Assessment Requirements for RIIERR203D Escape from hazardous situations unaided

Release: 3

Assessment Requirements for RIERR203D Escape from hazardous situations unaided

Modification History

Release	Comment
1	This unit replaces RIERR203B Escape from hazardous situation unaided
2	Removed repetition in Performance Evidence Removed irrelevant points from Knowledge Evidence
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of escaping from hazardous situations unaided including:
 - identifying alternative escape routes
 - interpreting and responding to adverse environmental conditions
 - identify and interpret alarms and indicators to determine type, cause and severity of emergency
 - identifying and complying with hygiene standards
 - identifying, addressing and reporting on risks
- works effectively with others to undertake and complete the escape from hazardous situations unaided that meets all the required outcomes including:
 - complying with written and verbal reporting requirements and procedures
 - communicating clearly and concisely with others to receive and clarify work instructions
 - communicating clearly and concisely with others to coordinate work activities

- demonstrates completion of the escape from hazardous situations unaided that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - inspecting, putting on and using self-rescuer and/or breathing apparatus
 - reading mine plans and navigating in mine
 - identifying and reporting on mine conditions
 - accessing, interpreting and applying data from monitoring systems and equipment
 - applying risk management processes and techniques
 - interpreting and responding to adverse environmental conditions
 - identifying alternative escape routes

Knowledge Evidence

The candidate must demonstrate knowledge in escaping from hazardous situations unaided through:

- types and causes of hazards and incidents in underground mines
- alarms and indicators of mine incidents
- accessing and interpreting relevant geological and survey data
- effects of hot and humid atmospheres
- location and distribution of caches
- trigger points to initiate emergency response to alarms
- barricades and barricading methods
- location and purpose of a place of safety
- guidance systems and markers
- site emergency plans
- implications of lack of visibility
- site communication systems
- escape routes and alternative escape routes
- types of adverse environmental conditions
- basic ventilation systems
- types and effects of mine gases
- travel speeds
- monitoring systems

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;

- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
