ATV or 4WD
Surf conditions may include:	• Calm water • Choppy • Large surf • Plunging shorebreak • Small surf
Secure position includes:	• Grasping appropriate handles and placing feet in footstraps as required
Instructions may include:	• Moving fore or aft or leaning in or out of the powercraft to maintain trim • Performance of emergency procedures • Retrieval of casualty or object from the water
Hazards may include:	• Adverse weather • Choppy water surface condition • Large surf • Marine creature • People swimming • Rocks • Seaweed
Emergency procedures may include:	• Abandoning powercraft drill • Acting as an outrigger in the event of motor failure in the surf zone • Fire on board powercraft drill • Powercraft capsize drill
Manoeuvring powercraft without operational motor may include:	• Holding onto ropes while in the water to stabilise the craft and to avoid capsize • Surfing the powercraft to shore with operator and crew acting as outriggers • Swimming and repositioning the craft • Using paddles
Assistance/task may include:	• Aquatic event safety surveillance • Rescuing distressed swimmer, drowning casualty • Transporting equipment/supplies
Communicator may include:	• Club/service team member • Distressed swimmer

© Commonwealth of Australia, 2025 Public Skills Australia

Retrieval techniques may include:	• Member of the public • Radio operator • Leaving powercraft for a swimming rescue with a rescue tube • Reaching over the edge of the craft to haul casualty/object on board
Post-operational checks and maintenance of motor may include:	• Checking motor, propeller and propeller guard for damage and secure attachment • Correctly operating cooling system • Flushing motor • Refilling fuel cell • Running of motor

PUASAR015A Crew small powercraft in a rescue operation

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to act as crew under direction of a skilled operator in a small powercraft during a rescue in a surf/aquatic environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers a range of open water rescue situations crewing small boats.

The unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations where additional support on a powercraft is required during surveillance and rescue operations in surf/aquatic environment or open water.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare powercraft for operations	1.1 ***Relevant logbooks*** are reviewed for previous ***operational feedback*** and pre-use information is completed as directed by operator in accordance with organisational requirements. 1.2 ***Pre-launch checks*** to ensure operational readiness of craft and safety features are conducted at the direction of the operator in accordance with manufacturer's guidelines. 1.3 Prelaunch operational checks of ***auxiliary equipment*** are completed and equipment is stowed. 1.4 Personal protective equipment (PPE) is obtained, applied or stowed as required.
2. Assist operator to transport powercraft	2.1 Safe manual handling techniques are used to assist operator to ***transport*** powercraft to launch site. 2.2 Operator is assisted to unload and position powercraft at water's edge. 2.3 PPE is secured, checked and stored correctly in powercraft.
3. Launch and stabilise powercraft through surf aquatic environment	3.1 Own level of competence is conveyed to operator in relation to ***surf/aquatic environment conditions.*** 3.2 Powercraft is lifted and dragged into water as directed by operator. 3.3 Powercraft is secured and positioned as required for surf/aquatic environment conditions. 3.4 Powercraft is boarded safely on operator command and a ***secure position*** is assumed. 3.5 ***Position in powercraft*** is changed at operator's direction to assist with maintaining trim and negotiating surf/aquatic environment conditions. 3.6 Lookout for ***hazards*** in surf/aquatic environment is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	maintained and information concerning objects in the water is communicated to operator.
	3.7 Assistance with beaching and stabilising craft is provided on return to shore as directed by operator.
4. Participate in emergency drills	4.1 ***Emergency procedures*** are implemented safely as directed by operator.
	4.2 Assistance is provided with safe ***manoeuvring of powercraft without operational motor.***
5. Participate in rescue	5.1 Casualty/object is retrieved using appropriate ***retrieval techniques*** as directed by operator.
	5.2 ***Basic patient care*** of casualty is performed as required.
	5.3 Casualty/object is secured for return to shore.
	5.4 Casualty lift/object is removed from powercraft as directed by operator.
6. Assist with powercraft recovery and restore	6.1 Safe manual handling techniques are used to assist operator with transport of craft to storage.
	6.2 Powercraft is cleaned and stored in line with organisational procedures and as directed by operator.
	6.3 Ancillary equipment is cleaned and restowed in accordance with organisational requirements and as directed by operator.
	6.4 Operational documentation is completed as specified.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in the workplace
- complete required documentation
- constantly monitor hazards and apply safety principles
- crew boat confidently and safely
- rescue people and recover objects from the water
- safely handle casualty
- secure small boats using knots and lashings
- swim in the surf/aquatic environment in moderate conditions

© Commonwealth of Australia, 2025 Public Skills Australia

- use recognised signals
- use rescue tubes

Required Knowledge

- effects of wind, tide, swell and ocean floor on surf/aquatic environment conditions
- features and signs of rips, gutters, sweeps and currents
- local hazards and environmental threats
- local operating procedures and organisational standards
- organisational craft operating procedures
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- self-rescue techniques
- surf/aquatic environment awareness including beach safety zones
- surf/aquatic environment hazards
- surf/aquatic environment survival techniques
- types of waves and their characteristic features

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • perform a rescue • safely load and manoeuvre a vessel **Consistency in performance** Competency should be demonstrated over one or more exercises, scenarios or incidents to develop confident boat crewing.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed by completing rescue boat operations, exercises or scenarios. Exercises, simulations, or a series of tasks is required to demonstrate competence in this unit. This may involve setting scenarios to be completed by a rescue boat crew. Evidence may be supplemented by questioning during and after an exercise, scenario or incident, hypothetical questioning and written or oral descriptions, or discussions or feedback during a debriefing.

© Commonwealth of Australia, 2025 Public Skills Australia

	Specific resources for assessment Access is required to: • equipment used in rescue boat operations • open water • range of challenging surf/aquatic environment conditions relevant to the area of operations
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Relevant logbooks may include:	• Equipment service logs • Patrol/service logs • Powercraft operations logs
Operational feedback may include:	• Equipment damage • New or variations to hazards in the local environment • Operational readiness of equipment
Pre-launch checks may include:	• Checking handles and footstraps are secure • Checking pressure of inflatable pontoons • Ensuring no sharp areas • Ensuring no wear
Auxiliary equipment may	• Knife

include:	• Paddles • Rescue tube • Tow rope • Whistle
Transport may include:	• Carrying craft • Moving on a beach trolley • Towing with an ATV or 4WD
Surf/aquatic environment conditions may include:	• Calm water • Choppy • Large surf/aquatic environment • Plunging shorebreak • Small surf/aquatic environment
Secure position includes:	• Grasping appropriate handles and placing feet in footstraps as required
Position in powercraft may include:	• Crouching, standing when negotiating green or broken waves • Laying on bow to avoid capsize • Leaning in or out of craft to assist with turning • Sliding back in craft when negotiating waves on return to shore • Standard sitting position
Hazards may include:	• Adverse weather • Choppy water surface condition • Large surf/aquatic environment • Marine creature • People swimming • Rocks • Seaweed
Emergency procedures may include:	• Abandoning powercraft drill • Acting as an outrigger in the event of motor failure in the surf/aquatic environment zone • Fire on board powercraft drill • Powercraft capsize drill
Manoeuvring of powercraft without operational motor may include:	• Holding onto ropes while in the water to stabilise the craft and to avoid capsize • Surfing the powercraft to shore with operator and crew acting as outriggers • Swimming and repositioning the craft • Using paddles
Retrieval techniques may include:	• Leaving the powercraft for a swimming rescue with a rescue tube • Reaching over the edge of the craft to haul

© Commonwealth of Australia, 2025 Public Skills Australia

Basic patient care may include:	casualty/object on board • Maintaining open airway • Reassuring the patient • Supporting the patient on return to shore

PUASAR016A Operate and maintain a personal water craft for rescue operations

Modification History

Release	TP Version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release into TGA.

Unit Descriptor

This unit covers the competency required to operate and maintain a personal water craft (PWC) and to use PWC during aquatic rescue operations in surf or open water environments.

State maritime licensing requirements to operate a PWC apply to this unit.

Application of the Unit

The application of this unit in the workplace covers a range of open water rescue situations using PWC.

This unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations where surveillance and rescue operations in open water are undertaken.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for operations	1.1 ***Relevant logbooks*** are reviewed for previous ***operational feedback*** and pre-use information is completed in accordance with organisational requirements. 1.2 ***Pre-operational checks*** of PWC are completed in accordance with manufacturer's guidelines and organisational procedures. 1.3 ***Ancillary equipment*** is checked and securely stowed. 1.4 Personal protective equipment (PPE) is applied or stowed as appropriate. 1.5 PWC is ***transported*** to launching site and is launched according to manufacturer's guidelines and organisational procedures.
2. Receive task information	2.1 ***Task information*** received verbally or through ***communications system*** is acknowledged. 2.2 Personal capability to perform task based on ***surf conditions*** is evaluated prior to accepting task and this information is communicated to supervisor or ***communicator.***
3. Manoeuvre PWC according to surf conditions	3.1 PWC is operated safely according to surf conditions and within ***personal skills and limitations.*** 3.2 Local regulations and legislation relevant to the operation of personal water craft are followed. 3.3 Communication with ***operational base*** is maintained. 3.4 Personal protective equipment is worn correctly. 3.5 ***Emergency procedures*** are implemented.
4. Assess rescue scene	4.1 Risk analysis of rescue scene is undertaken and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	hazards are identified. 4.2 ***Rescue method*** suitable to the situation is selected. 4.3 Safe passage to and out of the rescue scenes is assessed.
5. Perform rescue	5.1 Safe passage to and out of the rescue scene is navigated. 5.2 Powercraft is positioned at rescue scene. 5.3 Casualty is retrieved safely and is secured in accordance with organisational processes. 5.4 Progress is communicated to operational base. 5.5 Casualty is handed over at ***designated point*** . 5.6 Casualty ***transfer*** is completed in accordance with organisational procedures.
6. Complete rescue operations and recovery requirements	6.1 PWC is recovered from launch site and is transported to storage. 6.2 ***Post-operational checks and maintenance*** are completed in accordance with manufacturer's instructions and organisational procedures. 6.3 Debriefing with supervisor or other operational staff is completed. 6.4 Relevant logbooks are completed according to organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- handle PWC confidently and safely
- read surf conditions
- rescue people safely
- swim in the surf in moderate conditions
- use radio communications
- use recognised signals

Required Knowledge

- effects of wind, tide, swell and ocean floor on surf conditions
- features and signs of rips, gutters, sweeps and currents
- organisational craft operational procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- search and rescue techniques
- self-rescue techniques
- surf awareness including beach safety zones
- surf hazards
- surf survival techniques
- types of waves and their characteristic features

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • safely operate a PWC during rescue operations in a range of surf conditions **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated surf conditions.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed by completing PWC operations, exercises or scenarios. **Specific resources for assessment** Access is required to: • equipment used in PWC rescue operations • open water • range of challenging surf conditions relevant to the area of operations
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or

© Commonwealth of Australia, 2025 Public Skills Australia

	in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Relevant logbooks may include:	• Eeuipment service logs • patrol/service logs, • powercraft operations logs
Operational feedback may include:	• equipment damage • new or variations to hazards in the local environment • operational readiness of equipment
Pre-operational checks may include:	• correct operation of cooling system • efficient starting of motor • engine seating securely attached • ensuring sufficient fuel for proposed operation
Ancillary equipment may include:	• flares • first aid kit • rescue handle • rescue sled • rescue tube • throw bag • two way radio
Transport may include:	• on beach/sand • on roads • towing with an ATV or 4WD
Task information may include:	• location of incident • support available • surveillance duty
Communications systems may include:	• mobile phone • pager • two-way radio networks

© Commonwealth of Australia, 2025 Public Skills Australia

Surf conditions may include:	• calm water • choppy • large surf • plunging shorebreak • small surf
Communicator:	• club/service team member • distressed swimmer • member of the public • radio operator
Personal skills and limitations	• experience in prevailing conditions • knowledge of local area • qualifications/licences held
Operational base may include	• communications centre • lifesaver/lifeguard patrol • service base
Emergency procedures may include	• capsize drill • fire on board drill • motor stopped
Hazards may include:	• adverse weather • choppy water surface condition • large surf • marine creature • people swimming • rocks • seaweed
Rescue methods may include:	• conscious casualty rescue • leaving powercraft for a swimming rescue with a rescue tube • reaching over the edge of the craft to haul casualty on board • unconscious casualty rescue • using a crew person during rescue
Designated point may include:	• shoreline • open water location suitable for transfer to another vessel
Casualty transfer may include:	• transfer to another vessel • transfer to land based team members for first aid • transfer to medical aid • transfer to shore
Post-operational checks and maintenance may include:	• correct operation of cooling system • flushing motor

© Commonwealth of Australia, 2025 Public Skills Australia

- refilling fuel
- running of motor

PUASAR017A Undertake advanced surf rescue

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release to TGA.

Unit Descriptor

This unit covers the competency required to perform advanced surf rescue in challenging surf conditions and without assistance from other team members.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers lifeguards/lifesavers working in a minimum team environment.

The unit is typically relevant for personnel from emergency services and/or volunteer organisations or organisations where a structured beach surveillance and rescue service is supplied.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUACOM001C Communicate in the workplace
PUASAR012C Apply surf awareness and self-rescue skills
PUASAR013A Participate in an aquatic rescue operation

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for surf rescue	1.1 ***Pre-use checks of equipment*** are undertaken. 1.2 ***Hazards*** to bathers are identified. 1.3 ***Equipment*** is placed in ***locations of most likely need.***
2. Perform surveillance duties	2.1 ***Location that gives the best view*** of the area of responsibility and ready access to equipment and water for response to casualties in distress is determined and maintained. 2.2 ***People who match the profile of high risk bathers*** are identified and close attention is paid to these people. 2.3 ***Identified methods to avoid fatigue*** are used while providing surveillance.
3. Respond to casualty/ies in distress	3.1 ***Casualty/ies in distress*** is recognised. 3.2 ***Operational command*** is notified of intention to perform rescue. 3.3 Conditions are assessed and ***rescue techniques and equipment*** are selected. 3.4 ***Challenging surf conditions*** are negotiated using sand bars and rip currents to reach the casualty/ies in an appropriate timeframe. 3.5 ***Defensive approach*** is used to ensure own safety with a conscious panicking casualty/ies. 3.6 On approach, conscious casualty/ies is/are reassured. 3.7 Unconscious casualty/ies is/are assessed for breathing and initial rescue breaths are performed as required. 3.8 Casualty/ies is/are ***secured*** in accordance with organisational procedures and available equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Return casualty/ies to shore	4.1 Prevailing surf conditions are assessed and ***safe return to shore is navigated*** in accordance with organisational procedures. 4.2 Conscious casualty/ies is/are assessed for first aid requirements or medical care and is managed. 4.3 Unconscious casualty/ies is/are dragged unaided above the high water line using ***approved techniques.*** 4.4 Unconscious casualty/ies is/are ***lowered using approved techniques*** and assessed for signs of life and patient care required. 4.5 Operational command is notified that casualty/ies has/have been retrieved and of any ***further assistance required.*** 4.6 ***First aid and patient care*** is provided to casualty/ies until ***further aid*** arrives. 4.7 Casualty/ies is/are handed over with incident details, treatment provided and current condition.
5. Recover and restore equipment to operational readiness	5.1 Debrief is participated in and reports are completed according to organisational procedures. 5.2 ***Post-operational checks and maintenance of equipment*** are performed. 5.3 Any damage is reported according to organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively with colleagues and stakeholders
- display fitness and strength via a mission or fitness test such as that defined by the Surf Life Saving Gold Medallion
- identify rip currents
- identify wave types
- paddle a rescue board in challenging surf conditions and in choppy conditions
- perform a board rescue 200 metres out at sea and return
- perform a tube rescue 100 metres out at sea and return
- self-rescue in a surf environment
- swim in challenging surf conditions and in choppy conditions

© Commonwealth of Australia, 2025 Public Skills Australia

- use perceptual skills to provide beach surveillance

Required Knowledge

- beach types and hazard ratings as described in the Australian Beach Safety and Management Program (ABSAMP)
- escape techniques from a panicking casualty/ies
- factors defining an appropriate timeframe such as:
  - availability of rip currents to use in proceeding out to sea
  - consideration of the distance to the casualty/ies
  - equipment available
  - lulls between sets of waves
  - size of surf
  - time between waves
- first aid techniques and standards
- hazards of the surf beach environment
- organisational procedures relating to rescue and recovery
- organisational procedures for maintaining equipment in terms of environmental management and sustainability
- roles of lifesavers, lifeguards and other personnel during major aquatic emergencies
- signals for communication between team members on the shore and in the water
- types of water rescue equipment for advanced water rescues

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • perform a tube rescue 100 metres out at sea and return to shore • perform a board rescue 200 metres out at sea and return to shore • manage a surf rescue unaided, from identification of casualty/ies through to handover • perform a complex surf rescue with multiple casualties • display the fitness and strength to perform multiple rescues in close succession (such as that defined by the Surf Life Saving Gold Medallion) **Consistency in performance**

© Commonwealth of Australia, 2025 Public Skills Australia

	Competency should be demonstrated using both rescue boards and rescue tubes in a range of actual surf conditions.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed by performing actual or simulated rescues at a surf beach. **Specific resources for assessment** Access is required to: • rescue equipment used in the workplace • surf beach
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Pre-use checks of equipment may include:	• checking clip on rescue tube for correct operation • checking fibreglass rescue boards for cracks and sharp edges • checking rescue tubes for fraying of ropes and straps • checking straps on rescue boards are securely attached
Hazards may include:	• hazards associated with different wave types

© Commonwealth of Australia, 2025 Public Skills Australia

	• inshore holes • littoral currents • marine creatures • rip currents
Equipment may include:	• automated external defibrillator • first aid kit • oxygen resuscitation equipment • rescue board • rescue tube
Locations of most likely need may include:	• central location for first aid and resuscitation equipment • popular swimming locations • start of rip currents
Location that gives the best view may include:	• minimising sun glare • moving to counteract interference by beach users in ground level surveillance • raised tower • unobstructed by public or lifesaving equipment
People who match the profile of high risk bathers may include:	• inappropriately dressed for surf bathing • older people • people who are intoxicated • people who are overweight • tourists • young children
Identified methods to avoid fatigue may include:	• momentarily focusing on the horizon or a distant object • not staring fixedly for long periods at one thing • regular breaks
Casualty/ies in distress may include:	• attempting to swim to shore with little or no progress • calling for assistance • facing towards shore looking for help • fearful look on casualty's face • head titled back • upright body position • waving arms • vigorous arm movements in an attempt to raise head above water
Operational command may include:	• local supervisor • remote communications centre
Appropriate rescue techniques and equipment	• rescue using rescue board • rescue using rescue tube

© Commonwealth of Australia, 2025 Public Skills Australia

may include:	
Challenging surf conditions may include:	• choppy conditions due to wind • surf greater than 1.5 metres
Defensive approach may include:	• placing rescue device between rescuer and casualty • stopping a safe distance from the casualty while assessing their mental state • using legs or arms as a barrier
Securing the casualty/ies may include:	• assisting conscious casualty onto rescue board • clipping tube around casualty (conscious or unconscious) • putting exhausted/unconscious casualty on board using board rolling techniques
Navigating safe return to shore may include:	• avoiding rip currents on the return to shore • using broken waves to return to shore • waiting for a lull between sets to avoid large breaking waves
Approved techniques for dragging a casualty/ies unaided may include:	• best technique for personal safety • maintaining an open airway of an unconscious casualty • organisational procedures
Lowering a casualty/ies using approved techniques may include:	• best technique for personal safety • maintaining an open airway of an unconscious casualty • organisational procedures
Further assistance required may include:	• paramedics • supervisors to assist with managing major incidents • support from team members
First aid and patient care may include:	• treatment according to Australian Resuscitation Council Guidelines
Arrival of further aid may include:	• paramedics • team members
Post-operational checks and maintenance of equipment may include:	• checking for damage • ensuring all attachment points are secure • washing of salt and sand

PUASAR018A Select and maintain canines to be part of a canine search team for USAR incidents

Modification History

Release	TP Version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to select canines to be part of a canine search team for urban search and rescue (USAR) incidents, to maintain the health and welfare of canines, to provide daily care to canines and to plan search and rescue training for search canines.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to canine search specialists responsible for developing a canine search team for USAR incidents.

A canine search team consists of one disaster search canine and one canine search specialist.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess canines for USAR work	1.1 ***Criteria*** for canines to work in a USAR environment are determined. 1.2 Canines are observed and assessed in relation to determined criteria. 1.3 Canines assessed as meeting determined criteria are selected to be part of canine search team.
2. Maintain search canine health	2.1 ***Basic symptoms of ill health*** or injury in search canines are identified. 2.2 ***Local authorities*** who can be consulted about the establishment or maintenance of search canine health are identified. 2.3 ***Program of health maintenance*** to prevent common illnesses or parasites is implemented. 2.4 ***Treatment program*** for ill or injured search canine is followed as required. 2.5 Basic first aid for ill or injured search canines is administered. 2.6 Basic first aid kit suitable for treating injured search canines is maintained.
3. Manage search canine hygiene and welfare	3.1 Living environment, training areas and search canine transportation are maintained according to animal health and welfare requirements, standards and regulations. 3.2 Health, welfare and fitness of search canines is maintained for USAR operational and environmental conditions. 3.3 Healthy diet is maintained for search canines based upon individual animal's requirements. 3.4 Need to retire a search canine is assessed and recommended in accordance with ***specialist advice*** and/or animal health and welfare standards.
4. Maintain records of search canine health and	4.1 Vaccination and other preventative ***health records*** for search canine are established and maintained

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
welfare	accordance with the Australian Urban Search&Rescue Canine Capability Best Practice Guideline. 4.2 Health, treatment and injury records for search canines are established and maintained. 4.3 Decisions to retire search canines are recorded. 4.4 ***Organisational policies and procedures*** for recording and reporting incidents that result in injuries to search canines are followed.
5. Develop and implement a training plan	5.1 ***Training needs*** of canine search team are identified and assessed. 5.2 ***Training plan*** that addresses the needs, strengths, weakness of the canine search team is developed. 5.3 Training plan is reviewed and amended as necessary to reflect the changing needs of canine search team. 5.4 Training equipment is maintained. 5.5 Progress of canine search team is recorded and reported on.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- administer preventative or curative medicines and treatments to canines
- apply basic first aid techniques to canines
- collect, analyse and organise information to produce records and reports required by the organisation and animal welfare authorities
- interpret the actions and indications given by a canine
- maintain living environment, training areas and canines to the required standard of hygiene
- monitor diet and exercise regimes to maintain the health and welfare of canines
- recognise basic symptoms of ill health and injury in canines
- solve problems to deal with safety risks
- work independently and in teams to manage the hygiene and welfare of canines

Required Knowledge

- anatomy and signs of health/ill health and injury of canines
- animal health and welfare requirements and regulations affecting working canines
- Australian Urban Search&Rescue Canine Capability Best Practice Guideline

© Commonwealth of Australia, 2025 Public Skills Australia

- basic first aid techniques that can be used to treat injured canines
- canine anatomy
- canine developmental stages
- canine grooming requirements
- capabilities of canines working within a USAR environment
- common illnesses, diseases, parasites and other causes of ill-health or injury affecting working canines
- dietary and exercise requirements of working canines
- location of veterinarians and other authorities who can assist in the maintenance of the health and welfare of canines
- organisational policies and procedures regarding the health and welfare of canines within the organisation where applicable
- physiology of canines
- preventative measures for controlling illnesses and parasites that can affect canines
- procedures for acquiring canines
- psychology and behaviour of canines
- records and reports required by state, territory and local authorities, the organisation and animal welfare authorities
- restricted canine breeds
- typical characteristics and temperaments of various breeds of canines that are suited to working within the USAR environment
- work environment in which canines could be deployed and emergencies that could arise within those environments

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • constantly observe and monitor search canines in relation to their continued ability to work in a USAR environment • provide recommendations on the health and welfare of search canines deployed in USAR incidents **Consistency in performance** Competency should be demonstrated over time under a range of conditions that would be expected in the workplace.
Context of and specific	**Context of assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

resources for assessment	Competency should be assessed in the workplace and/or in a simulated workplace environment. **Specific resources for assessment** Access is required to: • Australian Urban Search&Rescue Canine Capability Best Practice Guideline • canines training to work in a USAR environment • search canines • legislation, policy, procedures and guidelines relating to the health and welfare of canines
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment according to the workplace environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Criteria must include:	• desired characteristics • desired habits • desired physical attributes • individual traits
Desired characteristics should include:	• adapting readily to new situations, canine search specialists and environment • being alert and positively watchful of surroundings • being bold and willing to accept new challenges

© Commonwealth of Australia, 2025 Public Skills Australia

	with confidence • being responsive to petting and praise from strangers in a non-aggressive manner • being sociable • demonstrating an even temperament • exhibiting high levels of inquisitiveness • having a high level of self-confidence • having strong prey or play drive • possessing high intelligence • responding to other canines in a non-aggressive manner • showing a strong desire to explore the environment and odours
Desired physical attributes should include:	• bright, clear eyes with pink surrounding membranes • body suitably structured to work in a USAR environment • clear of any parasitic infestations that cannot be treated • ears that are clean and without foul odour or discharge • feet that have all toes, solid whole pads and no overlong claws • healthy, shiny coat with no bare patches etc. • limbs/hips without signs of arthritis or dysplasia in the joints • mouth containing pink gums, complete set of white teeth and no foul odour • producing stools that are firm and moist, not sloppy • wet nose without discolouration, scales or discharge
Basic symptoms of ill health may include:	• aggression • dry nose • dull eyes • excessive barking • excessive drinking • excessive drooling • frothing at mouth • kennel cough • lameness • lethargy • signs of pain • stress/anxiety/depression
Local authorities may include:	• animal welfare associations • local government authorities

© Commonwealth of Australia, 2025 Public Skills Australia

	• local veterinarians • Royal Society for the Prevention of Cruelty to Animals (RSPCA)

Program of health maintenance must include:	• Daily health checks including:
	  • general demeanour
	  • main body parts
	  • maintaining hygienic environment
	  • nose, eyes, ears, mouth, teeth, skin/coat, genitals/orifices, mucous membranes, feet/limbs/nails
	  • obvious injury
	  • passing of urine/faeces
	  • posture and gait
	  • presence of fleas or ticks
	  • specific individual canine requirements
	  • state of body coat and body condition
	• annual veterinary checks

Treatment program can vary according to:	• cause of the symptoms, illness or injury • dosage matched to weight of canine • methods to be administered (e.g. in food, pill popper, applied to back of neck, injections, canine chew etc.) • physical form of the treatment to be administered (e.g. tablet, liquids, wash, decontamination etc.) • symptoms exhibited by the canine
Specialist advice may include:	• canine trainers • jurisdictional canine focal points • veterinarians
Health records must include:	• incident responses • organisational and state/territory or local authority, animal welfare legislative requirements • treatment programs for preventative or curative health regimes • vaccinations
Organisational policies and procedures may include:	• Australian Urban Search & Rescue Canine Capability Best Practice Guideline • enabling legislation • national and regional policies and procedures • organisational policies and procedures, particularly those relating to the health and welfare of canines within the organisation • organisation's approach to environmental

© Commonwealth of Australia, 2025 Public Skills Australia

	management and sustainability • procedural guides, standard operating procedures, work instructions • workplace health and safety acts, regulations and guidelines
Training needs may include:	• ability of canine search specialist to identify and respond to indicators • access to situations where search canine can be deployed for USAR work • age of canine • behavioural drives influencing the canine • degree of bonding between canine and canine search specialist • characteristics exhibited by the canine • experience, commitment and knowledge of canine search specialist • frequency of training • health and welfare status of canine • length of time required by canine to acquire new skills • level of canine enthusiasm for detecting live human scent • level of training/experience • temperament of canine

Training plan must include:	• consideration of environmental factors
	• planned set of exercises to:
	  • develop and enhance canine response and control capabilities
	  • maintain health and safety during work
	  • maintain canine motivation
	• outline of the strategies and timeline for the progressive development of the canine search team

PUASAR019A Train canines to work in a USAR environment

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to acclimatise canines to work within an urban search and rescue (USAR) environment, develop the canine's ability to detect live human scent and to indicate live human scent with alert behaviours.

This unit also covers the competency required to manage training assistants in a simulated USAR environment for the purposes of training canines.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to canine search specialists responsible for developing a search canine to be part of a USAR canine search team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the	Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work in a USAR environment	1.1 Risk assessment of the USAR environment is undertaken. 1.2 ***Personal protective clothing and equipment*** appropriate for the USAR environment is selected and worn. 1.3 ***Principles and procedures for working safely in a USAR environment*** are implemented.
2. Introduce canines to a USAR environment	2.1 ***Incremental approach*** is followed to introduce canines to a USAR environment. 2.2 ***Problems*** that may develop with canines being introduced to a USAR environment are identified and solved within area of own responsibility. 2.3 Problems outside area of own responsibility are referred to appropriate person for action and recommendations are made where appropriate.
3. Prepare canines for detection of live human scent	3.1 ***Scent factors*** that limit the capability of canines to function efficiently are identified. 3.2 Canine ***behaviour and responses*** are interpreted and action is taken. 3.3 Interaction with canines is undertaken to maintain an enthusiastic, effective and appropriate level of work and behaviour in required locations. 3.4 Canines are deployed to detect live human scent in a ***range of areas and situations.***
4. Develop alert behaviour in canines	4.1 ***Training tools and techniques*** are used to shape the desired ***bark alert behaviour.*** 4.2 Problems encountered in bark alert training are diagnosed and solved.
5. Train canine using appropriate methods	5.1 Humane ways of training are used that reflect positive reinforcement techniques. 5.2 ***Canine psychology and drives*** are applied in training canine.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	5.3 Appropriate ***degree of correction*** is used to discourage unwanted behaviour. 5.4 Canines involved in training are handled and controlled in a way that maintains performance and safety.
6. Manage training assistants	6.1 Training assistant is selected ***appropriate*** to the training exercise. 6.2 Training assistant is ***briefed*** and informed of the outcomes of the exercise. 6.3 Job safety analysis is provided to training assistant. 6.4 ***Safety and welfare*** of training assistants is maintained at all time. 6.5 Problems encountered with training assistants are diagnosed and solved.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- conduct job safety analysis
- control search canine off lead
- identify safety risks
- interpret the actions given by a search canine
- make decisions
- solve problems to deal with safety risks
- work with search canine in a variety of disasters

Required Knowledge

- Australian Urban Search&Rescue Canine Capability Best Practice Guideline
- factors affecting the location of human scent including differences in surfaces, pollution and environmental factors
- factors affecting scenting ability of search canine
- how environmental factors can affect scent
- how scent movement will affect search strategy
- how the physical conditions and hazards will affect training strategies
- how to introduce canines to disaster sites
- importance of exposing canines to varied disaster scenarios
- requirement for safe work practices in disaster sites

© Commonwealth of Australia, 2025 Public Skills Australia

- risks associated with disaster sites
- scent theory
- selection and use of personal protective equipment
- scent movement in a disaster site
- training tools and techniques appropriate to alert behaviour

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • work as part of a team **Consistency in performance** Competency should be demonstrated over time under a range of conditions that would be expected in the workplace.
Context of and specific resources for assessment	**Context of assessment** Competency must be assessed in a controlled, simulated workplace environment. **Specific resources for assessment** Access is required to: • Australian Urban Search&Rescue Canine Capability Best Practice Guideline • canines training to work in a USAR environment • legislation, policy, procedures and guidelines relating to the health and welfare of canines • training assistants
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment according to the workplace environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment.

© Commonwealth of Australia, 2025 Public Skills Australia

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Personal protective clothing and equipment must include:	• ear protection • elbow pads • eye protection • gloves • helmet • knee pads • lighting (if required) • full length clothing (i.e. long sleeve shirt, pant, overall) • safety boots • whistle
Principles and procedures for working safely in a USAR environment must include:	• confined space entry • evacuation signals • job safety analysis • three points of contact • weather conditions
Incremental approach may include:	• distraction training • exposure to given environment • motivational reward • positive reward • step by step exposure
Problems may include:	• failure to alert • lacks penetration drive • lacks prey/play drive • leaves victim location
Scent factors may include:	• animals • biological material • clothing

© Commonwealth of Australia, 2025 Public Skills Australia

	• cold • condition of victim • elevation • food • hazardous material • heat • hot scent • machinery • rubble pile lay out • surfaces • time of day • water • wind
Behaviour and responses may include:	• anxiety • barking • body language • digging • eagerness • false alert • fear • following scent cone • over enthusiastic • passive alert • pawing • scratching • stress • whinging
Range of areas and situations may include:	• buildings • collapsed building rural • collapsed building urban • explosions • fires • floods • landslides
Training tools and techniques may include:	• alert hole lid • assistant • bark box • clicker • food • positive reinforcement • toy • whistle

© Commonwealth of Australia, 2025 Public Skills Australia

Bark alert behaviour includes:	• spontaneous repetitive barking for twenty seconds, which may be interspersed with digging and attempts to penetrate
Canine psychology and drives may include:	• defensive-response to protect itself from a perceived threat • food-desire to get food • frustration and opposition reflex • hunt-intensity in searching without a visual cue • instinctual behaviours and motivations exhibited by the canine • operant and classical conditioning • pack-desire to work within framework of the pack • play-desire to actively entertain itself with any object • prey-intensity in chasing, catching, biting, carrying
Degree of correction must include:	• appropriate action administered to a canine of an intensity appropriate to behaviour modification • use of correction devices in accordance with state/territory regulations
Appropriate training assistant characteristics may include:	• fitness level appropriate to the task • no known phobias specific to environment • physical characteristics appropriate to task • willingness to follow instructions
Briefing may include:	• canine level of training • communication techniques • how to interact with the canine • likely problems and solutions • outcomes of exercise
Safety and welfare include:	• 'No duff' or 'casreal' procedure • comfort • evacuation plan • hydration • job safety analysis • timings

PUASAR020A Develop a canine search team for USAR incidents

Modification History

Release	TP Version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to prepare a canine search team to search for and locate people concealed in a structural collapse, and to manage the canine during the search.

The types of incidents that may require the skills and knowledge of an urban search and rescue (USAR) canine search team working as a member of a USAR task force include earthquake, terrorist incident, aircraft crash, disaster or major structural collapse.

A canine search team consists of one disaster search canine and one canine search specialist.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to people actively involved in and/or training as a canine search specialist for USAR incidents and disaster operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR018A Select and maintain canines to be part of a canine search team for USAR incidents
PUASAR019A Train canines to work in a USAR environment
PUASAR023A Participate in an urban search and rescue Category 1

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain canine obedience	1.1 ***Basic obedience*** is demonstrated by canine and canine search specialist while canine is heeling off lead. 1.2 ***Emergency stop*** with ***recall*** is performed by canine and canine search specialist. 1.3 At the direction of the canine search specialist, a down stay is performed by canine while under ***distraction.*** 1.4 Canine tasks are performed without demonstrating aggressive behaviour towards people. 1.5 Canine tasks are performed without demonstrating aggressive behaviour towards other animals.
2. Demonstrate canine agility	2.1 Under canine search specialist's direction, ***agility course*** is completed by canine within ***required timeframe.*** 2.2 Under canine search specialist's direction, turn on an elevated plank is performed by canine. 2.3 Agility course is negotiated by canine and canine search specialist in a ***controlled***, ***safe and appropriate manner.***
3. Maintain direction and control	3.1 Canine is directed to required ***elevation***, direction commands are followed by canine and elevation is jumped on by canine as directed by canine search specialist. 3.2 Elevation is sustained by canine for a minimum of five seconds and until directed by canine search specialist. 3.3 Direction and control course is negotiated by canine and canine search specialist within required timeframe.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.4 Ability to work at a ***distance*** from canine search specialist is demonstrated by canine.
4. Develop canine to indicate live human scent	4.1 Location of and ***commitment to live human scent*** is demonstrated by canine. 4.2 Alert exercise is undertaken by canine and canine search specialist within required timeframe and location of live human scent is correctly indicated by canine with a ***bark alert.***
5. Manage canine in a search to locate victims	5.1 Australian Urban Search & Rescue Canine Capability Best Practice Guideline is followed. 5.2 ***Interviews*** and ***site assessment*** are conducted to establish an appropriate ***search strategy.*** 5.3 Canine is deployed off lead and appropriate ***actions***, ***indications and characteristics*** are used to ensure search area is covered effectively. 5.4 Control of canine is maintained at all times and ***assistance*** is provided where appropriate. 5.5 Adjustments are made to search strategy where appropriate in accordance with any changes in environmental conditions, search progress, any other relevant information that becomes available and current rescue work being undertaken. 5.6 Location of live human scent is correctly indicated by canine with a bark alert during a search on a simulated collapse site. 5.7 Canine actions, indications and characteristics are interpreted correctly to identify the presence of live human scent. 5.8 Location of live human scent is correctly interpreted 5.9 ***Appropriate care***/safety/welfare for the canine and self is followed in accordance with relevant ***legislation***, ***policy and guidelines.*** 5.10 Search area is covered within required timeframe. 5.11 ***Post-search examination*** of canine is conducted.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills

- adjust handling strategies in response to changing environments
- adjust search strategies in response to changing environments
- carry out and interpret verbal instructions
- collect, analyse and organise information to develop an effective search strategy
- control a canine off lead including in public locations
- demonstrate appropriate commands when handling a canine
- handle a canine to maintain control and prevent accidents or injury to self and/or other/s including members of the public
- interpret the actions and indications given by a canine
- make sound decisions in rapidly changing and often high risk environments
- maintain physical fitness
- manage time and priorities in response to changing environments
- work with other canine search teams

Required Knowledge

- alert behaviours of canines and their causes such as the bark alert (spontaneous repetitive barking for twenty seconds barking, which may be interspersed with digging and attempts to penetrate)
- Australian Urban Search&Rescue Canine Capability Best Practice Guideline
- canine olfactory system
- capabilities of canines working within USAR operations
- canine behaviour
- canine physiology
- canine psychology
- factors used to determine appropriate search strategies
- organisational occupational health and safety (OH&S) legislation as it applies to USAR
- organisational task force policies and procedures
- principles of canine training including control, association, repetition, commands, rewards, correction and positive motivational methodologies
- principles of training a canine for obedience and agility
- risk analysis
- safe working systems to reduce canine related incidents
- scent theory and its application to the USAR environment such as commitment to live human scent (very good penetration drive, being committed to the scent, not leaving victim location)
- USAR canine search methods and techniques

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • construct direction and control course as per the requirements of the Australian Urban Search&Rescue Canine Capability Best Practice Guideline • follow the Australian Urban Search&Rescue Canine Capability Best Practice Guideline • implement USAR canine search methods and techniques • conduct a search of one search area • handle a canine to maintain control and prevent accidents or injury to self and/or other/s including members of the public **Consistency in performance** Competency should be demonstrated over time under a range of conditions that would be expected in the workplace.
Context of and specific resources for assessment	**Context of assessment** Competency must be assessed in a controlled, simulated workplace environment. **Specific resources for assessment** Access is required to: • Australian Urban Search&Rescue Canine Capability Best Practice Guideline • facilities as outlined in the Australian Urban Search&Rescue Canine Capability Best Practice Guideline • canines training to work in a USAR environment • two assessors
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of

© Commonwealth of Australia, 2025 Public Skills Australia

	assessment according to the workplace environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Basic obedience must include:	• about turn • change of pace (normal pace, fast pace, slow pace) • drop • halt • heel off/on lead • left turn • right turn • sit
Emergency stop must include:	• canine responding quickly upon the stop command from the canine search specialist, slowing to a stop position • position in which canine stops after being given the emergency stop command is suggested to be the down position
Recall must include:	• canine quickly returning to canine search specialist and sitting in front of canine search specialist until released
Distractions may include:	• banging pot lids • clapping hands • noises such as talking • walking past in front or behind canine
Agility course must include:	• climbing • elevated plank • tunnel • unpleasant surface

© Commonwealth of Australia, 2025 Public Skills Australia

	• unstable surface • and must be constructed as per the requirements of the *Australian Urban Search & Rescue Canine Capability Best Practice Guideline* (canine search specialist can remain in close proximity to canine but must not go in front of canine)
Required timeframe includes completing:	• agility course within five minutes • alert exercise within two minutes from release of canine to the commencement of the bark alert • canine direction and control course within five minutes • simulated search within 20 minutes
Controlled, safe and appropriate manner may include:	• canine search team being confident, calm and methodical • canine working off lead • managing canine in unsafe and high risk environments • working in accordance with relevant legislation, policy and guidelines
Elevation is defined in:	• Australian Urban Search and Rescue Canine Capability Best Practice Guideline
Distance is defined as:	• between 20 and 25 metres
Commitment to live human scent includes:	• commitment to the scent • not leaving victim location • very good penetration drive
Directions may include:	• back • centre/Middle • forward • left • right
Bark alert includes:	• spontaneous repetitive barking for twenty seconds, which may be interspersed with digging and attempts to penetrate
Interviews must include questions that determine:	• definition of search area • time of the structural collapse • type of occupancy of the structure (school, office, apartment, building, etc.) • number of suspected missing • if structure has been searched before • if structural engineer has checked the building and findings • if structure is safe to enter • if blueprints are available

© Commonwealth of Australia, 2025 Public Skills Australia

	• if HAZMAT has checked the area and findings • if utilities have been isolated, how and by whom • if heavy rescue is available • if medical is available • if a veterinarian is available
Site assessment techniques may include:	• identifying any exclusion zones • identifying hazards • incident action plan • prevailing wind and weather conditions • results of initial reconnaissance

Search strategy must include:	• delineation of primary and secondary search areas based on:
	  • information gathered from interview/s
	  • site assessment

Canine actions, indications and characteristics must include:	• ability to handle any distractions that may occur • ability to work scent cones • canine does not avoid obstacles • canine identifies live human scent with a bark alert • canine searches independently of canine search specialist • canine traverses all surfaces efficiently • canine covers search site as directed • high levels of search drive/eagerness/willingness to work
Canine actions indications and characteristics may include:	• false alert • passive alert behaviours
Assistance may include:	• assisting canine to traverse difficult obstacles • guiding canine • helping canine onto unstable elevated surfaces • intervening to prevent accident or injury to canine • providing motivation and support where necessary, however during an alert, support and motivation can only be provided after the canine has initiated the bark alert • stopping and restarting the search • taking appropriate breaks, rest and water
Appropriate canine care may include:	• checking condition of feet pads • fatigue management • irrigating canine's eyes to remove dust • treatment as required • watering of canine as required

© Commonwealth of Australia, 2025 Public Skills Australia

Legislation, policy and guidelines may include:	• Australian Standards • Australian Urban Search & Rescue Canine Capability Best Practice Guideline • guidance notes • national codes of practice • organisational policies and procedures • state/territory and federal animal welfare legislation • state/territory occupational health, safety and welfare legislation and regulations

Post-search examination must include:	• examining:
	  • ears
	  • eyes
	  • legs
	  • mouth
	  • nails and bones of the foot of the canine
	  • pads
	  • toes
	  • webbing between toes

PUASAR021A Search as part of a canine search team at USAR incidents

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to deploy a canine search team to search for and locate multiple people concealed in a structural collapse, and to manage the canine during the search.

A canine search team consists of one disaster search canine and one canine search specialist.

The canine search team must be capable of working together in disaster search operations to locate victims. The canine must be capable of searching independently and efficiently, as directed by the canine search specialist.

The types of incidents that may require the skills and knowledge of an urban search and rescue (USAR) canine search team working as a member of a USAR task force include earthquake, terrorist incident, aircraft crash, disaster or major structural collapse.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to canine search specialists intending to work with task forces actively involved in USAR incidents and disaster operations.

This unit has been aligned to the basic operational level of the Australian USAR Canine Capability Operational Framework as outlined in the *Australian Urban Search and Rescue Canine Capability Best Practice Guideline*; canine search teams seeking accreditation as operational task force members under this framework should refer to the guideline and not rely only on the information contained in this unit of competency.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR020A Develop a canine search team for USAR incidents

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for search	1.1 ***Interviews*** and ***site assessment*** are conducted to establish an appropriate ***search strategy.***
	1.2 ***Risks*** contained in the search area are identified and assessed, and appropriate safety procedures are implemented.
	1.3 Adjustments are made where appropriate to search strategy in accordance with any changes in ***environmental conditions***, search progress, any other relevant information that becomes available and current rescue work being undertaken.
2. Handle and control canine	2.1 Work is undertaken with canine in a ***safe and appropriate manner.***
	2.2 Control of canine is ***maintained*** at all times.
	2.3 Willingness to ***work independently*** is demonstrated by canine.
	2.4 Commands are responded to by canine in the presence of ***distractions.***
	2.5 ***Assistance*** is provided to canine where appropriate.
3. Conduct search	3.1 Canine is deployed off lead and appropriate ***actions***, ***indications and characteristics*** to ensure search area

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	is covered effectively are demonstrated by canine. 3.2 Location of and commitment to live human scent is demonstrated by canine. 3.3 Location of live human scent with a bark alert is ***correctly indicated*** by canine during a search on a simulated collapse site. 3.4 Actions, indications and characteristics of the canine to correctly identify the presence of live human scent are correctly interpreted. 3.5 Location of live human scent is correctly interpreted by canine search specialist. 3.6 Search areas are covered within ***required timeframe.***
4. Provide search debriefing	4.1 ***Relevant information*** is recorded accurately in accordance with legislative and jurisdictional requirements. 4.2 ***Sketch of search area*** is provided on completion of search. 4.3 ***Recommendations*** are provided to ***relevant personnel*** on completion of the search.
5. Maintain canine welfare and safety	5.1 Appropriate care/safety/welfare for the canine and self is demonstrated in accordance with relevant ***legislation***, ***policy and guidelines.*** 5.2 ***Basic care*** of canine is implemented.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- adjust handling strategies in response to changing environments
- adjust search strategies in response to changing environments
- carry out and interpret verbal instructions
- collect, analyse and organise information to develop an effective search strategy
- control a canine off lead including in public locations
- demonstrate appropriate commands when handling a canine
- handle a canine to maintain control and prevent accidents or injury to self and/or other/s including members of the public
- interpret the actions and indications given by a canine
- maintain physical fitness

© Commonwealth of Australia, 2025 Public Skills Australia

- make sound decisions in rapidly changing and often high risk environments
- manage time and priorities in response to changing environments
- work with other canine search teams

Required Knowledge

- alert behaviours of canines and their causes such as the bark alert (spontaneous repetitive barking for twenty seconds barking, which may be interspersed with digging and attempts to penetrate)
- Australian Urban Search&Rescue Canine Capability Best Practice Guideline
- biological and infectious hazards and safe management, particularly involving human remains
- canine olfactory system
- capabilities of canines working within USAR operations
- disaster victim identification principles and phases of operation
- canine behaviour
- canine physiology
- canine psychology
- factors used to determine appropriate search strategies
- INSARAG structural and victim marking systems
- organisational occupational health and safety (OH&S) legislation as it applies to urban search and rescue
- organisational task force policies and procedures
- principles of canine training including control, association, repetition, commands, rewards, correction and positive motivational methodologies
- risk analysis
- safe working systems to reduce canine related incidents
- scent theory and its application to the USAR environment such as commitment to live human scent (very good penetration drive, being committed to the scent, not leaving victim location)
- USAR canine search methods and techniques

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • follow the Australian Urban Search&Rescue Canine Capability Best Practice Guideline • implement USAR canine search methods and techniques

© Commonwealth of Australia, 2025 Public Skills Australia

	• handle a canine to maintain control and prevent accidents or injury to self and/or other/s including members of the public • apply emergency first aid techniques for canines • only accompanying the canine on the rubble pile when find is indicated or when directed by the assessor • conduct four searches within a 24 hour period; two searches must be conducted consecutively **Consistency in performance** Competency should be demonstrated over time under a range of conditions that would be expected in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Interviews must include questions that determine:	• time of the structural collapse • type of occupancy of the structure (school, office, apartment, building, etc.) • number of suspected missing • if structure has been searched before • if structural engineer has checked the building and findings • if structure is safe to enter • if blueprints are available • if HAZMAT has checked the area and findings • if utilities have been isolated, how and by whom • if heavy rescue is available • if medical is available • if a veterinarian is available
Site assessment techniques may include:	• identifying any exclusion zones • identifying hazards • incident action plan • prevailing wind and weather conditions • results of initial reconnaissance
Search strategy must include:	• delineation of primary and secondary search areas based on:

© Commonwealth of Australia, 2025 Public Skills Australia

	• information gathered from interview/s • site assessment
Risks may include:	• climatic conditions • distractions • lighting • other animals present • protruding objects • slippery floors • steps • terrain and obstacles to be traversed
Environmental conditions may include:	• building configuration and size • cold • heat • rain • time delay • wind
Safe and appropriate manner may include:	• canine search team being confident, calm and methodical • canine working off lead • managing canine in unsafe and high risk environments • working in accordance with relevant legislation, policy and guidelines
Maintaining control may include:	• recalling the canine • canine being responsive to direction controls • canine responding to an emergency stop • canine directing away from canine search specialist on command
Working independently may include:	• canine working at a distance from canine search specialist • canine working out of sight of canine search specialist

Distractions may include:	• noises such as:
	  • running generators
	  • machinery
	  • rescue tools
	• other distractions such as:
	  • personnel
	  • smoke
	  • food

© Commonwealth of Australia, 2025 Public Skills Australia

Assistance may include:	• assisting canine to traverse difficult obstacles • guiding canine • helping canine onto unstable elevated surfaces • intervening to prevent accident or injury to the canine • providing motivation and support where necessary, however during an alert, support and motivation can only be provided after the canine has initiated the bark alert • stopping and restarting the search • taking appropriate breaks, rest and water
Canine actions, indications and characteristics must include:	• ability to handle any distractions that may occur • ability to work scent cones • canine does not avoid obstacles • canine identifies live human scent with a bark alert • canine searches independently of canine search specialist • canine traverses all surfaces efficiently • canine covers search site as directed • high levels of search drive/eagerness/willingness to work
Canine actions indications and characteristics may include:	• false alert • passive alert behaviours
Correctly indicating location of live human scent with a bark alert must include:	• canine remaining at location of victim after indication of scent • canine search specialist notifying assessor of find
Required timeframe is defined as:	• twenty minutes to search each search area after the completion of the briefing
Relevant information to be recorded may include:	• details of areas searched • details of search and its conclusion • potential victim locations and any influencing factors • unidentified hazards
Sketch of search area must include:	• alert locations • compass orientation • prominent features
Recommendations may include:	• alternate search strategies (such as technical search, additional canine resources) • improving search processes • potential extrication points for victims
Relevant personnel may include:	• member of incident management team • other canine search specialists

© Commonwealth of Australia, 2025 Public Skills Australia

	• USAR canine search team leader
Legislation, policy and guidelines may include:	• Australian Standards • *Australian Urban Search & Rescue Canine Capability Best Practice Guideline* • guidance notes • national codes of practice • organisational policies and procedures • state/territory and federal animal welfare legislation • state/territory occupational health, safety and welfare legislation and regulations
Basic care must include:	• examining pads, webbing, toes, nails and bones of the foot of the canine • irrigating canine's eyes in an appropriate manner • treating minor injuries and contamination such as cuts, abrasions, foreign bodies, torn nails, fractures, sprains, irritant substances

PUASAR022A Participate in a rescue operation

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to participate in rescue operations as a member of a rescue team.

This unit underpins specialist rescue operations.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers a wide range of rescue and environmental situations, which may include industrial, rural, bush and extreme environmental conditions.

The individual will work under supervision in a team but may be responsible for completing individual tasks relating to a rescue.

The unit is typically performed by personnel from emergency services and/or volunteer organisations.

Typically, people performing this role have completed induction or recruit training and are commencing work as a member of an operational team.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and respond to rescue	1.1 ***Rescue operation*** and task information is received. 1.2 ***Rescue equipment*** is identified and selected based on incident information, as directed by supervisor. 1.3 ***Personal protective equipment*** (***PPE***) is selected based on the nature of the rescue operation. 1.4 Any further details of the nature of the rescue are received en route. 1.5 Anticipated ***hazards*** and associated risks are discussed with rescue team members while on approach.
2. Contribute to a risk assessment at the scene	2.1 Rescue scene reconnaissance is conducted and hazards and risks identified at the scene are reported to supervisor. 2.2 ***Communication*** with other team members is maintained using appropriate ***techniques*** and terminology. 2.3 Hazards and ***environmental conditions*** are minimised and/or controlled as directed. 2.4 Health, safety and security procedures are followed in accordance with organisational policy and relevant legislation. 2.5 ***Personal capabilities*** and limitations are recognised and referred to supervisor. 2.6 Need for additional personnel and/or specialist

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	equipment is reported to supervisor.
	2.7 Casualties at scene are identified, reported to supervisor and action is taken as directed.
3. Perform rescue	3.1 Access to incident and/or casualties is gained using techniques and equipment in accordance with organisational procedures.
	3.2 Rescue procedures are conducted in accordance with supervisor's instructions and organisational procedures.
	3.3 Casualties are prepared for removal and extricated safely using appropriate equipment rescue techniques and procedures, under the direction of ***appropriately trained personnel.***
	3.4 Incident scene is constantly monitored for hazards to prevent injury to self and/or others and reports are provided to supervisor as required.
	3.5 ***Hygiene precautions*** are implemented in accordance with organisational requirements.
4. Conclude rescue operations	4.1 Equipment is recovered, cleaned and maintained to organisational standards and manufacturers' procedures, and is restowed to maintain operational readiness.
	4.2 Where identified, signs and symptoms of operational stress are recognised in self and others and reported to relevant personnel.
	4.3 Operational debriefing is participated in and ***operational documentation*** is completed to organisational standards.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- identify and monitor hazards
- identify and use rescue equipment
- wear PPE in accordance with organisational requirements

Required Knowledge

- capabilities and limitations of rescue equipment

© Commonwealth of Australia, 2025 Public Skills Australia

- casualty handling techniques
- environmental hazards
- manual handling techniques
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- personal hygiene
- procedures for reporting injuries and accidents
- relevant legislative and regulatory requirements
- ropes and knots
- safety precautions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply safe work practices in rescue operations • use equipment in accordance with organisational procedures • respond and react to instructions in a safe, correct and timely manner **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved simulated and/or workplace environment involving rescue scenarios. **Specific resources for assessment** Access is required to: • PPE in accordance with organisational requirements • rescue equipment
Method of assessment	This unit may be assessed with the following unit:

© Commonwealth of Australia, 2025 Public Skills Australia

	• PUATEA001B Work in a team In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Rescue operation may include:	• confined spaces rescue • flood rescue • industrial rescue • road crash rescue • search and rescue • swift water rescue • trench rescue • vertical rescue

Rescue equipment may include:	• fire extinguishers
	• glass management kit
	• hand tools
	• ladders
	• lighting equipment
	• powered tools (battery, electric, fuel) such as:
	  • air bags
	  • chain saws
	  • cutting tools

© Commonwealth of Australia, 2025 Public Skills Australia

	• drills • excavating tools • hydraulic tools • pneumatic equipment • winches
	• rescue vehicles
	• ropes
	• tarpaulins
Personal protective equipment may include:	• appropriate protective clothing
	• boots
	• ear protection
	• helmets
	• infection protection
	• insect repellent
	• reflective vests
	• respiratory protection
	• safety glasses
	• safety gloves
	• sunscreen
Hazards may include:	• adverse weather
	• convergence
	• dangerous goods and hazardous substances
	• difficult terrain
	• electricity
	• gas
	• heights
	• insufficient light
	• respiratory
	• rubble and debris
	• supplementary restraint systems
	• traffic
	• water
	• wild farm or domestic animals
Communication techniques may include:	• non-verbal
	• signals/signs
	• verbal
	• written
Environmental conditions may include:	• effects of weather: • excess or lack of light • extreme weather • flood

© Commonwealth of Australia, 2025 Public Skills Australia

	• heat • humidity • mud slides
	• limited access • stability of rescue site
Personal capabilities may include:	• fatigue, stress, phobias • self assessed level of skill or competence
Appropriately trained personnel may include:	• ambulance crew • doctors • first aiders • nurses • paramedics
Hygiene precautions may include:	• as per operational procedures • avoiding contact with body fluids • washing hands • wearing appropriate protective clothing
Operational documentation may include:	• incident reports • legislation • notebooks, logbooks • organisational policies and procedures

PUASAR023A Participate in an urban search and rescue Category 1

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to provide safe and effective rescue support to an urban search and rescue (USAR) incident as a member of a first responder rescue team.

It involves assisting with the rescue and removing surface (lightly trapped) casualties or deceased victims, applying basic search techniques such as carrying out limited debris removal and following safe work practices in accordance with occupational health and safety requirements.

The unit also includes knowledge of the specialist equipment and techniques used at a USAR incident and the ability to work as a part of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to the role of a USAR Category 1 first responder.

A person performing this role will operate under direct supervision as a member of a USAR first responder rescue team.

This role is based on a national capability requirement to deploy competent personnel to any USAR incident. There are three nationally-agreed levels of capability, commencing with USAR Category 1.

PUAOPE031A Undertake an urban search and rescue Category 2 covers USAR Category 2 incidents.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEME001B Provide emergency care
OR
HLTFA201B Provide basic emergency life support

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for structural collapse rescue	1.1 Operation and ***task information*** is obtained and communicated to supervisor. 1.2 Based on incident information received, ***rescue resources*** are identified, selected and checked to ensure they are ready for use. 1.3 ***Personal protective clothing and equipment*** is selected based on the nature of the structural collapse operation. 1.4 ***Systematic approach*** to identifying potential hazards and associated risks is discussed with team members en route and on approach to the incident.
2. Participate in assessing structural collapse rescue	2.1 ***Rescue scene reconnaissance and size up*** is conducted and identified hazards and results are reported to supervisor. 2.2 ***Situational*** and ***environmental hazards*** are identified, analysed, evaluated and ***treated***, marked and monitored. 2.3 ***Physical features*** of structural collapse are ***assessed*** before rescue operations are deployed by supervisor. 2.4 Need for additional personnel and/or specialist

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	equipment is reported to supervisor.
	2.5 Liaison with primary response team and other relevant personnel is maintained.
	2.6 ***Communication*** with other team members on site is established and maintained using appropriate techniques and terminology.
	2.7 ***Structural collapse sectors*** and ***boundaries*** are confirmed with rescue team.
	2.8 ***Structural collapse marking system*** is implemented.
	2.9 Personal capabilities and limitations are recognised and referred to supervisor.
	2.10 Incident scene is ***preserved*** for investigating officer/s.
3. Determine location and condition of surface casualties	3.1 Intelligence of location of ***surface casualties*** within a collapsed structure is collected, analysed and reported in accordance with organisational policies and procedures.
	3.2 Collapse areas are explored for surface casualties in accordance with ***safe work practices.***
	3.3 Resources are used for surface or lightly trapped casualties.
	3.4 Condition of surface or lightly trapped casualties and nature of entrapment is ascertained where possible.
4. Gain access to surface casualties	4.1 ***Techniques*** and ***equipment*** are employed ***to stabilise*** and ***make safe*** incident site.
	4.2 Techniques and equipment are employed to ***locate trapped casualties.***
	4.3 ***Primary survey*** of casualty is undertaken to determine injury type and severity.
	4.4 Located casualties are ***treated prior to being moved*** in consultation with medical personnel in accordance with organisational policies.
5. Remove casualties	5.1 ***Located casualties are released***, treated and stabilised.
	5.2 Casualties are removed using ***recognised techniques and equipment.***
	5.3 Evidence of casualty identity is collected and processed in accordance with organisational procedures.
	5.4 Actions are taken to preserve the incident scene where possible for evidentiary purposes.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
6. Conclude structural collapse rescue operations	6.1 Equipment is ***recovered***, ***cleaned and serviced*** according to manufacturers' guidelines and organisational standards. 6.2 ***Signs and symptoms of operational stress*** in self and others are reported to relevant personnel. 6.3 Operational ***debrief*** is attended and ***documentation*** is completed to organisational standards. 6.4 ***Hygiene precautions*** are implemented in accordance with the organisational procedures. 6.5 ***Exposure records*** are completed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- conduct a primary survey
- handle casualties safely
- handle stretchers safely
- conduct a risk assessment
- identify signs of structural collapse including those associated with secondary collapse
- implement surface search procedures and surface clearance of casualties
- operates equipment in accordance with organisational procedures
- problem solving
- use structural collapse rescue equipment
- wear personal protective equipment (PPE) in accordance with organisational requirements
- work within the responsible agency's command and control structure

Required Knowledge

- building and structure classifications
- calling and listening procedures
- capabilities and limitations of rescue equipment
- collapse patterns (curtain fall wall collapse, inward/outward collapse, lean over collapse, lean to floor collapse, angle wall collapse
- command and control structure
- dangers associated with a damaged structure
- establishment of exclusion zones
- hazard identification and dynamic risk assessment recording

© Commonwealth of Australia, 2025 Public Skills Australia

- hazardous materials procedures
- hygiene precautions
- marking systems such as structure assessment marking, victim location marking in accordance with INSARAG guidelines and methodology
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- primary survey procedures
- procedures for reporting injuries and accidents
- relevant legislation
- risks associated with confined spaces
- role of structural collapse rescue
- safe work practices
- scene assessment procedures
- search procedures
- situational and environmental hazards
- standard internationally accepted warning systems
- standard operating procedures
- structural collapse equipment typically used in the rescue of surface casualties
- structure of the USAR taskforce and the roles of USAR personnel
- symptoms of physical/emotional stress
- team stretcher handling procedures
- types of PPE and clothing
- types of building structures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • work effectively as part of a team • apply safe work practices when providing assistance to a USAR rescue team • conduct a dynamic risk assessment • conduct a primary survey of casualty • maintain situational awareness and be alert to environmental and situational hazards • implement basic search techniques using approved marking systems • operates equipment in accordance with organisational procedures

© Commonwealth of Australia, 2025 Public Skills Australia

	• traverse unstable environments • safely and effectively gain access to surface casualties with no further injury to persons or damage to property • respond and react to instructions in a safe, correct and timely manner **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved simulated and/or workplace environment. **Specific resources for assessment** Access is required to: • USAR incident or simulation of a USAR incident • equipment, personnel, facilities etc. appropriate to a USAR incident
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

© Commonwealth of Australia, 2025 Public Skills Australia

wording in the Performance Criteria is detailed below.

Task information may include:	• cause of collapse • current situation • environmental and other hazards • incident location • other public safety organisations • type and magnitude of incident • type and number of casualties/vehicles
Rescue resources may include:	• basic rescue equipment such as lighting, hydraulic tools, ropes and hand tools • canines • communications • heavy plant • logistics support services such as portable toilets, tents, food • medical equipment • more sophisticated rescue equipment such as search cameras, chainsaws, jack hammers and air monitors
Personal protective equipment and clothing must meet the desired Australian/New Zealand Standards and may include:	• appropriate protective clothing • boots • dust mask • eye protection • gloves • hearing protection • helmets • knee/elbow protection • whistle
Systematic approach must include:	• assessment i.e. call out and response, route, scene, liaison, casualties • positioning of vehicle i.e. dangers, access and casualties • procedures i.e. dangers, casualty protection, extrication, warning devices and lighting
Rescue scene reconnaissance and size up may include:	• collecting relevant information about structural damage, e.g. casualties, victims, physical characteristics, hazards • isolating and eliminating utilities such as broken gas pipes, damaged electrical wiring, leaking water • relating knowledge of building and structure classifications to the incident scene • surveying the incident scene
Situational hazards may include:	• adverse weather conditions

© Commonwealth of Australia, 2025 Public Skills Australia

	• below debris hazards, including:
	  • flooding
	  • oxygen deficient atmosphere
	  • toxic environment
	  • flammable environment
	  • different levels of elevation
	• biological hazards, including:
	  • body fluids
	  • decomposing bodies
	  • untreated sewage
	• dangerous goods and hazardous substances
	• overhead hazards, including:
	  • falling debris
	  • loose or unstable sections of structure
	  • power lines
	• structural instability due to:
	  • events of nature such as earthquake, flood, landslide, wind
	  • explosions
	  • fire
	  • inadequate construction
	• surface hazards, including:
	  • climate
	  • different types of surfaces
	  • sharp and jagged objects
	  • water pooling
	  • dust and wind
	  • noise and vibration
	• utilities

Environmental hazards may include:	• dangerous goods and hazardous substances • utilities • weather
Treating hazards may include:	• eliminating the hazard • isolating the area/source • stabilising overhead hazards • using atmospheric monitoring equipment • using PPE and clothing

Assessing physical features of structural collapse may include:	• collapse patterns, including:
	  • curtain fall wall collapse
	  • lean over collapse

© Commonwealth of Australia, 2025 Public Skills Australia

	• lean to floor collapse • pancake floor collapse • secondary collapse/other building • inverted 'V' or tent collapse • 'V' collapse • cantilever collapse
	• methods of construction, including: • timber • light frame • besser block • reinforced masonry • concrete tilt-up • reinforced concrete and steel
Communication may include:	• marking systems • posted signage • radio communications (radio, telephones and information technology) • whistle/horn warning signals
Structural collapse sectors and boundaries may include:	• geographic area structure identification (sectorisation) • location identification within single structures
Structural collapse marking system includes:	• INSARAG Guidelines and Marking System: • structural assessment marking • victim location marking • site sectorisation marking
Preserving the incident scene may include:	• disturbing only to gain access or make scene safe • note taking and reporting to supervisor of observations made • preserving the integrity of evidence
Surface casualties may include:	• casualties not trapped within the structure • casualties who would suffer most from injuries inflicted from debris
Safe work practices must include:	• ability to traverse unstable surfaces in a safe manner • stretcher pass • three points of contact at all times
Techniques and equipment to stabilise and make safe site may include:	• controlling entry and entry permits if appropriate • removing debris
Techniques and equipment to locate trapped casualties may include:	• audible search method • rescue team - surface search procedures, line and hail

© Commonwealth of Australia, 2025 Public Skills Australia

	• visual
Primary survey:	• is a methodical process used to quickly identify immediate life threatening injuries and conditions that require intervention
	• should be completed promptly upon initial patient contact if no immediate life threatening injuries and conditions requiring intervention are found during the survey
	• should be completed as soon as possible if it is interrupted

	• should only be interrupted when:
	  • life threatening condition is identified and immediate life saving interventions are initiated
	  • scene conditions require that the patient be moved immediately due to danger to first emergency care responders or the patient

Treating casualties prior to being moved may include:	• cervical collar
	• first aid
	• primary/secondary survey
	• respiratory protection, if required
Releasing located casualties may include:	• use of stretcher packaging
	• surface extrication
Recognised techniques and equipment for removing casualties may include:	• exit route for rescuers and packaged casualty
	• 1:1/2:1 mechanical advantage hauling/lowering systems
	• rescue/spine boards
	• stretchers
	• team stretcher handling
Recovering, cleaning and servicing of equipment may include:	• cleaning or disposing of contaminated clothing and equipment
	• inspecting equipment for damage and serviceability
	• checking inventories
Signs and symptoms of operational stress may include:	• critical incident stress
	• dehydration
	• fatigue
	• hypothermia
Debriefings may include:	• critical incident stress debriefing
	• operational analysis
	• post-incident analysis
	• performance evaluations
Documentation may include:	• AIRS/coroner report
	• near miss injury register

© Commonwealth of Australia, 2025 Public Skills Australia

	• notebooks completed • operational debrief
Hygiene precautions may include:	• avoiding contact with body fluids • decontaminating equipment and personnel • washing hands • wearing appropriate protective clothing

Exposure records may include:	• reporting form that documents any exposure that may result in a short- or long-term associated injury such as:
	  • dangerous goods and hazardous substances, such as dust, vapours, fumes, radiation and chemical substances
	  • heavy repetitive work over long periods of time
	  • lifting heavy loads
	  • noise
	  • psycho-social hazards (e.g. critical incident stress)

PUASAR024A Undertake road crash rescue

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to gain access to and extricate entrapped casualty/s from vehicles travelling on the road such as cars, motorcycles, buses, trucks and semi-trailers while minimising the potential for further injury and preserving the integrity of evidence.

This unit requires the responder to access entrapped casualty/s using a range of techniques and to operate specialist equipment to undertake the rescue.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a member of a rescue team.

This unit may be customised to suit a range of road crash rescue incidents based on an organisational risk profile.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEME002C Manage injuries at emergency incident

OR

HLTFA301C Apply first aid

PUASAR022A Participate in a rescue operation

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and respond to road crash rescue	1.1 Equipment is checked, serviced and **operationally ready** for use. 1.2 ***Operation and task information*** is obtained and assessed about the ***type of collision.*** 1.3 ***Rescue equipment*** is selected based on incident information. 1.4 ***Personal protective equipment*** (***PPE***) is selected relevant to the nature of the rescue operation. 1.5 Any further details of the nature of the rescue are received en route. 1.6 Anticipated ***hazards*** and associated risks are discussed with rescue team members while on route.
2. Establish and maintain rescue scene safety	2.1 Road crash scene is assessed, hazards and risks are identified and appropriate control and ongoing monitoring processes are put in place. 2.2 ***Scene management procedures*** are followed in accordance with organisational procedures and legal requirements. 2.3 Safe working area is established and monitored to prevent injury to self and/or others. 2.4 ***Vehicle/s are stabilised*** to prevent movement during access and removal, in accordance with organisational standards and procedures.
3. Manage casualties	3.1 Hygiene precautions are maintained in accordance with organisational requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2 Casualties are assessed and stabilised to minimise further injury or discomfort during rescue operations. 3.3 Nature of injuries/entrapment is ascertained to develop an ***extrication plan.*** 3.4 Support is provided to medical personnel assisting with the treatment of the entrapped person/s as required
4. Remove casualties from entrapment	4.1 Access plans are determined in consultation with team leader and medical staff. 4.2 ***Procedures*** are implemented to ***protect casualties*** from further injury or discomfort during access and removal. 4.3 Access path is provided for removal of casualties using ***appropriate rescue techniques*** and equipment. 4.4 Casualties are removed from vehicle using appropriate ***rescue removal techniques*** and rescue equipment. 4.5 Removal of deceased person/s is undertaken under the direction of police.
5. Conclude road crash rescue operations	5.1 Scene is ***preserved*** for investigating officer/s. 5.2 Equipment is recovered, cleaned and maintained in accordance with manufacturer's guidelines and organisational procedures. 5.3 Decontamination procedures are followed in accordance with organisational procedures. 5.4 Where identified, signs and symptoms of operational stress in self and others are recognised and reported to appropriate personnel. 5.5 Operational debrief is participated in and ***operational documentation*** is completed to organisational standards.

Required Skills and Knowledge

Required Skills

- apply emergency care practices
- apply relevant road crash rescue techniques
- apply scene management procedures
- undertake initial (ongoing) scene assessment

© Commonwealth of Australia, 2025 Public Skills Australia

- use rescue equipment in a range of situations
- wear appropriate PPE
- work in a multi-agency environment
- work in teams

Required Knowledge

- dangers associated with vehicle safety devices
- documentation requirements
- emergency care
- equipment characteristics and safe working loads in rescue operations
- establishment and maintenance of safe working areas and minimisation of hazards
- hazards and environmental threats
- infection control procedures
- legal requirements for responders
- methods of access
- need to return equipment to operational readiness after use
- operating procedures and organisational standards
- operational briefing and debriefing procedures
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- personal hygiene protocols
- reconnaissance processes
- relevant occupational health and safety principles and practices
- rescue equipment and manufacturer's operational guidelines
- rescue techniques relevant to a range of vehicles
- road crash rescue techniques
- road crash rescue concepts as described in the Australian Emergency Manual *Road Crash Rescue*
- roles and responsibilities of, and relationship with, other emergency service/s
- use of PPE
- vehicle construction and dangers in cutting vehicle parts and panels

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • extricate casualties • minimise further injury or discomfort while conducting rescue operation • operate rescue equipment safely and effectively • apply safe work practices.

© Commonwealth of Australia, 2025 Public Skills Australia

	Consistency in performance Competency should be demonstrated over time in a range of actual and/or simulated workplace environments conducting rescues from a range of vehicles.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved simulated and/or workplace environment involving road crash rescues using a range of equipment. **Specific resources for assessment** Access is required to: • vehicles for exercise simulations • relevant transport • communications and emergency equipment
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operationally ready may include:	• Serviced as per manufacturers' recommendations and/or standard operating procedures
Operation and task	• Environmental and other hazards

© Commonwealth of Australia, 2025 Public Skills Australia

information may include:	• Location • Other agencies responding • Type and number of casualties/vehicles
Type of collision may include:	• Crushed vehicle • Head-on • Jack knife • Load movement • Multiple vehicle accidents • Off-set (quarter oblique) • Rear impact • Side impact (t-bone) • Vehicle roll-over • Vehicle under-ride/over-ride

Rescue equipment may include:	• Fire extinguishers
	• Glass management kit
	• Hand tools
	• Ladders
	• Lighting equipment
	• Powered tools (battery, electric, fuel) such as:
	  • lifting bags
	  • chain saws
	  • cutting tools
	  • drills
	  • excavating tools
	  • hydraulic tools
	  • pneumatic equipment
	• Rescue vehicles
	• Ropes
	• Stabilising equipment such as:
	  • winches
	• Tarpaulins

Personal protective equipment may include:	• Appropriate protective clothing • Boots • Ear protection • eye protection • gloves, boots • helmets • infection protection • respiratory protection
Hazards may include:	• adverse weather and environmental condition • after dark operations

© Commonwealth of Australia, 2025 Public Skills Australia

	• bio-hazards • Composite materials (carbon fibre and fibre glass) • Difficult terrain • Electricity • Gas • Hazardous materials/dangerous substances • Other road users • Supplementary restraint systems • Traffic and bystanders • Vehicle fuel • Vehicle propulsion systems • Vehicle glazing • wild farm or domestic animals • water and sewerage utilities
Scene management procedures may include:	• access and egress • cordoning and screening scene • glass management • isolating vehicle electrical systems • managing bystanders and media • positioning of response vehicles • preserving evidence • removing hazards • searching for missing occupants • staging areas • traffic control and traffic plan
Vehicles may include:	• buses • cars • farm vehicles • motorcycles • semi trailers • trucks
Stabilising vehicles may include:	• chaining • chocking • jacking • packing • propping • ratchet straps • roping • tensioning (manual operated cable winch) • use of soft webbing (rated)
Extrication plan may include:	• Alternate entries

© Commonwealth of Australia, 2025 Public Skills Australia

	• Controlled release • Immediate release
Procedures to protect casualties may include:	• Padding of sharp hazards (hard and soft protection) • PPE for casualty (helmet, glasses, dust mask, ear protection) • Shielding from debris, glass and tools

Appropriate rescue techniques may include:	• Door removal
	• Folding down sill
	• Foot well/front seat techniques:
	  • pulling and pushing the column (fitted with uni-joints)
	  • lifting the dash
	  • dash roll
	  • winching the dash
	  • exposing the foot well
	• light commercial vehicle techniques:
	  • van dash roll
	• Overturned vehicle techniques:
	  • inverted side removal
	  • flapping the floor pan
	  • inverted ramming (including inverted cross ramming techniques)
	• roof techniques:
	  • create openings
	  • forward roof flap
	  • roof flap
	• side impact techniques:
	  • cross ramming
	• side removal:
	  • 'B' pillar rip
	  • 'B' pillar removal
	  • Third door entry

Rescue removal techniques may include:	• cervical collars • extrication devices • spinal immobilisation device • spine board (back board)
Preserving the incident scene must include:	• disturbing only to gain access or make scene safe • not disturbing fatality scenes until police investigation activities are completed • preserving integrity of evidence

© Commonwealth of Australia, 2025 Public Skills Australia

Operational documentation may include:	• exposure records • incident field notes • incident report • organisation's reporting system • post operational report

PUASAR025A Undertake confined space rescue

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Fire specific prerequisites removed.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to undertake rescue in confined spaces, as defined in *AS 2865-2009 Confined spaces*, as a member of a single agency or multi-disciplinary team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers a range of confined space rescue situations.

The unit is typically performed by personnel from emergency services and/or volunteer organisations or organisations where confined space work is undertaken.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for confined space rescue operation	1.1 Operation and task information is obtained from a variety of sources and analysed, and team roles are confirmed. 1.2 Appropriate ***rescue equipment*** is identified and selected based on incident information as directed by supervisor. 1.3 ***Personal protective equipment*** is selected relevant to the nature of the confined space rescue operation. 1.4 Any further details of the nature of the rescue are received en route. 1.5 Anticipated hazards and associated risks are discussed with rescue team members whilst on route.
2. Assess and manage confined space/trench rescue	2.1 Confined space is assessed, hazards and risks are identified, and appropriate control and ongoing monitoring processes are put in place. 2.2 Physical features of confined space rescue scene are assessed before deploying rescue resources. 2.3 Rescue is managed to control access and to maintain a safe and effective operational environment. 2.4 ***Situational and environmental hazards*** are assessed, minimised and controlled. 2.5 Communication with other ***personnel*** on site is established and maintained.
3. Determine location and condition of casualties	3.1 Assessment of incident scene is undertaken to determine possible location of casualties. 3.2 Appropriate equipment is used to assist in the location of casualties. 3.3 Evidence of location of casualties within confined space is collected and reported. 3.4 Condition of casualties and nature of entrapment is ascertained where possible. 3.5 Hygiene procedures are applied in accordance with

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisational procedures.
4. Gain entry to confined space	4.1 Entry permit is located and relevant information is obtained if available. 4.2 Atmosphere is monitored in accordance with AS 2865-2009 Confined spaces. 4.3 Appropriate ventilation procedures are implemented, where required. 4.4 Appropriate respiratory protection is used in irrespirable atmospheres, where required. 4.5 Techniques and equipment are employed to access the casualty. 4.6 Located casualties are treated in consultation with medical personnel and in accordance with organisational policies.
5. Remove casualties	5.1 Casualties are removed in accordance with organisational procedures. 5.2 Appropriate actions are taken to ***preserve the incident scene*** and to ***collect evidence***, where possible.
6. Conclude rescue operations	6.1 Equipment is recovered, cleaned and serviced according to organisational standards and manufacturer's guidelines. 6.2 Signs and symptoms of operational stress are recognised and promptly reported. 6.3 ***Operational documentation*** is completed to organisational standards.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- operate atmospheric monitoring equipment
- operate isolation systems
- operate lifting equipment
- operate lowering and hauling systems
- operate self contained breathing apparatus and airline equipment
- operate ventilation equipment

Required Knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

- Australian Standard (AS) 2865-2009 Confined spaces
- lock, tag out and isolation procedures
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- potential occupational hazards and control measures
- procedures for atmospheric monitoring
- purging and ventilation in accordance with national standards
- selection, use and maintenance of respiratory devices
- use of ropes and knots for accessing confined space

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • extricate casualty minimising further injury to casualty, injury to self and others Consistency in performance Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	Context of assessment Competency should be assessed in an industry-approved simulated and/or workplace environment involving confined space rescues using a range of equipment. Specific resources for assessment Access is required to: • appropriate venue • organisational resource equipment • personnel for team-based activities • resources as specified in AS 2865-2009 Confined spaces
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

© Commonwealth of Australia, 2025 Public Skills Australia

	Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Confined space is defined in:	• AS 2865-2009 Confined spaces
Rescue equipment may include:	• airline equipment • atmospheric monitoring equipment • communications • escape sets and harnesses • hauling systems • life rescue line • litters/stretchers • isolation equipment • ropes/tapes • self-contained breathing apparatus/airline • tripods/edge management • ventilation and purging equipment
Personal protective equipment may include:	• airlines • atmospheric monitoring equipment • chemical splash suit/fully encapsulated gas-tight suits • gloves • hearing protection aids • helmets • safety glasses • self-contained breathing apparatus
Situational or environmental	• atmospheric contaminants (such as hydrogen

© Commonwealth of Australia, 2025 Public Skills Australia

hazards may include:	sulphide) • dangerous goods or hazardous substance • engulfment • falls from heights or into depths • heat exhaustion or hypothermia • oxygen enrichment • oxygen deficiency • methane and carbon dioxide • moving machinery either electrical or mechanical • sewers and stormwater canals • stored energy • swift water
Personnel may include:	• agency support • emergency services workers • local/state/territory government authorities • onsite staff • specialist advisors and safety authorities
Preserving the incident scene may include:	• preserving evidence and related legal requirements
Collecting evidence may include:	• entry permit • information received from bystanders • permit to work • witnesses and emergency services personnel
Operational documentation may include:	• atmospheric monitoring procedures • entry control procedures • entry permits • equipment and rope logs • exposure records • tally boards

2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release into TGA.

Unit Descriptor

This unit covers the competency required to gain access to and extricate entrapped casualty/s from a range of industrial and/or domestic incidents while minimising the potential for further injury and preserving the integrity of evidence.

An industrial rescue involves the safe removal of persons who have had an accident in the workplace such as factories, warehouses and building sites. It involves disentanglement from machinery, and extrication from heavy machinery such as cranes. Rescue of occupants trapped in elevators and escalators is also included.

Domestic rescue involves the rescue of occupants trapped in household settings. This includes such things as children with fingers in drain plugs, removal of rings, and persons who are physically incapable of removing themselves from their houses due to ill health.

This unit requires the responder to access entrapped casualties using a range of techniques and to operate specialist equipment to undertake the rescue.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit typically applies to a member of a rescue team.

This unit may be customised to suit a range of industrial and/or domestic incidents based on an organisational risk profile.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for industrial/domestic rescue	1.1 ***Operation and task information*** is obtained and assessed upon call out to ***domestic or*** industrial ***rescue incident.***
	1.2 Based on incident information, appropriate ***rescue resources*** are identified, selected, received and checked to ensure they are ready for use.
	1.3 ***Personal protective equipment*** (***PPE***) ***and clothing*** are selected based on type of industrial or domestic equipment. involved.
	1.4 ***Systematic approach*** to identifying ***potential hazards and associated risks*** is undertaken en route and on approach to the incident.
2. Establish and maintain rescue scene safety	2.1 ***Communication*** and ongoing liaison with heavy vehicle rescue team members on site is established.
	2.2 Liaison with ***other relevant personnel*** is established and maintained.
	2.3 ***Rescue scene reconnaissance*** and size up is conducted.
	2.4 ***Situational*** and ***environmental hazards*** are identified, analysed, evaluated and ***treated***, marked and monitored.
	2.5 Rescue team is positioned taking into account ***potential dangers***, requirements for personnel and vehicles to ***access the scene***, and ***limitations of operating equipment.***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.6 Safe work area is established to protect casualties, emergency services personnel and members of the public.
	2.7 Preventative action is taken to minimise the risk of fire or other potential hazards, where required.
	2.8 ***Impact effects on occupancy areas*** and ***potential effects on casualties*** are assessed.
	2.9 Techniques and equipment are employed to ***stabilise the occupancy area*** and to make the incident site safe.
	2.10 Scene lighting is established to reduce hazards associated with the type of incident.
	2.11 Specialist rescue resources are accessed based on an assessment of the incident.
3. Manage casualties	3.1 ***Hygiene precautions*** are implemented in accordance with organisational requirements.
	3.2 Techniques and equipment are used to ***gain access to entrapped casualties*** within the occupancy area/s.
	3.3 ***Primary survey*** of casualty is undertaken to determine injury type and severity.
	3.4 Injuries are confirmed that may complicate removal of casualty from the occupancy area and appropriate action is taken.
	3.5 In the event of multiple casualties, triage assessment is undertaken to determine priorities for medical treatment and for extrication.
	3.6 Need for additional personnel and/or specialist equipment is requested.
	3.7 Support is provided to medical personnel assisting with the treatment of the entrapped person/s as required.
4. Extricate casualty/s	4.1 Casualty/s are protected from injury during extrication.
	4.2 ***Treatment of located casualty/s*** is undertaken in consultation with medical personnel and in accordance with organisational policies.
	4.3 Access plans are determined with consultation team leader, medical staff and other technical specialists.
	4.4 Rescue techniques and equipment used by the rescue team take into account the features of the occupancy area including materials and design elements that may impact on the extrication.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.5 Casualty/s are ***removed*** using recognised techniques and equipment.
5. Carry out rescue operations	5.1 Liaison is undertaken with primary response team and other relevant personnel. 5.2 Additional technical equipment is employed to make incident scene safe. 5.3 Procedures are implemented to protect casualty/s from further injury or discomfort during access and removal. 5.4 Access path is provided for the removal of casualty/s using appropriate rescue techniques and equipment. 5.5 Scene is ***preserved*** for investigating officer/s.
6. Conclude rescue operations	6.1 Equipment is ***recovered***, ***cleaned and serviced*** according to manufacturers' guidelines and organisational standards. 6.2 ***Signs and symptoms of operational stress*** in self and others are reported to relevant personnel. 6.3 Operational ***debrief*** is attended and ***documentation*** is completed to organisational standards. 6.4 ***Exposure records*** are completed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communication
- conduct a primary survey
- decision making
- extricate casualties safely
- identify symptoms of physical/emotional stress
- solve problems
- use rescue equipment
- wear PPE and clothing in accordance with organisational requirements
- work within the organisation's command and control structure

Required Knowledge

- available equipment and equipment function
- emergency care

© Commonwealth of Australia, 2025 Public Skills Australia

- hygiene procedures
- manufacturer's operational guidelines
- operate rescue equipment
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- primary survey procedures
- relevant legislation
- relevant occupational health and safety (OH&S) principles and practices
- rescue equipment
- safe work practices
- scene assessment procedures
- situational awareness
- symptoms of physical/emotional stress
- use of personal protective equipment

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply a systematic approach to the rescue and to implement safe work practices throughout the incident • safely and effectively extricate casualty/s; minimising further injury or discomfort while conducting rescue operation • operate equipment to gain access to entrapped casualties in accordance with organisational procedures • maintain situational awareness and be alert to environmental and situational hazards • work effectively as a member of a rescue team in a multi-agency environment **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved

© Commonwealth of Australia, 2025 Public Skills Australia

	simulated and/or workplace environment. **Specific resources for assessment** Access is required to: • simulation of a range of domestic appliances, industrial machinery, an elevator shaft and an escalator • equipment, personnel, facilities etc. appropriate to a industrial/domestic rescue incident training exercise
Methods of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operation and task information may include:	• availability of company personnel to provide technical advice • environmental and other hazards • incident location • other public safety organisations at the scene or en route • time of day and traffic density • type of rescue and number of casualties • type of machinery or household item involved

© Commonwealth of Australia, 2025 Public Skills Australia

Domestic or industrial rescue may include:	• domestic rescue • children with fingers in drain plugs • removal of rings • persons who are physically incapable of removing themselves from their houses due to ill health • industrial rescue • agricultural machinery • disentanglement from machinery located in factories, warehouses and building sites • elevators/escalators • industrial/construction incidents • industrial machinery entrapments • occupant/s trapped in elevators and escalators • shipping containers
Rescue resources may include:	• ancillary equipment such as stretchers • firefighting equipment • hand tools • hot cutting equipment • lifting and hauling equipment • lighting equipment • pneumatic hydraulic mechanical electrical tools • patient protection equipment • rescue units and stowed equipment • tool boxes
Personal protective equipment and clothing may include:	• boots • eye protection • gloves • hearing protection • helmet • knee/elbow protection
Systematic approach must include:	• assessment i.e. call out and response, route, scene, liaison, casualties • positioning of vehicle i.e. dangers, access and casualties • procedures i.e. dangers, casualty protection, extrication, warning devices and lighting
Potential hazards and associated risks may include:	• moving machinery • electrocution • industrial traffic (forklifts etc.) • various industrial work environments
Communication may include:	• radio communications (radio, telephones and information technology)

© Commonwealth of Australia, 2025 Public Skills Australia

	• warning signals
Other relevant personnel may include:	• ambulance officers • company personnel • emergency services personnel • household occupants • police • utility technicians
Rescue scene reconnaissance may include:	• collecting relevant information about casualty/s and hazards • isolating and eliminating utilities • surveying the incident scene
Situational and environmental hazards may include:	• adverse weather • biological hazards such as body fluids and tissue • convergence • dangerous goods and hazardous substances • difficult terrain • dusts • electrical and mechanical moving machinery • electricity • equipment power/drive systems • gas • mobile property • sharp and jagged objects • slippery surfaces • vehicle fuel systems • water and sewerage utilities
Treating hazards may include:	• eliminating the hazard • isolating the area/source • stabilising overhead hazards • using atmospheric monitoring equipment • using PPE and clothing
Potential dangers may include:	• electrical hazards • fuel • stability and location of machinery
Accessing the scene may include:	• allowing clear access and egress for other responding vehicles and ambulances • establishing a clear area to manoeuvre personnel, stretchers
Limitations of operating equipment may include:	• access to incident site • equipment capacities and limitations
Impact effects on occupancy	• disconnection of essential services

© Commonwealth of Australia, 2025 Public Skills Australia

areas may include:	
Potential effects on casualty may include:	• confinement without entrapment (elevators) • limb entrapment
Stabilising the occupancy area may include:	• isolating utilities (power, gas, water etc.) • meshing gears on machinery
Hygiene precautions may include:	• avoiding contact with body fluids and tissue • decontaminating equipment at scene and placing protective clothing and gloves in a sealed bag for special dry cleaning • using correct personal protective clothing and equipment • using surgical gloves under protective work gloves • washing hands • wearing appropriate protective clothing
Gaining access to entrapped casualty/s may include:	• accessing elevator shaft • disassembling of machinery • managing moving machinery • managing utilities supplies • removing domestic plumbing equipment

Primary survey:	• is a methodical process used to quickly identify immediate life threatening injuries and conditions that require intervention
	• should be completed promptly upon initial patient contact if no immediate life threatening injuries and conditions requiring intervention are found during the survey
	• should be completed as soon as possible if it is interrupted
	• should only be interrupted when:
	  • life threatening condition is identified and immediate life saving interventions are initiated
	  • scene conditions require that the patient be moved immediately due to danger to first emergency care responders or the patient

Treating located casualty/s may include:	• first aid
Removing casualty/s may include:	• rescue/spine boards • stretchers • team stretcher handling
Preserving the scene may include:	• defining and redefining scene boundary • preserving evidence and related legal requirements

© Commonwealth of Australia, 2025 Public Skills Australia

	• securing the scene
Recovering, cleaning and servicing of equipment may include:	• contaminated clothing and equipment cleaned or disposed • equipment inspected for damage and serviceability • inventories checked
Signs and symptoms of operational stress may include:	• critical incident stress • dehydration • fatigue • hypothermia
Debriefings may include:	• critical incident stress debriefing • operational analysis • post-incident analysis • performance evaluations
Documentation may include:	• AIRS/coroner report • near miss injury report • notebooks completed • operational debrief • post operational analysis

Exposure records may include:	• reporting form that documents any exposure that may result in a short- or long-term associated injury such as:
	  • hazardous substances, such as dust, vapours, fumes, radiation and chemical substances
	  • heavy repetitive work over long periods of time
	  • lifting heavy loads
	  • noise
	  • psycho-social hazards (e.g. critical incident stress)

PUASAR027A Undertake land search rescue

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Fire specific prerequisite removed.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to search for and locate lost persons and/or items as a member of a land search team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to individuals who are required to perform a land search as a member of a team under the direction of team leader in a range of environments and conditions.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for land search	1.1 ***Operation and task information*** is obtained and assessed and ***safety briefing*** is received. 1.2 ***Incident information*** is used to determine ***personal equipment*** needed for ***search operation*** appropriate to search terrain. 1.3 ***Search equipment*** is checked and packed for use appropriate for the expected ***terrain*** and ***conditions.***
2. Participate in search	2.1 ***Specified team roles*** and functions for search operations are carried out and safety briefing is conducted. 2.2 Search techniques are maintained, as specified by search coordinator. 2.3 Search boundaries are marked in line with task requirements. 2.4 ***Observation skills*** are applied and any clues to locate persons or objects are reported immediately in accordance with organisational procedures. 2.5 ***Communication*** is maintained within the team. 2.6 Personal capabilities and limitations are recognised and referred to supervisor.
3. Maintain search safety	3.1 ***Survival techniques*** are applied where required. 3.2 Search safety procedures are implemented in accordance with organisational policies and procedures. 3.3 Lost searcher procedures are implemented if required.
4. Preserve scene	4.1 Supervisor is immediately advised of located persons or findings in accordance with organisational procedures. 4.2 Initial preservation procedures are implemented to maintain the integrity of evidence. 4.3 Initial scene preservation is conducted in line with the organisational requirements.
5. Complete stand down	5.1 Search equipment is recovered, cleaned and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
procedures	maintained in accordance with manufacturer's guidelines and organisational procedures. 5.2 Operational debriefing is participated in and ***operational documentation*** is completed to organisational standards. 5.3 ***Symptoms of operational stress*** are recognised and reported. 5.4 Decontamination procedures are followed in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply survival techniques
- deal appropriately with clues and location of objects and/or causalities
- implement lost searcher procedures
- implement spacing and boundary marking procedures
- maintain search information
- observation skills
- wear appropriate personal protective equipment (PPE) correctly
- work in a team

Required Knowledge

- local documentation requirements
- local hazards and environmental threats
- local operating procedures
- local operational briefing and debriefing procedures
- lost searcher procedures
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- procedures to locate person or object
- recall procedures
- relevant occupational health and safety principles and practices
- relevant state/territory search management arrangements
- requirements to preserve a crime scene and the preservation of evidence

© Commonwealth of Australia, 2025 Public Skills Australia

- signs and symptoms of operational stress

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • comply with search orders and organisational requirements • observe safety of self and others at all times during the search **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved simulated and/or workplace environment involving land search rescues using a range of equipment. **Specific resources for assessment** Access is required to: • appropriate environment to conduct the search operation • other organisations
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate

© Commonwealth of Australia, 2025 Public Skills Australia

	• journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operation and task information may include:	• access and egress routes • command, control and coordination arrangements • location • magnitude and type of incident • number and type of casualties • other organisations • potential hazards • weather conditions and forecasts
Safety briefing may include:	• appropriate PPE • care for other team members • changing light • fatigue management • identified hazards and risks • resupply • risks • situational awareness • own limitations • weather
Incident information may include:	• access and egress routes • command, control and co-ordination arrangements • emergency rendezvous points • number, nature and description of persons or objects that are the focus of the search • operating area • potential hazards • terrain and environmental information • time constraints • weather forecast
Personal equipment may include:	• food • notebook and pencil • overnight sleeping equipment

© Commonwealth of Australia, 2025 Public Skills Australia

	• personal first aid equipment • personal hygiene items • PPE, especially wet weather gear, cold weather clothing, sun protection • water
Search operations may include:	• operations are normally conducted in support of the police • searching for missing persons, objects or evidence • searching, most commonly, on foot – although searches may be undertaken from vehicles or on horseback, skis and snowshoes
Equipment may include:	• boundary marking tapes • compass or other positioning equipment • map • radio communications equipment
Terrain may include:	• forests • grassland • sand • snow • steep rock areas • urban areas

Conditions may include:	• hazardous environmental conditions including:
	  • adverse weather
	  • after dark operations
	  • dangerous flora and fauna
	  • difficult terrain
	  • time pressure
	• operating as part of a multi-agency response
	• urban or rural environments

Specified team roles may:	• be determined based on the selected search technique (as per national land search operations manual) such as:
	  • line search
	  • feature search
	  • track search

Observation skills may include:	• day vision skills • night vision skills
Communication may include:	• calming and reassuring a casualty • feedback of information • modes of communication as per organisational requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Survival techniques may include:	• constructing fires • constructing temporary shelters • conserving water, food and energy • locating shelter • obtaining water • skills relevant to the local areas (such as cold, heat, terrain and forest)
Operational documentation may include:	• electronic recording devices • notes, sketches of findings or other relevant information required for potential coronial or other legal proceedings photos
Symptoms of operational stress may include:	• fatigue • headaches • illness • indecision • intolerance • lack of focus • nausea

Unit Sector(s)

Not applicable.

PUASAR028A Undertake rescue from a partial structural collapse

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to provide safe and effective response to an incident involving compromised structural stability, partial or complete collapse to gain access to and extricate entrapped casualty/s.

This unit requires the responder to stabilise the structure. Where entrapped casualty/s or victims are present the responder is required to remove the casualty or victim using a range of techniques relevant to the type of structure and nature of entrapment.

This unit is designed for a response within the capability of a local response unit. This unit cannot be used to certify an operator as a member of an Urban Search and Rescue Task Force.

Application of the Unit

This unit applies to a member of a rescue team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR023A Participate in an urban search and rescue Category 1

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for structural collapse operation	1.1 Operation and ***task information*** is obtained and assessed upon call out. 1.2 Appropriate ***rescue resources*** are identified and selected based on incident information received and checked to ensure they are ready for use. 1.3 ***Personal protective equipment*** (***PPE***) ***and clothing*** is selected based on the ***nature of the incident*** and rescue resources to be used. 1.4 ***Systematic approach*** to identifying potential hazards and associated risks is discussed with team members en route and on approach to the incident.
2. Establish and maintain rescue scene safety	2.1 ***Rescue scene reconnaissance*** and size up is conducted. 2.2 ***Situational*** and ***environmental hazards*** are identified, analysed, evaluated and ***treated***, marked and monitored. 2.3 ***Scene is managed to control access*** and maintain a safe and effective operational environment. 2.4 Communication with other personnel on site is established and maintained.
3. Determine location and condition of casualties	3.1 ***Evidence of the location of casualties*** within the collapsed structure is collected, analysed and reported in accordance with organisational policies and procedures. 3.2 Appropriate resources are used for surface or lightly trapped casualties. 3.3 Condition of surface or lightly trapped casualties and nature of entrapment is ascertained where possible. 3.4 Search marking systems are utilised where applicable.
4. Stabilise and make safe	4.1 Exclusion zone is established to provide a safe

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
incident scene	working environment. 4.2 ***Stabilisation techniques*** are utilised to make the collapsed site safe. 4.3 Rescue operations can be conducted in a range of environments. 4.4 Incident scene is constantly monitored for situational and environmental hazards and structural stability to prevent injury to self or others.
5. Gain access to casualties	5.1 Techniques appropriate to the nature of the entrapment are utilised to access the casualty. 5.2 Located casualties are treated in consultation with medical personnel in accordance with organisational policies. 5.3 Hygiene precautions are implemented in accordance with organisational requirements.
6. Remove casualties	6.1 Techniques and ***equipment are used to remove the entrapped casualty or victim*** from within the structure. 6.2 Entrapped casualties are released, treated and stabilised in accordance with organisational procedures. 6.3 Casualties are removed from scene using recognised techniques. 6.4 Evidence of casualty's identity is collected and processed according to agreed procedures. 6.5 Appropriate actions are taken to preserve the incident scene where possible for evidentiary purposes.
7. Conclude rescue operations	7.1 Equipment is recovered, cleaned and serviced according to organisational standards and manufacturer's guidelines. 7.2 Hygiene precautions are implemented in accordance with the organisational requirements. 7.3 Signs and symptoms of operational stress are recognised are reported to relevant personnel. 7.4 ***Operational documentation*** is completed to organisational standards. 7.5 ***Exposure records*** are completed.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- establish exclusion zones
- operate equipment in accordance with organisational procedures
- take notes
- use appropriate rescue equipment
- use cutting and breaking equipment
- use debris removal techniques
- use generators and lighting equipment safely and effectively
- use lifting and hauling equipment
- use pneumatic equipment
- use props and basic shoring techniques
- use ropes, anchors and rigging systems
- wear PPE in accordance with organisational requirements
- work in teams
- work within the responsible agency's command and control structure

Required Knowledge

- agency incident command and control systems
- equipment capabilities and limitations
- medical considerations and patient packaging for structural collapse casualties
- operational briefing and debriefing procedures
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- principles of structural collapse operations
- relevant occupational health and safety (OH&S) principles and procedures
- signs and symptoms of operational stress

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence	Assessment must confirm the ability to: • work autonomously and as part of a team

© Commonwealth of Australia, 2025 Public Skills Australia

required to demonstrate competency in this unit	• conduct a dynamic risk assessment • maintain situational awareness and be alert to environmental and situational hazards • safely use debris removal, shoring and propping techniques • safely use hauling and lifting techniques • extricate casualty minimising further injury to self, others or the casualty • apply safe work practices in a range of environments **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed an industry-approved simulated and/or workplace environment involving structural instability and rescue. **Specific resources for assessment** Access is required to: • structural collapse rescue or simulation of a structural collapse incident • equipment, personnel, facilities etc. appropriate to the range of incidents covered by this unit of competency
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Task information may include:	• environmental and other hazards • nature, cause and location of incident • occupancy • type and magnitude of incident • type and number of casualties/vehicles • type of structure
Rescue resources may include:	• atmosphere monitoring equipment • buckets • chain saws • communications equipment • drills • electrical detectors • generators • hand tools • lifting/hauling equipment • lighting • medical equipment • ropes • shoring and building stabilisation • wheel barrows
Personal protective equipment and clothing must meet the desired Australian/New Zealand Standards and may include:	• boots • ear protection (plugs, and muffs) • eye protection (goggles, glasses) • gloves • hand held lighting • helmet and light • knee/elbow protection • masks and respirators • protective clothing • safety harnesses • surgical gloves • wet weather gear • whistle

Nature of the incident:	• structural instability due to:
	  • events of nature such as earthquake, flood, landslide, wind, storm
	  • explosions

© Commonwealth of Australia, 2025 Public Skills Australia

	• fire • inadequate construction • transport vehicle into residential or commercial building
Systematic approach must include:	• assessment i.e. call out and response, route, scene, liaison, casualties • positioning of vehicle i.e. dangers, access and casualties • procedures i.e. dangers, casualty protection, extrication, warning devices and lighting
Rescue scene reconnaissance must include:	• assessing physical features of structural collapse before rescue operations are deployed by supervisor • conducting size up • identifying hazards • maintaining liaison with primary response team and other relevant personnel • recognising personal capabilities and limitations and referring to supervisor • reporting need for additional personnel and/or specialist equipment to supervisor • reporting results to supervisor

Situational and environmental hazards may include:	• adverse weather conditions
	• below debris hazards, including:
	  • flooding
	  • oxygen deficient atmosphere
	  • toxic environment
	  • flammable environment
	  • different levels of elevation
	• biological hazards, including:
	  • body fluids
	  • untreated sewage
	  • dangerous goods and hazardous substances
	• overhead hazards, including:
	  • falling debris
	  • loose or unstable sections of structure
	  • power lines
	  • irrespirable atmospheres
	• surface hazards, including:
	  • climate
	  • different types of surfaces
	  • sharp and jagged objects

© Commonwealth of Australia, 2025 Public Skills Australia

	• water pooling • dust and wind • noise and vibration • utilities
Treating hazards may include:	• eliminating the hazard • isolating the area/source • stabilising overhead hazards • using atmospheric monitoring equipment • using PPE and clothing
Managing the scene to control access may include:	• implemented structural collapse marking system • sectorising site of structural collapse and defining boundaries
Evidence of location of casualties may include use of these search techniques:	• primary surface search and rescue: • audible • line and hail search • physical search • visual
Stabilisation techniques to make safe the incident scene may include	• controlling entry and entry permits if appropriate • cribbing • removing debris • tie backs • using shoring and props
Equipment used to remove the entrapped casualty or victim may include	• HAZMAT detection and isolation • cutting lifting and moving of: • general building material • other entrapment components • shoring stabilise and support structural components with use of: • cribbing and wedges • vertical, horizontal and window and/or door shores
Operational documentation may include:	• AIRS/coroner report • communication logs • equipment running and repair logs • incident reports • injury register • near miss/accident forms • notes or sketches and other relevant information required for potential coronal or other legal proceedings • operational debrief • site sectorisation plan

© Commonwealth of Australia, 2025 Public Skills Australia

Exposure records may include:	• reporting form that documents any exposure that may result in a short or long term associated injury such as:
	  • hazardous substances, such as dust, vapours, fumes, radiation and chemical substances
	  • heavy repetitive work over long periods of time
	  • lifting heavy loads
	  • noise
	  • psycho-social hazards (e.g. critical incident stress)

Unit Sector(s)

PUASAR029A Undertake a complex transport rescue

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to gain access to and extricate entrapped casualty/s from transport such as trains, trams, light aircraft (as defined by CASA) and self propelled heavy plant while minimising the potential for further injury and preserving the integrity of evidence.

This unit requires the responder to access entrapped casualty/s using a range of techniques and to operate specialist equipment to undertake the rescue.

This unit is designed to build on the skills and knowledge acquired in the competency PUASAR024A Undertake road crash rescue to extend the capability of a rescuer to perform rescues from trains, trams, light aircraft and self propelled heavy plant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a member of a rescue team.

This unit may be customised to suit a range of complex transport incidents based on an organisational risk profile.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for complex transport rescue	1.1 Operation and ***task information*** is obtained and assessed upon call out. 1.2 Appropriate ***rescue resources*** are identified and selected based on incident information, received and checked to ensure they are ready for use. 1.3 Personal protective equipment (PPE) and clothing are selected based on nature of transport and type of collision. 1.4 ***Systematic approach*** to identifying ***potential hazards and associated risks*** is undertaken en route and on approach to the incident.
2. Establish and maintain rescue scene safety	2.1 ***Communication*** and ongoing liaison with rescue team members on site is established. 2.2 Liaison with ***other relevant personnel*** is established and maintained. 2.3 Rescue scene reconnaissance and size up is conducted. 2.4 ***Situational*** and ***environmental hazards*** are identified, analysed, evaluated and ***treated***, marked and monitored. 2.5 Rescue team is positioned taking into account ***potential dangers***, requirements for personnel and vehicles to ***access the scene***, and ***limitations of operating equipment.*** 2.6 ***Functional areas*** are established to support operations.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.7 ***Warning devices*** are placed at appropriate distances from the scene to alert to approaching traffic of hazards or adverse road conditions. 2.8 Safe work area is established to protect casualty/s, emergency services personnel and members of the public. 2.9 Preventative action is taken to minimise the risk of fire or other potential hazards, where required. 2.10 ***Impact effects on transport*** and potential impact effects ***on casualty/s*** are assessed. 2.11 Techniques and equipment are employed to ***stabilise the transport*** and to make the incident site safe. 2.12 Scene lighting is established to reduce hazards associated with type of incident. 2.13 Specialist rescue resources are accessed based on the assessment of the incident.
3. Gain access to casualty/s	3.1 ***Hygiene precautions*** are implemented in accordance with organisational requirements. 3.2 Techniques and equipment are used to ***gain access to entrapped casualty/s*** within the vehicle/s. 3.3 ***Primary survey*** of casualty is undertaken to determine injury type and severity. 3.4 Injuries are confirmed that may complicate removal of the casualty/s from the vehicle and appropriate action is taken. 3.5 In the event of multiple casualties, triage assessment is undertaken to determine priorities for medical treatment and for extrication. 3.6 Need for additional personnel and/or specialist equipment is requested. 3.7 Support is provided to medical personnel assisting with the treatment of the entrapped person/s as required.
4. Extricate casualty/s	4.1 Casualty/s are protected from injury during extrication. 4.2 ***Treatment of located casualty/s*** is undertaken in consultation with medical personnel and in accordance with organisational policies. 4.3 Rescue techniques and equipment used by the rescue team take into account ***transport design***, materials and safety features that may impact on the

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	extrication. 4.4 Casualty/s are removed using ***recognised techniques*** and ***equipment.*** 4.5 Located casualty/s are released, treated and stabilised. 4.6 Evidence of casualty identity is collected and processed in accordance with organisational procedures. 4.7 Appropriate actions are taken to preserve the incident scene where possible for evidentiary purposes.
5. Conclude rescue operations	5.1 Equipment is ***recovered***, ***cleaned and serviced*** according to manufacturers' guidelines and organisational standards. 5.2 Fatigue and operational stress of team members is monitored and action taken to address identified issues. 5.3 ***Signs*** and ***symptoms*** of ***operational stress*** in self and others are reported to relevant personnel. 5.4 Operational ***debrief*** is attended and ***documentation*** is completed to organisational standards. 5.5 ***Hygiene precautions*** are implemented in accordance with the organisational procedures. 5.6 Exposure records are completed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply transport stabilisation techniques
- establish functional areas
- extricate casualties safely
- handle stretchers safely
- implement safety procedures for 'height safety operations' in accordance with organisational procedures
- isolate transport utilities
- operate equipment to access entrapped casualty/s in accordance with organisational procedures
- undertake a primary survey

© Commonwealth of Australia, 2025 Public Skills Australia

- wear PPE and clothing in accordance with organisational requirements
- work within the responsible agency's command and control structure

Required Knowledge

- complex transport design and safety features
- capabilities and limitations of rescue equipment
- command and control structure
- electrical hazards
- hazard identification and dynamic risk assessment recording
- hazardous materials procedures
- hygiene precautions relative to biological contamination
- injury prevention and minimisation
- manual handling
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- primary survey
- procedures for gaining access to entrapped casualties in different types of complex transport
- procedures for preservation of integrity of evidence
- procedures for reporting injuries and accidents
- relevant legislation
- safe work practices
- scene assessment procedures
- sectorisation
- situational and environmental hazards
- specific emergency entrance and exit procedures (doors/windows)
- standard operating procedures
- symptoms of physical/emotional stress
- systematic approach
- team stretcher handling procedures
- types of personal protective clothing and equipment
- types of collisions

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply a systematic approach to a complex transport rescue and to implement safe work practices throughout the incident • safely and effectively gain access to entrapped casualties using techniques relevant to the type of

© Commonwealth of Australia, 2025 Public Skills Australia

	complex transport rescue impact • operate equipment to gain access to entrapped casualties in accordance with organisational procedures • maintain situational awareness and be alert to environmental and situational hazards • work effectively as a member of a rescue team **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved simulated and/or workplace environment. **Specific resources for assessment** Access is required to: • simulation of a range of potentially complex transport mediums and their infrastructure • equipment, personnel, facilities etc. appropriate to a complex transport rescue incident training exercise
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Task information may include:	• environmental and other hazards at the scene • incident location and exact location of vehicles involved • other public safety organisations at the scene or en route • time of day and traffic obstructions caused by collision • types and number of vehicles involved and potential number of casualties • wind direction

Rescue resources may include:	• air operated equipment
	• ancillary equipment such as:
	  • airbag restraints
	  • stretchers
	  • elevated platforms
	• hot cutting equipment
	• electrical equipment
	• hand tools
	• hydraulic equipment
	• lifting and hauling equipment
	• rescue units and stowed equipment
	• stabilisation equipment
	• tool boxes

Personal protective equipment and clothing may include:	• boots • eye protection • gloves • hearing protection • helmets • knee/elbow protection • helmet
Nature of transport may include:	• heavy plant e.g. bulldozers • light aircraft • trains • trams

Types of collision may include:	• heavy plant:
	  • roll over
	  • impact with stationary object

© Commonwealth of Australia, 2025 Public Skills Australia

	• light aircraft:
	  • on take off and landing
	  • mid-air collision (impact into rural/urban environment)
	  • collision with structure
	• trains/trams:
	  • derailment
	  • roll over
	  • impact with another train
	  • impact with electrical infrastructure
	  • level crossing

Systematic approach must include:	• assessment i.e. on call out and response, en route, scene, liaison, casualties • positioning of vehicle i.e. dangers, access and casualties • procedures i.e. dangers, casualty protection, extrication, warning devices and lighting
Potential hazards and associated risks may include:	• downed powerlines • fuel • hazardous materials • overhead hazards • stability and position of vehicles involved • traffic in and around the incident location • unstable ground
Communication may include:	• radio communications (radio, telephones and information technology) • warning signals
Other relevant personnel may include:	• ambulance officers • company personnel • emergency services personnel • police • technical specialists • utility technicians • vehicle passengers
Rescue scene reconnaissance may include:	• collecting relevant information about casualty/s and hazards • isolating and eliminating utilities • surveying the incident scene
Situational and environmental hazards may include:	• biological hazards such as body fluids and tissue • climate • composite fibres

© Commonwealth of Australia, 2025 Public Skills Australia

	• dangerous goods and hazardous substances • different types of surfaces • dust and wind • noise and vibration • overhead hazards such as falling debris, power lines • pressurised containers • pyrotechnic safety device • structural instability • sharp and jagged objects • water and/or foam run off and oil
Treating hazards may include:	• eliminating the hazard • isolating the area/source • stabilising overhead hazards • using atmospheric monitoring equipment • using ppe and clothing
Potential dangers to be considered when positioning the rescue unit may include:	• downed power lines in the vicinity of the vehicle • down wind of contaminants • fuel • hazardous materials and locations where they collect • oncoming traffic • stability and position of transport involved • traffic in and around the incident location
Accessing the scene must include:	• allowing clear access and egress for other responding vehicles and ambulances • establishing a clear area to manoeuvre personnel, stretchers, charged hose lines and other equipment • placing rescue vehicle at an appropriate distance • specialist transport to move the equipment/personnel
Limitations of operating equipment may include:	• access to incident site • equipment capacities and limitations • working on uneven and soft ground
Functional areas may include:	• debris collection • decontamination • equipment • personnel staging • triage
Warning devices may include:	• flashing lights • traffic warning cones
Impact effects on transport	• damage to onsite hazardous infrastructure

© Commonwealth of Australia, 2025 Public Skills Australia

may include:	• frame deformation • occupant cell/s • structural integrity • supporting infrastructure
Impact effects on casualty/s may include:	• effect of types of collisions on the human body • crush syndrome • trauma
Stabilising the transport may include:	• chains, slings and winches • hydraulics • monitoring stabilisation • re-establishing mechanical braking systems • using step chocks and cribbing blocks
Hygiene precautions may include:	• avoiding contact with body fluids and tissue • decontaminating equipment at scene and placing protective clothing and gloves in a sealed bag for special dry cleaning • establishing decontamination areas • using correct personal protective clothing and equipment • using surgical gloves under protective work gloves
Gaining access to entrapped casualty/s may include:	• accessing doors • accessing emergency exits • accessing front • accessing roof • accessing side • managing electrical supplies • managing glass • removing debris

Primary survey:	• is a methodical process used to quickly identify immediate life threatening injuries and conditions that require intervention
	• should be completed promptly upon initial patient contact if no immediate life threatening injuries and conditions requiring intervention are found during the survey
	• should be completed as soon as possible if it is interrupted
	• should only be interrupted when:
	  • life threatening condition is identified and immediate life saving interventions are initiated
	  • scene conditions require that the patient be moved immediately due to danger to first emergency care responders or the patient

© Commonwealth of Australia, 2025 Public Skills Australia

Treating located casualty/s may include:	• assist medical personnel with patient triage if required • cervical collar • first aid • primary/secondary survey • respiratory protection, if required
Transport design may include:	• heavy reinforced compartment cell • maintaining body rigidity • major components such as frame (chassis), body parts, doors, windows, glass, seats, trim, removable panels, additional fittings and equipment, steering columns and wheels • light framed composite material • new safety systems • two storey transport
Recognised techniques may include:	• casualty packaging • team stretcher handling
Equipment for removing casualty/s may include:	• rescue/spine board • stretchers appropriate for packaging in a range of situations
Preserving the incident scene must include:	• disturbing only to gain access or make scene safe • not disturbing fatality scenes until police investigation activities are completed • preserving integrity of evidence
Recovering, cleaning and servicing of equipment may include:	• checking inventories • cleaning or disposing of contaminated clothing and equipment • inspecting equipment for damage and serviceability
Signs and symptoms of operational stress may include:	• anxiety • critical incident stress • fatigue • flashbacks • highly emotional behaviour • physical discomfort • poor concentration • sleep disturbances
Debriefing may include:	• critical incident stress debriefing • operational analysis • performance evaluations
Documentation may include:	• AIRS/coroner report • notebooks completed

© Commonwealth of Australia, 2025 Public Skills Australia

	• operational debrief
Hygiene precautions may include:	• avoiding contact with body fluids • decontaminating equipment and personnel • washing hands • wearing appropriate protective clothing

Exposure records may include:	• reporting form that documents any exposure that may result in a short- or long-term associated injury such as:
	  • hazardous substances, such as dust, vapours, fumes, radiation and chemical substances
	  • heavy repetitive work over long periods of time
	  • lifting heavy loads
	  • noise
	  • psycho-social hazards (e.g. critical incident stress)

PUASAR030A Undertake trench rescue

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to undertake trench rescue as member of a single agency or multi-disciplinary team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers a range of trench rescue situations.

The unit is typically performed by personnel from emergency services and/or volunteer organisations or organisations working in environments where potential for trench collapse is prevalent.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR022A Participate in a rescue operation

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

essential outcomes of a Unit of Competency.	needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for trench rescue operation	1.1 Operation and task incident information is obtained and analysed. 1.2 Shoring, propping and excavating equipment is identified and prepared for use. 1.3 ***Personal protective equipment*** and ***trench rescue equipment*** is selected relevant to trench rescue operation. 1.4 Any further details of the nature of the rescue are received en route. 1.5 Anticipated hazards and associated risks are discussed with rescue team members while on route.
2. Assess and manage a trench rescue scene	2.1 Physical features of a trench rescue are assessed before deploying rescue resources. 2.2 Trench rescue scene is managed to control access and to maintain a safe and effective operational environment. 2.3 ***Scene management*** procedures are followed in accordance with organisational procedures and legal requirements. 2.4 Communication with other personnel on site is established and maintained. 2.5 ***Situational and environmental hazards*** are assessed, minimised and controlled.
3. Stabilise the trench	3.1 Trench collapse pattern and signs of further collapse are identified. 3.2 Action to minimise further trench collapse is undertaken.
4. Locate and gain entry into a collapsed trench	4.1 Assessment is undertaken of incident scene to determine possible location of casualties. 4.2 Appropriate resources are used to assist in location of casualties. 4.3 Condition of casualties and nature of entrapment is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	ascertained where possible in accordance with organisational procedures. 4.4 Appropriate excavation techniques are employed to gain access to casualties. 4.5 Located casualties are treated in consultation with medical personnel and in accordance with organisational policies. 4.6 Hygiene procedures are followed in accordance with organisational procedures.
5. Remove casualties	5.1 Entrapped casualties are released, treated and stabilised in accordance with organisational procedures. 5.2 Released casualties are removed using ***recognised techniques.*** 5.3 Appropriate actions are taken to preserve incident scene, where required.
6. Conclude rescue operations	6.1 Equipment is recovered, cleaned and maintained according to organisational procedures and manufacturer's guidelines. 6.2 Signs and symptoms of operational stress are recognised and promptly reported. 6.3 ***Operational documentation*** is completed to organisational standards.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- construct and install shoring and propping systems
- operate lifting systems
- operate lowering and hauling systems
- operate ventilation equipment

Required Knowledge

- atmospheric monitoring procedures
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- shoring and propping techniques
- soil stability

- trench collapse patterns

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • shore, prop and shield • recognise further signs of trench collapse • apply safe work practices • extricate casualty minimising further injury to self or others **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved simulated and/or workplace environment involving trench rescues using a range of equipment. **Specific resources for assessment** Access is required to: • appropriate location/venue/trench • organisational rescue equipment • personnel for team-based activities
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation

PUASAR031A Undertake an urban search and rescue Category 2

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to provide safe and effective rescue to an urban search and rescue (USAR) incident as a Category 2 technician who is a member of a USAR task force.

USAR is a specialised technical rescue capability for the location and rescue of entrapped people following a structural collapse.

This unit covers locating and removing trapped and often injured live casualties or deceased victims from partially or totally collapsed structures or environments and providing emergency medical care, where required.

The types of incidents that may require the skills and knowledge of a USAR Category 2 technician working as a member of a USAR task force include earthquake, terrorist incident, aircraft crash, disaster or major structural collapse.

The unit also includes the application of the specialist equipment and techniques used at a USAR incident and the ability to work as an effective member of a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to the role of a USAR Category 2 technician performing this role as a member of a USAR task force.

This role is based on a national capability requirement to deploy competent personnel to any USAR incident.

There are three nationally agreed levels of capability, commencing with PUASAR023A Participate in an urban search and rescue Category 1.

© Commonwealth of Australia, 2025 Public Skills Australia

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR023A Participate in an urban search and rescue Category 1

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and plan to respond to USAR incidents	1.1 ***Personal documentation*** and ***personal kit*** are prepared appropriate to the nature of the incident and length of deployment. 1.2 Operation and ***task information*** is ***sourced*** and analysed. 1.3 Based on incident information received, appropriate ***rescue resources*** are identified, selected and checked to ensure they are ready for use. 1.4 ***Personal protective equipment*** (***PPE***) ***and clothing*** is selected based on the nature of the incident and rescue resources to be used.
2. Mobilise as part of a task force	2.1 Adequate communications are maintained with the task force reconnaissance team while en route to the incident site. 2.2 Personal conduct is in accordance with applicable ***situational and cultural sensitivities*** and organisational. requirements 2.3 ***Briefing*** from ***relevant personnel*** is received on

ELEMENT	PERFORMANCE CRITERIA
	arrival at the incident.
	2.4 Personal hygiene and safety is maintained while deployed in remote conditions.
3. Assess and work within USAR incidents	3.1 ***Rescue scene reconnaissance*** is undertaken with other team members.
	3.2 Scene is ***managed*** to control access and to maintain a safe and effective operational environment.
	3.3 Initial site ***blitz*** is undertaken with other team members..
	3.4 Establishment of a ***base of operations*** is undertaken with other team members as appropriate to the nature of the incident and deployment.
	3.5 ***Communication*** is established with other relevant personnel.
	3.6 ***Appropriate marking systems*** are used.
	3.7 Personal wellbeing and fatigue management strategies are monitored.
	3.8 ***Allocated rescue***, ***logistics and communications tasks*** are undertaken by the operator as directed.
4. Determine location and condition of casualties	4.1 ***Search techniques*** and ***equipment*** are used to locate trapped casualties under the surface, in ***voids and spaces***, and from heights.
	4.2 Nature of casualty entrapment is ascertained where possible.
	4.3 ***Primary survey*** of casualty is undertaken to determine injury type and severity.
5. Gain access to casualties	5.1 Exclusion zone is established to provide a safe working environment.
	5.2 ***Stabilisation techniques*** are utilised to make the collapsed site safe.
	5.3 ***Techniques appropriate to the nature of the entrapment*** are used to access the casualty.
	5.4 Located casualties are ***treated*** in consultation with medical personnel in accordance with organisational policies.
	5.5 Rescue operations are conducted in a ***range of environments.***
	5.6 Incident scene is constantly monitored for situational and environmental ***hazards***, and structural stability to prevent injury to self or others.
6. Remove casualties and	6.1 Casualties and victims are removed using ***recognised***

ELEMENT	PERFORMANCE CRITERIA
victims	***techniques and equipment.***
	6.2 Evidence of victim identity is collected and processed in accordance with jurisdictional disaster victim identification procedures.
	6.3 Appropriate actions are taken to preserve the incident scene where possible for evidentiary purposes.
7. Demobilise as part of a Task Force	7.1 Equipment is ***recovered***, ***cleaned and serviced*** according to manufacturer's guidelines and organisational standards.
	7.2 Disestablishment of the base of operation is undertaken with other team members.
	7.3 Operational readiness is maintained to support redeployment of task force team and individual members, if required.
	7.4 Signs and symptoms of operational stress in self and others are reported to relevant personnel.
	7.5 Fatigue and operational stress of team members is monitored and action is taken to address identified issues.
	7.6 Operational ***debrief*** is attended and ***documentation*** is completed to organisational standards.
	7.7 Hygiene precautions are implemented in accordance with organisational requirements.
	7.8 ***Exposure records*** are completed.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply casualty packaging techniques for confined spaces
- apply marking systems
- cut concrete, reinforcing bar, structural steel, timber and a range of non-structural components and contents
- operate equipment in accordance with organisational procedures
- take notes
- use air bags and other lifting equipment
- use concrete cutting, coring, breaching and lifting equipment
- use generators and lighting equipment safely and effectively

© Commonwealth of Australia, 2025 Public Skills Australia

- use heavy duty cutting, breaking and lifting equipment
- use jacks and props
- use ropes, anchors and rigging systems
- use safe debris tunnelling techniques
- use safe manual handling techniques
- use shoring and cribbing techniques
- use structural collapse rescue equipment
- use visual and audible locating devices
- wear personal protective equipment in accordance with organisational requirements
- work within the responsible agency's command and control structure
- work in teams

Required Knowledge

- agency incident command and control systems
- casualty search techniques, strategies and considerations
- coronial and other legal documentation requirements
- disaster victim identification procedures
- engineering considerations for structural collapse
- equipment capabilities and limitations
- heavy lifting techniques
- improvised explosive devices
- medical considerations and casualty packaging for structural collapse casualties
- operational briefing and debriefing procedures
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- principles of a dynamic risk assessment
- principles of structural collapse operations
- procedures for atmospheric monitoring
- relationship of local USAR teams with local rescue response and emergency management
- relevant legislation and standards
- relevant occupational health and safety (OH&S) principles and procedures
- risks associated with working in a confined space
- signs and symptoms of operational stress
- structural monitoring techniques
- types of construction and collapse

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • work autonomously and as part of a team • maintain situational awareness and be alert to environmental and situational hazards including using acquired knowledge of collapse patterns in structures, be able to assess and evaluate potential risks and hazards and put in place strategies prior to them becoming a threat to the team working in the area • safely use tunnelling techniques • safely use shoring and cribbing techniques, and construct and safely assemble the required range of shoring and cribbing sets needed to allow teams to safely move in and around a collapsed or partially collapsed structure/zone • safely use breaching, coring, cutting equipment • extricate casualty minimising further injury to self or others • apply safe work practices in a range of environments • mobilise and participate in establishing a remote base of operations • prioritise, package and handle patients in surface and confined space environments **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an industry-approved simulated and/or workplace environment where: • rescue techniques are applied throughout a 48 hour (minimum) continuous exercise to incorporate a minimum of three shift changes • designated roles as an active team member are performed within a task force structure and given scenarios • mobilisation and remote living procedures of a USAR task force are rehearsed.

© Commonwealth of Australia, 2025 Public Skills Australia

	Specific resources for assessment Access is required to: • USAR incident or simulation of a USAR incident in a multi-agency response environment • equipment, personnel, facilities etc. appropriate to a USAR incident
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Personal documentation may include:	• field operations guide • medical clearance for international travel • medication lists • passport and other travel documentation • passport photos • personal identification documentation • record of inoculations/vaccinations required for international travel
Personal kit may include:	• suitable and sufficient personal clothing and personal/health items commensurate with the duration and nature of deployment
Task information may	• cause of collapse

© Commonwealth of Australia, 2025 Public Skills Australia

include:	• current situation • emergency evacuation procedures/point • environmental and other hazards • incident location • local cultural awareness • occupancy • other public safety organisations • safety and security, including potential hazards e.g. HAZMAT • special or unusual considerations • type and magnitude of incident • type and number of casualties/vehicles • type of collapse • type of structure • weather
Sources of information may include:	• Emergency Management Australia (EMA) • Global Disaster Alert and Coordination System (GDACS) • incident controller • local emergency management authority (LEMA) • Office of Coordination and Humanitarian Affairs (OCHA) • onsite operations coordination centre (OSOCC) • reception/Departure Centre (RDC) • reconnaissance team • relief web • situation reports • task force leader • team leader • United Nations Disaster Assessment Coordination (UNDAC) • virtual OSOCC
Rescue resources may include:	• atmosphere monitoring equipment • canine search teams • concrete breaking and breaching equipment • cutting equipment for structural steel and reinforcing • earth moving equipment • electrical and lighting • hand tools • heavy lifting equipment • medical equipment • shoring and building stabilisation

© Commonwealth of Australia, 2025 Public Skills Australia

Personal protective equipment and clothing must meet the Australian/New Zealand Standards (if applicable) and may include:	• technical search equipment • vertical access equipment • atmospheric monitoring equipment • boots • breathing apparatus/airlines • chaps • chemical splash suit/fully encapsulated gas-tight suits • ear protection (plugs, and muffs) • eye protection (goggles, glasses) • gloves • hearing protection • helmet and helmet light • knee/elbow protection • masks and respirators • protective clothing • safety harnesses • surgical gloves • thermal clothing • torch • wet weather gear • whistle
Situational and cultural sensitivities may include:	• diversity • ethnicity • gender • INSARAG Guidelines • organisational code of conduct • political • religious
Briefings may include:	• command structure and communication plan • Incident Action Plan • intelligence regarding potential location of casualties within a collapsed structure • liaison with reconnaissance team • recording requirements, logistical arrangements • safety hazards (known and potential), escape routes, refuge areas • situation reports
Relevant personnel may include:	• relevant local emergency management personnel
Rescue scene reconnaissance may include:	• assessment of need for additional resources (equipment and/or personnel)

© Commonwealth of Australia, 2025 Public Skills Australia

	• assessment of situational and environmental hazards • building mapping and note taking • collecting relevant information about structural damage, physical characteristics, casualties, victims, hazards • dynamic risk assessment and implementation of appropriate control measures • establishing communication with local emergency management authority • implementing phases of a collapse rescue plan • isolating and eliminating utilities such as broken gas pipes, damaged electrical wiring, leaking water • relating knowledge of building and structure classifications to the incident scene • securing and preserving the scene • structural assessment and triage • surveying the incident scene • verifying validity of information
Managing the scene to control access may include:	• determining cold, warm and hot zone • restricting access by non-task force personnel • sectorising site of structural collapse and defining boundaries • tag in and tag out procedures
Blitz may include:	• commitment of task force resources to ensure incident scene is surveyed as effectively as possible to identify hazards and determine priorities in accordance with the rescue scene reconnaissance
Base of operations may include:	• base of operations management • communications • equipment maintenance and repair area • food and water • medical care • potential locations • safety and security considerations • sanitation and hygiene • search canine area • shelter for personnel and equipment • waste collection area
Communication may include:	• information technology • internet access • marking systems • radio communications (VHF/UHF) • satellite/mobile phone

© Commonwealth of Australia, 2025 Public Skills Australia

Appropriate marking systems include:	• whistle/horn warning signals • cylume sticks • geographic area structure identification (sectorisation) • INSARAG Guidelines and methodology • location identification within single structures • marking materials • map symbols • marking tape • personnel role identification • signage • structure assessment marking • team function identification • victim extrication marking • victim location marking

Allocated rescue, logistics and communications tasks may include:	• communications tasks:
	  • operate communications in support of the task force
	  • maintain functionality of task force communications equipment
	• logistic tasks:
	  • maintain task force cache
	  • service repairs and maintenance
	  • operate logistically in support of the task force, transport, maintaining base operations
	• rescue tasks:
	  • displacement of structural components to perform a rescue
	  • rescuing entrapped persons from heights/depths/voids
	  • rescuing lightly trapped casualties using equipment appropriate for task
	  • undertaking technical search operations

Search techniques and equipment to locate trapped casualties may include:	• primary surface search and rescue:
	  • audible
	  • line and hail search
	  • physical void search
	  • visual
	  • canine search team
	• technical search equipment:
	  • acoustic/seismic location detectors

© Commonwealth of Australia, 2025 Public Skills Australia

	• search cameras • thermal imaging camera
Voids and spaces may be:	• in basements • in rooms that have not completely collapsed but where the entrance is blocked • in vehicles • lift shafts • sheltered parts of a building that may have avoided damage • under stairs • under a collapsed floor

Primary survey:	• is a methodical process used to quickly identify immediate life threatening injuries and conditions that require intervention
	• should be completed promptly upon initial patient contact if no immediate life threatening injuries and conditions requiring intervention are found during the survey
	• should be completed as soon as possible if it is interrupted
	• should only be interrupted when:
	  • life threatening condition is identified and immediate life saving interventions are initiated
	  • scene conditions require that the patient be moved immediately due to danger to first emergency care responders or the patient

Stabilisation techniques may include:	• controlling entry and entry permits if appropriate • debris tunnelling • removing debris • safe havens • use of shoring and props

Techniques appropriate to the nature of the entrapment must include:	• HAZMAT detection and isolation
	• individually or as part of a team demonstrate s breaking and breaching:
	  • concrete coring
	  • penetrating below to a void space
	  • penetrating laterally through a load bearing wall to a void space
	  • penetrating overhead to a void space
	  • dirty and clean breaches
	• cutting:
	  • concrete

© Commonwealth of Australia, 2025 Public Skills Australia

	• reinforcing bar • structural steel • timber • non-structural components and contents • equipment (shackles, slings, etc.) and expertise to support lifting the loads utilising local heavy equipment (e.g. cranes) • lifting and moving concrete slab • lifting equipment to move loads • individually or as part of a team demonstrate shoring – stabilising and supporting structural components with the use of: • cribbing and wedges • T shore, sloped floor shore, laced post shore, vertical/dead shore; raker/multiple raker shore • split sole shore • window/door shores • horizontal shores • constructing and utilising a vertical raising and lowering system
Treating located casualties may include:	• assisting medical personnel with patient triage if required • first aid • packaging and removal of casualties for handover to local authority • primary/secondary survey • respiratory protection, if required
Range of environments may include:	• act of terrorism such as bombing • aircraft crash • any other structural collapse incident • enclosed and partially enclosed spaces • hazardous, unpredictable, subject to time pressure, chaotic and exposure of responders to risk by day or night • natural disaster such as flooding, cyclone, tsunami, earthquake, bushfire, landslide • operations in confined spaces and voids • urban debris (such as a rubble pile, concrete walls, floors, columns and beams; structural steel, reinforcing bars and timber)
Hazards may include:	• Adverse weather conditions • dangerous goods and hazardous substances • below debris hazards, including:

© Commonwealth of Australia, 2025 Public Skills Australia

	• flooding • oxygen deficient atmosphere • toxic environment • flammable environment • different levels of elevation • biological hazards, including: • body fluids • decomposing bodies • untreated sewage • irrespirable atmospheres • overhead hazards, including: • falling debris • loose or unstable sections of structure • power lines • structural instability due to: • events of nature such as earthquake, flood, landslide, wind • explosions • fire • inadequate construction • surface hazards, including: • climate • different types of surfaces • sharp and jagged objects • water pooling • dust and wind • noise and vibration • utilities
Recognised techniques and equipment for removing casualties may include:	• creation of exit route for technicians and packaged casualty • mechanical advantage hauling/lowering systems • stretcher packaging as appropriate: • rescue/spine board • stretchers appropriate for packaging in a range of situations • team stretcher handling
Recovering, cleaning and servicing equipment may include:	• checking inventories • cleaning or disposing of contaminated clothing and equipment • conducting a general clean up of the rescue work

© Commonwealth of Australia, 2025 Public Skills Australia

	areas • inspecting equipment for damage and serviceability • reviewing the possibility of donating equipment • safety and security issues
Debriefings may include	• assessing equipment function and suitability • identifying opportunities for improvement • identifying and reinforcing areas of positive work practices and systems • identifying welfare needs, and sourcing and implementing solutions • reviewing tactics and techniques and identifying deficiencies and solutions
Documentation may include:	• AIRS/coroner report • communication logs • equipment running and repair logs • incident reports • injury register • memorandums of understanding • near miss forms • notes or sketches and other relevant information required for potential coronal or other legal proceedings • operational debrief • site sectorisation plan

Exposure records may include:	• reporting form that documents any exposure that may result in a short- or long-term associated injury such as:
	  • dangerous goods and hazardous substances, such as dust, vapours, fumes, radiation and chemical substances
	  • heavy repetitive work over long periods of time
	  • lifting heavy loads
	  • noise
	  • psycho-social hazards (e.g. critical incident stress)

PUASAR032A Undertake vertical rescue

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to undertake vertical rescue in a range of emergency situations in natural and man-made environments.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

The application of this unit in the workplace covers a range of vertical rescue situations.

The unit is typically performed by personnel from emergency services and/or volunteer organisations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR022A Participate in a rescue operation

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare and respond to vertical rescue	1.1 ***Operation and task information*** is obtained from a variety of ***sources*** and analysed, and team roles are confirmed. 1.2 ***Vertical rescue equipment*** is selected based on incident information and is checked to ensure it is ready for use. 1.3 Personal protective equipment for vertical rescue is selected.
2. Assess scene	2.1 Appropriate actions are taken to preserve incident scene. 2.2 Scene reconnaissance is conducted and results are reported. 2.3 ***Scene management procedures*** are followed in accordance with vertical rescue procedures and legal requirements. 2.4 ***Physical and environmental features*** of scene are assessed before deploying rescue resources. 2.5 Risk assessment is conducted and communicated as per organisational procedures. 2.6 Access is controlled and a safe and effective ***operational environment*** is maintained. 2.7 Communication with other personnel on site is established and maintained including team and safety briefings relevant to task. 2.8 Location and condition of casualty is determined.
3. Establish vertical rescue system	3.1 Rescue ***system*** is constructed according to type of incident. 3.2 Anchors are established and monitored. 3.3 Equipment is prepared and techniques are used in accordance with manufacturer's guidelines and organisational procedures.
4. Perform vertical rescue	4.1 Hygiene precautions are maintained in accordance with organisational requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.2 Access is gained to casualties or trapped persons using organisationally approved techniques and equipment. 4.3 Casualties or trapped persons are secured and prepared for removal in consultation with medical personnel. 4.4 Casualties are removed using ***vertical rescue techniques*** and equipment while preventing further injury. 4.5 Scene is ***preserved*** for investigating officers.
5. Terminate vertical rescue operations	5.1 Equipment is recovered, cleaned and serviced in accordance with manufacturer's guidelines and organisational procedures. 5.2 Where identified, signs and symptoms of operational stress are recognised and reported. 5.3 Operational debrief is conducted and ***operational documentation*** is completed to organisational standards. 5.4 Decontamination procedures are followed in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- check, service and maintain vertical rescue equipment
- control infection
- escort stretchers in raising and lowering operations
- establish, maintain, monitor and use:
  - ascent and descent systems
  - safety systems
  - stretcher rigging
- implement safe and effective scene management procedures
- manage edge protection
- treat and package casualties
- undertake scene assessment and reporting
- use personal protective and rescue equipment within its safe work limitations
- wear appropriate personal protective and rescue equipment correctly

© Commonwealth of Australia, 2025 Public Skills Australia

- work in a team

Required Knowledge

- breaking strains
- casualty assessment and packaging
- emergency management and interagency arrangements
- equipment characteristics
- operation of high lines (span line, Tyrolean etc.)
- operational briefing and debriefing procedures
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- organisational procedures for operating vertical rescue equipment
- personal hygiene protocols
- principles of suspension trauma
- reconnaissance techniques
- relevant legislation
- relevant occupational health and safety (OH&S) principles and practices
- safe working loads of equipment
- safety factors and safe working loads
- signs and symptoms of operational stress
- vertical rescue concepts and practices
- voice, whistle and other communication systems

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • establish safe systems to gain access to and recover casualties • extricate casualty minimising further injury or discomfort while conducting rescue operation • apply safe work practices **Consistency in performance** Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.
Context of and specific	**Context of assessment**

© Commonwealth of Australia, 2025 Public Skills Australia

resources for assessment	Competency should be assessed in an industry-approved simulated and/or workplace environment involving vertical rescues using a range of equipment. **Specific resources for assessment** Access is required to: • an appropriate venue for vertical rescue activities • organisational vertical rescue equipment and personnel for team-based activities
Method of assessment	This unit may be assessed with the following unit: • PUATEA002B Work autonomously In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operation and task information may include:	• access and egress routes • clearly defining team roles (team leader, safety officer, technicians) • command, control and coordination arrangements • location • magnitude and type of incident

© Commonwealth of Australia, 2025 Public Skills Australia

	• number and type of casualties • other organisations • potential hazards • weather conditions and forecasts
Sources may include:	• pager • people on scene • public • other organisations
Vertical rescue equipment may include:	• anchors • ascending and descending devices • binoculars • edge management devices • edge protection • karabiners • lighting and generator • pulleys • rescue rope to AS 4142.3-1993 Fibre ropes – Man-made fibre rope for static life rescue lines; AS 4143.6-1996 Methods of test for fibre ropes – Resistance to abrasion; AS/NZS 1891 Industrial fall-arrest systems and devices • slings • specialist communications equipment • stretchers • tapes
Scene management procedures may include:	• establishing and monitoring safety zones • establishing barriers and perimeter access controls • liaising with the media • managing bystanders and media • preserving the crime scene
Preserving the incident scene must include:	• disturbing only to gain access or make scene safe • not disturbing fatality scenes until police investigation activities are completed • preserving integrity of evidence
Physical and environmental features may include:	• air quality • anchor points • cold rain • clearances • exhaust or steam outlets • exposed or hazardous electrical conductors • exposed unprotected edges

© Commonwealth of Australia, 2025 Public Skills Australia

	• fuels and chemicals • greasy or oily surfaces • ground stability • high winds • hot and/or humid conditions • hot surfaces • irrespirable atmospheres • loud noises • low light environments • moving machinery • physical features such as slopes: • loose surfaces • sheer face • overhangs • snow and ice • swift water • tides/waves/surf movements • unstable structures
Operational environments may include:	• man-made such as tower structures, mines and shafts • natural such as trees, cliffs, caves
Systems may include:	• edge management • hauling • high line or tyrolean • lowering
Vertical rescue techniques will be determined by:	• organisational policy and procedures • type of vertical rescue system adopted
Operational documentation may include:	• equipment running logs • notes • organisational procedures and related legal requirements • sketches • vehicle logs

Unit Sector(s)

PUASAR033 Perform land based swiftwater and floodwater rescue and recovery

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit covers the competency required to perform land-based swiftwater and floodwater rescues and recoveries as a member of a specialist team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who perform a narrow range of land based rescues from a swiftwater and floodwater environment while applying fundamental operational knowledge and working under direct supervision.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

HLTFA301C Apply first aid

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence

© Commonwealth of Australia, 2025 Public Skills Australia

	Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare and respond to the rescue	1.1 Operation and task information is obtained from communication centre or supervisor. 1.2 ***Rescue equipment/resources*** are identified and selected based on incident information as directed by supervisor. 1.3 ***Personal protective equipment*** is selected based on nature of the rescue operation. 1.4 Any further details of the nature of the rescue are received en route. 1.5 Anticipated ***situational and environmental hazards*** are discussed with rescue team members while on approach.
2 Participate in assessing the rescue scene	2.1 Information is collected from ***relevant persons*** at scene and observations are made of the scene to determine location, number, ***entrapment*** and condition of casualties. 2.2 Potential situational and environmental hazards to self and others are identified and reported to supervisor. 2.3 Control procedures are implemented as directed by supervisor. 2.4 Based on assessment of rescue scene, personal capabilities and limitations are recognised and referred to supervisor. 2.5 Need for additional personnel and/or specialist equipment is reported to supervisor. 2.6 ***Communication*** with other team members is maintained using situation-appropriate techniques and terminology.
3 Participate in developing primary and secondary rescue plans	3.1 ***Rescue and recovery techniques*** suitable to the casualty condition, entrapment, location and swiftwater and floodwater conditions are identified. 3.2 Primary and secondary rescue plans are formulated in consultation with other team members and ***other agencies***, and reported to supervisor. 3.3 Equipment and resources required to perform identified land based rescues and recoveries in

© Commonwealth of Australia, 2025 Public Skills Australia

	swiftwater and floodwater as identified by the rescue plan are selected. 3.4 In conjunction with the primary plan, deployment of the secondary rescue plan downstream is implemented and acted upon.
4 Gain access and perform rescue on casualty	4.1 ***Isolation techniques*** are used to stabilise positioning of casualty to assist in extrication and manage conscious casualty/s. 4.2 Land based rescue techniques and equipment are deployed to gain access to the casualty as identified in the rescue plan. 4.3 Rescue plan is implemented and casualty is extricated from entrapment or secured by using rescue techniques and equipment.
5 Remove casualty from swiftwater and floodwater	5.1 Casualties are retrieved from swiftwater and floodwater using ***recognised techniques for removal*** and in accordance with ***organisational policies and procedures.*** 5.2 Casualties are ***packaged and handled*** in accordance with organisational emergency care procedures, or as directed by ***first aid or medical personnel.***
6 Conclude swiftwater and floodwater rescue	6.1 Prior to leaving the scene, equipment is recovered, cleaned and maintained in accordance with manufacturer's guidelines and organisational procedures. 6.2 During cleaning of rescue equipment and personal protective equipment, hygiene procedures are followed in accordance with organisational procedures. 6.3 Where identified, signs and symptoms of operational stress in self and others are recognised and reported to appropriate personnel. 6.4 Operational debrief is participated in and documentation is completed to organisational standards and job role.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- anticipate and mitigate hazards and risks

© Commonwealth of Australia, 2025 Public Skills Australia

- determine rescue and recovery methods using yell/talk, reach and throw strategies
- identify changes in casualty condition and position
- identify changes in water flow, currents, eddies and other hydrological features
- identify hazards and risks
- inform appropriate people of progress based on organisational procedures
- interact with other members of the rescue team, casualty and others
- provide first aid select equipment and resources
- swim defensively
- throw equipment to reach a swimmer in swiftwater and floodwater
- use equipment to reach a swimmer in swiftwater and floodwater
- work as part of a team and support others in the rescue operation

Required Knowledge

- aggressive and defensive swimming techniques to escape hazards
- basic knots and anchors
- basics of swiftwater and floodwater hydrology and meteorology, and the impact this will have on the water flow
- behaviour of vehicles trapped in swiftwater and floodwater
- composition of team, and roles and responsibilities of team members
- hazards and risks associated with land-based swiftwater and floodwater rescues and recoveries
- organisational communication techniques used during rescue operation
- patient handling and packaging including the treatment of spinal injuries in the context of a swiftwater and floodwater incident
- potential contaminants in water and their potential impact on the rescuer and casualty
- principles of dynamic risk assessment
- principles of entrapment
- psychological considerations of swiftwater and floodwater rescue for the rescuer, casualty (normal survivor behaviour, panic, counter-panic casualty, instinctive drowning response), onlookers and the potential need for support resources
- relevant legislation and organisational policies and procedures to enable safe conduct of all swiftwater and floodwater rescues and recovery activities (e.g. rescue rating system relating to land-based rescues for swiftwater and floodwater)
- rescue and recovery equipment, characteristics, advantages and disadvantages, and its care and maintenance to enable appropriate selection and use
- search techniques

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • assess rescue situation to identify potential hazards and risks, and determine efficient rescue and recovery techniques • select and use rescue equipment and resources, including mechanical advantage systems, in a variety of swiftwater and floodwater rescue and recovery situations • communicate with other members of the rescue team and adapt to problems or issues that may arise during swiftwater and floodwater rescues and recoveries to ensure safety of self and group • evaluate and reflect on own rescue and recovery performance to identify strengths, weaknesses and areas that need improvement **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in swiftwater and floodwater relevant to the job role. **Specific resources for assessment** Access is required to: • simulated swiftwater and floodwater location • personnel for team based rescues • rescue, recovery, safety, first aid and activity-specific equipment and resources
Method of assessment	Assessment should be conducted by direct observation in either the workplace (through recorded subject matter supervision and/or mentoring) or the training environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Rescue equipment/resources must include:	• descenders
	• float ropes
	• harnesses
	• hose inflators and encaps
	• hot stick
	• level ii personal floatation devices
	• life rescue ropes
	• locking ‘d’ alloy carabiners
	• loud hailer
	• portable radios
	• pulleys
	• stretchers
	• strobe lighting
	• throw bags
	• vehicle
	• And may also include:
	  • cyalume sticks
	  • line throwing device
	  • helicopters
	  • safety and first aid equipment
	  • sledge hammer
	  • steel pickets for anchoring

Personal protective equipment must include:	• appropriate footwear
	• appropriate level ii personal floatation devices
	• helmet appropriate for swiftwater and floodwater
	• whistles
	• And may also include:
	  • eye protection
	  • gloves
	  • headlamps
	  • knives
	  • overalls
	  • torches

© Commonwealth of Australia, 2025 Public Skills Australia

	• wet weather gear
Situational and environmental hazards may include:	• adverse water conditions • availability of assistance • below surface debris hazards • biological contaminants • boat wraps • confluence • cushions and/or stacked water cushions • culverts • diseases and infections • downstream and upstream v's • eddies • entrapment hazards • haystacks and standing waves • holes, stoppers and keepers • inundation • lightning • low visibility • manholes • overhead hazards • rocks • snakes and other dangerous animals • strainers • surface debris hazards • undercuts • utilities – electrical • water contaminants • water borne hazards • water depth • water hydraulics • waterfalls • weirs
Relevant persons may include	• bystanders • other agencies • other casualties
Entrapment may include	• body • limb • recirculation • rope entanglements
Communication may include	• hand signals • radio

© Commonwealth of Australia, 2025 Public Skills Australia

	• verbal • whistle signals • written documents
Rescue and recovery techniques must include:	• inflatable fire hoses techniques • reach rescue techniques • throwing bag rescue technique • yelling
Other agencies may include:	• ambulance service • interagency departments • police • state emergency service
Isolation techniques may include:	• hand signals • yelling
Recognised techniques for removal may include:	• manual carry • stretcher
Organisational policies and procedures may include:	• access to medical personnel • code of ethics • communication protocols • emergency care • manufacturer's design specifications and recommendations for equipment use • occupational health and safety • removal of casualties • use, maintenance and storage of equipment
Packaging and handling casualties may include:	• extrication device • stiff neck collar
First aid or medical personnel may include:	• doctors • first aider • nurses • paramedics
Operational debrief may include:	• areas where improvements can be made • organisational strengths that can be built on • validation of the participation of teams and individuals
Documentation may include:	• accident/injury report • incident report forms • risk assessment forms
Organisational standards may include:	• documentation to meet another agency’s operational requirements

PUASAR034 Undertake swiftwater and floodwater rescue and recovery

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit covers the competency required to undertake swiftwater and floodwater rescues and recoveries as a member of a specialist team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who are skilled operators who apply the full range of rescues within a swiftwater and floodwater environment, using some discretion and judgement and relevant theoretical knowledge. They may provide technical advice and support to a team and may adopt a leadership role during the rescue.

A person operating at this level will not be performing under direct supervision.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR033 Perform land based swiftwater and floodwater rescue and recovery

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

© Commonwealth of Australia, 2025 Public Skills Australia

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare and respond to the rescue	1.1 Operation and task information is obtained from communication centre or supervisor. 1.2 ***Rescue equipment/resources*** are identified and selected based on incident information received. 1.3 ***Personal protective equipment*** is selected based on the nature of the rescue operation. 1.4 Any further details of the nature of the rescue are received en route. 1.5 Anticipated ***situational and environmental hazards*** are discussed with rescue team members while on approach and are used as the basis for the development of a rescue plan.
2. Assess the rescue scene	2.1 Information is collected from ***relevant persons*** at scene and observations are made of the scene to determine location, number, ***entrapment*** and condition of casualties. 2.2 Risk assessment on situational and environmental hazards is conducted and control measures to ensure safety to self, other team members and casualty are developed. 2.3 ***Communication*** with other team members is maintained during assessment to gather further information from their observations. 2.4 Request for additional personnel and/or specialist equipment based on risk assessment is reported to supervisor. 2.5 Personal capabilities and limitations of self and other team members are recognised and referred to the supervisor, based on assessment of rescue scene.
3. Develop primary and secondary rescue plans	3.1 ***Rescue and recovery techniques*** suitable to the casualty condition, entrapment, location and swiftwater and floodwater conditions are identified. 3.2 Primary and secondary rescue plans are developed based on risk assessment, identification of appropriate rescue and recovery techniques and

© Commonwealth of Australia, 2025 Public Skills Australia

	consultation from team members and ***other agencies.***
	3.3 Equipment and resources are selected to perform rescues and recoveries as identified by the rescue plan.
	3.4 Job roles and equipment are allocated to other team members.
	3.5 In conjunction with the primary plan, deployment of secondary rescue plan downstream is implemented and is acted upon.
4. Use mechanical advantage systems	4.1 Situations requiring the use of ***mechanical advantage systems*** are identified.
	4.2 Type of system required is determined in accordance with contextual issues, and ***organisational policies and procedures.***
	4.3 Suitable rope and mechanical advantage systems are established to perform rescues and recoveries in a range of situations.
	4.4 System equipment is used in accordance with manufacturer recommendations and organisational policies and procedures, to ensure that design limits are not exceeded.
	4.5 System is modified to increase efficiency, where necessary, and communication is maintained throughout.
5. Gain access and perform rescue on casualty	5.1 ***Isolation techniques*** are used to stabilise positioning of casualty to assist in extrication and management of ***conscious casualty.***
	5.2 ***Craft*** is ***tethered*** to perform a rescue or recovery, where required by the rescue plan.
	5.3 Rescue techniques and equipment are deployed to gain access to casualty as identified in the rescue plan.
	5.4 Rescue plan is implemented and casualty is ***extricated from entrapment*** or secured by using rescue techniques and equipment.
6. Remove casualty from swiftwater and floodwater	6.1 Casualties are retrieved from swiftwater and floodwater using ***techniques for removal*** in accordance with organisational policies and procedures.
	6.2 Casualty is ***packaged and handled*** in accordance with organisational emergency care procedures, or as directed by ***first aid or medical personnel.***
7. Conclude swiftwater and	7.1 Prior to leaving the scene, equipment is recovered,

© Commonwealth of Australia, 2025 Public Skills Australia

floodwater rescue	cleaned and maintained in accordance with manufacturer guidelines and organisational procedures. 7.2 During cleaning of rescue equipment and personal protective equipment, hygiene procedures are followed in accordance with organisational procedures. 7.3 Where identified, signs and symptoms of operational stress in self and others are recognised and reported to appropriate personnel. 7.4 Operational debrief is participated in or conducted, in accordance with role during rescue. 7.5 ***Documentation*** is completed to organisational standards and job role.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

anticipate, identify and mitigate hazards and risks

- apply aggressive, manoeuvring and defensive swimming techniques to escape hazards
- apply entrapment rescue techniques
- apply first aid
- apply search techniques and implement search management procedures
- apply wading techniques

contact rescue

- determine rescue and recovery methods to use according to the routine situation
- handle and package patient
- handle non-powered boat/craft safely

identify changes in casualty condition and position

identify changes in water flow, currents, eddies and other hydrological features

inform appropriate people of progress

- interact with other members of the rescue team, casualty and others
- manage spinal injuries in the context of swiftwater and floodwater incident
- operate in a range of conditions and climates
- select equipment and resources
- swim aggressively and defensively
- throw equipment to reach a swimmer in swiftwater and floodwater
- use rope and mechanical advantage systems

© Commonwealth of Australia, 2025 Public Skills Australia

- use knots and anchors
- work as part of a team and support others in the rescue operation

Required Knowledge

- behaviour of vehicles trapped in swiftwater and floodwater
- composition of team, and roles and responsibilities of team members
- environmental considerations based on whether operating in an urban or rural context
- first aid hazards and risks associated with rescues and recoveries for swiftwater and floodwater
- helicopter operations
- organisational communication techniques used during rescue operations
- potential contaminants in water and their potential impact on the rescuer and casualty
- principles of risk assessment including hierarchy of control and control methods
- psychological considerations of swiftwater and floodwater rescue for the rescuer, casualty (normal survivor behaviour, panic, counter-panic casualty, instinctive drowning response), onlookers and the potential need for support resources
- relevant legislation, and organisational policies and procedures to enable safe conduct of all swiftwater and floodwater rescue and recovery activities
- rescue and recovery equipment, characteristics, advantages and disadvantages, and its care and maintenance to enable appropriate selection and use
- rescue rating system
- signs and symptoms of operational stress
- swiftwater and floodwater hydrology and basic meteorology and the impact this will have on water flow

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • undertake risk assessment to determine and implement control measures • develop and implement appropriate primary and secondary plans for rescue being undertaken • use mechanical advantage system to conduct rescue or recovery • apply organisational policies and procedures relating to swiftwater and floodwater rescue

© Commonwealth of Australia, 2025 Public Skills Australia

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed conducting rescues and recoveries in swiftwater and floodwater relevant to the job role and of sufficient breadth to demonstrate competency. **Specific resources for assessment** Access is required to: • swiftwater and floodwater location • personnel for team based rescues • rescue, recovery, safety, first aid and activity-specific equipment and resources
Method of assessment	Assessment should be conducted by direct observation in either the workplace (through recorded subject matter supervision and/or mentoring) or the training environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Rescue equipment/resources must include:	• ascenders and descenders • boats/IWP/crafts • flares • float ropes • harnesses • hose inflators and encaps • hot stick • level ii personal floatation devices • life rescue ropes • line throwing device

© Commonwealth of Australia, 2025 Public Skills Australia

	• locking ‘d’ alloy carabiners • loud hailer • portable radios • prussiks • pulleys • stretchers • strobe lighting • throw bags • vehicle • And may also include: • cyalume sticks • fins • helicopters • safety and first aid equipment • sledge hammer • steel pickets for anchoring
Personal protective equipment must include:	• appropriate footwear including bootees • appropriate level ii personal floatation devices • gloves • helmet appropriate for swiftwater and floodwater • whistles
and may include	• eye protection • gloves • headlamps • hoods • knives • lycra suit • overalls • torches • wet shirt • wet weather gear • wetsuit
Situational and environmental hazards may include:	• adverse water conditions • availability of assistance • below surface debris hazards • biological contaminants • boat wraps • confluence • culverts • cushions and/or stacked water cushions • diseases and infections • downstream and upstream vs

© Commonwealth of Australia, 2025 Public Skills Australia

	• eddies • entrapment hazards • haystacks and standing waves • holes, stoppers and keepers • inundation • lightning • low visibility • manholes • overhead hazards • rocks • snakes and other dangerous animals • strainers • surface debris hazards • undercuts • utilities – electrical • water borne hazards • water contaminants • water hydraulics • waterfalls • water depth • weirs
Relevant persons may include:	• bystanders • other agencies • other casualties
Entrapment may include:	• body • limb • recirculation • rope entanglements
Communication may include:	• hand signals • radio • verbal • whistle signals • written documents
Rescue and recovery techniques must include:	• basic or defensive swimming position • entrapment and vertical pinning rescue techniques • inflatable fire hoses techniques • line crossing techniques • mechanical advantage system • offensive or aggressive swimming position • reach rescue techniques • throw bag rescue technique

© Commonwealth of Australia, 2025 Public Skills Australia

	• And may also include: • boat and rope rescue system • paddle boat handling • shallow water crossing technique • vehicle rescue techniques
Other agencies may include:	• ambulance service • interagency departments • police • state emergency service
Mechanical advantage systems may include:	• pig-rigs (4:1) • vector pulls • Z rigs
Organisational policies and procedures may include:	• access to medical personnel • code of ethics • communication protocols • emergency care • manufacturer design specifications and recommendations for equipment use • occupational health and safety • removal of casualties • use, maintenance and storage of equipment
Isolation techniques may include:	• hand signals • yelling
Conscious casualty is:	• a casualty who is able to follow commands and assist in stabilising their position
Craft may include:	• flood rescue boats • inflatable rescue boat • motorised inflatable work platforms • rafts
Tethering a craft may include:	• high line with a craft on tether system • two and/or four point boat tether system
Extricating a casualty from entrapment may include:	• alternate entries • controlled release • immediate release
Techniques for removal may include:	• manual carry • stretcher
Packaging and handling a casualty may include:	• extrication device • stiff neck collar
First aid or medical	• doctors

© Commonwealth of Australia, 2025 Public Skills Australia

personnel may include:	• first aider • nurses • paramedics
Operational debriefs may include:	• areas where improvements can be made • organisational strengths that can be built on • validation of the participation of teams and individuals
Documentation may include:	• accident/injury report • incident report forms • risk assessment forms
Organisational standards may include:	• documentation to meet another agency's operational requirements

PUASAR035 Develop plans for deployment of a USAR task force

Modification History

Release	TP version	Comments
2	PUA12 V1	First release.

Unit Descriptor

This unit covers the competency required to prepare and develop Urban Search and Rescue (USAR) task force plans for the deployment of a USAR task force.

Inherent in the development of these plans is the ability to analyse the operational requirements arising from the incident and to determine the requisite team capabilities needed by the task force team/s prior to their deployment inter-and- intrastate, and internationally.

A person performing this role operates a component part of the task force management team. A USAR task force leader is responsible for the management of a task force under his or her command.

It is recognised that a USAR task force will operate within the command and control system established by the organisation within the legislative authority for the incident, which may not be the Australasian Inter-service Incident Management System (AIIMS) or the New Zealand Coordinated Incident Management System (CIMS). However, the USAR task force will operate in accordance with AIIMS or CIMS and will plug into the command and control system used by the host organisation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a person performing the role of a USAR task force leader. This role is responsible for the management of a USAR task force specifically:

- preparation of task force mobilisation and demobilisation plans
- preparation of task force evacuation plans in conjunction with preplanning processes
- preparation of task force redeployment plans
- identification of task force reconnaissance and forward deployment capabilities
- development of briefing papers for the establishment of a reception centre for receiving incoming emergency response teams
- establishment of information management systems for the storing and archiving of data
- development of a communications plan and its management within the task force
- establishment of the task force structure within the USAR environment

© Commonwealth of Australia, 2025 Public Skills Australia

Compliance with legislative or regulatory requirements of Australian jurisdictions or the host country may be required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAOPE004B Conduct briefings and debriefings

PUACOM007B Liaise with other organisations

PUACOM012B Liaise with media at a local level

PUAEMR002B Identify, analyse and evaluate risk

PUAMAN007B Manage financial resources

PUASAR023A Participate in an urban search and rescue Category 1

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Prepare USAR task force for mobilisation	1.1 Request for support is received and task force leader is briefed by ***relevant personnel*** and ***roles and responsibilities*** confirmed. 1.2 ***Agencies involved in the emergency incident*** are confirmed and liaison arrangements established, where required. 1.3 ***Transport***, ***welfare*** and ***mobilisation plans*** are prepared and documented for USAR task force

© Commonwealth of Australia, 2025 Public Skills Australia

	deployment in accordance with the ***emergency management arrangements, policies and procedures*** of the state/territory or country requesting assistance.
	1.4 Plans are based on ***risk management*** within a USAR context.
	1.5 USAR task force resources are organised and recorded in accordance with ***asset management principles*** implemented by the agency.
	1.6 ***Financial considerations when deploying a USAR task force*** are factored into the planning for mobilisation and deployment of resources.
	1.7 Reports and summaries are maintained as required by standard operating procedures.
	1.8 ***Deployment notification processes*** are implemented in accordance with the policies and procedures of the state/territory or country requesting USAR task force.
	1.9 USAR task force briefing is conducted using ***SMEAC-Q*** format.
2. Establish arrangements for mobilisation of USAR task force	2.1 ***Reception centre*** is established and incoming emergency response teams are ***processed*** and ***briefing paper for incoming task force*** is prepared.
	2.2 USAR task force reconnaissance and forward deployment capabilities are confirmed and prepared in accordance with agreed USAR protocols.
	2.3 USAR task force ***deployment briefing*** is conducted.
	2.4 USAR task force is briefed on situational and cultural sensitivities of the country or location to which they are being deployed.
3. Develop plans to support USAR task force arrangements	3.1 ***Communications plan*** is prepared and documented by the task force leader.
	3.2 ***Media plan*** is prepared, implemented and managed.
	3.3 ***Content for an evacuation plan*** is prepared, taking into account a series of ***key factors.***
	3.4 Demobilisation plan is prepared and documented
4. Complete USAR task force administration information	4.1 USAR ***information sources*** are identified.
	4.2 Information is collected, based on identified needs and is reviewed for applicability and accessibility.
	4.3 ***Plans*** that will provide required information are prepared.
	4.4 Timely and relevant information is collected in a form suitable for analysis, interpretation and

© Commonwealth of Australia, 2025 Public Skills Australia

	distribution.
4.5	Available information systems are used to store and retrieve information for planning and decision-making.
4.6	Reports and task force support information, based on information collected and analysed, are prepared and distributed to appropriate personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse situations and plan effectively
- apply risk management processes to planning
- communicate effectively in writing
- delegate tasks effectively
- lead and manage personnel
- liaise with media
- make oral and written presentations
- manage budgets and finances
- prepare briefings and debriefings
- prepare plans to support the role of the USAR task force manager either within Australia or internationally that include:
  - transport of USAR task force physical and canine resources
  - welfare arrangements
  - communications
  - mobilisation
  - deployment
  - redeployment
  - evacuation
  - demobilisation
  - recovery
- resolve conflict
- undertake negotiations

Required Knowledge

- emergency management arrangements within the state/territory/host country
- financial management and assessment management systems
- legislation, statutes and memorandums which a task force manager operates

© Commonwealth of Australia, 2025 Public Skills Australia

(state/national legislation, memorandums of understanding and mutual aid agreements)
- national emergency management policy and arrangements and their impact on USAR and role of the USAR task force manager
- procedures for establishing a reception centre for incoming emergency response teams
- purpose of reconnaissance (for example, need for preplanning of reconnaissance assets, key considerations for a USAR task force reconnaissance team)
- risk management principles and processes
- role and responsibilities of a USAR task force manager
- SMEACS-Q briefing format and content of briefings
- types of briefings and debriefings, and the content and protocols associated with each type
- USAR capability within Australia and New Zealand

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • assess request for assistance and prepare USAR task force capability and resources for inter- and intrastate and international deployment • establish arrangements for deployment of USAR task froce and resources within legislative, policy and other formal arrangements • assess USAR task force requirements and develop requisite plans to support USAR operations in the field **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual or industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • Sample USAR task force plans • Information sources, e.g. emergency management arrangements, international guidelines etc

© Commonwealth of Australia, 2025 Public Skills Australia

Method of assessment	Assessment should be conducted by direct observation in either the workplace (through recorded subject matter supervision and/or mentoring) or the training environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Request for support may include:	• international deployment • inter-intra state or territory deployment
Relevant personnel may include:	• higher authority • local disaster groups • government agencies if deploying internationally
Roles and responsibilities of must include:	• co-ordination and allocation of resources under their supervision • implementing their portion of the incident action plan • maintaining effective two-way information flows within the incident control structure • reporting on incident situation, the progress of operations, emerging risks and the status of resources
Agencies involved in emergency incident may include:	• defence forces • embassies and consulates • foreign affairs agency • national emergency management agencies • police • united nations
Transport plan may include:	• border arrangements

© Commonwealth of Australia, 2025 Public Skills Australia

	• concept of operations • finance • hygiene briefing • medical checks • modes of transport • personnel and equipment • resupply arrangements • route plan
Welfare plan may include:	• critical incident stress management • family welfare • hygiene briefing • on call support personnel • personnel information • pre-deployment interviews • pre-deployment medical checks • quarantine checks
Mobilisation plan may include:	• concept of operations • cultural and ethnic awareness • disaster victim identification • INSARAG guidelines • code of conduct • code of Ethics • standard operating procedures
Emergency management arrangements, policies and procedures must include:	• INSARAG guidelines • Onsite Operations Coordination Centre (OSSOC) • United Nations Disaster Assessment Coordinator (UNDAC)
Risk management process may include:	• identify, analyse and evaluate risks according to agreed criteria in the USAR pre-deployment context • identify and select treatment options • implement treatment options • monitor and review risk strategies
Asset management principles may include:	• equipment and procurement • financial management of delegation • human resources management • jurisdictions asset management system • maintenance • payments • spending limits • testing regimes and depreciation and replacement procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Financial considerations when deploying a USAR task force may include:	• cash security • claims • creation of centres • credit limits and systems to increase limits • discretionary powers finance • financial management practices • financial support lines • industrial agreements • methods of payment • reconciliation processes • responsibilities of task force leader with regard to task force finances • travel • wages
Deployment notification processes may include:	• notification method and processes as applied within the state, territory or nation • utilisation of preplanning information regarding personnel availability
Policies and procedures may include:	• certification of equipment safe to deploy • Civil Aviation Safety Authority (CASA) regulations • dangerous goods for air, road and rail transport • foreign affairs briefings • own nation's aid agency briefing • self-sustainability of task force
SMEACS-Q must include:	• situation • mission • execution • administration and logistics • command and control • questions
Reception/departure centre may include:	• central point for cross border processes • liaison point for incoming USAR task forces • logistical supply point for incoming task forces
Emergency response teams are processed may include:	• additional support, if required • identifying cultural issues, security risk • identifying incoming team's capability • managing self-deployed teams • supplementary resources, for example maps
Briefing paper for incoming task force may include:	• identification of liaison point of contact • identification of logistical requirements of incoming teams:

© Commonwealth of Australia, 2025 Public Skills Australia

	• fuel • food • water • equipment
USAR task force deployment briefing may include:	• location of reception centre • operational framework • transportation requirements • conducting briefings/debriefings are conducted • confirming feedback and analysis of team personnel is confirmed to ensure actual roles are understood • identifying and reporting on follow-up actions • follow up action is identified and reported on • purpose and structure of briefing

Communications plan may include:	• radio frequencies and channels
	• network charts
	• maintenance of records:
	  • personal log
	  • incident notebook
	  • occurrence book
	• reporting templates
	• procedures for maintaining communication log

Media plan may include	• briefing notes • point of contact for media • policy for media engagement • talking points
Content for an evacuation plan may include:	• role of task force leader • key considerations if emergency evacuation is required • risk assessment • security • local contacts • equipment disposal • modes of transport • pre-approval of evacuation plan is sought • medical evacuation of a task force team member
Content for an evacuation plan is prepared, taking into account a series of ***key factors*** may include:	• planning considerations • security • medical communications • equipment disposal • risk assessment • use of planning templates

© Commonwealth of Australia, 2025 Public Skills Australia

Demobilisation plan may include:	• medical evacuation of a task force team member • decontamination • disposal/rehabilitation of cache • logistics planning • move from incident site to base of operations • notification • post operational analysis • task force casualties • transport arrangements from base to home location
Information sources may include:	• emergency management arrangements • international guidelines
Plans may include:	• communications • demobilisation • evacuation • media • redeployment

PUASAR036 Implement and monitor USAR task force plans

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit covers the competency required to establish and manage operational priorities for a deployed urban search and rescue (USAR) task force.

The USAR task force leader approves plans developed for the USAR task force through the approved reporting structure.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a person performing the role of a USAR task force leader. This role is responsible for the management of a USAR task force, specifically:

- conduct of a structural triage at a USAR incident
- implementation of operational priorities by the deployed USAR task force
- establishment of a base of operations
- operational briefs and debriefs throughout the incident
- management of deployed USAR task force
- implementation of the USAR component of the Incident Action Plan
- implementation of the communication plan and information flow within the team and through the established chain of command
- providing leadership to the task force Team and to individual members
- an USAR task force operates within the command and control system established by the organisation with the legislative authority for the incident, but will operate in accordance with AIIMS or CIMS

Compliance with legislative or regulatory requirements of Australian jurisdictions or the host country may be required.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Pre-Requisites

PUASAR035 Develop plans for deployment of a USAR task force

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1. Perform structural triage at USAR site	1.1 USAR task force is briefed on operations portion of the ***Incident Action Plan (IAP)*** using SMEACS-Q format.
	1.2 ***Structural triage principles*** and ***processes*** are applied at the area of operations.
2. Establish and manage base of operations	2.1 ***Location for base of operations*** is confirmed in accordance with USAR task force requirements.
	2.2 Base of operations is established, base camp manager is appointed and arrangements are communicated to appropriate personnel.
	2.3 ***Resources for base of operations*** are acquired and allocated as necessary, and tasks are delegated to appropriate personnel.
	2.4 Base of operations and resources are managed.
	2.5 Security arrangements are identified and communicated to task force staff.
	2.6 ***Fire protection and evacuation plan*** for base of operations is prepared and promulgated to appropriate personnel.
	2.7 Personnel working within base of operations are briefed on key responsibilities and operational priorities.
3. Manage deployed USAR	3.1 Task force ***communications*** and ***welfare plans*** are

© Commonwealth of Australia, 2025 Public Skills Australia

task force	implemented, monitored and communicated to all relevant personnel. 3.2 Task force members are tasked with the collection. collation and archiving of operational information. 3.3 Task force internal and external reporting arrangements are established and information flow is monitored to ensure it is accurate, timely and relevant. 3.4 ***Information management systems*** are implemented to maintain operational records. 3.5 Media requests are managed in accordance with the ***media plan*** and, where required, a media liaison officer is appointed. 3.6 USAR ***task force logistics*** is managed, and a logistics officer is appointed and delegated the appropriate financial delegation. 3.7 Financial expenditure for the deployed task force is managed and appropriate financial control measures are implemented. 3.8 ***Liaison*** function for the deployed task force is delegated and arrangements are managed.
4. Manage implementation of and monitor the USAR operations portion of, the IAP	4.1 Preparation of the USAR operations portion of the IAP is managed. 4.2 Implementation of the USAR operations portion of the IAP is managed in accordance with agreed procedures. 4.3 Actions to ensure the safety, health and welfare of task force members at the incident are authorised. 4.4 Identified risks are mitigated within the scope of USAR operations and safe work practices are monitored and adhered to. 4.5 Strategies implemented are consistent with the approved IAP. 4.6 Ongoing exchange is maintained with supervisor on incident situation, progress towards achievement of allocated tasks, when IAP is to be modified, when additional resources are needed and when significant events occur. 4.7 Ongoing exchange is maintained with USAR task force regarding work progress, resource status and location, and any significant changes or emerging risks. 4.8 Regular and timely reports are prepared and distributed.

© Commonwealth of Australia, 2025 Public Skills Australia

	4.9 Activities with adjacent areas of operations are coordinated. 4.10 Log of activities is maintained.
5. Redeploy USAR task force	5.1 USAR ***task force redeployment plan*** is implemented in accordance with emergency management arrangements. 5.2 Reconnaissance deployment briefing is conducted for USAR task force. 5.3 USAR task force is deployed and reconnaissance operations are supervised and managed. 5.4 ***Reception/departure centre*** is established and incoming emergency response teams are processed.
6. Demobilise and evacuate USAR task force	6.1 USAR ***task force demobilisation plan*** is implemented, stages of demobilisation are taken into consideration and preplanning of demobilisation is undertaken. 6.2 Approvals for disposal and decontamination are sought form relevant authorities. 6.3 USAR ***task force evacuation plan*** is prepared in conjunction with mobilisation pre-planning processes and is implemented.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse a range of structures and apply structural triage principles
- analyse risk assessment, reconnaissance and intelligence to determine operational priorities
- conduct briefings
- delegate effectively
- lead and manage personnel
- make decisions
- make presentations, specifically to the media
- manage own work load
- manage time effectively and deal with multiple issues
- prepare a range of plans to support USAR task force operations
- report on operational progress
- resolve conflict
- solve problems

© Commonwealth of Australia, 2025 Public Skills Australia

- undertake negotiations

Required Knowledge

- contents of all plans prepared to support and direct USAR task force
- format and content of briefing to be conducted
- purpose and content of Incident Action Plan
- risk management principles and processes
- structure triage principles and processes
- task force leader responsibilities during the response phase of an incident

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • assess area of operations, manage application of structural triage processes and determine operational strategies and priorities in line with the IAP • manage achievement of USAR task force operational priorities and effectively implement support plans • manage demobilisation, redeployment and evacuation of USAR task force **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual or industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • emergency situations or simulation of emergency situations, in a multi-team response environment • equipment, personnel, facilities etc. appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control

© Commonwealth of Australia, 2025 Public Skills Australia

Method of assessment	Assessment should be conducted by direct observation in either the workplace (through recorded subject matter supervision and/or mentoring) or the training environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident Action Plan (IAP) may include:	• accommodation and welfare arrangements • communications plan • division or sector plans • incident objectives • information on alternative strategies • information plan for dissemination of information to all stakeholders • information regarding the necessary logistical arrangements • management arrangements, including establishment of sectors and divisions • management structure, if established • maps or site plans of the incident • medical plan and consideration of workplace health and safety issues • resources to be allocated to each division and sector • statement of current situation and predictions of the incident's likely development (including key risk exposures) • strategies to achieve defined incident objectives • structural chart depicting the personnel in the incident management arrangements, including establishment of divisions and sectors

© Commonwealth of Australia, 2025 Public Skills Australia

	• timings of meetings and changeovers • traffic management • weather
Structural triage principles may include:	• composition of triage teams • detailed triage assessment of allocated structures • initial triage at incident site • hazard identification • priorities of a triage team
Structural triage processes may include:	• establishment of operational priorities • preparation of triage documentation • re-evaluation of structures as situation changes
Location for base of operations may include:	• establishment timelines • location of local amenities • proximity to other rescue teams • requirements for an effective base of operations • security considerations • short- or long-term • site of task force base camp • transport corridors
Resources for base of operations may include:	• self-sustainability cache including task force documentation and equipment such as laptops and generators • database back-up systems
Fire protection and evacuation plan may include:	• assembly area • location of fire blankets • location of fire extinguishers • location of smoke alarms
Communications plan may include:	• confirming communications needs for the effective management of task force operations • establishing communications networks both internally and externally • promulgating the communications plan to task force and other personnel • monitoring the performance of the communications systems and modifying if necessary • establishing supervisory and communications arrangements with the task force
Welfare plan may include:	• peer support • psychological, physical and religious needs
Information management systems may include:	• self-sustainability cache • sufficient redundancy

© Commonwealth of Australia, 2025 Public Skills Australia

Media plan may include:	• assessment of operational priorities and provision of information to the media • control of access to scene, personnel and victims • holding statements • location for media briefing area
Task force logistics may include:	• chain of supply for consumables • self-sustainability cache management • transport
Liaison may include:	• local emergency management authority • onsite operations coordination centre (OSOCC) • other relevant authorities • other respondent task force management teams • reception/departure centre
Task force redeployment plan may include:	• deployment briefing • mobilisation plan • transport plan • welfare plan
Reception/departure centre may include:	• central point for cross border processes • liaison point for incoming USAR task forces • logistical supply point for incoming task forces
Task force demobilisation plan may include:	• decontamination • disposal rehabilitation of cache • from base to home location • logistics planning • move from incident site to base of operations • notification • post operational analysis • task force casualties • type of demobilisation (part or full) • welfare
Task force evacuation plan may include:	• equipment disposal • key considerations if emergency evacuation is required • local contacts • medical evacuation of a task force team member • modes of transport • risk assessment • role of task force leader • security • seeking pre-approval of evacuation plan

PUASAR037 Review USAR task force plans implemented at an incident

Modification History

Release	TP version	Comments
1	PUA12 V1	First release.

Unit Descriptor

This unit covers the competency required to review the implementation of urban search and rescue (USAR) task force plans and to assess their effectiveness in achieving the incident objective and the needs of a USAR task force.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to a person performing the role of a USAR task force leader. This role is responsible for the management of a USAR task force specifically:

- managing and implementing post deployment review of USAR operations
- applying risk management processes and treating risks within an operational USAR context
- managing critical incident stress
- managing reconstitution of a task force
- managing demobilisation of a task force
- supporting recovery of affected communities

An USAR task force operates within the command and control system established by the organisation with the legislative authority for the incident, but will operate in accordance with AIIMS or CIMS.

Compliance with legislative or regulatory requirements of Australian jurisdictions or the host country may be required.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUASAR035 Develop plans for deployment of a USAR task force

PUASAR036 Implement and monitor USAR task force plans

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
1. Confirm arrangements for conducting a post-operations review of USAR incident	1.1 Roles and responsibilities of USAR task force involved in review of task force ***plans*** and operations are determined. 1.2 Cooperation with ***other agency personnel*** in the conduct of the ***post-operations review*** is consistent with designated roles and responsibilities. 1.3 Information required for post-operations review is identified, sought and received.
2. Perform post-operations review of USAR task force plans	2.1 USAR operations portion of ***Incident Action Plan*** (IAP) and other plans developed to support USAR task force are reviewed. 2.2 Information is conveyed to operational personnel and is recorded promptly and accurately, in accordance with organisational requirements.
3. Assist in the recovery of affected communities	2.3 Requirement for post operational support to the affected community is confirmed through ongoing deployment. 2.4 Data set collected during incident is provided to appropriate authorities to support recovery arrangements.

© Commonwealth of Australia, 2025 Public Skills Australia

	2.5 Consideration is given to the donation of cache equipment to the affected community, where appropriate.
4. Review demobilisation	3.1 Demobilisation process is reviewed against the objectives of the ***demobilisation plan***.
	3.2 Effectiveness of the demobilisation plan is assessed.
5. Complete required post incident reports	4.1 Information and reports are provided to agency and other organisations as required.
	4.2 Operational information from the incident is collected to provide a basis for performance reporting.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse situations and plan effectively
- apply risk management processes to planning
- communicate effectively in writing
- delegate effectively
- lead and manage personnel
- make oral presentations
- manage budgets and finances
- prepare for briefings and debriefings
- resolve conflict
- review effectiveness of plans and make recommendations for improvement
- undertake negotiations

Required Knowledge

- award conditions and leave entitlements
- community reaction in a crisis
- compensation claims and entitlements
- contractual arrangements for deploying and redeploying a USAR task force
- different types of briefings and debriefings and their content
- how to engage the community to assist with recovery
- organisational policy and procedures for responding to critical incident stress situations
- process for implementing CISD/CISM during and after a USAR deployment
- process required for conducting a post-operational review
- purpose of a post-operational review (lessons learned, scope and content of a

© Commonwealth of Australia, 2025 Public Skills Australia

review)
- reconstitution plan and requirements
- risk management principles and process (AS/NZS ISO 31000:2009, Risk management – Principles and guidelines)
- security arrangements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply the processes required for conducting a post operational review • apply problem solving strategies to identified risks and develop options to mitigate them. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in an actual or industry-approved multi-agency simulated workplace environment. **Specific resources for assessment** Access is required to: • operational documentation arising from the deployment • post-incident analysis and agency debrief/s • relevant templates for reporting
Method of assessment	Assessment should be conducted by direct observation in either the workplace (through recorded subject matter supervision and/or mentoring) or the training environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation

© Commonwealth of Australia, 2025 Public Skills Australia

- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Plans may include:	• communications • demobilisation • evacuation • media • redeployment • safety • welfare
Other agency personnel may include:	• defence forces • embassies and consulates • foreign affairs agency • national emergency management agencies • non-government organisations • public safety agencies • United Nations
Post-operations review may include:	• identification of lessons learned • in field operations review • post-mission report • preparation and distribution of a report • review of all plans • task force team management functional analysis
Incident Action Plan may include:	• accommodation and welfare arrangements • communications plan • incident objectives • information on alternative strategies • information plan for dissemination of information to all stakeholders • information regarding the necessary logistical arrangements • management arrangements, including establishment

© Commonwealth of Australia, 2025 Public Skills Australia

	of sectors and divisions • management structure if established • maps or site plans of the incident • medical plan and consideration of workplace health and safety issues • resources to be allocated to each division and sector • statement of current situation and predictions of the incident's likely development (including key risk exposures) • strategies to achieve defined incident objectives • structural chart depicting the personnel in the incident management arrangements, including establishment of divisions and sectors • timings of meetings and changeovers • traffic management
Demobilisation process is reviewed may include:	• coordinate its withdrawal with the OSOCC • provide completed Mission Summary Report to appropriate authority after deployment • report its mission has ended to the appropriate authority

PUASES008A Undertake storm and water damage operations

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to undertake storm and water damage operations as a member of a response team.

This unit replaces PUASES001B Undertake storm and water damage operations.

Application of the Unit

This unit applies to persons responding as a member of a team to storm and/or water damage operations in rural and urban environments which can range in intensity and impact from localised thunderstorm or windstorm events to tropical cyclones.

Similar damage characteristics can also result from other causes, such as vehicles crashing into properties.

Storm damage operations can involve damage to trees and structures.

Flooding, whether caused by slow river rise, storm waters, storm surge or flash flooding, has similar impact in terms of water damage. Techniques for minimising the effects of water entry are common to storm, flood and other water damage events.

Evacuation and rescue by boat are not dealt with as part of this unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for storm and water operations	1.1 ***Operation and task information*** is obtained through ***situational awareness*** and command structure at an incident site 1.2 ***Hazard*** identification, risk assessment and control measures are undertaken as required by organisational policies and procedures 1.3 ***Equipment*** is selected based on incident information and is checked to ensure it is ready for operational use 1.4 Personal protective equipment is selected and worn 1.5 ***Work area isolation methods*** are applied to ensure safety in accordance with organisational policies and procedures 1.6 Support for safe and timely ***evacuation*** is provided, as required
2. Provide information which assists with operations	2.1 Liaison with ***stakeholders*** is undertaken to provide ***information*** which increases awareness of situation, safety and facilitate operational requirements 2.2 Information is provided to team leader, as required
3. Undertake storm and water operations	3.1 Own safety is ensured when undertaking and completing operational tasks by ***working safely*** in conjunction with others 3.2 Debris is removed, cleared and/or controlled to minimise risk of injury and further damage, and safe access to and from incident site is provided 3.3 ***Techniques for temporary repairs*** and/or

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	improvised support are applied in accordance with organisational standard operating procedures to buildings or structures to make safe, minimise further damage and maximise safety
	3.4 ***Sandbagging*** techniques are used to minimise further damage
	3.5 ***Water diversions*** are created to mitigate the effects of damage, as required
	3.6 ***Rescue operation of team member/s*** is performed in accordance with organisational policies and procedures
	3.7 Support is provided to personnel undertaking roof repairs and/or working at height through the ***set up, placement and access to appropriate tools and equipment***
	3.8 Trees causing a hazard to life or property are secured, removed and/or reported according to organisational policies and procedures
4. Complete operations	4.1 Equipment is recovered, cleaned and serviced according to organisational standards and manufacturer's guidelines
	4.2 Equipment failure and/or deficiency is reported according to organisational procedures
	4.3 Signs and symptoms of operational stress in self and others are recognised and reported
	4.4 Information required for ***operational documentation*** and equipment logs is contributed to
	4.5 Debrief is participated in as required by organisational policies and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate with stakeholders, specifically in relation to situational awareness, safety and operational requirements
- construct sandbag barriers
- construct temporary repairs
- identify and use tools, generators, ladders, lighting

© Commonwealth of Australia, 2025 Public Skills Australia

- remove debris safely
- return equipment to operational readiness after use
- take precautions against electrical hazards
- use initiative to operate effectively under direction
- wear appropriate personal protective equipment correctly
- work safely
- work with others in a team

Required Knowledge

- anchors (constructed or improvised)
- hazard identification and risk control techniques
- height operations
- legal issues surrounding entry into property or workplace
- legislation relevant to storm and water operations
- relevant emergency public information and warning strategies
- relevant occupational health and safety principles and practices
- relevant organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- resources to assist with communicating with members of the community
- roof safety systems
- storm and water damage mitigation techniques
- structural safety considerations
- support agencies
- types of pumps and power tools

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- perform effective temporary structural weather proofing techniques to minimise further damage and to make safe
- use mitigation techniques to minimise and/or restrict water damage
- support roof/height operations to complete operations effectively.

© Commonwealth of Australia, 2025 Public Skills Australia

Consistency in performance

Competency should be demonstrated during exercises and/or incidences reflecting environmental variance in a simulated emergency environment or on-the-job.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed completing storm damage and flood mitigation operations, exercises or scenarios as a member of a team acting under direction and general supervision.

Specific resources for assessment

Access is required to:

- incident, exercise or simulation, or series of tasks
- equipment used in storm and water damage operations
- response team.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operation and task

- access and egress routes
- command, control and coordination arrangements

© Commonwealth of Australia, 2025 Public Skills Australia

information may include:

- extent and nature of damage
- location, magnitude and type of event
- potential hazards
- weather forecast

Situational awareness may include:

- systematic information seeking process where operational task information is gathered, monitored and reassessed and includes:
  - damage found
  - evacuation of immediate area
  - evacuation plan
  - hazard assessment
  - hazardous trees
  - height
  - identification of underlying hazards
  - scene assessment
  - size up
  - walk around/inspection of site
  - water levels

Hazards may include:

- adverse weather (particularly high winds and rain)
- animals and insects
- contaminants/chemical/biological
- damaged structures
- debris
- equipment
- fatigue and/or operational stress
- hazardous materials
- mud
- night/low light operations
- people
- terrain
- threatening trees
- time pressure
- traffic
- weather - hot/cold, wet/wind
- utilities including electricity, gas, water and sewerage

Equipment may include:

- anchors
- chainsaws/polesaws
- generators
- hand tools (crowbars, hammers, handsaws, knives, loppers, nails, pliers, screwdrivers, screws, snips)

© Commonwealth of Australia, 2025 Public Skills Australia

	• ladders • lighting • personal protective equipment • petrol and electric • power tools (including drills, reciprocating saw, nail guns, circular saws, tech drivers) • props (acrow props) and shoring materials • roof safety kit • ropes • sandbags and sand bagging machines • submersible and non-submersible pumps • timber batten • timber sheeting • water proofing materials plus their fixings (tarpaulins, plastic sheeting) • water proofing tapes and sealant materials
Work area isolation methods may include:	• placement of barrier • placement of safety cones, demarcation tapes and flashing beacons
Evacuation may include:	• using readily available transport
Stakeholders may include:	• crew members • home owner/s • members of household • other agencies • team leader
Information may include:	• self-help provided to householders either directly or over the telephone • warnings provided face-to-face or over the telephone to householders, by public address systems, such as loud-hailers as defined by operations managers and delivered under direction
Working safely may include:	• Avoiding exposure to contaminated water and mud where possible • Identifying possible structural safety issues • Manual handing • Monitoring and re-assessing • Personal protective equipment • Prompt treatment and reporting of injuries • Public control • Risk assessment • Universal precautions against infection
Techniques for temporary	• coverings

© Commonwealth of Australia, 2025 Public Skills Australia

repairs may include:	• external and internal weatherproofing • replacement • ropes • sealing • stapling • shoring • tape • tarping • tie off/securing
Sandbagging may include:	• constructing walls • constructing water diversion • filling by hand • filling by machine • stacking • using as weights/holding down
Water diversions may include:	• earth walls • fabricated barriers • laying of sandbags • pumping • salvaged material • synthetic materials • tarps/plastic • trenching
Rescue operation of team member/s may include:	• casualty handling • casualty packaging • extrication • rescue of a team member from height
Set up, placement and access to appropriate tools and equipment may include:	• ladders (care and use), climbing techniques, types of ladders, placement/set up, safety, stabilisation, alternatives • lighting placement such as set up, use of generators, placement, types of lighting (torches, portable lighting, headlamps)
Operational documentation may include:	• incident report • injury reporting • log books • notice to occupant • risk assessment

PUASES009A Undertake inland floodboat operations

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to act as a member of a crew of a floodboat on inland waterways in low risk water environments, including in times of flood.

This unit replaces PUASES003B Undertake flood and inland waterways rescue boat operations.

Licensing requirements may apply to this unit.

Prior to this unit, persons should have met organisational policies and procedures for swimming competence.

Application of the Unit

The application of this unit would inform roles and responsibilities of members of a crew operating a floodboat undertaking low risk operations in inland waterways, which may or may not include flooded environments.

The requirements for operation of the floodboat and crew tasks will be determined by the nature of the incident and/or operation, legislative requirements, emergency management plans, organisational policies and procedures and incident context.

Floodboat operators are expected to act as both driver and/or crew of a floodboat. A minimum of two operators is required on a floodboat; one person will be considered to be in charge of the floodboat.

Typical operations may include evacuations, transport, searches, rescues and resupply operations. Floodboat operations may be conducted in urban or rural environments, but do not include offshore operations.

Applicable roles and jobs may involve emergency services personnel, marine operators and waterways management organisations, marine rescue organisation.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for floodboat operation	1.1 ***Operational and task information*** is obtained 1.2 Operational and task information is used to determine response and ***equipment*** requirements 1.3 Equipment is checked for serviceability and is stowed for road transportation to prevent loss or damage 1.4 Pre-launch checks are conducted in accordance with organisational policies and procedures 1.5 Protective equipment is selected and worn, as appropriate
2. Operate floodboat	2.1 ***Hazard*** identification, risk assessment and control measures are undertaken as required by organisational policies and procedures 2.2 Vessel is launched safely 2.3 Pre-start checks are conducted in accordance with organisational policies and procedures 2.4 Start-up procedures are followed in accordance with

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisational policies and procedures, and manufacturers' guidelines
	2.5 Vessel is correctly boarded, loaded and trimmed safety
	2.6 Vessel is operated applying appropriate techniques
	2.7 ***Emergency drills*** are conducted as appropriate and when required
	2.8 Look-out procedures are conducted in accordance with organisational policies and procedures
3. Undertake floodboat tasks	3.1 Floodboat search procedures are conducted as required by organisational standard operating procedures
	3.2 People, supplies, equipment and livestock are transported safely and efficiently
	3.3 People or objects in the water are recovered safely and efficiently
	3.4 Bodies are recovered using organisational procedures to meet coronial requirements
4. Recover and restore floodboat	4.1 Vessel is recovered
	4.2 Vessel and associated equipment are restored, cleaned and serviced according to organisational policies and procedures and manufacturers' guidelines
	4.3 Signs and symptoms of operational stress in self and others are recognised and reported
	4.4 Debriefing requirements are contributed to as required by organisational policies and procedures
	4.5 ***Operational documentation*** is completed in accordance with organisational policies and procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate clearly as coxswain of the vessel
- communicate effectively with people recovered from the water and crew, specifically in relation situational awareness, safety and operational requirements
- handle casualty safely

© Commonwealth of Australia, 2025 Public Skills Australia

- implement floodboat handling techniques
- implement techniques for conducting waterway search
- implement techniques for securing vessels
- rescue persons and recover objects from the water
- return equipment to organisational readiness after use, including appropriate wash-down and motor flush
- work safely

Required Knowledge

- boat handling under adverse conditions including fast flowing currents and operating in towns, around fences and in the vicinity of power lines
- effects of water moving over objects and obstacles
- emergency drills
- local hazards and environmental threats
- local operating procedures
- nature of flood water hazards
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- personal hygiene protocols
- reconnaissance processes
- relevant state/territory legislation, management and inter-service arrangements
- roles and responsibilities of, and relationship with, other emergency services

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- operate a floodboat safely

Consistency in performance

Competency should be demonstrated over one or more exercises, scenarios or incidents. Confident boat handling is developed over time.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed completing floodboat operations, exercises or scenarios.

© Commonwealth of Australia, 2025 Public Skills Australia

Specific resources for assessment

Access is required to:

- relevant exercise, scenarios, simulation, or series of tasks
- equipment used in floodboat operations
- floodboat crew

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operational and task information may include:

- access and egress routes
- flood water
- nearby ramps or launching points
- number and nature of casualties
- potential hazards
- resupply or evacuation requirements
- tidal information
- weather forecast

Equipment may include:

- appropriate equipment required for task, as per organisational procedures
- appropriate trailer
- equipment required under state/territory legislation

© Commonwealth of Australia, 2025 Public Skills Australia

	• organisational approved floodboat/vessel • personal protective equipment, including protection from sun, heat, cold and appropriate footwear
Hazards may include:	• domestic animals • eddies • fast flowing streams and near still waters • floating and submerged debris and snags • heat and cold • night or low light • time pressure • undertows • underwater hazards such as underwater powerlines and fences • weather • wildlife
Emergency drills may include:	• abandon ship • break down • capsize • distress • emergency stop • fire • manoeuvring without motor • person overboard • towing
Operational documentation may include:	• activity reports • floodboat running logs • notes or sketches and other relevant information required for potential coronial or other legal proceedings • passenger/cargo manifest

PUASES010A Plan, activate and maintain a communications network

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to plan, activate and maintain a communications network in routine and operational situations

This unit replaces PUASES004B Establish and maintain a communications network.

Application of the Unit

The application of this unit would inform roles and responsibilities for individuals who plan, activate and maintain a communications network which has existing and established arrangements and equipment.

The requirements for the communications network and associated tasks will be determined by the nature of the routine and operational situation/context, legislative requirements, emergency management plans and organisational policies and procedures.

Applicable roles and jobs may involve emergency services personnel, conservation and land management agencies, tourism operators, search and rescue operators, local government agencies, contractors and volunteer organisations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAOPE013A Operate communications systems and equipment

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify operational communications needs	1.1 ***Operational communications considerations*** and requirements are identified based on operational needs
	1.2 Operational and task information is used to determine communications ***network*** and ***equipment*** requirements
	1.3 Agencies, organisations and individuals involved in operation/s are identified
	1.4 Established arrangements and equipment for communications are identified
	1.5 Hazards and environmental conditions likely to impact on communications requirements are identified, assessed and controlled
2. Establish communications plan	2.1 Communications plan is prepared based on identified operational communications needs
	2.2 ***Appropriate communications strategies*** and equipment are included in communications plan and network
	2.3 Personnel are briefed on requirements of the communications plan
	2.4 Communications plan is implemented, monitored and modified to meet changes in operational situation
3. Activate and maintain communications network	3.1 Prior to activation of the communications plan, communications network is set up and tested as outlined in communications plan and faults are

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	addressed
	3.2 Communications network is activated
	3.3 ***Communications network performance*** is monitored, analysed and adjusted to ensure effective and efficient communications
	3.4 Communications network is modified to meet changes in operational situation and network capacity
4. Terminate communications network	4.1 Communications network is closed down in accordance with organisational policies and procedures and operational requirements
	4.2 Communications network is dismantled and refurbished in accordance with organisational procedures and manufacturers' guidelines
	4.3 Maintenance requirement are recognised, recorded and reported according to organisational procedures
	4.4 Operational documentation is completed in accordance with organisational policies and procedures
	4.5 Efficiency of the communications plan and network is review

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse communications network performance
- communicate technical information clearly and concisely
- interpret topographic, meteorological and geophysical data and its impact on communications
- plan, solve problems and make decisions
- prepare, implement and monitor communications plan

Required Knowledge

- factors that influence communications network performance
- features of different communications equipment
- installation and performance of communications equipment
- operational context and communications pre-plans
- organisational communications policy and requirements

© Commonwealth of Australia, 2025 Public Skills Australia

- organisational communications resources and capabilities
- organisational documentation requirements
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- relevant internet and mobile communication technologies and systems
- resources and capabilities of other communications providers
- role and responsibilities of communications providers
- security issues for operational communications networks

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- establish and maintain an efficient and effective communications network.

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an actual operation, exercise or simulation.

Specific resources for assessment

Access is required to:

- organisational communications equipment
- simulation of network congestion, which may require special approval.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

© Commonwealth of Australia, 2025 Public Skills Australia

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operational communications considerations may include:

- access to an established operations centre or operating in a field situation
- adverse radio or telecommunications conditions
- hazardous or adverse environmental or weather conditions
- limited resources
- pre-planned communications networks
- scope, size and nature of response
- single or multi-agency responses

Networks may include:

- computer based networks linked together by electronic means
- radio networks linking two or more stations directly or by using relays
- repeaters
- satellite and commercial paging
- telecommunication networks
- trunking systems or a combination of these
- wireless area network/local area network, computer based networks

Equipment may include:

- computers
- generators and solar power panels
- operational radio communications equipment
- portable radio repeaters
- signalling devices
- telecommunications equipment

Appropriate communications

- activating pre-planned emergency telecommunication arrangements

© Commonwealth of Australia, 2025 Public Skills Australia

strategies may include:	• contracting arrangements • establishing fixed and mobile communication networks • establishing radio networks • linking telecommunication networks • utilising other communications methods
Communications network performance may include:	• congestion and network overload • equipment failures • network accessibility and clarity • procedure failures

PUASES011A Manage emergency operations

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to manage emergency operations, usually within a single agency command context.

This unit replaces PUASES006B Manage emergency operations.

Application of the Unit

The application of this unit would inform roles and responsibilities for individuals who act as an operational manager during an emergency operation.

Emergency operations are usually the result of an event (such as flood, storm, or bushfire) that generates a significant response requirement over a large area for protracted periods. Operations such as this differ from incidents where relatively small responses are required in tightly defined areas for relatively short periods of time (such as road accidents).

The level and complexity of activities of the operations centre will vary to meet operational requirements.

Operations centres are normally only activated to manage an emergency.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for operations	1.1 ***Operational information*** is obtained and ***hazards*** are identified to permit accurate assessment of the problem 1.2 ***Operational plans*** are activated in accordance with local emergency management practices and procedures 1.3 Operations centre is activated and confirmed as ready for use 1.4 Operations centre staff recall system is activated
2. Manage an operations centre	2.1 Operations centre tasks are ***allocated***, staff ***rosters*** are confirmed and briefings are conducted in accordance with operational plans 2.2 Internal and external liaison networks are activated and maintained to ensure effective communication 2.3 Operations centre staff work is supervised to ensure it meets relevant occupational health and safety (OH&S) and other regulatory requirements 2.4 Physical and financial resources are managed in accordance with organisational policies and procedures 2.5 Operation centre staff are tasked to collect and collate operational information using standard operational procedures (SOPs)
3. Manage operational information	3.1 Information flow is managed in accordance with SOPs 3.2 Operational information is analysed to modify and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	update plans and prioritise tasks in accordance with operational plans and policies
	3.3 Regular and timely situation reports are raised and distributed in accordance with organisational standards
	3.4 Media liaison is managed in line with operational objectives
	3.5 ***Communications and information systems*** are implemented and monitored to ensure operational objectives are met
4. Make operational decisions	4.1 Extent of the operational area and objectives is identified and promptly detailed
	4.2 Operational strategies are identified, assessed and implemented in accordance with local emergency management arrangements and SOPs
	4.3 Hazards are identified and prioritised to ensure response is appropriate to type and scale of event
	4.4 Response teams are rostered in accordance with organisational SOPs
	4.5 Termination of operation is accomplished in accordance with operational standards
5. Provide leadership	5.1 Briefings are conducted with operational members
	5.2 Operational objectives are identified and communicated to operational staff
	5.3 Team cohesion is developed and maintained
	5.4 Conflict is dealt with promptly and appropriately
	5.5 Leadership style is appropriate to the situation
	5.6 Concise, clear delegations and accountability processes are implemented
	5.7 Relevant state/territory equal employment opportunity and OH&S policies are implemented
	5.8 Signs and symptoms of operational stress in self and others are recognised and action is initiated
6. Manage post-operation activities	6.1 Debriefing is conducted with operational members
	6.2 ***Operational reports*** are prepared to organisational standards

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess local community demographic factors such as age and language
- communicate clearly with colleagues and stakeholders
- conduct clear, structured briefings and debriefings with 'lessons learned' reports distributed and acted on as required
- delegate appropriately
- establish an improvised operations centre
- establish an operational plan and adapt plan as circumstances change
- forecast resource requirements
- identify local operational areas of concern and sub-divide as needed
- lead operations centre staff and team leaders
- participate in planning for emergency response, including the setting up of appropriate control, command and coordination structures
- manage communications within and between teams and organisations
- manage operations centre staffing, including rostering, allocation of tasks, and conflict resolution
- manage information
- manage self under stress
- raise regular and timely situation reports
- recognise the need for, and take, personal rest periods
- solve problems and make decisions
- work in a team

Required Knowledge

- emergency management arrangements
- impact of emergency on the community and environment
- local alert and warning systems
- local communications equipment and systems
- local documentation requirements
- local operational briefing and debriefing procedures
- local operating procedures
- locally available resources, their capabilities and access to them
- locally used information management and communications systems
- nature of relevant local hazards and plans, including effects on the provision of communications
- operational communications concepts and practices
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to

© Commonwealth of Australia, 2025 Public Skills Australia

environmental management and sustainability)
- organisational procedures and protocol for media liaison
- principles of conflict resolution
- principles of dealing with cultural diversity
- principles of operational management and response management
- principles of risk management
- relevant operational standards, legislation and local leadership and management principles and practices
- signs and symptoms of operational stress

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- manage operations efficiently and effectively
- make decisions based on sound problem solving techniques
- forecast resource requirements

Consistency in performance

Competency should be demonstrated managing an established centre and an improvised centre on-the-job or through simulated exercises which reflect actual workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed using exercises or scenarios or actual incidents, where appropriate, as a manager of an operation where at least four operational teams are deployed, acting under limited supervision, and with wide discretion to act, in complex situations applying significant depth of knowledge and with responsibility for outcomes.

Specific resources for assessment

Access is required to:

- incidents, scenarios, exercises, simulations, or series of tasks
- established operations centre or resources to construct an improvised operations centre

© Commonwealth of Australia, 2025 Public Skills Australia

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Operational information may include:

- access and egress routes
- estimated duration of emergency
- location of incidents
- location, magnitude and type of event
- nature and extent of damage
- number and nature of casualties
- other organisations working
- potential hazards
- resources available
- weather forecast

Hazards may include:

- adverse weather
- closed access routes
- convergence
- hazardous materials
- industrial sites
- limited access to resources
- protracted response operations
- utilities

© Commonwealth of Australia, 2025 Public Skills Australia

Operational plans may include:	• local • municipal • regional • state/territory or national plans
Allocating tasks:	• will be guided by organisational policies and assessments of tasks • will be allocated based on resources available, response team competency and authority to act
Rosters include:	• any organisational requirements and will meet the welfare and efficiency needs of personnel, including adequate rest and meal breaks and appropriate shift times
Communications and information management systems may include:	• computers • couriers • internet or intranet links • filing systems • mobile/satellite phones • paging • runners • secondary communications nets for example HF, VHF, UHF radio systems
Operational reports may include:	• briefing and debrief reports • organisational reports • reports required for coronial or other legal proceedings

PUASES012A Work as a team member in an emergency operations centre

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to support an emergency operation as a member of a team by providing information collection, collation, dissemination and presentation in an emergency operations centre.

This unit replaces PUASES002B Work in an emergency operations centre.

Application of the Unit

The application of this unit would inform roles and responsibilities of individuals who act as a member of a team within an emergency operations centre at the commencement, during and completion of an incident operational period.

The requirements for operation of the emergency operations centre will be determined by the nature and context of the incident and/or operations, legislative requirements, emergency management plans and organisational policies.

Persons should have met organisational requirements for language, literacy and numeracy and computer literacy, prior to commencing this unit.

Applicable roles and jobs may involve members of emergency services organisations, Police officers, ambulance and paramedic services, fire service personnel and volunteers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Activate an operations centre and initiating systems	1.1 Initial task information is obtained on likely nature of incident response 1.2 ***Operations centre*** is opened in accordance with unit or organisational standing operating procedures (SOPs) 1.3 Communications, information management and computerised systems are activated in accordance with unit or organisational SOPs 1.4 Appropriate ***plans and directories*** are accessed in accordance with the decision on the nature of response 1.5 Operations centre staff are activated in accordance with unit SOPs 1.6 ***Other organisations*** are informed that the operations centre has been activated in accordance with unit or organisational SOPs
2. Collect, maintain and display information	2.1 ***Operational information*** is actively ***sought*** 2.2 Operational information is recorded legibly and/or electronically using ***organisational documentation*** 2.3 Operational priorities are applied according to organisational SOPs

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4 Information is evaluated for currency and correctness, and advice is provided to team leader and/or operational manager
	2.5 Incident files are maintained in accordance with organisational policies and procedures
	2.6 Information displays are ***plotted*** and/or updated as required by organisational SOPs
3. Disseminate information	3.1 Briefing areas are prepared
	3.2 Information for situational reports, operational orders and media releases is assembled for operational manager
	3.3 Relevant information is ***disseminated*** under direction of team leader or operational manager in accordance with organisational policies and procedures
	3.4 Information is distributed within the operations centre in accordance with organisational policies and procedures
	3.5 Clear and relevant information is included in incoming shift hand over
4. Close an operations centre	4.1 Records and information are filed in accordance with SOPs
	4.2 ***Communications systems*** are reset to stand-by modes according to organisational policies and procedures
	4.3 Operations centre is returned to operational readiness as needed to allow rapid reactivation when required
	4.4 Information is provided to team leader or operational manager to assist with post operation reports as requested
	4.5 Signs and symptoms of operational stress in self and others are recognised and promptly reported
	4.6 Debriefing requirements are met
	4.7 Other organisations are informed that the operations centre has been closed in accordance with organisational policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- be understood when speaking English to clients
- complete mathematical calculations and equations correctly
- enter data into computer accurately
- plot information
- read and interpret maps
- undertake phone/radio communications clearly and concisely
- use communication systems and equipment effectively
- use computerised information storage and/or retrieval systems
- write legibly

Required Knowledge

- local and state/territory emergency management organisations
- local and state/territory emergency management plans
- local emergency operations centre activation procedures
- local information management systems
- nature of local hazards and methods of combating these
- organisational emergency operations centres communications systems
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- relevant legislation and regulations
- requests for assistance online
- requirements for drafting situation reports (SITREPs), operation orders
- SOPs
- use of relevant computer and information communication technology systems used in organisational emergency operations centres

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate	Assessment must confirm the ability to: • legibly record and prioritise requests for assistance

© Commonwealth of Australia, 2025 Public Skills Australia

competency in this unit	• work in an operations centre during the day and at night • present information for decision-makers. **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments including participation in two daytime and two night time activities and/or exercises which reflect operational contexts.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the context of a real operation or a simulation. **Specific resources for assessment** Access is required to: • operations centre team • appropriately equipped operations centre.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Public Skills Australia

Emergency operations:	• are usually the result of an event or incident (such as flood, storm, or bushfire) that generates a significant response requirement over a large area for protracted periods • differ from incidents where relatively small responses are required in tightly defined areas for relatively short periods (such as road accidents or domestic structure fires)
Emergency operations centres may be:	• established and purpose-designed to deal with the typical response roles of the unit • field operations centres established to manage particular emergencies and dismantled after the emergency • primarily activated to respond to emergencies and are not normally operational
Plans and directories may include:	• local government plans • national emergency management plans and arrangements • resource and contact directories • response plans for specific hazards • state/territory disaster plans • unit standing operating procedures
Other organisations may include:	• ambulance • defence organisations • emergency service organisations • fire services - metropolitan and/or rural • local authorities • police • state and territory emergency services • suppliers • utility organisations • welfare organisations
Operational information may include:	• access and egress routes • location, magnitude and type of event • estimated duration of emergency • location of incidents • nature and extent of damage • number and nature of casualties • other organisations working • potential hazards • resources available • weather forecast
Seeking information may	• electronic documentation

© Commonwealth of Australia, 2025 Public Skills Australia

include	• information management systems • IT systems • members of the organisation in the field • members of the public • other emergency services organisations • reconnaissance teams • SITREPs • web based information
Organisational documentation may include:	• request for assistance forms • logs • summaries • running sheets • SITREPs • task allocation sheets • requests for assistance • records of conversation - manual and/or electronic • paper based or computerised • other documentation as described in organisational SOPs, T5 or safety management sheets
Plotting operational information may include:	• computer based geographic information systems • frequently used contact numbers • magnetic displays • marking topographical or other cartographic representations • resources available • sketch maps • statistical summaries • warnings • whiteboard information summaries
Disseminating information may include:	• media releases • orders for suppliers • preparing briefing notes • reminders • requests for assistance • summary information for higher authorities • task information to elements of own or other organisations
Communications systems may include:	• computer aided dispatch (CAD) • fax, telephone and radio systems • internet or intranet communications • MMS • other equipment or method (such as couriers) as

PUASES013A Undertake storm and water damage operations performed at heights

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to undertake ***storm and water damage operations*** performed at height as a member of a response team.

Application of the Unit

The application of this unit informs the roles and responsibilities for those undertaking tasks performed at heights to mitigate damage caused by storm.

Height is defined by organisational policy and legislation.

The unit may be applicable to members of emergency services organisations, roof repair services, emergency operators in the mining industry, rural and metropolitan firefighters,

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess situation	1.1 ***Operation and task information*** is obtained through command structure at incident site
	1.2 ***Scene reconnaissance*** is promptly conducted at height and results are reported
	1.3 ***Hazards and environmental conditions*** are assessed and minimised or controlled
2. Mitigate the effects of storm damage	2.1 ***Safety systems for working at heights*** are established and used in accordance with organisational standards
	2.2 ***Equipment*** is selected based on incident information and is checked to ensure it is ready for operational use
	2.3 Personal equipment is prepared and worn as required
	2.4 Techniques are used to minimise further damage and to provide for safe access to and from buildings or structures wherever possible
	2.5 Buildings or structures are ***temporarily repaired*** to make them safe, to minimise further damage and to provide for safe access to and from the property wherever possible
3. Complete operations	3.1 Equipment is recovered, cleaned and serviced according to organisational standards and manufacturers' guidelines, prior to standing down from the operation
	3.2 Signs and symptoms of operational stress in self and others are recognised and reported
	3.3 Operational documentation is completed to organisational standards

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply temporary roof coverings
- communicate effectively with people involved, specifically in relation to situational awareness, safety and operational requirements
- eliminate or control hazards and risks
- identify hazards and define risk
- implement appropriate safety precautions for working at heights, including establishment of roof safety systems
- implement flood safety precautions such as avoiding exposure to contaminated water and mud where possible, wearing protective clothing including gloves and footwear, promptly reporting cuts and abrasions for cleaning, universal precautions against infection
- recognise and use hand and power tools
- use ladders
- use ropes, anchors and rigging systems
- wear appropriate personal protective equipment correctly
- work with others in a team

Required Knowledge

- building construction techniques and building types
- hazard minimisation and control techniques
- legal issues surrounding entry into another person's home or workplace
- local community and demographic factors such as language and culture
- local documentation requirements
- local operating procedures
- local operational briefing and debriefing procedures
- nature of potential hazards including hazardous materials and electricity
- organisational policies and procedures (such as relevant legislation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- relevant occupational health and safety principles and practices
- relevant public information and warning strategies
- roofing materials, associated hazards and repair methods
- signs and symptoms of operational stress
- storm damage and flood mitigation concepts, as described in the Australian Emergency Manual - Storm Damage Operations
- techniques for temporary repair of damaged buildings

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- provide temporary roof waterproofing repairs
- apply techniques to make structure/s and roofing safe.

Consistency in performance

Competency should be demonstrated during exercises and/or incidences, reflecting environmental variance in a simulated emergency environment or on-the-job.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed completing storm damage and flood mitigation operations, exercises or scenarios as a member of a team acting under direction and general supervision; some skills may be demonstrated individually.

Specific resources for assessment

Access is required to:

- incidents, scenarios, exercises or simulations, or series of tasks
- response team
- equipment used in storm and water damage operations

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate

© Commonwealth of Australia, 2025 Public Skills Australia

- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Storm and water damage operations may include:

- flooding, whether caused by slow river rise, storm waters or flash flooding
- operations of different intensity and effect from localised thunderstorm or windstorm events to tropical cyclones
- rural and urban environments
- techniques for minimising the effects of water entry that are common to storm, flood and other water damage events
- vehicles crashing into properties
- wind damage to trees, wind and/or hail damage to structures

Operation and task information may include:

- access and egress routes
- command, control and coordination arrangements
- extent and nature of damage
- location, magnitude and type of event
- potential hazards
- weather forecast

Scene reconnaissance may include:

- systematic information seeking process where operation and task information is gathered on route to and after arrival at the scene

Hazards and environmental conditions may include:

- adverse weather (particularly high winds and rain)
- after dark operations
- damaged structures
- debris
- difficult terrain
- domestic hazards
- equipment
- hazardous materials
- mud
- threatening trees
- time pressure

© Commonwealth of Australia, 2025 Public Skills Australia

	• utilities including electricity, gas, water and sewerage
Safe systems for working at heights:	• are defined in organisational policies, and must, as a minimum, conform to the system described in the *Australian Emergency Manual - Storm Damage Operations*
Equipment may include:	• anchors • chainsaws • cold or wet weather clothing and sun protection • generators • hand tools (including hammers, nails, screwdrivers, screws and portable power tools such as drills) • lighting • personal protective equipment • petrol and electric • props (including acrow props) and shoring materials • pumps - submersible and non-submersible • rescue harnesses • ropes • tarpaulins of various types and materials plus their fixings • water proofing tapes and sealant materials
Temporarily repairing buildings or structures may include:	• all styles of domestic and commercial structures • repairs to structures, walls, doors , windows and/or roofing (especially metal sheeting), replacing tiles, using tarpaulins or other covering materials • tying back trees to prevent them falling on structures

PUASES014A Apply flood and fast moving water safety techniques

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to operate safely and perform self-rescue in and around water which is considered to be in flood and/or fast moving context/environments.

Application of the Unit

The application of this unit applies to persons who will be performing activities/tasks in or around water which is considered to be flood water and/or fast moving, but not specifically rapids, swift water and/or white water.

Roles to which this unit may apply could include emergency services personnel and marine operators.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for operations in or around flood and fast moving water	1.1 Appropriate personal protective equipment (PPE) is selected and used
	1.2 Safe and efficient operational activities are ensured by working and communicating with others as a part of team
	1.3 ***Hazards*** associated with operations are identified
2. Contribute to safe rescue operations in and around flood and fast moving water	2.1 Safe and stable platforms are identified and used to commence rescue activities according to organisational procedures
	2.2 ***Appropriate techniques for safe operations*** from land, vessel and/or water are used
	2.3 Safety of self and others when undertaking rescue operations is monitored
	2.4 Communication with others is undertaken to assist with rescue operations
3. Apply self-rescue	3.1 Potential hazards when operating in moving water are identified
	3.2 Correct ***body position and techniques*** to survive and to minimise injury are adopted
	3.3 Opportunities/activities where others may be trying to assist with self-rescue are identified
	3.4 Communication is undertaken with others on bank/edge/vessel to assist with self-rescue
4. Perform safe self-landing techniques	4.1 Appropriate ***landing techniques*** to safely exit water are applied
	4.2 After consideration of physical ability, type of craft and ***situational variances***, method of landing is selected
	4.3 Safety of others when landing and/or re-entry to a

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	vessel is ensured

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply appropriate self-rescue techniques
- communicate effectively with people involved, specifically in relation to situational awareness, safety and operational requirements
- manoeuvre in flood and/or fast moving water in PPE
- work safely around water

Required Knowledge

- defensive and aggressive swimming techniques
- hazard identification
- hydrology
- possible responses by people involved in flood and fast moving water safety and how to react to these responses

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- perform self-rescue techniques to ensure own safety
- survive in or around inland moving water.

Consistency in performance

Competency should be demonstrated over time in a range of conditions expected in the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed covering a minimum of four possible hazards which are reflective of the workplace environment and context, and are applicable to taking part in activities in flood and/or fast moving

© Commonwealth of Australia, 2025 Public Skills Australia

water.

The relative unpredictability of flood and/or fast moving water events makes relying on on-the-job assessment impractical, so training and assessment will usually involve setting scenarios to be completed either individually or as a member of a team.

Specific resources for assessment

Access is required to:

- incidents, scenarios, exercises or simulations, or series of tasks
- equipment used in flood and/or fast moving water operations.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards may include:

- fauna
- holes
- manmade objects
- rocks
- sieves
- slippery banks and/or landing

© Commonwealth of Australia, 2025 Public Skills Australia

- snags
- stoppers
- strainers
- swift moving water
- undercuts
- waterfalls
- weirs
- wire fences

Appropriate techniques for safe operations may include:

- using a throw bag

Body position and techniques may include:

- aggressive swimming
- defensive swimming
- wading

Landing techniques may include:

- climbing into a vessel
- hauling to shore or bank
- swimming to vessel or shore or manmade structure

Situational variances may include:

- access or egress
- availability of assistance
- current
- depth of water
- imminent hazards
- low light and/or darkness
- prevailing conditions and/or weather
- speed of water movement

PUASES015A Operate over-snow vehicle

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

Unit Descriptor This unit covers the competency required to operate an over-snow vehicle safely, including the systematic, safe and efficient control of all vehicle functions and the effective management of hazardous conditions.

Application of the Unit

This unit applies to the safe operation of an over-snow vehicle for use for transportation of personnel and/or resources/stores in snow covered environments/terrain.

A current, valid driver's license is required to undertake this unit of competency.

Roles to which this unit may apply could include emergency services personnel, wildlife and park rangers, tourism operators and workplace emergency response operators.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake personal safety preparation	1.1 ***Personal protective clothing and equipment*** is selected and checked according to ***organisational procedures***, to ensure it is operational prior to departure 1.2 Personal protective clothing and equipment appropriate to dealing with the hazard is selected, worn/fitted and used in accordance with organisational policies and procedures and manufacturers' guidelines 1.3 Water and food requirements are identified and stowed on the vehicle 1.4 En-route ***rest and shelter areas*** are identified 1.5 ***Survival technique/strategies*** are implemented in accordance with organisational policies and guidelines
2. Prepare over-snow vehicle for operation	2.1 ***Start-up checks*** are completed in accordance with ***operational standards*** 2.2 Engine is started in accordance with ***manufacturer's specifications*** 2.3 ***Instruments and gauges*** are checked to ensure all are operational 2.4 Pre-use checks of over-snow trailer are completed in accordance with manufacturer's specifications and organisational policies and procedures
3. Operate over-snow vehicle	3.1 ***Over-snow vehicle*** is prepared for and safely operated in, terrain suitable to the vehicle

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2 Passengers are briefed on safety and objective of the trip
	3.3 Vehicle ***movement is controlled*** in response to external conditions to ensure personal safety
	3.4 Vehicle is operated in accordance with ***relevant regulations*** and organisational policies and procedures
	3.5 Low risk manoeuvring techniques are used to minimise the likelihood of injury, damage to equipment or property and in accordance with organisational policies and procedures
	3.6 ***Recovery of vehicle techniques*** are used that minimise the likelihood of injury to personnel and equipment, in accordance with agency policies and procedures
4. Navigate to destination and monitor terrain	4.1 Most efficient route of travel is taken by monitoring factors likely to cause delays or route deviations
	4.2 ***Potential access restrictions*** which may limit thoroughfare are identified and arrangements are made to gain access, in accordance with organisational policies, practices and regulatory requirements
	4.3 ***Environmental conditions*** are consistently monitored and acted upon to enable safe operation and to ensure no injury to personnel or damage to property and equipment
5. Clean, maintain and stow vehicle	5.1 Vehicle and equipment are cleaned, maintained, assembled and stowed according to organisational procedures/manufacturers' requirements
	5.2 Vehicle and equipment records are updated in accordance with organisational procedures
	5.3 Faulty equipment is identified, ***recorded and reported*** for repair according to organisational policies and procedures

over-snow vehicle requirements and regulations

vehicle inspection procedures

vehicle operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- drive and ride an over-snow vehicle
- maintain personal safety
- be aware of safety and terrain conditions

Consistency in performance

Competency should be demonstrated in a simulated

© Commonwealth of Australia, 2025 Public Skills Australia

operational situation under varying conditions.

Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in a simulated operational situation under varying conditions. **Specific resources for assessment** Access is required to: • relevant environment • relevant over-snow vehicle
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Personal protective clothing and equipment may include:	• flares • food and water • full/open face helmet • goggles • hearing protectors • personal locator beacon/EPIRB • radios • tent • thermal under clothing

© Commonwealth of Australia, 2025 Public Skills Australia

	• water proof gloves • water proof boots • water proof shell
Organisational procedures may include:	• Australian Standards • equipment manufacturer's specifications and procedures • industry practices • maintenance schedules • occupational health and safety requirements • regulatory requirements
Rest and shelter areas may include:	• camping areas • geographical formations • huts and structures
Survival techniques/strategies may be applied in:	• blizzard • extreme cold • lose of bearing • mechanical breakdown • white out
Start-up checks may include:	• coolant • equipment stowage • fuel • oil • physical check or scan of gauges • visual inspection of vehicle
Operational standards may include:	• Australian Standards • industry standards • international standards • manufacturer's procedures • state/territory standards
Manufacturer's specifications may include:	• engagement procedures • engine characteristics • fuel capacity for range • gross vehicle mass • gross vehicle weight • horsepower rating • radius of turning circle • safety procedures • systems warning functions • vehicle clearances
Instruments and gauges may include:	• brake warning lights • electrical charging

- heated hand grips
- oil pressure
- tachometer
- speedometer
- systems indicators (high beam, turn signals and parking brakes)
- temperature
- warning lights

Over-snow vehicles include:

- purpose built vehicles for snow

Movement is controlled by:

- acceleration and deceleration
- passengers
- riding positions
- steering control
- weight distribution

Relevant regulations may include:

- environmental regulations
- environmental protection regulations
- organisational policies and procedures
- possession of appropriate licence/endorsement
- traffic regulations

Recovery of vehicle techniques may include:

- creeks
- drainage ditches
- gullies
- mechanical breakdown
- soft snow
- water
- water courses

Potential access restrictions may include:

- agency and regulatory requirements
- cultural heritage sites
- environmental areas
- european heritage sites
- hazardous areas
- military areas
- other areas requiring permission and/or authorisation to enter
- seasonal factors
- wilderness areas

Environmental conditions may include:

- effect of weather
- hard surfaces
- ice
- marginal snow
- rocks

© Commonwealth of Australia, 2025 Public Skills Australia

- snow
- snow bridges
- water/melting ice

Recording and reporting procedures may include:

- card systems
- computer databases
- maintenance schedules
- organisational procedures
- record sheets or books
- verbal

Unit Descriptor

This unit covers the competency required to operate safely, perform search operations and apply survival techniques for self and others in an alpine environment.

Application of the Unit

The application of this unit applies to persons who will be performing operational search activities/tasks in an alpine environment and in all weather conditions.

Roles to which this unit may apply could include emergency services personnel and other agencies/organisations involved in searches.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for operation in alpine environments	1.1 Operational and task information is obtained from search coordinator or delegate 1.2 Specific ***hazards*** and ***equipment*** requirements for environment and operational requirements are identified 1.3 Personal protective equipment (PPE) is selected and used 1.4 ***Food and water requirements*** for environment, operations and physical activity as outlined by organisational procedures are identified and selected 1.5 Environment/weather conditions and effects for anticipated period of operational response are determined 1.6 Own ability to meet anticipated ***physical and psychological requirements*** of operation is evaluated and any issues anticipated are reported to team leader
2. Undertake operations in an alpine environment	2.1 Deployment to operational response area is undertaken using transportation in a safe and timely manner 2.2 Specified team role and functions are carried out safely as directed by team leader 2.3 Search safety is maintained as required by organisational procedures 2.4 Search formation and spacings are undertaken and maintained as outlined by team leader and organisational procedures 2.5 Search boundaries are marked in line with task requirements under the direction of team leader 2.6 Observation skills are applied and any clues or

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	objects located are immediately reported in accordance with organisational procedures
	2.7 ***Communication*** within the team is maintained
	2.8 Safety and well being of self and others is monitored and any concerns are reported to team leader
	2.9 Hazards are continually monitored, and any concerns are identified and reported as required by organisational procedures
3. Perform survival techniques	3.1 ***Emergency shelter*** is constructed that is appropriate for ***current and future factors and conditions***
	3.2 Weather conditions and/or information is ***interpreted*** and actions are taken to minimise effects of weather on self and others
	3.3 First aid is applied to self and others as required
	3.4 Lost searcher drills are conducted as required by organisational procedures
	3.5 Welfare of self and others is ***sustained***
	3.6 Situational awareness is maintained and changing environment and weather conditions are responded to in a timely manner
4. Complete recall and stand down procedures	4.1 Search equipment is recovered, cleaned and maintained in accordance with manufacturer's guidelines and organisational procedures
	4.2 Operational debriefing is participated in and required documentation is completed to organisational standards
	4.3 Symptoms of operational stress in self and others are recognised and reported

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply hazard identification and risk management
- construct temporary emergency shelters
- travel in an alpine environment over snow
- work safely, in accordance with organisational policies and procedures

Required Knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

- factors impacting on avalanches
- factors impacting on snow conditions
- minimising impact on environments
- organisational procedures for cleaning and discarding equipment in terms of environmental management and sustainability
- relevant MOUs, agreements, codes of practice as applicable
- signs, symptoms and treatment of hypothermia
- snow shelter construction techniques
- sources of information on weather and snow conditions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- participate in a search in an alpine environment in a safe and effective manner
- apply survival techniques (for self and/or others) in an alpine environment.

Consistency in performance

Competency should be demonstrated in a simulated operational situation under varying conditions.

Context of and specific resources for assessment

Context of assessment

Competency must be assessed covering a variety of hazards which are reflective of the workplace environment and context and are applicable to taking part in activities in variable weather and conditions.

Specific resources for assessment

Access is required to:

- incidents, exercise, or series of assessment activities
- equipment used in alpine operations

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of

© Commonwealth of Australia, 2025 Public Skills Australia

assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazards may include:

- avalanches
- blizzards
- bold wet conditions
- cornices
- extreme wind
- hidden vegetation
- human structures e.g. culverts, drain pipes, weirs, star
- pickets
- ice
- partially frozen waterways
- recreational users
- rising water
- rock wells
- snow bridges
- snow drifts
- steep, slippery or unstable terrain
- UV radiation e.g. sunburn, snow blindness
- vegetation debris
- white outs
- wind chill

Equipment may include:

- activity specific equipment e.g. snowshoes
- alpine specific PPE
- communication devices
- cordage

© Commonwealth of Australia, 2025 Public Skills Australia

- EPIRB/PLB
- first aid kit
- global positioning system
- head lamp
- map and compass
- matches or equivalent
- sleeping bag
- snow shovel
- space blanket/ground sheet
- stove
- tent/bivi
- whistle

Food and water requirements may include:

- additional personal food requirements e.g. cultural, dietary
- appropriate energy foods
- drinking water e.g. carried, field sourced
- emergency ration packs Sufficient for the potential duration of the operation

Physical and psychological requirements may include:

- being sufficiently rested
- current capacity to fulfil operational requirement
- fitness level sufficient for the task and environment
- hydration and nutritional levels
- illness
- personal fears and phobias
- stress level

Communication within the team may include:

- hand signals
- mobile/satellite telephone
- radios
- torches/flashlights
- verbal and non-verbal
- whistles

Emergency shelters may include:

- dugout
- igloo
- improvised shelter e.g. tarp
- snow cave
- snow mound/quin-zhee
- storm shelter - fabric shell
- tent/bivi
- trench

Current and future factors and conditions may include:

- availability of time
- available resources
- construction time

© Commonwealth of Australia, 2025 Public Skills Australia

- environmental conditions
- factors affecting people e.g. physical and mental states
- location
- potential moving snow drift
- prevailing winds
- suitability of snow and location
- timeframe for survival
- visibility

Interpreting weather conditions and/or information may include:

- air temperature
- barometric pressure
- barometric pressure changes
- cloud formation and patterns
- electrical storms
- meteorological data such as:
  - daily and four day forecasts
  - maximum and minimum temperatures
  - rainfall
  - satellite images
  - synoptic charts
- personal observation
- rain/hail/sago/freezing rain
- snowfall
- storm
- UV levels
- warnings
- wind
- wind direction and velocity

Sustaining welfare of self and others includes:

- Sourcing, preparing and monitoring intake of food and water, which includes:
  - cooking food in the field
  - dehydrated foods
  - field sourced water
  - fresh foods
  - high energy foods
  - prepared meals
  - water/energy drinks

PUATEA001B Work in a team

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers competency in working with others and making a positive contribution to the effectiveness and efficiency of a team in a work environment when predominantly under direct supervision. Limited responsibility towards others is required.

Application of the Unit

This unit applies to all workers working in the Public Safety industry, but is particularly relevant to new workers in assisting integration with the organisational team culture of the agency.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

© Commonwealth of Australia, 2025 Public Skills Australia

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to team activities	1.1 Roles and responsibilities of team members are recognised. 1.2 Contribution is made to identifying team goals and objectives. 1.3 ***Activities*** are completed to required standard within timeframe and in accordance with ***organisation's policies and procedures.*** 1.4 ***Assistance*** in the completion of tasks is requested from other team members where appropriate. 1.5 Team members are assisted to ensure efficient and safe completion of tasks in accordance with organisation's policies and procedures. 1.6 Participation by team members is encouraged and acknowledged. 1.7 Changes in allocated role and responsibilities are implemented. 1.8 Team meetings are attended regularly and punctually.
2. Share knowledge and information	2.1 Information relevant to work is communicated effectively with team members to enable efficient completion of tasks in accordance with the organisation's policies and procedures. 2.2 Knowledge and skills are shared between team members.
3. Give and receive support to/from team members	3.1 ***Feedback***/assistance is given to other team members in an appropriate manner. 3.2 Team members are supported in achieving workplace goals. 3.3 Feedback from other team members is acted upon appropriately.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge

- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals. **Consistency in performance** Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated workplace environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Public Skills Australia

Teams comprise	• two or more people working towards a shared purpose
Appropriate situation to request assistance may include:	• difficulty meeting timelines • to comply with occupational health and safety requirements • unsure of best method to complete task • to maximise efficiency
Assisting other team members may include:	• own tasks completed • to comply with occupational health and safety requirements • assistance requested • actions of others do not comply with requirements • other team member appears to be having difficulty completing task
Contribute to workplace goals may include:	• completion of task • achievement of new competencies • development of new skills • attainment of new knowledge • personal development
Activities may include:	• working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies • civil/political emergencies and non emergency operations including community events • public relations – activities • sporting events • parades • festivals
Conditions under which this competency may be required include	• hazardous conditions eg adverse weather • after dark operations • difficult terrain • time pressure • varying time frames from immediate/short term to long term response operations • varying access to equipment/resources necessitating the use of improvised techniques • single or multi organisation responses • dealing with human behaviours that result from emergency situations • non-emergency operations and events eg training and community education
Appropriate feedback on	• acknowledging initiative

© Commonwealth of Australia, 2025 Public Skills Australia

performance may include:	• aptitude • ideas • performance and assistance • providing constructive criticism
Organisation's policy and procedures may vary between sectors and organisations and may include:	• legislation relevant to the operation/incident/response • legislation relevant to the organisation • operational • corporate and strategic plans • operational procedures • operational performance standards • organisation's personnel practices • policy and procedures • organisation's quality standards • organisation's approach to environmental management and sustainability
Communication processes may include:	• established organisation's procedures for recording and reporting • the use of logs • notebooks • pagers • radios and telephones • team members may be geographically dispersed and require communication systems and technology to remain in contact

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Undertake work activities	1.1 Work requirements are identified and undertaken. 1.2 Instructions and directions are understood and implemented. 1.3 Communication is maintained with team leader advising of progress of task/activity. 1.4 Personal safety and safety of others is maintained. 1.5 Any legal requirements and/or ramifications of ***activities*** are communicated to team leader. 1.6 ***Work area*** is determined or selected in accordance with operational or organisation's requirements. 1.7 Equipment is operated in accordance with the manufacturer's specifications. 1.8 OH&S and the organisation's policies and procedures.
2. Accept responsibilities	2.1 Responsibilities are accepted according to the organisation's policy and procedures. 2.2 Team leader is appraised of the outcome of task/activity. 2.3 Any activity that exceeds the scope of the defined task is referred to the supervisor.
3. Set performance requirements	3.1 ***Performance requirements*** are based on objectives and goals and agreed with supervisor.
4. Maintain team performance	4.1 Individual performance is monitored against defined performance requirements and appropriate action taken to maintain performance if required. 4.2 Performance of others is monitored and appropriate action is taken through coaching and mentoring to ensure team objectives and goals are met. 4.3 Supervisor is provided with feedback and constructive advice. 4.4 Issues which cannot be rectified or addressed are referred to the supervisor for appropriate action according to the organisation's policy.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.5 Supervisor is advised of any changes in priorities or tasks.
	4.6 All ***required documentation*** relevant to performance is completed.
5. Act as a team leader as required	5.1 Responsibility for the performance of the team is accepted.
	5.2 Goals are set, tasks identified and presented to team members.
	5.3 Instructions and directions are communicated to team members clearly and unambiguously.
	5.4 Team members' concerns and queries are recognised, discussed and dealt with.
	5.5 Any legal requirements and/or ramifications of team activities are communicated to team members.
	5.6 Duties, rosters and responsibilities are allocated to team members having regard to the skills and knowledge required to properly undertake the assignment or task and according to organisation's policy and procedures.
	5.7 Feedback on own performance is provided as required.
	5.8 Level of authority is recognised and adhered to.
	5.9 Operational debrief is conducted in accordance with the organisation's requirements.

Required Skills and Knowledge

Required Skills

- communicating instructions and directions
- communicating performance expectations
- completing a range of documentation
- encouraging team members
- informal performance counselling
- providing feedback on performance
- representing issues to management
- team building

Required Knowledge

- defined OH&S policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- knowledge of current principles and practices
- legal requirements and ramifications of team activities
- method of monitoring performance
- organisation's policy for referring performance issues
- organisation's policy relevant to hours of work and work allocation
- organisation's requirements for documenting team performance and activities
- procedures and methods of setting performance expectations
- required to work in a team
- team members' duties and responsibilities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in communication of performance expectations and providing feedback to team members. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. Where workplace observation is insufficient simulations or case studies may be used. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Scope of allocated task may include:	• extent of activity • content of activity • degree of responsibility for task
Performance requirements include	• goals • objectives • plans • standards

© Commonwealth of Australia, 2025 Public Skills Australia

	• performance indicators • production rates
Work area may be dependent upon	• activity conducted • road accessibility • logistical support • water availability • vicinity of built-up areas • areas of reduced visibility • distance to operation • hazards • vehicle parking
Performance issues may include:	• occupational health and safety • hours of work details • concerns about ability to complete work • inadequate resources
Appropriate personnel may include:	• manager • human resource personnel • team leader • supervisor • team members
Required documentation may include:	• forms • proformas • incident reports • rosters • timesheets • written reports • logs • standard operating procedures • checklists

Activities may include:	• non operational activities:
	  • tasks
	  • projects
	  • preparing documentation
	• operational activities:
	  • responding in a combat or support role to natural emergencies (fire/flood)
	  • technological/industrial emergencies
	  • civil/political emergencies and non-emergency operations including community events
	  • public relations activities
	  • sporting events

© Commonwealth of Australia, 2025 Public Skills Australia

	• parades • festivals
Conditions under which operational activities may be may include:	• hazardous conditions including adverse weather • after dark operations • emergency operations • difficult terrain • time pressure • varying time frames from immediate/short term to long term response operations • varying access to equipment necessitating the use of improvised techniques • varying levels of resources • single or multi organisation responses

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and maintain a team	1.1 Work contributions or suggestions from staff are continually sought and encouraged. 1.2 Contributions to team operations are acknowledged and suggestions are dealt with constructively. 1.3 Team members' skills are used and developed according to work requirements. 1.4 Team members are consulted about implementing new work practices.
2. Communicate objectives and required standards	2.1 Team members are provided with up-to-date information concerning the objectives and standards required by the organisation. 2.2 Team members' understanding of objectives and standards is checked. 2.3 Organisational standards and values relating to equal employment opportunity, anti discrimination and workplace harassment are modelled and promoted to team members.
3. Manage and improve performance of teams and individuals	3.1 Relevant and realistic team development plans are based on identified strengths and weaknesses of all team members. 3.2 Regular constructive feedback on all aspects of work performance is provided to individuals and the team. 3.3 Performance is assessed and addressed in a fair and timely manner in accordance with organisational guidelines and procedures.
4. Support and participate in development activities	4.1 Training needs of individuals and the team are identified and assessed on a regular basis in line with organisational guidelines and procedures. 4.2 An action plan to meet individual and team training and development needs is developed, agreed and implemented. 4.3 On the job training is provided to the required organisational standard and to meet team needs. 4.4 Team members are encouraged and supported to attend ***training*** and to undertake other ***development***

ELEMENT	PERFORMANCE CRITERIA
	opportunities.
	4.5 Coaching and mentoring are utilised as development tools.
5. Provide leadership to individuals and teams	5.1 The link between the function of the team and the goals of the organisation is understood and communicated to the team.
	5.2 Participative decision making is used to develop, implement and review work of the team and allocate responsibilities where appropriate.
	5.3 Opportunities are given to individuals and teams to develop new and innovative work practices and strategies.
	5.4 Delegation to individuals and team members is appropriate and relevant to team objectives and goals in accordance with organisational policy and procedures.
	5.5 Allocated tasks are within the competence of team members and supported with appropriate authority, autonomy and training.
6. Manage difficulties to achieve positive outcomes	6.1 Potential or actual conflict between team members or between self and other individuals is recognised and addressed.
	6.2 Difficulties in achieving required outcomes are identified, analysed and solutions developed and communicated to appropriate personnel.
	6.3 Individuals experiencing difficulties which cannot be addressed within the team are referred to ***appropriate personnel*** according to organisational policies and procedures.
7. Create and maintain conditions for productive work	7.1 Work environment is monitored to ensure it is maintained in line with organisational standards.
	7.2 Improvements to working environment are recommended and implemented where possible.
	7.3 Workplace hazards are identified or anticipated and managed to maintain safe working conditions.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills

- assessing training needs
- conflict resolution and negotiation
- consulting team members
- interpersonal skills
- leading and supervising individuals and teams
- problem solving
- providing constructive feedback

Required Knowledge

- all organisational policies
- anti discrimination and harassment
- industrial awards and agreements
- legislation relevant to work group activities
- occupational health and safety requirements
- organisational personnel practices and guidelines
- organisational policy relating to equal employment opportunity
- organisational quality standards and values
- principles of effective team operation and leadership
- principles of human resource management
- principles of leadership
- procedures
- protocols and standards affecting work group activities
- relevant training courses and development opportunities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated by team leader meeting objectives and performance requirements. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** A combination of oral or written presentations on the job and/or in a simulated scenario. **Specific resources for assessment** No special requirements.

ELEMENT	PERFORMANCE CRITERIA
1. Manage own work	1.1 Instructions are understood, acknowledged and implemented. 1.2 ***Factors affecting work requirements*** are identified, their impact is assessed and action is taken to ensure work requirements are met. 1.3 Work load is assessed and priorities are set within allocated timeframes. 1.4 Own work is monitored to ensure compliance with organisational requirements. 1.5 Need for additional support is communicated clearly to ***appropriate person.*** 1.6 Tasks are completed and results are achieved with minimum supervision. 1.7 ***Conduct*** is at all times in accordance with organisational policies, procedures and standards.
2. Develop and maintain own expertise	2.1 ***Workplace information*** is accessed and clarification is sought where necessary. 2.2 Currency of required licences and certificates is maintained. 2.3 ***Training and development*** needs relevant to area of work are identified in conjunction with supervisor and are followed up with relevant personnel. 2.4 Programs are participated in to ensure level of expertise meets organisational requirements.
3. Maintain work effectiveness	3.1 Organisational policies and procedures relating to work performance are understood and issues with own wellbeing or performance are discussed with supervisor. 3.2 Signs of personal stress are recognised and managed and ***action*** is taken to ensure continued work effectiveness. 3.3 Peer support is sought when required.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Promote cooperation	4.1 Responsibilities and duties are undertaken in a positive manner to promote cooperation and good relationships. 4.2 Communication with others is conducted in a courteous manner appropriate to the purpose, situation and relationship with the receiver. 4.3 Problems and conflict are recognised and resolved through agreed and accepted processes. 4.4 Contribution of individuals of different age, gender and social and cultural backgrounds are recognised and accessed.
5. Contribute to improving workplace and quality of outcomes	5.1 ***Workplace issues*** are ***raised with appropriate personnel*** and contribution is made to resolve issues in accordance with workplace procedures. 5.2 Work related meetings and ***workplace committees*** are attended/***contributed*** to in line with level of responsibility. 5.3 Suggestions for improvements in work practices and procedures are made. 5.4 Agreed changes to improve work outcomes are implemented.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access and interpret workplace information
- communicate concerns about own fitness/stress
- communicate with people of different ages, cultures, gender, language backgrounds
- participate in meetings/speak in a group

Required Knowledge

- available training and development
- basic principles of participating in meetings
- career progression options
- conflict resolution strategies
- cultural diversity principles
- dress codes
- equal opportunity responsibilities

© Commonwealth of Australia, 2025 Public Skills Australia

- factors which can affect work performance
- implications of change in the workplace on own job (such as introduction of new/amended legislation; introduction of new personnel; introduction of new technology including new communication systems; implementation of new work practices and services; organisational restructures)
- implications of external change on the organisation (such as at an international, national or state/territory level and invoke changes in society, changes to legislation, changes to organisational policies and procedures; community expectations; political changes)
- information on any licensing and certification requirements for driving vehicles and providing emergency care
- organisational policies and procedures (such as legislation relevant to the operation/incident/response; legislation relevant to the organisation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- organisational standards relating to harassment and anti-discrimination
- organisational structure
- positions in the organisation
- potential effects of not meeting commitments
- procedures and standards relating to conduct
- responsibilities of specific personnel
- stress recognition
- structure and function of workplace committees
- variety of communication strategies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • apply organisational policies, procedures and standards in own work performance **Consistency in performance** Competency should be demonstrated over of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on the job or in a

© Commonwealth of Australia, 2025 Public Skills Australia

	simulated work environment. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Public safety organisations may include:	• aquatic rescue • defence • emergency services • fire • natural, cultural resource management personnel • police
Factors affecting work requirements may include:	• contingencies • impact of emergencies/incidents • other work demands • personnel available to assist • sea conditions • time • weather • wind and tide conditions

© Commonwealth of Australia, 2025 Public Skills Australia

Appropriate person may include:	• team leader • team member • supervisor
Conduct may include:	• acting legally, honestly and ethically • complying with dress code • complying with organisational code of conduct • complying with reasonable and lawful instructions • complying with safe work practices • complying with standard operating procedures • contributing to work objectives • disciplinary procedures • treating peers, clients, associates and members of the general community with due respect and courtesy
Workplace information may include:	• brochures • information on noticeboards • internet/intranet • leaflets • magazines • memos, circulars • multimedia • notices • policies • procedures • professional publications • risk/job safety analysis • signs
Training and development needs may include:	• career development/progression • new technology • personal development training • retraining for licensing and certification requirements • stress management
Taking appropriate action for stress may include:	• reporting to supervisor or team leader • seeking counselling • seeking medical advice • seeking peer support
Workplace issues may include:	• change and change management • conflict of interest • conflict with other personnel • conflict with public/others • excessive workloads

© Commonwealth of Australia, 2025 Public Skills Australia

	• new policies and changes • occupational health, safety and welfare • perceived harassment or discriminatory behaviour • perceptions of equity • resource allocation
Raising workplace issues with appropriate personnel may include:	• consultative committee representative • manager • occupational health and safety representative • peers • supervisor • team leader • union delegate
Workplace committees may include:	• consultative committees • occupational health and safety committees • project teams • social committees • special event committees
Contributing to workplace committees may include:	• comments • feedback • questions • reports • suggestions

PUATEA005A Manage own professional performance

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted.
1	PUA00 V8.1	First release on TGA.

Unit Descriptor

This unit covers the competency required to effectively manage one's own professional performance, and to perform ethically and with the integrity required to ensure the public's confidence.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit was developed for personnel working within a public safety environment.

Individuals must operate within laws and organisational policies and procedures but often work in dangerous and fluid environments where they are required to act independently and manage their own performance.

This unit is applicable to any individual in the workplace where the principles of own professional management apply.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Model high standards of personal performance, ethics and integrity	1.1 ***Own performance*** standards consistently serve as a role model for others. 1.2 Personal and professional integrity is maintained to engender confidence and respect. 1.3 Commitment to applicable laws and organisational policies, procedures and objectives is constantly demonstrated. 1.4 Breaches of organisational Codes of Ethics and/or practice are recognised and reported in required manner.
2. Review and monitor own performance	2.1 Required personal and ***professional performance standards*** are identified and acknowledged. 2.2 ***Self-assessment and reflection*** are regularly used to ***monitor performance*** against established standards and to accurately identify personal strengths and weaknesses. 2.3 Formal and informal performance feedback is regularly sought and acted upon appropriately. 2.4 Tasks are carried out to achieve outcomes sought and to minimise resource usage.
3. Develop and maintain ongoing personal competence	3.1 Currency of relevant professional operational competencies is maintained. 3.2 Personal development strategies are identified, planned and implemented, and results are evaluated. 3.3 New organisational developments are identified and the associated knowledge and skills are identified, acquired and applied.
4. Manage personal work priorities	4.1 Jobs/tasks are prioritised and undertaken in accordance with team goals. 4.2 Competing demands are assessed and organised

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	within time constraints to achieve individual, team and organisational priorities.
	4.3 Operational and self development needs are balanced within the work environment.
5. Assist and support other personnel	5.1 Informative and constructive feedback is provided to other personnel in a positive manner.
	5.2 Interaction with others promotes a productive and harmonious work environment.
	5.3 Encouragement, ***support and advice*** is provided to personnel as required.
6. Maintain physical and emotional health	6.1 Levels of personal physical and emotional health are routinely monitored and appropriately managed.
	6.2 Support is sought where required to enable identification and implementation of positive alternatives to personal problems.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- deal with and effectively respond to issues/events that challenge professional ethics
- maintain consistently high levels of personal presentation (such as dress code, mannerisms, respectfulness)
- maintain consistently high levels of 'professional ethics and integrity' in all work practices and dealings with the community
- maintain personal health and stress at a level that will enable optimum operational performance
- plan and implement personal improvement plans
- recognise, accurately assess and acknowledge personal strengths and weaknesses
- report breaches of integrity and behaviour to appropriate authorities
- seek out and respond effectively to feedback related to personal performance

Required Knowledge

- acceptable/non-acceptable behaviour and practices
- cultural awareness
- factors pertaining to job roles that affect/impact on personal health and stress
- internal/external professional support and development mechanisms
- internal procedures for dealing with breaches of professional ethics
- methods for assessing/reviewing personal performance and for planning and

© Commonwealth of Australia, 2025 Public Skills Australia

implementing effective personal improvement strategies
- organisational policies and procedures (such as legislation relevant to the operation/incident/response; legislation relevant to the organisation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- professional integrity and behaviour standards
- relevant organisational Codes of Practice/Ethics
- team dynamics and its impacts on personal work performance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • consistently maintain professional performance standards **Consistency in performance** Competency should be demonstrated over time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed over time and under a range of various operational conditions. **Specific resources for assessment** There are no specific resource requirements for this unit.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment according to the workplace environment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation

	• interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Own performance in the context of this unit may include:	• integrity and behaviour in relation to that expected and implied within organisational stated codes of ethics/practice • professional ethics • statements of values, law, policy and procedures
Professional performance standards:	• are those personal and technical attributes and skills required to undertake the day-to-day tasks and duties of the incumbent's role, to the required workplace performance level
Self-assessment and reflection may include:	• regularly reviewing own performance against established service standards and own personal professional goals and standards • seeking formal and informal feedback, in written and/or verbal formats
Monitoring own performance against established personal and organisational performance requirements may include:	• colleagues • formal/informal organisational initiated performance appraisals • human resource personnel, family and other relevant community members, etc. • identifying personal strengths/weaknesses/issues to be addressed • monitoring supervised staff, colleagues and/or team staff morale • obtaining feedback from supervisors • personal reflective behaviour strategies/methodologies • subordinates
Strategies for improvement may include:	• developing/implementing a personal/professional improvement program, either internal or external to the organisation including such things as: • adapting work rotation to facilitate changing personal/work priorities

© Commonwealth of Australia, 2025 Public Skills Australia

	• cultural awareness • developing improved interpersonal/technical skills • establishing new career paths internal or external to the organisation • formal/informal learning programs • seeking coaching, mentoring, counselling from appropriate personnel to overcome identified limitations • updating stress management abilities • utilising existing strengths to focus future career development
Support and advice may include:	• acting as a field supervisor • acting as a role model/mentor • assisting in induction • formal and informal socialisation • participating in a formal assessment program

PUAVEH001B Drive vehicles under operational conditions

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency to drive vehicles safely, including the systematic, safe and efficient control of all vehicles functions and effective management of hazardous situations under operational conditions.

Application of the Unit

This unit applies to all Public Safety workers who are required to operate vehicles both on and off road during public safety operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is

of Competency.	detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare vehicle for operational response	1.1 The ***vehicle*** is selected to meet operational requirements and is suitable to use in the terrain. 1.2 Preliminary check of the vehicle is completed to ensure it is serviceable. 1.3 Equipment and accessories are checked to ensure they are available and serviceable. 1.4 ***Cabin drill*** and ***start up checks*** are completed in accordance with operational standards. 1.5 Engine is started in accordance with ***manufacturer's specifications.*** 1.6 Audible and visual warning systems are checked to ensure that they are all operational.
2. Drive the vehicle	2.1 Vehicle is prepared for, and safely operated in terrain suitable to the vehicle. 2.2 Vehicles and/or trailers are operated and positioned in accordance with traffic regulations and organisation's policies and procedures and to ensure safe and efficient operation. 2.3 Low risk driving techniques are used which minimise the likelihood of injury to persons or damage to equipment or property and in accordance with the organisation's policies and procedures.
3. Monitor traffic, road and terrain under operational conditions	3.1 Vehicle movement is controlled in response to external conditions to ensure safety of persons. 3.2 The most efficient route of travel is taken through monitoring factors likely to cause delays or route deviations. 3.3 ***Traffic and surface conditions*** are consistently monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment, loads and facilities.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- low risk driving techniques
- monitor and anticipate traffic hazard

Required Knowledge

- ancillary equipment
- appreciation of automotive systems
- emergency vehicle requirements and regulations
- knowledge of emergency vehicle inspection procedures
- knowledge of equipment and accessories
- local area knowledge
- traffic legislation
- traffic rules and regulations
- vehicle operating procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in a practical demonstration of driving skills. Maintaining personal safety, safety awareness and awareness of traffic conditions and other road users is critical. **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.
Context of and specific resources for assessment	**Context of assessment** Competency must be demonstrated in a simulated operational situation under varying conditions. **Specific resources for assessment** Assessment of this competency will require access to a relevant vehicle.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Vehicles may include:

- all types of operational vehicles
- tankers
- troop carrier
- rescue vehicles
- buses
- bulk water carrier
- all terrain vehicles
- pumpers
- aerial appliances
- communication vehicles
- command /control vehicles

Operational conditions may include:

- non-emergency driving
- emergency response driving
- off-road driving
- hazardous environmental conditions
- driving in special environments (e.g. on actual airport movement areas)
- prevailing weather
- time of day/night
- visibility
- recovery

Considerations may include:

- procedures
- traffic conditions
- levels of emergency response
- adverse weather
- traffic regulations
- warning devices
- adverse terrain
- type of vehicle
- adverse surfaces

Cabin drill may include:

- adjustment of seats
- seatbelts
- mirrors and steering
- radio on
- all crew seated/restrained
- dash layout
- gauges

© Commonwealth of Australia, 2025 Public Skills Australia

Start-up check may include:	• warning lights • fuel • coolant • oil • pump • water • equipment/locker security • visual inspection of vehicle • operation of emergency warning devices (lights/sirens) • crew intercom • physical check or scan of gauges
Instruments/gauges may include:	• warning lights • tachometer • temperature • electrical charging • systems indicators (high beam • turn signals • parking brakes) • speedometer • oil pressure • brake warning lights • audible warning devices • water tank level indicator
Relevant legislation and procedures may include:	• traffic regulations • organisation policy and procedures • accident procedures • emergency parking • possession of appropriate licence
Manufacturer's specifications may include:	• engine characteristics • systems warning functions • radius of turning circle • safety procedures • horsepower rating • maximum vehicle weight • fuel capacity for range • clearance height • engagement procedures • no-spin locking differential • anti-lock braking systems
Traffic conditions may	• parking

© Commonwealth of Australia, 2025 Public Skills Australia

include:

- traffic pattern and density
- known peak traffic periods and community functions and events
- effect of weather on roads
- road surface
- visibility

PUAWER001B Identify, prevent and report potential workplace emergency situations

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application, PC and Required Skills revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to identify and prevent the development of workplace emergency situations, or to minimise their consequences, and to report if emergency protection systems, emergency control equipment and evacuation systems are compromised.

For this unit the term workplace is defined as the area encompassed by an individual's responsibilities. All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures, and accepted safe practices.

This unit:

- has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 37452002
- covers the work required before the emergency services or specialist response team arrives
- does not cover the specific use of equipment to prevent workplace emergency situations

Application of the Unit

This unit applies to employees in the workplace within all industries and in all contexts.

This unit places responsibility on individual employees in the workplace to identify, prevent and report potential workplace emergency situations. This requirement is consistent with the legislative obligations of employees as prescribed in OHS legislation. The unit may also be used for planning for future operations in the workplace.

The knowledge and skills gained through the completion of this unit may be applied by all employees across all industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify, monitor and report situations that could lead to workplace emergencies	1.1 Situations that could lead to workplace emergencies are identified. 1.2 Immediate work area is routinely checked for any situations that could lead to emergencies. 1.3 ***Hazardous work*** is monitored to ensure precautions and workplace procedures are followed.
2. Identify, report and correct situations that could prevent workplace emergencies from being safely handled	2.1 Principles of operation of relevant ***emergency protection systems*** are identified. 2.2 Principles of operation of relevant ***emergency control equipment*** are identified. 2.3 Evacuation systems are identified. 2.4 Immediate work area is routinely checked for any situations that could lead to emergency protection systems, emergency control equipment and evacuation systems being made inoperable. 2.5 Situations that could lead to emergency protection systems, emergency control equipment and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	evacuation systems being made inoperable are identified and corrected.
	2.6 Workplace procedures and accepted safe practices are regularly monitored and followed to ensure operability of emergency protection systems, emergency control equipment and evacuation systems.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively
- identify hazards in the workplace that reduce the effectiveness of emergency protection systems, emergency control equipment and evacuation systems
- monitor the work area to identify new and emerging risks on an on-going basis

Required Knowledge

- basic types, principles of operation and limitations of emergency protection systems and emergency control equipment typically installed in the workplace
- hazards in the workplace that reduce the effectiveness of emergency protection systems and emergency control equipment
- procedures for identifying, minimising or preventing, correcting and reporting situations within the organisation that may lead to workplace emergencies
- safe practices applicable to the workplace that help to prevent emergencies
- situations in the workplace that may lead to emergencies
- situations that may make emergency protection systems and emergency control equipment inoperable

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to identify emergency protection systems, emergency control equipment and evacuation systems; to identify and report situations that may lead to or contribute to workplace incidents and/or emergencies.
	Consistency in performance

© Commonwealth of Australia, 2025 Public Skills Australia

	Competency should be demonstrated in the workplace.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace. **Specific resources for assessment** Access to: • scenarios that reflect a range of emergency situations that may be expected in the workplace • appropriate emergency protection systems and emergency control equipment • relevant standards and workplace procedures

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Hazardous work may include:	• handling dangerous goods and hazardous materials (including waste) • hot work • manufacturing • unsafe manual handling • using, mixing and/or moving chemicals • working at heights, in confined spaces, in poorly ventilated spaces or around noise • working around traffic • working with plant and machinery • working with unstable equipment or equipment that has deteriorated
Emergency protection systems may include:	• automatic fire/leak/spill/movement detectors • CCTV • communications systems • manual alarms • passive installations, fire/smoke doors, fire walls • security infrastructure • special hazard identification systems • spill/leak containment systems • sprinkler and deluge systems • warning systems
Emergency control	• communications equipment

© Commonwealth of Australia, 2025 Public Skills Australia

equipment may include:	• escape equipment • fire/smoke detection, alarm, mitigation and suppression systems • first-aid kits • forcible entry tools • initial response firefighting equipment • isolation barriers • personal protection kits • shower and eyewash • spill control kits/equipment
Evacuation systems may include:	• access, egress • exits • procedures
Situations that could lead to emergency protection systems, emergency control equipment and evacuation systems being made inoperable may include:	• blocking egress • compromising security infrastructure or integrity • emergency lighting and/or exit lighting being damaged, missing or under service • locking or blocking exits • impairing exits and/or pathways to exits • interfering with alarm systems • not replacing or replenishing used emergency equipment • not reporting damage to emergency control equipment or facilities • propping open fire/smoke doors

PUAWER002B Ensure workplace emergency prevention procedures, systems and processes are implemented

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to implement workplace emergency prevention procedures within a workplace or a defined group of workplaces.

The person undertaking this work may be supervising some people in the workplace. All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures, and accepted safe practices.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745—2010.

Application of the Unit

This unit applies to employees in the workplace within all industries and in all contexts.

This unit places responsibility on individual employees in the workplace to implement workplace emergency prevention procedures, systems and processes; coordinate workplace emergency prevention inspections; review and report on workplace procedures; and undertake routine hazard analysis consistent with job function.

The knowledge and skills gained through the completion of this unit may be applied by employees across all industries.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively
- delegate affectively according to workplace procedures and level of responsibility
- effective leadership and decision-making to ensure safety in the workplace
- monitor and review the work area to identify new and emerging risks on an ongoing basis

Required Knowledge

- basic types, principles of operation and limitations of emergency prevention and protection systems and emergency control equipment typically installed in the workplace
- hazard analysis processes
- reporting procedures
- workplace procedures to rectify problems

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to identify workplace emergency prevention procedures and to ensure these procedures are routinely implemented.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- relevant workplace hazard analysis results

ELEMENT	PERFORMANCE CRITERIA
1. Manage emergency measures and practices	1.1 ***Emergency prevention measures***, practices and control equipment are identified, documented and disseminated according to the requirements of the workplace emergency procedures. 1.2 Purchasing, installation and commissioning procedures are followed. 1.3 Instructions in the safe and effective use and care of ***emergency control equipment*** are documented and disseminated. 1.4 ***Situations that could lead to workplace emergencies*** are identified and recorded, and options for mitigating or avoiding these situations are formulated, tested and implemented.
2. Manage emergency control equipment	2.1 Emergency control equipment maintenance requirements are specified and managed. 2.2 Instructions and training are provided for on-site personnel in the care of emergency control equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Equipment maintenance is audited for compliance.
	2.4 Emergency control equipment is assessed for useability and accessibility and is reported according to workplace procedures.
	2.5 Procedures are followed to correct emergency control equipment defects and deficiencies.
3. Record and report emergency control equipment and faults	3.1 Schedule for verifying and reporting faults is developed and implemented.
	3.2 Details and nature of faults are recorded and where possible rectified.
	3.3 Maintenance logs, records and tests are consulted and corrective action is verified.
	3.4 Reports on faults verified are provided in a timely manner and contain recommendations for improving verified faults .
	3.5 Frequency of occurrence of faults is monitored and reported.
4. Monitor emergency control structures	4.1 Currency, compliance and appropriateness of the workplace emergency plan are monitored.
	4.2 Emergency control organisation activities are monitored to ensure they comply with workplace emergency plans, relevant standards and are appropriate for the workplace.
	4.3 Advice is provided to emergency planning committee and emergency control organisation.
	4.4 Compliance with relevant standards and statutory requirements is checked and appropriate recommendations are made where compliance is an issue.
	4.5 Implementation of hazard analysis recommendations is monitored.
	4.6 Representation on the emergency planning committee and emergency control organisation is monitored according to the workplace emergency plan, relevant standards and statutory requirements.
	4.7 Recommendations and reports are provided to stakeholders.
	4.8 Training is provided and monitored in accordance with the workplace emergency plan and statutory requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse operational effectiveness of emergency control equipment
- apply emergency prevention principles
- implement emergency prevention solutions
- implement maintenance auditing and fault reporting procedures
- report emergency prevention problems and suggestions for correction

Required Knowledge

- characteristics, use and limitations of workplace emergency procedures and emergency control equipment
- maintenance requirements of workplace emergency procedures and emergency control equipment
- principles of emergency prevention
- relevant legislation and standards
- typical applications of emergency prevention

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to ensure compliance of workplace emergency procedures, emergency control structures, equipment and other resources with relevant standards and statutory requirements.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access is required to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- workplace emergency management plan
- workplace emergency procedures

© Commonwealth of Australia, 2025 Public Skills Australia

- emergency control organisation policy documents
- emergency planning committee policy documents

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency prevention measures may include:

- emergency control equipment
- emergency evacuation systems
- emergency protection systems

Emergency control equipment may include:

- communications equipment
- escape equipment
- fire/smoke detection, alarm, mitigation and suppression systems
- first-aid kits
- forcible entry tools
- initial response firefighting equipment
- isolation barriers
- personal protection kits
- shower and eyewash
- spill control kits/equipment

Situations that could lead to workplace emergencies may include:

- deficient or ineffective security arrangements
- faults not being reported
- fire/smoke hazards
- poor housekeeping
- unsafe practices
- unsafe storage and handling of dangerous goods and hazardous materials
- unsafe use of electrical or mechanical equipment

Emergency control equipment maintenance requirements must include:

- Australian standards
- industry practices or needs identified as specific to the organisation or workplace
- legislative requirements including codes of practice
- manufacturers' guidelines

Unit Descriptor

This unit covers the competency required to recognise emergencies in the workplace, to report emergencies and to take appropriate action.

For this unit workplace is defined as the area encompassed by an individual's responsibilities.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745—2010.

Application of the Unit

This unit applies to all personnel within an organisation, within all industries and in all contexts.

This unit places responsibility on individual employees in the workplace to recognise, report and take action during workplace emergency situations. This requirement is consistent with the legislative obligations of employees as prescribed in OHS legislation.

The knowledge and skills gained through the completion of this unit may be applied by all employees across all industries.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for emergency situations	1.1 Current workplace emergency procedures to be used by employees and other workplace occupants are identified and followed. 1.2 Emergency resources in the workplace are identified and located. 1.3 ***Emergency response exercises*** are participated in according to workplace emergency procedures.
2. Report emergencies and potential emergencies	2.1 Emergencies and potential emergencies are identified and reported according to workplace emergency procedures. 2.2 People in any immediate danger from the emergency or potential emergency are alerted according to workplace emergency procedures.
3. Respond to emergency warnings and advice	3.1 ***Emergency warnings*** and advice are responded to according to workplace emergency procedures. 3.2 ***Instructions*** from emergency control response personnel are complied with during an emergency. 3.3 Sources of additional information are identified and information is sought from relevant people if the situation is not clear.
4. Evacuate from the work area	4.1 Need to evacuate from the work area is determined according to the level of immediate danger or instruction issued under the workplace emergency procedures. 4.2 Work area is prepared for evacuation according to workplace emergency procedures and the nature of

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	the emergency. 4.3 Area of danger is evacuated according to workplace emergency procedures. 4.4 Where it is safe to do so, assistance is provided to ***people who may require assistance.*** 4.5 Evacuation procedures and instructions from emergency control organisation or ***emergency response personnel*** are followed. 4.6 Alternative pathways or methods of evacuation are identified, assessed and chosen according to workplace emergency procedures if usual means of evacuation are blocked or endangered. 4.7 Communication systems are used according to workplace procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in an emergency situation as outlined in the workplace emergency procedures
- identify an emergency/potential emergency
- adhere to documented workplace emergency procedures

Required Knowledge

- circumstances where evacuation may need to be modified
- emergency reporting systems and procedures used on site
- emergency warning system, signals and instructions used on site
- evacuation alarms and workplace emergency procedures used at the workplace
- location of assembly areas and post-evacuation actions
- location of emergency equipment in the workplace
- procedures for reporting emergencies
- roles, responsibilities and authority of emergency personnel, emergency control organisation and emergency response team
- types of emergencies, the hazards and the evacuation actions associated with each one

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to apply workplace procedures; to maintain own safety and the safety of others in emergency situations; and to follow workplace emergency procedures and the advice of emergency control organisation members.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace including assisting people who may need assistance.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- appropriate emergency resources
- range of communication equipment relevant to the workplace
- workplace emergency procedures and documentation

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency response exercises may include

- briefings
- debriefings
- emergency exercises, simulations and reviews
- table/desk top exercises

Emergency warnings may include

- audible/visual alarms
- audible or vibrating pagers
- coded or uncoded public address announcements
- e-mail
- screen alerts
- stench alarms

© Commonwealth of Australia, 2025 Public Skills Australia

People who may require assistance may include	• verbal alert • babies and children • people with a mobility, intellectual, visual, auditory or sensory impairment, either temporary or permanent, who require assistance during an emergency response • people from diverse cultural and linguistic backgrounds • people who are injured • people who are not able to comprehend the instructions given • pregnant women • the elderly
Emergency response personnel may include	• emergency control organisation members • counsellors • emergency response team members • police, fire and emergency services • peer support • recovery team

ELEMENT	PERFORMANCE CRITERIA
	evacuation and the results are reported to the relevant person according to the workplace emergency procedures.
	2.5 Persons not accounted for are reported in accordance with workplace emergency procedures.
3. Anticipate the further development of emergencies	3.1 Emergency responses are based on the emergency management plan, taking into account the current situation and possible further development.
	3.2 Possible further development of emergency situations is continually assessed, reported to the relevant person and acted on according to workplace emergency procedures.
4. Assist with post initial response	4.1 Emergency evacuation or alternative action is completed before any ***post initial response activities*** are undertaken.
	4.2 Post initial response activities are conducted under the control of the relevant person and are consistent with the workplace emergency plan.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- ability to relate to a range of people from a range of cultural, linguistic, social and ethnic backgrounds, and a range of physical and intellectual abilities
- apply methods of accounting for people
- assist people who need assistance
- carry out a search pattern within an area
- communicate clearly by the means specified in the workplace emergency procedures
- contribute to emergency management planning
- exercise leadership within a workplace emergency context
- use equipment assigned to assist with implementing the workplace emergency procedures

Required Knowledge

- arrangements for evacuating people who need support
- assessing and anticipating the progress of emergencies that might reasonably be expected in the workplace
- command, control and coordinate function of the emergency control organisation

© Commonwealth of Australia, 2025 Public Skills Australia

- context of own role within the workplace emergency procedures
- emergency assessment and reporting procedures
- emergency reporting signals, alarms, warnings and procedures
- emergency response and operating procedures
- members of the emergency control organisation and their roles and responsibilities
- evacuation priorities
- hazard identification
- precautions to be taken during emergencies and during an evacuation
- methods of accounting for people during and after emergencies
- methods of summoning first aid to occupants or visitor injured during an emergency evacuation
- need to keep the relevant person informed of the developing situation
- post initial response emergency activities
- responses to meet the various situations
- workplace procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to respond to emergency reports, signals and warnings appropriately; to supply clear directions under emergency conditions; to make decisions appropriate to the situation; to keep others appropriately informed; to respond according to the workplace emergency procedures; and to take on a leadership role consistent with the emergency control organisation.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access to scenarios that reflect a range of emergency situations that may be expected in the workplace.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for workplace emergencies	1.1 Possible emergency situations in the workplace are identified. 1.2 Information on possible development and characteristics of typical emergency situations is gathered, assessed, analysed and applied according to workplace emergency plan. 1.3 Emergency actions for typical workplace emergency situations and emergency developments are identified according to the workplace emergency plan.
2. Apply command, control and coordinate aspects of workplace emergency procedures	2.1 ***Initial emergency response*** is initiated according to workplace emergency procedures. 2.2 Initial emergency response is subsequently controlled and coordinated according to incident type and workplace emergency procedures. 2.3 Suitable arrangements are made for the safety of people. 2.4 ***Welfare*** of evacuated people is arranged according to workplace emergency procedures. 2.5 Emergency response priority activities are completed before ***post initial response activities.***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.6 ***Assets*** are secured where safe to do so. 2.7 Post initial response activities are assessed and initiated in consultation with emergency services. 2.8 Initial recovery activities are coordinated according to the workplace emergency management plan.
3. Control the response to emergency reports, signals and warnings	3.1 ***Emergency reports***, ***signals and warnings*** are correctly identified or initiated. 3.2 Action is taken to ensure ***emergency stations*** are attended and operated according to workplace emergency procedures and relevant standards. 3.3 Emergency situations are assessed and appropriate action is taken according to workplace emergency procedures. 3.4 Emergency response actions are controlled according to workplace emergency procedures.
4. Coordinate reports and results of initial emergency response	4.1 Reports of areas affected by the incident are received or sought. 4.2 Accounting for evacuated people is coordinated according to workplace emergency procedures. 4.3 Results and reports of the initial emergency response are analysed according to workplace emergency procedures.
5. Conclude incident	5.1 Action is taken to ensure 'all clear' is advised to appropriate people. 5.2 Required information for debriefing is provided in a timely manner. 5.3 Critical incident stress management is organised as appropriate. 5.4 Reporting is undertaken in accordance with workplace procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- ability to relate to a range of people from a range of cultural, linguistic, social and ethnic backgrounds, and a range of physical and intellectual abilities
- communicate clearly by the means specified in the emergency plan

- interpersonal communication
- ability to take on a leadership role, which includes giving clear directions under emergency conditions, making decisions appropriate to the situation and keeping others appropriately informed

Required Knowledge

- accounting for evacuated persons and analysis of reports from evacuation areas
- actions to take in response to developing situations
- command, control and coordinate framework
- leadership responsibilities during a workplace emergency
- emergency plan and procedures
- emergency response reports or signals
- emergency response structure including external agencies and disaster plans
- emergency risk assessment, response and coordination actions
- hazard identification and precautions to be taken during emergencies and during an evacuation
- liaison requirements of emergency services
- own role in the emergency plan and role and authority of the emergency services
- people's typical behaviour in an emergency
- range of appropriate post initial response activities

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to respond to emergency reports, signals and warnings properly; to give clear directions under emergency conditions; to make decisions appropriate to the situation; to keep others appropriately informed; to respond in accordance with the workplace emergency procedures; to take on a leadership role consistent with the emergency control organisation; and to operate in accordance with the command, control and coordinate framework of the emergency control organisation structures. **Consistency in performance** Competency should be demonstrated controlling an emergency response or a simulated emergency response.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or in a simulated workplace. **Specific resources for assessment** Access to scenarios that reflect a range of emergency

Unit Descriptor

This unit covers the competency required to manage or to operate as part of the management of an emergency control organisation.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745-2010.

Application of the Unit

This unit applies to employees in the workplace within all industries and in all contexts.

The application of this unit includes all employees in the workplace who have a functional management role in the emergency control organisation. This expectation will be included in appropriate position descriptions and duty statements. The unit may also be used for planning for future operations in the workplace.

People who undertake this work would generally be members of an emergency planning committee.

The knowledge and skills gained through the completion of this unit may be applied by employees across all industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Initiate a system of emergency response planning	1.1 Develop a workplace emergency plan, and ensure a system of emergency alerting is planned, specified, implemented and maintained according to the workplace emergency plan, needs, resources and relevant legislation. 1.2 A means of alerting people to the need for evacuation or other ***initial emergency response*** is provided in accordance with relevant legislation or appropriate standards. 1.3 Emergency risk management process is developed and implemented according to legislative requirements and relevant standards. 1.4 Emergency control organisation is established and trained to meet organisational needs and resources and the workplace emergency plan. 1.5 Resources required to support the effective operation of the emergency control organisation are identified and allocated.
2. Ensure emergency control organisation is in place	2.1 Possible emergencies are identified and defined and plans are developed to deal with them. 2.2 Building plans are analysed for initial emergency response issues. 2.3 Emergency response procedures are based on emergencies identified in the hazard analysis.
3. Provide for initiation and control of initial	3.1 Procedures for initiating and controlling the initial emergency response are developed, implemented

ELEMENT	PERFORMANCE CRITERIA
emergency response	and communicated according to workplace emergency procedures.
	3.2 Suitable arrangements are established for the evacuation of ***people who need assistance.***
	3.3 Plans provide for ***assets*** to be secured where safe to do so.
	3.4 Plans provide for restricted access to the evacuated area.
	3.5 Evacuation exercises are conducted to validate and amend the procedures as required.
	3.6 A system to account for all people during emergencies is developed and implemented.
4. Provide for post initial response activities	4.1 Priorities for evacuation and ***post initial response activities*** are put in place.
	4.2 Need for post initial response activities is considered and discussed with emergency services.
	4.3 Possible post initial response activities and procedures are documented in workplace emergency procedures.
	4.4 Workplace emergency procedures provide for initial emergency response activities being completed before post initial response activities are undertaken.
	4.5 Workplace emergency procedures provide for recovery activities to be identified and developed, and their implementation to be facilitated.
5. Plan and implement emergency control organisation training	5.1 Training needs are identified and documented.
	5.2 Relevant training is developed, implemented and regularly reviewed according to workplace emergency plan, legislative requirements and relevant standards.
	5.3 Training covers topics identified in the needs analysis before a person is assigned emergency duties, when those duties are changed, or when a significant change occurs to the risk of emergencies at the workplace.
	5.4 Sufficient relevant refresher training, drills and exercises are conducted so that competencies needed by the workplace emergency initial response team are maintained.
	5.5 Resources required for training are identified and provided.
	5.6 Training provided reflects the needs of the

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	workplace, the individuals and statutory requirements.
	5.7 Qualified and experienced people are used to provide training.
	5.8 Feedback on training is sought and used to improve future training.
6. Provide advice and support for people in the post response and recovery phase	6.1 Provision is made for minimising adverse consequences to people involved, the environment and the organisation.
	6.2 A process is provided for debriefing to be undertaken according to workplace procedures.
	6.3 A process is provided for ***external support services*** to be accessed as necessary.
	6.4 Provision is made for liaison with the media to be undertaken according to organisation procedures.
	6.5 Provision is made for appropriate reports to be completed and processed according to organisation procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analyse
- chair meetings
- manage projects
- manage risk
- plan
- communicate

Required Knowledge

- characteristics, limitations and use of emergency alerting systems and procedures
- emergency alerting needs
- hazard identification and the precautions to be observed during emergencies
- legislative requirements
- methods/priorities in managing media responses in emergency situations
- organisation and its human resources
- people who may need assistance and the assistance they may require
- pre-planning procedures to allow for the conduct of post initial response activities

© Commonwealth of Australia, 2025 Public Skills Australia

- roles and responsibilities under legislation of employers, managers, supervisors, employees and contractors
- requirements under relevant standards and codes of practice
- resources required to support an emergency control organisation
- systems for controlling the entry of visitors, contractors and staff during an emergency
- workplace emergency hazard analysis

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to plan and prepare for the range of possible emergencies as identified by the hazard analysis.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access is required to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- hazard analyses
- emergency planning committee

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial emergency response may include:

- to evacuate
- not to evacuate
- to partially evacuate
- advice or requests for emergency services
- alternative evacuation
- lateral evacuation

© Commonwealth of Australia, 2025 Public Skills Australia

- any guidance from emergency response team
- designated assembly area
- evacuation routes and destination
- not to re-enter the evacuated area until directed by emergency personnel
- shelter in place/lockdown
- relocating or providing welfare services for evacuated persons
- restricting entry to danger areas
- searching floors or areas
- supplying emergency equipment
- use of response equipment

People who need assistance may include:

- babies and children
- people with a mobility, intellectual, visual, auditory or sensory impairment, either temporary or permanent, who require assistance during an emergency response
- people from diverse cultural and linguistic backgrounds
- people who are injured
- people who are not able to comprehend the instructions given
- pregnant women
- the elderly

Assets may include:

- equipment
- information
- livestock
- machinery
- material
- plant

Post initial response activities may include:

- advice or requests for emergency services
- assisting with recovery activities
- assisting with authorised restoration of normal activity
- participating in debriefing
- providing advice
- requests for emergency services or specialist response team

PUAWER008B Confine small workplace emergencies

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application and Range Statement revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to confine small workplace emergencies.

Small workplace emergencies may include such incidents as a small fire that can be controlled using a nearby fire extinguisher; or a chemical spill that can be controlled using workplace personal protective clothing and equipment, and a small spill kit; or a workplace vehicle accident where there is no significant injury or damage.

All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures, and accepted safe practices.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745-2010.

This unit does not cover the competency required for first aid; there are other units that cover first aid competence such as PUAEME001B Provide emergency care..

Application of the Unit

This unit applies to employees in the workplace within all industries and in all contexts.

This unit places responsibility on individual employees in the workplace to identify, assess and safely confine workplace emergency situations. This requirement is consistent with the legislative obligations of employees as prescribed in OHS legislation. The unit may also be used for planning for future operations in the workplace.

The knowledge and skills gained through the completion of this unit may be applied by all employees across all industries.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for emergency situations	1.1 Possible workplace emergency situations and appropriate responses, within the range of current skills and relevant workplace emergency procedures, are identified. 1.2 Relevant ***emergency resources*** are identified and their location is ascertained in the work area. 1.3 Any problems with the serviceability of the emergency resources are identified and reported to relevant people in accordance with workplace procedures.
2. Identify and assess the emergency	2.1 Emergency situation or potential emergency situation and risks are identified and the likely effectiveness of initial response action is considered. 2.2 Advice in relation to emergency situation is sought according to workplace emergency procedures. 2.3 Where ***initial response actions*** are considered unsafe or inappropriate, action is taken according to workplace emergency procedures.
3. Safely confine emergencies where	3.1 Emergencies are confined to the immediate area according to workplace emergency procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
possible	3.2 Emergency resources are used within the individual's limitations imposed by current skills, relevant workplace procedures and relevant legislative requirements. 3.3 Emergency resources used to confine emergency situation are used in a manner that will promote and enhance safe work conditions.
4. Use initial response equipment	4.1 Initial response equipment is checked to ensure its serviceability prior to use. 4.2 Appropriate equipment is selected for use in emergency situations. 4.3 Initial response equipment is used according to accepted safe practices and training. 4.4 Use of equipment is coordinated with other emergency actions.
5. Report workplace emergency response	5.1 Emergency situation response is documented and reported in accordance with workplace procedures. 5.2 Use of initial response equipment is documented and reported according to workplace procedures. 5.3 Initial response equipment is marked or positioned after use and reported to relevant personnel or authority to indicate if it requires servicing or replacing.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate in an effective manner
- give and follow instructions
- implement workplace procedures
- re-stow initial response equipment
- risk management
- use initial response equipment
- manage a small workplace emergency

Required Knowledge

- actions to be followed when initial response action is not safe
- appropriate initial response equipment

© Commonwealth of Australia, 2025 Public Skills Australia

- facilities that may be used to confine emergencies
- hazards involved with initial response action
- implications of the incorrect use of equipment
- limitations of initial response equipment
- limitations of use of emergency control equipment or facilities
- methods of extinguishment
- safe use of initial response equipment
- situations that must not be responded to because of the risk
- types of emergencies
- workplace procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to correctly identify the type of emergency that has occurred; to identify and take action to avoid or control any associated hazards; to use initial response equipment and techniques to safely and effectively control or contain the emergency. **Consistency in performance** Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace using initial response equipment.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in a simulated environment under conditions that safely replicate workplace emergency situations. **Specific resources for assessment** Access to scenarios that reflect a range of emergency situations that may be expected in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency resources may	• personal access bar codes/swipe cards • barricades

© Commonwealth of Australia, 2025 Public Skills Australia

include:	• communication systems • fire protection equipment • first-aid kits • mechanical ventilation and air handling equipment • personal protective equipment • spill control kits • surveillance equipment • warning signs
Initial response action may include:	• activation of response team • activation of suppression systems • alerting others • containing the emergency • evacuating the area • removing people from danger • removing the emergency • rendering basic aid as required • shut down procedures • use of containment systems • use of portable fire extinguishers, fire blankets or hose reels

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application, PC, Required Knowledge and Range Statement revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to participate as a member of a workplace emergency initial response team. This team works in conjunction with the emergency control organisation in the control of workplace emergencies in their early stages prior to the arrival of emergency services or specialist response teams.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745-2010.

This unit does not cover the competency required for crisis management, recovery or restoration.

Application of the Unit

This unit applies to employees in the workplace within all industries and in all contexts.

This unit places responsibility on individual employees who are delegated responsibility as part of an initial response team to participate in the preparation of workplace emergency procedures and respond to workplace emergencies. This expectation will be included in appropriate position descriptions and duty statements.

The knowledge and skills gained through the completion of this unit may be applied by employees across all industries.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for workplace emergencies	1.1 ***Emergency equipment*** assigned for use by the initial response team is stored and maintained in a safe, accessible and serviceable state. 1.2 Current workplace emergency procedures to be used by employees are identified and accessed. 1.3 Risk assessment of initial response team activities is undertaken according to workplace procedures. 1.4 Initial response team training activities are undertaken according to workplace emergency procedures and relevant legislation.
2. Respond to workplace emergencies	2.1 Emergency is responded to according to workplace emergency procedures. 2.2 Emergency situation is assessed for hazards and appropriate precautions against those ***hazards*** are implemented. 2.3 Identified hazards are reported to people in danger and the initial response team leader. 2.4 An appropriate level or response is determined according to the status of the emergency. 2.5 Instructions from the initial response team leader are confirmed and implemented safely and promptly.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.6 Appropriate equipment is selected and operated according to workplace emergency procedures.
	2.7 Situation is contained to the extent necessary to prevent an escalation of the emergency and to enable emergency services and specialist response team activity to be completed safely.
3. Communicate with and complement other personnel	3.1 Effective communication with initial response team members and initial response team leader is constantly maintained.
	3.2 Activities are consistent with the initial response team leader's plan of action and support the work of other initial response team members.
	3.3 Activities support the actions of ***other initial response teams.***
	3.4 Any injuries, accidents or near misses involving team members are reported to the team leader.
4. Assist with recovery from workplace emergencies	4.1 Evidence relating to the cause, origin and progress of the emergency is preserved and recorded as far as possible.
	4.2 Appropriate assistance is provided in accordance with the workplace emergency procedures.
	4.3 Emergency equipment is returned to a state of readiness as soon as is reasonably practicable.
	4.4 Debriefings are attended and participated in as appropriate.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- access and use protective clothing and equipment safely and effectively under emergency conditions
- communication skills during emergencies
- care for protective clothing and equipment
- interpret and respond to alarm systems
- re-stow initial response equipment

Required Knowledge

- alarm systems and associated equipment

© Commonwealth of Australia, 2025 Public Skills Australia

- appropriate personal protective clothing and equipment
- concept of dynamic risk assessment
- equipment operating characteristics, limitations, hazards, precautions, procedures and general care
- general emergency priorities and strategies
- hazard analysis
- hierarchy of control
- hazards and the precautions necessary during control activities
- procedures for responding to alarms
- survival, rescue and recovery procedures
- tactics for safely handling specific emergencies
- workplace emergency procedures

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to be prepared for a safe and prompt response to a workplace emergency; to identify hazards and implement appropriate precautions; to use equipment safely and effectively; and to work as a team member safely and effectively under the direction of a workplace emergency initial response team leader.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies that could be expected in the workplace, including dealing with plausible contingencies.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in a simulated environment under conditions that safely replicate workplace emergency situations.

Specific resources for assessment

Access to:

- scenarios that reflect a range of emergency situations that may be expected in the workplace
- material safety data sheets
- workplace register of hazardous substances

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Emergency equipment may include:

- emergency vehicles, trailers, trolleys or caches
- fire protection equipment
- forcible entry tools
- life support equipment
- monitors (or turrets)
- monitoring equipment
- personal protective clothing and equipment
- rescue equipment
- spill or leak control kits

Hazards may include:

- chemical, biological, radiological
- climatic
- electrical
- environmental
- explosive
- fire
- mechanical
- psychological (e.g. critical incident stress)
- noise related
- security related
- storm/flood
- structural
- thermal
- wildlife related

Other initial response teams may include:

- damage control
- emergency control organisation
- fire team
- first aid
- maintenance
- security

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the team for workplace emergencies	1.1 ***Pre-incident planning*** sessions are conducted to familiarise team members with relevant workplace procedures and safe and effective actions to control workplace emergencies according to relevant legislative requirements. 1.2 Processes are developed and implemented to ensure the competence of team members is developed and maintained. 1.3 Discussions, practice drills and exercises are conducted in accordance with workplace emergency procedures. 1.4 ***Emergency equipment*** is confirmed to be in a serviceable and accessible condition in accordance with standard/operating procedures.
2. Coordinate the response to control workplace emergencies	2.1 Initial response team is made aware of the workplace emergency. 2.2 Team's response to the emergency is coordinated according to workplace emergency procedures, risk assessment and available resources. 2.3 Situation and its likely development is constantly assessed, ***hazards*** are identified and appropriate ***precautions*** are applied and maintained to safeguard team members. 2.4 Appropriate actions to safely control the emergency are selected, and contingency plans are developed and implemented if needed.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5 Instructions to implement selected actions are conveyed to team members in a clear manner and confirmed with them.
	2.6 Actions chosen for the team to implement are consistent with available resources and the priority order of safely protecting self, other people and property where safe to do so.
	2.7 Team actions are monitored, recorded and adjusted if needed to ensure safe and appropriate action is maintained.
3. Communicate with and coordinate personnel	3.1 Effective communication with team members is constantly maintained according to communication systems.
	3.2 Activities are consistent with the workplace emergency procedures and team members' actions are coordinated.
	3.3 Team members' actions are coordinated with the activities of ***other initial response teams*** .
	3.4 On arrival incident controller is briefed and control is transferred to the appropriate emergency services/specialist response team.
	3.5 Liaison is established with the responding emergency services or specialist response team, and all relevant information and support is provided to them.
4. Lead team's recovery from workplace emergencies	4.1 Team actions are coordinated to prevent a re-occurrence of the emergency and to enable recovery activities to be commenced safely.
	4.2 Appropriate assistance is coordinated, within the scope of the workplace emergency procedures.
	4.3 Equipment is checked, serviced and stored, replaced or disposed of, to ensure its readiness for use .
	4.4 Any injuries, accidents or near misses involving the team are reported and critical incident support services for the team are requested in accordance with relevant regulatory requirements.
	4.5 A debriefing of the team is conducted and an incident report is prepared and submitted according to workplace procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- coordinate the use of emergency equipment safely and effectively under emergency conditions
- communication skills during emergencies
- ability to take on a leadership role, which includes giving clear directions under emergency conditions, making decisions appropriate to the situation and keeping others appropriately informed

Required Knowledge

- alarm systems and associated equipment
- appropriate personal protective clothing and equipment
- building fire safety features
- dealing with contingencies
- equipment operating characteristics, limitations, hazards, precautions, procedures and general care
- general emergency priorities and strategies
- hazards and relevant precautions
- how people react in emergency situations
- procedures for responding to alarms
- risk assessment
- roles, responsibilities and authority of emergency services personnel
- situational awareness
- survival, rescue and recovery procedures
- tactics for safely handling specific emergencies
- workplace emergency management plan

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to lead a safe and prompt response to a workplace emergency; to constantly assess the situation, identify hazards, apply and coordinate appropriate precautions; to select, implement and coordinate safe and effective actions by the team; to support the responding emergency services or specialist response teams; and to complete appropriate reports. **Consistency in performance** Competency should be demonstrated over time with a

PUAWER011B Manage workplace emergency initial response teams

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application and Range Statement revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers the competency required to manage the workplace emergency initial response teams assigned to control workplace emergencies in their early stages prior to the arrival of emergency services or specialist response teams.

Depending on the size and structure of the workplace, management may involve more than one workplace emergency initial response team over more than one physical location as specified in the emergency management plan.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745—2010.

Application of the Unit

This unit applies to employees in the workplace within all industries and in all contexts.

The application of this unit includes all employees in the workplace who have a functional management role of the emergency response team. A person performing this role has the delegated responsibility for the development of business plans and budgets to support the funding of an initial response team; undertake a risk assessment to identify possible hazards that the response team may encounter and develop and implement appropriate controls for those hazards including pre-incident planning, emergency procedures, response protocols and subsequent auditing; and recommend the acquisition and procurement of emergency equipment to support the initial response team, developing procedures and coordinating training on available equipment in accordance with manufacturers' specifications.

Responsibilities also include the coordination of training and assessment to ensure that a person is competent prior to induction on to the emergency response team, as well as ensuring effective scheduling of skills maintenance together with the reporting and recording of all training.

© Commonwealth of Australia, 2025 Public Skills Australia

The knowledge and skills gained through the completion of this unit may be applied by employees across all industries.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish and maintain initial response teams	1.1 Role, authority, structure and scope of the team are negotiated with the management of the workplace and are clearly defined and documented in the workplace emergency procedures. 1.2 An appropriate and effective system for alerting initial response team members to an emergency is developed, demonstrated to members and regularly tested. 1.3 An appropriate business plan and budget are developed and maintained for the initial response team. 1.4 Workplace emergency systems and procedures are audited for compliance.
2. Provide appropriate	2.1 Risk assessment relevant to the expected activities of

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
information and procedures	the initial response team is conducted at intervals relevant to the levels of risk. 2.2 Possible ***hazards*** are identified, and appropriate controls for those hazards are developed and implemented. 2.3 Relevant, current information is provided to the initial response team about its role, authority, structure, scope, equipment, training. 2.4 Workplace emergency procedures are developed, provided to appropriate people and regularly reviewed. 2.5 ***Pre-incident planning*** information about the current layout of the workplace and key features relevant to emergencies is provided to the initial response team in an accessible form. 2.6 Members of the initial response team and emergency control organisation are consulted and encouraged to participate in the development and review of relevant workplace emergency procedures.
3. Make recommendations for the provision of appropriate emergency equipment and manage its maintenance	3.1 Recommendations are made for the acquisition of ***emergency equipment*** appropriate to the role and scope of the initial response team. 3.2 Safe operating procedures, based on risk assessment and manufacturers' instructions, are developed and communicated to initial response team. 3.3 Appropriate arrangements are made for the storage of emergency equipment in a location that is safe, convenient and readily accessible to initial response team. 3.4 Appropriate arrangements are made to ensure emergency equipment is maintained in an accessible and serviceable condition, according to relevant standards and/or the manufacturers' instructions. 3.5 Appropriate personal protective equipment, and information about its characteristics, limitations, safe use and care, are provided to each member of the initial response team.
4. Arrange appropriate training for the initial response teams	4.1 Training and assessment is arranged before a person is assigned initial response duties. 4.2 Training is arranged according to the needs analysis to ensure currency of competence and where the duties or risks within the workplace change. 4.3 Arrangements are made for the effective scheduling,

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	promoting, reporting and recording of training. 4.4 Feedback on performance during training is used to validate and improve the training.
5. Monitor and report on effectiveness of the initial response teams	5.1 Initial response team is regularly audited and reviewed for relevance and ability of the workplace to implement the system. 5.2 Status of the initial response team and emergency control system is reported to management on a regular basis.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- assess resources needed by workplace emergency initial response teams
- communicate and consult effectively with a range of agencies, professions and advisers
- conduct meetings
- deal with conflict
- develop procedures
- leadership
- manage and conduct risk assessments/analysis
- negotiation
- plan and promote training
- relate to a range of people from a range of cultural, linguistic, social and ethnic backgrounds, and a range of physical and intellectual abilities
- select team members
- write reports for a range of audiences including senior management and external agencies

Required Knowledge

- appropriate personal protective clothing and equipment
- audit management systems
- emergency warning systems
- equipment operating characteristics, limitations, hazards, precautions, procedures and general care
- general emergency priorities and strategies
- hazards and relevant precautions
- how people react in emergency situations

© Commonwealth of Australia, 2025 Public Skills Australia

- maintenance management systems
- situational awareness
- statutory and legislative requirements
- tactics for safely handling specific emergencies
- training management systems
- workplace emergency management plan

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to conduct a risk assessment; to identify hazards; to implement controls effectively; and to audit all processes. There should also be clear evidence of a systematic approach to managing the workplace emergency initial response team.

Consistency in performance

Competency should be demonstrated over time with a range of emergencies and workplace emergency team management issues that could be expected in the workplace.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or in a simulated workplace.

Specific resources for assessment

Access is required to scenarios that reflect a range of emergency situations that may be expected in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

TLIH107D Interpret road maps and navigate pre-determined routes

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to interpret road maps and navigate routes as part of transport operations including identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements.

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant state/territory roads and traffic authorities.

Work is performed under general or limited supervision. It involves the application of the basic map reading principles and procedures when interpreting street directories and road maps and following pre-determined routes as part of transport operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 **Identify and determine the pre-planned route**	1.1 Documentation on the pre-determined route is accessed and interpreted
	1.2 Relevant street directory and/or road maps are identified and accessed
	1.3 Street directory and road map symbols are recognised and interpreted
	1.4 Points of departure and destination are identified in a directory index and the information used to locate designated places on the appropriate map
	1.5 Directions for a pre-determined route are interpreted and the route traced using a street directory and road map
	1.6 Key intersections and other landmarks along the route are identified for use in following the planned route
	1.7 Alternative routes are identified for possible contingency situations such as emergencies or traffic delays
	1.8 Pre-determined route is correctly followed
2 **Complete necessary documentation**	2.1 Required route documentation is completed in accordance with purpose of transportation and with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory permit and licence regulations and requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Operational procedures for interpreting road maps, using GPS devices and navigating routes

Road conditions for various routes, including sections undergoing road works

Height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route

Traffic conditions at various times of the day along specific routes

Security hazards and issues (where relevant)

Current information on accidents or emergencies that might close or restrict traffic on a particular route

Location of service stations/rest stops where relevant

Typical problems that may arise concerning the interpretation of road maps, the use of GPS devices and the navigation of predetermined routes and appropriate action that should be taken

Workplace requirements for recording and documenting route information

Required skills:

Communicate effectively with others when interpreting road maps, using GPS devices and navigating predetermined routes

Read and interpret instructions, procedures, information and signs relevant to route navigation

Identify and correctly use maps and other route documentation, including: identification of town and suburb locations; identification of roads and intersections; reading and interpretation of map symbols; and estimation of route distances using map information

Where applicable, use GPS devices to navigate predetermined routes

Interpret and follow operational instructions and prioritise work

Complete documentation related to route navigation

Operate electronic communication equipment to required protocol

Where applicable work collaboratively with others (such as fleet managers, sales team etc.) when interpreting road maps, using GPS devices and navigating predetermined routes

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

© Commonwealth of Australia, 2025 Public Skills Australia

Promptly report and/or rectify any identified problems that may arise when interpreting road maps, using GPS devices and navigating predetermined routes in accordance with workplace procedures

Plan for alternative routes in the event of contingencies such as road works, emergencies or delays

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying: the underpinning knowledge and skills relevant legislation and workplace procedures other relevant aspects of the range statement
Context of and specific resources for assessment	Performance is demonstrated consistently over a period of time and in a suitable range of contexts Resources for assessment include: a range of relevant exercises, case studies and other simulated practical and knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

	assessment, and/or access to an appropriate range of relevant operational situations in the workplace
	In both real and simulated environments, access is required to: relevant and appropriate materials and/or equipment, and/or applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
Method of assessment	Assessment of this unit must be undertaken by a registered training organisation As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests Practical assessment must occur: through appropriately simulated activities at the registered training organisation, and/or in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

This unit covers:	work of transport and distribution personnel involved in the delivery of a range of possible goods and materials including valuables, secured products and documents and materials
Operations may be conducted:	in a range of work environments and weather conditions by day or night
Customers may be:	internal or external

© Commonwealth of Australia, 2025 Public Skills Australia

Routes will be pre-determined but may include:	alternative routes to accommodate contingency situations
Map areas may include:	metropolitan areas country and regional areas interstate locations
Depending on the type of transport service being provided, consultative processes may involve:	clients other employees and supervisors management other professional or technical staff private security personnel public sector security personnel police and other emergency services security consultants
Communication in the work area may include:	mobile and fixed phones radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Information/documents may include:	workplace procedures and policies route specifications maps and street directories published information on route hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route competency standards and training materials supplier and/or client route documentation quality assurance procedures emergency procedures
Applicable regulations and legislation may include:	relevant state/territory road rules and traffic acts

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Use appropriate software	1.1. Select ***software*** appropriate to perform activity 1.2. Use ***software*** to produce required outcome using a range of features related to the activities 1.3. Save documents in appropriate directories/folders
2. Access, retrieve and manipulate data	2.1. Select and access ***files*** 2.2. Amend and save ***files*** according to requirements 2.3. Produce documents and ***files*** that meet organisational needs 2.4. Save ***files*** in appropriate directories/folders 2.5. Exit ***software*** correctly without loss of ***data***
3. Access and use help	3.1. Identify the help resources available for basic

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
functions within each application	difficulties with the ***software*** 3.2. Access user help documentation and other resources for basic difficulties with the ***software***
4. Use keyboard and equipment	4.1. Follow ***OH&S*** standards and regulations to avoid injury or illness 4.2. Use wrist rests and document holders where appropriate 4.3. Use monitor anti-glare and radiation reduction screens where appropriate 4.4. Ensure user ***equipment*** is maintained and free from defects that could cause injury

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• Basic analysis of desktop layout, monitor and chair positioning, keyboard techniques and use of the mouse • Basic problem solving in application management and help function usage • Reading and writing at a level where basic workplace documents are understood • Clear and precise communication with team members and supervisors • Interpretation of user manuals
Required knowledge
• OH&S principles and responsibilities • Basic understanding of system usage • Basic technical terminology in relation to reading help files and responding to system help prompts • Personal computer access and log-on procedures

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • Assessment must confirm the ability to produce several workplace documents utilising a minimum of three different computing packages. Learner will demonstrate the use of a wide range of features from each package. To demonstrate competency in this unit the person will require access to: • Personal computer • Basic software • Documents or information containing data suitable for use with computing packages
Context of and specific resources for assessment	This unit brings together a range of basic computer skills and knowledge consistent with general expectations around computer usage in the workplace. The breadth, depth and complexity of knowledge and skills in this competency would prepare a person to perform in a range of varied activities or knowledge applications where there is a clearly defined range of contexts in which the choice of actions required is usually clear. There would generally be limited complexity in the range of operations to be applied. Assessment must ensure: • Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes would be characteristic. • Applications may include some complex or non-routine activities involving individual

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	responsibility or autonomy and/or collaboration with others as part of a group or team.
Method of assessment	The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1. • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • ICAU2005B Operate computer hardware • ICAU2231B Use computer operating system • ICAD2003B Receive and process oral and written communication • ICAI2015B Install software applications • ICAW2001B Work effectively in an IT environment An individual demonstrating this competency would be able to:

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	• Demonstrate basic operational knowledge in a moderate range of areas • Apply a defined range of skills • Apply known solutions to a limited range of predictable problems • Perform a range of tasks where choice between a limited range of options is required • Assess and record information from varied sources • Communicate with team members to clarify job requirements • Take limited responsibility for own outputs in work and learning • Maintain knowledge of industry products and services Demonstration of these competencies would involve: • Using appropriate software • Opening, amending and saving files and documents according to organisational requirements • Using help manuals and on-line help when appropriate • Applying OH&S procedures • Demonstrating basic operational knowledge in a moderate range of areas • Performing a range of tasks where choice between a limited range of options is required • Assessing and recording information from varied sources

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Software may include but is not limited to:	• commercial software applications • organisation-specific software • It is expected that a word processing application, Database Application and Spreadsheet application will be chosen in preference to other types of applications
Files may include but is not limited to:	• html pages • pdf files • text files • pictures • music • email messages
Data may include:	• text • images • graphics • screenshots • icons added to the document
Equipment may include but is not limited to:	• workstations • personal computers • modems and other connectivity devices • printers • hard drives • DSL modems • monitors • switches • hubs • personal digital assistant (PDA) • other peripheral devices
OH&S may include:	• correct posture • lighting • type of desk • type of monitor • style of chair • typing position • repetitive strain injury prevention • ventilation • light position • length of time in front of computer

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Access the internet	1.1. Open an ***internet browser*** and set a home page of personal choice by setting ***internet options*** 1.2. Adjust the display of the ***internet browser*** to suit personal requirements 1.3. Modify ***toolbar*** to meet user and ***internet browser*** needs 1.4. Access a particular website, note privacy and other conditions of use and retrieve data 1.5. Enter a uniform resource locator (URL), in the address line of the ***internet browser***
2. Search the internet	2.1. Locate and select appropriate ***search engine*** and define search expressions based on the data required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.2. Save search expression results and present them in a report according to the information requirements 2.3. Create a bookmark within the ***internet browser*** or a link for the required web page and save it in a bookmark folder 2.4. Modify the ***internet browser*** options for printing and print a web page 2.5. Close the internet browser
3. Research and apply 'netiquette' principles	3.1. Select ***search engine*** and using key word search research the concept of ***netiquette*** (or web etiquette) 3.2. Review rules of good online manners from at least two ***netiquette*** sites 3.3. Develop a personal list of ***netiquette*** principles to be applied to email and newsgroup discussions 3.4. Check that these are consistent with organisational policies
4. Send and organise messages	4.1. Open an email application package and create a new email message 4.2. Add addressee to the email message 4.3. Compose the text of an email message according to organisational guidelines 4.4. Create and add an automatic signature for the user, so that it appears automatically in every new email message that the user creates 4.5. Attach ***files*** to the email message, using the attachment feature 4.6. Determine and set a priority for an email message and spell check and edit text as required 4.7. Send the email message 4.8. Reply to received messages and forward as appropriate, using the carbon copy and forward features 4.9. Open and save an attachment to the relevant folder 4.10. Search for an email message and set a priority setting or delete as necessary 4.11. Sort inbox according to sender's name and date received 4.12. Save email messages in a folder 4.13. Compact folder to save space 4.14. Print an email message
5. Create an address	5.1. Manually add an email address to the email package

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
book	address book 5.2. Update the address book by transferring the email address from a received message 5.3. Create a distribution list and send out email message

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• Ability to implement workstation adjustment according to OH&S guidelines • Basic analysis in relation to a limited range of routine tasks • Low-level decision making in relation to a limited range of routine tasks • Problem solving skills in known areas during normal routine activities • Reading and writing at a level where basic workplace documents are understood • Clear and precise communication • Ability to interpret user manuals • Using a PC and peripherals • Cultural understanding
Required knowledge
• Makeup and structure of an internet addresses • Basic technical terminology in relation to reading help files and prompts • Log-on procedures for accessing a PC • Modem speed, traffic loads in relation to times of accessing the internet • Evaluating and assessing the authority, reliability and authenticity of information • Organisational guidelines on internet and email usage ('web etiquette' or netiquette) • Different types of search engines (eg. Google, Alta Vista, Infoseek) • Different types of messages that occur (e.g. error messages, updates, need for installing plug-ins)

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • Assessment must confirm the ability to browse the internet, search for information, send and receive emails and organise the email client application on the computer. To demonstrate competency in this unit the person will require access to: • Organisational style guide/policy • Organisational policies on internet and email usage • Personal computer with internet capability
Context of and specific resources for assessment	This competency provides one of the fundamental foundation skills for interacting online. In this context, individuals must recognise their own responsibility in having access to the vast services, sites, systems and people provided by the internet. The breadth, depth and complexity of knowledge and skills in this competency would prepare a person to perform a defined range of activities many of which may be routine and predictable. Assessment must ensure • Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.
Method of assessment	The purpose of this unit is to define the standard of performance to be achieved in the workplace. In undertaking training and assessment activities related to this unit, consideration should be given to the implementation of appropriate diversity and accessibility

© Commonwealth of Australia, 2025 Public Skills Australia

	practices in order to accommodate people who may have special needs. Additional guidance on these and related matters is provided in ICA05 Section 1. • Competency in this unit should be assessed using summative assessment to ensure consistency of performance in a range of contexts. This unit can be assessed either in the workplace or in a simulated environment. However, simulated activities must closely reflect the workplace to enable full demonstration of competency. • Assessment will usually include observation of real or simulated work processes and procedures and/or performance in a project context as well as questioning on underpinning knowledge and skills. The questioning of team members, supervisors, subordinates, peers and clients where appropriate may provide valuable input to the assessment process. The interdependence of units for assessment purposes may vary with the particular project or scenario.

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • ICAS1193B Connect a workstation to the internet • ICAU1128B Operate a personal computer • ICAU1129B Operate a word processing application • ICAU1213B Conduct on-line transactions • ICAS2243B Detect and protect from spam and destructive software An individual demonstrating this competency would be able to: • Demonstrate knowledge by recall in a narrow range of areas • Demonstrate basic practical skills, such as the use of relevant tools • Perform a sequence of routine tasks given clear direction • Receive and pass on messages and information

© Commonwealth of Australia, 2025 Public Skills Australia

	• Maintain knowledge of industry products and services

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Internet browser may include but is not limited to:	• Netscape Navigator • Internet Explorer • Mozilla • Opera • Galleon • Phoenix • Konqueror • Lynx
Internet options may include but are not limited to:	• configuring of the following options: home page, location of temporary files, privacy level, security level, type of connection and history
Toolbar can contain:	• buttons • menus • a combination of both
Netiquette	• Is sometimes referred to as web etiquette and is an informal code of manners governing online conduct which may include but is not limited to the use of upper and lower case letters in messages, not spamming other users, not posting commercial messages to newsgroups, learning to lurk before posting, respect for other's time, privacy and bandwidth
Search engine may include:	• Snap • Questfinder • Ask Jeeves • Google

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• Metacrawler • Alta Vista • Excite • Infoseek • Findlink • Northern Light • AOL Netfind • Hotbot • LookSmart • Yahoo • Netscape • Lycos • Open Text • WebCrawler • Go To Dot Com • Beaucoup • Meta Search • Search.com • Go2Network • Savvy Search • Profusion • Dogpile • Metagopher
Organisational guidelines may include but are not limited to:	• personal use of emails and internet access • content of emails • downloading information and accessing particular websites • opening mail with attachments • virus risk (MS windows OS and Mac OS only)
Files may include but is not limited to:	• html pages • pdf files • text files • pictures • music • email messages

PUAEMR007B Conduct risk assessment

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competency required to identify and assess risk in preparation for the treatment of that risk.

This competency would normally apply to personnel working at a relatively simple and routine level, in which they use established organisational policy and procedures. Personnel would normally have local supervisory/management responsibility and apply known solutions to a variety of predicable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment. It does not deal with the treatment of risk; this is covered in the unit PUAEMR006B Treat risk at an operational level.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Establish the risk context**	1.1 Aims, objectives, scope and boundaries of the ***risk*** assessment are clearly defined in accordance with ***organisational policies and procedures***
	1.2 Risk evaluation criteria is identified and confirmed as contained in organisational policies, procedures or supervisors' guidance
	1.3 ***Structure*** for the planning required to conduct a risk assessment is determined
	1.4 Aims and objectives of ***stakeholders*** are identified and recorded in accordance with workplace procedures and guidelines
2. **Identify risk**	2.1 All possible sources of risk which may impact on the situation or objectives are identified and recorded in accordance with workplace

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	procedures and guidelines
	2.2 Sources of risk are identified from the perspective of all stakeholders
	2.3 Risks are identified using a ***specified methodology or tool*** in accordance with workplace procedures and guidelines
	2.4 Stakeholders are consulted during the risk identification process to finalise a list of risks
3. **Analyse risk**	3.1 Potential consequence of a risk and the likelihood of that consequence are estimated
	3.2 Risks are analysed using a specified method or tool in accordance with organisational policies and procedures
	3.3 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures
4. **Evaluate risk**	4.1 Levels of risk are prioritised for treatment
	4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors
	4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analytical and probing
- communicate with stakeholders and convey information, including:
- listening
- questioning
- paraphrasing
- clarifying
- summarising

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- critically evaluate an operational situation by listening, observing and clarifying information with supervisor
- follow instructions/directives and report information
- interpersonal
- make notes of observations
- participate in the team
- provide and receive feedback in a constructive manner
- read and understand the organisation's plans, policies and procedures
- represent mathematical ideas in appropriate format
- solve problems for a defined range of problems
- voice personal view to the review process

Required Knowledge

- aims and objectives of the task
- organisational policies, procedures and guidelines
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening
- written communication to a level required to complete workplace forms and reports

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder's involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	Consistency in performance Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed in the workplace or under conditions that accurately simulate the workplace **Specific resources for assessment** Access to: • organisational documentation • relevant organisational standards • appropriate tools and methods used within the organisation
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Risks that may impact on objectives may include	Actual events Conflict Economic Environmental Financial Human behaviour Political circumstances Safety

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	Security
	Technical
Organisational policies and procedures may include	Australian Standard AS/NZS 4360
	Commonwealth and state/territory legislative requirements eg OHS Act
	Industry standards and codes of practice
	Organisational charter/business plan
Structure must include identifying	Amount of documentation required
	Analysis tools which are required to conduct the assessment
	Approach taken to conduct the assessment
	Depth of assessment
Stakeholders may include	Those people, organisations and other interested parties (both internal and external) who may affect, be affected by, or perceive themselves to be affected by, a decision or activity
Specified methods or tools may be	Qualitative
	Quantitative
	Semi-quantitative
	Or a combination of the three
Specified methods or tools may include	A risk matrix
	Analysis of risk registers
	Brainstorming
	Business continuity planning
	Examining any available data eg audit results/incident reports
	Expert judgement
	Focus groups
	Nomogram
	Scenario analysis
	SWOT analysis

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Make risk decision**	1.1 Calculated level of ***risk*** is compared to the established risk evaluation criteria and determined to be acceptable or unacceptable in consultation with the supervisor
	1.2 Risk that is determined as unacceptable is documented and noted for treatment
2. **Identify and select treatment options**	2.1 ***Treatment options*** of known risks are identified and confirmed as contained in ***organisational policies and procedures*** or supervisor's guidance
	2.2 Treatment options under consideration are evaluated for ***effectiveness*** within the given context
	2.3 Selected treatment options are documented and communicated in accordance with organisational policies and procedures
3. **Implement treatment options**	3.1 ***Treatment plans*** incorporating selected options are implemented in accordance with organisational policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.2 Treatment plans are communicated in the workplace in accordance with organisational policies and procedures
	3.3 Treatment plans are evaluated to determine residual risk following implementation
4. **Monitor and review risk and the process**	4.1 Effectiveness and efficiency of the treatment plan is ***monitored***, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity
	4.2 Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process
	4.3 Treatments are adjusted and communicated following the review process

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- analytical and probing
- communicate with stakeholders and convey information, including:
- clarifying
- listening

Unit Descriptor	This unit has been developed for the Outdoor Recreation Industry Training Package. This unit covers the knowledge and skills required to establish, use and maintain a temporary site. Temporary sites include sites used for rest stops, overnight camping and emergency shelters

ELEMENT	PERFORMANCE CRITERIA
Select a temporary site	Access local area knowledge and use to identify suitable sites Determine additional sources of information to assist in site location Identify factors affecting suitable site selection Consider the suitability of the site for the group size and objectives
Establish a shelter	Identify hazards and remove/avoid in order to reduce risks Arrange shelter appropriately for the prevailing weather and conditions Establish general context shelter to ensure comfort and safety Erect shelter in a manner to cause minimal environmental impact
Maintain a temporary site	Take measures, within the area of responsibility of the participant, to remove/avoid hazards and minimise risk at the temporary site Comply with, where relevant to the activity, statutory and organisational procedures with respect to the use of campfires Implement minimal impact practices with respect to camping and washing of self and utensils Identify the consequences of unhygienic practices

© Commonwealth of Australia, 2025 Public Skills Australia

Follow recommended procedures to decrease potential health problems

Clean individual and shared utensils adequately

Follow sanitation practices appropriate to the site and permit requirements to minimise health problems and environmental impact

RANGE STATEMENT

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

General context	One category
	• equipment for use at the site may be
	  • lightweight
	  • heavyweight
	  •

Hazards	All categories relevant to type of outdoor activity
	• potential terrain hazards
	  • loose debris
	  • unstable or sloping terrain
	  • sharp edges
	  • slippery rocks
	  • slippery decks
	  • overhanging branches
	• environmental hazards
	  • hail
	  • wind
	  • rising water levels
	  • avalanches
	  • storms
	  • ice
	• people hazards
	  • irresponsible use of campfires or stoves
	  • irresponsible behaviour

© Commonwealth of Australia, 2025 Public Skills Australia

Shelter	All categories relevant to the activity
	• include
	  • tents
	  • bivvies
	  • snow caves
	  • lean-to
	  • mobile trailers and vans

Site selection	All relevant categories
	• is affected by factors such as
	  • group size
	  • weather conditions
	  • time constraints
	  • degree of urgency
	  • type of shelter required
	  • access

Sources of information	All categories • maps and charts • guide books • resource management authorities • port authorities • local government authorities and councils

Statutory and organisational procedures	All categories
	• include
	  • permits from resource management authorities
	  • authority/permission from landowners
	  • documented operating procedures and organisation/enterprise policies

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

Critical aspects of evidence to be considered	• Assessment must confirm sufficient knowledge of site selection and maintenance using sites and shelter options applicable to at least one type of specific outdoor activity
	• Assessment of performance should be over a minimum of two (2) different occasions/sites covering the prescribed number of categories from the Range Statements applicable to the selection and use of a site for a specific outdoor activity
	• Assessment must confirm the ability to apply this knowledge and appropriate techniques to
	  • Select a suitable site for the activity after consideration of all relevant factors
	  • Establish safe shelter whilst causing minimal environmental impact
	  • Maintain a site in accordance with statutory and organisational procedures
	  •

Interdependent assessment of units	• This unit must be assessed after attainment of competency in the following unit(s)
	  • Nil
	• This unit must be assessed in conjunction with the following unit(s)
	  • Nil
	• For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)
	  • SROOPS001B Implement minimal environmental impact practices
	  • Units relevant to participate in a specific outdoor recreation activity

Required knowledge and skills	• Required knowledge
	  • Minimal impact codes and practices
	  • Sanitation procedures in outdoor environments
	  • Hazard identification at sites
	  • Organisation and legislative requirements

© Commonwealth of Australia, 2025 Public Skills Australia

- Shelter options and how to erect them
- Weather information and how to apply it to the establishment of a temporary site

- Required skills
  - Establishing/erecting shelter
  - Applying weather information to determine suitable site locations

Resource implications

- Physical resources - assessment of this competency requires access to
  - outdoor locations/sites
  - activity specific shelter options
  - food and water resources
  - personal clothing appropriate to activity, location and conditions
  - activity specific equipment
- Human resources - assessment of this unit of competency will require
- human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must
  - be competent in this unit
  - be competent, as a minimum, in the units SRXFAD001A,
  - SRXRIK001A and SRXEMR001A to ensure adequate risk management during the assessment
  - be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area
  - have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the Standards for Registered Training Organisations

Consistency in performance

- Due to issues such as the range of possible outdoor sites, this unit of competency must be assessed over a minimum of two (2) different occasions/sites in order to ensure consistency of performance over the Range Statements and contexts applicable to using and maintaining a temporary or overnight site

Context for assessment

- This unit of competency must be assessed in the context of an outdoor recreation activity and must be demonstrated when establishing and maintaining a temporary camping or emergency site at an outdoor location
- Assessment of this unit of competence will usually include observation of processes and procedures at a campsite, oral and/or

© Commonwealth of Australia, 2025 Public Skills Australia

written questioning on required knowledge and skills and consideration of required attitudes
- Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

KEY COMPETENCY LEVELS

These levels do not relate to the Australian Qualifications Framework. They relate to the seven areas of generic competency that underpin effective workplace practices.

The three levels of performance (1, 2 and 3) denote the level of competency required to perform the task:

1. Use routine approaches
2. Select from routine approaches
3. Establish new approaches

- Collecting, analysing and organising information - Sourcing information on suitable overnight campsites
- Communicating ideas and information - Sharing information on camping requirements to other activity participants
- Planning and organising activities - Planning route in order to reach a suitable campsite at a reasonable time in order to establish camp
- Working with teams and others - Building a shelter, eg, lean-to or bivvy
- Using mathematical ideas and techniques - Calculating appropriate distance from water source to establish toilet area
- Solving problems - Finding sufficient safe sites in a small camping area
- Using technology - Using varieties of portable stove to reduce impact on the environment

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies.

Collect, Analyse & Organise	Communicate Ideas & Information	Plan & Organise Activities	Work with Others	Use Mathematical Ideas &	Solve Problems	Use Technology

INTRODUCTION

Unit Descriptor

This unit has been developed for the Outdoor Recreation Industry Training Package.

This unit covers the knowledge and skills required to conduct navigation in unmodified landscapes where extreme environmental conditions and/or poor visibility are likely to occur and the activity participants need to operate independently.

Unmodified landscapes are those which are totally natural and there are no modifications to the natural surface so that track alignment is indistinct, there is no clearance along the track, there is no signage, the track is not managed for public risk and where the onset of extreme environmental conditions may have a significant adverse impact upon the activity.

This unit incorporates the unit SRONAV002B Navigate in difficult or trackless areas, and this should be taken into consideration when planning to meet pre-and co-requisite requirements.

ELEMENT	PERFORMANCE CRITERIA
Use a map	Select the type of map(s) suitable for the activity Identify possible sources of error and inaccuracies on the map Identify symbols and information contained on the map that may be used in navigation Identify the way in which relevant symbols and

© Commonwealth of Australia, 2025 Public Skills Australia

	information on the map can be used in navigation
Use a compass	Identify the essential features of a compass
	Demonstrate the manner in which a compass is used to maintain a designated course
	Demonstrate how compass use reflects understanding of the factors that affect accuracy
Plan a route in unmodified landscapes	Apply symbols and information contained on the map to plan an efficient route/course suitable to navigation and activity-specific abilities
	btain additional information to assist in the preparation of a navigation data sheet from the map and from other suitable sources of information
	Identify hazards in extreme environmental conditions
	Consider other contextual issues in the planning of a route
	Prepare a navigation data sheet/route card
	Identify emergency or contingency escape routes
	Consider environmental impact issues in the planning of a route
Navigate in unmodified landscapes in poor visibility and/or extreme environmental conditions	Maintain orientation of map to surroundings
	Identify possible sources of navigation error in specific locations
	Demonstrate combined use of map , compass and other techniques whilst following a route in unmodified landscapes
	Demonstrate techniques for distance estimations of travel in the absence of identifying features
	Maintain the designated course whilst bypassing obstacles
	Demonstrate maintenance of a course in extreme environmental conditions and/or poor visibility
	Fix position accurately and regularly using a combination of appropriate navigation techniques
	Demonstrate an efficient route choice for the

© Commonwealth of Australia, 2025 Public Skills Australia

	surroundings and conditions
	Demonstrate suitable combinations of navigation techniques to fix position and identify unknown features when lost

RANGE STATEMENT

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency:

Distance estimations	[all categories] • pacing • time

Hazards in extreme environmental conditions	• may include
	  • river crossings and rising water levels
	  • open water crossings
	  • cliff lines
	  • wet and slippery rocks
	  • extreme heat
	  • extreme cold
	  • fog and mist
	  • snow
	  • severe storms/squalls
	  • strong winds
	  • heavy rain
	  • currents
	  • man-made features

Map	[all categories] • topographic • aerial photographs[all categories]

© Commonwealth of Australia, 2025 Public Skills Australia

Navigation data sheet	[all categories]
	• may include
	  • grid reference points
	  • grid and magnetic bearings
	  • distances
	  • estimated travelling times
	  • height gain/loss
	  • gradient
	  • identifiable features
	  • escape routes

Navigation techniques	[all categories] • use of compass • linear features • point features • attack points • aiming off • collecting features • spiral search • sweep search • backbearings and resections • use of Global Positioning Systems (GPS) • use of stars and sun • use of natural features
Obstacles	[all categories relevant to location of activity] • thick vegetation • drops and climbs • marshes and bogs • fog • rivers, lakes and dams
Other contextual issues	[all categories] • navigation and activity-specific abilities • available clothing, equipment and resources • fitness levels • type of terrain or features of the location • access and escape routes • group size

© Commonwealth of Australia, 2025 Public Skills Australia

	• natural protection or shelter
Suitable sources of information	[all categories] • guide books • local inhabitants • peers • local clubs
Symbols and information	[all categories] • grid lines and numbers • contour lines • magnetic variation • scale • map legend • topographic features

Unmodified landscapes	• an area where all of the following occur
	  • there are no modifications to the natural surface or the natural environment so that track alignment is indistinct
	  • there is no clearance along the track
	  • signage is generally not provided
	  • there may include steep sections of unmodified surfaces and other terrain and man-made hazards
	  • the track is not managed for public risk
	  • there is an appreciable risk of onset of poor visibility
	(These align to Class 6 Tracks within the Australian Standard for Walking Tracks AS 2156.1. Standards Australia 2001)

EVIDENCE GUIDE

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

Critical aspects of evidence to be	• Assessment must confirm sufficient knowledge of factors affecting navigation techniques and route planning in unmodified landscapes

© Commonwealth of Australia, 2025 Public Skills Australia

considered	in circumstances where extreme environmental conditions may occur
	• Assessment of performance should be over a minimum of three (3) occasions covering all categories from the Range Statements that are applicable to navigating in unmodified landscapes within an activity-specific context in the learner's environment
	• Assessment must confirm the ability to apply this knowledge and appropriate techniques to
	  • independently navigate in an activity-specific context in unmodified landscapes
	  • navigate in extreme weather conditions/poor visibility
	  • apply varying navigation skills and techniques relevant to the
	  • context to different remote locations/types of location within an activity-specific context
	  • navigate in areas with different hazards, obstacles and topographic features
	  •

Interdependent assessment of units	• This unit must be assessed after attainment of competency in the following unit(s)
	  • Nil
	• This unit must be assessed in conjunction with the following unit(s)
	  • Nil
	• For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)
	  • Relevant units specific to participation in a particular outdoor activity

Required knowledge and skills	• Required knowledge
	  • Factors affecting navigation techniques in extreme environmental conditions
	  • Map types and sources of error
	  • Use of a compass and factors that affect their accuracy
	  • Route planning and issues that should be considered in extreme environmental conditions
	  • Estimation of travelling times in unmodified landscape and/or difficult terrain/conditions
	  • Techniques for estimating distance travelled in poor visibility
	  • Backbearings and resections
	  • Techniques to navigate around obstacles
	Required skills
	  • Problem solving
	  • Maintenance of a compass bearing in poor visibility and/or

© Commonwealth of Australia, 2025 Public Skills Australia

extreme conditions
- Observation of surroundings
- Decision making

Resource implications

- • Physical resources - assessment of this unit of competency requires access to
- suitable outdoor activity locations/venues
- maps
- compass
- watch
- data sheet
- Global Positioning System (GPS)
- • Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must
  - be competent in this unit
  - be competent, as a minimum, in the units SRXFAD001A, SRXRIK001A and SRXEMR001A to ensure adequate risk management during the assessment
  - be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area
  - have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the Standards for Registered Training Organisations

Consistency in performance

- Due to issues such as differing terrain/location types, situations, this unit of competency must be assessed over a minimum of three (3) occasions in order to ensure consistency of performance over the Range Statements and contexts applicable to navigating in unmodified landscapes in situations where extreme environmental conditions may occur

Context for assessment

- This unit of competency must be assessed in the context of an outdoor recreation activity in unmodified landscapes. Competency in extreme environmental conditions/poor visibility may be demonstrated in a real or simulated environment whilst participating in an outdoor activity
- This unit of competency should be assessed through the observation of processes and procedures, oral and/or written questioning on

© Commonwealth of Australia, 2025 Public Skills Australia

required knowledge and skills and consideration of required attitudes

- Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

KEY COMPETENCY LEVELS

These levels do not relate to the Australian Qualifications Framework. They relate to the seven areas of generic competency that underpin effective workplace practices.

The three levels of performance (1, 2 and 3) denote the level of competency required to perform the task:

1. Use routine approaches
2. Select from routine approaches
3. Establish new approaches

- Collecting, analysing and organising information - Sourcing adequate maps for the activity area
- Communicating ideas and information - Obtaining additional information from locals
- Planning and organising activities - Planning and navigating routes
- Working with teams and others - Participating in outdoor recreation activities with others
- Using mathematical ideas and techniques - Calculating distances from a map
- Solving problems - Dealing with navigational errors
- Using technology - Using maps and compass

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies.

Collect, Analyse & Organise Information	Communicate Ideas & Information	Plan & Organise Activities	Work with Others & in Teams	Use Mathematical Ideas & Techniques	Solve Problems	Use Technology

HLTFA301B Apply first aid

Modification History

Unit Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess the situation	1.1 Identify assess and minimise **hazards** in the situation that may pose a risk of injury or illness to self and others
	1.2 Minimise immediate **risk** to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements
	1.3 Assess casualty and identify injuries, illnesses and conditions
2 Apply first aid procedures	2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness
	2.2 Use available **resources and equipment** to make the casualty as comfortable as possible
	2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner
	2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort
	2.5 Seek consent from casualty prior to applying first aid management
	2.6 Provide **first aid management** in accordance with **established first aid principles** and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements
	2.7 Seek first aid assistance from others in a timely manner and as appropriate
	2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures

© Commonwealth of Australia, 2025 Public Skills Australia

		2.9	Use safe manual handling techniques as required
		2.10	Monitor **casualty's condition** and respond in accordance with effective first aid principles and procedures
		2.11	Finalise casualty management according to casualty's needs and first aid principles
3	Communicate details of the incident	3.1	Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant **communication media and equipment**
		3.2	Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
		3.3	Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
		3.4	Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
		3.5	Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
4	Evaluate own performance	4.1	Seek feedback from **appropriate clinical expert**
		4.2	Recognise the possible psychological impacts on rescuers of involvement in critical incidents
		4.3	Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

ARC Guidelines relating to provision of first aid as outlined

Working knowledge of:

basic principles and concepts underlying the practice of first aid

procedures for dealing with major and minor injury and illness

priorities of management in first aid when dealing with life threatening conditions

basic occupational health and safety requirements in the provision of first aid

infection control principles and procedures, including use of standard precautions

chain of survival

first Aiders' skills and limitations

Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

First aid management of:

abdominal injuries

allergic reactions

altered and loss of consciousness

bleeding

burns - thermal, chemical, friction, electrical

cardiac arrest

casualty with no signs of life

chest pain

choking/airway obstruction

injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

envenomation - snake, spider, insect and marine bites

environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke

fractures

medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

near drowning

© Commonwealth of Australia, 2025 Public Skills Australia

poisoning and toxic substances (including chemical contamination)

respiratory distress

seizures

shock

stroke

substance misuse - common drugs and alcohol, including illicit drugs

Awareness of stress management techniques and available support

Social/legal issues:

duty of care

need to be culturally aware, sensitive and respectful

importance of debriefing

confidentiality

own skills and limitations

Essential skills:

Ability to:

Conduct an initial casualty assessment

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills

Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit **HLTCPR201A Perform CPR**)

Apply first aid principles

Infection control, including use of standard precautions

Follow OH&S guidelines

Demonstrate:

safe manual handling

consideration of the welfare of the casualty

ability to call an ambulance

site management to prevent further injury

Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available

© Commonwealth of Australia, 2025 Public Skills Australia

medical/pharmaceutical instructions

Administer medication in line with state/territory regulations, legislation and policies

Prepare a written incident report or provide information to enable preparation of an incident report

Communicate effectively and assertively in an incident

Make prompt and appropriate decisions relating to managing an incident in the workplace

Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition

Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evaluate own response and identify appropriate improvements where required

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:	Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit Competence should be demonstrated working individually and, where appropriate, as part of a first aid team Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

Context and resources required for assessment:	Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines
Access and equity considerations:	All workers in the health industry should be aware of access and equity issues in relation to their own area of work All workers should develop their ability to work in a culturally diverse environment In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

Contextualisation to address specific requirements may include:	Focus on first aid management of specific types of injury First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
Established first aid principles include:	Preserve life Prevent illness, injury and condition(s) becoming worse Promote recovery Protect the unconscious casualty
Vital signs include:	Consciousness Breathing Circulation
A hazard is:	A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
Hazards may include:	Physical hazards Biological hazards Chemical hazards Hazards associated with manual handling
Risks may include:	Risks from equipment, machinery and substances Risks from first aid equipment Environmental risks Exposure to blood and other body substances

© Commonwealth of Australia, 2025 Public Skills Australia

Risk of further injury to the casualty

Risks associated with the proximity of other workers and bystanders

Risks from vehicles

Casualty's condition is managed for:

Abdominal injuries

Airway obstruction

Allergic reactions

Altered and loss of consciousness

Bleeding

Burns - thermal, chemical, friction, electrical

Chest pain/cardiac arrest

Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

Near drowning

Envenomation - snake, spider, insect and marine bites

Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke

Fractures

Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

No signs of life

Poisoning and toxic substances (including chemical contamination)

Respiratory distress/arrest

Seizures

Shock

Stroke

Substance misuse - common drugs and alcohol, including illicit drugs.

© Commonwealth of Australia, 2025 Public Skills Australia

First aid management must take into account applicable aspects of:	The setting in which first aid is provided, including: workplace policies and procedures industry/site specific regulations, codes etc. OHS requirements state and territory workplace health and safety legislative requirements location and nature of the incident situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents location of emergency services personnel. The use and availability of first aid equipment and resources Infection control Legal and social responsibilities of first aider
Resources and equipment are used appropriate to the risk to be met and may include:	AED First aid kit Auto-injector Puffer/inhaler Resuscitation mask or barrier Spacer device
Communication media and equipment may include but are not limited to:	Telephones, including landline, mobile and satellite phones HF/VHF radio Flags Flares Two way radio Email

© Commonwealth of Australia, 2025 Public Skills Australia

	Electronic equipment Hand signals
Appropriate clinical expert may include:	Supervisor/manager Ambulance officer/paramedic Other medical/health worker
Documentation may include:	Injury report forms Workplace documents as per organisation requirements
Documentation may include recording:	Time Location Description of injury First aid management Fluid intake/output, including fluid loss via: blood vomit faeces urine Administration of medication including: time date person administering dose Vital signs

© Commonwealth of Australia, 2025 Public Skills Australia

Unit Sector(s)

Modification History

INTRODUCTION

Unit Name	Search as a member of an air search team
Unit Code	PUAAMS002A
Unit Descriptor	This unit covers the competency to conduct air search observation duties during an air search operation.

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for search operations	Operational briefing is obtained from relevant search and rescue authority Aircraft is configured and loaded in accordance with policies, procedures and pilot-in-command instructions Involvement in briefings is undertaken in accordance with policies and procedures and relevant documentation Incident information is used to determine personal equipment needed for search operation
2. Conduct search operations	Scanning distance is identified and aircraft windows are marked in accordance with organisational procedures Search briefing is reviewed en route to task area in accordance with policies and procedures Impediments to effective observation techniques are identified and appropriate adjustments made in accordance with policies and procedures Observation technique is applied in accordance with policies and

© Commonwealth of Australia, 2025 Public Skills Australia

	procedures Search equipment is operated to maximise sighting and identification effectiveness in accordance with policies and procedures
3. Investigate sightings	Sightings are reported and maintained in accordance with policies and procedures Sightings are investigated in accordance with policies and procedures Sightings are logged and communicated to the relevant search and rescue authority in accordance with policies and procedures
4. Communicate outcome search	Signals are identified in accordance with policies and procedures Communications are logged and communicated to the relevant search and rescue authority in accordance with policies and procedures

RANGE STATEMENT

Relevant search and resuce authorities may include	• Rescue Coordination Centre • State and Territory SAR authority • pilot-in-command
Search operations may include	fixed wing or rotary wing aircraft engaged in the location, identification and communication with persons in distress on land or sea by day or night. This includes searching for evidence of the remains of vehicles. It also includes other Search and Rescue associated duties such as the placement of electronic beacons for use as search datums and drift indicators
Policies and procedures may vary between organisations and may include	• legislation relevant to the operation/incident/response legislation relevant to the organisation • jurisdictional requirements operational • corporate and strategic plans • operational Standing Operating Procedures operational performance standards • organisational personnel practices and guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

	organisational quality standards • aircraft flight manuals
Impediments to observation techniques may include	• aircraft structure • glare • dirty or damaged windows • weather • environmental conditions • aircraft flight angle
Observation techniques may include	• scanning • saccading •
Search equipment may include	• binoculars and other magnification equipment radar • infra-red • radio direction finding equipment video/camera equipment • night vision equipment
Sightings may include	• debris • damaged or discoloured vegetation • oil slicks • reflections • lights • smoke • burned areas • unusual colours, shapes or movements in the environment • floating objects
Targets may include	• persons • vehicles • wreckage • aircraft crash sites • ships and small craft
Target markers may include	• smoke/flame pyrotechnics electrical lights • electronic beacons • dye • streamers

© Commonwealth of Australia, 2025 Public Skills Australia

	• buoys
Signals may include	• ground to air emergency signal code international code of signals • signal panels • Morse code • improvised signals •
• Communications equipment may include	• radio transceivers mobile telephones heliographs • signal panels message bags •
• Sightings are maintained to	• keep the target in sight •
• Search briefing is reviewed to	• utilise the time enroute to optimally prepare the searchers •
• Briefings may include	• task crew • pre-flight safety • aircraft equipment •

EVIDENCE GUIDE

Critical aspects of evidence	Knowledge and skill in the safe dispatch of target marking and communications equipment from aircraft in flight
Interdependent assessment of units	Pre-requisite units: • Nil Co-requisite units: • PUAAMS001A Work in an aviation environment • PUATEA001A Work in a team • PUATEA004B Work effectively in a public safety organisation • PUAEME001A Provide emergency care PUATE003A Lead, manage and develop teams
Underpinning knowledge	Evidence of:

© Commonwealth of Australia, 2025 Public Skills Australia

- a basic understanding of search planning
- a basic understanding of the physiology of sight
- an understanding of factors which may indicate evidence of a search target
- an understanding of observation techniques and procedures an understanding of signalling/message equipment and procedures
- an understanding of target marking equipment and procedures

Underpinning skills	The ability to: • communicate information clearly within the search team make decisions based on available information • select and use available technology appropriate to the search task
Resource implications	An appropriate training location/venue Access to aircraft and equipment required for learning and assessment activities Flight operations for learning/skills development and assessment
Consistency in performance	In order to assess these performance criteria it may be necessary for evidence to be collected over a period of time
Context of assessment	Evidence can be collected on the job but may be undertaken in a simulation

INTRODUCTION

Unit Name Work in an aviation environment

Unit Code PUAAMS001A

Unit Descriptor This unit covers the competency to work effectively as a crew member.

ELEMENT	PERFORMANCE CRITERIA
1. Work effectively as a member of a search and rescue crew	Functions and responsibilities are determined from policies and procedures Contact/call-out arrangements and requirements are determined from organisational documents and personal employment requirements Factors which impede or disqualify persons from performing safe and effective aircrew duties are determined from policies and procedures Communication equipment, terminology and procedures are utilised in accordance with policies, procedures and company operation’s manuals to ensure safe and effective operations during flight In-flight performance is maintained in accordance with policies, procedures, and company operations manuals
2. Work safely in an aviation environment	Safety procedures for working in and around aircraft are determined from policies and procedures Cabin/load security and dangerous goods requirements are determined in accordance with policies and procedures appropriate manual handling strategies are applied when loading

© Commonwealth of Australia, 2025 Public Skills Australia

	the aircraft in accordance with policies and procedures
	In-flight hazards are managed in accordance with policies and procedures, organisational operations manuals and pilot-in-command instructions
3. Respond to aircraft emergency situations	Aircraft cabin, load and occupants are prepared for impact
	Firefighting equipment is used to protect occupants and the aircraft from fire
	Escape/evacuation plan is implemented in accordance with policies and procedures
	Emergency care is provided to injured occupants as required
	Life and health of survivors are supported and maintained
	Survival plan is implemented
4. Complete documentation	Manifests, load sheets and other pre-flight documents are completed in accordance with policies and procedures
	In-flight operations log is completed in accordance with policies and procedures
	Debriefing documents and other post flight reports are completed in accordance with policies and procedures

RANGE STATEMENT

An aircraft may include	A fixed wing or rotary wing aircraft engaged in search interception and escort • stores dropping • rescue or medical evacuation operations over land or sea by day or night
Safety procedures for working in and around aircraft may include	• being familiar with aircraft • appreciation of aircraft capabilities • approaching rotary wing aircraft terrain-related issues

© Commonwealth of Australia, 2025 Public Skills Australia

Search and rescue crew members may include	• National Search and Rescue Manual • Search and Rescue Manual for Civil Search and Rescue • Unit Pilots and Dropmasters • Search and Rescue Manual for Observers • Civil Aviation Regulations (CARs) Civil Aviation Orders (CAOs) • Aeronautical Information Publications (AIPs) • En route Supplementary Australia – Emergency Section • (ERSA) • Applicable Aircraft Flight Manual and Civil Search and • Rescue Unit Operations manual •
Escape/evacuation plan may include	• evacuating personnel and equipment from the aircraft •
Life is supported and maintained may include	• aircraft components survival equipment • natural materials being utilised to provide protection from environmental hazards to aid in location and to maintain the health of survivors •
Survival plan may include	• giving consideration to psychological • physiological • medial and environmental issues •
Organisational documents may include	• emergency service pilots and procedures • aircraft operator company operations manuals • and memoranda of understanding •
Factors which may impede or exclude safte performance may include	• physical physiological • psychological • pathological and psychosocial and may include • such things as motion sickness • poor eye sight • pregnancy fatigue • poor general health • drug and/or alcohol affected
The flight may include	• over-night deployment • international travel •

© Commonwealth of Australia, 2025 Public Skills Australia

Personal requirements may include	• passports additional clothing • refreshments as required for long term/long distance travel •
Communications equipment may include	• aircraft intercommunications equipment and portable radio transceivers •
Terminology and procedures may include	• standard aviation and agency specific terminology and procedures associated with Search and Rescue operations •
In-flight crew performance may be maintained by	• rotation/rest schedules prevention of motion sickness • duty reassignment or reallocation for people found unsuitable for certain tasks •
Safety procedures for working in and around aircraft may relate to	• aircraft propellers and blades refuelling operations • smoking loose articles danger areas • no step/push areas and airside security •
Dangerous goods may include	• Search and Rescue related pyrotechnics • weapons and ammunition • petroleum fuels •
In-flight hazards may include	• opening doors/windows moving around the aircraft operating near open doors loose articles in the cabin dispatching items • operating electronic equipment •
Emergency care includes	• pre-hospital emergency care as described in workplace • emergency care qualifications which meet State and Territory OH&S requirements •
Firefighting equipment may include	• dry chemical powder vaporising liquid • carbon dioxide and foam extinguishers •
Survival equipment may include	• inflatable life-jackets inflatable life-rafts • survival kits • electronic location beacons •
Environmental hazards may include	• marine environments • extremes of heat and cold

© Commonwealth of Australia, 2025 Public Skills Australia

	• dangerous creatures • hydration and nutrition limitations •
Physiological factors may include	• health and fitness • heat loss rates • hydration and nutrition • injury survival time • predictions •
Rescue factors may include	• predicted time to rescue rescue vehicle types • visibility and location of target rescue systems • rescue crew competence priority of survivors •
Pre/post-flight documentation may include	• search briefing and debriefing forms manifests • load sheets flight logs • post flight reports •

EVIDENCE GUIDE

Critical aspects of evidence	Operate safely and effectively as a crew member in an aviation environment
Interdependent assessment of units	Pre-requisite units: • Nil Co-requisite units: • PUAAMS002A Search as a member of an air search team • PUATEA001A Work in a team • PUATEA004B Work effectively in a public safety organisation • PUATEA003A Lead, manage and develop teams
Underpinning knowledge	Evidence of: • a knowledge of aircraft accidental hazards and response an understanding of airside safety and aircraft safety • an understanding of appropriate air traffic control procedures and terminology

© Commonwealth of Australia, 2025 Public Skills Australia

- an understanding of appropriate aviation meteorology
- an understanding of aviation technology and communication procedures
- an understanding of manual handling hazards and techniques
- an understanding of Search and Rescue functions and responsibilities

Underpinning skills

The ability to:

- communicate information orally and in writing complete
- Search and Rescue documentation
- harnesses and emergency exits
- operate aircraft doors
- operate aircraft intercom systems
- operate aviation survival equipment
- operate firefighting equipment

Resource implications

An appropriate training location/venue and access to aircraft and survival equipment required for learning and assessment activities

Consistency in performance

In order to assess these performance criteria it may be necessary for evidence to be collected over a period of time in a context of rescue operations

Context of assessment

Evidence can be collected on the job but may be undertaken in a simulation

PSPWPI605B Audit management systems

Modification History

PSPWPI605B Release 2: Layout adjusted. No changes to content.

PSPWPI605B Release 1: Primary release.

Unit Descriptor

This unit covers the competency to undertake audits of workplace occupational health and safety and/or workers compensation and/or injury management and/or workplace relations and other management systems. It includes planning, organising and undertaking an audit; and evaluating, recording and providing advice on audit results.

In practice, auditing management systems may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, managing evaluations, etc.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Plan**, **organise and undertake audit**	1.1 The ***resources*** required to ***conduct*** the ***audit*** are identified and obtained. 1.2 The ***relevant parties*** are consulted and informed of ***audit plans*** in accordance with the organisation's policy and procedures. 1.3 The environment is assessed for personal safety. 1.4 The environment is assessed to ensure that it permits the audit to be fair, valid and reliable. 1.5 The audit arrangements and requirements are explained to the persons involved in the audit and to the relevant parties, and their understanding of the purpose and processes is confirmed. 1.6 ***Documents*** are sighted and all other evidence specified in the ***audit procedure*** is gathered in accordance with the organisation's policy and procedures and confidentiality is maintained.
2. **Evaluate audit results**	2.1 ***Evidence*** gathered is evaluated for reliability, validity, authenticity, sufficiency, currency, and consistency in the achievement of the specific standards. 2.2 The ***assessment*** decision is made in accordance with the purpose and objectives of the audit. 2.3 Guidance is sought if in doubt, from a more experienced auditor/s.
3. **Record audit results**	3.1 The audit results are recorded and processed in accordance with organisational auditing procedures. 3.2 Access to the audit records is provided only to authorised personnel 3.3 Confidentiality of the audit outcome is maintained.
4. **Provide advice on audit results**	4.1 Audit results are discussed and confirmed with the persons involved in the audit. 4.2 Feedback including advice on corrective action/s required is given to persons involved in the audit. 4.3 Any audit decision that may be disputed is reported in accordance with the organisation's policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- applying risk management principles
- working with a variety of professionals
- paying attention to detail
- implementing methodical and systematic approach
- using recording, testing and specialised evidence collection equipment
- auditing systems
- justifying/explaining the assessment decision and recommended corrective action
- using communication involving complex exchanges of oral information, reading and analysing complex and formal documents
- responding to diversity, including disability and gender

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- risk management principles
- legislation, codes, standards
- management systems
- powers of inspector, jurisdiction
- use of audit/assessment tools
- industry practices and procedures
- quality management principles
- organisational auditing procedures
- management system principles

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPLEGN601B Manage compliance with legislation in the public

© Commonwealth of Australia, 2025 Public Skills Australia

sector

PSPMNGT602B Manage resources

PSPMNGT608B Manage risk

PSPMNGT611A Manage evaluations

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management systems audited in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to workplace legislative compliance
- case studies and workplace scenarios to capture the range of situations likely to be encountered when auditing management systems

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when auditing management systems, including coping with difficulties, irregularities and breakdowns in routine
- management systems audited in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration

© Commonwealth of Australia, 2025 Public Skills Australia

- observation
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Resources required to conduct the audit may include:

- financial, such as:
  - budget allocations
  - travelling/subsistence allowances
  - motor vehicle hire
- physical, such as:
  - motor vehicles
  - measuring equipment
  - photographic equipment
  - computer equipment
  - office location
  - personal protective equipment
  - telephone equipment
  - stationery
  - documentation (e.g. standards)
  - electronic recording equipment
  - office communication equipment

Audits may be conducted by:

- an auditor working on his/her own
- a team comprising subject technical knowledge expert/s and a lead auditor
- an auditor working in conjunction with an experienced auditor, trainer and/or supervisor

© Commonwealth of Australia, 2025 Public Skills Australia

Audit may include:	• assessment • examination/test • structured inspection of workplaces to validate management systems • national/state or other relevant assessment instruments • results of internal and external monitoring
Relevant parties may include:	• the auditors • key members/representatives of the organisation being audited • nominated contact person/s • managers concerned with the unit/section being audited • audit manager • audit team leader • audit team members • project manager • employer association • employee association • community groups • industrial commission • insurance companies • employer • employee • principal contractor
Audit plan may address:	• the scope, purpose and objectives of the audit • competency of auditor/s • recordkeeping and processing arrangements • evaluation and review mechanisms • quality assurance methods • legislation • codes of practice • standards • guidance materials • benchmarks
Documents may include:	• electronic databases • videos • intra/internet sites • training/learning programs • photographs • written information
Audit procedure may specify:	• recording procedure • audit methods used • evidence required

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence may include:	• location • timing of audit • documented instruction relating to the performance of tasks • sets of oral/written/computer-based questions • checklists • logbooks • working guides • manuals • technical reports • standard operating procedures/work method statements • policies and procedures • employer/employee records • contractor records • third party records • use of technology • outcome of interviews • outcome of focus groups
Assessment methods may include:	• direct observation of performance • practical tasks • written/oral/computer-based questioning • consideration of third party reports • consideration of authenticated prior achievements • use of measuring and testing equipment • combination of methods • statistical data relating to safety and health injury/disease and/or workplace relations

PSPREG602B Evaluate regulatory compliance

Modification History

PSPREG602B Release 2: Layout adjusted. No changes to content.

PSPREG602B Release 1: Primary release.

Unit Descriptor

This unit covers evaluation of compliance outcomes, and review of regulatory policies, procedures and legislation to improve compliance outcomes. This is typically performed by a manager with responsibility for regulatory officers who enforce and promote compliance with the organisation's enabling legislation (such as customs, quarantine, workplace safety, equal employment opportunity, agriculture, environmental protection, etc). It includes developing compliance measures/targets, evaluating the extent of compliance, reviewing procedures and guidelines to improve compliance, and contributing to new legislation or the review of existing legislation.

In practice, evaluation of regulatory compliance may overlap with other public sector work activities such as managing ethical behaviour and compliance with public sector legislation, managing diversity, risk, resources, etc.

This unit replaces and is equivalent to *PSPREG602A Evaluate regulatory compliance*.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop compliance measures/targets	1.1 Compliance ***measures*** are developed that are valid, reliable, sufficient and both time and cost effective. 1.2 Realistic measures/targets are developed underpinned by current information.
2. Evaluate extent of compliance	2.1 Analysis of compliance data is valid and conclusions are unbiased and supported by evidence. 2.2 Interpretation of comparative data over time is valid and reliable and outcomes are recorded in accordance with ***legislative and policy*** requirements. 2.3 Compliance outcomes are reported in accordance with organisational and legislative requirements.
3. Review procedures and guidelines to improve compliance	3.1 A variety of sources of information representing the breadth of possible ***stakeholders*** is drawn on to ensure review is comprehensive. 3.2 Possible reasons for not meeting targets/performance indicators are identified and recommendations are made to improve long-term voluntary compliance. 3.3 Adjustments of strategies and plans are made to address review recommendations in accordance with government policy requirements and resource constraints.
4. Contribute to new legislation or review of existing legislation	4.1 Input is provided that supports government policy directions and relies on current information with supporting reasons and data analysis. 4.2 Resource implications of legislative recommendations are made within government policy requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

Skill requirements

Look for evidence that confirms skills in:

- undertaking information analysis
- interpreting complex written and numerical materials
- preparing written reporting requiring formal structure and language
- responding to diversity, including gender and disability
- applying occupational health and safety and environment legislation in the context of regulatory compliance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- enabling legislation
- government policies
- principles of evaluation
- equal employment opportunity, equity and diversity principles
- public sector policy and legislation including occupational health and safety and environment relating to the evaluation of regulatory compliance

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

PSPREG601B Manage regulatory compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- evaluation of regulatory compliance in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to regulatory compliance in the public sector
- relevant aspects of common law
- case studies and workplace scenarios to capture the range of situations likely to be encountered when evaluating regulatory compliance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when evaluating regulatory compliance, including coping with difficulties, irregularities and breakdowns in routine
- evaluation of regulatory compliance in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios

© Commonwealth of Australia, 2025 Public Skills Australia

- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Measures may include:

- evaluation against strategic goals/targets/major outcomes
- level of prosecutions, cautions or warnings
- number of people accessing organisational publications about compliance requirements
- outcomes, such as:
  - reported injuries/deaths, workers compensation claims and premiums (relevant to workplace safety)
  - illegal imports (relevant to customs)
  - exotic diseases (relevant to quarantine)
  - amount of land affected by salinity (relevant to land management)
- qualitative, such as:
  - client satisfaction (relevant to all regulatory areas)

Legislation and policy may include:

- enabling legislation, such as that dealing with:
  - audit, customs and excise, quarantine, fisheries, agriculture, land management, conservation, coastal management, environmental protection, environment, insurance, legal administration (sheriffs, young offenders), workers compensation, occupational safety and health, workplace relations
- public sector management, financial management
- auditor general
- planning, construction, transport, energy, mining, resource management, communications
- family services, employment, equal employment opportunity and anti-discrimination
- aspects of common law

© Commonwealth of Australia, 2025 Public Skills Australia

- contract law
- administrative law
- equal employment opportunity and anti-discrimination law
- government policy

Stakeholders may include:

- government
- Minister
- public
- staff
- victims
- offenders/alleged offenders

competency. Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret and advise on enabling and related legislation	1.1 Non-routine or ***complex matters*** related to enabling and related ***legislation*** are resolved or referred in accordance with organisational procedures. 1.2 Advice is provided to clients and staff that is timely, consistent and constructive, and within level of authority. 1.3 Feedback is obtained on client level of understanding, and additional information or explanation is provided to clarify issues. 1.4 Staff understanding of legislation and procedures is monitored and action to address professional development needs is timely and in accordance with organisational procedures.
2. Develop and implement compliance strategies	2.1 ***Strategies*** and ***measures*** to influence long-term voluntary compliance are identified and implemented to suit the audience and the context. 2.2 Information that is current and promotes the benefits of compliance is provided to clients. 2.3 Strategies are developed in accordance with government and organisational policy and practice. 2.4 Information and strategies are adjusted in response to feedback gathered from a range of stakeholders.
3. Provide strategic advice on compliance matters	3.1 Client/government information requirements are confirmed. 3.2 Advice is provided based on current information and meets the specific needs of clients in its range, depth and form of presentation. 3.3 Presentation standards are maintained in accordance with organisational guidelines. 3.4 Feedback is obtained on how well the advice/information suits its purpose and audience, and is used to recommend further action.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking planning and information analysis
- engaging in mentoring and coaching
- interpreting complex written materials
- preparing written reports requiring formal structure and language
- providing oral advice to a range of audiences requiring adaptation of style and language
- using active listening and questioning to confirm understanding
- responding to diversity, including gender and disability
- applying occupational health and safety and environment legislation in the context of regulatory compliance management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- enabling legislation
- aspects of common law
- strategic management of regulatory compliance
- equal employment opportunity, equity and diversity principles
- organisational reporting procedures
- public sector policy and legislation including occupational health and safety and environment relating to the management of regulatory compliance

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Complex matters may include:

- conflicting legislation
- unclear or ambiguous guidelines
- use of legal precedents
- regional or national issues
- issues not previously encountered
- 'red herring' issues

Legislation may include:

- enabling legislation, such as that dealing with:
- audit, customs and excise, quarantine, fisheries, agriculture, land management, conservation, coastal management, environmental protection, environment, insurance, legal administration (sheriffs, young offenders), workers compensation, occupational safety and health, workplace relations
- public sector management, financial management
- auditor general
- planning, construction, transport, energy, mining, resource management, communications
- family services, employment, equal employment opportunity and anti-discrimination
- aspects of common law
- contract law
- administrative law

© Commonwealth of Australia, 2025 Public Skills Australia

Strategies may include:

- equal employment opportunity and anti-discrimination law
- public education campaigns
- culture change programs
- redesign of organisational documents
- incentive programs
- web site
- help desk
- staff training
- policy changes
- awareness-raising consultations with client groups

Measures may include:

- evaluation criteria against strategic goals/targets/required policy outcomes
- quantitative, such as:
  - reported injuries/deaths, workers compensation claims and premiums (workplace safety)
  - illegal imports (customs)
  - exotic diseases (quarantine)
  - amount of land affected by salinity (land management)
- qualitative, such as:
  - client satisfaction (relevant to all regulatory areas)

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify road safety risks	1.1 Records and statistics are monitored, both day and night, to identify problems and areas of risk

© Commonwealth of Australia, 2025 Public Skills Australia

		1.2	Complaints, requests, comments and observations are analysed to identify problems or areas of risk
2	Assess road safety risks	2.1	Risk sites are investigated to clearly establish conditions and causes of accidents and collisions
		2.2	Research is undertaken to collect evidence regarding identified risks
		2.3	Identified risks are compared and assessed against legislative requirements, codes of practice, relevant Australian standards and community expectations
		2.4	Clear priorities based on a ranking of safety factors are established
3	Develop and evaluate options	3.1	Options relevant to reducing risk are identified
		3.2	Acquisition or resumption of land is identified
		3.3	All options are assessed on the basis of cost effectiveness, efficiency and practicality
		3.4	Preferred option to reduce risk is selected based on Council guidelines
4	Present preferred options to Council	4.1	Council 'approval in principle' is obtained
		4.2	Statutory and other relevant authority approvals are obtained in required timeframes with minimal modification to the preferred option
		4.3	Opportunities are provided for community consultation to maximise acceptance of preferred option
		4.4	Clear, concise documentation is prepared that provides full preliminary cost details
		4.5	Options and recommendations, supported by clear rationale, are submitted to Council for endorsement
5	Prepare detailed design	5.1	Initial brief and regular, clear communication with design personnel is undertaken
		5.2	Implementation timeframes are advised to design personnel to ensure detail design is completed as required

© Commonwealth of Australia, 2025 Public Skills Australia

5.3 Design development is monitored to completion to ensure no errors or omissions are made

5.4 A safety design audit is undertaken

5.5 Final detailed cost estimates are accurately prepared

Required Skills and Knowledge

Not applicable.

Evidence Guide

Critical aspects of evidence

production of accurate information

analysis of sites and information

data interpretation

survey development

presentation and endorsement of options

effective problem solving based on research

Interdependent assessment of units

Prerequisite units: nil

Co-requisite units: nil

Underpinning knowledge

national and state traffic management policy

traffic classification and statistics

traffic legislation

traffic standards and guidelines

traffic engineering practice

analytical methods

Range Statement

Application of this competency will vary according to the Council's size, location, organisational structure, resources, state/territory statutory requirements, business/strategic plans, and policies and practices

Accidents and collision causes

speed, volume, sight distance, vehicles, pedestrians, cyclists, road and roadside environment, weather, transport mode

Environment contexts

metropolitan, urban, regional, rural, industrial, residential, commercial

Research types

surveys, observation, accident statistics, literature studies, applicable standards, questionnaires, gathering local knowledge

Affected parties

local occupants, neighbours, emergency services, public transport, through traffic

Funding options

Local Government, state government, federal government, private developers, schools, community groups, relevant authorities

Treatment

construction, diversion, speed zones, speed humps, traffic lights, roundabouts, education programs, public awareness campaigns, police liaison groups, multilingual information services

Council guidelines

risk assessment, cost benefit ratio, community expectations

Community

commercial, rate payers, land holders, residents, industrial, rural

LGAPLEM606B Develop ecologically sustainable land management systems

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor This unit covers developing, implementing and monitoring ecologically sustainable land management systems.

Application of the Unit

Application of the Unit This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify current land uses, condition and practices**	1.1. Existing data is collated and reviewed to identify current land uses, condition and practices. 1.2. Need for additional information is assessed as required.
2. **Undertake a land capability study**	2.1. Information needs to assess land capability are determined. 2.2. Suitable methods to collate information on land capability are established. 2.3. Information on land capability is collected from primary and secondary sources using objective and best practice techniques. 2.4. Data to identify major characteristics of land capability is analysed, collated and tabulated. 2.5. A clearly written and illustrated report is prepared on land capability with clearly documented conclusions supported by available evidence.
3. **Develop optional land management strategies**	3.1. Information on land capability, condition and uses is assessed to identify evidence of inappropriate practices. 3.2. Local, regional and national significance factors are considered in the review of land capability. 3.3. Preferred land use options are established. 3.4. Areas of degradation requiring urgent attention are classified. 3.5. Appropriate land uses are clearly established based on an assessment of land capability, planning zone modifications and existing conditions.
4. **Develop action plans for identified land management strategies**	4.1. Action plans to implement strategies are prepared that set priorities, time lines and relevant responsibilities. 4.2. Draft strategy documentation is prepared that clearly presents all data and recommendations.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.3. Draft strategy is released for public comment and provides adequate time for considered input. 4.4. Final strategy and action plan are prepared incorporating public and expert input to assist in achieving strategy objectives.
5. **Implement strategies to achieve ecologically sustainable land management**	5.1. Educational packages are developed to inform land owners of preferred strategies for land use. 5.2. An appropriate protocol for council staff is prepared. 5.3. Cooperative and consultative arrangements are established with other land management authorities, landowners and adjacent council. 5.4. Action plans based on endorsed strategies are implemented in accordance with agreed time lines and budget.
6. **Monitor and review the effectiveness of land management strategies**	6.1. Regular data is collected and analysed to provide accurate measures on performance. 6.2. Comparisons are made with strategy objectives to assess effectiveness. 6.3. Changes to strategy are made as required to ensure outcomes are achieved. 6.4. Information obtained during monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- data collection
- analytical
- presentation
- policy planning
- program planning
- monitoring
- consultation with diverse community and relevant authorities
- budgeting and budget cycle.

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

Required Knowledge

- agricultural and forestry practices
- land capabilities and economics
- land management practices
- council structure and services
- council planning
- relevant organisations
- relevant legislation, including native title.

Hidden text

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: • collect and analyse information on land capability and sustainable practices • write and illustrate appropriately a report on land capability and sustainability challenges and opportunities • produce action plans with time lines and responsibilities for identified priorities • develop and disseminate educational materials • put in place, monitor and review processes and reports • account for the relationship to native title.
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Relationship to other units(prerequisite or co-requisite units)	Prerequisite units: nil. Co-requisite units: nil.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a workplace or simulated case study that includes access to: • an appropriate land area • real or simulated consultation processes • real or simulated data systems • council staff • relevant technical information.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Ecologically sustainable land management may include a combination of:	• biodiversity • conservation • water conservation • energy management • air quality control • coastal management

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Strategies may include:	• natural resource management. • formalised land use incentive programs • financial incentives and disincentives.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

Elements and Performance Criteria

© Commonwealth of Australia, 2025 Public Skills Australia

Element	Performance Criteria
1 Develop a campaign evaluation strategy	1.1 The evaluation strategy defines standards and measurements by which the effectiveness of the advertising can be measured and improvements identified
	1.2 The strategy establishes specific performance standards for each element of the advertising campaign as well as the overall outcome
	1.3 The strategy includes standards for the evaluation of the legal and ethical acceptability of the advertisement/s
	1.4 The strategy includes processes for correcting advertisements which do not meet legal and ethical standards
2 Implement campaign evaluation strategy	2.1 Expenditure data is evaluated to determine effectiveness in relation to budget
	2.2 The media program is evaluated to determine performance against the objectives of the media plan
	2.3 The creative strategy is evaluated in terms of copy content, creative execution and effectiveness of the finished advertisement
	2.4 The interactive effect of all the elements in the advertising campaign is evaluated to determine the overall effectiveness of the advertising campaign
3 Utilise advertising effectiveness data	3.1 The results of evaluations of advertising effectiveness are used in the analysis and planning phase for subsequent advertising
	3.2 Expenditure information is used to improve the budget planning process
	3.3 Feedback on the advertisement itself is used to provide ideas for future advertisements and to improve advertising copy
	3.4 Media performance information is used to determine whether alternative media approaches would yield better results

© Commonwealth of Australia, 2025 Public Skills Australia

3.5	Differences between planned and actual accomplishments are used to define problems to be addressed in the next planning phase

Required Skills and Knowledge

Not applicable.

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competency for this unit. This is an integral part of the assessment of competency and should be read in conjunction with the Range Statement.

Critical Aspects of Evidence

Integrated demonstration of all elements of competency and their performance criteria

Campaign effectiveness to be evaluated during and after a campaign

Underpinning Knowledge*

* At this level the learner must demonstrate understanding of specialised knowledge with depth in some areas.

Relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

Organisation's budget planning process

Techniques for evaluating advertising effectiveness

Advertising objectives

Legal and ethical requirements

Advertising, creative and media briefs

Media options

Corrective action

Underpinning Skills

Literacy skills to interpret evaluation requirements, legal and ethical requirements

Communication including questioning, clarifying and reporting

Numeracy skills for analysing numerical and other data and drawing conclusions

Evaluation skills

Ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

© Commonwealth of Australia, 2025 Public Skills Australia

Resource Implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace

Consistency of Performance

In order to achieve consistency of performance, evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and variety of situations

Context/s of Assessment

Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statement

Assessment must take account of the endorsed assessment guidelines in the Business Services Training Package

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment

Assessment should reinforce the integration of the key competencies and the business services common competencies for the particular AQF level. Refer to the Key Competency Levels at the end of this unit

Key Competency Levels

Collecting, **analysing and organising information** (Level 2)- to determine the effectiveness of advertising campaigns

Communicating ideas and information (Level 3) - to report on ways to utilise evaluation findings

Planning and organising activities (Level 2)- to implement evaluation processes

Working with teams and others (Level 2)- to gather effectiveness information

Using mathematical ideas and techniques (Level 2)- to analyse evaluation data

Solving problems (Level 3) - to improve advertising planning

Using technology (Level 1)- to compare data, if necessary and interpret results

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competency for this unit. This is an integral part of the assessment of competency and should be read in conjunction with the Range Statement.

Range Statement

The Range Statement provides advice to interpret the scope and context of this unit of competency, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. The following variables may be present for this particular unit:

Legislation, **codes and national standards relevant to the workplace may include**:

award and enterprise agreements and relevant industrial instruments

relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

relevant industry codes of practice

Elements of the advertising campaign may include:

research

creative materials

finished advertisement

purchase of advertising media

campaign launch

expenditure against budget

Effectiveness measures may include:

cognitive tests

physiological tests

readership tests

recall tests

related recall

awareness studies

ratings

© Commonwealth of Australia, 2025 Public Skills Australia

tracking study

affective tests

consumer juries

headline testing

conative tests

inquiry measurement

split-run tests

theatre tests

split cable testing

split scan system

sales analysis

consumer take-away

retail audit

controlled store testing

simulated test market (STM)

Legal and ethical standards may include:

legislation

government regulations

policies

non-government agency regulations

industry self-regulation standards

codes of practice

privacy standards

safety standards

standards relating to truth in advertising

'good taste' standards

standards relating to the use of sex in advertising

standards relating to women, children, and culturally and linguistically diverse groups

standards relating to subliminal advertising

standards relating to comparative advertising

The Range Statement provides advice to interpret the scope and context of this unit of competency, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. The following variables may be present for this particular unit:

Element	Performance Criteria

© Commonwealth of Australia, 2025 Public Skills Australia

1	Develop an implementation strategy	1.1	The creative brief and media plan are analysed and factors affecting implementation of the campaign determined
		1.2	The strategy outlines implementation tasks and timelines and includes a contingency plan for dealing with omissions and errors
2	Negotiate media contracts	2.1	The media plan and budget for implementation is confirmed with the client
		2.2	Advertisement positions and price are negotiated with each media vehicle in accordance with the client's requirements
		2.3	Contingency factors and solutions are negotiated and agreed with the media
		2.4	Media contracts are established that meet legal and ethical requirements and the requirements of the advertising campaign brief and schedule
3	Monitor the advertising campaign	3.1	Media performance is evaluated against the conditions of the contract and variations identified and analysed
		3.2	The provisions of media guarantees are applied if necessary, and adjustments made to media schedules
		3.3	The execution of the advertising campaign complies with the advertising schedule and budget

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan the production process for advertisements	1.1 Timing and budgetary requirements for creative and production work are confirmed

© Commonwealth of Australia, 2025 Public Skills Australia

		1.2 The creative brief is assessed and factors that influence the production process are identified
		1.3 Production processes are investigated and determined to suit both the creative work and the advertising medium
		1.4 Specifications are determined to suit both the advertisement and the production process
		1.5 Pre-production work is scheduled to meet production requirements
		1.6 A production schedule is planned to meet the requirements of the advertising brief and the media plan
2	Evaluate and select suppliers	2.1 Suppliers are identified for each element in the production process
		2.2 Suppliers are assessed in terms of their expertise and capacity to meet production, budget and schedule requirements
		2.3 Choice of suppliers is based on merit and value for money and meets legal and ethical requirements
		2.4 Suppliers are briefed and their agreement to meet production, schedule and price requirements gained
		2.5 Market segment/s are selected to meet the requirements of the advertising brief or new segmentation criteria are chosen and applied
3	Direct the advertising production process	3.1 Management of all aspects of the production process is integrated to meet the requirements of the advertising brief and schedule
		3.2 Creative specialists are involved in the production process to solve creative problems and advise on creative changes to ensure the resulting advertisement is consistent with the objectives and positioning for the product or service
		3.3 The outputs from the production process meet the requirements of the production schedule, creative brief and media plan
4	Evaluate advertising	4.1 The quality and cost-effectiveness of the

© Commonwealth of Australia, 2025 Public Skills Australia

production	production processes are evaluated and reported against the requirements of the creative brief
	4.2 Evaluation processes are valid and measure quality against the standards established in the creative brief
	4.3 The final advertisement is evaluated in relation to the requirements of the creative brief

Required Skills and Knowledge

Not applicable.

Evidence Guide

Critical Aspects of Evidence

Integrated demonstration of all elements of competency and their performance criteria

Rationale for choosing approach to describing the market and segmentation criteria

Underpinning Knowledge*

* At this level the learner must demonstrate understanding of a broad knowledge base incorporating some theoretical concepts.

Relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

Advertising brief

Purposes of advertising

Advertising objectives

Underpinning Skills

Literacy skills to identify demographic and other information, to write descriptive

Communication including clarifying and reporting

Numeracy skills for collecting and analysing quantitative information

Ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

Resource Implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace

Consistency of Performance

© Commonwealth of Australia, 2025 Public Skills Australia

In order to achieve consistency of performance, evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and variety of situations

Context/s of Assessment

Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statement

Assessment must take account of the endorsed assessment guidelines in the Business Services Training Package

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment

Assessment should reinforce the integration of the key competencies and the business services common competencies for the particular AQF level. Refer to the Key Competency Levels at the end of this unit

Key Competency Levels

Collecting, **analysing and organising information** (Level 2) - to evaluate market segments

Communicating ideas and information (Level 2) - through the development of a consumer profile

Planning and organising activities (Level 2) - to choose approaches and criteria to segment the market

Working with teams and others (Level2) - to identify and access sources of information for segmenting and profiling

Using mathematical ideas and techniques (Level2) - to analyse data and draw conclusions

Solving problems (Level 3) - by evaluating segments and re-doing the process if necessary

Using technology (Level 1) - to apply segmentation criteria and analyse data if required

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies

Critical Aspects of Evidence

Integrated demonstration of all elements of competency and their performance criteria

Rationale for choosing approach to describing the market and segmentation criteria

Underpinning Knowledge*

* At this level the learner must demonstrate understanding of a broad knowledge base incorporating some theoretical concepts.

Range Statement

Legislation, codes and national standards relevant to the workplace may include:

award and enterprise agreements and relevant industrial instruments

relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

relevant industry codes of practice

Approaches to determining the total market may include:

identifying consumers with relevant needs

identifying current users of a product or service

identifying people with related characteristics

Terms used to describe media audiences may include:

demographics:

age

sex

education

marital status

occupation

nationality

first language

children

income

Market segmentation is

the process of dividing a market into consumer subgroups, each of which has different needs

Criteria to use in market segmentation may include:

consumer needs

benefits desired

product/service usage

attitude

demographics

lifestyle

social and cultural factors

business characteristics

Sources of information for segmenting and profiling markets may include:

© Commonwealth of Australia, 2025 Public Skills Australia

industry sources

existing research data

original a priori research (where the market segments are assumed at the beginning and research is used to confirm them)

original response based research

Consumers may include:

individuals

businesses

households

Standard statistical terms

are those categories used by the Australian Bureau of statistics in collecting and reporting census data

Demographic descriptions may include:

date and place of birth

sex

nationality

indigenous Australian

education

occupation

marital status

first language

other languages spoken at home

number and age of children

income level

disability

Psychographic descriptions may include:

activities

interests

opinions

values

attitudes

lifestyle

Elements and Performance Criteria

Elements and Performance Criteria

© Commonwealth of Australia, 2025 Public Skills Australia

Element	Performance Criteria
1 Define campaign objectives	1.1 The advertiser's purpose and objectives from the advertising brief are clarified and used to set objectives for the advertising campaign
	1.2 Campaign objectives are stated in measurable terms and identify the nature and extent of what is to be accomplished by the advertising
	1.3 Campaign objectives are feasible, given the constraints of time, budget, product and market factors
	1.4 Campaign objectives take into consideration factors which may affect consumer responses
	1.5 Campaign objectives meet legal and ethical requirements
2 Prepare an advertising budget	2.1 Research resource requirements for the advertising campaign are assessed and specified
	2.2 Resource requirements for a range of media options are assessed and specified
	2.3 Resource requirements for creative and production services for the campaign are assessed and specified
	2.4 Resources allocated to each component of the advertising campaign are justified and sufficient, in relative terms, to achieve the campaign objectives
	2.5 The overall budget meets the requirements of the advertising brief
3 Develop a schedule for proposed advertising activities	3.1 Campaign length and timing is confirmed from the advertising brief
	3.2 Service providers with the required expertise are identified and their costs and availability negotiated
	3.3 Choice of service providers is based on merit and value for money and meets legal and ethical requirements
	3.4 The time allowed in the schedule to meet creative, media and production requirements is sufficient to

© Commonwealth of Australia, 2025 Public Skills Australia

achieve the advertising objectives

3.5 The schedule includes milestones for monitoring progress and expenditure against budget, and evaluating campaign effectiveness

BSBWOR502B Ensure team effectiveness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to facilitate all aspects of teamwork within the organisation. It involves taking a leadership role in the development of team plans, leading and facilitating teamwork and actively engaging with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers and addresses the need for managers to facilitate work teams and to build a positive culture within work teams. The unit takes a systematic and planned approach to developing teams. It includes the soft skills as well as more structured approaches to the management of teams. At this level, work will normally be carried out within complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Establish team performance plan	1.1. ***Consult*** team members to establish a common understanding of team purpose, roles, responsibilities and ***accountabilities*** in accordance with organisational goals, plans and objectives 1.2. Develop ***performance plans*** to establish expected ***outcomes***, ***outputs***, ***key performance indicators*** and goals for work team 1.3. ***Support*** team members in meeting expected performance outcomes
2. Develop and facilitate team cohesion	2.1. Develop ***strategies*** to ensure team members have input into planning, decision making and operational aspects of work team 2.2. Develop ***policies and procedures*** to ensure team members take responsibility for own work and assist

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	others to undertake required roles and responsibilities 2.3. Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4. Develop ***processes*** to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1. Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2. Support the team in identifying and resolving work performance problems 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all ***stakeholders***
4. Liaise with stakeholders	4.1. Establish and maintain open communication processes with all stakeholders 4.2. Communicate information from ***line manager***/***management*** to the team 4.3. Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4. Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to explain team goals, to address team conflict and to build an environment of trust • planning and organisational skills to keep team on track and focussed on work outcomes.
Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• group behaviour • strategies for mentoring and coaching to informally guide and instruct team members • issue resolution • strategies for gaining consensus.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • range of techniques that can be used to build work teams, strengthen communications in the team and resolve issues • methods for engaging with stakeholders and obtaining advice from outside the work team, to ensure team is focussed and on track • knowledge of group behaviour.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • demonstration of team building techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • review of performance plans developed for work team • review of policies and procedures developed to

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	ensure team members take responsibility for own work.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Consultation may refer to:	• conducting meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual performance plans • mechanisms used to provide feedback to the work team in relation to outcomes of consultation
Accountabilities may refer to:	• responsibilities as defined in position descriptions, codes of conduct/behaviour, duty statements or similar • statement of conduct outlining responsibilities/actions/performance
Performance plans may refer to:	• individual performance plans linked to team goals • team plans based on work assignments and responsibilities
Outcomes, ***outputs***, ***key performance indicators*** may refer to agreed:	• changes in work roles and responsibilities • improved individual and team, performance and participation • improvements to systems, operations • measures for monitoring and evaluating the

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	efficiency or effectiveness of systems or services • quality standards and expectations • targets for productivity improvements such as reduced downtime, higher production levels, decreases in absenteeism • targets for training and development
Support may include:	• Coaching • Mentoring • Training and development opportunities • Clarification of roles and expectations • Long term or short term plans • Meetings
Strategies may refer to:	• clarification of roles and expectations • electronic communication devices and processes, such as intranet and email communication systems, to facilitate input • long-term or short-term plans factoring in opportunities for team input • mentoring and 'buddy' systems to support team members in providing input • newsletters and briefings • training and development activities
Policies and procedures may refer to:	• organisational guidelines and systems that govern operational functions • procedures that detail the activities that must be carried out for the completion of actions and tasks • Standard Operating Procedures
Processes may refer to:	• brainstorming options with the team for addressing concerns • creating a matrix of issues and concerns and distributing for comment • discussions with individuals regarding their concerns • distributing drafts for comment with a range of options for resolution of concerns • training and development sessions
Stakeholders may include:	• Board members • business or government contacts • funding bodies

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• union/employee groups and representatives • work team
Line manager*/*management may refer to:	• chief executive officer • direct superior • other management representatives

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Initiate interpersonal communication with clients	1.1. Identify and use ***preferred client communication styles and methods*** 1.2. Establish rapport with clients using ***verbal*** and ***non-verbal communication*** processes 1.3. Investigate and act upon opportunities to offer positive feedback to clients 1.4. Use open questions to promote two-way communication 1.5. Identify and act upon potential ***barriers to effective communication*** with clients 1.6. Initiate communication processes which relate to client needs, preferences and expectations
2. Establish client relationship management strategies	2.1. Develop client loyalty objectives focussing on the development of long term business partnerships 2.2. Assess client profile information to determine approach 2.3. Develop ***client loyalty strategies*** to attract and retain

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	clients in accordance with the business strategy 2.4. Identify and apply ***client care and client service standards***
3. Maintain and improve ongoing relationships with clients	3.1. Develop ***strategies to obtain ongoing feedback*** from clients to monitor satisfaction levels 3.2. Develop strategies to elicit feedback which provide information in a form that can be used to improve relationships with clients 3.3. Obtain feedback to develop and implement strategies which maintain and improve relationships with clients
4. Build and maintain networks	4.1. Allocate time to establish and maintain business contacts 4.2. Participate in ***business associations*** and/or ***professional development activities*** to establish and maintain a ***network*** of support for the business and to enhance personal knowledge of the market 4.3. Establish communication channels to exchange ***information and ideas*** 4.4. Provide, seek and verify information to the network

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to determine client needs and preferences through active listening and presenting ideas clearly and precisely • culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities • interpersonal skills to establish rapport, and to build and maintain relationships with clients.
Required knowledge

• key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects business operations, such as:
  • anti-discrimination legislation
  • consumer laws including appropriate state/territory legislation

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• ethical principles • marketing code of practice • privacy laws • Trade Practices Act • marketing communications concepts and processes • principles and techniques for effective communication and networking • sources of business related networks.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • establishing and maintaining relationships with a range of clients related to the candidate's business • participating in and providing, an active contribution to a business related network.
Context of and specific resources for assessment	Assessment must ensure: • access to office equipment and resources.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • assessment of written reports or journals on client relationship activities • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of the candidate communicating with clients • observation of presentations made to business networks • oral or written questioning to assess knowledge and understanding

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	• review of authenticated documents from the workplace or training environment • review of testimony from team members, colleagues, supervisors or managers.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other relationship management units • marketing units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Preferred client communication styles and methods may include:	• email • face-to-face • mail • phone
Verbal communication may include:	• articulation • clarity of speech • feedback • language • listening skills • open questions • questioning skills • voice modulation • voice projection
Non-verbal communication may include:	• active listening • body language • body orientation • clothing • colour • distance

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• facial expression • grooming • gestures • music • posture • sound • touching • voice
Barriers to effective communication may include:	• acting on false assumptions and stereotypes • cultural differences not being addressed • educational differences not being addressed • failure to prominently display contact details in all communications provided to the client • inappropriate word choice • ineffective non-verbal communication • lack of 'contact us' forms or pages on websites • lack of distribution of reply paid cards or envelopes in mail outs • lack of voice modulation and articulation • limited opening hours of call centres or office • not listening actively • organisational factors • physical, personal, gender and age differences not being addressed
Client loyalty strategies include:	• access to dedicated staff • added value offers • anniversary offers • client clubs • client reward schemes • credit or discount facilities • dedicated or private facilities • discounts • formal letter of thanks • frequent purchaser programs • handwritten note thanking the client • offering promotional items • phone call thanking client for the business • regular recontact with best clients • thank you gifts and promotions
Client care and client service	• accuracy of billing

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	

standards may include:	• accuracy of product/service descriptions, specifications in marketing communications
	• complaint resolution times
	• incidences of stock outs and back orders
	• on-hold times
	• order delivery standards such as:
	  • whether right product or service was delivered
	  • delivered to right person or address
	  • delivered on time
	  • politeness, helpfulness and grooming of delivery staff
	  • delivery vehicles parked properly
	  • cleanliness of delivery vehicles
	• shipment tracking services
	• telephone answering times and responses

Strategies to obtain ongoing feedback may include:	• including 'comments and queries' or 'bouquets and brickbats' on all order forms • complaints handling procedures • email • letter • soliciting complaints • surveys of current clients • surveys of lapsed clients to determine reason/s for ceasing to buy • telephone interviews • training staff to ask open questions about product or service levels
Business associations may include:	• chambers of commerce • industry associations • institutes • professional bodies • societies
Professional development activities may include:	• demonstrations • exhibitions • fairs • industry information seminars • industry training • pre-launch activities • technical information briefings

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• trade shows
Networks may include:	• business • formal • groups • individuals • informal • organisations • personal
Information and ideas may include:	• changes in the environment • changing customer requirements • information on competitors' activities • personal, professional or business support

PSPSOHS609A Evaluate an organisation's OHS performance

Modification History

PSPSOHS609A Release 2: Layout adjusted. No changes to content.

PSPSOHS609A Release 1: Primary release.

Unit Descriptor

This unit covers the outcomes required to make judgments as a consequence of an OHS audit and to evaluate an organisation's arrangements for identifying hazards, assessing and controlling risks, and monitoring and improving the effectiveness of the management of OHS and compliance against agreed benchmarks.

In practice, evaluating an organisation's OHS performance may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, applying government systems, influencing opinion, fostering leadership, managing resources, managing compliance with legislation, etc.

Application of the Unit

The unit focuses on evaluation of the effectiveness of an organisation's management of OHS. Aspects of the integration with other organisational management systems, the appropriateness of participative arrangements and OHS improvements are some components of the evaluation. The scope may cover OHS performance measures and outcomes, strategies, policies, programs, procedures and the organisation's resources.

This unit applies to the auditing of systematic approaches to managing OHS, which may or may not be formalised as part of an OHS management system, and can apply to internal or external benchmarks. The scope and benchmark criteria for the OHS audit will be agreed before the commencement of information and data gathering, and may address all areas of the organisation or an identified function, business or geographical area.

This unit is a companion unit to PSPSOHS608A Conduct an OHS audit, which together address the knowledge and skills required to conduct an OHS audit and to evaluate an organisation's OHS performance. People with overall responsibility for OHS audit will require both units.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Evaluate effectiveness of systematic approaches to identifying OHS hazards	1.1 Workplace ***hazard*** identification activities being undertaken are identified and compared with organisational policies and procedures. 1.2 Products, processes and systems are examined to determine whether ***hazards of long latency*** and ***low frequency/high consequence*** are included and minimised. 1.3 Products, processes and systems are examined to determine whether ***risks*** to ***persons other than employees*** are identified and minimised. 1.4 ***Organisational factors*** that impact on OHS are identified. 1.5 Outcomes of the evidence gathering are reviewed with ***specialist personnel***, if required.
2 Evaluate the effectiveness of systematic approaches to OHS risk management	2.1 Appropriateness of the organisation's risk assessment tool/s and processes are evaluated. 2.2 Outcomes of the risk assessment process are assessed for validity, reliability and inclusion of all major OHS risks, in particular demonstrated use of risk assessment methods in the organisation. 2.3 Risk controls are evaluated for suitability and effectiveness in relation to the organisation's systematic management of OHS.
3 Evaluate the	3.1 The scope of organisational processes to monitor the

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
effectiveness of systematic OHS monitoring processes	implementation and status of systematic approaches to managing OHS is evaluated. 3.2 The quality of information and data obtained from the monitoring processes is evaluated. 3.3 The managerial level of response to the issues raised in the monitoring process is evaluated in relation to the level of risk.
4 Assess whether the OHS management approaches have produced improved performance	4.1 Performance indicators (including ***positive performance indicators***) are evaluated to determine whether they provide a true, reliable and timely measure of the effectiveness of the OHS management approaches to reducing OHS risk. 4.2 Reported performance is compared with evidence gathered, and differences are documented. 4.3 Outcomes of evaluation of performance are documented in a clear and objective manner.
5 Assess and advise on organisational OHS compliance against agreed benchmarks	5.1 Systematic analysis is undertaken to identify areas of OHS compliance and non-compliance with ***benchmarks***. 5.2 Advice on the impact of legislation and standards on the selection, suitability and implementation of a range of OHS performance interventions is provided. 5.3 Outcomes of evaluation of compliance are documented and reported to ***key personnel and stakeholders***.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communicating effectively with personnel at all levels of organisation and OHS specialists and, as required, emergency service personnel
- preparing reports for a range of target groups including OHS committee, OHS representatives, managers, supervisors and other stakeholders
- contributing effectively to the strategic OHS performance of the organisation
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- analysing relevant workplace information and data, make observations including of

© Commonwealth of Australia, 2025 Public Skills Australia

workplace tasks and interactions between people, their activities, equipment, environment and systems
- analysing and evaluating a range of information and data carrying out simple statistical analysis eg mean, standard deviation, regression formats including graphs, maps, matrices, technical reports
- using electronic information and data systems to enter workplace information and data and produce effective graphical representations
- interpreting information and data to identify areas for improvement
- using a range of communication media
- conducting effective formal and informal meetings
- using information and data gathering techniques such as brainstorming, polling, interviews
- using language and literacy skills appropriate to the workgroup and the task
- using computer and information technology skills to access internal and external information and data on OHS
- paying attention to detail when making observations and recording outcomes

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- roles and responsibilities under OHS legislation of employees including supervisors, contractors, OHS inspectors etc
- responsibilities of designers etc under OHS legislation
- principles of duty of care including concepts of causation, foreseeability, preventability
- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- difference between common law and statutory law
- concept of common law duty of care
- requirements for recordkeeping that address OHS, privacy and other relevant legislation
- standards related to OHS information and data, statistics and records management including requirements for information and data under elements of systematically managing OHS
- nature and use of information and data that provides valid and reliable results on performance of OHS management processes (including positive performance indicators (PPIs) and limitations of other types of measures
- development of tools such as PPIs in assessment of OHS performance
- methods of collecting reliable information and data, commonly encountered problems in collection, and strategies for overcoming such problems
- requirements for reporting under OHS and other relevant legislation including notification

© Commonwealth of Australia, 2025 Public Skills Australia

and reporting of incidents
- difference between hazard and risk
- risk as a measure of uncertainty and the factors that affect risk
- requirements under hazard-specific OHS legislation and codes of practice
- principles of incident causation and injury processes
- characteristics, mode of action and units of measurement of major hazard types
- principles of human behaviour and response to interactions with human, physical and task environment to identify psychosocial hazards
- hierarchy of control and considerations for choosing between different control measures, such as possible inadequacies of particular control measures
- knowledge of a range of risk analysis/assessment techniques and tools and the application and limitations of those techniques and tools
- standard industry controls for a range of hazards
- types of hazard identification tools including JSA
- limitations of generic hazard and risk checklists and risk ranking processes
- sampling methodologies, application and related statistical measures
- principles and practices of a systematic approach to managing OHS
- range of risk analysis/assessment techniques and tools and their application and limitations
- requirements of OHS and standards related to systematically managing OHS
- other function areas that impact on the management of OHS
- internal and external sources of OHS information and data
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS e.g.
  - labour market changes
  - structure and organisation of workforce e.g. part-time, casual and contract workers, shift rosters, geographical location
  - language, literacy and numeracy
  - communication skills
  - cultural background/workplace diversity
  - gender
  - workers with special needs
- auditing methods and techniques
- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- organisational behaviour and culture as it impacts on OHS and on change
- ethics related to professional practice
- methods of providing evidence of compliance with OHS legislation
- professional liability in relation to providing advice
- principles of effective meetings including agendas, action planning, chair and secretarial duties, minutes and action items
- organisational OHS policies and procedures
- nature of workplace processes (including work flow, planning and control) and hazards relevant to the particular workplace

© Commonwealth of Australia, 2025 Public Skills Australia

- formal and informal communication and consultation processes and key personnel related to communication
- language, literacy and cultural profile of the work group
- organisational culture as it impacts on the workgroup

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC601B Maintain and enhance confidence in public service
- PSPGOV605A Persuade and influence opinion
- PSPLEGN601B Manage compliance with legislation in the public sector
- PSPMNGT602B Manage resources
- PSPMNGT611A Manage evaluations
- PSPSOHS608A Conduct an OHS audit.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit
- skill requirements of this unit
- application of employability skills as they relate to this unit.

Resources required to carry out assessment

Resources essential for assessment include:

- legislation, policy, procedures and protocols relating to evaluation of organisational OHS performance
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when evaluating an organisation's OHS performance.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when evaluating an organisation's OHS performance, including coping with difficulties, irregularities and breakdowns in routine
- evaluation of an organisation's OHS performance in a range of 3 or more contexts or occasions, over time, with at least 1

© Commonwealth of Australia, 2025 Public Skills Australia

evaluation of broad scope.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation.
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

A ***hazard*** is:

- a source or situation with a potential for harm in terms of human injury or ill health, damage to property or the environment, or a combination of these

Hazards of long latency include:

- conditions, illnesses and other health risks that result from longer term exposure to specific triggers such as chemicals, noise, radiation and psychosocial factors

Low frequency/high consequence hazards are:

- high impact events that occur rarely such as explosions, fires and building collapses but may result in very serious injury, death or multiple death situations

A ***risk*** is:

- the chance of something occurring that will result in injury or damage
- measured in terms of consequences (injury or damage) and likelihood of the consequence

© Commonwealth of Australia, 2025 Public Skills Australia

Persons other than employees may include:	• neighbourhood or local community members • contractors • visitors to premises • customers/clients
Organisational factors may include:	• geographical spread of sites • roster and shift arrangements • supervision structure • participatory arrangements • authority and reporting structure • workforce structure such as labour hire, contractors, part-time and casual workers • cultural diversity • workplace culture including industrial relations and safety culture • other management systems requiring interface or integration with management of OHS • nature of hazards and level of risk
Specialist personnel may include:	• external consultants specialising in specific areas of OHS such as safety engineering, ergonomics, hygiene, toxicology, psychology, occupational health • specialist staff within government agencies offering assistance in specialist or problem areas within OHS
Positive performance indicators are:	• a means of focusing on assessing how successfully a workplace is performing through measuring OHS processes
Benchmarks may include:	• specific legislation • OHS management system standards • industry specific standards • organisation's business plan
Key personnel and stakeholders may include:	• boards of management and shareholders • management, persons in control of the workplace, supervisors • employees and other parties across a range of levels and roles including health and safety representatives and OHS committee members • customers/clients

PSPSOHS502A Participate in the management of the OHS information and data systems

Modification History

PSPSOHS502A Release 2: Layout adjusted. No changes to content.

PSPSOHS502A Release 1: Primary release.

Unit Descriptor

This unit covers participation in the provision of technical and legal information and data necessary to ensure that management and other stakeholders are informed about OHS and the effectiveness of the management of OHS.

It includes accessing and providing OHS information; collecting, collating and analysing data; and ensuring that this information and data is distributed throughout the workplace. It also addresses the legislative requirements for reporting and notification of OHS matters.

In practice, participation in the management of OHS information and data systems may overlap with other generalist or specialist public sector work activities such as promoting ethical practice, using complex communication strategies, undertaking research and analysis, coordinating resource usage, promoting compliance with legislation, etc.

Application of the Unit

This unit applies to individuals with managerial responsibility for providing technical and legal information and data necessary to ensure that management and other stakeholders are informed about OHS and the effectiveness of the management of OHS

It includes accessing and providing OHS information; collecting, collating and analysing data; and ensuring that this information and data is distributed throughout the workplace. It also addresses the legislative requirements for reporting and notification of OHS matters.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Access sources of OHS information and data	1.1 ***Sources of OHS information and data*** are identified, accessed and reviewed regularly. 1.2 Information and data is critically evaluated to ensure its accuracy, currency and relevance. 1.3 ***Appropriate formats*** for information and data storage and retrieval are determined.
2 Assist in the application of policies and procedures for collection of workplace information, data and records	2.1 Managers and ***key personnel*** are informed of ***legal requirements*** for information and data collection and record keeping. 2.2 OHS records are kept using ***appropriate tools***. 2.3 Workplace information and data is collected according to ***established procedures***. 2.4 Procedures for information and data collection, record keeping, amendments to legislation, and distribution of records are reviewed regularly to ensure their usability and relevance.
3 Assist in maintaining an information and data management system that enables retrieval and distribution of OHS information and data	3.1 Recommendations are made for storage of OHS information and data in a manner that makes it accessible to ***stakeholders*** and key personnel. 3.2 OHS information, data and records are accurately entered, and stored ***ethically***. 3.3 Purposes and appropriate uses of OHS information and data are identified for meaningful outcomes. 3.4 ***Legislated reporting requirements*** to external bodies are met accurately and within time limits. 3.5 Training needs relevant to the management of the information and data system for appropriate personnel are regularly assessed and actioned as appropriate. 3.6 Information and data management system is regularly evaluated to ensure its ease of use and relevance to the OHS needs of the organisation.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4 Use, apply and regularly review analytical techniques to evaluate and improve OHS performance	4.1 ***Information and data collected*** is evaluated for validity and reliability. 4.2 ***Analytical techniques*** appropriate for evaluation of OHS performance (including ***positive performance indicators***) and identification of areas for improvement are identified. 4.3 Analytical techniques are applied appropriately and accurately. 4.4 OHS information and data analysis processes are reviewed regularly, in consultation with stakeholders, to ensure organisational and legislative requirements.
5 Communicate OHS information and results of data analysis to stakeholders and external bodies	5.1 Outcomes of information and data analysis are appropriately formatted taking account of the ***target audience***. 5.2 OHS information and data is disseminated to managers, key personnel and stakeholders taking account of legal and ethical requirements. 5.3 OHS information and data is communicated objectively and feedback sought. 5.4 Recommendations are made for improvement in prevention strategies based upon information accessed and data analysis.
6 Communicate the effectiveness of OHS information and data systems through monitoring and evaluation	6.1 The effectiveness of the OHS information and data system is reviewed regularly. 6.2 Frequency, method and scope of review is determined in consultation with stakeholders. 6.3 Stakeholders are enabled to have input to review. 6.4 Areas for improvement in the OHS information and data system are identified and recommendations made for improvement. 6.5 Improvement strategies arising from the review are communicated to appropriate levels of authority through planning, documentation and implementation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- relating to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- preparing more detailed reports for a range of target groups including OHS committee, OHS representatives, managers and supervisors

© Commonwealth of Australia, 2025 Public Skills Australia

- applying continuous improvement and action planning processes
- contributing to the strategic OHS performance of the organisation
- employing project management skills to achieve change
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically manage OHS and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (eg % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- using electronic systems to enter workplace information and data and produce effective graphical representations
- using a range of communication media
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on OHS

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- legislative requirements for OHS information and data, and consultation
- roles and responsibilities in relation to communication and consultation for OHS committees, OHS representatives, line management, employees and inspectors
- requirements for recordkeeping that addresses OHS, privacy and other legislation
- state/territory/Commonwealth OHS legislation (Acts, regulations, codes of practice, associated standards and guidance material) including prescriptive and performance approaches and links to other relevant legislation such as industrial relations, equal employment opportunity, workers compensation, rehabilitation etc
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- difference between common law and statutory law
- concept of common law duty of care
- methods of providing evidence of compliance with OHS legislation
- facilitation of the use of tools such as positive performance indicators (PPIs) in assessment of OHS performance
- nature of information and data that provides valid and reliable results on performance of OHS management processes (including positive indicators, such as number of safety audits conducted)
- methods of collecting reliable information and data, commonly encountered problems in collection and strategies for overcoming such problems
- requirements for reporting under OHS and other relevant legislation including notification and reporting of incidents

© Commonwealth of Australia, 2025 Public Skills Australia

- internal and external sources of OHS information and data
- auditing methods and techniques
- how the characteristics and composition of the workforce impact on risk and the systematic approach to managing OHS e.g.
  - labour market changes
  - structure and organisation of workforce e.g. part-time, casual and contract workers, shift rosters, geographical location
  - language, literacy and numeracy
  - communication skills
  - cultural background/workplace diversity
  - gender
  - workers with special needs
- ethics related to professional practice
- professional liability in relation to providing advice
- knowledge of organisational OHS policies and procedures
- key personnel, including identifying 'change agents', within workplace management structure
- language, literacy and cultural profile of the workgroup
- organisational culture as it impacts on the workgroup

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the unit descriptor, performance criteria, The range statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV512A Use complex workplace communication strategies
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPSOHS501A Participate in the coordination and maintenance of a systematic approach to managing OHS
- PSPSOHS503A Assist in the design and development of OHS participative arrangements.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- knowledge requirements of this unit

© Commonwealth of Australia, 2025 Public Skills Australia

- skill requirements of this unit
- application of employability skills as they relate to this unit.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to management of OHS information and data systems
- workplace documentation, case studies and workplace scenarios to capture the range of situations likely to be encountered when participating in the management of OHS information and data systems.

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when participating in the management of OHS information and data systems, including coping with difficulties, irregularities and breakdowns in routine
- participation in the management of OHS information and data systems in a range of three or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios.

The assessment environment should not disadvantage the candidate and where the person has a disability the principle of reasonable adjustment should be applied during assessment.

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments.

Range Statement

The range statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The range statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance criteria is explained here.

Sources of OHS information and data may include:

- external sources such as:
  - OHS legislation and codes of practice
  - Australian and industry standards
  - Australian Bureau of Statistics (ABS)
  - OHS authorities
  - unions and industry bodies
  - OHS professional bodies
  - internet, journals, magazines
  - technical information and data
  - research literature
  - manufacturers' manuals and specifications
  - National Occupational Health and Safety Commission (NOHSC)
- internal sources such as:
  - OHS policies and procedures
  - work instructions
  - job and work system analysis (JSAs)
  - risk assessments (past and present)
  - material safety data sheets (MSDSs) and registers
  - manufacturers' manuals
  - organisational data such as insurance records, incident investigation, enforcement notices and actions, workers compensation data, OHS performance indicators, audits etc
  - safety handbooks
  - employee information papers, brochures, notes, newsletters
  - OHS reports including, workplace inspections, hazard and incident reports, technical reports, consultations and observations

Appropriate formats may be:

- electronic or paper-based
- available through an intranet or CD-ROM
- recognised records and data management systems

Key personnel may include:

- managers from other areas
- people involved in OHS decision making or who are affected by OHS decisions

© Commonwealth of Australia, 2025 Public Skills Australia

Legal requirements may include:	• legislation, regulations and standards governing:
	  • reporting of incidents
	  • records for monitoring and exposure to specific hazards
	  • privacy and confidentiality of personal records
	  • workplace equity
	  • workers compensation

Appropriate tools may be:	• electronic systems
	• paper-based systems
	• and may include:
	  • registers
	  • graphical representations
	  • performance monitoring charts and checklists
	  • handbooks

Established procedures may include:	• legislation and codes of practice • OHS management systems • relevant workers compensation processes • organisational policies and procedures including accident and incident recording system • recognised industry standards • manufacturers' recommendations, and maintenance and servicing schedules • contract and tender documentation • formal and/or informal procedures
Stakeholders may include:	• management • supervisors • employees • OHS committees • health and safety and other employee representatives
Ethical requirements for OHS records storage include:	• privacy, as appropriate • confidentiality • ensuring access to personal records, within legislative requirements • commercial in confidence information as appropriate
Legislated reporting requirements include:	• serious injury and serious incident reporting to OHS authorities
Information and data collected may include:	• data relating to implementation of OHS plans and processes • OHS performance indicators • hazard registers • incident data including injury and disease • MSDSs and registers

© Commonwealth of Australia, 2025 Public Skills Australia

	• risk assessments • job safety analyses • OHS policies and procedures
Analytical techniques may include:	• basic statistical tests such as means, standard deviation and percentage change
Positive performance indicators are:	• a means of focusing on assessing how successfully a workplace is performing through measuring OHS processes
Target audience may include:	• internal stakeholders, including the board of management, managers, OHS committees, supervisors, employees (and their families), contractors, visitors and others on site • external stakeholders, including customers, shareholders, local community (directly or via the media), representatives of special interest groups and agencies, insurance agencies, OHS regulators and other relevant statutory bodies

PSPPM501B Design complex projects

Modification History

PSPPM501B Release 2: Layout adjusted. No changes to content.

PSPPM501B Release 1: Primary release.

Unit Descriptor

This unit covers planning and development of projects which may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes identifying project opportunities, undertaking scoping, analysing the feasibility of projects, developing project plans and managing the establishment of projects. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, designing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis, etc.

When this unit is completed in conjunction with *PSPPM502B Manage complex projects*, and *PSPPM503B Close complex projects*, the three units together are equivalent to the nine private sector Business Services project management competencies: BSBPM501A - BSBPM509A inclusive.

This unit replaces and is equivalent to *PSPPM501A Initiate projects*.

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify project opportunities and undertake scoping	1.1 A ***critical analysis*** of the need for a project is conducted in accordance with organisational ***policy and procedures***. 1.2 A project definition study is undertaken, where necessary, to determine the scope of the project. 1.3 Project scoping is completed in accordance with organisational policy and procedures and identifies a rationale for the project that includes the purpose, outcomes/expected benefits. 1.4 ***Stakeholders*** are identified and canvassed to ensure that their requirements are addressed in project planning.
2. Analyse project feasibility	2.1 Research and analysis is undertaken to identify impacts and risks, ***constraining factors*** and alternate options. 2.2 Technical feasibility, supportability and cost effectiveness of the project are analysed and the outcome is reported to key stakeholders. 2.3 Alternatives for project design are assessed and a preferred option that fits the strategic direction of the organisation/work unit is identified and reported. 2.4 Relevant specialists are consulted to determine the extent of financial, technical, security, scheduling, ***whole-of-life support*** and probity, and other risks. 2.5 A business case is prepared and ***approvals*** to proceed with project development are obtained in accordance with organisational policy, procedures and guidelines.
3. Develop project plans	3.1 Project aims, objectives and impacts are defined in the ***project plan***, and timeframes and resources to complete quality deliverables on time and within budget are identified. 3.2 Projected outcomes are recorded in measurable and achievable forms and indicators to monitor the performance of the project are developed and agreed by relevant parties. 3.3 Potential risks are investigated and identified in the project plan and a risk management process is established to analyse

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	information and ***options to manage risks***.
	3.4 Skills, roles and responsibilities of team members and stakeholders are clarified and agreed, and reporting requirements are identified.
	3.5 ***Management*** of project ***parameters*** is addressed in the project plan and evaluation criteria are designed in accordance with organisational policy and practice.
	3.6 ***Project management tools*** are utilised for planning in accordance with project requirements and the project is designed and ***documented*** in consultation with ***specialists*** to meet user requirements.
4. Manage establishment of project	4.1 If required, stakeholders are lobbied in accordance with organisational policy and procedures, to negotiate endorsement for the project.
	4.2 Terms of reference are written and agreed to by stakeholders and resources are obtained in accordance with organisational procedures to establish the project.
	4.3 Project scope and objectives are reviewed and analysed, and a strategy is developed to establish ***work breakdown structures*** to implement the project.
	4.4 Project ***infrastructure*** is identified and established in accordance with organisational policy and procedures.
	4.5 Specialist and technical support relevant to the project is obtained in accordance with the project plan.
	4.6 Project governance structure and processes are established as detailed in the project plan.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using project planning techniques related to projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects
- detailing requirements, writing recommendations and preparing plans requiring precision of expression
- negotiating timelines, roles and responsibilities with stakeholders and team

© Commonwealth of Australia, 2025 Public Skills Australia

members
- scheduling project activities
- communicating with stakeholders using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools suited to planning reasonably complex projects
- applying risk management techniques in project establishment including risk sharing and transfer
- using public relations strategies to promote and gain endorsement for projects
- including workplace safety issues in project planning requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on the project and management of the project, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
- project governance requirements
- financial management requirements
- quality standards
- risk management
- procurement
- human resources
- equal employment opportunity, equity and diversity principles
- project planning methods which may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects
- project management tools suited to planning reasonably complex projects
- principles relating to the planning phase of project management
- the project specifications
- market capability
- resource plans
- project approval processes
- scheduling packages
- cost schedule control systems
- integrated logistics support
- work breakdown structures
- change management in the context of designing complex projects

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV503B Coordinate resource allocation and usage

PSPGOV504B Undertake research and analysis

PSPGOV505A Promote diversity

PSPGOV507A Undertake negotiations

PSPGOV512A Use complex workplace communication strategies

PSPPM502B Manage complex projects

PSPPM503B Close complex projects

PSPPROC502A Establish contract management arrangements

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see table Following for examples)
- complex projects designed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project planning and management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when initiating projects, including coping with

© Commonwealth of Australia, 2025 Public Skills Australia

difficulties, irregularities and breakdowns in routine
- complex projects designed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Critical analysis may include:

- internal and external environment scan
- political imperatives
- previous and current related projects

© Commonwealth of Australia, 2025 Public Skills Australia

- policies likely to be impacted
- cost-benefit analysis

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
  - environmental/sustainability legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Constraining factors may include:

- political
- industrial
- legislative
- technical
- financial
- social
- cultural

© Commonwealth of Australia, 2025 Public Skills Australia

- security/privacy
- environmental
- logistical support
- resources

Whole-of-life support may include:

- maintenance
- supply
- technical data
- personnel
- training
- facilities
- packaging, handling
- storage and transportation
- support and test equipment
- computing support

Approval may be required from:

- project sponsor
- business owner of the project
- program manager
- line manager
- specialist project management office
- chief executive officer, manager or management representative
- funding body
- customer or client

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose

© Commonwealth of Australia, 2025 Public Skills Australia

- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Risk management may include:

- acceptance
- avoidance
- minimisation
- transfer

Management may include:

- risk management
- schedule management
- financial management
- communication, including reporting
- resources management
- logistics management
- scope management
- change management
- quality management
- people management
- procurement management
- occupational health and safety management

Project parameters include:

- project scope - outcomes, objectives, project deliverables
- feasibility
- skills required for project team
- people required for project including specialist expertise
- communications including reporting requirements
- risks associated with project including people, environment, resources, technology change during the life of the project, if applicable
- steering committee arrangements
- timeframe and milestones
- cost
- resources for project
- acquisition/procurement
- organisational structure for project
- project quality control and operational flexibility
- project governance structure

© Commonwealth of Australia, 2025 Public Skills Australia

- monitoring through staged rollout
- project delivery requirements
- pilot outcomes
- intellectual property
- integration of project within organisation
- transition arrangements
- change management
- project evaluation

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

Documented information may include:

- reports detailing strategy
- statement of requirement/work
- industry development proposals
- project plans
- resource plans
- project team work plans
- risk and issues plan and log
- performance evaluation criteria
- reports to industry
- whole-of-life support proposals
- project definition study

Relevant specialists may include:

- legal
- technical
- financial
- other functional areas
- other relevant agencies
- logistics

Work breakdown structures may include:

- how the work is to be performed and how cost and schedule data are to be tracked and reported
- identification of the project tasks (deliverables)

© Commonwealth of Australia, 2025 Public Skills Australia

Project infrastructure may include:	• identification of specific management responsibilities for tasks • staffing levels/need for recruitment action and training • equipment and technical support • resource requirements including travel, finance etc • project office accommodation • management infrastructure

PSPGOV606A Prepare high-level/sensitive written materials

Modification History

PSPGOV606A Release 2: Layout adjusted. No changes to content.

PSPGOV606A Release 1: Primary release.

Unit Descriptor

This unit covers high-level written communication including the preparation of complex, sensitive materials. It includes preparing for high-level written communication, critically analysing other positions and preparing persuasive written communication.

In practice, preparing high-level/sensitive written materials may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, etc.

This is one of 5 units of competency in the *Working in Government* Competency Field that deal with written communication. Related units are:

- PSPGOV208A Write routine workplace materials
- PSPGOV313A Compose workplace documents
- PSPGOV413A Compose complex workplace documents
- PSPGOV513A Refine complex workplace documents

Application of the Unit

Elements and Performance Criteria Pre-Content

Elements are the essential Together, performance criteria specify the requirements for

© Commonwealth of Australia, 2025 Public Skills Australia

outcomes of the unit of competency.

competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for high-level written communication	1.1 ***Communication objectives*** are clarified, stakeholders are identified and political or other sensitivities are determined. 1.2 Research is undertaken to anticipate the likely attitudes of and positions of ***stakeholders*** on the matter/s under consideration. 1.3 Subject matter is researched/***organised***, key messages to be conveyed are distilled and tactics are planned to utilise written materials to maximise outcomes for the organisation in accordance with ***legislation, policy and guidelines***.
2. Critically analyse other positions	2.1 Other positions are considered critically to evaluate complex levels of meaning in written communication and to identify impartiality, bias or unsupported argument. 2.2 Written materials are examined for subtext, significant inclusions and exclusions, socio-cultural values, attitudes and assumptions. 2.3 Complex concepts and ideas are explored to clarify understanding, and justify, or challenge interpretations based on underlying assumptions, beliefs and values. 2.4 Evidence is compared and contrasted and sources referred to are evaluated for reliability and authenticity. 2.5 Evidence is used to test other positions and draw conclusions about their validity and strengths.
3. Prepare persuasive written communication	3.1 ***Communication approach*** is chosen and used to positively influence and remove barriers to understanding for the given audience. 3.2 Risk assessment is undertaken and risk management is implemented in relation to document preparation and content. 3.3 Input information/documents provided by others are analysed for fit with the chosen approach and to ensure consistency of values, attitudes and opinions. 3.4 Information is synthesised and ***complex documents*** are prepared in accordance with ***organisational requirements***, legislation, policy and procedures. 3.5 Feedback from others is obtained on the documents' effectiveness for the purpose intended, outcomes are assessed and lessons learnt are articulated and used to underpin future writing.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.6 Feedback is provided to contributors of information/documents to improve future input in a manner that provides learning opportunities for the contributors.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and writing at a level to cope with a range of complex and sensitive workplace materials
- critically analysing and synthesising information to compose complex written documents
- researching other pertinent information, such as supporting/opposing position papers
- refining content, structure and sequence according to the required purpose of written material
- analysing and using language structures and features that influence the interpretation of written communication
- using spelling, punctuation and grammar for workplace documents at an experienced level
- providing feedback on other people's work in ways suited to the diversity of the workplace, including creation of learning opportunities to improve research/document input
- cross-cultural communication requirements
- implementing ergonomic requirements for office work
- complying with environmental policies such as those relating to paper use/wastage/recycling

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to written communication in the public sector such as privacy, freedom of information, information security, confidentiality, copyright, intellectual property
- critical analysis of complex information in a government context
- politically and culturally sensitive documents
- organisational requirements for complex written documents
- government style manual requirements
- persuasive written language devices and their ethical use for calculated effect
- the ways in which socio-cultural factors, language features and structures combine to influence the interpretation of written information
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the

© Commonwealth of Australia, 2025 Public Skills Australia

context of preparing complex/sensitive written materials

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV605A Persuade and influence opinion

PSPMNGT605B Manage diversity

PSPMNGT608B Manage risk

PSPMNGT609B Formulate business strategies

PSPLEGN601B Manage compliance with legislation in the public sector

PSPOHS602A Manage workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- preparation of high-level/sensitive written materials in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to written communication in the public sector
- examples of complex workplace documents
- government style guide
- organisational writing guides
- case studies and workplace scenarios to capture the range of situations likely to be encountered when preparing high-level/sensitive written materials

© Commonwealth of Australia, 2025 Public Skills Australia

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when preparing high-level/sensitive written materials, including coping with difficulties, irregularities and breakdowns in routine
- preparation of high-level/sensitive written materials in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Communication

- influencing opinion
- share information

© Commonwealth of Australia, 2025 Public Skills Australia

objectives may include:

- brief Minister
- reach consensus
- shape opinion
- influence policy
- represent the organisation's position
- represent the business unit's position
- build reputation (of self and organisation)
- market services
- obtain funding

Stakeholders may include:

- all those individuals and groups both inside and outside the government that have some direct interest in government conduct, actions, products and services, such as:
  - employees at all levels of the public sector
  - government
  - Ministers
  - clients
  - the public
  - other public sector organisations
  - other jurisdictions
  - union and association representatives
  - boards of management
  - international governments
  - international bodies
  - community groups
  - non-government organisations
  - special interest groups
  - key individuals of influence

Organisation of subject matter may include:

- identifying features, advantages and benefits and aligning evidence/examples
- anticipating likely disagreements and structuring material to address these

Legislation, ***policy and guidelines*** may include:

- State/Territory and Commonwealth legislation, regulations, policies, guidelines and standards relating to high-level written communication in the public sector, such as:
  - ethics and accountability guidelines/codes of practice
  - information security standards
  - principles of equal employment opportunity, equity and diversity
  - confidentiality
  - freedom of information
  - privacy

© Commonwealth of Australia, 2025 Public Skills Australia

- intellectual property
- fraud standards
- copyright
- risk management

Communication approach may include:

- consideration of wider organisational/public sector issues
- consideration of political sensitivities
- language calculated to appeal emotionally to a particular audience, such as authoritative, serious, informal, informative
- cultural, ethnic, diversity or equity considerations
- working within government processes and operational frameworks
- consultative
- collaborative
- assertive
- reasonable

Complex documents may include:

- Cabinet submissions
- briefing papers
- speeches
- media briefs
- position papers
- discussion papers
- business cases
- reports
- public policy strategies
- justification for policy development
- policy guidance

Organisational requirements may include:

- use of plain English
- style formats
- acknowledgements
- particular terminology to be used/not used:
  - acronyms
  - technical terms
  - bureaucratic language
  - abbreviations.
- requirements for minimising jargon in written materials
- requirements for written material to take account of cultural, ethnic, religious or language differences, disabilities, etiquette
- guidelines for illustrative items
- standards for references, acknowledgements, citations, footnotes, endnotes
- use of particular communication channels
- private or confidential materials

© Commonwealth of Australia, 2025 Public Skills Australia

- embargoed material
- politically sensitive materials
- security standards for government information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the political terrain	1.1 ***Stakeholder*** positions are ***identified*** and taken account of. 1.2 Corporate politics are analysed to identify agendas and players. 1.3 Awareness of and sensitivity to political agendas, both open and hidden, are developed and utilised. 1.4 The current agenda is located in the wider context to appreciate the big picture and provide more than one perspective. 1.5 The impact of the agenda on the work area is identified and confirmed in accordance with organisational protocols.
2. Evaluate the political environment	2.1 Information is sourced from inside and outside the organisation, and its authenticity and reliability are confirmed. 2.2 An analysis of the political, social and economic environment is undertaken that takes into account emerging trends and current and possible future goals of the organisation.
3. Form alliances	3.1 Power structure and sources of ***power*** are identified in the organisation and the wider public sector. 3.2 People prepared to trade mutual support are identified and the benefits assessed. 3.3 Risks and benefits of possible alliances are weighed. 3.4 Interested groups/individuals are lobbied to gain support and acceptance of ideas/courses of action. 3.5 Influence is built with key policy makers, ***decision makers*** and key influencers, in accordance with public sector standards and legislation.
4. Bargain and negotiate to achieve outcomes	4.1 Sound positions are developed with supporting arguments. 4.2 Responses to possible contradictory positions are formulated. 4.3 Positions are negotiated and refined with feedback from the negotiation process. 4.4 Consensus with others is achieved for one's position. 4.5 Outcomes are implemented in accordance with organisational policy and procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to the public sector
- undertaking research and analysis
- using a range of communication activities such as negotiating, consulting, influencing, bargaining, resolving conflict, networking, etc
- responding to diversity, including gender and disability
- applying risk management strategies
- applying procedures relating to occupational health and safety and environment in the context of the political environment.

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to the public sector environment
- organisational policies and procedures
- organisational and public sector power structures and sources of power
- macro view of agendas, positions, and power
- government directions and agendas
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment and sustainability

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC501B Promote the values and ethos of public service

sector

PSPGOV510A Undertake and promote career management

PSPGOV511A Provide leadership

PSPGOV512A Use complex workplace communication strategies

PSPGOV516A Develop and use emotional intelligence

PSPPOL501A Develop organisation policy.

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- development and use of political nous in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to the public sector
- organisational and public sector power structures and sources of power
- case studies and workplace scenarios to capture the range of situations likely to be encountered when developing and using political nous

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing and using political nous, including coping with difficulties, irregularities and breakdowns in routine
- development and use of political nous in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination

	of 2 or more of: • case studies • portfolios • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may include:	• people within the organisation and the public sector • public sector organisations • non-government organisations • community organisations • peak bodies • lobby groups • statutory bodies • industry groups • local government
Identification of positions may include:	• knowing who to talk to • recognising informal as well as formal structures • using personal profile within the organisation
Power may include:	• positional power • coercive power • power in relationships • control of scarce resources • information and knowledge • interpersonal alliances
Key decision makers may include:	• senior executive officers • government bodies • special interest groups

PSPCOM503A Build and maintain community relationships

Modification History

PSPCOM503A Release 1: Layout adjusted. No changes to content.

PSPCOM503A Release 2: Primary release.

Unit Descriptor

This unit covers building, rebuilding and maintaining trusting relationships with individuals and communities by public sector officers. It includes setting the parameters for relationships or partnerships, providing information relating to community engagement, and building community engagement and community problem solving capacity.

In practice, building and maintaining community relationships overlaps with other generalist or specialist work activities such as acting ethically, providing leadership, developing client services, developing policy, undertaking research, facilitating change, etc.

This is a new unit of competency, added to the *Community Engagement* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the

competency. Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Set the parameters for relationships or partnerships	1.1 A ***contextual framework*** is developed to assist in analysing and setting parameters for ***relationships/partnerships*** in accordance with organisational policy and procedure. 1.2 The parameters and purpose for the relationships/partnerships are established and agreed. 1.3 The emergence of new ideas and options are allowed for in the flexibility of the purpose. 1.4 The dynamics within and across relationships/partnerships are identified and managed. 1.5 Benefits for both parties are identified and agreed in accordance with organisational policy and procedure. 1.6 ***Constraints*** are identified, including time, procedural and resource limitations, and resources are allocated in accordance with organisational requirements.
2. Provide information relating to community engagement	2.1 Current community understanding of the roles and responsibilities of public officials is assessed, and information is provided to clarify the roles and responsibilities in accordance with organisational policy and procedures. 2.2 The rights and responsibilities of individuals and communities to be involved in government processes and decision making are explained in a manner accessible to the audience. 2.3 Government/agency priorities, strategic direction, systems, decision making and approval processes are communicated using language, materials and timelines to suit the audience and the occasion. 2.4 ***Opportunities for community involvement*** in government/agency processes and decision making are communicated in ways suited to the ***diversity*** of the community.
3. Build community engagement capacity	3.1 The skills and knowledge requirements of individuals and communities to engage with government are identified and addressed with a range of strategies tailored to individual needs. 3.2 ***Opportunities for individuals and communities to develop their capacity*** to engage with government are identified collaboratively, resourced and promoted in accordance with organisational policy and procedures. 3.3 ***Innovative strategies*** are developed and implemented to identify and reach out to those who have not yet connected with

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	government, and those who have had a previous poor experience in attempting to engage with government.
	3.4 ***Informal and formal community networks*** are tapped into to strengthen local capital and to ensure ongoing capacity.
	3.5 ***Barriers to community engagement*** are identified and solutions formulated and implemented in accordance with organisational policy and procedures and community context.
4. Build community problem-solving capacity	4.1 Information and opportunities for involvement in government processes and decision making are provided to individuals and communities in accordance with their needs and preferences.
	4.2 Existing and ***new ways to engage*** with government are identified and promoted in a variety of ways suited to diverse communities.
	4.3 Mechanisms for communities to raise their own ***issues*** with government are developed, implemented and promoted in accordance with organisational policy and procedures and community context.
	4.4 A range of ***strategies*** to address community issues is developed in partnership with communities.
	4.5 Mutually developed and agreed solutions to community issues are implemented in accordance with organisational policy and procedures.
	4.6 Strategies for reporting developments to communities are identified and utilised.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- establishing and fostering transparent, trusting relationships/partnerships with individuals and communities
- maintaining multiple and potentially conflicting relationships/partnerships
- working with diverse communities using a range of communication styles to suit different audiences and purposes
- explaining complex and formal policies and concepts to a variety of audiences
- responding to diversity, including gender and disability
- applying lateral thinking to provide solutions and overcome barriers to community engagement

© Commonwealth of Australia, 2025 Public Skills Australia

- linking people to appropriate capacity-building opportunities
- applying workplace safety procedures to community engagement activities
- preparing community engagement information requiring the presentation of complex information using simple language structures and precision of expression

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to community engagement
- community engagement theory, principles, practices and techniques
- community development practices and principles
- public sector values and codes of conduct
- leadership and the managing of expectations in the context of community engagement
- principles of cultural awareness and cross-cultural communication
- equal employment opportunity, equity and diversity principles
- workplace safety procedures relating to community engagement activities

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPCOM501A Prepare for community engagement

PSPCOM502A Develop and implement community engagement strategies

PSPETHC501B Promote the values and ethos of public service

PSPGOV502B Develop client services

PSPGOV504B Undertake research and analysis

PSPGOV505A Promote diversity

PSPGOV507A Undertake negotiations

PSPGOV508A Manage conflict

PSPGOV511A Provide leadership

© Commonwealth of Australia, 2025 Public Skills Australia

PSPGOV512A Use complex workplace communication strategies

PSPGOV514A Facilitate change

PSPLEGN501B Promote compliance with legislation in the public sector

PSPOHS501A Monitor and maintain workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- community relationships built and maintained in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- community information, case studies or scenarios, including current journals, international case studies
- community engagement theory, principles, practices and techniques
- procedures and protocols for community engagement, including occupational health and safety
- policy and legislation related to community engagement
- public sector values and codes of conduct

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment, or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when building and maintaining community relationships, including coping with difficulties, irregularities and breakdowns in routine
- community relationships built and maintained in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of

© Commonwealth of Australia, 2025 Public Skills Australia

	this competency may include, but are not limited to, a combination of 2 or more of: • case studies • demonstration • portfolios • projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *italics* in the Performance Criteria is explained here.

A ***contextual framework*** may include:	• dynamics of community • community power structures • big political versus community politics (big 'P' v little 'p') • collaborations • networks • formal or informal partnerships • timelines for relationship building • purpose of partnership/relationship building and therefore type of partnership/relationship to be developed • level of agency support
Relationships/ **partnerships** may be with:	• individuals • community groups • ethnic communities • local residents - through place-based initiatives • non-government organisations • private sector organisations • other public sector agencies • media organisations

© Commonwealth of Australia, 2025 Public Skills Australia

- business community
- industry specific target groups

Constraints may include:

- lack of knowledge
- lack of understanding
- lack of decision making powers
- lack of time and resources
- geographic location
- previous experiences with engagement processes
- community angst or lack of trust
- organisational capacity to respond to community
- external factors (including non-negotiables)
- perceived status of organisation in the community
- community expectations of the partnership/relationship
- cost for the community to be involved, such as transport, time off work, childcare

Opportunities for community involvement may include:

- 'whole of government' forums and networks as part of regional/place-based strategies
- 'whole of community' projects as part of regional/place-based strategies
- policy development
- program or service delivery planning or decision making
- review or evaluation or existing policies, programs or services
- involvement through:
- Cabinet sittings
- charettes
- citizens' panels/juries
- community-based information
- consultations
- correspondence with/to Members of Parliament
- direct participation
- employment of local community members
- focus groups
- government announcements
- information flows
- media campaigns
- one-on-one meetings
- parliamentary sittings
- participation in local events
- public meetings/forums
- regional forums
- response/s to questionnaires
- scenario planning

© Commonwealth of Australia, 2025 Public Skills Australia

	• think tanks • visioning • workshops
Community diversity may include differences in:	• age • cultural background • educational level • English language proficiency • ethnicity • expertise • family responsibilities • gender • household structure (couples, singles, single parents, single sex partners) • interests • interpersonal approach • language • length of residence • life experience • marital status • mobility • physical ability • political orientation • religious belief • sexual orientation • socio-economic background • thinking/learning styles • work experiences
Opportunities for individuals and communities to develop their capacity may include:	• formal and informal leadership programs • formal or informal mentoring and coaching programs • access to resources and information to build knowledge • community visioning • community development • attendance at workshops • agency professional development • participation opportunities • formal learning opportunities • community building networks
Innovative strategies must:	• be tailored to those being approached • take account of past failures/difficulties • take advantage of a range of media/communication channels
Informal and formal community networks	• interest groups • clubs

© Commonwealth of Australia, 2025 Public Skills Australia

may include:

- associations
- leadership structures
- community leaders/elders (place-based)
- word of mouth
- web-based information networks
- electronic communication
- (online) virtual learning communities
- reference groups
- church groups
- service clubs
- existing multi-agency reference groups
- school networks
- community organisations
- community services
- non-government organisations
- religious and cultural networks

Barriers to community engagement may include:

- access constraints
- community perception that nothing ever comes from engagement with government - 'talk fest'
- cultural barriers
- diversity variables listed previously
- geographical isolation
- inappropriate timing, venues and strategies
- lack of awareness of the full range of government services
- lack of clear branding in government communications
- lack of confidence or trust in government
- lack of follow-up within community engagement strategies
- lack of information at the local level through local resources such as community newspapers
- lack of interest in or commitment to the issues
- lack of knowledge about the structure of government (at all three levels)
- lack of openness/transparency
- lack of understanding about an actual issue - building knowledge and literacy, knowing the scenarios
- lack of understanding or clarity about the engagement process
- language issues
- limited access to effective information in first language
- little access to traditional ethnic media channels such as print and radio or an integrated mix
- mobility issues
- over-reliance on or sole use of electronic media and Internet
- poor integration of government information strategies

© Commonwealth of Australia, 2025 Public Skills Australia

	• poor monitoring and feedback loops • poor past experiences with engagement processes • previous over-consultation • social capital gate keepers - residents who block broad participation • socio-economic levels • the difficulty of contacting the right area of government first time (no 'one number for government') • the terminology and style of copy used in government information • time constraints • unequal access to information, participation, influence on decision making
New ways to engage may include:	• active participation in government planning and decisions making through a range of innovative and appropriate methods and techniques such as: • citizens' juries • citizens' panels • deliberative polling • negotiation tables • online consultation • policy round tables • policy action teams • search conferences
Community issues may include:	• local solutions to a range of local issues • new or improved services or programs • infrastructure • strategic planning • community development • crime reduction
Strategies to address issues may include:	• community planning processes • community development processes • collaborative service and program planning

BSBFLM511B Develop a workplace learning environment

Modification History

Not applicable.

Unit Descriptor

This unit specifies the outcomes required to encourage and support the development of a learning environment in which work and learning come together. Particular emphasis is on the development of strategies to facilitate and promote learning and to monitor and improve learning performance.

This unit replaces the unit BSBFLM511A Develop a workplace learning environment.

Frontline managers have a prominent role in encouraging, supporting and facilitating the development of a learning environment in which work and learning come together.

At this level, work will normally be carried out within complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

This unit builds on BSBCMN404A Develop teams and individuals. Consider co-assessment with BSBFLM501B Manage personal work priorities and professional development, BSBFLM512A Ensure team effectiveness, BSBFLM505B Manage operational plan, BSBFLM507B Manage quality customer service, and BSBMGT505A Ensure a safe workplace.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Create learning opportunities	1.1 Potential formal and informal learning opportunities are identified
	1.2 Learning needs of individuals are identified in relation to the needs of the team and/or enterprise and available learning opportunities
	1.3 Learning plans are developed and implemented as an integral part of individual and team performance plans
	1.4 Strategies are developed to ensure that learning plans reflect the diversity of needs
	1.5 Organisational procedures maximise individual and team access to, and participation in, learning opportunities
	1.6 Effective liaison occurs with training and development specialists and contributes to learning opportunities which enhance individual, team and organisational performance

© Commonwealth of Australia, 2025 Public Skills Australia

2 Facilitate and promote learning	2.1 Strategies are developed to ensure that workplace learning opportunities are used and team members are encouraged to share their skills and knowledge to encourage a learning culture within the team
	2.2 Organisational procedures are implemented to ensure workplace learning opportunities contribute to the development of appropriate workplace knowledge, skills and attitudes
	2.3 Policies and procedures are implemented to encourage team members to assess their own competencies, and to identify own learning and development needs
	2.4 The benefits of learning are shared with others in the team and organisation
	2.5 Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards
3 Monitor and improve learning effectiveness	3.1 Strategies are used to ensure that team and individual learning performance is monitored to determine the type and extent of any additional work-based support required, and any occupational health and safety issues
	3.2 Feedback from individuals and teams is used to identify and introduce improvements in future learning arrangements
	3.3 Adjustments negotiated with training and development specialists result in improvements to the efficiency and effectiveness of learning
	3.4 Processes are used to ensure that records and reports of competency are documented and maintained within the organisation's systems and procedures to inform future planning

Evidence Guide

The Evidence Guide provides advice to inform and support appropriate assessment of this unit. It contains an overview of the assessment requirements followed by identification of specific aspects of evidence that will need to be addressed in determining competence. The Evidence Guide is an integral part of the unit and should be read and interpreted in conjunction with the other components of competency. Assessment must reflect the endorsed Assessment Guidelines of the parent Training Package.

Overview of Assessment Requirements

A person who demonstrates competence in this standard must be able to provide evidence that they are able to facilitate the development of a learning environment. They must be able to show evidence of the ability to identify workplace activities which facilitate learning, and negotiate learning arrangements with training and development specialists. They also must be able to develop strategies to monitor performance of individuals and the team and use this to improve learning effectiveness and future learning arrangements.

Specific Evidence Requirements

Required knowledge and understanding include:

relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

the principles and techniques involved in the management and organisation of:

- adult learning
- a learning environment and learning culture
- work based learning
- structured learning
- problem identification and resolution
- leadership
- coaching and mentoring
- consultation and communication
- record keeping and management methods
- monitoring and reviewing workplace learning
- improvement strategies

management of relationships to achieve a learning environment

strategies that contribute to the elimination of discrimination/bias

Required skills and attributes include:

ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

functional literacy skills to access and use workplace information

© Commonwealth of Australia, 2025 Public Skills Australia

communication skills to:

- encourage colleagues to share their knowledge and skills
- gain the trust and confidence of colleagues
- deal with people openly and fairly
- use consultation skills effectively

skills to facilitate, promote and monitor learning:

- identifying learning needs
- developing learning plans
- selecting and using work activities to create learning opportunities
- establishing a workplace which is conducive to learning
- negotiating learning arrangements with training and development specialists
- using coaching and mentoring to support learning
- evaluating the effectiveness of learning

Key competencies or generic skills relevant to this unit

The seven key competencies represent generic skills considered essential for effective work participation. Innovation skills represent a further area of generic competence. The bracketed numbering indicates the performance level required in this unit:

Level (1) represents the competence to undertake tasks effectively

Level (2) represents the competence to manage tasks

Level (3) represents the competence to use concepts for evaluating and reshaping tasks. The bulleted points provide examples of how the key competencies can be applied for this unit.

Communicating ideas and information (3)

discussing strategies to facilitate and improve workplace learning

sharing with others the benefits of learning

providing feedback, recognition and rewards to team and individuals

Collecting, analysing and organising information (3)

assembling information about learning options

Planning and organising activities (3)

developing and implementing strategies to facilitate and promote learning

Working in a team (3)

gaining feedback from individuals and team members on learning needs and opportunities

Using mathematical ideas and techniques (2)

compiling data about learning arrangement

Solving problems (3)

resolving difficulties with competency development

© Commonwealth of Australia, 2025 Public Skills Australia

Using technology (2)

using technology to assist in the management of information and to promote learning

Innovation skills (3)

developing an innovative approach to the development of a learning culture to enhance business operations

Products that could be used as evidence include:

documentation produced in developing a workplace learning environment, such as:

- contribution to organisational policies and procedures
- procedures and policies for dealing with learning systems, and related codes of conduct
- evidence of actions taken to address information collection and retrieval
- evidence of actions taken to address methods of analysing information
- evidence of actions taken to develop and/or maintain a learning culture
- evidence of actions taken to address internal and external learning issues
- evidence of actions taken to address issues and problems within the work team
- evidence of advice and input into management decisions related to the work team and workplace learning
- learning and development plans for team members
- materials developed for coaching, mentoring and training
- induction programs developed and/or delivered
- reviews of people management
- records of people management lessons learned

Processes that could be used as evidence include:

how workplace learning activities were developed and managed

how work was allocated within work team, and rationale for allocations

how learning plans were developed

how team members have been encouraged to participate in learning opportunities

how procedures have been designed to ensure that individual learning and development pathways were developed and implemented

how liaison with training and development specialists has occurred, especially in regard to ongoing improvement

how team members were encouraged to assess their own competencies and to identify own learning and development needs

how workplace achievement has been recognised

how input and advice was provided to management and stakeholders in relation to the benefits of learning and development

how learning and development records have been documented and stored

© Commonwealth of Australia, 2025 Public Skills Australia

how performance management processes were reviewed and evaluated, and improvements identified, reported and acted upon

Resource implications for assessment include:

access by the learner and trainer to appropriate documentation and resources normally used in the workplace

Validity and sufficiency of evidence requires:

that this unit can be assessed in the workplace or in a closely simulated work environment

that where assessment is part of a learning experience, evidence will need to be collected over a period of time, involving both formative and summative assessment

that examples of actions taken by the candidate to develop a workplace learning environment are provided

Integrated competency assessment means:

that this unit should be assessed with other frontline management units taken as part of this qualification, as applicable to the candidate's leadership role in a work team and as part of an integrated assessment activity

The Evidence Guide provides advice to inform and support appropriate assessment of this unit. It contains an overview of the assessment requirements followed by identification of specific aspects of evidence that will need to be addressed in determining competence. The Evidence Guide is an integral part of the unit and should be read and interpreted in conjunction with the other components of competency. Range Statement

The Range Statement adds definition to the unit by elaborating critical or significant aspects of the performance requirements of the unit. The Range Statement establishes the range of indicative meanings or applications of these requirements in different operating contexts and conditions. The specific aspects which require elaboration are identified by the use of italics in the Performance Criteria.

Legislation, codes and national standards relevant to the workplace may include:

award and enterprise agreements and relevant industrial instruments

© Commonwealth of Australia, 2025 Public Skills Australia

relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal opportunity, industrial relations and anti-discrimination

relevant industry codes of practice

OHS considerations may include:

knowledge of OHS legislation, principles and practice within the context of the organisation's operations and plans

OHS practice as an ethical standard and legislative requirement

training of all employees in health and safety procedures

regular updating and reviewing of procedures, records and systems

inclusion of OHS requirements in the planning process

inclusion of OHS in learning plans

adjustment of communications and OHS approach to cater for social and cultural diversity and special needs

Learning opportunities may include:

structured learning activities conducted outside and within the workplace such as:

- training through an RTO leading to a nationally recognised Australian Qualifications Framework (AQF) qualification or Statement of Attainment, for example through a traineeship or New Apprenticeship
- accredited training through an independent organisation such as a State OHS authority
- workshops
- short courses
- action learning

workplace learning activities, that may also contribute to a recognised credential, such as:

- induction
- mentoring
- coaching
- shadowing
- exchange/rotation

Learning needs may include:

gaps between the competencies held by the employee and the skills and knowledge required to effectively undertake workplace tasks

developmental learning, for example the learning required to progress through an organisation and take on new tasks and roles

Learning plans may include:

team competencies

© Commonwealth of Australia, 2025 Public Skills Australia

team roles and responsibilities

performance standards

work outputs and processes

Key Performance Indicators (KPI)

codes of conduct

OHS requirements

negotiated agreement with individual

Diversity of needs may include:

learning needs that relate to social, cultural and other types of workplace diversity, such as the need for varied communication styles and approaches

Training and development specialists may be:

internal or external

Encourage a learning culture may refer to:

encouraging learning and sharing of skills and knowledge across the work team and the wider organisation to develop competencies of individual team members and the team as a whole

The Range Statement adds definition to the unit by elaborating critical or significant aspects of the performance requirements of the unit. The Range Statement establishes the range of indicative meanings or applications of these requirements in different operating contexts and conditions. The specific aspects which require elaboration are identified by the use of italics in the Performance Criteria.

Legislation, codes and national standards relevant to the workplace may include:

award and enterprise agreements and relevant industrial instruments

relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal opportunity, industrial relations and anti-discrimination

relevant industry codes of practice

OHS considerations may include:

knowledge of OHS legislation, principles and practice within the context of the organisation's operations and plans

OHS practice as an ethical standard and legislative requirement

training of all employees in health and safety procedures

regular updating and reviewing of procedures, records and systems

inclusion of OHS requirements in the planning process

inclusion of OHS in learning plans

adjustment of communications and OHS approach to cater for social and cultural diversity and special needs

Learning opportunities may include:

© Commonwealth of Australia, 2025 Public Skills Australia

structured learning activities conducted outside and within the workplace such as:

training through an RTO leading to a nationally recognised Australian Qualifications Framework (AQF) qualification or Statement of Attainment, for example through a traineeship or New Apprenticeship

accredited training through an independent organisation such as a State OHS authority

workshops

short courses

action learning

workplace learning activities, that may also contribute to a recognised credential, such as:

induction

mentoring

coaching

shadowing

exchange/rotation

Learning needs may include:

gaps between the competencies held by the employee and the skills and knowledge required to effectively undertake workplace tasks

developmental learning, for example the learning required to progress through an organisation and take on new tasks and roles

Learning plans may include:

team competencies

team roles and responsibilities

performance standards

work outputs and processes

Key Performance Indicators (KPI)

codes of conduct

OHS requirements

negotiated agreement with individual

Diversity of needs may include:

learning needs that relate to social, cultural and other types of workplace diversity, such as the need for varied communication styles and approaches

Training and development specialists may be:

internal or external

Encourage a learning culture may refer to:

encouraging learning and sharing of skills and knowledge across the work team and the wider organisation to develop competencies of individual team members and the team as a whole

PSPPA601A Manage public affairs

Modification History

PSPPA601A Release 2: Layout adjusted. No changes to content.

PSPPA601A Release 1: Primary release.

Unit Descriptor

This unit covers management of public affairs including crisis management and high-profile events. It includes contributing to public affairs scope and direction, planning and managing a public affairs program, developing crisis management communication strategies, and handling high-profile events.

In practice, managing public affairs may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government systems, managing change, managing diversity, using complex communication strategies, providing leadership, etc.

This is a new unit of competency, added to the *Public Affairs* Competency field of the Training Package in 2004.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills..

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the

© Commonwealth of Australia, 2025 Public Skills Australia

competency. Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to public affairs scope and direction	1.1 An ***environmental scan*** is conducted to identify public affairs issues and needs for the organisation. 1.2 Target audiences for public affairs action are identified in accordance with organisational requirements. 1.3 Public affairs objectives and programs are developed in line with the organisation's business and strategic plans. 1.4 Criteria and measures are developed for assessing objectives. 1.5 ***Resourcing*** requirements are identified and the scope of public affairs activities is negotiated in accordance with organisational priorities and resource constraints.
2. Plan and manage public affairs program	2.1 An operational plan is developed for public affairs to integrate strategies and coordinate communications and activities. 2.2 Schedules are developed for communications and activities that are flexible enough to provide for contingencies and emerging issues. 2.3 Responsibilities and accountabilities are defined, and reporting requirements and benchmarks are identified for monitoring the program. 2.4 Public affairs program is implemented and monitored to ensure progress or to make changes to achieve the program objectives. 2.5 Results are evaluated in terms of media coverage, penetration and desired audience response, reasons for variations are identified and changes are made to improve results.
3. Develop crisis management communication strategies	3.1 Organisational activities and operations are assessed to identify potential crisis factors and evaluate risk management strategies. 3.2 The composition of a crisis communication team is explored and determined in terms of required ***specialist knowledge and guidance***. 3.3 Training needs for potential spokespersons are identified and media training is organised in accordance with organisational policy and procedures. 3.4 ***Individuals and groups*** who must be contacted in crisis situations are identified, lines of communication are established and their involvement/role/responsibilities confirmed. 3.5 Crisis management action plan is developed and submitted for approval to document crisis management communication

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	strategies and protocols, including ***post-crisis communication***.
4. Handle high-profile events	4.1 Public affairs strategic planning is undertaken for ***high-profile events*** in accordance with organisational requirements.
	4.2 Outside groups, partners, the media and business are involved in sponsoring/supporting special events as required.
	4.3 Protocol standards are applied and explained to others as required to ensure a positive organisational outcome from high-profile events.
	4.4 The involvement of managers, staff and government representatives in high-profile events is overseen and supported in accordance with organisational policy and procedures.
	4.5 Speeches and statements for management and other officials are prepared for special events or in times of crisis.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to public affairs
- planning and setting objectives
- undertaking strategy development
- establishing and maintaining relationships inside and outside the organisation
- communication including consulting, negotiating and liaising with diverse groups
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and the environment in the context of public affairs

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to public affairs
- public affairs capability and how this relates to organisational objectives
- event management
- requirements of crisis management communication strategies
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and the environment in the context of public affairs

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC601B Maintain and enhance confidence in public service

PSPGOV601B Apply government systems

PSPGOV605A Persuade and influence opinion

PSPGOV606A Prepare high-level/sensitive written materials

PSPMNGT605B Manage diversity

PSPMNGT608B Manage risk

PSPMNGT609B Formulate business strategies

PSPLEGN601B Manage compliance with legislation in the public sector

PSPOHS602A Manage workplace safety

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- managing public affairs in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to public affairs
- examples of crisis situations and high-profile events
- case studies and workplace scenarios to capture the range of situations likely to be encountered when managing public affairs

Where and how to

Valid assessment of this unit requires:

© Commonwealth of Australia, 2025 Public Skills Australia

assess evidence	• a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing public affairs, including coping with difficulties, irregularities and breakdowns in routine • managing public affairs in a range of (3 or more) contexts (or occasions, over time) Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse backgrounds • Aboriginal and Torres Strait Islander people • women • young people • older people • people in rural and remote locations Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of: • case studies • portfolios • projects • questioning • scenarios • authenticated evidence from the workplace and/or training courses
For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Environmental scan may include:	• corporate strategy • strategic and operational objectives • range of products and services

© Commonwealth of Australia, 2025 Public Skills Australia

	• operating environment • previous public affairs programs and their effectiveness
Resourcing may include:	• human resources • financial resources • physical resources such as equipment • outsourced expertise • contingency provisions
Specialist knowledge and guidance may include:	• legal aspects • technical aspects • security • industrial relations • management • occupational health and safety • emergency management
Individuals and groups may include:	• Minister's office • police • emergency services • employees • clients • media • public
Post-crisis communication strategies may include:	• cooperation with investigators • debriefing employees • thanking organisations and individuals who assisted in the crisis • information on changes to prevent or avoid the crisis recurring • strategies to re-build the organisation's image
High-profile events may include	• special events • unforeseen incidents • disasters • times of crisis

AHCBIO601A Plan and oversee an emergency disease or plant pest control program

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers planning and overseeing an emergency disease or plant pest control program according to the relevant standards and protocols provided in a national response plan and defines the work practices required to: plan for contingencies; plan, oversee and monitor a response to an emergency disease or plant pest incursion; build, maintain and motivate a team in response to an emergency disease or plant pest incursion; prioritise allocation of resources; implement best options for problem solving based on risk assessment.

Application of the Unit

Application of the unit	This unit applies to the planning and management of an emergency response to a disease or plant pest outbreak.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan emergency disease or plant pest control program	1.1. Effective strategies to control emergency disease or plant pest are identified to support the emergency disease or plant pest control. 1.2. All components of emergency disease or plant pest control program comply with relevant standards and protocols, jurisdiction's nationally approved response plan, relevant state/territory and commonwealth legislation, and emergency management principles. 1.3. Expert advice is sought and used to identify source of emergency disease or plant pest and gauge its likely spread. 1.4. Declared areas are identified in line with expert advice and available evidence of presence of emergency disease or plant pest. 1.5. Plans are developed to effectively and efficiently control emergency disease or plant pest. 1.6. Plans are submitted to appropriate authorities for approval. 1.7. Likely developments and consequences of emergency disease or plant pest outbreak are identified and appropriate personnel are advised according to established lines of command and control.
2. Oversee emergency disease or plant pest control program	2.1. Emergency disease or plant pest control plans are implemented and monitored. 2.2. Information recording and dissemination are

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	monitored to ensure compliance with standards and protocols. 2.3. Reports are sent, received and acted upon according to relevant standards and protocols. 2.4. Relevant organisations/agencies and personnel are briefed in relation to management of emergency disease or plant pest.
3. Monitor and review the emergency disease or plant pest control program	3.1. Emergency disease or plant pest control strategies are monitored continually to ensure that they are achieving the intended outcomes. 3.2. Emergency disease or plant pest control plans are amended as appropriate in line with expert advice, standards and protocols. 3.3. Resource requirements are monitored continually to ensure strategies are achieved.
4. Revise emergency disease or plant pest control program	4.1. Emergency disease or plant pest control strategies and/or plans are revised as required. Changes to emergency disease or plant pest control strategies are communicated to appropriate personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• accessing relevant standards and protocols such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) to determine requirements for a specific emergency disease or plant pest response • demonstrating flexibility by modifying priorities and procedures in response to new findings • developing briefing materials for use by others to communicate sensitive and complex information in an appropriate manner • making effective judgements to achieve a balance of taking authority and delegating appropriately • managing a team of people under stressful conditions • managing collection, analysis and dissemination of data to guide the ongoing

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
emergency disease or plant pest response • operating effectively under stress while performing tasks requiring high-level problem solving and decision making • preparing or commissioning a detailed plan to manage an emergency disease or plant pest response, including identifying an outbreak of the emergency disease or plant pest, monitoring its presence, investigating its source and pattern of infection, estimating its likely spread and implementing measures and planning procedures for its control or eradication • use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports • use numeracy skills to estimate, calculate and record complex workplace measures • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• detailed knowledge of relevant state, territory and commonwealth Acts of parliament with respect to emergency disease or plant pest control, emergency powers and notification of appropriate authorities • extensive knowledge of emergency disease or plant pest control strategies for emergency disease or plant pest situations • extensive knowledge of standards and protocols, such as AUSVETPLAN or PLANTPLAN • extensive knowledge of where to source technical information and/or expert advice and expertise to effectively manage an emergency disease or plant pest incursion • knowledge of common reactions and behaviours under stress • knowledge of relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management • knowledge of occupational health and safety requirements, particularly when managing personnel in an emergency under stressful conditions.

Evidence Guide

EVIDENCE GUIDE
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency is demonstrated in this standard if the candidate is able to: • plan for contingencies • plan, oversee and monitor a response to an emergency disease or plant pest incursion • build, maintain and motivate a team in response to an emergency disease or plant pest incursion • prioritise allocation of resources • implement best options for problem solving based on risk assessment.
Context of and specific resources for assessment	For valid assessment, one must have opportunities to participate in a range of exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to plan and oversee an emergency disease or plant pest control program. The candidate must also have access to a functioning control centre, or a control centre established for an emergency disease or plant pest response simulation exercise.
Method of assessment	Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest response simulation exercise or in responses to an emergency disease or plant pest incursion.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. The skills and knowledge required to plan and oversee an emergency disease or plant pest control program must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work within control centres established for other emergency diseases or plant pest incursions.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Strategies to control the emergency disease or plant pest may include:	• application of plant pesticides • cleaning and decontamination • collecting samples • commonwealth, state, territory and industry response agreements • destruction • disinfestation • disposal • emergency management approach • epidemiological assessments • movement control • quarantine • tracing and surveillance • vaccination • vector control • whole of government approach • wild animal control measures

Emergency diseases or plant pests may include:	• diseases that may affect animals, fish and other marine animals including:
	  • disease that is exotic to Australia
	  • serious infectious disease of unknown or uncertain cause
	  • variant of an endemic disease
	  • severe outbreak of a known endemic disease that is considered to be of national significance with serious social or trade implications
	  • species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.

Relevant standards and protocols may include:	• directions from state control headquarters • emergency disease or plant pest response agreements such as: • Emergency Animal Disease Response Agreement (EADRA) • Emergency Plant Pest Response Deed

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	(EPPRD) • emergency disease or plant pest specific guidelines and manuals included in the relevant national response plan such as AUSVETPLAN and PLANTPLAN • emergency management principles • standard operating procedures • state and territory legislation defining legal powers in an emergency disease or plant pest incursion • state response plans.
Declared areas may include:	• areas in which defined conditions apply to the access or egress of specified plants, animals, fish and other marine animals or things • control areas • dangerous contact premises and suspect premises • infected premises • quarantine premises • restricted areas • stand still areas • any other areas declared.
Information recording and dissemination requirements may include:	• electronic systems • mapping systems • message systems, including: • records of conversation • telephone messages • task requests • event logs • record keeping systems.
Relevant organisations may include:	• community organisations • industry organisations • local, commonwealth and state or territory government agencies, including emergency service organisations • whole of government.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Initiate emergency disease or plant pest control program	1.1. Control procedures needed to manage an infection or infestation are identified, sourced or developed according to standards, protocols and situational variables. 1.2. Operational plans are developed for own area of responsibility. 1.3. Contributions are made as required to other plans and strategies. 1.4. Resources required to control or eradicate emergency disease or plant pest are sourced.
2. Direct implementation of emergency disease or plant pest control procedures	2.1. Implementation of emergency disease or plant pest control plan and procedures is managed according to operational plan, other specified guidelines and situational variables. 2.2. Reports on progress of emergency disease or plant pest control are disseminated as required. 2.3. Relevant management systems are implemented, and confirmed as functioning and available as required.
3. Monitor emergency disease or plant pest control procedures	3.1. Emergency disease or plant pest status of properties is monitored in line with relevant guidelines and operational or control plan. 3.2. Appropriateness and effectiveness of emergency disease or plant pest control procedures being used are monitored.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3. Resource expenditure and availability are monitored to ensure adequacy for job. 3.4. Effectiveness of emergency disease or plant pest control information management system is monitored.
4. Review emergency disease or plant pest control program	4.1. Emergency disease or plant pest control operational plans and procedures are reviewed and revised. 4.2. Emergency disease or plant pest control information management procedures are revised as appropriate to ensure a complete set of records. 4.3. Where required, resources are reallocated or acquired.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- accessing standards and protocols such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) to interpret and determine requirements for implementing specific emergency animal disease or plant pest control programs
- collating, interpreting and analysing relevant information
- operating effectively under stress in tasks involving high-level problem solving and decision making
- managing people under stressful conditions
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• application of emergency management principles when implementing an emergency disease or plant pest control program • common reactions and behaviours of people working under stressful conditions • occupational health and safety requirements, particularly for use of chemicals, specific control procedures and managing personnel under emergency conditions • relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management • relevant standards and protocols, such as AUSVETPLAN or PLANTPLAN • requirements of relevant commonwealth, state and territory legislation.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances. Competency requires the application of work practices under work conditions. • direct and monitor activities of one or more operational units • source resources • work effectively under stressful conditions • apply approved standards and protocols for emergency disease or plant pest control within a specific area • provide accurate and detailed reports to appropriate authorities.
Context of and specific resources for assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to manage the implementation of an emergency disease or plant pest control program.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	The candidate must also have access to a functioning emergency disease or plant pest control centre, or a control centre established for an emergency disease or plant pest response simulation exercise.
Method of assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to manage the implementation of an emergency disease or plant pest control program. The candidate must also have access to a functioning emergency disease or plant pest control centre, or a control centre established for an emergency disease or plant pest response simulation exercise.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. The skills and knowledge required to manage the implementation of an emergency disease or plant pest control program must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work within control centres established to deal with a range of different emergency disease or plant pest incursion responses.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Relevant standards and protocols may include:	• approved standard operating procedures • emergency disease or plant pest specific guidelines such as AUSVETPLAN or PLANTPLAN • jurisdiction's approved response plan • state and territory legislation defining legal

PUAEMR020A Design activities which exercise elements of emergency management arrangements

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competency required to design, review and/or improve activities which exercise elements of emergency management arrangements.

Designing and improving these activities may be based on evaluations from operations, exercise outcomes, organisational requirements and arrangements, individual feedback and strategic objectives.

Application of the Unit

Application of the Unit

The application of this unit would inform roles and responsibilities of individuals responsible for the design of emergency management activities which exercise elements of emergency management arrangements. The requirements for the testing of emergency management arrangements may be driven by multiple legislative, organisational policy or incident contexts.

Applicable roles and jobs may involve emergency management, business continuity, risk management, emergency services liaison and event management.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Determine exercise objectives and outcomes**	1.1 Need for exercise is identified in consultation with ***stakeholders***
	1.2 ***Exerciseobjectives and outcomes*** that meet the identified needs are determined
	1.3 Areas of ***focusfor exercise activities*** are determined, based on operational outcomes, results of training needs/outcomes, previous exercises and evaluation
2. **Design and plan exercise activities**	2.1 ***Planning team*** is established and organised
	2.2 Meetings are held, agreements and decisions are made and outcomes are communicated to relevant people
	2.3 ***Componentsof the exercise program*** are identified, developed and documented in the exercise plan
	2.4 Exercise style and ***activities*** consistent with exercise objectives are selected in consultation with stakeholders
	2.5 ***Design planning processes*** are undertaken to meet exercise objectives and components

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.6 Exercise ***activity documentation*** is constructed
3. **Assess exercise activity risks**	3.1 Risk and safety considerations are included in planning process 3.2 Activities which mitigate/reduce risks associated with conducting exercise activities are designed and included 3.3 Exercise contingency plan based on risk assessment is prepared
4. **Plan resource allocation**	4.1 ***Resources*** to support exercise are identified and secured 4.2 Exercise host is identified and commitment to achieving exercise objectives and outcomes is negotiated and secured 4.3 Appropriate authorisation for use of resources is determined 4.4 Availability and timeframes for use of resources is negotiated and approved with appropriate authorities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate in a group setting
- liaise and communicate with other agencies
- make informed recommendations for improvement
- negotiate with stakeholders
- plan and deliver briefings and debriefings
- provide feedback

Required Knowledge

- consultation

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- emergency management concepts and principles
- incident management principles
- legislative and regulatory arrangements relative to emergency management
- organisational policies and procedures (such as legislation relevant to the operation/ incident/response; legislation relevant to the organisation; operational, corporate and strategic plans; operational performance standards; operational policies and procedures; organisational personnel and occupational health and safety practices and guidelines; organisational quality standards; organisation's approach to environmental management and sustainability)
- problem solving and decision making techniques
- project management principles
- state/territory and agency plans and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessment must confirm the ability to: • bring together an effective exercise design and planning team • facilitate the construction of realistic, meaningful and safe activities. **Consistency in performance** Competency should be demonstrated over time in a range of activity contexts including multi-agency incidents of varying complexity.
Context of and specific resources for assessment	**Context of assessment** Competency should be assessed on-the-job or in a simulated workplace environment. **Specific resources for assessment** Access is required to:

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	• resources relevant to the exercise activities.
Method of assessment	In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook. Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment. Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include: • direct observation • interviewing the candidate • journals and workplace documentation • third party reports from supervisors • written or oral questions.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Stakeholders may include	Client groups Community groups/members Industry groups Media Members of the public Politicians Public and private sector organisations Recovery organisations Staff

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	Volunteers
Exercise objectives and outcomes may include	Assessing and demonstrating the capability of individuals/teams and systems/arrangements
	Assessing system/s performance
	Auditing performance
	Education
	Enhanced emergency management arrangements
	Evaluating emergency management plans
	Evaluating individuals/teams/facilities/systems
	Evaluating risk treatment strategies
	Exploring issues
	Improving team cohesion
	Meeting legislative and/or state/territory requirements
	Promoting awareness
	Testing effectiveness/efficiency of emergency management plans/arrangements
	Validating training outcomes
Focus for exercise activities may include	Improving systems/arrangements
	Learning of participants
	Developing/training participants
	Sharing information
	Testing systems/arrangement/facilities/competency of individuals/teams
Planning team must include	Appropriately qualified and experienced members and stakeholders
Components of the exercise program must include	Activity plan
	Authorities
	Budget
	Code name
	Complexity of exercise plan
	Debrief
	Evaluation/assessment plan

BSBCON601A Develop and maintain business continuity plans

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to work within the business continuity framework to develop and implement business continuity plans in order for an organisation to manage risk and ensure business resilience when faced with a disruptive event. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit is for individuals working in positions of authority who are approved to implement change across the division, business area, program area or project area. This unit addresses the knowledge and processes necessary to develop and maintain business continuity requirements. Business continuity awareness and planning help the organisation to identify barriers and/or interruptions, and to determine how the organisation will achieve critical business objectives (even at diminished capacity) until full functionality is restored. The focus is on risk and vulnerability assessment, business impact assessments, and business continuity and communication plans.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Conduct risk and vulnerability assessments	1.1. Identify the relationship between ***corporate risk*** and the ***organisation's*** business continuity management framework 1.2. Analyse and determine internal and external ***risk*** context by collecting information that relates to the organisation's priorities, operations and environment 1.3. Analyse and identify potential internal and external sources of disruption to the organisation's priorities, operations and environment
2. Develop and report on	2.1. Identify the organisation's ***critical business***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
the business impact assessment/s	***functions*** and their ***dependencies*** and ***interdependencies***, and analyse and evaluate risks through the ***business impact assessment/s*** 2.2. Develop risk and disruption scenarios through the business impact assessment/s 2.3. Validate risk and ***disruption scenarios*** through the business impact assessment/s 2.4. Analyse, validate and report on the outcomes of the business impact assessment/s to ***management***
3. Develop, implement and report on risk treatments	3.1. Develop and implement risk treatments 3.2. Participate in ***risk treatment*** review 3.3. Report on risk treatment review to management and relevant appropriate personnel 3.4. Update risk treatment review in line with feedback provided by relevant personnel
4. Determine interdependencies and develop response strategies	4.1. Develop the organisation's ***emergency response***, ***continuity and recovery strategies*** 4.2. Consult and seek endorsement on the organisation's emergency response, continuity and recovery strategies from management and other appropriate personnel 4.3. Identify and manage synergies and conflicts in ***resource*** availability and access in conjunction with management 4.4. Coordinate the organisation's emergency response, continuity and recovery strategies
5. Establish the business continuity plan	5.1. Consult relevant personnel and seek support for the development of the organisation's ***business continuity plan/s*** 5.2. Ensure content of business continuity plan is comprehensive and meets, where applicable, the requirements of regulations, standards, industry practice and geographical dispersion 5.3. Document and analyse feedback received through consultation and finalise business continuity plan 5.4. Demonstrate accountability for the organisation's business continuity plan/s
6. Establish the communication plan within the organisation's	6.1. Identify ***stakeholders*** and determine objective and scope of ***communication plan*** for periods before, during and after disruptions occur 6.2. Determine organisation's communication

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
planning framework	capabilities in line with objectives and scope, and identify gaps and options for meeting shortfalls 6.3. Develop and implement across the organisation, appropriate risk and incident monitoring, reporting and escalation processes
7. Deliver business continuity professional development activities	7.1. Promote the application of the business continuity management framework and plan to all relevant personnel on an ongoing basis 7.2. Provide staff with appropriate information relating to the cyclical review process of the business continuity management plan 7.3. Conduct business continuity management plan ***exercises*** in line with the organisation's policies and procedures 7.4. Conduct post exercise debriefs, complete post exercise reviews and update business continuity strategies and plans as required 7.5. Manage and record staff learning and development in relation to the business continuity management framework in accordance with organisational requirements, and framework policies and procedures 7.6. Report on the outcomes of staff learning and development, and business continuity framework exercises to relevant personnel

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

• analytical skills to analyse relevant workplace information and data, and to make observations and connections between workplace tasks and interactions in relation to people, activities, equipment, environment and systems
• communication, teamwork and leadership skills to:
  • read and interpret an organisation's reports, policies and procedures in order to develop business continuity management plan/s
  • effectively communicate and work with a diverse range of individuals at all levels during and after a disruptive event

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• effectively negotiate the trust and confidence of colleagues and stakeholders • effectively undertake detailed business impact assessment activities across the spectrum of the organisation's stakeholders • information technology skills to effectively respond to information technology issues • initiative and enterprise skills to generate a range of options in response to a disruptive event • planning and organisational skills to participate in or to establish the organisation's improvement and planning processes • presentation skills to develop and present reports or presentations that deal with complex ideas and concepts, and to articulate information and ideas clearly • research skills to undertake the necessary background research for risk and vulnerability assessment, business impact assessment and business continuity plan • risk management and project planning skills to effectively develop and execute potentially complex business continuity planning strategies and plans • stress management skills to work effectively and positively under the pressure of a major incident or situation within the workplace.
Required knowledge
• Australian/New Zealand Standard AS/NZS 4360:2004Risk Management • Australian/New Zealand Standard HandbookAS/NZS HB221:2004 Business Continuity Management • organisation's policies and procedures, including business continuity strategies • overall operations of the organisation, including existing data and information systems, paper and digital recordkeeping systems • past and current internal, external and industry disruptions • relevant legislation and regulations that impact on business continuity, such as OHS, environment, duty of care, contract, company, freedom of information, industrial relations, emergency management, privacy and confidentiality, due diligence, records management • types of available insurance, what is required and insurance providers in relation to business continuity planning • types of available recoverable services.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • knowledge of the organisation's overall business continuity framework and how it interrelates with the critical business functions • development and implementation of a business continuity plan that includes appropriate links to emergency response, disaster recovery plans and detailed continuity and recovery strategies • effective management of the communication and staff development activities relating to business continuity risk and vulnerability assessment.
Context of and specific resources for assessment	Assessment must ensure: • access to workplace business continuity documentation • access to feedback from teams and management.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the participant • work based projects or case studies • observation of presentations • oral or written questioning to assess knowledge of business continuity management framework and business continuity plans • review of documented critical success factors, and goals or objectives for area • review of risks prioritised for risk treatment and disruption scenarios • evaluation of business impact assessment • evaluation of business continuity and communication strategies and plans.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Corporate risk may include:	• electronic information security • espionage/commercial confidence/sensitivity breach • governance • insolvency • major fraud • professional negligence - threat of major legal action against directors
Organisations may include:	• commercial enterprises • community • government • non-commercial enterprises • not-for-profit • religious organisations
Risk may include:	• aeronautical • armed hold-up • biological • chemical • civil disturbance • disability/death of key person • economic • electronic • erosion • explosion • fire • fraud • hazardous materials • industrial accident • infrastructure failure • market failure • natural disaster • operational collapse - insolvency • pandemic

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• pollution • privacy and confidentiality • radiological/nuclear • robbery and/or major vandalism • sabotage • structure failure • terrorism • transport accident • war • water • weather/climate change
Critical business functions may include:	• business objectives • customer service functions • financial systems • human resource functions • management • OHS • organisational structure • payroll • records management
Dependencies may include:	• office furniture • office supplies • personnel • support activities • systems and applications • vital records
Interdependencies may include:	• communications • outsourcer and third party suppliers • power • sanitation • security • transport • water
Business impact assessment/s may include:	• breach/reduction of customer service standards • cost/impact on existing and/or increased finance • escalating losses over time • impact of loss of business/resources • loss of revenue • potential fines/penalties/litigation costs • reputation/brand damage

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• statutory/regulatory breaches
Disruption scenarios may include:	• damage to/loss of critical infrastructure • information and intelligence - unavailable • equipment and other assets - unavailable • litigation • loss of access to building • loss of access to precinct • loss of access to records and organisational information systems • loss of building • loss of communications - voice • loss of communicationsÂ - data • loss of distribution chain • loss of information technology systems • loss of number and availability of staff, including key staff • not meeting legal and business requirements • partnership dependencies - denial of access to goods and services from suppliers, outsourcers
Management may include:	• chief executive officer • company board • delegated business continuity management director/officer • department managers • directors • supervisors
Risk treatment may include:	• activating evacuation plan • activating lockdown procedures • activating workplace emergency management plan • personnel working from home • relocation of facilities • temporarily suspending activities • transferring activities
Emergency response strategies may include:	• contact lists to report incident/s • documentation/reporting/recording procedures • evacuation plan • location of evacuation assembly point • lock down procedures • names and responsibilities of wardens

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• personnel instructions for evacuation • process for accounting personnel • workplace emergency management plan
Continuity strategies may include:	• action required to resume critical business activities to pre-disruption capacity • contact lists of critical personnel and stakeholders • counselling • critical business activities and prioritisation of when they can/need to resume • list of resources • relocation to alternative worksite • resource replacement • treatment for critical business activities
Recovery strategies may include:	• customer confidence/relationship management • damage assessment • market re-establishment • process for assessing loss and filing insurance claims • relocation of business to original location • salvage and restoration of records, infrastructure and premises
Resources may include:	• critical written and/or electronic records • emergency services • facilities and/or accommodation • finances • information technology infrastructure and applications management • insurance • personnel • plant and equipment • premises • telecommunications
Business continuity plan*/*s may include:	• introduction • organisational details • objectives • purpose • critical business functions • assumptions • processes

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• activation and stand down • responsibility • version control and maintenance • operational requirements • critical success factors • interdependencies • outage times • compliance • people • structure • roles and responsibilities • contact details • continuity arrangements • accommodation • resources • workarounds and alternate solutions • continuity management tasks • communications • other plans • checklists • maps and drawings
Stakeholders may include:	• chief executive officer • company board • customers • directors • families/next-of-kin • funders • local community • media • personnel • professional bodies • shareholders • relevant government minister/s and department/s • regulators • sponsors • suppliers
Communication plan may include:	• accessibility • assumptions • audience

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• boundaries • business continuity terminology • capability • equipment • hierarchical organisational chart of internal and external emergency services personnel/delegates • mode • monitoring procedures • radio silence • reporting and recording procedures • sensitivities
Exercises may include:	• drills • discussion exercises • modelling • planned walkthroughs • scenario planning and exercising • simulated exercises • testing

NWP505B Implement and manage environmental management policies, plans, procedures and programs

Modification History

NWP505B Release 2: Layout adjusted. No changes to content.

NWP505B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to manage activities associated with the implementation and management of environmental management policies, plans, procedures and programs. The ability to consult with stakeholders effectively and interpret complex information is central to effective performance.

Application of the Unit

This unit supports the attainment of skills and knowledge required for managers with responsibility for environmental management within the organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Gather environmental management information.	1.1 Read, review and interpret the organisation's environmental policies and plans against ***current environmental legislation*** and perceived stakeholder attitudes and expectations. 1.2 Identify all stakeholders and their relationship with the enterprise and their impact on, or relationship with, policies and plans. 1.3 Identify the available resources to implement policies and plans. 1.4 Confirm responsibilities and authorities as outlined in the policies and plans. 1.5 Establish best practice procedures for the implementation of management plans.
2 Implement and monitor environmental policies and plans.	2.1 Develop and apply ***environmental management processes*** and workplace procedures to achieve policy and plan objectives and Performance Criteria. 2.2 Monitor the effectiveness of policies and plans against objectives, timelines and key performance indicators. 2.3 Audit environmental management processes and workplace procedures. 2.4 Review and modify processes and procedures to achieve policy and plan objectives.
3 Identify environmental impacts and assess risks.	3.1 Identify, quantify and report existing and potential events that may affect the environment. 3.2 Identify, quantify and report existing and potential environmental management risks. 3.3 Identify, quantify and report work activities that may cause harm to the environment according to enterprise procedures.
4 Implement and monitor the procedures for quantifying environmental impacts and controlling risks.	4.1 Implement work procedures to control risks or remedy damage. 4.2 Monitor risk control measures and report results according to workplace procedures. 4.3 Identify inadequacies in risk control measures, report to the appropriate authority and remedy according to organisational procedures. 4.4 Quantify and record environmental impacts according to legislative requirements and workplace procedures. 4.5 Report adverse environmental impacts and make recommendations to minimise the impacts according to enterprise and legislative requirements.
5 Implement and	5.1 Implement workplace procedures for managing incidents of

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
monitor procedures for dealing with environmental incidents.	environmental significance or harm to ensure prompt control and remediation. 5.2 Investigate ***incidents of environmental impact*** to identify their cause according to investigation procedures or environmental audit requirements. 5.3 Implement control measures to prevent recurrence and minimise risks of events according to the environmental policy and plan. 5.4 Record and report incidences of environmental impact, significance or harm according to enterprise procedures and legislative requirements.
6 Maintain environmental records.	6.1 Accurately and legibly complete ***environmental management documentation*** for the work area according to workplace and legislative requirements. 6.2 Store environmental records for easy access and review according to the policy and plan requirements. 6.3 Regularly review and assess environmental records are to identify long term trends and impacts. 6.4 Report results of record reviews according to the policy and plan requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- applies relevant legislative requirements
- applies enterprise environmental policies
- consults and communicates with internal and external groups and/or individuals
- assesses environmental risks
- applies control procedures
- responds to emergencies
- manages records

Required knowledge:

- enterprise consultation processes
- economic systems and development needs
- enterprise emergency response requirements
- occupational health and safety legislation
- enterprise environmental policies

© Commonwealth of Australia, 2025 Public Skills Australia

- risk assessment procedures
- environmental risk control procedures
- relevant legislative requirements
- environmental legislation
- environmental management records

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to manage activities associated with the implementation and management of environmental management policies, plans, procedures and programs including:

- gathering and interpreting information (including policies, procedures, legislation, Australian and New Zealand standards, best practice guidelines) relating to environmental management
- implementing environmental management plans in consultation with relevant stakeholders
- monitoring the effective implementation of environmental management plans
- assessing and managing risks
- taking effective steps to ensure the remediation of environmental problems or impacts
- collecting, recording, assessing and reporting data associated with the performance of the environmental management plan

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Public Skills Australia

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.

Current environmental legislation may include:	• relevant federal legislation • relevant state or territory legislation • relevant local government by-laws • relevant government and quasi government policies and regulations • relevant community planning and development agreements (e.g. land care agreements)
Environmental management	• minimisation of those factors that contribute to

© Commonwealth of Australia, 2025 Public Skills Australia

processes may include:	environmental degradation
	• minimisation, directly or indirectly, of the production of greenhouse gases. These contributing factors might include the:
	• minimisation of waste materials
	  • correct use of enterprise vehicles and machinery
	  • reuse or recycling of trade materials where possible
	  • overall reduction of energy usage through general awareness
	  • use of appropriate technologies
	• licensing agreements
	• the proper disposal of waste materials
	• restriction of burning off
	• correct handling of toxic substances
	• containment of chlorofluorocarbons and other hazardous substances

Incidents of environmental impact may include:	• emissions to air • releases to/of water • releases to land • disposal of waste • contamination of land • impact on communities • destruction of habitat • use of energy sources • waste generation processes and technologies • extraction of water • changes to water temperature • changes to water salinity • regulation of flow • land use
System adjustments may include:	• pH correction • dissolved oxygen levels • recirculation rates • chemical additives
Environmental management documentation may include:	• information on applicable environmental laws or other requirements • complaint records • training records • process information • process operational logbooks • inspection, maintenance and calibration records • relevant contractor and supplier information

© Commonwealth of Australia, 2025 Public Skills Australia

- incident reports
- information on emergency preparedness and response; records of significant environmental impacts
- audit results
- management reviews

BSBMKG401B Profile the market

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to profile a target market or market segments in accordance with a marketing plan and to develop market positioning strategies. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals working in a marketing team who are responsible for segmenting a target market to review alignment with organisational marketing objectives. This involves identifying viable market segments and profiling target consumers, and then defining the target market in more detail and developing strategies to position products and services. This unit is relevant to individuals working in a variety of marketing communications occupational roles, including advertising, direct marketing, promotional marketing, personal selling and public relations.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Segment the market	1.1. Identify ***criteria*** for use in segmenting the market in accordance with the marketing plan 1.2. Identify and access ***sources of information for segmenting and profiling markets*** in accordance with the marketing plan 1.3. Segment the market in accordance with identified criteria 1.4. Review market segments for their usefulness in terms of factors such as their ***size***, ***potential***, ***distinctive needs***, ***easy identification of members*** or ***distinctive media use patterns*** 1.5. Select ***market segments*** to meet marketing objectives, and choose and apply new segmentation criteria if required
2. Identify the target	2.1. Evaluate ***approaches*** to determining and describing

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
market	the total market for a product or service 2.2. Define the target market in terms of the consumers to be included as ***prospective users*** of a product or service, and the selected market segments 2.3. Use ***segment descriptors*** to describe the target market 2.4. Identify available ***strategic marketing options*** and select ***targeting strategies*** that best meet the requirements of the marketing plan
3. Profile the target audience	3.1. Describe the total market and selected market segments in the form of a consumer profile 3.2. Identify consumer characteristics in ***standard statistical terms*** and/or the descriptive terms used in media selection in the consumer profile 3.3. Use ***demographic*** and/or ***psychographic descriptions*** in the consumer profile in accordance with the requirements of the marketing plan 3.4. Describe consumer attitudes to products or services being offered 3.5. Ensure profile meets organisational requirements in terms of language, format, content and level of detail
4. Develop a positioning strategy	4.1. Identify available ***positioning strategies*** and choose a strategy to meet ***marketing requirements*** and consumer profile 4.2. Write a positioning implementation plan containing several options, in accordance with organisational requirements 4.3. Submit plan to supervisor within specified time lines and make appropriate adjustments based on feedback

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• creativity and innovation skills to select targeting and positioning strategies that meet organisation's requirements • culturally appropriate communication skills to relate to people from diverse

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

backgrounds and people with diverse abilities
• key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects of business operations such as:
  • Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice
  • Free TV Australia Commercial Television Industry Code of Practice
  • privacy laws
  • sweepstakes regulations
  • Trade Practices Act
• literacy skills to prepare reports and to interpret internal and external marketing information
• research skills to identify and analyse market segments and target markets.

Required knowledge

• Australian Marketing Institute Code of Professional Conduct
• data collection and analysis techniques
• industry knowledge including:
  • components of the marketing mix
  • elements of marketing planning
• marketing communications concepts and processes
• organisational structures, roles, responsibilities, business and marketing plans
• product and service standards and best practice models
• relevant legislation from all forms of government that may affect aspects of business operation in addition to those listed above, especially in relation to occupational health and safety, environmental issues, equal opportunity, industrial relations and anti-discrimination
• statistical terms used by the Australian Bureau of Statistics.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and	Evidence of the following is essential:

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
evidence required to demonstrate competency in this unit	• developing a market positioning strategy that documents market segmentation, consumer profiling, targeting and strategies relevant to a product or service being offered to the marketplace.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace • access to information on past profiling, segmentation and targeting performed for a product or service.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following assessment methods are appropriate for this unit: • assessment of positioning implementation plan • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of the application of criteria to segment markets, selection of targeting strategies • oral or written questioning to assess knowledge and understanding • presentation of marketing profiling activities • review of authenticated documents from the workplace or training environment • review of testimony from team members, colleagues, supervisors or managers.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBMKG402B Analyse consumer behaviour for specific markets • BSBMKG507AInterpret market trends and developments.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Criteria may include:	• attitude • average order value in units and dollars • desired benefits • business characteristics • consumer needs • demographics • geography • lifestyle • lifetime value in units, dollars and number of transactions • product or service usage • psychographics • recency and frequency of response to direct marketing activities • social and cultural factors
Sources of information for segmenting and profiling markets may include:	• advertising sales representatives • existing research data • industry sources • media representatives • original a priori research (where the market segments are assumed at the beginning and research is used to confirm them) • original response based research • owners or brokers of mail, email and phone lists • sales representatives • website operators
Usefulness in terms of ***size*** may include:	• segments which are large enough to justify the expense of creating distinctive offers and creative executions • small segments which are viable if telephone and email are used as communication media rather than other types of media
Potential may include:	• high response of market segment members to test campaigns • high response to previous campaigns by members of market segments

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	

Distinctive needs may include:	• specific price points
	• specific products or services
	• specific response vehicles such as:
	  • store visiting only
	  • website only response
	• specific timing of communications such as:
	  • day of week
	  • seasonality
	  • time of day

Easy identification of members may include:	• flags such as:
	  • postcode
	  • date of last purchase
	• geographical location of segment members, such as:
	  • city
	  • metropolitan region
	  • regional centre
	  • rural region
	  • state or territory
	• spending habits such as:
	  • one-off purchasers
	  • subscribers

Distinctive media use patterns may include:	• age • email use • ethnic language television, newspapers and radio • gender • internet use • mobile phone use • special interests
Selection of ***market segments*** may be contingent upon:	• expected frequency of purchase • expected lifetime as customers • expected volume of purchase • how efficiently segment members can be reached with targeted communications • one or more segments
Approaches may include:	• describing total market in dollar or unit terms as gross sales of all other products or services similar to those offered by the organisation

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• describing total market in prospect terms as those most similar to current customers • identifying consumers with relevant needs • identifying current users of a product or service • identifying people with related characteristics
Prospective users may include:	• market segment users most similar to current customers

Segment descriptors may include:	• demographic descriptions
	• geographic descriptions
	• historic descriptions such as:
	  • volume of purchase
	  • frequency of purchase
	• psychographic descriptions

Strategic marketing options may include:	• advertising strategies such as:
	  • most cost effective creative executions
	  • most cost effective media or media vehicle for each segment
	  • most cost-effective media or media vehicle
	• distribution strategies such as:
	  • one-step
	  • multi-step
	• innovative strategies

Targeting strategies may include:	• anniversary of first purchase • concentrated, differentiated and mass strategies • de-duping prospect lists against customer lists • differentiation and segmentation • ease of entry • frequency of purchase • gender • geography of home or workplace • growth considerations • innovation • market share • media usage • niche markets • price sensitivity • purchasing power • recency of purchase • sales volume

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	

Standard statistical terms may include:	• categories used by the Australian Bureau of Statistics in collecting and reporting census data
	• media selection terms such as:
	  • behaviouristics
	  • demographics
	  • geo-demographic analysis of census data available from proprietary research suppliers
	  • geographic selections and segmentations

Demographic descriptions may include:	• age • date and place of birth • disability • education • first language • gender • household income • indigenous Australian • languages spoken at home • marital status • nationality • number and age of children • occupation
Psychographic descriptions may include:	• activities • affiliations • attitudes • interests • lifestyle • opinions • political views • values
Positioning strategies may include:	• competitive positioning • conspicuous positioning • convenience of use • convenience to buy • image perceptions • market follower positions • market leader positions • Me-Too positioning • prestige and exclusive positioning

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• pricing • quality • repositioning • service positioning • uniqueness • value positioning
Marketing requirements may include:	• business-to-business marketing • direct marketing • ideas marketing • marketing of goods • public sector marketing • services marketing • telemarketing

BSBINM501A Manage an information or knowledge management system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to organise learning to use an information or knowledge management system and to manage the use of the system. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers who have responsibility for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes. The unit does not address the requirement to select the technical system (software or hardware), which is seen as the role of an information technology specialist, although in some smaller organisations this may be a part of the manager's role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Organise learning to use information or knowledge management system	1.1. Identify learning needs of ***relevant personnel*** and ***stakeholders*** for input into, and use of, ***an information or knowledge management system*** 1.2. Identify and secure human, financial and physical resources required for ***learning activities*** to use an information or knowledge management system 1.3. Organise and facilitate learning activities 1.4. Promote and support use of the system throughout the organisation 1.5. Monitor and document effectiveness of learning activities
2. Manage use of information or knowledge management system	2.1. Ensure implementation of ***policies and procedures for the information or knowledge management system*** are monitored for compliance, effectiveness and efficiency 2.2. Address implementation issues and problems as they arise

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3. Monitor integration and alignment with data and information systems 2.4. Collect information on achievement of ***performance measures*** 2.5. Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required
3. Review use of information or knowledge management system	3.1. Analyse effectiveness of system and report on strengths and limitations of the system 3.2. Review business and operational plan and determine how effectively the system is contributing to intended outcomes 3.3. Make recommendations for improvement to system, policy or work practices

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem-solving skills to ensure the system is working in accordance with organisational expectations and to deal with contingencies
- technology skills to work with and manage the use of the information or knowledge management system.

Required knowledge

- legislation, codes of practice and national standards, for example:
  - privacy and confidentiality legislation
  - freedom of information legislation
  - AS 5037:2005 Knowledge management - A guide
- organisational policies and procedures, for example:
  - records management
  - information management
  - customer service
  - commercial confidentiality
- organisational operations, and existing data and information systems.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • analysis of the strengths and weaknesses of information or knowledge management system/s and evaluation of suitability for a particular work or organisational context • knowledge of relevant legislation, codes of practice and national standards.
Context of and specific resources for assessment	Assessment must ensure: • access to system • access to system user feedback.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • assessment of written reports reviewing and evaluating information or knowledge management systems • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • oral or written questioning to assess knowledge of relevant organisational policies and procedures • review of identified learning needs personnel and stakeholders regarding the information or knowledge management system • evaluation of monitoring and documentation about the effectiveness of learning activities • analysis documentation reporting on the strengths and limitations of the system • review of recommendations made for improvements to the system, policy or work practices.
Guidance information for	Holistic assessment with other units relevant to the

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
assessment	industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Relevant personnel include:	• managers, leaders, supervisors and coordinators • owners • staff, team members and colleagues
Stakeholders include:	• clients and customers • employee representatives • funding bodies • industry, professional and trade associations • regulatory bodies and authorities • sponsors • tenderers, suppliers and contractors
Information or knowledge management is defined as:	• equipment, strategies, methods, activities and techniques used formally and informally by individuals and the organisation to identify, collect, organise, store, retrieve, analyse, share and draw on information and knowledge valuable to the work of the organisation
An information or knowledge management system:	• comprises policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders
Learning activities include:	• coaching and mentoring programs • help desks • information sessions, briefings, workshops and training programs • paper-based or electronic (including intranet)

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	learning opportunities • use of expert workers such as coaches and mentors to help other personnel use the system
Policies and procedures for the information or knowledge management system cover:	• complying with legislative requirements (such as privacy, confidentiality and defamation requirements) and other policies and procedures • content guidelines • ensuring accuracy and relevance of knowledge input into the system • mechanisms, formats and styles of input to system, including appropriate alternative formats for people with a disability • permissions for input • removing out-of-date, inaccurate and content that is no longer relevant • selecting, maintaining and disposing of knowledge in the system • sharing knowledge in the system
Performance measures include:	• key performance indicators • other systems and measures to enable assessment of how, when, where and why outcomes are being achieved • performance objectives • performance standards (including codes of conduct) • qualitative or quantitative mechanisms to measure individual performance

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare a presentation	1.1. Plan and document presentation approach and intended outcomes 1.2. Choose ***presentation strategies***, ***format and delivery methods*** that match the ***characteristics*** of the target audience, location, resources and personnel needed 1.3. Select ***presentation aids***, ***materials*** and ***techniques*** that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas 1.4. Brief others involved in the presentation on their roles/responsibilities within the presentation 1.5. Select ***techniques to evaluate presentation effectiveness***
2. Deliver a presentation	2.1. Explain and discuss desired outcomes of the presentation with the target audience 2.2. Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas 2.3. Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes 2.4. Use persuasive communication techniques to secure audience interest 2.5. Provide opportunities for participants to seek

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences 2.6. Summarise key concepts and ideas at strategic points to facilitate participant understanding
3. Review the presentation	3.1. Implement ***techniques to review the effectiveness*** of the presentation 3.2. Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation 3.3. Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- facilitation and presentation skills to communicate central ideas of a message in an informative and engaging manner, and to utilise verbal and non-verbal techniques to sustain participant engagement
- literacy skills to prepare presentation information and to write in a range of styles for different target audiences.

Required knowledge

- data collection methods that will support review of presentations
- industry, product/service
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• principles of effective communication • range of presentation aids and materials available to support presentations.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • preparation, delivery and evaluation of the effectiveness of at least two presentations related to the candidate's occupation or area of interest • knowledge of the principles of effective communication.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment, documentation and resources.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • demonstration of preparation, delivery and evaluation of a presentation • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • review of selected presentation aids, materials and techniques • review of briefing provided for others involved in the presentation • evaluation of techniques implemented to review the effectiveness of the presentation.

EVIDENCE GUIDE	
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other general administration units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Presentation strategies may involve:	• case studies • demonstration • discussion • group and/or pair work • oral presentations • questioning • simulations and role-play
Presentation format and delivery methods may include:	• advertising copy • audio • direct marketing copy • individual presentation • public relations copy • scripts • storyboards • team presentation • verbal presentation • video • visuals
Characteristics may include:	• age • cultural and language background • educational background or general knowledge • gender • language, literacy and numeracy needs

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• physical ability • previous experience with the topic
Presentation aids and materials may include:	• computer simulations and presentations • diagrams, charts and posters • models • overhead projector • paper-based materials • video and audio recordings • whiteboard

Presentation techniques may include:	• animation
	• comparative advertising
	• live action
	• music
	• signature elements such as:
	  • slogans
	  • logotypes
	  • packaging
	• sound effects
	• use of a guest speaker
	• use of black and white
	• use of colour
	• use of humour

Techniques to evaluate presentation effectiveness may include:	• action research • critical friends • focus group interviews • one-on-one interviews with participants and other personnel involve in the presentation • written feedback provided by participants

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in panels and group discussion on the planning process	1.1. Natural resource management issues, economic and social factors, and potential solutions/directions are submitted to panels/groups for discussion. 1.2. Contributions to discussions and panels/groups are positive to assist panel/group to develop course of action and recommendations. 1.3. Contributions to discussions and panels and groups are structured to comply with legislative, program and agency requirements.
2. Collect data and background information	2.1. Information on local natural resource management issues is collected through monitoring and surveys conducted in conjunction with local groups, projects and programs. 2.2. Arrangements are made for additional data on natural resource management issues and associated economic, industry and social factors to be collected for input into analysis and the planning process.
3. Contribute to the plan	3.1. Local natural resource management issues are highlighted to the planning team for inclusion in planning considerations. 3.2. Relationship between local and wider issues is explored to submit views on natural resource management priorities and solutions. 3.3. Draft plans are reviewed in terms of impact on the local and wider region to identify deficiencies and propose solutions.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.4. Participation in community consultation assists the facilitator/regional planner to obtain feedback on the draft plan. 3.5. Proposals for improvement to draft plans are based on natural resource management within relevant economic, industry and social contexts.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- interpret technical advice.
- research information.
- establish data collection processes.
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- local community including economic, industry and social factors.
- group development.
- natural resource management issues for local area/region.
- legislative, program and other requirements for regional plans and the planning process.
- regional planning concepts.
- natural resource management processes.
- consultation approaches.
- cross cultural and cultural factors relevant to social structures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • participate in panels and group discussion on the planning process • collect information on local land management issues and relate to economic, industry and social factors • submit views on natural resource management priorities and solutions • review draft plans in terms of impact on the local and wider region to identify deficiencies and propose solutions • participate in community consultation.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Land management issues may include:	• damage to natural resources • activities or lack of activity causing ecosystems operating outside their natural states

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• risk of damage and degradation to natural resources • restoration of degraded areas.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Evaluate markets and organisation's capacity for service	1.1 Markets for existing or new service/product opportunities for the organisation are identified, researched and analysed for possible entry and/or development. 1.2 An audit of existing service capacities is undertaken to identify scope for increased service provision. 1.3 Preferred business profile is identified from business ***plans*** and other organisational documentation. 1.4 Economic, ***community environmental and political trends*** are assessed for relevance against the organisation's profile.
2. Develop marketing strategies and plans	2.1 Alternative and innovative ***marketing strategies*** for the organisation are identified and compared with existing systems. 2.2 Services and markets for the organisation are clearly identified from reliable information. 2.3 Marketing strategies incorporate suitable advice from qualified marketing professionals if required. 2.4 Marketing ***service organisations*** are identified and services accessed where appropriate. 2.5 Cost-effective plans are developed for services, ***promotional*** and pricing strategies. 2.6 Proposed service/product is tested to verify demand, strategies, cost and ability to deliver.
3. Implement marketing strategies	3.1 Suitable advertising and other promotional strategies are evaluated for cost-effectiveness. 3.2 Plans, schedules and targets are set for the introduction of new or improved services. 3.3 The organisation's marketing strategy and each employee's role and responsibility within it are communicated to relevant personnel. 3.4 Plans take into account the nature of the target client and business and seasonal cycles. 3.5 Planned measures are taken to educate clients in value-added services provided by the organisation. 3.6 Implementation is directed toward achieving outcomes defined in the marketing strategy.
4. Monitor marketing strategy	4.1 ***Evaluation criteria*** to assess the effectiveness of marketing are established. 4.2 Accurate records are kept against evaluation criteria

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to enable reliable decisions on performance to be made.
	4.3 Marketing strategy is regularly adjusted in response to monitoring of performance.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- business negotiation
- written and verbal communication
- budgeting
- analytical skills applied market research and assessments
- planning and scheduling of monitoring activities
- presentation
- maintaining records or database
- research
- basic computer literacy including word processing

Required Knowledge

- marketing principles and practice
- performance evaluation measures
- competitor's strengths and weaknesses
- business planning process
- organisation's customer relations policies
- market conditions and forces

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Its is essential for this unit that competence be demonstrated in:

- demonstrated capacity to develop marketing strategy from given data and evaluate strategy
- demonstrated knowledge of a range of promotional strategies

Consistency in performance

© Commonwealth of Australia, 2025 Public Skills Australia

	Evidence is best obtained by citing a marketing strategy prepared for normal organisation operating conditions, including evidence of process followed
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment **Specific resources for assessment** No special requirements
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Marketing strategies may include:	• target markets by client group • location • core function • service type • internal and external clients

Promotional strategies may include:	• a combination of:
	  • pricing
	  • public relations
	  • image and presentation
	  • advertising
	  • community education
	  • involvement

Promotional plans take account of:	• objectives of the promotion • venue and location • duration • style and format of the promotion • technical equipment required • number of invitees • promotional materials • budget • control of invitations • staffing implications

© Commonwealth of Australia, 2025 Public Skills Australia

	• possible cooperative approaches with other organisations • organisation goals • mission • vision to ensure marketing profile • impact of government legislation on marketing functions
Plans may include:	• budgets • business plans • marketing plans
Service organisations may include:	• advertising agencies • marketing consultants • industry associations
Assessment of existing capacity may include:	• competency levels • geographic location • condition and type of facilities and equipment • current workloads • new technology
Community, environment, political trends may include:	• popular attitudes • stability • conservation • degree of knowledge • news coverage • security issues • crime trends
Evaluation criteria may include:	• volume of billed business • public response rates • cost per lead • conversion rates • surveys on attitudes • views of company

PUAFIR602B Manage the implementation of community safety strategies

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit covers the competency to establish and manage the implementation of a range of intervention strategies which can be used to reduce the risk to communities.

This unit resulted from the merger of Public Safety Units PUAEMR004B and PUAEMR005B.

Application of the Unit

Application of the Unit

The application of this unit in the workplace - the environments, complexities and situations involved - will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

This text will be useful for the purposes of job descriptions, recruitment advice or job analysis; where possible, it will not be too job specific to allow other industries to import it into other Training Packages, where feasible.

Pre-Requisites

Prerequisite Unit/s PUAFIR509B Implement prevention strategies

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify prevention**, **preparedness**, **response and recovery strategies**	1.1 Characteristics of the ***risk*** are fully identified 1.2 Existing prevention, preparedness, response and recovery ***strategies*** are identified through research and stakeholder consultation 1.3 A range of potential prevention, preparedness, response and recovery strategies is identified through researching current best practice, alternative options, and seeking expert opinion
2. **Evaluate draft strategies**	2.1 Strategies are evaluated and limitations and impacts identified and communicated to ***stakeholders*** 2.2 Feedback on strategies is obtained from stakeholders and collated 2.3 Stakeholder needs are addressed and negotiated 2.4 Draft strategies are reviewed taking stakeholder feedback into account
3. **Select strategies**	3.1 Reviewed strategies are negotiated with stakeholders and agreement and commitment

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	obtained
	3.2 Strategies are documented according to ***organisational requirements***
	3.3 Strategies are submitted for approval in line with organisational policies, procedures and guidelines
4. **Communicate approved strategies**	4.1 Approved strategies are widely publicised to stakeholders and support gained
	4.2 ***Technologies*** and processes are selected which most effectively communicate the ***information***
5. **Organise the implementation of documented strategies**	5.1 Implementation strategies relevant to the risk are identified
	5.2 Actions required to implement the strategies are documented
	5.3 ***Action plans*** are developed to facilitate the implementation process
	5.4 Action plans are implemented with minimal conflict and disruption
6. **Review effectiveness of implemented strategies**	6.1 An implementation review process is established
	6.2 The effectiveness of the selected intervention strategies is reviewed as appropriate
	6.3 Implementation action plans are adjusted following the review process if required
	6.4 Any adjustments to the action plans are implemented

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

resolve conflicts

define and anticipate implementation barriers

identify relevant stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

establish communication networks

conduct needs analysis

negotiate with client groups and stakeholders

review procedures, action plans and strategies for implementation

use information technologies to communicate information

Required Knowledge

legislative and regulatory requirements relevant to emergency management

problem solving and decision making techniques

emergency management concepts and principles

techniques for the prioritisation and evaluation of Public Safety risk management systems

organisation's approval procedures

knowledge of current principles and practices to conduct activities which exercise elements of Public Safety management

risk management and models

problems likely to preclude the implementation of strategies

potential hazards and their consequences

planning theory and processes

benchmarking best practices in the implementation and review of management processes

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in: appropriate strategies selected and supported by the community implementation action plans are adopted by stakeholders implementation process is current to the community it

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	protects **Consistency in performance** Evidence should be demonstrated over a period of time and in a range of contexts
Context of and specific resources for assessment	**Context of assessment** Evidence of competence in this unit should be collected in one or more actual situations or scenarios where there is the capacity to demonstrate the required evidence in a real or simulated environment in conjunction with portfolio evidence. Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to provide a real life environment and/or simulations based on real life incidents. These resources may involve complex scenarios sufficient to allow evidence to be gathered from a variety of sources and stakeholders on more than one occasion and over an extended period of time. Controlled access to organisational records and personnel may have significant cost implications for the staging of scenarios
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational documentation may include	legislation, policies, corporate plans, guidelines, existing disaster plans, operational manuals, historic time series data

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Community information may include	community information booklets, media, groups, municipalities, emergency service personnel
Communication strategies may include	meetings, letters, facsimile, electronic transmission of information, small group or individual verbal communication
Communicating to promote understanding may include	using plain English (or appropriate community language), avoidance of technical terminology and jargon, taking account of education levels, literacy levels, familiarity with technical terms, interpreter, community liaison officer
Legislative, regulatory and organisational requirements may include	environmental acts, safety standards, local government regulations, organisation's policy and procedures, coronial, inquests, royal commissions, commissions of inquiry
Sources of risk	commercial and legal relationships, economic, human behaviour, natural events, political circumstances, technology/technical issues, management activities and controls, individual activities, criminal activity
Stakeholders may include	career and volunteer personnel, client groups, members of the public, community groups, industry groups, public and private sector organisations, non-government organisations, Members of Parliament
Possible strategies may include	all aspects of comprehensive emergency management evolved from considering prevention/ mitigation, preparedness, response and recovery including safety standards, legislation and regulation, building codes, land use management, public education, emergency management planning, mutual aid agreements, training and exercises, warning systems, critical incident stress management, community restoration, mobilising resources, implementing plans, financial support, restoration and reconstruction, personal support and counselling
Monitoring and review of the planned process will include	the maintenance of equity, continued involvement of stakeholders, cost effectiveness of treatment, evaluation of effectiveness in terms of actual risk reduction, the evaluation of the need for the redefinition of policy, a feedback mechanism, consideration of change that takes place over time

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Information technologies may include	computerised simulations
Action plans may include	aims and objectives of the strategy possible strategies to achieve objectives possible tactics to implement strategies resources required including their availability, limitations, contingencies and alternatives monitoring and evaluative procedures reporting requirements
Evaluation of strategies may include	determination of advantages, disadvantages, deficiencies and limitations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Assess hazards of on-site materials**	1.1 On-site hazards are identified 1.2 Facility risk factors are determined 1.3 Potential incidents are identified 1.4 Factors which may contribute to loss of containment, control of, or fire involving ***hazardousmaterials*** are assessed
2. **Identify**, **determine and assess the likely consequence of the release on on-site materials** (**non-fire scenario**)	2.1 The range of dangerous goods releases is identified and assessed in accordance with the organisation's procedures 2.2 The ***consequence*** of each of the dangerous goods releases is identified and assessed in accordance with the organisation's procedures 2.3 The impact on the immediate area, personnel, property and the environment is identified in accordance with the organisation's procedures 2.4 The likelihood of the events occurring is determined in accordance with the organisation's procedures 2.5 Resources available to combat the release of on-site materials are identified and assessed
3. **Determine and assess the fire scenario** (**fire**, **chemical**, **gas release**) **involving hazardous**	3.1 The range of fire ***scenarios*** involving hazardous materials is identified in accordance with the organisation's procedures 3.2 The range of consequences of each scenario

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
materials	involving hazardous materials is identified and assessed in accordance with the organisation's procedures
	3.3 Impact on the immediate area, personnel, property and the environment in the event of a hazardous materials fire is identified in accordance with the organisation's procedures
	3.4 The likelihood of a fire occurring is determined in accordance with the organisation's procedures
	3.5 Resources available for each fire are identified and assessed in accordance with the organisation's procedures
4. **Assess fire/incident and safety management systems and their performance**	4.1 ***Fire/incident and safety management systems*** including prevention, preparedness, response and ***recovery*** are identified
	4.2 Performance of fire/incident and safety management systems is assessed in accordance with relevant legislation, standards, codes of practice and performance based criteria
	4.3 Survivability of the systems is evaluated in accordance with the organisation's procedures Fire/incident and safety management system design assumptions and fire organisation's operations are assessed
	4.4 Recovery strategies are identified and assessed
5. **Report and recommend action**	5.1 Proposed or existing fire/incident and safety management systems are documented
	5.2 Evaluation of the fire/incident and safety management systems are recorded
	5.3 Recommendations for action to be taken and proposed upgrades to fire/incident and safety management systems are reported, documented and forwarded in accordance with the organisation's procedures

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Plan fire/incident investigation and analysis activities**	1.1 The roles and responsibilities of the government and non-government organisations involved in fire/incident investigation are identified 1.2 ***Procedures*** and ***protocols*** for the cooperation and coordination of relevant organisations involved in the fire/incident investigation are identified, agreed and implemented 1.3 Strategies required to conduct a fire/incident investigation and analysis are identified and implemented in accordance with the organisation's procedures 1.4 Preliminary and background ***information*** concerning the context of the fire/incident investigation is prepared 1.5 The relevant legislative requirements that impact on the collection and recording of ***evidence*** are identified 1.6 Evidence and information gathering process at the incident site is planned in accordance with organisation and legislative requirements, environmental conditions and resource availability 1.7 Required fire investigation equipment and resources for the incident are identified and assembled

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. **Collect, collate and preserve evidence**	2.1 The methods and techniques of evidence and information collection appropriate to the investigation are applied in accordance with legislative requirements
	2.2 The various types of evidence and information pertinent to the investigation are recorded and/or collected in accordance with organisational and legislative procedures
	2.3 The procedures for continuity and ***preservation*** of evidence are followed in accordance with legislative requirements
	2.4 Appropriate ***packaging*** and identification techniques for the transportation of evidence for the purpose of laboratory testing are implemented
3. **Determine cause and origin of fire**	3.1 The procedures required to determine the origin and cause of fire are followed
	3.2 Assistance is rendered to laboratory personnel and specialist organisations in accordance with organisational procedures
	3.3 Physical evidence that can lead to the determination of the origin and cause of fire is identified and examined
	3.4 Preliminary findings are documented and validated in accordance with organisational procedures
	3.5 The cause and origin of fire is determined
	3.6 Findings, methodologies, support data and briefing notes are documented in accordance with organisational and legislative procedures
4. **Conduct analysis of incident**	4.1 Information relating to incident is gathered in accordance with the organisation's policies and procedures
	4.2 Information relating to incident is evaluated in accordance with the organisation's procedures
5. **Record and report information collected**	5.1 Relevant organisation/legislative requirements for the recording, reporting and producing of information for a fire/incident investigation are implemented
6. **Prepare personnel for proceedings**	6.1 Briefings are held with counsel as required
	6.2 Other personnel involved in the proceedings are briefed

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	6.3 Additional information and/or clarification of fire/incident investigation procedures/findings are provided as required
	6.4 Protocols for giving of evidence at a coronial/civil/criminal proceeding are followed
7. **Review and evaluate fire/incident investigation**	7.1 Outcomes of proceedings are ***reviewed*** to ensure knowledge of investigations, trends and precedents is current
	7.2 Changes to an organisation's policy and procedures arising from rulings and decisions are formulated and reported
	7.3 Post incident analysis ***documentation*** is completed in accordance with the organisation's requirements
	7.4 Fire/incident cause determination/documentation/ recommendations are forwarded according to the organisation's procedures

EVIDENCE GUIDE

	evidence **Specific resources for assessment** Required fire investigation equipment and resources real or simulated test fire sites (forest/rural) training building with appropriate fire investigation training rooms, fire crews and pumpers, thermal detection equipment, appropriate protective equipment, classrooms equipped with computers and appropriate training aids, text and reference materials, and appropriate role play scripts for the appropriate personnel (police, barristers, solicitors, forensic scientist, insurance adjustors and investigators)
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Evidence must include	video tapes, audio tapes, drawings, photographs, plans, manifests, documents, personal notes, physical evidence, debris, soil
Investigative procedures must include	canvass witnesses, conduct examinations, advise and cooperate with other agencies, take notes and photographs, make sketches and maps, collect and secure physical evidence, collect, collate and analyse information, conduct interview, prepare reports, produce information
Evidence preservation must include	chain of evidence recording, tagging secure encasements, log of events
Packaging of evidence may include	non-lined tins, non-leaching bags, glass receptacles, gas sampling equipment, rigid and non-rigid receptacles

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Causes of fire may include	electrical origin, gas explosion, gas, accidental or deliberate nature, motor vehicles, flammable liquids, chemical, mechanical defect, lightning, environmental or natural occurrences, matches and lighters, smoking, spontaneous combustion
Liaison with specialist personnel may include	laboratory technicians, forensic specialist, insurance investigators, medical examiners, lawyers, crime scene police, arson squad, other relevant authorities
Protocols for giving evidence must may include	court procedures, court practices, pre-court briefings, rules of evidence
Review of information may include	incidence mapping, databases, journals, correspondence, Internet, inter-organisation activities, intra-organisation activities
Post investigation documentation may include	statements, proformas, photographs, tape recordings

PSPREG403B Assess compliance

Modification History

PSPREG403B Release 2: Layout adjusted. No changes to content.

PSPREG403B Release 1: Primary release.

Unit Descriptor

This unit covers risk assessment, monitoring of situations/environments/behaviours, and analysis of information to assess compliance with legislation and/or standards. It includes monitoring areas under own jurisdiction, receiving or identifying allegations of non-compliance, and conducting research to determine levels of compliance.

In practice, assessing compliance may overlap with other generalist or specialist public sector work activities such as acting ethically, exercising regulatory powers, promoting compliance, acting on non-compliance, etc.

This unit replaces and is equivalent to PSPREG403A Assess compliance with legislation.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor areas under jurisdiction	1.1 ***Risk assessment*** analysis is conducted to identify and prioritise areas for ***monitoring*** and to identify methodology. 1.2 Monitoring is conducted in accordance with ***legislation, policy and procedures***. 1.3 Inspections and/or compliance audits are conducted in accordance with organisational policy and procedures. 1.4 ***Specialist equipment*** is utilised when required, in accordance with legislation, policy and procedures. 1.5 Safety of self and others is protected in accordance with legislation, policy and procedures. 1.6 Cooperation with ***other organisations and jurisdictions*** is facilitated in accordance with organisational policy and procedures.
2. Receive or identify allegation of non-compliance	2.1 ***Referrals*** relating to non-compliance are recorded in accordance with legislation, policy and procedures. 2.2 Possible and potential breaches are responded to in a timely manner in accordance with legislation, policy and procedures. 2.3 Preliminary information is assessed to establish the offence and is validated to confirm the need for action in accordance with organisational policy and procedures. 2.4 Complainants are handled in accordance with organisational guidelines which may indicate referral to more senior personnel.
3. Determine levels of compliance	3.1 Timely consultation is undertaken as necessary to obtain advice on methodology to adopt and prevent gaps occurring in evidence collection. 3.2 ***Evidence collection methodology*** is selected according to the purpose, situation and operational guidelines. 3.3 Information/samples are collected, analysed and secured in accordance with legislation, policy and procedures. 3.4 Information/samples are relevant and sufficient for the purpose identified. 3.5 Assessment is made against the requirements of the legislation and the level of compliance is identified and documented according to legal and organisational requirements. 3.6 Further action is determined consistent with the level of compliance and is ***recorded/reported*** in accordance with legislation, policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking research, analysis and problem solving in the context of assessing compliance
- applying regulations and codes of practice
- using information technology for data analysis, recording and reporting
- communicating including questioning and negotiating of meaning in sometimes difficult situations
- responding to diversity, including gender and disability
- reading and applying complex information from legislation
- applying public sector legislation such as occupational health and safety and environmental and sustainability procedures in the context of assessing client compliance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, standards, policies and legal precedents
- organisational procedures, guidelines and protocols
- knowledge of own and others' jurisdictions
- risk management in the context of compliance assessment
- application of audit tools
- research and sampling methodologies
- security storage of evidence/information
- procedures for recording allegations/complaints
- specialist equipment
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment and sustainability relating to the assessment of client compliance

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training

© Commonwealth of Australia, 2025 Public Skills Australia

Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPREG401C Exercise regulatory powers

PSPREG402C Promote client compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- assessment of compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards
- public sector values and codes of conduct
- evidence gathering methodology
- case studies and workplace scenarios to capture the range of situations likely to be encountered when assessing compliance

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when assessing compliance, including coping with difficulties, irregularities and breakdowns in routine
- assessment of compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities

© Commonwealth of Australia, 2025 Public Skills Australia

- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Risk assessment may include:

- formal risk management cycle
- informal risk assessment

Monitoring may include:

- surveillance
- spot checks
- comparison of data over time
- audit
- quality assurance reviews

Legislation, policy and procedures may include:

- enabling legislation
- occupational health and safety legislation
- workers compensation legislation
- equal employment opportunity and anti-discrimination law
- environment legislation and sustainability procedures

© Commonwealth of Australia, 2025 Public Skills Australia

	• listening devices legislation • privacy legislation/instructions • organisational procedures and protocols • standard operating procedures • Australian standards
Specialist equipment may include:	• computer data analysis systems • computer aided auditing techniques • electronic equipment • listening devices • cameras • chemical analysis kits • security cupboards • oil sampling kits • personal protective equipment
Other organisations/ jurisdictions may include:	• State/Territory police and special units • federal police • military police • Commonwealth regulatory agencies • Local Government law enforcement officers • fire and rescue • emergency services
Referrals may include:	• suspicions • complaints • allegations of non-compliance
Evidence collection methodology may include:	• sampling • audit • interviews • data analysis • document analysis
Recording/reporting of further action may include:	• decision to proceed/not proceed • justification for decision • informing other areas or organisations of information received/gathered and the action to be taken, if any, subject to confidentiality and privacy legislation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify the demographic composition of the community, and of interest groups and organisations in the community**	1.1. Demographic data on community is gathered and collated. 1.2. Community interest groups and organisations are identified. 1.3. Data is analysed to identify the composition and characteristics of the local community.
2. **Identify community need for information, skills and opportunities for involvement in environmental management practices**	2.1. Relevant information to assist community knowledge , skills and opportunities for community involvement in environmental management is identified, researched and collated. 2.2. Links with community interest groups, organisations and the broader community are established to identify information, skills and opportunities. 2.3. Community needs and opportunities for community involvement are established. 2.4. Gaps between expectations and current environmental management practices in the community are identified. 2.5. The need for modification or improvement of existing environmental practices in the community is identified. 2.6. New areas that require the implementation of environmental management practices in the community are identified.
3. **Identify and assess the effectiveness of methods for creating and raising community awareness of environmental management**	3.1. Data on the effectiveness of various methods is gathered and analysed in the context of known community data and environmental management targets. 3.2. Criteria for determining the range and effectiveness of methods are determined, based on known information. 3.3. Criteria are applied to known methods in order to

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
practices	determine relative effectiveness. 3.4. Specialist knowledge and skills are applied to determine the most suitable methods in the community.
4. **Implement appropriate methods to improve community awareness, skills and involvement in community environmental management practices**	4.1. Financial resources are identified within budget cycles to support the achievement of required outcomes. 4.2. Personnel are identified, trained and assigned to tasks so that strategy requirements for skills and knowledge are met. 4.3. Physical facilities and equipment are identified and procured within budget cycles. 4.4. Prioritised methods are implemented appropriately by identified staff. 4.5. Improvement in community awareness of environmental issues is achieved in accordance with local policy, procedures and relevant legislative requirements.
5. **Monitor and review levels of community awareness**	5.1. Regular data is collected and analysed to provide accurate measures of performance. 5.2. Comparisons are made with required outcomes to assess effectiveness. 5.3. Recommendations are made for changes to methods and systems. 5.4. Changes to methods and systems are made to ensure outcomes are achieved. 5.5. Information obtained during monitoring and review is used to develop new methods and systems that are based on accumulated knowledge and experience.

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	A range of relevant environmental management practices are identified and documented. Community consultation is carried out and documented. Resources are identified within budget cycle. Topics are prioritised relevant to community expectations, identified outcomes and resource constraints. A variety of methods to improve community knowledge, skills and opportunities for involvement is activated. Monitoring and review process is carried out and results are documented.
Context of assessment	On the job or in a simulated work environment.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Relationship to other units(prerequisite or co-requisite units)	Prerequisite units: nil. Co-requisite units: nil.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to relevant data sets including: • Australian Bureau of Statistics • community profiles • real or simulated community consultation processes such as workshops • forums • participation in community events.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Data on community may include:	• Australian Bureau of Statistics data • community profiles • information gathered from community groups and organisations.
Community knowledge	• methods of information distribution • methods for suggesting improvements in systems

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

may include:	• local authority environmental management policies and practices • other organisation's environmental management policies and practices • community education techniques • networks • environmental management expertise.
Community skills may include:	• composting • mulching • worm farming • waste sorting • community education • action learning • media skills • building materials • energy efficiency (e.g. solar and water) • vegetation • handling and disposing of toxins.
Criteria may include:	• the range of education and marketing methods used • consistency of involvement • level and quality of training provided • level and quality of involvement from each section of the community • funding and resources required to support the involvement • quality and level of benefit derived from involvement • goals for involvement • available resources and funds.

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Assess resource availability**	1.1. Data on resources where council can influence use are identified and collated in a comprehensive manner. 1.2. Targeted resources are defined in-house and/or in the local government area by type, amount and degree of availability.
2. **Assess current resource utilisation**	2.1. Reliable measurable indicators of resource utilisation are identified to provide data on resource consumption. 2.2. Measurement is undertaken accurately and comprehensively. 2.3. Comparisons are made against identified practice from a variety of sources and accepted standards of performance.
3. **Develop strategies for efficient resource usage**	3.1. The potential for efficient resource usage is identified. 3.2. A practical feasibility analysis is carried out on opportunities and options for minimisation in the local context. 3.3. Strategies are selected and prioritised based on effectiveness, efficiency and availability of resources. 3.4. Personnel responsible for strategy implementation are identified. 3.5. Strategies are presented at appropriate organisational level for endorsement and are referred to appropriate personnel for implementation.
4. **Monitor and review effectiveness of ways to reduce resource usage**	4.1. Regular data is collected and analysed to provide accurate measures of performance. 4.2. Comparisons are made with strategy objectives to assess effectiveness. 4.3. Changes to implementation strategy are made as required in a timely manner to ensure outcomes are

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify nature and type of service requests**	1.1. Requests are assessed to establish if they are within the jurisdiction and ability of the building or planning area of relevant authority and are then referred as appropriate. 1.2. Requests are assessed to establish necessity for compliance with statutory requirements. 1.3. Time required to service requests is established to identify if an immediate response will satisfy requirements. 1.4. Requests requiring additional research are prioritised and recorded to ensure important matters are finalised promptly.
2. **Research information relevant to service requests**	2.1. Accurate research and action are undertaken in priority order to obtain required information or result. 2.2. Sources of relevant information are correctly identified. 2.3. Information is collated to enable preparation of a satisfactory response to the request. 2.4. Professional advice is identified and incorporated where appropriate. 2.5. Affected relevant authorities are consulted.
3. **Determine suitable response**	3.1. Response is prepared within statutory constraints and levels of authority that protects council interests. 3.2. Response facilitates discussion and consultation so that client expectations can be satisfied. 3.3. Relevant form of response is selected within council policies and procedures.
4. **Communicate information and advice**	4.1. Written information and advice provided are clear and concise to minimise the need for follow-up action. 4.2. Verbal advice is presented clearly and in a courteous

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	manner so that the need for follow up is minimised. 4.3. Advice given is recorded according to council procedures. 4.4. Discretionary advice on major issues is made available according to council policy and procedures.

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: • establish and maintain community networks • establish appropriate goals for health education, promotion and awareness in accordance with council requirements • develop, implement and evaluate appropriate health education, promotion and awareness programs • market, implement and monitor programs to ensure objectives are met • report, review and assess programs.
Context of assessment	On the job or in a simulated work environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials, including

EVIDENCE GUIDE

	personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Competency must be demonstrated in all elements across a range of variables relevant to council's size, location and strategic plan.
Resource implications	Access to a workplace or simulated case studies that provide relevant equipment and materials, such as: • videotapes • pamphlets • health legislation • council policies and procedures.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Council requirements may include:	• council policies, procedures and guidelines • strategic, business and management plans • local ordinances, laws and by-laws • state legislation.
Community health needs may include special requirements of:	• ethnic or minority groups • demographic groups.
Health education, promotion and awareness programs may include:	• immunisation • nutrition • smoking • sun smart • health effects of climate change, such as heat stress • mosquito control • sexually transmitted diseases • council • public health plan • public health policy • media releases • personal skill development

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• community action strengthening • supportive environments • reorienting services • behavioural and environmental adaptation • community development.
Legislative requirements may include:	• federal • state or territory • local government.
Marketing may include:	• preparation and use of materials, such as: • audiovisual materials • pamphlets and books • software • badges • ties • stickers • professional consultancy • online support.
Viability may include:	• profit or loss • break-even • community value.
Internal and external consultation may include:	• staff • councillors • schools • police • experts • community • parents • funding organisations • regional groups • relevant agencies, including welfare agencies • hospitals • medical institutes • church groups • industry and professional expertise • government departments • marketing departments and consultants • media developers.

Health education, ***promotion*** and awareness ***programs*** are monitored and evaluated to assess performance against goals and objectives of the program.
3. **Undertake entrepreneurial programs**	3.1. The opportunity for an ***entrepreneurial program*** is identified from the market place. 3.2. The viability of a program is assessed by internal and external consultation. 3.3. Reports are prepared for council with recommendations and supporting information. 3.4. The program is implemented and monitored to ensure objectives are met within budget, resources and time limitations. 3.5. The program is reviewed and assessed using consumer response and internal audits.

EVIDENCE GUIDE

considered	
Context of assessment	On the job or in a simulated work environment.
Relationship to other units(prerequisite or co-requisite units)	Prerequisite units: nil. Co-requisite units: nil.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completing workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Competency must be demonstrated in all Elements across a range of variables relevant to council's size, location and strategic plan.
Resource implications	Access to a workplace or simulated case study that provides relevant equipment and materials such as videotapes and pamphlets.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Promotion programs **may include**:	• immunisation • nutrition • smoking • sun smart • mosquito control • sexually transmitted diseases • council

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• public health plan • public health policy • personal skill development • community action strengthening • supportive environments • reorienting services • behavioural and environmental adaptation • community development.
Entrepreneurial programs **may include**:	• videotapes • slide tapes • hard copy • pamphlets • books • software • badges • ties • stickers • professional consultancy.
Internal and external consultation **may include**:	• staff • councillors • schools • police • experts • community • parents • funding organisations • relevant agencies, including welfare agencies • regional groups • hospitals • medical institutes • church groups • industry and professional expertise • government departments.
Public health needs **may include special requirements of**:	• ethnic or minority groups • demographic groups.
Viability **may include**:	• profit or loss • break-even • community value.

Unit Descriptor

Unit Descriptor This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

Application of the Unit

Application of the Unit This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Devise consultation strategies**	1.1. A range of consultation strategies is identified and assessed for suitability. 1.2. Interested and affected parties are identified. 1.3. Resources required to conduct consultation are assessed. 1.4. Consultation strategies are chosen that enable and encourage relevant groups or individuals to be involved. 1.5. Legislative and council requirements are reviewed to ensure strategies meet all criteria.
2. **Conduct consultations**	2.1. Information is prepared that is clear, accurate and appropriate to the needs of all parties. 2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved. 2.3. Information is presented to affected parties at an appropriate time and place. 2.4. Access and equity requirements are implemented in the consultations. 2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame. 2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.
3. **Record**, **analyse and report on results**	3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed. 3.2. Appropriate suggestions for improvement are

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	incorporated into design parameters. 3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised. 3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern. 3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur. 3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to devise and conduct community consultations where: • consultation ensures council's image or reputation is maintained or enhanced • community consultation produces valid and useful information.
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Relationship to other units(prerequisite or co-requisite units)	Prerequisite units: nil. Co-requisite units: nil.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including:

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	• public and community meetings and forums • surveys and door knocks • appropriate communications equipment and aids such as overhead projectors and computer-based presentations.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Access and equity may include:	• subject matter • manner in which consultations are conducted • physical accessibility • community profile.
Enabling and encouraging relevant groups to be involved may include:	• physical accessibility • diverse language needs • culture, including Indigenous, youth and non-English speaking background • physical environment • number of people.
Information may include:	• written and oral records • anecdotes • reports • instructions • directions from supervisor or management • interviews • formal and informal team meetings.
Interested and affected parties may include:	• community groups • other authorities • individuals • emergency authorities (police, fire and ambulance) • private sector business interests • special interest groups • experts.
Resources may include:	• human • financial • locations.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Consultation strategies may include:	• public meetings • phone-ins • questionnaires • informal gatherings • door knocks • council meetings.
Legislation may include:	• local government • anti-discrimination • planning.
Presentation of information may include:	• graphics • models • computer animations • video displays • overhead transparencies • handouts • display plans • interpreter service.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the activity / *program* required	1.1 Assess need for a particular program from relevant evidence collected 1.2 Identify and review a range of possible programs to meet the defined needs 1.3 Select a program type based on client needs, organisation's criteria and availability of resources
2. Prepare activity / program plan	2.1 Undertake appropriate strategic planning activities to ensure client needs are met 2.2 Plan activities in consultation with key clients and stakeholders 2.3 Determine operational arrangements for conducting the program and assess their feasibility 2.4 Include appropriate implementation and evaluation strategies in the activity/program plan 2.5 Ensure planning activities reflect accepted good practice in working with young people
3. Deliver activity / program	3.1 Implement program in accordance with program plan, organisation guidelines and legal / statutory requirements 3.2 Provide participants with access to a range of *activities* suited to their needs and interests 3.3 Develop flexible implementation plans to suit a variety of contexts and to cope with contingencies 3.4 Adapt program to changing needs of participants as required 3.5 Ensure problems in program delivery are addressed promptly

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Evaluate activity program	4.1 Define criteria to judge effectiveness of program in consultation with clients and stakeholders 4.2 Routinely use appropriate evaluation strategies during and after program and for revision and development 4.3 Collect, organise and report evaluation information in a format which is accessible and meaningful to clients and stakeholders 4.4 Prepare and present reports as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Target groups relevant to the worker and the activity or program
- A range of youth activities and programs
- Legal and safety requirements as they relate to activities and programs
- Relevant funding sources

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Consult with relevant stakeholders

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- Work with individuals and groups
- Undertake autonomous work and team work

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
  - research and consultation
  - coordination and management of programs
  - analysis of data, information and relationships
  - advocacy
  - provision of support to a diverse range of people/organisations
  - conflict resolution/negotiation and mediation
  - cross cultural communication and negotiation
  - literacy adequate to prepare a range of appropriate resource material
  - working with and through community leaders
  - effective use of relevant information technology in line with occupational health and safety (OHS) guidelines

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit is best assessed in the workplace or in a simulated workplace under the normal range of conditions • Consistency in performance is to be demonstrated for

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	at least two: • types of activities and programs identified in the Range Statement • purposes identified in the Range Statement
Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities
Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resource requirements for assessment of this unit include access to: • a workplace or an accurately simulated environment where assessment may take place
Method of assessment:	• In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios • Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes • Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should

EVIDENCE GUIDE

	be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Program may include:	• Activities designed to address needs of target groups • Activities designed to meet needs identified in research • Strategies to implement government/funding agency policy • Activities to extend the participation numbers in existing programs • Strategies to address exclusion, discrimination and alienation • Those directed at individual young people and their needs • Those directed at the general community which affect young people • Those initiated by the organisation, by community groups, by other organisations, or by community leaders and decision-makers • Those designed to respond to social, economic and demographic changes
Programs may have the following focus:	• Education/learning/training e.g. homework support and study • Personal development and support e.g. life skills

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	education • Music and performing arts e.g. youth theatres, band, video production team • Research, planning and management e.g. Aboriginal cultural camp, scouts meeting • Community action e.g. anti violence group • Special interest causes e.g. young people against nuclear disarmament • Enterprise development activities • Employment, funding raising, small business
Activities may include:	• Discussion groups e.g. about safe sex, religious beliefs • Sporting and recreation activities e.g. basketball at the drop in centre, pool game, disco, bush excursion • • Structured and unstructured social activities e.g. party, shopping, visit to the cinema
Programs are planned and implemented for the purpose of:	• Providing immediate support • Promoting young people's participation and personal development • Enabling young people to use their time constructively, have fun and develop qualities of self reliance • Enabling young people to learn life skills, knowledge and attitudes

Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. *Initiate research* efforts	1.1 Identify and define need for further research and develop proposals in consultation with relevant stakeholders 1.2 Develop research concepts, designs and proposals and test with relevant stakeholders according to needs, timeframes, *resources* and desired outcomes 1.3 Assess feasibility of research proposals against determined *criteria* 1.4 Provide opportunities to encourage participation in research activities 1.5 Incorporate issues related to ethics, validity and reliability in research designs
2. Identify and acquire resources	2.1 Devise and implement strategies to obtain and use necessary human, financial and physical resources to achieve research outcomes 2.2 Make written and oral submissions to obtain the resources, addressing standard requirements for *funding* and usual organisation practice
3. Supervise research being undertaken	3.1 Implement work plan and budget, considering resource and time constraints, and negotiate with all research workers and participants, if relevant 3.2 Regularly monitor progress against the work plan and budget and make changes as necessary 3.3 Create and act on opportunities for feedback, support, advice and debriefing for research workers to ensure quality outcomes 3.4 Create opportunities for stakeholders to *evaluate research* findings and process

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Interpret and act on analysis of research	4.1 Derive recommendations from analysis of the research to address desired outcomes 4.2 Test validity and reliability of research findings against original research plan and confirm with key stakeholders 4.3 Where appropriate, make recommendations for actioning research results

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Management of research models/practices
- Project management models/practices
- Research ethics and codes of conduct
- Consultation models/practices
- Resource management models/practices
- People management models/practices

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Design research
- Interpret and analyse research
- Complete submission process

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- Manage people in a research environment

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Develop consultation protocols
- Facilitate consultation
- Demonstrate application of skills in:
  - high level communication
  - negotiation
  - management of equipment, materials funding
  - use of technology
  - analysis

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit is most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions This may include the use of languages other than English and alternative communication systems • Assessment must include evidence of all aspects of managing research activities

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities
Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resource requirements for assessment of this unit include access to: • an appropriate workplace where assessment can take place, or simulation of realistic workplace setting for assessment
Method of assessment:	• Assessment may include observations, questioning and evidence gathered from the workplace

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

The contexts for initiating and coordinating research include:	• Preparation of a range of data:
	  • policy making
	  • strategic planning
	  • marketing
	  • service development and delivery

Initiate research will be carried out and coordinated within requirements established by:	• Research codes of ethics and protocols • Organisation mission, outcomes and objectives • Organisation's program standards • State and commonwealth legislation • Key stakeholders
Criteria to assess the research proposal will include:	• The size and nature of the research sample i.e. Who and how many will be researched • Research methods • Purpose of research and for whom • The human, financial and physical resources required • The nature and scope of the information to be gathered • The timetable
Evaluate research will be based on:	• The value of its usefulness • The feasibility of implementing the recommendations • The findings of previous and current research • Available time and resources • The value of the information and data • The quality and credibility of the methodology
Resources will include:	• Specialist researchers • Funding • Previous research data written, oral and audio-visual sources • Equipment e.g. computer, electronic recording equipment etc

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Funding proposals will include:	• Submissions • Tenders • Expressions of interest • Sponsorship • Fee for service • Contracting
Funding sources can include:	• Government state and federal • Philanthropic agencies • Private business and sponsorship • Bequests, donations and other private grants • Money raised by fundraising events • Sale of resources
Support and promotion will include:	• The promotion and dissemination of information about the benefits of the research • Organisation of meetings/forums for broader involvement and interaction with stakeholders • Recruitment of people with research skills and experience • Recruitment of resources and funding

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Power relationships within and between organisations
- The values and limitations of networks
- The dynamics of networks
- Processes of initiating and supporting community development planning
- Strategic planning
- Existing relevant networks
- Lobbying in the context of organisation protocols

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Ensure networks developed meet the needs of the organisation and its clients

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
  - negotiation

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- reporting and record-keeping
- lobbying
- dealing with diverse and/or specific cultural groups
- Utilise relevant information technology effectively in line with occupational health and safety (OHS) guidelines

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit is most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions This may include the use of languages other than English and alternative communications systems
Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	Torres Strait Islander clients and communities
Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resource requirements for assessment of this unit include access to: • an appropriate workplace where assessment can be conducted or simulation of realistic workplace setting for assessment
Method of assessment:	• Assessment may include observations, questioning and evidence gathered from the workplace environment
Method of assessment:	• In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios • Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes • Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Networks may include formal networks such as:	• Key people • Local organisations • Interest and support groups • Lobby groups • Regional specialist and peak associations • Advisory committees • Associations • Businesses • Law enforcement agencies • Government ministers/departments
Networks may serve the purpose of:	• Achieving corporate objectives • Accessing the services and resources of other organisations • Promotion of organisation and/or programs • Strategic planning • Encouraging coordination amongst organisations and workers • Enhancing service delivery
Networking needs may be as a result of, or leading to:	• New government policies • New or reviewed strategic plan • New organisations/services starting up • Restructuring of organisation • Enhanced service delivery • Funding imperatives
Strategies to develop effective new networks may include:	• Liaison with relevant government, community, business and other representatives • Participating and managing formal network committees • Negotiating with relevant organisations for network

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define media requirements	1.1. Identify the ***target audience characteristics*** from the advertising brief and prepare a detailed ***consumer profile*** which uses the same terms as those used to describe media audiences 1.2. Analyse ***product market factors*** to determine the reach and frequency requirements of advertising media selected 1.3. Analyse the ***creative requirements*** of the advertising message and determine the media implications 1.4. Identify media ***merchandising requirements*** from the advertising brief 1.5. Confirm the media budget and identify ***legal and voluntary constraints***
2. Select media vehicles	2.1. Weigh up the relative merits of identified ***media vehicle*** alternatives taking past media performance into account 2.2. Evaluate and test new or alternative ***media vehicles*** with other advertisers and against proven vehicles 2.3. Select ***media vehicles*** that target the required audience, meet ***media requirements*** and fulfil merchandising requirements within budget 2.4. Select ***media vehicles*** that meet the creative, reach and frequency requirements of the advertising message to be achieved within the budget

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5. Ensure selected ***media vehicles*** meet legal and ethical requirements
3. Determine the media schedule	3.1. Ensure the duration and ***timing*** of the media schedule meet the requirements of the advertising brief 3.2. Determine the ***distribution*** of messages over the duration of the schedule to meet the requirements of the advertising brief 3.3. Create a ***media schedule*** to the satisfaction of the advertiser 3.4. Develop alternative media schedules for the advertiser within the budget 3.5. Determine testing schedule for the media plan and continually modify media plan in accordance with results obtained
4. Produce a media plan	4.1. Create a media plan which defines the media requirements of the advertising brief and provides evidence to support each requirement 4.2. Specify the recommended media and vehicle/s, and the ***rationale*** for their selection in the media plan 4.3. Ensure the media plan contains a ***budget allocation*** per medium per advertising period 4.4. Identify the anticipated impact of the advertising and ***measures to assess its effectiveness*** in the ***media*** plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to consult on the media schedule • evaluation skills to compare and weigh advantages of one medium over another, and to match characteristics with media requirements • literacy skills to interpret the characteristics of different media and to match them to the requirements of the advertising brief.
Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

• data analysis and matching techniques
• legal and ethical requirements relating to the advertising industry
• organisational products and services offered
• organisational budget and resource constraints
• principles and characteristics of advertising media, types of media and advertising strategies
• identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:
  • anti-discrimination legislation
  • consumer protection laws
  • copyright legislation
• ethical principles
• fair trading laws
  • privacy laws
  • Trades Practices Act
• terms for describing media audiences.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential:
	• production of a media plan for an advertising campaign for at least one product or service which:
	  • defines the media requirements of the advertising brief
	  • specifies rationales for media vehicles chosen
	  • contains budgetary allocation for each advertising medium
	• measures to assess effectiveness of media vehicles selected.

Context of and specific resources for	Assessment must ensure:

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
assessment	• access to an actual workplace or simulated environment • access to office equipment and resources • access to the advertising brief.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of documented media plans • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations of media plans • oral or written questioning to assess budget knowledge • review of media schedule.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBADV511A Evaluate and recommend advertising media options.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Target audience characteristics may include:	• analysis of current customers • attitudes • cultural factors • demographics • duplication or presence on customer and outside lists

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• existing product usage • geographics • lifestyle • psychographics • social factors • values

Consumer profile may include:	• behaviouristic information such as:
	  • benefits sought by buyer
	  • loyalty status
	  • readiness stage
	  • user status
	• combinations of geographic, demographic and psychographic information often including data on media consumption and retail outlet usage overlaid
	• demographic information such as:
	  • age
	  • education
	  • gender
	  • income
	  • marital status
	  • number of children
	  • nationality
	  • occupation
	  • statistical descriptions
	• geographic information such as:
	  • Census Collector District (CCD)
	  • census information
	  • home address
	  • nation of residence
	  • postcode
	  • state or territory of residence
	  • work address
	• psychographic information such as:
	  • activities
	  • attitudes
	  • interests
	  • lifestyle
	  • opinions

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• values

Product market factors may include:	• whether a product or service:
	  • is convenient
	  • is differentiated or undifferentiated
	  • is established
	  • is frequently or infrequently purchased
	  • is highly competitive
	  • is new
	  • has a high or low level of audience involvement
	• whether the message characteristics are:
	  • ongoing
	  • simple
	  • unique

Creative requirements may include:	• action • cluttered or uncluttered medium • colour • electronic or physical form • fast production time • intrusive medium • local, national or international medium • longer and more profitable space requirements • longer and more profitable time requirements • paper stock • pictures or illustrations • prestigious medium • printing requirements • production technique costs • response forms • sound • words only
Merchandising requirements may include:	• association with a particular media vehicle to give the perception of safety and value • identification with a particular local community • number of required responses

Legal and voluntary constraints may include:	• codes of practice such as those issued by:
	  • Advertising Federation of Australia
	  • Australian Communications and Media

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	Authority • Australian Competition and Consumer Commission • Australian Performing Right Association • Commercial Radio Australia • Free TV Australia • cultural expectations and influences • ethical principles • legislation, including occupational health and safety legislation • policies and guidelines • regulations • social responsibilities such as protection of children, environmental issues • societal expectations
Media vehicles may include:	• aerial advertising • billboards • cable and satellite television • cinema • direct mail • direct response • exhibitions and trade fairs • internet • point-of-sale • radio • sales literature • sales promotion • sponsorship • television • the press • video • video games • videotext
Media requirements may include:	• number of target audience reached • required number of responses, including: • current customer base versus expected attrition and growth target • conversion factor for multi step offers/campaigns • required cost per response

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Timing may include:	• continuous advertising throughout the year • pre-launch advertising • pre-sale advertising • seasonal advertising
Distribution may include:	• advertisements evenly spread over the time schedule • advertisements in waves, with heavy advertising followed by light or no advertising • generation of a budgeted number of responses at no more than the budgeted cost per response
Media schedule includes:	• number of advertisements • placement of advertisements • size/length of advertisements
Rationale may include:	• dissimilarity to any proven media and/or media vehicle, but worth a controlled test based on similarity between media/vehicle audience and organisational customer base • proven ability to reach target audience in the past • proven ability to generate profitable responses in the past • similarity to proven media vehicle/s • similarity between media vehicle/s, audience and organisational target audience or customer base
Budget allocation may include:	• allocation of online budget based on maximum cost for pay per click • allocation per medium based on number of times media and/or media vehicle can be used within the period while maintaining the budgeted average cost per response • budgeted number of responses required for the period • maximum daily budget
Measures to asses its effectiveness may include:	• attitude measurements • awareness measurements • cost per response • gross profit per contact • inquiry measurements • market tests • media audience measurements

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• number of responses • opinion measurements • physiological measurements • readership measurements • recall measurements • sales measurements • split cable tests • split-run tests • tests of different creative executions • tests of different direct marketing offers • tests of different media vehicles • theatre tests

TDMMH807B PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required of a Master 5 or Skipper 3 to plan and navigate a vessel of less than 24 metres in length within offshore limits (200 nm) and determine the vessel's position. This includes the use of coastal navigational charts to plan and conduct the passage and the application of coastal navigational techniques involving a range of instrumentation and navigational aids.** **This unit has been retitled but covers the same functions as previous unit TDMMH801A*Plan and navigate an inshore passage*.**

Application of the Unit

Application of the unit	The unit has applications in the qualification for a Master 5/Skipper 3 as per relevant sections of Part D of the National Standard for Commercial Vessels (NSCV), i.e. Certificate III in Transport&Distribution (Coastal Maritime Operations - Master 5).

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant sections of State and Territory maritime regulations and NSCV/USL Code for a Master 5/Skipper 3.

© Commonwealth of Australia, 2025 Public Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
.	.
1 Use and care for navigational charts, nautical publicationsand related documentation	a Navigational charts, nautical publications and related documentation are handled and used in ways that ensure continued availability, utility and length of life b Navigational charts, nautical publications, notices to mariners and related documentation are correctly used for voyage planning and identification of navigational hazards in accordance with established procedures
2 Plan route for offshore voyage	a Navigational hazards relevant to a proposed offshore voyage are identified using relevant navigational charts, nautical publications and related documentation b The route for an offshore voyage is determined as per operational instructions and navigational principles and taking due account of identified navigational hazards c Critical points along the proposed route of the voyage are identified and recorded d Appropriate actions to deal with the identified critical points

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	are developed e Potential navigational contingencies and problems that may occur along the planned offshore route are identified and appropriate strategies for dealing with them are developed and recorded

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

ELEMENT	PERFORMANCE CRITERIA
3 Conductan offshore passage	a Forecasts and interpretation of sea and weather conditions are accurate and appropriate to the planned offshore passage of the small vessel b Meteorological information and observations of sea and weather conditions are correctly interpreted and applied to decisions on the vessel's speed and direction c Information from navigation systems is interpreted and applied to identify navigational hazards and to fix the small vessel's position and to enable decisions to be made concerning the vessel's speed and direction d The selection of the mode of steering is the most appropriate for the prevailing weather, sea and traffic conditions and intended manoeuvres e Required alterations to the small vessel's course or speed are made taking into account prevailing weather and sea conditions, the proximity and course of other vessels, relevant navigational hazards, buoyage, signage and overall passage plan requirements f Alterations to the small vessel's course and speed are appropriate to prevailing circumstances and conditions, comply with relevant maritime regulations and do not put at risk the safety of the small vessel or its passengers and crew or that of other vessels, passengers or crew

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	g Signals relevant for navigational manoeuvres are made at the appropriate time in accordance with Australian and international regulations h Operational limits of vessel propulsion, steering, power systems and overall trim and stability are not exceeded during navigational manoeuvres
4 Fix small vessel's position within a limited area	a Primary position fixing method is selected in accordance with navigational principles and prevailing conditions b Position is fixed using the selected method and information derived from relevant navigational systems c Checks are made for random, instrument, system and data errors and appropriate corrections and allowances are made to derived courses and bearings d Time interval between fixes is appropriate to the prevailing navigational conditions e Verification of primary position fixing is regularly carried out using appropriate methods f Performance checks and tests of navigation position fixing instruments and systems are carried out in accordance with company procedures and manufacturer's instructions

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

ELEMENT	PERFORMANCE CRITERIA
4 Fix small vessel's position within a limited area (**continued**)	g Position of small vessel is recorded in accordance with regulations and established procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
5 Document and report planned route and passage	a Planned route for a small vessel's offshore voyage is recorded and reported in accordance with procedures and regulations b Plans and strategies for dealing with critical situations and contingencies along the route of an offshore voyage are recorded c Details of an offshore passage, including navigational incidents and related action taken are recorded in the vessel's log in accordance with relevant maritime regulations

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

Required Skills and Knowledge

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use verbal communication skills required when planning and navigating a passage within limits of responsibility of a Master 5 or Skipper 3

2 Read and interpret charts and other published information relevant to planning and navigating a passage within limits of responsibility of a Master 5 or Skipper 3

3 Read and interpret instrument and equipment readings and indications relevant to planning and navigating a passage within limits of responsibility of a Master 5 or Skipper 3

4 Complete any required operational records

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS

6 Work safely and collaboratively with others when planning and navigating a passage

7 Select and use relevant equipment required when planning and navigating a passage as per standard operating procedures

8 Recognise faulty equipment and take appropriate action as per operating instructions

9 Recognise problems that may be experienced when planning and navigating a passage and take appropriate action

10 Adapt to differences in vessels, and equipment and related standard operating procedures

11 Planning and navigating a passage for a vessel of less than 24 metres

16 Correct a magnetic compass direction/reading for variation and deviation

17 Correct a gyro compass direction for gyro errors

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant sections of State and Territory regulations, NSCV and USL Code dealing with responsibilities of a Master 5 or Skipper 3

2 Principles and procedures of navigation and passage planning, including contingency planning (within the limits of responsibility of a Master 5 or Skipper 3

3 Information required to develop an effective passage plan

4 Procedures for storing and handling navigational charts, nautical publications and related documentation in serviceable condition

5 Principles and procedures for fixing a small vessel's position

6 Procedures for converting one set of coordinates to another

7 Procedures for the calculation of the height of tide for a given time at any place listed using tide tables

8 Errors in common position fixing systems and their effect on observed positions

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

9 Methods for controlling small vessel speed and direction

10 Typical manoeuvring and engine characteristics for small vessels up to 24 m in length, including stopping distances and turning circles at various draughts, speeds and loading

11 Effects on vessel handling of wind, currents and bottom topography

12 Voyage planning and position fixing problems that may be experienced for small vessels on offshore voyages and appropriate action and solutions

13 Small vessel reporting systems

14 Parallel indexing techniques

15 Electronic chart system and errors and procedures for their correct use

Evidence Guide

Evidence Guide

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Plan the offshore passage of a small vessel up to 24 metres in length b Fix the position of a small vessel within offshore waters using all acceptable methods c Identify navigational hazards and make due allowance for them when planning an offshore voyage d Conduct the passage of a small vessel up to 24 metres in length on an offshore voyage, taking into account all relevant

© Commonwealth of Australia, 2025 Public Skills Australia

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

	navigational hazards e Access, use and maintain coastal navigational charts, nautical publications and related documentation f Communicate effectively with others when planning an offshore voyage and conducting navigation g Follow reporting procedures in accordance with the relevant maritime regulations
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 planning and conducting an offshore passage 2 identifying and evaluating navigation problems and determining appropriate navigational solutions 3 interpreting and applying information derived from navigational equipment and systems 4 applying required precautions relevant to coastal voyage planning and navigation 5 fixing the position of the small vessel in an offshore area c Shows evidence of application of relevant workplace and regulatory procedures, including: 1 relevant maritime regulations 2 reporting requirements for small vessels 3 job procedures and navigational instructions 4 use of relevant nautical publications and charts

Evidence Guide (**continued**)

© Commonwealth of Australia, 2025 Public Skills Australia

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

2 Evidence required for demonstration of consistent performance **(continued)**	5 procedures for the storage and maintenance of nautical publications and charts d Action is taken promptly to report and/or rectify navigational errors and contingencies e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among crew and others
3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a plan a simulated offshore passage and conduct navigation using an appropriate marine simulator in simulated coastal areas and across an appropriate range of navigational hazards; and/or

© Commonwealth of Australia, 2025 Public Skills Australia

b	assist in the planning and conduct of an actual offshore passage for a small commercial vessel up to 24 m in length

Range Statement

Range Statement

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with the relevant sections of State and Territory marine regulations, NSCV and USL Code
b. Work is performed:	1 within defined operational procedures, with responsibility for own outputs and limited responsibility for others
c. Work involves:	1 the application of nautical principles to the planning and conduct of an offshore passage and the fixing of a small vessel's position across a range of predictable offshore contexts
2. WORKSITE ENVIRONMENT	
a Vessel may include:	1 any commercial vessel up to 24 metres in length operating within offshore limits

© Commonwealth of Australia, 2025 Public Skills Australia

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

b Voyages to be planned and conducted may include:	1 any voyage within offshore limits navigable by the size and type of small vessel concerned 2 passages through: i traffic separation schemes in offshore areas ii tidal restricted areas iii VTS controlled areas iv marine parks
c Navigation may occur in conditions of:	1 *clear visibility using visual navigational techniques* 2 *restricted visibility* 3 clear visibility using a combination of visual and electronic techniques

Range Statement (**continued**)

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

VARIABLE	SCOPE
d Instrumentation and equipment used for navigation and fixing a small vessel's position may include:	1 radar 2 GPS satellite navigation systems 3 integrated navigation systems and electronic chart systems 4 magnetic compasses 5 gyro compasses and repeaters 6 chronometers and sextants

© Commonwealth of Australia, 2025 Public Skills Australia

VARIABLE	SCOPE
	7 azimuth mirrors and vanes 8 pelorus 9 doppler and electromagnetic logs 10 depth sounders
e The use of navigational aids to assist safe navigation may include:	1 avoidance of collision with another vessel 2 fixing the position of the vessel 3 tracking of other vessels 4 assistance in making of command navigational decisions 5 navigating during search and rescue operations
f Position fixing techniques may include:	1 visual bearings of landmarks, coastal features and all aids to navigation such as lighthouses, beacons and buoys 2 dead reckoning, taking into account winds, tides, currents and estimated speed 3 radar fixes 4 using parallel indexing 5 electronic navigational systems
g Documentation and records may include:	1 relevant sections of State and Territory marine regulations, NSCV/USL Code 2 operational orders 3 navigational charts of offshore waters 4 annual and weekly notices to mariners 5 navigational warning records 6 small vessel's log

© Commonwealth of Australia, 2025 Public Skills Australia

VARIABLE	SCOPE
	7 small vessel manufacturer's instructions and recommended procedures 8 instructions of relevant maritime authorities

Range Statement (**continued**)

TDMMH807A PLAN AND NAVIGATE AN OFFSHORE PASSAGE WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

VARIABLE	SCOPE
h Applicable legislation, regulations and codes may include:	1 relevant sections of State and Territory marine regulations, NSCV/USL Code 2 regulations for preventing collisions at sea 3 SOLAS Convention and STCW Code 4 relevant international, Commonwealth, State and Territory OH&S legislation 5 Guidelines and criteria for vessel reporting systems

Unit Descriptor

Unit Descriptor This unit covers designing, generating and producing information to meet user requirements.

Application of the Unit

Application of the Unit This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify presentation requirements**	1.1. Presentation requirements are determined in consultation with end user. 1.2. Extent, content and intended use of output are considered in recommending presentation format and medium.
2. **Format and present data**	2.1. Relevant data elements are assembled. 2.2. Procedures are designed for formatting data into compatible format. 2.3. Data formats are selected to meet customer requirements. 2.4. Information is presented to meet user requirements using suitable media in an attractive, informative and useable manner. 2.5. Information is presented in line with appropriate Australian standards.
3. **Ensure customer satisfaction**	3.1. Work is completed in line with council quality requirements . 3.2. Feedback is sought from customer regarding satisfaction with information and presentation. 3.3. Any areas of dissatisfaction are resolved in line with council policies and procedures. 3.4. Customer feedback is analysed and used as a quality improvement tool.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- layout and design
- attention to detail
- consultation and negotiation with customers.

Required Knowledge

- display principles including colour, composition, layout, text and line style, appropriate scale, media, font types and sizes, legends and projectives
- use of software and hardware such as GIS, CAD, desktop publishing, desktop mapping, multimedia, graphic animation, plotters, printers and terminals
- Australian standards: drawing
- council policies relevant to information presentation.

Hidden text

Evidence Guide

EVIDENCE GUIDE

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	Customer requirements are met. Presentation is in line with Australian standards.
Context of assessment	On the job or in a simulated work environment.
Relationship to other units(prerequisite or co-requisite units)	Prerequisite units: nil. Co-requisite units: nil.
Method of assessment	The following assessment methods are suggested:

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation third-party reports from experienced practitioners completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to a workplace or simulated case study that provides resources, including: • relevant software and hardware such as GIS, CAD, desktop publishing, desktop mapping, spreadsheets, word processing, multimedia, graphic animation, plotters, printers and terminals.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Output formats may include:	• hard copy • digital graphic output • spreadsheets • databases • word processing documents • maps • sticky labels • desktop published documents.
Quality requirements may include:	• percentage rework • allowable time frame durations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide initial and ongoing information and advice on training and assessment services	1.1. Provide potential learners with relevant information about the range of training and assessment services provided by the training and/or assessment organisation 1.2. Explain specific program content and assessment requirements to learners in a clear and concise manner 1.3. Confirm ***training schedule*** with ***relevant personnel*** and disseminate to learners 1.4. Access, provide and explain relevant organisational policies and procedures relating to training and/or assessment services to learners according to ***organisational and legal requirements***
2. Complete training and assessment records	2.1. Collect, verify and record personal learner information on learner ***records management system*** 2.2. Collect, verify and record ***details of the specific learning strategy and learning program*** on the learner records management system 2.3. Confirm and record relevant ***additional requirements*** 2.4. Confirm and record learner progress and assessment outcomes in a timely manner

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5. Organise ***certification processes*** according to national reporting requirements, where appropriate 2.6. Address ***custody and management requirements*** of training and/or assessment information and records
3. Complete reporting requirements	3.1. Complete and forward final results to appropriate personnel for signature, using ***systems to support reporting*** 3.2. Finalise, check and provide data for national reporting purposes to appropriate personnel for signature 3.3. Identify, document and address ***issues and irregularities*** in recording and reporting activities in a timely and effective manner 3.4. Refer issues and irregularities outside area of responsibility or expertise to appropriate personnel for resolution, if relevant 3.5. Finalise certification arrangements, send to learners and store copies according to organisational and legal requirements, where appropriate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- language and literacy skills to:
  - elicit appropriate and critical information from learners in order to complete recording requirements
  - prepare national and state or territory reporting information
  - liaise with personnel, including managers and supervisors, from the training and/or assessment organisation
  - liaise with appropriate external authorities
  - analyse a wide range of documents
- self-management and organisational skills relating to planning, and meeting deadlines and organisational and regulatory requirements

Required knowledge

- organisational policies and procedures relating to records and reporting procedures,

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

and disseminating information to learners
• established training and assessment information systems
• training and assessment services provided by the organisation
• requirements for collecting, recording and reporting vocational education and training information
• Australian Quality Training Framework and AVETMISS requirements, covering:
  • records management
  • reporting requirements
• relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation, for example:
  • copyright and privacy laws in terms of electronic technology
  • security of information
  • recording information and confidentiality requirements
• OHS responsibilities associated with maintaining training and/or assessment information requirements

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • provide initial and ongoing advice on training and/or assessment services, programs and specific information requirements to a range of learners • manage records relating to a range of learners • organise certification processes for a range of learners • complete AVETMISS and in-house reporting documentation for a learning program, covering a range of learners.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: • range of electronic equipment and/or resources for recording and reporting requirements • supervisors or appropriate personnel.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Training schedule may include:	• program start dates and end dates • what areas training will address • dates and times when training is scheduled • venue where training will take place • trainers, facilitators and assessors responsible for delivery and assessment.
Relevant personnel may include:	• trainers, facilitators and assessors • program coordinators • supervisors and managers • personnel responsible for analysing statistics and data to ensure the training and/or assessment organisation complies with relevant standards across all operations and training and/or assessment activities • users of training information, such as finance personnel, human resource personnel, and employers • contract managers

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• union and employee representatives.

Organisational and legal requirements may include:	• registration requirements, as defined in the AQTF Standards for Registered Training Organisations
	• state or territory legislation and regulations governing registration and accreditation
	• requirements of endorsed training packages
	• requirements set by commonwealth and state or territory legislation relating to:
	  • OHS
	  • anti-discrimination
	  • workplace and industrial relations
	  • workers' compensation.

Records management system provides:	• administrative tool to manage learner progress from enrolment to completion.
Details of specific learning strategy and learning program may include:	• training and/or assessment organisation details and training and assessment location • program of training, unit of competency or module • learner information, such as enrolment form details • enrolment, including start date, end date and outcome/results • qualification completed • internal or local learning program coding.
Additional requirements may include:	• fees to be paid • payment scheduling • legal and contractual agreements • training contract information.

Certification processes may include:	• using correct certification form
	• entering critical details, for example:
	  • name of learner
	  • name of learning program successfully completed
	  • assessment result
	• processes relating to qualification, Statement of Attainment or internal organisational award, such as:
	  • dating and signing
	  • forwarding to learner
	  • sending copy to relevant authority
	  • storing copy according to organisational and legal requirements.

Custody and	• secure physical and electronic storage of training and

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
management requirements may include:	assessment records and information • authorised access to training and assessment records and information • secure disposal or return of training and assessment records and information.
Systems to support reporting may include:	• electronic student management system that complies with Student Statistical Collection Guidelines • internal organisational recording and reporting systems • arrangements for issuing qualifications or Statements of Attainment • arrangements for recognising and recording current competencies • record-keeping policies and procedures.
Issues and irregularities may include:	• inaccuracies or inconsistencies • lost information and records • not meeting timelines for reporting • OHS issues.

TAEDES401A Design and develop learning programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine the design, outline the content and review its effectiveness.

Application of the Unit

Application of the unit	This unit typically applies to a trainer or facilitator who designs or develops learning programs. A learning program can be discrete, providing a planned learning approach that relates to specific learning and training needs, or it may form part of the learning design for a qualification.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define parameters of the learning program	1.1. Clarify ***purpose*** and type of learning program with key stakeholders 1.2. Access and confirm the competency standards and ***other training specifications*** on which to base the learning program 1.3. Identify language, literacy and numeracy requirements of the program 1.4. Identify and consider characteristics of the target learner group
2. Work within the vocational education and training (VET) policy framework	2.1. Access relevant ***VET policies*** and frameworks, and apply to work practices 2.2. Identify changes to training packages and accredited courses and apply these to program development 2.3. Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1. Research, develop and document specific subject matter content according to agreed design options 3.2. Evaluate existing learning resources for content relevance and quality 3.3. Specify assessment requirements of the learning program

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Design structure of the learning program	4.1. Break the learning content into manageable segments and document timeframe for each segment 4.2. Determine and confirm ***delivery strategies*** and required assessment methods and tools 4.3. Document complete learning program in line with organisational requirements 4.4. Review complete program with key stakeholders and adjust as required 4.5. Ensure a safe learning progression by analysing risks in the learning environment and including a risk control plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- organisational skills to ensure resources are available and suitable
- evaluation skills to determine the time required for each learning segment and the overall timelines of the learning program
- cognitive skills to develop the learning program content and design its structure
- language and literacy skills to read and interpret a range of documentation, including technical and subject matter documents, references and texts

Required knowledge

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- distinction and relationship between a training package/accredited course, learning strategy and learning program, where linked
- different purposes and focus of learning programs
- sound knowledge of learning principles
- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
and pre-developed learning activities • methodology relating to developing and documenting new learning activities and related learning materials • different delivery modes and methods • relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the VET sector • relevant OHS knowledge relating to the work role, and OHS considerations that need to be included in the learning program

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• design, develop and review learning programs within the VET context
	• prepare and develop a minimum of two learning programs:
	  • that contain differentiated learning program designs to reflect particular needs, contexts and timelines
	  • at least one of which must be based on competency standards or accredited courses and must cover at least one entire unit of competency or accredited course module.

Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment

EVIDENCE GUIDE	
assessment	units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Purpose may include:	• developing vocational competency or vocational skills • developing language, literacy and numeracy skills • developing general education • meeting legislative, licensing and registration requirements, such as OHS requirements.
Other training specifications may include:	• curriculum specifications • product specifications • organisational work requirements and training needs • induction needs • language, literacy and numeracy development needs • regulatory and licensing requirements.
Vocational education and training policies may include:	• policies and procedures set by national organisations, such as the National Quality Council • Australian Quality Training Framework • other relevant policies.

Delivery strategies may include:	• focus of delivery in terms of size and type of group
	• context of delivery, for example:
	  • in the workplace
	  • in a training room
	  • in a community setting
	• mode of delivery, for example:
	  • face-to-face
	  • online
	  • blended delivery mode
	• delivery methods, for example:

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• lock-step, learner-paced and mixed • interactive, participative and collaborative • blended delivery methods.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for distance-based learning	1.1. Access, read and interpret ***learning strategy*** and ***learning program*** to determine learning objectives and outcomes to be met 1.2. Develop knowledge of group, individual learner styles and learner characteristics to support effective planning for distance-based learning 1.3. Select and evaluate learning resources for appropriateness, and ***contextualise*** them for distance-based learning where required 1.4. Develop ***distance delivery-management plan***, using knowledge of learning principles and research to date 1.5. Identify and organise ***support mechanisms*** and means of communicating with learners
2. Manage distance-based learners	2.1. Confirm expectations and requirements through ***direct contact*** and clarify any issues or questions 2.2. Establish distance-based learning relationships between trainer/facilitator and learners 2.3. Progressively distribute learning resources and learning materials according to plan and learner needs
3. Monitor learner progress	3.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 3.2. Develop and implement strategies to address learner difficulties and techniques for maintaining motivation and commitment 3.3. Provide support and guidance outside the formal communication process, where appropriate 3.4. Maintain, store and secure learner records according

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to organisational and legal requirements
4. Review distance-based learning process	4.1. Gather feedback to review own management of the distance-based process 4.2. Analyse feedback to determine success of the distance-based learning in meeting learner needs and expectations 4.3. Reflect on own performance as a coordinator/facilitator and document improvement plans 4.4. Identify and document options for improving the distance-based learning process, and discuss with relevant personnel for future action

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills using different mediums to establish rapport and provide guidance
- initiative and enterprise skills to:
  - contextualise existing resources to suit the distance-based learning method
  - developdelivery-managementplan to reflect delivery method and learner styles
- interpretation skills to interpret and transfer the learning strategy and learning program to distance mode
- organisational skills to manage learners by distance
- problem-solving skills to:
  - offer flexible solutions to suit a range of learner needs
  - resolve disability and support needs
- technology skills to:
  - incorporate different delivery methods into the distance delivery-management plan
  - use a range of technology for direct contact with learners
- time-management skills to coordinate and facilitate a distance-based learning program

Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

• sound knowledge of adult learning principles
• sound knowledge of learner styles
• content and requirements of the learning strategy and learning program to be used in distance delivery
• characteristics and needs of individual distance learners
• use of technology to support distance-based learning
• techniques for maintaining motivation and commitment of distance learners
• availability and types of support mechanisms relevant to distance learners
• relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
• OHS relating to the work role, including:
  • reporting requirements for hazards
  • safe use and maintenance of relevant equipment
  • emergency procedures
  • sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • facilitate distance-based learning • provide evidence of at least two examples of organising and facilitating distance learning, showing that training package units or accredited course curriculum were used as the benchmarks for learning.
Context of and specific	Evidence must be gathered in the workplace wherever possible.

EVIDENCE GUIDE	
resources for assessment	Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Learning strategy may include:	• documented framework to guide and structure learning requirements and teaching/delivery and assessment arrangements.
Learning program may include:	• documented guide to support a cohesive and integrated learning process for the learner.
Contextualised may include:	• modify examples, case studies, activities and templates with industry/enterprise context-specific information, to be more relevant to learners.
Distance delivery-management plan may include:	• learning outcomes • sequence, packaging, timing and distribution requirements of specific learning resources and learning materials • timelines for completing learning outcomes and learning activities • formative assessment requirements • expectations of the learner • instructions to the learner • list of other learners.
Support mechanisms may include:	• contact numbers for help or guidance • email or phone tutoring • workplace mentoring by supervisors or managers

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• learning partners • contact numbers of other learners • equipment needs • disability and support needs.
Direct contact may include:	• telephone • face-to-face • video conference.

TAEDEL401A Plan, organise and deliver group-based learning

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to plan, organise and deliver training for individuals within a group.

Application of the Unit

Application of the unit	This unit typically applies to a person working as an entry-level trainer, teacher or facilitator in or with a training and assessment organisation. The person will be working from a learning program developed by someone else, and structuring the learning around that program.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret learning environment and delivery requirements	1.1. Access, read and interpret ***learning program documentation*** to determine delivery requirements 1.2. Use available information and documentation to identify group and individual learner needs and learner characteristics 1.3. Identify and assess constraints and risks to delivery 1.4. Confirm personal role and responsibilities in planning and delivering training with relevant personnel
2. Prepare session plans	2.1. Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2. Develop ***session plans*** and document these for each segment of the learning program 2.3. Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1. Contextualise existing learning materials to meet the needs of the specific learner group 3.2. Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3. Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1. Conduct each session according to session plan, modified where appropriate to meet learner needs 4.2. Use the diversity of the group as another resource to

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	support learning 4.3. Employ a range of delivery methods as training aids to optimise learner experiences 4.4. Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 5.2. Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3. Manage ***inappropriate behaviour*** to ensure learning can take place 5.4. Maintain and store learner records according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- presentation skills to ensure delivery is engaging and relevant, including:
  - synthesising information and ideas
  - preparing equipment, such as data projectors and computer presentation applications
  - speaking with appropriate tone and pitch
  - using language appropriate to audience
  - encouraging and dealing appropriately with questions
- group facilitation skills to ensure that:
  - every individual has an opportunity for participation and input
  - group cohesion is maintained
  - behaviour that puts others at risk is observed, interpreted and addressed
  - discussion and group interaction are enhanced
- conflict resolution and negotiation skills to:
  - identify critical points, issues, concerns and problems
  - identify options for changing behaviours
- oral communication and language skills to:

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• motivate learners to transfer skills and knowledge • engage with the learner • interpersonal skills to maintain appropriate relationships and ensure inclusivity • observation skills to monitor individual and group progress
Required knowledge

• introductory knowledge of learning theories
• sound knowledge of learning principles
• sound knowledge of learner styles
• industry area and subject matter of the delivery
• learner group profile, including characteristics and needs of individual learners in the group
• content and requirements of the learning program and/or delivery plan
• different delivery methods and techniques appropriate to face-to-face group delivery
• techniques for the recognition and resolution of inappropriate behaviours
• behaviours in learners that may indicate learner difficulties
• organisational record-management systems and reporting requirements
• evaluation and revision techniques
• specific resources, equipment and support services available for learners with special needs
• relevant policy, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
• OHS relating to the facilitation of group-based learning, including:
  • assessment and risk control measures
  • reporting requirements for hazards
  • safe use and maintenance of relevant equipment
  • emergency procedures
  • sources of OHS information
  • role of key workplace persons
• policies and procedures relevant to the learning environment

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• facilitate group-based learning by preparing and delivering a series of training sessions, including:
	  • at least two consecutive sessions, of a duration commensurate with a substantive training session (e.g. 40-60 minutes), that follow one of the learning program designs
	  • at least one session delivered to a different learner group, with evidence of how the characteristics and needs of this group were addressed
	• identify and respond to diversity and individual needs
	• access and use documented resources and support personnel to guide inclusive practices.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Learning program documentation may include:	• competencies or other benchmarks to be achieved
	• for each chunk or segment of the learning program:
	  • specific learning outcomes derived from the benchmarks
	  • overview of content to be covered
	  • learning resources, learning materials and activities
	  • delivery methods
	• number and duration of training sessions or classes required, and overall timelines
	• OHS issues to be addressed in delivery
	• identification of assessment points to measure learner progress
	• assessment methods and tools to be used to collect evidence of competency, where assessment is required.

Session plans may include:	• outline of objectives and content to be addressed • plan of delivery methods and learning activities to be used within the session • timelines and duration for each learning activity • formative assessment points and opportunities • learning materials required.
Inappropriate behaviour may include:	• violent or inappropriate language • verbal or physical abuse or bullying • insensitive verbal or physical behaviour towards other learners or the trainer/facilitator, including cultural, racial, disability or gender-based insensitivities • dominant or overbearing behaviour • disruptive behaviour • non-compliance with safety instructions.

BSBWOR403A Manage stress in the workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to manage own stress and the stress of others stress in a team environment. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to the understanding and management of own stress and team stress in the workplace. Competence in this unit requires managing own stress and managing the stress within a team by using effective strategies and initiatives to reduce stress and to improve the resilience of staff to withstand the stresses associated with a customer contact environment. This will require application of sound occupational health and safety (OHS) management in accordance with legislation and organisational policies and guidelines. This role is undertaken by staff with managerial responsibility.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Develop and implement personal stress management strategy	1.1. Recognise ***signs and sources of stress*** 1.2. Use appropriate techniques to manage own stress 1.3. Maintain personal stamina and resilience 1.4. Maintain personal work/life balance 1.5. Become a role model in managing stress and time
2. Develop stress management strategies and techniques within a team	2.1. Analyse and understand potential ***sources of fatigue*** and stress in the work environment 2.2. Develop an understanding of a range of ***stress management techniques*** within a team 2.3. Develop techniques to support the achievement of ***key performance indicators*** (***KPIs***) ***and priorities*** 2.4. Encourage team members to support each other in managing stress 2.5. Adopt strategies to effectively reduce, manage and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	deal with stress within a team 2.6. Adopt ***stamina management strategies*** to maximise performance 2.7. Develop techniques to assist team members to recover effectively from a ***stressful or difficult situation***
3. Implement stress management techniques within a team	3.1. Adopt work routine and procedural strategies to minimise stress and fatigue within a team 3.2. Use appropriate ***time management tools and techniques*** 3.3. Develop individual/group training and development program as required 3.4. Use team meetings and other opportunities to discuss stress management techniques and to coach staff in using these techniques 3.5. Regularly evaluate tools, techniques and strategies 3.6. Develop team awareness of sources of internal and external support
4. Develop team and morale building strategies	4.1. Develop a strategy to engage and develop team members 4.2. Develop a communication strategy within a team 4.3. Manage and use team meetings effectively 4.4. Develop a supportive and responsive team environment 4.5. Delegate effectively to further empower and motivate team members
5. Monitor and address stress levels within a team	5.1. Monitor individual staff performance against performance requirements 5.2. Conduct regular staff reviews to identify variations and difficulties impacting on work requirements 5.3. Monitor and support team members when in stressful situations 5.4. Respond appropriately to behavioural signs of stress among team members 5.5. Monitor work/life balance of team members 5.6. Discuss outcomes and develop action plans with team members as appropriate

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• coaching and mentoring skills to give feedback in difficult and tense situations • communication skills to conduct effective formal and informal meetings and to communicate with personnel at all levels of the organisation • communication skills to relate to people from diverse backgrounds and people with diverse abilities • consultation and negotiation skills to establish and implement development plans and actions for team members • interpersonal skills to establish rapport and to build relationships with team members • leadership skills to gain the trust and confidence of colleagues and team members • literacy skills to clearly articulate information, ideas and advice • organisational skills to manage own tasks within timeframes • problem-solving skills to creatively and positively address issues that arise • self-management skills to be an excellent role model for a team • team building skills to ensure cohesion within a team.
Required knowledge
• behavioural management techniques • internal and external sources of assistance • job role priorities and KPIs • OHS principles and requirements • signs and sources of existing and potential stress or difficult situations • stress management and reduction techniques • time management tools and techniques • workplace policies and procedures.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • explanation of signs and sources of stress • explanation of job role priorities and KPIs • ability or strategy to recover from stressful contact • work stamina and implementation of work/life management strategies • knowledge of OHS principles and requirements.
Context of and specific resources for assessment	Assessment must ensure: • access to workplace information and data • access to performance management, development plan and training records • access to relevant legislation, standards and guidelines • access to staff feedback and satisfaction survey records.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral and/or written questioning to assess knowledge of signs and sources of stress, and time management tools and techniques • direct observation of the candidate effectively managing time and work priorities • oral and /or written questioning of the process for the candidate to work through and recover from a stressful situation with a team member during and after the situation • review and analysis of attendance records • review of development plans and feedback for team members • review of minutes of team meetings.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • relevant management units.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Signs of stress may include:	• absence from work • conflict • fatigue • lack of self-esteem and confidence • poor work performance • sickness
Sources of stress may include:	• challenging KPIs and/or priorities • complex tasks • difficult customer contact • external factors • inadequate physical environment • interpersonal relationships
Sources of fatigue may include:	• ergonomic factors • excessive overtime • external issues • overload of information • repetitive tasks and/or contacts • shift rostering and hours of work
Stress management techniques may include:	• debriefing with peers and/or line manager • relaxation methods • specific training • stretching and exercises • taking breaks
Key performance indicators (***KPIs***) ***and priorities*** may include:	• adherence to schedule • average handling time • call rates • customer satisfaction feedback • quality assurance requirements • sales targets • targets
Stamina management strategies	• management of personal wellbeing, for example:

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
may include:	• breaks • hydration • life balance • meals • recognising fatigue • management of the environment, for example: • climate • ergonomics • noise • management of work, for example: • minimising re-working • sequencing tasks
Stressful or difficult situations may include:	• angry customer • changing regulations and legislation • customer abuse • customer complaint • high number of customer contacts • sensitive customer situations • unreliable technology
Time management tools and techniques may include:	• diarising and/or scheduling tasks and time • organising information • prioritising tasks • self-managing training requirements

AHCOHS401A Maintain occupational health and safety (OHS) processes

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers maintaining OHS processes and defines the standard required to: facilitate meetings and document actions to consider OHS issues in the workplace; distribute information concerning OHS processes and requirements to staff; establish procedures to document the identification of hazards and assessment of risk covering the operations of the enterprise; provide staff with OHS training in risk assessment, and other areas nominated by risk controls; put emergency procedures in place and organise for safety drills; maintain health and safety records.

Application of the Unit

Application of the unit	This unit applies to nominated OHS representatives in a workplace.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide information about occupational health and safety	1.1. Relevant provisions of OHS legislation and Codes of Practice are accurately and clearly explained to the work group. 1.2. Information on enterprise OHS policies, procedures and programs is provided in a readily accessible manner, and is accurately and clearly explained to the work group. 1.3. Information about identified hazards and the outcomes of risk assessment and control procedures is regularly provided, and is accurately and clearly explained to the work group.
2. Facilitate the participation of workers in OHS observance and decision-making	2.1. Enterprise procedures for consultation over OHS issues are implemented and monitored to ensure that all members of the work group have the opportunity to contribute. 2.2. Procedures whereby workers report OHS hazards, risks are assessed and action taken to control risks, are clearly described to the work group. 2.3. Issues raised through consultation are dealt with and resolved promptly, or referred to the appropriate personnel for resolution in accordance with workplace procedures for issue resolution. 2.4. The outcomes of consultation over OHS issues are promptly communicated to the work group.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Implement procedures for identifying hazards and assessing and controlling risks	3.1. Existing and potential hazards which are identified are reported so that adequate risk assessment and effective control measures are implemented. 3.2. Work procedures to control OHS risks are implemented by the work group and regular monitoring occurs to ensure ongoing adherence and effectiveness of risk control. 3.3. Inadequacies in existing risk control measures are identified in accordance with the hierarchy of control, and reported to designated personnel/management. 3.4. Inadequacies in allocation of resources to ensure safe work practice are identified and reported to management. 3.5. Existing risk control measures are monitored and results reported regularly in accordance with workplace procedures.
4. Implement workplace procedures for dealing with emergencies and hazardous events	4.1. Workplace procedures for dealing with OHS emergencies are implemented where necessary to ensure that prompt and effective control action is taken. 4.2. OHS emergencies are reported in accordance with established enterprise procedures. 4.3. Control measures to prevent recurrence and minimise risk of emergencies and hazardous events are implemented based on the hierarchy of control, or alternatively, referred to designated personnel for implementation.
5. Implement and monitor enterprise procedures for providing OHS training	5.1. OHS induction and training needs are identified accurately, specifying the gaps between OHS competencies required and those held by the work group. 5.2. Arrangements are made for meeting identified OHS training needs in both on and off-the-job training programs in consultation with relevant parties.
6. Implement and monitor enterprise procedures for maintaining occupational health and safety records	6.1. OHS records for work area are accurately and legibly completed in accordance with workplace requirements for OHS records, and legal requirements for the maintenance of records of occupational hazards, risk control, injury and disease events. 6.2. Aggregate information from OHS records is used to identify hazards and monitor risk control procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	within work area according to enterprise procedures and within scope of responsibilities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• facilitate the participation of workers in OHS observance and decision-making • identify OHS hazards and conduct the risk assessment process • respond to emergencies and OHS issues in an appropriate and timely manner • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• hazards in the workplace • relevant OHS legislation and Codes of Practice • risk control measures • the hierarchy of OHS risk control and its implementation for hazards in land-based industries • communication and engagement strategies with workers • suitable communication techniques • relevant enterprise management systems and procedures • accident/incident investigation • participative work practices.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • facilitate meetings and document actions to consider OHS issues in the workplace • distribute information concerning OHS processes and requirements to staff • establish procedures to document the identification of hazards and assessment of risk covering the operations of the enterprise • provide staff with OHS training in risk assessment, and other areas nominated by risk controls • put emergency procedures in place and organise for safety drills • maintain health and safety records.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
OHS processes may include:	• all OHS processes identified in OHS legislation and regulations and industry Codes of Practice.

AHCPMG602A Develop a plant pest destruction strategy

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers developing a plant pest destruction strategy and specifies the outcomes required to develop a strategy for the destruction of plant pests for the purposes of eradication. The plant pest destruction strategy forms part of the Australian Emergency Plant Pest Response Plan (PLANTPLAN).

Application of the Unit

Application of the unit	This unit applies to personnel who have been appointed or engaged to undertake a role within a plant pest incursion. The unit may also apply to personnel involved with planning responses to emergency animal diseases and aquatic animal diseases.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain and analyse information for inclusion in the plant pest destruction strategy	1.1. Characteristics of plant pest that may determine best method of destruction are identified. 1.2. Characteristics of host plants and/or plant products are identified. 1.3. Possible destruction treatments are identified and estimated costs are obtained.
2. Determine destruction methodology	2.1. Pre-treatments that will limit organism's risk of escape are identified. 2.2. Affected areas, including buffer areas, are identified. 2.3. Occupational health and safety and environmental standards that will apply to all phases of destruction strategy are identified, incorporated into destruction methodology and documented. 2.4. Most cost-effective, safe and effective method of destruction is selected as appropriate for circumstances. 2.5. Contingencies for prevailing weather conditions are developed. 2.6. Instructions for destruction teams are developed, including specific checklists on performance of operations. 2.7. Need for approvals associated with destruction activities is identified and documented. 2.8. Biosecurity issues are identified and contingency plans are prepared.
3. Determine the required resources	3.1. Resources required for implementation of destruction strategy are determined in conjunction

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with technical experts and are documented.
4. Develop communication procedures	4.1. In conjunction with communications manager, procedures and protocols for communicating with contractors, emergency services, property owner/manager, government, media and other stakeholders are developed. 4.2. Plant pest destruction strategy is communicated to appropriate authorities.
5. Determine post-destruction processes	5.1. Review processes to evaluate effectiveness of plant pest destruction treatments are determined. 5.2. Surveillance needed to demonstrate pest-free areas is determined. 5.3. Review processes to evaluate effectiveness of plant pest destruction strategy are determined.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- costing alternative destruction treatments
- developing a budget
- planning biological strategies
- researching and analysing information
- supervising others working in a special purpose team
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• approvals required for such things as burning • communication procedures and protocols • crop destruction methods • equipment needed for plant pest destruction • government processes • group of organisms relevant to strategy being developed • legislation and regulations defining and affecting destruction of plant pests • logistics requirements • rates and methods of application of selected biocides • relevant guidelines, including PLANTPLAN.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

Critical aspects for assessment and evidence required to demonstrate competency in this unit	The critical requirements for this unit of competency as a whole are listed below:
	• assessment must confirm one's ability to:
	  • plan pre-treatment, destruction and site clean-up
	  • communicate plans to destruction teams, contractors and emergency services.

Context of and specific resources for assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to develop a plant pest destruction strategy. The candidate must also have access to a functioning control centre, or a control centre established for a plant pest response simulation exercise.
Method of assessment	Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in a real or simulated plant pest incursion

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	response.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. The skills and knowledge required to develop a plant pest destruction strategy must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work within urban, farming, forestry and natural environments.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	

Characteristics of plant pest to be analysed may include:	• likely efficacy of treatment considering the susceptibility of pest and life form of organism, such as resistant spore forms in soil
	• means of organism dispersal, escape points and associated risks
	• position of pest in/on host organism:
	  • on or inside plants:
	  • leaves
	  • stems
	  • fruit
	  • seeds
	  • roots
	  • tuber bulbs
	  • in the soil:
	• risks of survival post-treatment.

Characteristics of host plants and/or plant products to be analysed may include:	• analysis of morphological characteristics such as:
	  • cellulose or lignified
	  • perennial or annual

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• size • extent of root system • presence of fruits or other materials that may be difficult to treat by usual destruction methods • identity, area, location and other important characteristics of host plants/plant products such as ownership.
Pre-treatments may include:	• application of pesticides to close down escape routes of organism, such as: • spores • winged insects.
Approvals may be required for activities such as:	• burial and/or disposal of affected plants and plant products • chemical use • destruction of vegetation on public land • environmental approvals • excessive noise • fires.
Resources required for plant pest destruction treatments may include:	• contractors • destruction teams • emergency services to control site access • equipment for affected host organism removal and transportation • equipment for site clean-up • equipment for application of treatments and biocides.
Communication strategies with stakeholders may involve a range of methods such as:	• liaison with technical experts • reporting to appropriate authorities • reporting to media.
Appropriate authorities may include:	• chief plant health manager • consultative committee on emergency plant pests • planning manager • survey manager.
Review of effectiveness of plant pest destruction treatments may involve:	• checks of biosecurity of routes for off-site disposal of affected material • integrity of disposal and burial areas • site inspection for signs of infected material and unacceptable debris.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Review of effectiveness of plant pest destruction strategy may need to consider:	• best timing for review • checks required on possible points of weakness of destruction program • detailed analysis of effectiveness • resources required for review.

AHCPMG601A Develop a plant pest survey strategy

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers developing a plant pest survey strategy and specifies the outcomes required to develop a strategy for plant pest surveys. It specifies elements for determining the presence, distribution and/or prevalence of a plant pest or for confirming that the pest is not detectable. This work may be conducted as part of an emergency response to an incursion or as part of routine surveillance, and will be conducted in line with established standards and protocols.

Application of the Unit

Application of the unit	This unit applies to personnel who have been appointed or engaged to undertake a role within a plant pest incursion. This unit may also apply to personnel involved with planning responses to emergency animal diseases and aquatic animal diseases.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain and analyse biological information for survey design	1.1. Biological and dispersal characteristics of pest are identified. 1.2. Impact of climate on reproduction rate and predicted distribution of pest are determined. 1.3. Geographical distribution of the host(s) is identified. 1.4. Information is analysed to determine priority areas to be surveyed.
2. Develop survey methodology	2.1. Particular type of survey to be designed is determined according to phase of incursion. 2.2. Appropriate biometric design that will satisfy confidence limits is selected in consultation with technical experts and according to relevant standards and protocols. 2.3. Field data collection methodology is determined. 2.4. Quality assurance standards that will apply to survey are identified and incorporated in survey methodology and documentation. 2.5. Appropriate diagnostic tests are selected for use in confirming pest presence in samples to be collected. 2.6. Instructions for survey teams are developed.
3. Determine the resources required	3.1. Resources required for survey activities are determined in conjunction with technical experts and are documented.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Obtain approval for the survey design	4.1. Survey design is documented according to protocols and standards. 4.2. Survey design is submitted to appropriate authorities for approval.
5. Determine post-survey review processes	5.1. Review processes are determined to evaluate conduct and effectiveness of survey program.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- high level interpretation of information to determine distribution of pests in relation to biology, climate and vegetation
- working with other technical experts
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- detailed knowledge of a range of biological survey methods
- detailed knowledge of application of biometric principles to biological survey design
- detailed knowledge of biology of groups of pests and pathogens relevant to survey
- detailed knowledge of types and distribution of hosts relevant to survey
- knowledge of plant and animal industries and potential impact of incursions
- legislation and regulations defining and affecting management of incursions
- Australian Emergency Plant Pest Response Plan (PLANTPLAN).

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Biological and dispersal characteristics may include:	• intrinsic characteristics of pest • active flight • soil borne • water borne • wind borne • biological (mechanical) vectors that carry the pest such as: • fruit, seed and plant material • insects, invertebrates and vertebrates • non-biological means such as equipment, machinery, vehicles and clothing.
Types of survey required may include:	• area free • delimiting • distribution • prevalence.
Standards and protocols that may apply include:	• PLANTPLAN • Australian Veterinary Emergency Plan (AUSVETPLAN) • commonwealth, state and territory legislation defining legal powers in a disease emergency • damage minimisation policies • environmental policies • occupational health and safety requirements and policies • pest free area guidelines • standard operating procedures.
Diagnostic tests selected may include:	• biochemical tests • Enzyme-Linked Immunosorbent Assay (ELISA) • microscopy • Polymerase Chain Reaction (PCR).
Instructions for survey teams may cover:	• actions to take when suspect material is found • biosecurity measures for team and property owners • communication protocols for teams when

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	briefing property owners, including confidentiality requirements • farm, district and regional requirements • sampling intensity • sampling protocols • specifying survey sites.

Resources required may include:	• equipment
	• illustrated guides
	• information technology and communications equipment
	• maps - topographical and aerial
	• personnel and their needs, including physical needs such as transport, accommodation and other requirements such as supervision and training
	• vehicles appropriate to area, site and terrain, including:
	  • four-wheel drive
	  • all terrain vehicle (ATV)
	  • forklift
	  • helicopter.

Technical experts to consult may include:	• those with appropriate diagnostic and biometric expertise.
Appropriate authorities may include:	• chief plant health manager • consultative committee on emergency plant pests • planning manager • survey manager.

AHCBIO401A Supervise activities on infected premises

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers supervising activities on infected premises and defines the standard required to: develop a schedule for implementation of emergency disease or plant pest control activities; effectively supervise the range of activities required to achieve emergency disease or plant pest control in an outbreak or incursion; effectively communicate and give directions.

Application of the Unit

Application of the unit	This unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response. Where work requires the use of load-shifting or other equipment, appropriate training/certification must be provided according to state and territory safety and licensing requirements.

Licensing/Regulatory Information

Refer to Application of the Unit

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan emergency disease or plant pest control activities on an IP	1.1. Emergency disease or plant pest control activities are planned under direction from Infected Premises (IP) operations manager and in consultation with property owner/manager. 1.2. All IP procedures are confirmed with IP operations manager and communicated to property owner/manager. 1.3. Schedule for implementation of emergency disease or plant pest control activities is developed and resources required for planned activities are requested according to instructions from IP operations manager. 1.4. Reporting processes are established according to instructions from IP operations manager. 1.5. Staff rosters are established to support activities in a cost-effective manner and with minimal stress on personnel.
2. Oversee emergency disease or plant pest control activities	2.1. Personnel are assigned to team leader and worker positions according to IP operations functions to be performed and are given directions about tasks to be performed. 2.2. Emergency disease or plant pest control activities are conducted in ongoing consultation with IP operations manager and property owner/manager. 2.3. Emergency disease or plant pest control activities are overseen to ensure that they are cost-effective, make

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	effective use of resources, and avoid unnecessary property damage and livestock or crop destruction. 2.4. Valuations of materials requiring destruction, use of plant, equipment and materials, and all IP service provision are monitored to ensure they adhere to relevant standards, protocols and contract requirements. 2.5. Supplies of materials and resources are monitored to ensure that they are adequate to meet needs of control activities. 2.6. Incident log is maintained that includes details of all activities undertaken and contractors' hours and performance. 2.7. Effective communications with IP operations manager and property owner/manager are established and maintained throughout operation. 2.8. Personnel are supervised and motivated to carry out specific emergency disease or plant pest control activities to the standard required and according to Occupational Health and Safety (OHS) and legislative requirements.
3. Check effectiveness of emergency disease or plant pest control activities	3.1. Effectiveness and progress of control activities are monitored and compared with planned objectives. 3.2. Inspections of teams on site are carried out with sufficient regularity to ensure that standards are applied in line with required standards and protocols. 3.3. Progress reports are provided to IP operations manager according to agreed reporting schedule and format. 3.4. Records are kept as required by standards and protocols.
4. Revise site-specific emergency disease or plant pest control activities	4.1. Control activities are revised as required to address relevant protocols, maintain cost-effectiveness (including appropriate resource allocation) and contain wider impacts. 4.2. Revisions to activities are communicated promptly to Local Control Centre (LCC).

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- operating effectively under stress
- managing people
- supervising application of emergency disease or plant pest control measures on an IP, in line with relevant response plan
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- appropriate standards and protocols for the emergency disease or plant pest e.g. Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN)
- OHS and other legislative requirements in an emergency disease or plant pest incursion response
- principles underpinning control procedures
- procedures necessary to ensure that environmental values are protected during and after emergency disease or plant pest control program
- OHS, environmental and biosecurity legislation, codes of practice and enterprise procedures
- record keeping requirements
- reporting requirements
- safety practices related to use of equipment and materials used in emergency disease or plant pest control.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	

Emergency diseases or plant pests may include:	• diseases that may affect animals, fish and other marine animals including:
	  • disease that is exotic to Australia
	  • serious infectious disease of unknown or uncertain cause
	  • severe outbreak of a known endemic disease that is considered to be of national significance with serious social or trade implications
	  • variant of an endemic disease
	• species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.

IP procedures may include	• collection of emergency disease or plant pest information • decontamination • destruction • disposal • eradication • mustering • property security and quarantine • sentinel restocking • valuation and inventory • vector control.
Resources required may include:	• personnel • plant, facilities, equipment and materials for livestock or crop destruction, disposal, cleaning and disinfection • staff amenities.
Factors to take into account when overseeing IP control activities may include:	• cost • direction by LCC • effectiveness of emergency disease or plant pest control operations • OHS requirements • relevant standards and protocols • staff welfare

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	

	• wider impact on things such as:
	  • animal welfare
	  • environment
	  • industry
	  • local businesses
	  • local community
	  • neighbouring properties
	  • other non-susceptible livestock or crops
	  • property owners and managers.

Relevant standards and protocols may include:	• animal welfare codes of practice • approved standard operating procedures • AUSVETPLAN or PLANTPLAN protocols • commonwealth, state and territory legislation • environmental legislation • impact on and potential for damage to property • OHS requirements and legislation.
Progress reports may include information about:	• estimated completion dates • problems encountered • recommendations for change to priorities or procedures • resource requirements • successful solutions • work completion and work in progress.
Records may be kept of:	• any other records relevant to outbreak or incursion • authorisations for personnel and equipment to enter and leave IP • damage to equipment and property • inventories of livestock or crops alive/destroyed • materials and stockfeed destroyed • personnel employed • stores ordered and supplied • work done by private contractors.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to lead a work team or group including participating in team/group planning, managing and developing team/group performance, participating in and facilitating the work team/group in its achievement of workplace tasks, and documenting and reviewing work team/group performance. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work is carried out in accordance with workplace procedures and relevant regulations.

Work is performed under some supervision, generally within a team environment.

Work involves the application of established procedures to the provision of leadership within a work team or group.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Participate in team/group planning	1.1 Requirements of a team/group task are identified and clarified in conjunction with other team or group members to ensure appropriate interpretation of specifications and in accordance with enterprise requirements 1.2 Task is interpreted and relevant steps are identified in conjunction with other team/group members to ensure efficient conduct of work to meet specifications and enterprise requirements 1.3 Steps are planned in conjunction with the work of other personnel to allow achievement of practical outcomes according to enterprise and/or manufacturers procedures
2 Manage and develop team/group performance	2.1 Task activities are assigned to team/group members based on their areas of competence and expertise and their availability 2.2 Team/group members are advised on symptoms and effects of fatigue, drugs and alcohol, safe lifting techniques and other Occupational Health and Safety policies 2.3 Performance measures and requirements are agreed upon between team/group members in accordance with enterprise procedures
3 Participate in and facilitate the work team/group	3.1 Work activity is organised and carried out with other involved team/group members and personnel using relevant communication processes to ensure safe, unambiguous and appropriate sequencing of tasks 3.2 Individuals and teams/groups are actively encouraged to take individual and joint responsibility
4 Document and review work team/group tasks	4.1 All necessary documentation related to job planning and progress is completed and recorded in accordance with statutory, manufacturers and enterprise requirements 4.2 The outcomes of the team's/group's task activities are compared with the planned objectives, task instructions and specifications

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT **PERFORMANCE CRITERIA**

to ensure all requirements have been met

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulatory and code requirements
- Relevant OH&S and environmental protection policies and procedures
- Workplace protocols and procedures for leading work teams
- Techniques to encourage appropriate participation of team/group members
- Coaching and mentoring approaches
- Workplace policies and plans including procedures for training and development
- Principles, duty of care and obligations within the chains of responsibility in the transport industry
- Strategies to implement continuous improvement processes
- Typical problems that can occur when leading a work team and related appropriate action that can be taken

Required skills:

- Communicate effectively with others when leading a work team
- Read and interpret instructions, procedures and information relevant to team leadership and team activities
- Negotiate and work effectively with team members
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to team leadership and team activities
- Operate electronic communication equipment to required protocol
- Provide leadership and encouragement to team members
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when leading a work team in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unanticipated situations that may arise when leading a work team

© Commonwealth of Australia, 2025 Public Skills Australia

Required skills:

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during team activities
- Plan team activities, including predicting consequences and identifying improvements
- Monitor team activities in terms of planned schedule
- Modify team activities depending on differing operational contingencies, risk situations and environments
- Ensure application of fatigue management knowledge and techniques
- Operate and adapt to any differences in language and culture amongst team members
- Identify and recommend improvements to services, resource allocation and use
- Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work involves:	• completion of workplace activities as a leader of a work team
Work may occur:	• by day or night • in a variety of work contexts
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Team members may include:	• English-speaking persons • multilingual staff • persons with limited ability to communicate in English • persons from a range of cultural backgrounds • permanent, part-time and/or casual staff
Consultative processes may include:	• other members of the team • supervisors/team leaders • workplace personnel • visitors • contractors • official representatives • union representatives

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• industrial relations and OH&S specialists • other professional or technical staff • managers
Communication may involve the basic use of a range of communication technology including:	• phone • electronic data interchange (EDI) • fax • email • internet • radio
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/documentation may include:	• workplace procedures, checklists and instructions • goods identification numbers and codes • manifests, bar codes, goods and container identification • manufacturers specifications • workplace policies • supplier and/or client instructions • material safety data sheets • relevant codes of practice including the national standards for manual handling and the industry safety code • legislation, regulations and related documentation • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes • dangerous goods and freight regulations and codes • relevant Australian and state/territory OH&S legislation • equal employment legislation and related policies • environmental protection regulations

AHCBIO501A Manage active operational emergency disease or plant pest sites

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers managing active operational emergency disease or plant pest sites and specifies the outcomes required to manage activities required to eradicate emergency disease or plant pests from infected premises and dangerous contact premises.

Application of the Unit

Application of the unit	This unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response. Work is performed at the control centre and will involve the management of personnel and contractors operating in the field.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan control procedures across the declared area	1.1. Planning is carried out in effective and ongoing consultation with stakeholders and field personnel. 1.2. Planning is conducted in line with relevant standards and protocols, and according to instructions from operations director. 1.3. All required resources are identified, obtained, scheduled, prioritised and deployed according to relevant standards and protocols. 1.4. Occupational Health and Safety (OHS) requirements, and hazards associated with implementing control procedures, are identified and appropriate action is taken to minimise risks to self and others. 1.5. Criteria for implementing control procedures are decided and agreed to satisfy relevant standards and protocols with minimal livestock or crop destruction and property damage. 1.6. Contingency plans for effective control of emergency disease or plant pest are prepared.
2. Manage the implementation of control procedures	2.1. Control procedures are coordinated to achieve effective emergency disease or plant pest control outcomes. 2.2. Ongoing consultation and communication links are maintained with all stakeholders, field staff, property owners/managers and others in control centre. 2.3. Control procedures and services supplied under contract are implemented according to standards, protocols and contractual requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4. Written and verbal reports are prepared and submitted as required.
3. Monitor and review the effectiveness of control procedures	3.1. Personnel are monitored to ensure that they are achieving specified objectives. 3.2. Supply of resources is monitored to ensure that it is appropriate and available to carry out required tasks. 3.3. Implementation of control procedures is monitored to ensure cost-effective compliance with relevant standards and protocols. 3.4. Priorities for emergency disease or plant pest control operations are reviewed, and confirmed or revised as appropriate, according to relevant standards and protocols.
4. Implement review findings	4.1. Control activities are revised as required. 4.2. Revisions to control activities are promptly and effectively communicated to relevant stakeholders and personnel for implementation.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- applying relevant standards and protocols such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) to determine requirements and/or guidelines applying to on-site control and eradication procedures
- managing resources effectively to achieve emergency disease or plant pest control and eradication
- operating effectively under stress in tasks involving high-level problem solving and decision making
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• use numeracy skills to estimate, calculate and record complex workplace measures • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• emergency animal disease or plant pest control program • common reactions and behaviours of people working under stressful conditions • OHS requirements, particularly for use of chemicals, specific control procedures and managing personnel under emergency conditions • relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management • relevant standards and protocols, such as AUSVETPLAN or PLANTPLAN • OHS and environmental protection legislation, codes of practice and enterprise procedures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • manage emergency disease or plant pest control operations at a number of operational sites • ensure procedures implemented at operational sites conform to relevant standards and protocols • manage resources across operational sites • monitor performance of personnel.
Context of and specific resources for assessment	Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest response

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	simulation or in a response to an outbreak.
Method of assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to manage active operational emergency disease or plant pest sites. The candidate must also have access to a functional control centre established as part of an emergency disease or plant pest response simulation, or in response to an actual outbreak.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. The skills and knowledge required to manage active operational emergency disease or plant pest sites must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include managing the implementation of different control procedures required in different responses or on different sites.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Stakeholders may include:	• industry representatives and organisations • local community • local government authorities and other government departments • property owners, operators and managers • suppliers of goods and services.
Relevant standards and protocols may include:	• approved standard operating procedures • commonwealth, state and territory legislation • emergency disease or plant pest response agreements

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• emergency disease or plant pest specific guidelines and manuals included in the relevant national response plans such as AUSVETPLAN and PLANTPLAN • other relevant guidelines for handling an emergency disease or plant pest incursion, such as local government regulations.

Resources may include:	• contractors and other service providers
	• documents such as:
	  • plans
	  • pro formas
	  • maps
	• equipment such as:
	  • trucks
	  • tankers
	  • pumps
	• facilities such as:
	  • portable shower blocks
	• operations personnel and teams responsible for:
	  • clerical and administrative duties
	  • decontamination
	  • destruction
	  • disposal
	  • pest control
	  • site supervision of infected premises
	  • valuation.

Control procedures required may cover:	• decontamination • destruction • disposal • pest control • security • surveillance and testing • treatment • vaccination • valuation • vector control measures • wild animal control measures.
Reports may include:	• input into situation reports and control centre planning activities

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• use of emergency disease or plant pest management software • verbal progress and activity reports • written reports.
Personnel monitoring may involve consideration of:	• appropriate resources • first aid • meals • OHS • personal protective equipment • providing information to personnel • right range of skills on sites • shelter • staff rosters • stress levels.
Implementation of control procedures may be monitored through:	• site inspections • specific software • usage levels of major resources such as time, equipment and materials • verbal and written reports.

BSBOHS407A Monitor a safe workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to implement and monitor the organisation's occupational health and safety (OHS) policies, procedures and programs in the relevant work area to meet legislative requirements. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to employees with supervisory responsibilities for implementing and monitoring the organisation's OHS policies, procedures and programs in a work area. This unit applies to individuals with a broad knowledge of OHS policies who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Provide information to the workgroup about OHS policies and procedures	1.1. Accurately explain relevant provisions of ***OHS legislation and codes of practice*** to the workgroup 1.2. Provide information to the workgroup on the ***organisation's OHS policies***, ***procedures and programs***, ensuring it is readily accessible by the workgroup 1.3. Regularly provide and clearly explain information about ***identified hazards and the outcomes of risk assessment*** and control to the workgroup
2. Implement and monitor participative arrangements for the management of OHS	2.1. Explain the importance of effective consultative mechanisms in managing health and safety risks 2.2. Implement and monitor consultative procedures to facilitate participation of workgroup in management of work area hazards 2.3. Promptly deal with issues raised through consultation, in accordance with ***organisational consultation procedures***

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4. Promptly record and communicate to the workgroup the outcomes of consultation over OHS issues
3. Implement and monitor the organisation's procedures for providing OHS training	3.1. Systematically identify OHS training needs in line with organisational requirements 3.2. Make arrangements to meet OHS training needs of team members in consultation with relevant individuals 3.3. Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate team and individual achievement of identified training needs 3.4. Identify and report to management the costs associated with providing training for work team, for inclusion in financial plans
4. Implement and monitor procedures for identifying hazards and assessing risks	4.1. Identify and report on hazards in work area in accordance with OHS policies and procedures 4.2. Promptly action team member hazard reports in accordance with organisational procedures
5. Implement and monitor the organisation's procedures for controlling risks	5.1. Implement ***procedures to control risks*** using the hierarchy of controls and organisational requirements 5.2. Identify and report inadequacies in existing risk control measures in accordance with the hierarchy of controls 5.3. Monitor outcomes of reported inadequacies, where appropriate, to ensure a prompt organisational response
6. Implement and monitor the organisation's procedures for maintaining OHS records for the team	6.1. Accurately complete and maintain ***OHS records*** of incidents of occupational injury and disease in work area in accordance with OHS legal requirements 6.2. Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
Required skills
• analytical skills to identify hazards, to assess risks in the work area and to review data relating to monitoring and evaluating incidents (accidents), environmental issues and the effectiveness of risk control measures • literacy skills to comprehend documentation and to interpret OHS requirements • coaching and mentoring skills to provide support to colleagues.
Required knowledge

• key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  • anti-discrimination legislation
  • ethical principles
  • codes of practice
  • privacy laws
  • environmental issues
  • OHS
• legal responsibilities of employers, supervisors and employees in the workplace
• hazards and associated risks which exist in the workplace
• organisational policies and procedures relating to hazard management, fire, emergency, evacuation, incident (accident) investigating and reporting
• relevance of consultation as a key mechanism for improving workplace culture.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applying organisational management systems and procedures to OHS within workgroup area • applying procedures for assessing and controlling risks to health and safety associated with those hazards, in accordance with the hierarchy of controls • providing specific, clear and accurate information

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	and advice on workplace hazards to workgroup • knowledge of legal responsibilities of employers, supervisors and employees in the workplace.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of documentation relating to hazards in the work lace • examples of documents relating to workplace safety, hazard identification and risk assessment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of records communicating the outcomes of consultation over OHS issues to the workgroup • analysis of responses to case studies and scenarios • demonstration of techniques • review of reports to management on the costs associated with providing training for the work team • oral or written questioning to assess knowledge of workplace safety and hazards • examples of risk assessments • evaluation of actioning of team member hazard reports • review of OHS records of occupational injury and disease incidents in work area.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • management units • other OHS units.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
OHS legislation and codes of practice may include:	• common law duties to meet the general duty of care requirements • health and safety representatives and health and safety committees • prompt resolution of health and safety issues • provision of information, induction and training • regulations and approved codes of practice relating to hazards present in work area • relevant state/territory legislation • requirements for the maintenance and confidentiality of records of occupational injury and disease
Organisation's OHS policies, ***procedures and programs*** may include:	• consultative arrangements for employees in work area • dangerous goods transport and storage • emergency and evacuation procedures • first aid provision/medical practitioner contact and attention • hazard reporting procedures • hazardous substances use and storage • incident (accident) investigation • OHS arrangements for on site contractors, visitors and members of public • OHS audits and safety inspections • plant and equipment maintenance and use • procedures for hazard identification • procedures for risk assessment, selection and implementation of risk control measures • purchasing policy and procedures • safe operating procedures/instructions • site access • use and care of personal protective equipment

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Identified hazards and the outcomes of risk assessment may include:	• checking equipment before and during work • consulting work team members • daily informal employee consultation and regular formal employee meetings • housekeeping • OHS audits and review of audit reports • review of health and safety records including hazard reports, hazardous substances and dangerous goods registers, injury records • workplace inspections in area of responsibility
Organisational consultation procedures may include:	• attendance of health and safety representatives at management and OHS planning meetings • counselling/disciplinary processes • early response to employee suggestions, requests, reports and concerns put forward to management • election of health and safety representatives in accordance with legislative requirements • formal and informal meetings • health and safety committees • other committees, for example, planning and purchasing
Procedures to control risks may include:	• consultation with employees and their representatives • job/process/workplace re-design e.g. introduce mechanical handling equipment, re-arrange material flow/timing/scheduling, raise/lower work platforms • removing the cause of a risk at its source (eliminating the hazard) e.g. removing stored goods permanently from emergency exit passageways • selecting control measures in accordance with the hierarchy i.e. work through hierarchy from most effective to least effective control
OHS records may include:	• audit and inspection reports • consultation e.g. meetings of health & safety committees, workgroup meeting agendas including OHS items and actions • first aid/medical post records • hazardous substances registers • induction, instruction and training

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• manufacturer's and supplier's information including dangerous goods storage lists • plant and equipment maintenance and testing reports • workers compensation and rehabilitation records • workplace environmental monitoring records

BSBOHS405B Contribute to the implementation of emergency procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to contribute to the implementation of planning and response procedures for emergencies. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals with supervisory responsibilities for managing occupational health and safety (OHS) in the workplace who contribute to the implementation of procedures for responding to emergencies. The unit assumes that expert advice will be available in identifying potential emergencies and in formulating the response plans. As the unit focuses on implementation of procedures already developed for short term emergency responses, it is less complex than BSBOHS508B Participate in the investigation of incidents, which has a greater scope both in situations addressed and the timeframe for action. Contributions to the actions to control OHS risks are covered in BSBOHS404B Contribute to the implementation of strategies to control OHS risk.

Licensing/Regulatory Information

Not applicable.

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify potential emergencies	1.1. Apply knowledge of OHS ***hazards*** and ***standards*** to identify causes of potential ***emergencies*** 1.2. Seek input of ***stakeholders*** in identifying potential emergencies 1.3. Identify and liaise with appropriate ***specialist advisors*** and ***emergency agencies*** to identify causes of potential emergencies 1.4. Develop a ***risk register*** to identify potential emergencies and their causes
2. Identify options for initial response	2.1. Categorise major types of emergencies 2.2. Identify actions required to contain or limit potential emergencies 2.3. Identify actions required to limit impact on

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	personnel, property and the environment 2.4. Identify requirements for liaison with emergency agencies 2.5. Prioritise actions to be taken during emergencies
3. Plan initial response procedures	3.1. Identify ***resources*** available and required for immediate response 3.2. Check ***emergency equipment*** to ensure serviceability, accessibility, cleanliness and correct location 3.3. Document actions required for a number of major types of emergency, taking account of standards, current industry practice, specialist advice and input by emergency agencies 3.4. Identify training needs and appropriate providers
4. Implement initial response procedures	4.1. Document and display actions for initial response 4.2. Understand and implement own role in emergency response
5. Contribute to post event activities	5.1. Identify and support other personnel in the ***second response phase*** 5.2. Make contributions to debriefing processes
6. Monitor emergency response and address deficiencies	6.1. Monitor responses to emergencies for efficiency and timeliness, in consultation with stakeholders and, as appropriate, specialist advisors and agencies 6.2. Document, and promptly and appropriately report results of monitoring to managers and key personnel 6.3. Identify areas for organisational and personal improvement and make recommendations for improvement in response to analysis of response taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities across all levels of an organisation

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- interpersonal skills to issue instructions in an authoritative manner during unusual circumstances
- literacy skills to prepare reports for a range of target groups
- observation skills to evaluate the impact characteristics and composition of the workforce have on managing OHS
- organisational and time management skills to sequence tasks and meet timelines
- research and data analysis skills to assess resources required to systematically manage OHS and to analyse relevant workplace information and data
- research and data analysis skills to evaluate interactions between employees, their activities, equipment, environment and work systems
- technology skills to access internal and external OHS data.

Required knowledge

- basic emergency prevention controls typically installed in a workplace, such as:
  - emergency alerting systems
  - emergency protection systems
  - fire and smoke alarms, and fire extinguishers
  - required safety wear
  - security systems
- emergency alerting systems and signals used in the workplace and their meanings
- enterprise physical site and work areas
- enterprise reporting procedures in an emergency
- essential actions of self and others in an emergency
- hazards and precautions to be taken during an emergency
- hazards arising from evacuation
- information needs of emergency response personnel during reporting, arrival and response to an emergency
- OHS information needs of work unit or work team
- internal and external sources of OHS information and data
- organisational policies and procedures for OHS and acting in an emergency situation
- organisational structure, roles and responsibilities
- powers of safety representatives and other authorised OHS personnel to cease work immediately if an immediate danger to OHS exists
- principles and priorities for evacuation, checking and accounting for people
- principles of fire protection and emergency response
- relevant state/territory and commonwealth OHS legislation, codes of practice, associated standards and guidance material
- roles, responsibilities and authority of OHS personnel
- types of emergency responses typically used in workplaces.

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identification of a potential emergency • contribution to the implementation of procedures for preparing and responding to an emergency • evaluation of the effectiveness of the implementation strategies • knowledge of basic emergency prevention controls typically installed in a workplace.
Context of and specific resources for assessment	Assessment must ensure: • access to office equipment and resources • access to workplace documentation and actual workplaces.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • demonstration of procedures implemented in response to an emergency situation • direct questioning combined with review of portfolios of evidence and third party reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of information needs of emergency response personnel during reporting, arrival and response to an emergency • review of risk register developed to identify potential emergencies and their causes • written examples of reports on responses to emergency situations • review of documentation submitted to managers and key personnel outlining monitoring of emergency response.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBOHS403B Identify hazards and assess OHS risks • BSBOHS404B Contribute to the implementation of strategies to control OHS risk.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Hazards may include:	• sources of potential harm in terms of human injury, ill health, damage to property, damage to the environment, or a combination of these, including:
	  • biological
	  • chemical
	  • environment
	  • mechanical and/or electrical
	  • physical
	  • psychosocial
	  • radiological
	  • nuclear

Standards may include:	• Australian Standards • industry-specific standards • international standards

Emergencies may include:	• emergencies requiring evacuation
	• explosion and bomb alerts
	• external emergencies and natural disasters, such as:
	  • flood
	  • storm

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• traffic accident • fire • explosion • hazardous substance spill • chemical spill • internal emergencies, such as: • loss of power • loss of water supply • structural collapse • security emergencies, such as: • armed robberies • intruders • disturbed persons • serious injury events
Stakeholders may include:	• community • employees • health and safety, and other employee representatives • managers • OHS committee • supervisors
Specialist advisors may include:	• internal or external advisors in: • safety • chemicals • engineering • security • emergency response
Emergency agencies may include:	• fire • police • ambulance • government departments • hazardous materials response teams (Hazmat) • OHS authorities
Risk register may include:	• lists of hazards • location of hazards • range of possible scenarios or circumstances under which an emergency could occur,

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	including natural disasters • outcomes of any risk assessment or risk ranking
Resources may include:	• emergency response personnel and equipment • first aid personnel and equipment • emergency services personnel
Emergency equipment may include:	• clothing items such as coloured hats and vests • communication equipment • evacuation alarms • evacuation equipment, especially for people with a disability • fire extinguishers and equipment • torches
Second response phase may include:	• actions required if building cannot be re-occupied • containment of personnel in evacuation area • first aid • support/counselling of personnel involved or affected

BSBCON401A Work effectively in a business continuity context

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to work effectively in a business continuity context. This unit requires an awareness of the organisation's overall business continuity management framework and participation in activities related to the business continuity management framework. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit is for individuals working in administrative and/or support roles who require a basic knowledge of the processes relating to the organisation's business continuity requirements. Business continuity awareness and planning help the organisation to identify barriers and/or interruptions and to determine how the organisation will achieve critical business objectives (even at diminished capacity) until full functionality is restored.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Demonstrate an understanding of the business continuity management framework	1.1. Access the business continuity management framework, and related policies and procedures 1.2. Analyse the key elements of the business continuity management framework within the ***organisation*** to determine their impact 1.3. Within work role authority, contribute to the review of the business continuity management framework, policies and procedures 1.4. Participate in emergency response and business continuity management framework training and ***exercises*** as required
2. Support the organisation's	2.1. Demonstrate an awareness of internal and external

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
business continuity strategies	***risk*** context relevant to the organisation 2.2. Review and provide feedback on the outcomes of the ***business impact assessment/s*** 2.3. Participate in ***risk treatment*** reviews 2.4. Identify and record the organisation's ***emergency response***, ***continuity and recovery strategies*** 2.5. Identify own role and responsibility within the organisation's ***business continuity plan/s*** 2.6. Identify and report to management on any new or ***emerging risk*** or ***incident***

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and teamwork skills to:
  - provide feedback to appropriate personnel about the business continuity management framework and strategies
  - read, write and understand a variety of workplace documents
  - work effectively with diverse individuals and groups
- learning skills to participate in training activities and to improve own knowledge and skills about business continuity management
- planning and organising skills to identify risk factors and to take action to minimise risk according to level of responsibility
- problem-solving skills to appropriately address identified risks treatments (within ownlevel of responsibility)
- research and data collection skills to monitor and evaluate risks
- technology skills to use the organisation's data and information management systems

Required knowledge

- Australian/New Zealand Standard AS/NZS 4360:2004Risk Management
- Australian/New ZealandStandard HandbookAS/NZS HB221:2004 Business Continuity Management
- organisation's policies and procedures, including business continuity strategies
- overall operations of the organisation, including existing data and information systems

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• relevant legislation and regulations that impact on business continuity, such as OHS, environment, duty of care, contract, company, freedom of information, industrial relations, privacy and confidentiality, due diligence, records management

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • demonstrated understanding of own role in relation to wider business continuity requirements in the organisation • demonstrated understanding of risk and the business continuity management framework processes and policies as they apply in the organisation • participation in contributing to improving business continuity management framework processes within the organisation
Context of and specific resources for assessment	Assessment must ensure: • access to workplace documentation relating to risk management • access to business continuity management framework, business impact assessments and strategies
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the participant • review of documentation outlining risk context and organisation's processes and outcomes • work based projects or case studies • scenarios • oral or written questioning to assess basic knowledge of Australian standards for risk management and

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	business continuity
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Organisation may include:	• commercial enterprises • community • government • non-commercial enterprises • not-for-profit • religious organisations
Exercises may include:	• drills • scenario planning
Risk may include:	• aeronautical • armed hold-up • biological • chemical • civil disturbance • disability/death of key person • economic • electronic • erosion • explosion • fire • fraud • hazardous materials • industrial accident • infrastructure failure • market failure

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• natural disaster • operational collapse - insolvency • pandemic • pollution • privacy and confidentiality • radiological/nuclear • robbery and/or major vandalism • sabotage • structure failure • terrorism • transport accident • war • water • weather/climate change
Business impact assessment/s may include:	• breach/reduction of customer service standards • cost/impact on existing and/or increased finance • escalating losses over time • impact of loss of business/resources • loss of revenue • potential fines/penalties/litigation costs • reputation/brand damage • statutory/regulatory breaches
Risk treatment may include:	• activating evacuation plan • activating lock down procedures • activating workplace emergency management plan • personnel working from home • relocation of facilities • resource replacement • temporarily suspending activities • transferring activities
Emergency response strategies may include:	• contact lists to report incident/s • documentation/reporting/recording procedures • evacuation plan • location of evacuation assembly point • lockdown procedures • names and responsibilities of wardens • personnel instructions for evacuation • process for accounting for personnel • workplace emergency management plan

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Continuity strategies may include:	• action required to resume critical business activities • contact lists of critical personnel and stakeholders • counselling • critical business activities and prioritisation of when they can/need to resume • list of resources • relocation to alternative worksite • resource replacement • treatment for critical business activities
Recovery strategies may include:	• damage assessment • process for assessing loss and filing insurance claims • relocation of business to original location • salvage and restoration of records, infrastructure and premises
Business continuity plan/s may include:	• introduction • organisational details • objectives • purpose • critical business functions • assumptions • processes • activation and stand down • responsibility • version control and maintenance • operational requirements • critical success factors • interdependencies • outage times • compliance • people • structure • roles and responsibilities • contact details • continuity arrangements • accommodation • resources • workarounds and alternative solutions

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• continuity management tasks • communications • other plans
Emerging risk may include:	• act of god • civil unrest • communication with third party, e.g. phone call of bomb threat • environmental - human • insufficient finance • insufficient insurance • news bulletins • pandemic • terrorist
Incident may include:	• biological contamination • chemical exposure • detection of any of the risks as listed previously • fire • flood

SISCAQU416A Coordinate lifeguard service at an aquatic facility

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to coordinate the supervision of patrons at an aquatic recreation facility or environment.

Application of the Unit

This unit applies to those who work as program, swim school or recreation coordinators in various aquatic environments, such as council or commercially operated aquatic and leisure centres, and who are responsible for supervising the activities of staff.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1. Identify supervision requirements.	1.1. Identify and document the use of the ***aquatic facility or environment***.
	1.2. Conduct research and consultation to establish the ***supervision requirements*** of the aquatic facility or environment according to ***organisational policies and procedures***.
	1.3. Allocate appropriate resources to meet supervision requirements of the aquatic facility or environment according to organisational policies and procedures.
2. Implement supervision requirements.	2.1. Train appropriate staff to implement supervision requirements according to ***relevant legislation*** and organisational policies and procedures.
	2.2. Identify and communicate staff roles and responsibilities according to organisational policies and procedures.
	2.3. Advise staff of factors that contribute to problems in the aquatic facility or environment.
	2.4. Monitor staff performance in carrying out supervision requirements according to relevant legislation and organisational policies and procedures.
	2.5. Evaluate staff performance and provide constructive feedback according to organisational policies and procedures.
	2.6. Carry out regular inspection of the aquatic facility or environment to minimise ***risk*** to ***clients***, according to relevant legislation and organisational policies and procedures.
	2.7. Take action to address possible risks according to organisational policies and procedures.
3. Manage emergency situations.	3.1. Communicate ***emergency*** procedures to staff according to organisational policies and procedures.
	3.2. Conduct emergency drills according to organisational policies and procedures.
	3.3. Assess and manage the emergency according to organisational policies and procedures.
	3.4. Utilise ***emergency services*** according to organisational policies and procedures.
	3.5. Report and record incidents according to the emergency action plan for the aquatic facility or environment and organisational policies and procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. Review and adapt lifeguard operations.	4.1. Seek feedback on effectiveness of lifeguard service from staff and clients according to organisational policies and procedures. 4.2. Review and amend lifeguard ***operations*** in response to feedback according to organisational policies and procedures. 4.3. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - inform staff of roles and responsibilities
  - consult stakeholders to determine supervision requirements
  - train staff to implement supervision requirements
  - provide feedback to assist staff in meeting or improving performance standards
- problem-solving skills to:
  - determine appropriate emergency responses
  - allocate resources and staff to implement supervision requirements
  - seek feedback on lifeguard service and make appropriate changes
- planning and organisational skills to:
  - allocate and coordinate staff roles and responsibilities to meet the supervision requirements of the aquatic facility or environment
  - carry out regular inspections to identify and respond to risk
  - coordinate responses to minor and major aquatic emergencies
- language and literacy skills to document levels of patronage at the aquatic facility and to document emergency incidents
- first aid and emergency response skills appropriate to the location to enable initial assessment of and response to emergencies

Required knowledge

- legislation and organisational policies and procedures that enable the provision of a safe environment for client activities and appropriate response to emergencies
- potential dangers or hazards commonly encountered in aquatic environments to enable safe conduct of client activities
- facility or environment hazards to enable these to be monitored through supervision

© Commonwealth of Australia, 2025 Public Skills Australia

- factors affecting the classification of emergencies including nature and size, likely development and availability of support to enable an appropriate response
- supervision techniques in an aquatic environment to enable effective supervision
- communications equipment to enable prompt response to emergencies
- first aid, emergency and rescue procedures appropriate to the conditions to ensure risk minimisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • determines the supervisory needs of the aquatic facility or environment and allocates resources to ensure safety of patrons • monitors and modifies use of resources to maintain safety of aquatic facility or environment and patrons • coordinates staff training, in line with identified staff roles and responsibilities, and follows operational procedures to minimise and respond to risk in the aquatic facility or environment • assesses, manages and reports on emergency situations.
Context of and specific resources for assessment	Assessment must ensure: • coordination of a lifeguard service at an aquatic facility or environment on multiple occasions to demonstrate competency and consistency of performance • access to an aquatic facility or environment, such as a swimming pool or confined natural shallow water venue • access to appropriate personnel and staff • access to incident reporting documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of factors affecting the supervision requirements of the

© Commonwealth of Australia, 2025 Public Skills Australia

aquatic facility or environment
- observation of candidate's management of emergency situations
- third-party reports from a supervisor detailing candidate's performance
- portfolio containing completed incident reports and research into measures of use of aquatic facility or environment.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXRSK301A Undertake risk analysis of activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Aquatic facility or environment may include:
- pools and spas
- lakes
- rivers
- water slides
- dams.

Supervision requirements may include:
- opening and closing procedures
- rostering lifeguards
- allocating duties and responsibilities
- cleaning and maintenance.

Organisational policies and procedures may include:
- occupational health and safety
- communication protocols
- safety, rescue and emergency procedures
- incident reporting
- risk management procedures
- staff training
- local call-out procedures.

Relevant legislation may include:
- occupational health and safety
- health act
- duty of care
- working with children

© Commonwealth of Australia, 2025 Public Skills Australia

	• local government regulations • environment legislation • anti-discrimination legislation.
Risks may include:	• misuse of equipment • swimming in unsafe areas • behaving with disregard for the safety of others.
Clients may include:	• participants • spectators • members • volunteers • facility owners • staff.
Emergency may include:	• water incident • hazardous release • medical condition.
Emergency services may include:	• police search and rescue • state emergency service • ambulance service • fire services.
Operations may include:	• staffing levels • availability of resources • supervision ratios.

SISCAQU305A Implement aquatic facility plant and equipment maintenance program

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to safely implement an aquatic facility plant and equipment maintenance program. This involves maintaining plant and equipment, diagnosing faults, responding to unsafe or failed plant and equipment and reviewing the effectiveness of the maintenance program.

Application of the Unit

This unit applies to those working independently as aquatic operators or managers in various aquatic environments, such as council or commercially operated aquatic and leisure centres. This may also include those coordinating and supervising others in the aquatic environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Maintain aquatic facility plant and equipment.	1.1. Carry out regular monitoring of ***aquatic facility plant and equipment*** condition. 1.2. Identify potential problems with plant and equipment and record details according to ***organisational policies and procedures***. 1.3. Implement preventative maintenance systems for aquatic facility plant and equipment for the long-term protection of assets according to ***relevant legislation***, organisational policies and procedures and manufacturer's specifications.
2. Diagnose faults.	2.1. Erect clear and noticeable warning signs around aquatic facility plant and equipment that is being repaired. 2.2. Assess failed or unsafe aquatic facility plant and equipment according to organisational policies and procedures. 2.3. Identify faults and, where possible, determine the underlying cause.
3. Respond to failed or unsafe aquatic facility plant and equipment.	3.1. Erect clear and noticeable warning signs around aquatic facility plant and equipment that is being repaired. 3.2. Carry out repairs within designated responsibility according to manufacturer's recommendations and standards, ***public health regulatory requirements*** and organisational policies and procedures. 3.3. Take defective equipment and or facilities out of operation according to organisational policies and procedures. 3.4. Make arrangements for required repairs to be carried out by qualified and or licensed contractors according to relevant legislation. 3.5. Record actions taken according to organisational policies and procedures and relevant legislation.
4. Review maintenance program.	4.1. Evaluate maintenance program to ensure short- and long-term maintenance requirements of the facility are met.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	4.2. Schedule maintenance activities to minimise disruption to facility users and ensure that ***supplies*** are available.
	4.3. Integrate maintenance program with asset acquisition and disposal plans.
	4.4. Identify and use acceptable alternative maintenance methods to maintain cost-effective program as required.

Required Skills and Knowledge

is section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - make suitable arrangements with qualified contractors to repair failed or unsafe aquatic plant and equipment
  - consult with others when reviewing the maintenance program
  - problem-solving skills to:
  - review maintenance programs
  - monitor and respond to failed or unsafe facility plant and equipment
- planning and organisational skills to:
  - carry out maintenance that minimises disruption to the facility users
  - ensure all required supplies are available
- literacy skills to:
  - record details of failed or unsafe plant or equipment and corrective actions taken
  - ensure clarity of warning signs for public safety during repair processes
- numeracy skills to maintain cost-effective maintenance plans
- first aid skills and treatment procedures related to plant and equipment accidents.

Required knowledge

- legislation and organisational policies and procedures that enable:
  - implementation of effective preventative maintenance systems
  - assessment of failed or unsafe aquatic plant and equipment
- public health regulatory requirements to carry out repairs within designated responsibility
- maintenance planning procedures and qualified and or licensed contractors to repair plant and equipment when required

© Commonwealth of Australia, 2025 Public Skills Australia

- resources and supplies required to maintain and manage aquatic facility plant and equipment.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • conducts regular monitoring of use and condition of aquatic facility plant and equipment and identifies potential problems and faults • responds to plant and equipment failures and faults and repairs within designated responsibility or makes arrangements for qualified contractors to carry out repairs as required • records details of failed or unsafe plant or equipment and corrective actions taken.
Context of and specific resources for assessment	Assessment must ensure: • implementation and review of aquatic facility and equipment maintenance program on multiple occasions to demonstrate competency and consistency of performance • access to an aquatic facility plant and equipment • access to resources to maintain facility and equipment and to keep records • access to qualified contractors • access to public health regulatory requirements, relevant legislation, and organisational policies and procedures.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the candidate assessing failed or unsafe facility plant and equipment • oral or written questioning to assess candidate's knowledge of procedures and processes for plant and equipment operation and maintenance • portfolio of written records detailing unsafe or failed

plant and equipment and corrective action taken
- third-party reports from a supervisor detailing candidate's performance on the job.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU303A Operate aquatic facility plant and equipment

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Aquatic facility plant and equipment may include:

- circulation plant
- heating systems
- lighting and ventilation systems
- electrical control units
- electrical appliances
- self-contained breathing apparatus.

Organisational policies and procedures may include:

- occupational health and safety
- communication protocols
- use and maintenance of resources
- emergency and risk management procedures
- chemical handling procedures
- backwash procedures
- filtration processes
- isolation procedures
- procedures for disposal of dangerous materials
- reporting and record keeping.

Relevant legislation may include:

- occupational health and safety
- public health regulations
- infectious diseases regulations
- relevant dangerous goods act and regulations
- metropolitan water supply, sewerage and drainage by-laws
- relevant environment legislation
- local government regulations.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1. Conduct pool water quality tests.	1.1. Complete ***routine pool water tests*** according to ***public health regulatory requirements***, ***organisational policies and procedures*** and ***relevant legislation***. 1.2. Monitor pool water test results according to public health regulatory requirements and organisational policies and procedures. 1.3. Develop and implement schedules for ***pool water microbiological testing*** according to organisational policies and procedures and public health regulatory requirements.
2. Apply water quality principles.	2.1. Anticipate bather loading and implement corrective actions with appropriate personnel to maintain ***pool water quality***. 2.2. Develop and implement safe processes for using chemicals to maintain disinfectant levels and chemical balance of pool water according to public health regulatory requirements. 2.3. Carry out ***water treatment procedures*** according to the aquatic facility's operating plan for the treatment of pool water. 2.4. Calculate the amount of chemicals required to correct chemical imbalances in pool water according to public health regulatory requirements. 2.5. Use chemical dosing equipment for the treatment of pool water according to the manufacturer's specifications and organisational policies and procedures.
3. Document action taken.	3.1. Record pool water test results according to organisational policies and procedures and public health regulatory requirements. 3.2. Record any corrective action taken according to organisational policies and procedures and public health regulatory requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:

© Commonwealth of Australia, 2025 Public Skills Australia

    - initiate corrective actions with appropriate personnel
    - maintain water quality and develop schedules for pool water microbiological testing
- problem-solving skills to:
    - conduct a variety of routine pool water tests
    - monitor and interpret results
    - anticipate bather loading
    - maintain disinfectant levels and chemical balance of pool water
- planning and organisational skills to:
    - collect and organise pool information
    - develop safe processes for the use of chemicals
- literacy skills to:
    - record pool water test results and corrective actions implemented
    - interpret aquatic facility's treatment operating plan
- numeracy skills to calculate the amount of chemicals required to correct chemical imbalances
- first aid skills to implement procedures related to pool water chemical accidents.

Required knowledge

- legislation and organisational policies and procedures that enable:
    - completion and monitoring of pool water tests
    - use and maintenance of chemical dosing equipment
    - development and implementation of schedules for microbiological testing and chemical use
    - accurate and timely record keeping
- public health regulatory requirements to:
    - implement processes for chemical use
    - calculate chemical requirements
- pool water chemistry to understand scientific terms related to tests such as pH levels, alkalinity, chlorine, bromine, temperature and calcium hardness
- plant and equipment operation, chemical dosing equipment and relevant resources used for testing, treating and maintaining pool water quality.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

© Commonwealth of Australia, 2025 Public Skills Australia

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- develops and implements schedules for pool water microbiological testing and safely uses and calculates chemicals to maintain chemical balance of pool water
- anticipates bather loadings and takes corrective action to ensure public health and safety
- operates chemical dosing equipment for the treatment of pool water
- updates pool records with information detailing water quality test results and corrective action taken.

Context of and specific resources for assessment

Assessment must ensure:

- conduct of regular pool water quality tests and monitoring of results on sufficient occasions to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a suitable aquatic facility
- equipment and resources required for the maintenance of pool water quality
- public health regulatory requirements, relevant legislation and organisational policies and procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate safely handling chemicals, equipment and resources
- oral or written questioning to assess knowledge of procedures for pool water testing and treatment
- observation of the candidate calculating chemical requirements to correct imbalances
- portfolio of written recordings detailing pool water test results and corrective action taken
- third-party reports from a supervisor detailing the candidate's performance on the job.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU303A Operate aquatic facility plant and equipment

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Routine pool water tests may include:

- free chlorine
- total bromine
- total chlorine
- combined chlorine
- pH
- alkalinity
- cyanuric acid
- calcium hardness
- total hardness
- temperature.

Public health regulatory requirements may include:

- health and poisons acts
- infectious diseases regulations
- dangerous goods act and regulations
- metropolitan water supply, sewerage and drainage by-laws
- environment legislation
- local government regulations.

Organisational policies and procedures may include:

- occupational health and safety
- use and maintenance of equipment and resources
- emergency and risk management procedures
- chemical handling procedures
- backwash procedures
- filtration processes
- isolation procedures
- communication protocols
- reporting and record keeping.

Relevant legislation may include:

- occupational health and safety
- relevant dangerous goods act
- relevant environment legislation.

Pool water microbiological testing may include:

- standard plate count
- coliform count
- pseudomonas aeruginosa

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• legionella • staphylococcus • cryptosporidium.
Pool water quality may include:	• microbiological count • pH • clarity levels.
Water treatment procedures may include:	• chemical disinfection • electrolytic generation of chlorine • superchlorination • shock dosing • dechlorination • chlorine stabilisation with cyanuric acid • control of algae • ozonisation • ultraviolet radiation • alkalinity adjustments • calcium and total hardness adjustments • lowering total dissolved solids • pool water filtration and recirculation • backwashing • manual removal of visible contaminants.

consistent with the Evidence Guide.

1. Conduct pool water tests.	1.1. Complete ***routine pool water tests*** according to ***public health regulatory requirements***, ***organisational policies and procedures*** and ***relevant legislation***.
	1.2. Compare and interpret pool water test results with public health regulatory requirements.
	1.3. Report pool water test irregularities to aquatic facility or to service personnel for corrective action.
	1.4. Respond to contamination incidents according to public health regulatory requirements, organisational policies and procedures and relevant legislation.
	1.5. Perform continual visual checks of ***pool water quality*** and initiate corrective actions.
2. Record results.	2.1. Record routine pool water test results according to aquatic facility specifications and public health regulatory requirements.
	2.2. Update swimming pool log according to aquatic facility specifications and organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - report irregularities to aquatic facility or service personnel
  - initiate corrective actions
- problem-solving skills to:
  - conduct a variety of routine pool water tests
  - identify irregularities in results
  - respond to contamination incidents
- planning and organisational skills to conduct regular pool water tests according to facility schedule
- literacy skills to:
  - record pool water test results
  - update swimming pool log
- numeracy skills to identify and interpret routine test results.

© Commonwealth of Australia, 2025 Public Skills Australia

Required knowledge

- legislation and organisational policies and procedures that enable:
  - safe conduct of pool water tests
  - appropriate response to contamination incidents
  - correct maintenance of swimming pool logs
- public health regulatory requirements and aquatic facility specifications for:
  - comparing and interpreting pool water test results
  - recording pool water test results
- pool water chemistry to understand scientific terms related to tests such as pH levels, alkalinity, chlorine, bromine, temperature and calcium hardness
- equipment and resources used for testing pool water quality.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • conducts pool water tests and reports irregularities to aquatic facility or service personnel promptly, according to public health regulatory requirements and organisational policies and procedures • records pool water test results and updates pool log according to organisational policies and procedures and relevant legislation • performs routine visual checks for pool water quality and proposes corrective actions in response to contamination incidents.
Context of and specific resources for assessment	Assessment must ensure conduct of regular pool water tests to monitor water quality over a realistic aquatic facility timeframe. Assessment must also ensure access to: • an aquatic facility with a suitable pool • equipment, resources and pool water testing apparatuses to test water quality • public health regulatory requirements, relevant

© Commonwealth of Australia, 2025 Public Skills Australia

legislation and organisational policies and procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate using pool water testing apparatuses and equipment
- oral or written questioning to assess knowledge of the application of routine pool water quality tests
- observation of reading and recording test results
- portfolio of written recordings detailing test irregularities, pool water test results and log updates
- third-party reports from a supervisor detailing the candidate's performance on the job.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXOHS101A Follow occupational health and safety policies

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Routine pool water tests may include:

- free chlorine
- total bromine
- total chlorine
- combined chlorine
- pH
- alkalinity
- cyanuric acid
- calcium hardness
- total hardness
- temperature.

Public health regulatory requirements may include:

- health and poisons acts
- infectious diseases regulations
- dangerous goods act and regulations
- metropolitan water supply, sewerage and

© Commonwealth of Australia, 2025 Public Skills Australia

	drainage by-laws • occupational health and safety act • environment legislation • local government regulations.
Organisational policies and procedures may include:	• occupational health and safety • communication protocols • use and maintenance of equipment and resources • reporting and record keeping • emergency and risk management procedures.
Relevant legislation may include:	• occupational health and safety • dangerous goods • environment.
Pool water quality may include:	• microbiological • disinfectant • pH • clarity.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify community values	1.1. Range of groups in community is identified through interaction with community members and groups to determine potential diversity of values. 1.2. Values held by various sections of the community relevant to program activities are identified for planning of promotional and group activities. 1.3. Cultural authority is identified in indigenous communities and groups to implement appropriate protocols. 1.4. Community leaders in terms of community involvement and opinion making are identified from community interaction.
2. Research community history and plans	2.1. History of community relevant to program is identified for use in promotional, educational and group activities. 2.2. Relevant documents, symbols, places of value and oral traditions are identified to place program and group in local context. 2.3. Community plans are identified for use in promotional, educational and group activities.
3. Establish role of group in community	3.1. Potential roles of program and group to community are identified for use in group activities. 3.2. Interaction with community is managed to build rapport with individuals and groups.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3. Consultation processes are established and maintained with community members and groups. 3.4. Image of group and program in community is maintained by acknowledging community concerns and promoting positive image of group and program.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• identify community values • research community history and plans • conform to social protocols for a range of cultures in the community • develop an approach that is inclusive of indigenous gender issues • source key information from community sources including approaching leaders • establish role of groups within the community • use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record complex workplace measures • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• relevant government and community action programs • processes for development and delivery of programs • typical community and local government structures and organisation • group processes • broad Australian and regional history • current social and environment affairs for local community and wider region • rural industry operation and processes (for rural programs) • process for identifying cultural protocols

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• understanding of what may be noteworthy to community and newsworthy to media.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • investigate the diversity of groups within a community and their culture • identify the roles of informal leaders and influencers in community groups, as well as elders in indigenous communities • research the background and goals of community groups, and their attitudes and perspectives on natural resource management issues • plan for consultation within the community by working with the cultures and goals of the groups that comprise it.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain contact on group activities	1.1. Contact is maintained with group leaders/officers on current and proposed group activities and projects. 1.2. Advice on group operation and opportunities is provided when sought by leaders/officers. 1.3. Role of facilitator/coordinator in group operations is clearly defined with the management committee to avoid misunderstanding.
2. Provide fresh input into group	2.1. Relevant new initiatives and ideas from other groups and program areas are identified for input into/suggestion to the group. 2.2. New initiatives and ideas are systematically sought from appropriate sources. 2.3. Any suggestions are developed before submission to include local group and program context.
3. Maintain network of contacts	3.1 Contacts with members of the group and community are maintained to provide interchange of ideas and information.
4. Facilitate resolution of group operating difficulties	4.1. Group issues with potential to hinder group operations are identified before damage has occurred. 4.2. External threats are assessed to facilitate negotiation of solutions between the group and external parties. 4.3. Internal operating difficulties are resolved where possible through facilitation and use of relevant expert advice. 4.4. Groups requiring major restructuring are identified

SISXRES402A Support implementation of environmental management practices

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to support the implementation of environmental management practices within an organisation. The unit focuses on working effectively within organisational management systems to support staff to implement environmental management practices in their work tasks and to review outcomes.

Application of the Unit

This unit applies to those working autonomously and with supervisory roles in a sport, recreation or fitness environment. This includes those in roles such as team leaders, coordinators and facility managers. These roles may be performed in a range of sport and recreation environments, such as leisure centres, fitness centres, and indoor activity centres, or as part of outdoor recreation activities.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Provide information to staff.	1.1. Access and analyse the organisational ***environmental management plan*** according to ***relevant legislation*** and ***organisational environmental policies and procedures***. 1.2. Explain the environmental management plan to staff using appropriate communication strategies. 1.3. Convey information about current organisational programs and activities to support the implementation of environmental management practices.
2. Assess implementation of environmental management practices.	2.1. Determine staff participation in the implementation of environmental management practices according to organisational policies and procedures. 2.2. Determine barriers to effective staff implementation of organisational environmental management practices. 2.3. Identify areas for modification or improvement in implementation of existing environmental management practices. 2.4. Determine new areas that require implementation of environmental management practices according to organisational policies and environmental management plan.
3. Develop initiatives to improve implementation of environmental management practices.	3.1. Identify, research and collate information to assist staff to apply environmental management practices and to address needs. 3.2. Consult with relevant personnel to identify potential ***programs or activities*** to improve implementation of environmental management practices. 3.3. Identify ***aims of initiatives*** for the implementation of environmental practices and expected outcomes. 3.4. Assess and determine the most suitable ***strategies to implement initiatives*** according to organisational policies and procedures. 3.5. Establish information needs and opportunities for community involvement in supporting the initiatives.
4. Implement initiatives	4.1. Identify and access resources within budgetary

ELEMENT	PERFORMANCE CRITERIA
to improve staff implementation of environmental management practices.	constraints to support the achievement of required outcomes. 4.2. Identify physical facilities and equipment in line with organisational budgetary constraints. 4.3. Identify personnel to support the achievement of outcomes. 4.4. Promote organisational programs and activities to implement environmental work practices.
5. Monitor and review initiatives to implement environmental management practices.	5.1. Collect and analyse regular data to provide accurate measures of outcomes and ***effectiveness of initiative***. 5.2. Make comparisons with required outcomes to assess performance and report to ***designated personnel***. 5.3. Make recommendations to designated personnel for changes to strategies and systems as required. 5.4. Implement changes to strategies and systems to ensure outcomes are achieved according to organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - liaise with designated personnel to report progress and outcomes of initiatives to support implementation of environmental management practices
  - interact with staff to convey information about organisational environmental management practices
  - elicit information about current barriers to implementing environmental management practices
- problem-solving skills to:
  - review and evaluate outcomes of initiatives to support implementation of environmental management practices
  - make recommendations for improvements to future initiatives
- planning and organising skills to:
  - monitor and implement initiatives and strategies
  - access and use resources necessary to achieve effective outcomes
  - integrate program goals with organisational goals
- language and literacy skills to:

© Commonwealth of Australia, 2025 Public Skills Australia

  - read and analyse information about environmental management practices, organisational policies and procedures, and relevant legislation
  - interpret and apply information arising from review processes
- numeracy skills to work within budgetary restraints to plan and implement initiatives, such as programs or activities that support environmental management practices.

Required knowledge

- legislation and organisational policies and procedures to enable analysis of the organisational environmental management plan
- organisational environmental management plans and objectives to enable the development of initiatives that meet organisational goals as well as broader organisational strategic plans
- environmental issues specific to work practices and work environment to enable the development of initiatives and strategies that address specific environmental management requirements
- environmental management practices to enable the development of programs and strategies that are informed by best practice in environmental management
- community needs and expectations to ensure that environmental practices are relevant
- organisational structures and services to identify roles and responsibilities in implementing and monitoring environmental management practices
- training opportunities and networks to enable staff to access learning opportunities
- environmental legislation to enable the development of initiatives that meet legal requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • analyses organisational environmental management plan to develop, implement and monitor initiatives that support effective environmental management practices • uses resources efficiently and responsibly according to budgetary constraints to support the achievement of identified outcomes • applies a continuous improvement approach to evaluate and recommend potential improvements to

© Commonwealth of Australia, 2025 Public Skills Australia

strategies.

Context of and specific resources for assessment	Assessment must ensure development, implementation and monitoring of practices that support environmental management and are relevant to the candidate's current or intended work environment. Assessment must also ensure access to: • an organisational management plan relevant to the candidate's current or intended work environment • sources of legislative requirements and organisational environmental management plan.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of interacting with staff to provide information about environmental management practices • observation of planning, monitoring and modifying initiatives to implement effective environmental management practices • oral and or written questioning to assess knowledge of environmental management practices and approaches • third-party reports from a supervisor detailing work performance over multiple applications • review of portfolios of evidence to show initiatives undertaken and evaluation outcomes. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISXRES403A Use resources efficiently.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Environmental management plan	• aims and objectives • resources

© Commonwealth of Australia, 2025 Public Skills Australia

may include:	• environmental performance indicators • energy and water management • strategies and action plan.
Relevant legislation may include:	• environmental protection • tenure • local laws and by-laws • ordinances.
Organisational environmental policies and procedures may include:	• waste management • land management.
Programs or activities may include:	• business sustainability • environmental load reduction • waste management • energy saving.
Aims of initiatives may include:	• raise awareness • identify problems and make improvements • increase skills and knowledge • increase community participation • encourage feedback for improvement.
Strategies to implement initiatives may include:	• experts or consultants with relevant skills • workplace environmental projects • participation in community projects • tenders for goods and services.
Effectiveness of initiative may include:	• consistency of involvement • level and quality of training provided • level and quality of benefit derived • outcomes achieved and goals for improvement.
Designated personnel may include:	• managers • supervisors.

SITXMPR001A Coordinate production of brochures and marketing materials

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to coordinate the development of brochures and other marketing materials. It requires the ability to source information to be included; obtain production quotations; develop or outsource copy; and design, check and approve final content.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit describes a complex sales and marketing skill for those working within the service industries and applies to the full range of industry sectors and environments.

Brochures and marketing materials can be devised to promote any product, service or event; a group of products being cooperatively marketed; or even a whole city, region or tourist precinct.

This unit does not include all the skills of a professional graphic designer or copywriter. Rather it reflects the more general skills needed by a large range of service industry personnel involved in sales and marketing activities.

Frontline sales and marketing personnel who operate with some level of autonomy or under limited supervision and guidance from others would be responsible for coordinating the production of brochures and marketing materials. Managers and owner-operators of small businesses would also undertake this activity.

© Commonwealth of Australia, 2025 Public Skills Australia

Prerequisite units	Nil

Employability Skills Information

Employability skills	The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1 Plan the production of brochures and marketing materials.	1.1 Plan for the production of ***brochures and marketing materials*** according to organisation objectives, marketing focus and other issues that impact on the production process. 1.2 ***Consider factors*** in the planning of brochures. 1.3 Create detailed action plans for the production process, including timelines, responsibilities and budget.
2 Produce information for inclusion.	2.1 Produce or obtain from the appropriate source accurate and complete ***information for inclusion***. 2.2 Present information in a clear and easily understood format. 2.3 Present information in a culturally appropriate way.
3 Obtain quotations for artwork and printing as appropriate.	3.1 Provide ***accurate and complete specifications*** to quoting organisations within appropriate timeframe. 3.2 Obtain comprehensive quotations with full details of potential variations to cost and conditions that may apply.
4 Develop final copy for brochures and marketing materials.	4.1 Develop copy using basic creative writing techniques or outsource to sell the products presented. 4.2 Produce copy that provides accurate practical and operational details. 4.3 Present all costs accurately with notes about conditions that may apply. 4.4 Present general conditions clearly and accurately according to organisation policy. 4.5 Check all copy for accuracy prior to submission to internal or external art house or printers.
5 Coordinate the print production of brochures and marketing materials.	5.1 Liaise with production house or responsible staff members in a manner that permits accurate monitoring of production schedule. 5.2 Check and correct all production work as required. 5.3 Re-check and gain approval of appropriate authority only

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	when totally accurate.
	5.4 Approve artwork according to organisation guidelines prior to commencement of printing.
	5.5 Obtain and deliver brochures and marketing materials on schedule and establish contingency plans to allow for situations where timelines may be exceeded.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- high-level literacy skills to create copy or check quality of outsourced copy, to interpret quotations and conditions and to proofread all contents of draft materials
- high-level verbal and written communication skills to explain complex requirements and specifications
- high-level numeracy skills to calculate costs and quantities of materials to be produced, sizing of layouts and components, and total size of final materials.

The following knowledge must be assessed as part of this unit:

- in-depth understanding of the objectives of the material and knowledge of the market for which material is required
- general awareness of potential of material for use on websites
- print production processes and terminology, including copy, film, artwork, 2-colour process, 4-colour process, final art, proofreading, bromide, print-ready, PDF file, author's corrections and transparencies
- printing and industry conventions in relation to placement of information, page numbering and copyright information
- quality indicators in brochure production, including readability, photographic quality, effective use of colour and spacing requirements
- current production technology
- creative writing techniques used for the content of brochures and other marketing materials
- procedures and requirements for preparation and proofing of material
- broad understanding of copyright laws and restrictions that apply to the inclusion of certain materials and content within brochures and other marketing materials

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- procedures for copyright clearance of restricted materials.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- coordination of all elements of development and production process for brochures and marketing material
- ability to produce materials that meet stated objectives, provide current and accurate information and are free of errors
- knowledge and understanding of current production processes and terminology and copyright restrictions
- production of brochures and marketing materials within typical workplace time constraints that meet determined deadlines.

Context of and specific resources for assessment

Assessment must ensure:

- that the candidate has accessed a fully equipped office environment using appropriate computers, printers, communication technology, information and software programs to facilitate the processes involved in coordinating the production of brochures and marketing materials
- access to an operation for which brochures and marketing materials would be developed, or access to comprehensive and sufficient information about that operation to allow the candidate to fully coordinate the production of actual brochures and marketing materials to meet a specified market need for a commercially realistic operation
- access to technology and materials for the production

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	of brochures and marketing materials • interaction with suppliers such as graphic designers, print production organisations and copywriters.
Methods of assessment	A range of assessment methods should be used to assess the practical skills and knowledge required to coordinate the production of brochures and marketing materials. The following examples are appropriate for this unit: • evaluation of brochures or other marketing materials produced by the candidate • written and oral questioning or interview to test knowledge of brochure coordination and production processes, copyright laws and clearance procedures • review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SITXMGT006A Establish and conduct business relationships • SITXMPR004A Coordinate marketing activities.
Assessing employability skills	Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Determine requirement for inspection**	1.1 Need for inspection is identified 1.2 Scope of inspection is determined based on the legislative provisions and the organisation's requirements relating to the inspection 1.3 Power of entry is determined in accordance with the legislative requirements
2. **Conduct inspection**	2.1 Designated area to be inspected is identified and defined 2.2 Inspection is conducted in accordance with the organisation's policies and procedures 2.3 ***Non-compliance***/possible ***breaches*** are detected and recorded in accordance with legislative and the organisation's requirements
3. **Determine appropriate action to achieve compliance**	3.1 Consultation is undertaken with the owner/occupier or alleged offending party to facilitate resolution in accordance with the organisation's procedures, if applicable 3.2 Options for ***action*** are identified that will enable compliance to be achieved 3.3 A practical action plan to achieve compliance is developed as a result of consultation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.4 Action is undertaken to achieve compliance
4. **Prepare report**	4.1 A report is compiled and submitted to satisfy the intent of the inspection in accordance with the organisation's requirements
	4.2 Details of the offence/breach are recorded and a clear report recommending action is submitted to appropriate personnel in accordance with ***organisational policies and procedures***
	4.3 Infringement notices are initiated or processed, or the offence is reported according to organisational procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

inspection techniques

record keeping

providing written reports

verbal and written communication with public

using appropriate technology to gather information

negotiating

problem solving

analysing options for action

Required Knowledge

potential risk to public

potential risks to environment

risk management procedures

organisation's policies and procedures relating to conducting routine and non-routine inspections, reporting risks, reporting breaches, collection of information, dealing with complainants, completing reports of incidents and complaints, issuing notices

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

legislation for which organisation has responsibility for and must align to legislative requirements relating to issuing of notices, reporting risks to public and environment

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence is demonstrated in: accurate identification and assessment of situation found comprehensive inspection within policy adherence to legislative and organisation's requirements accurate and comprehensive recording and reporting **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated work environment. Written or verbal tests may be used as supporting evidence **Specific resources for assessment** No special requirements
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised***

RANGE STATEMENT

wording in the Performance Criteria is detailed below.

Breaches/non-compliance may include	non-compliance to building controls, reasonable requests in an emergency situation or disregarding fire bans or hazard warnings chemical spills, pollution maintenance of fire safety systems
Timeframe may include	state or territory statute of limitations, organisation's policies, procedures and guidelines
Information may include	written records, oral, anecdotes, reports, instructions, directions from supervisor/management interviews - formal and informal team meetings reports from other organisations, reports from experts media reports
Organisational policy and procedures may include	legislation relevant to compliance legislation relevant to the organisation operational, corporate and strategic plans organisational procedures, policies and guidelines operational performance standards
Appropriate action may include	isolating site contacting supervisor contacting other emergency services contacting relevant authorities processing infringement notices in accordance with organisational requirements recommendations
Procedures for advising complainants may include	verbal, telephone, facsimile, letters, standard forms
Gathering and recording of information may include	photographs, statements, diagrams, sketches, storing, handling and processing physical information
Reports of incident may include	diary, standard form, written report

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Provide advice on prevention strategy**	1.1 ***Public safety risk prevention strategies*** are identified taking into account available information on hazards and environmental conditions 1.2 Public safety risk prevention strategies are assessed against organisation's criteria 1.3 Advice is provided to ***local forums*** on public safety risk prevention strategies in accordance with ***organisational policy and procedures*** 1.4 Advice provided takes into account type of risk, locality, and protection of life, property and the environment
2. **Implement and monitor prevention strategies**	2.1 Risk prevention activity is implemented in accordance with selected strategies 2.2 Prevention activities are communicated to and coordinated with ***relevant authorities*** and other ***responsible organisations*** 2.3 Progress reports are provided to ***stakeholders*** in line with organisational policies and procedures
3. **Review implementation of prevention strategies**	3.1 Stakeholders are advised of the outcome of the implementation in line with organisational policy and procedures 3.2 Recommendations are documented and provided to appropriate personnel as proposed

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	amendments to prevention strategies

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

resolve conflicts

ability to negotiate

analyse needs

communication

Required Knowledge

legislative requirements relevant to emergency management

problem solving and decision making techniques

emergency management concepts and principles

techniques for the prioritisation and evaluation of public safety risk management systems

organisation's policy and procedures

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in ability to effectively implement the selected public safety risk prevention strategy

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	Consistency in performance Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** Underpinning knowledge may be assessed through written assignments, project reports, debriefings and action learning projects **Specific resources for assessment** For the demonstration of competence in this unit it will be necessary to provide a real life environment and/or simulations based on real life incidents. These resources may involve complex scenarios sufficient to allow evidence to be gathered from a variety of sources and stakeholders on more than one occasion and over an extended period of time
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Relevant authorities and other responsible organisations may include	operative and support organisations other emergency organisations water, gas and power agencies welfare and counselling organisations medical organisations equipment suppliers contractors community service organisations land management agencies

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	Federal, State and local government authorities
Local forums may include	local councils
	local emergency management committees
	community groups
	schools
Documentation may include	emergency procedures
	standard operating procedures
	relevant Australian or international documentation disaster/ emergency management
	organisational and workplace operating procedures and policies
	evacuation procedures
	occupational health and safety procedures
	applicable State/Territory, Commonwealth legislation and regulations
	risk and hazard analysis

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Determine requirement, scope and outcome of inspection**	1.1 Requirement for inspection is determined 1.2 Scope of inspection is determined based on organisation's requirements relating to the inspection
2. **Identify the fire safety systems on the building plan and associated documentation and locate the actual systems in the building**	2.1 Class of building and nature of occupancy is identified 2.2 ***Fire safety systems*** and components are correctly identified on the building plans and associated documentation 2.3 Using the building plans and associated documentation, the fire safety systems are located in the building 2.4 Variations between the plans and the actual locations are recorded
3. **Verify the actual fire**	3.1 The building plan and associated documentation

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
safety systems with the building plan and associated documentation	are compared with the actual location of the building's fire safety systems 3.2 Variations between the building plans and associated documentation and actual locations are recorded
4. **Review compliance of the building fire safety systems**	4.1 Building fire safety systems are checked against design requirements and relevant standards 4.2 Building emergency organisation's structure is checked against design requirements and relevant standards 4.3 Maintenance procedures and log books are checked against design requirements and relevant standards 4.4 Variations to design requirements and relevant standards are noted and reported
5. **Assess the operation and maintenance of the fire safety systems**	5.1 Maintenance requirements are identified and examined 5.2 Maintenance records are located and examined 5.3 Fire safety systems are tested in conjunction with a building representative and recorded and reported in accordance with the organisation's and/or owner/occupier requirements
6. **Report on the inspection of the building fire safety system**	6.1 Variations to building plans and associated documentation are described 6.2 Information on the review of the building's fire safety systems compliance is provided 6.3 Reports are distributed according to the organisation's policies, legislative requirements and/or owner/occupier requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

interpret building plans in relation to fire safety systems

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

locate and identify components of the building fire safety system

operate and reinstate fire safety systems in accordance with the organisation's requirements

Required Knowledge

relevant standards

types of fire suppression systems

methods of operation of fire suppression systems

types of detection and alarm systems

building evacuation systems

role of emergency management organisation

egress routes and housekeeping practices

relevant manufacturers' specifications

maintenance procedures

specific building design requirements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential that competence is demonstrated in: comparing the building's actual fire safety system against the system on the building plans and associated documentation inspecting and determining the building's fire safety system against design requirements or other relevant standards knowledge of building regulations in the area of responsibility knowledge of the Building Code of Australia reporting on the inspection and highlighting variations **Consistency in performance**

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** Evidence of competence may be demonstrated on the job through actual inspections Verbal or written assessment of knowledge components may be used as supporting evidence **Specific resources for assessment** This unit will require a site and building plans and associated documentation for an actual inspection
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Installed fire safety systems must include	fire sprinkler systems fire detection and alarm systems
and may also include	communications systems fire suppression systems (including hydrants and boosters) building control systems building design requirements Emergency Warning and Intercommunication System (EWIS) emergency vehicle access - egress systems fire/emergency control centres/rooms smoke hazard management fire resisting structures/compartmentation

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Operation of these systems must include compliance with	organisation's procedures Building Codes Australia, AS/NZ Standards and building regulations
and may also include	manufacturers' specifications
Emergency access-egress systems, must include	emergency lifts emergency lighting and power systems emergency warning and intercommunication systems exit signs exit doors emergency vehicular access exit and egress pathways

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify *regulatory information* needs and sources**	1.1 The information needs of individuals/managers are determined and the sources are identified 1.2 Information held by the organisation is reviewed to determine suitability and accessibility 1.3 Plans are prepared to obtain information which is not available or accessible within the organisation
2. **Collect and analyse regulatory information**	2.1 ***Collection*** of information is timely and relevant to the needs of individuals/managers 2.2 Information is in a format suitable for ***analysis***, interpretation and dissemination 2.3 Information is analysed to identify relevant trends and developments in terms of the needs for which it was acquired
3. **Use management information systems**	3.1 ***Management information systems*** are used to store and retrieve data for decision making 3.2 Technology available in the work area/organisation is used to manage information 3.3 Recommendations for improving the information system are submitted to designated persons/groups

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
4. **Record and support regulatory information**	4.1 The results of information gathering, analysis and synthesis are reported within specific time frames and to the standards defined by the organisation 4.2 The results of information gathering, analysis and synthesis are reported and used to inform policy development and organisation decision-making 4.3 Information which is gathered is disseminated to appropriate personnel within the specified timeframe

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Collect plans and documentation**	1.1 Appropriate building plans and documentation to undertake the assessment are obtained 1.2 Additional information where required is sourced from the appropriate parties
2. **Assess building plans and associated documentation**	2.1 ***Fire safety systems*** are correctly identified on the building plans and associated documentation 2.2 Building plans and documentation are checked in accordance with the organisation's requirements and relevant codes, regulations and standards 2.3 Variations between the plans and the actual locations are assessed and recorded
3. **Report on the assessment of building plans and associated documentation**	3.1 Variations to building plans and associated documentation are documented and reported 3.2 Recommendations arising from the assessment are documented and reported in accordance with the organisation's requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

identify and interpret building plans in relation to fire safety systems

apply knowledge of firefighting and organisational requirements for assessing building plans

Required Knowledge

regulations, codes and standards

building and drafting terms and practices

organisation's procedures

equipment manufacturer's specifications

maintenance procedures

design documentation and reporting

types of fire safety systems

building class and type of construction

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence is demonstrated in: identification of plans and associated documentation required to undertake an assessment of a building plan ability to review the building's fire safety system against design requirements knowledge of codes, regulations and standards reporting on the assessment of building plans **Consistency in performance** Evidence should be gathered over a period of time in a

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** Evidence of competence may be demonstrated on the job or in a simulated workplace environment Verbal or written assessment of knowledge components may be used as supporting evidence **Specific resources for assessment** This unit will require a site and building plans and associated documentation for an actual or simulated assessment
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Installed fire safety systems must include	fire sprinkler systems fire detection and alarm systems communication systems fire suppression systems (including hydrant, booster) building control systems building design requirements emergency warning and intercommunication system (EWIS) emergency vehicle access - egress systems fire/emergency control centres/rooms smoke hazard management fire resisting structures/compartmentation
Operation of these systems	organisation requirements

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

must include compliance with	Australian Standards, Building Code of Australia and building regulations building regulations
and may also include	manufacturers' specifications

PSPREG402C Promote client compliance

Modification History

PSPREG402C Release 2: Layout adjusted. No changes to content.

PSPREG402C Release 1: Primary release.

Unit Descriptor

This unit covers provision of information, encouragement and advice by personnel in regulatory/compliance/law enforcement roles in one-to-one and group situations to raise awareness, encourage understanding and improve compliance with legislative requirements and/or standards. It includes advising and assisting clients to comply with legislation or standards, and implementing communication strategies to improve compliance.

In practice, promoting client compliance may overlap with other generalist or specialist public sector work activities, such as providing client service, acting ethically, exercising regulatory powers, assessing compliance, acting on non-compliance, etc.

This unit replaces and is equivalent to PSPREG402B Promote client compliance with legislation.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

competency. Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Advise and assist clients to comply with legislation or standards	1.1 ***Client*** needs, expectations, ***attitudes***, and current level of knowledge are confirmed. 1.2 Risks related to possible confrontations are identified and managed in accordance with organisational risk management and procedures. 1.3 Advice is provided to clients that is current, timely and meets the specific needs of clients in its range, depth and form of presentation. 1.4 Feedback is obtained on clients' levels of understanding and additional information or explanation is used to clarify issues if required. 1.5 ***Information*** is provided to promote the benefits of compliance and the consequences of non-compliance. 1.6 Clients are advised of processes and timelines when interpretation/advice from others is needed for complex matters.
2. Implement communication strategies to improve compliance	2.1 ***Communication strategies*** are tailored to the audience and the *context.* 2.2 ***Presentation standards*** are applied in accordance with organisational guidelines and the needs of clients. 2.3 Community rights and responsibilities and avenues for public redress under ***legislation/standards*** are highlighted when applicable. 2.4 Conflict resolution techniques are used if necessary and safety of self and others is protected in accordance with legislation, policy and procedures. 2.5 Content and presentation of communication strategies are adjusted in response to feedback gathered from a range of clients.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Look for evidence that confirms skills in:

- providing advice and discussion involving exchanges of sometimes complex oral information
- working with people - conflict resolution, coaching, problem solving
- delivering presentations tailored to the needs of a range of people from diverse backgrounds
- responding to diversity, including gender and disability
- reading and explaining complex and formal documents such as legislation and their application to clients' situations
- using active listening and questioning strategies to clarify understanding
- using information technology to access relevant legislation and guidelines
- applying occupational health and safety and environment procedures relating to the promotion of client compliance

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- relevant legislation, standards, policies and legal precedents
- consequences of non-compliance
- terminology used in legislation and procedures
- organisational procedures, guidelines and protocols
- delivery approaches to address a range of learning styles
- industry knowledge
- equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to the promotion of client compliance

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPGOV402B Deliver and monitor service to clients

© Commonwealth of Australia, 2025 Public Skills Australia

PSPGOV408A Value diversity

PSPGOV422A Apply government processes

PSPLEGN401A Encourage compliance with legislation in the public sector

PSPPOL404A Support policy implementation

PSPREG401C Exercise regulatory powers

PSPREG403B Assess compliance

PSPREG405B Act on non-compliance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- promotion of client compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards
- public sector values and codes of conduct
- presentation materials and communication techniques to suit diverse audiences
- case studies and workplace scenarios to capture the range of compliance situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when promoting client compliance, including coping with difficulties, irregularities and breakdowns in routine
- promotion of client compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people

© Commonwealth of Australia, 2025 Public Skills Australia

- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Clients may include:

- individuals
- organisations
- general public
- key stakeholders from industry
- industry groups
- unions
- students
- community
- specific interest groups
- other government agencies

Attitude may include:

- compliant/willing to comply
- interested
- helpful
- negative
- aggressive
- violent

© Commonwealth of Australia, 2025 Public Skills Australia

Information may include:	• verbal advice or explanation • written materials • brochures • videos • electronic media: floppy disk, CD-ROM, email, Internet
Communication strategies may include:	• one-to-one • informal discussion • telephone call • small group discussion/presentation • large group presentation • written paper-based or electronic presentation • teleconference • video-conference
Contexts may include:	• telephone • face-to-face • public forums • in the workplace • in the field • front counter • call centres • video-conferencing • email • web site
Presentation standards may include:	• dress • punctuality • preparedness • manner • handouts • overhead transparencies/slide shows • questioning techniques • customisation to meet the needs of a diverse workplace
Legislation and standards may include:	• enabling and related legislation • public sector standards • organisational policy and procedures • equal employment opportunity and anti-discrimination law

PSPPOL401A Contribute to policy development

Modification History

PSPPOL401A Release 2: Layout adjusted. No changes to content.

PSPPOL401A Release 1: Primary release.

Unit Descriptor

This unit covers the provision of input to the policy development process by all public sector staff and other stakeholders who are not policy specialists (i.e. they are not responsible for developing policy). It includes contributing to the consultative, validation and review phases of policy development, and providing feedback on the policy development process.

Assistance to the policy development process by specialist policy research officers responsible for aspects of policy development is covered in the unit *PSPPOL402A Assist with specialist policy development*, rather than this unit.

In practice, contributing to the development of policy may overlap with other generalist or specialist work activities such as applying government processes, providing client services, gathering and analysing information, providing input to change etc.

This unit replaces *PSPPOLD401A Contribute to the development of policy*, and contains additional requirements. The units are not equivalent.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to the consultative phase of policy development	1.1 Opportunities to contribute to ***policy*** development are ***identified*** and responded to in accordance with organisational needs, government directions and priorities. 1.2 Information on the policy development process, timelines and expected outcomes is communicated to interested parties in accordance with ***public sector requirements***, to ensure likely ***stakeholders*** are aware of, and able to engage in, policy development that may affect them. 1.3 Information on policy requirements and existing policies and procedures likely to be impacted, is ***gathered*** from within and ***outside*** the immediate work environment, recorded and provided in accordance with organisational procedures.
2. Contribute to the validation stage of policy development	2.1 Draft policy is analysed and the likely implications for government service delivery are identified in consultation with ***those likely to be affected***. 2.2 Draft policy implications for work processes and outcomes are evaluated and recorded. 2.3 Likely implementation issues, dissenting stakeholders and transition requirements are identified and recorded. 2.4 Feedback on draft policy is provided as unambiguous, objective advice supported by evidence provided in accordance with organisational procedures.
3. Provide feedback on policy development	3.1 Information relating to the process of policy development is gathered, stored and analysed during policy development, as required. 3.2 Oral or written feedback on the policy development process and the final policy is provided to the policy developer in accordance with organisational procedures.
4. Contribute to the review of policy	4.1 Information relating to the expected outcomes of the policy is gathered, recorded, analysed and provided before, during and/or following policy implementation, as required. 4.2 Unanticipated consequences of policy and suggestions for dealing with them are identified and reported immediately in

ELEMENT	PERFORMANCE CRITERIA
	accordance with organisational procedures and protocols.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation and making judgments on their impact on the organisation
- working with others to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- accessing policies and legislation electronically or in hard copy
- undertaking research involving collecting and analysing data for evaluation
- preparing written reports requiring precision of expression
- identifying and addressing the environmental, sustainability and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- current policies underpinning the work area
- the policy cycle
- organisation and government processes and procedures
- public sector code/s of ethics and code/s of conduct
- principle of community and stakeholder engagement in policy development
- equal employment opportunity, equity and diversity principles
- environmental, sustainability and occupational health and safety implications of policy/s being developed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Units to be assessed together

	4.2 Provide opportunities for validation of research findings
	4.3 Report research results and make them available to all relevant stakeholders

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Current and suitable research methodologies, including community based research and participatory research
- Research interview techniques, including consultation methods, protocols and practice
- Information systems, manual and electronic
- Report presentation
- Cultural implications of research methods
- Cultural analysis of information
- Cultural knowledge and ownership issues
- Research ethics

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Carry out research activities that are directly relevant to the organisation and/or the community

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
  - consultation methods
  - complex communication
  - negotiation with a wide range of known and unknown stakeholders
  - interpretation and analysis of data
  - networking
  - written/oral presentation
- Utilise relevant information technology effectively in line with occupational health and safety (OHS) guidelines

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit is most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions This may include the use of languages other than English and alternative communication systems • It is recommended that assessment take place on one or more occasions but must include all aspects of research activities - preparing, implementing, analysing, and reporting on research

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities
Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resource requirements for assessment of this unit include access to: • an appropriate workplace where assessment can take place, or simulation of realistic workplace setting for assessment
Method of assessment:	• Assessment may include observations, questioning and evidence gathered from the workplace

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

The contexts for undertaking research may include:	• Preparation of a range of organisation information for policy development, strategic planning, marketing and promotion services, planning new services, reviewing existing services, providing advice to management • Responsibility for research specific to a service, its stakeholders, interests and relationship with the wider community • Specific community or client interests and issues
Stakeholders may be:	• Within the organisation • Within the community • In other areas of delivery and other services, agencies • In the education/training field • Other specialists • Management • Community leaders • Recipients of the service delivery

competency.	Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Address resourcing issues for *group activities*	1.1 Plan group activities, including consideration of: • the purposes, defined according to the identified needs of the client group • the human, financial and physical *resources* required 1.2 Where required resources are not immediately and readily available, make appropriate submissions to potential sources of assistance and resources 1.3 *Ensure formal submissions meet requirements* of funding guidelines and organisation principles and practice
2. Coordinate a group planning process	2.1 Actively seek opportunities for collaborative planning and promotion of group activities with clients and solicit, analyse and prioritise information about group's needs and expectations 2.2 Negotiate the purpose of group activities with the group in a manner that gives sufficient time and space for individuals to articulate their ideas and wishes and create opportunity for input to ownership of group processes 2.3 Translate purpose of proposed group activity into a set of aims and objectives 2.4 Analyse potential impact on group operation of the values and beliefs of both worker and client and clarify with those involved in planning and implementing group activities 2.5 Deal with contributions and suggestions to group planning processes so as to promote continued participation 2.6 Design group strategies that promote effective group operation and take into account specific characteristics of clients who will participate in the activity or program

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Manage group processes including responding to conflict	3.1 Promote opportunities for open dialogue and active listening between group members 3.2 Encourage and model sensitivity to participants, regardless of their gender, culture, ethnicity, subculture, sexuality and ability 3.3 When conflict threatens or arises: • implement strategies to prevent it within own role, power and capacity • identify and reinforce the outcomes of positive conflict • clarify and confirm relevant principles and practices of conflict resolution and seek agreement to implement them • encourage acknowledgment of respective rights and responsibilities and perceptions of all participants within the conflict situation 3.4 Offer opportunity to all participants for debriefing, *support*, mediation, consultation and facilitation throughout conflict resolution processes
4. Evaluate group activities	4.1 Ensure aims and objectives of the group activity provide the basis for evaluation and feedback 4.2 Seek feedback from all group participants on leadership style, group process, achievement of objectives, other achievements and areas for development 4.3 Document evaluation data according to organisation procedures and distribute to relevant people

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Dynamics of groups
- Different styles of group leadership and decision
- Effective communication strategies
- Organisation's policies, principles and procedures
- Organisation's and community resources
- Relevant models such as stages of group development and stages of change

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Support group activities for formal and informal groups
- Participate in a variety of the group activity types identified in the Range Statement
- Provide support for an appropriate target group, defined by factors as listed in the Range Statement

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
  - conflict management
  - developing and maintaining positive relationships
  - effective group management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit is best assessed in the workplace or in a simulated workplace under the normal of range conditions • Assessment may be conducted on one or more occasions but must enable assessment in a variety of settings with a range of both formal and informal groups
Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged
	• Resources required for assessment of this unit include access to:
	  • an appropriate workplace where assessment can take place
	  • simulation of realistic workplace setting for

EVIDENCE GUIDE

assessment

Method of assessment:	• Assessment may include observations, questioning or evidence gathered from the workplace e.g. testimonials from group members, portfolios

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Group activities may be:	• Formal or informal • Structured • Semi structured • Unstructured
Group activities may relate to:	• Discussions about relevant issues • Sporting and recreation activities • Music and performing arts • Research, planning and management • Informal education • Community service and/or action • Special interest causes
Communication with young people may include:	• Oral, written or visual means • Use of third party translation/interpretation • Any language

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify information, resource and service requirements	1.1 Employ appropriate *evaluation methods* to evaluate domestic violence *information, resources and services* available in the *community* 1.2 Review relevance of existing *community activities* and materials based on changing community needs and organisation philosophy 1.3 Accurately identify gaps and inadequacies in existing information, resources and services in accordance with *organisation standards and procedures* 1.4 Undertake research to ensure that information reflects the *underpinning values and philosophies* of domestic violence including a domestic violence prevention focus
2. Support community participation	2.1 Support community participation in line with organisation standards and procedures 2.2 Use appropriate *interpersonal and networking skills* to enlist support from *key people and groups* influencing community values 2.3 Provide opportunities for key people and groups to participate in designing and evaluating programs, *policies and strategies* to address the changing needs of the community 2.4 Undertake cooperative planning to develop appropriate policies and strategies which address the identified *community service education needs*
3. Promote domestic violence awareness	3.1 Identify and utilise relevant opportunities to formally and informally communicate and promote

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	awareness of domestic violence in line with community needs
	3.2 Promote service delivery and activities in a way that facilitates understanding and gains support
	3.3 Implement strategies to address identified gaps and inadequacies in information, resources and services in accordance with organisation standards and procedures
	3.4 Identify opportunities for *community education programs* and/or resources/services, and clarify and evaluate with key people and groups
	3.5 Evaluate and discuss community activities with key people and groups to determine future directions

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include:

- Understanding of the general principles and practices of community development, education and consciousness raising
- Knowledge of the cultural and language groups represented within the local/regional community, and a respect for their values and beliefs
- An understanding of the key people and groups within the community who are able to influence community values
- Understanding of current theory and research knowledge in the domestic violence area
- Knowledge of the processes used to formally and informally communicate the domestic violence prevention needs of the community
- Knowledge of the social, historical, political and economic context of domestic violence,

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

including types and nature of domestic violence, power and gender issues, child abuse, and associated criminal issues

- Understanding of the prevalence of myths, unhelpful beliefs, attitudes and practices in the broader society relating to domestic violence and their impact
- Knowledge of the organisation's current domestic violence activities, programs and services
- Understanding of current organisation procedures, protocols and practice for promotion of services
- Knowledge of the impacts of cultural, sub-cultural, social, sexual identity, religious, gender, age, disability, language issues etc on attitudes towards domestic violence
- Knowledge of community development principles and strategies and their application and particularly the Ottawa Charter, partnership and community consultation approaches to community development
- Understanding specific limitations of work role, responsibility and professional abilities

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Promote community awareness of domestic violence, in particular, to:
  - research and identify strategies to address inadequacies in existing community information and resources
  - develop working relationships with key people within the organisation and other services, including the community to encourage their cooperation and participation in the promotion of domestic violence issues
  - depending on the work program or services provided apply specific knowledge of particular groups or issues (e.g. alcohol and other drugs (AOD), same-sex relationships, religious, survivors/victims of domestic violence, users of violence, Aboriginal and Torres Strait Islander communities, mental health etc)
  - effectively communicate and promote awareness of domestic violence (including services and activities) using methods which are appropriate to the community

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
  - research involving analysis and evaluation for identifying domestic violence information and resource requirements of the community
  - networking in relation to establishing and maintaining relationships with key people and groups in the community
  - facilitation and presentation in relation to transferring and collecting information and

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

gaining agreement on concepts, for example presenting to community groups

- facilitation relating to providing guidance to achieve outcomes and gain agreement on concepts and for enlisting support from key people and groups within the community
- report writing requiring analysis and evaluation of information in a defined range of areas, for example when bringing together results of research for recommending policies and strategies to address community needs
- problem solving for a broad range of problems involving analysis, assessment and evaluation for the development of new ways of addressing domestic violence issues which address changing community needs and attitudes and help to raise community awareness
- project planning in relation to scope, time, cost, quality, and communication requirements when planning new community education activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit will be most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions • Assessment of performance should be over a period of time covering all categories within the Range Statement statements that are applicable in the learning environment This will include contexts applicable to the work environment, such as actual or simulated workplace situations involving a combination of direct, indirect and supplementary forms of evidence

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Access and equity considerations:

- All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

Context of and specific resources for assessment:

- This unit can be delivered and assessed independently, however holistic assessment practice with other community services units of competency is encouraged
- Resources required for assessment of this unit include access to:
  - an appropriate workplace where assessment can take place or simulation of realistic workplace setting for assessment
- Where assessment is conducted within the workplace there are no resource implications above those normally available in the workplace
- Where assessment is conducted in a simulated or non-workplace environment then access to the necessary equipment and research resources should be provided
- Access to simulated exercises, case studies related to service delivery issues will also be required if non-workplace assessment paths are utilised

Method of assessment:

- Evidence will be determined by selection from the Range Statement, justified in terms of work requirements, work roles and responsibilities and occupational specialisations
- Evidence for assessment of competence may be gathered by appropriate combination of the following:

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

- demonstration of competency within the working environment to promote community awareness of domestic violence and the promotion of prevention of domestic violence
- where there is not an opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios
- observation of processes and procedures, oral and/or written questions on Essential knowledge and skills and consideration of required attitudes
- where performance is not directly observed and/or is required to be demonstrated over a period of time and/or in a number of locations, any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons
- review of any documentation produced by the candidate related to needs analysis and/or community development service delivery evaluation

Related units:

This unit should be assessed after or in conjunction with related unit:

- CHCDFV402C Manage own professional development in responding to domestic and family violence

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit/s:

- CHCCD514C Implement a community development strategy
- CHCCD402C Provide education programs

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Methods to collect information may for instance include:	• Interviews with clients, family, significant others and carers • Questionnaires • Applications and other forms • Case documentation • Using specialist communicators • Classification tools • Information from professionals including medical reports • Information from service providers • Previous file records • Client consent (verbal and written)
Evaluate methods to evaluate information, resources and services available may include:	• Qualitative and quantitative • Consultative and participatory • Diagnostic or summative • Any combination of the above • Sampling techniques such as: • Observation of work activities • Workshops and meetings • Questionnaires • Surveys
Information, resources and services may include:	• Culturally appropriate literature and media that is relevant to specific needs groups e.g. Visually impaired • Skills/administrative support • Facilities, educational materials, equipment • Funding • Developmental training • Staff development programs, community

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

development programs

Services include but are not limited to:

- Government agencies/departments
- Non-government organisations
- Charity/voluntary organisations
- Church groups
- Service organisations
- Political parties
- Committees

Community may relate to a specific location, language/ cultural or social structure and include:

- Individuals and groups defined by the organisation's programs and services
- Other agencies providing services to individuals and groups
- People with specific needs and interests
- People using the organisation's services/programs
- Groups, such as those representing cultural, sub-cultural, gender, religious, age and sexual identity

Community activities are those which raise awareness of domestic violence issues and could include:

- Seminars and workshops
- Victim support groups/networks
- Public forums
- Community safety plans
- Focus groups on relevant issues
- Health promotion activities
- Users of violence behaviour change groups
- Community awareness programs
- Community education programs
- Community support programs

Organisation standards and procedures may include those relating to:

- Collection and storage of information
- Code of conduct/code of ethics
- Departmental, inter-departmental regulations, protocols and procedures relevant to work role and responsibilities
- Organisation mission statement and/or philosophy
- Minimum practice standards

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• Assessment for eligibility to access particular services • Legal frameworks • Use of interpreter or interpreter services • Financial plan • Community development models
Underpinning values and philosophies relating to domestic violence include:	• All individuals have the right to be free from violence • The community has a responsibility to work toward the prevention of domestic violence and to demonstrate the unacceptability of all forms of domestic violence • All forms of domestic violence are unacceptable in any group, culture or creed • Those who use violence should take responsibility for their behaviour and have access to programs to assist them change their behaviour to ensure the safety of their family • Domestic violence is widespread and complex • Domestic violence impacts on the physical, emotional, social, and financial well being and safety of individuals in families • Domestic violence and abuse has devastating effects on family members and results in significant social and economic costs to the community
Interpersonal and networking skills may include:	• Means for communicating with people with disabilities or where English is not the first language • Methods of communicating with different age, gender and sexual identity groups • Cultural and sub-cultural awareness/sensitivity • Using appropriate body language • Demonstrating empathy • Liaison with regional and specialist associations • Liaison with other service providers and key stakeholders • Liaison with key community contacts
Key people and groups within the community may include but are	• Various community groups representing cultural, sub-cultural, religious, social, ethnic, gender, sexual

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

not limited to:	identity, and age groups within the community • Policy and decision-makers in the specific community • Funding bodies • Service providers • Individuals, groups or communities most likely to be affected by strategies or action plans • Organisation management, colleagues, supervisor, team members
Policies and strategies that could be developed to meet the changing needs of the community may include:	• Strategies to increase access to facilities, services or decision-making • Providing direction, advice and information • Development of community facilities • Development of community education programs • Development of advocacy groups • Development of support networks/groups • Development of users of violence behaviour change groups • Improved community liaison and networking • Education programs to improve workers' skills and knowledge • Simple informal communication regarding the service's activities, through internal and external networks • Lobbying relevant persons and agencies • Public communication, such as public speaking opportunities, local media interviews/press releases etc • Specific materials such as flyers, brochures, 'advertisement' type articles in local newspapers • Use of existing own or other organisation/agency information channels such as notice boards/bulletin boards, newsletters, pamphlets, etc • Use of community meetings and meetings with community leaders, both formal and informal • Use of audio-visual materials and web-sites • Any combination of the above and others
Community education programs may be of varying scope and	• Single events, such as information stalls in shopping centres

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work within a domestic violence framework	1.1 Plan *work* practices to ensure maximum consideration is given to *client* and worker safety 1.2 Ensure all work undertaken accords with prevention *strategies* and accepted models of intervention and demonstrates consideration and understanding of the *underpinning values and philosophies* of domestic violence work and the nature of domestic violence, including its effects, its *social, historical, political and economic context* and its place in the criminal justice system 1.3 In all work demonstrate commitment to assist clients to deal with their issues through enhancing skills, accessing appropriate support and working with others in the *community* who share client's issues and concerns 1.4 In all work demonstrate understanding of the *rights and responsibilities* of the individual, the family, the community, and society and the worker's limitations, strengths and professional boundaries 1.5 In all work demonstrate consideration of the *interrelationship of issues* affecting clients in a domestic violence context
2. Model high standards of performance	2.1 Use own performance as a positive role model for others within the occupational group and the community as a whole 2.2 Acknowledge personal and professional values and attitudes regarding domestic violence and how they impact/conflict in practice, when planning and implementing work activities 2.3 In all work demonstrate respect and understanding

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	of individual differences and work processes are adapted as appropriate to meet the cultural, linguistic and any specific needs of the client
	2.4 Use *organisation* and *professional standards, procedures* and values in providing services to clients affected by domestic violence and reflect community needs
	2.5 Recognise and report breaches of organisation codes of ethics/and or practices in accordance with *professional and organisation standards and procedures*
3. Develop and maintain professional competence	3.1 Assess personal knowledge and skills in the domestic violence area against occupational *units of competency* and other relevant standards to determine development needs and priorities
	3.2 Regularly use *self assessment and reflection* on practice to monitor *own performance* against established *personal performance standards* and to identify strengths and weaknesses
	3.3 Use feedback from clients, their family and colleagues to identify and develop ways to improve competence in responding to domestic violence
	3.4 Identify *personal development strategies* to recognise and respond effectively to domestic violence, and plan and implement to maintain currency of professional competency
	3.5 Identify, acquire and apply new developments and trends in responding to domestic violence, and the associated skills and knowledge
	3.6 Participate in *support processes* to obtain professional feedback and to monitor occupational health and stress
	3.7 Use networking to identify and build relationships with associated and relevant individuals and organisations
	3.8 *Participate in professional networks and associations* to obtain and maintain personal knowledge and *networks*

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include:

- Knowledge of the social, historical, political and economic context of domestic violence, including types and nature of domestic violence, its effects, power and gender issues, child abuse and associated criminal issues
- Understanding of the prevalence of myths, unhelpful beliefs, attitudes and practices in the broader society regarding domestic violence and their effects on individuals' rights to safety and autonomy
- An understanding of current organisation and professional procedures, practices, and social, ethical and business standards
- Knowledge of relevant debriefing and support processes
- An understanding of how to interpret units of competency and apply them to self, including identifying and prioritising personal learning needs
- An understanding of how to develop and maintain professional networks
- Knowledge of the principles and techniques of goal setting, measuring performance and time management
- Knowledge of self assessment and reflective strategies to assist in determining personal development needs, including preparing personal plans and establishing priorities
- Knowledge of respectful strategies that will assist in client self-determination to ensure safety of client and family
- Knowledge of legislative requirements and provisions relevant to area of service delivery and delegated responsibility
- Awareness of own values and attitudes and their potential impact on clients
- An understanding of specific limitations of work role, responsibility and professional abilities

Essential skills:

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

It is critical that the candidate demonstrate the ability to:

- Manage own performance and take responsibility for professional development in relation to domestic violence, in particular to:
  - consider the physical and emotional safety of clients, their family, worker and colleagues
  - display a positive role model to others
  - adapt work processes to meet the specific needs of the community, client or colleagues as required
  - monitor own performance and identify any personal development needs
  - identify ways to improve performance through seeking feedback from clients and colleagues
  - acknowledge personal values when responding to domestic violence
  - access learning opportunities to extend own personal work competencies to improve service delivery in domestic violence
  - develop and expand professional networks and participate in positive relationship building to further enhance skills and knowledge
  - interpret accurately and comply with legal and procedural requirements
  - understand their own work role and responsibilities in relation to domestic violence issues
  - select and use available technology appropriate to the task

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
  - networking to enable positive participation in professional associations and networks to enhance knowledge within a domestic violence framework
  - questioning and active listening to establish confidence and facilitate accurate and relevant exchange of information
  - liaison, for example, ability to liaise with people from a range of social, cultural, sub-cultural, religious and ethnic backgrounds in individual or group contexts
  - planning and organising for determining goals and strategies
  - researching and evaluating to acquire and assess information, for example-to prepare personal plans and establish priorities
  - collaboration between worker and client, between worker and colleagues and between services and other providers
  - problem solving for a defined range of predictable problems, for example when client needs are identified as lying outside a worker's particular professional role the worker should offer the client accurate and current information about appropriate services

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

and workers in other occupational groups

- literacy and communication in relation to analysis and evaluation of feedback, and presentation of information

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit will be most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions • Assessment of performance should be over a period of time covering all categories within the Range Statement statements that are applicable in the learning environment This will include contexts applicable to the work environment, such as actual or simulated workplace situations involving a combination of direct, indirect and supplementary forms of evidence
Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

Context of and specific resources for assessment:

- This unit can be delivered and assessed independently, however holistic assessment practice with other community services units of competency is encouraged
- Resources required for assessment of this unit include access to:
  - an appropriate workplace where assessment can take place or simulation of realistic workplace setting for assessment
- Where assessment is conducted within the workplace there are no resource implications above those normally available in the workplace
- Where assessment is conducted in a simulated or non-workplace environment then access to the necessary equipment and research resources should be provided
- Access to simulated exercises, case studies related to service delivery issues will also be required if non-workplace assessment paths are utilised

Method of assessment:

- Evidence will be determined by selection from the Range Statement, justified in terms of work requirements, work roles and responsibilities and occupational specialisations
- Evidence for assessment of competence may be gathered by appropriate combination of the following:
  - demonstration of competency within the working environment to manage professional development in responding to domestic violence
  - assessment must be in the workplace, however, where there is not an opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

- observation of processes and procedures, oral and/or written questions on Essential knowledge and skills and consideration of required attitudes
- where performance is not directly observed and/or is required to be demonstrated over a period of time and/or in a number of locations, any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons
- review of any documentation produced by the candidate related to identifying and responding to domestic violence

Related units: For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit:

- CHCDFV301A Recognise and respond to domestic and family violence

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Work may relate to:

- Specific groups, issues or communities e.g. Health issues of young people from particular cultural, religious, sub-cultural backgrounds and/or geographical areas
- Monitoring, evaluation and research activities
- Policy development
- Primary intervention and assessment
- Advocacy

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

- Individual casework
- Community development
- Referrals
- Child protection work
- Provision of information/materials
- Service development towards systems change
- Project development and implementation

Client may include:

- Individuals (inclusive of children, youth, adults and the aged)
- Referred or self-referred clients
- Voluntary and involuntary clients
- People with specific needs seeking access to services
- Survivors/victims of domestic violence, their families and friends
- Users of violence and their family
- Other organisations/service providers
- Communities

Underpinning values and philosophies in responding to domestic and family violence include:

- The safety and well being of those subjected to domestic violence must be the first priority of any response
- All individuals have the right to be free from violence
- The community has a responsibility to work toward the prevention of domestic violence and to demonstrate the unacceptability of all forms of domestic violence
- All forms of domestic violence are unacceptable in any group, culture or creed
- Those who use violence should take responsibility for their behaviour and have access to programs to assist them change their behaviour to ensure the safety of their family
- A commitment to meeting the needs and upholding the rights of clients
- A commitment to empowering those affected by domestic violence
- Domestic violence is widespread and complex
- Domestic violence impacts on the physical, emotional, social, and financial well being and safety of individuals in families

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

- Domestic violence and abuse has devastating effects on family members and results in significant social and economic costs to the community
- Domestic violence is an abuse of power perpetrated mainly (but not only) by men against women both in a relationship and after separation

Social, historical, political and economic context:

- Statutory framework within which work takes place
- Historical context of work e.g. changing attitudes to domestic violence; changing approaches to working with people affected by domestic violence
- Changing social context of work e.g. previous, current and changing government and societal views of domestic violence and approaches to working with clients
- Political context e.g. government policies and initiatives affecting domestic violence work
- Economic context e.g. the current economic situation as it relates to and affects domestic violence and the subsequent impact on client needs and the effects of economic deprivation and control on clients attempting to escape domestic violence

Community may relate to a specific location, language/ cultural or social structure and include:

- Individuals and groups defined by the organisation's programs and services
- Other agencies providing services to individuals and groups
- People with specific needs and interests
- Organisation management, colleagues, supervisor, team members
- Survivors/victims of domestic violence, their families and friends
- Funding bodies
- Professional networks and associations
- Government representatives and service providers
- Policy and decision-makers in the specific community
- Groups representing cultural, sub-cultural, religious, social, ethnic, sexual, gender, and age issues in the community

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Rights and responsibilities may include:	• Rights of safety • Rights under common law • Rights outlined under relevant standards/principles and charters (e.g. UN Declaration on Rights of the Child) • Rights under the Constitution • Rights and responsibilities under legislation (e.g. freedom of information and child protection legislation) • Guidelines relating to parameters of confidentiality/client consent • Worker's code of ethics
Interrelationship of issues when responding to domestic violence may relate to clients with specific needs such as:	• Disability issues • Cultural diversity issues • Language issues, such as when English is not the first language • Issues for the aged or young • Isolation issues, such as those from remote or rural locations • Sexual identity issues • Gender issues • When religious beliefs, practices or values need to be considered • Addiction or dependency issues • Mental health issues • Criminal history • Literacy issues • Those at risk of self-harm • Economic/transport or accommodation issues
Own performance may be monitored against established personal and organisation performance requirements and may include processes such as:	• Formal/informal organisation initiated performance appraisals • Obtaining feedback from supervisors, subordinates and colleagues • Obtaining feedback from clients, human resource development personnel, family and other relevant community members etc. • Monitoring of supervised staff, colleagues and/or team staff morale

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• Personal reflective behaviour strategies/ methodologies • Other strategies which facilitate the identification of personal strengths/weaknesses/issues to be addressed • Routine organisation methods for monitoring service delivery
Organisation and professional standards and procedures may include those relating to:	• Client and worker safety • Organisation mission statement and/or philosophy • Routine organisation methods for monitoring service delivery • Collection and storage of information • Client interview protocols and procedures • Code of conduct/code of ethics • principles and implementation of duty of care and rights of client to self determination • Departmental, inter-departmental regulations, protocols and procedures relevant to work role and responsibilities • Industry standards • Inter-agency practice and protocols • Use of interpreter and interpreter services • Eligibility criteria for accessing particular services • Completion of forms and applications • Debriefing and supervision • Industry standards • Guidelines relating to parameters of confidentiality/client consent • Occupational health and safety
Units of competency are standards which measure:	• All those personal and technical knowledge, skills and attitudinal aspects (competencies) required to effectively and efficiently undertake the day to day tasks and duties of the practitioner's work function
Self assessment and reflection requires practitioners to regularly review their own performance against required and established professional	• Professional bodies' competencies and codes of practice/ethics • Organisation HRD policies and procedures • Occupational or functional roles/units of competency • Professional accreditation and re-accreditation

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to collect, analyse and communicate information and to use that information to develop and maintain effective working relationships and networks, with particular regard to communication and representation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers play an important role in developing and maintaining positive relationships in internal and external environments so that customers, suppliers and the organisation achieve planned outputs and outcomes. They play a prominent part in motivating, mentoring, coaching and developing team cohesion through providing leadership for the team and forming the bridge between the management of the organisation and team members. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, and leadership and guidance of others.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Collect, analyse and communicate information and ideas	1.1. Collect relevant ***information*** from appropriate sources and analyse and share with the work team to improve work performance 1.2. Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the audience and any specific needs 1.3. Implement ***consultation processes*** to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes 1.4. Seek and value contributions from internal and external sources in developing and refining new ideas and approaches

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.5. Implement ***processes*** to ensure that issues raised are resolved promptly or referred to ***relevant personnel*** as required
2. Develop trust and confidence	2.1. Treat all internal and external contacts with integrity, respect and empathy 2.2. Use the ***organisation's social***, ***ethical and business standards*** to develop and maintain effective relationships 2.3. Gain and maintain the trust and confidence of ***colleagues***, ***customers and suppliers*** through competent performance 2.4. Adjust interpersonal styles and methods to meet organisation's social and cultural environment 2.5. Encourage other members of the work team to follow examples set, according to ***organisation's policies and procedures***
3. Develop and maintain networks and relationships	3.1. Use ***networks*** to identify and build relationships 3.2. Use networks and other work relationships to provide identifiable benefits for the team and organisation
4. Manage difficulties into positive outcomes	4.1. Identify and analyse difficulties, and take action to rectify the situation within the requirements of the organisation and relevant legislation 4.2. Guide and support colleagues to resolve work difficulties 4.3. Regularly review and improve ***workplace outcomes*** in consultation with relevant personnel 4.4. Manage ***poor work performance*** within the organisation's processes 4.5. Manage conflict constructively within the organisation's processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• coaching and mentoring skills to provide support to colleagues

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

• literacy skills to research, analyse, interpret and report information
• relationship management and communication skills to:
  • deal with people openly and fairly
  • forge effective relationships with internal and/or external people, and to develop and maintain these networks
  • gain the trust and confidence of colleagues
  • respond to unexpected demands from a range of people
  • use supportive and consultative processes effectively.

Required knowledge

• relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS), and environmental issues, equal opportunity, industrial relations and anti-discrimination
• theory associated with managing work relationships to achieve planned outcomes:
  • developing trust and confidence
  • maintaining consistent behaviour in work relationships
  • understanding the cultural and social environment
  • identifying and assessing interpersonal styles
  • establishing, building and maintaining networks
  • identifying and resolving problems
  • resolving conflict
  • managing poor work performance
  • monitoring, analysing and introducing ways to improve work relationships.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • range of methods and techniques for communicating information and ideas to a range of stakeholders • range of methods and techniques for developing positive work relationships that build trust and

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	confidence in the team • accessing and analysing information to achieve planned outcomes • techniques for resolving problems and conflicts and dealing with poor performance • knowledge of the theory associated with managing work relationships to achieve planned outcomes.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • demonstration of techniques in managing poor performance and communicating effectively • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • oral or written questioning to assess knowledge of relevant legislation • review of consultation processesimplemented to encourage employees to contribute to issues related to their work • review of documentation outlining reviewing ofworkplace outcomes.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	• data appropriate to work roles and organisational policies that is shared and retrieved in writing or verbally, electronically or manually such as: • archived, filed and historical background data • individual and team performance data • marketing and customer related data • planning and organisational documents including the outcomes of continuous improvement and quality assurance • policies and procedures
Consultation processes may include:	• feedback to the work team and relevant personnel in relation to outcomes of the consultation process • opportunities for all employees to contribute to ideas and information about organisational issues
Processes to ensure that issues raised are resolved promptly or referred may include:	• conducting informal meetings • coordinating surveys or questionnaires • distributing newsletters or reports • exchanging informal dialogue with relevant personnel • participating in planned organisational activities
Relevant personnel may include:	• managers • OHS committee and other people with specialist responsibilities • other employees • supervisors • union representatives/groups
Organisation's social, ***ethical and business standards*** may refer to:	• implied standards such as honesty and respect relative to the organisational culture and generally accepted within the wider community • rewards and recognition for high performing staff

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	

	• standards expressed in legislation and regulations such as anti-discrimination legislation
	• written standards such as those expressed in:
	  • code of workplace conduct/behaviour
	  • dress code
	  • policies
	  • statement of workplace values
	  • vision and mission statements

Colleagues, customers and suppliers may include:	• both internal and external contacts • employees at the same level and more senior managers • people from a wide variety of social, cultural and ethnic backgrounds • team members
Organisation's policies and procedures may refer to:	• Materials Safety Data Sheets • organisational tasks and activities undertaken to meet performance outcomes • sets of accepted actions approved by the organisation • Standard Operating Procedures
Networks may be:	• established structures or unstructured arrangements and may include business or professional associations • informal or formal and with individuals or groups • internal and/or external
Workplace outcomes may include:	• OHS processes and procedures • performance of the work team
Poor work performance may refer to:	• individual team members • organisation as a whole • self • whole work team

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to work with teams and individuals, their standard of conduct and the initiative they take in influencing others. At this level, work will normally be carried out within routine and non routine methods and procedures which require the exercise of some discretion and judgement. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline management provides the first level of leadership within the organisation. This unit applies to people who are making the transition from being a team member, to taking responsibility for the work and performance of others. Frontline managers have a strong influence on the work culture, values and ethics of the teams they supervise. As such it is important that frontline mangers model good practice, professionalism and confidently represent their organisation.

BSBWOR402A Promote team effectiveness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to promote teamwork. It involves developing team plans to meet expected outcomes, leading the work team, and proactively working with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers have an important leadership role in the development of efficient and effective work teams. They play a prominent part in team planning, supervising the performance of the team and developing team cohesion. They provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Plan to achieve team outcomes	1.1. Identify, establish and document ***team purpose***, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** in ***consultation*** with team members 1.2. Support team members in meeting expected outcomes
2. Develop team cohesion	2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2. Encourage and support team members to take ***responsibility for own work*** and to assist each other in undertaking required roles and responsibilities 2.3. Provide ***feedback*** to team members to encourage, value and reward individual and team efforts and contributions 2.4. Recognise and address issues, concerns and problems identified by team members or refer to ***relevant persons*** as required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Participate in and facilitate work team	3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2. Give the team support to identify and resolve problems which impede its performance 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1. Maintain open ***communication*** with ***line manager***/***management*** at all times 4.2. Communicate information from line manager/management to the team 4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - boost team morale
  - deal with team conflict
  - deliver messages from management
  - facilitate discussion
  - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

• organisational goals, objectives and plans
• organisational policy and procedures framework
• organisational structure, including organisational chart
• principles and techniques associated with:
  • delegation and work allocation
  • goal setting
  • group dynamics and processes
  • individual behaviour and difference
  • leadership
  • motivation
  • negotiation
  • planning.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • teamwork plan with details of how it was generated and how it will be monitored so that team goals can be met • techniques in communicating information, dealing with team conflict and resolving issues • knowledge of organisational goals, objectives and plans.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques in working with team dynamics • observation of performance in role plays • oral or written questioning to assess knowledge of principles and techniques associated with group dynamics and processes • evaluation of opportunities provided for input of team members into planning, decision making and operational aspects of work team • review of feedback provided to team members • review of teamwork plan.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Team purpose, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** may include:	• action plans, business plans and operational plans linked to strategic plans • expected outcomes and outputs • goals for individuals and the work team • individual and team performance plans and key performance indicators • occupational health and safety (OHS) responsibilities
Consultation may include:	• attending meetings, interviews, brainstorming sessions

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• using email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual effectiveness • using mechanisms to provide feedback to the work team in relation to consultation outcomes
Responsibility for own work may involve:	• individual and joint actions • individuals and teams
Feedback may refer to:	• formal/informal gatherings between team members where there is communication on work related matters • informal communication of ideas and thoughts on specific tasks, outcomes, decisions, issues or behaviours
Relevant persons may include:	• colleagues • direct superior or other management representatives • OHS committees and other people with specialist responsibilities
Communication may include:	• face-to-face • formal/informal interaction • verbal, written or electronic communication
Line manager*/*management may refer to:	• direct superior or other management representatives

PSPGOV417A Identify and treat risks

Modification History

PSPGOV417A Release 2: Layout adjusted. Required Knowledge and Evidence Guide updated.

PSPGOV417A Release 1: Primary release.

Unit Descriptor

This unit covers the identification and treatment of risk using the organisation's risk management procedures and treatments. It applies to the risks inherent in all aspects of everyday work in the public sector as well as to specific functional activities and projects related to the particular mandate of the organisation. The unit covers establishment of the risk context, identification, analysis and evaluation of risks, risks treatment, and monitoring and review of risk treatment plan.

In practice, identifying and treating risk occurs in the context of other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, handling classified information, using resources, administering projects, providing parliamentary support, making arrests, using financial processes, undertaking scientific research, awarding contracts, undertaking native title assessments, assessing compensation claims, road transport compliance, etc.

This is one of 4 units of competency in the *Working in Government* and *Management* Competency Fields that deal with risk. Related units are:

- PSPGOV517A Coordinate risk management
- PSPMNGT608B Manage risk
- PSPMNGT704A Undertake enterprise risk management
-

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the risk context	1.1 The nature and extent of the work activity are established within the broader ***organisational context***.
	1.2 The outcomes to be achieved are identified and documented as required.
	1.3 The relationship between the activity and its environment is analysed and critical ***factors*** in the environment that may impact on the achievement of outcomes are identified.
	1.4 ***Stakeholders*** are identified and consulted to identify their opinions, concerns and needs related to the activity and the management of risks related to it.
	1.5 ***Risk evaluation criteria*** are determined for the activity in accordance with ***legislation, policy and procedures*** related to ***risk management*** in the organisation.
2. Identify risks	2.1 ***Method/s for identifying risks*** are selected in accordance with risk management policy and procedures, budgetary and time constraints relative to the type of activity to be undertaken.
	2.2 ***Sources*** of risk are identified and documented as required.
	2.3 ***Risk events*** related to each source of risk are identified and recorded in accordance with risk management policy and procedures.
	2.4 Consultation and communication is undertaken to ensure all possible risks are identified.
3. Analyse risks	3.1 The ***probability*** of identified risks occurring is analysed and rated in accordance with risk management policy and procedures.
	3.2 The ***consequences*** of identified risks occurring are analysed and rated according to organisational procedures.
	3.3 Current ***control measures*** for any of the identified risks are

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	considered in the risk analysis, and residual risks are analysed and included if necessary.
	3.4 ***Levels of risk*** are determined in accordance with risk matrix used by the organisation.
	3.5 Consultation/communication is undertaken as required to confirm risk levels, and analysis is ***documented*** in accordance with organisational risk management procedures.
4. **Evaluate risks**	4.1 Risks are evaluated by comparing the level of risk with risk evaluation criteria established at the beginning of the risk management process.
	4.2 The importance of the activity, its outcomes and the degree of control over the risks are considered.
	4.3 Potential and actual losses which may arise from the risk are considered.
	4.4 Benefits and opportunities presented by the risk are taken into account.
	4.5 Risks are identified as ***acceptable*** or ***unacceptable*** in accordance with risk evaluation criteria, and confirmation/approval is obtained in accordance with risk management policy and procedures.
	4.6 Unacceptable risks are prioritised and the reason/s for acceptance of risks is documented.
5. **Treat risks**	5.1 ***Options*** for treating risks are determined in accordance with risk management policy and procedures.
	5.2 The best treatment option is selected and a cost-benefit analysis is undertaken to compare the cost of implementing the treatment with the benefits.
	5.3 A ***risk treatment plan*** is prepared, approved and communicated to those who will be involved in implementation.
	5.4 Changes required to operational structure, procedures or staffing in order to implement risk treatments are negotiated in accordance with organisational policy and procedures.
	5.5 ***Resources*** are arranged and risk treatment plan is implemented in accordance with risk management policy and procedures.
6. **Monitor and review risk treatment plan**	6.1 ***Changes*** in the organisational environment and factors impacting on the organisation are monitored for their impact on risks and existing risk treatments.
	6.2 Risk treatments for unacceptable risks are monitored and adjusted as required to ensure they remain effective.
	6.3 Acceptable risks are monitored to ensure these risk levels do not increase over time.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	6.4 Consultations are conducted and data relating to risks and risk treatments are collected, analysed and used to improve risk management in own area of operation.
	6.5 Risk treatment plan is reviewed in accordance with timetable for review of plan and updated as required.
	6.6 Input is provided into formal reviews/audits of risk in the organisation to improve risk management outcomes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to risk management
- researching and analysing the wider context affecting the organisation
- assessing and evaluating risks
- monitoring and reviewing risks and risk treatments
- communicating and consulting with a diverse range of stakeholders
- estimating and arranging resources needed for implementation of risk treatments
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of risk management

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to risk management
- AS/NZS ISO31000:2009 Risk management - Principles and Guidelines
- HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- the organisation's risk management framework
- the relationship of risk to context - how the context may define the risks
- the importance of consultation and communication at every stage of the risk management cycle
- risk management as a core activity of everyday work in the public sector
- the diversity of risks in the public sector
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in

the context of risk management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPETHC401A Uphold and support the values and principles of public service

PSPFIN401A Use public sector financial processes

PSPGOV402B Deliver and monitor service to clients

PSPGOV405B Provide input to change processes

PSPGOV406B Gather and analyse information

PSPGOV409A Provide support to Parliament

PSPGOV422A Apply government processes

PSPGOV419A Work with interpreters

PSPLAND402A Undertake native title assessments

PSPPM405A Administer simple projects

PSPPROC410A Administer contracts

PSPREG406C Make arrests

PSPSEC405A Handle security classified information

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- identification and treatment of risks in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to risk

© Commonwealth of Australia, 2025 Public Skills Australia

management
- AS/NZS ISO 31000:2009 Risk management - Principles and Guidelines
- HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- other national and international risk management standards
- case studies and workplace scenarios to capture the range of risk management situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when identifying and treating risks, including coping with difficulties, irregularities and breakdowns in routine
- identification and treatment of risks in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Organisational context may include:

- the organisation, how it is organised, and its capabilities
- the organisation's functions:
  - political
  - operational
  - financial
  - social
  - legal
  - commercial
- the various stakeholders and clients
- any official resources, including physical areas and assets, that are vital to the operation of the organisation
- key operational elements and services of the organisation
- any major projects
- the relationship between the organisation and the environment in which it operates

Environmental factors may be:

- social
- economic
- legal
- technological
- environmental

Stakeholders may include:

- employees
- managers
- volunteers
- unions
- financial managers
- self-insurers
- clients
- suppliers
- contractors
- service providers
- community organisations
- the public

Risk evaluation criteria are:

- used to rank risks and decide whether they are acceptable or not
- affected by:

© Commonwealth of Australia, 2025 Public Skills Australia

- legal requirements
- perceptions of internal/external stakeholders

- cost-benefit analysis, for example, cost of risk management being less than financial cost if the risk occurred

Legislation**, **policy and procedures may include:

- Commonwealth and State/Territory legislation relating to risk management
- national and international codes of practice and standards, such as SIRCA 8001:2003
- the organisation's risk management policies and practices
- codes of conduct/codes of ethics
- AS/NZS ISO 31000:2009 Risk management - Principles and Guidelines
- HB 436:2004 (Guidelines to AS/NZS 4360:2004) Risk Management Guidelines Companion to AS/NZS 4360:2004
- ISO Guide 73:2009 Risk Management, Vocabulary
- professional standards for risk management, for example certified practising risk manager (CPRM)
- jurisdictional policies, guidelines and web sites, for example www.riskmanagement.qld.gov.au

Risk management:

- is a logical and systematic process of identifying, analysing, evaluating, treating and monitoring risks related to any strategy, plan, process, program or procedure that will enable the organisation to minimise losses and maximise opportunities.
- may be considered in relation to an organisation's:
  - people
  - assets and physical environment
  - reputation and image
  - legal issues
  - business continuity
  - finances
- may include written procedures to ensure staff know:
  - what
  - how
  - when, and
  - by whom, action is to be taken to treat risks in the organisation

Methods of identifying risks may include:

- analysis of past records
- personal, local or overseas experience
- interviews/discussions with stakeholders
- surveys/questionnaires
- audits and physical inspections
- observation of activity

© Commonwealth of Australia, 2025 Public Skills Australia

	• analysis of scenarios • research of external sources • using industry experts/consultants
Risks may include:	• physical injury or death • failure of machinery or equipment • breaches of security • fraud • litigation • client dissatisfaction • unfavourable publicity
Risks may be:	• internal • external • random • real • perceived
Sources of risk may include:	• human behaviour • technology/technical issues • occupational health and safety • legal • political • property/equipment • environmental • financial/market • natural events
Risk events are:	• what can happen, as opposed to the source (how a risk may arise) and the impact (what is the implication if it happens)
Probability of risk may be:	• almost certain • likely • possible • unlikely • rare
Consequences of risk may be:	• insignificant • minor • moderate • major • catastrophic

Control measures may:	• reduce the probability of the risk occurring, the consequences of the risk, or both
	• include:
	  • training
	  • supervision

© Commonwealth of Australia, 2025 Public Skills Australia

	• minimising/restricting exposure • physical barriers • relocation
Level of risk may be:	• low - treated with routine procedures • moderate - with specific responsibility allocated for the risk, and monitoring and response procedures implemented • high - requiring action, as it has potential to be damaging to the organisation • extreme - requiring immediate action, as the potential could be devastating to the organisation
Documentation of analysis may include:	• table showing all risks, any existing controls, probability of occurring, consequences and subsequent level of risk
Acceptable risks are:	• those which an organisation has determined have the least potential for harm • not necessarily insignificant
Risks may be acceptable because:	• the risk level is so low that it does not warrant spending time and money to treat it • the risk is low and the benefits outweigh the cost of treating it • the opportunities presented are much greater than the threat
Unacceptable risks are:	• those which an organisation has determined have the most potential for harm
Options for treating risks may include:	• avoiding the risk, for example, by terminating the activity or conducting it in another way (these actions may have different risks attached) • controlling the risk, by reducing the probability of the risk occurring, the consequences of the risk, or both • transferring the risk, for example, by arranging insurance, contracting some or all of the activity to another organisation or person, etc • retaining the risk, and making contingency plans/funds allocation for covering any loss or other negative effect from the risk
Risk treatment plan may include:	• sources of risk and risk events • analysis of risks - probability, consequences and risk levels • prioritised list of unacceptable risks • treatment options selected • person/s responsible for implementing treatment options • resources required • performance measures • timeframe for implementation • timetable for review of plan
Resources may include:	• physical - equipment, motor vehicles, furniture

© Commonwealth of Australia, 2025 Public Skills Australia

- human - management, employees, volunteers
- financial - funding, budget allocation, sponsorship
- resources that are part of the risk treatment, not just implementation of the treatment plan
- training and briefing sessions
- changes to the organisation's operating structure

Changes may mean that:

- new risks are created
- existing risks are increased or decreased
- risks no longer exist
- the priority order of risks changes
- risk treatment strategies are no longer effective

AHCNAR302A Collect and preserve biological samples

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of collecting and preserving biological samples as part of a monitoring program and defines required to: establish the equipment and facilities to take biological samples; carry out biological sampling; preserve and record samples and forward for testing if required; record sampling data and observations; report outcomes of collection.

Application of the Unit

Application of the unit	This unit applies to the process of collecting and preserving biological samples and is likely to be under limited supervision from others with checking only related to overall progress. It requires knowledge of industry biological sampling and preserving guidelines and protocols, flora and fauna, environmental legislation, and sampling and preserving methods.

Licensing/Regulatory Information

Not Applicable

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan for collection	1.1. Sampling schedule is read/heard and confirmed with manager. 1.2. Sampling site location is confirmed and approval obtained for site access following enterprise and legislative guidelines. 1.3. Samples to be collected and preserved are identified by supervisory staff. 1.4. Equipment requirements for biological sampling and preserving are determined and arranged. 1.5. Range of likely operating conditions, hazards and difficult/sensitive environments are assessed for impact on sampling and testing.
2. Prepare equipment and resources	2.1. Equipment required for sampling and preserving is sourced according to sampling procedures. 2.2. Equipment is checked for availability and serviceability in accordance with enterprise procedures. 2.3. Data or record sheets/books are collected for use. 2.4. Equipment, data sheets and personnel are moved to sampling sites without injury or damage and readied for use.
3. Carry out biological sampling and preserving	3.1. Samples are collected in accordance with sampling plan and enterprise procedures and industry protocols/guidelines.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
procedures	3.2. Samples are preserved and recorded in accordance with sampling standards and guidelines. 3.3. Samples for external analysis are prepared, packaged and sent to laboratory in accordance with sampling schedule and laboratory standards. 3.4. Specific and general observations including information on relevant ambient and antecedent environmental conditions are made in accordance with monitoring schedule. 3.5. Equipment operation and work practices conform to occupational health and safety requirements. 3.6. Collection outcomes including presentation of samples are reported and delivered in accordance to enterprise guidelines.
4. Complete collection of biological sampling activities	4.1. Equipment and clothing is cleaned, sanitised, repaired and stored in accordance with enterprise procedures. 4.2. Damaged or malfunctioning equipment is repaired on site sampling results and observations are accurately recorded on data sheets and forwarded in accordance with enterprise procedures. 4.3. Changes in field conditions and equipment are conveyed to supervisor according to enterprise procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• plan for collection • prepare equipment and resources • carry out biological sampling and preserving procedures • complete collection of biological sampling activities • use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks • use oral communication skills/language competence to fulfil the job role as

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• hydrological cycle • field procedures for biological sampling and preservation • collecting equipment and methods • preservation equipment and processes • basic habitat assessment • water quality issues. • fauna and flora recognition relevant to sampling activities • relevant environmental legislation.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • establish the sampling purpose and requirements • prepare equipment and facilities to take biological samples • carry out biological sampling • preserve and record samples and forward for testing if required • record sampling data and observations • report outcomes of collection.

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Types of samples may include:	• collecting and preserving biological samples of macro invertebrates, aquatic vegetation, intertidal organisms, soil and water • equipment used to collect and preserve biological specimens.

AHCBIO402A Carry out field surveillance for a specific emergency disease or plant pest

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the outcomes required to carry out field surveillance for a specific emergency disease or plant pest. Field surveillance teams work under instructions from the control centre.

Application of the Unit

Application of the unit	This unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Look for signs of a specific emergency disease or plant pest	1.1. Work instructions from surveillance coordinator or other appropriate authority are received and confirmed. 1.2. Signs of an emergency disease or plant pest are identified, appropriate samples for testing collected, and evidence gathered to support a diagnosis according to relevant standards and protocols. 1.3. Available expertise is accessed to assist in diagnosis, as appropriate. 1.4. Diagnostic samples are collected, handled, packaged and dispatched according to relevant standards and protocols.
2. Respond to an emergency disease or plant pest	2.1. Where signs of an emergency disease or plant pest are found, surveillance coordinator is alerted. 2.2. Appropriate measures are taken to immediately contain emergency disease or plant pest according to instructions from control centre and relevant guidelines. 2.3. Information relevant to management of emergency disease or plant pest outbreak is collected and reported to surveillance coordinator. 2.4. Property owners/persons in charge are given directions and warnings about suspected emergency disease or plant pest. 2.5. Personal decontamination and, where appropriate, decontamination of equipment and vehicles, are conducted according to relevant standards and protocols for emergency disease or plant pest.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• apply relevant standards, protocols and procedures • solve problems to deal with unexpected issues • work as part of a team where required • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected, and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• appropriate standards and protocols for the emergency disease or plant pest, such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) • emergency disease or plant pest control procedures • personal and general decontamination procedures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to: • follow work instructions • follow biosecurity and decontamination procedures • communicate findings to supervisor in a timely and accurate manner • communicate with property owner while observing confidentiality requirements.
Context of and specific resources for assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to carry out field surveillance for a specific emergency disease or plant pest. The candidate must also have access to the following resources: • standards, protocols and procedures, such as: • AUSVETPLAN or PLANTPLAN • operational plan and survey plan • personal protective and decontamination equipment.
Method of assessment	Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in an emergency disease or plant pest response simulation exercise or in responses to an emergency disease or plant pest incursion.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. The skills and knowledge required to carry out field surveillance for a specific emergency disease or plant pest must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include work with outbreaks of different emergency diseases or plant pest incursions and with possibly unfamiliar

EVIDENCE GUIDE	
	species.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Signs of emergency disease or plant pest may include:	• abnormality • clinical signs • high levels of morbidity in populations • mode of death • mortalities • presence of highly specific vectors • results of post-mortem examinations • symptoms and decline.

Emergency diseases or plant pests include:	• diseases that may affect animals, fish and other marine animals, including:
	  • disease that is exotic to Australia
	  • serious infectious disease of unknown or uncertain cause
	  • severe outbreak of a known endemic disease that is considered to be of national significance with serious social or trade implications
	  • variant of an endemic disease
	• species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.

Relevant standards and protocols may include:	• approved standard operating procedures • commonwealth, state and territory legislation • emergency disease or plant pest specific guidelines, such as AUSVETPLAN or PLANTPLAN • other relevant guidelines for handling an emergency disease or plant pest • transportation of dangerous goods.
Appropriate measures to contain emergency diseases or plant pests	• decontaminating people, products, materials and premises • disposing of carcasses or plants and plant

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
may include:	products • implementing movement controls • notifying appropriate authorities • quarantining one or more premises.
Relevant information may include:	• clinical signs • disease history • epidemiology • livestock or crop data • owner/manager contact details • premises data • surveillance • tracing.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to carry out movement and security procedures	1.1. Specific movement and security procedures to be carried out, and times and locations of operations are identified from work instructions. 1.2. Where required for the particular procedures to be carried out, Personal Protective Equipment (PPE) is obtained and checked for serviceability and use. 1.3. Documentation required to carry out specific procedures is obtained. 1.4. Resources required to carry out specific procedures are obtained and checked for serviceability and use.
2. Apply movement and security procedures	2.1. Traffic check point is established according to work instructions. 2.2. Movement of vehicles, personnel, products, livestock and/or plant material through declared areas is monitored in line with requirements. 2.3. Permits are issued and/or checked appropriately according to standards and protocols. 2.4. Where vehicles are determined to be carrying personnel, products, livestock and/or plant material without a valid permit, action is taken according to standards and protocols. 2.5. Close liaison with external security providers is maintained as required. 2.6. PPE is used where required, according to occupational health and safety requirements and manufacturer instructions. 2.7. Resources are appropriately decontaminated where required, according to standards, protocols and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	policies.
3. Check and adjust movement and security procedures	3.1. Application of movement and security procedures within own area of responsibility is regularly checked to ensure consistency, currency and ongoing effectiveness. 3.2. Reports are provided to appropriate authorities as required. 3.3. Any variations in consistency, currency and ongoing effectiveness or failure to achieve objectives are reported to appropriate authorities and remedial action is undertaken within one's scope of authority. 3.4. Any recommendations for adjusting movement and security procedures are communicated to supervisor and appropriate authorities.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- applying movement and security controls under emergency conditions
- carrying out instructions
- identifying the checks and permits required to maintain effective security
- taking appropriate measures to enforce movement and security procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

Required knowledge

- application of the law in relation to movement and security controls during an emergency disease or plant pest incursion response program

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• decontamination procedures where required • movement permit system • safety issues • understanding the role of movement and security controls in controlling the spread of an emergency disease or a plant pest incursion.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to: • establish appropriate movement and security controls • check movement permits for validity • check for unauthorised movement of personnel, livestock, plant materials and/or products that have been in contact with infectious or infested material • deal with unauthorised movements in line with required standards and protocols.
Context of and specific resources for assessment	Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in a practical training activity or emergency disease outbreak or a plant pest incursion.
Method of assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to carry out movement and security procedures.
Guidance information for	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for emergency disease or plant pest control activities	1.1. Work instructions received from IP site supervisor are clarified in preparation for carrying out control procedures. 1.2. Appropriate equipment and materials are selected and prepared to undertake control activities in line with IP site supervisor work instructions and associated safety requirements. 1.3. Personal Protective Equipment (PPE) is selected and prepared according to Occupational Health and Safety (OHS) requirements.
2. Implement emergency disease or plant pest control activities	2.1. Control activities are implemented in line with work instructions, OHS requirements and standards and protocols. 2.2. Log of activities carried out on the IP is maintained according to instructions from IP site supervisor. 2.3. PPE is used as instructed by IP site supervisor and according to OHS requirements and manufacturer instructions. 2.4. Within own area of responsibility, work instructions are given and received.
3. Check and adjust emergency disease or plant pest control activities	3.1. Control activities within own area of responsibility are regularly checked to ensure compliance with work instructions, OHS requirements, and standards and protocols. 3.2. Reports are provided to IP site supervisor as required. 3.3. Any variations from work instructions, and standards and protocols, or failure to achieve

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	

Emergency diseases or plant pests may include:	• diseases that may affect animals, fish and other marine animals including:
	  • diseases that are exotic to Australia
	  • serious infectious diseases of or uncertain cause
	  • severe outbreaks of known endemic diseases that are considered to be of national significance with serious social or trade implications
	  • variants of endemic diseases
	• species, biotypes or strains of invertebrate pests or pathogens which are injurious to plants or plant health.

Information covered in work instructions may involve:	• stipulations relating to standards, protocols and specific IP site requirements, and may cover:
	  • administration
	  • collection of biological samples
	  • decontamination
	  • destruction of livestock or crop
	  • disposal of carcasses and infectious material
	  • gate control
	  • inventory and valuation
	  • mapping of location of affected plants or

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	crops • pest control • team leader duties • wild animal control.
Control procedures may include:	• containment of livestock or crop and other materials • decontamination and disinfection of premises, equipment and staff leaving premises • destruction and slaughter • disposal of livestock or crop and other materials • gate control • pest control • sample collection • use of chemicals • vaccination and treatment • wild animal control.
OHS requirements may include:	• administration of treatments and vaccinations • animal handling and use of approved restraints where required • correct techniques for manual handling • policies relating to livestock or crop destruction and disposal • procedures for dealing with risks associated with working in areas where there may be an accumulation of airborne dusts or gases, such as ammonia, methane and carbon dioxide • procedures for dealing with risks that may arise when working in buildings or yards that have been damaged in the course of implementation of control procedures • processes for avoiding needle stick injuries and safe use of biohazard containers for disposal of sharps • safe operation of machinery and equipment, including consideration of layout, buildings, terrain, location and prevailing weather conditions • safe use and handling of chemicals • use of firearms for livestock destruction • use of PPE and clothing.
Relevant standards and protocols	• approved standard operating procedures

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
may include:	• Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) or similar protocols • damage minimisation policies • environmental policies • OHS legislation • relevant commonwealth, state and territory legislation.

AHCBIO302A Identify and report unusual disease or plant pest signs

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit of competency specifies the outcomes required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.

Application of the Unit

Application of the unit	The work in this unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify signs of unusual disease or a plant pest	1.1. Signs of disease or a plant pest are identified. 1.2. Signs of disease or a plant pest are compared with own experience of common endemic disease or a plant pest in the species. 1.3. Where signs indicate an unusual disease or a plant pest, severity and extent of problem in the species are assessed. 1.4. Where signs indicate an unusual disease or a plant pest, immediate advice is sought from supervisors, professionals or appropriate authorities.
2. Report signs of unusual disease or a plant pest	2.1. Signs of unusual disease or a plant pest are reported immediately to appropriate authorities. 2.2. Biosecurity measures are implemented according to enterprise biosecurity plans and instructions from appropriate authority.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• observing • recognising unusual disease or plant pest signs

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• required procedures to follow in notifying appropriate authorities • where to access additional reliable information or personnel.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to: • identify unusual disease or pest signs within ones own experience • notify appropriate authorities where appropriate • implement appropriate biosecurity measures.
Context of and specific resources for assessment	For valid assessment, one must have opportunities to participate in a range of exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to identify and report unusual disease or plant pest signs. The candidate must also have access to resources such as photographs of signs of emergency and endemic diseases

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	and of plant pests.
Method of assessment	Assessment for this unit of competency may be undertaken on or off the job. The unit could be assessed on its own or in combination with other units of competency relevant to the job function,
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. The skills and knowledge required to identify and report unusual disease or plant pest signs must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. For example, this could include a range of diseases for a particular species or a variety of pests.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Signs of disease or a plant pest may include:	• abnormality • clinical signs • decline and dieback • insect damage or presence of insects • mortalities and mode of death • presence of highly specific vectors • results of post-mortem examinations • unexplained levels of morbidity or mortality in populations.
Unusual diseases or plant pests may include:	• disease that is classified as an emergency disease • disease that presents in an unusual, uncommon or atypical form • plant pest species, biotype or strain of invertebrate pest or pathogen injurious to plants or plant health.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
Appropriate authorities may include:	• national disease watch hotlines • property owner or manager • regulatory officers from state and territory departments of Primary Industries, Agriculture, Fisheries and Forestry.

AHCBIO202A Follow site quarantine procedures

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of following enterprise site quarantine procedures that are designed to reduce the likelihood of pathogenic organisms entering the site, and defines the standard required to: read and/or interpret site quarantine procedures; follow enterprise quarantine procedures (including industry quality assurance procedures if applicable); report and respond to quarantine issues or breaches of procedures; communicate with visitors to the enterprise about site quarantine procedures.

Application of the Unit

Application of the unit	This unit applies to the routine part of ones own work and is applied to visitors to the site. Work is performed under supervision and according to strict procedures and policies.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to work in quarantine site	1.1. Ensure personal and/or work vehicles are decontaminated before entering the quarantine site. 1.2. Contact with potential contaminants is reported according to enterprise requirements. 1.3. Hands are washed before livestock, feed, plant stock or other products are handled. 1.4. Showering and changing into work clothes is carried out if required. 1.5. Appropriate clothing and footwear is put on before commencing work and street clothing is securely stored away from livestock, feed or other products. 1.6. Footbaths are used thoroughly and checked for disinfectant level before entering site and sheds if required.
2. Work in quarantine site	2.1. Chemicals and/or medications are handled and stored appropriately. 2.2. Different feed mixes, soils and/or growing media and/or other products are kept separate and appropriately marked according to enterprise procedures. 2.3. Any cases of disease or pest infestation are identified and reported to supervisor. 2.4. Any breaches of quarantine procedures are identified and reported to supervisor.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5. Any Occupational Health and Safety (OHS) hazards are identified and appropriate action is taken according to enterprise policy and OHS legislation and codes. 2.6. All waste products is disposed of according to enterprise procedures. 2.7. All deceased livestock, unwanted biological material or damaged/infected plant stock are disposed of according to enterprise procedures. 2.8. Information relating to work in quarantine site is recorded as required by the enterprise procedures.
3. Assist in maintaining site quarantine procedures	3.1. All visitors are informed of the quarantine procedures and are provided with appropriate clothing and footwear, if required by enterprise procedures. 3.2. Visitors are required to sign in, state their recent activities and exposures, and wash or shower if required by enterprise procedures. 3.3. Any observed breaches of quarantine procedures by visitors are noted and reported to supervisor. 3.4. Gates and doors are kept locked where required by enterprise procedures and supervisor instructions. 3.5. Where installed, security fencing is maintained according to supervisor's instructions. 3.6. Deliveries to site are checked to ensure that established procedures for vehicle decontamination, unloading and receipt and holding or storage of stock and/or supplies are followed.
4. Respond to site quarantine breach or problem	4.1. The specific problem and its location is identified and reported to supervisor. 4.2. Problems are secured according to enterprise procedures. 4.3. Quarantine site and location of breach is cleaned and disinfected as required according to the specific nature of the problem and enterprise procedures. 4.4. Livestock, plant stock suspected of being exposed to contaminants are isolated and monitored for evidence of contamination according to enterprise procedures. 4.5. All contaminated stock/materials are treated and/or disposed of according to enterprise procedures. 4.6. Information about the breach or problem is recorded according to enterprise procedures.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• read and/or interpret site quarantine procedures • follow biosecurity and hygiene procedures • use literacy skills to follow sequenced written instructions and record information accurately and legibly • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.
Required knowledge
• enterprise site quarantine policy and procedures • industry quality assurance requirements (where applicable) and documentation required to be kept • reporting procedures for alleged breaches of site quarantine procedures • consequences of breaching site quarantine procedures • OHS, environmental and disease legislative and enterprise requirements.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
competency in this unit	criteria and required skills and knowledge and include achievement of the following: • read and/or interpret site quarantine procedures • follow enterprise quarantine procedures (including industry quality assurance procedures if applicable) • report and respond to quarantine issues or breaches of procedures • communicate with visitors to the enterprise about site quarantine procedures.
Context of and specific resources for assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to carry out movement and security procedures. The candidate must also have access to resources that establish movement and security controls.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Sites may include:	• quarantine site of the whole farm • an apiary • enterprise premises, or part of the premises or enterprise, such as • an isolation area or sick bay. • in some cases, the quarantine area may extend beyond the enterprise boundaries.

PSPGOV307B Organise workplace information

Modification History

PSPGOV307B Release 2: Layout adjusted. No changes to content.

PSPGOV307B Release 1: Primary release.

Unit Descriptor

This unit covers organisation of information in the workplace. It includes collecting and assessing information, organising and providing information.

In practice, organising workplace information may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, working effectively, working with diversity, using resources, assisting with scientific technical support, undertaking basic procurement, calculating duty and other taxes, undertaking routine inspections and monitoring, searching land, investigating tenure and land use history, processing claims, etc.

This is one of 5 units of competency in the *Working in Government* and *Management* Competency Fields that deal with information/knowledge management. Related units are:

- PSPGOV206B Handle workplace information
- PSPGOV406B Gather and analyse information
- PSPGOV504B Undertake research and analysis
- PSPMNGT614A Facilitate knowledge management

This unit replaces and is equivalent to *PSPGOV307A Organise workplace information*

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect and assess information	1.1 ***Information*** is gathered and recorded within specified timeframes and according to organisational procedures. 1.2 Information gathered is checked for accuracy and to ensure it meets relevant work requirements. 1.3 Confidentiality and privacy procedures are followed.
2. Organise and provide information	2.1 Information and materials are organised and ***stored*** within established procedures. 2.2 Information is organised for easy access by relevant staff. 2.3 Records maintenance is completed in a manner that is accurate, up-to-date and in a format acceptable to the organisation. 2.4 Security procedures are followed for information storage and retrieval. 2.5 Incoming information and materials within the area of responsibility are sorted and distributed to relevant staff in accordance with ***legislation, policy and procedures***. 2.6 Information is communicated to relevant staff clearly and within appropriate timeframes. 2.7 Information is used to develop options for consideration and action as required.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

© Commonwealth of Australia, 2025 Public Skills Australia

Look for evidence that confirms skills in:

- establishing and maintaining filing systems
- applying computer technology to data storage, security, retrieval and presentation
- applying information security requirements
- undertaking basic statistical and numerical manipulation
- problem solving and referring problems as required
- communicating with colleagues and supervisors
- responding to diversity, including gender and disability
- applying public sector legislation such as occupational health and safety and environment in the context of organising workplace information

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, policies, procedures and guidelines relating to information handling in the public sector, such as confidentiality, privacy, security, freedom of information
- public sector standards
- organisational information handling and storage procedures
- electronic and manual filing systems
- databases and data storage systems
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of information management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

PSPBORD305A Calculate taxes, fees and charges

PSPETHC301B Uphold the values and principles of public service

PSPGOV301B Work effectively in the organisation

PSPGOV305B Access and use resources and financial systems

PSPGOV306B Implement change

© Commonwealth of Australia, 2025 Public Skills Australia

PSPGOV308B Work effectively with diversity

PSPGOV312A Use workplace communication strategies

PSPGOV313A Compose workplace documents

PSPIM301A Process claims

PSPLAND302A Investigate tenure and land use history

PSPLEGN301B Comply with legislation in the public sector

PSPOHS301A Contribute to workplace safety

PSPPROC302A Undertake basic procurement

PSPREG301A Undertake routine inspections and monitoring

PSPSCI301A Assist with scientific technical support

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- organisation of workplace information in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to information in the public sector
- case studies and workplace scenarios to capture the range of situations likely to be encountered when organising workplace information

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when organising workplace information, including coping with difficulties, irregularities and breakdowns in routine
- organisation of workplace information in a range of (3 or more) contexts (or occasions, over time).

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people

© Commonwealth of Australia, 2025 Public Skills Australia

- older people
- people in rural and remote locations.

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Information is:

- specified by the work of the organisation and may include:
  - basic numerical and statistical data
  - legislative, organisation, and policy requirements
  - client data
  - registries and file records
  - library materials
  - financial records
  - mail
  - human resources records
  - asset details
  - meta-data

Storage of information may include:

- systems which are internal and external to the organisation
- manual and computer files

© Commonwealth of Australia, 2025 Public Skills Australia

- databases
- information systems
- records management systems
- web sites

Legislation**, **policy and procedures may include:

- Commonwealth and State/Territory legislation, standards and guidelines especially relating to privacy, confidentiality, freedom of information, security, fraud control, copyright, intellectual property
- government policy
- public sector code of ethics
- Australian standards such as records management, knowledge management, risk management
- the organisation's policies and practices
- organisational code of conduct

Unit Sector(s)

AHCBIO301A Work effectively in an emergency disease or plant pest response

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit specifies the outcomes required to work effectively within own area of responsibility in a response to an emergency disease or plant pest incursion.

Application of the Unit

Application of the unit	This unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain and use information about the emergency disease or plant pest and an appropriate response	1.1. Information about emergency disease or plant pest and appropriate response is accessed and applied during an emergency disease or plant pest response. 1.2. Information is used to address specific work needs and further information requirements are identified. 1.3. Information and/or resources required from stakeholders are identified and accessed.
2. Work according to organisational requirements	2.1. All communication with stakeholders is carried out according to organisational policies and procedures. 2.2. All work undertaken reflects a current working knowledge and understanding of organisational requirements. 2.3. All work undertaken reflects understanding and compliance with relevant duty of care and legal responsibilities. 2.4. Work activities conform to relevant legislation, regulations, procedures and codes of practice appropriate to work area and level of responsibility. 2.5. Hazards and risks relevant to specific work being undertaken are identified and responded to as required. 2.6. Work is carried out according to organisational policies and procedures.
3. Manage own work	3.1. Work instructions are interpreted correctly and clarification is sought if inconsistencies are noted. 3.2. Workload is assessed and competing demands are prioritised to achieve personal, team and organisational goals and objectives. 3.3. Need for physical and human resources is communicated clearly to appropriate person(s). 3.4. Own role, responsibilities and duties are performed

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	in a positive manner that promotes cooperation within the workplace. 3.5. Importance of own and others' roles in achieving organisational goals is respected. 3.6. Personal symptoms of stress and their potential to impact on performance are recognised, action is taken to minimise their negative effects and undue personal stress is reported to appropriate persons.
4. Comply with biosecurity requirements	4.1. Biosecurity procedures relevant to own work area are identified. 4.2. Work activities are carried out according to established biosecurity procedures. 4.3. Personal protective equipment and fomites are maintained according to biosecurity procedures. 4.4. Biosecurity breaches are reported immediately to appropriate person. 4.5. Biosecurity records are completed according to work area requirements.
5. Adapt to change as required	5.1. Need for change in own work practices to reflect critical emergency issues or emerging trends is identified and assessed. 5.2. Changes required are discussed and agreed with senior staff. 5.3. Own work practices are changed where required and according to agreed arrangements. 5.4. Flexible approach that takes account of changing priorities and circumstances is applied when implementing instructions for changes to work practices. 5.5. Change is monitored to determine the effectiveness of revised work practices and senior staff members are advised of findings.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
Required skills
• operating in stressful situations • prioritising conflicting demands • working in a strict line management environment • use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required • use numeracy skills to estimate, calculate and record routine workplace measures • use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• district, regional and local plans • functional plans of other government agencies • legal and regulatory framework under which responses are taken • national plans such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN) • Occupational Health and Safety (OHS) and biosecurity procedures • national, state and territory plans.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to: • access and use national plans such as

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	AUSVETPLAN or PLANTPLAN • operate within a response team and follow instructions • operate effectively under stress in tasks involving problem solving in relation to own role • make effective judgements • follow instructions • provide advice in area of expertise and authority • understand legal and regulatory implications of one's own role in an emergency disease or plant pest response.
Context of and specific resources for assessment	For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to work effectively in an emergency disease or plant pest response. The candidate must also have access to the following resources: • simulated workplace for an emergency disease or plant pest response for assessment using scenarios, case studies, role plays and group work • access to local, regional, district, state and territory, and national plans relating to an emergency disease or plant pest response.
Method of assessment	Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in a simulated workplace or in a situation that reproduces normal work conditions.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities. The skills and knowledge required to work effectively in an emergency disease or plant pest response must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. This could include: • working in the field or in a local, state or national control centre

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	• participating in a response to a plant pest or to an emergency disease of animals, fish or other marine animals • participating in a response to a natural disaster.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Information about emergency diseases or plant pests may be found in:	• AUSVETPLAN or PLANTPLAN strategies • published texts • scientific literature.
Information about emergency response may be found in:	• district, regional or local plans • functional plans of other government agencies • industry biosecurity plans • national, state or territory plans.

Emergency diseases and pests may include:	• diseases that may effect animals, fish and other marine animals include:
	  • disease that is exotic to Australia
	  • serious infectious diseases or pests of or uncertain cause
	  • severe infectious disease of unknown or uncertain cause
	  • severe outbreaks of known endemic diseases or pests that are considered to be of national significance with serious social or trade implications
	  • variants of endemic diseases
	  • biotypes or strains of invertebrate pests or pathogens injurious to plants or plant health; invasive pest plants.

Stakeholders may include:	• agronomists and consultants • chemical resellers • consumers • crop monitors or scouts • general community • government departments

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• industry • producers and other local enterprise owners • other personnel involved in an emergency response • plant pathologists • property owners, managers and staff • stock agents and transport personnel • veterinarians.
Organisational requirements may include:	• biosecurity and OHS policies and procedures • district or regional plans • functional plans of other government agencies • goals, objectives, policies and standard operating procedures of response lead agency • national plans such as AUSVETPLAN or PLANTPLAN • local, state and territory plans.
Duty of care and legal responsibilities may include:	• duties and responsibilities for self and others • responsibilities defined through legislation • responsibility of an employer to provide a safe workplace.
Procedures may include:	• AUSVETPLAN or PLANTPLAN • biosecurity procedures of industry and response lead agency • handling and storage of hazardous materials • industry codes of practice • legal or regulatory requirements • personal hygiene • standard operating procedures of response lead agency.
Hazards and risks may include:	• allergic reaction • chemical exposure • occupational trauma • physical injury • spreading disease or plant pests • zoonotic infection.
Ways in which work may be carried out include:	• individually • in cooperation with other sections in response team, using their skills and knowledge as appropriate.
Appropriate person may include:	• controller

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	• section manager • team leader.

Fomites may be defined in terms of:	• inanimate objects capable of transmitting an infectious agent such as:
	  • boots
	  • clothing
	  • vehicles.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Identify workplace hazards and risks and advise others**	1.1 Procedures and practices are followed to identify workplace ***hazards*** and risks 1.2 Appropriate procedures for dealing with hazards in the workplace are followed in accordance with Occupational Health and Safety (OH&S) guidelines and the organisation's procedures 1.3 ***Contact*** is maintained at all times with other crew members and supervisor 1.4 Hazards in the work area and warnings of hazardous situations are recognised and reported to designated personnel 1.5 Stressful situations are recognised and support is sought or given to minimise effect
2. **Implement hazard control procedures**	2.1 ***Personal protective clothing and equipment*** is selected and donned in accordance with the organisation's procedures and within its limitations 2.2 Appropriate procedures and work instructions for controlling risks and hazards are followed 2.3 Personal health is protected in accordance with legislative and organisation's procedures 2.4 Equipment appropriate to dealing with a hazard is used in accordance with standard operating procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.5 Controls are implemented to minimise damage to the environment
	2.6 Fluid and food intake and rest breaks are maintained in accordance with environmental and working conditions and the organisation's policy
	2.7 Assistance is given to crew members in danger while maintaining personal safety in accordance with the organisation's procedures
3. **Review effectiveness of hazard control procedures**	3.1 Hazard controls are monitored to ensure continued effectiveness
	3.2 Changes in incident behaviour and conditions are reported immediately to supervisor
	3.3 Factors which may create or increase ***risk*** to life, property or the environment are identified, reported and controlled in so far as possible
4. **Participate in the implementation of OH&S in the workplace**	4.1 OH&S issues are raised with designated personnel in accordance with procedures and OH&S legislation
	4.2 Contributions to OH&S implementation in the workplace are made within organisation's procedures and scope of responsibilities and competencies
	4.3 Activities/debriefings are undertaken which ***alleviate occupational stress***

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

identification of typical hazards in the workplace

use of protective clothing and equipment

Required Knowledge

Health and fitness requirements such as diet and nutrition, exercise, impact of smoking, alcohol and drugs on the body

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

Occupational hazards encountered in the workplace such as structural collapse, electricity, chemicals, dust, wildfires, extreme temperatures, biological, radiation, hazardous atmospheres, flammable and combustible liquids and gases and manual handling

Personal protection such as clothing and equipment requirements, survival in life threatening situations and health hazards

Signs of occupational stress, limiting stress, dealing with stress and seeking assistance

Signs of fatigue and dealing with fatigue

Methods of hazard control and reporting in accordance with the organisation's procedures

Procedures for participating in OH&S arrangements

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in: correct identification of hazards in the workplace application of the organisation's procedures including the correct selection and use of PPE advising and reporting of workplace hazards in accordance with the organisation's requirements notification of risk to the team and supervisor in a timely manner **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** A combination of oral or written presentations, observations, on the job and/or in a range of simulated environments

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	Specific resources for assessment Availability of appropriate protective clothing, equipment and organisational procedures
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Workplaces may include	locations where activities and operations may occur such as structures, open spaces, water, public and private property, (including crown land), mobile property, confined spaces
Activities to alleviate occupational stress include	avoidance limiting exposure withdrawal defusion/debriefing counselling services referral to medical services or relevant government agencies
Hazards must include those associated with	urban, rural and aircraft fires training and simulation activities hazardous materials electricity
and may also include	prescribed burning activities vehicle and industrial rescue/extrication flood, storm and tempest rescues travelling in vehicles and

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	travelling in aircraft
The nature of the hazard must include	**Incident**
	chemical spills such as those involving dangerous goods; vapours/poisonous gases/smoke; contaminated fire water; explosions/flammability; radioactivity; environmental
	contamination of air/land/water, appliances and equipment
	Biological
	biological such as infections, bites, stings, radiation
	Personal
	heat stress; dehydration
	psychological such as critical incident stress; shock, drownings
	Environmental
	fire and explosions; falling objects (trees, masonry, rocks etc.); subsidence; water load; structural collapse, radiant heat
	entrapment by fire in a vehicle or on foot
	chemical types
	heavy machinery
	confined space/structure
and may also include	aerial retardant drops
	broken terrain
Risk control measures must include	use of clothing and equipment to provide protection
	eye, sight, hearing protection
	appropriate training
	barriers
	vehicle protection hoses and devices
	survival techniques
	life support equipment/features
and may also include	spill clean up kits
	electrically insulated tools and equipment

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	fire blankets/roll over protection
	goggles, face shield, hearing protection and chainsaw chaps
	adequate food, fluid and other welfare needs during extended operations
Personal protective clothing and equipment must include	Turnout uniform and gloves
	respiratory protection
	eye protection
and may also include	face shield
	chemical protective clothing
	personal lines
	personal distress units
	personal accessories kit
	chainsaw chaps
Life support equipment/ features may include	radiation shielding
	vehicle cabins with/without sprays
	low water level indicators
	protective vests
	fire blankets
	first aid kit
Factors which must require evaluation and review include	available resources
	traffic and spectators
	wind strength/direction
	temperature and relative humidity
	fire development/behaviour
	structural and equipment integrity
	water supply/pressure
	vegetation type
	topographical features including slope, terrain and aspect
Contact with crew members and supervisors must	visual
	touch

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

include	radio verbal
and may also may include	electronic and written
Designated personnel must include	other crew members/supervisors/OH&S representatives

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise meetings	1.1. Purpose of meeting(s) is clarified with the chair, secretary or coordinator. 1.2. Schedule of meetings is prepared and maintained in line with any group, regional and/or agency requirements. 1.3. Venue and date of meeting is organised according to meeting schedule, group or regional requirements and within any budget constraints. 1.4. Participants are advised of any changes to original meeting details. 1.5. All appropriate individuals are advised of details of meetings and followed up for confirmation of attendance according to instructions. 1.6. Any apologies are accepted and accurately recorded for presentation at meeting. 1.7. Meeting room is set up in a timely manner to suit arrangements and according to instructions.
2. Prepare business papers for meetings	2.1. Notice of meeting and agenda are accurately prepared to instructions and details provided. 2.2. Reports required for meeting are prepared or collated as appropriate. 2.3. All business papers are distributed to appropriate individuals following established group or regional meeting guidelines.
3. Record and produce minutes of meeting	3.1. Notes are taken of meeting activities and decisions to ensure an accurate record of meeting. 3.2. Minutes of the meeting are produced in required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	format to provide an accurate account of meeting. 3.3. Minutes are checked for accuracy, approved and distributed to instructions.
4. Follow up after meetings	4.1. Action lists on work following from meetings are prepared according to instructions. 4.2. Requests for information from group members or officers are dealt with promptly and accurately. 4.3. Correspondence associated with meetings is dealt with in a timely manner according to instructions.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• use office equipment, such as computers, photocopiers and facsimiles • plan events • manage budgets • use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks • use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views • use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data • use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.
Required knowledge
• meeting procedures, both formal and informal • agency guidelines where applicable or instructions • relevant program and incorporation requirements for group where applicable • local facilities for meetings • local arrangements for authorising expenditure • local community and activities

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• office and related business procedures • Occupational Health and Safety (OHS) and public safety requirements.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following: • organise formal meetings • prepare business papers and additional information for meetings • conduct meetings and carry out follow up actions • plan other events for a committee • maintain records, including the operating budget, for a committee.
Context of and specific resources for assessment	Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Service may include:	• meetings including group management

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
	meetings, group general or annual meetings • training/extension sessions • sub-committee meetings related to a project or other specific activity • regional meetings for coordination or for management of regional plan • agency related meetings associated with management of program.

SITXMPR002A Create a promotional display or stand

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to create a display or stand for the promotion of a product or service. It requires the ability to identify the objectives of the promotion, determine who the audience will be, select all display components and assemble the display or stand.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit describes a fundamental sales and marketing skill for those working within the service industries and applies to the full range of industry sectors and environments.

Promotional displays or stands are set up and operated in a range of contexts, including trade or consumer shows, meeting or conference events, in-house promotions, window displays, visitor information centre displays and shopping centre promotions. They might be used to promote any product, service, or event; a group of products being cooperatively marketed; or even a whole city, region or tourist precinct.

This unit does not include all the skills of a specialist display designer or visual merchandiser. Rather, it reflects the more general display skills needed by a large range of service industry personnel involved in sales and marketing activities. Frontline sales and marketing personnel who operate with some level of autonomy or under limited supervision and guidance from others would be responsible for setting up displays or stands.

© Commonwealth of Australia, 2025 Public Skills Australia

Licensing/Regulatory Information

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Make preparations for display or stand.	1.1 Identify display or stand objectives in consultation with appropriate colleagues.

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.2 Obtain operational ***information to assist in display or stand preparation*** to allow time for adequate planning.
	1.3 Plan display or stand to meet the needs of target audience.
	1.4 Select and organise adequate ***display supplies*** and transportation arrangements according to display plan.
	1.5 Identify the need for and seek assistance from display specialists where appropriate.
2 Create the display.	2.1 Create or dress the display or stand, making creative use of available materials and supplies.
	2.2 Use established ***display techniques*** to maximise the visual appeal of the display and reflect the nature of product or service being sold.
	2.3 Use display equipment correctly and safely.
	2.4 Check display or stand to ensure safety of colleagues and customers.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- safe OHS practices that relate to transporting, carrying, assembling and monitoring the display or stand
- basic visual merchandising techniques for creating displays with typically available materials, including techniques for maximising the effectiveness of commonly-used collateral in displays, including brochures and posters
- literacy skills to collect and interpret information about the needs of the target audience and operational aspects of the display or stand.

The following knowledge must be assessed as part of this unit:

- typical tourism industry contexts in which displays are used, such as trade and consumer shows, shopping centre promotions, information centre displays, window displays and promotional functions

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- range of materials and equipment used for display in different locations and settings, such as stages, exhibition booths, permanent displays and window displays.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- creation of a display or dressing of a promotional stand to meet specific objectives using accepted display techniques
- ability to create display or stand in a well-organised and safe manner
- creation of a display or dressing of a promotional stand within typical workplace time constraints that meet determined deadlines.

Context of and specific resources for assessment

Assessment must ensure:

- creation of a display or promotional stand within commercially realistic promotional environments
- use of display and promotional material commonly used by tourism and hospitality organisations.

Methods of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to create a promotional display or stand. The following examples are appropriate for this unit:

- evaluation of the creativity and visual appeal of a display created by the candidate
- case studies to assess application of different display techniques to typical industry promotional situations
- written and oral questioning or interview to test

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

knowledge of basic and different visual merchandising techniques
- written and oral questioning or interview to test knowledge of safe working practices
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXMPR004A Coordinate marketing activities
- SITXCOM005A Make presentations.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Information to assist in display or stand preparation may include:

- nature of display area, including booth and stage
- floor plans
- type of surface on which display is to be created
- set-up times and duration
- OHS requirements
- budget allocation

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

- need for utilities, such as electricity and water
- need for waste management
- security.

Display supplies may include:

- furniture
- collateral materials, such as brochures, posters, banners and organisational colours and logo
- scissors
- adhesives and velcro
- pins
- string
- audiovisual systems, including videos and sound systems
- floral arrangements and potted plants
- balloons and other decorations
- mobiles
- computers.

Display techniques must include the use of:

- fabric
- flags
- signs
- printed materials
- three-dimensional materials
- freestanding display options
- product samples
- local produce
- cultural artefacts.

assessment and evidence required to demonstrate competency in this unit	demonstrated in: identification of specified hazards appropriate presentation of information in accordance with the organisation's procedures demonstration of ability to undertake risk mitigation activities **Consistency in performance** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** A combination of oral or written presentations, observations, on the job and/or in a range of simulated environments **Specific resources for assessment** Provision of the appropriate literature and equipment
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Community members and organisations may include	Geographically-based groups of people such as: households, neighbourhood, suburbs, business districts and towns Shared-experience groups of people such as: particular-interest groups, ethnic groups, professional groups, language groups, age groupings and those exposed to a particular hazard
Property may include	Buildings, infrastructure which provide for the

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	movement of people, goods and services
Environment may include	Natural environment such as: topographical features, water bodies, vegetation communities and ecosystems
	Elements such as economics, commerce, culture and public safety service provisions that relate to how the community functions
Hazards may include	wildfires and associated exposures
	severe storm
	flood
	storm surge
	structural collapse
	explosion
	electrical hazards
	structural fire and associated exposures
	impediments to firefighting and rescue activities
	hazardous materials
	dangerous goods
	illegal or careless use of fire
Organisation's risk modelling process at this level means	a set of procedures used for risk identification purposes and to advise the community of recommended actions
Accompanied inspections may include	familiarisation inspections, licensed premises inspections, inspections required by legislation, scheduled inspections
Legislation may include	local, state or federal acts or regulations applying to organisation
Mitigation strategies may include	hazard reduction
	hazard removal
	hazard isolation
	hazard management
	community information/education
	community activities
	altering work practices

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Feedback may include	checklists reports, verbal and/or written submitted to immediate supervisor survey results facilitated group meetings standard organisation forms

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Locate and identify fire safety systems**	1.1 ***Alarms***, ***detectors***, ***sprinklers*** and other fire safety ***systems*** are identified and located 1.2 On-site visual identification of type and mode of operation is made
2. **Check and monitor the status of fire safety systems**	2.1 Alarms, detectors, sprinklers and other fire safety systems are checked in accordance with the organisation's procedures 2.2 Status of fire safety systems is monitored and faults are identified and reported using appropriate reporting procedures in accordance with the organisation's procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

identify various forms of communication systems and components

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

identify various forms of detection devices and alarm systems

identify various alarms

check the status of various forms of detection and suppression systems

identify faults in fire safety systems

apply organisation's procedures

Required Knowledge

advantages and disadvantages of various forms of heat and smoke detection devices

basic operating principles and applications of heat and smoke detectors

basic components of heat and smoke detection systems

basic operating principles and applications of smoke alarms

functions of a sprinkler system

sources of water supply to sprinklers systems

basic components and their functions in the operation of a sprinkler system

organisation's procedures

use and operation of fire control room

combining of addressable and non-addressable detectors in a fire detection and alarm system

appreciation of building emergency evacuation procedures

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential that competence is demonstrated in: identification of types of sprinkler systems identification of components of sprinkler systems identification of fire detection systems and fire control facilities identification of firefighter control facility

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	Consistency in performance Evidence should be gathered over a period of time in a range of actual or simulated workplace environments
Context of and specific resources for assessment	**Context of assessment** Evidence of competence may be demonstrated on the job or by exercises in a simulated workplace environment Written or verbal assessment of knowledge components may be used as supporting evidence Checking of fire safety systems is to be done under direct supervision **Specific resources for assessment** This unit will require access to a wide range of fire safety systems and their components
Guidance information for assessment	Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Systems may include	fire sprinkler fire detection and alarm communications fire suppression building and smoke control and other systems according to the organisation's requirements
Fire sprinklers may include	wet pipe dry pipe

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Sprinkler components may include	all types of sprinkler heads alarm valves stop valves pressure and flow switches tamper switches pressure gauges valve monitoring system pressurisation arrangement retard chambers
Heat and smoke detection systems may include	addressable non-addressable local alarm
Fire suppression may include	gaseous (carbon dioxide, nitrogen and inert gas) water foam vaporising liquid aerosol dry powder
Smoke detectors may include	photo-electric ionisation smoke sampling beam carbon monoxide fuzzy logic (multi-decision based process smoke detectors)
Smoke alarms may include	photo-electric ionisation mains power (240v) battery operated interconnected or single station carbon monoxide

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Heat detectors may include	rate of rise fixed temperature line type
Flame detectors may include	ultra violet infra-red
Alarms and communications may include	radio telephones paging (audible and visual alarms) emergency warning and intercommunication system (EWIS) wire free
Building controls may include	smoke control mechanical plant shutdown other systems operations (eg. electrical system shutdown, door opening)
Smoke controls may include	dampers smoke detectors control panels fans and motors smoke and heat vents

1	Develop a professional rapport with young people	1.1	Conduct interactions with young people in a fair, just, humane and positive manner
		1.2	Use communication strategies with individuals for effective interaction and problem solving
		1.3	In all work demonstrate a consistent commitment to young people
2	Address issues associated with the culture of young people	2.1	In all actions and decisions, take into account the culture of the young person
		2.2	Consider cultural sensitivities in communication techniques and adapt style and language to accommodate different cultural values and practices
		2.3	Evaluate issues in relation to young person's culture, family background and interest and modify approach appropriately
		2.4	Select activities and resources to promote cross cultural awareness
		2.5	Establish guidelines that are relevant to the culture and background of the young person
3	Recognise that youth culture is distinct	3.1	In all interventions, take account of youth culture the young person identifies with
		3.2	Select activities and interventions to fit both individual and/or group needs of particular young people
		3.3	Assist young people to negotiate positive outcomes within a political framework
		3.4	In all interventions, take account of their economic impact on young people
		3.5	In all work demonstrate a commitment to addressing any economic disadvantages young people experience

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively perform task skills; task management skills; contingency management skills and job/role environment skills as outlined in elements and performance criteria of this unit

These include knowledge of:

Own work role within the context of the youth sector

Organisation role within the context of the youth sector

Interrelationship of society, culture, the family and the young person

Aspects of human behaviour and development related to young people, their personal and social development and relationships

Principles of access and equity

Statutory framework in which the work takes place

Political and economic context as listed in the Range Statement

Current issues facing young people and existing services to address their needs and rights

Principles and practices of community support

Youth cultures social, political and economic frameworks

Essential skills:

It is critical that the candidate demonstrate the ability to:

Prepare reports such that the information and the way it is organised is appropriate to its purpose and audience

In addition, the candidate must be able to demonstrate relevant task skills; task management skills; contingency management skills and job/role environment skills

These include the ability to:

Demonstrate application of skills in:

interpersonal communication with young people and other stakeholders

working as part of a team or as a sole worker

communication

advocacy

empathy

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	The individual being assessed must provide evidence of specified essential knowledge as well as skills This unit is best assessed in the workplace or in a simulated workplace under the normal range of conditions Consistency in performance should consider the organisation and individual context within which work takes place
Access and equity considerations:	All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work All workers should develop their ability to work in a culturally diverse environment In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander

© Commonwealth of Australia, 2025 Public Skills Australia

	clients and communities
Context of and specific resources for assessment:	This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged Resource requirements for assessment of this unit include access to: a workplace or an accurately simulated environment where assessment may take place
Method of assessment:	In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work

© Commonwealth of Australia, 2025 Public Skills Australia

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Historical, **social**, **political economic context includes**:	Statutory framework within which work takes place in the sector Historical context of work e.g. changing attitudes to young people; changing approaches to working with young people Changing social context of work: e.g. changing government and societal views of young people and approaches to working with them Political context e.g. Government policies and initiatives affecting youth work Economic context e.g. The current economic situation as it relates to and affects young people and the subsequent impact on client needs
Stakeholders and representatives may include:	Young people Friends, peers and target groups Families and care givers Local community and community and religious organisations Government representatives and service providers Youth organisations Specialists/experts Peak bodies and networks in youth work Organisation management, colleagues, supervisor, team members
Different models of work in the sector may include:	Community development and education Case management Working with families A client-centred approach

© Commonwealth of Australia, 2025 Public Skills Australia

A commitment to access and equity may be demonstrated by:	A non-discriminatory approach to all people using the service, their family and friends, the general public and co-workers Ensuring the work undertaken takes account of, and caters for differences including: cultural, physical, developmental, religious, economic and social

competency.	Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the purpose of the group	1.1 Identify and determine with members of the group, activities which meet the group purpose 1.2 Discuss and establish with all group members, rules for group behaviour 1.3 Identify, acknowledge and respect *individual differences* of workers and group members 1.4 Seek, identify and accommodate goals, needs and expectations of participants according to available *resources*
2. Establish relationship with the group	2.1 Define roles played by group members including the worker 2.2 Encourage a suitable level of participation 2.3 Inform group of resources available to meet group needs 2.4 Assess capacity of the worker to respond to group's needs and communicate to the group, in an appropriate manner 2.5 Identify and implement the most appropriate *support* to achieve the objectives of the activity 2.6 Model *clear communication* to group members 2.7 Encourage group members to use clear and appropriate communication 2.8 Respect individual differences and needs in communication and interaction with group members 2.9 Ensure communication and interactions with group are appropriate to aim and purpose of group 2.10 Implement appropriate processes as necessary to address breaches of behaviour 2.11 Encourage participants to agree on and abide by a set of appropriate guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.12 Promote group achievements in a way which motivates and recognises participants' efforts
	2.13 Keep records of group interaction, where required, in a manner consistent with organisation's documentation requirements
3. Organise resources for *group activities*	3.1 Work to ensure adequate resourcing is available
	3.2 Communicate to group availability of resources and guidelines for use
	3.3 Encourage cooperative approach to the use of resources
	3.4 Complete *reports* on use of resources if required
	3.5 Ensure reports are completed to standard required by organisation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Dynamics of groups and the different styles of group leadership and decision-making
- Effective communication techniques
- Conflict management
- Organisation's policies, principles and procedures
- Relevant organisation and community resources

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- Building and maintaining relationships
- Relevant models such as stages of group development and stages of change model

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Support group activities for formal and informal groups
- Participate in a variety of group activity types identified in the Range Statement or in the workplace
- Provide support for appropriate target groups

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Apply oral communication skills including asking questions, clarifying issues/topics, providing information in the workplace setting:
  - language used may be English or community language, depending on the client group
- Apply written communication competence to complete reports required by the organisation:
  - complexity of reports may vary from completing an organisation proforma, to completing a unstructured report
  - literacy support for completing reports may vary from the availability of support from a supervisor to no support available in the workplace
  - reports may be written in English or community language depending on the organisation requirements
- Apply reading competence required to fulfil the job role:
  - this may vary from no competence required (if information on the availability of resources, materials etc for the group are conveyed verbally), to the ability to read work-related texts, which may include lists of available resources, names of group members, policy statements on use of equipment and resources etc
  - language in use may be English or community language depending on organisation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit is best assessed in the workplace or in a simulated workplace under the normal of range conditions • Assessment may be conducted on one or more occasions but must include the normal range of client groups, group activities and types of groups in the workplace
Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities
Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resources required for assessment of this unit include access to: • an appropriate workplace where assessment can take place or simulation of realistic workplace setting for assessment

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Method of assessment:	• Assessment may include observations, questioning or evidence gathered from the workplace

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Group activities may be:	• Formal or informal • Structured • Semi structured • Unstructured
Group activities may relate to:	• Discussions • Sporting and recreation activities • Research, planning and management • Informal and formal education • Community action • Special interest causes
Resources will include:	• Information/referrals • Facilities • Equipment/materials • Administrative support • Facilitation of meetings • Worker skills/expertise

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Support will include:	• Resources managed by the organisation • Advice, information and facilitation • Individual or group supervision
Individual differences may include differences in:	• Beliefs • Values • Age • Cultural background • Physical abilities
Clear communication will be:	• Communication related to group purpose and aims • Communication that respects individual differences and abilities of group members
Reports may be:	• Verbal or written according to organisation procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Composition of specific community and group structures, practices and values
- Specific communication protocols and practices
- Social, political, cultural, historical issues that affect or are relevant to specific communities and groups
- Relevant networks, people, stakeholders
- Culture and diversity
- Models of society
- Critique of socialisation theory
- Family, power
- Understanding of deviance
- Identity theories
- Specific knowledge areas may include aging, youth women, health, housing, environment, multiculturalism, family violence etc

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Demonstrate the capacity to work effectively with a specific group, validated by community acceptance and the impact of work undertaken

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Demonstrate application of skills in:
  - consultation
  - facilitation

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- research, including data collection/analysis and recording, and effective use of relevant information technology in line with occupational health and safety (OHS) guidelines
- high level interpersonal relationship

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- This unit may be assessed on the job using appropriate relevant materials and examples or through simulation
- The candidate must be able to demonstrate competence in working with at least one group or community over a number of assessment situations and through a number of assessment tools, including:
  - observation
  - reports from supervisors or other key people, and
  - confirmation from key community leaders

Access and equity considerations:

- All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities
Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resources required for assessment include access to a workplace or to an environment that accurately simulates the workplace
Method of assessment:	• In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios • Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes • Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Issues of specific communities may relate to:

- Cultural and linguistic diversity
- Risk of self-harm
- Mental health
- Gender
- Sexuality
- Age
- General health
- Alcohol and other drugs abuse
- Disability
- Location e.g. urban, rural and remote
- Income
- Family systems
- Religion

Work may relate to:

- Specific groups, issues or communities e.g. health issues of young people from particular cultural backgrounds and/or geographic areas
- Research activities
- Policy development
- Advocacy
- Referrals
- Project development and implementation
- Project design and implementation

Context of work may include:

- Social, political and economic issues impacting upon specific communities and groups
- Models of community development
- Legislative and statutory frameworks

Values and structures may include:

- Cultural preference and mores of specific groups e.g. religious/spiritual observances
- Language
- Family relationships
- Status/protocol
- Ceremonies/celebrations

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work with individuals and the community to promote participation	1.1 Undertake work to identify key community issues to be addressed 1.2 Undertake planning to address community issues to ensure: • appropriate policies and *strategies* are developed • adequate resourcing is identified • *key people* are consulted • identified needs are addressed 1.3 Ensure processes are forward looking and proactive 1.4 Use appropriate interpersonal and networking skills to enlist support from *key people* and groups 1.5 Provide *opportunities* for community input to planning provision of services 1.6 Guarantee community input and participation in services
2. Support existing community activities	2.1 Undertake appropriate review of the relevance of existing community activities, based on changing community needs 2.2 Provide relevant support and assistance to existing community activities to obtain additional resources required for effective operation 2.3 Provide support to community groups to monitor and evaluate processes, progress and outcomes of activities 2.4 Provide appropriate support to community groups to become self managing in the implementation of plans

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Community development methods and their principles and practices
- Funding sources and their policies and strategies for encouraging community input and participation
- budget and funding allocation
- Local, state and federal strategies/legislation
- Health promotion (as per Ottawa Charter)

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Demonstrate the capacity to undertake a range of activities to ensure appropriate participation by groups and individuals in community based activities

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Work with key people or stakeholders in the community
- Demonstrate application of skills in:
  - research relating to the community
  - policy development
  - report writing, including effective use of relevant information technology in line with occupational health and safety (OHS) guidelines
  - evaluating effectiveness of community based activities

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- budgeting
- negotiation, liaison, networking
- marketing
- facilitation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit will be assessed in the workplace or in a simulated workplace under the normal range of workplace conditions
Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resources required for assessment include access to appropriate structures, people or organisations for assessment of ability to work with key people or stakeholders in the community
Method of assessment:	• In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios • Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes • Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Working with the community may	• Health promotion • Community service delivery

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

include activities associated with:	• Community projects • Community development • Community action • Community planning • Consultative and planning committees • Sector development structures
Opportunities for community members and groups to participate may include:	• Systems within and outside the organisation • Activities at program, operative and management levels • Formal and informal systems • Focus groups on relevant issues • Inviting community participation on organisation committees e.g. quality assurance committees, ethics committees • Through publications • Group facilitation • Peer education/training • Seminars and workshops
Key people may include:	• Advocacy groups • Policy and decision-makers in the specific community • Individuals, groups or communities most likely to be affected by strategies or action plans • Community leaders • People with formal and informal representative roles
Strategies which the worker may develop may include:	• Development of new business, employment opportunities for individuals • Establishment of advocacy groups • Health promotion activities • Development of community facilities • Strategies to increase access to facilities, services or decision-making • Providing direction, advice and information
Information and resources may	• Equipment

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

include:	• Staff skills and time • Provision of facilities • Educational materials • Funding • Skills/administrative support • Physical, transport, venues, material, equipment • Developmental training • Financial

Unit Sector(s)

BSBFLM312C Contribute to team effectiveness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This specifies the outcomes required to by frontline managers to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers have a key role in developing efficient and effective work teams within the context of the organisation. They play a prominent part in motivating, mentoring, coaching and developing team cohesion by providing leadership for the team and forming the bridge between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non routine activities that require some discretion and judgement.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Contribute to team outcomes	1.1. Consult team members to identify ***team purpose***, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** 1.2. Support team members to meet expected outcomes
2. Support team cohesion	2.1. Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility 2.2. Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities 2.3. Provide ***feedback*** to team members to encourage, value and reward team members' efforts and contributions 2.4. Identify and address issues, concerns and problems identified by team members to ***relevant persons*** as

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	required
3. Participate in work team	3.1. Actively encourage and support team members to participate in team activities and communication processes and to take ***responsibility for their actions***
	3.2. Support the team to identify and resolve problems which impede its performance
	3.3. Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers
4. Communicate with management	4.1. Maintain open ***communication*** with ***line manager*/*management*** at all times
	4.2. Communicate information from line manager/management to the team
	4.3. Communicate ***unresolved issues*** to line manager/management and follow-up to ensure action is taken in response to these matters

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communication skills, including listening
- basic training skills, including mentoring and coaching
- planning and organising skills
- problem solving skills
- attributes:
  - empathic
  - communicative
  - self aware
  - supportive
  - trusting

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
• open • flexible • accommodating • initiating • loyal • fair • adaptable
Required knowledge

Required knowledge
• relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
• organisational policies and procedures
• organisational goals, objectives and plans at both tactical and strategic levels
• organisational structure including organisational chart
• learning and development options available within and through organisation
• a general understanding of the principles and techniques of:
  • group dynamics and processes
  • motivation
  • planning
  • negotiation
• individual behaviour and difference

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • demonstrate leadership in contributing to team plans • lead and facilitate teamwork • actively communicate with management • manage communication within the team

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	• induct new team members • implement performance management system • handle problems
Context of and specific resources for assessment	Assessment must ensure: • that this unit can be assessed in the workplace or in a closely simulated work environment • access by the learner and trainer to appropriate documentation and resources normally used in the workplace • where assessment is part of a learning experience, evidence will need to be collected over a period of time, involving both formative and summative assessment • that examples of actions taken by candidate to contribute to team effectiveness are provided

Method of assessment	A range of assessment methods should be used to assess skills and knowledge. The following examples are appropriate for this unit:
	• Direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
	• Records produced from working in a team, such as:
	  • reports
	  • minutes or records of meetings
	  • work journals or diaries
	  • learning and development plans developed with team members
	  • records of actions taken to address issues raised by team members

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Legislation, codes and national standards relevant to the workplace may include:	• award and enterprise agreements and relevant industrial instruments • relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal opportunity, industrial relations and anti-discrimination • relevant industry codes of practice
OHS considerations may include:	• provision of information about OHS legislative requirements, guidelines and the organisation's OHS policies, procedures and programs • training of all employees in health and safety procedures • participation in the regular update of OHS systems and procedures • changes to work practices, procedures and the working environment which impact on OHS
Team purpose, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** may include:	• goals for individuals and the work team • expected outcomes and outputs • individual and team performance plans and Key Performance Indicators (KPIs) • action plans, business plans and operational plans linked to strategic plans • OHS responsibilities
Feedback may refer to:	• communication of ideas and thoughts which focus on specific tasks, outcomes, decisions, issues or behaviours • formal/informal gatherings between team members where there is discussion on work-related matters
Relevant persons may include:	• frontline manager's direct superior or other management representatives • colleagues • designated personnel e.g. safety officer
Responsibility for their actions	• individuals and teams • individual and joint actions

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
may involve:	
Communication may include:	• verbal, written or electronic communication • face-to-face • formal/informal interaction
Line manager*/*management may refer to:	• frontline manager's direct superior or other management representatives
Unresolved issues may include:	• issues, concerns and tensions • problems related to work roles and responsibilities • grievances and complaints • any matters affecting workplace relationships and team cohesion

SISCAQU307A Perform advanced water rescues

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify and evaluate a major aquatic emergency and perform an advanced water rescue. These situations will usually involve a team response.

Application of the Unit

This unit applies to pool lifeguards in swimming pools and confined natural shallow water venues. It may also apply to those conducting water familiarisation, learn-to-swim and water safety classes in venues where a pool lifeguard is not available.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

HLTFA301B Apply first aid

SISCAQU202A Perform basic water rescues

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify and evaluate major aquatic emergencies.	1.1. Recognise ***factors which contribute to major aquatic emergencies***. 1.2. Recognise the ***signs and signals*** of the ***aquatic emergency***. 1.3. Communicate initial assessment to ***appropriate personnel*** according to ***accepted best practice principles of aquatic rescues***, ***relevant legislation*** and ***organisational policies and procedures***. 1.4. Identify an appropriate ***emergency response*** for the situation and the people involved Promote compliance with safety rules of aquatic facility to clients.
2. Respond to the emergency.	2.1. Activate emergency systems according to organisational policies and procedures. 2.2. Implement ***strategies for group control*** according to relevant legislation and organisational policies and procedures. 2.3. Assess the ***factors*** impacting on the ***advanced water rescue*** and formulate a ***rescue plan***. 2.4. Determine ***involvement of others*** according to the nature of the emergency, relevant legislation and organisational policies and procedures. 2.5. Determine the type of rescue required and ***rescue equipment*** needed. 2.6. Identify hazards and appropriate action taken to prevent further injury to the casualty. 2.7. Perform an advanced water rescue in accordance with accepted best practice principles of aquatic rescues.
3. Assess the casualty.	3.1. Observe and assess the condition of the casualty. 3.2. Assess vital signs and symptoms of shock according to accepted first aid procedures. 3.3. Provide appropriate treatment according to accepted ***first aid techniques and standards***.
4. Organise further emergency care as required.	4.1. Make contact with emergency services as soon as possible. 4.2. Provide accurate information to emergency services

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to obtain the required assistance. 4.3. Monitor casualty or arrange further treatment until emergency response team assumes responsibility.
5. Record and report the incident.	5.1. Complete required documentation according to relevant legislation and organisational policies and procedures. 5.2. Notify other personnel and statutory authorities of the incident as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - assert group control
  - reassure casualties and bystanders
  - provide clear and accurate information to emergency authorities
- literacy skills to accurately complete incident documentation
- problem-solving skills to promptly assess aquatic emergencies and formulate appropriate rescue plans
- teamwork skills to:
  - organise staff and bystanders
  - delegate tasks to enable effective rescues
- ability to retrieve an object from the deepest water within the aquatic environment, no greater than 3 metres; if depth is greater than 3 metres assistance may be used, e.g. fins
- ability to complete a 25 metre swim and 25 metre tow with assisted landing in less than 1 minute and 45 seconds
- fitness and strength level to swim 200 metres in less than 6 minutes.

Required knowledge

- legislation and organisational policies and procedures that enable the safe and appropriate conduct of all activities
- factors contributing to aquatic emergencies to enable prompt and accurate assessment of emergency situations
- accepted best practice principles of aquatic rescues to enable prompt and appropriate responses to major aquatic emergencies
- signs and signals of people in difficulty to enable prompt recognition of emergency situations

© Commonwealth of Australia, 2025 Public Skills Australia

- first aid techniques and standards to enable provision of safe and effective response and treatment of casualties
- types and characteristics of water rescue equipment used in advanced water rescue to enable its safe and effective use
- roles of lifeguards and other personnel during major aquatic emergencies to enable effective emergency responses.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies the signs and signals of a person experiencing difficulties in the water and determines possible contributing factors to enable prompt assessment and formulation of a suitable rescue plan • determines appropriate rescue types and participates as part of a team in rescues in the water that involve more than one casualty • demonstrates the use of spine-boards, spinal immobilisation collars, oxygen supplemented resuscitation and oxygen therapy on sufficient occasions to demonstrate competency and consistency of performance • monitors, accurately assesses and treats casualties and communicates effectively with emergency services • accurately reports incidents and notifies other relevant personnel according to relevant legislation and organisational policies and procedures.
Context of and specific resources for assessment	Assessment must ensure: • access to an aquatic environment appropriate to the candidate's current or intended work role, such as a swimming pool or confined natural shallow water venue, to enable rescues to be demonstrated in the water • access to suitable participants to enable demonstration of advanced water rescue techniques • access to rescue and resuscitation equipment.

© Commonwealth of Australia, 2025 Public Skills Australia

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- demonstration of the performance of safe and effective advanced water rescues of multiple casualties as part of a team
- oral or written questioning to assess knowledge of accepted best practice principles of aquatic rescues and how they apply to safe and effective conduct of rescues
- third-party reports from a supervisor detailing candidate's performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Factors which contribute to major aquatic emergencies may include:

- swimming ability
- deep water
- shallow water
- river currents
- surf
- strong wind
- risk-taking behaviour.

Signs and signals may include:

- calling for help
- vertical body position
- diagonal body position
- minimal or non-supportive leg action
- vigorous arm movements
- head tilted up and back, face turned to safety or help
- submerged.

Aquatic emergency may include:

- envenomation by aquatic animals
- sudden unconsciousness
- spinal injury

© Commonwealth of Australia, 2025 Public Skills Australia

	• drowning • heart attack • severe bleeding • epileptic seizures • severe asthma attacks.
Appropriate personnel may include:	• other rescuers • staff.
Accepted best practice principles of aquatic rescues may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks to casualty, bystanders and rescuer • The Royal Life Saving Society Australia guidelines and code of conduct policies • the culture of lifesaving • current and past good practice demonstrated by self or peers in the same or similar situation.
Relevant legislation may include:	• occupational health and safety • duty of care • working with children.
Organisational policies and procedures may include:	• occupational health and safety • use and care of lifesaving equipment • communication protocols • safety, rescue and emergency procedures • incident reporting.
Emergency response may include:	• rescue equipment required • personnel involved • group control • risk management for self and others.
Strategies for group control may include:	• removing facility users from danger • giving clear direction to other staff • dealing effectively with caregivers or friends of person in difficulty.
Factors may include:	• number of casualties • rescue equipment • number and location of other staff.
Advanced water rescue may include:	• spine-board • spinal immobilisation collar • oxygen supplemented resuscitation • oxygen therapy.
Rescue plan may include:	• self-preservation

© Commonwealth of Australia, 2025 Public Skills Australia

	• awareness of personal capabilities • available assistance • selection of rescue aids • nature of the area • priorities of rescue.
Involvement of others may include:	• bystanders • trained or untrained staff.
Rescue equipment may include:	• reaching aids • ropes • floatation aids • flippers • rescue tube • spine-board • spinal immobilisation collar • rescue board • oxygen resuscitation equipment.
First aid techniques and standards may include:	• danger, response, airway, breathing, circulation routine • Australian Resuscitation Council Standards.

PMAOHS214B Undertake helicopter safety and escape

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	In an emergency scenario, a person traveling by helicopter to an offshore facility may have to exit the aircraft under abnormal conditions.

Application of the Unit

Application of the unit	This unit of competency is designed to improve the chance of an individual surviving a helicopter incident at sea through the application of thorough pre-flight preparation, the correct use of safety equipment, and appropriate helicopter safety techniques. This unit of competency would be applied to all persons who regularly travel by helicopter to any of the following installations or facilities: • offshore rig/installation • floating production vessel • support vessel • In an emergency the operations technician would: • escape from an inverted and/or submerged helicopter • don and successfully employ a life jacket • deploy safety and emergency equipment • deploy life rafts.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for flight.	1.1. Listen to and follow pre-flight instructions from pilot or boarding controller 1.2. Undertake pre-flight preparation including wearing appropriate clothing and personal safety equipment such as immersion suits and personal floatation devices (life jacket) 1.3. Check own gear for suitability including covered footwear, long trousers, and no loose items or hats 1.4. Check the supplied safety gear is fitted and worn correctly
2. Board the helicopter	2.1. Approach helicopter as directed by the pilot or ground crew 2.2. Put on seat belt and hearing protection. 2.3. Familiarise oneself with the helicopter layout 2.4. Locate and identify all the safety equipment 2.5. Locate and identify primary and secondary exits 2.6. Listen to instructions on emergency egress from the aircraft.
3. Prepare for helicopter ditching	3.1. Facilitate a controlled and safe egress from a ditched helicopter from a knowledge of helicopter layout, including the location and operation of emergency exits and equipment 3.2. Secure personal items within the cabin prior to the evacuation to facilitate escape 3.3. Check harnesses, seat belts and life jackets to ensure that they are properly fastened and secured prior to the ditching in order

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to minimise personal injury or gear failure 3.4. Adopt the required brace position in order to allow for proper positioning prior to ditching 3.5. Acknowledge and respond to information communicated by the helicopter crew advising the nature and extent of the situation.
4. Undertake evacuation from the helicopter	4.1. Identify appropriate primary and secondary escape routes in order to determine the locations through which the evacuation will be undertaken 4.2. Wait until rotors have stopped turning and all movement has ceased 4.3. Undo, in a controlled sequential manner seat belts and harnesses to facilitate exit from the helicopter 4.4. Deploy available safety equipment as instructed in order to assist the individual's sea survival after evacuation has been safely completed 4.5. Acknowledge and respond to information communicated by the helicopter crew advising the nature and extent of the situation.
5. Facilitate recovery process	5.1. Deploy position indicating devices and use appropriate signalling devices to facilitate the location of personnel by air-sea rescue group 5.2. Use emergency supplies and equipment to ensure that available supplies are maximised and are able to meet the nature and extent of the emergency 5.3. Apply appropriate helicopter/vessel rescue techniques to the recovery process.
6. Control hazards.	6.1. Identify and act upon potential hazards to minimise injury to personnel or damage to equipment 6.2. Manage use of life raft by applying a knowledge of life raft operation and requirements 6.3. Apply suitable swimming techniques (whilst wearing life jacket) in the water in order to aid movement and boarding of the deployed life raft 6.4. Rescue and recover persons in the water, minimising further potential for injury through the appropriate raft boarding and righting techniques. 6.5. Employ suitable techniques, both in the life raft and in the water, in order to delay the onset of hypothermia 6.6. Assess and treat hypothermia as required.

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to: • correctly fit and wear required personal emergency equipment • respond instantly to pilot commands • deploy life rafts or other emergency equipment as commanded • orient oneself whilst upside down under water • remove as necessary doors or windows from the aircraft • extricate oneself from the aircraft • correctly inflate life jacket • locate and gain access to life raft where deployed • locate and link up with other survivors.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • helicopter escape techniques • integral equipment functions to the level needed to act rationally and recognise and resolve problems • hazards boarding and departing from helicopters under normal and emergency situations • inverted and submerged helicopter escape techniques • life jacket operation • emergency equipment deployment techniques • life raft operation and deployment • rescue and recovery techniques • hypothermia prevention and reduction techniques (delaying and offsetting).

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment for this unit of competency will involve a

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE	
	helicopter simulator. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations. Simulation should be based on actual helicopter ditchings and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems. In the case of evacuation training or training for competencies practised in life threatening situations, simulation may be used for the bulk of the training. This unit of competency requires an application of the knowledge contained in the use of the aircraft's survival systems and their integral equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the facility (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to safely get out of the helicopter following an incident at sea.
Context of and specific resources for assessment	Assessment will require access to a suitable helicopter simulator. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	It may be appropriate to assess this unit concurrently with relevant teamwork, OHS and communication units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all such items of equipment and unit operations which form part of the helicopter escape system. For your circumstances this may include: • helicopter simulators • beacons • life rafts • distress flares • life jackets • EPIRB.
Typical problems	Typical problems for your situation may include: • jammed or damaged survival equipment • personal injury or injury to others • trapped personnel • loose or damaged equipment • adverse weather conditions.
Procedures	Procedures may be written, verbal, computer-based or in some other form. They include: • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.
Health, safety and	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
environment (**HSE**)	State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

HLTFA402C Apply advanced first aid

Modification History

Not Applicable

Unit Descriptor

Descriptor

This unit deals with the provision of advanced first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance, and provision of support to other providers

This unit builds on HLTFA301B: Apply first aid to include additional skills and use of a range of equipment

Application of the Unit

Application

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

This unit includes coverage of skills and knowledge in advanced resuscitation techniques
Competency outcomes in advanced resuscitation are to be equivalent to unit:

- HLTFA404B Apply advanced resuscitation techniques

To achieve equivalence of outcome, providers assessing HLTFA402C may refer to specific detail included in unit HLTFA404B and may choose to award both units

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.	The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess the situation	1.1 Identify, assess and minimise *hazards* that may pose a risk of injury or illness to self and others 1.2 Assess *risks* to first aider and others and determine appropriate response to ensure prompt control of situation 1.3 Ascertain and prioritise need(s) for emergency services/medical assistance and undertake triage where required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	1.4 Deploy *resources* to appropriate locations as required in line with workplace procedures
2. Manage the casualty(s)	2.1 Determine and explain the nature of *casualty's injury/condition* and relevant first aid procedures to provide comfort 2.2 Respond to the casualty in a culturally aware, sensitive and respectful manner 2.3 Seek consent for *management* of the casualty's injury/illness from person(s) where relevant 2.4 Determine and implement welfare procedure according to casualty(s) needs 2.5 Control effects of injury and determine and apply appropriate *first aid management* to meet the needs of the casualty and situation 2.6 Assist with *self-medication* in accordance with State/Territory regulations, legislation and policies and manufacturer's/supplier's instructions and subject to casualty's regime 2.7 Monitor *casualty's condition* and respond in a timely manner in accordance with effective first aid principles 2.8 Correctly operate basic life support *equipment* where appropriate according to relevant legislation and manufacturer's/supplier's instructions 2.9 Apply safety procedures for operation of pressurised gases 2.10 Use safe manual handling techniques 2.11 Finalise *management* according to casualty's needs and first aid principles
3. Coordinate first aid activities until arrival of medical assistance	3.1 Identify available *resources* required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate 3.2 Deploy correct amount of *resources* to appropriate locations in an effective manner to ensure timely arrival of required resources

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	3.3 Document the provision of resources and recommend modifications as required
	3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures
	3.5 Coordinate evacuation of casualties according to relevant evacuation procedures
	3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures
4. Communicate essential incident details	4.1 Maintain communication with relevant personnel using appropriate media and equipment
	4.2 Communicate first aid information with other providers/carers as appropriate to meet their needs and in accordance with workplace procedures
	4.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness
	4.4 Prepare an incident report in line with organisation requirements
	4.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
5. Evaluate the incident	5.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties
	5.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs
	5.3 Formulate and review contingency planning to identify and select alternative management principles and procedures as required

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- Working knowledge of:
  - legal responsibilities and duty of care, including confidentiality
  - basic anatomy (skeleton, muscles, joints, bones), physiology and toxicology
  - ARC Guidelines and/or State/Territory regulations, legislation and policies relating to provision of first aid
  - procedures for dealing with major and minor accidents in the workplace
  - infection control principles and procedures, including using standard precautions
  - how to gain access to and interpret material safety data sheets (MSDSs)
  - company/organisation standard operating procedures (SOPs)
  - priorities of management in first aid
  - occupational health and safety requirements in the provision of first aid.
  - capabilities of emergency management services
  - first aiders' skills and limitations
  - safe storage and handling procedures for pressurised gases
  - advanced resuscitation techniques as per *HLTFA404A Apply advanced resuscitation techniques*
- First aid management procedures in accordance with ARC Guidelines, state/territory regulations, legislation and policies and organisation requirements for conditions identified in the Range Statement and including:
  - use of AED, oxygen, bronchodilator
  - spinal care
  - management of anaphylactic shock reaction
  - use of analgesic gases
- Incident management procedures:
  - manual handling, hazardous substances, dangerous goods or chemicals
  - basic triage for a multiple casualty incident
  - safe access to the casualty

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- awareness of confined spaces and dangerous places
- removal of casualty to safe area, if appropriate
- coordinate activities of other first aiders, if applicable
- First aid management procedures may also relate to emergency childbirth
- Complications and associated methods of management for conditions identified in the Range Statement
- State and territory regulatory requirements relating to currency of skill and knowledge

continued ...

Essential knowledge (*contd*):

- Social issues, especially in particular workplace or community context(s) in which first aid is to be applied, including:
  - importance of debriefing
  - need to be culturally aware, sensitive and respectful
  - confidentiality
  - own skills and limitations
- Awareness of stress management techniques and available support
- Safety procedures for the operation of pressurised gases

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Administer medication in line with State/Territory regulations, legislation and policies and any available medical/pharmaceutical instructions
- Apply advanced resuscitation techniques as per *HLTFA404A Apply advanced resuscitation techniques*
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively and show leadership in an incident
- Comply with OHS legislation
- Conduct an initial casualty assessment
- Demonstrate the application of first aid principles
- Demonstrate:
  - adequate infection control procedures
  - consideration of the welfare of the casualty
  - safe manual handling
  - safe storage and handling procedures for pressurised gases

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Manage specific injuries/illnesses and conditions as identified in the Range Statement for this competency unit
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use a range of first aid equipment as outlined in the Range Statement
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • Competence should be demonstrated working individually and, where appropriate, as part of a first aid team • Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting • Currency of first aid knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines
Method of assessment may	• Skills in performing first aid procedures are to be

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

include:	assessed through demonstration, with questioning to confirm essential knowledge • Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre • For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines
Access and equity considerations:	• All workers in the health industry should be aware of access and equity issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address	• Focus on first aid management of specific types of

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

specific requirements may include:	injury • First aid provision under specific constraints or circumstances (eg. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
First aid management must take into account:	• Workplace policies and procedures • Industry/site specific regulations, codes etc. • OHS requirements • State and territory workplace health and safety requirements
A hazard is:	• A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
Hazards may include:	• Physical hazards • Biological hazards • Chemical hazards • Hazards associated with manual handling
Risks may include:	• Risks from worksite equipment, machinery and substances • Risks from first aid equipment (oxygen cylinders, AED) • Environmental risks • Exposure to blood and other body substances • Risk of further injury to the casualty • Risks associated with the proximity of other workers and bystanders • Risks from vehicles • Fallen power lines, step and touch potential
Casualty's condition is managed for:	• Abdominal injuries • Airway obstruction • Allergic reactions • Altered and loss of consciousness • Bleeding

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

- Burns - thermal, chemical, friction, electrical
- Chest pain
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- Near drowning
- Envenomation - snake, spider, insect and marine bites
- Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
- Fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- No signs of life
- Pain relief
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress
- Shock
- Seizures
- Stroke
- Substance misuse - all drugs and alcohol, including illicit drugs

First Aid management skills must include in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements:

- Administration of analgesia
- CPR
- Infection control
- AED
- Identification and management of anaphylactic shock reaction in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements
- Oxygen administration

First aid management must account for:

- Location and nature of the workplace
- Environmental conditions eg electricity (high or low voltage), biological risks, weather, motor vehicle accidents
- Location of emergency services personnel

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

- Number of casualties and potential casualties
- Use and availability of first aid equipment, resources and pharmaceuticals
- Types of dangers/risks to the casualty and any others in the vicinity of the situation
- Confined spaces, subject to industry need

Medications may include in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements:

- Oxygen
- Analgesics
- Bronchodilators
- Casualty's own medications
- Auto-injectors

Resources and equipment are used appropriate to the risk to be met and may include:

- Oxygen resuscitation/cylinders
- AED
- Thermometers
- Auto-injectors
- Back boards
- Stretchers
- Soft bag resuscitator
- First aid kit
- Casualty's medication
- Analgesic inhalers
- Analgesic gas equipment
- Resuscitation mask or barrier
- Spacer device
- Cervical collars

Information to be documented may include:

- Time
- Location
- Description of injury
- First aid management
- Fluid intake/output, including fluid loss via:
  - blood
  - vomit
  - faeces
  - urine
- Administration of medication including:

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• time • date • person administering • dose • Vital signs
Established first aid principles include:	• Checking the site for danger to self, the casualty and others and minimising the danger • Checking and maintaining the casualty's airway, breathing and circulation

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to respond to emergency in a remote situation	1.1 *Prepare for isolated travel* or work, accounting for expected contingencies 1.2 Assess casualty's condition and determine appropriate response in order to minimise hazards and determine need for medical assistance 1.3 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, transport availability and casualty's condition
2. Provide first aid in a remote situation	2.1 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort 2.2 Seek consent from casualty prior to applying first aid management 2.3 Provide first aid response to address casualty's condition and in accordance with effective first aid principles 2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner 2.5 Monitor casualty's condition and undertake ongoing first aid procedures as required 2.6 Calmly provide information to reassure casualty during the wait for medical assistance, adopting a communication style to match the casualty's level of consciousness 2.7 Provide shelter from elements in accordance with environmental conditions 2.8 Document condition of casualty over time to

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	assist in on-going management
3. Work in conjunction with medical and emergency services support	3.1 Establish communication links to medical services, using relevant communication equipment to ensure prompt control action is undertaken 3.2 Request ambulance support or appropriate medical assistance according to relevant circumstances 3.3 Administer medication under direct instruction from an *authorised health worker* as required 3.4 Assist in the evacuation of the casualty by following directions given by emergency services as required
4. Evaluate the incident	4.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties 4.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs 4.3 Formulate and review contingency planning to identify and select improved or alternative management principles and procedures as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

manage contingencies in the context of the identified work role

This includes knowledge of:

- Awareness of stress management techniques and available support
- Infection control principles and procedures, including use of standard precautions
- Principles for evaluating management options relating to transporting casualty and/or waiting for assistance
- Principles of identifying and preparing area for safe evacuation (including aero-medical evacuation)
- Principles of preparing for providing first aid in an area remote from ready assistance, including identifying and preparing supplies to address contingencies specific to different types of situation
- Understanding of OHS principles
- Working knowledge of communication systems, equipment and methods as available in the remote situation

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Accurately listen to, clarify and apply medical instructions
- Administer medication under direct instruction from an authorised health worker and in accordance with State/Territory regulations, legislation and policies
- Communicate effectively and assertively and show leadership in an incident
- Conduct an initial casualty assessment in a remote situation
- Demonstrate:
  - adequate infection control procedures, including standard precautions
  - identification and preparation of area for safe evacuation (including aero-medical evacuation)
  - safe manual handling
- Evaluate available options for transporting or maintaining condition of casualty
- Improvise treatment and associated resources
- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in a remote situation
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own level of skills and knowledge
- Prepare a written incident report or provide information to enable preparation of an

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

incident report
- Transport casualty safely using available methods
- Undertake contingency planning in relation to providing a first aid response in a remote situation
- Use available communication methods and equipment to access medical assistance
- Use available resources effectively to manage pain
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:
- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, Australian Resuscitation Council and industry guidelines
- Assessment should utilise aspects of actual or simulated remote situation relevant to work or community context

Method of assessment may include:
- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Access and equity considerations:	• All workers in the health industry should be aware of access and equity issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities
Related unit:	This unit should be assessed either after or in conjunction with achievement of the following related competency unit: • HLTFA301C Apply first aid

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:	• Focus on first aid management of specific types of injury • First aid provision under specific constraints or

RANGE STATEMENT

	circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
Preparation for isolated/remote travel may include:	• Selection of relevant communication equipment • Accessing relevant first aid supplies and resources to cater for environmental conditions • Considering access/egress opportunities • Notifying relevant authorities of travel plans
In remote/isolated situations consideration to travel or wait would depend upon:	• Severity of injury • Time required for medical assistance to arrive • Whether movement might hinder rescue • Advice given by authorised health worker • Whether contact with medical and/or emergency services has been achieved

Documentation, especially in remote/isolated situations may include recording:	• Time
	• Location
	• Description of injury
	• First aid management
	• Fluid/oral intake/output, including fluid loss via:
	  • blood
	  • vomit
	  • faeces
	  • urine
	• Administration of medication including time, date, person administering, dose
	• Vital signs

Authorised health worker may include:	• Paramedic/ambulance officer • General practitioner • Nurse practitioner

TAEASS403B Participate in assessment validation

Modification History

Version	Comments
TAEASS403B	Released with *TAE10 Training and Education Training Package version 2.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in an assessment validation process.

Application of the Unit

This unit typically applies to those participating in assessment validation. It does not address leading the validation process.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

1. Prepare for validation	1.1 Discuss and confirm the approach to validation according to defined purposes, context, and relevant ***assessment system policies and procedures***
	1.2 Analyse relevant ***benchmarks for assessment*** and agree on the evidence needed to demonstrate competence
	1.3 Arrange ***materials*** for ***validation activities***
2. Contribute to validation process	2.1 Demonstrate active ***participation*** in validation sessions and activities using appropriate communication skills
	2.2 Participate in validation sessions and activities by applying the principles of assessment and rules of evidence
	2.3 Check all documents used in the validation process for accuracy and version control
3. Contribute to validation outcomes	3.1 Collectively discuss validation findings to support improvements in the quality of assessment
	3.2 Discuss, agree and record recommendations to improve assessment practice
	3.3 Implement changes to own assessment practice, arising from validation

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- planning skills to participate in validation activities within agreed timeframes
- problem-solving skills to identify information that is inconsistent, ambiguous or contradictory
- evaluation skills to:
  - determine evidence requirements from competency standards
  - review assessment process, tools and methods
  - review collected evidence
- communication skills to share information in validation meetings.

Required knowledge

- how to interpret competency standards and other related assessment information to determine the evidence needed to demonstrate competence, including:
  - criterion-referenced assessment as distinct from norm-referenced assessment

© Commonwealth of Australia, 2025 Public Skills Australia

  - various reasons for carrying out validation and the different approaches to validation that may be appropriate before, during and after assessment
  - critical aspects of validation, including validation of assessment processes, methods and products
  - relevant OHS legislation, codes of practice, standards and guidelines, impacting on assessment
  - legal and ethical requirements of assessors, particularly in relation to validation activities
- principles of assessment
- rules of evidence.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • actively participate in a minimum of two validation sessions or meetings which, in combination, address the critical aspects of validation using different validation approaches and activities • clearly explain purposes of validation and the legal and ethical responsibilities of assessors • collate documentation relating to validation process in a logical manner • demonstrate communication and liaison with relevant people • provide feedback and interpret documentation in validation sessions • record contribution to validation findings.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: • assessment reports and records • other documentation relevant to validation.
Method of assessment	
Guidance information	

© Commonwealth of Australia, 2025 Public Skills Australia

for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Assessment system policies and procedures may include:	• candidate selection • rationale and purpose of competency-based assessment • assessment records, and data and information management • recognition of current competency, recognition of prior learning and credit arrangements • assessment reporting procedures • assessment appeals • candidate grievances and complaints • validation • evaluation and internal audit • costs and resourcing • access and equity, and reasonable adjustment • partnership arrangements • links with human resource or industrial relations system • links with overall quality management system.
Benchmarks for assessment:	• refers to criterion against which the candidate is assessed • may be one or more units of competency or assessment criteria of course curricula.
Materials may include:	• assessment tools • samples of collected evidence • documentation outlining the basis of assessment decisions • reports and records of assessment decisions • samples of benchmarks of appropriate evidence • Assessment Guidelines of the relevant training packages • information from the evidence guide of the relevant units of competency.

Validation activities may include:	• analysing and reviewing:
	  • assessment tools
	  • collected evidence
	  • assessment decisions and records of assessment outcomes

© Commonwealth of Australia, 2025 Public Skills Australia

	• other aspects of assessment policies, processes and outcomes • recording evidence of validation processes and outcomes.
Participation may include comparison and evaluation of:	• assessment practices • assessment plans • interpretation of units of competency • assessment methods and instruments • assessment decisions • collected evidence.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

© Commonwealth of Australia, 2025 Public Skills Australia

Elements and Performance Criteria

1. Prepare for assessment	1.1 Interpret ***assessment plan*** and confirm organisational, legal and ethical requirements for conducting assessment with relevant people 1.2 Access and interpret relevant ***benchmarks for assessment*** and nominated ***assessment tools*** to confirm the requirements for evidence to be collected 1.3 Arrange identified material and physical resource requirements according to assessment system policies and procedures 1.4 Organise ***specialist support*** required for assessment 1.5 Explain, discuss and agree details of the assessment plan with candidate
2. Gather quality evidence	2.1 Use agreed ***assessment methods*** and instruments to gather, organise and document evidence in a format suitable for determining competence 2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence 2.3 Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel 2.4 Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required
3. Support the candidate	3.1 Guide candidates in gathering their own evidence to support recognition of prior learning (RPL) 3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to ***individual differences*** and enables two-way ***feedback*** 3.3 Make decisions on reasonable adjustments with the candidate, based on candidate's needs and characteristics 3.4 Access required specialist support in accordance with the assessment plan 3.5 Address any OHS risk to person or equipment immediately
4. Make the assessment decision	4.1 Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence 4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence 4.3 Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan 4.4 Provide clear and constructive feedback to candidate regarding

© Commonwealth of Australia, 2025 Public Skills Australia

	the assessment decision and develop any follow-up action plan required
5. Record and report the assessment decision	5.1 Record assessment outcomes promptly and accurately 5.2 Complete and process an assessment report according to agreed assessment procedures 5.3 Inform other relevant parties of the assessment decision according to confidentiality conventions
6. Review the assessment process	6.1 Review the assessment process in ***consultation*** with relevant people to improve own future practice 6.2 Document and record the review according to relevant assessment system policies and procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
  - break down competency standards
  - interpret assessment tools and other assessment information, including those used in RPL
  - identify candidate needs
  - make judgements based on assessment of available evidence
- observation skills to:
  - recognise candidate's prior learning
  - determine candidate's performance
  - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
  - access required human and material resources for assessment
  - access assessment system policies and procedures
  - access RPL policies and procedures
  - evaluate evidence
  - evaluate assessment process
- cognitive skills to:
  - weigh up the evidence and make a judgement
  - consider and recommend reasonable adjustments
- decision-making skills to:
  - recognise a candidate's prior learning

© Commonwealth of Australia, 2025 Public Skills Australia

    - make a decision on a candidate's competence
- literacy skills to:
    - read and interpret relevant information to conduct assessment
    - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
    - explain the assessment, including RPL process
    - give clear and precise instructions
    - ask effective questions
    - provide clarification
    - discuss process with other relevant people
    - give appropriate feedback
    - discuss assessment outcome
    - use language appropriate to candidate and assessment environment
    - establish a working relationship with candidate.

Required knowledge

- competency-based assessment, including:
    - vocational education and training as a competency-based system
    - criterion-referenced assessment as distinct from norm-referenced assessment
    - competency standards as the basis of qualifications
    - structure and application of competency standards
    - principles of assessment and how they are applied
    - rules of evidence and how they are applied
    - range of assessment purposes and assessment contexts, including RPL
    - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
    - reasonable adjustments and when they are applicable
    - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
    - potential barriers and processes relating to assessment tools and methods
    - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
    - copyright and privacy laws in terms of electronic technology
    - security of information

© Commonwealth of Australia, 2025 Public Skills Australia

  - plagiarism
  - training packages and competency standards
  - licensing requirements
  - industry and workplace requirements
  - duty of care under common law
  - recording information and confidentiality requirements
  - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
  - workplace relations
  - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for use of relevant personal protective equipment
  - safe use and maintenance of relevant equipment
  - sources of OHS information.
-

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan
	• assess at least one candidate for RPL
	• consider reasonable adjustment and the reasons for decisions in at least one assessment
	• cover an entire unit of competency and show:
	  • the application of different assessment methods and instruments involving a range of assessment activities and events
	  • two-way communication and feedback
	  • how judgement was exercised in making the assessment decision
	  • how and when assessment outcomes were recorded and reported

© Commonwealth of Australia, 2025 Public Skills Australia

	• assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements • how the assessment process was reviewed.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Assessment plan may include:	• overall planning, describing:
	  • what is to be assessed
	  • when assessment is to take place
	  • where assessment is to take place
	  • how assessment is to take place.

Benchmarks for assessment:	• refer to a criterion against which the candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
Assessment tools include:	• the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.

© Commonwealth of Australia, 2025 Public Skills Australia

Specialist support may include:	• assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels • support from lead assessors • advice from policy development experts.

Assessment methods include:	• particular techniques used to gather different types of evidence, such as:
	  • direct observation
	  • structured activities
	  • oral or written questioning
	  • portfolios of evidence
	  • review of products
	  • third-party feedback.

Individual differences may include:	• English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
Feedback may include:	• ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and

© Commonwealth of Australia, 2025 Public Skills Australia

	presentation.
Consultation may involve:	• moderation with other assessors, or training and assessment coordinators • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors • technical and subject experts • English language, literacy and numeracy experts.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the assessment process.

Application of the Unit

This unit typically applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role and for whom collecting evidence for assessment is an adjunct to principal work responsibilities.

This unit is performed under the following conditions:

- the necessary assessment tools and assessment resources to guide the evidence collection process have been provided
- any adjustments to tools are determined by the qualified assessor (as defined by the Australian Quality Training Framework and the assessor requirements of the relevant training package), who provides guidance and supervision.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency .	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Clarify role and responsibilities in the assessment process	1.1 Discuss and confirm ***purpose of assessment*** with ***relevant people***
	1.2 Discuss and confirm ***benchmarks for assessment*** with qualified assessor
	1.3 Access, read and clarify ***assessment plan*** with qualified assessor
	1.4 Discuss and agree with qualified assessor the specific responsibilities in gathering evidence and types of evidence to be gathered
2. Confirm organisational arrangements for evidence gathering	2.1 Access and confirm relevant ***assessment system policies and procedures;*** organisational, legal and ethical requirements; and other relevant advice on assessment
	2.2 Clarify nominated ***assessment tools*** and methods for collecting evidence with qualified assessor, to ensure that procedures to be followed and instruments to be used are clear
	2.3 Discuss and confirm with relevant people ***assessment context,*** including candidate's characteristics and any need for ***reasonable adjustments***
	2.4 Confirm and arrange ***resource requirements*** in consultation with relevant people
3. Collect evidence in accordance with the assessment plan	3.1 Explain assessment process to candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to qualified assessor prior to undertaking assessment activities
	3.2 Use ***assessment instruments*** to gather quality evidence within available time and resources, according to organisational, legal and ethical requirements
4. Record and report findings	4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to assessment system policies and procedures

© Commonwealth of Australia, 2025 Public Skills Australia

	4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment and whether evidence collected meets the rules of evidence 4.3 Document areas for improvement in collecting evidence, for future assessment activities

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- observation skills to observe candidate performance
- cognitive and interpretation skills to ensure collection of valid and reliable evidence
- organisational skills to collect evidence
- time-management skills to schedule assessment events and activities
- literacy skills to:
  - read and interpret relevant information
  - prepare required documentation and collate evidence in required format
- communication skills to:
  - discuss evidence-gathering processes with practitioners and candidates
  - provide constructive and supportive feedback
  - ask appropriate questions to clarify and confirm instructions for evidence gathering
  - provide clear and concrete options and advice.

Required knowledge

- competency-based assessment, including:
  - criterion referenced
  - competency standards as the benchmarks for assessment
  - competency-based reporting
- principles of assessment
- rules of quality evidence
- different purposes of assessment
- diversity of assessment contexts
- evidence, including different types of evidence
- evidence-gathering methods – what are assessment methods and different types of methods
- purpose and features of assessment tools and assessment plans
- potential barriers and processes relating to evidence-gathering procedures and assessment processes
- organisational assessment system policies and procedures relevant to this unit of competency

© Commonwealth of Australia, 2025 Public Skills Australia

- technical or subject area being assessed
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation, that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, and OHS considerations to be included in collecting evidence, including:
  - hazard identification and risk control measures
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for use of relevant personal protective equipment
  - safe use of relevant equipment
  - sources of OHS information
  - role of key workplace personnel
  - responsibilities of learners.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • carry out a minimum of three evidence-gathering activities, with different candidates for each activity • present documentation of the evidence in a clear and concise manner • present documented feedback from others involved in the assessment.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Purpose of assessment may be:	• recognise current existing competency of candidates • determine if competency has been achieved following learning • establish candidate progress towards achievement of competence • determine language, literacy and numeracy needs of candidate • certify competence through a Statement of Attainment • establish progress towards a qualification • determine training gaps of candidate • measure work performance • classify employee and support career progression • meet organisational requirements for work, such as operating equipment or developing new skills • satisfy licensing or regulatory requirements.
Relevant people must include:	• qualified assessors • candidates.
Benchmarks for assessment:	• refer to criteria against which candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
Assessment plan must include:	• purpose and aims of assessment • context of assessment • relevant benchmarks for assessment • other assessment information and documentation identified as relevant.
Assessment system policies and procedures may include:	• candidate selection • rationale and purpose of competency-based assessment • assessment records, data management and information management • recognition of current competency, recognition of prior learning and credit arrangements.
Assessment tools include:	• the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance

© Commonwealth of Australia, 2025 Public Skills Australia

	(i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.
Assessment context may include:	• environment in which assessment will be carried out • relationship between units of competency and candidate's workplace • time period over which assessment takes place.

Reasonable adjustments may include:	• taking into account candidate's language, literacy and numeracy requirements
	• providing personal support services, such as arranging for:
	  • member of the community to accompany the candidate
	  • reader
	  • interpreter
	  • attendant carer
	  • scribe
	• using adaptive technology or special equipment
	• providing flexible assessment sessions to allow for such things as fatigue or administering of medication
	• format of assessment materials, such as:
	  • in Braille
	  • in first language
	  • use of audiotape or videotape
	• making adjustments to the physical environment
	• revising proposed assessment methods and instruments
	• considering age and gender
	• considering cultural beliefs, traditional practices and religious observances.

Resource requirements may include:	• resources specific to evidence-gathering activities • access to assessors • access to policy and procedures • access to subject and technical experts • OHS requirements • plant, equipment and technology.

Assessment instruments may include:	• instruments developed by an assessor as part of formative or summative assessment activities, including:
	  • profiles of acceptable performance measures
	  • templates and proformas
	  • specific questions or activities
	  • evidence and observation checklists
	  • checklists for the evaluation of work samples

© Commonwealth of Australia, 2025 Public Skills Australia

	• recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.

TAEASS401B Plan assessment activities and processes

Modification History

Version	Comments
TAEASS301B	Released with *TAE10 Training and Education Training Package version 2.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.

The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	*is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Determine assessment approach	1.1 Identify candidate and confirm ***purposes and context of assessment/RPL*** with relevant people according to l***egal, organisational and ethical requirements***
	1.2 Identify and access ***benchmarks for assessment/RPL*** and any specific assessment guidelines
2. Prepare the assessment plan	2.1 Determine evidence and ***types of evidence*** needed to demonstrate competence, according to the ***rules of evidence***
	2.2 Select ***assessment methods*** which will support the collection of defined evidence, taking into account the context in which the assessment will take place
	2.3 Document all aspects of the ***assessment plan*** and confirm with relevant personnel
3. Develop assessment instruments	3.1 Develop ***simple assessment instruments*** to meet target group needs
	3.2 Analyse ***available assessment instruments*** for their suitability for use and modify as required
	3.3 ***Map assessment*** instruments against unit or course requirements
	3.4 Write clear instructions for candidate about the use of the instruments
	3.5 Trial draft assessment instruments to validate content and applicability, and record outcomes

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
  - interpret competency standards and other assessment documentation, including material

© Commonwealth of Australia, 2025 Public Skills Australia

relating to reasonable adjustment
    - identify opportunities for integrated competency assessment
    - contextualise competency standards to the operating assessment environment, including RPL
    - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
    - obtain competency standards, assessment tools and other relevant assessment resources
    - research candidate characteristics and any reasonable adjustment needs
    - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
    - demonstrate sensitivity to access and equity considerations and candidate diversity
    - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.
- **Required knowledge**
- ethical and legal requirements of an assessor
- competency-based assessment, including:
    - work focused
    - criterion referenced
    - standards based
    - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence
- assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Evidence of the ability to:
	• plan and organise the assessment process on a minimum of two occasions
	• collect evidence that demonstrates:
	  • documented assessment plans
	  • having covered a range of assessment events
	  • catering for a number of candidates
	  • different competency standards or accredited curricula
	  • an RPL assessment
	  • contextualisation of competency standards and the selected assessment tools, where required
	  • incorporation of reasonable adjustment strategies
	  • development of simple assessment instruments for use in the process
	  • organisational arrangements.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Public Skills Australia

Purposes of assessment/ RPL may include:	• recognising current existing competence of candidates • determining if competence has been achieved following learning • establishing candidate progress towards achievement of competence • determining language, literacy and numeracy needs of candidates • certifying competence through a qualification or Statement of Attainment • licensing or regulatory requirements.

Context of assessment/ RPL may include:	• environment in which the assessment/RPL will be carried out, including real or simulated workplace
	• opportunities for collecting evidence in a number of situations
	• relationships between competency standards and:
	  • evidence to support RPL
	  • work activities in the candidate's workplace
	  • learning activities
	• who carries out the assessment/RPL.

Organisational, legal and ethical requirements may include:	• assessment system policies and procedures
	• assessment strategy requirements
	• reporting, recording and retrieval systems for assessment, including RPL
	• quality assurance systems
	• business and performance plans
	• access and equity policies and procedures
	• collaborative and partnership arrangements
	• defined resource parameters
	• mutual recognition arrangements
	• industrial relations systems and processes, awards, and enterprise agreements
	• Australian Quality Training Framework
	• registration scope
	• human resources policies and procedures
	• legal requirements, including:
	  • anti-discrimination
	  • equal employment opportunity
	  • job role, responsibilities and conditions
	• relevant industry codes of practice
	• confidentiality and privacy requirements
	• OHS considerations, including:
	  • ensuring OHS requirements are adhered to during the

© Commonwealth of Australia, 2025 Public Skills Australia

	assessment process • identifying and reporting OHS hazards and concerns to relevant personnel.
Benchmarks for assessment/RPL may include:	• criterion against which the candidate is assessed or prior learning recognised, which may be: • competency standard/unit of competency • assessment criteria of course curricula • performance specifications of an enterprise or industry • product specifications.
Types of evidence may include:	• direct • indirect • supplementary.
Rules of evidence ensure that evidence collected is:	• valid • sufficient • authentic • current.
Assessment methods are the particular techniques used to gather evidence and may include:	• direct observation, for example: • real work/real time activities at the workplace • work activities in a simulated workplace environment • structured activities, for example: • simulation exercises and role-plays • projects • presentations • activity sheets • questioning, for example: • written questions, e.g. on a computer • interviews • self-assessment • verbal questioning • questionnaires • oral or written examinations (applicable at higher AQF levels) • portfolios of evidence, for example: • collection of work samples compiled by candidate • product with supporting documentation • historical evidence • journal or log book • information about life experience • review of products, for example: • testimonials and reports from employers and supervisors

© Commonwealth of Australia, 2025 Public Skills Australia

	• evidence of training • authenticated prior achievements • interview with employer, supervisor, or peer.
Assessment plan may include:	• overall planning document describing: • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
Simple assessment instruments may include:	• instruments developed by an assessor as part of formative or summative assessment activities, including: • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
Available assessment instruments may include:	• commercially available instruments • those created by others inside the registered training organisation.
Map assessment means:	• showing a clear relationship between the evidence and the requirements of the unit.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about ***learner characteristics*** and learning needs 1.2. Confirm a ***safe learning environment*** 1.3. Gather and check ***instruction and demonstration objectives*** and seek assistance if required 1.4. Access and review relevant ***learning resources*** and ***learning materials*** for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of ***details*** regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any ***OHS procedures*** and requirements prior to and during training 2.4. Use ***delivery techniques*** to structure, pace and enhance learning 2.5. Apply ***coaching*** techniques to assist learning 2.6. Use communication skills to provide information,

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use ***measures*** to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbaland non-verbal communication techniques, such as:
  - asking relevant and appropriate questions
  - providing explanations
  - demonstrating
  - using listening skills
  - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
  - identify hazards
  - conduct prestart-up checks if required
  - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- ensure all learning objectives are covered
- pace learning

- reflection skills in order to:
  - identify areas for improvement
  - maintain personal skill development
- literacy skills to:
  - complete and maintain documentation
  - read and follow learning programs and plans
  - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
  - engage, motivate and connect with learners
  - provide constructive feedback
  - maintain appropriate relationships
  - establish trust
  - use appropriate body language
  - maintain humour
  - demonstrate tolerance
  - manage a group
  - recognise and be sensitive to individual difference and diversity
- observation skills to:
  - monitor learner acquisition of new skills, knowledge and competency requirements
  - assess learner communication and skills in interacting with others
  - identify learner concerns
  - recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE
procedures • risk controls for the specific learning environment

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• carry out aminimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
	  • different learning objectives
	  • a range of techniques and effective communication skills appropriate to the audience.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Learner characteristics may include:	• language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
Safe learning environment may include:	• exit requirements • personal protective equipment • safe access • safe use of equipment.

Instruction and demonstration objectives may include:	• competencies to be achieved
	• generic and technical skills, which may be:
	  • provided by the organisation
	  • developed by a colleague
	  • individual or group objectives
	  • learning outcomes.

Learning resources may include:	• any material used to support learning, such as:
	  • learner and user guides
	  • trainer and facilitator guides
	  • example training programs
	  • specific case studies
	  • professional development materials
	  • assessment materials
	• a variety of formats
	• those produced locally
	• those acquired from other sources.

Learning materials may include:	• handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
Details may include:	• location and time • outcomes of instruction or demonstration • reason for instruction or demonstration • who will be attending instruction session.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT	
OHS procedures may include:	• emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
Delivery techniques may include:	• coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
Coaching may include:	• learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
Measures may include:	• informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

HLTFA404B Apply advanced resuscitation techniques

Modification History

Not Applicable

Unit Descriptor

Descriptor

This unit deals with the provision of advanced first aid resuscitation techniques, life support, and management of casualty(s), until the arrival of medical or other assistance, and provision of support to other providers

Application of the Unit

Application

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Pre-requisite units

This unit must be assessed after successful achievement of one of the following related units:

- HLTFA301C Apply first aid

or

© Commonwealth of Australia, 2025 Public Skills Australia

- HLTCPR201B Perform CPR
  or
- HLTFA201B Provide emergency life support

In general it is recommended that people using advanced resuscitation techniques have completed *HLTFA301C Apply first aid*

However, it is recognised that some employers require staff to be able to apply advanced resuscitation techniques without requiring this first aid competency

Employability Skills Information

Employability Skills This unit contains Employability Skills

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare resuscitation equipment ready for use	1.1 Undertake pre-use check of resuscitation equipment in accordance with organisation procedures, manufacturer's instructions, industry standards and regulatory requirements 1.2 Diagnose minor equipment faults and rectify within the scope of organisation procedures and manufacturer's instructions 1.3 Identify and deal with major faults and defects in accordance with organisation procedures

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2. Apply bag and mask resuscitation technique	2.1 Assemble the bag valve mask resuscitation device 2.2 Use the bag valve mask device in the delivery of CPR 2.3 Select and use an oropharyngeal airway to maintain a casualty's airway 2.4 Rectify issues preventing adequate treatment as they arise
3. Attach and operate an AED	3.1 Prepare the casualty in accordance with manufacturer's requirements and ARC Guidelines. 3.2 Attach the *AED* and operate *in accordance with organisation procedures, manufacturer's guidelines, ARC guidelines and state legislation* 3.3 Coordinate the operation of the *AED* with the resuscitation team to minimise interruption to CPR efforts
4. Administer oxygen	4.1 Apply the medical and safety precautions associated with storing, handling and administering oxygen 4.2 Select and operate oxygen masks and cannulae in delivery of oxygen therapy 4.3 Provide oxygen to a bag valve mask device 4.4 Provide supplemental oxygen to a breathing casualty
5. Operate suction equipment	5.1 Apply medical and safety precautions associated with the provision of manual and oxygen powered suction devices 5.2 Select and operate suction catheters and devices 5.3 Provide suction during the application of advanced resuscitation techniques

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
6. Restore and maintain equipment ready for future use	6.1 Clean, discard, disinfect, replenish and recharge *equipment* in accordance with organisation procedures and manufacturer's instructions 6.2 Diagnose and rectify minor faults within the scope of organisation procedures and manufacturer's instructions 6.3 Identify and deal with major faults and defects in accordance with organisation procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- First aid management procedures in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and organisation requirements for equipment and conditions identified in the Range Statement and including:
  - use of bag valve mask device, AED, oxygen therapy equipment, manual and oxygen powered suction, and oropharyngeal airways
  - sudden cardiac arrest
  - collapse, unconsciousness
  - shock
  - airway management including foreign body airway obstruction
  - hypoxia
- Complications and associated methods of management for conditions identified in the Range Statement
- Incident management procedures:
  - manual handling, hazardous substances, dangerous goods or chemicals

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- safe access to the casualty
- awareness of confined spaces and dangerous places
- removal of casualty to safe area, if appropriate
- coordinate activities of other first aiders, if applicable

- State and territory regulations, or organisation policy requirements relating to currency of skill and knowledge
- Social issues, especially in particular workplace or community context(s) in which first aid is to be applied, including:
  - importance of debriefing
  - need to be culturally aware, sensitive and respectful
  - confidentiality
  - own skills and limitations
  - awareness of stress management techniques and available support

continued ...

Essential knowledge (*contd*):

- Working knowledge of:
  - ARC Guidelines and/or State/Territory regulations, legislation and policies relating to provision of first aid
  - basic anatomy (skeleton, muscles, joints, bones), physiology and toxicology as it relates to the provision of advanced first aid resuscitation, including:
    - relevant organs of the cardio pulmonary system and their operation
    - basic electrical activity associated with normal and abnormal heart rhythm
  - benefits of providing oxygen to a casualty and of providing suction during the application of advanced resuscitation techniques
  - capabilities of emergency management services
  - chain of survival, including:
    - purpose of bystander CPR
    - aim and function of advanced resuscitation techniques in the chain of survival
  - company/organisation standard operating procedures (SOPs)
  - first aiders' skills and limitations
  - how to gain access to and interpret material safety data sheets (MSDSs)
  - infection control principles and procedures, including using standard precautions
  - legal responsibilities and duty of care, including confidentiality
  - occupational health and safety requirements in the provision of first aid.
  - priorities of management in first aid
  - procedures for dealing with major and minor accidents in the workplace
  - safe storage and handling procedures for pressurised gases, oxygen and battery

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

operated equipment

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Administer oxygen in line with state/territory regulations, legislation and policies and any available medical/pharmaceutical instructions
- Apply appropriate resuscitation techniques, including use of:
  - oxygen in resuscitation and oxygen therapy
  - bag valve mask resuscitation device
  - AED
  - mechanical and oxygen powered suction devices
  - oropharyngeal airways
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively and show leadership in an incident
- Comply with OHS legislation
- Conduct an initial casualty assessment
- Demonstrate the application of first aid principles
- Demonstrate:
  - assembly of the bag valve mask resuscitation device
  - effective use of the bag valve mask device on a manikin
  - selection and use of an oropharyngeal airway
  - correct selection and operation of oxygen masks and cannulae
  - provision of oxygen to a bag valve mask device
  - provision of supplemental oxygen to a breathing patient
  - correct selection and operation of suction catheters and devices
  - safe manual handling
  - adequate infection control procedures
  - consideration of the welfare of the casualty
  - safe storage and handling procedures for pressurised gases and battery operated equipment
- Incorporate the use of all equipment into effective treatment of illness/injuries specified in the Range Statement
- Interpret and use listed documents
- Make prompt and appropriate decisions relating to managing an incident in the

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

workplace

- Manage specific injuries/illnesses and conditions as identified in the Range Statement for this competency unit

continued ...

Essential skills (*contd*):

- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Use literacy and numeracy skills as required to read, interpret and apply instructions, guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Method of assessment may

- Skills in performing advanced resuscitation procedures are to be assessed through demonstration,

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

include:	with questioning to confirm essential knowledge • Skills are to be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre • For assessment purposes, demonstration of skills in CPR procedures require using a model of the human body (resuscitation manikin) in line with ARC Guidelines
Access and equity considerations:	• All participants undertaking this unit should be aware of access and equity issues in relation to their own area of work or involvement • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may	• Focus on first aid management of specific types of injury

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

include:	• First aid provision under specific constraints or circumstances (eg. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
First aid management must take into account:	• Workplace policies and procedures • Industry/site specific regulations, codes etc. • OHS requirements • State and territory workplace health and safety requirements
A hazard is:	• A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
An AED is:	• Automatic External Defibrillator • Semi-automatic External Defibrillator
Hazards may include:	• Physical hazards • Biological hazards • Chemical hazards • Hazards associated with manual handling
Risks may include:	• Risks from worksite equipment, machinery and substances • Risks from first aid equipment (oxygen cylinders, AED) • Environmental risks • Exposure to blood and other body substances • Risk of further injury to the casualty • Risks associated with the proximity of other workers and bystanders • Risks from vehicles • Fallen power lines, step and touch potential
Casualty's condition is managed for:	• Sudden cardiac arrest • Collapse/unconsciousness

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• Foreign body airway obstruction • No signs of life • Respiratory distress • Shock • Hypoxia
First aid management skills must include in accordance with ARC Guidelines, state/territory regulations, legislation and policies and industry requirements:	• CPR • Infection control • AED • Oxygen administration
First aid management must account for:	• Location and nature of the workplace • Environmental conditions e.g. electricity (high or low voltage), biological risks, weather, motor vehicle accidents • Location of emergency services personnel • Number of casualties and potential casualties • Use and availability of first aid equipment, resources and pharmaceuticals • Types of dangers/risks to the casualty and any others in the vicinity of the situation • Confined spaces, subject to industry need
Resources and equipment are used appropriate to the risk to be met and may include:	• Oxygen therapy equipment (e.g. masks, cannulae and tubing) and cylinders • Bag valve mask resuscitation device • AED • First aid kit • Resuscitation mask or barrier device • Mechanical and oxygen powered suction device • Oropharyngeal airway • Gloves • Razor • Shears • Cleaning wipes or towels

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Information to be documented may include:	• Time
	• Location
	• Description of condition of patient
	• First aid management
	• Administration of medication including:
	  • time
	  • date
	  • person administering
	  • dose
	• Number of electrical shocks attempted
	• Vital signs

Established first aid principles include:	• Checking the site for danger to self, the casualty and others and minimising the danger • Checking and maintaining the casualty's airway, breathing and circulation

FPIFGM3205A Fall trees manually (advanced)

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit specifies the outcomes required to assess, plan and safely carry out advanced tree falling operations. This unit is intended for use in situations where the production of timber is not the primary focus of the activity. Compliance with licensing, legislative, regulatory or certification requirements may be required in various jurisdictions

This unit replaces FPIFGM112A Fall trees manually - advanced (non-commercial/non-production)

Application of the Unit

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in forest and forest products operations of all sizes. The unit applies to a forest environment and involves application of skills and knowledge at a tradesperson level. These skills and knowledge are to be used within the scope of the person's job and authority

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency	**Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide**

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare and maintain falling equipment	1.1 Applicable ***Occupational Health and Safety*** (***OHS***), ***legislative*** and ***organisational*** requirements relevant to ***falling trees*** are identified and complied with
	1.2 Site ***environmental protection measures*** are adhered to in accordance with relevant legislation and regulations
	1.3 ***Work plan*** is reviewed and checked as required
	1.4 ***Tools and equipment*** are selected appropriate to work requirements and checked for operational effectiveness in accordance with manufacturer's recommendations
	1.5 Blunt or damaged chainsaw is detected, rectified and reported in accordance with workplace procedures
	1.6 Operational effectiveness of chainsaw is monitored to ***maintain*** falling safety and productivity
	1.7 ***Communication*** with others is established and maintained in accordance with OHS requirements
2 Assess conditions and surroundings	2.1 Site environmental concerns are identified and complied with in accordance with relevant national, state, and local legislation or regulations
	2.2 ***Environmental conditions*** are identified and assessed in accordance with work plan requirements
	2.3 Awareness of environmental conditions and other personnel activity in the work area is maintained and falling activity modified

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.4 General factors affecting falling requirements are assessed and specific forest or site risks and hazards identified and controlled
3 Assess tree and plan falling	3.1 General falling direction and working face are planned to minimise danger and damage to self, others and the environment
	3.2 Tree falling sequence for individual trees is assessed and progressively planned
	3.3 Tree to be felled is located and growth is cleared to enable a ***visual assessment*** of falling characteristics
	3.4 Required falling direction and degree of allowable error is assessed and checked
	3.5 Sequence of cuts to fall tree is planned in accordance with standard falling procedures
	3.6 Suitable ***escape route*** is selected and cleared of growth and other obstacles in accordance with environmental care principles and statutory requirements
	3.7 Personal ***limitations*** in safely falling trees with own skills are assessed and ***assistance*** sought from appropriate personnel
4 Fall tree	4.1 All work is conducted using established safe operating practices and in accordance with site procedures
	4.2 Location and activity of other personnel in the work area is noted and monitored
	4.3 Cutting techniques used are appropriate for advanced tree falling operations
	4.4 Unexpected characteristics of tree and other problems are assessed, assistance sought and planning reviewed
	4.5 Planned escape route is used when tree starts to fall and the fall and movement of tree on ground is monitored until stability is determined
	4.6 Chainsaw is monitored for operational effectiveness and any faults, malfunctions or problems are reported in accordance with site procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this

© Commonwealth of Australia, 2025 Public Skills Australia

unit

Required skills include:

- comply with legislation, regulations, standards, codes of practice and established safe practices and procedures relating to advanced tree falling operations
- use and maintain relevant tools, machinery and equipment including chainsaws
- identify problems and equipment faults and demonstrate appropriate response procedures
- use appropriate communication and interpersonal techniques and methods with colleagues and others
- accurately record and report workplace information, and maintain documentation
- use hand signals with other operators to maintain effective and safe tree falling
- recognise own limitations in assessing conditions and trees for falling
- contribute to a tree assessment and plan and fall trees within the range of variables for trees and conditions including techniques for control of falling direction consistent with this range
- recognise common diseases, pests and nutrition deficiencies
- calculate slopes and weights in the metric system

Required knowledge and understanding includes:

- applicable Commonwealth, State or Territory licensing, legislative, regulatory or certification requirements and codes of practice relevant to advanced tree falling operations
- organisational and site standards, requirements, policies and procedures relating to advanced tree falling operations
- principles of cultural diversity and access and equity
- environmental protection requirements, including the safe disposal of waste material
- established communication channels and protocols
- problem identification and resolution
- types of tools and equipment and procedures for their safe use, operation and maintenance
- identification and evaluation of structural defects in trees
- types and purposes of a range of cuts to fall trees
- hazards of operating a chainsaw and falling trees
- operational principles and limitations of a chainsaw
- procedures for the recording, reporting and

© Commonwealth of Australia, 2025 Public Skills Australia

maintenance of workplace records and information
- appropriate mathematical procedures for estimation and measurement

KEY COMPETENCIES

The seven key competencies represent generic skills considered necessary for effective participation by an individual in the workplace
Performance Level 1 - at this level, the candidate is required to undertake tasks effectively
Performance Level 2 - at this level, the candidate is required to manage tasks
Performance Level 3 - at this level, the candidate is required to use concepts for evaluating and reshaping tasks

Key Competency	**Example of Application**	**Performance Level**
How are ideas and information communicated?	By communicating in simple language to confirm work requirements, convey information to colleagues, and report outcomes relating to falling trees	2
How can information be collected, analysed and organised?	By collecting, organising and understanding information required to plan and undertake tree falling	2
How are activities planned and organised?	By organising and conducting tree falling activities in the correct sequence to complete within the designated timeframes	2
How is team work used?	By using effective communication and interpersonal techniques with colleagues and others to maximise confidence, satisfaction and productivity during tree falling operations	2
How are mathematical ideas and techniques used?	By calculating slopes, wind speed and direction time to complete tasks	2
How are problem solving skills applied?	By establishing safe and effective tree falling procedures and processes which anticipate likely problems to avoid wastage and downtime	2
How is the use of	By accessing and locating applicable legislative, regulatory and	2

technology applied?	environmental guidelines relevant to tree falling operations	

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, **Required Skills and Knowledge**, **the Range Statement and the Assessment Guidelines for this Training Package**

Overview of assessment

- A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently assess, plan and conduct advanced tree falling operations in accordance with environmental and organisational requirements

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to advanced tree falling operations
- Comply with applicable licensing or certification requirements
- Communicate effectively and work safely with others including maintaining an awareness of other personnel activity in the work area
- Contribute to a tree assessment, plan and undertake advanced tree falling within the range of variables for trees and conditions
- Visually assess trees and determine falling characteristics
- Determine and plan falling sequence for individual trees
- Select and maintain appropriate tools and equipment and recognise faults, problems or malfunctions
- Safely operate and maintain a chainsaw

Context of and specific resources for assessment

- Competency is to be assessed in the workplace or realistically simulated workplace
- Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
- Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to comply with relevant regulatory or Australian Standards requirements

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, **Required Skills and Knowledge**, **the Range Statement and the Assessment Guidelines for this Training Package**

- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to advanced tree falling operations
  - specifications and work instructions

Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies
- Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

OHS requirements are to be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:	• the use of personal protective equipment and clothing • safety equipment • first aid equipment • fire fighting equipment • hazard and risk control • elimination of hazardous materials and substances • safe forest practices including required actions relating to forest fire • manual handling including shifting, lifting and carrying
Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:	• award and enterprise agreements • industrial relations • Australian Standards • confidentiality and privacy • OHS • the environment • equal opportunity • anti-discrimination • relevant industry codes of practice • duty of care • heritage and traditional land owner issues
Organisational requirements	• may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)
Falling	• may require the use of multiple back-cuts and/or boring techniques and will be undertaken in all conditions for which it is safe including slopes up to the maximum allowed by relevant regulations
Trees	• selected for falling include those of any size and condition that are determined can be safely fallen
Environmental protection	• may include noise, ground growth, canopy, general

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

measures	forest lean, wind speed and direction, fallen trees, density of trees, ground slope, soil and water protection, ground hazards, obstacles. Measures may also include contingencies for modifying operations during wet or other adverse weather conditions
Work plan	• is to include information and instructions relevant to tree falling operations including processing location details and trees to be felled and retained. Information may also include general environmental requirements, site plan and environmental features
Tools and equipment	• may include warning signs, chainsaw and components, personal protective equipment and clothing, first aid equipment, maintenance requirements, fuel
Maintenance	• of chainsaw and components may include sharpening and making adjustments as required
Communication	• may include verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language, hand signals
Environmental conditions	• may relate to ground growth, canopy, general forest lean, ground slope, ground hazards, wind speed and direction
Limitations	• may relate to job role and responsibilities, own competency level, industry requirements, own understanding of risk identification processes, own interpretation of legislation, regulations and procedures, complying with OHS requirements
Assistance	• may be required in situations where cuts made may lead to loss of control of tree in falling, to confirm and adjust cutting techniques in response to movement and condition of tree, to help clear trees that hang up during falling
Visual assessment	• of tree may cover size, weight distribution, lean, species, multi leaders, soundness of timber, growth characteristics and stresses
Escape route	• clearance may require the assistance from a dozer or

unit

Required skills include:

- comply with legislation, regulations, standards, codes of practice and established safe practices and procedures relating to intermediate manual tree falling operations
- use and maintain relevant tools, machinery and equipment
- identify problems and equipment faults and demonstrate appropriate response procedures
- use appropriate communication and interpersonal techniques and methods with colleagues and others
- accurately record and report workplace information, and maintain documentation
- use hand signals with other operators to maintain effective and safe tree falling
- recognise own limitations in conditions and trees for falling
- contribute to a tree assessment and plan and fall trees within the range of variables for trees and conditions
- recognise common diseases, pests and nutrition deficiencies
- calculate slopes and weights in the metric system

Required knowledge and understanding includes:

- applicable Commonwealth, State or Territory licensing, legislative, regulatory or certification requirements and codes of practice relevant to intermediate manual tree falling operations
- organisational and site standards, requirements, policies and procedures relating to intermediate manual tree falling operations
- principles of cultural diversity and access and equity
- environmental protection requirements, including the safe disposal of waste material
- established communication channels and protocols
- problem identification and resolution
- types of tools and equipment and procedures for their safe use, operation and maintenance
- identification and evaluation of structural defects in trees
- types and purposes of a range of cuts to fall trees
- hazards of operating a chainsaw and falling trees
- operational principles and limitations of a chainsaw
- procedures for recording, reporting and maintaining workplace records and information
- appropriate mathematical procedures for estimation

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package

Overview of assessment	• A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently assess, plan and conduct tree falling operations in accordance with environmental and organisational requirements
Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Comply with applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS, environmental and organisational policies and procedures, relevant to falling trees manually (intermediate) • Comply with applicable licensing or certification requirements • Communicate effectively and work safely with others including maintaining an awareness of other personnel activity in the work area • Contribute to a tree assessment, plan and fall trees within the range of variables for trees and conditions • Visually assess trees and determine falling characteristics • Select, use and maintain appropriate tools and equipment and recognise faults, problems or malfunctions • Safely operate and maintain a chainsaw

Context of and specific resources for assessment	• Competency is to be assessed in the workplace or realistically simulated workplace
	• Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context
	• Assessment is to comply with relevant regulatory or Australian Standards requirements
	• The following resources should be made available:
	  • workplace location or simulated workplace
	  • materials and equipment relevant to manual falling of trees (intermediate)
	  • specifications and work instructions

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package

Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI05 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies
- Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

OHS requirements are to

- the use of personal protective equipment and clothing

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

be in accordance with Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures. Requirements may include:	• safety equipment • first aid equipment • fire fighting equipment • hazard and risk control • elimination of hazardous materials and substances • safe forest practices including required actions relating to forest fire • manual handling including shifting, lifting and carrying
Legislative requirements are to be in accordance with applicable legislation from all levels of government that affect organisational operation. Requirements may include:	• award and enterprise agreements • industrial relations • Australian Standards • confidentiality and privacy • OHS • the environment • equal opportunity • anti-discrimination • relevant industry codes of practice • duty of care • heritage and traditional land owner issues
Organisational requirements	• may include legal, organisational and site guidelines, policies and procedures relating to own role and responsibility, quality assurance, procedural manuals, quality and continuous improvement processes and standards, OHS, emergency and evacuation, ethical standards, recording and reporting, access and equity principles and practices, equipment use, maintenance and storage, environmental management (waste disposal, recycling and re-use guidelines)
Falling	• may require the use of multiple back-cuts
Trees	• for falling will have the following characteristics: height not more than 40 metres, lean and weight distribution which can be adapted to falling direction with the use of wedges and or control with hinge wood, single leader, sound wood condition in barrel
Environmental protection measures	• may include noise, ground growth, canopy, general forest lean, wind speed and direction, fallen trees, density of trees, ground slope, soil and water protection, ground hazards, obstacles. Measures may

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below

	also include contingencies for modifying operations during wet or other adverse weather conditions
Work plan	• is to include information and instructions relevant to tree falling operations including processing location details and trees to be felled and retained. Information may also include general environmental requirements, site plan and environmental features
Appropriate personnel	• may include supervisors, clients, colleagues, line management
Tools and equipment	• may include warning signs, chainsaw and components, personal protective equipment and clothing, first aid equipment, maintenance requirements, fuel
Maintenance	• of chainsaw and components may include sharpening and making adjustments as required
Communication	• may include verbal and non-verbal language, constructive feedback, active listening, questioning to clarify and confirm understanding, use of positive, confident and cooperative language, use of language and concepts appropriate to individual social and cultural differences, control of tone of voice and body language, hand signals
Environmental conditions	• may relate to ground growth, canopy, general forest lean, ground slope, ground hazards, wind speed and direction, wet weather including ice and snow
Conditions	• in which falling will be undertaken include ground slope not more than 15 degrees, moderate wind speed, absence in growth of fallen trees preventing complete fall, works with general supervision available to provide assistance related to planning, falling
Limitations	• may relate to job role and responsibilities, own competency level, industry requirements, own understanding of risk identification processes, own interpretation of legislation, regulations and procedures, complying with OHS requirements
Assistance	• may be required in situations where cuts made may lead to loss of control of tree in falling, to confirm and adjust cutting techniques in response to movement and condition of tree, to help clear trees

FPICOT2239A Trim and cut felled trees

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the outcomes required to trim and cut felled trees with a chainsaw. It is intended for use in situations where the production of timber is not the primary focus of the activity. The unit also includes equipment maintenance

General workplace legislative and regulatory requirements apply to this unit; specific licensing or certification requirements may apply in some states and territories

This unit replaces FPICOT2221A Trim and cross cut felled trees

Application of the Unit

Application of the unit

This unit involves trimming and cutting felled trees with a chainsaw in a variety of work settings including a forest, agriculture, domestic, local council and emergency services environment, as relevant to the unit

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability skills This unit contains employability skills

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for trimming and cutting	1.1. Applicable ***Occupational Health and Safety*** (***OHS***), environmental, ***legislative*** and ***organisational requirements*** and manufacturer's specifications relevant to trimming and cutting felled ***trees*** are identified and followed
	1.2. Site ***environmental protection measures*** and enterprise environmental management systems are identified and adhered to in line with relevant legislation and regulations
	1.3. ***Job requirements*** are reviewed and clarified with ***appropriate personnel***
	1.4. Trimming and cutting activities are planned in line with site procedures
	1.5. ***Tools and equipment*** are selected appropriate to work requirements and checked for operational effectiveness in line with organisational procedures and manufacturer's recommendations
	1.6. ***Communication*** with others is established and maintained in line with OHS requirements
2. Visually assess felled trees	2.1. Trees to be trimmed and cut are identified in line with job requirements
	2.2. ***Environmental requirements*** are identified and used

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	to plan the trimming and cutting activities
	2.3. Tree, location and stability are assessed for conditions likely to affect safety of trimming and cutting activities
	2.4. Tree is visually assessed for ***defects***
	2.5. ***Stresses*** within the tree are identified
	2.6. Trees unable to be cut safely are identified and referred to appropriate personnel
3. Plan cutting	3.1. Tree is moved or stabilised for safe cutting in line with site standards and regulations
	3.2. ***Cutting pattern*** is selected to optimise time and manageable removal of the sections
	3.3. Options for utilisation of product are identified
	3.4. ***Sequence of cuts*** is planned to maintain control of cut sections and minimise cutting problems
	3.5. Cut location is determined with consideration of tree stresses
4. Conduct trimming and cutting	4.1. ***Debris*** is cleared from the work area to prevent saw damage or injury in line with OHS requirements
	4.2. ***Pre start-up*** checks are carried out on equipment in line with site requirements
	4.3. Movement and whereabouts of other personnel is monitored and work is modified in line with OHS regulations
	4.4. Tree section on each side of planned cut is secured and potential movement is assessed and planned
	4.5. Chainsaw is operated to cut tree and limbs with ***cutting techniques*** adjusted in response to movement and condition of the tree/limbs
	4.6. Trimming and cutting is completed in line with OHS and job requirements
	4.7. Trimming and cutting ***records*** are prepared and problems reported to the appropriate personnel
5. Conduct equipment ***maintenance***	5.1. Equipment is inspected on completion of trimming and cutting activities
	5.2. Damaged saws and cutting attachments are identified for repair or replacement in line with

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements and manufacturer's recommendations
	5.3. Chain and other components are removed, cleaned, maintained, adjusted or replaced in line with manufacturer's recommendations
	5.4. Tools and equipment are maintained in line with OHS requirements and manufacturer's recommendations

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills

- Technical skills sufficient to select, use and maintain relevant equipment to safely trim and cut felled trees in a range of situations
- Ability to assess the implications related to identified stresses of the tree
- Communication skills sufficient to interact with colleagues and others
- Literacy skills sufficient to review and accurately identify work requirements and to locate, record and report information
- Numeracy skills sufficient to estimate and measure tolerances and minimum diameter, and calculate time to complete tasks
- Problem solving skills sufficient to identify problems, equipment faults and apply appropriate response procedures

Required knowledge

- Applicable Commonwealth, State or Territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for trimming and cutting felled trees
- Industry, organisational and site standards, requirements, policies and procedures for trimming and cutting felled trees
- Environmental protection requirements, including the safe disposal of waste material
- Characteristics of trees and types of timber defects that may affect cutting
- Cutting patterns, sequences and techniques
- Chainsaw operation, safety and maintenance procedures
- Risk assessment processes
- Problem identification and resolution strategies and common fault finding

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

techniques

- Types of tools and equipment and procedures for their use, operation and maintenance for trimming and cutting felled trees
- Procedures for reporting workplace records and information

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently trim and cut felled trees and conduct equipment maintenance within industry and organisational requirements
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements of this unit and include demonstration of: • following applicable Commonwealth, State or Territory legislative and regulatory requirements and codes of practice, including OHS and environmental, relevant to trimming and cutting felled trees • following industry and organisational policies and procedures relevant to trimming and cutting felled trees • effective communication and safe working practices • planning of trimming and cutting activities in line with site standards and regulations • trimming and cutting of felled trees in line with job requirements in a range of workplace situations • equipment maintenance
Context of and specific resources for assessment	• Competency is to be assessed in the workplace or realistically simulated workplace • Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

- Assessment of essential underpinning knowledge, other than confirmatory questions, will usually be conducted in an off-site context
- Assessment is to comply with relevant regulatory or Australian Standards requirements
- The following resources should be made available:
  - workplace location or simulated workplace
  - materials and equipment relevant to undertaking work applicable to this unit
  - specifications and work instructions

Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package
- Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of underpinning knowledge
- Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of employability skills
- Assessment methods must confirm the ability to access and correctly interpret and apply the essential underpinning knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS requirements: are to be in line with applicable Commonwealth, State or Territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing safety equipment
- first aid equipment
- fire fighting equipment
- communications equipment
- location of other workers
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe workplace practices including required actions relating to forest fire
- awareness of danger zone for kickback
- manual handling including shifting, lifting and carrying
- erection of warning signs
- potential falling objects
- procedures for cutting on slopes

Legislative requirements: are to be in line with applicable Commonwealth, State or Territory legislation, regulations, certification requirements and codes of practice and may include:

- Australian Standards
- OHS
- the environment
- equal opportunity
- relevant industry codes of practice

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• award and enterprise agreements • industrial relations • confidentiality and privacy • duty of care • heritage and traditional land owner issues
Organisational requirements may include:	• legal • organisational and site guidelines • policies and procedures relating to own role and responsibility • quality assurance • procedural manuals • quality and continuous improvement processes and standards • OHS • emergency and evacuation procedures • fire prevention procedures • recording and reporting requirements • equipment use and maintenance and storage requirements • environmental management requirements (waste disposal, recycling and re-use guidelines) • access and equity principles and practices
Trees may include:	• hardwood trees • softwood trees
Environmental protection measures may include:	• action to limit the impact of noise, wind speed and direction, fallen trees, ground slope, ground hazards and obstacles, general forest lean • action to limit the impact to ground growth, canopy, density of trees and may relate to: • soil and water protection • contingencies for modifying operations during wet or other adverse weather conditions • the safe disposal of waste material
Job requirements	refer to information and instructions relevant to trimming and cutting operations including: • size • length

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• quantity and grade • removal status
Appropriate personnel may include:	• supervisors • clients • colleagues • line management
Tools and equipment may include:	• chainsaws • Personal Protective Equipment (PPE) • maintenance tools • fuel and oil containers and ancillary equipment, which may include: • hammer • axe • wedges • cant hook or breaking bar • first aid kit • fire control equipment • tool belt • loggers tape • warning signs • chainsaw maintenance kit
Communication may include:	• verbal and non-verbal language • hand or other agreed signals • eye contact with other operators or personnel • use of electronic devices
Environmental requirements	may be assessed in relation to: • ground growth • ground slope • ground hazards and obstacles and may include environmental protection measures to: • limit the impact of noise, fumes in enclosed spaces, waste, fire, disposal of fuel and oil • limit the impact on flora, fauna and habitat
Defects may include:	• splits • falling damage • fire damage • infestation

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• pipe • shake • twist • branch/knot locations
Stresses may include:	• tension (fibres being stretched) • compression (fibres being squashed) • neutral fibres
Cutting pattern refers to:	• the best direction or angle for making a cut
Sequence of cuts refers to:	• the plan of cuts to optimise time and recovery of logs
Debris may include:	• stones • rocks • loose branches • other timber • woody material • any loose hazards underfoot or in escape path • any material underfoot or in the cutting area which may impinge on safe cutting procedures
Pre start-up checks may include:	• checking that equipment is suitable for task and has been set up correctly • checking that systems are performing accurately • checking equipment is operating to optimum performance
Cutting techniques may include:	• bridging cuts • swinging cuts • side bind cuts • delimbing • boring • wedge cuts • ripping cuts
Records may include:	• quality outcomes; hazards, incident reports, equipment malfunctions and damage and may be compiled using a computer-based system or another appropriate organisational communication system to record and report
Maintenance must include:	• sharpening and may include: • refuelling

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

- inspection, identification and replacement of bar, chain, drive sprockets
- bar oil checks and top up
- air filter check, clean and replacement
- cleaning of saw body, air intake vents and cooling fans
- fitting spare chain and tension chain

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to interpret road maps and navigate routes as part of transport operations. It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant state/territory roads and traffic authorities.

Work is performed under general or limited supervision. It involves the application of the basic map reading principles and procedures when interpreting street directories and road maps and following pre-determined routes as part of transport operations.

Licensing/Regulatory Information

Refer to Unit Descriptor

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify and determine the pre-planned route	1.1 Documentation on the pre-determined route is accessed and interpreted 1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed 1.3 Street directory , GPS and road map symbols are recognised and interpreted 1.4 Points of departure and destination are identified in a directory index and the information is used to locate designated places on the appropriate map 1.5 Directions for a pre-determined route are interpreted and the route is traced using a street directory, GPS and road map 1.6 Key intersections and other landmarks along the route are identified for use in following the planned route 1.7 Alternative routes are identified for possible contingency situations such as emergencies or traffic delays 1.8 Pre-determined route is correctly followed
2 Complete necessary documentation	2.1 Required route documentation is completed in accordance with purpose of transportation and with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant state and territory permit and licence regulations and requirements

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE AND SKILLS

- Operational procedures for interpreting road maps, using GPS devices and navigating routes
- Road conditions for various routes, including sections undergoing road works
- Height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- Traffic conditions at various times of the day along specific routes
- Security hazards and issues (where relevant)
- Current information on accidents or emergencies that might close or restrict traffic on a particular route
- Location of service stations/rest stops where relevant
- Typical problems that may arise concerning the interpretation of road maps, the use of GPS devices and the navigation of pre-determined routes, and appropriate action that should be taken
- Workplace requirements for recording and documenting route information

Required skills:

- Communicate effectively with others when interpreting road maps, using GPS devices and navigating pre-determined routes
- Read and interpret instructions, procedures, information and signs relevant to route navigation
- Identify and correctly use maps and other route documentation including: identification of town and suburb locations, identification of roads and intersections, reading and interpretation of map symbols, and estimation of route distances using map information
- Where applicable, use GPS devices to navigate pre-determined routes
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to route navigation
- Operate electronic communication equipment to required protocol
- Where applicable work collaboratively with others (such as fleet managers, sales team etc.) when interpreting road maps, using GPS devices and navigating pre-determined routes
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when interpreting road maps, using GPS devices and navigating pre-determined routes in accordance with workplace procedures
- Plan for alternative routes in the event of contingencies such as road works, emergencies or delays
- Plan own work including predicting consequences and identifying improvements
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments

© Commonwealth of Australia, 2025 Public Skills Australia

Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
	  • applying the underpinning knowledge and skills
	  • applying relevant legislation and workplace procedures
	  • plotting a route from one destination to another relevant to the job role
	  • demonstrating the ability to navigate a pre-determined route

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• As a minimum, assessment of knowledge must be

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

	conducted through appropriate assessments using written/practical/oral assessments
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment, and/or
	  • in an appropriate range of situations in the workplace
	• A simulator/online assessment is not suitable for the final assessment of this unit of competency

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

This unit covers:	• work of transport and distribution personnel involved in the delivery of a range of possible goods and materials including valuables, secured products and documents and materials
Operations may be conducted:	• in a range of work environments and weather conditions • by day or night
Customers may be:	• internal or external
Routes will be pre-determined but may include:	• alternative routes to accommodate contingency situations
Map areas may include:	• metropolitan areas • country and regional areas • interstate locations
Depending on the type of transport service being provided, consultative processes may involve:	• clients • other employees and supervisors • management • other professional or technical staff • private security personnel • public sector security personnel • police and other emergency services • security consultants
Communication in the work area may include:	• mobile and fixed phones • radio

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• oral, aural or signed communications • company procedures • enterprise procedures • organisational procedures • established procedures
Information/documents may include:	• workplace procedures and policies • route specifications • maps and street directories • published information on route hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route • competency standards and training materials • supplier and/or client route documentation • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• relevant state/territory road rules and traffic acts • regulations and codes related to the transport of dangerous goods, explosives and hazardous materials

HLTFA301C Apply first aid

Modification History

Not Applicable

Unit Descriptor

Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess the situation	1.1 Identify assess and minimise *hazards* in the situation that may pose a risk of injury or illness to self and others 1.2 Minimise immediate *risk* to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements 1.3 Assess casualty and identify injuries, illnesses and conditions
2. Apply first aid procedures	2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness 2.2 Use available *resources and equipment* to make the casualty as comfortable as possible

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner
	2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort
	2.5 Seek consent from casualty prior to applying first aid management
	2.6 Provide *first aid management* in accordance with *established first aid principles* and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements
	2.7 Seek first aid assistance from others in a timely manner and as appropriate
	2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures
	2.9 Use safe manual handling techniques as required
	2.10 Monitor *casualty's condition* and respond in accordance with effective first aid principles and procedures
	2.11 Finalise casualty management according to casualty's needs and first aid principles
3. Communicate details of the incident	3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant *communication media and equipment*
	3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
	3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
	3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
	3.5 Maintain confidentiality of records and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	information in line with privacy principles and statutory and/or organisation policies
4. Evaluate own performance	4.1 Seek feedback from *appropriate clinical expert*
	4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents
	4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- ARC Guidelines relating to provision of first aid as outlined
- Awareness of stress management techniques and available support
- First aid management of:
  - abdominal injuries
  - allergic reactions
  - altered and loss of consciousness
  - bleeding
  - burns - thermal, chemical, friction, electrical
  - cardiac arrest
  - casualty with no signs of life
  - chest pain
  - choking/airway obstruction
  - injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries;

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
  - envenomation - snake, spider, insect and marine bites
  - environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
  - fractures
  - medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
  - near drowning
  - poisoning and toxic substances (including chemical contamination)
  - respiratory distress
  - seizures
  - shock
  - stroke
  - substance misuse - common drugs and alcohol, including illicit drugs
- Social/legal issues:
  - duty of care
  - need to be culturally aware, sensitive and respectful
  - importance of debriefing
  - confidentiality
  - own skills and limitations
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

continued ...

Essential knowledge (*contd*):

- Working knowledge of:
  - basic occupational health and safety requirements in the provision of first aid
  - basic principles and concepts underlying the practice of first aid
  - chain of survival
  - first aiders' skills and limitations
  - infection control principles and procedures, including use of standard precautions
  - priorities of management in first aid when dealing with life threatening conditions
  - procedures for dealing with major and minor injury and illness

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

This includes the ability to:

- Administer medication in line with state/territory regulations, legislation and policies
- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition
- Communicate effectively and assertively in an incident
- Conduct an initial casualty assessment
- Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit *HLTCPR201A Perform CPR*)
- Demonstrate:
  - ability to call an ambulance
  - consideration of the welfare of the casualty
  - safe manual handling
  - site management to prevent further injury
- Evaluate own response and identify appropriate improvements where required
- Follow OH&S guidelines
- Infection control, including use of standard precautions
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions
- Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:

- Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge
- For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:	• Focus on first aid management of specific types of injury • First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
Established first aid principles include:	• Preserve life • Prevent illness, injury and condition(s) becoming worse • Promote recovery • Protect the unconscious casualty
Vital signs include:	• Consciousness • Breathing • Circulation
A hazard is:	• A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Hazards may include:

- Physical hazards
- Biological hazards
- Chemical hazards
- Hazards associated with manual handling

Risks may include:

- Risks from equipment, machinery and substances
- Risks from first aid equipment
- Environmental risks
- Exposure to blood and other body substances
- Risk of further injury to the casualty
- Risks associated with the proximity of other workers and bystanders
- Risks from vehicles

Casualty's condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions
- Altered and loss of consciousness
- Bleeding
- Burns - thermal, chemical, friction, electrical
- Chest pain/cardiac arrest
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations
- Near drowning
- Envenomation - snake, spider, insect and marine bites
- Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke
- Fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- No signs of life
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress/arrest
- Seizures
- Shock
- Stroke

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

	• Substance misuse - common drugs and alcohol, including illicit drugs.

First aid management must take into account applicable aspects of:	• The setting in which first aid is provided, including:
	  • workplace policies and procedures
	  • industry/site specific regulations, codes etc.
	  • OHS requirements
	  • state and territory workplace health and safety legislative requirements
	  • location and nature of the incident
	  • situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
	  • location of emergency services personnel.
	• The use and availability of first aid equipment and resources
	• Infection control
	• Legal and social responsibilities of first aider

Resources and equipment are used appropriate to the risk to be met and may include:	• AED • First aid kit • Auto-injector • Puffer/inhaler • Resuscitation mask or barrier • Spacer device
Communication media and equipment may include but are not limited to:	• Telephones, including landline, mobile and satellite phones • HF/VHF radio • Flags • Flares • Two way radio • Email • Electronic equipment • Hand signals
Appropriate clinical expert may	• Supervisor/manager • Ambulance officer/paramedic

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

include:	• Other medical/health worker
Documentation may include:	• Injury report forms • Workplace documents as per organisation requirements

Documentation may include recording:	• Time
	• Location
	• Description of injury
	• First aid management
	• Fluid intake/output, including fluid loss via:
	  • blood
	  • vomit
	  • faeces
	  • urine
	• Administration of medication including:
	  • time
	  • date
	  • person administering
	  • dose
	• Vital signs

TDMMR4307B ASSIST IN MOORING AND ANCHOR HANDLING ACTIVITIES

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required of an Integrated Rating to assist the responsible officer in a range of mooring and anchor handling activities as required of an Integrated Rating, including preparing for arrival or departure from an anchorage or mooring, handling mooring lines, carrying out stoppering and heaving line tasks, anchor operations, securing a vessel to a sea buoy, and securing a tug using either tug's or vessel's lines.**

Application of the Unit

Application of the unit	The unit has application in the qualification for an Integrated Rating, i.e. Certificate III in Transport&Distribution(Maritime Operations - Integrated Rating).

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant sections of STCW 95 and Marine Orders under the Australian Navigation Act 1912, describing the specific requirements for Integrated Ratings.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Public Skills Australia

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Carry out mooring and anchor handling tasks	a Tasks required of an integrated rating in preparation for arrival and departure from an anchorage or mooring are completed in accordance with shipboard procedures b Mooring line handling, stoppering and heaving line tasks are performed in accordance with shipboard procedures c Mooring and unmooring operations are carried out as per established procedures d Anchor operations are carried out in accordance with shipboard procedures e Vessel is secured to a sea buoy in accordance with shipboard procedures f A tug is secured using tug's or vessel's lines as per shipboard procedures g Communications during mooring and anchor handling operations are clear and timely and involve the correct use of communications equipment where required
2 Follow safety and hazard control procedures	a All required safety precautions and regulations are followed when carrying out routine mooring and anchor handling tasks b Operational hazards are identified and action is taken in conjunction with the officers, engineers and other team members to minimise or eliminate risk to personnel, vessel and

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	the environment

ELEMENT	PERFORMANCE CRITERIA
2 Follow safety and hazard control procedures (**continued**)	c Shipboard emergency and contingency plans are followed in the event of a failure or emergency associated with mooring and anchor handling equipment and machinery and associated systems

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Applicable sections of relevant maritime regulations

2 Relevant OH&S and pollution control legislation and policies

3 Mooring and anchor handling procedures on board a vessel

4 Functions and responsibilities of the members of the bridge and engine room teams on board a vessel

5 Procedures for carrying out the routine tasks required of an integrated rating when a vessel is arriving at or departing from a berth or anchorage

6 Types, features and characteristics of fibre and wire ropes

7 Hazards and related safety precautions when carrying out mooring and anchor handling activities

8 Signs of fatigue

9 Fatigue management principles and techniques

10 Communication techniques and equipment used during mooring and anchor handling operations

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal and other communication skills required when assisting in mooring and anchor handling activities

2 Read, interpret and apply basic instructions and standard operating procedures relevant to mooring and anchor handling activities

3 Work safely and collaboratively with others when assisting in mooring and anchor handling activities

4 Select and safely use tools and equipment as per operating instructions

5 Recognise problems that may occur during mooring and anchor handling activities and take appropriate action

6 Store lines, tools and equipment after use as per standard operating procedures

7 Adapt to differences in vessels, port facilities, equipment and standard operating procedures

8 Follow required work schedule as per company requirements

Evidence Guide

Evidence Guide **TDMMR4307B ASSIST IN MOORING AND ANCHOR HANDLING ACTIVITIES**

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in	Assessment must confirm appropriate knowledge and skills to: a Carry out mooring and anchor handling tasks b Ensure the exercise of all required safety, environmental and hazard control precautions and procedures during mooring

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

TDMMR4307B ASSIST IN MOORING AND ANCHOR HANDLING ACTIVITIES

this unit	and anchor handling activities c Communicate effectively with others during mooring and anchor handling activities
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 carrying out mooring and anchor handling tasks 2 exercising all required safety, environmental and hazard control precautions and procedures during mooring and anchor handling tasks 3 communicating effectively with others during routine shipboard tasks c Shows evidence of application of relevant workplace procedures, including: 1 ISM Code and associated vessel's safety management system and procedures 2 OH&S regulations and hazard prevention policies and procedures 3 job procedures and work instructions related to mooring and anchor handling activities 4 following housekeeping processes d Action is taken promptly to report operational incidents and problems in accordance with regulations and shipboard procedures e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and

TDMMF6207A PREVENT, CONTROL AND FIGHT FIRES ON BOARD AN OCEAN-GOING VESSEL

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR:

This unit involves the basic skills and knowledge required to prevent, fight and extinguish fires on board an ocean-going commercial vessel.

This unit incorporates the content of the previous two units *TDMMF901A Fight and extinguish fires* and *TDMMF1201A Minimise the risk of fire and maintain a state of readiness to respond to emergency situations involving fire* as the content applied to ocean-going vessels. It aligns with the AMSA approved course: *SC002 - Fire Prevention and Firefighting*.

Application of the Unit

Application of the unit	The unit covers requirements for the management of firefighting and prevention activities on ocean-going vessels and has applications in qualifications for masters, engineers, watchkeepers and integrated ratings, i.e. Advanced Diploma of Transport&Distribution (Maritime Operations - Master Unlimited), Diploma and of Transport&Distribution (Maritime Operations - Deck Watchkeeper), Advanced Diploma of Transport&Distribution (Marine Engineering Class 1), Advanced Diploma of Transport&Distribution (Marine Engineering Class 2), Diploma of Transport&Distribution (Marine Engineering - Engineer Watchkeeper), Certificate III in Transport&Distribution (Maritime Operations - Integrated Rating).

© Commonwealth of Australia, 2025 Public Skills Australia

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for basic fire prevention and firefighting skills and knowledge of crew on ocean-going vessels. This includes applicable sections of STCW 95 and AMSA certification and regulatory requirements under Marine Orders Part 3, Seagoing Qualifications, Issue 6.

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Carry out fire minimisation procedures	a Fire hazards on board vessel are identified and action is taken to eliminate or minimise them b Responsibilities for checking fire prevention equipment and systems are fulfilled and appropriate action is taken to ensure that they are operational c An awareness and understanding of the causes of fire and its minimisation is maintained through participation in fire drills and related instructional programs d A state of readiness to respond to fire emergencies is

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	maintained at all times

ELEMENT	PERFORMANCE CRITERIA
1 Carry out fire minimisation procedures (**continued**)	e Where applicable, correct techniques are applied for the setting up of foam making equipment to extinguish B Class fires on board a vessel
2 Respond to emergency situations involving fire	a Emergency situations involving fire are correctly identified in accordance with established nautical practice b Type of fire is identified in accordance with the established classification system for fires c Initial action on becoming aware of fire emergency is in conformity with established practices and procedures d Action taken is timely and appropriate for seriousness of the fire emergency e Action taken on identifying muster signals for a fire emergency is appropriate and complies with established procedures f Appropriate precautions and procedures are implemented when responding to electrical fires g Appropriate precautions and procedures are implemented when responding to uptake and hydrogen fires h Communications are clear and concise at all times and orders are acknowledged in a timely and seamanlike manner
3 Operate firefighting	a A, B and C classes of fires are correctly identified as per established firefighting practice

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
equipment	b Correct portable firefighting equipment is selected and used to fight specific classes of fires c Correct techniques are applied for the use of hose lines to extinguish fires on board a vessel d Class F fires are correctly extinguished with a fire blanket as per established firefighting practice
4 Recharge portable fire extinguishers	a Where applicable, correct techniques are used to recharge the various types of portable fire extinguisher b Portable firefighting equipment is confirmed as operational following recharging

ELEMENT	PERFORMANCE CRITERIA
5 Carry out firefighting operations	a Correct procedures and techniques are followed when fighting fires in simulated or real fire emergencies b Safety clothing, appliances and equipment are appropriate to the nature of the firefighting operations c Extinguishment of a fire is achieved using appropriate procedures, techniques, equipment and firefighting agents d Correct portable fire extinguisher(s) are selected and used for the class of fire involved in a fire emergency e Appropriate safety precautions and procedures are applied when fighting fires in accordance with regulatory requirements, vessel's procedures and established firefighting practice f The timing and sequence of individual actions when fighting fires on board a vessel are appropriate to the prevailing circumstances and conditions

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	g Procedures for donning and starting up self-contained breathing apparatus (SCBA) are correctly followed
	h Procedures for the logging of SCBA operators on a BA Control Board are correctly followed in accordance with vessel's procedures and accepted firefighting practice
	i Search and rescue operations in a smoke filled environment are correctly conducted as a member of a firefighting team in accordance with accepted firefighting practice
	j Interior fires are extinguished using appropriate firefighting equipment and procedures as a member of a firefighting team in accordance with accepted firefighting practice
	k Lifeline signals are correctly used during interior firefighting operations
	l A compartment filled with high expansion foam is correctly entered as per accepted firefighting practice

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant sections of maritime regulations applicable to fire prevention and firefighting on board a vessel

2 ISM Code and associated vessel's safety management system and procedures, where relevant

3 Duties and responsibilities as a member of the emergency response organisation on a vessel

4 The chemistry of fire and its relationship to materials typically carried on vessels, including:

   a elements of fire and their relationship to the fire triangle

   b dangers associated with fuels having a low flashpoint

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

c dangers associated with the heating of fuels to their self-ignition temperature

d situations where spontaneous combustion may occur

e importance of ensuring that fuels are outside their range of flammability

f safety precautions that should be adopted when using fuels with a high vapour density

g risks associated with finely divided fuels

5 Principles underlying the spread of fire and its extinguishment

6 Fire hazards and risks found on board vessels

7 The different classes of fire, their characteristics and equipment needed for their extinguishment

8 Firefighting techniques, agents and precautions applicable to different classes of fire on board a vessel

9 Principles and procedures for the use of self-contained breathing apparatus (SCBA) when fighting fires

10 Firefighting clothing, outfits and personal safety equipment used when fighting a fire on board a vessel

11 Types firefighting appliances, equipment and systems used on board vessels, their features, principles of operation and the procedures for their use and maintenance

12 Fixed fire prevention and extinguishing installations used on vessels and their principles of operation

13 Relevant features of portable firefighting equipment and procedures for their use, including:

a The colour coding of portable fire extinguishers

b The processes for the extinguishment of A. B, or C Class fires using portable fire extinguishers

c Extinguishing an F Class fire with a fire blanket is demonstrated

d The recharging of portable fire extinguishers (where applicable)

e The use of hose lines to extinguish fires

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

f The setting up of foam making equipment to extinguish B Class fires

14 Procedures for interior search and rescue and firefighting operations as a member of a team, including:

a The donning and start up procedures of SCBA

b Procedures for search and rescue operations in a smoke filled space

c Procedures for interior fire extinguishing operations

d Procedures for the logging of SCBA operators on a BA control board

e After use maintenance of SCBA

f Lifeline signals

g Procedures for entering a compartment filled with high expansion foam without wearing SCBA

15 The importance of testing and evaluating emergency procedures

16 Typical problems that can occur with shipboard firefighting equipment and operations and appropriate remedial action and solutions

17 Sources of information on shipboard fire prevention and extinguishment

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with other crew and passengers during simulated and real fire emergencies

2 Read, interpret and follow instructions on fire emergency procedures and on the use of fire prevention and firefighting equipment

3 Recognise and interpret fire alarms and respond as per emergency procedures

4 Work collaboratively with other shipboard personnel and passengers during a fire emergency

5 Determine the type and extent of a fire and take appropriate action

© Commonwealth of Australia, 2025 Public Skills Australia

a The donning and start up procedures of SCBA

6 Participate as a member standard shipboard firefighting organisation on a vessel

7 Identify and use fixed fire detection and extinguishing systems as per operating instructions

8 Use portable fire extinguishers as per operating instructions

9 Recharge portable fire extinguishers as per instructions (where applicable)

10 Adapt to contingencies and variations in fire prevention and firefighting equipment

11 Recognise fire hazards on a vessel and take appropriate action to report them and minimise them

Evidence Guide

Evidence Guide

TDMMF6207A PREVENT, CONTROL AND FIGHT FIRES ON BOARD AN OCEAN-GOING VESSEL

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Implement fire prevention and minimisation measures and procedures on board a vessel b Recognise fire hazards on board vessel and take appropriate action to eliminate or minimise them c Assess the operational capability of fire detection and firefighting equipment and systems and initiate any required maintenance or replenishment action d Respond to emergency situations involving fire e Participate in simulated on-board firefighting activities

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

TDMMF6207A PREVENT, CONTROL AND FIGHT FIRES ON BOARD AN OCEAN-GOING VESSEL

	f Participate in search and rescue and firefighting teams g Implement OH&S principles and policies when carrying out firefighting duties h Communicate effectively with others as required during fire emergencies
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 responding to emergency situations involving fire 2 participating in simulated on-board firefighting activities 3 implementing the implementation of fire prevention measures and procedures 4 identifying and evaluating firefighting problems and determining appropriate courses of action 5 participating as a member of an interior search and rescue and firefighting team on board a vessel 6 assessing the operational capability of firefighting appliances, equipment and systems and taking any required maintenance or replenishment action c Shows evidence of application of relevant workplace procedures, including: 1 relevant maritime regulations related to the prevention and fighting of fires on board a vessel 2 ISM Code safety management system procedures, where applicable

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide (continued)

TDMMF6207A PREVENT, CONTROL AND FIGHT FIRES ON BOARD AN OCEAN-GOING VESSEL

2	**Evidence required for demonstration of consistent performance** (**continued**)	3 OH&S regulations and hazard prevention policies and procedures 4 relevant manufacturer's guidelines relating to the use of fire detection and firefighting equipment and systems 5 following on-board housekeeping processes and fire prevention measures 6 fire prevention and firefighting procedures and policies d Action is taken promptly to report and respond to fire emergencies, fire hazards and faulty fire detection and firefighting equipment and systems in accordance with established procedures e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others
3	**Context of assessment**	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4	**Specific**	Access is required to opportunities to:

TDMMF5607A OBSERVE PERSONAL SAFETY AND SOCIAL RESPONSIBILITIES

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR:

This unit involves the basic skills and knowledge required to fulfil personal safety and social responsibilities on board a commercial ocean-going vessel. **This includes following and applying established maritime safe working practices and procedures and hazard control strategies**, **communicating and interacting effectively with others in the course of shipboard duties**, **performing allocated duties**, **observing of expected standards of work and behaviour and following established emergency response procedures**.

This unit incorporates the content of the previous four units *TDMMF701B Observe safe working practices'*, *'TDMML201A Contribute to effective human relationships on board a vessel*, *TDMME101A Understand orders and be understood in relation to shipboard duties* and *TDMMF801B Comply with emergency procedures* as it applies to ocean-going vessels. **It aligns with the AMSA approved course**: ***SC004 Personal Safety and Social Responsibilities***

Application of the Unit

Application of the unit	The unit covers mandatory requirements in basic personal safety and social responsibilities, including emergency procedures on ocean-going vessels and has applications in qualifications for Integrated Ratings, Watchkeeper, Master (Less than 500 GT) and Master (Unlimited), Engineer Watchkeepers and Chief Engineers, i.e. Certificate III in Transport&Distribution(Maritime Operations - Integrated Rating), Diploma of Transport&Distribution(Maritime Operations - Deck Watchkeeper), Advanced Diploma of Transport&Distribution(Maritime Operations - Master Unlimited), Diploma of Transport&Distribution(Marine Engineering - Engineer Watchkeeper), Advanced Diploma of

© Commonwealth of Australia, 2025 Public Skills Australia

	Transport&Distribution(Marine Engineering Class 1). Advanced Diploma of Transport&Distribution(Marine Engineering Class 2).

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for basic personal safety and social responsibilities, including emergency procedures on ocean-going vessels. This includes applicable sections of STCW 95 and AMSA certification and regulatory requirements under Marine Orders Part 3, Seagoing Qualifications, Issue 6.

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide*.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
• • **Follow workplace procedures for hazard identification and**	a Safety regulations and established vessel's safety and hazard control practices and procedures are obtained, interpreted and applied to work activities b Workplace procedures for OH&S and related work instructions for controlling risks on board a vessel are

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
risk control •	accurately followed

ELEMENT	PERFORMANCE CRITERIA
• • **Follow workplace procedures for hazard identification and risk control** (**continued**) •	c Workplace procedures for dealing with shipboard accidents, fire and emergencies are interpreted and followed d Hazards in the workplace are identified and appropriate action is taken to report them and to minimise or eliminate risk to personnel, vessel and the environment e Where relevant, procedures and precautions necessary for entry into a pump room, fuel tanks or other confined spaces on a vessel are correctly followed f Personal protective clothing and equipment is correctly used as per established shipboard safety practices and procedures
• • **Contribute to arrangements for the management of OH&S**	a OH&S issues and identified safety hazards are raised with designated personnel b A contribution is made to participative arrangements for OH&S management in the workplace within limits of personal responsibilities c OH&S issues are raised with designated personnel.
• • **Complete OH&S records**	a OH&S records for self are correctly completed b Legal requirements for the maintenance of records of occupational injury and diseases are followed
4 Contribute to	a Personal responsibilities on board a vessel are fulfilled

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA	
the effective human relationships	b	A effective contribution is made to the achievement of a harmonious working environment on board a vessel
	c	Assistance and encouragement are provided to others in workplace activities
	d	A contribution is made to the resolution of conflicts by participating in mediation and negotiations fairly, honestly and effectively
	e	Appropriate action is taken to avoid and prevent harassment of others and to respect the religious and cultural habits of other crew members
	f	Appropriate standards of hygiene and cleanliness are maintained to the standards required when living in a shipboard community
	g	Credit for achievements is appropriately shared with others in the crew
	h	Appropriate precautions are taken to avoid contributing to the spread of AIDS and other communicable diseases
	i	A good example is provided to others of a responsible, fair, sympathetic, equitable and diligent member of the shipboard team

ELEMENT	PERFORMANCE CRITERIA	
• • **Observe standards of work and behaviour**	a	Work is carried out as per established performance standards
	b	Feedback on assessed work performance is acknowledged and acted upon
	c	Personal skills and knowledge are developed through on-board training and other means to ensure an effective contribution to shipboard work activities
	d	Employment conditions are known, interpreted and followed

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	e Individual rights and responsibilities on board a vessel are interpreted and fulfilled f Drug and alcohol abuse on board vessel is avoided g Appropriate precautions are taken to prevent pollution of the marine environment
• • **Communicate with officers, crew and others**	a Orders are attended to, interpreted and implemented b Effective listening skills are demonstrated c Questions are used to gain additional information d Verbal and written communication with others in the performance of duties is clear and precise and uses the standard nautical vocabulary e Misunderstandings in communications are avoided using appropriate confirmation techniques and established practice f Appropriate techniques are used when communicating with others in multilingual crew to ensure that communication is effective and messages are clearly understood g Various forms of non-verbal communication are appropriately used when working and communicating with others in the course of shipboard duties
• • **Participate in work group discussions** •	a Responses are sought and provided to others in the group b Constructive contributions are made in terms of the process involved c Goals and outcomes are communicated and recorded
• • **Follow established**	a Emergency situations are correctly recognised and identified b Correct action is taken on discovery of an actual or potential

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA	
emergency procedures		emergency
	c	Information given on raising alarm is prompt, accurate, complete and clear

ELEMENT	PERFORMANCE CRITERIA	
• • • • **Follow established emergency procedures** • (**continued**)	d	Vessel's contingency plans for emergency response are interpreted and implemented in real and simulated emergency situations
	e	Escape routes and internal and eternal communications and alarm systems are correctly used in real and simulated emergency situations
	f	Emergency communications and alarm signals and systems are recognised and interpreted and required action implemented
	g	Planned damage control procedures for dealing with damage to the vessel and its hull are implemented
• • **Follow basic procedures for the use of lifesaving appliances**	a	Participation in lifesaving drills confirms readiness to correctly carry out lifesaving procedures and use lifesaving appliances
	b	Basic procedures for the use of various shipboard lifesaving appliances are followed as per regulatory requirements, manufacturer's instructions and company requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant sections of applicable maritime regulations

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

2 ISM Code and other safety management system procedures

3 The provisions of OH&S Acts, regulations and codes of practice relevant to vessel operations

4 The ways in which OH&S is managed on the vessel, for example:

- a policies
- b procedures
- c plant and equipment operation and maintenance
- d hazard identification
- e risk assessment and control
- f OH&S instruction and training
- g provision of OH&S information

5 Hazards and causes of shipboard accidents

6 The preferred order of ways to control risks on a vessel (known as the hierarchy of control);

7 Procedures with respect to entry into an enclosed space

8 Workplace OH&S procedures relevant to the work being undertaken, including procedures for:

- a recognising and reporting on hazards, for example, work area inspections
- b work operations to control risks, for example, permit to work systems and isolation procedures
- c responding to accidents, fires and emergencies
- d raising OH&S issues
- e employee participation in OH&S management, for example, consultative or OH&S committees and joint employer/employee inspections

9 Designated personnel responsible for OH&S on board a vessel

10 The meaning of OH&S symbols found on signs and labels on board a vessel

11 Regulatory requirements for shipboard emergency drills and musters

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

12 Types of emergency situations that may occur on a vessel and required individual and crew response when various actual or potential emergency situations are identified

13 Emergency alarm signals and systems in use on vessels and procedures to be followed when an emergency alarm is raised

14 Emergency and personal safety and survival equipment available on a vessel and procedures for their use

15 Escape routes and internal and external communications systems and alarms on board a vessel

16 Potential sources of marine pollution by a vessel

17 Effects of various types of pollution of the marine environment

18 Procedures and processes for disposal of operational wastes on a vessel

19 Precautions and procedures to prevent accidental pollution during vessel operations

20 Anti-discrimination and harassment policies and regulations

21 Personnel responsibilities, obligations and entitlements as per relevant industrial relations requirements

22 Instructions, standards and procedures for social behaviour, shipboard work and emergency situations

23 Principles of effective social interaction and teamwork on board a vessel

24 Conflict resolution and mediation strategies and techniques used on board a vessel

25 Appropriate standards of hygiene and cleanliness required when living in an on-board community

26 The dangers of drug and alcohol abuse on board ship

27 The dangers of AIDS and other venereal diseases

28 Basic written, verbal and non-verbal communication practices, protocols and procedures for communicating with others on board a vessel

© Commonwealth of Australia, 2025 Public Skills Australia

Procedures and processes for disposal of operational wastes on a vessel

18

29 Standard nautical vocabulary as per the 'IMO Standard Marine Communication Phrases' publication

30 Techniques for communicating effectively with other members of a multilingual crew

31 Barriers to effective communication and how to overcome them

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Receive and interpret oral and written orders and instructions

2 Interpret and apply established communication practices, including standard marine terms and phrases

3 Interpret and follow operational and emergency procedures and instructions

4 Recognise and interpret non-verbal communications

5 Communicate with multilingual crew where applicable using established techniques

6 Work and interact safely and collaboratively with others in the course of work activities

7 Contribute to effective human relationships on board a vessel

8 Respond appropriately to shipboard emergency situations

9 Contribute to the resolution of any interpersonal conflict

10 Recognise safety problems and hazards that may occur on a vessel and take appropriate action

11 Practise the required standards of hygiene and cleanliness required when living in an on-board community

12 Take action to avoid discrimination and harassment and report any identified incidents in accordance with policies and regulations

13 Identify interpersonal relationship problems that may arise during operations on a

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS

vessel and take appropriate action to resolve problems identified

14 Take appropriate precautions to prevent pollution of the marine environment

15 Use emergency and personal safety and survival equipment

16 Select and use appropriate communications equipment if required

Evidence Guide

Evidence Guide

TDMMF5607A OBSERVE PERSONAL SAFETY AND SOCIAL RESPONSIBILITIES

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Respond to shipboard emergency situations b Take precautions to prevent pollution of the marine environment c Observe safe working practices d Communicate with other members of the vessel's crew e Contribute to effective human relationships on board a vessel
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 responding to shipboard emergency situations 2 taking precautions to prevent pollution of the marine

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

TDMMF5607A OBSERVE PERSONAL SAFETY AND SOCIAL RESPONSIBILITIES

environment

3 observing safe working practices

4 communicating with other members of the vessel's crew

5 contributing to effective human relationships on board a vessel

c Shows evidence of application of relevant workplace procedures, including:

1 ISM Code and associated vessel's safety management system and procedures

2 OH&S legislation and regulations and hazard prevention policies and procedures

3 operational and emergency procedures

4 standards for social behaviour and shipboard work

5 on-board housekeeping processes

6 waste, pollution and recycling management processes

d Action is taken promptly to report and/or rectify hazards, emergencies, safety risks, and interpersonal incidents and problems as per established procedures

e Work is completed systematically with required attention to detail

f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others

Evidence Guide (**continued**)

TDMMF5607A OBSERVE PERSONAL SAFETY AND SOCIAL RESPONSIBILITIES

Context of	a Assessment of competency must comply with the assessment

Range Statement

TDMMF5607A OBSERVE PERSONAL SAFETY AND SOCIAL RESPONSIBILITIES

1. GENERAL CONTEXT

a. Work must be carried out:	1	in compliance with the relevant maritime and OH&S regulations
b. Work is performed:	1	either individually or in a team environment with some accountability for the safety of self and others
c. Work involves:	1	the application of known and established regulations, practices and procedures to react in an appropriate manner during a shipboard emergency, to act appropriately with respect to personal and crew safety, and to be able to maintain good relations with others in a shipboard environment

2. WORKSITE ENVIRONMENT

a Vessel may include:	1	any Australian or international commercial vessel
b Work may be conducted:	1	in enclosed spaces, exposed conditions and controlled or open environment
c Safe working practices and hazard control strategies must be applied at all times, including:	1	by day or night in both normal and emergency situations
	2	under any permissible conditions of weather and loading
	3	while underway
	4	during berthing and unberthing operations
	5	while anchoring or mooring

TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the basic skills and knowledge required to prevent, fight and extinguish fires on board a commercial coastal vessel, including taking action to minimise the risk of fire, maintaining a state of readiness to respond to fire emergencies, operating portable firefighting equipment, and carrying out firefighting operations.** **This unit incorporates the content of the previous units *TDMMF5302A Fight and extinguish fires on board a commercial vessel* and *TDMMF1201A Minimise the risk of fire and maintain a state of readiness to respond to emergency situations involving fire*, as it applies to coastal vessels.**

Application of the Unit

Application of the unit	The unit covers mandatory requirements in basic firefighting skills on coastal vessels and has applications in qualifications for Coxswain, Master 5, Master 4, Skipper 3, Skipper 2, Marine Engine Drivers 1, 2 and 3 and Marine Engineer Grade 3, i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain), Certificate III in Transport&Distribution (Coastal Maritime Operations - Master Class 5), Certificate IV in Transport&Distribution (Coastal Maritime Operations - Master Class 4), Certificate II in Transport&Distribution (Marine Engine Driving - Grade 3), Certificate III in Transport&Distribution (Marine Engine Driving - Grade 2), Certificate IV in Transport&Distribution (Marine Engine Driving - Grade 1), Diploma of Transport&Distribution (Coastal Marine Engineering - Class 3).

© Commonwealth of Australia, 2025 Public Skills Australia

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for basic fire prevention and firefighting on coastal vessels. This includes applicable sections of the National Standard for Commercial Vessels and State/Territory Maritime licensing and regulatory requirements.

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide*.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Carry out fire minimisation procedures	a Fire hazards on board vessel are identified and action is taken to eliminate or minimise them b Responsibilities for checking fire prevention equipment and systems are fulfilled and appropriate action is taken to ensure that they are operational c A state of readiness to respond to fire emergencies is maintained at all times

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
2 Respond to emergency situations involving fire	a Emergency situations involving fire are correctly identified b Type of fire is identified as per the established classification system for fires c Initial action on becoming aware of fire emergency is in conformity with established practices and procedures d Action taken is timely and appropriate for seriousness of the fire emergency e Action taken on identifying muster signals for a fire emergency is appropriate and complies with established procedures f Appropriate precautions and procedures are implemented when responding to fires involving electricity g Communications are clear and concise at all times and instructions are acknowledged in a timely manner
3 Operate portable firefighting equipment	a Classes of fires are correctly identified in accordance with accepted firefighting practice b Correct portable firefighting equipment is selected and used to fight specific classes of fires c Fires are correctly extinguished with a fire blanket in accordance with accepted firefighting practice d Correct techniques are applied for the use of hose lines to extinguish fires on board a vessel
4 Carry out firefighting operations	a Correct procedures and techniques are followed when fighting fires in simulated or real fire emergencies b Safety clothing, appliances and equipment are appropriate to the nature of the firefighting operations

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	c Extinguishment of a fire is achieved using appropriate procedures, techniques, equipment and firefighting agents d Correct portable fire extinguisher(s) are selected and used for the class of fire involved in a fire emergency e Appropriate safety precautions and procedures are applied when fighting fires in accordance with regulatory requirements, vessel's procedures and established firefighting practice

ELEMENT	PERFORMANCE CRITERIA
4 Carry out firefighting operations (**continued**)	f The timing and sequence of individual actions when fighting fires on board a vessel are appropriate to the prevailing circumstances and conditions g Upper deck and below deck fires are extinguished using appropriate firefighting equipment and procedures as a member of a firefighting team in accordance with accepted firefighting practice h Lifelines are correctly used during interior firefighting operations i Correct procedures are followed when operating fixed fire detection and extinguishing systems in machinery spaces k Emergency fuels and ventilation shut-offs are operated correctly l Boundary cooling techniques are followed m Fixed fire extinguisher systems are operated and tested correctly

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant maritime regulations concerning basic fire prevention and firefighting on board a coastal vessel

2 The chemistry of fire and its relationship to materials typically carried on coastal vessels

3 Principles underlying the spread of fire and its extinguishment, including

- a the elements of fire and explosion (the fire triangle)
- b types and sources of ignition
- c flammable materials and fire hazards
- d factors that influence the spread of fire

4 The importance of constant vigilance in fire prevention and minimisation

5 Principles underlying the spread of fire and its extinguishment

6 The different classes of fire, their characteristics and strategies and equipment needed for their extinguishment

7 Firefighting clothing, outfits and personal safety equipment used when fighting a fire on board a coastal vessel

8 Types of fire detection, firefighting appliances, equipment and systems and emergency shut-offs used on coastal vessels, their features, principles of operation and the procedures for their use and maintenance

9 Fixed fire prevention and extinguishing installations used on coastal vessels and their principles of operation, including machinery space systems

10 Firefighting techniques, agents and precautions applicable to different classes of fire on board a coastal vessel

11 Maritime communication techniques applicable to fire prevention and firefighting activities on board a vessel

12 Problems that can occur with shipboard fire detection and firefighting equipment and operations and appropriate remedial action and solutions

13 Sources of information on shipboard fire prevention and extinguishment

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

14 Procedures to be followed in the event of an engine room fire

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with other personnel and passengers during simulated and real fire emergencies

2 Read and interpret and follow instructions on fire emergency procedures and on the use of fire prevention and firefighting equipment

3 Recognise and interpret fire alarms

4 Work collaboratively with shipboard personnel and passengers during a fire emergency

5 Use portable fire extinguishers as per operating instructions

6 Recognise fire hazards on a coastal vessel and take appropriate action to report them and minimise them

7 Determine the type and extent of a fire and take appropriate action

8 Operate emergency shut-offs

9 Operate fixed installation controls, fire detection and extinguishing systems

10 Operate fire hoses, branches, nozzles and fire pumps

11 Conduct effective boundary cooling

12 Use water spray as an effective firefighting agent

Evidence Guide

Evidence Guide

TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Participate in simulated on-board firefighting activities b Participate in on-board and interior search and rescue and firefighting teams c Implement OH&S principles and policies when carrying out firefighting duties d Communicate effectively with others as required during fire emergencies
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 implementing the implementation of fire prevention measures and procedures 2 identifying and evaluating firefighting problems and determining appropriate courses of action 3 participating as a member of an interior search and rescue and firefighting team on board a vessel 4 assessing the operational capability of firefighting appliances, equipment and systems and taking any required maintenance or replenishment action c Shows evidence of application of relevant workplace procedures, including: 1 relevant maritime regulations

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Evidence Guide (continued) **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**	
	2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a carry out a range of suitably simulated practical and knowledge assessments that demonstrate the skills and knowledge to carry out firefighting activities on board a vessel; and/or b assist in firefighting drills on board an operational vessel Note: Simulated firefighting assessment exercises may require access to a fire training and assessment facility capable of simulating firefighting activities in a marine environment. Assessments must be conducted in accordance with relevant OH&S requirements. Protective clothing must be worn in accordance with current maritime practices and Australian OH&S standards. Simulated conditions should provide realistic simulated shipboard conditions, including, where practical, conduct of activities in darkness.

Range Statement **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**		
a. **Work must be carried out**:	1	in compliance with the relevant maritime regulations.
b. **Work is performed**:	1	as a member of a team within defined firefighting situations, with some responsibility for self and others in achieving the prescribed outcomes.
c. **Work involves**:	1	the application of prescribed principles and practice to the prevention and fighting of fires on board a vessel. Participation as a member of a firefighting team is involved.
d. **Work requires**:	1	some judgement and teamwork in the execution of prescribed procedures for the fighting of fires that may occur on board a vessel.

2. **WORKSITE ENVIRONMENT**

a Vessel may include:	1	any Australian coastal vessel
b Fires on board a vessel may occur:	1	by day or night in both normal and emergency situations
	2	under any possible conditions of weather and loading
	3	while underway
	4	during berthing and unberthing operations
	5	while anchoring or mooring
	6	while in port
	7	while moored or at anchor

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**	
	8 loading or unloading
c Types of fires which may occur on board a vessel include:	1 The standard classification of fires

Range Statement (**continued**) **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**	
VARIABLE	**SCOPE**
d Firefighting equipment, **appliances and systems may include**:	1 portable fire extinguishers, including foam, water, CO_2, dry chemical and wet foam 2 fire blankets 3 foam installations, including semi-portable and fixed systems 4 sprinkler systems 5 fire pumps (main and emergency fire pump) 6 fire hoses, hydrants, branches and international shore connection 7 fixed engine room installations, including gas/powder and other agents
e Personal protection clothing and	1 fire-resistant clothing 2 masks

TDMMF5407A OBSERVE SAFETY AND EMERGENCY PROCEDURES ON A COASTAL VESSEL

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to follow and apply established maritime OH&S working practices and procedures and hazard control strategies on a coastal vessel and to take appropriate initial action on becoming aware of an emergency, and to follow established emergency response procedures.** (**This unit incorporates the content of the previous units *TDMMF701B Observe safe working practices* and *TDMMF801B Comply with emergency procedures* as it applied to coastal vessels**)

Application of the Unit

Application of the unit	The unit covers mandatory requirements in basic pre-sea safety and emergency procedures on coastal vessels and has applications in qualifications for Coxswain, Master 5, Master 4, Skipper 3, Skipper 2, Marine Engine Drivers 1, 2 and 3 and Marine Engineer Grade 3, i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain), Certificate III in Transport&Distribution (Coastal Maritime Operations - Master Class 5), Certificate IV in Transport&Distribution (Coastal Maritime Operations - Master Class 4), Certificate II in Transport&Distribution (Marine Engine Driving - Grade 3), Certificate III in Transport&Distribution (Marine Engine Driving - Grade 2), Certificate IV in Transport&Distribution (Marine Engine Driving - Grade 1), Diploma of Transport&Distribution (Coastal Marine Engineering - Class 3).

© Commonwealth of Australia, 2025 Public Skills Australia

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for basic pre-sea safety and emergency procedures on coastal vessels. This includes applicable sections of the National Standard for Commercial Vessels and State/Territory Maritime licensing and regulatory requirements.

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify and follow workplace procedures for hazard identification and risk control	a Safety regulations and vessel's safety and hazard control practices and procedures are obtained, interpreted and applied to day-to-day work activities b Workplace procedures for OH&S and related work instructions for controlling risks on board a vessel are accurately followed c Workplace procedures for dealing with shipboard accidents, fire and emergencies are known and followed d Hazards in the workplace are identified and appropriate action is taken to report them and to minimise or eliminate risk to personnel, vessel and the environment

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1 Identify and follow workplace procedures for hazard identification and risk control (**continued**)	e Where relevant, procedures and precautions necessary for entry into a pump room, fuel tanks or other confined spaces on a vessel are correctly followed f Personal protection clothing and equipment is correctly used in accordance with established shipboard safety practices and procedures g Appropriate assistance is provided in the event of a shipboard emergency to secure the vessel and its machinery and equipment and to maintain the safety of the vessel and persons involved
2 Contribute to arrangements for the management of OH&S	a OH&S issues and identified safety hazards are raised with designated personnel in accordance with workplace procedures and relevant OH&S legislation b Contributions to OH&S management in the workplace are made within workplace procedures and provisions of relevant legislation c OH&S issues are raised with designated personnel in accordance with workplace procedures and relevant OH&S legislation. d Contributions to participative arrangements for OH&S management in the workplace are made within vessel's procedures and scope of responsibilities and competencies
3 Complete OH&S records	a OH&S records are completed in accordance with workplace requirements b Records of occupational injury and diseases are completed as per legal requirements
4 Take action	a Emergency situations are correctly recognised and identified

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
on becoming aware of an emergency	b Response to an emergency situation follows vessel's established emergency response procedures c Correct action is taken on discovery of an actual or potential emergency in accordance with established vessel procedures d Information given on raising alarm is prompt, accurate, complete and clear
5 Follow established emergency procedures	a Vessel's contingency plans for emergency response are known and are implemented in real and simulated emergency situations

ELEMENT	PERFORMANCE CRITERIA
5 Follow established emergency procedures (**continued**)	b Escape routes and internal and external communications and alarm systems are correctly used in real and simulated emergency situations as per regulatory requirements and established procedures c Emergency communications and alarm signals and systems are correctly interpreted and required action is implemented as per emergency procedures and regulatory requirements d Planned damage control procedures for dealing with damage to the vessel and its hull are implemented as per company procedures and regulatory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant maritime regulations

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

2 The provisions of OH&S Acts, regulations and codes of practice relevant to the workplace, including the rights and responsibilities of the workplace parties under OH&S Acts, regulations and codes of practice;

3 The ways in which OH&S is managed on a coastal vessel, and activities required under OH&S legislation, for example:

a relevant policies and procedures

b equipment operation and maintenance

c hazard identification

d risk assessment and control

e OH&S instruction and training requirements

f requirements for the provision of OH&S information to crew and passengers

4 Hazards that exist on a coastal vessel

5 The preferred order of ways to control risks on a coastal vessel (known as the hierarchy of control)

6 Workplace OH&S procedures relevant to the work being undertaken, including procedures for:

a recognising and reporting on hazards, for example, work area inspections

b procedures and precautions for entering and working in confined spaces

c work operations to control risks, for example, permit to work systems and isolation procedures

d responding to accidents, fires and emergencies

e raising OH&S issues

f employee participation in OH&S management, for example, consultative or OH&S committees on a vessel and joint employer/employee inspections

7 The meaning of OH&S symbols found on signs and labels in the workplace

8 Designated personnel responsible for OH&S on board a vessel

9 Indications of various types of emergency situations that may occur on a coastal vessel and the action to be followed when various types of actual or potential emergency situations are identified

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

10 Emergency alarm signals and systems in use on coastal vessels and procedures to be followed when an emergency alarm is raised

11 Escape routes and internal and external communication systems and alarms on board a vessel

12 Ways of controlling damage during a fire or flooding emergency on a coastal vessel

13 Communication techniques used during emergencies on a coastal vessel

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal communication skills

2 Read and interpret OH&S and emergency instructions and procedures

3 Work safely and collaboratively with others when implementing OH&S requirements and emergency procedures

4 Give instructions and directions on safety issues and emergency procedures on a coastal vessel

5 Recognise safety problems and hazards that may occur on a coastal vessel and take appropriate action

6 Complete required documents related to safety incidents or emergencies that may occur on a vessel

7 Adapt to any changes in safety and emergency equipment and procedures in the workplace

8 Use emergency and safety equipment as per operating instructions

9 Recognise faulty emergency and safety equipment and take appropriate action

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

Evidence Guide

TDMMF5407A OBSERVE SAFETY AND EMERGENCY PROCEDURES ON A COASTAL VESSEL

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Follow OH&S procedures, including hazard identification and risk control b Contribute to arrangements for the management of OH&S on board a vessel c Complete OH&S records and other documentation as required d Take appropriate action in the event of discovering a shipboard emergency e Follow vessel's contingency plans for emergency response f Follow procedures for the use of various safety and emergency equipment on a coastal vessel g Implement damage control following a shipboard emergency as per instructions h Identify typical problems that may occur during a shipboard emergency and take appropriate action i Communicate effectively with others on workplace safety matters and during shipboard emergencies j Participate in drills to prepare shipboard personnel for emergency response
2 Evidence required for demonstration of consistent	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when:

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

TDMMF5407A OBSERVE SAFETY AND EMERGENCY PROCEDURES ON A COASTAL VESSEL

performance	1 following workplace OH&S procedures on board a coastal vessel 2 contributing to arrangements for the management of OH&S on board a coastal vessel 3 completing OH&S records as required 4 implementing emergency procedures (during real and simulated emergency situations) 5 participating in drills aimed at preparing shipboard personnel to implement emergency response plans c Shows evidence of application of relevant workplace procedures, including: 1 relevant maritime regulations 2 OH&S regulations and hazard prevention policies and procedures 3 relevant procedures and regulations relating to shipboard emergencies and damage control

Evidence Guide (**continued**)

TDMMF5407A OBSERVE SAFETY AND EMERGENCY PROCEDURES ON A COASTAL VESSEL

2 Evidence required for demonstration of consistent performance (**continued**)	4 shipboard safety procedures 5 environmental protection during emergencies d Action is taken promptly to report and/or rectify shipboard emergencies in accordance with established procedures e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide (continued) **TDMMF5407A OBSERVE SAFETY AND EMERGENCY PROCEDURES ON A COASTAL VESSEL**	
3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a participate in a range of role plays, case studies and/or other simulated practical and knowledge assessments that demonstrate the skills and knowledge to follow OH&S and emergency procedures on board a coastal commercial vessel; and/or b follow OH&S and emergency procedures during real operations and simulated emergency situations on board an operational coastal commercial vessel

Range Statement

Range Statement

TDMMF5407A OBSERVE SAFETY AND EMERGENCY PROCEDURES ON A COASTAL VESSEL

The Range Statement relates to the unit of competency as a whole. It allows for

different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with the relevant maritime and OH&S regulations.
b. Work is performed:	1 either individually or in a team environment with some accountability for the safety of self and others.
c. Work involves:	1 involves the application of known and established safe working and hazard control practices and procedures across a variety of normal and emergency contexts on a coastal vessel
2. WORKSITE ENVIRONMENT	
a Vessel may include:	1 any Australian coastal commercial vessel less than 80 metres
b Safe working practices and hazard control strategies must be applied at all times, including:	1 by day or night in both normal and emergency situations 2 under any permissible conditions of weather and loading 3 while underway or berthed 4 during berthing and unberthing operations 5 while anchoring or mooring 6 when slipped or in dry dock 7 when bunkering

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to survive at sea in the event of vessel abandonment**. **It includes practising survival techniques**, **operating lifesaving and survival equipment**, **and participating in abandon vessel drills**. **Note**: **Training and assessment may be customised to suit the applicable types and size of vessels and the various survival craft and equipment carried by the vessels to meet regulatory requirements**.

Application of the Unit

Application of the unit	The unit has applications in qualifications for all maritime deck and engineering occupations and covers mandatory requirements in survival skills for all seafarers.

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory requirements for familiarisation and basic safety competency required for all seafarers. This includes applicable sections of international, Commonwealth, State and Territory Maritime licensing and regulatory requirements.

© Commonwealth of Australia, 2025 Public Skills Australia

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Practise survival techniques	a The timing and sequence of individual survival actions are appropriate to the prevailing circumstances and conditions of the emergency and minimise potential dangers and threats to other survivors b Initial actions when boarding survival craft enhance chance of survival c Jumps safely from a height into the water in accordance with established survival practice d Swims while wearing a life-jacket and floats without a life-jacket in accordance with established survival practice e Inverted liferaft is righted while wearing a life-jacket in accordance with established survival practice f Appropriate handling strategies are applied to manoeuvre survival craft in rough weather and sea conditions g Sea anchors and drogues are deployed in accordance with accepted nautical practice

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1 Practise survival techniques (**continued**)	h Signs of hypothermia are identified and treated in accordance with accepted survival medical practice i (Where applicable) exposure cover is deployed on survival craft in accordance with accepted survival practice and manufacturer's instructions j Relevant first aid is administered in survival craft k Rationing of food is in accordance with accepted survival practice
2 Operate lifesaving and survival equipment	a Location and accessibility of lifesaving and survival equipment is established Survival craft are launched in a timely and effective manner b Method of boarding survival craft is appropriate and avoids dangers to other survivors c Survival equipment is operated in accordance with instructions and accepted survival practice d Survival radio equipment is operated in accordance with manufacturer's instructions and regulatory protocols e Life-jacket and other lifesaving clothing are correctly used in accordance with instructions
3 Participate in abandon vessel drills	a Abandon vessel musters and drills are attended in accordance with regulatory requirements and company procedures b Action taken on identifying muster signals is appropriate to the indicated emergency and complies with established procedures c Information on the use of lifesaving equipment and procedures to be followed in the event of the order to abandon vessel is obtained and correctly interpreted

© Commonwealth of Australia, 2025 Public Skills Australia

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant maritime regulations dealing with survival at sea following abandonment of vessel

2 Relevant OH&S legislation and policies

3 SOLAS regulations

4 Emergency muster and abandon vessel signals

5 Importance of being ready for any shipboard emergency

6 Procedures for emergency response on board vessels, including abandoning vessel

7 Initial actions for survival on abandonment of vessel as summarised in maritime survival publications such as the AMSA publication 'Survival at Sea - a Training and Instruction Manual'

8 Value of training and emergency drills for enhancing chances of survival at sea

9 Location of lifesaving appliances on a vessel

10 Construction, outfit and particular characteristics of various types of applicable survival craft

11 Equipment found in survival craft, its function and the procedures for its use

12 Procedures for correctly operating and using lifesaving appliances and personal safety equipment on board vessels and survival craft, and specifically:

   a donning a life-jacket and using a life-jacket light and whistle

   b donning an immersion suit (where applicable)

   c deployment of a mob combination light and smoke float

   d use of hand-held pyrotechnics

   e use of hydrostatic releases

   f launching survival craft

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

14 Threats to survival on abandonment of a vessel and appropriate strategies for countering these threats

15 Ways of maximising detectability and location of survival craft using pyrotechnic distress signals, portable VHF radios, satellite EPIRBs and SARTs

16 IMO safety symbols

17 Procedures for the rationing of food and water in survival craft

18 Personal protective clothing and equipment - its purpose and use

19 Symptoms of hypothermia, its prevention and treatment and the related use of protective covers and garments such as immersion suits and thermal protective aids

20 Maritime communication techniques

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with other personnel and passengers during simulated and real abandon vessel musters and emergencies

2 Read and interpret instructions on emergency procedures and on the use of lifesaving and survival equipment

3 Collect, manage and interpret information on the use of lifesaving equipment and procedures to be followed in the event of the order to abandon vessel

4 Recognise and interpret muster signals appropriately for the indicated emergency

5 Plan the timing and sequence of individual survival actions to be appropriate to the prevailing circumstances and conditions of the emergency and minimise potential dangers and threats to other survivors

6 Work collaboratively with other shipboard personnel and passengers during an emergency

7 Carry out calculations involved in rationing food and water

8 Make appropriate estimates and calculations involved when in charge of

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS

survival craft

9 Determine the type and extent of an emergency and determine the appropriate survival action to be taken

10 Right an inverted liferaft

11 Ration food and water

12 Identify hypothermia and provide appropriate treatment

13 Deploy and use survival craft during a simulated emergency.

14 Operate survival radio equipment

15 Don various thermal protective aids, life-jacket and other lifesaving clothing

Evidence Guide

Evidence Guide

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Practise survival techniques in suitably simulated situations b Operate and use the various types of survival equipment typically found on applicable vessels in suitably simulated situations c Participate in abandon vessel musters and drills d Communicate effectively with others as required when operating survival craft and ancillary survival equipment

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

2 Evidence required for demonstration of consistent performance

a Performance is demonstrated consistently over a period of time and in a suitable range of contexts

b Consistently applies underpinning knowledge and skills when:

1 participating in simulated emergency response musters and drills

2 operating survival equipment

3 applying safety precautions relevant to survival operations

4 assessing operational capability of survival craft and equipment

c Shows evidence of application of relevant workplace procedures, including:

1 relevant maritime regulations

2 OH&S regulations and hazard prevention policies and procedures

3 accepted survival procedures and maritime survival practice

4 relevant manufacturer's guidelines relating to the operation and use of survival equipment, including instructions on equipment capability and limitations

d Action is taken promptly to address any problems that may arise when following vessel abandonment procedures

e Work is completed systematically with required attention to detail

f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide (continued)

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii in a suitable training pool iii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a carry out a range of suitably simulated practical and knowledge assessments that demonstrate the skills and knowledge to abandon vessel and survive at sea; and/or b participate in vessel musters and drills in appropriately simulations of maritime conditions; and/or c participate in abandon vessel simulations and drills on board an operational commercial or training vessel Note: Simulated abandon vessel and survival situations and assessments may require access to survival equipment typically found on the coastal or ocean-going vessels concerned, a training pool with jumping platform or equivalent and immersion suits (where applicable). Assessments must be conducted in accordance with relevant OH&S requirements. Protective clothing must be worn in accordance with current maritime practices and Australian standards. At least one assessor must hold a current lifesaving qualification appropriate for in-water training and assessment exercises

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

Range Statement **TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	**SCOPE**	
1. GENERAL CONTEXT		
a. Work must be carried out:	1	in compliance with the relevant maritime regulations.
b. Work is performed:	1	in response to abandon vessel alarms and follow a prescribed range of survival procedures either individually or in a team environment with some accountability for the safety of self and others. This includes response to abandon vessel musters in both simulated and real emergency circumstances.
c. Work involves:	1	the use of known and defined survival procedures and techniques across a variety of maritime survival contexts.
2. WORKSITE ENVIRONMENT		
a Vessel may include:	1	any Australian or international commercial vessel
b Emergencies that may lead to abandonment	1	collision resulting in damage to the integrity of the vessel's hull
	2	fire

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to manoeuvre a commercial vessel of less than 24 m in length within offshore limits (200 nm). This includes the operation of small vessel propulsion systems and manoeuvring the small vessel during normal operations and adverse weather conditions, including berthing, mooring and anchoring.**

Application of the Unit

Application of the unit	The unit has applications in qualifications for a Master 5 and Skipper 3 operating a vessel of less than 24 metres in length within offshore coastal limits (200 nm) (i.e. Certificate III in Transport&Distribution (Coastal Maritime Operations - Master Class 5).

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory requirements for a Master 5/Skipper 3. This includes applicable sections of State/Territory maritime licensing and regulatory requirements and the National Standard for Commercial Vessels (NSCV).and the USL Code.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manoeuvre the small vessel for normal operations	a Manoeuvres are made to safely progress the operation and keep the small vessel in safe water b Vessel's heading is maintained within acceptable limits as per requirements of the manoeuvre, weather, tide, headreach and stopping distances c Alterations of heading or power are smooth and controlled d Communication is clear, concise and acknowledged according to good seamanship e Suitable techniques are applied when manoeuvring in shallow water and narrow channels f Appropriate turn techniques are used g Small vessel propulsion is controlled as required to progress the operation and complement steering movements h Safe operating limits of small vessel propulsion and steering systems are not exceeded in normal manoeuvres

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
1 Manoeuvre the small vessel for normal operations (**continued**)	j Appropriate allowance is made for the effects of deadweight, draft, trim, speed and under keel clearance on turning circles and stopping distance k Correct procedures are adopted when crossing a bar l Anchoring and mooring manoeuvres are carried out in accordance with safe nautical practice m Adequate resources are organised prior to and during operations n The effects on small vessel performance of shallow and restricted waters, tidal and wind conditions and passing vessel's and own vessel's bow and stern waves are regularly evaluated and the implications for small vessel handling assessed o Appropriate alterations to small vessel heading and power are made in response to assessments of the vessel's operational environment p Special handling techniques are correctly applied during rescues of persons overboard or adverse sea and weather conditions q Correct manoeuvres are used when launching boats or liferafts
2 Tow and be towed	a Preparations for towing are safely made in accordance with established nautical practice b Correct towing procedures and precautions are applied when towing and being towed c Correct manoeuvres are used when towing
3 Manoeuvre small vessel	a Impending adverse weather and/or ice conditions are identified and the implications for small vessel operations

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
during adverse weather conditions	are evaluated b Preparations are made and required precautions are taken to minimise risk and damage to small vessel and personnel and time loss on passage within the limits of the master's responsibility c Manoeuvres are adjusted to allow for weather and sea conditions and keep the small vessel in safe water d Small vessel's heading is maintained within acceptable limits e Special handling techniques required under heavy weather conditions are used when necessary

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant sections of applicable maritime regulations

2 Relevant OH&S legislation and policies

3 Limits of responsibility of a master of a small vessel up to 24 m in length operating within offshore limits

4 Methods for controlling small vessel speed and direction

5 Small vessel turn techniques

6 Techniques for incidental towing

7 Manoeuvring characteristics and propulsion system operational techniques for of vessels up to 24 m in length operating within offshore limits, including stopping distances and turning circles at various draughts, speeds and loading

8 Effects of rudders and propellers on small vessel performance

9 Effects of deadweight, draught, trim, speed and under-keel clearance on turning circles and stopping distances

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED KNOWLEDGE

10 Manoeuvring procedures for small vessels during adverse sea and weather conditions

11 Manoeuvres for a small vessel to approach an anchorage

12 Squat, shallow water, narrow channel and similar effects on small vessel's handling

13 Effects on small vessel handling of wind and currents

14 Typical manoeuvring problems for small vessels up to 24 m in length operating within offshore limits, and appropriate action and solutions

15 Interaction effects with passing and moored vessels and appropriate manoeuvring procedures to be applied

16 Manoeuvring procedures when launching lifeboats and liferafts

17 Methods for a recovering a person from the water

18 Maritime communication techniques, including issuing of helm and engine orders and towing communications

19 Methods for attaching towlines on small vessels (for incidental towing operations)

20 Effects of towing on the stability of a small vessel

21 Manoeuvring procedures when towing either alongside or on a towing line (for incidental towing operations)

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with other personnel and passengers during vessel manoeuvres

2 Issue helm and engine orders

3 Read and interpret vessel manufacturer's instructions on vessel operation

4 Read and interpret vessel marine regulations, rules and instructions concerning vessel operations

5 Collect, manage and interpret information required for the safe navigation of the

© Commonwealth of Australia, 2025 Public Skills Australia

vessel

6 Plan the timing and sequence of vessel operations to be appropriate to the prevailing circumstances, sea and weather conditions and any navigational hazards

7 Work collaboratively with other shipboard personnel and passengers during vessel operations

8 Make appropriate estimates and calculations required during the course of vessel operations (e.g. fuel, distance, speed, time, etc.)

9 Determine the type and extent of an emergency and determine the appropriate survival action to be taken

10 Determine appropriate procedures to allow for interaction effects with passing vessels

11. Recognise the effects of various operational situations such as squat, shallow water and narrow channel on vessel's handling and determine appropriate manoeuvring action required

12 Operate the vessel in accordance with manufacturer's instructions

13 Turn the vessel in various operational situations

Evidence Guide

Evidence Guide (**continued**)

TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

2	**Evidence required for demonstration of consistent performance** (**continued**)	d	Action is taken promptly to report and/or rectify resolve manoeuvring incidents in accordance with workplace procedures and regulatory requirements
		e	Work is completed systematically with required attention to detail without damage to vessel, equipment or personnel
		f	Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among crew and others

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide (**continued**) **TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5**	
3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a operate a suitable small vessel simulator over an appropriate range of simulated manoeuvring situations, weather and loading conditions; and/or b manoeuvre a vessel less than 24 m in length on offshore coastal voyages

Range Statement

Range Statement **TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance

VARIABLE	**SCOPE**

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

1. GENERAL CONTEXT

a. Work must be carried out:	1	in compliance with the relevant maritime regulations
b. Work is performed:	1	within defined operational procedures, with responsibility for own outputs and limited responsibility for others. It involves the operation of small vessel propulsion systems and the application of nautical principles and manoeuvring techniques across a range of predictable offshore contexts. Planning and carrying out the required manoeuvres for a small vessel is required, including solving predictable small vessel manoeuvring problems

2. WORKSITE ENVIRONMENT

a Vessel may include:	1	a small commercial vessel up to 24 m in length operating within offshore limits
b Measures to control the trim and stability of the vessel may be carried out:	1	by day or night in normal operational situations
	2	under normal and adverse conditions of sea and weather
	3	while underway
	4	during berthing and unberthing operations
	5	while anchoring or mooring
	6	when towing or being towed
	7	when crossing a bar
c Manoeuvres	1	berthing and unberthing

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement **TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5**	
may include:	2 mooring or anchoring 3 handling small vessel in shallow water, narrow channels, rivers, estuaries and restricted waters

Range Statement (**continued**) **TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5**	
VARIABLE	**SCOPE**
c Manoeuvres may include: (**continued**)	4 use of small marine power plants 5 incidental towing 6 dragging an anchor and clearing a foul anchor
d Special handling techniques required may include:	1 launching lifeboats and liferafts 2 taking on board survivors from rescue boats and survival craft 3 manoeuvring to rescue a person overboard 4 managing a disabled vessel in rough seas 5 lessening drift 6 manoeuvring alongside another vessel
e Documentation and records may include:	1 operational orders 2 navigational charts 3 relevant maritime regulations

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement (**continued**) **TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5**	
	4 safety management system 5 small vessel's log 6 small vessel's operational plan 7 small vessel manufacturer's instructions and recommended procedures 8 towing permits and associated regulations 9 instructions of relevant maritime authorities
f Applicable legislation, regulations and codes may include:	1 relevant sections of State and Territory maritime regulations, NSCV and USL Code 2 International Regulations for Preventing Collisions at Sea 3 relevant Commonwealth, State and Territory OH&S legislation

Evidence Guide **TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5**	

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Manoeuvre the small vessel: 1 safely in both normal and adverse weather conditions 2 when towing or being towed (for incidental towing operations) 3 in berthing and unberthing operations

© Commonwealth of Australia, 2025 Public Skills Australia

Evidence Guide

TDMMC807B MANOEUVRE A VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A MASTER 5

	4 when anchoring or mooring b Exercise all required safety and hazard control procedures when manoeuvring the small vessel c Identify typical manoeuvring problems and take appropriate action d Communicate effectively with others during manoeuvring operations
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 completing manoeuvring operations for a small vessel 2 identifying and evaluating manoeuvring problems and determining appropriate courses of action 3 applying safety precautions relevant to manoeuvring operations for small vessels 4 assessing operational capability of small vessel and propulsion system and associated equipment c Shows evidence of application of relevant workplace procedures, including: 1 relevant maritime regulations 2 OH&S regulations and hazard prevention policies and procedures 3 job procedures and work instructions 4 relevant manufacturer's guidelines relating to the use of propulsion system and associated equipment, including instructions on equipment capability and limitations

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge section and the Range Statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Identify participant needs.	1.1. Identify the ***characteristics of the participant group***. 1.2. Identify and assess suitability of ***environmental features*** according to the needs of the participant group. 1.3. Identify entry and exit requirements and appropriate entry and exit points. 1.4. Assess the degree and type of ***support*** required by the participant group according to ***organisational policies and procedures*** and ***relevant legislation***. 1.5. Report any unsuitable environmental features or entry and exit points according to organisational policies and procedures.
2. Provide support.	2.1. Advise participants and ***caregivers*** of the location and appropriate use of ***resources***. 2.2. Provide information and demonstrations to participants and caregivers on safe exit, entry and support in the aquatic environment. 2.3. Seek and respond to questions or feedback from participants and caregivers. 2.4. Provide the appropriate type and level of support. 2.5. Observe participants' response and adjust or refine the support provided as required. 2.6. Respond to participants or caregivers experiencing difficulties, according to organisational policies and procedures and relevant legislation.
3. Review the support.	3.1. Respond to participant and caregiver concerns, feedback and questions as required, according to ***best practice principles of aquatic activities***. 3.2. Report on resources and aspects needing further emphasis, attention or intervention in future sessions according to organisational policies and procedures. 3.3. Review own performance and identify areas needing improvement and ***appropriate strategies*** as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Public Skills Australia

- communication skills to:
  - provide clear instruction
  - confirm understanding
  - request and respond to participant and caregiver questions and feedback
- problem-solving skills to identify and address participant support needs and the appropriateness of environmental features for the participant group
- ability to perform basic water rescue techniques.

Required knowledge

- legislation and organisational policies and procedures that ensure the safety of clients, other facility users and staff
- best practice principles of aquatic activities to respond to concerns, feedback and questions
- support techniques and their application to different participant requirements to enable safe and appropriate support
- location, use and care of equipment
- first aid and water rescue techniques to enable appropriate responses to participants or caregivers experiencing difficulties.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • delivers concise information, explanations and demonstrations to ensure safe exit and entry and provides support appropriate to the needs of the participant group • provides appropriate support and responds to participant feedback and any difficulties experienced by participants • applies organisational policies and procedures and relevant legislation to ensure safety of participants and other facility users • reviews own performance and addresses any areas requiring modification or improvement.
Context of and specific resources for assessment	Assessment must ensure: • provision of support appropriate to the disability of

© Commonwealth of Australia, 2025 Public Skills Australia

the participant group during multiple aquatic activities to demonstrate competency and consistency of performance
- access to a swimming pool or confined natural shallow water venue
- access to safety equipment relevant to local regulatory and organisational requirements
- access to appropriate clients.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate instructing, monitoring and adjusting water familiarisation, buoyancy and mobility skills according to the needs and characteristics of participant groups and organisational safety requirements
- oral or written questioning to assess knowledge of the suitability of environmental features as they relate to participants needs
- third-party reports from a supervisor detailing candidate's performance on the job.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISSCGP201A Apply legal and ethical coaching practices

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics of the participant group may include:

- physical disability
- intellectual or sensory impairment
- mobility
- fitness
- body type and composition
- age.

© Commonwealth of Australia, 2025 Public Skills Australia

Environmental features may include:	• ramps • hoists • steps • surface • railings • depth • available water space.
Support may include:	• hands on torso • hands to hands • back hold in vertical or horizontal positions • short arm hold • cradling • carry hold • hip hold • prone hold • prone side hold • assisted exits.
Organisational policies and procedures may include:	• occupational health and safety • reporting procedures • communication protocols • AUSTSWIM Limited Teachers Code of Conduct policy • swimwear and personal protective equipment.
Relevant legislation may include:	• occupational health and safety • duty of care • working with children • Disability Discrimination Act 1992 • privacy.
Caregivers may include:	• parents • guardians • integration aids • therapists.
Resources may include:	• flotation devices • ropes • reaching poles • pool safety equipment • instructors and equipment.
Best practice principles of aquatic activities may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks • Instructors code of conduct policies developed by the peak bodies responsible for the teaching

© Commonwealth of Australia, 2025 Public Skills Australia

	of swimming and water safety • the culture of swimming and water safety.
Appropriate strategies may include:	• formal training • mentoring • peer support.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 Public Skills Australia

1. Identify potential hazardous behaviours and situations.	1.1. Access the organisation's risk management plan. 1.2. Identify ***hazardous behaviour and activities*** for ***clients*** utilising the ***aquatic facility or environment***. 1.3. Identify ***clients at risk*** or those who have specific needs. 1.4. Identify ***environmental hazards*** for clients utilising the aquatic facility or environment 1.5. Promote compliance with safety rules of aquatic facility to clients 1.6. Identify supervision requirements according to ***relevant legislation***, ***industry codes*** and ***organisational policies and procedures*** and select supervision techniques appropriate to the nature of the facility or environment.
2. Maintain a safe aquatic facility or environment.	2.1. Monitor client behaviour and activities according to relevant legislation and organisational policies and procedures. 2.2. Identify behaviour and activities posing a risk to the individual or other facility users. 2.3. Inform clients of unacceptable behaviour or actions according to organisational policies and procedures. 2.4. Take action to remove clients who persist in unsafe behaviour, according to organisational policies and procedures.
3. Assess possible emergency or rescue situations.	3.1. Identify ***signs of possible casualty or difficulty***. 3.2. Assess situation to determine appropriate ***response*** to ***emergency*** according to ***accepted best practice principles of aquatic rescues***, relevant legislation and organisational policies and procedures. 3.3. Communicate emergency situation to appropriate personnel according to organisational policies and procedures. 3.4. Report and record incidents according to organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:

© Commonwealth of Australia, 2025 Public Skills Australia

  - identify factors leading to unsafe situations
  - determine appropriate course of action to minimise risks to clients
- communication skills to:
  - promote compliance with safety rules and regulations
  - inform clients of unacceptable behaviour or actions and deal with potential conflict
  - respond to and report aquatic emergencies
- planning and organisational skills to devise an appropriate response after assessing an emergency situation
- language and literacy skills to:
  - access and interpret the organisation's risk management plan
  - document emergency incidents
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures that enable:
  - identification and fulfilment of supervision requirements
  - monitoring of client behaviour and activities
  - reporting and recording of incidents and emergency situations
- industry standards that enable the provision of a safe environment for client activities and appropriate response to emergencies
- potential dangers or hazards commonly encountered in aquatic environments and how to ensure safe conduct and supervision of client activities
- first aid, emergency and rescue procedures appropriate to the conditions to ensure risk minimisation
- characteristics and needs of individuals who may be at risk to enable effective supervision and response
- signs and symptoms of physical injury to enable prompt response in an emergency
- hazardous behaviour and activities that pose risks to clients and how to identify and deal with them quickly and safely
- conflict resolution techniques to deal with difficult or aggressive clients.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and Evidence of the following is essential:

© Commonwealth of Australia, 2025 Public Skills Australia

evidence required to demonstrate competency in this unit

- identifies behaviours and actions that pose a risk to the range of clients commonly encountered in aquatic facilities or environments
- determines and actions appropriate responses according to the organisation's risk management plan and own level of responsibility
- monitors and supervises client activity discreetly and takes prompt action within own level of responsibility to maintain a safe aquatic facility or environment at all times
- uses effective communication techniques to monitor and manage the behaviour of clients and to document incidents
- identifies the common signs and signals of a person experiencing difficulties in the water and determines and actions the most appropriate response.

Context of and specific resources for assessment

Assessment must ensure:

- participation in supervisory duties on multiple occasions to demonstrate consistency of performance
- access to an aquatic facility or environment
- access to a range of participants
- access to organisational policies and procedures appropriate to risk management
- access to appropriate personnel
- access to incident reporting documentation
- access to first aid facilities and equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of signs indicating client difficulty especially as regards high risk clients
- observation of candidate responding to unacceptable behaviour and actions by clients in an aquatic environment
- third-party reports from a supervisor detailing performance
- portfolio containing completed incident reports.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU202A Perform basic water rescues
- SISXRSK301A Undertake risk analysis of activities

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazardous behaviour and activities may include:	• misusing equipment • swimming in unsafe areas • behaving with disregard for the safety of others or self • chewing gum while swimming • diving into shallow water • consuming alcohol or illegal drugs.
Clients may include:	• participants • care-givers • members • volunteers • facility owners • spectators • staff.
Aquatic facility and environments may include:	• pools and spas • pool surrounds • play equipment • shower and changing areas • lakes, rivers and dams • beaches.
Clients at risk may include:	• drug or alcohol affected • overweight • elderly • people with a disability • weak or non-swimmers • injured swimmers • new facility users • young children.
Environmental hazards may include:	• weather conditions • reflective glare • water clarity or turbidity • rips

© Commonwealth of Australia, 2025 Public Skills Australia

- shallow water.

Relevant legislation may include:

- occupational health and safety
- duty of care regulations
- working with children regulations
- dangerous goods act and regulations
- environment legislation
- anti-discrimination legislation.

Industry codes may include:

- guidelines or code of conduct policies developed by peak bodies responsible for lifesaving:
  - Royal Life Saving Society Australia
  - Surf Life Saving Australia and relevant state or territory surf life saving organisation.

Organisational policies and procedures may include:

- occupational health and safety
- use and care of equipment
- communication protocols
- safety, rescue and emergency procedures
- incident reporting
- risk management
- behaviour management.

Signs of possible casualty or difficulty may include:

- lack of movement
- arm waving
- calling for help.

Response may include:

- type of rescue
- required assistance
- available assistance
- required emergency services.

Emergency may include:

- envenomation by aquatic animals
- spinal injury
- drowning
- heart attack
- severe bleeding
- multiple victims.

Accepted best practice principles of aquatic rescues may include:

- accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks
- Royal Life Saving Society Australia guidelines and code of conduct policies
- the culture of lifesaving.

SISCAQU202A Perform basic water rescues

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify and evaluate aquatic emergencies and respond appropriately with basic water rescues that incorporate cardiopulmonary resuscitation (CPR). These situations will usually require an individual response.

Application of the Unit

This unit applies to those working in indoor or outdoor aquatic facilities, such as pool lifeguards or aquatic educators teaching water familiarisation, learn-to-swim and water safety classes in swimming pools or confined natural shallow water venues. It also applies to those instructing canyoning and snorkelling activities.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

with the Evidence Guide.

1. Identify and evaluate aquatic emergencies.	1.1. Recognise the ***signs and signals*** of a person in difficulty. 1.2. Assess situation to determine appropriate ***response*** to ***aquatic emergency***, according to ***accepted best practice principles of aquatic rescues***, ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Identify and assess immediate ***hazards*** and ***risks*** to self and ***others***.
2. Apply the principles of a basic water rescue.	2.1. Determine the type of rescue required and promptly formulate a ***rescue plan*** according to relevant legislation and organisational policies and procedures. 2.2. Access ***equipment*** as required. 2.3. Perform ***basic water rescue*** according to accepted best practice principles of aquatic rescues. 2.4. Monitor the condition of the casualty and plan course of action. 2.5. Provide appropriate ***treatment*** according to ***industry standards*** and organisational policies and procedures.
3. Record and report the incident.	3.1. Record details of the incident and the action taken using appropriate forms, according to organisational policies and procedures. 3.2. Notify appropriate personnel and statutory authorities of the incident.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:
  - identify factors leading to aquatic emergencies
  - assess and evaluate emergencies and determine the appropriate rescue technique for the situation and location
- communication skills to:
  - alert others to the situation
  - delegate tasks during aquatic emergencies
  - provide reassurance to casualties and bystanders

© Commonwealth of Australia, 2025 Public Skills Australia

- planning and organisational skills to:
  - allocate relevant equipment under pressure to aid in rescue
  - devise a rescue plan after assessing the situation
- monitoring and observational skills to identify aquatic emergencies requiring basic water rescues
- swimming, defensive swimming and towing skills to perform basic swimming rescues
- fitness and strength level to perform basic non-swimming water rescues
- cardiopulmonary resuscitation techniques to provide an initial response to emergencies.

Required knowledge

- legislation, organisational policies and procedures and industry standards to enable:
  - the safe conduct of water rescues
  - accurate completion of incident documentation
- use and location of equipment types to effect prompt rescues
- swimming and non-swimming rescue methods to enable appropriate responses to aquatic emergencies
- characteristics and features of water environments, such as pools or canyons, and safe rescue techniques appropriate to the conditions and location
- communication systems used during rescues to inform managers, other employees and emergency services of progress
- potential dangers in a range of aquatic environments and how to respond to them
- cardiopulmonary resuscitation techniques to provide an initial response to emergencies.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies the common signs and signals of a person experiencing difficulties in the water and promptly determines possible contributing factors and formulates a suitable rescue plan • performs all basic water rescue techniques in the water while maintaining own safety • monitors condition of affected person, applies appropriate treatment

© Commonwealth of Australia, 2025 Public Skills Australia

	• recognises issues that arise during rescues and makes appropriate adjustments to ensure safety of self and others, according to organisational policies and procedures and relevant legislation • accurately reports incidents and notifies other relevant personnel according to organisational policies and procedures.
Context of and specific resources for assessment	Assessment must ensure performance of all swimming and non-swimming basic rescues and performance of cardiopulmonary resuscitation. Assessment must also ensure access to: • an aquatic environment appropriate to the candidate's current or intended work role, such as a swimming pool or confined natural shallow water venue • suitable participants to enable demonstration of water rescue techniques • CPR mannequins • equipment such as flotation devices, first aid facilities and equipment, ropes and reaching poles.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of aquatic emergency situations and basic water rescues • direct observation of the candidate safely participating in and demonstrating swimming and non-swimming water rescues incorporating cardiopulmonary resuscitation • third-party reports from a supervisor detailing candidate's performance on the job. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Public Skills Australia

Signs and signals may include:

- call for help
- vertical body position
- minimal or non-supportive leg action
- vigorous arm movements
- submerged or unconscious person.

Response may include:

- type of rescue
- number of people in difficulty
- assistance
- leaving existing role to assist
- promptly organising a suitable replacement
- contacting emergency services.

Aquatic emergency may include:

- envenomation by aquatic animals
- sudden unconsciousness
- spinal injury
- drowning
- heart attack
- severe bleeding
- epileptic seizure
- severe asthma attack.

Accepted best practice principles of aquatic rescues may include:

- accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks to the casualty, bystanders and rescuer
- guidelines and codes of conduct
  - Royal Life Saving Society Australia
  - Surf Life Saving Australia
- national, state and territory or local government regulations and guidelines
- the culture of lifesaving
- current and past good practice demonstrated by self or peers in the same or similar situation.

Relevant legislation may include:

- occupational health and safety legislation
- duty of care regulations
- working with children requirements.

Organisational policies and procedures may include:

- occupational health and safety
- use and care of lifesaving equipment
- communication protocols
- safety, rescue and emergency procedures
- incident reporting.

Hazards may include:

- slippery surfaces around pools
- deep or shallow water
- currents

© Commonwealth of Australia, 2025 Public Skills Australia

- strong wind
- risk taking behaviour.

Risks may include:

- imminent drowning
- injury
- hypothermia
- cramps
- choking
- submersion or injury of rescuer.

Others may include:

- bystanders
- staff
- other facility users
- parents
- emergency services.

Rescue plan may include:

- self-preservation
- available assistance
- selection of rescue aids
- number of people in difficulty
- priorities of rescue
- type of rescue.

Equipment may include:

- flotation devices
- ropes
- reaching poles
- pool safety equipment.

Basic water rescue must include:

- non-swimming rescues:
  - reach rescue
  - rope throw rescue
  - throw a flotation aid
- swimming rescues:
  - accompanied rescue
  - wade rescue
  - non-contact tow
  - contact tow
  - water search procedures
  - vice grip and extended arm roll-over techniques
  - defensive techniques including blocking, blocking with an aid, reverses
  - escape techniques including escape from front and rear grasps.

Treatment may include:

- danger, response, airway, breathing, circulation routine

© Commonwealth of Australia, 2025 Public Skills Australia

	• expired air resuscitation • cardiopulmonary resuscitation • injury, illness or shock related treatment.
Industry standards may include:	• Australian Resuscitation Council standards • first aid techniques and standards.

ICAICT103A Use, communicate and search securely on the internet

Modification History

Version	Comments
ICAICT103A	This version first released with *ICA11 Information and Communications Technology Training Package version 1.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to connect to the internet, securely send and receive emails, search the internet using web browsers and interact securely and in a socially responsible manner with a range of different internet sites.

Application of the Unit

This unit applies to individuals who use business technology to perform a range of routine tasks in the workplace or home office. They use fundamental knowledge of internet connection requirements, email and web browsers to perform tasks under direct supervision or with limited responsibility.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria

© Commonwealth of Australia, 2025 Public Skills Australia

Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Connect to and access the internet	1.1 Connect to the internet through the existing ***internet connection*** and confirm functionality 1.2 Open an ***internet browser*** and set a home page of personal choice by setting ***internet options*** 1.3 Ensure internet ***browser software security*** 1.4 Adjust the display of the internet browser to suit personal requirements 1.5 Modify toolbar to meet user and internet browser needs 1.6 Access a particular website, note privacy and other conditions of use and retrieve data 1.7 Use ***socially responsible behaviour*** when sharing information on the internet 1.8 Enter uniform resource locator (URL) in address line of internet browser
2. Use email for communications	2.1 Open email application package, create new email message and add addressees 2.2 Compose the text of an email message according to ***organisational guidelines*** and spell check and edit text as required 2.3 Create and add an automatic signature for the user 2.4 Attach ***files*** to the email message where required 2.5 Determine and set a priority and send the email message 2.6 Reply to and forward a received message using available features 2.7 Open and save an attachment to the relevant folder

© Commonwealth of Australia, 2025 Public Skills Australia

	2.8 Search for, sort and save email message using available settings 2.9 Adjust email accounts to restrict and quarantine possible ***email security*** problems 2.10 Print an email message as required
3. Search the internet	3.1 Review organisational guidelines on internet access 3.2 Open an internet application and locate and access a ***search engine*** on the internet and define search expressions based on the data required 3.3 Enter appropriate key words into the search engine to locate the desired information 3.4 Refine a search depending on outcomes of the original search 3.5 Save search expression results and present them in a report according to the information requirements 3.6 Create a bookmark within the internet browser or a link for the required web page for the key results 3.7 Save the key results in a bookmark folder 3.8 Modify the internet browser options for printing and print a web page 3.9 Close the internet browser
4. Access and use consumer-specific sites on the internet	4.1 Identify, access and review information-specific sites to gain consumer information 4.2 Identify and use ***internet application sites*** to lodge details and gain access and information 4.3 Access and use online forms on the internet
5. Undertake online transactions	5.1 Access an online transaction site 5.2 Ensure security of transaction site 5.3 Enter required information into fields on merchant's website 5.4 Ensure that pop-up dialog boxes, prompts or feedback mechanisms are completed

© Commonwealth of Australia, 2025 Public Skills Australia

	5.5 Enter, check and make changes to preferred ***transaction options***
	5.6 Complete online transaction
	5.7 Record and archive receipts according to business processes
	5.8 Close down and leave transaction process
6. Conduct an advanced search	6.1 Use search tools and advanced search features
	6.2 Use ***Boolean search*** techniques when required to enhance the search
	6.3 Use multiple or meta-search tools with a range of key words
	6.4 Use search engines particular to a field of knowledge to refine the outcome
	6.5 Access related virtual community sites and newsgroups and note their objectives and operational arrangements
	6.6 Conduct a search with domain names to refine the search
7. Use information that has been located	7.1 Cross-reference information found by using several websites to determine accuracy of information obtained
	7.2 Check date that website was last updated or properties of website to determine currency of information
	7.3 Determine website authority by looking at copyright statements, privacy statements and organisational information
	7.4 Save and print information found in different file forms

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
  - undertake online transactions

© Commonwealth of Australia, 2025 Public Skills Australia

- literacy skills to:
  - compose email messages
  - interpret user manuals and help functions
  - read and interpret basic online documents
  - read and write basic workplace documents
- problem-solving skills to address common operational problems when using web browsers
- research skills to locate varied sources of information online
- technical skills to use:
  - digital device
  - email applications
  - internet search functions
  - peripheral hardware
  - keyboard to enter text into web browsers and email applications.

Required knowledge

- basic technical terminology related to reading help files and prompts
- basic knowledge of copyright and privacy statements
- different types of messages that occur, such as:
  - error messages
  - message to install plug-ins
- different types of search engines
- procedures for using email applications
- procedures for evaluating and assessing the authority, reliability and authenticity of information
- internet search functions
- internet speed, traffic loads related to times of accessing the internet
- internet web browsers
- makeup and structure of internet addresses
- organisational guidelines on internet and email use (web etiquette or netiquette)
- different internet search techniques
- web browser update techniques
- use of key words and bookmarks.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Public Skills Australia

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • connect to and access the internet • send and receive emails • secure internet access and email communications • use search tools to locate information • research and select appropriate website • undertake online interactions • make an informed assessment of the accuracy, currency, authority and reliability of the site and information located.
Context of and specific resources for assessment	Assessment must ensure access to: • use of PC or digital device with internet • search engines currently used in industry • organisational policies on internet usage • appropriate learning and assessment support when required. Where applicable, physical resources should include equipment modified for people with special needs.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • verbal or written questioning to assess candidate's knowledge of internet access requirements, email features and search engine attributes • direct observation of candidate accessing the internet, using email, and searching and interacting with consumer sites using advanced search features • direct observation of candidate undertaking online interactions • review of search results, including assessment of the accuracy, currency and reliability of the site and information located.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate. Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed. Indigenous people and other people from a non-English speaking background may need additional support. In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.

© Commonwealth of Australia, 2025 Public Skills Australia

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Internet connection may include:	• 3G or high-speed downlink packet access (HSDPA) cellular network • 4G cellular network • broadband • cable • dial-up • digital subscriber line (DSL) • fibre to the 'x' (FTTx) • high-speed digital subscriber line (HSDSL) • integrated services digital network (ISDN) network terminating unit (NTU) • satellite • wireless modem • worldwide interoperability for microwave access (WiMAX).
Internet browser may include:	• Firefox • Galleon • Google Chrome • Internet Explorer • Konqueror • Lynx • Mozilla • Netscape Navigator • Opera • Phoenix.

Internet options may include:	• configuring:
	  • history
	  • home page
	  • location of temporary files
	  • privacy level
	  • security level
	  • type of connection.

© Commonwealth of Australia, 2025 Public Skills Australia

Browser software security may include:	• application enabling • cookie handling • pop-up blocking • privacy levels • security zones • trusted sites.
Socially responsible behaviour may relate to:	• not using obscene, profane, lewd, vulgar, rude, inflammatory or threatening language • not publishing information that, if acted upon, could cause damage to property or persons, nor publish deliberately false or defamatory information about a person or organisation • not engaging in personal attacks, including prejudicial or discriminatory attacks, not harass (distress or annoy) another person • not accessing material that is profane, obscene, pornographic or paedophilic, that promotes illegal acts, or that advocates violence or discrimination • not sending inappropriate emails • taking responsibility for protecting personal information by not revealing personal information, including names, addresses, photographs, credit card details and telephone numbers.
Organisational guidelines may include:	• content of emails • downloading information and accessing particular websites • opening mail with attachments • personal use of emails and internet access • virus risk (MS Windows OS and Mac OS only).
Files may include:	• email messages • HTML pages • music • PDF files • pictures • text files.

Email security may relate to:	• taking steps to restrict:
	  • malware
	  • phishing
	  • spam.

Search engine may include:	• Alexa Internet • AllTheWeb • AltaVista

© Commonwealth of Australia, 2025 Public Skills Australia

	• Bing • Cuil • Excite • Galaxy • GigaBlast • Go.com • Google • HotBot • Live Search • Lycos • search.AOL • specific search engines • Yahoo.

Internet application sites may include:	• consumer:
	  • banking
	  • shopping
	• education and training
	• government
	• health
	• interest groups
	• news
	• travel.

Transaction options may include:	• currency • delivery address • freight • invoice address.
Boolean search may include terms:	• AND • OR • NOT • NAND • NOR • NE • GE • LE • GT • LT.

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Respond in an emergency situation	1.1 Recognise emergency situation and identify *hazards* to health and safety of self and others 1.2 Minimise immediate risk to health and safety of self, casualty and others by isolating any hazard(s) 1.3 Assess casualty and identify injuries, illnesses and conditions 1.4 Assess the need for assistance
2. Apply identified first aid procedures	2.1 Reassure casualty in a caring and calm manner and make comfortable using available resources 2.2 Determine and explain the nature of *casualty's injury*/*condition* and relevant first aid procedures to provide comfort 2.3 Seek consent from casualty or significant other prior to applying first aid management 2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner 2.5 Use *identified first aid procedures* as required in accordance with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements 2.6 Use safe manual handling techniques as required

© Commonwealth of Australia, 2025 Public Skills Australia

ELEMENT	PERFORMANCE CRITERIA
3. Communicate details of the incident	3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances and using available means of communication 3.2 Accurately convey assessment of casualty's condition and first aid procedures undertaken to emergency services/relieving personnel 3.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness 3.4 Provide reports, where applicable, in a timely manner, presenting all relevant facts according to established procedures 3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
4. Evaluate own performance	4.1 Seek feedback from *appropriate clinical expert* 4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents 4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- Awareness of stress management techniques and available support
- Basic anatomy and physiology relating to:
  - absence of signs of life:
    - unconscious
    - unresponsive
    - not moving
    - not breathing normally
  - choking/airway obstruction
  - severe bleeding
  - shock
- Chain of survival
- Duty of care requirements
- First aid procedures for:
  - airway management
  - bleeding control
  - care of unconscious
  - casualty with no signs of life
  - chest pain
  - infection control as it relates to standard precautions
  - respiratory distress, including asthma
  - severe allergic reaction
  - shock
- How to access emergency response support services/personnel
- Need to be culturally aware, sensitive and respectful
- Own skills and limitations
- Privacy and confidentiality requirements
- Relevant workplace hazards
- State/territory regulations, legislation and policies, ARC Guidelines and accepted industry practice relating to currency of skill and knowledge
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Assess vital signs and responses of casualty

© Commonwealth of Australia, 2025 Public Skills Australia

REQUIRED SKILLS AND KNOWLEDGE

- Call an ambulance and/or medical assistance, according to circumstances and report casualty's condition
- Demonstrate first aid casualty management principles:
  - assess and minimise danger
  - check for response
  - maintain casualty's airway, breathing and circulation
- Demonstrate:
  - consideration of the welfare of the casualty
  - correct procedures for CPR on a resuscitation manikin
  - implementation of standard precautions
  - safe manual handling of casualty
- Identify and minimise hazards to health and safety of self and others in the immediate workplace or community environment
- Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own level of skills and knowledge
- Report details of emergency incident and first aid provided

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- Competence should be demonstrated working individually and, where appropriate, as part of a first aid team.
- Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting
- Currency of CPR knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

© Commonwealth of Australia, 2025 Public Skills Australia

EVIDENCE GUIDE

Context and resources required for assessment:	• For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines
Access and equity considerations:	• All workers in the health industry should be aware of access and equity issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities
Related unit:	• This unit stands alone and incorporates the content of unit HLTCPR201B Perform CPR

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

© Commonwealth of Australia, 2025 Public Skills Australia

RANGE STATEMENT

Condition of the casualty must include, but is not limited to:	• Severe bleeding
	• Absence of signs of life:
	  • unconscious
	  • unresponsive
	  • not moving
	  • not breathing normally
	• Choking/airway obstruction
	• Severe allergic reaction

*Identified first aid procedures **must** include*:	• Cardiopulmonary Resuscitation (CPR) • Control severe bleeding • Airway management • Provide assistance with self-administered medications, such as auto-injector, puffer/inhaler in line with state/territory regulations, legislation and policies and any available medical/pharmaceutical instructions • Care of the unconscious person
Resources and equipment may include:	• First aid kit • Resuscitation mask or barrier • Casualty's medication • Manikin • AED (if available) • Auto-injector • Puffer/inhaler
A hazard is:	A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
Appropriate clinical expert may include:	• Supervisor/manager • Ambulance officer/paramedic • Other medical/health worker
