RIICWD531D Prepare detailed design of subsurface drainage

Release: 2

RIICWD531D Prepare detailed design of subsurface drainage

Modification History

Release	Comment
1	This unit replaces RIICWD531A Prepare detailed design of subsurface drainage
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to prepare detailed design of subsurface drainage in Civil construction.

This unit is appropriate for those working in management or technical specialist roles.

No licensing or certification requirements apply to this unit at the time of publication.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for the detailed design of subsurface drainage	1.1 Access, interpret and apply detailed design of subsurface drainage documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and confirm the subsurface drainage project requirements and information 1.4 Prepare a design plan which makes best use of the available resources
2. Undertake the detailed design of subsurface drainage	2.1 Interpret and analyse data and identify viable options 2.2 Interpret and analyse data and recommend the preferred option 2.3 Complete the detailed design of the subsurface drainage 2.4 Prepare a cost estimate for execution of the design 2.5 Participate in the review of design with peers and stakeholders

	2.6 Complete required documentation 2.7 Monitor and coordinate the progress of other team members involved in the design process 2.8 Gain design approval
3. Finalise design processes of subsurface drainage	3.1 Ensure filing of design records is completed 3.2 Complete and submit design cost and other reporting 3.3 Participate in performance review of the design process 3.4 Seek client feedback and contribute to the verification of the design 3.5 Close out all systems
4. Support and review the application of the design of subsurface drainage	4.1 Provide clarification and advice to those applying the design 4.2 Review the application of the design and recommend changes continuous improvement 4.3 Contribute to the validation of the design

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIICWD531A Prepare detailed design of subsurface drainage
