## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- anticipating and responding rapidly to changed circumstances in a race, including emergency situations and relevant rules
- applying safe work practices when riding and jumping horses in trials and races
- calculating pace and distances
- checking gear and equipment
- communicating with employer, supervisor, co-workers and others using assertive communication techniques to gather, interpret and relay information related to applying jumping skills in trials and races
- completing duties in accordance with safe operating procedures and nominated time frame
- identifying and correctly using different items of personal protective equipment
- identifying and practising rules of racing relevant to jumping racing jockeys
- identifying and correctly using different items of gear and equipment and assessing condition of same in terms of safe use and need for repair
- identifying track conditions
- judging pace
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- trial and race riding jumps skills
- using videos to review races and riding performance
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- Australian and local rules of racing and regulations pertaining to jumps race riding
- communication procedures within stable and wider racing industry
- industry terminology related to handling and racing horses
- location of tracks for jumps races
- pace of horses
- purpose of using appropriate personal protective equipment
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- track conditions and shape

## REQUIRED SKILLS AND KNOWLEDGE

- types of jumps.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that apply to race and trial riding jumping skills, including rules of racing relevant to jumping racing
- demonstration of jumps riding skills suitable for race riding and making appropriate judgement calls on riding strategies based on a range of common racing scenarios
- implementation of procedures and timely techniques to complete race and trial riding jumping tasks safely, effectively and efficiently
- working with others to undertake and complete application of race and trial riding jumping tasks that meet required outcomes.

Evidence should be collected over a period of time using a range of horses of different ages and sexes, in different circumstances and in different racing stable and track environments.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to horses that are being educated and trained in a commercial racing stable under the care of a licensed trainer and the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or

## EVIDENCE GUIDE

---

Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of thoroughbred horses that are currently in training for jumping racing
- commercial racing training establishments, racetracks and registered race meetings
- materials and equipment relevant to assessing candidate's ability to demonstrate race and trial riding jumping skills
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform trial and race jumping riding skills. Workplaces include thoroughbred stables and racecourses, training tracks and public areas.

***Variety of track conditions and situations*** may include:

- camber
- characteristics of jumps
- differences between tracks at different locations
- distances between turns and straights
- height of jumps for hurdles and steeplechases
- hurdle races
- length of straights
- country, metropolitan and provincial jumping races
- position of jumps
- rail position and condition
- rider ability
- steeplechase races
- surface of tracks
- track rating
- track shape
- viewing race videos to assess known and unknown horse performance at various tracks
- weather conditions.

***Pace of horse over jumps*** may include:

- approaching jumps
- average speed over the course
- calmness
- contact on the bit
- impulsion
- judging sectional times
- metres per minute
- long and short crest release
- out of hand release
- safe pace.

## RANGE STATEMENT

---

**Rules** will include:

- A and B class riders, and cross country and picnic riders
- Australian and local rules of racing
- amateur flat races
- handicap weights
- jumps race rules
- country, metropolitan and provincial
- race and trial conditions
- steeple schooling areas
- training sessions.

## Unit Sector(s)

**Unit Sector** Thoroughbred racing code

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

## RGRPSH417A Participate in protests, inquiries and appeals

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to identify relevant rules of racing; participate in protests, inquiries and appeals; understand procedures; recognise rights and responsibilities; seek advice; and provide clear and accurate information.

It is recommended that RGRCMN001A Comply with the rules of racing and related protocols be delivered in conjunction with or before this unit of competency.

This unit of competency operates in work environments of racing stables, racecourses, administration buildings and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel to prepare for and participate in protests, inquiries and appeals.

Competencies attained in this unit apply to the harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code and statements of attainment will reflect this distinction.

## Licensing/Regulatory Information

Verbal evidence and statements are succinct and relevant to the appeal. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying relevant industry rules and regulations pertaining to rights, responsibilities and dress codes
- communicating with stewards, racing officials, co-workers and others using assertive communication techniques to gather, interpret and relay information related to protests, inquiries and appeals
- completing procedures within nominated time frames
- gathering evidence relevant to racing or other incidents covered by rules of racing
- identifying rights, responsibilities and procedures of protests, inquiries and appeals
- identifying protest, inquiry and appeal participants
- interpreting and relating personal conduct to rules of racing
- lodging an appeal
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- understanding nature of the protest or inquiry
- verifying nature of the charge and plea options
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- protest, inquiry and appeal processes and procedures

## REQUIRED SKILLS AND KNOWLEDGE

- communication procedures within stable and wider racing industry
- personal grooming and presentation requirements
- protocols and procedures for communicating with stewards and tribunal members
- range of documentation and records used in protests, inquiries and appeals
- relevant rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to the specific industry sector and workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when participating in protests, inquiries and appeals
- documentation related to information and evidence gathered for a number of protest, inquiry and appeal situations
- implementation of procedures and timely techniques for safe, effective and efficient participation in protests, inquiries and appeals
- working with others to undertake and complete tasks related to managing participation in protests, inquiries and appeals that meet required outcomes.

Evidence should be collected over a period of time and be focused on business activities of an establishment that trains harness or thoroughbred horses. Assessment in a simulated situation must be related to racing industry conditions and context.

#### **Context of and specific resources for assessment**

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. Assessment is to occur under

## EVIDENCE GUIDE

---

standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to effectively participate in protests, inquiries and appeals
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

## RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to participate in protests, inquiries and appeals. Workplaces include administration buildings, harness and thoroughbred stables and racecourses, training tracks and public areas.

- Nature*** of protest or inquiry may include:
- careless riding or driving
  - drug use
  - race meeting or non-race meeting
  - running and handling
  - viewing race footage
  - weight infringement.
- Rules of racing*** may include:
- Australian and local rules of racing
  - animal welfare
  - constitutional
  - interpretation
  - licensing
  - offences
  - penalties
  - registration
  - race meetings
  - stewards
  - syndication.
- Participants*** may include:
- apprentice jockeys
  - apprentice stablehands
  - drivers
  - employers or authorised trainers
  - jockey mentors
  - riders' advisory panel members
  - senior jockeys
  - stewards
  - strappers or stablehands
  - trackwork riders
  - trainer of horse ridden or driven in race
  - other persons nominated by stewards.
- Rights, responsibilities and procedures*** may include:
- appeal against stewards' decision
  - gathering evidence, for example videos

## RANGE STATEMENT

## RANGE STATEMENT

---

*Addressing tribunal members and others appropriately* may include:

- similar to standards at race meetings, for example member's area.
- addressing tribunal members politely
- refraining from swearing, arguing or fighting
- refraining from interrupting
- remaining patient
- using assertive but not aggressive body language and voice
- using language that is not patronising but at a suitable level.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assessing racing performance objectively
- communicating with employer, supervisor, co-workers and others using assertive communication techniques to gather, interpret and relay information related to

## REQUIRED SKILLS AND KNOWLEDGE

- setting goals to improve racing performance
- completing duties in accordance with safe operating procedures and nominated time frame
- distinguishing facts from feelings
- identifying behavioural changes in self
- identifying consequences of actions and responses
- identifying and describing feelings
- identifying impact of poor self-image on family, friends and workmates
- observing emotional changes in self
- planning leisure activities
- planning lifestyle to include work, leisure, family and friends in an appropriate balance
- planning strategies to maintain and improve confidence
- practising relaxation and performance enhancing techniques
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- recognising factors that influence reactions and responses
- recognising benefits to performance of good health, balanced diet and adequate sleep
- setting and continually reassessing career goals.

### Required knowledge

- benefits and disadvantages of stress to performance
- communication procedures within stable and wider racing industry
- effect of human emotions on self and others
- factors that can affect performance
- impact of anxiety on performance
- impact of self-confidence and self-esteem on performance
- principles of self-management
- probability of success or failure in racing
- stress management techniques
- racing industry safety requirements, including safe operating procedures
- relaxation techniques
- relevant rules of racing
- strategies to manage weight problems.

# Evidence Guide

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when setting goals to improve racing performance
- implementation of procedures and timely techniques to complete setting of goals to improve racing performance safely, effectively and efficiently
- working with others to undertake and complete tasks related to setting goals to improve racing performance that meet required outcomes.

Evidence should be collected over a period of time and be focused on self-improvement strategies related to improving racing performance. Theoretical components can be assessed in a simulated situation but must be related to racing industry conditions and context.

### **Context of and specific resources for assessment**

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to set goals to improve race performance
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit

## EVIDENCE GUIDE

are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- inspection of completed work
- simulation exercises.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- RGRPSH411A Prepare to drive horses in trials
- RGRPSH412A Prepare to drive horses in races
- RGRPSH414A Ride horses in trials
- RGRPSH415A Ride horses in races.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to set goals to improve racing performance. Workplaces include thoroughbred stables and racecourses, training tracks and public areas.

### *Barriers to improving*

- frustration over decisions made by employer or others that affect own role and actions

## RANGE STATEMENT

***performance*** may include:

- illnesses and injuries
- inability to objectively assess current skills and potential for improvement
- lack of appropriate goals to improve performance
- lack of exposure to adequate competition
- lack of exposure to good role models
- lack of fitness for driving or riding
- lack of self-discipline to set and achieve realistic and relevant goals
- lack of motivation
- lack of practice of required skills
- lack of suitable mentor
- limited opportunity to drive or ride quality horses
- not using specialist services that could help achieve goals, such as:
  - nutritionist
  - psychologist
  - driving or riding instructor
- poor sleep and eating patterns
- unhappiness in current personal or work life
- self-talk that:
  - suggests current performance can be blamed on others when there is no evidence to support this
  - suggests current performance is good enough when statistics show it is not
  - suggests improvement is not possible due to negative perception of current and potential skills.

***Goals are established and prioritised*** by:

- considering self, family and peer group
- identifying those persons or activities that could benefit performance
- planning and establishing milestones
- setting realistic short-term and long-term goals
- reviewing goals at appropriate intervals.

***Lifestyle and personal welfare balance*** may include:

- importance of awareness of world affairs and local issues as well as general racing industry knowledge to be able to relate to other people
- importance of positive relationships with

## RANGE STATEMENT

---

family and friends to self-worth, social skills and self-fulfilment

- importance of rest to performance improvement
- value to performance of non-racing activities that can provide adequate switch-off time and/or provide skills and techniques that transfer to racing.

## Unit Sector(s)

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying principles of fitness and nutrition
- calculating energy requirements
- communicating with employer, supervisor, co-workers, sports science specialists and others using assertive communication techniques to gather, interpret and relay information related to managing principles of sports science for jockeys
- developing strength and fitness
- demonstrating strengthening exercises
- evaluating professional services
- following rules of racing and safe operating procedures
- identifying indicators of fitness
- identifying principal features of basic human digestive, muscular, nervous and skeletal systems
- identifying relationship between diet and fitness
- managing workplace illness or injury
- maintaining desired weight
- observing weight changes in self
- practising exercise routines
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- recognising factors that influence long-term weight reduction and maintenance
- reporting workplace illness or injury promptly
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- balanced diets
- basic principles of human anatomy and physiology
- communication procedures within stable and wider racing industry
- common riding injuries
- effect of drugs and alcohol
- exercise regimes
- fitness indicators
- hydration and dehydration
- nutrition principles
- principles of fitness
- racing industry safety requirements, including safe operating procedures
- rehabilitation practices

## REQUIRED SKILLS AND KNOWLEDGE

- relevant rules of racing
- reporting procedures
- weight maintenance
- workplace illnesses and injuries.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when managing the principles of sports science for jockeys
- implementation of procedures to and timely techniques to manage the principles of sports science for jockeys
- working with others to undertake and complete related tasks that meet required outcomes.
- Evidence should be collected over a period of time and be focused on activities related to applying sports science principles. Theoretical components can be assessed in a simulated situation but must be related to racing industry conditions and tasks.

#### **Context of and specific resources for assessment**

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

## EVIDENCE GUIDE

---

### Method of assessment

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to manage and apply principles of sports science for jockeys
- work instructions and related documentation.

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, and may include:

- RGRPSH413A Prepare for race riding
- RGRPSH414A Ride horses in trials
- RGRPSH415A Ride horses in races.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

## RANGE STATEMENT

---

The range statement provides details of how this competency can be used in the workplaces of the racing industry to manage the principles of sports science for jockeys. Workplaces include thoroughbred stables and racecourses, training tracks and public areas.

***Human anatomy and physiology*** will include:

- basic digestive system
- basic muscular system
- basic nervous system
- basic skeletal system.

***Fitness*** will include:

- fitness maintenance
- indicators of fitness
- relationship between diet and fitness
- rules of racing
- short-term and long-term effect of drugs and alcohol on the body.

***Exercise regime*** may include:

- elite athlete program
- exercise machines and aids
- exercise routine
- intensive riding periods and down time.

***Nutrition*** may include:

- balanced diets
- basic nutritional guidelines
- eating more or less of particular foods
- energy sources
- fluid replacement related to hydration and dehydration
- five food groups
- nutritional supplements
- requirements for maintaining strength
- sports drinks.

***Weight maintenance*** may include:

- energy intake versus energy expenditure
- inappropriate methods of weight reduction
- medical requirement related to minimum weight for riders
- rules of racing
- sauna use
- scales
- weight gain and loss
- wasting.

***Professional services*** may include:

- coaches
- agents

## RANGE STATEMENT

## Functional Area

Functional Area      Racing performance services

# RGRPSH420A Participate in implementing racehorse exercise programs

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to relate the principles of education and conditioning to the fitness and skill requirements of racing horses, put into action the trainer's exercise program, monitor and report to the trainer the horses' responses to the program, and comply with rules of racing and animal welfare responsibilities and related protocols.

This unit also requires the practical care and management of harness or thoroughbred racing horses and the application of OHS standards in the workplace.

This unit of competency operates in workplace environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports senior stablehands, trainers and others authorised to participate in implementing exercise programs for racehorses.

Competencies attained in this unit apply to the harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with trainer, staff, horse health specialists and others to gather and relay information related to implementing exercise programs for horses
- complying with animal welfare policies when assisting in the management of horses in race preparation
- complying with directions of officials and rules of racing
- dealing with emergencies
- ensuring OHS workplace procedures are followed

## REQUIRED SKILLS AND KNOWLEDGE

- following trainer's conditioning and training program for individual horses
- identifying positive and negative responses to exercise
- identifying benefits and disadvantages of various methods of exercising and conditioning horses for racing
- investigating possible causes of poor performance
- monitoring horse behaviour and response to exercise and reporting to trainer
- predicting potential impact of factors that can affect performance in horses
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- common illnesses and injuries of racing horse
- communication procedures within stable and wider racing industry
- industry terminology related to preparing horses for racing
- OHS obligations and racing industry safe operating procedures
- racing industry animal welfare requirements
- roles and responsibilities of trainers, staff and officials in the care, exercise and management of racehorses
- rules of racing
- signs and symptoms of normal and distressed behaviour in horses
- stable protocols and procedures for pre and post-exercise or race care of horses
- stages of fitness and skill development that racehorses must undergo before they are ready to race
- types of conditioning and training programs for racehorses.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of

## EVIDENCE GUIDE

---

this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when training, trialling and racing horses
- demonstration of procedures and timely techniques for the safe, effective and efficient implementation, evaluation and modification of exercise programs for racehorses
- working with others to implement and complete procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in racing stable, track and race meeting environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to horses that are being educated and trained in a commercial racing stable under the care of a licensed trainer and the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses that are currently in training
- commercial racing training establishments, and training and racetracks
- materials and equipment relevant to assessing candidate's ability to monitor and record trackwork and racing performance and relay information on training and racing horses to trainer, staff and specialists
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge

## EVIDENCE GUIDE

- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- RGRPSH304A Identify factors that affect racehorse performance
- RGRPSH308A Provide first aid and emergency care for horses
- RGRPSH309A Implement feeding programs for racehorses under direction.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to participate in implementing racehorse exercise programs. Workplaces include harness or thoroughbred stables and racecourses, training tracks and public areas.

**Methods** used to evaluate performance include:

- horse has maintained or varied body weight
- horse's recovery after exercise by monitoring vital signs, for example:
  - heart rate

## RANGE STATEMENT

**Indicators** of poor adaptation include:

- respiratory rate
- horse's behaviour in stables and during work
- horse's adaptation to workload, including:
  - ability to continue working without signs of soreness
  - eating up feed and drinking adequate quantity of water
- trackwork, trial and race times.
- blood results
- development of undesirable behaviour patterns, including:
  - bolting
  - box walking
  - jibbing
  - kicking or biting staff or other horses
  - refusing or unwilling when asked to work
  - refusing to enter or remain in start stalls
  - refusing to work with other horses
  - weaving
- lameness
- reluctance to eat
- slow times compared to other horses of same stage of development
- slow recovery rates (vital signs)
- weight loss.

**Factors affecting performance** may include:

- age
- conformation and overall soundness
- experience of and adaptation to living in a racing environment
- gender, for example:
  - colt
  - filly
- previous injuries
- providing enough time between increases in workload to allow adaptation of body systems
- track conditions
- training methods
- type and intensity of work
- willingness of horse to compete against others.

**Stages of training programs** may

- breaking in

## RANGE STATEMENT

---

include:

- first preparation
- barrier training
- preparing for specialist race type or distance
- ready to trial
- ready to race
- returning after injury
- returning after spell.

***Methods used to condition horses*** may include:

- beach work
- hacking out
- hill work
- jogging behind a vehicle
- lunging
- riding (harness)
- swimming
- trackwork
- treadmills or walking machines.

***Racing jargon*** may include:

- common and trainer-specific terms used to describe:
  - conformation and anatomical features
  - horse illnesses and injuries
  - horse behaviour:
    - during exercise or racing
    - relating to its adaptation to a racing lifestyle
    - when being handled
    - when in the stable
  - horse's fitness
  - race programs
  - race types, distances and classes
  - racing calendar
  - racing officials
  - rules of racing
- trackwork types, times and distances.

***Daily training plan*** may include:

- educational activities, such as:
  - developing horse's confidence to work close to or move past other horses
  - exposing horse to racing situations, such as:
    - barrier training or jump outs (thoroughbred)

## RANGE STATEMENT

---

|                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## RANGE STATEMENT

---

- bits
- blinkers or pacifiers
- boots
- ear muffs
- girth types and covers
- head check
- hobble length
- lighter or heavier rider, driver, saddle or vehicle
- lugging pole (harness)
- martingale
- nosebands
- shadow rolls.

***Horse's recovery*** is assessed by:

- monitoring horse's temperature, pulse and respiration
- checking for heat or swelling after cool down
- checking for signs of injury after race
- checking horse movement and behaviour during exercise 48 hours post-race and after strenuous exercise
- monitoring horse response to exercise in week post-race and after strenuous exercise
- monitoring horse's eating and drinking habits 24 hours post-race and after strenuous exercise
- reviewing horse's behaviour for signs of distress or pain.

***Race performance*** may include:

- comparing quality of race field to nominated horse
- considering horse's current fitness and education
- considering race incidents and track and weather conditions that affected nominated horse's performance
- expected race place compared to actual
- race winner time compared to nominated horse time
- reviewing race video for performance in various stages of race
- rider or driver comments
- track record for race distance.

## Unit Sector(s)

**Unit Sector** Harness and thoroughbred racing codes

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

## RGRPSH421A Operate horse racing training business

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to comply with racing regulatory authority requirements as a trainer, including acquiring and maintaining a trainer's license; keeping records and submitting documents to the racing authority; administering payment and invoicing for services; providing safe, healthy and secure facilities suitable for the preparation of horses for racing that also comply with local government requirements; upholding safe operating procedures for the welfare of staff, the public and horses; and conducting training operations that reflect a positive image of racing.

This unit also requires the practical care and management of harness or thoroughbred racing horses and the application of OHS standards in the workplace.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports leading hands, trainers and others authorised or preparing to provide racehorse training services.

Competencies attained in this unit apply to the harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT                              | PERFORMANCE CRITERIA                                                                                     |
|--------------------------------------|----------------------------------------------------------------------------------------------------------|
| Determine racing business structure. | 1. Rules and regulations relating to obligations and responsibilities of licensed trainers are followed. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adhering to responsibilities under relevant legislation and workplace practices
- checking invoices and completing payments
- communicating with racing officials, stable staff, horse health specialists and others using assertive communication techniques to gather and relay information related to operating a horse racing training business
- complying with animal welfare policies in the care and management of horses
- conflict resolution
- ensuring license and registration applications are completed and submitted
- ensuring licenses and registrations are maintained
- ensuring security of medications and stable complies with racing regulatory authority requirements
- incorporating safe work practices into all instructions and procedures
- maintaining medication records
- maintaining required insurances

## REQUIRED SKILLS AND KNOWLEDGE

- maintaining staff employment and related payroll records
- maintaining taxation records
- preparing and distributing invoices
- preparing and submitting stable returns
- providing assistance to others in the workplace
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- resolving conflict
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- animal welfare obligations
- business registration and related obligations, including taxation and insurance
- council regulations for the operation of a racing stable
- employment conditions and recruitment options
- license and registration requirements for staff and horses
- OHS obligations and racing industry safe operating procedures
- rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when operating a racing training business
- documentation related to a number and variety of racing horses that are presently in training and housed in registered training facilities

## EVIDENCE GUIDE

---

- implementation of procedures and timely techniques for the safe, effective and efficient operation of a racing training business
- working with others to implement and complete procedures that meet required outcomes.

Evidence should be collected over a period of time and be focused on business activities of an establishment that trains harness or thoroughbred horses. Theoretical components can be assessed in a simulated situation but must be related to racing industry conditions and tasks.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses that are currently in training
- commercial racing training establishments, and training and racetracks
- materials and equipment relevant to assessing candidate's ability to operate a racing training business
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- inspection of completed work
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Where performance is not directly observed any evidence

## EVIDENCE GUIDE

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to operate a horse racing training business. Workplaces include harness and thoroughbred racing stables and racecourses, training tracks and public areas.

- Obligations and responsibilities of licensed trainers*** may include:
- complying with anti-discrimination legislation, including bullying and sexual harassment
  - complying with Australian and local rules of racing of the state or territory regulatory racing body
  - complying with national and state codes of practice; federal, state and territory legislation;

## RANGE STATEMENT

---

and local government regulations covering animal welfare

- complying with OHS legislation and regulations and environmental work practices
- complying with legislative requirements for insurance, including:
  - public liability
  - workers' compensation
- confirming arrangements for collection of prize money and distribution to owners
- confirming arrangements for payment of race entry fees and track fees
- confirming owner representatives
- ensuring all staff are registered or licensed
- ensuring stable adheres to council regulations and by-laws, for example:
  - buildings
  - disposal of waste
- instructing staff in safe operating procedures
- maintaining stable security
- providing information to racing regulatory officers.

***Options for training business structure*** may include:

- location of training stables:
  - country
  - metropolitan
  - provincial
- operating as a sole trader, partnership or company
- staffing requirements
- whether trainer needs to register for goods and services tax (GST) and acquire an Australian business number (ABN) for invoicing owners and distributing prize money.

***Racing registrations and licenses*** may include:

- owner-trainer
- public trainer
- shared license options.

***Racing documents*** may include:

- license and registration forms for staff and horses
- medication control information and declarations
- race book

## RANGE STATEMENT

---

***Obligations resulting from contractual arrangements*** may include:

- race nominations and acceptances
- race programs
- race results
- race scratching notifications
- feed batch information
- stable medication records
- stable returns
- steward inquiry information and notices.
- license obligations to comply with rules of racing
- Sale of Goods Act
- services agreed must be provided
- staffing contract.

***Expenses involved in training horses*** may include:

- advertising
- box rent or mortgage expenses
- building maintenance
- council rates
- equipment maintenance and repair
- feeding, including supplements
- insurance
- license and registration maintenance
- medication
- office operation expenses
- race entry fees
- saddlery, rug purchase and repair
- specialist services, including:
  - dentist
  - farrier
  - racing colours
  - saddler
  - veterinarian
- taxation obligations
- track fees, including rider or driver
- transport fees
- utilities, including:
  - power
  - telephone
  - water
- vehicle purchase and running costs
- wages and superannuation

## RANGE STATEMENT

***Arrangements between trainer, staff, clients and contractors*** may include:

- workers' compensation.
- client:
  - decisions on when to race a horse
  - decisions on when to retire horse or remove from stables
  - decisions on when and where to spell horse
  - decisions on who pays for horse expenses (flat rate all inclusive or other arrangement)
  - payment of accounts by monthly invoice or other arrangement
  - services to be provided
- contractor:
  - confirming who has authority to order services and equipment on behalf of trainer
  - how will accounts be settled, for example monthly or cash on delivery
  - negotiating plans of treatment or service to be provided for special situations
  - negotiating whether individual client or trainer will be billed for services provided
- staff:
  - conditions of employment, including hours and days of work
  - wages
  - work duties and safe operating procedures
  - race day attendance arrangements
- structured or random performance bonuses.
- ensuring accounts are paid on time to ensure operation of stable is safe and maintains welfare of horses and staff
- meeting taxation obligations, including:
  - GST
  - income taxation
- proving to the satisfaction of the racing regulatory authority that a trainer has the financial resources to operate a racing stable.

***Racing and financial requirements*** may include:

## Unit Sector(s)

**Unit Sector** Harness and thoroughbred racing codes

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

## **RGRPSH422A Promote and maintain business arrangements with racehorse owners**

### **Modification History**

Not Applicable

### **Unit Descriptor**

**Unit descriptor** This unit of competency specifies the outcomes required to promote the services to be provided, encourage owners to race horses and ensure owners are kept informed of incidents and decisions that affect their horses.

This unit also requires the practical care and management of harness or thoroughbred racing horses and the application of OHS standards in the workplace.

This unit of competency operates in workplace environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

### **Application of the Unit**

**Application of the unit** This unit of competency supports trainers and others authorised to train and race horses.

Competencies attained in this unit apply to the harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

Develop plans for attracting owners.

1. ***Market research techniques*** are employed to identify potential owners.
2. Information on ***training services*** is provided.
3. Information on stable successes is relayed to ***relevant sources***.
4. Opportunities to attract new owners are evaluated.

Determine services

5. Needs of racehorse owners are clarified.
6. Expectations of owners are reviewed in line with rules

| ELEMENT                              | PERFORMANCE CRITERIA                                                                                              |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| required by owners.                  | of racing and racing protocols.                                                                                   |
|                                      | 7. <b><i>Services to be provided</i></b> are confirmed with owners.                                               |

|                                      | 9. <b><i>Contract for training of horse</i></b> or stable return is completed and lodged with relevant authority. |
| Maintain communications with owners. | 10. <i>Training progress reports</i> are supplied to owners.                                                      |
|                                      | 11. Decisions on future plans for horses are discussed with owners.                                               |
|                                      | 12. Race meeting arrangements for owners are organised.                                                           |
|                                      | 13. Conflict resolution and negotiation skills are used to resolve <b><i>problems with owners</i></b> .           |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices while supervising owners around horses
- communicating with owners, staff and others using assertive communication techniques to gather and relay information in the process of promoting and maintaining business arrangements with racehorse owners
- identifying and recruiting potential new clients
- identifying potential conflicts with owners, staff and others and using assertive communication skills to avoid or resolve problems
- preparing accounts for services rendered in the preparation of horses for racing
- preparing information on stable success and performance of horses for owners and media
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- supporting others in owning or leasing horses for racing
- written communication skills to complete workplace documentation, reports and accounts.

#### Required knowledge

- communication procedures within stable and wider racing industry

## REQUIRED SKILLS AND KNOWLEDGE

- effective working relationships, including teamwork
- industry terminology related to handling and racing horses
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing
- rights and obligations of trainers and owners when racing horses.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and processes that are to apply when promoting and maintaining business arrangements with owners
- preparation and application of criteria for the safe, effective and efficient maintenance of business arrangements with racehorse owners
- documentation related to a number and variety of racing horses that are presently in training for owners and housed in registered training facilities
- working with others to promote and maintain arrangements that meet required outcomes
- consistent timely completion of promotion, maintenance and decision making processes that safely, effectively and efficiently meet required outcomes.

Evidence should be collected over a period of time and be focused on business activities of an establishment that trains harness or thoroughbred horses. Theoretical components can be assessed in a simulated situation but must be related to racing industry conditions and

## EVIDENCE GUIDE

### Context of and specific resources for assessment

contexts.

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

This unit includes practical aspects as well as the research and interpretation of data. Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses that are currently in training
- commercial racing training establishments, and training and racetracks
- materials and equipment relevant to assessing candidate's ability to market and promote participation in racing as an owner, including:
  - racing documentation related to owning and racing horses
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- inspection of completed work
- simulation exercises.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- Market the small business

## EVIDENCE GUIDE

### Guidance information for assessment

- BSBSMB406A Manage small business finances
- BSBSMB407A Manage a small team
- RGRPSH421A Operate horse racing training business
- RGRPSH505A Select horses for racing.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to promote and maintain business arrangements with racehorse owners. Workplaces include harness and thoroughbred racing stables and racecourses, training tracks and public areas.

***Market research techniques*** may include:

- identifying racing participation demographics
- investigating amount of money invested in racing
- researching other trainer services and charges
- reviewing membership numbers
- reviewing participation and money invested in other sports
- surveys.

***Training services*** may include:

- breaking in
- conditioning horses for racing fitness
- educating horses for race starts
- educating horses to settle and try during trials or races
- educating horses to work and race against other horses

## RANGE STATEMENT

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## RANGE STATEMENT

***Contract for training of horse*** may cover:

- clarifying how specialist or consultant fees will be paid, for example veterinary services
- clarifying obligations of owner and trainer in relation to animal welfare legislation
- date when fees are due
- fee for services provided
- method of payment
- obligations of owner
- obligations of trainer
- provision for dissolving business arrangements
- rights of owner to make decisions on horse activities
- rights of trainer to make decisions on horse welfare and activities
- rights of trainer to recover debts from owner
- services to be provided.

***Training progress reports*** may include:

- comments from drivers or riders in trackwork, trials and races
- days worked and type of work performed and any highlights or incidents
- expected trial and race plans for coming month
- health and injury status, including updates on progress in recovery and expected prognosis for return to racing
- races attended and results
- trials attended and results.

***Decisions on future plans for horses*** may include:

- should horse be:
  - aimed at lower or higher level races
  - assessed by specialist before further plans are made
  - kept with current trainer
  - moved to different location
  - moved to different trainer
  - sold
  - spelled
- should owner be encouraged to stop racing this horse
- should training program be altered.

***Race meeting arrangements for owners*** may include:

- advising owners of race date, location, race number and time
- clarifying number of owners that can

## RANGE STATEMENT

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## RGRPSH423A Train horses for jumping racing

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to educate and develop the fitness of horses for jumping racing.

This unit also requires the practical care, management and flat training of racing thoroughbreds and the application of OHS standards in the workplace.

This unit of competency operates in work environments of racing stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports supervisors, trainers and others in the thoroughbred racing industry responsible for training horses for jumping racing.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

### Licensing/Regulatory Information

Refer to Unit Descriptor

### Pre-Requisites

#### Prerequisite units

## Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Prepare horses for jumping education.

1. Horse's ***flatwork skills*** are reviewed.
2. ***Rider skills*** for introducing jumping to horses are prioritised.
3. Horse ***tack and equipment*** for jumping exercises are selected.
4. Horse jumps training sessions are ***planned*** .

Present pole and cavaletti exercises to horses.

5. ***Pole exercises*** are introduced.
6. Cavaletti exercises are introduced.
7. Horse's aptitude for negotiating obstacles is reviewed.

Present jumping obstacles to horses.

8. Single and related distance ***jumping exercises*** are introduced.
9. Racing brush and hurdle fences are introduced.
10. Jumping racing courses are introduced.

| ELEMENT                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                          |

| Plan jumps race program. | <ol style="list-style-type: none"><li>11. <i>Horse's welfare</i> is monitored during jumping education and fitness development.</li><li>12. Rules of racing related to jumping racing are reviewed.</li><li>13. Jump racing trials are completed.</li><li>14. Horse's aptitude for jumping racing is evaluated.</li><li>15. Jumps races are selected that are aligned to individual horse aptitude.</li></ol> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying OHS workplace procedures
- applying safe handling and work practices when dealing with horses
- assessing area conditions for safe jumping
- assessing horse's aptitude for jumping obstacles
- assessing horse's aptitude for jumping and jumping racing
- identifying skills required by horses and riders for jumping racing
- communicating with riders, owners, specialists and others using assertive communication techniques to gather and relay information related to skill development in jumping racing for horses
- complying with animal welfare policies in the care and management of horses
- dealing with emergencies
- evaluating risks associated with jumping horses
- giving and receiving instructions
- identifying behaviour traits of individual horses related to introducing and developing jumping skills
- measuring jumping stride and adjusting obstacle distances for individual horses
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- selecting and adjusting distance and height of jumping equipment
- selecting, fitting and maintaining horse tack for jumping
- selecting suitable jumping exercises for level of experience, education and fitness of horses

## REQUIRED SKILLS AND KNOWLEDGE

- supporting others in handling and providing education and exercise for horses learning to jump
- written communication skills to compile and maintain records related to planning, implementing and reviewing jumping education and training.

### Required knowledge

- common horse behaviour traits related to jumping
- common injuries related to jumping exercise and education
- communication procedures within stable and wider racing industry
- controlling techniques for horses
- effective working relationships, including teamwork
- emergency control measures
- industry terminology related to jumps education and racing
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing related to jumping racing
- signs of lameness in horses
- stages of jumping education for horses
- types of jumping obstacles relevant to education and competition in jumping racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- applying safe operating procedures to ensure the safety of horses, riders and others during the education and fitness development of horses for jumping racing
- knowledge of the requirements, procedures and instructions that apply to overseeing the education of

## EVIDENCE GUIDE

---

horses for jumping racing

- implementation of procedures and timely techniques for the safe, effective and efficient education and fitness development of horses for jumping racing
- working with others to undertake and complete procedures that meet required outcomes.
- Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in racing stable, track and race meeting environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to horses that are being educated and trained in a commercial racing stable under the care of a licensed trainer and the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of thoroughbred horses that are currently in training for jumping racing
- commercial racing training establishments, safe racetrack areas, race meetings and related facilities
- materials and equipment relevant to assessing candidate's ability to plan and oversee the education of horses for jumping racing
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

## EVIDENCE GUIDE

---

### Guidance information for assessment

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRPSH502A Plan and implement education of horses for racing.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to train horses for jumping racing. Workplaces include harness or thoroughbred stables and racecourses, training tracks and public areas.

***Flatwork skills*** may include:

- responding to rider aids, including:
  - selection of gait
  - control of speed
  - direction of travel
  - turning signals
  - stopping
  - moving towards unusual objects.

***Rider skills*** may include:

- establishing and maintaining suitable tempo, stride length and control for jumping obstacles from poles on the ground to jumping racing fences
- identifying when horse is not coping with task
- reassuring nervous horse during exercise
- remaining calm and positive while horse is

## RANGE STATEMENT

***Tack and equipment*** may include:

- learning new skills
- riding in a balanced independent seat suitable for jumping
- using positive and negative reinforcement to encourage horse to negotiate obstacles.
- jumping equipment, including:
  - cavaletti
  - ground poles
  - jump fill used to introduce jumping height and solid obstacles, including walls and ground line
  - jump materials to replicate fences used in jumping races, such as brush and ditches
  - jump wings suitable to build vertical and spread fences
- jumping tack, including:
  - breast plates
  - martingales
  - specialist bits
  - specialist shoeing for jumping
- protective equipment for horse, including:
  - bandages
  - brushing boots
  - overreach boots
  - sausage boots
  - splint boots
- suitable arena with safe footing and reasonably level surface.

***Planned jumping sessions*** may include:

- frequency of jumping sessions per week when horse is learning to jump
- length of sessions depending on fitness and experience in jumping
- progression of jumping exercises, from learning to negotiate poles on the ground up to jumping racing obstacles
- type of obstacles used at different stages of education and fitness for jumping.

***Pole exercises*** may include:

- random single poles on the ground negotiated at walk, trot and canter
- grids of poles negotiated at walk, trot and canter on straight and curving lines at distances

## RANGE STATEMENT

|                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## **RGRPSH501A Plan and adapt training and conditioning programs for racehorses**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit descriptor**

This unit of competency specifies the outcomes required to develop training and conditioning plans for racing horses, assessing the horse's adaptation to the plan and modifying the program for individual horses.

To undertake this unit the candidate will have already achieved or be able to demonstrate competence in the practical care and management of harness or thoroughbred racing horses and the application of OHS standards in the workplace.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

### **Application of the Unit**

#### **Application of the unit**

This unit of competency supports senior stablehands, trainers and others authorised to prepare and condition horses for racing.

The unit focuses on the competencies associated with preparing horses of various ages and abilities for Australian racing programs. Harness and thoroughbred racing occurs under different conditions consequently when performance criteria are applied they will relate to harness or thoroughbred horses and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adapting exercise and training programs according to individual animal responses and specific stages of racing preparation
- applying horse health and emergency care procedures
- applying safe handling and work practices when dealing with horses
- communicating with stable staff, horse health specialists and others using assertive communication techniques to gather and relay information related to training and conditioning programs for racehorses
- complying with animal welfare policies in the care and management of horses
- dealing with emergencies
- evaluating horse response to exercise
- identifying normal, abnormal and distressed horse behaviour
- identifying symptoms and signs of adaptation and adaptive failure response to training and conditioning programs
- identifying, fitting and explaining purpose of corrective gear and equipment

## REQUIRED SKILLS AND KNOWLEDGE

- identifying, fitting and explaining purpose of protective gear and equipment
- maintaining OHS workplace procedures
- measuring trackwork times and distances and comparing performance to racing requirements
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- supporting others in applying training and conditioning programs to horses in appropriate manner
- written communication skills to document training and conditioning programs and record observations post-exercise.

### Required knowledge

- classes and types of racing in Australia
- communication procedures within stable and wider racing industry
- current industry performance requirements for racing
- current trackwork times for various distances and stages of racing preparation
- impact of nutrition and general health on horse performance
- industry terminology related to racing horses
- OHS obligations and racing safe operating procedures
- protocols for trackwork on public tracks
- racing industry animal welfare requirements
- variations in conditioning program requirements for various ages and classes of horses.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and

## EVIDENCE GUIDE

---

instructions that are to apply when planning and adapting training and conditioning programs for racehorses

- implementation of procedures and timely techniques for the safe, effective and efficient planning adapting, evaluating and modifying of training and conditioning programs
- working with others to implement and complete programs that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in racing stable and track environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to horses that are being educated and trained in a commercial racing stable under the care of a licensed trainer and the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- access to commercial racing training establishments, training and racetracks, and a variety of harness or thoroughbred horses that are currently in training
- materials and equipment relevant to assessing candidate's ability to plan, adapt and modify training and conditioning programs for racehorses
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Where performance is not directly observed any evidence should be authenticated by supervisors or other

## EVIDENCE GUIDE

|                                            | <p>appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.</p> <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:</p> <ul style="list-style-type: none"> <li>• RGRPSH401A Relate anatomical and physiological features to the care and treatment of horses</li> <li>• RGRPSH408A Manage horse health and welfare</li> <li>• RGRPSH409A Determine nutritional requirements for racing horses.</li> </ul> |
| <b>Guidance information for assessment</b> | <p>Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).</p>                                                                                                                                                                                                             |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to plan and adapt training and conditioning programs for racehorses. Workplaces include harness and thoroughbred racing stables and racecourses, training tracks and public areas.

|                                                            |                                                                                                                                                                                                                                                                                                  |

## RANGE STATEMENT

***Factors to consider when reviewing trackwork times and behaviour*** include:

- on public or private track.
- are trackwork times within acceptable parameters for a particular track and conditions
- is horse willing to go past others during trackwork
- is horse willing to work close to others
- is horse worked with others or alone to gain these times.

***Corrective or remedial gear*** may include:

- assorted bits
- blinkers or hood
- harness specific:
  - ear muffs
  - head check
  - lugging pole
  - nosebands
  - spreaders
- thoroughbred specific:
  - barrier blanket
  - ear muffs
  - martingale
  - nosebands.

***Factors to consider when diet is reviewed*** include:

- access to fresh pasture
- appropriate volume of feed
- balance of concentrates and roughage in diet
- changed eating patterns
- drinking appropriate volume of water daily
- horse's appetite
- levels of protein, carbohydrates, vitamins and minerals in the diet
- presence of potentially diet-related illnesses, including:
  - colic
  - deficiency in electrolytes indicated in blood tests
  - excessive sweating or insufficient sweating
  - exertional rhabdomyolysis (tying up)
  - horse being diagnosed with ulcers
- teething conditions leading to inability to eat hard feed temporarily.

## RANGE STATEMENT

---

***Performance compared to racing goals*** includes:

- a more effective assessment of horse readiness to run may be required, for example:
  - blood tests
  - fast workout with another known horse or group of horses
  - fitness test
- animal welfare and racing guidelines for the amount of work
- does horse need a few trials and/or races to reach peak performance
- expected time frame to first trial or race
- hormone control, for example:
  - mares
  - stallions versus geldings
- race class or type that horse is being prepared for
- specialist advice required to review fitness, for example:
  - farrier
  - therapist
  - veterinarian
- trainer style, methods and size of establishment versus horse response.

## Unit Sector(s)

# RGRPSH502A Plan and implement education of horses for racing

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to prepare horses for life in a racing establishment, including educational opportunities to expose horses to the routines and activities that occur in a racing training complex and at a racing meeting, using industry-approved techniques and principles of learning theory, animal welfare and OHS.

To undertake this unit the candidate will have already achieved or be able to demonstrate competence in the practical care and management of harness or thoroughbred racing horses and the application of OHS standards in the workplace.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports senior stablehands, trainers and others authorised to educate horses for racing.

The unit focuses on the competencies associated with preparing horses of various ages and abilities for Australian racing programs. Harness and thoroughbred racing occurs under different conditions consequently when performance criteria are applied they will relate to harness or thoroughbred horses and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying horse learning principles to the introduction of young or inexperienced horses to new or stressful activities and environments
- applying safe handling and work practices when dealing with horses
- communicating with stable staff, horse health specialists and others using assertive communication techniques to gather and relay information related to education of horses for racing
- complying with animal welfare policies in the care and management of horses
- consulting specialists for the training and handling of horses
- dealing with emergencies
- directing or instructing others in the handling of horses
- evaluating options for handling and educating horses
- identifying and modifying potentially stressful or hazardous situations and activities for young and inexperienced horses
- identifying relaxed and distressed behavioural characteristics in horses
- identifying, fitting and using different items of riding or driving gear and assessing their condition in terms of safe use and need for repair
- identifying, fitting and using different items of exercise and protective equipment on horses

## REQUIRED SKILLS AND KNOWLEDGE

- maintaining OHS workplace procedures
- modifying or adapting training and education practices in relation to individual horse response to stimuli
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- supporting others in applying education programs to horses in the appropriate manner
- written communication skills to document education programs and record observations.

### Required knowledge

- activities that racing horses are required to perform
- behaviour of horses in normal and distressed states
- communication procedures within stable and wider racing industry
- indicators of horse's ability to comprehend and complete required tasks
- industry terminology related to education of racing horses
- OHS protocols and racing industry safety requirements, including safe operating procedures
- principles of horse anatomy and physiology
- racing industry animal welfare requirements.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when planning and introducing racing husbandry and exercise practices to racehorses

## EVIDENCE GUIDE

---

- implementation of procedures and timely techniques for the safe, effective and efficient introduction of industry-approved routines and activities related to educating horses for racing
- working with others to implement and complete horse education procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in racing stable and track environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to horses that are being educated and trained in a commercial racing stable under the care of a licensed trainer and the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses that are currently in training
- commercial racing training establishments, and training and racetracks
- materials and equipment relevant to assessing candidate's ability to plan and implement education of horses for racing
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be

## EVIDENCE GUIDE

|                                            | <p>approved by the State Principal Racing Authority.</p> <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:</p> <ul style="list-style-type: none"> <li>• RGRPSH401A Relate anatomical and physiological features to the care and treatment of horses</li> <li>• RGRPSH408A Manage horse health and welfare</li> <li>• RGRPSH409A Determine nutritional requirements for racing horses</li> <li>• RGRPSH501A Plan and adapt training and conditioning programs for racehorses.</li> </ul> |
| <b>Guidance information for assessment</b> | <p>Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).</p>                                                                                                                                                                                                                                                |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to plan and implement education of horses for racing. Workplaces include harness or thoroughbred stables and racecourses, training tracks and public areas.

- Racing stable activities*** include:
- accepting restraints, including being tied up
  - adapting to living in stables or yards
  - feeding routines
  - shoeing
  - standing for grooming, hosing, clipping, tacking up and rugging
  - standing or working close to other horses.
- Racing tack and equipment***
- bridles

## RANGE STATEMENT

include:

- blinkers, winkers and hoods
- harness specific:
  - cart
  - head check
  - hobbles
  - jog machine vehicle
- protective equipment, including:
  - boots
  - bandages
- swimming pools
- thoroughbred specific:
  - girths
  - saddles and associated tack, for example:
    - breast plate
    - martingale
  - saddlecloths
- treadmills and walking machines.

***Remedial or corrective equipment*** includes:

- assorted bits
- blinkers or hoods
- harness specific:
  - ear muffs
  - head check
  - lugging pole
  - nosebands
  - spreaders
- thoroughbred specific:
  - barrier blanket
  - brow band
  - cornell collar
  - martingale
  - noseband
  - nose roll
  - pacifiers
  - tongue tie
  - winkers.

***Methods that could be used to acclimatise horses to exercise related activities*** include:

- horses ridden or driven singly under direct supervision
- horses worked with experienced, reliable

## RANGE STATEMENT

|                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## RANGE STATEMENT

---

*Specialist advice* may include:

- horse shows interest in surroundings and activities
- horse stands relatively quietly for exercise or race preparation activities.
- dentist
- farrier
- horse breaker
- jockey or driver
- nutritionist
- other trainer
- specialist young horse trackwork rider or driver
- starter
- thoroughbred barrier attendant
- thoroughbred specialist trackwork jump-out rider
- veterinarian.

## Unit Sector(s)

## Functional Area

**Functional Area** Racing performance services

## RGRPSH503A Trial and race horses

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to select appropriate trials or race programs, enter horses in trials or races, and comply with rules of racing and related protocols.

This unit also requires the practical care and management of harness or thoroughbred racing horses and the application of OHS standards in the workplace.

This unit of competency operates in workplace environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports trainers and others authorised to trial and race horses.

The unit focuses on the competencies associated with preparing horses of various ages and abilities for Australian racing programs. Harness and thoroughbred racing occurs under different conditions consequently when performance criteria are applied they will relate to harness or thoroughbred horses and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with staff, horse health specialists and others using assertive communication techniques to gather and relay information related to trialling and racing horses
- complying with animal welfare policies when trialling or racing horses
- complying with directions of officials and rules of racing
- ensuring OHS workplace procedures are followed
- ensuring owners are kept informed of racing plans and arrangements for their horses
- identifying possible options for improving race performance
- incorporating safe operating procedures into all instructions
- informing staff of race meeting preparation and post-meeting requirements for horses
- investigating possible causes of poor performance
- planning racing program or schedule for individual horses, including spacing of trials and races
- presenting horses in a fit and healthy state for trials and races
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with

## REQUIRED SKILLS AND KNOWLEDGE

varying physical and mental abilities

- selecting appropriate races for individual horses
- selecting corrective gear or equipment to improve the racing performance of individual horses
- selecting suitable riders or drivers for individual horses in trials and races
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within stable and wider racing industry
- industry terminology related to racing horses, including type and class of race
- license and registration requirements for staff and horses
- OHS obligations and racing industry safe operating procedures
- protocols and procedures for entering horses for races
- protocols and procedures for racing horses
- purpose of using appropriate personal protective equipment
- racing industry animal welfare requirements
- roles and responsibilities of trainers, staff and officials at trials and race meetings
- rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when planning and implementing racing schedules to trial and race horses
- implementation of protocols, procedures and timely techniques for the safe, effective and efficient trialling and racing of horses
- working with others to implement and complete

## EVIDENCE GUIDE

---

procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in racing stable, track and race meeting environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to horses that are being educated and trained in a commercial racing stable under the care of a licensed trainer and the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses that are currently in training
- commercial racing training establishments, safe racetrack areas, race meetings and related facilities
- materials and equipment relevant to assessing candidate's ability to trial and race horses, including rules of racing and approved gear
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- RGRPSH501A Plan and adapt training and

## EVIDENCE GUIDE

### Guidance information for assessment

conditioning programs for racehorses

- RGRPSH502A Plan and implement education of horses for racing.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to trial and race horses. Workplaces include harness or thoroughbred stables and racecourses, training tracks and public areas.

***Race meeting program and race classes*** include:

- race distance
- race start type
- race location, including:
  - country
  - metropolitan
  - picnic
  - provincial
- harness race classes:
  - pacing and trotting (all of the categories below can apply to either race style)
  - 2 year old
  - 3 year old
  - 4 year old
  - claiming
  - derby
  - graduation

## RANGE STATEMENT

## RANGE STATEMENT

---

***Race meeting preparations*** will include:

- selecting rider or driver based on skill with particular horse temperament or style of racing
- selecting rider or driver on experience with nominated race or race location.
- advising officials:
  - if horse is not available to run
  - race strategies
  - gear changes
- arranging accommodation for horse and staff if required
- arranging transportation to and from race meeting
- briefing staff on:
  - allocation of staff for race meeting and home stable duties
  - safety procedures at race meeting
  - routine procedures of conducting a race, including:
    - collecting horses as they return to parade area
    - drug testing
    - grooming horses
    - handing over control of horse to rider or driver
    - harnessing up or saddling horses
    - identifying horses
    - parading horses prior to start
    - restrictions on feeding and watering horses at race meeting
    - supervising horses during race meeting
- checking track and weather conditions
- confirming horse is ready to run by:
  - checking hoof condition and shoeing
  - conducting out of competition drug tests if required
  - reviewing health, eating and drinking
  - reviewing performance in trackwork
- determining exercise required prior to race.
- accepting horses for races
- answering questions and attending inquiries as

***Protocols and procedures that apply to race meetings*** include:

## RANGE STATEMENT

---

required by stewards

- arriving at race meeting in given time frame
- attending horse in tie-up stalls
- attending inquiries to assist apprentice or junior driver during inquiries
- collecting horse post-race
- collecting saddle (thoroughbred) and number from jockey or driver room
- completing stable returns
- complying with drug testing protocols
- ensuring self and staff attending race meeting are registered, have required identification and are appropriately attired
- ensuring shoes, plates or no shoes are approved for racing
- nominating horses for races
- notifying stewards of race instructions for rider or driver
- parading in required time
- parading winners according to officials' instructions
- presenting horse to race in good health and well-groomed
- providing identification for horse at race meeting
- providing riders or drivers with race instructions
- registering race colours of owners
- saddling up or tacking up with clean, well-fitting approved gear that is in good repair
- sewing bandages.
- asking for documentation of horses
- instructing participants to move from nominated area
- instructing patrons in case of an emergency or safety issue
- instructing patrons to leave racetrack venue
- instructing race meeting veterinarian or farrier to attend, inspect or treat horse
- instructing trainer to present horse for pre or post-race drug testing
- questioning on any aspect of conduct of race

***Types of officials' directions likely to be made during race meetings include:***

## RANGE STATEMENT

### ***Information required by racehorse owners includes:***

- meeting
  - questioning trainer on health or injury status of horse pre and post-race
  - questioning trainer on race strategies or other instructions to rider or driver.
- prospects of horse in race
- protocols for addressing and complying with officials' instructions
- required protocols (including dress standards) and safety procedures in parade or presentation areas
- routine procedures of conducting a race, including:
  - identification
  - parading
  - meeting rider or driver
  - horses sent to start
  - race run
  - horses return to parade area
  - drug testing
- their rights in protests, appeals or inquiries
- use of mobile phones.

### ***Assessment of horse's recovery will include:***

- checking for heat or swelling after cool down
- checking for signs of injury after race
- monitoring horse's recovery rate through vital signs
- checking horse movement and behaviour during exercise 48 hours post-race
- monitoring horse response to exercise in week post-race
- monitoring horse's eating and drinking habits 24 hours post-race
- reviewing horse's behaviour for signs of distress or pain.

### ***Trial and race performance can be assessed by:***

- comparing quality of race field to nominated horse
- considering track and weather conditions, and trial or race incidents that affected horse's performance
- expected race place compared to actual
- race winner time compared to nominated horse

## RANGE STATEMENT

|                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## **RGRPSH504A Develop systems and records for horse racing business training operations**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit descriptor**

This unit of competency specifies the outcomes required to identify the roles and responsibilities of trainer and staff; develop protocols and procedures for horse care, management, exercise and emergency care; and relay this information to staff. The unit also includes the preparation and upkeep of record-keeping systems for reporting day-to-day activities and incidents in a racing stable.

This unit also requires the practical care and management of harness or thoroughbred racing horses and the application of OHS standards in the workplace.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit, check with your State Principal Racing Authority for current license or registration requirements.

### **Application of the Unit**

#### **Application of the unit**

This unit of competency supports leading hands, trainers and others authorised to supervise the day-to-day operations of a racing stable.

Competencies attained in this unit apply to the harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

Set stable hierarchy.

1. Person in charge in trainer's absence is determined.
2. Staff duties and rosters are developed.

Prepare policies for training stable

3. Policies for ***acceptance or release of horses*** are developed and relayed to staff.
4. Policies and procedures for visitors to the stable are

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying quarantine control measures for isolation of sick horses and prevention of transference of disease by horses, other animals and humans
- communicating with staff, co-workers and others using assertive communication techniques to gather and relay information related to systems and records in horse racing training business operations
- demonstrating basic first aid techniques for horses to staff who will provide these skills under supervision, and providing feedback on technique
- demonstrating safe work procedures, including horse handling techniques and providing feedback to staff
- designing and preparing basic record-keeping systems
- evaluating risks associated with catching, handling and restraining horses
- explaining characteristics of sick and healthy horses to staff

## REQUIRED SKILLS AND KNOWLEDGE

- explaining signs and symptoms of shock, lameness, and common illnesses and injuries in horses
- identifying and correctly using different treatments
- identifying and recording horse irregularities
- incorporating safe operating procedures into all instructions
- prioritising daily activities, incidents and emergencies
- providing assistance to others in the workplace
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- verifying that records are accurate and up-to-date
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- common horse behaviour, social traits and vices
- common illnesses and injuries in horses
- communication procedures within stable and wider racing industry
- disease control and reporting requirements
- effective working relationships, including teamwork
- exercise routines and training programs for horses being prepared for racing
- handling techniques for horses
- horse first aid
- horse husbandry
- industry terminology related to handling, treating and exercising horses
- quarantine and emergency disease control protocols and procedures
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and** The evidence required to demonstrate competency in this

## EVIDENCE GUIDE

### evidence required to demonstrate competency in this unit

unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when developing systems and records for racing business operations
- implementation of procedures and techniques for the safe, effective and efficient operation of systems and records
- documentation related to a number and variety of racing horses that are presently in training and housed in registered training facilities
- working with others to implement and complete procedures that meet required outcomes
- consistent prioritising and timely completion of procedures that safely, effectively and efficiently meet required outcomes.

Evidence should be collected over a period of time using a range of stable management and exercise scenarios for racehorses of different ages and sexes, and at different stages of preparation in a racing stable. Theoretical components can be assessed in a simulated situation but must be related to racing industry conditions and tasks.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to prepare documents and give instructions on the care, management and exercise of horses in a racing stable

work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed

## EVIDENCE GUIDE

---

Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- inspection of completed work
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- RGRPSH302A Supervise handling of horses
- RGRCMN401A Maintain and monitor OHS procedures and environmental work practices
- RGRPSH408A Manage horse health and welfare
- RGRPSH409A Determine nutritional requirements for racing horses
- RGRPSH421A Operate horse racing training business
- RGRPSH501A Plan and adapt training and conditioning programs for racehorses
- TAADEL301A Provide training through instruction and demonstration of work skills.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

## RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to develop systems and records for horse racing business training operations. Workplaces include harness and thoroughbred racing stables and racecourses, training tracks and public areas.

***Stable hierarchy*** may include:

- clarifying steward's rights to inspect premises and question any racing participant
- clarifying trainer's rights and responsibilities to horse welfare, safety and compliance with rules of racing
- clarifying what types of information can be relayed to owner or other visitors to the stable
- identifying job responsibilities and limit of decision making authority of staff members
- identifying staff members who can make decisions to change or modify trainer instructions or normal procedures
- explaining who staff should report information or incidents to on a daily basis
- verifying who and under what circumstances veterinarian, farrier or others can be contacted for emergencies.

***Acceptance or release of horses*** may include:

- checking special diet, medication or other requirements with owner, recording same and advising trainer or supervisor
- collecting owner contact details
- collecting horse's registration papers
- completing relevant documentation
- confirming identification of horse on arrival and departure
- confirming that trainer knows that horse is due to arrive
- ensuring rugs and other equipment sent with a horse are labelled, recorded and returned with horse when it leaves
- ensuring horse is healthy and fit to travel
- ensuring trainer has approved removal of horse from stables
- isolating and monitoring horse where possible

## RANGE STATEMENT

---

|                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## RANGE STATEMENT

---

***Husbandry of horses*** may include:

- protocols
- providing quarantine area for new or sick horses.
- demonstrating handling techniques, including judicious use of restraints
- determining who can handle potentially less reliable horses, including young stock and stallions
- developing diet for individual horses
- exercise management of horses not being ridden or driven
- maintaining a diary of daily activities relating to the movement, management and exercise of horses
- monitoring and recording vital signs and other health indicators
- recording administration of medication, vaccinations, therapeutics and worming preparations, including type, amount and date of administration
- recording information on shoeing and hoof care
- recording injuries, illnesses, diseases and treatments for individual horses
- recording response to diet and any changes to diet
- warm-up and cool-down requirements for horses being exercised
- weighing horses and recording information.

***Maintenance of tack and equipment*** may include:

- cleaning and conditioning saddlery, transport equipment, rugs, bandages and boots on a daily, monthly and annual basis
- cleaning and servicing gigs (harness)
- organising safety inspection of electrical leads and appliances
- listing gear and equipment requiring repair
- regular inspection protocol of all tack and equipment
- stock control of rugs and saddlery sent for repair.

|                                    | 14. <b>Horse's future</b> is determined with consideration to animal welfare issues.                                  |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- analysing information provided by staff
- applying safe handling and work practices when dealing with horses
- communicating with horse specialists and others using assertive communication techniques to gather and relay information related to selecting horses for racing
- complying with animal welfare policies in care and management of horses
- decision making
- determining desired extent of participating in racing and how this may influence the type of horse selected
- evaluating conformation features of nominated horses
- evaluating potential influence of ancestors to characteristics and potential of nominated horses
- evaluating racing breeding theories and rationalising influence of pedigree and other factors to potential performance
- identifying current popular sires
- identifying current prominent racehorses
- identifying prominent racing family lines
- interpreting basic genetic terminology
- interpreting statistical racing information, including breeding performance, track times, race sectional times and winners
- listing track records for major feature races
- rationalising horse's future in racing based on performance, health and injury status
- relating horse's temperament to racing potential
- reading and interpreting racing pedigrees and breeding theories

## REQUIRED SKILLS AND KNOWLEDGE

- reading and interpreting workplace documentation, including relevant rules of racing
- relating pedigree and conformation to potential performance in various race distances and types
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- basic genetic theory of inheritance of traits
- characteristics of successful racehorses of various racing types
- common horse behaviour, social traits and vices
- features of healthy and fit racehorses
- features of conformation of racehorses
- illnesses and injuries that may impact on a horse's potential in racing
- industry terminology related to breeding and racing horses
- life span of horses and likely length of racing career
- popular racing breeding theories
- racing industry animal welfare requirements
- role of horse temperament in racing potential
- statistical information related to breeding performance
- track records for prominent races
- types of pedigree layout.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and processes that are to apply when determining a horse's suitability for racing

## EVIDENCE GUIDE

---

- preparation and timely application of criteria for the safe, effective and efficient selection of horses for racing or alternative future options
- working with others to select horses for racing that meet required outcomes.

Evidence should be collected over a period of time and be focused on selection and decision making processes applying to a range of racehorses of different ages and sexes, at different stages of their racing career and housed in a racing stable. Theoretical components can be assessed in a simulated situation but must be related to racing industry conditions and contexts.

### Context of and specific resources for assessment

Competency may be assessed in an actual workplace or simulated environment that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

This unit includes practical aspects as well as the research, interpretation and evaluation of data. Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to assess conformation, pedigree and race type features of horses for racing
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- inspection of completed work
- simulation exercises.

Where performance is not directly observed any evidence should be authenticated by supervisors or other

## EVIDENCE GUIDE

### Guidance information for assessment

appropriate persons.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- RTE3148A Assess conformation of horses.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to select horses for racing. Workplaces include harness and thoroughbred racing stables and racecourses, training tracks and public areas.

***Profiling*** a racehorse may include:

- assessment of pedigree and performance of close relatives
- conformation evaluation
- health and injury status
- performance if any of nominated horse.

***Characteristics*** of racehorse types include:

- climate adaptability
- horses that prefer to lead versus those who prefer cover
- racehorse types:
  - all weather runners versus particular weather specialists
  - distance versus sprinting types
  - track direction preferences
  - track type preferences

## RANGE STATEMENT

---

***Features of conformation*** may include:

- temperament and ability to settle into training and racing
- variations in behaviour and management requirements, based on age and sex.
- balance and proportion of body
- conformational faults that may affect racing performance
- front leg structural features
- hind leg structural features
- structural features of feet and hooves.

***Racing program aims*** may include:

- longer term performance in feature races
- race class
- race distance
- race location, including:
  - country
  - metropolitan
  - picnic
  - provincial
- race start type.

***Pedigree information*** may include:

- dam line pedigree styles
- methods used in pedigrees to identify race performance, such as black type
- personal knowledge of family is used, such as previous close relations in stable or similar
- sire line pedigree styles
- suffix details commonly used in pedigrees for horses, for example import country
- terminology used in describing relationship between ancestors and other relations for horses.

***Racing breeding theories*** may include:

- Bruce Lowe
- cluster mares
- cross-breeding
- dosage pedigrees
- inbreeding
- influence of dam on progeny performance
- influence of environment on performance potential
- influence of sire on progeny performance
- line breeding
- nicks

## RANGE STATEMENT

---

Features of ***prominent racing lines*** may include:

- outbreeding
- race records and statistical information
- taproot pedigrees
- Tesio
- Varola.
- consistency of type within progeny of nominated sire or dam
- consistency of race performance of nominated sire or dam, for example producers of 2 year old winners
- current successful dams based on:
  - dam's race record
  - number of foals to race
  - number of winners to starters
  - prize money earned by progeny
- current successful sires based on:
  - number of runners for winners
  - number of winners to starters
  - prize money earned by progeny
  - sire's race record
- sale price of yearlings
- race performance of related progeny within a three generation pedigree
- reputation of stallion as producer of successful broodmares.

***Options for racing horses*** may include:

- affordability of price range
- racing as an owner-trainer
- leasing horses to race
- syndicating horses to race
- purchasing a share in a horse
- purchasing a horse and engaging a trainer
- selecting a horse with racing performance versus selecting a yearling
- breeding a horse to race.

***Specialist advice*** may include:

- bloodstock agent assessment
- farrier assessment
- trainer advice
- veterinary advice and testing, including:
  - x-ray
  - blood test

## RANGE STATEMENT

|                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

# RGRROP201A Perform duties of barrier attendant at thoroughbred race meetings and trials

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to safely and efficiently perform the duties of a barrier attendant at thoroughbred race meetings and trials. It requires knowledge and skills associated with handling horses safely in a high pressure environment, working closely with other barrier attendants and following directions from the starter, as well as recognising approved gear and damaged gear and fitting replacement gear to agitated horses in a timely manner.

It is recommended that RGRPSH201A Handle horses be delivered in conjunction with or before this unit of competency.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports racing industry personnel authorised to perform the duties of a barrier attendant.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

Prepare for race meeting duties.

1. Work roster is confirmed.
2. Assistance with preparation of barrier and starting equipment is provided.
3. Allocated ***duties*** are confirmed with starter.
4. ***Personal protective equipment*** is used according to safe operating procedures and club requirements.
5. ***Personal presentation*** is appropriate for work duties and reinforces a positive image of racing.

| ELEMENT                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

Barriers are returned to storage area and cleaned, and damage or maintenance needs are reported.</p>                                                                                                                                                                                                                                                                |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with horses
- communicating with race starter, racing officials and licensed personnel using assertive communication techniques to gather, interpret and relay information

## REQUIRED SKILLS AND KNOWLEDGE

related to barrier attendant duties

- completing duties in accordance with safe operating procedures and nominated time frame
- evaluating risks associated with loading horses into barriers
- identifying and correctly applying different items of approved gear
- judging situations and seeking assistance to prevent problems arising or overcome problems before they develop further
- leading and handling horses in enclosed spaces
- recognising damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- relaying messages to others
- responding quickly to requests from starter
- responding to instructions promptly and safely
- teamwork skills to ensure completion of job tasks
- working safely in confined spaces of barrier.

### Required knowledge

- appropriate methods of controlling horses
- approved gear
- basic industry terminology related to handling horses
- limits of own responsibility
- personal grooming and presentation requirements
- protocols and procedures for communicating with licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## EVIDENCE GUIDE

---

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply performing the duties of a barrier attendant
- implementation of procedures and timely techniques for the safe, effective and efficient handling and loading of horses into barriers
- working with others to undertake and complete barrier procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in racing stable and track environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to perform barrier attendant duties
- safe handling areas, such as racetracks and barriers
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial

## EVIDENCE GUIDE

---

### Guidance information for assessment

- evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN201A Follow OHS procedures and observe environmental work practices
- RGRPSH201A Handle horses.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform the duties of a barrier attendant at thoroughbred race meetings and trials. Workplaces include thoroughbred racecourses, training tracks, administration buildings and public areas.

***Preparation of barrier and starting equipment*** will include:

- battery
- communication system
- damage
- fuel
- lights
- oil

## RANGE STATEMENT

---

***Duties allocated by the starter*** may include:

- power steering fluid
- transmission fluid
- tyre pressure
- water.
- climb barrier
- hold horses
- load horses
- shut gate
- walk horses.

***Personal protective equipment*** will include:

- approved helmets
- approved vests
- boots
- gloves.

***Personal presentation*** will include:

- adhering to industry or race club dress code, including:
  - clothing
  - footwear
  - hair
  - jewellery and other personal adornment.

***Approved racing gear*** may include:

- bandages
- bits
- blinkers
- boots
- bridles
- breastplates
- crossover nosebands
- girths
- pacifiers
- reins
- rings
- saddles
- shadow roll
- stirrup leathers
- surcingle
- tongue ties.

***Damaged or defective gear*** may include:

- frayed reins
- incorrectly adjusted blinkers and pacifiers
- loose bandages
- loose shoes

## RANGE STATEMENT

---

|                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## RANGE STATEMENT

---

***Problems relayed to the starter***  
may include:

- controlling and calming horse
- holding rein correctly.
- horse burrowing
- horse cast under stalls
- horse collapsed in stalls
- horse laying back on gate
- horse kicking
- horse pulling back
- horse refusing
- horse sitting down
- horse straddling front of stall or adjacent stall
- horse turning head into adjacent stall
- horse whipping around
- rider injury.

***Potential track problems or incidents*** may include:

- gate fails to open
- horse injury
- loose horses
- rider injury.

## Unit Sector(s)

**Unit Sector** Thoroughbred racing code

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

# RGRROP202A Perform duties of kennel attendant at race meetings

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to assist the kennel supervisor in the control of greyhounds during race meetings. It requires an ability to work with others and to follow and uphold racing authority protocols and procedures. At times staff may be required to use appropriate communication skills when directing racing participants.

To undertake this unit the candidate will be able to apply safe greyhound handling skills and follow workplace OHS standards.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports race meeting staff assisting in the conduct of races or trials.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Prepare for kennelling.

1. ***Rules of racing*** that apply to kennelling procedures and greyhound health and welfare guidelines are identified and applied.
2. Kennelling procedures and ***responsibilities of kennel staff*** are known and followed.
3. ***Security*** of kennels is confirmed prior to commencement of kennelling.
4. Duties are confirmed prior to commencement of kennelling.
5. OHS and racing safety protocols and procedures are known and complied with.

Follow kennelling

6. ***Identification of greyhounds*** and general fitness to race

| ELEMENT                                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Greyhound and attendant are escorted to allocated kennel, observed during settling of greyhound, then kennel is secured.</p> <p>9. <b>Approval is sought</b> prior to allowing non-scheduled visit to kennels by greyhound attendant or others.</p> <p>10. <b>General wellbeing of greyhound</b> is monitored and animal referred to veterinarian or kennel supervisor if there are any concerns.</p> |
| Conduct pre-race kennelling procedures.  | <p>11. Greyhounds are called to marshalling area prior to race.</p> <p>12. Identification of greyhounds is verified and race rugs are allocated.</p> <p>13. Greyhounds are escorted to stir-up area.</p> <p>14. Catchers are identified and directed to finish area.</p> <p>15. Greyhounds are organised into race order and handed over to racing official.</p> <p>16. Cleanliness, safety and security of kennel area are maintained throughout race meeting.</p>                               |
| Conduct post-race kennelling procedures. | <p>17. Greyhounds are received after race, rugs are collected and race documents returned.</p> <p>18. Kennels, scales, race rugs, vests and other equipment are checked and cleaned, and damage reported at the end of race meeting.</p>                                                                                                                                                                                                                                                          |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds
- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to kennel attendant duties
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with OHS and animal welfare legislation

## REQUIRED SKILLS AND KNOWLEDGE

- complying with race day procedures and relevant rules of racing
- escorting greyhound and handler to and from kennel so that they remain in sight at all times
- following directions of racing officials and stewards
- identifying common signs and symptoms of distressed or injured greyhounds
- identifying greyhounds using approved greyhound signalment
- locating allocated kennels
- observing greyhound and handler during kennelling for compliance with kennelling procedures and other racing protocols
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- securing kennel in line with security procedures
- verifying kennel allocation procedure for particular race meeting.

### Required knowledge

- basic industry terminology related to greyhound racing procedures
- communication procedures within the kennel and wider racing industry
- layout of approved race meeting kennel complex
- procedures for conduct of pre and post-race kennelling
- race meeting procedures and protocols
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- rules of racing for greyhounds, including state and local variations relating to kennelling and pre and post-race procedures and animal welfare
- signals and symptoms of injured, distressed or sick greyhounds
- time management for completion of work tasks
- written and verbal report formats and protocols for reporting non-compliance issues to supervisor and stewards.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and** The evidence required to demonstrate competency in this

## EVIDENCE GUIDE

---

### evidence required to demonstrate competency in this unit

unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing kennel attendant duties at race meetings
- implementation of procedures and timely techniques for the safe, effective and efficient performance of kennel attendant race meeting duties
- working with others to undertake and complete race meeting procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of greyhounds of different ages, sexes and temperaments, and at different stages of preparation in race meeting environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds and handlers
- materials and equipment relevant to assessing candidate's ability to perform the duties of a kennel attendant at race meetings
- safe handling areas, such as racetracks with racing authority approved kennels and associated facilities
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

## EVIDENCE GUIDE

### Guidance information for assessment

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRPSG201A Handle greyhounds.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to assess the skills required to perform the duties of kennel attendant at race meetings. Workplaces include greyhound kennels and racecourses, training tracks and public areas.

***Rules of racing*** will include:

- Australian and local rules of racing.

***Responsibilities of kennel staff*** will include:

- advising supervisor and stewards of incidents or non-compliance issues
- allocating kennels according to race club policy
- complying with the rules of racing
- escorting greyhound and handler to kennel and ensuring handler complies with kennelling protocols and procedures
- ensuring that kennels are locked securely
- ensuring that no-one accesses greyhounds

## RANGE STATEMENT

---

|                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

# RGRROP203A Perform duties of parade official at greyhound race meetings

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to conduct parading procedures for greyhounds prior to the start of greyhound races. It requires an ability to work closely with people, use appropriate communication skills to direct and control greyhound racing participants, and use verbal and reading skills to interpret racing documentation and directions from stewards and racing officials.

To undertake this unit the candidate will be able to recognise greyhound behaviour patterns and follow workplace OHS and animal welfare standards.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports race meeting staff assisting in the conduct of race meetings.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

|                                                                   |                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds
- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to parade official duties
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with OHS and animal welfare legislation
- complying with race day procedures and relevant rules of racing
- ensuring no contact with greyhounds by unauthorised personnel
- following directions of racing officials and stewards
- handing over race field to starter
- identifying common signs and symptoms of distressed or injured greyhounds
- locating allocated kennels
- maintaining visual contact of race field whilst escorting greyhounds and handlers during parade and walk to race start
- marshalling greyhounds in race order and ensuring race field stays in order and together during marshalling, parade and walk to race start
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reporting problems or incidents to kennel supervisor, stewards and other officials in a timely manner

## REQUIRED SKILLS AND KNOWLEDGE

- verifying box draw and allocating race rugs and handler jackets
- verifying identification of greyhounds
- written communication skills to complete workplace documentation or reports.

### Required knowledge

- basic industry terminology related to greyhound racing procedures
- communication procedures within the kennel and wider racing industry
- procedures for conduct of pre and post-race parading
- race meeting procedures and protocols
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- rules of racing for greyhounds, including state and local variations relating to race day procedures and animal welfare
- signals and symptoms of injured, distressed or sick greyhounds
- time management for the completion of work tasks
- written and verbal report formats and protocols for reporting non-compliance issues to supervisor and stewards.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing parade official duties at greyhound race meetings
- implementation of procedures and timely techniques for the safe, effective and efficient performance of parade official greyhound race meeting duties
- working with others to undertake and complete greyhound race meeting procedures that meet required outcomes.

## EVIDENCE GUIDE

---

Evidence should be collected over a period of time using a range of greyhounds of different ages, sexes and temperaments, and at different stages of preparation in race meeting environments.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds and handlers
- materials and equipment relevant to assessing candidate's ability to perform the duties of a parade official at greyhound race meetings
- safe handling areas, such as racetracks with racing authority approved kennels and associated facilities
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English,

## EVIDENCE GUIDE

youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to assess the skills required to perform the duties of parade official at greyhound race meetings. Workplaces include greyhound kennels and racecourses, training tracks and public areas.

- |                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## RGRROP204A Assist with harness race starts

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to safely and efficiently assist in harness race starts during harness trials and race meetings. It requires knowledge and skills associated with handling horses safely in a high pressure environment, working closely with other race meeting staff and following directions from the starter while adhering to safe work practices.

It is recommended that RGRPSH201A Handle horses be delivered in conjunction with or before this unit of competency.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel and others authorised to assist with harness race and trial starts.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with horses
- catching, leading and handling a range of horses in a variety of environments
- communicating with stewards, racing officials, licensed and registered personnel, co-workers and others using assertive communication techniques to gather and relay information related to assisting with race starts
- completing duties in accordance with safe operating procedures and nominated time frame
- evaluating risks associated with race start activities
- identifying and correctly applying different items of approved gear
- judging situations and seeking assistance to prevent problems arising or to overcome problems before they develop further
- identifying and correctly using different items of handling gear
- identifying behaviour of horses
- recognising damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- relaying messages to others
- responding to instructions promptly and safely
- teamwork skills to ensure completion of job tasks.

#### Required knowledge

- appropriate methods of controlling horses
- approved gear
- basic industry terminology related to handling horses
- limits of own responsibility
- personal grooming and presentation requirements

## REQUIRED SKILLS AND KNOWLEDGE

- protocols and procedures for communicating with licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when assisting with harness race starts
- implementation of procedures and timely techniques for the safe, effective and efficient application of race start duties
- working with others to undertake and complete starting procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in racing stable and track environments.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards

## EVIDENCE GUIDE

---

requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness horses
- materials and equipment relevant to assessing candidate's ability to assist with harness race starts
- safe handling areas, such as racetracks, race meetings and associated facilities
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN201A Follow OHS procedures and observe environmental work practices.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to assist with harness race starts. Workplaces include harness stables and racecourses, training tracks and public areas.

- Hazards*** may include:
- foreign objects
  - loose or working horses
  - machinery
  - stray or feral animals
  - personnel working on tracks
  - plastic cones, markers or witches hats.
- Potential track problems*** may include:
- damaged gear or sulkies
  - driver injury
  - fallen driver
  - horse injury
  - loose horses
  - mobile barrier problems, for example hydraulic problems with wings.
- Safe operating procedures*** when approaching horses may include:
- approaching horse from near side front
  - avoiding sudden movement
  - assuming control of horse
  - considering variables that influence behaviour of horses, such as:
    - fences and equipment
    - other persons or animals
    - vehicles
    - wind and noise
  - leading horse person to person
  - maintaining at least two lengths between horses being led
  - speaking calmly to horse
  - using personal protective equipment
  - using well-maintained and safe gear.
- Track incidents or emergencies*** may include:
- foreign objects on racetrack
  - injured horses
  - fallen or injured drivers

## RANGE STATEMENT

---

**Reports** will be relayed to starter or steward:

- loose horses
- mobile barrier malfunction
- people and/or stray or feral animals on racetrack
- weather conditions, for example:
  - lightening
  - thunderstorm.
- courteously and efficiently
- maintaining confidentiality and discretion
- promptly
- using correct forms of greeting
- via verbal and/or written communication, including:
  - describing actions
  - giving and receiving clear, accurate and simple messages
  - listening to and interpreting information and instructions
  - written reports, including simple documents and notes.

# RGRROP301A Perform ear branding and marking up of greyhounds

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to perform industry-regulated procedures for the recording of permanent identification and registration of individual racing greyhounds. It requires knowledge of greyhound features and greyhound behaviour traits, effective interpretation and completion of written documentation, and compliance with animal welfare legislation and rules of racing.

To undertake this unit the candidate will be able to apply safe greyhound handling skills and follow workplace OHS standards.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports stipendiary stewards or State Principal Racing Authority delegated officers in performing industry-regulated identification and branding of racing greyhounds.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

handler or operator.

5. Ear branding equipment is prepared.

6. Ear brand is applied using *humane techniques* .

7. Documentation is completed.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds
- communicating with licensed or registered industry personnel and others using assertive communication techniques to gather, interpret and relay information related to performing ear branding and marking up procedures
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- identifying individual greyhounds using industry-approved terminology, records and signalment
- operating ear branding equipment
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- common greyhound behaviour traits
- communication procedures within the kennel and wider racing industry
- first aid procedures for humans and greyhounds
- operating procedures for ear branding equipment
- procedures for completing workplace documentation related to greyhound identification and registration
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing.

# Evidence Guide

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing ear branding and marking up of greyhounds
- implementation of procedures and timely techniques for safe, effective and efficient ear branding application
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds
- materials and equipment relevant to assessing candidate's ability to perform ear branding and marking up procedures
- safe handling areas, such as commercial kennels, training and racetracks
- work instructions and related documentation.

## EVIDENCE GUIDE

---

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols
- RGRPSG201A Handle greyhounds.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform ear branding and marking up of greyhounds. Workplaces include greyhound racecourses, training tracks and

## RANGE STATEMENT

---

administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

***Industry identification features***  
will include:

- breeding
- colour
- date of whelping
- ear brands
- markings
- owner
- racing name
- registration number
- sex.

***Other industry documentation***  
may include:

- naming and registration certificate
- kennel return.

***Ear branding equipment required***  
includes:

- collar
- lead
- muzzle
- tattoo.

***Humane techniques*** ensure:

- compliance with animal welfare legislation
- compliance with rules of racing
- safety of handler and operator
- safety of greyhound.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying freeze branding and maintaining freeze branding equipment
- applying safe handling and work practices when dealing with horses, including techniques required to specifically handle and restrain mares and foals
- catching, leading and handling a range of horses in a variety of environments
- communicating with licensed or registered industry personnel and others using assertive communication techniques to gather, interpret and relay information related to performing freeze branding procedures
- completing duties in accordance with safe operating procedures and nominated time frame
- evaluating risks associated with horse handling
- identifying horses using industry signalment and documents
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- appropriate methods of restraining horses
- basic industry terminology related to horse identification and branding
- industry documentation required for identifying, breeding, registering and branding standardbred horses
- manufacturer specifications for the operation and maintenance of freeze branding equipment
- procedures for registering and branding standardbred horses
- protocols and procedures for communicating with licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

# Evidence Guide

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when branding standardbred horses
- implementation of procedures and timely techniques for the safe, effective and efficient application of branding duties
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness horses
- materials and equipment relevant to assessing candidate's ability to perform branding procedures
- safe handling areas such as commercial stables, training and racetracks
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit

## EVIDENCE GUIDE

are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols
- RGRPSH201A Handle horses.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to brand standardbred horses. Workplaces include harness stables and racecourses, training tracks and public areas.

***Identification features*** may include:

- brands and other permanent skin or hair features
- coat colour

## RANGE STATEMENT

---

|                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <b><i>Verifying relationship of foal to its parents</i></b> may include:                    | <ul style="list-style-type: none"> <li>• blood type and/or DNA of sire and dam</li> <li>• colour and markings of sire and dam</li> <li>• date of birth of foal</li> <li>• date of service.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b><i>Age of foal estimate</i></b> may involve:                                             | <ul style="list-style-type: none"> <li>• reviewing characteristics to verify the declared age of the foal, including the following features: <ul style="list-style-type: none"> <li>• condition score</li> <li>• eruption of teeth</li> <li>• length of mane and tail hair</li> <li>• shape and length of hooves.</li> </ul> </li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b><i>Restrained for branding</i></b> may include:                                          | <ul style="list-style-type: none"> <li>• equipment or medication that can be used for restraint using humane and safe techniques, including: <ul style="list-style-type: none"> <li>• chemical sedation supervised by a veterinarian</li> <li>• hobbles</li> <li>• nose twitch</li> </ul> </li> <li>• physical restraints that must be applied using humane and safe techniques, including: <ul style="list-style-type: none"> <li>• fitting halter or headcollar</li> <li>• handlers using their body to keep foal against mare's body, a wall or other object</li> <li>• handlers wrapping their arms around foal's body</li> <li>• handlers elevating foal's tail</li> <li>• handlers applying skin twitch</li> <li>• handlers raising one foreleg off the ground.</li> </ul> </li> </ul> |
| <b><i>Considerations for safety of foal, handler and branding officer</i></b> will include: | <ul style="list-style-type: none"> <li>• if restraints are not used, or are ill fitting or in poor condition, foals could: <ul style="list-style-type: none"> <li>• suffer distress by struggling to get away from handler or brand</li> <li>• suffer strains, contusions or breaks if they</li> </ul> </li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## RANGE STATEMENT

---

get out of restraints

- fall, be knocked over or burned if they move during application of brand
- if restraints are not used, the following injuries could occur to handler or branding officer:
  - brand or cooling agent may burn after coming into contact with skin accidentally
  - injury by being bitten, kicked, pushed into a wall or knocked over by mare and/or foal
  - needlestick injury if chemical restraints are used
  - strain while trying to restrain foal.

**Branding equipment** may include:

- authority approved branding irons, including alpha angle sequence and stud brand (if required)
- clippers for removing hair prior to branding
- coolant to super cool brands
- gloves and goggles to protect branding officer
- insulated containers suitable for storage and application of coolant to brands.

**Considerations for humane techniques** will include:

- avoiding bony features of the body when applying brands
- cooling and applying brands for an appropriate length of time for foals or young horses
- ensuring minimal stress is suffered by the animal during preparation, restraint and application of brand
- keeping foal or young horse with mother if possible to reduce separation anxiety
- monitoring foal after application of brands and release from restraints to ensure health status
- restraining animal for no longer than minimum time required to complete the job
- using chemical sedation under the supervision of a veterinary surgeon to ensure dose rate and chemical used is suitable for foals or young horses
- using restraining equipment that is in good condition and fits the animal to avoid foal escaping due to equipment malfunction and/or injury
- using restraining techniques that are suitable

## RANGE STATEMENT

---

***Documentation to be completed***  
will include:

- for use on foals and young horses.
- description and drawing of brands applied
- registration papers with foal descriptions completed and verified
- report of all foals or horses inspected and branded.

## Unit Sector(s)

**Unit Sector** Harness racing code

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

## **RGRROP303A Perform duties of clerk of course at harness or thoroughbred race meetings and trials**

### **Modification History**

Not Applicable

### **Unit Descriptor**

#### **Unit descriptor**

This unit of competency specifies the outcomes required to perform the race meeting or trial duties of a clerk of the course. The unit covers the process of preparing for the race meeting, assisting in the start of races and trials, monitoring horses throughout all stages of the race or trial, and assisting in emergency and post-race procedures.

To undertake this unit the candidate will be able to demonstrate competent, high level horse riding and horse handling skills and apply workplace OHS standards.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### **Application of the Unit**

#### **Application of the unit**

This unit of competency supports racing industry personnel and others authorised to perform clerk of course duties at harness or thoroughbred race meetings and trials.

Competencies attained in this unit apply to the harness or thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

Prepare for race meeting or trial.

1. Horses are ***conditioned*** and ***fed*** to ensure their fitness to complete the duties of a clerk of the course mount.
2. Horses are presented clean, well-groomed, sound, and in ***good health*** .
3. Horse gear is clean, well fitting and in good repair.
4. Personal presentation and dress is appropriate to the

| ELEMENT                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with horses
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to clerk of course duties

## **REQUIRED SKILLS AND KNOWLEDGE**

- completing duties in accordance with safe operating procedures and nominated time frame
- evaluating risks associated with loading horses into barriers
- high level horse riding and handling skills
- identifying a range of horses
- identifying different items of approved gear
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- relaying messages to others
- responding to instructions promptly and safely
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- working in a high pressure environment.

### **Required knowledge**

- approved gear
- basic industry terminology related to handling horses during race meetings
- common horse illnesses and injuries
- commonly used health and fitness parameters for horses
- communication procedures within the race meeting environment and wider racing industry
- effective methods of controlling horses in a range of situations
- hazard identification and risk management
- horse identification features
- nutritional requirements with respect to the horse's age and needs while in work
- personal grooming and presentation requirements
- preparing and providing balanced diets for working horses
- protocols and procedures for communicating with licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply performing the duties of clerk of course at race meetings or trials
- demonstration of competent riding and horse handling skills in a range of situations relevant to clerk of course duties
- implementation of procedures and timely techniques for the safe, effective and efficient application of clerk of course duties
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, and at different stages of preparation in race meeting and trial environments.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to perform clerk of course duties
- safe handling areas and racetracks, including registered race meetings and trials
- work instructions and related documentation.

## EVIDENCE GUIDE

---

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform the duties of clerk of course at race meetings and trials. Workplaces include harness or thoroughbred racecourses, training tracks, administration buildings and public areas.

Horses are ***conditioned*** by:

- planning a program taking into account the following:
- current fitness

## RANGE STATEMENT

---

- expected daily work routine
- term of duties
- types of work patterns, including slow foundation work and sprints
- determining or observing fitness indicators, including:
  - recovery time after exercise
  - brightness of eye
  - appetite and general health and wellbeing
  - muscle definition
  - respiration and heart rate
  - weight of horse.

Horses are **fed** by:

- ensuring feed is of high quality, considering:
  - absence of mould or rot
  - age of material
  - rodent or other spoilage
- providing a variety of protein and energy sources, including:
  - prepackaged or bulk base feed
  - varieties of grass, hays and fodders
- taking into account horse's individual aspects, including:
  - age
  - level of work
  - individual taste
  - metabolism
  - gender
  - water consumption
- using supplements, including:
  - vitamins
  - calcium
  - electrolytes
  - potassium citrate
  - iron.

- Regular action required to ensure a horse's **good health** will include:
- hoof care
  - identifying and reporting notifiable diseases
  - illness and injury checks
  - skin checks
  - teeth treatment

## RANGE STATEMENT

---

***OHS and racing safety protocols and procedures*** may include:

- vaccinations
- waste removal
- worming.
- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- contributing to development of risk control measures
- following safe work practices
- identifying and reporting unsafe work practices
- identifying and preventing hazards
- identifying emergency situations
- trial and race meeting specific health and safety procedures for the protection of others, including:
  - all gear used on horses is approved and of good quality
  - protective gear conforms to required standards
- understanding individual horse behaviour
- wearing approved personal protective equipment.

***Identification of starters*** will include:

- brands
- coat colour
- markings
- race colours
- race stall number
- race book directory
- sex.

***Assistance to starter and drivers***

- assembling horses prior to going on to track

## RANGE STATEMENT

**or riders** may include:

- responding to directions from starter
- moving horses to barrier
- assisting in controlling horses after the race
- assisting in adjusting gear.

**Effective strategies employed** may include:

- assistance with:
  - adjusting of gear
  - leading or escorting horse
  - catching horse that has lost driver or rider
  - catching horse that is loose
  - hazing horse that is loose.

**Opportunities for horses to escape and/or cause injury are assessed** by:

- knowledge of racecourse layout, including access and egress points
- knowledge of expected changes in horse behaviour during race meetings, including:
  - agitation and sweating up
  - biting
  - charging forward
  - kicking
  - pulling back or sideways
  - rearing
  - reluctance to move forward
  - turning in circles.

**Racing participants** may include:

- drivers (harness)
- jockeys (thoroughbred)
- punters and other racegoers
- race day staff
- strappers
- trainers.

**Racing safe operating procedures** will include:

- procedures that are relevant to the range of race meeting clerk of course activities, including:
  - catching loose horses
  - fitting gear to horses behind the barriers
  - escorting horses to mounting yard or birdcage enclosure.

**Reports** are relayed to stewards or starter:

- courteously and efficiently
- maintaining confidentiality and discretion
- promptly
- using correct forms of greeting
- via verbal and/or written communication,

## RANGE STATEMENT

---

including:

- describing actions
- giving and receiving clear, accurate and simple messages
- listening to and interpreting information and instructions
- written reports may include simple documents and notes.

# RGRROP304A Perform duties of clerk of scales at greyhound race meetings

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to effectively perform the duties of a clerk of scales at greyhound race meetings. It requires knowledge of greyhound weight variations, greyhound behaviour, common greyhound handling techniques, and verbal and written communication skills.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

**Application of the unit** This unit of competency supports race club personnel or others who may be required to perform the duties of clerk of scales at greyhound racing meetings.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Weigh greyhounds prior to pre-race kennelling.

1. Scales are checked to verify accuracy and correct operation.
2. ***Weight variations*** for greyhounds are explained.
3. ***Weights allowed*** for each greyhound are verified prior to weigh out.
4. Greyhounds are weighed according to safe operating procedures and results are recorded.
5. ***Stewards are advised*** of the results of greyhound weigh out.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to the conduct of clerk of scales duties
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- judging situations and seeking assistance to prevent problems arising or to overcome problems before they develop further
- operating and correctly reading weighing scales
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reporting incidents to supervisor or stewards in a timely manner
- teamwork skills to ensure completion of job tasks
- written communication skills to record data and complete workplace documentation and reports.

#### Required knowledge

- common greyhound handling techniques
- communication procedures used by race day kennel and wider racing industry
- equipment used in work role and procedures for its operation, shut down, maintenance and emergency stop
- greyhound weight allowances and variations
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by greyhounds
- relevant rules of racing
- reporting lines and procedures.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the

## EVIDENCE GUIDE

---

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing clerk of scales duties
- implementation of procedures and timely techniques for the safe, effective and efficient application of clerk of scales operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds
- materials and equipment relevant to assessing candidate's ability to undertake clerk of scales duties
- race day approved kennelling facilities
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge

## EVIDENCE GUIDE

- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform the duties of a greyhound clerk of scales. Workplaces include greyhound racecourses, training tracks and administration buildings.

Factors related to ***weight variations*** for greyhounds may include:

- natural body structure
- sprinters and stayers
- thickness of the skin as a guide to body fat
- muscle bulk or excessive muscle tone
- rib visibility
- stress on bones and joints.

## RANGE STATEMENT

---

**Weight allowances** are determined by:

- previous racing weight
- range permitted with requirement to inform stewards if greyhound is 1kg or more than last registered weight.

Considerations when **greyhounds are weighed** will include:

- greyhound behaviour
- safe handling techniques
- muzzle left on and collar and lead taken off
- clearly calling the new weight.

**Safe operating procedures** may include:

- applying safe manual handling techniques
- considering variables that influence behaviour of greyhounds, such as:

- noise
- other persons or animals

- using personal protective equipment
- using well-maintained and safe gear.

**Stewards are advised :**

- courteously and efficiently
- maintaining confidentiality and discretion
- promptly
- using correct forms of greeting
- via verbal and/or written communication, including:
  - describing actions
  - giving and receiving clear, accurate and simple messages
  - listening to and interpreting information and instructions
  - written reports may include simple documents and notes.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with horses
- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to the conduct of duties of clerk of scales for horses
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- judging situations and seeking assistance to prevent problems arising or to overcome problems before they develop further
- operating and correctly reading weighing scales
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reporting incidents to supervisor or stewards in a timely manner
- teamwork skills to ensure completion of job tasks
- written communication skills to record date and complete workplace documentation and reports.

#### Required knowledge

- common horse handling techniques
- communication procedures used by race day personnel and wider racing industry
- equipment used in work role and procedures for its operation, shut down, maintenance and emergency stop
- horse weight allowances and variations
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting lines and procedures.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing duties of clerk of scales for horses
- implementation of procedures and timely techniques for the safe, effective and efficient application of clerk of scales horse operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to undertake duties of clerk of scales for horses
- race day approved horse weighing facilities
- work instructions and related documentation.

#### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit

## EVIDENCE GUIDE

---

are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform the duties of clerk of scales for horses. Workplaces include thoroughbred racecourses, training tracks and administration buildings.

Reasons ***weight of horse*** may be important include:

- betting fluctuations
- conditioning
- health

## RANGE STATEMENT

---

***Safe operating procedures*** may include:

- performance.
- considering variables that influence behaviour of horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- using an anti-rearing bit or bridle headpiece with bit and double clip lead
- using personal protective equipment
- using well-maintained and safe gear.

***Safe and effective horse handling strategies*** may include:

- applying appropriate restraining techniques
- assessing behaviour prior to handling
- identifying good behaviour traits and bad behaviour traits and vices
- relating horse behaviour to level of education and experience of the horse.

***Stewards are advised :***

- courteously and efficiently
- maintaining confidentiality and discretion
- promptly
- using correct forms of greeting
- via verbal and/or written communication, including:
  - describing actions
  - giving and receiving clear, accurate and simple messages
  - listening to and interpreting information and instructions
  - written reports may include simple documents and notes.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to clerk of scales duties
- completing duties in accordance with safe operating procedures and nominated time frame
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- operating and reading weight scales
- reading and interpreting workplace documents, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding to instructions promptly and safely
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- working in a high pressure environment
- written communications skills to record data and complete workplace documentation and reports.

#### Required knowledge

- approved gear
- basic industry terminology related to race meeting procedures
- communication procedures within the race meeting environment and wider racing industry
- personal grooming and presentation requirements
- protocols and procedures for communicating with licensed and other racing industry personnel
- racing industry safety requirements, including safe operating procedures

## REQUIRED SKILLS AND KNOWLEDGE

- relevant rules of racing
- reporting requirements for irregularities and problems
- weight allowances and variations.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply performing the duties of clerk of scales for jockeys at thoroughbred race meetings
- implementation of procedures and timely techniques for the safe, effective and efficient application of clerk of scales duties
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing

## EVIDENCE GUIDE

---

### Method of assessment

candidate's ability to perform clerk of scales duties

- safe handling areas such as racetracks, including race meetings and trials
- work instructions and related documentation.

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform the duties of clerk of scales for jockeys at thoroughbred race meetings. Workplaces include thoroughbred racecourses, training tracks, administration buildings and public areas.

## RANGE STATEMENT

---

**Weight allowed** for each jockey may include:

- handicap weight allocated by handicapper in relation to:
  - jockey classification, such as senior jockey or apprentice jockey
  - class of race, for example:
    - set weight
    - set weight penalties
    - weight-for-age
- gear included, for example:
  - breastplates
  - rings
- gear excluded, for example:
  - blinkers
  - pacifiers
  - saddlecloths
  - skull caps
  - whips
- lead and lead bags
- weight in relation to body protectors
- minimum weight.

**Weight allowances for apprentice jockeys** may include:

- allowance for group and listed races
- checking race books to ensure all information is correct, including apprentice claims
- location of race, for example:
  - country regions
  - metropolitan
  - provincial
- number of winners ridden in each region
- kilogram allowance in each region in relation to numbers of winners ridden
- keeping records, for example winning rides book
- weight claim at start and end of the day's racing.

Factors when **jockeys are weighed out** may include:

- correct gear is included and scrutinised
- jockeys are wearing correct clothing
- jockeys are weighed approximately 30 minutes before race.

**Approved gear** may include:

- breastplates

## RANGE STATEMENT

---

- girths
  - girth covers
  - pacifiers
  - rings
  - saddles
  - stirrup leathers
  - surcingles.
- Stewards are advised :**
- courteously and efficiently
  - maintaining confidentiality and discretion
  - promptly
  - using correct forms of greeting
  - via verbal and/or written communication, including:
    - describing actions
    - giving and receiving clear, accurate and simple messages
    - listening to and interpreting information and instructions
    - written reports may include simple documents and notes.
- Jockeys ***weighed-in*** are:
- first five jockeys in order of race result.
- Allowed variations*** at weigh-in and weigh-out may include:
- allowance for bridle
  - declaring overweight at weigh-out
  - overweight due to accumulated mud or moisture
  - penalties at weigh-in for flat races and hurdles
  - underweight due to heavy sweating of jockey.

# RGRROP307A Perform duties of lure driver at race meetings and trials

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to operate the lure during greyhound race meetings and trials. It requires an ability to observe and respond to greyhound behaviour during and after a race by controlling the speed and distance of the race field from the lure. Performing pre and post-operation checks on lure equipment and adhering to safe operating procedures are essential, as the operation of the lure represents a high risk of injury to greyhounds and personnel.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports race club staff or others who are authorised to operate the greyhound lure during race meetings and trials.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- Applying safety handling and work practises when catching, leading and controlling greyhounds
- Communicating with race meeting staff, stewards, racing participants and others using assertive communication techniques to gather, interpret and relay information related to lure operations
- Completing duties in accordance with safe operating procedures and nominated time frame
- Evaluating risks associated with lure operations
- Giving evidence in racing inquiries and investigations
- Making effective decisions and resolving routine problems within the bounds of duties and responsibilities
- Making judgements on necessity to stop lure during a race
- Operating lure equipment in accordance with safe operating and race day procedures
- Reading and interpreting workplace documentation, including rules of racing
- Relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- Reporting incidents to stewards in a timely manner
- Reporting problems with lure operation to stewards, racing officials and/or race

## REQUIRED SKILLS AND KNOWLEDGE

club staff in a timely manner

- Responding promptly to emergencies or potential hazards by controlling lure speed and distance or shutting down equipment
- Written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within race day operations and wider racing industry
- environmental protection requirements, including noise and emission control
- equipment used in work role and the procedures for its operation, shut down maintenance and emergency stop
- general OHS requirements, including operating machinery and working in a confined space
- greyhound behaviour relating to chasing prey or lure and racing with others
- principles of racing industry animal welfare requirements and guidelines for animals used in competition
- race distances and individual track characteristics
- racing industry safety requirements, including safe operating procedures
- race day and trial lure operation procedures
- rules of racing in relation to conduct of races or trials, operation of lures and greyhound welfare
- time management for the completion of work tasks
- written and verbal report formats and protocols for reporting issues to stewards or racing officials.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when driving a lure at race meetings or trials

## EVIDENCE GUIDE

---

- implementation of procedures and timely techniques for the safe, effective and efficient application of lure driving operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to perform lure driver duties
- safe handling and lure operation facilities, such as training and racetracks and a variety of greyhound fields
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of

## EVIDENCE GUIDE

### assessment

particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Rules of racing , protocols and procedures*** related to lure operation may include:

- Australian and local rules of racing
- adhering to responsibilities under OHS legislation and workplace practices
- adhering to state, territory or federal legislation related to animal welfare
- following instructions from race day stewards and other officials
- following safe operating procedures.

***Lure equipment*** may include:

- lure, such as artificial hare or rabbit
- lure arm
- lure engine, drive wheels and pulley system
- power supply:
  - diesel
  - mains power
- operating panel
- safety cut-off switch.

***Hazards in operation of lure*** may include:

- chemicals and hazardous substances
- confined space
- fumes and emissions
- greyhounds
- lure and lure cables or wiring
- machinery and equipment
- noise
- other people, including:

## RANGE STATEMENT

---

- Lure is operated by:***
- contractors
  - employees
  - visitors
  - physical environment
  - unsafe work practices.
  - conducting pre-start safety and operations check
  - controlling distance of lure from race field so as not to impede or otherwise disrupt running of the race
  - performing emergency stop of lure due to incident or potential contact of lure with people or greyhounds
  - running lure during stir-up
  - stopping lure post-race after drawing greyhounds into catching pen area.
- Safe and appropriate distance of catching pen will include:***
- considering actual distance according to the behaviour of individual race fields
  - stopping lure at a sufficient distance to prevent greyhounds doubling back down the track once the lure has stopped.

## RGRROP308A Drive mobile start vehicle

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to safely and efficiently drive a mobile start vehicle at harness race meetings under the direction of the race starter. It requires knowledge and skills associated with vehicle, barrier and starter equipment safety and operations checks, strategies to maintain required speed and distance from race field during starting operations, and taking evasive action in emergency situations in accordance with the rules of racing and related protocols.

To undertake this unit the candidate will have an understanding of horse behaviour traits and be able to apply workplace OHS standards. A current driver's licence and a high level of driving experience is also a requirement.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel and others authorised to drive the mobile start vehicle at harness race meetings.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe and effective driving and work practices when operating start vehicle
- communicating with stewards, racing officials, licensed and registered personnel, co-workers and others using assertive communication techniques to gather and relay information related to driving the mobile start vehicle at race meetings
- completing duties in accordance with safe operating procedures and nominated time frame
- evaluating risks associated with race start activities
- following and responding to instructions promptly
- judging situations and seeking assistance to prevent problems arising or to overcome problems before they develop further
- identifying behaviour of horses
- reading and interpreting workplace documentation, including relevant rules of racing
- recognising potential incidents or emergency situations and applying appropriate evasive action and strategies
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- relaying messages to others
- teamwork skills to ensure completion of job tasks

## REQUIRED SKILLS AND KNOWLEDGE

- written communication skills to complete workplace documentation and reports.

### Required knowledge

- industry terminology related to race meetings and the wider industry
- limits of own responsibility
- personal grooming and presentation requirements
- protocols and procedures for communicating with licensed and other racing industry personnel
- protocols and procedures associated with race start driving operations
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when assisting with harness race starts
- demonstration of effective mobile start vehicle driving skills, including maintaining required speed and distance from race field during starting operations and evasive action techniques
- implementation of procedures and timely techniques for the safe, effective and efficient application of mobile start vehicle duties
- working with others to undertake and complete driving procedures that meet required outcomes.

---

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness horses
- materials and equipment relevant to assessing candidate's ability to drive mobile start vehicle at harness races
- mobile start vehicles
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities,

## EVIDENCE GUIDE

Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Pre-start ***vehicle check*** will include:

- battery
- damage
- fuel
- lights
- oil
- power steering fluid
- transmission fluid
- tyre pressure
- water.

Checking ***barrier and starter equipment*** will include:

- barrier wing hydraulics
- communication systems between starter and driver
- damage
- operation
- transmission fluid.

***Safe operating procedures*** will include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of horses, such as:

## RANGE STATEMENT

---

- fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
  - ensuring vehicle keeps a suitable distance from horses that may be warming up on the track
  - ensuring driver stops or moves out of the way if there is a problem with a horse
  - ensuring horses are not near track entrance as vehicle enters.
- Track emergencies** may include:
- horse injury
  - loose horses
  - mobile wings malfunction
  - driver injury.
- Vehicle is driven out of the path** of race field by:
- accelerating away from field
  - moving to the side of the track then off track
  - taking care around corners as vehicle is top heavy with starter.
- Reports to race club** may include:
- via verbal and/or written communication, including:
    - describing actions
    - giving and receiving clear, accurate and simple messages
    - listening to and interpreting information and instructions
    - written reports may include simple documents and notes.

# RGRROP309A Perform duties of catching pen supervisor

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to supervise and assist in the catching of greyhounds after a race or trial and includes post-race identification of greyhounds.

To undertake this unit the candidate will be able to apply safe greyhound handling skills. It is recommended that RGRCMN201A Follow OHS procedures and observe environmental work practices be delivered in conjunction with or before this unit of competency.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports licensed and registered personnel and others in the greyhound racing industry who may be required to supervise catching pen operations as part of their job function.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when catching, leading and controlling greyhounds
- communicating with race meeting staff, stewards, racing participants and others using assertive communication techniques to gather, interpret and relay information related to the conduct and operation of racing and catching pens
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- evaluating risks associated with catching pens and catching greyhounds
- giving instructions
- giving evidence in racing inquiries and investigations
- identifying and correctly fitting gear
- identifying individual greyhounds using industry-approved terminology, records and signalment
- identifying injured and distressed greyhounds that require assistance
- making effective decisions and resolving routine problems within the bounds of the duties and responsibilities of a catching pen supervisor
- performing pre and post-race catching pen supervisory procedures
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with

## REQUIRED SKILLS AND KNOWLEDGE

varying physical and mental abilities

- reporting incidents to stewards in a timely manner
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- characteristics of healthy greyhounds
- communication procedures within the kennel and wider racing industry
- equipment used in work role and procedures for its operation, shut down maintenance and emergency stop
- first aid procedures for humans and greyhounds
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- race day and trial catching pen procedures
- rules of greyhound racing, including state and local variations relating to job function and associated tasks, protocols and procedures.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when supervising catching pen operations
- implementation of procedures and timely techniques for the safe, effective and efficient application of catching pen operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds at different stages of race preparation
- materials and equipment relevant to assessing candidate's ability to supervise catching pen operations
- safe handling and catching pen areas, such as training and racetracks
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols
- RGRPSG201A Handle greyhounds.

### Guidance information for

Assessment methods should reflect workplace demands

## EVIDENCE GUIDE

### assessment

(e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Props*** used to attract greyhounds to catching area may include:

- false lure dragged by catching pen attendant
- synchronised timing of lure switch off with approach of greyhounds to catching area
- visual barrier to block greyhounds' view of track.

***Rules of racing , protocols and procedures related to catching pen operations*** may include:

- Australian and local rules of racing
- adhering to responsibilities under OHS legislation and workplace practices
- adhering to state, territory or federal legislation related to animal welfare
- adhering to personal presentation standards
- following instructions from race day stewards and other officials.

***Potential hazards in catching area*** may include:

- getting hit by the lure
- getting hit by greyhounds running into the pen
- getting hit or jammed in the catching gate
- greyhounds attacking other greyhounds
- greyhounds not entering the catching pen and running back down the track
- making physical contact with greyhound catchers
- tripping or falling while encouraging greyhounds into the catching area.

## RANGE STATEMENT

**Strategies to minimise risk** may include:

- controlling access to the catching area until it is safe to enter
- switching off lure at strategic distance from catching pen
- ensuring all greyhounds are in catching pen before closing the gate
- ensuring timing of use of catching area props is likely to attract greyhounds into pen
- directing catchers to concentrate on catching their own greyhound
- knowing greyhound behaviour traits
- moving swiftly to catch greyhounds that may appear to be ready to fight
- paying attention to where catchers and greyhounds are in the catching pen
- talking to greyhound trainer about a greyhound's behaviour.

**Identification of greyhounds** may include:

- coat colour and markings
- ear brand
- race rug colour and number
- racing registration certificate.

**Incidents** to be reported to stewards may include:

- accidents or near misses in the catching pen area or surrounds
- inability to verify identification of greyhounds with racing documentation
- injured, distressed or sick greyhounds
- failure of catching pen equipment
- failure of racing participants to comply with catching pen supervisor's instructions.

## RGRROP310A Supervise race meeting kennels

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to supervise race meeting kennelling procedures before, during and after racing. It requires adherence to the compliance requirements associated with the rules of racing and related protocols, allocating duties to and monitoring performance of kennel staff to ensure procedures meet security standards and race schedule timetable in line with stewards' directions.

To undertake this unit the candidate will be able to oversee safe greyhound handling skills. It is recommended that RGRCMN201A Follow OHS procedures and observe environmental work practices be delivered in conjunction with or before this unit of competency.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports licensed and registered personnel and others in the greyhound racing industry who may be required to supervise race meeting kennels as part of their job function.

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with race meeting staff, stewards, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to supervising race meeting kennels
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- delegating duties to others, including volunteers and workers
- evaluating risks associated with race meeting kennelling and race day operations
- giving evidence in racing inquiries and investigations

## REQUIRED SKILLS AND KNOWLEDGE

- identifying individual greyhounds using industry approved terminology, records and signalment
- identifying injured or distressed greyhounds that require assistance
- making effective decisions and resolving routine problems within the bounds of duties and responsibilities of a race meeting supervisor
- monitoring kennelling and greyhound security procedures and using effective communication skills to ensure compliance by staff and greyhound attendants
- operating closed circuit television and other devices used for monitoring security
- operating telephones, two-way radios and other communication tools
- overseeing safe handling and work practices when dealing with greyhounds
- reading and interpreting racing documents relating to race distances, race fields, track conditions, greyhound identification and performance records
- reading and interpreting workplace documentation, including rules of racing and kennelling procedures
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reporting incidents to stewards in a timely manner
- resolving disputes according to greyhound racing protocols and procedures
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- characteristics of healthy greyhounds
- common features of injury, illness and distress in greyhounds
- communication procedures within the racing kennel and wider racing industry
- equipment used in work role and procedures for its operation, shut down, maintenance and emergency stop
- positive and effective communication strategies used to manage and work with a team, deal with conflicts and resolve disputes
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- rules of racing and industry protocols and procedures in relation to kennelling, greyhound inspections, pre-race procedures, swabbing, greyhound welfare and the rights and responsibilities of greyhound attendants, owners and kennel staff.

## Evidence Guide

### EVIDENCE GUIDE

---

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when supervising race meeting kennel operations
- implementation of procedures and timely techniques for the safe, effective and efficient application of race meeting kennel operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds
- materials and equipment relevant to assessing candidate's ability to supervise race meeting kennel operations
- safe handling and approved race meeting kennel areas and associated facilities
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Rules of racing*** that apply to kennelling procedures may include:

- appointment of stewards and officials
- authority, committee and stewards
- greyhounds in public places
- identification of greyhounds
- race meetings
- registration of greyhounds
- registration of owners, trainers and attendants
- running of races
- weights and inspections of greyhounds.

## RANGE STATEMENT

**Security** requirements may include:

- greyhound attendants must be supervised while in the vicinity of or handling greyhounds
- greyhounds must be monitored while kennelled to identify ill or distressed animals
- kennels must be:
  - designed to prevent contact with greyhounds by persons or objects
  - free of materials or contaminants that could affect the blood, urine or samples taken from greyhounds at race meetings
  - free of materials, substances or objects that could injure or cause illness to greyhounds
  - locked with tamper-evident locks and seals
  - monitored to identify anyone who has contact with or is in the vicinity of greyhounds that have been kennelled prior to racing or swabbing.

**Duties** performed by kennel staff may include:

- allocating and collecting race rugs and attendant jackets
- allocating kennels and escorting greyhounds and attendants to kennels
- cleaning kennels and surrounding area pre-race meeting
- cleaning and securing kennels post-race meeting
- escorting greyhounds to parade area
- identifying greyhounds during pre-kennel inspections, prior to racing, after racing and prior to swabbing
- supervising greyhounds and attendants during approved contact prior to racing
- supervising post-race hosing and care of greyhounds
- supervising stir-up
- supervising weighing of greyhounds.

**OHS hazards and risks** may include:

- contraction of zoonotic diseases
- extremes of hot or cold weather
- greyhounds biting, fighting or running into people
- high levels of noise due to greyhounds barking
- lifting greyhounds
- trips, slips and falls

## RANGE STATEMENT

---

Features considered to verify **identification and health** of greyhounds may include:

- unsafe work practices
- working in confined spaces.
- identification characteristics, including:
  - approximate age
  - colour
  - ear brands
  - greyhound authority issued identification certificates
  - other signalment, including:
    - nail colour
    - scars
    - whorls
  - sex
- general characteristics of good health, including:
  - absence of skin disease
  - colour of conjunctiva
  - ease of movement when walking around inspection area
  - general attitude and interest in surroundings
  - reaction to flexion or extension of joints
  - reaction to light
  - reaction to palpation of external body structures.

Protocol and procedures when kennels are **allocated** may include:

- individual kennels cannot be reserved for greyhounds
- individual kennels within the race field are randomly allocated to greyhounds
- lock and seal numbers are recorded for each kennel
- race field kennel rows are allocated using a random selection procedure
- race field kennels include all animals in a particular race
- separate kennels are prepared and kept secure for greyhounds that are nominated for swabbing
- swabbing kennels are allocated on a random basis then locked with an individual lock and seal.

## RANGE STATEMENT

|                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Procedures to follow when greyhounds are <b>escorted and secured</b> in kennels will include: | <ul style="list-style-type: none"> <li>• a separate lock and numbered seal are attached once greyhound has been installed</li> <li>• a separate lock and seal are attached to gate enclosing the race field kennel row once all greyhounds have been installed</li> <li>• attendants may only visit greyhounds with the approval of stewards or kennel supervisor</li> <li>• attendants must be escorted to and from kennel by race meeting official</li> <li>• each greyhound and attendant must be escorted by a race meeting official to the allocated kennel, with the official observing the installation of the greyhound and ensuring bedding is compliant with the rules of racing.</li> </ul> |
| Attendants are <b>supervised</b> during visits to kennels to:                                 | <ul style="list-style-type: none"> <li>• ensure they do not give anything or do anything, or allow anyone else to give or do anything that could affect the greyhound's race performance or welfare.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Main features of the pre-race <b>marshalling</b> procedure include:                           | <ul style="list-style-type: none"> <li>• greyhound attendants are: <ul style="list-style-type: none"> <li>• called to collect their greyhounds</li> <li>• allocated a jacket based on greyhound box draw</li> <li>• supervised as they bring greyhounds to marshalling area</li> </ul> </li> <li>• greyhound collars, muzzles and leads are checked for compliance with rules as well as safe condition and fit</li> <li>• greyhound identification is verified</li> <li>• race rugs are allocated to greyhounds based on box draw.</li> </ul>                                                                                                                                                         |
| <b>Conduct of stir-up</b> involves:                                                           | <ul style="list-style-type: none"> <li>• lure being operated within sight and sound of greyhounds to excite some greyhounds immediately prior to racing</li> <li>• greyhounds being held by their attendants during the stir-up in an allocated, usually fenced area</li> <li>• no greyhounds being allowed on the track during stir-up.</li> </ul>                                                                                                                                                                                                                                                                                                                                                    |
| <b>Empty-out</b> procedures may include:                                                      | <ul style="list-style-type: none"> <li>• greyhound and attendant are kept under observation during empty-out and pre-race marshalling</li> <li>• greyhound attendant is escorted to kennel and area allocated for greyhounds to urinate or</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## RANGE STATEMENT

Procedures of ***escorting greyhounds to race start*** include:

- defecate.
- greyhounds and attendants are allocated and must wear race rugs and jackets that correspond to the greyhound box draw
- greyhounds must stay in box draw order during the walk to the race start
- if a greyhound stops for any reason, the rest of the field must also stop so that the race field is not spread out over a large distance
- parade officials must assert their authority using effective communication skills to ensure greyhound attendants comply with parade procedures
- race field must reach the race start area within allocated time frame to ensure greyhounds can be loaded so race starts are on time.

Features of ***distressed or ill*** greyhounds may include:

- behavioural characteristics, including:
  - body curled, head lowered and tail between legs
  - general lack of interest in surroundings and/or lethargy
  - laying down and refusing to stand
  - unwilling to leave kennel area
- physical characteristics of illness or distress, including:
  - convulsions
  - diarrhoea
  - discharge of blood
  - excessive panting or salivating
  - loss of consciousness
  - straining to pass urine or faeces without producing any material
  - vomiting
  - yelping or whimpering.

Features of ***injured*** greyhounds may include:

- lack of coordination
- laying down and refusing to stand
- limping
- reluctance to put limb to the ground
- reluctance to walk.

***Swabbing*** will include:

- escorting greyhound and attendant from the time they are selected for swabbing until

## RANGE STATEMENT

---

greyhound is installed in swab kennel and kennel is secured using individual lock and seal by a race meeting attendant

- escorting greyhound and attendant to sample collection area
- verifying greyhound identification prior to collecting samples
- designated swabbing attendant or official collecting blood, urine and other samples from greyhounds
- following procedures for collecting and storing samples.

## Unit Sector(s)

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

# RGRROP311A Perform duties of greyhound race starter

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to safely and efficiently conduct greyhound race starts. It requires knowledge and skills associated with preparing for race starts, and working closely with other race meeting staff to start races and complete post-race activities, including the provision of reports to stewards and race club personnel.

To undertake this unit the candidate will be able to apply safe greyhound handling skills and follow workplace OHS standards.

This unit of competency operates in work environments of racing kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports licensed and registered personnel and others in the greyhound racing industry who may be required to act as starters for greyhound race meetings as part of their job function.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                            | 11. Permission to start race is confirmed with stewards.                                                                              |
|                            | 12. Race start is initiated once final greyhound is boxed.                                                                            |
|                            | 13. Loading and start <b>reports are provided</b> to stewards.                                                                        |
|                            | 14. Notes on problems with starters are updated for personal records.                                                                 |
|                            | 15. Boxes and other start equipment are checked for damage and/or maintenance requirements prior to shutting down.                    |
|                            | 16. Repairs or maintenance requirements are reported to race club.                                                                    |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds
- communicating with race meeting staff, stewards, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to greyhound racing starts
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- evaluating risks associated with race meeting starts and race day operations
- giving evidence in racing inquiries and investigations
- identifying individual greyhounds using industry-approved terminology, records and signalment
- identifying injured or distressed greyhounds that require assistance
- making effective decisions and resolving routine problems within the bounds of duties and responsibilities of a race meeting starter
- operating starting box equipment in accordance with safe operating and race day procedures

## REQUIRED SKILLS AND KNOWLEDGE

- reading and interpreting racing documents relating to race distances, race fields, track conditions, greyhound identification and performance records
- reading and interpreting workplace documentation, including rules of racing and starting procedures
- recognising damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reporting incidents to stewards in a timely manner
- resolving disputes according to greyhound racing protocols and procedures
- teamwork skills to ensure completion of job tasks
- working in a high pressure environment
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- approved gear
- common features of injury, illness and distress in greyhounds
- communication procedures within the race meeting and wider racing industry
- equipment used in work role and procedures for its operation and maintenance
- greyhound handling and controlling techniques
- OHS and environmental legislative requirements
- organisational policies and procedures
- positive and effective communication strategies used to work with a team, deal with conflicts and resolve disputes
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of

---

## EVIDENCE GUIDE

---

this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when starting greyhound races
- implementation of procedures and timely techniques for the safe, effective and efficient application of race starting operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds
- materials and equipment relevant to assessing candidate's ability to start greyhound races
- safe handling and approved race starting and associated facilities
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other

## EVIDENCE GUIDE

### Guidance information for assessment

units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Past problems*** with particular greyhounds may include:

- greyhound:
  - attempts to fight with other dogs
  - charges forward
  - is reluctant to move into boxes
  - pulls sideways.

***Operation of start boxes and other equipment*** may include:

- boxes are clean
- back doors are working properly
- lids are set properly
- lids open properly
- nine, ten and blank magnets are available
- red and green lights are working
- spare muzzles are available
- trip start is working.

***Rules of racing*** in relation to race starts may include:

- box draw and withdrawal after box draw
- failing to pursue the lure
- fighting
- greyhounds suffering injury or condition

## RANGE STATEMENT

---

***OHS and racing safety protocols and procedures*** may include:

- judge's decision
- lure driver, lure starting point and lure distance to leading greyhound
- no race, false start, postponement or abandonment of event
- unsatisfactory performance.
- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of greyhounds, such as:
  - fences and equipment
  - lure, wind and noise
  - other persons or animals
  - vehicles
- contributing to development of risk control measures
- following safe work practices
- following accident and injury procedures
- identifying and reporting unsafe work practices
- identifying race start hazards, including:
  - broken start equipment
  - gear breakage
  - injury to staff, attendant or greyhound
  - loose greyhound
- identifying emergency situations
- understanding individual greyhound behaviour
- wearing approved personal protective equipment.

***Incidents*** may include:

- delayed race start
- greyhound turning in box
- injured greyhound
- loose greyhound
- faulty equipment or box operation.

***Reports are provided*** to stewards:

- courteously and efficiently
- maintaining confidentiality and discretion

## RANGE STATEMENT

---

- promptly
- using correct forms of greeting
- via verbal and/or written communication, including:
  - describing actions
  - giving and receiving clear, accurate and simple messages
  - listening to and interpreting information and instructions
- written reports may include simple documents and notes.

## RGRROP312A Perform duties of licensing or registration clerk

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to apply knowledge of racing terminology, identification of greyhounds or horses, and classes of registration or licenses to racing governing body applications and renewals process. It requires an ability to communicate verbally and provide assistance to customers when submitting applications, close attention to detail and timely completion of required documentation.

This unit of competency operates in workplace environments of racing administration, stables, kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel who are required to perform the administration duties of a racing governing body licensing or registration clerk as part of their job role.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry.

Consequently when performance criteria are applied they will relate to either the greyhound code or harness code or the thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

---

safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry supervised access to racing administration offices relevant to the applicable racing code
- materials and equipment relevant to assessing candidate's ability to perform licensing and registration duties
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

## RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Terminology*** used when identifying greyhounds or horses may include:

- brands classification
- body marking classification
- directional terms, for example:
  - forequarter
  - hindquarter
  - near-side
  - off-side
- electronic identification
- gender classification
- height classification
- pedigree
- points of the greyhound or horse.

***Identification features*** of greyhounds or horses may include:

- brands
- breeder of animal
- colours
- date of whelping (greyhound specific)
- DNA
- markings
- owner
- racing name
- registration number
- sire and bitch or dam
- sex.

***Brands*** may be described by:

- age brands
- alpha angle coding
- ear brands (greyhound specific)
- freeze brands.

***Documents*** used may include:

- applications for racing colours
- applications for animal names
- incoming or outgoing clearances for interstate and overseas
- leases and lease cancellations
- microchip records
- pup or foal registrations

## RANGE STATEMENT

---

- Racing participants* may include:
- syndications
  - transfers of ownership.
  - animal owners
  - licensed and registered personnel.
- Classes of license or registration* may include:
- approved rider
  - apprentice jockey
  - catching pen attendant
  - driver
  - greyhound attendant
  - jockey
  - number one trainer
  - owner
  - owner trainer
  - public trainer
  - stablehand
  - stud master/manager
  - trackwork driver
  - trackwork rider.

## RGRROP314A Perform duties of photo finish operator at greyhound or horse race meetings

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to prepare for race day and operate specialised race result equipment, including cameras, computers and other technology. It requires an ability to identify individual greyhounds or horses, liaise with stewards and other racing officials, work to deadlines and report on race outcomes.

This unit of competency operates in workplace environments of racing administration, stables, kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel who are required to perform photo finish operations at greyhound or horse race meetings as part of their job role. Some states and racing codes have crossover tasks associated with the duties of race judge and photo finish operator.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to either the greyhound code or harness code or the thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT               | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                         |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying OHS and environmental work procedures
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information relating to photo finish operations
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- consulting concisely and effectively with colleagues and team members
- evaluating advantages or disadvantages of a variety of potential solutions to resolve problems
- making effective decisions, including accurately identifying the correct winner in a tight finish
- operating photo finish equipment and technology
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- visual acuity to identify colours, individual animals and correct winner

## REQUIRED SKILLS AND KNOWLEDGE

- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- hazards and potential hazards in the workplace and risk control procedures
- identification features of greyhounds or horses
- industry terminology related to racing procedures and photo finish operations
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- purpose and comprehension of racing operations documentation
- race colours and barrier or box numbers
- relevant rules of racing
- reporting requirements for irregularities and problems
- types of equipment and procedures for operation and maintenance.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when conducting photo finish procedures
- implementation of procedures and timely techniques for the safe, effective and accurate application of photo finish procedures
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

range of workplace-relevant contexts and include dealings with an appropriate range of situations.

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry supervised access to race meetings and photo finish facilities relevant to the applicable racing code
- materials and equipment relevant to assessing candidate's ability to complete photo finish procedures
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Race fields and distances*** verification may include:

- race book, including runners and race distances
- scratchings list.
- animal colours and markings
- driver or rider race colours
- greyhound rug colours
- new gear, for example:
  - blinkers used on horses
  - shadow rolls.

***Greyhound or horse identification features*** may include:

***Equipment*** may include:

- camera
- computer
- lighting
- mirror box
- telephone
- television monitor.

***Rules of racing*** are:

- Australian and local rules of racing specific to the racing code.

***OHS and racing safe operating procedures*** may include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- contributing to development of risk control measures
- following safe work practices
- identifying and reporting unsafe work

## RANGE STATEMENT

---

practices

- identifying hazards
- identifying emergency situations
- wearing approved personal protective equipment.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying OHS and environmental work procedures
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information relating to timekeeping operations
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- consulting concisely and effectively with colleagues and team members
- dexterity in manual timekeeping
- evaluating advantages or disadvantages of a variety of potential solutions to resolve problems
- making effective decisions, including accurately identifying correct winner in a tight finish
- numeracy skills to perform simple calculations
- operating timekeeping equipment and technology
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- visual acuity sufficient to identify correct winner
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- communication procedures, including reporting lines within the workplace and wider racing industry

## REQUIRED SKILLS AND KNOWLEDGE

- ethical conduct standards of relevant racing principal authority
- hazards and potential hazards in the workplace and risk control procedures
- identification features of greyhounds or horses
- industry terminology related to racing procedures and timekeeping operations
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- purpose and comprehension of racing operations documentation
- relevant rules of racing
- race colours and barrier or box numbers
- reporting requirements for irregularities and problems
- types of equipment and procedures for operation and maintenance.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when conducting timekeeping procedures
- implementation of procedures and timely techniques for the safe, effective and accurate application of timekeeping procedures
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

#### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is

## EVIDENCE GUIDE

---

to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry supervised access to race meetings and timekeeping facilities relevant to the applicable racing code
- materials and equipment relevant to assessing candidate's ability to complete timekeeping procedures
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

# RGRROP316A Perform duties of track supervisor during trackwork operations

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to supervise the activities of licensed and registered personnel and race club visitors, and to monitor track usage for the training of racing animals. It requires the ability to ensure the rules of racing and race club safe operating procedures are followed, communicate effectively with industry participants, complete required documentation and report the need for repair or maintenance to the track or immediate surrounds.

This unit of competency operates in workplace environments of racing administration, stables, kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports race club employees to supervise trackwork operations.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry.

Consequently when performance criteria are applied they will relate to the greyhound or harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Open track for use.

1. Track is inspected for safety compliance .
2. Track barriers, signs and/or cones are placed on 'no-go' areas.
3. Track access notices are displayed and lights switched on if required.
4. ***Paperwork*** for registering track use is prepared.

| ELEMENT            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assessing race club and industry requirements associated with trackwork and training operations, including safety, security, licensing, and staff and animal welfare
- communicating with stewards, race club and licensed and registered personnel, and others using assertive communication techniques to gather, interpret and relay information related to trackwork operations
- completing duties in accordance with safe operating procedures and nominated time frame

## REQUIRED SKILLS AND KNOWLEDGE

- complying with organisational policies and procedures
- evaluating advantages or disadvantages of a variety of potential solutions to resolve problems
- identifying industry-approved gear and illegal devices
- identifying irregularities with greyhounds or horses that may indicate injury, distress or illness
- identifying potential hazards and evaluating risks associated with trackwork activities
- making effective decisions
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- approved gear and illegal devices
- ethical conduct standards of relevant racing principal authority
- industry terminology related to racing and trackwork operations
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- protocols and procedures for communicating with licensed and registered personnel, racing officials and other relevant people
- racing industry animal welfare requirements
- reporting requirements for trackwork irregularities and problems
- rules relating to common welfare principles of racing animals, race club security, track conditions and associated documentation
- rules relating to licensed personnel, permit holders and others authorised to undertake trackwork activities
- relevant rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## EVIDENCE GUIDE

---

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to the specific industry sector and workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when supervising trackwork operations
- implementation of procedures and timely techniques for the safe, effective and efficient application of trackwork supervision duties
- working with others to undertake and complete supervisory procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to supervise trackwork operations
- relevant racing code trackwork sites, such as training and racetracks
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of

## EVIDENCE GUIDE

| <b>Guidance information for assessment</b> | <p>Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).</p> |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Track ***inspected for safety compliance*** may include:

- access to other tracks restricted via barriers, signs or gates
- alarms operational
- effective lighting
- foreign objects, litter or other hazards or people
- loose greyhounds
- loose or bolting horses
- personnel working on tracks
- placement of plastic cones, markers or witches hats
- rail placement and repair
- relocation of irrigators
- sprinklers turned off or watering truck removed
- stray or feral animals
- track notices displaying direction of track use and pace allowed on various tracks

## RANGE STATEMENT

**Paperwork** for registering track use will include:

- track surface following maintenance
- track surface following heavy rain.
- date of use
- fee status
- name of track supervisor
- name of trainer of greyhound or horse
- number of greyhounds or horses per trainer or handler
- type of track to be accessed.

**Safe operating procedures** for driver, rider or attendant may include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - lure, wind and noise
  - other persons or animals
  - vehicles
- driving or riding in an industry-recognised manner
- driving or riding horses purposefully to and from the track
- following track rules, such as:
  - obeying light signals at gap
  - driving or riding in single file at crossings
  - ensuring horses working slow move to outside of track
  - driving or riding at correct pace on designated tracks
  - driving or riding in proper direction as directed by signage and gap attendant
  - observing track entrance and exit rules
- stirrup irons at approved length
- using personal protective equipment
- using safe gear and saddlery.
- approved helmet

**Personal protective equipment**

## RANGE STATEMENT

---

may include:

- approved vests
- gloves
- goggles
- smooth soled riding boots
- work boots.

**Gear** compliance will cover:

- Australian and local rules of racing-approved gear list for relevant racing code
- illegal devices, including:
  - jiggers
  - unapproved heart rate monitors or other battery operated or electrical devices.

**Animal care and welfare** requirements will include:

- careless driving or riding practices that may cause injury or distress to horses
- identifying and reporting bleeders to stewards
- incidents that may cause injury to other greyhounds or horses
- reporting accidents or near misses
- visible signs of neglect, distress or injury in animals being worked.

**Traffic is controlled** by:

- number of greyhounds or horses on any track at one time
- number of greyhounds or horses that may enter or exit a track at one time
- pedestrian traffic.

**Potential problems** are managed by:

- identifying hazards
- controlling risks
- eliminating hazardous materials and substances
- following safe operating procedures
- reporting unsafe operating procedures
- using correct manual handling techniques, including:
  - carrying
  - lifting
  - shifting
- using personal protective equipment.

**Damage or wear and tear** to track and surrounds may include:

- breakdown of track alarm
- cutting up of grass tracks requiring divots replacement
- damage to running rails
- depressions in woodchips, sand or cinders tracks

## RANGE STATEMENT

---

- Reports on track use* will include:
- lighting failure
  - heavy rain causing wash away
  - shifting woodchips, sand or cinders.
  - accidents to drivers, riders, handlers or others
  - injuries to greyhounds or horses
  - near miss incidents
  - reports of bleeders
  - track use by trainers to club accounts.

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing common

# RGRROP317A Attend racing events and comply with protocols and safety procedures

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to safely attend race meetings and/or greyhound or horse events held at racecourses. It requires an understanding of regulatory standards related to the rules of racing and racing events industry practices and protocols. The unit covers competencies related to the identification of greyhound and/or horse behaviour and safe methods of moving around animals, as well as knowledge of industry-specific OHS requirements and personal presentation standards.

This unit of competency operates in work environments of racing kennels and stables, racecourses and public areas.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Application of the Unit

### Application of the unit

This unit of competency supports media representatives, race club committee members, owners, race club staff and others required to comply with safe operating procedures, racing protocols and identification of animal behaviour in a variety of situations related to racing events.

Competencies attained in this unit apply to the greyhound or harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adhering to safety procedures when approaching and moving around animals
- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to the conduct and operation of racing events
- following directions from racing officials
- identifying safe animal handling practices
- identifying safe work practices
- interpreting and complying with workplace protocols
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reviewing and accurately identifying work requirements
- using appropriate language and interpersonal techniques.

#### Required knowledge

- dress code and behavioural protocol requirements as determined by industry and workplace
- greyhound or horse behaviour traits
- OHS obligations
- own roles, responsibilities and relationships with other industry personnel
- race day procedures
- relevant industry rules and regulations, including rules of racing

## REQUIRED SKILLS AND KNOWLEDGE

- safe operating procedures
- workplace communication channels, protocols and procedures.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when attending racing events
- demonstration of ability to approach and move around animals in a safe manner
- implementation of procedures and timely techniques for the safe, effective and efficient application of required actions and behaviour covering safety of self, others and animals
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of race meeting relevant contexts and include dealings with an appropriate range of situations.

#### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

## EVIDENCE GUIDE

---

- a range of educated greyhounds and harness or thoroughbred horses for practical experience
- industry supervised access to racecourses to view training activities and to racing events to view marshalling yard or enclosure operations
- materials and equipment relevant to assessing candidate's ability to attend race meetings and comply with protocols and safety procedures
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

## RANGE STATEMENT

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Factors that affect ***greyhound or horse behaviour*** may include:

- senses:
  - eyesight
  - hearing
  - smell
  - sixth sense
  - taste
  - touch
- environment:
  - animal location, including kennels or stalls
  - marshalling area or enclosure
  - presentation area
  - crowds
  - enclosed spaces, including:
    - barrier
    - boxes
  - inclement weather conditions, including:
    - extreme heat
    - wind
  - loud noises
  - other greyhounds or horses
  - pre or post-race activity.

***Signs of distress , excitement or nervousness in greyhounds or horses*** may include:

- agitated and sweaty
- attempts to bite
- charges forward
- kicks
- pulls back
- pulls sideways
- rears
- reluctant to move forward
- turns in circles.

***Safety zones and danger areas*** around greyhounds or horses may include:

- blind spots at fore and rear of horse
- head and hindquarters
- location to other animals
- near shoulder.

Considerations when determining ***safe methods of approaching or***

- assessing behaviour prior to approaching or moving around
- identifying good behaviour traits and bad

## RANGE STATEMENT

|                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## RGRROP401A Perform duties of race programmer

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to perform the administration duties of a racing governing body race programmer. It requires an understanding of the role of the TAB and knowledge of the relevant codes' permanent race and trial calendars and the impact of changes to programs when preparing race programs.

This unit of competency operates in workplace environments of racing administration, stables, kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel who are required to prepare race programs for a racing governing body as part of their job role.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to either the greyhound code or harness code or the thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Review previous race programs.

1. Size of fields at each track in previous season is reviewed.
2. ***Size and number of trials*** in previous season at each track are reviewed.

Consider requests for program amendments.

3. TAB supported meetings are noted.
4. One-off or ***special program requests*** are considered.
5. ***Permanent changes to calendar*** are considered in relation to expected support from starters.

| ELEMENT          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                     |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Prepare program. | <ol style="list-style-type: none"><li>6. Program is planned to accommodate club requests for dates and regular carnivals where possible.</li><li>7. Program is planned to include race classes and distances to accommodate expected demand.</li><li>8. Program is planned to utilise TAB supported dates.</li><li>9. Program is finalised within time frames.</li></ol> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- accurate computer skills, including:
  - data entry
  - spreadsheet
  - word processing
- applying OHS and environmental work procedures
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information relating to race programming requirements
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- consulting concisely and effectively with customers, colleagues and team members
- evaluating advantages or disadvantages of a variety of potential solutions to resolve problems
- making effective decisions
- operating a range of office equipment and technology
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- researching and analysing data related to race programming and scheduling
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- communication procedures, including reporting lines within the workplace and wider racing industry

## REQUIRED SKILLS AND KNOWLEDGE

- ethical conduct standards of relevant racing principal authority
- hazards and potential hazards in the workplace and risk control procedures
- industry terminology related to race programming and wider racing industry
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- procedures for operation and maintenance of office equipment and technology
- relevant rules of racing
- reporting requirements for irregularities and problems
- size and structure of the racing industry, including:
  - classes of races and special events
  - racetracks and their field capacity
  - numbers of registered greyhounds or horses
  - other codes' race programs.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when programming races
- implementation of procedures and timely techniques for the safe, effective and accurate application of race programming procedures
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry supervised access to racing administration offices relevant to the applicable racing code
- materials and equipment relevant to assessing candidate's ability to complete race programming procedures
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Programs*** may include:

- calendar of races and official trials for greyhounds, harness or thoroughbreds compiled in consultation with race clubs and other codes' requirements, and TAB defined race allocations in separate jurisdictions
- greyhound race classes, including:
  - 5th to 1st grade
  - aged
  - maiden
  - non-graded
- harness race classes. including:
  - age
  - claiming
  - classic
  - C0 to C8
  - country
  - graduation
  - M0 to M8
  - metropolitan
  - show
  - sire stakes
- thoroughbred race classes, including:
  - class 1 to 6
  - class A to D
  - group
  - listed
  - open
  - restricted
  - special conditions
  - transition
  - trophy
  - weight for age.

## RANGE STATEMENT

---

Reviewing considerations regarding ***size and number of trials*** will include:

- age
- class
- distance
- location of trials, for example:
  - country regions
  - provincial
  - metropolitan
- nominations received
- official trials and unofficial trials (jump outs)
- race club requests for additional trials.

Considerations for ***TAB supported meetings*** will include:

- allocation per state or territory
- location of meetings
- non-TAB meetings
- number of Saturday meetings
- sequencing for Sky Channel coverage.

***Special program requests*** may include:

- administration error, for example no two-year old races
- amendments arising from trainer requests
- charity events
- distance changes due to rail relocation during prolonged inclement weather
- race club sponsored race days
- replacement races or meetings for postponed meetings.

Relevance of ***permanent changes to calendar*** includes:

- country, provincial or metropolitan program set times
- impacts of changes, including:
  - betting turnover
  - patron attendance
  - prize money distribution
  - training program requirements for individual greyhounds or horses
- setting before beginning of season.

# RGRROP402A Perform duties of medical practitioner at race meetings and trials

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit relates to the competencies required to assess a driver's or rider's fitness to compete at race meetings or trials. It requires knowledge of relevant rules of racing. It also requires performing pre and post-race assessments of drivers or riders and providing advice to stewards regarding the fitness and wellbeing of drivers or riders to compete, conducting swabbing procedures of drivers or riders should it be required, as well as providing advice to drivers or riders in relation to health and welfare issues.

To undertake this unit the candidate will be a qualified medical practitioner who requires the knowledge and skills to adhere to policies and procedures associated with the rules of racing and race day medical practitioner duties.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports qualified medical practitioners to effectively perform the required duties of a race day medical practitioner at harness or thoroughbred race meetings and trials.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Assess driver's or rider's fitness to compete.

1. ***Rules of racing*** and ***legislative obligations*** for medical practitioners and ***OHS and racing safety protocols and procedures*** are complied with when determining driver or rider health status.
2. Drivers or riders are examined after a fall to ensure fitness to continue with racing commitments.
3. Drivers or riders are examined on stewards' instructions for fitness to continue with racing commitments.

| ELEMENT                                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- assessing driver's or rider's health and advising if fit to compete
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to race day medical practitioner duties
- completing duties in accordance with safe operating procedures and nominated time frame
- identifying and reporting swabbing irregularities
- judging situations and taking appropriate action to prevent problems arising or overcome problems before they develop further
- maintaining racing code requirements for confidentiality
- participating safely in sample collection processes
- providing advice to drivers or riders relating to health and welfare issues
- providing prompt and succinct information to stewards and others as required
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities

## REQUIRED SKILLS AND KNOWLEDGE

- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- indicators of human fitness and wellbeing
- industry terminology related to race meeting procedures
- hazard identification and risk management
- medical welfare considerations in relation to licensed and other racing industry personnel
- medications and treatments
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing
- reporting requirements for irregularities and problems, including difficulties in obtaining samples
- sample collection standard operating procedures
- swabbing protocols and associated rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply performing the duties of a medical practitioner at race meetings or trials
- implementation of procedures and timely techniques for the safe, effective and efficient application of

## EVIDENCE GUIDE

|                                                          | <p>medical practitioner duties</p> <ul style="list-style-type: none"><li>• working with others to undertake and complete procedures that meet required outcomes.</li></ul> <p>Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Context of, and specific resources for assessment</b> | <p>Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.</p> <p>Assessment of the practical components of this unit will be by observation of relevant skills.</p> <p>The following resources must be available:</p> <ul style="list-style-type: none"><li>• a range of drivers or riders</li><li>• materials and equipment relevant to assessing candidate's ability to perform medical practitioner duties at race meetings or trials</li><li>• race meetings, trials and racing personnel swabbing facilities</li><li>• work instructions and related documentation.</li></ul> |
| <b>Method of assessment</b>                              | <p>Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.</p> <p>The suggested strategies for the assessment of this unit are:</p> <ul style="list-style-type: none"><li>• written and/or oral assessment of candidate's required knowledge</li><li>• observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.</li></ul> <p>Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.</p> <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.</p>                                                                        |
| <b>Guidance information for assessment</b>               | <p>Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities,</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## EVIDENCE GUIDE

Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Driver's or rider's ***fitness to compete*** considerations may include:

- alcohol or drugs
- blood or urine tests
- dehydration
- fatigue
- illness
- injury
- physical and mental fitness.

Relevant ***rules of racing*** may include:

- Australian and local rules of racing
- apprentice allowances
- drivers
- jockeys and riders
- prohibited substances
- weight allowances
- weighing in and weighing out.

***Legislative obligations*** of medical practitioners will include:

- legislative requirements for use of drugs and poisons
- patient's rights, including refusal of medical treatment
- rehabilitation policies
- return to work policies
- WorkCover and WorkSafe Acts
- workplace health, welfare and safety responsibilities.

***OHS and racing safety protocols***

- adhering to responsibilities under OHS legislation and workplace practices

## RANGE STATEMENT

**and procedures** may include:

- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- contributing to development of risk control measures
- following safe work practices
- following accident and injury procedures
- identifying and reporting unsafe work practices
- identifying emergency situations
- wearing approved personal protective equipment.

**Other actions** recommended to ensure health and welfare of drivers or riders may include:

- conditioning programs
- physiotherapy
- rehydration.

Advice provided to drivers or riders on **health and welfare issues** may include:

- drug and alcohol use
- fatigue
- hydration
- mental fitness
- nutrition
- physical fitness
- stress
- weight control.

## Unit Sector(s)

**Unit Sector**

Harness and thoroughbred racing codes

## Co-requisite units

Co-requisite units

## Functional Area

Functional Area      Racing performance services

## RGRROP403A Perform duties of farrier at race meetings

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to prepare for and provide routine and emergency race meeting farrier services. It requires knowledge of horse behaviour in high pressure environments, horse handling techniques, relevant rules of racing, and appropriate communication modes and personal presentation.

To undertake this unit the candidate will be able to apply workplace OHS standards.

This unit is not aimed at developing the skills of a farrier, but rather reflects racing industry requirements of performing the duties of a qualified farrier at a race meeting. The scope of duties of a race meeting farrier may vary between codes and from state to state.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports qualified farriers to develop the skills required to perform race meeting duties of a farrier.

Competencies attained in this unit apply to the harness or thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while

also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

- | ELEMENT                   | PERFORMANCE CRITERIA                                                                                                                                                                                       |

| ELEMENT                                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Provide hoof care and shoeing service at race meetings. | <p>are verified.</p> <p>3. Invoicing system is confirmed with race club prior to race meeting.</p> <p>4. <b>Rules of racing</b> that relate to hoof care, shoeing and farrier services at race meetings are defined and complied with.</p> <p>5. <b>Hazards</b> associated with handling and shoeing horses are assessed and <b>risks controlled</b> to comply with OHS legislation and safe operating procedures.</p> <p>6. Hoof and shoe condition are inspected, <b>options for treatment or adjustment that comply with rules of racing</b> are reported to <b>relevant parties</b> and procedures are agreed upon.</p> <p>7. Shoes are removed, hooves prepared and horses shod (plated) in compliance with rules of racing and <b>wellbeing of the horse</b>.</p> <p>8. Horses are observed in pre-race activities and shoeing or hoof status is inspected if situation warrants or as requested by stewards, starter or other relevant party.</p> <p>9. <b>Status of emergency</b> is reported to steward and starter.</p> <p>10. Emergency repairs are made in a safe and timely manner.</p> |
| Finalise race meeting farrier services.                 | <p>11. Tax invoice for farrier services is prepared and presented to race club within agreed time frame.</p> <p>12. <b>Reports</b> are provided to stewards on hoof and shoeing injury and incidents.</p> <p>13. Farrier work area is left clean and tidy.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with horses
- assessing hazards and controlling risks
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay

## REQUIRED SKILLS AND KNOWLEDGE

information related to race day farrier duties

- completing duties in accordance with safe operating procedures and nominated time frame
- dealing with contingencies
- estimating, calculating and recording materials and resource requirements
- evaluating a shoe emergency
- identifying horse behaviour traits
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- numeracy skills to prepare tax invoices using simple calculations, including addition, subtraction, division, multiplication and percentages
- plating and shoeing horses
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding to instructions promptly and safely
- responding quickly to requests from stewards or other racing officials
- small business management skills
- teamwork skills to ensure completion of job tasks
- working in confined spaces
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- effective methods of controlling horses in a range of situations
- hazard identification and risk management
- horse identification features
- industry terminology related to handling and working with horses during race meetings
- OHS legislation and farrier codes of practice
- personal grooming and presentation requirements applicable to race club code and farrier standards
- protocols and procedures for communicating with licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply performing the duties of a farrier at race meetings or trials
- implementation of procedures and timely techniques for the safe, effective and efficient application of farrier duties
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time using a range of racehorses of different ages and sexes, in race meeting and trial environments.

#### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to perform farrier duties at race meetings
- safe handling areas, such as racetracks including registered race meetings and trials
- work instructions and related documentation.

#### **Method of assessment**

Assessment methods must satisfy the endorsed

## EVIDENCE GUIDE

Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Booking of farrier services*** for a race meeting will include:

- clarifying starting time with farrier supervisor
- confirming location of farrier shop
- confirming numbers of horses to be plated or re-shod
- organising race meeting pass and parking with race club administration.

***Other equipment*** will include:

- apron and hand tools
- plates, tips and small nails suitable for race

## RANGE STATEMENT

## RANGE STATEMENT

include:

may include other professionals such as a veterinary surgeon

- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- remaining calm and applying common and safe horse handling techniques.

**Emergency status** may include:

- nail pricks
- shifted, sprung or twisted plates.

**Reports** are provided to stewards:

- courteously, efficiently and promptly
- maintaining confidentiality and discretion
- using correct forms of greeting
- via verbal and/or written communication, including:
  - describing actions
  - giving and receiving clear, accurate and simple messages
  - listening to and interpreting information and instructions
  - written reports may include simple documents and notes.

## Functional Area

**Functional Area**                      Racing performance services

# RGRROP404A Perform duties of veterinarian at race meetings or trials

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit relates to the competencies required to provide race meeting veterinary advice to stewards on the health, welfare and fitness to race greyhounds or horses. It requires knowledge of relevant rules of racing, the ability to prepare for race meetings, make pre and post-race assessments of greyhounds or horses, provide advice to stewards, provide emergency care to animals and should it be required, euthanase animals and ensure proper arrangements are made for the disposal of the deceased animal.

This unit has restricted access to veterinarians licensed to practise veterinary medicine through relevant state registration and who have evidence of experience in the treatment and management of greyhounds for greyhound race meetings or horses for harness and thoroughbred race meetings.

This unit of competency operates in work environments of racing stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports veterinarians who are licensed to practise veterinary medicine through relevant state registration and are required to effectively perform required veterinarian duties at race meetings.

Competencies attained in this unit apply to the greyhound or harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Licensing/Regulatory Information

## Pre-Requisites

**Prerequisite units**

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds or horses
- assessing animal health and illness or injury status
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to race day veterinarian duties
- completing duties in accordance with safe operating procedures and nominated time frame
- demonstrating common greyhound or horse handling skills
- identifying and reporting swabbing irregularities
- identifying animal by colour, brand, sex, and leg and face markings
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- maintaining racing code requirements for confidentiality
- participating safely in sample collection processes
- providing prompt and succinct information to stewards and others as required
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- communication procedures within the race meeting environment and wider racing

## REQUIRED SKILLS AND KNOWLEDGE

industry

- emergency animal care
- euthanasia practices and animal removal processes
- greyhound or horse behaviour, senses and communication traits
- industry terminology related to race meeting procedures
- impacts on animals of adverse or extreme weather conditions
- hazard identification and risk management
- medications and treatments for injured or unhealthy animals
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reporting requirements for irregularities and problems, including difficulties in obtaining samples
- sample collection standard operating procedures
- signs of animal health, ill health, injury and diseases
- swabbing protocols and associated rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply performing the duties of veterinarian at race meetings or trials
- implementation of procedures and timely techniques for the safe, effective and efficient application of veterinarian duties
- working with others to undertake and complete procedures that meet required outcomes.

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a range of greyhounds, and harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to perform veterinarian duties at race meetings or trials
- race meetings and related facilities, including swabbing
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English,

## EVIDENCE GUIDE

---

youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Rules of racing*** cover:

- constitutional
- interpretation
- licensing
- local rules
- offences
- penalties
- race meetings
- registration
- stewards
- syndicates.

***Signs of distress, illness, injury or abnormal behaviour*** may include:

- greyhound or horse race meeting behaviour, including:
  - attempting to bite
  - becoming agitated and sweaty
  - charging forward
  - pulling back or sideways
  - rearing
  - turning in circles
- signs of unhealthy greyhounds or horses, include:
  - discharge
  - dull coat
  - dull eyes
  - elevated temperature
  - listlessness

## RANGE STATEMENT

| <b><i>Race and post-race activities</i></b> observed may include:         | <ul style="list-style-type: none"> <li>• action in enclosure or mounting yard</li> <li>• action or bleeding occurrence upon return to scale or catching pen</li> <li>• action or performance during racing</li> <li>• barrier loading (thoroughbred)</li> <li>• warm-up or score-up (harness)</li> <li>• stir-up or box loading (greyhound).</li> </ul>       |

## RANGE STATEMENT

---

**Restraints** may be:

- chemical
- physical.

**Safety of staff and greyhound or horse** may include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- contributing to development of risk control measures
- following safe work practices
- following accident and injury procedures
- identifying and reporting unsafe work practices
- identifying emergency situations
- monitoring animal behaviour
- using approved and well-maintained gear
- wearing approved personal protective equipment.

**Suspected notifiable diseases** include:

- African horse sickness
- anthrax
- contagious equine metritis
- equine flu
- hendra virus
- Japanese encephalitis
- rabies
- surra.

**Identification** is verified by:

- identifying colours, brands, markings or gender
- viewing registration papers
- reading microchip information.

Arrangements for **removal of deceased animal** will include:

- considering owner, trainer and other witnesses
- determining disposal area, which may include local waste management centre or other area agreed by stewards

## RANGE STATEMENT

# RGRROP405A Conduct veterinarian supervision of sample collection procedures

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to provide veterinarians with the skills and required knowledge to supervise the process of collecting samples from racing animals. The unit includes processes related to the preparation for testing, authorisation and implementation of testing, and initiation of evidence gathering activities as required. It emphasises the obligation of appointed personnel to maintain continuity and security of evidence.

In order to complete this unit the candidate must be a qualified veterinarian with recognised experience in the management and care of racing greyhounds or horses, who is licensed to practise veterinary medicine in the nominated state.

This unit of competency operates in work environments of racing kennels, stables, paddocks, yards, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

**Application of the unit** This unit of competency supports veterinarians who are licensed to practise veterinary medicine through relevant state registration and are required to supervise the collection of samples from racing animals.

Competencies attained in this unit apply to the greyhound or harness or thoroughbred code of the industry. Consequently when performance criteria are applied they

will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT           | PERFORMANCE CRITERIA                                                   |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds or horses
- assessing animal health and illness or injury status
- communicating with swabbing officers, stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to supervising sample collection duties
- completing duties in accordance with safe operating procedures and nominated

## REQUIRED SKILLS AND KNOWLEDGE

time frame

- complying with laboratory protocols and procedures, and OHS and animal welfare regulations to maintain the integrity of samples
- directing industry personnel to correctly and safely participate in sample collection processes
- demonstrating common greyhound or horse handling skills
- identifying and reporting swabbing irregularities
- identifying animal by colour, brand, sex, and leg and face markings
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- maintaining racing code requirements for confidentiality
- participating safely in sample collection processes
- providing prompt and succinct information to stewards and others as required
- reading and interpreting workplace documentation, including the rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or horse behaviour, senses and communication traits
- industry terminology related to race meeting and swabbing procedures
- hazard identification and risk management
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reporting requirements for irregularities and problems, including difficulties in obtaining samples
- sample collection standard operating procedures
- signs of animal health, ill health, injury and diseases
- swabbing protocols and associated rules of racing.

# Evidence Guide

## EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when supervising sample collection
- implementation of procedures and timely techniques for the safe, effective and efficient application of supervising duties related to sample collection
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a range of greyhounds, and harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to perform veterinarian sample collection supervisory duties
- race meetings and related facilities, including swabbing
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit

## EVIDENCE GUIDE

are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Rules of racing*** relevant to collection of samples relate to:

- prohibited substances
- stewards' power to test any greyhound or horse, or take possession on the course or elsewhere of any greyhound or horse for testing.

***Collection protocols*** will include:

- conditions under which the sample is gathered, including:
  - identification of animals to be tested
  - duration of sample custody
  - security conditions and manner in which sample is transferred to subsequent

## RANGE STATEMENT

|                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## RGRROP406A Perform duties of harness race starter

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to safely and efficiently conduct harness race starts. It requires knowledge and skills associated with preparing for race starts, and working closely with other race meeting staff to start races and complete post-race activities, including the provision of reports to stewards and race club personnel.

It requires the ability to oversee safe horse handling and apply workplace OHS standards.

This unit of competency operates in work environments of racing stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports licensed and registered personnel and others in the harness racing industry who may be required to act as starters for race meetings as part of their job function.

### Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with race meeting staff, stewards, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to harness racing starts
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation

## REQUIRED SKILLS AND KNOWLEDGE

- evaluating risks associated with race meeting starts and race day operations
- giving evidence in racing inquiries and investigations
- identifying individual horses using industry approved terminology, records and signalment
- identifying injured or distressed horses that require assistance
- making effective decisions and resolving routine problems within the bounds of the duties and responsibilities of a race meeting starter
- operating starting equipment
- overseeing safe handling and work practices when dealing with horses
- reading and interpreting racing documents relating to race distances, race fields, track conditions, horse identification and performance records
- reading and interpreting workplace documentation, including rules of racing and starting procedures
- recognising damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reporting incidents to stewards in a timely manner
- resolving disputes according to harness racing protocols and procedures
- teamwork skills to ensure completion of job tasks
- working in a high pressure environment
- written communication skills to complete workplace documentation and reports.

## Required knowledge

- approved gear
- common features of injury, illness and distress in horses
- communication procedures within race meeting and wider racing industry
- equipment used in work role and the procedures for its operation and maintenance
- horse handling and controlling techniques
- OHS and environmental legislative requirements
- organisational policies and procedures
- positive and effective communication strategies used to work with a team, deal with conflicts and resolve disputes
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

# Evidence Guide

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when starting harness races
- implementation of procedures and timely techniques for the safe, effective and efficient application of race starting operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of harness horses
- materials and equipment relevant to assessing candidate's ability to start harness races
- safe handling and approved race starting and associated facilities
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

## EVIDENCE GUIDE

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Past problems*** with particular horses may include:

- horse:
  - attempts to burrow
  - charges forward
  - pulls sideways
  - rears
  - is reluctant to move forward.

***Operation of mobile and other start equipment*** check will

- arms or wings of mobile start
- battery

## RANGE STATEMENT

include:

- communication system between starter and driver
- damage
- fuel
- height of arms
- lights
- oil
- power steering fluid
- transmission fluid
- tyre pressure
- water.

**Rules of racing** in relation to race starts may include:

- ahead of advertised start time
- barrier positions for unruly horses
- defer or delay start
- horse denied fair start
- horse unfit
- non-starter
- order of placing at barrier
- starter's orders
- starter's powers.

**Hazards** associated with start of the race may include:

- broken start equipment
- disruption at barrier
- gear breakage
- injury to staff, driver or horse
- non-compliance of drivers.

**OHS and racing safe operating procedures** may include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- contributing to development of risk control measures

## RANGE STATEMENT

## RANGE STATEMENT

---

- via verbal and/or written communication, including:
  - describing actions
  - giving and receiving clear, accurate and simple messages
  - listening to and interpreting information and instructions
- written reports may include simple documents and notes.

## Unit Sector(s)

**Unit Sector** Harness racing code

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing performance services

# RGRROP407A Perform duties of thoroughbred race starter

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to safely and efficiently conduct thoroughbred race starts. It requires knowledge and skills associated with preparing for race starts, and working closely with other race meeting staff to start races and complete post-race activities, including the provision of reports to stewards and race club personnel.

It requires the ability to oversee safe horse handling and apply workplace OHS standards.

This unit of competency operates in work environments of racing stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports licensed and registered personnel and others in the thoroughbred racing industry who may be required to act as starters for race meetings as part of their job function.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

### Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

|                                                                   |                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Elements and Performance Criteria

| ELEMENT                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Supervise pre-start activities.               | <p>7. Race meeting <b><i>duties and instructions</i></b> are allocated and relayed to staff.</p> <p>8. Starters are verified and <b><i>identified</i></b>, and <b><i>approved gear</i></b> and colours are noted.</p> <p>9. Horses are sent to start under supervision of clerk of course.</p> <p>10. Race start time is confirmed with stewards.</p> <p>11. Order of loading barriers is determined and relayed to staff.</p> <p>12. <b><i>Barrier loading</i></b> is performed within time and safety constraints using approved methods and personal protective equipment and with consideration to public perception of non-verbal signals and handling techniques.</p> <p>13. Incidents are managed to minimise risk of injury to staff and horses and reported to stewards and veterinarian.</p> <p>14. Non-starters are declared after conferring with stewards.</p> |
| Start race and complete post-race activities. | <p>15. Possible delay in race time is reported to stewards.</p> <p>16. Race start permission is sought from stewards.</p> <p>17. Race start is initiated as soon as starters are loaded and ready.</p> <p>18. Feedback on staff performance is provided in a timely and positive manner.</p> <p>19. Barrier loading and race start <b><i>reports are presented</i></b> to stewards.</p> <p>20. Barrier or start equipment is checked for damage and/or maintenance requirements prior to shutting down.</p> <p>21. Repairs or maintenance requirements are reported to race club.</p>                                                                                                                                                                                                                                                                                       |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with race meeting staff, stewards, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay

## REQUIRED SKILLS AND KNOWLEDGE

information related to thoroughbred racing starts

- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- evaluating risks associated with race meeting starts and race day operations
- giving evidence in racing inquiries and investigations
- identifying individual horses using industry approved terminology, records and signalment
- identifying injured or distressed horses that require assistance
- making effective decisions and resolving routine problems within the bounds of the duties and responsibilities of a race meeting starter
- operating starting equipment
- overseeing safe handling and work practices when dealing with horses
- reading and interpreting racing documents relating to race distances, race fields, track conditions, horse identification and performance records
- reading and interpreting workplace documentation, including rules of racing and starting procedures
- recognising damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- reporting incidents to stewards in a timely manner
- resolving disputes according to thoroughbred racing protocols and procedures
- teamwork skills to ensure completion of job tasks
- working in a high pressure environment
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- approved gear
- common features of injury, illness and distress in horses
- communication procedures within the race meeting and wider racing industry
- equipment used in work role and the procedures for its operation and maintenance
- horse handling and controlling techniques
- OHS and environmental legislative requirements
- organisational policies and procedures
- positive and effective communication strategies used to work with a team, deal with conflicts and resolve disputes
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when starting thoroughbred races
- implementation of procedures and timely techniques for the safe, effective and efficient application of race starting operations
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

#### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to start thoroughbred races
- safe handling and approved race starting and associated facilities
- work instructions and related documentation.

## EVIDENCE GUIDE

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Past problems*** with particular horses during loading may include:

- horse:
  - attempts to burrow under or climb gates
  - charges forward
  - pulls sideways

## RANGE STATEMENT

**Operation of barriers and other start equipment** check may include:

- rears
- is reluctant to move forward and requires barrier blanket.
- battery
- communication system between starter and driver
- damage
- electrical
- front and rear gates
- fuel
- lights
- power steering fluid
- tractor oil and water
- transmission fluid
- tyre pressure
- water.

**Rules of racing** in relation to race starts may include:

- ahead of advertised start time
- barrier positions for unruly horses
- defer or delay start
- horse denied fair start
- horse unfit
- non-starter
- order of placing at barrier
- rider disobedience
- riderless on jumping
- starter's orders
- starter's powers.

**Hazards** associated with start of the race may include:

- broken start equipment
- disruption at barrier
- gear breakage
- injury to staff, rider or horse
- non-compliance of riders.

**OHS and racing safe operating procedures** may include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour

## RANGE STATEMENT

---

of horses, such as:

- fences and equipment
- other persons or animals
- vehicles
- wind and noise
- contributing to development of risk control measures
- following safe work practices
- following accident and injury procedures
- identifying and reporting unsafe work practices
- identifying race start hazards
- identifying emergency situations
- understanding individual horse behaviour
- wearing approved personal protective equipment.

***Duties and instructions*** relayed to staff may include:

- climbing barrier
- holding horses
- loading horses
- reminding staff of high visibility of actions due to televised barrier loading
- shutting gates
- walking horses.

Horses are ***identified*** by:

- brands
- colours
- gender
- markings.

***Approved gear*** may include:

- bandages
- bits
- blinkers
- boots
- breastplates
- bridles
- crossover nosebands
- girths
- pacifiers
- reins
- rings
- saddles
- shadow roll
- stirrup leathers

## RANGE STATEMENT

---

- Barrier loading** may include:
- surcingles
  - tongue ties.
  - applying cane under starter's instruction
  - applying barrier blanket
  - applying blindfold
  - applying twitch
  - assuming correct position to assist jockey in barrier
  - adjusting or removing gear
  - communicating with other team members to complete tasks
  - climbing barrier and moving to horse's head to take control
  - closing gates of stalls correctly
  - exiting barrier safely, quickly and efficiently
  - fitting correct items of gear
  - identifying non-approved gear
  - lifting tail to prevent horse flipping
  - leading horse forward into barrier correctly
  - linking arms to move horse forward
  - pushing horse sideways
  - straddling barrier safely to control horse.
- Reports are presented** to stewards and race club:
- maintaining confidentiality and discretion
  - promptly, courteously and efficiently
  - using correct forms of greeting
  - via verbal and/or written communication including:
    - describing actions
    - giving and receiving clear, accurate and simple messages
    - listening to and interpreting information and instructions
  - written reports may include simple documents and notes.

## Functional Area

**Functional Area**                      Racing performance services

## RGRROP408A Perform duties of betting supervisor or steward at greyhound or horse race meetings

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to perform the duties of a betting supervisor at race meetings, including pre-race and race meeting checks of a variety of documentation. It requires knowledge of rules of racing related to betting ring and internet wagering activity, high level communication skills to mediate effectively in betting disputes, and analytical and mathematical skills to effectively monitor and interpret wagering information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication. However greyhound, harness and thoroughbred racing are strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

### Application of the Unit

#### Application of the unit

This unit of competency supports authorised racing officials to perform the job functions associated with the duties of a betting supervisor at race meetings.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT                                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                  |

Ledgers and other documentation are seized and receipted for further investigation if non-compliance is suspected.</li> </ol> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- calculating alterations to odds and reporting deviations to supervisor
- communicating with the public, industry officials, licensed or registered personnel and others using assertive communication techniques to gather, interpret and relay information related to wagering activity during the conduct and operations of racing
- managing conflict and difficult situations during mediation
- monitoring wagering and relating odds offered to current form of racing animals using various medium, including:
  - internet
  - ledgers
  - totalisator
- numeracy skills for calculating alterations to odds and recording results
- practising protocols and procedures for communicating with other stewards and officials
- providing clear and concise reports on race performance in verbal and written

## REQUIRED SKILLS AND KNOWLEDGE

formats

- reading and interpreting wagering, other workplace documentation and rules of racing
- recognising individuals, for example warned-off persons
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- using computer, internet, video and DVD recording and re-play devices
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- effect of race incidents on animal performance
- effect of track conditions and ratings, course layout and rail placement on animal performance
- equipment used in work role and procedures for its operation and maintenance
- industry terminology related to race meeting procedures and wagering
- OHS and environmental legislative requirements
- organisational policies and procedures
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel and the public
- racing industry safety requirements, including safe operating procedures
- regular racing industry personnel, including bookmakers and clerks
- rules of racing relating to laying of bets, and rights and obligations of punters, bookmakers and other suppliers of wagering products
- wagering trends, including odds fluctuations and unusual betting patterns
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and

## EVIDENCE GUIDE

---

instructions that are to apply when monitoring wagering activity

- demonstration to confirm ability to monitor betting fluctuations and analyse and interpret bookmakers' ledgers, totalisator and other systems
- implementation of procedures and timely techniques for the safe, effective and efficient application of betting supervisor or steward duties
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of race meeting relevant contexts and include dealings with an appropriate range of situations.

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of race meetings and race administration offices
- materials and equipment relevant to assessing candidate's ability to supervise, interpret and analyse wagering activity
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- case studies covering a range of wagering activity scenarios, accompanied by race documentation, such as form guides and stewards' reports.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly

## EVIDENCE GUIDE

---

### Guidance information for assessment

observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Expected form*** may include:

- betting ring and TAB prices
- form guide
- greyhound's or horse's age, number of race starts or trial starts, variety of tracks and track conditions and class or grading of race
- driver or rider error and experience
- other incidents in previous race starts, such as:
  - careless driving or riding
  - interference
  - lack of race fitness
  - missing the start.

***Race performance*** interpretation may include:

- hearing race call
- reading form
- watching race.

## RANGE STATEMENT

---

Observations of ***activities in betting ring and surrounds*** may assist with:

- developing a good memory for faces
- monitoring bookmaker or punter compliance with established protocols
- noting familiar and unfamiliar faces.

***Wagering disputes*** may be caused by:

- false, misleading or fictitious entries in betting sheets
- illegible entries on betting tickets
- lack of identification of person making bet
- lack of information regarding horse name or number on betting tickets
- non-payment of bet.

***Bookmakers' ledgers*** may be checked to:

- ensure compliance with rules of racing
- maintain integrity.

***Rules of racing and legislative requirements*** may include:

- rules of racing, including:
  - bet-backs
  - bookmakers
  - bookmakers' clerks
  - rules of betting
  - sports betting
  - telephone betting
- legislative compliance, with:
  - federal and state Bookmakers (Taxation) Act
  - Gaming and Betting Act
  - Stamp Duties Act
  - other state-specific Acts relating to betting.

***Evidence of suspected non-compliance*** may be found by:

- comparing on-course bookmakers' ledgers to 'bag' tallies
- comparing odds offered to expected form
- comparing wagers accepted with legislative requirements.

## RGRROP409A Perform duties of greyhound grader

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to grade greyhounds for eligibility to compete in races. It requires a consistent approach to compliance with the grading policy in accordance with the rules of racing. The unit includes procedures related to collecting, analysing and organising information to ensure the most ethical means of determining the application of grading protocols.

This unit of competency operates in workplace environments of racing administration, kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel who are required to apply the grading policy to the classification of racing greyhounds for a racing governing body as part of their job role.

### Licensing/Regulatory Information

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- accurate computer skills, including:
  - data entry
  - spreadsheet
  - word processing
- applying OHS and environmental work procedures
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to:
  - deal with disgruntled racing participants
  - gather, interpret and relay information relating to greyhound grading requirements
  - respond to a formal complaint
  - respond to trainers or owners disputing the classification used by graders
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- consulting concisely and effectively with customers, colleagues and team members
- evaluating advantages or disadvantages of a variety of potential solutions to resolve problems
- interpreting racing jargon, including classes and distances of greyhound races
- making effective decisions based on grading policies, current performance and industry guidelines
- operating a range of office equipment and technology
- reading and interpreting race reports, form guides and other records of race performance
- reading and interpreting workplace documentation, including rules of racing and grading policies
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities

## REQUIRED SKILLS AND KNOWLEDGE

- using race replay equipment, including video, DVD and other sources to assess individual greyhound performance during various stages of the race
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- factors that affect greyhound performance
- grades, classifications and distances of greyhound races
- hazards and potential hazards in the workplace and risk control procedures
- industry terminology related to greyhound grading and wider racing industry
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication, including dealing with conflict and grievance resolution
- procedures for operation and maintenance of office equipment and technology
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when grading greyhounds for races
- implementation of procedures and timely techniques for the safe, effective and accurate application of greyhound grading procedures
- working with others to undertake and complete

---

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry supervised access to racing administration offices and racecourses
- materials and equipment relevant to assessing candidate's ability to complete greyhound grading procedures
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Greyhound ***performance*** may be analysed by:

- reading race reports and results
- viewing races or trials live and via replay.

***Race result reports*** may include:

- box draw and number of runners
- identification of greyhounds that did not complete the race
- race class
- race distance
- race incidents that affected the results
- race location
- race record time
- race times of individual runners in race sections.

***Race class structure*** may affect race results:

- due to class structures being set to match greyhounds that have won the same types of races and/or similar amounts of prize money
- if greyhounds of all levels were raced against each other, greyhounds of higher class would have an advantage over the rest of the field.

***Experience and/or age of runner*** may affect performance due to:

- experienced greyhounds are more likely to settle into their race, which will also reduce wasting energy early
- greyhounds generally need some race experience before they perform consistently
- older greyhounds can suffer more wear and tear from racing, which can prevent them from racing according to previous form
- young greyhounds need time to gain strength and stamina.

***Box draw*** considerations may include:

- boxes are numbered in the same way on every racetrack in Australia

## RANGE STATEMENT

---

***Integrity and ethical principles*** are required for:

- greyhound races are started from a row of individual cages (boxes) for each greyhound
- there are perceived advantages to runners starting from certain boxes so a random pick takes place to allocate boxes to greyhounds; this is known as the box draw.
- graders to demonstrate that they have applied the grading policy consistently to all greyhounds
- graders not making decisions based on factors other than the grading policy, such as:
  - applying a selection criterion other than the grading policy
  - friendships or disputes with owners or trainers
  - subjective rather than objective evaluation of performance
- graders conducting their work and private life in such a way as to avoid attempts of bribery or blackmail, or threats of harm
- owners, trainers and the betting public to have confidence in the grading system.

***Confidentiality of decisions*** is important due to:

- certain information is private and should not be disclosed to others who may deliberately or inadvertently cause embarrassment or financial loss to others
- information given to certain people before others are advised can give some people an unfair advantage
- information that is not protected may be distributed out of sequence or with omissions or unauthorised additions that can distort the facts or misrepresent a person's intention or reputation.

# RGRROP410A Perform duties of racehorse handicapper

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to provide racehorse handicappers with the skills and knowledge to interpret race performance, rank race performance and compile and update handicapping records. The unit includes procedures related to collecting, analysing and organising information to ensure the most ethical means of determining the application of handicapping protocols that comply with rules of racing.

This unit of competency operates in workplace environments of racing administration, stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

**Application of the unit** This unit of competency supports racing industry personnel who are required to apply the handicapping policy to the classification of racehorses for a racing governing body as part of their job role.

Competencies attained in this unit apply to the harness or thoroughbred code of the industry. Consequently when performance criteria are applied they will relate to the harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Interpret race performances.

1. Performance of horses is analysed.
2. ***Speed maps*** are interpreted.

Rank race performances.

3. ***Race class structure*** is used to compare performances.
4. Track ratings and weather conditions are related to race performance.
5. Experience and/or age of runner and ***incidents within the race*** are considered.

| ELEMENT                                           | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- accurate computer skills, including:
  - data entry
  - spreadsheet
  - word processing
- applying OHS and environmental work procedures
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information relating to racehorse handicapping requirements
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- consulting concisely and effectively with customers, colleagues and team members
- evaluating advantages or disadvantages of a variety of potential solutions to resolve problems
- identifying, by observation of live racing and/or video, examples of fair and legal race strategies and any rapid alteration of an animal's position in race field
- interpreting racing jargon, including classes and distances of racehorse races
- making effective decisions based on handicapping policies, current performance and industry guidelines

## REQUIRED SKILLS AND KNOWLEDGE

- operating a range of office equipment and technology
- reading and interpreting race reports, form guides and other records of race performance
- reading and interpreting workplace documentation, including rules of racing and handicapping policies
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- using race replay equipment including video, DVD and other sources to assess individual horse performance during various stages of the race
- visual acuity to identify colours and individual animals
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- effect of track conditions and ratings, course layout and rail placement on animal performance
- factors that affect racehorse performance
- race form, class structure and track ratings
- hazards and potential hazards in the workplace and risk control procedures
- industry terminology related to racehorse handicapping and wider racing industry
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication, including dealing with conflict and grievance resolution
- procedures for operation and maintenance of office equipment and technology
- reporting requirements for irregularities and problems
- rules of racing and handicapping regulations relevant to the racing code.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Critical aspects for assessment and evidence required to demonstrate

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy

## EVIDENCE GUIDE

---

### competency in this unit

all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when handicapping racehorses for races
- implementation of procedures and timely techniques for the safe, effective and accurate application of handicapping procedures
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry supervised access to racing administration offices and racecourses relevant to the applicable racing code
- materials and equipment relevant to assessing candidate's ability to complete race handicapping procedures
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by

supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

- Factors taken into account when ***performance of horses*** is analysed may include:
- age of horse
  - barrier draw
  - class of race
  - driver or rider error and experience
  - gear usage
  - horse racing behaviour, including:
    - appearing to falter
    - changing stride
    - checking
    - crowding
    - climbing
    - laying-in or hanging
    - losing ground
    - over-racing
    - racing ungenerously
    - racing wide

## RANGE STATEMENT

---

- steadying off the heels
  - race distance
  - sectional times
  - track condition and rating
  - variety of tracks
  - weather conditions.
- Speed maps*** may be prepared by:
- referring to documentation, including:
    - form guides
    - race books
    - stewards' reports
  - referring to other form review methods, including:
    - computer for internet
    - DVD and video replays of races, trials and trackwork.
- Race class structure*** to compare performance may take into account:
- racing code
  - local and international structures.
- Incidents within the race*** may include:
- careless driving or riding
  - changes in strategies
  - injury in running
  - lack of race fitness
  - loss of driver or rider
  - missing the start.
- Handicapping system*** considerations may include:
- balloting conditions
  - HaRVEY harness racing software
  - ratings-based
  - regional weights, for example:
    - country
    - provincial
    - metropolitan
  - set weights
  - weight for age.
- Appropriate ***communications skills*** when dealing with racing participants will include:
- presenting information in logical order
  - using body language and voice that is assertive but not aggressive
  - using language that is not patronising but at suitable level
  - using non-discriminatory language

## RANGE STATEMENT

***Integrity and ethical principles*** are required for:

- using effective listening and speaking skills
- verifying what has been said or done and why it has been said or done.
- handicappers to demonstrate that they have applied handicapping policy consistently to all racehorses
- handicappers not making decisions based on factors other than the handicapping policy, such as:
  - applying a selection criterion other than the handicapping policy
  - friendships or disputes with owners or trainers
  - subjective rather than objective evaluation of performance
- handicappers conducting their work and private life in such a way as to avoid attempts of bribery or blackmail, or threats of harm
- owners, trainers and the betting public to have confidence in the handicapping system.
- certain information is private and should not be disclosed to others who may deliberately or inadvertently cause embarrassment or financial loss to others
- information given to certain people before others are advised can give some people an unfair advantage
- information that is not protected may be distributed out of sequence or with omissions or unauthorised additions that can distort the facts or misrepresent a person's intention or reputation.

***Confidentiality of decisions*** is important due to:

# RGRROP411A Perform duties of greyhound or horse race judge

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to identify the finish positions of greyhounds or horses in races and report outcomes of the race. It requires the ability to operate computers and other relevant technology, correctly identify greyhounds or horses, liaise with stewards and other racing officials and work to deadlines while applying ethical standards and complying with the rules of racing.

This unit of competency operates in workplace environments of racing administration, stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports racing industry personnel who are required to perform the duties of a greyhound or horse race judge for a racing governing body or race club as part of their job role. Some states and racing codes have crossover tasks associated with the duties of race judge and photo finish operator.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound, harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying OHS and environmental work procedures
- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information relating to judging operations
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- consulting concisely and effectively with colleagues and team members
- evaluating advantages or disadvantages of a variety of potential solutions to resolve problems
- making effective decisions, including accurately identifying correct winner in a tight finish
- operating a range of equipment and technology
- reading and interpreting workplace documentation, including relevant rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with

## REQUIRED SKILLS AND KNOWLEDGE

varying physical and mental abilities

- visual acuity to identify colours, individual animals and correct winner
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- hazards and potential hazards in the workplace and risk control procedures
- identification features of greyhounds or horses
- industry terminology related to racing procedures and judging operations
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- procedures for operation and maintenance of relevant equipment and technology
- purpose and comprehension of racing operations documentation
- relevant rules of racing
- race colours and barrier or box numbers
- reporting requirements for irregularities and problems
- types of equipment and procedures for operation and maintenance.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when judging races
- implementation of procedures and timely techniques for the safe, effective and accurate application of judging procedures
- working with others to undertake and complete

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry supervised access to race meetings and racecourse facilities relevant to the applicable racing code
- materials and equipment relevant to assessing candidate's ability to complete race judging procedures
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English,

youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Race fields and distances are verified by:***

- race book, including runners and race distances
- scratchings list.

***Greyhound or horse identification features*** may include:

- animal colours and markings
- driver or rider race colours
- greyhound rug colours
- new gear, for example:
  - blinkers used on horses
  - shadow rolls.

***Equipment*** may include:

- camera
- computer
- lighting
- mirror box
- telephone
- television monitor.

***Rules of racing*** may include:

- camera usage
- judge's position when runners pass winning post
- judge's declaration of winning or placed runners subject to alteration only by stewards
- mistakes
- placement of runners to fourth, fifth or sixth place dependant upon conditions of race, code and state
- rules of racing for the specific racing code.

***Stewards advised of final placings***

- calling for photo in tight or close finishes

## RANGE STATEMENT

---

will cover:

- comparing placings
- margins, for example:
  - half head
  - half length
  - nose
- phoning stewards room.
- on course announcer and public address
- race caller.

## RGRSTD301A Perform duties of cadet steward

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to perform the duties of a cadet steward in race meeting and non-race meeting activities. It requires knowledge of rules relating to licensed personnel, permit holders and others authorised to undertake work on racecourses and racing training establishments, as well as knowledge of the rules of racing related to the gear worn by racing animals and the animals' health, fitness and suitability to race.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

### Application of the Unit

#### Application of the unit

This unit of competency supports the cadet steward in attending city, provincial and country race meetings or trials and supporting senior stewards in non-race meeting duties, and performing such duties as directed by the chairman of stipendiary stewards for the greyhound, harness and thoroughbred racing codes.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Licensing/Regulatory Information

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                 |

| ELEMENT                                            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                    | required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Assist in conduct of race meetings or trials.      | <p>4. <b>Incidents</b> are reported to supervisor and/or chairman of stewards' panel.</p> <p>5. Duties allocated are performed in an effective and timely manner.</p> <p>6. <b>Gear</b> used on racing animals is inspected for condition, fit, safety and authorised use.</p> <p>7. <b>Identification</b> of animals is verified at race meetings and trials.</p> <p>8. Identification of licensed or registered persons at race meetings or trials is verified.</p> <p>9. Observations of <b>animal performance</b> are made and reported.</p> |
| Verify suitability of animals to race.             | <p>10. Features of healthy racing animals are identified.</p> <p>11. Symptoms of poor health, pain or distress in racing animals are identified.</p> <p>12. Animals are referred to specialist for evaluation if required.</p> <p>13. Advice from specialist is collected on animal's fitness to start and conveyed to chairman of stewards.</p>                                                                                                                                                                                                 |
| Support senior stewards in nonrace day activities. | <p>14. <b>Safety and security</b> of kennels or stables are checked for compliance with racing requirements.</p> <p>15. Animals are checked against kennel or stable returns.</p> <p>16. Information on animal performance is gathered as requested.</p> <p>17. Information on racing participants is gathered as requested.</p> <p>18. <b>Records</b> are updated as requested.</p>                                                                                                                                                             |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adhering to safe handling and work practices when working around greyhounds or horses

## REQUIRED SKILLS AND KNOWLEDGE

- communicating with senior stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to cadet steward duties
- completing duties in accordance with safe operating procedures and nominated time frame
- computer skills, including:
  - data entry and retrieval
  - email and internet
  - spreadsheet applications
  - word processing
- following OHS and environmental work procedures
- identifying different items of greyhound and horse race gear and assessing their condition in terms of safe use and need for repair
- identifying individual animals by brand, colour, sex, and leg and face markings
- identifying signs of ill health, injury or pain in racing animals
- operating a range of equipment and technology
- performing duties of related racing operations staff in cases of emergency or as required
- providing clear and concise reports on race performance in verbal and written formats
- recognising rapid alterations in an animal's position in race field
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- undertaking general administration duties, including filing, photocopying and telephone duties in an office environment
- using initiative, discretion and judgements to solve racing issues and problems
- using video and DVD recording and re-play devices and other equipment for racing operations duties
- working within the boundaries set by regulatory bodies, other regulations and the racing industry
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures for communicating with other stewards and officials, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or racehorse markings
- hazards and potential hazards in the workplace and risk control procedures
- industry terminology related to cadet steward duties and wider racing industry
- OHS and environmental legislative requirements

## REQUIRED SKILLS AND KNOWLEDGE

- organisational policies and procedures
- principles of effective communication
- procedures for operation and maintenance of office equipment and other technology
- purpose and comprehension of racing and non-racing operations documentation
- purpose of gear and reasons for identifying and reporting problems with condition, fit and safety
- racing industry animal welfare requirements
- reasons racing animals may not perform as expected
- relevant rules of racing
- reporting requirements for irregularities and problems
- roles and activities of licensed and non-licensed racing industry personnel
- size and structure of the racing industry
- symptoms of and ways of checking for common signs of injury, ill health or distress in racing animals.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing the duties of a cadet steward
- demonstration of the ability to comply with rules of racing and race meeting protocols when assisting with race meeting operations and effectively supporting senior stewards in non-race meeting activities
- implementation of procedures and timely techniques for the safe, effective and efficient application of cadet steward duties

## EVIDENCE GUIDE

---

- working with others to undertake and complete required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing operations and administration-relevant contexts, and include dealings with an appropriate range of situations.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to perform cadet steward duties
- racing administration buildings, training and racetracks, race trials and meetings and related facilities, including commercial kennels and stables
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and related protocols

## EVIDENCE GUIDE

### Guidance information for assessment

- RGRCMN201A Follow OHS procedures and observe environmental work practices
- RGRCMN202A Achieve requirements for industry induction.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform the duties of a cadet steward. Workplaces include greyhound kennels, harness and thoroughbred stables, racecourses, training tracks, administration buildings and public areas.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

***Equipment*** used in racing operations may include:

- animal descriptions
- approved gear list
- barrier draw
- binoculars
- form guide
- offence reports
- race fields
- race colours

## RANGE STATEMENT

---

|                                                                                                     |                                                                                                                                                                                                                                                                                                                                           |
|-----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                     | <ul style="list-style-type: none"> <li>• recording equipment</li> <li>• two-way radios</li> <li>• video re-play equipment.</li> </ul>                                                                                                                                                                                                     |
| <b><i>Roles in race day operations</i></b> include:                                                 | <ul style="list-style-type: none"> <li>• clerks of course</li> <li>• clerks of scales</li> <li>• kennel attendants or barrier attendants</li> <li>• racecourse detectives</li> <li>• race day farriers</li> <li>• race day veterinarians</li> <li>• race starters</li> <li>• scribe or shorthand writers</li> <li>• stewards.</li> </ul>  |
| <b><i>Incidents</i></b> reported may include:                                                       | <ul style="list-style-type: none"> <li>• contravention of rules of racing</li> <li>• unsafe work practices</li> <li>• ill treatment of racing animals.</li> </ul>                                                                                                                                                                         |
| Factors considered for condition, fit, safety and authorised use of <b><i>gear</i></b> may include: | <ul style="list-style-type: none"> <li>• common safe greyhound or horse handling techniques</li> <li>• relevant rules of racing</li> <li>• types of gear permitted.</li> </ul>                                                                                                                                                            |
| <b><i>Identification</i></b> verified may include:                                                  | <ul style="list-style-type: none"> <li>• brands</li> <li>• colour</li> <li>• ear tattoos</li> <li>• markings</li> <li>• sex</li> <li>• using a scanner to read microchip information.</li> </ul>                                                                                                                                          |
| <b><i>Animal performance</i></b> indicators may include:                                            | <ul style="list-style-type: none"> <li>• jumping quickly and cleanly from the barriers or boxes</li> <li>• placement during the race</li> <li>• signs of animal fatigue during race</li> <li>• deviations during the race</li> <li>• animal's ability to finish the race strongly.</li> </ul>                                             |
| <b><i>Features of healthy racing animals</i></b> may include:                                       | <ul style="list-style-type: none"> <li>• bright eye, shiny coat, defined musculature, sound action and alert manner</li> <li>• signs of unhealthy horses are: <ul style="list-style-type: none"> <li>• discharge</li> <li>• dull coat</li> <li>• dull eyes</li> <li>• elevated temperature</li> <li>• listlessness</li> </ul> </li> </ul> |

## RANGE STATEMENT

---

- skin disease
- swollen joints
- symptoms of injuries may include:
  - abrasions or cuts
  - fractures
  - heat in limbs
  - lameness
  - sprains
  - strains.
- **Safety and security** of kennels or stables may include:
  - adequate lighting and air flow
  - clean, well-maintained and ventilated kennels or boxes and feed rooms
  - electricity sources in good condition
  - exits not obstructed
  - fire equipment operational
  - gear and equipment in good repair
  - visual deterrents, such as surveillance, signage and locks.
- **Records** information may include:
  - acceptance lists
  - current racing code notices of greyhound, horse or trainer offences
  - documents of description, registration papers and registration cards
  - driver or jockey disciplinary or offence records
  - form guides
  - greyhound or horse identification summary
  - greyhound performance records
  - kennel or stable returns
  - kennel or stable workplace safety audits
  - nomination forms
  - race colours
  - steward liaison with racing office clerks or handicappers to check eligibility of greyhound or horse to race and the status of any owner, trainer, driver or jockey involved in the meeting.

## Unit Sector(s)

**Co-requisite units**

## Functional Area

**Functional Area** Racing common

## RGRSTD302A Interpret wagering trends

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to conduct pre-race and race meeting checks of a variety of documentation, including written, audio and visual, to monitor and interpret wagering information. It requires knowledge of the rules of racing related to bookmakers, bookmakers' clerks and other licensed and registered personnel, including owners. It also requires the application of mathematical and analytical skills to interpret wagering trends.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

### Application of the Unit

#### Application of the unit

This unit of competency supports betting stewards, supervisors and racing officials to perform the job functions associated with interpreting wagering trends.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Licensing/Regulatory Information

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Read and interpret wagering information.

1. ***Industry jargon and abbreviations*** used in wagering are interpreted.
2. ***Types of bets*** available are explained.
3. Bookmakers' ledgers are interpreted.
4. Information provided on totalisators and other betting or form analysis systems is interpreted.

| ELEMENT                              | PERFORMANCE CRITERIA                                                                                                                                                                                                      |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Monitor wagering.                    | 5. On-course and totalisator wagering trends are monitored.<br>6. Off-course e-betting system wagers are monitored.                                                                                                       |
| Relate odds offered to current form. | 7. <b><i>Speed maps</i></b> and predicted form are reviewed.<br>8. Odds offered by a range of sources are compared to <b><i>predicted form</i></b> .<br>9. Race performance is assessed against wagers made and reported. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with senior stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to wagering trends
- completing duties in accordance with safe operating procedures and nominated time frame
- computer skills, including:
  - data entry and retrieval
  - email and internet
  - spreadsheet applications
  - word processing
- following OHS and environmental work procedures
- identifying individual animals during running of races
- numeracy and analytical skills to interpret odds fluctuations and record results
- operating a range of equipment and technology
- providing clear and concise reports on wagering trends in verbal and written formats
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- using video and DVD recording and re-play devices
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

## REQUIRED SKILLS AND KNOWLEDGE

- communication procedures for communicating with other stewards and officials, including reporting lines within the workplace and wider racing industry
- effect of track conditions and ratings, course layout and rail placement on animal performance
- ethical conduct standards of relevant racing principal authority
- greyhound or racehorse markings
- industry terminology related to wagering and wider racing industry
- OHS and environmental legislative requirements
- odds fluctuations and unusual betting patterns
- organisational policies and procedures
- principles of effective communication
- procedures for operation and maintenance of office equipment and other technology
- reasons racing animals may not perform as expected
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when interpreting wagering trends
- demonstration of the ability to analyse race form and predict expected race results, interpret bookmakers' ledgers, totalisators and other systems, and accurately monitor betting fluctuations
- implementation of procedures and timely techniques for the safe, effective and efficient application of cadet steward duties

## EVIDENCE GUIDE

---

- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing operations and administration-relevant contexts, and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to interpret wagering trends
- racing administration buildings, race meetings and related facilities
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- case studies to assess candidate's ability to provide written and/or oral responses to various scenarios.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN001A Comply with the rules of racing and

## EVIDENCE GUIDE

### Guidance information for assessment

related protocols

- RGRROP408A Perform duties of betting supervisor or steward at greyhound or horse race meetings.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to interpret wagering trends. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

### ***Industry jargon and abbreviations*** may include:

- appeared to falter
- barrier or box draw
- came together in the run
- changing stride
- checking
- climbing
- crossing towards the rails
- crowding

## RGRSTD303A Assess racing gear suitability and safety

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to identify approved and non-approved gear and equipment used on racing animals. It requires the ability to check the comfort and safety of gear, identify greyhound or horse behaviour traits, apply common handling techniques and follow workplace OHS standards.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports racing industry personnel required to assess racing gear suitability and safety as part of their job role.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Ensure gear is racing compliant.

1. Approved racing gear and equipment are identified.
2. Non-approved racing gear and equipment are identified.
3. Non-approved or illegal gear is reported and removed.

Check fit and safety of racing gear.

4. Racing gear fit is checked to ensure ***comfort and safety*** to greyhound or horse.
5. Potential wear points on racing gear or equipment are inspected.
6. Stitching, bonding and attachment points are inspected

| ELEMENT                             | PERFORMANCE CRITERIA                                                                                    |

|                                     | 7. Bandages and boots are inspected for suitable fit and secure closing.                                |
|                                     | 8. <b>Safe handling techniques</b> are employed to restrain greyhound or horse during gear adjustments. |
|                                     | 9. Gear is adjusted or replaced to ensure safe racing and handling.                                     |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adhering to safe handling and work practices when dealing with greyhounds or horses
- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to gear suitability and safety
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with animal welfare legislation
- following OHS and environmental work procedures
- identifying and correctly applying different items of approved gear
- making effective decisions and resolving routine problems within the bounds of own duties and responsibilities
- providing clear and concise reports on gear suitability and safety in verbal and written formats
- reading and interpreting workplace documentation, including rules of racing
- recognising non-approved, damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- approved gear
- communication procedures, including reporting lines within the workplace and

## REQUIRED SKILLS AND KNOWLEDGE

wider racing industry

- greyhound and horse handling and controlling techniques
- OHS and environmental legislative requirements
- organisational policies and procedures
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- range of behaviour traits exhibited by greyhounds and horses
- relevant rules of racing
- reporting requirements for irregularities and problems.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when assessing gear suitability and safety
- implementation of procedures and timely techniques for the safe, effective and efficient assessment of racing gear suitability and safety
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing operations relevant contexts, and include dealings with an appropriate range of situations using a variety of racing greyhounds or horses.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is

## EVIDENCE GUIDE

---

to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of greyhounds, and harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to assess racing gear suitability and safety
- safe handling areas, such as racetracks, race meetings and related facilities
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace, and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to assess racing gear suitability and safety. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

***Approved racing gear and equipment*** may include:

- gear or equipment that is approved by regulatory racing body to be worn by greyhounds or horses during trials and races
- gear or equipment that is approved by regulatory racing body to be worn by drivers, riders or handlers, including:
  - boots
  - colours
  - gloves
  - goggles
  - helmets
  - vests
  - whips.

***Non-approved racing gear and equipment*** may include:

- gear or equipment that is considered by stewards to be unsafe, unsuitable or ineffective and which contravenes the rules of racing.

***Considerations of fit check for racing gear comfort and safety*** will include:

- frayed reins
- impaired action
- incorrectly adjusted blinkers and pacifiers
- loose shoes
- loose straps
- loose bandages
- reins with buckles
- rubbed hair or skin
- slipped saddles.

***Safe handling techniques*** will include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare

## RANGE STATEMENT

---

- applying safe controlling and restraining techniques
- assessing greyhound or horse level of education and behaviour prior to handling
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- identifying good behaviour traits and bad behaviour traits and vices
- seeking assistance from other workers when required.

# RGRSTD401A Perform duties of stipendiary steward at race meetings and trials

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to administer race meeting and trial operations and manage the job functions associated with checking eligibility of racing participants, including greyhounds and horses, checking equipment used in races, reading and controlling races, identifying participating animals and ensuring the security, safety and welfare of participants and animals.

The unit requires strong verbal and written communication and the knowledge and skills associated with supervising staff and race meeting or trial personnel, enforcing the rules of racing and safe operating procedures, providing information on races, hearing protests, conducting inquiries and updating reports, records and other relevant documentation.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

## Application of the Unit

### Application of the unit

This unit of competency supports a stipendiary or cadet steward to administer race meeting and trial operations and manage the associated job functions.

Competencies attained in this unit apply to the greyhound,

harness or thoroughbred code of the industry.  
Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

## REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

- allocating duties to staff based on a range of operational requirements, staff experience, level of responsibility and complexity of job task
- adhering to safe handling and work practices when working around greyhounds or horses
- communicating with other stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to steward duties
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- computer skills, including:
  - data entry and retrieval
  - email and internet
  - spreadsheets
  - word processing
- enforcing the rules of racing
- identifying different items of industry-approved greyhound and horse race gear and assessing their condition in terms of safe use and need for repair
- identifying individual animals by industry signalment and documents
- identifying signs of ill health, injury or pain in racing animals
- managing race day incidents and emergencies
- monitoring and maintaining OHS and environmental work procedures
- providing clear and concise reports on race performance in verbal and written formats
- reading and controlling races
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- using initiative, discretion and judgements to solve racing issues and problems
- using video and DVD recording and re-play devices and other equipment and technology for racing operations duties
- working within the boundaries set by regulatory bodies, other regulations and the racing industry
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- avenues and procedures for personnel to access grief counselling

## REQUIRED SKILLS AND KNOWLEDGE

- communication procedures for communicating with other stewards and officials, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or racehorse identification features
- hazards and potential hazards in the workplace and risk control procedures
- industry terminology related to steward duties, racing operations and wider racing industry
- OHS and environmental legislative responsibilities
- organisational policies and procedures
- principles of administrative law and natural justice when applied to racing investigations, protests, inquiries and appeals
- principles of effective communication
- procedures for hearing protests, conducting inquiries and gathering evidence
- procedures for operation and maintenance of required equipment and technology
- processes and methods used to read races
- purpose of gear and reasons for identifying and reporting problems with condition, fit and safety
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reasons racing animals may not perform as expected
- relevant rules of racing
- reporting requirements for irregularities and problems
- roles and activities of licensed and non-licensed racing industry personnel
- symptoms of and ways of checking for common signs of injury, ill health or distress in racing animals
- track ratings and conditions.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of

## EVIDENCE GUIDE

---

this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing the duties of a stipendiary steward during race meetings and trials
- implementation of procedures and timely techniques for the safe, effective and efficient application of stipendiary steward trial and race day duties
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of race meeting and trial contexts, and include dealings with an appropriate range of situations.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to perform the race meeting and trial duties of a stipendiary steward
- race meetings and trials, and related facilities
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing

## EVIDENCE GUIDE

---

### Guidance information for assessment

Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role, for example:

- RGRCMN401A Maintain and monitor OHS procedures and environmental work practices.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform the duties of a stipendiary steward at race meetings and trials. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

Methods used to evaluate ***race form*** may include:

- form guide
- software for speed map preparation and form interpretation
- stewards' reports
- video re-plays.

## RANGE STATEMENT

---

***Club officials and track staff*** may include:

- clerk of course
- race club operations manager
- race club secretary
- race starter
- track maintenance manager
- track maintenance staff.

Liaising on ***track conditions, race club facilities and racing procedures*** will include:

- confirming starting equipment is operational
- confirming swabbing staff are in attendance and appropriate security for samples is provided
- conveying accurate information on track condition and rating to:
  - drivers
  - jockeys
  - owners
  - punters
  - trainers
- ensuring emergency and first aid equipment and facilities are available for humans and animals
- ensuring phone access is available for contacting TAB and media to advise of race results, late scratchings and protests.

***Duties allocated to staff*** at race meetings and trials will include:

- allocating stewards to observation positions around track
- arranging for swab samples to be sent to laboratory for analysis
- carrying out or supervising pre-race identification
- calling greyhounds or horses to parade or marshalling area
- calling greyhounds to stir-up area and to starting boxes
- calling horses to starting stalls
- calling jockeys to mount up
- checking starting positions of each race
- checking track conditions
- checking updated eligibility list against current suspension list
- conducting post-race protests
- inspecting bandages and other gear

## RANGE STATEMENT

**Racing safety** related to track condition may include:

- liaising with trainers, drivers and jockeys if there are problems with engaged drivers or riders
- participating in post-meeting inquiries or appeals
- selecting animals for pre-race swabbing and supervising the procedure
- sending field to the start.
- debris left on track
- moisture content
- rail position and condition
- turf, dirt or synthetic surface maintenance.

**Animal welfare issues** may include:

- epistaxis
- exhaustion
- injuries
- lameness
- overheating.

**OHS issues** identification and resolution may include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- applying correct manual handling techniques, including:
  - carrying
  - shifting
  - lifting
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - lure, wind and noise
  - other persons or animals
  - vehicles
- eliminating hazardous substances and materials
- ensuring accident and emergency equipment is available and in good working order, including:
  - fire safety equipment
  - first aid equipment for humans and animals

## RANGE STATEMENT

---

- safety signage
- ensuring trial and race meeting specific health and safety procedures for the protection of others, including:
  - all gear used on greyhounds or horses is approved and of good quality
  - drivers or jockeys are in a fit state to compete
  - required equipment and vehicles are well maintained and in operational order, including:
    - barriers
    - lures
    - mobile start vehicles
    - starting boxes
    - tractors
  - personal protective equipment conforms to required standards
  - track is in a fit and proper state for safe and competitive racing
- following safe operating procedures
- identifying hazards and applying risk control measures
- reporting unsafe work practices
- understanding accident and injury procedures.
- advising persons involved or immediate witnesses of ways to access counselling
- identifying emergency or accident, and responding in accordance with race club procedures
- working within safe operating procedures.
- copies of betting sheets and fluctuations
- inquiry transcripts
- stewards' reports
- swab materials
- videos.

Assistance following **critical race incidents** may include:

**Evidence** may include:

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to oversee and monitor trackwork and training operations and manage the job functions associated with checking the equipment used in trackwork and the eligibility of participants, including greyhounds and horses, and to conduct kennel or stable inspections. It requires strong verbal and written communication skills and the knowledge and skills associated with staff and animal welfare, animal treatment and medication, the security of kennels or stables, the conduct of licensed or registered personnel and updating reports, records and other relevant documentation.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

### Application of the Unit

#### Application of the unit

This unit of competency supports a stipendiary or cadet steward to manage the job functions associated with non-race day duties.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adhering to safe handling and work practices when working around greyhounds or horses
- assessing industry requirements associated with trackwork and training operations, including safety, security, licensing or registration, and staff and animal welfare
- communicating with other stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to steward non-race day duties
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- enforcing the rules of racing
- identifying different items of industry-approved greyhound and horse race gear and assessing their condition in terms of safe use and need for repair

## REQUIRED SKILLS AND KNOWLEDGE

- identifying individual animals by industry signalment and documents
- identifying signs of ill health, injury or pain in racing animals
- managing trackwork incidents and emergencies
- monitoring and maintaining OHS and environmental work procedures
- providing clear and concise reports on trackwork and training in verbal and written formats
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- using initiative, discretion and judgements to solve racing issues and problems
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- avenues and procedures for personnel to access grief counselling
- communication procedures for communicating with other stewards and industry personnel, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or racehorse identification features
- hazards and potential hazards in the workplace and risk control procedures
- industry terminology related to steward non-race day duties, racing operations and wider racing industry
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- purpose of gear and reasons for identifying and reporting problems with condition, fit and safety
- racing industry animal welfare requirements
- relevant rules of racing
- reporting requirements for irregularities and problems
- roles and activities of licensed and non-licensed racing industry personnel
- symptoms of and ways of checking for common signs of injury, ill health or distress in racing animals.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the

## EVIDENCE GUIDE

---

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when performing the non-race day duties of a stipendiary steward
- implementation of procedures and timely techniques for the safe, effective and efficient application of stipendiary steward non-race day duties
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing kennels or stables, trackwork and training contexts and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- commercial kennel and stable establishments, racecourse trackwork and training activities, and related facilities
- materials and equipment relevant to assessing candidate's ability to perform the non-race day duties of a stipendiary steward
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required

## EVIDENCE GUIDE

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to perform steward's non-race day duties. Workplaces include greyhound kennels, harness and thoroughbred stables, racecourses, training tracks, administration buildings and public areas.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

## RANGE STATEMENT

**Trackwork and training operations monitoring** may include:

- currency of kennelhand or stablehand, driver or rider registrations and trainer licenses
- greyhound or horse welfare
- personal protective equipment
- security and industry compliance
- staff welfare
- suitability and safety of gear and saddlery
- track conditions.

**Staff welfare** may include:

- effective supervision is provided at all times
- hazard identification, risk assessment and control measures are in place
- required safety equipment is maintained, including:
  - personal protective
  - first aid equipment
- stable evacuation procedure is clearly established and signed
- staff accommodation is clean, well maintained and affords privacy for male and female staff, such as apprentice jockeys
- staff are adequately trained in tasks carried out, including induction training.

**Animal welfare** may include:

- animals are exercised in a manner deemed proper and appropriate to the fitness of the greyhound or horse
- animals are maintained appropriately for the conditions, such as:
  - housed
  - rugged
- animals do not display obvious signs of ill health or distress
- boxes, kennels, runs and yards are clean and free of hazards
- clean and dust free bedding is evident
- feed and water containers are clean and free of sharp edges
- safe and industry-recognised gear and saddlery are used on animals.

**Site security and safety** may be evaluated by:

- ensuring availability of avenues for staff to address harassment, bullying and discrimination
- checking available site security and safety

## RANGE STATEMENT

|                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## RANGE STATEMENT

include:

- officials
- owners.
- Australian and local rules of racing related to:
  - conduct and behaviour, including:
    - race day procedures
    - staff and animal welfare
    - use of prohibited substances
  - nominations and acceptances
  - registration of greyhounds or horses
  - syndications
- state and federal legislation and regulations related to:
  - animal welfare
  - anti-discrimination
  - equal employment opportunities
  - industrial awards
  - OHS
  - sexual harassment.

***Obligations of licensed and registered persons, owners, agents and others*** may include:

***Assistance following critical incidents*** may include:

- advising persons involved or immediate witnesses of ways to access counselling
- identifying emergencies or accidents, and responding in accordance with race club procedures
- working within safe operating procedures.

***Assistance sought for personal recovery or debrief after critical incident*** may include:

- accessing organisation counselling and debriefing avenues.

## Unit Sector(s)

**Unit Sector**

Greyhound, harness and thoroughbred racing codes

## Co-requisite units

Co-requisite units

## Functional Area

Functional Area      Racing common

# RGRSTD403A Apply principles of administrative law to investigation and resolution of racing incidents

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to ensure principles of administrative law are applied in the investigation and resolution of incidents in racing. It requires knowledge of the rules of racing, the concept of natural justice, and the application of correct documentation procedures. Verbal and non-verbal communication skills, including conflict resolution, assertiveness and interviewing techniques, are required.

This unit has been contextualised and is based on TAFE NSW 0639F Principles of Administrative Law.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

## Application of the Unit

### Application of the unit

This unit of competency supports stipendiary or cadet stewards and others authorised to conduct and resolve racing incident investigations.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for

this unit will reflect this distinction.

## Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

Apply the principles of administrative law.

1. ***Natural justice*** is applied to the investigation and resolution of racing incidents.
2. ***Racing protocols and procedures*** are followed during

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with other stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to racing incident investigations

## REQUIRED SKILLS AND KNOWLEDGE

- completing duties in accordance with safe operating procedures and nominated time frame
- completing clear and concise stewards' reports
- complying with organisational policies and procedures and the rules of racing
- conducting inquiries and arriving at satisfactory conclusions
- gathering relevant evidence to racing incidents covered by the rules of racing
- hearing and adjudicating race protests
- managing conflicts and difficult situations
- performing the duties of a steward with due consideration to the individual differences and needs of licensed persons
- preparing and presenting evidence for appeals
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures for communicating with other stewards and industry personnel, including reporting lines within the workplace and wider racing industry
- detailed understanding of applicable federal, state or territory legislation and regulations relating to anti-discrimination and harassment
- ethical conduct standards of relevant racing principal authority
- industry terminology related to steward duties, racing operations and wider racing industry
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of administrative law
- principles of effective communication
- purpose of racing operations documentation
- racing industry animal welfare requirements
- rules of racing
- reporting requirements for irregularities and problems
- rules relating to licensed personnel, permit holders and others authorised to undertake work associated with the greyhound, harness and thoroughbred codes
- rules relating to conduct of inquiries, hearings, protests and appeals
- state and territory Acts governing the specific racing code of the industry.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions applicable to applying the principles of administrative law to racing incident investigations and resolution
- demonstration of ability to employ a range of communication strategies to elicit facts and information and to defuse potentially difficult situations, while applying the principles of natural justice and procedural fairness and complying with equity principles
- implementation of procedures and timely techniques for the safe, effective and efficient application of administrative law principles to investigations and resolution of racing incidents
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing industry administration and operations contexts, and include dealings with an appropriate range of situations.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to apply the principles of administrative law to investigation and resolution of

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

## RANGE STATEMENT

---

The range statement provides details of how this competency can be used in the workplaces of the racing industry to apply the principles of administrative law to investigation and resolution of racing incidents. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

**Natural justice**, also known as procedural fairness, is applied to:

- conduct of inquiries, hearings, protests and appeals
- dealings with licensed persons, including:
  - drug testing procedures
  - inspections
  - licensing matters.

**Racing protocols and procedures** include:

- legal parameters within the rules of racing and the stewards' rights and obligations under these rules when conducting an investigation and resolution of an incident.

**Non-verbal communication** may include:

- body posture
- eye contact
- distance or physical contact
- facial expression
- timing.

**Communication and recording aids** may include:

- microphone
- note taking
- recorder
- scribe
- two-way radio.

Techniques for **dealing with difficult people** may include:

- analysing the situation from the interviewee's point of view
- avoiding using manipulation or displays of temper
- creating a clear picture of the overall situation
- defining the parameters or constraints of the inquiry and solution
- explaining decisions
- identifying strengths and weaknesses of the

# RGRSTD404A Prepare for racing industry appeals

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to prepare for racing industry appeals. It requires an ability to research and gather information, and prepare evidence and associated documentation. It also requires the ability to effectively communicate with appeal panel members, lawyers, licensed personnel and racing officials.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

## Application of the Unit

### Application of the unit

This unit of competency supports the stipendiary steward in preparing for and representing stewards at appeal hearings.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Licensing/Regulatory Information

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with appeal panel members, other stewards, racing officials, licensed and registered personnel and others using assertiveness and communication techniques to gather, interpret and relay information related to preparing for racing industry appeals
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures and the rules of racing
- gathering relevant evidence to racing incidents covered by the rules of racing
- preparing and presenting evidence for appeals in a succinct and logical manner
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- researching documents
- teamwork skills to ensure completion of job tasks
- using various modes of technology, including video records, tape and other audiovisual aids
- written communication skills to complete workplace documentation and reports.

#### Required knowledge

- applicable federal, state or territory legislation and regulations relating to anti-discrimination and harassment
- communication procedures for communicating with other stewards and industry personnel, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- evidence-gathering procedures
- industry terminology related to steward duties, racing operations and wider racing industry

## REQUIRED SKILLS AND KNOWLEDGE

- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of administrative law
- principles of effective communication
- racing industry animal welfare requirements
- rules of racing relevant to appeal subject matter.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when preparing for racing appeals
- demonstration of ability to research and gather information, and prepare evidence, employing a range of appropriate communication strategies
- implementation of procedures and timely techniques for the safe, effective and efficient preparation of racing appeals
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing industry administration and operations contexts, and include dealings with an appropriate range of situations.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or

## EVIDENCE GUIDE

---

Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to prepare evidence at racing appeals, including:
  - supervised access to inquiry, protest and appeals documents at supervisor's discretion
- racing administration buildings and related appeals facilities
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- case studies to assess candidate's ability to provide written and/or oral responses to various scenarios.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to prepare for appeals. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

***Appeals process*** includes:

- appeal decision
- application for stay of proceedings
- avenue of appeal for aggrieved person at first or second level, dependant on racing code procedures
- level of fine or suspension duration
- lodgement of fees
- notice of appeal
- subject matter of appeals and associated rules of racing
- time frame of appeal related to statutory requirement.

***Evidence*** may include:

- copy of betting sheets and fluctuations
- inquiry transcripts
- models
- stewards' reports
- swab materials
- videos.

***Effective listening and speaking skills*** may include:

- being clear and precise
- clarifying what a question is about prior to responding
- presenting information in logical order
- speaking clearly

## RANGE STATEMENT

---

**Assertiveness skills** may include:

- using language that is not patronising but at a level suitable for interviewee
- using body language and voice that is assertive but not aggressive
- using non-discriminatory language
- verifying what has been said or done and why.
- acknowledging rights of self and others
- confronting tactfully
- displaying self-confidence
- giving others an opportunity to state their case
- keeping control of emotions
- keeping control of tone, level and pitch of voice
- maintaining authority without resorting to emotional blackmail or violence
- valuing others.

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to provide stewards and other authorised racing officials with the skills and required knowledge to oversee the process of sample collection from racing industry personnel, greyhounds and harness or thoroughbred racing horses.

The unit includes processes related to the preparation for testing, authorisation and implementation of testing, and initiation of evidence-gathering activities. It requires compliance with laboratory protocols and procedures as well as the rules of racing, OHS standards and safe operating procedures to maintain the integrity of the samples.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

## Application of the Unit

### Application of the unit

This unit of competency supports the stipendiary steward and other racing industry personnel authorised to oversee the collection of samples from racing personnel and racing animals.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe work practices when dealing with people, greyhounds and horses, including safe handling and lifting techniques

## REQUIRED SKILLS AND KNOWLEDGE

- communicating with swabbing officers, doctors, veterinarians, other stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to sample collection procedures
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with laboratory protocols and procedures, and OHS and animal welfare regulations to ensure the integrity of samples
- complying with organisational policies and procedures and the rules of racing
- demonstrating aptitude to use initiative and problem-solving abilities to collect samples from difficult people and animals
- directing industry personnel to correctly and safely participate in sample collection processes
- ensuring provision of same gender when directing racing personnel to make themselves available for sample collection
- demonstrating common greyhound or horse handling skills
- identifying and reporting swabbing irregularities
- identifying animals by colour, brand, sex, and leg and face markings
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- maintaining racing code requirements for confidentiality
- practical experience in dealing with difficult people
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from other stewards or racing officials
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or horse behaviour and communication traits
- industry terminology related to race meeting and swabbing procedures
- hazard identification and risk management
- protocols and procedures for communicating with licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reporting requirements for irregularities and problems, including difficulties in obtaining samples

## REQUIRED SKILLS AND KNOWLEDGE

- sample collection standard operating procedures
- signs of animal health, ill health, injury and diseases
- swabbing protocols and associated rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when overseeing sample collection
- implementation of procedures and timely techniques for the safe, effective and efficient overseeing of sample collection
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing industry operations contexts and include dealings with an appropriate range of situations.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a range of greyhounds and harness or thoroughbred horses

## EVIDENCE GUIDE

---

### Method of assessment

- materials and equipment relevant to assessing candidate's ability to oversee sample collection
- race meetings and related facilities, including swabbing
- work instructions and related documentation.

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- case studies to assess the candidate's skills and knowledge of the overall swabbing procedure to ensure continuity and security of evidence.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

## RANGE STATEMENT

---

The range statement provides details of how this competency can be used in the workplaces of the racing industry to conduct steward overseeing of sample collection procedures. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

- Cleanliness, safety and security*** of the sampling area will include:
- animal manure or faeces removed promptly
  - area must be able to be:
    - locked
    - monitored at all times
  - provision of hand washing amenities and disposable gloves
  - refrigerator in working order for proper storage of samples
  - sampling area design allows safe movement of animals and personnel
  - working surfaces are dust free.
- Considerations for ***animal comfort*** will include:
- air flow
  - clean animal bedding
  - dust free environment, including animal bedding
  - light
  - size of enclosure to allow animal to move around comfortably
  - temperature
  - quiet area to minimise distractions and encourage provision of samples.
- Sample collection kits*** may include:
- blood collection bottles
  - collection bottle seals and labels
  - disposable gloves
  - laboratory cards
  - needles
  - rinse containers
  - sharps containers

## RANGE STATEMENT

**Collection procedures** may include:

- urine collection bottles.
- escorting animal and handler to swab area
- following chain of evidence protocols
- preparing swab kit and swab area
- recording details
- securing swabs and swab area
- sending samples to laboratory for analysis.

**Collection protocols** will include:

- conditions under which the sample is gathered, including:
  - identification of humans or animals to be tested
  - duration of sample custody
  - security conditions and manner in which sample is transferred to subsequent custodians
- documents or paper trails showing collection, custody, control, transfer and analysis of physical (evidence) sample
- each transaction completely documented chronologically
- identifiable person always to have physical evidence, from swab staff to detective or steward
- jurisprudence concept applying to handling of sample and its integrity.

**OHS and safe operating procedures** will include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- contributing to development of risk control measures
- following safe work practices, including:

## RANGE STATEMENT

---

- use of restraints
- handling animals in enclosed spaces
- following accident and injury procedures
- identifying and reporting unsafe work practices
- identifying emergency situations
- monitoring animal behaviour
- using approved and well-maintained gear and equipment
- wearing approved personal protective equipment.

## Unit Sector(s)

**Unit Sector** Greyhound, harness and thoroughbred racing codes

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area** Racing common

## RGRSTD406A Assess greyhound or horse handling skills

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to assess the greyhound or horse handling skills of license or registration applicants. It requires the ability to identify safe animal handling practices in a range of situations, including races or trials and to communicate verbally and in writing to provide appropriate feedback to applicants. The unit also requires knowledge of industry-approved gear, personal protective equipment and safe operating procedures.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

### Application of the Unit

#### Application of the unit

This unit of competency supports stipendiary stewards or other nominated racing officials authorised to assess the greyhound or horse handling skills of license or registration applicants.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while

also maintaining the integrity of the unit.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe work practices when approaching and moving around greyhounds or horses
- assessing license or registration applicant's ability to:
  - adhere to safe work practices
  - demonstrate application of safe animal handling and controlling methods
  - identify and apply nominated gear correctly
  - work with animals in confined spaces
- communicating with other stewards, racing officials, license and registration applicants and others using assertive communication techniques to gather, interpret and relay information related to assessing greyhound or horse handling skills

## REQUIRED SKILLS AND KNOWLEDGE

- completing duties in accordance with safe operating procedures and nominated time frame
- complying with OHS, environmental and animal welfare legislation
- complying with organisational policies and procedures and the rules of racing
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- reading and interpreting workplace documentation and rules of racing
- recognising damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from other stewards or racing officials
- using appropriate language and interpersonal techniques
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- applicable federal, state or territory legislation and regulations relating to anti-discrimination and harassment
- approved gear
- common safe greyhound or horse handling and controlling techniques
- communication procedures for communicating with other stewards and industry personnel, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or horse behaviour and communication traits
- hazard identification and risk management
- industry terminology related to animal handling, racing operations and wider racing industry
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing
- reporting requirements for irregularities and problems
- signs of animal health, ill health, injury and diseases.

## Evidence Guide

### EVIDENCE GUIDE

---

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when assessing greyhound or horse handling skills of license or registration applicants
- implementation of procedures and timely techniques for the safe, effective and efficient assessment of greyhound or horse handling skills
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing industry operations contexts, and include dealings with an appropriate range of situations and a variety of racing animals at different stages of preparation.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a range of greyhounds and harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to assess greyhound or horse handling skills of license or registration applicants
- safe handling areas, such as kennels or stables, and training and racetracks
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed

## EVIDENCE GUIDE

---

Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to assess greyhound or horse handling skills of license or registration applicants. Workplaces include greyhound kennels, harness and thoroughbred stables, racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is

## RANGE STATEMENT

---

delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

***Greyhound or horse handling skills*** may include:

- considering working environment where greyhounds or horses may be caught and controlled in kennels, stables, yards, tracks, public places, racecourses, paddocks and on beaches
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- ensuring handler is next to other handler when leading or passing horses in the opposite direction (person to person)
- ensuring only one horse per handler
- ensuring reflective vest is worn by handler and reflective tape affixed to horse's gear when walking in the dark
- maintaining two horse lengths between horses
- using anti-rearing bit, or bridle headpiece with bit, with double clip lead when horses are lead at racecourses, training tracks and in public place
- using muzzles and leads on greyhounds
- using personal protective equipment
- using well-maintained and safe gear
- walking in single file when leading greyhounds or horses.
- observing applicant's handling skills and testing knowledge of impact of environmental changes on the racing animal, including:
  - animal location, for example:
    - kennels, stables or stalls
    - marshalling area or enclosure
    - stirrup area
  - crowds

***Racing safe operating procedures compared to general handling skills*** may include:

## RANGE STATEMENT

---

- enclosed spaces, including:
  - barriers or boxes
  - inclement weather conditions, such as:
    - extreme heat
    - wind
  - loud noises
  - other greyhounds or horses
  - pre or post-race activity and biochemical changes
  - signs of distress, excitement or nervousness in greyhounds or horses, such as:
    - agitation and sweating up
    - charging forward
    - kicking
    - pulling back or sideways
    - rearing
    - reluctance to move forward
    - turning in circles.
- OHS regulations related to animal handling requirements*** will include:
- employers and self-employed:
    - completing risk assessments
    - conforming to rules of racing
    - ensuring all employees follow safe operating procedures
    - ensuring workplace is a safe and healthy place in which to work
    - ensuring personal protective equipment is worn, including:
      - approved helmets
      - approved vests
      - boots
      - gloves
    - keeping health and safety records of all incidents and near misses
    - providing training, supervision and information that help people handle animals safely
  - employees:
    - working safely to ensure self, other people and greyhounds or horses are protected
    - conforming to kennel or stable rules and

## RANGE STATEMENT

## RANGE STATEMENT

---

***Performance during handling skills test*** assessments may include:

- moving safely around the animal
- using approved gear.
- developing checklists and using safe operating procedures to assess tasks, including:
  - catching animals
  - fitting a range of approved gear relevant to code and task
  - identifying and responding to behaviour in animals
  - leading and controlling animals.

***Recommended remedial action*** may include:

- attending recognised training programs
- extending period of time as registered person before applying for license
- working with or under other trainers for additional guidance or mentoring.

# RGRSTD407A Assess driving or riding skills of license or registration applicants

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to identify safe horse driving or riding practices and to judge pace and driving or riding techniques in a range of situations, including races or trials.

The unit requires knowledge of track and safety procedures, use and application of industry-approved gear, and the ability to assess high-level driving or riding skills, including skills and pace required for trackwork, trials and race driving or riding. The unit also requires the ability to communicate verbally and in writing to provide appropriate feedback to applicants.

This unit of competency operates in workplace environments of racing administration, stables, racecourses and public areas.

Harness and thoroughbred racing are strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

## Application of the Unit

### Application of the unit

This unit of competency supports stewards or other nominated racing officials authorised to assess the driving or riding skills of license or registration applicants.

Competencies attained in this unit apply to the harness or thoroughbred code of the industry. Consequently when performance criteria are applied they will relate to the harness code or the thoroughbred code, and statements of

attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe work practices when approaching and moving around horses
- assessing license or registration applicant's ability to:

## REQUIRED SKILLS AND KNOWLEDGE

- adhere to safe work practices
- demonstrate application of safe animal handling and controlling methods
- demonstrate application of safe driving or riding techniques at nominated pace
- identify and apply nominated gear correctly
- work with animals in confined spaces
- communicating with other stewards, racing officials, license and registration applicants and others using assertive communication techniques to gather, interpret and relay information related to assessing driving or riding skills
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with OHS, environmental and animal welfare legislation
- complying with organisational policies and procedures and the rules of racing
- judging pace
- judging situations and taking appropriate action to prevent problems arising or to overcome problems before they develop further
- reading and interpreting workplace documentation and rules of racing
- recognising damaged or defective gear
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- using appropriate language and interpersonal techniques
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- approved gear
- common safe horse handling and controlling techniques
- communication procedures for communicating with other stewards and industry personnel, including reporting lines within the workplace and wider racing industry
- ethical conduct standards of relevant racing principal authority
- horse behaviour and communication traits
- hazard identification and risk management
- industry terminology related to animal handling, driving and riding, racing operations and wider racing industry
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reasonable understanding of applicable federal, state or territory legislation and regulations relating to anti-discrimination and harassment
- reporting requirements for irregularities and problems
- rules of racing relevant to driving and riding

## REQUIRED SKILLS AND KNOWLEDGE

- signs of horse health, ill health, injury and diseases.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when assessing driving or riding skills of license or registration applicants
- implementation of procedures and timely techniques for the safe, effective and efficient assessment of driving or riding skills
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of racing industry operations contexts, and include dealings with an appropriate range of situations and a variety of racing horses at different stages of preparation.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a range of harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to assess license or registration

## EVIDENCE GUIDE

---

### Method of assessment

applicants' driving or riding skills

- safe handling areas, such as stables, training and racetracks
- work instructions and related documentation.

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to assess driving or riding skills of license or

## RANGE STATEMENT

---

registration applicants. Workplaces include harness and thoroughbred stables, racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

***Driving or riding skills for nominated class of license or registration*** are determined by:

- reviewing existing class of license or registration status
- using industry-approved assessment documents.

***Safe operating procedures for the control of horses in harness or under saddle*** will include:

- cooling horses down after driving or riding
- fitting a range of gear relevant to the code while ensuring adherence to the following:
  - awareness of animal behaviour
  - checking durability of gear, for example frayed reins
  - comfort of the animal
  - rules related to gear application, for example bandages stitched or taped
  - safely moving around the animal
  - using approved gear
- identifying and responding to behaviour and activity in horses in harness or under saddle, including:
  - animal location, for example:
    - stables or stalls
    - enclosure
  - crowds
  - enclosed spaces, including barriers
  - inclement weather conditions, such as:
    - extreme heat
    - wind
  - loud noises
  - other horses
  - pre or post-race or trial activity
  - signs of distress, excitement or nervousness

## RANGE STATEMENT

---

***OHS and animal welfare regulations and industry guidelines*** may include:

- in horses, such as:
    - agitation and sweating up
    - charging forward
    - kicking
    - pulling back or sideways
    - rearing
    - reluctance to move forward
    - turning in circles
- leading and controlling horses
- moving around and working with other horses
- preparing horses for driving or riding.
- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue, including track rules covering:
  - crossing a track
  - entering and coming off
  - direction
  - position of pull up
  - position on track when doing slow work or fast work
  - safety of fellow drivers or riders
  - where horses may be driven or ridden, such as:
    - bull rings
    - trails
    - various tracks
- considering variables that influence behaviour of horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- ensuring horses are worked or trained only within the scope of their current training program

## RANGE STATEMENT

---

- following industry safety inspection checklists and safe operating procedures
- identifying dangerous driving or riding situations, for example:
  - bad weather
  - faulty equipment
  - loose horses
  - track hazards, such as:
    - excessive water
    - machinery or vehicles
    - other animals
    - rough surfaces
- reporting horse injuries to trainer or other relevant person, such as:
  - epistaxis
  - exhaustion
  - lameness
  - overheating
- using safe and approved gear, including:
  - bandages, bits, blinkers, boots, bridles and breastplates
  - cross over nosebands
  - girths
  - hobbles
  - overchecks
  - pacifiers
  - reins
  - rings
  - saddles
  - shadow roll
  - stirrup leathers
  - sulkies
  - surcingles
  - tongue ties
- positioning horse safely in trackwork or in the field
- working with animals in confined spaces
- wearing approved personal protective equipment and ensuring helmet and vest

## RANGE STATEMENT

***Driver or rider assessment for ability to maintain control of the horse*** during trackwork, trials and racing may include:

- replacement terms are complied with.
- driving or riding competitively
- horse is driven or ridden to and from the track in a safe manner
- horses are warmed up to, and cooled down from, working pace and are exercised in a balanced manner in all required gaits
- pace of horse is judged and maintained for required times and distances according to plans or instructions
- driving or riding skills are appropriate to a variety of trackwork situations, including:
  - cross only when two lengths clear of other horses
  - constant awareness of other drivers or riders
  - keeping horse straight.

***Ability to start a race or trial without hindering horse's progress*** may include:

- driver or rider hand and seat position is correct
- driver or rider has demonstrated correct positioning of the horse in or at the barriers
- driver or rider has demonstrated safe and correct procedure for driving or riding horse from the barriers
- horse is driven or ridden straight from the barriers
- pace of the horse is judged and maintained for required time.

***Using objective measurements*** for driving or riding skills tests will include:

- developing checklists and using safe operating procedures to assess tasks, including:
  - applying safe animal handling and controlling methods
  - applying safe driving or riding techniques at varying paces
  - fitting a range of approved gear relevant to code and task
  - identifying and responding to behaviour in animals
  - leading and controlling animals.

***Recommended remedial action*** may include:

- attending recognised training programs
- extending period of time as registered person before applying for license
- working with or under other trainers for additional guidance or mentoring.

## RGRSTD408A Analyse race performance

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to conduct procedures related to pre and post-race checks of a range of written documentation and audio or visual records to analyse race performance. It requires knowledge of rules of racing, training practices, track design and ratings, and verbal and written communication skills to ensure adequate gathering of information. It also requires an ability to work with other team members in order to verify factors that may affect animal performance.

This unit of competency operates in workplace environments of racing administration, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. All handicappers are officials appointed by racing licensing bodies. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary or cadet steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

### Application of the Unit

#### Application of the unit

This unit of competency supports stipendiary stewards, race handicappers, and other nominated persons in determining, collecting and organising information to effectively analyse race performances of greyhounds and harness or thoroughbred horses.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or

the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information related to analysing race performance
- identifying industry requirements associated with trackwork, trialling and racing operations, including approved gear, saddlery or harness, and race or rug colours

## REQUIRED SKILLS AND KNOWLEDGE

- identifying individual animals by brand, colour, sex, and leg and face markings
- identifying fair and legal race strategies by observation of live racing or video examples
- providing clear and concise reports on race performance in verbal and written formats
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- recognising rapid alterations in an animal's position in race field
- teamwork skills to ensure completion of job tasks
- using video and DVD recording and re-play devices
- visual acuity to identify colours and individual animals
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures, including reporting lines within the workplace and wider racing industry
- effect of track conditions and ratings, course layout and rail placement on animal performance
- factors that affect greyhound or racehorse performance
- greyhound or horse's normal action and impaired action at different gaits and stages of exercise at critical control points during a race, including signs of fatigue or injury
- industry terminology related to race performance and wider racing industry
- procedures for operation and maintenance of equipment and technology
- race form, class structure and track ratings
- racing industry safety requirements, including safe operating procedures
- greyhound or racehorse markings
- relevant rules of racing
- rules of racing relating to riders, drivers and trainers of animals involved in trackwork, trials and races.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## EVIDENCE GUIDE

---

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when analysing race performance
- demonstration in identifying effects on individual racing and trialling greyhounds or horses, including placement at beginning of race, changes in pace, position in running, and other factors affecting race performance
- implementation of procedures and timely techniques for the safe, effective and efficient application of race analysis duties
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of race meeting relevant contexts, and include dealings with an appropriate range of situations.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a variety of race meetings and training tracks
- materials and equipment relevant to assessing candidate's ability to analyse race performance, including:
  - stewards' reports
  - race form
  - race books
  - videos and DVDs
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed

## EVIDENCE GUIDE

---

Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- case studies covering a range of strategies and involving video footage from actual races, accompanied by race documentation such as form guides and stewards' reports.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to analyse race performance. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

## RANGE STATEMENT

---

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

**Speed maps** may be prepared through use of:

- form guides
- race books and other form reviews, including:
  - video replays of races, trials or trackwork
- stewards' reports.

**Level of education and experience** may include:

- class or grading of race
- driver or rider error and experience
- greyhound or horse's age
- number of race starts and trial starts
- variety of tracks and track conditions.

Situations where **animals are identified** include:

- at race meetings
- during trackwork
- via video replays.

**Interference** may constitute:

- crowding
- crossing another greyhound or horse
- fighting (greyhounds)
- hampering
- jostling
- taking the running.

**Other incidents** may include:

- careless riding
- changes in strategies
- failure to pursue the lure (greyhounds)
- gear usage
- injury in running
- lack of race fitness
- missing the start.

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to manage and supervise compliance in race meeting and non-race meeting contexts. The unit requires an understanding of and ability to practise and supervise ethical and integrity compliance, an ability to manage investigations and inquiries, and knowledge of associated rules of racing and legislative responsibilities.

Staff supervisory skills and associated knowledge of staff and animal welfare, the security of kennels or stables and the conduct of licensed or registered persons is required. The unit also requires knowledge of rules of racing and OHS standards relating to licensed personnel, permit holders and others authorised to undertake work on racecourses and training establishments associated with the greyhound, harness and thoroughbred codes of the racing industry.

Strong verbal and written communication skills are necessary, as are analytical skills in the determination of inquiries, protests and appeals.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Greyhound, harness and thoroughbred racing is strictly regulated throughout Australia. All stewards are appointed under the rules of racing by the relevant racing controlling body. For this reason enrolment in this unit of competency is restricted to people currently employed as a stipendiary steward or those who have been approved by a State Principal Racing Authority to undertake this unit.

## Application of the Unit

### Application of the unit

This unit of competency supports senior stipendiary stewards or other approved persons who are required to perform the role of chairman of stewards in maintaining and upholding fair racing, and supervising and enforcing the industry's probity and integrity standards as empowered by the relevant racing code's national and local rules of racing.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

## REQUIRED SKILLS AND KNOWLEDGE

- allocating duties to staff based on a range of operational requirements, staff experience, level of responsibility and complexity of job task
- assessing industry requirements associated with steward services, including safety, security, licensing, and staff and animal welfare
- adhering to safe handling and work practices when working around greyhounds or horses
- communicating with racing administration executives and staff, other stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to steward duties
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with organisational policies and procedures
- computer skills, including:
  - data entry and retrieval
  - email and internet
  - spreadsheets
  - word processing
- conducting steward inquiries and gaining satisfactory conclusions
- critically analysing decisions made at inquiries, appeals, protests and review for relevance
- enforcing the rules of racing
- hearing and adjudicating race protests
- identifying different items of industry-approved greyhound and horse race gear and assessing their condition in terms of safe use and need for repair
- identifying individual animals by industry signalment and documents
- identifying signs of ill health, injury or pain in racing animals
- leadership skills to successfully manage and coordinate staff, including ability to delegate as and when required
- managing race day incidents and emergencies
- managing OHS and environmental work procedures
- managing staff
- preparing and presenting evidence for appeals
- providing clear and concise reports on race performance in verbal and written formats
- reading and controlling races
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- taking a proactive stance in all matters pertaining to racing, and implementing changes to advance racing where necessary
- using initiative, discretion and judgements to solve racing issues and problems

## REQUIRED SKILLS AND KNOWLEDGE

- using video and DVD recording and re-play devices and other equipment and technology for racing operations duties
- working within the boundaries set by regulatory bodies, other regulations and the racing industry
- working with team members to achieve results
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- avenues and procedures for personnel to access counselling
- communication procedures for communicating with racing administration executives and staff, other stewards, officials, licensed or registered personnel and others, including reporting lines within the workplace and wider racing industry
- detailed understanding of applicable federal, state or territory legislation and regulations, and national standards and codes of practice, including:
  - animal welfare
  - anti-discrimination and harassment
  - environmental and waste management
  - equal employment opportunity
  - industrial relations
  - OHS
- ethical conduct standards of relevant racing principal authority
- greyhound or racehorse identification features
- industry terminology related to steward duties, racing operations and wider racing industry
- organisational policies and procedures and management practices
- principles of administrative law and sound knowledge of legal proceedings
- principles of effective communication
- procedures for hearing protests, conducting inquiries and gathering evidence
- procedures for operation and maintenance of required equipment and technology
- purpose of gear and reasons for identifying and reporting problems with condition, fit and safety
- reasons racing animals may not perform as expected
- relevant rules of racing
- reporting requirements for irregularities and problems
- symptoms of and ways of checking for common signs of injury, ill health or distress in racing animals.

# Evidence Guide

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when managing steward services
- demonstration of ability to manage race day and non-race day steward services, including investigations and inquiries, by applying the relevant rules of racing and related protocols using appropriate communication techniques that reflect compliance with equity principles
- implementation of procedures and timely techniques for the safe, effective and efficient application of steward services management
- working with others to undertake and complete the required procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of administrative, race meeting and trial contexts, and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to manage steward services
- racing administration offices, racetracks, race trials and meetings, and related facilities

## EVIDENCE GUIDE

---

### Method of assessment

- work instructions and related documentation.

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks including:
  - observation of chairing at least three race meetings and conducting at least three inquiries
  - presenting completed reports for these race meetings, plus reports for three inquiries (and any related appeals) in which candidate has actively participated while maintaining case studies of common race incidents.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording

## RANGE STATEMENT

---

in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to manage steward services. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks and administration buildings.

Stewards oversee the conduct of all racing-related activities within the responsibilities and powers described under the rules of racing. The conditions under which this unit is delivered and assessed must take into consideration these powers and responsibilities. These powers and responsibilities are further described in the rules of racing for the relevant racing code. It is strongly recommended that training facilitators and learners refer to these powers and responsibilities as part of the range of conditions for all units covered in the steward specialist area of the Training Package.

***Rules of racing and legislation***  
may include:

- anti-discrimination and harassment
- animal welfare
- Australian and local rules of racing
- equal employment opportunity
- OHS
- superannuation awards
- taxation law
- union coverage and work agreements
- workers' compensation.

***Areas the rules of racing cover***  
include:

- animal welfare
- constitutional
- interpretation
- licensing and registration
- local rules
- offences
- penalties
- race meetings
- stewards
- syndicates.

***Dimensions of ethical behaviour***  
include:

- administrative structures
- codes of conduct
- corporate strategies
- systems, policies and procedures.

***Race meeting operations roles***  
include:

- barrier attendants
- catching pen supervisors
- clerks of the course

## RANGE STATEMENT

---

***Animal welfare legislation*** includes:

- kennelhands
- jockeys and trackwork riders
- owners
- stablehands
- strappers
- race day staff
- trainers.
- national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare, and requires:
  - animals to be exercised in a manner deemed proper and appropriate to the fitness of the animal
  - animals not to display any obvious signs of ill health
  - animals to be maintained appropriately for the conditions, including:
    - housing
    - rugging
  - feed and water containers to be clean and free of sharp edges
  - safe and industry-recognised gear and saddlery to be used on animals
  - boxes, kennels, runs and yards to be free of hazards and clean bedding evident.

***Staff welfare and safety*** will include:

- adhering to legislation governing:
  - bullying
  - discrimination
  - harassment, including sexual harassment
  - health and safety
  - working with children
  - taxation law
  - workers' compensation
- all gear used on animals is approved and of good quality
- effective supervision at all times
- ensuring drivers or jockeys are in a fit state to compete
- equipment or vehicles to be used are well maintained and in proper working order

## Unit Sector(s)

**Unit Sector** Greyhound, harness and thoroughbred racing codes

**Co-requisite units**

Co-requisite units

**Functional Area**

Functional Area                  Racing common

# RGRSWA301A Collect non-blood samples from greyhounds or horses

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to work under supervision and apply the process for the collection of non-blood samples from racing animals. It requires compliance with laboratory protocols and procedures as well as the rules of racing, OHS regulations and safe operating procedures, which are essential to maintaining the integrity of the samples and the continuity and security of evidence.

This unit of competency operates in work environments of racing administration approved sample collection facilities that may include racecourse, kennel or stable premises.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports racing personnel or other authorised persons who are required to collect non-blood samples from greyhounds or horses under supervision as part of their job role.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Prepare for sample collection.

1. Process for selecting greyhounds or horses to be sampled is confirmed with stewards or supervising veterinarian.
2. ***Preparation of collecting area*** and provision of ***collecting equipment*** and collection bags are confirmed.
3. Collecting area and equipment are secured.
4. Greyhounds or horses required for non-blood sample

| ELEMENT                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds or horses
- communicating with stewards, veterinarians, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to non-blood sample collection from greyhounds or horses
- completing duties in accordance with safe operating procedures and nominated time frame
- conducting sample collection processes in accordance with laboratory protocols and procedures, and OHS and animal welfare regulations to ensure the integrity of samples
- demonstrating common greyhound or horse handling skills

## REQUIRED SKILLS AND KNOWLEDGE

- identifying and reporting swabbing irregularities
- identifying animal by colour, brand, sex, and leg and face markings
- maintaining racing code requirements for confidentiality
- providing prompt and succinct information to stewards and others as required
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- using initiative and problem-solving techniques to deal with difficult people
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or horse behaviour and communication traits
- industry terminology related to race meeting and swabbing procedures
- hazard identification and risk management
- laboratory protocols and procedures
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reporting requirements for irregularities and problems, including difficulties in obtaining samples
- sample collection standard operating procedures
- swabbing protocols and associated rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Critical aspects for assessment and evidence required to demonstrate

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria,

## EVIDENCE GUIDE

### competency in this unit

required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when collecting non-blood samples from greyhounds or horses
- implementation of procedures and timely techniques for the safe, effective and efficient application of non-blood sample collection from greyhounds or horses
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### Context of, and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a range of greyhounds and harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to perform duties associated with non-blood sample collection
- safe handling areas such as racetracks, including race meetings, related swabbing facilities and Australian racing forensic laboratory
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

## EVIDENCE GUIDE

---

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### ***Preparation of collecting area*** will include:

- collecting and managing records pertaining to individual sample collection processes
- communicating with other sample collection officers and swab stewards or veterinarians
- checking number and verifying contents of swab kits
- checking that swab video camera is working
- ensuring swab area is clean
- ensuring appropriate systems and personnel are in place to monitor key operating areas
- preparing paperwork and computer used in sample collection.

#### ***Collecting equipment*** will

- collection bottles

## RANGE STATEMENT

include:

- collection bottle seals and labels
- disposable gloves
- laboratory cards
- swab kit.

***Collection procedures*** will include:

- checking identification of attending witness
- identifying greyhounds or horses to be swabbed
- escorting animal and handler to swab area
- preparing swab kit and swab area
- recording swab kit numbers, taking sample and sealing bottles
- recording swab details
- requesting agent to sign required paperwork
- storing swab samples in secured area prior to dispatch to laboratory for analysis.

***Non-blood samples*** may include:

- saliva
- urine
- other non-invasive samples.

***Chain of custody of sampling equipment, documentation and sample*** may include:

- conditions under which the sample is gathered, including:
  - identification of animals to be tested
  - identification of all personnel
  - duration of sample custody
  - security conditions and manner in which sample is transferred to subsequent custodians
- documents or paper trails showing collection, custody, control, transfer and analysis of physical (evidence) sample
- each transaction completely documented chronologically
- identifiable person always to have physical evidence, from swab staff to detective or steward
- jurisprudence concept applying to handling of sample and its integrity.

***Contingency plans*** may include:

- managing dehydrated animal unable to provide urine sample
- providing water for drinking
- providing alternative (blood) sample collection.

## RANGE STATEMENT

---

***Safety of greyhound or horse , self and others*** will include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- adhering to rules of racing and rules of the race venue
- considering variables that influence behaviour of greyhounds or horses, such as:
  - fences and equipment
  - other persons or animals
  - vehicles
  - wind and noise
- contributing to development of risk control measures
- following safe work practices
- following accident and injury procedures
- identifying and reporting unsafe work practices
- identifying emergency situations
- monitoring animal behaviour
- using appropriate handling and restraining techniques
- using approved and well-maintained gear
- wearing approved personal protective equipment.

## Unit Sector(s)

# RGRSWA302A Collect non-blood samples from racing personnel

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to work under supervision and apply the process for the collection of non-blood samples from racing personnel. It requires compliance with laboratory protocols and procedures as well as the rules of racing, OHS regulations and safe operating procedures, which are essential to maintaining the integrity of the samples and the continuity and security of evidence.

This unit has been contextualised and is based on NSW TAFE 0640A Drug Testing Procedures (Personnel).

This unit of competency operates in work environments of racing administration approved sample collection facilities that may include racecourse, kennel or stable premises.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

**Application of the unit** This unit of competency supports racing personnel or other authorised persons who are required to collect non-blood samples from racing personnel under supervision as part of their job role.

Competencies attained in this unit apply to the harness or thoroughbred code of the industry. Consequently when performance criteria are applied they will relate to the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

**Prerequisite units**

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

| ELEMENT                                              | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                        |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to non-blood sample collection from racing personnel
- completing duties in accordance with safe operating procedures and nominated time frame
- conducting sample collection processes in accordance with laboratory protocols and procedures and OHS regulations to maintain the integrity of samples
- identifying and reporting swabbing irregularities

## REQUIRED SKILLS AND KNOWLEDGE

- maintaining racing code requirements for confidentiality
- providing prompt and succinct information to stewards and others as required
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- using initiative and problem-solving techniques to deal with difficult people
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- ethical conduct standards of relevant racing principal authority
- industry terminology related to race meeting and sample collection procedures
- hazard identification and risk management
- laboratory protocols and procedures
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- racing industry safety requirements, including safe operating procedures
- reporting requirements for irregularities and problems, including difficulties in obtaining samples
- sample collection standard operating procedures
- swabbing protocols and associated rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when collecting

## EVIDENCE GUIDE

security of evidence associated with the element in this unit:

- collect samples from racing personnel.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Preparation of collecting area*** will include:

- collecting and managing records pertaining to individual sample collection processes
- communicating with other sample collection officers and swab stewards
- checking number and verifying contents of swab kits
- ensuring swab area is clean
- ensuring appropriate systems and personnel are in place to monitor key operating areas
- preparing paperwork and computer used in

## RANGE STATEMENT

# RGRSWA303A Collect blood samples for racing animal drug testing

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to work under supervision and apply the process for the collection of blood samples from racing animals. It requires compliance with laboratory protocols and procedures as well as the rules of racing, OHS regulations and safe operating procedures, which are essential to maintaining the integrity of the samples and the continuity and security of evidence.

This unit of competency operates in work environments of racing administration approved sample collection facilities that may include racecourse, kennel or stable premises.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports racing personnel or other authorised persons who are required to collect blood samples from racing greyhounds or horses under supervision as part of their job role.

Blood collection may be restricted to veterinarians and veterinary nurses in some states. Candidates must ensure they are eligible to collect blood from animals before undertaking this unit.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry. Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for

this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

**Prerequisite units**

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

|                                                                             | 11. Disposal of sharps is managed to ensure safety of self and others.                                             |
| Document and provide information on swabbing procedure to relevant parties. | 12. Swab documentation is completed and filed.                                                                     |
|                                                                             | 13. Alterations to standard collection procedures are justified and documented.                                    |
|                                                                             | 14. Incidents that occurred during collection procedure are documented and reported to stewards.                   |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying safe handling and work practices when dealing with greyhounds or horses
- communicating with stewards, veterinarians, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to blood sample collection from greyhounds or horses
- completing duties in accordance with safe operating procedures and nominated time frame
- conducting sample collection processes in accordance with laboratory protocols

## REQUIRED SKILLS AND KNOWLEDGE

and procedures, and OHS and animal welfare regulations to maintain the integrity of samples

- demonstrating common greyhound or horse handling skills
- identifying and reporting swabbing irregularities
- identifying animal by colour, brand, sex, and leg and face markings
- maintaining racing code requirements for confidentiality
- providing prompt and succinct information to stewards and others as required
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- using initiative and problem-solving techniques to deal with difficult people
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- ethical conduct standards of relevant racing principal authority
- greyhound or horse behaviour and communication traits
- industry terminology related to race meeting and swabbing procedures
- hazard identification and risk management
- laboratory protocols and procedures
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reporting requirements for irregularities and problems, including difficulties in obtaining samples
- sample collection standard operating procedures
- swabbing protocols and associated rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

## EVIDENCE GUIDE

---

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when collecting blood samples from greyhounds or horses
- implementation of procedures and timely techniques for the safe, effective and efficient application of blood sample collection from greyhounds or horses
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of, and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- a range of greyhounds, and harness or thoroughbred horses
- materials and equipment relevant to assessing candidate's ability to perform blood sample collection duties
- safe handling areas such as racetracks, including race meetings, related swabbing facilities, and an Australian racing forensic laboratory
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge

## EVIDENCE GUIDE

- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- case study to assess candidate's skills and knowledge associated with the overall procedure to ensure continuity of security of evidence.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

#### ***Preparation of collecting area*** will include:

- collecting and managing records pertaining to individual sample collection processes
- communicating with other sample collection officers and swab steward or veterinarian
- checking number and verifying contents of swab kits
- checking that swab video camera is working
- ensuring swab area is clean
- ensuring appropriate systems and personnel are

## RANGE STATEMENT

---

|                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| <b><i>Collecting equipment</i></b> will include:                | <p>in place to monitor key operating areas</p> <ul style="list-style-type: none"> <li>• preparing paperwork and computer used in sample collection.</li> <li>• blood collection bottles</li> <li>• collection bottle seals and labels</li> <li>• disposable gloves</li> <li>• laboratory cards</li> <li>• needles</li> <li>• sharps container</li> <li>• swab kit.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b><i>Collection procedures</i></b> will include:               | <ul style="list-style-type: none"> <li>• checking identification of attending witness</li> <li>• identifying greyhounds or horses to be swabbed</li> <li>• escorting animal and handler to swab area</li> <li>• preparing swab kit and swab area</li> <li>• recording swab kit numbers</li> <li>• recording swab details</li> <li>• requesting agent to sign required paperwork</li> <li>• storing swab samples in secured area prior to dispatch to laboratory for analysis</li> <li>• taking blood samples and sealing blood bottles.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                   |
| <b><i>Safety of animals , self and others</i></b> will include: | <ul style="list-style-type: none"> <li>• adhering to responsibilities under OHS legislation and workplace practices</li> <li>• adhering to responsibilities under national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare</li> <li>• adhering to rules of racing and rules of the race venue</li> <li>• considering variables that influence behaviour of greyhounds or horses, such as: <ul style="list-style-type: none"> <li>• fences and equipment</li> <li>• other persons or animals</li> <li>• vehicles</li> <li>• wind and noise</li> </ul> </li> <li>• contributing to development of risk control measures</li> <li>• following safe work practices</li> <li>• following accident and injury procedures</li> <li>• identifying and reporting unsafe work practices</li> <li>• identifying emergency situations</li> </ul> |

## RANGE STATEMENT

***Chain of custody of sampling equipment, documentation and sample*** may include:

- monitoring animal behaviour
- using appropriate handling and restraining techniques
- using approved and well-maintained gear
- wearing approved personal protective equipment.
- conditions under which the sample is gathered, including:
  - identification of animals to be tested
  - identification of all personnel
  - duration of sample custody
  - security conditions and manner in which sample is transferred to subsequent custodians
- documents or paper trails showing collection, custody, control, transfer and analysis of physical (evidence) sample
- each transaction completely documented chronologically
- identifiable person always to have physical evidence, from swab staff to detective or steward
- jurisprudence concept applying to handling of sample and its integrity.

# RGRSWA401A Collect blood samples from racing personnel

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to apply the process for the collection of blood samples from racing personnel. It requires compliance with laboratory protocols and procedures as well as the rules of racing, OHS regulations and safe operating procedures, which are essential to maintaining the integrity of the samples and the continuity and security of evidence.

This unit has been contextualised and is based on NSW TAFE 0640A Drug Testing Procedures (Personnel).

This unit of competency operates in work environments of racing administration approved sample collection facilities that may include racecourse, kennel or stable premises.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports racing personnel or other authorised persons who are required to collect blood samples from racing personnel as part of their job role.

Blood collection may be restricted to doctors and nurses in some states. Candidates must ensure they are eligible to collect blood from humans before undertaking this unit.

Competencies attained in this unit apply to the harness or thoroughbred code of the industry. Consequently when performance criteria are applied they will relate to the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while

also maintaining the integrity of the unit.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicating with stewards, racing officials, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to blood sample collection from racing personnel
- completing duties in accordance with safe operating procedures and nominated time frame
- conducting sample collection processes in accordance with laboratory protocols and procedures and OHS regulations to maintain the integrity of samples
- directing racing personnel to make themselves available for sample collection

## REQUIRED SKILLS AND KNOWLEDGE

- identifying and reporting swabbing irregularities
- maintaining racing code requirements for confidentiality
- providing prompt and succinct information to stewards and others as required
- reading and interpreting workplace documentation and rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- responding quickly to requests from stewards or other racing officials
- teamwork skills to ensure completion of job tasks
- using initiative and problem-solving techniques to deal with difficult people
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- communication procedures within the race meeting environment and wider racing industry
- ethical conduct standards of relevant racing principal authority
- hazard identification and risk management
- industry terminology related to race meeting and sample collection procedures
- laboratory protocols and procedures
- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- racing industry safety requirements, including safe operating procedures
- reporting requirements for irregularities and problems, including difficulties in obtaining samples
- sample collection standard operating procedures
- swabbing protocols and associated rules of racing.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and

## EVIDENCE GUIDE

---

### Context of, and specific resources for assessment

instructions that are to apply when collecting blood samples from racing personnel

- implementation of procedures and timely techniques for the safe, effective and efficient application of blood sample collection from racing personnel
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

Competency must be assessed in a racing workplace or simulated environment that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills, however these should not include human sample collection procedures.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to perform duties associated with blood sample collection from racing personnel
- safe and appropriate racing sample collection facilities and an Australian racing forensic laboratory
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks associated with the elements in this unit:
  - plan for blood collection from racing personnel
  - document and provide information on swabbing procedure to relevant parties
- case studies or role plays to assess candidate's ability to implement various strategies to address a range of

## EVIDENCE GUIDE

scenarios and ensure continuity of security of evidence associated with the element:

- collect blood samples from racing personnel.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons, at least one of whom should be approved by the State Principal Racing Authority.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Preparation of collecting area*** will include:

- collecting and managing records pertaining to individual sample collection processes
- communicating with other sample collection officers and swab steward
- checking number and verifying contents of swab kits
- checking that swab video camera is working
- ensuring swab area is clean
- ensuring appropriate systems and personnel are in place to monitor key operating areas

## RANGE STATEMENT

***Collecting equipment*** will include:

- preparing paperwork and computer used in sample collection.
- blood collection bottles
- collection bottle seals and labels
- disposable gloves
- laboratory cards
- license cards or registration cards for personnel
- needles
- sharps container
- swab kit.

***Collection procedures*** will include:

- checking identification of personnel to be swabbed
- escorting personnel to swab area
- preparing swab kit and swab area
- recording swab kit numbers
- recording swab details
- requesting personnel providing sample to sign required paperwork
- storing swab samples in secured area prior to dispatch to laboratory for analysis
- taking blood samples and sealing blood bottles.

***Safety of self and others*** may include:

- adhering to responsibilities under OHS legislation and workplace practices
- adhering to rules of racing and rules of the race venue
- applying safe operating systems for blood collection procedures
- following accident and injury procedures
- identifying and reporting unsafe work practices
- using disposable gloves
- using sharps container
- wearing approved personal protective equipment.

***Chain of custody of sampling equipment , documentation and sample*** may include:

- conditions under which the sample is gathered, including:
  - identification of personnel to be tested
  - identification of all personnel attending
  - duration of sample custody
  - security conditions and manner in which sample is transferred to subsequent custodians

## RANGE STATEMENT

---

- documents or paper trails showing collection, custody, control, transfer and analysis of physical (evidence) sample
- each transaction completely documented chronologically
- identifiable person always to have physical evidence, from swab staff to detective or steward
- jurisprudence concept applying to handling of sample and its integrity.

## RGRTRK301A Assist with race meeting track management

### Modification History

Not Applicable

### Unit Descriptor

#### Unit descriptor

This unit of competency specifies the outcomes required to assist with race meeting track management operations. It requires the ability to maintain and monitor the organisation's policies, including workplace OHS standards, allocate race meeting trackwork duties, supervise staff and track operations, apply effective verbal and written communication skills, work in a team environment and complete required administration tasks.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

#### Application of the unit

This unit of competency supports race club employees to assist with race meeting track management operations.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry.

Consequently when performance criteria are applied they will relate to the greyhound or harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

### Licensing/Regulatory Information

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- allocating duties to staff based on a range of operational requirements, staff experience, level of responsibility and complexity of job task
- assessing race club and industry requirements associated with race meeting track management, including safety, security, licensing, and staff and animal welfare
- communicating with stewards, racing officials, personnel and others using assertive communication techniques to gather, interpret and relay information related to race meeting track management
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with OHS and environmental legislation
- complying with organisational policies and procedures

## REQUIRED SKILLS AND KNOWLEDGE

- evaluating risks associated with track equipment and activities
- making effective decisions to resolve routine problems
- operating a range of equipment and technology
- recognising faulty equipment, machinery and infrastructure
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- hazards and potential hazards in the workplace and risk control procedures
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- protocols and procedures for communicating with stewards, racing officials and other relevant people
- race meeting track management operations and staff roles
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reasonable understanding of applicable federal, state or territory legislation and regulations, and national standards and codes of practice relevant to full range of processes relating to own work role and responsibilities
- relevant rules of racing
- types of equipment and procedures for their operation and maintenance.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to the specific industry sector and workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

## EVIDENCE GUIDE

---

- knowledge of the requirements, procedures and instructions that are to apply when assisting with race meeting track management
- implementation of procedures and timely techniques for the safe, effective and efficient application of race meeting track management assistance
- working with others to undertake and complete assistance procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to assist with race meeting track management operations
- relevant racing industry work sites, such as racecourses and race meetings
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by

## EVIDENCE GUIDE

---

### Guidance information for assessment

supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to effectively assist with race meeting track management. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks, administration buildings and public areas.

***Staffing requirements*** may include:

- barrier attendants
- clerks of the course
- erection and pull down of marquees
- grading machine operators
- landscaping and grounds
- track attendants
- tractor drivers
- water truck drivers.

***Track preparation requirements*** may include:

- condition and rating
- irrigation pipes removal
- machinery removal
- mobile starting barriers
- rail location
- semaphore board and timing equipment
- signage

## RANGE STATEMENT

---

***Casual and new staff induction***  
may include:

- starting boxes
- steward and camera towers.
- conducting safety training covering:
  - emergency evacuation procedures drill
  - first aid equipment and treatment
  - safe operating procedures
  - personal protective equipment requirements
  - track or race incidents and emergency procedures
- explaining work conditions and job requirements
- providing information related to:
  - accident and incident reporting procedures
  - anti-discrimination responsibilities
  - environmental work practices
  - OHS legislation and responsibilities
  - race club code of conduct and dress code.

***Areas are made safe by:***

- identifying hazards
- controlling and minimising risks
- eliminating hazardous substances and materials
- ensuring safe use and operation of equipment and machinery
- following accident and injury procedures
- following safe operating procedures
- using correct manual handling techniques, including:
  - carrying
  - lifting
  - shifting.

***Repairs and maintenance***  
requirements for track and surrounds may include:

- electrical boards
- fire safety equipment
- irrigation pipes and sprinklers
- lighting
- mirror box
- mobile starting barriers
- photo finish equipment
- public address system
- rails
- starting boxes

## RANGE STATEMENT

---

- spectator seating
- track maintenance equipment or machinery
- tractors and harrows.

## Unit Sector(s)

**Functional Area** Racing common

# RGRTRK302A Maintain specialised non-turf track surfaces for racing

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to maintain specialised non-turf track surfaces for greyhound, harness or thoroughbred racing. It includes knowledge and skills associated with comparing specialised track materials, managing specialised track surfaces and renovating specialised track surfaces for greyhound, harness or thoroughbred training and racing. The unit requires knowledge of track materials, machinery and equipment, and regular care requirements, including repairs and renovation. The ability to plan and prepare budgets, liaise with staff and contractors regarding work requirements, and comply with workplace OHS standards is necessary.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports race club personnel in maintaining specialised non-turf track surfaces.

Competencies attained in this unit apply to the greyhound, harness or thoroughbred code of the industry.

Consequently when performance criteria are applied they will relate to the greyhound code or the harness code or the thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                      | as well as climatic, drainage and durability management considerations.                                                                                                                                       |
|                                      | 3. Specialised track materials are assessed for environmental sustainability .                                                                                                                                |
|                                      | 4. Specialised track materials are assessed for <b><i>economic viability</i></b> .                                                                                                                            |
|                                      | 5. Strategies for managing a range of common track problems are compared for specialised track surfaces.                                                                                                      |
| Manage specialised track surfaces.   | 6. Machinery and equipment are selected and prepared for track maintenance operations in accordance with manufacturer or supplier directions, <b><i>OHS requirements</i></b> and workplace procedures.        |
|                                      | 7. Track camber, fall and surface depth for racing are evaluated.                                                                                                                                             |
|                                      | 8. <b><i>Daily, weekly and race meeting care requirements</i></b> are planned and carried out for nominated specialised track surfaces to comply with manufacturer or supplier specifications and directions. |
|                                      | 9. Track density and current moisture content are measured and track rating is declared.                                                                                                                      |
|                                      | 10. Minor repairs to nominated specialised track surfaces are planned and carried out according to manufacturer or supplier and supervisor's directions.                                                      |
| Renovate specialised track surfaces. | 11. Renovation is planned and budget presented to supervisor for approval.                                                                                                                                    |
|                                      | 12. Materials and equipment are selected, ordered and prepared for track renovation.                                                                                                                          |
|                                      | 13. <b><i>Contractor is engaged or staff instructed</i></b> in maintenance procedures in accordance with manufacturer specifications and directions, OHS requirements and workplace procedures.               |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- allocating duties to staff based on a range of operational requirements, staff

## REQUIRED SKILLS AND KNOWLEDGE

experience, level of responsibility and complexity of job task

- assessing requirements of track maintenance operation, including safety and welfare of staff and contractors
- assessing track materials for durability, environmental sustainability and economic viability
- communicating with racing officials, contractors and other personnel using assertive communication techniques to gather, interpret and relay information related to maintaining specialised non-turf track surfaces
- completing duties in accordance with safe operating procedures and nominated time frame
- complying with OHS and environmental legislation
- complying with organisational policies and procedures
- evaluating risks associated with track maintenance activities
- making effective decisions to resolve routine problems
- operating a range of equipment and machinery
- recognising faulty equipment, machinery and infrastructure
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- supervising staff and contractor operations and procedures
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- common horse gait abnormalities
- hazards and potential hazards in the workplace and risk control procedures
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- protocols and procedures for communicating with racing officials and other relevant people
- purpose and comprehension of procedures related to track maintenance and renovation
- racetrack management operations and staff roles
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- reasonable understanding of applicable federal, state or territory legislation and regulations, and national standards and codes of practice relevant to full range of processes relating to own work role and responsibilities
- relevant rules of racing
- track construction and materials
- types of equipment and procedures for their operation and maintenance

## REQUIRED SKILLS AND KNOWLEDGE

- workplace specific and OHS requirements for engaging contractors.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to the specific industry sector and workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when maintaining specialised non-turf track surfaces for racing
- implementation of procedures and timely techniques for the safe, effective and efficient application of specialised non-turf track surface maintenance requirements
- working with others to undertake and complete maintenance procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

#### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

## EVIDENCE GUIDE

---

### Method of assessment

- a range of relevant training and racetracks
- materials and equipment relevant to assessing candidate's ability to maintain specialised non-turf track surfaces for racing
- work instructions and related documentation.

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the

## RANGE STATEMENT

workplaces of the racing industry to maintain specialised non-turf track surfaces for racing. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks, administration buildings and public areas.

***Features of track construction*** may include:

- base course layer
- compressive strength
- general principles of road construction
- grading or profiling of subgrade
- materials, including:
  - fine crushed rock
  - road base or similar material
- preparation of subgrade layer
- proof rolling
- recycling capability of materials
- surface layer type and particle size
- surface layer depth
- subgrade compaction
- specialised surfaces, including Pro-Ride
- stability of materials
- thickness of base course.

***Specialised track materials*** may include:

- sands, soils and other track base and surface materials suitable for greyhound, harness or thoroughbred training and racing.

***Environmental sustainability*** may include:

- recycling capability of materials
- toxicity of materials.

***Economic viability*** may include:

- cost of establishment of specialised track
- ease of access to materials
- estimated racing days on nominated surface
- estimated training days on nominated surface
- expected life span of materials
- maintenance requirements.

***OHS requirements*** will include:

- adhering to responsibilities under OHS legislation and workplace practices
- national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare
- considering variables that influence behaviour of horses, such as:
  - fences and equipment
  - other persons or animals

## RANGE STATEMENT

|                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## RANGE STATEMENT

***Considerations for when renovation is planned and budget presented*** will include:

- checking running rails and pegs, including visibility and structural integrity
- deep rip to remove deep-seated compaction as required
- dragging daily to ensure even surface
- ensuring satisfactory depth of surface layer
- harrowing daily on sand tracks and as needed on cinders tracks
- filling of hoof prints (harness and thoroughbred)
- irrigation to bind surface material
- power harrow to remove subsurface compaction as required
- renovation
- ripping as needed on cinders tracks
- rolling daily on sand tracks
- replacing materials
- screening (greyhound and harness).
- identifying defects, deterioration or deficiencies and establishing effect on asset performance
- determining renovation or remediation required
- determining club's funding arrangements for track renovation, for example asset management plans
- appropriating necessary maintenance resources, for example:
  - labour
  - monetary
- selecting appropriate renovation or rectification procedures
- estimating expected completion of execution of work
- developing maintenance and renovation programming, for example:
  - annual
  - five year
  - long-term.
- arranging safe systems of work:
  - how work is organised

***Engaging contractors or instructing staff in maintenance***

## RANGE STATEMENT

*procedures* will include:

- management of occupational stress and violence
- pace and procedures to prevent fatigue
- work arrangements
- work processes and safe operating procedures
- contractor-specific issues:
  - casual or fixed-term basis
  - control overwork and how services are to be performed
  - delegation
  - hours worked
  - legal risk
  - payment to contractor upon results achieved or completion of work
  - services and equipment provided
- implementing procedures for safe use, handling, storage and transport of plant and substances
- providing adequate facilities for welfare of employees and contractors:
  - drinking water
  - eating areas
  - shade
  - toilets.

## RGRTRK303A Provide emergency animal assistance

### Modification History

Not Applicable

### Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to provide emergency animal assistance during trackwork, barrier trials and race meetings. It requires the ability to assist at the incident scene using safe greyhound or horse handling techniques; manage staff, public and racing personnel at the scene; and transport the injured or deceased animal from the incident scene in accordance with workplace OHS standards.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

### Application of the Unit

**Application of the unit** This unit of competency supports race club track personnel and others authorised to provide emergency animal assistance following track incidents.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the greyhound or harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

This unit can be contextualised for other industries while also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Provide assistance at incident scene.

1. Veterinarian, steward and/or ***other specialists*** are contacted when ***animal emergency*** occurs.
2. Assistance is provided to supervising personnel who are treating or assessing the animal.
3. OHS hazards are identified, risks assessed and procedures selected to avoid injury to personnel or animals .
4. ***Basic methods of restraint*** are applied to animal under

| ELEMENT                | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                        | veterinary or specialist supervision.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Manage incident scene. | 5. Privacy screens are collected and installed if necessary.<br>6. Staff members are allocated to restrict public access to incident area.<br>7. <b>Consideration is given in the management of incident</b> of the distress of those associated with the injured animal and of the general public.<br>8. Discretion is used in the handling of a deceased animal.                                                                                                                                                                    |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- adhering to safe handling and work practices when dealing with greyhounds or horses
- assessing greyhound or horse behaviour status
- allocating duties to staff based on incident or situation requirements, staff experience, level of responsibility and complexity of job task
- communicating with stewards, veterinarians, racing officials, personnel and others using assertive communication techniques to gather, interpret and relay information related to providing emergency animal assistance
- completing duties in accordance with safe operating procedures in a timely manner
- complying with OHS, environmental and animal welfare legislation
- complying with organisational policies and procedures
- driving vehicle safely
- evaluating risks associated with emergency animal assistance

## REQUIRED SKILLS AND KNOWLEDGE

- making effective decisions to resolve presenting problems
- operating a range of equipment and machinery
- recognising faulty equipment, machinery and infrastructure
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- supervising staff
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- avenues and procedures for personnel to access grief counselling
- greyhound or horse behaviour and communication traits
- hazards and potential hazards in the workplace and risk control procedures
- OHS and environmental legislative requirements
- organisational policies and procedures
- principles of effective communication
- protocols and procedures for communicating with stewards, veterinarians, racing officials and other relevant people
- protocols and procedures for emergency animal care
- race meeting track management operations and staff roles
- racing industry safety requirements, including safe operating procedures
- reasonable understanding of national and state codes of practice; federal, state and territory legislation; and local government regulations covering animal welfare related to handling and transporting injured greyhounds or horses
- relevant rules of racing
- types of equipment and procedures for their operation and maintenance.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to the specific industry sector and workplace operations and satisfy all of the requirements of the performance criteria, required skills and

## EVIDENCE GUIDE

---

knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when providing emergency animal assistance
- implementation of procedures and timely techniques for safe, effective and efficient provision of emergency animal assistance
- working with others to undertake and complete emergency animal assistance procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### Context of and specific resources for assessment

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- greyhound or horse vehicle for transporting animals
- materials and equipment relevant to assessing candidate's ability to provide emergency animal assistance
- relevant racing track sites, such as training tracks and racecourses
- work instructions and related documentation.

### Method of assessment

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal

## EVIDENCE GUIDE

Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to provide emergency animal assistance. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks, administration buildings and public areas.

***Other specialists*** may include:

- Department of Agriculture personnel
- Department of Primary Industries personnel
- injured animal's insurance company representative
- local and state government emergency animal disease (EAD) contacts.

***Animal emergency*** may include:

- critical race meeting or training track injury requiring euthanasia, such as limb, neck and spinal injuries
- suspected EAD outbreak.

***Assistance provided to***

- assisting with crowd control

## RANGE STATEMENT

---

***supervising personnel*** may include:

- assisting stewards or veterinarians, but not administering to animals
- following prescribed protocols
- providing details of animal ownership and insurance
- recording any information relevant to situation
- restraining animals
- stopping animals leaving premises, in the case of an EAD
- stopping entry of animals to premises, in the case of an EAD.

***OHS hazards*** may include:

- greyhounds or horses
- hazardous substances and chemicals
- machinery or equipment
- other people, including:
  - contractors
  - employees
  - visitors
- physical environment
- unsafe work practices
- zoonotic diseases.

***Risks assessment*** may include:

- conducting workplace site inspection audits
- consulting with employees or specialists
- monitoring safe work practices
- using a risk assessment matrix.

***Procedures to avoid injury to personnel and animals*** may include:

- applying OHS hierarchy of control model:
  - eliminate
  - substitute
  - engineer
  - administrative
  - personal protective equipment
- ensuring safe use and operation of equipment, including:
  - first aid
  - safety
  - personal protective clothing and equipment
- following accident and injury procedures
- following safe operating procedures
- using correct manual handling techniques, including:

# RGRTRK401A Prepare track and facilities for race meetings

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to prepare track and facilities for race meetings as required by the relevant racing code. The unit includes preparing track and other race club facilities, equipment, machinery and infrastructure for a race meeting, monitoring track condition and operations during the meeting, overseeing the post-race clean-up, and scheduling required repairs and maintenance work. It requires the ability to maintain and monitor the organisation's policies, including workplace OHS standards relating to contractors, race club staff and others authorised to undertake work on racecourses. It also requires effective verbal and written communication skills to ensure adequate supervision of staff, and completion of related tasks and documentation.

This unit of competency operates in workplace environments of racing administration, kennels, stables, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports race club employees to prepare the racetrack and associated facilities for race meetings.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry. Consequently when performance criteria are applied they will relate to the greyhound or harness or thoroughbred code, and statements of attainment for this unit will reflect this distinction.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Plan for race meeting.

1. ***Race meeting requirements*** are clarified with race club personnel and stewards.
2. Pre-planning ***work roster*** with monthly, weekly and daily objectives is prepared.
3. Kennels or stables are cleaned, cameras checked for

| ELEMENT                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                                                 | operation and <b>area is secured</b> according to workplace and stewards' requirements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Prepare track for racing.                       | <p>4. Race distances and track selection are verified.</p> <p>5. <b>Barriers, rails, starting boxes and jumps</b> are checked for operation and condition and moved into position as required.</p> <p>6. <b>Track condition</b> is verified in consultation with stewards prior to start and during race meeting and adjustments are made as required.</p> <p>7. Repairs are made to track surface between races as required.</p>                                                                                                                           |
| Oversee post-race meeting clean-up (pull down). | <p>8. Track surface is checked , repairs are arranged and <b>maintenance operations</b> are scheduled.</p> <p>9. Kennels or stables are cleaned, repaired and secured where necessary.</p> <p>10. Inventory is checked for return of all race club equipment.</p> <p>11. Damage to <b>equipment or infrastructure</b> is reported and repairs are initiated by following workplace procedures.</p> <p>12. Area is checked for <b>safety</b> and removal of all items, equipment or contractor supplies before site is declared open for regular access.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- allocating duties to staff based on a range of operational requirements, staff experience, level of responsibility and complexity of job task
- assessing race club and industry requirements associated with race meeting track and facilities, including safety, security, licensing, and staff and animal welfare
- communicating with stewards, racing officials and staff, licensed and registered personnel and others using assertive communication techniques to gather, interpret and relay information related to preparing track and facilities for race meetings
- completing duties in accordance with safe operating procedures and nominated time frame

## REQUIRED SKILLS AND KNOWLEDGE

- complying with OHS and environmental legislation
- complying with organisational policies and procedures
- evaluating risks associated with track and facility equipment and activities
- making effective decisions to resolve routine problems
- operating a range of equipment and technology
- preparing work rosters
- recognising faulty equipment, machinery and infrastructure
- reading and interpreting workplace documentation, including rules of racing
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- teamwork skills to ensure completion of job tasks
- written communication skills to complete workplace documentation and reports.

### Required knowledge

- detailed understanding of applicable federal, state or territory legislation and regulations, and national standards and codes of practice, including:
  - animal welfare
  - anti-discrimination and harassment
  - environmental and waste management
  - equal employment opportunity
  - industrial relations
  - OHS
- industry terminology related to racing operations and wider racing industry
- organisational policies and procedures
- principles of effective communication
- protocols and procedures for communicating with stewards, racing officials and other relevant people
- race meeting track and facility management operations and staff roles
- racing industry animal welfare requirements
- racing industry safety requirements, including safe operating procedures
- relevant rules of racing
- staff supervision, including rights and responsibilities of employees, supervisors, employers and contractors
- track condition relevant to applicable racing code
- track maintenance procedures relevant to applicable racing code
- types of equipment and procedures for their operation and maintenance.

# Evidence Guide

## EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to the specific industry sector and workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of the requirements, procedures and instructions that are to apply when preparing track and facilities for race meetings
- implementation of procedures and timely techniques for the safe, effective and efficient application of race meeting track and facility preparation
- working with others to undertake and complete preparation procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources or simulated environment approved by the relevant State Principal Racing Authority. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- materials and equipment relevant to assessing candidate's ability to prepare track and facilities for race meetings
- relevant racing industry work sites, such as racecourses, race meetings and related facilities
- work instructions and related documentation.

### **Method of assessment**

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

## EVIDENCE GUIDE

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks
- simulation exercises conducted in a State Principal Racing Authority approved simulated environment.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to effectively prepare track and facilities for race meetings. Workplaces include greyhound, harness and thoroughbred racecourses, training tracks, administration buildings and public areas.

***Race meeting requirements*** may include:

- access for contractors
- cleaning
- marquee or additional hospitality areas
- parking

## RANGE STATEMENT

## RANGE STATEMENT

---

- allocating necessary maintenance resources, for example:
  - labour
  - monetary
- selecting appropriate rectification procedure
- scheduling maintenance work that may include:
  - aeration for turf tracks
  - de-compaction annually on turf tracks
  - de-thatching
  - deep rip as required
  - dragging daily
  - harrowing daily on sand tracks and as needed on cinders tracks
  - herbicide and insecticide use
  - irrigation to bind surface material
  - fertilising
  - filling of hoof prints
  - fungicide use
  - mowing appropriate for season
  - nematicide use
  - power harrow as required
  - ripping as needed on cinders tracks
  - rolling daily on sand tracks
  - replacing divots
  - scarifying
  - top dressing if required
  - turf track aeration.

***Equipment or infrastructure*** may include:

- electrical boards
- fire safety equipment
- irrigation pipes and sprinklers
- lighting
- mirror box
- mobile starting barriers
- photo finish equipment
- public address system
- rails
- starting boxes
- spectator seating
- track maintenance equipment or machinery

## RANGE STATEMENT

---

*Post-race safety check* will include:

- tractors and harrows.
- identifying hazards
- controlling and minimising risks
- eliminating hazardous substances and materials
- ensuring equipment, machinery and vehicles are safe and in proper working order, including:
  - barriers
  - lures
  - starting boxes
- following accident and injury procedures
- following safe operating procedures
- scheduling identified facilities' repairs and maintenance
- using correct manual handling techniques, including:
  - carrying
  - lifting
  - shifting.

## Unit Sector(s)

**Unit Sector**

Greyhound, harness and thoroughbred racing codes

## Co-requisite units

**Co-requisite units**

## Functional Area

**Functional Area**

Racing common

# RGRTRK402A Relate animal welfare to track and environmental conditions

## Modification History

Not Applicable

## Unit Descriptor

### Unit descriptor

This unit of competency specifies the outcomes required to relate the injuries and performance of racing animals to external conditions and present options for improving performance and safety. The unit requires competence in determining track rating and condition and using basic technology. It also requires the demonstration of skills associated with consistent identification of a range of animal welfare issues related to the exercise of racing animals on trial, training and racing tracks.

This unit of competency operates in workplace environments of racing administration, stables, kennels, racecourses and public areas.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Check with your State Principal Racing Authority for current license or registration requirements.

## Application of the Unit

### Application of the unit

This unit of competency supports racetrack supervisors, stewards and other industry personnel in identifying a range of racing animal welfare issues that may be related to track design and condition, and presenting options for improving external conditions.

Competencies attained in this unit apply to the greyhound, harness and thoroughbred codes of the industry.

Consequently when performance criteria are applied they will relate to either the greyhound code or harness code or the thoroughbred code and statements of attainment will reflect this distinction.

This unit can be contextualised for other industries while

also maintaining the integrity of the unit.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

Prerequisite units

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

Relate animal physiology to environmental conditions.

1. ***Animal cooling mechanisms*** are researched and efficiency is related to ambient temperature and humidity.

| ELEMENT                                                                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

Justification for adjusting or not adjusting track or environmental conditions is presented to stakeholders.</li> </ol> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- applying OHS and environmental work procedures
- assessing an individual animal's general health status

## REQUIRED SKILLS AND KNOWLEDGE

- communicating with stewards, racing officials, and licensed and registered personnel using assertive communication techniques to gather, interpret and relay information relating to track and environmental conditions and animal welfare
- conducting continuous improvement processes
- consulting concisely and effectively with colleagues and team members
- evaluating advantages or disadvantages of a variety of potential solutions to problems
- identifying racing animal behaviour patterns
- operating a range of equipment and technology
- reading and interpreting workplace documentation, including rules of racing
- researching information
- relating to people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities
- using measuring devices.

### Required knowledge

- common racing animal behaviour traits
- communication procedures, including reporting lines within the workplace and wider racing industry
- climatic conditions
- clinical signs related to gastric, respiratory and nervous conditions in racing animals
- clinical signs of lameness in racing animals
- factors that affect hydration status of racing animals
- hazards and potential hazards in the workplace and risk control procedures
- mathematical procedures for estimating, measuring and calculating
- OHS and environmental legislative requirements
- race meeting protocols and reporting requirements
- racing industry animal welfare requirements
- rules of racing
- track construction and design
- track ratings and condition
- types of equipment and procedures for their operation and maintenance.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the

## EVIDENCE GUIDE

---

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following:

- knowledge of requirements, procedures and instructions that are to apply when relating animal welfare to track and environmental conditions
- demonstration of determination of track ratings and condition using basic technology
- implementation of procedures and timely techniques for the safe, effective and efficient application of judgement and skills associated with identifying a range of animal welfare issues related to race meeting operations and rules of racing
- working with others to undertake and complete procedures that meet required outcomes.

Evidence should be collected over a period of time in a range of workplace-relevant contexts and include dealings with an appropriate range of situations.

### **Context of and specific resources for assessment**

Competency must be assessed in a racing workplace that provides access to the required resources. Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints. It is to comply with relevant regulatory requirements or Australian Standards requirements.

Assessment of the practical components of this unit will be by observation of relevant skills.

The following resources must be available:

- industry-supervised access to a range of racetracks, race meetings, trackwork and kennels or stables relevant to the applicable racing code
- supervised access to racing or race-retired animals with illnesses and injuries outlined in the range statement
- materials and equipment relevant to assessing candidate's ability to relate animal welfare to track and environment conditions, including:
  - DVDs or videos of animal locomotion

## EVIDENCE GUIDE

---

### Method of assessment

- standard industry tools
- veterinary reports, scans and x-rays
- work instructions and related documentation.

Assessment methods must satisfy the endorsed Assessment Guidelines of the Racing Training Package.

The suggested strategies for the assessment of this unit are:

- written and/or oral assessment of candidate's required knowledge
- observed, documented and firsthand testimonial evidence of candidate's application of practical tasks.

Evidence is required to be demonstrated over a period of time, therefore where performance is not directly observed any evidence should be authenticated by supervisors or other appropriate persons.

This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.

### Guidance information for assessment

Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

The range statement provides details of how this competency can be used in the workplaces of the racing industry to relate animal welfare to track and environmental conditions. Workplaces include greyhound kennels, harness and thoroughbred stables as well as greyhound, harness and thoroughbred racecourses, training tracks, administration buildings and public areas.

## RANGE STATEMENT

---

Aspects of ***animal cooling mechanisms*** that may affect performance include:

- behavioural indicators
- care of animals at race meetings, including:
  - allowing access to water before racing and after travelling long distances or sweating heavily
  - ensuring animal has access to water after racing
  - ensuring animal is hosed repeatedly after racing, and scraping or towelling after each hosing
  - allowing animal to stand in breezy, shaded area
- greyhounds are unable to sweat, cooling is by way of evaporation of moisture from the lungs and air passages
- horses cool by sweating unless suffering anhidrosis
- increases in humidity reduce evaporation effect and reduce ability of animal to maintain appropriate body temperature
- increased muscle breakdown caused by heat stress resulting in myoglobinuria and/or severe body breakdown
- loss of water from animal's body by evaporation in effort to maintain body temperature results in dehydration
- monitoring of hydration level at race meetings following travelling, excitability, heavy sweating and access to water prior to racing
- overheating may lead to heat exhaustion or stroke
- temperature data logging systems
- warm down, cool off, fitness level, rectal temperature and water cooling points, including:
  - belly
  - head
  - legs
  - neck.

***Climatic conditions*** may include:

- altitude
- cold and fog
- high humidity

## RANGE STATEMENT

***Digestive distress*** may include:

- prevailing air pollution level, which may exacerbate climatic conditions
- wind and wind chill.
- conditions that may result in suboptimal racing performance, including:
  - colic
  - dysphagia
  - stomach ulcers.

***Respiratory distress*** may be evidenced by:

- bleeding or exercise-induced pulmonary haemorrhage (EIPD)
- chronic coughing or pharyngeal lymphoid hyperplasia (PLH)
- heart rate before and after race
- inflammatory airway disease (IAD)
- upper respiratory inflammation
- reactive airway disease (RAD)
- recovery time after exercise
- respiration rate and aerobic performance
- thumps or synchronous diaphragmatic flutter (SDF).

***Nervous distress*** may be indicated by:

- diarrhoea, possibly due to gastrointestinal disturbances associated with travel to race meeting
- dysphagia
- exertional rhabdomyolysis (tying up)
- muscle cramps
- shivering
- overheating
- dehydrating
- twitching or kicking.

Impact from ***track camber and tightness*** of turns on performance injuries may include:

- bone and soft tissue injuries, including:
  - arthritis
  - bowed tendons
  - bone chips
  - bursitis
  - muscle damage
  - shin soreness
  - strained fetlock joints
  - suspensory and check ligament
  - tendonitis

## RANGE STATEMENT

Impact from ***track density and track materials*** on performance injuries may include:

- greyhound or horse reaction to different surfaces, cambers, inclines, turns or slopes
- harness camber compared to thoroughbred camber
- turn radius, camber and speed entering the turn.
- hard surfaces near chutes and crossing may cause more severe injuries
- impact caused by turf roots of kikuyu and cool season grass
- track density based on:
  - track materials
  - track drainage and irrigation
  - underlying track geology
- track materials, including:
  - cinders
  - dirt
  - grass
  - rubberised dirt
  - sand
  - synthetic grass
- range of surfaces for different training regimes and workloads
- thatch and mowing height.

***Grading, mowing and watering techniques*** relate to animal performance by:

- excessive grading in wet or heavy conditions may impact on animal's exercise intensity
- lack of watering causing dusty conditions may cause respiratory distress
- track condition and rating (e.g. fast, good, dead, slow or heavy going) may exacerbate animal's existing injury and relate directly to new injuries
- uneven track marks due to rushed grading may cause impact on animal's action
- uneven dragging may cause 'false footing'
- uneven rolling may cause 'bridging', resulting in 'false footing'.

Standard ***industry tools*** may include:

- barometer
- moisture meter
- penetrometer
- rain gauge

## RANGE STATEMENT

Considerations when evaluating **options** for improving track conditions may include:

**Track conditions for optimal greyhound or horse performance** are defined as:

**Weather conditions** evaluation as set down in:

Areas to be considered when presenting **justification for adjusting or not adjusting track or environmental conditions** will include:

- thermometer
- wind speed measurement.
- achievable and realistic actions on a given race day
- long-term renovation of track
- short-term management of track.
- industry-agreed track conditions to suit majority of starters, not an individual greyhound's or horse's preferred conditions.
- guidelines for racing animal welfare
- rules of racing.
- animals
- general public
- image of racing
- options that are feasible or not feasible within time available, budget or resource constraints
- options that provide the opportunity to improve potential performance or increase or decrease risk of illness or injury.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- employ safe, humane and environmentally responsible organisational systems and procedures when handling and working with young animals
- identify signs and symptoms of disease and ill thrift in young animals
- implement facility policies and procedures
- maintain the highest standards of hygiene and infection control at all times to reduce the risk of infection and cross-infection
- maintain records
- monitor animal health and condition and recognise abnormalities
- literacy skills to read and follow facility policies and procedures, including OHS and waste management; follow treatment instructions; record accurately and legibly information collected; and select and apply procedures to a range of defined tasks
- oral communication skills/language to fulfil the job role as specified by the facility, including questioning techniques, active listening, asking for clarification from supervisors and consulting with supervisors
- numeracy skills to estimate, calculate and record routine workplace measures
- interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities
- problem-solving skills to use available resources and prioritise daily tasks
- use safe manual handling techniques and/or equipment
- use safe waste handling and disposal procedures.

#### Required knowledge

- anatomy structure and physiology features of the relevant animal groups related to caring for young animals

**REQUIRED SKILLS AND KNOWLEDGE**

- concepts of imprinting and socialisation
- feeding and husbandry requirements for artificially raised animals
- formula types for common species
- housing requirements for mother and young where relevant
- normal and abnormal animal behaviour
- pre-release activities
- range of risks to animals being artificially fed
- release strategies
- relevant facility policies and procedures, including OHS, animal welfare, ethics, hygiene standards and other industry guidelines
- relevant federal and state or territory legislation and codes of practice
- safe animal handling techniques and procedures
- safe work practices
- weaning management
- workplace hygiene standards, disinfectants, cleaning agents, cleaning techniques and cleaning equipment and materials.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competence in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit. Assessors should ensure that candidates can:

- provide appropriate environments and care programs to meet the needs of a range of young animals
- assist in artificially rearing animals
- monitor the health and nutrition of young animals to ensure their overall growth and wellbeing
- prepare animals for release into a captive or natural habitat environment.

| <b>EVIDENCE GUIDE</b>                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | The skills and knowledge required to care for young animals must be transferable to a range of work environments and contexts and include the ability to deal with unplanned events.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Context of and specific resources for assessment</b> | <p>Assessment of this unit is to be practical in nature and will be most appropriately assessed in a captive animal workplace.</p> <p>There must be access in this situation to a range of young animals as well as the appropriate equipment and/or resources to enable one to demonstrate competence.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Method of assessment</b>                             | <p>To ensure consistency in one's performance, competency should be demonstrated, to industry defined standards, on more than one occasion over a period of time in order to cover a variety of circumstances and where possible, over a number of assessment activities.</p> <p>The assessment strategy must include practical skills assessment. Suggested strategies for this unit are:</p> <ul style="list-style-type: none"> <li>• written and/or oral assessment of candidate's required knowledge</li> <li>• observed, documented and first-hand testimonial evidence of candidate's application of practical tasks</li> <li>• simulation exercises that reproduce normal work conditions</li> <li>• third-party evidence</li> <li>• workplace documentation</li> <li>• portfolio.</li> </ul> <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.</p> |
| <b>Guidance information for assessment</b>              | Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Suitable environments*** may include:

- appropriate level of barrier nursing
- consideration of appropriate housing for the mother
- reduced noise or light
- screening or privacy from the public
- separation of the young from other animals or mate
- simulated natural habitats.

***OHS*** risks when working with animals may include:

- animal bites, envenomation, kicks, scratches and crush injuries
- biological hazardous waste and sharps disposal
- handling of chemicals and medicines
- inhalation of aerosol particles
- intraocular contamination
- manual handling, including carrying, lifting and shifting
- needle pricks and cuts from other sharps
- release of infective agents (animal and human)
- slippery or uneven work surfaces
- zoonoses.

***Care program*** may include:

- appropriate environment
- nutritional requirements
- teaching animals to catch their own food
- providing animals with materials to create their own living environment
- providing socialisation opportunities with other animals.

***Controlled environment*** may include:

- brooders
- food dictated by breeding and growth patterns
- heat pads
- hospital cages

| RANGE STATEMENT                                                |                                                                                                                                                                                                                                                                                                                                                                                                             |
|----------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                | <ul style="list-style-type: none"> <li>• humidicribs</li> <li>• incubators</li> <li>• invertebrate breeding cages.</li> </ul>                                                                                                                                                                                                                                                                               |
| <b>Risks to animals</b> during artificial feeding may include: | <ul style="list-style-type: none"> <li>• acquisition of aberrant behaviours</li> <li>• aspiration</li> <li>• imprinting</li> <li>• infection</li> <li>• lack of socialisation</li> <li>• pneumonia.</li> </ul>                                                                                                                                                                                              |
| <b>Growth and general condition</b> monitoring may include:    | <ul style="list-style-type: none"> <li>• appearance of the body or coat</li> <li>• body measurements</li> <li>• monitoring weight</li> <li>• temperature.</li> </ul>                                                                                                                                                                                                                                        |
| <b>Weaning</b> may involve:                                    | <ul style="list-style-type: none"> <li>• changing the diet</li> <li>• introducing alternative feeding strategies</li> <li>• weaning from human contact.</li> </ul>                                                                                                                                                                                                                                          |
| <b>Records</b> may include:                                    | <ul style="list-style-type: none"> <li>• those required by legislation and facility policies and procedures: <ul style="list-style-type: none"> <li>• animal identification and health records</li> <li>• facility breeding program records, if applicable</li> <li>• yearly returns to relevant state or territory bodies detailing the survival of all wildlife held, if required.</li> </ul> </li> </ul> |

## Unit Descriptor

|                        |                                                                                                                                                                                                                                                                                                         |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | <p>This unit of competency covers the process of following animal health management practices to monitor animal health via daily observations of behaviour and condition.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.</p> |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Application of the Unit

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | <p>This unit is applicable to those working in animal care industry sectors where it may be necessary to care for a range of animal species and to monitor the wellbeing of healthy, ill or injured animals by observing and measuring indicators of ideal and poor development or response to treatments. These animals may be being kept long term in the workplace or being raised or prepared for sale, rehousing or release to their native habitat.</p> <p>In addition to legal and ethical responsibilities, all units of competency in the ACM10 Animal Care and Management Training Package have the requirement for animals to be handled gently and calmly. The individual is required to exhibit appropriate care for animals so that stress and discomfort is minimised.</p> |

## Elements and Performance Criteria

| ELEMENT                                                    | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Follow <b><i>animal</i></b> health management practices | <p>1.1. <b><i>Personal health and hygiene standards</i></b> are maintained in accordance with <b><i>occupational health and safety (OHS)</i></b> and organisation policies and procedures.</p> <p>1.2. <b><i>Animal diseases</i></b> and their impact on animals and humans are identified.</p> <p>1.3. Broad categories of <b><i>parasitic infestations</i></b> are identified.</p> <p>1.4. <b><i>Quarantine</i></b> areas are prepared and maintained in accordance with quarantine protocols</p> |

| ELEMENT                                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                 | <p>1.5. Animals requiring quarantine are identified and isolated.</p> <p>1.6. Quarantine records are maintained in accordance with organisation policies and procedures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 2. Monitor and maintain the physical wellbeing of animals       | <p>2.1. Different types of animal's anatomy and physiology are identified, compared and examined to determine physical appearance, particular body structures and observation recording requirements.</p> <p>2.2. <b>Indicators of animal health</b> are regularly monitored and tested in accordance with organisation standard operating procedures and facility demarcation/quarantine requirements involving movement of animals within or between facilities.</p> <p>2.3. The <b>physical environment of animals</b> is assessed for evidence of problems that may affect the physical wellbeing of animals</p> <p>2.4. Animal activity monitoring and health information and records are maintained in accordance with organisation standard operating procedures.</p> |
| 3. Identify and report signs of ill health or injury in animals | <p>3.1. <b>Signs of illness or injury</b> are recognised and reported to supervisor.</p> <p>3.2. <b>Abnormal animal behaviour and conditions</b> are recognised and reported to supervisor.</p> <p>3.3. <b>Samples</b> are collected correctly and recorded as directed in accordance with organisation policies and procedures.</p> <p>3.4. Sick or injured animals are separated from other animals, as required, and cared for in accordance with supervisor or veterinary advice.</p> <p>3.5. Animals that are ill or injured are handled in accordance with OHS and legislative requirements, relevant codes of practice and organisation policies and procedures.</p>                                                                                                  |
| 4. Administer and record animal treatments                      | <p>4.1. <b>Authorised animal treatments</b> are administered under supervision and dosages recorded in accordance with organisation policies and procedures.</p> <p>4.2. <b>Routine preventative health treatments</b> are regularly monitored, administered and recorded in accordance with organisation standard operating procedures.</p> <p>4.3. Appropriate storage of treatments is identified and used in accordance with organisation policies and</p>                                                                                                                                                                                                                                                                                                               |

| ELEMENT | PERFORMANCE CRITERIA                                                                                                                                                                                                         |

|         | <p>procedures.</p> <p>4.4. Records relating to animal health status, before and after treatment, and to the specific nature of treatment provided are completed in accordance with organisation policies and procedures.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- complete relevant work-related documents
- employ safe and environmentally responsible organisational systems and procedures when handling animals
- maintain the highest standards of personal and workplace hygiene and infection control at all times to reduce the risk of infection and cross-infection
- participate in arrangements for maintaining the health and safety of all people and animals in the workplace
- take and record animals temperature, pulse, respiration and hydration indicators where appropriate
- literacy skills to read and follow organisational policies and procedures, including OHS and animal welfare; follow sequenced written instructions; and record information accurately and legibly
- oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- numeracy skills to estimate, calculate and record routine workplace measures
- interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities
- problem-solving skills to assess appropriate practices and prioritise daily tasks
- use personal protective clothing and equipment correctly
- use safe manual handling techniques and/or equipment
- use safe waste handling and disposal procedures.

#### Required knowledge

- anatomical and physiological terminology and glossary of terms
- anatomical and physiological structures and functions related to animal health and wellbeing

**REQUIRED SKILLS AND KNOWLEDGE**

- broad categories of parasitic infestations
- common diseases, ailments, injuries and other impacts on animal health and wellbeing
- housing, exercise, social and activity needs of animals
- indicators of poor response to treatment or management of young, ill, injured or compromised animals
- indicators of recovery from illness or injury
- methods used to measure, interpret and record animals weight and other objective measures of animal health
- principles of animal welfare and ethics
- relevant OHS and animal welfare legislative requirements and codes of practice
- quarantine protocols
- safe work practices
- terminology used to describe and document health and behavioural signs and symptoms
- workplace hygiene standards, disinfectants, cleaning agents, cleaning techniques and cleaning equipment and materials.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competence in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit. Assessors should ensure that candidates can:

- carry out routine, consistent monitoring of animal health and physical wellbeing
- maintain personal health and a hygienic work environment
- follow quarantine protocols as required
- identify good health, illness, injury and abnormal behaviour in animals and report to supervisor
- administer authorised animal treatments and

| <b>EVIDENCE GUIDE</b>                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | <p>implement routine preventative health programs as directed</p> <ul style="list-style-type: none"> <li>maintain accurate animal activity monitoring, health, treatment and quarantine records.</li> </ul> <p>The skills and knowledge required to maintain and monitor animal health and wellbeing must be transferable to a range of work environments and contexts and include the ability to deal with unplanned events.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Context of and specific resources for assessment</b> | <p>Assessment of this unit is to be practical in nature and will be most appropriately assessed in an animal care industry sector workplace in which candidates are working or in a situation that reproduces normal work conditions. Workplaces can include pet shops, breeding or boarding kennels and catteries, aviaries, companion animal training, grooming establishments, animal shelters, zoos, wildlife parks, mobile animal facilities and animal technology facilities.</p> <p>There must be access in either situation to a range of animals as well as relevant information, equipment and/or resources to enable one to demonstrate competence. Assessment must be relevant to the industry sector in which candidates are working and must cover a minimum of one species from at least two of the six major animal groups OR at least three breeds from within one of the six major animal groups (mammals, fish, birds, amphibians, reptiles, invertebrates).</p> |
| <b>Method of assessment</b>                             | <p>To ensure consistency in one's performance, competency should be demonstrated, to industry defined standards, on more than one occasion over a period of time in order to cover a variety of circumstances over a number of assessment activities.</p> <p>The assessment strategy must include practical skills assessment. Suggested strategies for this unit are:</p> <ul style="list-style-type: none"> <li>written and/or oral assessment of candidate's required knowledge</li> <li>observed, documented and first-hand testimonial evidence of candidate's application of practical tasks</li> </ul>                                                                                                                                                                                                                                                                                                                                                                       |

| EVIDENCE GUIDE                             |                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                            | <ul style="list-style-type: none"> <li>• simulation exercises that reproduce normal work conditions</li> <li>• third-party evidence</li> <li>• workplace documentation</li> <li>• portfolio.</li> </ul> <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.</p> |
| <b>Guidance information for assessment</b> | Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).                |

## Range Statement

| RANGE STATEMENT                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p> |                                                                                                                                                                                                                                                                                                                                 |

| 1. Collect and organise production data | <p>1.1. Information is collected and organised in a format suitable for analysis and interpretation in accordance with enterprise requirements.</p> <p>1.2. Information held by the production unit is assessed for accuracy and relevance in line with enterprise requirements.</p> <p>1.3. Methods of collecting data are reliable and make efficient use of resources in accordance with organisational requirements.</p> <p>1.4. Business equipment is used to access, organise and monitor data in accordance with organisational requirements.</p> <p>1.5. Information is updated, modified, maintained and stored in accordance with organisational requirements.</p> |
| 2. Analyse and interpret data           | <p>2.1. Objectives of analysis are clearly defined and consistent with enterprise requirements.</p> <p>2.2. Methods of data analysis are reliable and suitable to research purposes.</p> <p>2.3. Assumptions used in analyses are clear, justified and consistent with enterprise objectives.</p> <p>2.4. Conclusions are supported by evidence and contribute to the achievement of business objectives.</p>                                                                                                                                                                                                                                                                |
| 3. Present data                         | <p>3.1. Data are prepared in an appropriate format, style and structure using suitable business technology.</p> <p>3.2. Structure and format of reports are clear and conform to enterprise requirements.</p> <p>3.3. Findings are reported and distributed in accordance with enterprise requirements.</p> <p>3.4. Feedback and comments on suitability and sufficiency of findings is obtained in accordance with</p>                                                                                                                                                                                                                                                      |

| ELEMENT | PERFORMANCE CRITERIA     |
|---------|--------------------------|
|         | enterprise requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect and organise production data
- analyse and interpret data
- present data
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the relevant legislation, industry and enterprise codes of practice and quality assurance procedures that impact on intensive production
- knowledge of enterprise record keeping and recording practices
- knowledge of enterprise policies and procedures relating to collection, analysis and maintenance of production data
- methods to collect and analyse production data
- data management systems and methods
- business equipment
- principles of report writing and data presentation.

## Evidence Guide

| <b>EVIDENCE GUIDE</b>                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                     | <p>2.5. Any Occupational Health and Safety (OHS) hazards are identified and appropriate action is taken according to enterprise policy and OHS legislation and codes.</p> <p>2.6. All waste products is disposed of according to enterprise procedures.</p> <p>2.7. All deceased livestock, unwanted biological material or damaged/infected plant stock are disposed of according to enterprise procedures.</p> <p>2.8. Information relating to work in quarantine site is recorded as required by the enterprise procedures.</p>                                                                                                                                                                                                                                                                                                                        |
| 3. Assist in maintaining site quarantine procedures | <p>3.1. All visitors are informed of the quarantine procedures and are provided with appropriate clothing and footwear, if required by enterprise procedures.</p> <p>3.2. Visitors are required to sign in, state their recent activities and exposures, and wash or shower if required by enterprise procedures.</p> <p>3.3. Any observed breaches of quarantine procedures by visitors are noted and reported to supervisor.</p> <p>3.4. Gates and doors are kept locked where required by enterprise procedures and supervisor instructions.</p> <p>3.5. Where installed, security fencing is maintained according to supervisor's instructions.</p> <p>3.6. Deliveries to site are checked to ensure that established procedures for vehicle decontamination, unloading and receipt and holding or storage of stock and/or supplies are followed.</p> |
| 4. Respond to site quarantine breach or problem     | <p>4.1. The specific problem and its location is identified and reported to supervisor.</p> <p>4.2. Problems are secured according to enterprise procedures.</p> <p>4.3. Quarantine site and location of breach is cleaned and disinfected as required according to the specific nature of the problem and enterprise procedures.</p> <p>4.4. Livestock, plant stock suspected of being exposed to contaminants are isolated and monitored for evidence of contamination according to enterprise procedures.</p> <p>4.5. All contaminated stock/materials are treated and/or disposed of according to enterprise procedures.</p> <p>4.6. Information about the breach or problem is recorded according to enterprise procedures.</p>                                                                                                                      |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- read and/or interpret site quarantine procedures
- follow biosecurity and hygiene procedures
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- enterprise site quarantine policy and procedures
- industry quality assurance requirements (where applicable) and documentation required to be kept
- reporting procedures for alleged breaches of site quarantine procedures
- consequences of breaching site quarantine procedures
- OHS, environmental and disease legislative and enterprise requirements.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

**EVIDENCE GUIDE****competency in this unit**

criteria and required skills and knowledge and include achievement of the following:

- read and/or interpret site quarantine procedures
- follow enterprise quarantine procedures (including industry quality assurance procedures if applicable)
- report and respond to quarantine issues or breaches of procedures
- communicate with visitors to the enterprise about site quarantine procedures.

**Context of and specific resources for assessment**

For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to carry out movement and security procedures.

The candidate must also have access to resources that establish movement and security controls.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Sites may include:

- quarantine site of the whole farm
- an apiary
- enterprise premises, or part of the premises or enterprise, such as
  - an isolation area or sick bay.
- in some cases, the quarantine area may extend beyond the enterprise boundaries.

**Unit Sector(s)**

Comply with biosecurity requirements | <p>4.1.Biosecurity procedures relevant to own work area are identified.</p> <p>4.2.Work activities are carried out according to established biosecurity procedures.</p> <p>4.3.Personal protective equipment and fomites are maintained according to biosecurity procedures.</p> <p>4.4.Biosecurity breaches are reported immediately to appropriate person.</p> <p>4.5.Biosecurity records are completed according to work area requirements.</p>                                                                                                                                                                      |
| 5. Adapt to change as required          | <p>5.1.Need for change in own work practices to reflect critical emergency issues or emerging trends is identified and assessed.</p> <p>5.2.Changes required are discussed and agreed with senior staff.</p> <p>5.3.Own work practices are changed where required and according to agreed arrangements.</p> <p>5.4.Flexible approach that takes account of changing priorities and circumstances is applied when implementing instructions for changes to work practices.</p> <p>5.5.Change is monitored to determine the effectiveness of revised work practices and senior staff members are advised of findings.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

## REQUIRED SKILLS AND KNOWLEDGE

### Required skills

- operating in stressful situations
- prioritising conflicting demands
- working in a strict line management environment
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

### Required knowledge

- district, regional and local plans
- functional plans of other government agencies
- legal and regulatory framework under which responses are taken
- national plans such as Australian Veterinary Emergency Plan (AUSVETPLAN) or Australian Emergency Plant Pest Response Plan (PLANTPLAN)
- Occupational Health and Safety (OHS) and biosecurity procedures
- national, state and territory plans.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed on its own or in combination with other units of competency relevant to the job function.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The critical requirements for this unit of competency as a whole are listed below. Assessment must confirm one's ability to:

- access and use national plans such as

| <b>EVIDENCE GUIDE</b>                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | <p>AUSVETPLAN or PLANTPLAN</p> <ul style="list-style-type: none"> <li>• operate within a response team and follow instructions</li> <li>• operate effectively under stress in tasks involving problem solving in relation to own role</li> <li>• make effective judgements</li> <li>• follow instructions</li> <li>• provide advice in area of expertise and authority</li> <li>• understand legal and regulatory implications of one's own role in an emergency disease or plant pest response.</li> </ul>                                                                                                                                                                                                        |
| <b>Context of and specific resources for assessment</b> | <p>For valid assessment, one must have opportunities to participate in exercises, case studies and other real and simulated practical and knowledge assessments that demonstrate the skills and knowledge required to work effectively in an emergency disease or plant pest response.</p> <p>The candidate must also have access to the following resources:</p> <ul style="list-style-type: none"> <li>• simulated workplace for an emergency disease or plant pest response for assessment using scenarios, case studies, role plays and group work</li> <li>• access to local, regional, district, state and territory, and national plans relating to an emergency disease or plant pest response.</li> </ul> |
| <b>Method of assessment</b>                             | <p>Assessment for this unit of competency is to be largely practical in nature and will most appropriately be assessed in a simulated workplace or in a situation that reproduces normal work conditions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Guidance information for assessment</b>              | <p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p> <p>The skills and knowledge required to work effectively in an emergency disease or plant pest response must be transferable to a range of work environments and contexts, including the ability to deal with unplanned events. This could include:</p> <ul style="list-style-type: none"> <li>• working in the field or in a local, state or national control centre</li> </ul>                                                        |

|                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 1. Establish agreements with sources external to the enterprise | <p>1.1. The enterprise requirements of a business relationship with external sources are identified and defined.</p> <p>1.2. The ranges of acceptable outcomes from a negotiation are established.</p> <p>1.3. Contact is made with individuals, bodies or corporations, the appropriate individual is identified, and requirements of an agreement are discussed and mutually acceptable terms agreed.</p> <p>1.4. Sound practice and procedure for business meetings are maintained and all agreements are documented.</p>                                                                                                                       |
| 2. Complete contract documentation                              | <p>2.1. Requirements of the contract are clearly documented and understood by the relevant parties.</p> <p>2.2. Areas of ambiguity or concern are clarified and resolved.</p> <p>2.3. Conditions for service or supply are agreed between the parties including the determination of key performance indicators.</p> <p>2.4. Alternative processes are undertaken where agreement is unable to be reached in accordance with enterprise procedures.</p> <p>2.5. Negotiations conform to established enterprise requirements and relevant legislation.</p> <p>2.6. Contract documentation is signed and exchanged between the relevant parties.</p> |
| 3. Monitor the performance of contracts                         | <p>3.1. The rights and obligations of parties to a contract are identified, and appropriate methods of addressing non-performance are implemented.</p> <p>3.2. Professional and regulatory bodies available to support commercial grievance processes are identified and consulted when required.</p>                                                                                                                                                                                                                                                                                                                                              |

| ELEMENT | PERFORMANCE CRITERIA                                                                                                                                                         |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         | <p>3.3.Completion of contract against key performance indicators is monitored.</p> <p>3.4.Issues in respect to non-compliance are advised to the other party in writing.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- establish agreements with sources external to the enterprise
- complete contract documentation
- monitor the performance of contracts
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- contract/commercial law applicable to the type of agreement
- processes of formulation and negotiation of contracts
- enterprise business policies and plans including procedures for maintenance of confidentiality
- selection and appropriate application of technology, information systems and procedures.

## Evidence Guide

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1. Identify scope of capital works | <p>1.1. Analysis is undertaken as required and the results are analysed to determine the scope of the proposed capital works.</p> <p>1.2. Planning is initiated in accordance with organisational and other relevant policies and guidelines and the organisation's strategic direction in consultation with stakeholders.</p> <p>1.3. Conceptual and analytical skills are applied to develop a strategy to achieve objectives, outcomes and client requirements for the capital works.</p> <p>1.4. An effective risk management system is developed and applied to ensure objectives can be met within the enterprises allocated budget.</p> |
| 2. Acquire resources               | <p>2.1. Resources, equipment and infrastructure are identified, acquired and allocated.</p> <p>2.2. Scope and objectives of works are analysed to determine the tasks to achieve agreed outcomes on time and within budget.</p> <p>2.3. Processes for monitoring, evaluating and reporting performance against objectives are developed and applied.</p> <p>2.4. Roles and responsibilities of team members and stakeholders are identified and agreed.</p>                                                                                                                                                                                    |
| 3. Manage construction activities  | <p>3.1. Tasks are implemented in accordance with plans and specifications.</p> <p>3.2. Communication process is established including responsibilities for conflict resolution.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| ELEMENT                                                         | PERFORMANCE CRITERIA                                                                                                                                                                                     |

| 4. Complete capital works and evaluate and report on activities | <p>4.1. Inspection is undertaken to ensure all outcomes are met.</p> <p>4.2. Evaluation of completed project is undertaken against agreed objectives and reported to stakeholders.</p>                   |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- negotiate with contractors and suppliers, and internal and external clients
- design a strategy to achieve project outcomes and client requirements
- monitor, evaluate and report on progress of works
- resolve disagreements and disputes satisfactorily
- analyse project outcomes
- evaluate project achievements
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- human resource management and policies
- capital works specifications and objectives
- project management systems
- project management tools and techniques

**REQUIRED SKILLS AND KNOWLEDGE**

- cost schedule control systems
- enterprise procurement guidelines
- enterprise project management policies
- risk management techniques
- business and commercial issues
- basics of contract law
- physical resource management.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- negotiate with contractors and suppliers, and internal and external clients
- design a strategy to achieve project outcomes and client requirements
- monitor, evaluate and report on progress of works
- resolve disagreements and disputes satisfactorily, analyse project outcomes
- evaluate project achievements.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

The variables for this unit may include:

- the range of capital works projects undertaken in primary production or similar enterprises.

Follow legislative and regulatory requirements regarding chemical use including OHS.</li><li>2.5. Confirm instructions from chemical MSDSs in the event of a spill.</li><li>2.6. Check that output of application equipment is correct and in accordance with application/spray plan.</li></ul> |

| ELEMENT                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3. Apply chemicals               | <p>3.1. Assess and record meteorological conditions and forecasts prior to and during application.</p> <p>3.2. Select and use appropriate personal protective equipment in accordance with MSDSs and chemical label.</p> <p>3.3. Apply chemical in accordance with the application/spray plan and/or instructions.</p> <p>3.4. Assess and minimise risks to others, product integrity and the environment prior to and during application.</p>                                                                                                                                                         |
| 4. Finalise work                 | <p>4.1. Clean and store Personal Protective Equipment (PPE) and application equipment in accordance with manufacturer's specification and OHS requirements.</p> <p>4.2. Dispose of excess chemicals and use triple rinse drums in accordance with label and MSDSs requirements.</p> <p>4.3. Complete incident reports as required in accordance with legislative and/or regulatory requirements.</p> <p>4.4. Complete application records.</p> <p>4.5. Store unused chemical/products in accordance with label requirements and MSDSs.</p> <p>4.6. Adhere to all re-entry and withholding periods.</p> |
| 5. Transport and handle chemical | <p>5.1. Confirm precautions for the transport and handling of chemicals.</p> <p>5.2. Transport and handle chemicals in accordance with legislative and/or regulatory requirements.</p>                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and adopt safe work practices
- conduct pre-operational checks of application equipment
- use and maintain personal protective equipment
- measure, mix and load chemical mixes

**REQUIRED SKILLS AND KNOWLEDGE**

- use hand held and small powered application equipment relevant to the industry sector using safe and environmentally responsible work practices
- interpret labels, record relevant information and measure application amounts
- follow chemical label requirements and application/spray plan
- record activities and maintain records
- transport and handling techniques
- respond to emergencies and apply first aid in the event of pesticide poisoning
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- applied principles of Integrated Pest/Resistance Management
- structure of chemical label and MSDS
- types, applications, storage and fitting of personal protective equipment
- legislation and regulations including OHS and licensing requirements in relation to chemical use
- features and functions of a range of application equipment relevant to the industry sector
- risk factors including human and animal health, spillage and environmental
- principles of transport, handling and storage for chemicals
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- transport and handling requirements
- environmental effects of selected chemicals and how to minimise damaging effects of chemicals
- different broad chemical types, eg, insecticides, herbicides and fungicides and their mode of action symbols on the label
- paths of entry of poisons into the body and methods of limiting exposure
- methods of minimising risk during application
- Regulations and Codes of Practices with regard to hazardous substances of the use of chemicals
- OHS concerning personal safety and safety of others in the workplace
- alternatives to chemicals for pest management
- possible effects on health of bystanders/public in addition to applicators
- weather conditions and means of assessing them in line with risks, and recognising when they become unsuitable for application to continue.

## Evidence Guide

| EVIDENCE GUIDE                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Overview of assessment</b>                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>                                                                                                                    | <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• apply chemicals using handheld or small powered equipment</li> <li>• check, prepare, use and maintain application equipment and personal protective equipment</li> <li>• measure, mix, transport, handle store and dispose of chemicals</li> <li>• comply with OHS, chemical label and MSDSs requirements.</li> </ul> |
| <b>Context of and specific resources for assessment</b>                                                                                                                                                                | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Range Statement

|         | substances, risk assessments, are completed in accordance with legislative, industry and enterprise requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement risk control procedures
- identify appropriate treatment for pest, disease or weed
- mix and load chemicals
- conduct pre-operational checks of application equipment
- calibrate handheld and/or powered application equipment relevant to the industry sector
- interpret and apply chemical label requirements in the preparation of an application/spray plan
- apply chemicals
- use and maintain PPE
- dispose of surplus chemical and containers
- record activities and maintain records
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- options for pest control based on Integrated Pest/Resistance Management principles
- plant, pest, weed and/or diseases relative to industry sector
- chemical label and MSDSs formats
- meteorological and other conditions and impacts on safe and effective chemical

**REQUIRED SKILLS AND KNOWLEDGE**

- application
- types and application of personal protective equipment
- features, functions and calibration techniques for a range of hand held and/or powered application equipment relevant to the industry sector
- risk factors including human and animal health, weather, spray drift, spillage and environmental
- spray nozzle identification, selection, operation and use
- chemical mix including mixing order, adjuvants, water quality, efficacy etc
- application techniques for a range of equipment types
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- legislation including Occupational Health and Safety (OHS) and environment, and licensing requirements, in relation to chemical use.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- assess the need for chemical use
- comply with safety, chemical label and MSDSs requirements
- prepare an application/spray plan
- prepare and apply chemicals
- calibrate application equipment
- maintain chemical records

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

|                        |                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | This unit covers the process of transporting, handling and storing chemicals safely and identifies the standard required to: correctly maintain and use personal protective equipment (PPE) according to label; follow emergency procedures for chemical spillage; follow legislative requirements for the safe transport of chemicals; and maintain storage area and chemical manifest. |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Application of the Unit

|                                |                                                                                                                                                                                                                                                                                                                                                                                          |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies to the safe transport, handling and storage of liquid and dry chemical formulations across a range of industry sectors. The work is likely to be carried out unsupervised. Responsibility for and limited organisation of the work of others may be involved. This unit may be deemed to have a time limit when used as part of an accreditation or licensing process. |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Storage incidents are reported as required according to legislative and/or regulatory requirements.</p>                                                                                                                                                                                                                                                                                             |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- transport, handle and store chemicals safely
- follow chemical label and MSDS requirements for transport handling and storage
- maintain records
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record information collected accurately and legibly, and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

- transport handling and storage requirements on chemical labels and MSDS
- types and application of PPE used in transport and handling
- legislation and regulations, including OHS and licensing requirements in relation to chemical storage and transport
- risk factors, including human, animal health and environmental associated with transport, handling and storage
- requirements for disposal of excess, unwanted and/or out-of-date chemicals
- requirements for disposal of used chemical containers and/or drums
- processes for clearing spillages and clean up.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- transporting, handling and storing chemicals safely
- identify the standard required to correctly maintain and use PPE according to label
- follow emergency procedures for chemical spillage
- follow legislative requirements for the safe transport of chemicals
- maintain storage area and chemical manifest.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                                                                                                                          |
|-------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                                                                                                          |
| Chemicals handling may include:                                   | <ul style="list-style-type: none"> <li>requirements for the safe transport, handling and storage of chemicals and products used in the control of pest, weeds and diseases, including animal health products.</li> </ul> |
| This unit does not cover:                                         | <ul style="list-style-type: none"> <li>operation of specialised chemical application equipment and machinery, application of chemicals. See separate units of competency under the appropriate category.</li> </ul>      |

|         | 4.3. Risk assessment records are maintained according to industry, label, legislative and regulatory requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- develop procedures
- evaluate implementation
- identify hazards, assess risks, and implement and monitor risk control procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record information collected accurately and legibly, and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- sources of information relating to chemical use, including:
  - guidelines
  - legislation and regulations
  - industry requirements
- hazard identification and risk assessment strategies
- risk factors, including human and animal health, product integrity, weather, spray drift, spillage and environmental
- principles of transport, handling and storage for chemicals
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations.

## Evidence Guide

| EVIDENCE GUIDE                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## AHCCHM402A Plan and implement a chemical use program

### Modification History

Not Applicable

### Unit Descriptor

|                        |                                                                                                                                                                                                                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | This unit covers the planning and implementation of a chemical use program and defines the standard required to: plan and implement a program for chemical use; supervise others in chemical use; apply and monitor risk control procedures; select and manage chemical application equipment and processes. |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Application of the Unit

|                                |                                                                                                                                                                                                                                      |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies those whose job role includes the development and implementation a chemical use program for pesticides use. This unit may be deemed to have a time limit when used as part of an accreditation or licence process. |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| 1. Develop and document an application/spray plan                      | 1.1. Assess risks associated with proposed control strategy.<br>1.2. Select preferred control procedures.<br>1.3. Document preferred control procedures as application/spray plan.                                                                                                                                                                                                                                                          |
| 2. Identify requirements for chemical use                              | 2.1. Identify and interpret guidelines, legislation and regulations and industry requirements relating to chemical use.<br>2.2. Assess the need for chemical use as an option within an integrated pest management and/or animal health strategy.<br>2.3. Ensure that personnel are adequately trained in chemical use.                                                                                                                     |
| 3. Ensure that risk control measures are followed                      | 3.1. Provide appropriate Personal Protective Equipment for people in the workplace using chemicals.<br>3.2. Monitor the implementation of safe practice in the workplace including preparation and application of chemicals.<br>3.3. Monitor implementation of procedures for transport, handling, storage, decontamination and disposal.<br>3.4. Monitor implementation of procedures to mitigate residues in produce and the environment. |
| 4. Plan and implement a maintenance program for chemical use equipment | 4.1. Develop and implement a maintenance strategy for application equipment and personal protective equipment.<br>4.2. Monitor implementation of maintenance procedures.                                                                                                                                                                                                                                                                    |

| ELEMENT                                                              | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                      | 4.3. Ensure that faulty or damaged equipment is repaired or replaced.                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 5. Ensure the correct selection and application of chemicals         | 5.1. Ensure that the correct chemicals and equipment is selected in accordance with the application/spray plan.<br>5.2. Ensure that pre-operational checks of application equipment are carried out.<br>5.3. Check to ensure that calibration conforms to the requirement of the application/spray plan.<br>5.4. Ensure that meteorological conditions are monitored and assessed during application where relevant.<br>5.5. Monitor the application procedures in the event of a chemical spill. |
| 6. Ensure work activities are finalised in accordance with procedure | 6.1. Ensure that excess chemical are disposed of in accordance with label and Material Safety Data Sheet requirements.<br>6.2. Ensure incident reports are completed as required in accordance with legislative and/or regulatory requirements.<br>6.3. Ensure all required records are completed.                                                                                                                                                                                                |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- develop strategies to monitor the implementation of procedures
- evaluate conformance with procedures
- identify hazards and oversee the safety of the working environment
- develop and document an application/spray plan
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex

**REQUIRED SKILLS AND KNOWLEDGE**

workplace measures and data

- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- sources of information relating to chemical use including:
- guidelines
- legislation and regulations
- industry requirements
- hazard identification and risk assessment strategies
- methodologies for the development of procedures
- risk factors including human and animal health, weather, spray drift, spillage, residue, product integrity and environmental
- transport, handling and storage for chemicals
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- OHS, environmental and pesticides legislation, codes of practice and enterprise procedures.
- chemical application equipment capabilities and limitations.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- plan and implement a program for chemical use
- supervise others in chemical use
- apply and monitor risk control procedures
- select and manage chemical application equipment

| EVIDENCE GUIDE                                          |                                                                                                                                                                                            |
|---------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | and processes.                                                                                                                                                                             |
| <b>Context of and specific resources for assessment</b> | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances. |

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Agricultural chemicals include:                                   | <ul style="list-style-type: none"> <li>• insecticides</li> <li>• fungicides</li> <li>• herbicides</li> <li>• bactericides</li> <li>• algaecides</li> <li>• biologicals</li> <li>• nematocides</li> <li>• rodenticides</li> <li>• antimicrobial agents</li> <li>• anthelmintics</li> <li>• fumigants</li> <li>• hormone growth promotants</li> <li>• a range of veterinary chemicals used to treat animals for disease.</li> </ul> <p>It does not cover the development of general chemical use procedures.</p> |

## AHCHBR307A Assess suitability of horses for stock work

### Modification History

Not Applicable

### Unit Descriptor

|                        |                                                                                                                                                                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | This unit covers the process of assessing suitability of horses for purpose and defines the standard required to: handle horses safely; identify horse conformation; assess soundness and temperament of horses; maintain accurate data documentation. |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Application of the Unit

|                                |                                                                                                                                                                                                                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies to assessing conformation, temperament and soundness of horses and is an important skill in making sure an animal is fit for purpose and in determining sale value. The work in this standard is likely to be carried out as part of a team or independently. |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and work safely with horses
- identify horse conformation, soundness and temperament
- defer to veterinary advice if necessary
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- relevant occupational health and safety legislation, regulations and codes of practice
- recognise and report on desirable and undesirable conformation using accepted conformation terminology
- recognise and report on common vices in horses
- safe horse handling techniques
- recognise and report on desirable and undesirable natural gaits.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and

The evidence required to demonstrate competency in this

| <b>EVIDENCE GUIDE</b>                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Elements and Performance Criteria

| ELEMENT                                              | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1. Identify and confirm maintenance requirements     | <p>1.1. Visual inspections are conducted of structures and facilities to locate and evaluate defects, deterioration and impending defects.</p> <p>1.2. Property infrastructure and resources are checked for correct operation, minor maintenance needs and damage.</p> <p>1.3. Maintenance plan is confirmed according to supervisor's instructions and enterprise requirements.</p>                                                                                                                     |
| 2. Select and prepare tools, equipment and materials | <p>2.1. Tools, equipment and materials appropriate to the job requirements are selected and checked for serviceability according to manufacturer's specifications.</p> <p>2.2. Faulty or unsafe tools are identified and segregated for repair or replacement and reported according to enterprise requirements.</p> <p>2.3. Existing and potential hazards to health and safety are identified, assessed and reported according to Occupational Health and Safety (OHS) and enterprise requirements.</p> |
| 3. Carry out routine maintenance                     | <p>3.1. Suitable personal protective equipment is selected, used, maintained and stored according to OHS requirements.</p> <p>3.2. Routine maintenance to structures and surroundings is carried out according to the maintenance plan and enterprise requirements.</p> <p>3.3. Minor repairs to building cladding, and treatments to structural finishes, are carried out as required to minimise deterioration.</p>                                                                                     |

| ELEMENT                            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4. Complete maintenance activities | <p>4.1. Worksite, tools and materials are cleaned, returned to operating order, and stored according to OHS and enterprise requirements.</p> <p>4.2. Unwanted materials and waste from maintenance activities is collected, treated and disposed or recycled according to enterprise, OHS and environmental requirements.</p> <p>4.3. Relevant information is documented according to industry, enterprise requirements and OHS requirements.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe work practices
- interpret and apply task instructions
- operate a broad range of tools and equipment
- carry out building and maintenance operations
- work in team environment
- observe and report on the condition of structures and equipment
- communicate with work team and supervisor
- estimate and calculate volumes and usage.

#### Required knowledge

- characteristics, capabilities and limitations of materials, equipment and tools
- operation of water taps and reticulation systems
- types of building cladding and finishes, purpose and use
- identification of defects and appropriate repair methods
- appropriate selection of repair materials
- OHS legislative requirements and Codes of Practice
- relevant Codes of Practice and procedures with regard to protection of the environment.

## Evidence Guide

| EVIDENCE GUIDE                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Overview of assessment</b>                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>                                                                                                                    | <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• demonstrate correct selection and safe use of tools</li> <li>• apply basic building or construction techniques</li> <li>• store or dispose of unused or waste materials.</li> </ul> |
| <b>Context of and specific resources for assessment</b>                                                                                                                                                                | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                                                                                                         |

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                                                                                                                                                                         |
|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                                                                                                                                                         |

| ELEMENT                                            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 1. Assist with setting up of irrigation components | <p>1.1. Irrigation equipment is handled safely in accordance with Occupational Health and Safety (OHS) practices.</p> <p>1.2. Irrigation equipment is positioned, if necessary, in accordance with enterprise requirements.</p> <p>1.3. Irrigation components are checked and action taken, as required, in accordance with enterprise policy and procedures.</p> <p>1.4. Assemble and join irrigation system components where required.</p> <p>1.5. Water outlets are checked in accordance with enterprise practices.</p> |
| 2. Carry out irrigation operations                 | <p>2.1. Valves are opened and shut, as necessary, in accordance with enterprise procedures.</p> <p>2.2. Required pressures and water flows are achieved and maintained to ensure sufficient water availability.</p> <p>2.3. Equipment is relocated, if necessary, in accordance with enterprise procedures and OHS guidelines.</p>                                                                                                                                                                                          |
| 3. Clean and store irrigation equipment as require | <p>3.1. Equipment is cleaned and prepared for storage, as necessary, in accordance with enterprise policy and procedures.</p> <p>3.2. Equipment is loaded for transport safely, if necessary, in accordance with OHS practices.</p> <p>3.3. Equipment is stored, as required, in accordance with enterprise policy and procedures.</p>                                                                                                                                                                                      |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and follow safe work practices
- shift and transfer loads
- follow enterprise policy and procedures relating to irrigation duties
- assemble and join irrigation system components
- operate irrigation systems (i.e., turn on and off)
- regulate system to achieve and maintain correct operating pressures and water flows
- estimate water flow
- monitor the environmental impacts of pressurised irrigation
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- basic operation of pressurised irrigation system
- irrigation times to deliver sufficient volume without over watering
- manual handling procedures
- OHS and environmental procedures relating to using pressurised irrigation systems.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| <b>EVIDENCE GUIDE</b>                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Overview of assessment</b>                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b> | <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• assemble and join irrigation system components</li> <li>• monitor irrigation times to deliver sufficient volume without over watering</li> <li>• operate and monitor irrigation systems</li> <li>• estimate water flow</li> <li>• regulate system to achieve and maintain correct operating pressures and water flows.</li> </ul> |
| <b>Context of and specific resources for assessment</b>                                             | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Range Statement

| <b>RANGE STATEMENT</b>                                            |                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                                                                                                                                                                                    |
| Pressurised irrigation may include:                               | <ul style="list-style-type: none"> <li>• micro-irrigation systems</li> <li>• spray irrigation systems.</li> </ul>                                                                                                                                                                                  |

## Elements and Performance Criteria

| ELEMENT                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 1. Organise resources for installation work | <p>1.1. Materials, tools, equipment and machinery are selected according to the irrigation system design requirements and enterprise work procedures.</p> <p>1.2. The construction site for the irrigation system and construction method is identified according to the site and irrigation system plans and enterprise work procedures.</p> <p>1.3. Parts and equipment delivered to site are checked according to system drawings and specifications.</p> <p>1.4. Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturer specifications and enterprise work procedures.</p> <p>1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</p> <p>1.6. Suitable safety and personal protective equipment (PPE) are selected, used and maintained.</p> <p>1.7. Water supply is checked to ensure that it is compatible with system specifications.</p> |
| 2. Set out and prepare site                 | <p>2.1. Measurement and marking out of irrigation lines are consistent with the plan.</p> <p>2.2. Trenches, where constructed, are at the specified depth without damage to services, facilities, features and established plants.</p> <p>2.3. Equipment operation and work practices conform to enterprise and legislative OHS requirements.</p> <p>2.4. Regulations and legislation relevant to the situation</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| ELEMENT                          | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <p>are observed.</p> <p>2.5. Work practices reflect sustainable horticulture principles and respond to local community requirements.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3. Install irrigation components | <p>3.1. Plan is interpreted and, where applicable, contractors are supervised and work is monitored to conform to the plan.</p> <p>3.2. Components are assembled and connected according to the plan, and joints are completed and tested according to manufacturer specifications.</p> <p>3.3. Fittings and valves are fitted and adjusted to the requirements of the installation plan, and all joints are secured according to enterprise guidelines.</p> <p>3.4. A clean and safe work area is maintained while installation work is carried out.</p> <p>3.5. Tools appropriate to the task being undertaken are chosen and used according to guidelines and safe working practices are employed.</p> |
| 4. Complete installation work    | <p>4.1. Earthworks are finished off to plan specifications and enterprise work procedures.</p> <p>4.2. The system configuration and capacity matches the installation plan.</p> <p>4.3. The site is restored and waste material is removed from the site and disposed of in an environmentally aware and safe manner according to enterprise work procedures.</p> <p>4.4. Tools, equipment and machinery are cleaned, maintained and stored according to enterprise work procedures.</p>                                                                                                                                                                                                                  |
| 5. Commission irrigation system  | <p>5.1. Start-up sequence is in accordance with operations manual.</p> <p>5.2. System is flushed as required.</p> <p>5.3. Operating faults are identified and corrective actions taken according to the operations manual.</p> <p>5.4. Testing and monitoring equipment are calibrated to manufacturer specifications.</p> <p>5.5. Work outcomes are recorded or reported to the supervisor according to enterprise work procedures.</p>                                                                                                                                                                                                                                                                  |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- organise resources for installation work
- set out and prepare site
- install irrigation components
- complete installation work
- commission irrigation system
- implement and follow relevant enterprise OHS and environmental policies and procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record information collected accurately and legibly, and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- methods and techniques of irrigation
- components of an irrigation system
- characteristics and operation of joints, valves and sprinkler components
- operation of pumps and water flow rates
- behaviour of water on varying terrain and soil types
- soil water retention testing techniques
- water quality and water filtration techniques
- calculations for installing irrigation systems
- soil characteristics
- environmental impacts of installing irrigation systems
- enterprise OHS procedures.

## Evidence Guide

| <b>EVIDENCE GUIDE</b>                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         | <p>accordance with enterprise procedures.</p> <p>3.4. Irrigation activities are recorded and in reported accordance with regulatory requirements and enterprise procedures.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- read and follow operations manual and irrigation schedules
- calibrate pressure and flow testing equipment
- carry out pre-start checks and prime pumps
- start up system and carry out operational checks
- measure and interpret flow rates and pressures
- perform shut down procedures
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- implement and follow relevant OHS and environmental policies and procedures relating to the operation of pressurised irrigation systems
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- general irrigation methods for pressurised systems
- main components of pressurised irrigation systems
- pump types used in pressurised irrigation systems and their operation
- environmental impacts of irrigation using water from any ground or underground source
- soil/plant/water relationships

**REQUIRED SKILLS AND KNOWLEDGE**

- water requirements of plants/crops consistent with sound environmental management
- shutdown sequence
- OHS, environmental and enterprise policies and procedures relating to the operation of pressurised irrigation systems.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- read and follow operations manual and irrigation schedules
- carry out pre-start checks
- operate and inspect the system
- measure and interpret flow rates and pressures
- identify adverse environmental impacts of irrigation activities and take appropriate remedial action
- shut down in response to irrigation indicators.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                                               |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- operate, maintain and repair irrigation systems
- shut down and isolate components
- replace components
- carry out operational tests
- implement and follow relevant enterprise OHS and environmental policies and procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record information collected accurately and legibly, and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required

**REQUIRED SKILLS AND KNOWLEDGE**

- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- identification, characteristics and operation of replaceable components of irrigation systems
- system malfunctions and their likely causes
- environmental impacts of irrigation, using water from any ground or underground source
- purchasing procedures
- isolation procedures
- enterprise policies and procedures
- irrigation, OHS and environmental guidelines.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- read and apply system specifications, technical manuals and supply/spare parts inventories
- locate and identify faulty components and blockages
- apply shutdown sequence and isolation procedures
- remove faulty components from the system and install replacements
- clear blockages or replace blocked sections
- return isolated or shutdown components to service.

**Context of and specific resources for**

Competency requires the application of work practices

**EVIDENCE GUIDE****assessment**

under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

System may include:

- pressurised irrigation systems, such as micro-irrigation, spray irrigation or gravity-fed irrigation systems.

**Unit Sector(s)****Unit sector**

Irrigation

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe systems of work
- order materials and equipment to meet schedule
- administer the contract on site
- supervise construction operations in the most efficient sequence
- identify adverse environmental impacts of irrigation installation activities and take appropriate remedial action
- comply with statutory requirements
- follow environmental procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of

**REQUIRED SKILLS AND KNOWLEDGE**

cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- communication procedures for on site labour and authorities
- safety procedures and quality assurance programs
- local government regulations
- on-site contract provisions
- projected costs
- environmental impacts of irrigation system installation using water from any ground or underground source
- OHS and environmental legislation, codes of practice and environmental procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- organise supplies and labour
- organise the installation of supplies and equipment
- implement and monitor on site operations
- test the installation or construction against specifications
- carry out any remediation work required.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

| RANGE STATEMENT                                                   |                                                                                           |

| 1. Identify scope of landscape project works     | <p>1.1.Nature of landscape project works and extent of responsibilities are identified and checked against relevant landscape documentation.</p> <p>1.2.Personnel and other resources required to undertake landscape project works are identified according to the scope of the project and relevant landscape documentation.</p> <p>1.3.A work program is developed according to the needs of management and/or the client to ensure that project outcomes are reached within designated time lines.</p> <p>1.4.The environmental impact of the proposed landscape project works is considered.</p> <p>1.5.Occupational Health and Safety (OHS) hazards are identified, risks assessed and controls implemented.</p> |
| 2. Coordinate the supply of materials/ equipment | <p>2.1.Material quantities and equipment requirements are calculated to ensure an on-going work program is maintained according to the scope of the project.</p> <p>2.2.Material quantities are ordered, checked for quantity and quality, and stockpiled where required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| ELEMENT                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | <p>2.3.Any specific delivery instructions are conveyed and confirmed with suppliers to ensure materials are delivered according to the work program.</p> <p>2.4.Any material rejected is sent back to supplier and re-ordered.</p>                                                                                                                                                                                                                                                                                                                                                |
| 3. Monitor project works | <p>3.1.Work program is monitored and adjusted to ensure the site is developed according to the needs of management and/or the client, and to ensure that project outcomes are reached within designated time lines</p> <p>3.2.Variations to the work program, issues likely to cause delays, and contingencies beyond the scope of the project are identified, recorded and reported to management and/or the client.</p> <p>3.3.The work site is monitored to ensure it remains in a clean, tidy and safe condition throughout and on completion of landscape project works.</p> |
| 4. Complete site works   | <p>4.1.Site is inspected prior to practical completion to ensure all works have been undertaken according to management and/or client needs and the relevant landscape documentation.</p> <p>4.2.Any works not complying are noted and rectified.</p> <p>4.3.A completed landscape project works report is produced, recorded and communicated to management and/or the client.</p>                                                                                                                                                                                               |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- calculate material and resource requirements
- control quality of supplied materials
- coordinate a team to achieve optimum performance
- demonstrate safe working practices
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly

**REQUIRED SKILLS AND KNOWLEDGE**

- information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
  - use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
  - use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- environmental awareness associated with undertaking landscape project works to ensure the impact on the environment is minimal
- project contracts, documentation, plans and specifications
- possible causes of disruption to work programs and their effect on quality and time schedules
- site assessment and work site establishment
- supervision of labour and sub-contractors
- job reporting including format, frequency and documentation
- issuing of instructions, variations and RFI
- legislative requirements and legal responsibilities (including OHS)
- OHS responsibilities of employers and employees
- hazard identification, assessment and control.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- develop a project plan and apply for planning

| <b>EVIDENCE GUIDE</b>                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | <p>approvals if required</p> <ul style="list-style-type: none"> <li>• calculate and obtain quotes for materials and receive on site</li> <li>• supervise the work team and ensure a safe work environment</li> <li>• minimise environmental risks and impacts</li> <li>• monitor the landscape works through to completion and rectify problems</li> <li>• complete a landscape works report and present to management and client.</li> </ul> |
| <b>Context of and specific resources for assessment</b> | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                                                    |

## Range Statement

| <b>RANGE STATEMENT</b>                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Unit Descriptor

|                        |                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | This unit covers the process of undertaking operational maintenance of machinery and defines the standard required to: select and prepare tools and equipment; carry out lubrication and basic servicing; conduct basic diagnostic tests; report simple faults or report and tag more serious faults; collect, remove and recycle or dispose of wastes; maintain records of machinery maintenance. |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Application of the Unit

|                                |                                                                                                                                                                                                                                                                                                                                        |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies to workers in the agriculture, horticulture and land management sectors who use non-specialist skills to perform basic servicing and repairs on a range of machinery according to scheduled maintenance programs. The operational maintenance of machinery will usually follow set routines, methods and procedures. |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                                    | <p>mechanical faults are identified and rectified according to manufacturer's specifications.</p> <p>2.5. More serious or complex faults are reported for referral according to enterprise requirements.</p>                                                                                                                                                                                                                                                               |
| 3. Complete maintenance activities | <p>3.1. Tools are cleaned and stored according to OHS and enterprise requirements.</p> <p>3.2. Waste from maintenance activities is collected, treated and disposed or recycled according to enterprise environmental requirements.</p> <p>3.3. Work areas are cleaned, returned to operating condition and maintained according to OHS and enterprise requirements.</p> <p>3.4. Relevant information is documented according to industry and enterprise requirements.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and apply safe work practices
- use tools and equipment safely
- carry out basic servicing of machinery
- carry out basic mechanical fault finding and diagnostic tests
- refer complex mechanical faults to appropriate technician
- follow procedures to dispose of waste
- recognise caution or hazard signs and symbols
- interpret tasks or information from labels, manuals or written instructions
- record information accurately or verbally report information
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

**REQUIRED SKILLS AND KNOWLEDGE****Required knowledge**

- types and uses of lubricants and other commonly used servicing materials
- operational principles of machinery including mechanical and auto-electrical systems
- servicing characteristics of plant and equipment
- types, characteristics, uses and limitations of hand power tools
- functions of components of common mechanical and hydraulic systems
- working principles of 2-stroke, 4-stroke, petrol and diesel engines
- set-up requirements of plant and equipment, and principles of calibration
- basic diagnostic processes and techniques
- environmental Codes of Practice with regard to maintenance activities
- OHS and environmental legislative and enterprise requirements and Codes of Practice
- hazard identification and OHS procedures.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- select and prepare tools and equipment
- carry out lubrication and basic servicing
- conduct basic diagnostic tests
- report simple faults or report and tag more serious faults
- collect, remove and recycle or dispose of wastes
- maintain records of machinery maintenance.

**Context of and specific resources for**

Competency requires the application of work practices

**EVIDENCE GUIDE****assessment**

under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Operational maintenance of machinery may include:

- the basic operational maintenance of a range of agricultural, horticultural or land management machinery.

Machinery may include:

- sprayers
- tractors
- mechanical pruners
- harvesters
- turf mowers
- rotary hoes
- chainsaws
- hedge trimmers
- winches
- vehicles
- motorcycles.

Malfunctions, faults, irregular performance or damage to vehicle is detailed and reported according to enterprise requirements.</li><li>3.3. Vehicle is cleaned and decontaminated (where necessary), secured and stored according to enterprise and OHS requirements.</li></ul>                                                                                                                                                         |

| ELEMENT | PERFORMANCE CRITERIA                                                                                        |
|---------|-------------------------------------------------------------------------------------------------------------|
|         | 3.4. Vehicle operational reports are maintained to industry standards according to enterprise requirements. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- steer, manoeuvre and position vehicles in a smooth and controlled manner in on and off-road conditions
- demonstrate safe and environmentally responsible workplace practices
- obtain relevant licenses and permits
- demonstrate emergency procedures and safe driving techniques
- read and comprehend operator manuals
- effectively communicate faults, malfunctions and workplace hazards
- interpret and apply task instructions, report and maintain operational records
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- components, controls and features of vehicles and their functions
- operating principles and operating methods
- load limits and the principles of weight distribution with regard to load shifting and vehicle movement
- effects of adverse weather and terrain conditions on the operation of vehicles
- OHS legislative requirements and Codes of Practice
- Environmental Codes of Practice with regard to the operation of vehicles
- Relevant State/Territory legislation and regulations with regard to licensing, road and traffic requirements.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out routine checks and maintenance
- store loads securely
- drive a range of vehicles safely and defensively
- record details of vehicle use and maintenance.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Vehicles may include:

- utilities
- four wheel drive vehicles
- light trucks.

## Unit Sector(s)

### Unit sector

Machinery operation and maintenance

Contingency situations are recognised and reported to the supervisor and corrective actions taken according to enterprise guidelines.</p> <p>3.5. A simple report is written to inform management of maintenance and repair activities undertaken and completed.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- implement safe work procedures and ensure a safe workplace
- read and interpret documentation associated with work site activities
- calculate material and resource requirements
- co-ordinate a team to achieve optimum performance
- document results clearly and concisely
- perform an OHS risk assessment

**REQUIRED SKILLS AND KNOWLEDGE**

- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- the range, use and availability of materials, equipment and machinery that may be required for the project
- environmental awareness associated with undertaking maintenance and repair work on machinery and equipment to ensure the impact on the environment is minimal
- OHS issues, legislative requirements and codes of practice.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- seek technical advice on scale of repairs required where necessary
- establish priorities for work to be carried out
- calculate material and resource requirements and place orders
- respond to contingencies and take corrective actions

| EVIDENCE GUIDE                                          |                                                                                                                                                                                                       |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | where necessary <ul style="list-style-type: none"> <li>• monitor and document personnel, activities, timelines and materials usage</li> <li>• monitor and report on activities undertaken.</li> </ul> |
| <b>Context of and specific resources for assessment</b> | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.            |

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                                                                                                                                                                                                                                                                                                      |

Machinery and equipment damage, malfunctions or irregular performance are recorded and/or reported according to enterprise requirements.</p> <p>3.4. Machinery and equipment is cleaned, secured and stored according to manufacturer's specifications and enterprise requirements.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe operating procedures
- complete pre-operational checks
- recognise and report defects
- operate machinery and equipment to industry standards
- demonstrate safe and environmentally responsible workplace practices
- read and interpret manufacturer's specifications, work and maintenance plans, and Material Safety Data Sheets (MSDSs)
- interpret and apply instructions, communicate with work team and supervisor, record and report equipment faults, workplace hazards, and accidents
- measure and calculate volumes, consumption and servicing requirements
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- manufacturers specifications for servicing of machinery and equipment
- operating principles and operating methods for machinery and equipment
- principles of weight distribution with regard to load shifting and machinery movement
- procedures for cleaning, securing and storing machinery, equipment and materials
- potential risks and hazards associated with the operation of machinery and

**REQUIRED SKILLS AND KNOWLEDGE**

- equipment
- use of hazardous substances
- environmental impacts and minimisation measures associated with the operation of machinery and equipment
- OHS and environmental legislation, regulations and Codes of Practice
- relevant State/Territory legislation, regulations and Codes of Practice with regard to licensing, roads and traffic requirements.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out pre-operational checks and maintenance and report defects if necessary
- secure attachments according to manufacturer's directions
- operate machinery in a safe and controlled manner
- follow procedures to minimise environmental impacts
- implement shut-down procedures and store machinery and equipment
- record maintenance and operation details
- evidence records must include details of the machinery and equipment that the candidate was assessed on.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

|--|---------------------------|
|  | enterprise circumstances. |
|--|---------------------------|

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Machinery and equipment may include:

- hydraulic equipment
- stationary engines
- spraying equipment
- mulching and chipping equipment
- powered trailers and three point linkage equipment
- excludes chainsaws, tractors, vehicles and earth moving equipment.

**Unit Sector(s)**

| equipment operation | <p>3.2. Specialised machinery and equipment operational records are completed and maintained according to enterprise requirements.</p> <p>3.3. Malfunctions, faults, irregular performance and damage to specialised machinery and equipment are detailed and reported according to enterprise requirements.</p> <p>3.4. Specialised machinery and equipment is cleaned, secured and stored according to OHS and enterprise requirements.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work procedures
- select the appropriate machinery and equipment for the work plan
- determine and check operating methods with management
- carry out pre-operational checks on machinery
- examine faults or breakdowns and specify repairs
- use machinery or equipment in a safe and controlled manner to perform specific tasks by utilising the various components, controls and features
- maintain and monitor performance and maintenance records
- use environmentally responsible practices for operation of machinery and equipment, and to dispose of used oils and machinery parts
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- manufacturer's requirements and/or workplace requirements for:

**REQUIRED SKILLS AND KNOWLEDGE**

- pre-operational checks
- machinery operation techniques
- operator level servicing
- shutdown
- emergency procedures
- basic diagnostic techniques
- equipment characteristics, technical capabilities and limitations
- components and controls features and functions
- OHS and environmental legislation, Codes of Practice and enterprise requirements
- licensing requirements for machinery.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare and operate the machinery in accordance with manufacturer specifications
- operate the machinery in a safe, efficient and controlled manner
- conduct pre and post operational checks
- perform minor maintenance and fault finding
- record work activities
- Evidence records must include a description of the machinery and equipment that the candidate was assessed on.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or

|  | enterprise circumstances. |
|--|---------------------------|

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Machinery and equipment may include:

- feed mixers
- specialised turf equipment
- specialised nursery equipment
- livestock feeding systems
- filtering and pumping equipment
- poultry performance monitoring equipment
- fertilising application
- grain handling equipment.

|         | 4.4. Apply mulch as directed. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards
- use tools and equipment for planting
- mark out planting site
- excavate planting holes
- inspect root ball condition
- observe problems of root balls
- install plants
- apply root treatments
- follow work procedures
- participate in teams and contribute to team objective
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- basic botany and physiology
- chemical use, toxicity and mode of action of chemicals used
- awareness of the impact of planting activities on the surrounding environment
- planting techniques relating to specific species
- factors affecting the timing and method of tree or shrub planting
- initial establishment needs of juvenile plants
- soil amelioration techniques
- principles relating to the application of mulches and fertilisers
- basic plant structure and the physical and nutritional requirements of plants
- OHS legislative requirements and Code of Practice

**REQUIRED SKILLS AND KNOWLEDGE**

- manual handling techniques
- the effect of adverse outdoor climatic conditions.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- carry out ground preparation
- excavate planting holes
- apply suitable tree planting techniques for the tree species
- inspect root ball quality
- apply a range of treatments
- apply post planting applications
- monitor and record plantings.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

| <b>RANGE STATEMENT</b> |                                                                                                                                                                                                                                                                                                                                                                                          |

|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | This unit covers the installation and consolidation of planted areas as part of a horticultural, agricultural or land management tree and shrub planting program and defines the standard required to: determine plant establishment methods and requirements from plans, clients quotations or instructions; interpret planting plans and specifications for a planting project; inspect quality of supplied plants and take appropriate action; conduct a site hazard identification and risk control assessment; undertake planting work, review the work and take remedial action where required. |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Application of the Unit

|                                |                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies to the establishment of planting areas in new projects and in programs of extensive replacement and renovation works across a range of situations and environments including amenity and natural resource areas. It excludes sports turf or recreational turf surfaces, intensive plant production and revegetation areas. |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| 1. Prepare to establish a planted area | <p>1.1. The planting site, planting methods and plant species and cultivars are identified according to the site plan.</p> <p>1.2. Materials, tools, equipment and machinery are selected according to planted area design requirements.</p> <p>1.3. Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers' specifications.</p> <p>1.4. Site hazards are identified, risks assessed and risk controls implemented.</p> <p>1.5. Suitable safety and Personal Protective Equipment (PPE) is selected, used, maintained and stored.</p> <p>1.6. A clean and safe work area is maintained throughout and on completion of work.</p> |
| 2. Prepare the planting area           | <p>2.1. Layout of services is recognised, depths checked against the site plan, and discrepancies are reported to the supervisor and the relevant authority.</p> <p>2.2. Earthworks are undertaken according to documented work procedures.</p> <p>2.3. Additives are selected and applied, as required,</p>                                                                                                                                                                                                                                                                                                                                                                             |

| ELEMENT                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                         | <p>according to site conditions.</p> <p>2.4. The planting site is watered, where required, according to the planting method and enterprise work procedures.</p> <p>2.5. Positions of plants are marked out on site according to the plant establishment program.</p> <p>2.6. Debris and pollutants are removed from the site and disposed of in an environmentally aware and safe manner.</p>                                                                                                                                                                                                                                                                                                                                                                                              |
| 3. Undertake planting operation         | <p>3.1. All plants are inspected for health, vigour and well established root systems prior to being planted.</p> <p>3.2. Plants with major defects are returned to the supplier or set aside to be returned.</p> <p>3.3. Plants with minor defects are trimmed or treated to maintain health and vigour.</p> <p>3.4. Plants are planted with appropriate spacings as detailed in the plant establishment program.</p> <p>3.5. Planting methods comply with the growing requirements of individual plant species and cultivars.</p> <p>3.6. Newly installed plants are provided with post-planting care.</p> <p>3.7. Pruning is undertaken, where necessary, according to the needs of the species and cultivar to ensure plants develop a sound framework for their growth and habit.</p> |
| 4. Review the plant establishment works | <p>4.1. The plant establishment program is reviewed according to enterprise work procedures.</p> <p>4.2. Plants incorrectly planted, or situations that will prevent plants from reaching their full potential are identified, recorded and reported.</p> <p>4.3. Remedial action is undertaken to ensure all requirements of the plant establishment program are implemented.</p>                                                                                                                                                                                                                                                                                                                                                                                                         |
| 5. Complete establishment works         | <p>5.1. Earthworks and surface finishes are completed to plan specifications.</p> <p>5.2. Waste material is removed from the planting site.</p> <p>5.3. Work outcomes are recorded and reported to the client or appropriate supervisor.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- inspect plant quality
- determine plant health
- interpret site plans and plant establishment specifications
- measure quantities, calculate material requirements, area, volume, ratios and application rates
- record and report work outcomes
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the objectives of the plant establishment program, including finished plant forms, site appearance, end use and time constraints
- the physiology of required plant species and cultivars, culture and planting procedures including growth rates, main nutrient and water requirements, deficiency symptoms, recommended treatments and associated environmental implications
- the identification of pests and diseases, plant symptoms of infections, treatment threshold levels, recommended treatments, methods of application and environmental implications
- soils and soil amelioration techniques
- Occupational Health and Safety (OHS) legislative requirements and codes of practice, OHS procedures, OHS employee and employer responsibilities, and hazard identification, assessment and control.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

| <b>EVIDENCE GUIDE</b>                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

### Unit Descriptor

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | This unit covers the process of implementing a landscape maintenance program of newly constructed or established landscapes and defines the standard required to:<br>determine the scope, frequency and standards required for a range of routine landscape maintenance activities from an existing landscape maintenance program; implement landscape maintenance activities; evaluate landscape maintenance works; record the results of the maintenance e works. |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Application of the Unit

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies to implementing a landscape maintenance program on newly constructed or established landscapes and is carried out under limited supervision from others, with checking only related to overall progress. The work requires the application of extensive horticultural knowledge and a broad range of horticultural skills. Landscape maintenance is normally done within routines, methods and procedures where some discretion and judgement is required in the selection of equipment, work organisation, services, actions, and achieving outcomes within time constraints. |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|         | <p>2.4. Items which are beyond the scope of the maintenance program are reported to the nominated person.</p> <p>2.5. Items requiring further action are recorded.</p> <p>2.6. Results of maintenance works are evaluated and recorded.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- determine maintenance requirements
- implement maintenance operations
- treat diseased plants
- repair and renovate landscape structures and features
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- a detailed knowledge of what is included (and what is excluded) from the landscape maintenance program or contract
- actions permitted in the event of variations to maintenance programs/contracts
- appropriate horticultural practices for heritage and cultural areas
- principles and applications of an integrated pest management program
- characteristics of a range of plants
- optimal growing conditions for a range of plants
- common problems occurring in a range of plants.

## Evidence Guide

| <b>EVIDENCE GUIDE</b>                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Overview of assessment</b>                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>                                                                                                                    | <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• determine the scope, frequency and standards required for a range of routine landscape maintenance activities from an existing landscape maintenance program</li> <li>• implement landscape maintenance activities</li> <li>• evaluate landscape maintenance works</li> <li>• record the results of the maintenance e works.</li> </ul> |
| <b>Context of and specific resources for assessment</b>                                                                                                                                                                | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Range Statement

| <b>RANGE STATEMENT</b>                                            |                                                                                                                                            |
|-------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                            |
| Programs may include:                                             | <ul style="list-style-type: none"> <li>• care of plants</li> <li>• repairs and maintenance of landscape features and amenities.</li> </ul> |

Treatment waste is disposed of causing minimal environmental damage.</li></ul>                                                                                                                                                                                                                                                                                                                                                |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and implement safe work practices
- read and interpret chemical labels, Material Safety Data Sheets (MSDSs), manufacturer's specifications for setting up equipment
- use and maintain PPE
- prepare to treat weeds
- apply weed treatments
- carry out post treatment operations
- maintain spray records
- recognise caution or hazard signs and symbols
- interpret tasks or information from labels, manuals or written instructions
- record information accurately or verbally report information
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- recognition of common weeds for a particular enterprise/situation
- weed growth characteristics
- different types of control measures, treatments and their principles
- modes of action of different chemicals
- equipment capability and limitations
- legislation relation to the use of chemicals for weed control
- OHS responsibilities of employers and employees
- OHS legislative requirements and associated hazardous substances regulations and Codes of Practice
- correct wearing/fit of personal protective equipment
- environmental considerations when using chemicals for weed control.

## Evidence Guide

| <b>EVIDENCE GUIDE</b>                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- read and interpret chemical labels, Material Safety Data Sheets (MSDSs), manufacturer's specifications for setting up equipment
- recognise a range of plant pests, diseases and disorders
- monitor and record the severity of the plant pest or disease problem
- prepare to treat plant pests and diseases
- apply plant pest, disease and disorder treatments
- carry out post treatment operations
- use and maintain PPE appropriate to task
- maintain spray and other treatment records
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- recognition of common plant pests, diseases and disorders for a particular enterprise/situation
- different types of control measures and their principles
- modes of action of different chemicals
- legislation relation to the use of chemicals for plant pest, disease and disorder control
- OHS legislative and enterprise requirements and Codes of Practice
- correct use and maintenance of PPE.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify significant plant pests, diseases and disorders for the enterprise
- apply a range of control or treatment options
- recognise and control risks to environment (including spray drift and chemical spillage)
- clean and store equipment correctly
- observe the treatment site
- record plant treatments.

#### Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Plant pests, diseases and disorders may include:

- those which impact on commercial crops, pastures, amenity areas, gardens and turf, and natural areas.

Plant pests may include:

- chewing, sucking and boring invertebrates
- nematodes
- fungi
- viruses
- bacteria.

| RANGE STATEMENT                                       |                                                                                                                                          |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify a range of weeds and beneficial organisms
- identify threshold level of weeds for treatment
- conduct a site hazard identification and risk control assessment
- prepare a control plan
- use appropriate cultural, biological or chemical controls
- minimise damage to non-target species
- complete records of control treatments
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- economic, aesthetic and environmental threshold for a range of weeds
- IPM principles and strategies
- lifecycle and biology of weeds
- hazard identification and risk assessment methodologies

**REQUIRED SKILLS AND KNOWLEDGE**

- types of control measures (cultural, biological, chemical) commonly used in industry/sector
- types of equipment including personal protective equipment appropriate to the control measure
- risk factors including human, animal health and environmental associated with a range of control measures/options
- OHS requirements pertaining to the use of cultural, biological, chemical agents.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify a range of weeds and beneficial organisms
- plan and coordinate weed control activities
- prepare and calibrate equipment
- conduct a site hazard identification and risk control assessment for weed control
- apply a range of weed control methods and maintain records
- monitor, record and report the effectiveness of controls.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                                                                     |
|-------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                                                     |
| Weeds may include:                                                | <ul style="list-style-type: none"><li>the range of significant and noxious weeds of agricultural and horticultural crops, pastures and native vegetation.</li></ul> |

Monitor control methods | <p>4.1.Control methods are monitored to identify side effects to other plants, animals or external environment.</p> <p>4.2.Effectiveness of control methods are assessed in reference to specified industry, OHS and enterprise standards.</p> <p>4.3.Adjustments to IPM control methods are implemented where necessary to meet enterprise specifications.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- recognise a range of pests, diseases and beneficial organisms within a particular enterprise
- communicate with work team members, supervisors, contractors and consultants
- understand IPM symbols and information
- interpret and apply an IPM- based program
- utilise proforma reporting, analysis and work procedure documents
- interpret and apply plant pest and disease spatial and logistical specifications
- interpret and apply test results, and calculate the quantities and application rates of control materials
- coordinate work groups, contractors and own activities to sequentially and effectively complete activities in a timely and cost effective manner
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- pests and disease recognition
- economic, aesthetic or environmental thresholds for a range of plant pests, diseases

**REQUIRED SKILLS AND KNOWLEDGE**

and disorders

- chemical, biological and cultural control methods and treatments available to the enterprise within the parameters of an IPM program
- range and use of tools, equipment and machinery available to the enterprise for implementing the control measures
- range of site monitoring and analysis techniques that may be used to implement and IPM program
- choice of plant pest and disease methods with site limitations, environmental implications, end market and production or environmental objectives for the site
- IPM standards or industry Code of Practice
- occupational health and safety responsibilities for employees and employers
- correct use and maintenance of personal protective equipment.
- OHS and environmental legislative requirements including hazardous substances regulations.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- identify a range of pests, diseases and disorders, and beneficial organisms
- assess damage or threat to plants
- select pest and disease controls and timing of operations
- prepare and calibrate equipment
- apply a range of pest and disease control methods and keep records
- monitor the effectiveness of controls.

**EVIDENCE GUIDE****Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Pests, diseases and disorders may include:

- the range of pests, diseases and disorders of plants managed or controlled by using a range of integrated measures of management and control.

**Unit Sector(s)****Unit sector**

Pest management

Results are recorded according to organisational procedures.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- collect soil/media samples
- perform basic soil/media tests
- interpret results from own or laboratory results
- record and store information
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- soil sampling techniques
- soil/media physical properties
- soil/media chemical properties
- soil/media plant relationships
- basic soil/media field tests
- interpreting laboratory results
- techniques to ameliorate soil properties.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance

| <b>EVIDENCE GUIDE</b>                                   |                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>competency in this unit</b>                          | <p>criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• undertake basic soil/media analysis descriptive tests for soil texture, salinity and pH</li> <li>• use basic proprietary soil testing equipment for testing pH and salinity</li> <li>• determine basic soil structure with a view to using soil structure ameliorants.</li> </ul> |
| <b>Context of and specific resources for assessment</b> | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                             |

## Range Statement

| <b>RANGE STATEMENT</b>                                            |                                                                                                                          |
|-------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                          |
| Soils may include:                                                | <ul style="list-style-type: none"> <li>• all types of soils and growing media used for commercial production.</li> </ul> |

## Elements and Performance Criteria

| ELEMENT                                                       | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 1. Prepare for soil sampling                                  | <ul style="list-style-type: none"><li>1.1. The soils to be surveyed, surveying activity and contractors are identified according to site plans and enterprise work procedures.</li><li>1.2. Tools, equipment and machinery are selected according to site conditions, testing agency requirements and enterprise work procedures.</li><li>1.3. If required, pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise work procedures.</li><li>1.4. Areas of homogeneous soil types are identified for sampling.</li><li>1.5. Services are located using site plans and in consultation with the supervisor.</li><li>1.6. Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</li><li>1.7. Suitable safety equipment and Personal Protective Equipment (PPE) are selected, used and maintained.</li><li>1.8. A clean and safe work area is maintained throughout and on completion of work.</li></ul> |
| 2. Determine soil characteristics by performing soil sampling | <ul style="list-style-type: none"><li>2.1. The density and depth for a representative sampling of the area are determined according to enterprise work procedures.</li><li>2.2. Holes are excavated at identified sampling sites according to enterprise work procedures, OHS requirements and with due consideration of the environmental implications.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| ELEMENT                               | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                       | <p>2.3. Samples for off-site testing are collected and prepared, packaged, accurately labelled and dispatched according to testing agency requirements and enterprise work procedures.</p> <p>2.4. The physical and chemical characteristics of the soil are determined according to investigative requirements and best practice guidelines.</p> <p>2.5. Sampling and testing tools and equipment are cleaned of all residues and returned to storage according to manufacturer's specifications and enterprise work procedures.</p> <p>2.6. Results are recorded in an established format according to enterprise work procedures.</p>                           |
| 3. Interpret results of soil analysis | <p>3.1. The soil types of the sample area are classified according to standards for soil classification.</p> <p>3.2. The acceptable soil physical and chemical parameters for a specified plant are determined from published data and historical records.</p> <p>3.3. Collected analytical results are compared with acceptable physical and chemical parameters for a specified plant.</p> <p>3.4. Soil characteristics are evaluated to determine whether they can be altered to meet plant needs.</p> <p>3.5. The Readily Available Water (RAW) values for irrigation sites are determined according to industry standards and enterprise work procedures.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate with work team members, supervisors and contractors, interpret and apply soil surveying specifications, utilise proforma reporting, analysis and work procedure documents, and understand soil surveying data
- measure distance, depth and spacing, calculate area, volume and RAW values, calibrate tools and equipment, and interpret analytical results
- coordinate own activities with the requirements and schedules of contractors and

**REQUIRED SKILLS AND KNOWLEDGE**

other work teams to sequentially and effectively complete surveying activities in a timely and cost effective manner

- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- practical understanding of the range of sample collection, testing and analytical methods that may be used to perform soil surveys, and the association of surveying methods with site conditions, environmental implications and intended horticultural use of the surveyed site
- the physical and chemical properties of soils in relation to their ability to support specified horticultural production
- the capacity of soils to provide water to plants
- the importance of organic matter in soil in relation to the intended horticultural use
- awareness of ameliorants and soil improvement techniques for addressing site limitations identified through surveying
- awareness of the comparative environmental implications associated with soil surveying activities and the application of analytical results.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

| <b>EVIDENCE GUIDE</b>                                   |                                                                                                                                                                                                                                                                                                                                                                      |

| 1. Research information about soil                                          | <p>1.1. Soil type, characteristics and properties are researched and analysed for relevance to enterprise requirements.</p> <p>1.2. Particular soil properties, identified as relevant to the enterprise, are researched for further enquiry.</p> <p>1.3. Acceptable soil physical and chemical parameters for a specified crop are determined from published data and historical records.</p> <p>1.4. Relevant properties of soils and areas of homogenous soils are identified for testing.</p> <p>1.5. Soil sampling is conducted across a representative sampling area of the whole production area.</p> <p>1.6. Soil samples are collected, packaged, accurately labelled and dispatched according to testing agency requirements.</p> |
| 2. Apply information from soil testing to production and/or management plan | <p>2.1. Soil types of the sample area are classified according to standards for soil classification.</p> <p>2.2. Results from soil testing are compared with the identified soil physical and chemical parameters for the specified crop.</p> <p>2.3. Results from soil testing are compared with soil records and production history.</p> <p>2.4. The comparative results are reviewed and differences recorded and charted.</p> <p>2.5. Production or management plan is developed and testing results and comparative results are recorded.</p>                                                                                                                                                                                          |
| 3. Develop soil                                                             | 3.1. Soil properties capable of being ameliorated are                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| ELEMENT                                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| amendment practices                             | <p>identified for action.</p> <p>3.2. Relevant soil ameliorants or cultural practices are identified and included in production/management plan.</p> <p>3.3. Soil ameliorants are quantified and purchased.</p> <p>3.4. Soil ameliorating activities are costed and included in production/management plan.</p> |
| 4. Monitor soil amendment practices             | <p>4.1. Areas of ameliorant activities are sampled for testing across a representative sampling area.</p> <p>4.2. Results are analysed to measure the performance of soil amelioration activities.</p> <p>4.3. Monitoring program is recorded and included in the production/management plan.</p>               |
| 5. Review and document the soil management plan | <p>5.1. Analysis of the sampling methods is recorded and methods amended as required.</p> <p>5.2. Monitoring program is reviewed, amended for effectiveness and recorded.</p> <p>5.3. Production/management plan is documented incorporating reviews and reports.</p>                                           |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research information
- prepare production/management plans for crops/plants
- collect soil/media samples
- interpret results from laboratory tests
- record and store information
- review methods and practices
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views

**REQUIRED SKILLS AND KNOWLEDGE**

- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- soil types
- soil physical properties
- soil chemical properties
- plant nutrition through soil management
- soil conservation strategies and sustainable production techniques
- basic soil field tests
- soil sampling techniques
- interpreting laboratory results
- techniques to ameliorate soil properties
- record keeping.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- interpret soil analytical data for the purposes of developing management or production plans
- develop and conduct soil improvement programs
- review and analyse ongoing soil monitoring programs
- document the soil management plan or production plan.

**EVIDENCE GUIDE****Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Soils may include:

- all types of soils and growing media used for commercial production.

**Unit Sector(s)**

**Unit sector**

Soils and media

|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Unit descriptor</b> | This unit covers the process of monitoring the health and condition of high performance sports turf playing surfaces and defines the standard required to: inspect and report on the condition of turfed surfaces; assess turf health; perform soil sampling and analyse results; identify deficiencies and diseases in turf; prepare turf maintenance recommendations according to the playing requirements and desired objectives of the enterprise. |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Application of the Unit

|                                |                                                                                                                                                                                                                                                                                                                                                                                                       |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies to the application of extensive horticultural knowledge and a broad range of horticultural skills. Monitoring is normally done within routines, methods and procedures where some discretion and judgement is required in the selection of equipment and materials, organisation of work, services, actions, and the achievement of outcomes within time and budgetary constraints. |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| 1. Prepare for monitoring activities     | <p>1.1. The turf site to be monitored, nature and regularity of monitoring, and time constraints for delivering reports are identified according to enterprise work procedures.</p> <p>1.2. Plant tissue and soil analysis consultants are identified and their sampling specifications determined in consultation with the supervisor and/or consultants.</p> <p>1.3. Monitoring tools and equipment are selected according to enterprise work procedures.</p> <p>1.4. Pre-operational and safety checks are carried out on tools and equipment according to manufacturers specifications and enterprise work procedures.</p> <p>1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</p> <p>1.6. Suitable Personal Protective Equipment (PPE) is selected, used and maintained.</p> |
| 2. Collect soil and plant tissue samples | 2.1. Samples for off-site testing are collected from a representative area and prepared, packaged,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| ELEMENT                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                 | <p>accurately labelled and dispatched according to consultant's requirements and enterprise work procedures.</p> <p>2.2. On-site soil tests are performed according to testing instrument instructions, industry codes of practice and enterprise work procedures.</p> <p>2.3. Divots are replaced from soil sampling sites and waste materials disposed of according to enterprise work procedures.</p> <p>2.4. Sampling tools and equipment are cleaned of all residues and returned to storage according to manufacturers' specifications and enterprise work procedures.</p> <p>2.5. Results of analysis are recorded and compared with acceptable parameters according to researched and experiential awareness.</p> <p>2.6. Recommendations are written to address identified deficiencies and to meet target chemical balances according to researched and experiential awareness.</p> |
| 3. Visually monitor turf health | <p>3.1. Monitoring of turf health is undertaken according to OHS requirements.</p> <p>3.2. Health indicators of the turf are assessed visually with reference to researched and experiential awareness, site conditions, seasonal conditions, and according to enterprise work procedures.</p> <p>3.3. Deficiencies in turf quality and turf diseases are identified visually with reference to researched and experiential awareness, site conditions and seasonal conditions.</p> <p>3.4. Reports and recommendations are made to the supervisor according to the playing requirements and desired objectives of the enterprise.</p>                                                                                                                                                                                                                                                        |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**REQUIRED SKILLS AND KNOWLEDGE**

- communicate with work team members, supervisors and consultants
- utilise proforma reporting, analysis and work procedure documents
- assess turf health
- measure materials and interpret specifications and analytical results
- perform soil sampling and analyse results
- identify deficiencies and diseases in turf
- make reports and recommendations
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- botany and turf physiology
- practical understanding of soil and plant tissue analysis as a monitoring and turf management tool, the main elements of analysis, and their significance as indicators of nutritional deficiency and toxicity
- awareness of the role of trace elements and nutrients required by turf grass plants, and symptoms of toxicities and deficiencies
- turf grass diseases, including commonly occurring regional diseases, seasonality, history of site and visual disease symptoms
- main, simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, rates and cost
- rates and regularity of recommended fertiliser and pesticide application to achieve optimum plant health objectives, while minimising external environment impact through leaching, excessive spraying and overuse.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

| EVIDENCE GUIDE                                          |                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | <ul style="list-style-type: none"> <li>inspect and report on the condition of turfed surfaces</li> <li>assess turf health</li> <li>perform soil sampling and analyse results</li> <li>identify deficiencies and diseases in turf</li> <li>prepare turf maintenance recommendations according to the playing requirements and desired objectives of the enterprise.</li> </ul> |
| <b>Context of and specific resources for assessment</b> | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                    |

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                |
|-------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                |
| Monitoring turf health may include:                               | <ul style="list-style-type: none"> <li>multi-use and high performance sports turf playing surfaces.</li> </ul> |

### Application of the Unit

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Application of the unit</b> | This unit applies to the process of implementing renovation or remediation of a sports turf area for minor projects and seasonal renovations in the turf industry. Renovating sports turf requires the application of extensive horticultural knowledge and a broad range of horticultural skills. Turf renovation is normally done within routines, methods and procedures where some discretion and judgement is required in the selection of equipment and materials, organisation of work, services, actions, and the achievement of outcomes within time and budgetary constraints. |

## Elements and Performance Criteria

| ELEMENT                         | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1. Prepare to renovate turf     | <p>1.1. The turf renovation site and extent of works are identified according to the renovation program.</p> <p>1.2. Turf and renovation materials are selected according to enterprise work procedures.</p> <p>1.3. Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</p> <p>1.4. Suitable safety and Personal Protective Equipment (PPE) are selected, used and maintained.</p> |
| 2. Prepare renovation equipment | <p>2.1. Tools, equipment and machinery are selected appropriate to the renovation works program.</p> <p>2.2. Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise work procedures.</p> <p>2.3. Tools, equipment and machinery are calibrated and adjusted according to manufacturer's guidelines and enterprise work procedures.</p>                                      |

| ELEMENT                             | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3. Implement sports turf renovation | <p>3.1. Renovation works are identified from the renovation program and schedule and work tasks are implemented in a sequential, timely and effective manner in consultation with the supervisor.</p> <p>3.2. Renovation tasks are undertaken according to OHS requirements and with due consideration of the environmental implications.</p> <p>3.3. Renovation tasks are reviewed and remedial action is undertaken where necessary.</p> <p>3.4. A clean and safe work area is maintained throughout and on completion of work.</p> |
| 4. Complete renovation activities   | <p>4.1. Waste material is removed from the renovation site and disposed of in an environmentally aware and safe manner according to enterprise work procedures.</p> <p>4.2. Tools, equipment and machinery are cleaned, maintained and stored according to enterprise work procedures.</p> <p>4.3. Work outcomes are recorded and reported to the supervisor according to enterprise work procedures.</p>                                                                                                                             |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communicate with work team members, supervisors and contractors
- interpret and apply site plans and renovation program specifications
- operate specialised turf renovation equipment
- utilise proforma reporting, analysis and work procedure documents
- measure materials
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- detailed physical structure of a sports turf soil profile
- specialist turf renovation practices to achieve high performance turf

**REQUIRED SKILLS AND KNOWLEDGE**

- Field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness, and turf sward height
- enterprise and industry standards for turf surface appearance and quality
- comparative environmental implications of renovation activities, turf and soil treatments and waste disposal procedures
- planting, care and renovation scheduling requirements of grass species and cultivars.
- nutrition and plant growth regulators.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- implement a sports turf renovation program
- conduct a site hazard identification and risk control assessment
- prepare check and calibrate turf renovation machinery and equipment
- use turf renovation machinery and equipment to restore turf health and condition
- renovate a sports turf for successful high performance use
- record outcomes of renovation works.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                                                                                                 |
|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                                                                                 |
| Renovate turf materials may include:                              | <ul style="list-style-type: none"> <li>• cool or warm season turf seed</li> <li>• plants of the species and cultivar specified by the supervisor and/or the turf renovation program.</li> </ul> |

| 1. Determine additives required by performing soil and plant testing | <p>1.1. Soil and plant tests are determined according to the requirements of the turf plant species and cultivars, climatic conditions, prevailing soil and plant conditions, enterprise guidelines and industry best practice.</p> <p>1.2. A soil and plant testing program is developed which defines field and off-site testing activities, task responsibilities, involvement of contractors, scheduling, and desired information outcomes.</p> <p>1.3. Testing tasks are implemented and monitored, liaison procedures with outside testing agencies are supervised and remedial action is undertaken where necessary.</p> <p>1.4. Data and readings are compiled and presented in a form that can be easily read and interpreted.</p> <p>1.5. Seasonal issues are determined from published data on the turf plant species and cultivars, historical records, own experience, and enterprise guidelines.</p> <p>1.6. Nutritional status of the turf plant species and cultivars is determined by analysing collected data and comparing to accepted standards.</p> |
| 2. Identify the requirements of a sports turf maintenance program    | <p>2.1. The standards for turf presentation are clearly defined according to client requirements, enterprise guidelines and industry best practice.</p> <p>2.2. The different maintenance requirements during a range of conditions over the growing cycle of the turf plant are identified according to published data on the species and cultivar, historical records, own</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| ELEMENT                                                     | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                             | <p>experience, and enterprise guidelines.</p> <p>2.3. Sports turf maintenance procedures are selected to achieve the appropriate plant condition according to the standards for turf presentation.</p> <p>2.4. Resources, tools, equipment and machinery required for the sports turf maintenance program are identified, costed, and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>2.5. The most cost-effective approach to maintaining the sports turf playing surface is determined.</p> <p>2.6. Occupational Health and Safety (OHS) hazards associated with the implementation of the sports turf maintenance program are identified, risks assessed and controls developed according to enterprise guidelines, costed and documented in the program.</p> <p>2.7. Environmental implications of sports turf maintenance activities are identified and documented in the program.</p> |
| 3. Prepare and document the sports turf maintenance program | <p>3.1. Detailed plan, specifications and quotation are prepared based on the requirements of the program and presented to management for acceptance.</p> <p>3.2. Scaled site plan is produced which can be readily interpreted and understood by on-site personnel according to enterprise standards.</p> <p>3.3. Detailed on-site procedures and schedules required for the sports turf maintenance program are developed and documented.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 4. Monitor the sports turf maintenance program              | <p>4.1. Implementation of the maintenance program is monitored to ensure enterprise standards for presentation of sports turf playing surfaces are achieved.</p> <p>4.2. The sports turf maintenance program is reviewed and monitored to ensure it remains responsive to changing conditions.</p> <p>4.3. Appropriate courses of action are implemented to alleviate or overcome identified shortcomings in the program.</p> <p>4.4. Remedial action undertaken is documented and reported to management according to enterprise policy.</p>                                                                                                                                                                                                                                                                                                                                                                                    |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and evaluate information
- assess site factors and evaluate their impact on the development of the sports turf maintenance program
- comply with legislative requirements
- document plans, specifications and work procedures, and write reports for the understanding of staff, managers and contractors
- calculate the cost and spatial and logistical requirements of components of the sports turf maintenance program
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the principles and practices of maintaining a range of sports turf playing surfaces in relation to client needs, and the standards required for the intended use of the surface
- growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
- maintenance requirements and practices for specific turf plant species and cultivars after initial establishment
- site evaluation techniques including analysis of the condition of soils, plants, and the site for turf maintenance activities
- nutrients required by specific turf plant species and cultivars and the affects of nutrient deficiency and toxicity on individual plant species and cultivars, including visual symptoms
- plant diseases of specific turf plant species and cultivars
- the characteristics of soil and other growth media types, uses and additives to enhance the available nutrition for specific turf plant species and cultivars
- soil ameliorants commonly required to treat the soil problems experienced by the enterprise
- the main simple and compound fertiliser products available to the enterprise
  - legislation and regulations relating to sports turf sites and turf maintenance

**REQUIRED SKILLS AND KNOWLEDGE**

activities.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- use existing information and records to determine a comprehensive maintenance program
- prepare an seasonal/annual program according to the requirements of the enterprise and the grounds maintenance budget
- communicate a sports turf maintenance program to staff.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole.

Maintenance may include:

- soil and turf plant tissue testing
- applying nutrients

**RANGE STATEMENT**

| 1. Carry out preliminary planning activities for turf establishment | <ul style="list-style-type: none"><li>1.1. Client preferences and requirements for the sports turf playing surface are understood and confirmed.</li><li>1.2. The site is assessed for biophysical factors, services and site modifications.</li><li>1.3. Research is conducted into turf plant species and cultivars, legal attributes and local by-laws and restrictions that may affect the plan for turf establishment.</li><li>1.4. Environmental implications of the planned turf establishment works are identified and, if necessary, reported to relevant personnel for further research.</li><li>1.5. A concept plan that reflects client preferences and requirements, and takes into account site factors and any identified environmental requirements is developed and presented to the client for discussion and approval.</li></ul> |
| 2. Determine requirements of turf establishment works               | <ul style="list-style-type: none"><li>2.1. Plants that are appropriate to the site and consistent with the agreed concept plan are identified and the required quantity calculated, costed and availability confirmed with the supplier.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| ELEMENT                                                               | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                       | <p>2.2. Turf establishment procedures consistent with the agreed concept plan are selected according to the characteristics of available plant materials, site factors, the resources and equipment available and the environmental factors affecting the success of the turf establishment works.</p> <p>2.3. Design of the soil profile to support the playing surface takes into account the turf use, soil characteristics and other site and local environmental factors, and includes irrigation and drainage systems that accord with enterprise irrigation and drainage plans.</p> <p>2.4. Management of juvenile turf is provided for according to client requirements, site capabilities and enterprise standards and encourages optimal growth.</p> <p>2.5. Resources, tools, equipment and machinery required for the construction of soil profiles, planting and ongoing maintenance of the sports turf playing surface are identified, costed and availability confirmed with suppliers, contractors and appropriate personnel.</p> <p>2.6. Occupational Health and Safety (OHS) hazards associated with the turf establishment works are identified, risks assessed and controls developed according to industry standards, and are costed and documented in the plan.</p> <p>2.7. Staged implementation and development are outlined where appropriate, with access for future works provided for according to client, enterprise and site requirements.</p> <p>2.8. Timelines for preparations, construction of soil profiles, planting and maintenance are determined taking into account the needs of the turf species and cultivars, the softscape and hardscape components, site conditions and any other planning requirements.</p> |
| 3. Prepare and document the turf establishment plan and specification | <p>3.1. Designs of the soil profile and detailed plans of the scope of works, specifications and quotation are prepared based on horticultural conventions and the requirements of the turf establishment work and presented to the client for acceptance.</p> <p>3.2. Scaled site plan is produced which can be readily interpreted and understood by on-site personnel according to enterprise standards.</p> <p>3.3. Detailed on-site procedures and schedules required</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|         | for the establishment of the sports turf playing surface and its ongoing maintenance are developed and documented. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- research and evaluate information
- design plans and elevations of turf establishment works
- document the plan of scope of works and record all relevant information
- comply with legislative requirements
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- the principles and practices of establishing and maintaining a range of sports turf playing surfaces in relation to client needs, and the standards required for the intended use of the surface
- construction procedures, plant selection and cultural practices for sports turf playing surfaces
- legislation and regulations relating to sports turf sites and turf establishment works
- site evaluation techniques including analysis of the condition of soils, plants and the site for turf establishment activities
- irrigation, drainage and the interrelationship of soil air, water and the physical structure of existing and manufactured soils and sports turf mixes
- growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
- maintenance requirements and practices for specific turf plant species and cultivars

**REQUIRED SKILLS AND KNOWLEDGE**

- prior to and after initial establishment
- surveying principles and techniques
- the role of project briefs and client consultation processes in planning turf establishment works.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- develop or interpret construction documentation
- develop specifications and prepare a bill of quantities
- develop a schedule and a plan of the scope of works
- design sectional and elevation plans of the turf establishment works
- order and arrange for purchase and delivery of goods and services
- identify and incorporate sub-contracted works into the turf establishment plan
- prepare a maintenance program for turf establishment.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole.

Turf may include:

- all species and cultivars of turf.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- monitor physical signs of weather in the context of available information
- relate forecasts to impact on current operations and activities
- communicate information on weather and situations that may be impacted
- use literacy skills to follow sequenced written instructions and record information accurately and legibly
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification and seeking advice from supervisor
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- effects of wind and rain on wind chill
- effects of wind shear and wind chill exposure
- enterprise and industry policies for monitoring weather and climate conditions, and recording and reporting weather and climate conditions.
- weather and climate conditions impact upon farming and grazing activities
- working knowledge of climate and weather
- effects of wind chill on metabolism of animals
- effects of prolonged dry periods on pastures and animal production, and natural resources
- effects of extreme heat on animals, including during birthing, and effects of heat stress on neonates
- relevant legislative health and OHS requirements, especially as they relate to weather and climate monitoring and preparations for hazardous weather.

## Evidence Guide

| EVIDENCE GUIDE                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         | <p>3.3. Research on forecasting techniques is undertaken to maintain currency of information.</p> <p>3.4. Relevant information is documented and recorded according to enterprise requirements.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- relate forecasts to impact on current operations and activities
- relate weather and climate conditions and changes to decision-making and prevention of loss and damage
- monitor physical signs in the context of available information
- use literacy skills to read, interpret and follow organisational policies and procedures, follow sequenced written instructions, record accurately and legible information collected and select and apply procedures for a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning techniques, active listening, clarifying information and consulting with supervisors as required
- use numeracy skills to estimate, calculate and record routine workplace measures
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- working knowledge of climate and weather
- weather and climate conditions and its impact upon farming and grazing activities
- effects of wind and rain on wind chill
- relevant legislative health and Occupational Health and Safety (OHS) requirements especially as they relate to weather and climate monitoring and preparations for hazardous weather
- enterprise and industry policies for monitoring weather and climate conditions and recording and reporting weather and climate conditions
- if applicable, effects of shearing and/or parturition and wind chill exposure
- if applicable, effects of wind chill on metabolism of animals
- if applicable, effects of prolonged dry periods on pastures and animal production and natural resources.

## Evidence Guide

| <b>EVIDENCE GUIDE</b>                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Overview of assessment</b>                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>                                                                                                                    | <p>The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:</p> <ul style="list-style-type: none"> <li>• monitor and interpret weather and climate information</li> <li>• communicate warnings and concerns</li> <li>• identify resource requirements and dangers</li> <li>• minimise loss and damage to staff, livestock, crops, natural resources, property, and produce</li> <li>• implement alternative livestock or other programs and continue to monitor weather changes.</li> </ul> |
| <b>Context of and specific resources for assessment</b>                                                                                                                                                                | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Range Statement

| <b>RANGE STATEMENT</b>                                            |                                                                                                                                                        |
|-------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                                                        |
| Interpreting weather and climate conditions may include:          | <ul style="list-style-type: none"> <li>• all situations, techniques and sources of evidence for monitoring and assessing its likely impact.</li> </ul> |

| 1. Prepare for work site activities | <p>1.1. Requirements of the work are clarified with supervisor of the project.</p> <p>1.2. Personnel, equipment and material resource requirements are identified according to the scope of the project and supervisors instructions.</p> <p>1.3. The order of activities and time allocation is identified, documented and presented to the supervisor for verification.</p> <p>1.4. The environmental implications of the proposed work site activities are identified and the likely outcomes assessed and reported to the supervisor.</p> <p>1.5. Occupational Health and Safety (OHS) hazards are identified, risks assessed and risk controls are implemented.</p> <p>1.6. Personal Protective Equipment (PPE) is selected, used, maintained and stored according to the type of work site activities to be undertaken.</p> |
| 2. Organise resources               | <p>2.1. Materials are purchased and equipment/machinery is hired as authorised by the supervisor and according to enterprise guidelines.</p> <p>2.2. External agency permits are gained in the correct order as necessary.</p> <p>2.3. Neighbours and affected parties are notified of works to be undertaken as necessary.</p> <p>2.4. Delivery of materials and equipment/machinery to site is organised according to documented order of activities.</p> <p>2.5. Personnel are organised to be on site when they are</p>                                                                                                                                                                                                                                                                                                       |

| ELEMENT                                | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                        | required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 3. Coordinate and report on activities | <p>3.1. All resources are coordinated and timed to suit the scope of the project and order of activities.</p> <p>3.2. Personnel are directed in activities for each period of work.</p> <p>3.3. Personnel, activities, timelines and resource usage are monitored and documented according to enterprise guidelines.</p> <p>3.4. Contingency situations are recognised and reported to the supervisor, and corrective actions taken according to enterprise guidelines.</p> <p>3.5. A simple project report is written to inform management of work site activities undertaken and completed.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- read and interpret documentation associated with work site activities
- calculate material and resource requirements
- coordinate a team to achieve optimum performance
- communicate with personnel at all levels
- document results clearly and concisely
- perform an OHS risk assessment
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- environmental awareness associated with undertaking project works to ensure the impact on the environment is minimal
- work schedule programming
- hiring and subcontracting of labour
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for obtaining external agency permits as

**REQUIRED SKILLS AND KNOWLEDGE**

necessary

- the range, use and availability of materials, equipment and machinery that may be required for the project
- OHS issues, legislative requirements and Codes of Practice.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare and plan worksite activities
- identify and allocate resources required
- schedule activities and allocate tasks and responsibilities
- use communication and team supervision strategies
- monitor activities and record costs and production levels
- convey issues and suggested improvements to management.

**Context of and specific resources for assessment**

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

## Range Statement

| RANGE STATEMENT                                                   |                                                                                                                       |
|-------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| The range statement relates to the unit of competency as a whole. |                                                                                                                       |
| Work site activities may include:                                 | <ul style="list-style-type: none"><li>all materials, equipment and personnel used for small-scale projects.</li></ul> |

| 1. Establish quality specifications for product                                      | 1.1. Market specifications are sourced.<br>1.2. Legislated requirements are identified.                                                                                                                                                                                                                                                                                                      |
| 2. Identify hazards and critical control points in the production of quality product | 2.1. Critical control points impacting on quality are identified.<br>2.2. Degree of risk for each hazard is determined.                                                                                                                                                                                                                                                                      |
| 3. Assist in planning of quality assurance procedures                                | 3.1. Procedures for each identified control point are developed to ensure optimum quality.<br>3.2. Hazards and risks are minimised through application of appropriate controls.<br>3.3. Processes to monitor the effectiveness of quality assurance procedures are developed.                                                                                                                |
| 4. Implement quality assurance procedure                                             | 4.1. Responsibilities for carrying out procedures are allocated to staff and contractors.<br>4.2. Instructions are prepared in accordance with the enterprise the quality assurance program.<br>4.3. Staff and contractors are given induction training on the quality assurance policy.<br>4.4. Staff and contractors are given in-service training relevant to their allocated procedures. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- identify hazards and critical control points in the production of quality product
- assist in planning of quality assurance procedures
- provide induction and in-service staff training
- implement quality assurance procedures
- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- market requirements for product
- definition of quality
- quality specifications for product
- enterprise and industry quality assurance systems
- Hazard Analysis and Critical Control Points (HACCP) techniques
- strategies for control of hazards to quality
- work place training strategies
- delegation and empowerment
- contingency management.

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

| <b>EVIDENCE GUIDE</b>                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                     | <p>3.2. Assistance is sought from work group members when difficulties arise in achieving allocated tasks</p> <p>3.3. Discussion and information sharing is routinely used to communicate requirements of work activities through a participative approach.</p> <p>3.4. Disagreements and conflicts are managed constructively using appropriate conflict management strategies.</p>                                                                                                          |
| 4. Provide feedback | <p>4.1. Feedback is clear, constructive and provided promptly to individuals to support achievement of outcomes.</p> <p>4.2. Difficult situations are identified and negotiated to achieve results in line with organisational requirements.</p> <p>4.3. Team and individual performances are monitored regularly to ensure personnel are able to achieve goals.</p> <p>4.4. Supervisory structures and lines of reporting are maintained in accordance with organisational requirements.</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- assess and evaluate staff capability
- identify and provide training requirements
- plan timesheets and timetables to meet deadlines
- demonstrate safe workplace and environmentally responsible practices
- solve problems (staffing, resources)
- evaluate performance, provide feedback and prepare reports and performance appraisals
- promote and maintain effective relationships between staff
- monitor productivity and maintain staff records as required

**REQUIRED SKILLS AND KNOWLEDGE**

- use literacy skills to read, interpret and follow organisational policies and procedures, develop sequenced written instructions, record accurately and legibly information collected and select and apply procedures to a range of tasks
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record routine and more complex workplace measures and data
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

**Required knowledge**

- enterprise personnel processes
- enterprise organisational structure and responsibilities
- techniques for building trust and relationships
- principles of team work and negotiation
- leadership for the work team
- performance appraisal systems and procedures
- principles of time management
- conflict management techniques
- enterprise training requirements and processes
- relevant State/Territory legislation, regulations and Codes of Practice with regard to workplace OHS, environmental protection and employment
- OHS hazard identification, risk assessment and development of risk controls.

**Evidence Guide****EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include

| <b>EVIDENCE GUIDE</b>                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                         | <p>achievement of the following:</p> <ul style="list-style-type: none"> <li>• assess staff capability against position descriptions</li> <li>• designate and communicate staff roles and responsibilities, including line management</li> <li>• develop work plans to achieve organisational targets and business objectives</li> <li>• provide training and mentoring for staff</li> <li>• implement strategies to foster teamwork and trust</li> <li>• negotiate with staff as part of dealing with conflict</li> <li>• monitor team and individual work performance and provide feedback to staff.</li> </ul> |
| <b>Context of and specific resources for assessment</b> | Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Range Statement

| <b>RANGE STATEMENT</b>                                            |                                                                                                                                                                                 |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- determine quality assurance objectives for the enterprise
- plan the quality assurance program and develop implementation strategies
- implement the quality assurance program
- review the quality assurance program
- use literacy skills to fulfil job roles as required by the organisation. The level of skill may range from reading and understanding documentation to completion of written reports
- use oral communication skills/language competence to fulfil the job role as specified by the organisation including questioning, active listening, asking for clarification, negotiating solutions and responding to a range of views
- use numeracy skills to estimate, calculate and record complex workplace measures
- use interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

#### Required knowledge

- market projections and customer requirements
- cost/benefit of quality assurance implementation
- system analysis, HAACCP or related processes
- enterprise culture and values
- leadership and administrative skills
- human resources induction practices
- human resources performance monitoring practices.

## Evidence Guide

| <b>EVIDENCE GUIDE</b>                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to determine and analyse existing and required resources, their effective application and the accountability for their use.

### Application of the Unit

This unit applies to individuals with a broad knowledge of business resources who contribute well developed skills and knowledge to ensure adequate resources are available to perform the work of the organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

|                                                                   |                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Elements and Performance Criteria

| ELEMENT                                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Determine resource requirements      | <p>1.1. Determine <b>resource requirements</b> in accordance with business and operational plans, and <b>organisational requirements</b></p> <p>1.2. Provide opportunities to individuals and workgroups to contribute to the identification of resource requirements</p> <p>1.3. Ensure resource expenditure is realistic and makes efficient use of available budget resources</p> <p>1.4. Present recommendations on resource requirements in the required format, style and structure using relevant <b>business equipment and technology</b></p> |
| 2. Acquire and allocate resources       | <p>2.1. Acquire physical resources and services in accordance with organisational requirements</p> <p>2.2. Check resources to ensure quality and quantity, in line with service agreements</p> <p>2.3. Allocate resources promptly to enable achievement of workgroup objectives</p> <p>2.4. Ensure consultation with individuals and teams on allocation of resources is participative and is conducted using <b>appropriate interpersonal skills</b></p>                                                                                            |
| 3. Monitor and report on resource usage | <p>3.1. Measure effectiveness of resource planning, and assess against actual costs, identified shortfalls and surpluses</p> <p>3.2. Develop and implement methods of monitoring resource use to enable timely and accurate reporting against business and operational plans</p> <p>3.3. Identify improvements in resource planning through consultation and <b>feedback</b>, and implement in accordance with organisational requirements</p> <p>3.4. Maintain <b>records</b> concerning equipment and</p>                                           |

| ELEMENT | PERFORMANCE CRITERIA                                               |

|         | resource purchases, in accordance with organisational requirements |

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to request advice, to receive feedback and to work with a team
- literacy skills to draft complex reports and to display logical information on resource usage
- numeracy skills to interpret, compare and calculate resource usage costs
- planning skills to schedule and track resource use and availability.

### Required knowledge

- common equipment faults
- functions of a range of business equipment
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety (OHS)
- organisational policies, plans and procedures
- record management processes and techniques related to maintenance schedules.

## Evidence Guide

*The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

| <b>competency in this unit</b>                          | <ul style="list-style-type: none"> <li>• monitoring resource usage to determine resource needs</li> <li>• maintaining records of resource requirements</li> <li>• calculating costs and expenditures in relation to use and maintenance of business resources</li> <li>• knowledge of relevant legislation.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Context of and specific resources for assessment</b> | <p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of records relating to business resources.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Method of assessment</b>                             | <p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• review of recommendations on resource requirements</li> <li>• review of records concerning equipment and resource purchases</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• oral or written questioning to assess knowledge of functions of a range of business equipment.</li> </ul> |
| <b>Guidance information for assessment</b>              | <p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• other general administration units.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

|                                           |                                                                                                                           |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|

## Elements and Performance Criteria Pre-Content

|                                                                   |                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Elements and Performance Criteria

| ELEMENT                 | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Prepare for meetings | 1.1. Develop <b><i>agenda</i></b> in line with stated <b><i>meeting purpose</i></b><br>1.2. Ensure style and structure of meeting are appropriate to its purpose<br>1.3. Identify meeting participants and notify them in accordance with organisational procedures<br>1.4. Confirm <b><i>meeting arrangements</i></b> in accordance with requirements of meeting<br>1.5. Despatch <b><i>meeting papers</i></b> to participants within <b><i>designated time lines</i></b> |
| 2. Conduct meetings     | 2.1. Chair meetings in accordance with organisational requirements, agreed <b><i>conventions</i></b> for type of meeting and <b><i>legal and ethical requirements</i></b><br>2.2. Ensure meeting facilitation enables participation, discussion, problem-solving and <b><i>resolution</i></b> of issues<br>2.4. Brief minute taker on method for recording meeting                |

| ELEMENT               | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | notes in accordance with organisational requirements and conventions for type of meeting                                                                                                                                                                                                                                                                                                                                                            |
| 3. Follow up meetings | <p>3.1. Check transcribed meeting notes to ensure they reflect a true and accurate record of the meeting, and are formatted in accordance with organisational procedures and meeting conventions</p> <p>3.2. Distribute and <b>store minutes</b> and other follow-up documentation within designated time lines, and according to organisational requirements</p> <p>3.3. Report outcomes of meetings as required, within designated time lines</p> |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to:
  - participate in sustained complex interpersonal exchanges and to interact with others
  - listen to, incorporate and encourage feedback
  - conduct oral presentations to a group, to consult participants and to answer questions
  - manage and work with a group to construct an action plan
  - chair meetings
- literacy skills to:
  - categorise and organise information
  - assess information for relevance and accuracy
  - identify and elaborate on key agenda items and source additional information
- numeracy and time management skills to allow for sufficient meeting preparation
- problem-solving skills to choose appropriate solutions from available options.

#### Required knowledge

- culturally appropriate techniques to communicate with people from diverse backgrounds and people with diverse abilities
- key provisions of relevant legislation from all forms of government, standards and codes that may affect aspects of business operations, such as:

**REQUIRED SKILLS AND KNOWLEDGE**

- anti-discrimination legislation
- ethical principles
- codes of practice
- privacy laws
- copyright
- occupational health and safety
- formats for minutes and agendas
- group dynamics
- meeting terminology, structures, arrangements and responsibilities of chairperson
- organisational procedures and policies regarding meetings, chairing and minutes.

**Evidence Guide****EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment****Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- applying conventions and procedures for formal and informal meetings
- chairing meetings in relation to agreed agendas.

**Context of and specific resources for assessment**

Assessment must ensure:

- access to reference material in regard to meeting venues, catering, transport suppliers
- access to names and contacts for meeting participants
- access to office supplies and equipment
- access to computers and relevant software.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- demonstration of techniques
- direct questioning combined with review of portfolios of evidence and third party workplace

| EVIDENCE GUIDE                             |                                                                                                                                                                                                                                                  |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                            | reports of on-the-job performance by the candidate <ul style="list-style-type: none"> <li>• review of minutes, agendas and other communication</li> <li>• review of testimony from team members, colleagues, supervisors or managers.</li> </ul> |
| <b>Guidance information for assessment</b> | Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: <ul style="list-style-type: none"> <li>• other general administration units.</li> </ul>                                |

## Range Statement

| RANGE STATEMENT                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p> |                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b><i>Agendas</i></b> may include:                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <ul style="list-style-type: none"> <li>• correspondence</li> <li>• date, time and location of meeting</li> <li>• date of next meeting</li> <li>• general business</li> <li>• major agenda items</li> <li>• matters or business arising from the minutes</li> <li>• minutes of the previous meeting</li> <li>• reports</li> <li>• statement of the meeting's purpose</li> <li>• welcome</li> </ul> |

## Elements and Performance Criteria Pre-Content

|                                                                   |                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Elements and Performance Criteria

| ELEMENT                                        | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Identify workplace communication procedures | 1.1. Identify organisational communication requirements and <b><i>workplace procedures</i></b> with assistance from <b><i>appropriate people</i></b><br>1.2. Identify appropriate <b><i>lines of communication</i></b> with supervisors and colleagues<br>1.3. Seek advice on the <b><i>communication method/equipment</i></b> most appropriate for the task                                                              |
| 2. Communicate in the workplace                | 2.1. Use effective questioning, and active listening and speaking skills to gather and convey information<br>2.2. Use appropriate non-verbal behaviour at all times<br>2.3. Encourage, acknowledge and act upon constructive feedback                                                                                                                                                                                     |
| 3. Draft written information                   | 3.1. Identify relevant procedures and formats for written information<br>3.2. Draft and present assigned <b><i>written information</i></b> for approval, ensuring it is written clearly, concisely and within designated timeframes<br>3.3. Ensure written information meets required <b><i>standards</i></b> of style, format and detail<br>3.4. Seek assistance and/or feedback to aid communication skills development |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

- communication skills to identify lines of communication, to request advice, to effectively question, to follow instructions, to receive feedback, and to convey messages clearly and concisely
- culturally appropriate communication skills to relate to people from diverse backgrounds and to people with diverse abilities
- literacy skills to identify work requirements, to draft written information and to process basic, relevant workplace documentation
- problem-solving skills to solve routine problems related to the workplace, under direct supervision.

#### Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as privacy laws
- organisational policies, plans and procedures.

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- clear, concise and correct verbal and written communication
- promptly and appropriately following instructions
- knowledge of relevant legislation.

#### Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- access to examples of documents relating to

| EVIDENCE GUIDE                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                            | workplace communication policies and procedures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Method of assessment</b>                | <p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of organisational policies, plans and procedures</li> <li>• review of written information.</li> </ul> |
| <b>Guidance information for assessment</b> | <p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> <li>• general administration units.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Range Statement

| RANGE STATEMENT                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                               |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p> |                                                                                                                                                                                                                                                                                                               |

| Release 1 | <p>This version first released with <i>BSB07 Business Training Package version 6.0</i>.</p> <p>Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBCUS201A Deliver a service to customers</p> |

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to deliver all aspects of customer service at an introductory level. It includes creating a relationship with customers, identifying their needs, delivering services or products and processing customer feedback.

### Application of the Unit

This unit applies to individuals who perform a range of routine tasks in the workplace using a limited range of practical skills and fundamental knowledge of customer service in a defined context under direct supervision or with limited individual responsibility.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

| Element                                                                  | Performance Criteria                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes of a unit of competency.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i> |

## Elements and Performance Criteria

|                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | 4. Process customer feedback | <p>4.1 Promptly recognise <b>customer feedback</b> and handle sensitively according to organisational requirements</p> <p>4.2 Accurately record any feedback and communication between customers and the organisation according to organisational standards, policies and procedures</p> <p>4.3 Identify any unmet customer needs and discuss suitability of other products/services</p> <p>4.4 Support customers to make contact with other services according to organisational policies and procedures</p> |

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to convey meaning clearly, concisely and coherently
- literacy skills to communicate with customers and to develop required product knowledge
- numeracy skills to interpret customer requirements and to meet customer needs
- problem-solving skills to deal with customer enquiries or complaints
- self-management skills to:
  - comply with policies and procedures
  - seek learning and development opportunities.

### Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies and procedures relating to customer service and the customer service process.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

|-----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Overview of assessment</b>                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b> | <p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> <li>• demonstrating all stages of customer service interactions</li> <li>• responding to customer feedback</li> <li>• demonstrating a range of interpersonal skills</li> <li>• knowledge of relevant legislation.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Context of and specific resources for assessment</b>                                             | <p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to an actual workplace or simulated environment</li> <li>• access to office equipment and resources</li> <li>• examples of customer complaints and policies relating to customer service.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Method of assessment</b>                                                                         | <p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate</li> <li>• analysis of responses to case studies and scenarios</li> <li>• demonstration of techniques</li> <li>• observation of presentations</li> <li>• oral or written questioning to assess knowledge of customer service and communication techniques</li> <li>• review of information provided to customers about problems and delays, and customer follow-up</li> <li>• review of documentation recording feedback and communication between customers and the organisation.</li> </ul> |
| <b>Guidance information for assessment</b>                                                          | <p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Customers</b> may include:                   | <ul style="list-style-type: none"> <li>• contacts from other organisations</li> <li>• external customers</li> <li>• internal customers</li> <li>• members of the public</li> <li>• patients</li> <li>• service users.</li> </ul>                                                                                                                                                                                                                                         |
| <b>Organisational requirements</b> may include: | <ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• anti-discrimination and related policy</li> <li>• following OHS procedures for dealing with customers</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• quality and continuous improvement processes and standards</li> <li>• quality assurance and/or procedures manual.</li> </ul>                                                    |
| <b>Interpersonal skills</b> may include:        | <ul style="list-style-type: none"> <li>• listening actively to what the customer is communicating</li> <li>• providing an opportunity for the customer to confirm their request</li> <li>• questioning to clarify and confirm customer needs</li> <li>• seeking feedback from the customer to confirm understanding of needs</li> <li>• summarising and paraphrasing to check understanding of customer's message</li> <li>• using appropriate body language.</li> </ul> |
| <b>Designated persons</b> may include:          | <ul style="list-style-type: none"> <li>• manager, supervisor or team leader</li> <li>• more experienced personnel with specific knowledge or information</li> <li>• staff from other work areas with particular product or service knowledge.</li> </ul>                                                                                                                                                                                                                 |
| <b>Opportunities</b> may include:               | <ul style="list-style-type: none"> <li>• advice about warranties, guarantees or support services</li> <li>• packaging options</li> <li>• pricing options</li> <li>• procedures for delivery of goods or service</li> <li>• provision of product knowledge</li> <li>• systems for recording complaints.</li> </ul>                                                                                                                                                        |

|                                        |                                                                                                                                                                                                                |

| Release 1 | <p>This version first released with <i>BSB07 Business Training Package version 6.0</i></p> <p>Revised unit. Performance criteria amended so that the learner is not required to ‘incorporate evidence of customer satisfaction in decision to modify products or services’.</p> <p>Required skills updated to focus on learning and development practices and compliance with policy and procedures.</p> <p>Replaces BSBCUS301A Deliver and monitor a service to customers</p> |

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify customer needs and monitor service provided to customers. Operators may exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over either a short or long term interaction.

### Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

| Element                                                                  | Performance Criteria                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Elements describe the essential outcomes of a unit of competency.</i> | <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i> |

## Elements and Performance Criteria

|                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
