Assessment Requirements for RIICSG404D

Apply the principles of civil masonry, crib and gabion structure construction

Release: 2

Assessment Requirements for RIICSG404D Apply the principles of civil masonry, crib and gabion structure construction

Modification History

Release	Comment
1	This unit replaces RIICSG404A Apply the principles of civil masonry, crib and gabion structure construction
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant legislation, documentation, policies and procedures
- implements appropriate procedures and techniques for the safe, effective and efficient supervision of civil masonry, crib and gabion structure construction tasks including:
 - calculate quantities for the execution of tasks, including:
 - volumes
 - tonnage required
 - grades
 - percentages
 - areas
 - resource consumption figures, including required supply rates
 - interpret civil masonry, crib and gabion structure construction materials properties and test results
- works effectively with others to plan, prepare and conduct civil masonry, crib and gabion structure construction tasks including:
 - provides clear and timely instruction and supervision using a range of communication techniques to those involved in civil masonry, crib and gabion structure construction tasks including:
 - prepares for and conducts briefings, toolbox and site meeting
 - maintains clear and legible written records and the reporting systems including:

- preparing and presenting job reports
- preparing and maintaining of log books and diaries
- demonstrates completion of the principles of civil masonry, crib and gabion structure construction that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - provides evidence of the consistent successful supervision of masonry, crib and gabion structures construction tasks including:
 - interpreting project contract specification requirements
 - applying procedures to problem solve
 - making decisions for activity
 - carrying out continuous improvement in meeting task outcomes

Knowledge Evidence

The candidate must demonstrate knowledge in applying the principles of civil masonry, crib and gabion structure construction through:

- organisational, client and site operational requirements
- relationship between various areas of civil works
- team leadership techniques
- works planning techniques
- civil masonry, crib and gabion structure construction monitoring methods
- engineering survey principles
- materials quality and delivery requirements and procedures
- applying mentoring techniques
- estimating principles
- civil works construction sequencing
- civil masonry, crib and gabion structure construction and related activities' terminology
- set out requirements and procedures
- drainage requirements
- works planning techniques
- monitoring methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,

- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
