

# Assessment Requirements for RIISAM207D Apply operational maintenance skills

Release: 3

# Assessment Requirements for RIISAM207D Apply operational maintenance skills

### **Modification History**

Release	Comment	
1	This unit replaces RIISAM207A Apply operational maintenance skills.	
2	Performance Criteria distribution and wording amended.	
3	Required frequency and volume of evidence amended in Performance evidence.  Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.	

#### **Performance Evidence**

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of applying operational maintenance skills including:
  - operational safety
  - manufacturer's and site technical information
  - matching tools with work needs
  - site isolation procedures
  - diagnosing and responding to faults
  - reporting
  - environmental requirements
- demonstrates completion of applying operational maintenance skills that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - identifying, rectifying and/or reporting faults in:
    - · mechanical systems
    - · electrical systems
  - identifying and using fasteners
  - completing housekeeping

Approved Page 2 of 4

- inspect and prepare tools for use
- identify components of mechanical systems and electrical circuitry

## **Knowledge Evidence**

The candidate must demonstrate knowledge of the following when applying operational maintenance:

- identifying types, characteristics, uses and limitations of hand tools
- · identifying types, characteristics, uses and limitations of measuring devices
- complying with hand tool maintenance, care and storage procedures
- identifying types, characteristics, uses and limitations of power tools
- complying with power tool maintenance, care and storage procedures
- identify the functions of major components of common:
  - mechanical systems
  - electrical systems
  - · hydraulic systems
  - pneumatic systems
  - lubrication systems
- applying basic diagnostic processes/techniques
- identifying types, uses, grades and limitations of fasteners
- identifying and applying environmental constraints and requirements related to operational maintenance
- identifying types and uses of oils, greases, hydraulic fluids, brake fluid and other commonly used servicing materials

#### **Assessment Conditions**

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may
  occur in a simulated environment provided it is realistic and sufficiently rigorous to cover
  all aspects of this sector's workplace performance, including environment, task skills, task
  management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using
  policies, procedures, processes and operational manuals directly related to the industry
  sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as
  outlined in this Unit of Competency, and through the minimum years of current\* work
  experience specified below in an Industry sector relevant to the outcomes of the unit; or,

Approved Page 3 of 4

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil	1	1 Year
Construction	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

<sup>\*</sup>Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.
