Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• literacy skills to read and understand organisation's recordkeeping and information systems(including classification systems), to follow sequenced written instructions and to comprehend/interpret nature of record content • numeracy skills to sequence and index files • planning skills to organise work priorities and arrangements • problem-solving skills to solve routine problems • technology skills to select and use technology appropriate to maintaining workplace information.
Required knowledge

• key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  • anti-discrimination legislation
  • ethical principles
  • codes of practice
  • privacy laws
  • occupational health and safety
• organisational policies and procedures relating to collecting and processing workplace information
• organisational recordkeeping/filing systems and security procedures
• organisation's business and structure
• range of filing systems including paper-based and software-based.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applying organisational policies and procedures for collecting and processing workplace information • accuracy in recording and documenting information • correctly storing, classifying and maintaining documents and records.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of workplace information systems.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of maintenance of information and filing systems • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of the management of information in the workplace.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • general administration units • other information management units.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
regional contexts) may also be included.	
Information may include:	• computer databases (library catalogue, customer records) • computer files (letters, memos and other documents) • correspondence (faxes, memos, letters, email) • forms (insurance forms, membership forms) • invoices (from suppliers, to debtors) • minutes of meetings • personnel records (personal details, salary rates) • sales records (monthly forecasts, targets achieved)
Business equipment/technology may include:	• answering machine • binder • computer • fax machine • filing systems (manual/computerised/electronic) • photocopier • printer • telephone
Organisational requirements may include:	• despatching and collecting procedures • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • procedures for deciding which records should be captured and filed • procedures for updating records • security procedures
Removing inactive or dead files may include:	• compressing computer files prior to archiving • periodically archiving or deleting files • transferring files at regular intervals or routinely checking for dead or inactive files • transferring records from the active filing system to secondary storage
Relocating inactive or dead files may include:	• electronic (email, internet access, diskette, tape, CD-ROM) • microfilm • photographic material

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collect and assess information	1.1. Access product and service ***information*** in accordance with ***organisational requirements*** 1.2. Ensure ***methods of collecting information*** are reliable and make efficient use of available time and resources 1.3. Assess information for clarity, accuracy, currency and relevance to intended tasks 1.4. Use ***interpersonal skills*** to access relevant information from teams and individuals
2. Organise information	2.1. Organise information in a ***format*** suitable for analysis, interpretation and dissemination in accordance with organisational requirements 2.2. Use appropriate ***technology***/***systems*** to maintain information in accordance with organisational requirements 2.3. Collate information and materials, and communicate to relevant ***designated persons*** 2.4. Identify difficulties organising and accessing information and solve collaboratively with individuals and team members 2.5. Update and store information in accordance with organisational requirements and systems
3. Review information	3.1. Actively seek ***feedback*** on clarity, accuracy and

ELEMENT	PERFORMANCE CRITERIA
needs	sufficiency of information to ensure relevance of information and system 3.2. Review the contribution of information to decision making and implement appropriate modifications to collection processes 3.3. Identify future information needs and incorporate in modifications to collection processes 3.4. Document future information needs and incorporate in modifications to reporting processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to classify and report information
- literacy skills to read and understand a variety of texts; and to write, edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- problem-solving skills to deal with information which is contradictory, ambiguous, inconsistent or inadequate
- technology skills to display information in a format suitable to the target audience.

Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- methods for checking validity of information and its sources
- organisational recordkeeping/filing systems, security procedures and safe recording practices
- policies and procedures relating to distribution of workplace information, and legal and ethical obligations.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	• computer databases (e.g. library catalogue, customer records) • computer files (e.g. letters, memos and other documents) • correspondence (e.g. faxes, memos, letters, email) • financial figures • forms (e.g. insurance forms, membership forms) • invoices (e.g. from suppliers, to debtors) • personnel records (e.g. personal details, salary rates) • production targets • sales records (e.g. monthly forecasts, targets achieved)
Organisational requirements may include:	• code of conduct/code of ethics • information protocols • legal and organisational policies, guidelines and requirements • management and accountability channels • OHS policies, procedures and programs • procedures for updating records • quality assurance and/or procedures manuals • security and confidentiality requirements
Methods of collecting information may include:	• checking research provided by others • checking written material including referrals and client files • classification tools • individual research • information from other organisations • interviews with colleagues/customers

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• observation and listening • previous file records • questioning (in person or indirect) • recruitment applications and other forms
Interpersonal skills may include:	• consultation methods, techniques and protocols • networking • seeking feedback from group members to confirm understanding • summarising and paraphrasing • using appropriate body language
Format may include:	• adding headers and footers • incorporating graphics and pictures • inserting symbols • using legends • using a particular software application • using tables and charts
Technology may include:	• answering machine • computer • email • fax machine • internet/extranet/intranet • photocopier • shredder • telephone
Systems may include:	• information management systems • knowledge management systems • record management systems
Designated persons may include:	• clients • colleagues • committee • external agencies • line management • statutory bodies • supervisor
Feedback may include:	• audit documentation and reports • comments from clients and colleagues • customer satisfaction questionnaires • quality assurance data • returned goods

BSBINM401A IMPLEMENT WORKPLACE INFORMATION SYSTEM

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to implement the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information, which plays a significant part in the organisation's effectiveness. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers play a significant role in contributing to the organisation's effectiveness in identifying, acquiring, analysing and using appropriate information. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify and source information needs	1.1. Determine and locate ***information*** required by teams 1.2. Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to ***organisational policies***
2. Collect, analyse and report information	2.1. Collect information, which is adequate and relevant to the needs of teams, in a timely manner 2.2. Ensure information is in a format suitable for analysis, interpretation and dissemination 2.3. Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired
3. Implement information systems	3.1. Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes 3.2. Use ***technology*** available in the work area to manage information effectively

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.3. Submit recommendations for improving the information system to ***designated persons and/or groups***
4. Prepare for information system changes	4.1. Collect information about information system future needs in consultation with ***colleagues***, including those who have a specialist role in resource management 4.2. Ensure estimates of information system future needs reflect the organisation's ***business plans***, and customer and supplier requirements 4.3. Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes 4.4. Prepare team members to work with new technology and information system changes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to work with information, and to research and present information in ways that are appropriate to the work team
- technology skills to work with a range of information systems.

Required knowledge

- information management systems and technology that would be associated with the workplace such as:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • analysis of the information that is required for the effective functioning of the team's work together • knowledge of the range of information systems that are, or should be, available in the workplace • ability to recognise what information system changes and improvements will be required in the future.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • demonstration of techniques in working with information management systems • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of relevant technology • review of documentation analysing information trends and developments • written reports on future information system needs • review of preparation undertaken for team members to work with new technology and information system changes.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	• archived, filed and historical background data • continuous improvement and quality assurance data • data available internally or externally • data shared and retrieved in various forms such as in writing or verbally, electronically or manually • financial and contractual data • marketing and customer-related data • organisational performance data • planning and organisational documents • policies and procedures
Organisational policies may include:	• guidelines for decision making throughout the organisation that link the formulation of strategy with its implementation • sets of accepted actions approved by the organisation • Standard Operating Procedures
Technology may include:	• computerised systems and software such as databases, project management and word processing • telecommunications devices • any other technology used to carry out work roles and responsibilities
Designated persons and/or groups may include:	• groups designated in workplace policies and procedures • managers or supervisors with management roles and responsibilities concerning information systems • other stakeholders accessing the information system such as customers and service providers • other work groups or teams whose work will be affected by the system

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Colleagues may include:	• employees at the same level or more senior managers • occupational health and safety committee members and other specialists • people from a range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities • team members
Business plans may include:	• cash flow projections • long-term budgets/plans • operational plans • short-term budgets/plans • spreadsheet-based financial projections • targets or key performance indicators for production, productivity, wastage, sales, income and expenditure

BSBINM501A Manage an information or knowledge management system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to organise learning to use an information or knowledge management system and to manage the use of the system. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers who have responsibility for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes. The unit does not address the requirement to select the technical system (software or hardware), which is seen as the role of an information technology specialist, although in some smaller organisations this may be a part of the manager's role.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Organise learning to use information or knowledge management system	1.1. Identify learning needs of ***relevant personnel*** and ***stakeholders*** for input into, and use of, ***an information or knowledge management system*** 1.2. Identify and secure human, financial and physical resources required for ***learning activities*** to use an information or knowledge management system 1.3. Organise and facilitate learning activities 1.4. Promote and support use of the system throughout the organisation 1.5. Monitor and document effectiveness of learning activities
2. Manage use of information or knowledge management system	2.1. Ensure implementation of ***policies and procedures for the information or knowledge management system*** are monitored for compliance, effectiveness and efficiency 2.2. Address implementation issues and problems as they arise

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.3. Monitor integration and alignment with data and information systems 2.4. Collect information on achievement of ***performance measures*** 2.5. Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required
3. Review use of information or knowledge management system	3.1. Analyse effectiveness of system and report on strengths and limitations of the system 3.2. Review business and operational plan and determine how effectively the system is contributing to intended outcomes 3.3. Make recommendations for improvement to system, policy or work practices

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem-solving skills to ensure the system is working in accordance with organisational expectations and to deal with contingencies
- technology skills to work with and manage the use of the information or knowledge management system.

Required knowledge

- legislation, codes of practice and national standards, for example:
  - privacy and confidentiality legislation
  - freedom of information legislation
  - AS 5037:2005 Knowledge management - A guide
- organisational policies and procedures, for example:
  - records management
  - information management
  - customer service
  - commercial confidentiality
- organisational operations, and existing data and information systems.

EVIDENCE GUIDE	
assessment	industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Relevant personnel include:	• managers, leaders, supervisors and coordinators • owners • staff, team members and colleagues
Stakeholders include:	• clients and customers • employee representatives • funding bodies • industry, professional and trade associations • regulatory bodies and authorities • sponsors • tenderers, suppliers and contractors
Information or knowledge management is defined as:	• equipment, strategies, methods, activities and techniques used formally and informally by individuals and the organisation to identify, collect, organise, store, retrieve, analyse, share and draw on information and knowledge valuable to the work of the organisation
An information or knowledge management system:	• comprises policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders
Learning activities include:	• coaching and mentoring programs • help desks • information sessions, briefings, workshops and training programs • paper-based or electronic (including intranet)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	learning opportunities • use of expert workers such as coaches and mentors to help other personnel use the system
Policies and procedures for the information or knowledge management system cover:	• complying with legislative requirements (such as privacy, confidentiality and defamation requirements) and other policies and procedures • content guidelines • ensuring accuracy and relevance of knowledge input into the system • mechanisms, formats and styles of input to system, including appropriate alternative formats for people with a disability • permissions for input • removing out-of-date, inaccurate and content that is no longer relevant • selecting, maintaining and disposing of knowledge in the system • sharing knowledge in the system
Performance measures include:	• key performance indicators • other systems and measures to enable assessment of how, when, where and why outcomes are being achieved • performance objectives • performance standards (including codes of conduct) • qualitative or quantitative mechanisms to measure individual performance

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain information relevant to business issues	1.1. Review staff and customer feedback and business performance data 1.2. Identify, define and analyse business problems and issues 1.3. Identify information required to reach a decision on problems/issues 1.4. Source and gather reliable information 1.5. Test information for reliability and validity, and reject where contradictory or ambiguous 1.6. Utilise formal and informal networks to access corporate knowledge/memory not held in formal systems and review appropriately
2. Analyse information and knowledge	2.1. Ensure objectives for analyses are clear, relevant and consistent with the decisions required 2.2. Identify patterns and emerging trends correctly and interpret as to cause and effect 2.3. Utilise ***statistical analyses*** and interpretation where appropriate 2.4. Undertake ***sensitivity analysis*** on any proposed options 2.5. Ensure documentation reflects a logical approach to the evaluation of the evidence and conclusions drawn

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.6. Adjust ***management information systems*/*decision support systems*** to meet information processing objectives
3. Take decisions on business issues identified	3.1. Ensure sufficient valid and reliable information/evidence is available to support a decision 3.2. Utilise ***risk management*** plans to determine acceptable courses of action 3.3. Utilise appropriate ***quantitative methods*** to assist decision making 3.4. Consult specialists and other ***relevant groups and individuals*** 3.5. Ensure decisions taken are within the delegation/accountability of the group/individual responsible 3.6. Make decisions in accordance with organisational guidelines and procedures 3.7. Ensure decisions taken are consistent with organisational objectives, values and standards 3.8. Ensure decisions are taken in a timely manner
4. Disseminate information to the organisation	4.1. Ensure advice/information needs are documented and are specific to location, format and time line requirements 4.2. Document information and update databases regularly 4.3. Design and test systems to meet information requirements of decision makers 4.4. Ensure information is up-to-date, accurate, relevant and sufficient for the recipient 4.5. Develop ***communication plans*** and disseminate information 4.6. Adhere to confidentiality/privacy policies in the transmission/release of information/advice 4.7. Review and update communication plans regularly 4.8. Utilise ***technology*** which provides optimum efficiency and quality 4.9. Maintain ***corporate knowledge*** and ensure security

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• analytical skills to identify improvement opportunities in relation to the services/products delivered internally or concepts/ideas in area of expertise • communication and consultation skills to ensure all relevant groups and individuals are advised of what is occurring and are provided with an opportunity for input • quantitative and qualitative research skills to locate and review relevant data and information • technology skills to consider various software and hardware options for storing and accessing data and information.
Required knowledge
• new technologies and their suitability to knowledge and information management • risk management.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • documentation which tracks a particular problem/issue through information gathering and analysis, decision making and taking, and dissemination to relevant groups and individuals • development and utilisation of relevant information storage and retrieval systems, as well as accessing informal knowledge and information from informal networks within the organisation • knowledge of new technologies and their suitability to knowledge and information management.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • assessment of written reports on knowledge management and information management • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of information management systems • review of documentation identifying, defining and analysing business problems and issues • evaluation of communication plans • evaluation of the transmission/release of information/advice in terms of adhering to confidentiality/privacy policies.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Advanced Diploma of Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Statistical analyses may include:	• correlation calculations • long-term trend analyses • probability assessment • regulation analyses • short to medium-term trend analyses
Sensitivity analyses means:	• applying 'what if' scenarios to available

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	options
Management information systems means:	• formal systems for collecting, storing and synthesising information to be used in management decision making
Decision support systems are:	• management information systems which include some form of computer-based assistance to decision making (expert systems)
Risk management means:	• process of identification of potential negative events and the development of plans to mitigate or minimise the likelihood or consequences of the negative event if it occurs
Quantitative methods may include:	• dynamic programming • linear programming • queuing theory • simulation • transportation methodology
Relevant groups and individuals means:	• those personnel who have knowledge about the issue being dealt with and the expertise to assist the decision making process
Research may include:	• focus groups • group interviews • individual interviews • surveys
Communication plans means:	• structured program for the dissemination of information and the receipt of feedback information from individuals relevant to the process or activity
Technology may include:	• audio-visual media • internet • intranet • print media • radio • telephone • television
Corporate knowledge may include:	• copyright • intellectual property • technology

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to be an effective and pro active member of an innovative team. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies individuals who play a pro active role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. The team may 'make itself' or be constructed by others. It may have core members and members who participate at certain times or for particular purposes. It may be permanent or temporary, or come together at different times to work on specific projects. The team could consist of a team of contractors/freelancers, permanent staff, clients and service providers, or any combination of these groups. It may operate within an organisation or across several organisations - or simply across a group of individuals. The key focus of the unit is on what makes for an innovative team, what keeps it working well, how the structure of work can make a difference and what skills and knowledge are needed to maximise opportunities for innovation. Where a greater focus on team leadership is required this unit should be combined with units such as BSBLED401A Develop teams and individuals.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Create opportunities to maximise innovation within the team	1.1. Evaluate and reflect on ***what the team needs and wants to achieve*** 1.2. Check out ***information about current or potential team members' work*** in the context of developing a more innovative team 1.3. Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross-fertilising ideas 1.4. Acknowledge, respect and discuss the ***different ways that different people may contribute*** to building or

ELEMENT	PERFORMANCE CRITERIA
	enhancing the team
2. Organise and agree effective ways of working	2.1. Jointly establish ***ground rules*** for how the team will operate 2.2. Agree and communicate responsibilities in ways that encourage and reinforce ***team-based innovation*** 2.3. Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4. Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5. Establish personal reward and stimulation as an integral part of the team's way of working
3. Support and guide colleagues	3.1. Model ***behaviour that supports innovation*** 3.2. Seek ***external stimuli and ideas*** to feed into team activities 3.3. Pro-actively share information, knowledge and experiences with other team members 3.4. Challenge and test ideas within the team in a positive and collaborative way 3.5. Pro-actively discuss and explore ideas with other team members on an ongoing basis
4. Reflect on how the team is working	4.1. De-brief and reflect on activities and on opportunities for improvement and innovation 4.2. Gather and use feedback from within and outside the team to generate discussion and debate 4.3. Discuss the ***challenges of being innovative*** in a constructive and open way 4.4. Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5. Identify, promote and celebrate successes and examples of successful innovation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• communication skills to work collaboratively as part of a team, to provide guidance and support to others, and to participate in open and constructive discussions • creative thinking skills to generate, explore, test and challenge ideas • learning skills to stretch boundaries of own knowledge and skills • literacy skills to analyse a wide range of information from varied sources • planning and organisational skills to participate in the effective allocation of work in a team context • problem-solving skills to work constructively to overcome issues and challenges of both a practical and conceptual nature and to make ideas become realities • self-management skills to take a pro-active team role and to reflect on own performance in modelling and encouraging behaviour that supports innovation.
Required knowledge
• barriers to innovation that can occur within a team and broader barriers that sometimes hinder innovation • broad concepts of innovation including what innovation is, different types of innovation and the benefits of innovation • characteristics of teams that are more likely to be innovative and characteristics of broader environments that support and encourage innovation • different roles that people may play within a team, how this impacts on the way a team works and what it might achieve • group dynamics in a team.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • active participation in a team where the team takes a pro-active and considered approach to innovation and innovative practice • collaborative and open communication within the team • knowledge and understanding of the internal and external factors that contribute to a team becoming

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	and remaining innovative.
Context of and specific resources for assessment	Assessment must ensure: • demonstration of skills as part of a team.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • direct observation of team interactions • evaluation of reports by the candidate or the team (could be oral or written) discussing the ideas, challenges and opportunities associated with teams, and how they can be more innovative • evaluation of feedback from other people in the team about the candidate's communication approaches and abilities • oral or written questioning to assess knowledge of the characteristics of innovative teams, innovation concepts more broadly and they ways in which innovation can be encouraged • review of jointly established 'groundrules' for how the team will operate.
Guidance information for assessment	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
What the team needs and wants to achieve may relate to:	• addressing particular customer feedback • conceiving and implementing a particular

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	project • developing new services or products • generating ongoing ideas within the work unit • improving budgetary performance • improving or changing work conditions • new ideas that impact beyond the workplace (e.g. that have a broader social or community impact)
Information about current or potential team members' work may relate to:	• interests • lifestyle preferences • past jobs • technical strengths • work preferences • working styles
Different ways that different people may contribute may relate to individual strengths around:	• creating positive energy within the team • fundamental literacy strengths (e.g. particularly strong in visual literacy, written or spoken communication) • generating ideas • networks or spheres of influence • particular ways of thinking • powers of persuasion • problem-solving capacities • specific technical skills or knowledge
Ground rules may relate to:	• boundaries or lack of boundaries for team activities and ideas • confidentiality • copyright, moral rights or intellectual property • regularity of communication • key roles and responsibilities • time lines • ways of communicating
Team-based innovation may be encouraged through:	• accessing training and learning opportunities • enough but not too much guidance and structure • equitable sharing of workload • follow-through with ideas • supportive communication
Behaviour that supports innovation may include being:	• collaborative • equitable

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• fair • fun • hardworking • reflective • responsible • sympathetic
External stimuli and ideas might be from:	• Australia or overseas • colleagues outside of the team • family and friends • internet • journals • networks or technical experts • other organisations
Challenges of being innovative may relate to:	• budgetary or other resource constraints • competing priorities • organisational culture • problems with breaking old patterns of behaviour or thinking • time pressures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to create an environment that enables and supports the application of innovative practice. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self formed team of individuals. The work group could be permanent or temporary in nature. The unit focuses on the skills and knowledge required to develop and implement a holistic approach to the integration of innovation across all areas of work practice. It also acknowledges the importance of wider contextual evaluation for potential innovations to ensure their value and benefit.

Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Lead innovation by example	1.1. Make innovation an integral part of ***leadership and management activities*** 1.2. Demonstrate positive reception of ideas from others and provide constructive advice 1.3. Establish and maintain relationships based on mutual respect and trust 1.4. Take considered ***risks*** to open up opportunities for innovation 1.5. Regularly evaluate own approaches for consistency with the wider organisational or project context
2. Establish work practices that support innovation	2.1. Consult on and establish ***working conditions*** that reflect and encourage innovative practice 2.2. Introduce and maintain ***workplace procedures*** that foster innovation and allow for rigorous ***evaluation of innovative ideas*** 2.3. Facilitate and participate in ***collaborative work arrangements*** to foster innovation

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. Build and lead teams to work in ***ways that maximise opportunities for innovation***
3. Promote innovation	3.1. Acknowledge suggestions, improvements and innovations from all colleagues 3.2. Find appropriate ***ways of celebrating and promoting innovation*** 3.3. Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project 3.4. Promote and support the evaluation of innovative ideas within the wider organisational or project context
4. Create a physical environment which supports innovation	4.1. Evaluate the ***impact of the physical environment*** in relation to innovation 4.2. Collaborate with colleagues about ideas for enhancing the physical work environment before taking action 4.3. Consider potential for supporting innovation when selecting physical resources and equipment 4.4. Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships
5. Provide learning opportunities	5.1. Pro-actively share relevant information, knowledge and skills with colleagues 5.2. Provide or encourage ***formal and informal learning opportunities*** to help develop the skills needed for innovation 5.3. Create opportunities in which individuals can learn from the experience of others

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication, consultation and negotiation skills to model and lead, open and collaborative relationships

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• comprehension skills to interpret and develop information that may deal with complex ideas and relate to issues both within and outside a given workplace context • planning and organisational skills to implement wide-ranging practical processes and procedures that support innovation • problem-solving skills to assess and respond to challenges and risks around innovation at an operational management level • self-management and learning skills to evaluate and enhance personal effectiveness, and to promote a culture of ongoing learning and development.
Required knowledge
• benefits of providing coaching and learning opportunities in relation to innovation • concept of innovation, what it is and what it means for different people either working independently or within an organisation • context for innovation in the relevant workplace context including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects • different ways of rewarding performance • factors and tools that can motivate individuals to use creative thinking and apply innovative work practices • legislative framework that impacts on operations in the relevant workplace context • management principles and leadership styles, including the impact of different approaches on innovation • typical challenges and barriers to innovation within teams and organisations, and ways of overcoming these • ways in which workplace climate can affect individual attitudes and performance.

EVIDENCE GUIDE	
	evaluation processes • modelling of behaviour that supports innovative work practice • knowledge and understanding of the role of leaders and managers in encouraging innovation, and the issues and challenges associated with building and sustaining an innovative work environment.
Context of and specific resources for assessment	Assessment must ensure: • involvement of a team for which the candidate provides leadership and guidance.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of outcomes and processes from activities managed by the candidate, particularly in relation to how innovation and innovative practice was encouraged and supported • oral or written questioning to assess knowledge of ways that innovation can be fostered and the typical challenges and barriers to innovation.
Guidance information for assessment	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Leadership and management activities may include:	• people management practices • planning processes

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• regular management meetings • review processes
Risks may include:	• budgetary issues • challenging changes in relationships, work practices and general workplace climate • unforseen impacts of innovative ideas
Working conditions may include:	• family-friendly leave entitlements • flexible working hours • social leave • study leave • time provided for coming up with ideas
Workplace procedures may relate to:	• briefing processes • client relations • performance management • project management • staff meetings • training
Evaluation of innovative ideas may relate to:	• analysing consistency with overall goals, values or vision • assessing resource requirements and practicalities • assessing the potential to find 'champions' or supporters • evaluating the external factors that may impact on the idea • exploring the implications of ideas that may stretch or change existing ways of doing things
Collaborative work arrangements might be:	• cross section • vertical teams • within a section • working with supplier organisations or partner organisations
Ways that maximise opportunities for innovation may relate to:	• collaborating • collecting data • creative thinking • future scanning • getting feedback • making suggestions • networking
Ways of celebrating and	• congratulating the project team

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
promoting innovation may include:	• ensuring management acknowledgment • providing a newsletter story about the idea • using the idea to help foster other ideas • well-planned group incentive schemes
Impact of the physical environment may relate to:	• eating areas • extent to which design or style links with declared philosophies or objectives • external areas • general ambience of the work environment • location of different people • presence and ambience of relaxation areas • style of dÃ©cor • use of creative messages or images in the workplace • workspace design and dÃ©cor • workstation arrangements and opportunities for interaction
Formal and informal learning opportunities may include:	• coaching • conferences • formal training courses/programs • information seminars • job rotation • mentoring • online learning

BSBITS401B Maintain business technology

Modification History

Release	Comments
Release 1	This version first released with *BSB07 Business Training Package version 6.0.* Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures. Replaces BSBITS401A Maintain business technology

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain the effectiveness of business technology in the workplace. It includes maintaining existing technology and planning for future technology requirements.

Application of the Unit

This unit applies to individuals with a broad knowledge of business technology who contribute well developed skills in creating solutions to maintenance and upgrade issues with existing technology. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

	technologies

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain the operation and troubleshooting of technology in the work environment
- literacy skills to interpret and evaluate the purposes and objectives of various uses of technology; to display logical organisation of written information
- problem-solving skills to address routine and non-routine faults with hardware and software
- research and analytical skills to analyse and identify organisation's future technology requirements.

Required knowledge

- costs and benefits of technology maintenance strategies
- general features and capabilities of current industry accepted hardware and software products
- principles of environmental sustainable practice in implementing business technology
- importance of back-up and security procedures; maintenance and diagnostic procedures; licensing, installation and purchasing procedures
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety (OHS).

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • installing software and hardware • organising and accessing software, materials and consumables • maintaining technology security and maintenance systems • knowledge of costs and benefits of technology maintenance strategies.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • access to examples of technology maintenance and security procedures.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of general features and capabilities of current industry accepted hardware and software products.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other information and communications technology or general administration units.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Skills Insight

Organisational and system requirements may include:	• back-up procedures • Code of Conduct • ethical standards • legal and organisational policy/guidelines and requirements • maintenance of customised software • OHS policies, procedures and programs • quality assurance and/or procedures manuals • register of licenses • restore procedures • security and confidentiality procedures • software licence documentation • storage of information technology documentation • storage retrieval and type of product licenses • updating of virus protection systems.
Disk drive and peripherals maintenance may include:	• backing up files before major maintenance • checking hard drive for errors • cleaning dust from internal and external surfaces • creating more free space on the hard disk • defragmenting the hard disk • deleting unwanted files • reviewing programs • using up-to-date anti-virus programs.
Consumables may include:	• disks • magnetic tape and cassettes • print heads • print media • printer ribbons and cartridges.
Software may include:	• accounting applications • commercial software applications • database applications • internet/intranet/extranet related programs • organisation-specific software • presentation applications • spreadsheet applications • word processing applications.
Technology may include:	• client services • computers • data transfer devices • modems • peripherals, including:

© Commonwealth of Australia, 2025 Skills Insight

	• printers, scanners, tape cartridges • speakers, multimedia kits • personal computer, modems • input equipment such as mouse, touch pad, keyboard, pens • mobile phones, palmtops and personal digital assistants (PDAs), laptops and desktop computers • Bluetooth devices, universal serial bus (USB), Firewire (IEEE 1394) • photocopiers • printers • scanners • software.
Sources of information may include:	• computer hardware manufacturers • computer magazines and journals • computer software designers • industry associations • internal/external clients • internet • retail outlets • seminars, workshops and training sessions • trade fairs.
Improved technology systems may include:	• access protocols • cable data transmissions • delivery and installation systems • hardware upgrades • implementing a new system • maintenance options • multimedia • networking options • new hardware • new software • resource usage monitoring • software upgrades • environmentally sustainable design practices.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement procedures to send and receive electronic mail	1.1. Log in to ***software*** for sending and receiving email in accordance with ***organisational requirements*** 1.2. ***Check outgoing email for accuracy*** and ensure any required ***attachments*** are prepared, in accordance with organisational and service provider requirements 1.3. Identify urgent, confidential, personal, ***suspicious or potentially dangerous email*** and take appropriate actions 1.4. ***Deal with returned email*** in accordance with organisational policies and procedures
2. Manage electronic mail	2.1. Set security levels and/or filters for incoming email in accordance with organisational requirements 2.2. Create and maintain individual mailboxes in accordance with organisational requirements 2.3. ***Store email*** and/or attachments in accordance with organisational requirements 2.4. Empty inboxes and archive or permanently delete in accordance with organisational requirements 2.5. Prepare and maintain electronic ***mailing lists*** in accordance with organisational requirements
3. Collaborate online	3.1. Identify software to be used in collaboration 3.2. Ensure ***online collaboration*** is undertaken in

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	accordance with organisational policy, procedures and ***net etiquette*** (netiquette) 3.3. Respond to posts or communications in accordance with agreed parameters, organisational requirements and netiquette

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to request advice, to receive feedback and to work with a team • literacy skills to identify work requirements; to understand and process basic, relevant workplace information; and to draft simple correspondence • problem-solving skills to solve routine technology problems.
Required knowledge

• different methods of electronic communication
• key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  • anti-discrimination legislation
  • ethical principles
  • codes of practice
  • privacy laws
  • occupational health and safety.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • sending and receiving email for a range of purposes • attaching and removing documents to email • using software applications to collaborate online • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • access to software applications likely to be used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of electronic communication methods and tools • review of attachments prepared for email • review of electronic mailing lists • evaluation of postings and responses to online discussions.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • general administration units • other IT use units.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Software may include:	• mobile or wireless software applications:
	  • personal digital assistants (PDA)
	  • mobile phones
	  • text messaging (SMS/TXT)
	  • multimedia messaging (MMS)
	  • internet relay chat (IRC)
	• personal computer-based software applications:
	  • email applications
	  • web-based email services
	  • chat applications
	  • internet discussion groups/boards/chat rooms
	  • intranet discussion groups/boards/chat rooms

Organisational requirements may include:	• carbon copies or blind carbon copies • concise, relevant subject line • electronic signature • form of address • formality/informality of language, tone and structure • including original message in the reply • length of emails (i.e. short and to the point) • net ethics • net etiquette(netiquette) • requesting read receipt • sender's name and address
Checking outgoing email for accuracy may include checking:	• clarity of intended meaning • completeness • content • grammar • punctuation • recipient's address • spelling • structure
Attachments may include:	• PDFs

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• pictures • spreadsheets • word processed documents • any electronic file
Suspicious or potentially dangerous email may include:	• attachments • email where sender is unknown, and subject line is enticing and/or personal (e.g. urging the receiver to open immediately) • particular file extensions • spam (unsolicited commercial email or junk email) • unsolicited email containing viruses
Dealing with returned email may include:	• checking email address • checking size of attachment/s • re-sending • sending message by other means e.g. facsimile, post • telephoning addressee
Storing email may include:	• email application software • paper-based filing system • specialised recordkeeping, spreadsheet or database software
Mailing lists may include:	• database or spreadsheet records • electronic address books • word processing tables or data files
Online collaboration may include:	• chat rooms • email communications • instant messaging • intranet
Net etiquette may include:	• accepted (not mandated) rules for being a good net citizen (netizen) • adjust to the style and tone of discussion groups • be forgiving of other's mistakes • do not abuse your power • if you would not do it in real life do not do it in cyberspace • keep flames under control (flaming is making personal attacks on others) • look good online (spelling, grammar, and have

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and investigate online service provider	1.1. Undertake online research to identify ***suppliers*** of required ***products***/***services*** 1.2. Assess service provider ***confidentiality***, ***security*** and ***privacy*** facilities in accordance with individual and organisational requirements 1.3. Assess potential products/services for authenticity
2. Perform online transactions	2.1. Confirm organisational requirements for products/services to be obtained 2.2. Ensure authentication information is secured in accordance with organisational requirements 2.3. Use appropriate online functions to obtain required products/services 2.4. Report any difficulties in accessing or using online facilities to the service provider 2.5. Complete transaction and ensure that products/services are received in accordance with terms of online transaction
3. Maintain records of online transactions	3.1. Maintain records of transactions in accordance with organisational policy, procedures and level of authority 3.2. Compare organisational records with online records and deal with irregularities according to organisational policy and procedures

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
4. Review online transactions	4.1. Review obtained products/services rendered to determine quality, timeliness and level of customer service in relation to advertised profile 4.2. Make recommendations regarding continued or future use of online service provider, as supported by transaction history

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to negotiate with online service provider/s.
- literacy skills to read and analyse information for its relevance and sufficiency, and to follow policies and procedures
- numeracy skills to work with and evaluate monetary figures
- technology skills to operate computer and software appropriate to transaction being performed.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety
- policies and procedures relating to use of the internet and online purchasing
- service provider requirements
- legal and ethical requirements relating to a range of online transactions.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identification and selection of appropriate services to meet defined needs • use of appropriate security considerations • knowledge of policies and procedures relating to the use of the internet and online purchasing.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of legal and ethical requirements relating to a range of online transactions • review of recommendations made regarding continued or future use of online service provider.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other information and communications technology units.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Suppliers may include:	• banks or other financial institutions • e-auction • e-brokerage service • e-mail • e-procurement service • e-shop • third party marketplace
Products*/*services may include:	• financial services • goods • insurance • loans • shares

Confidentiality*, *security and privacy may include:	• access to independent reviews of financial services such as:
	  • Australian Competition and Consumer Commission (ACCC)
	  • Financial Planning Association of Australia (FPA)
	• authentication services
	• disclaimers
	• firewall protection
	• jurisdiction
	• level of encryption
	• limit of liability
	• personal identification number (PIN)
	• physical site security of web server
	• receipting
	• terms and conditions of website use
	• use of 'cookies' - small files automatically downloaded from a web server to the computer of someone browsing a website - information stored in cookies can be accessed any time computer returns to the site
	• user name and password
	• warranties

BSBITU306A Design and produce business documents

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and prepare resources	1.1. Select and use appropriate ***technology*** and ***software*** applications to produce required ***business documents*** 1.2. Select layout and style of publication according to information and ***organisational requirements*** 1.3. Ensure document design is consistent with company and/or client requirements, using basic design principles 1.4. Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1. Identify, open and generate files and records according to task and organisational requirements 2.2. Design document to ensure efficient entry of information and to maximise the presentation and appearance of information 2.3. Use a range of ***functions*** to ensure consistency of design and layout 2.4. Operate ***input devices*** within designated requirements
3. Produce document	3.1. Complete document production within designated time lines according to organisational requirements 3.2. Check document produced to ensure it meets task requirements for style and layout 3.3. Store document appropriately and save document to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	avoid loss of data 3.4. Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1. Proofread document for readability, accuracy and consistency in language, style and layout prior to final output 4.2. Make any modifications to document to meet requirements 4.3. ***Name*** and ***store*** document in accordance with organisational requirements and exit the application without data/loss damage 4.4. Print and present document according to requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- keyboarding and computer skills to complete a range of formatting and layout tasks
- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread documents to ensure clarity of meaning and conformity to organisational requirements
- numeracy skills to access and retrieve data
- problem-solving skills to determine document design and production processes.

Required knowledge

- appropriate technology for production requirements
- functions and features of contemporary computer applications
- organisational policies, plans and procedures
- organisational requirements for document design e.g. style guide.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • designing and producing a minimum of 3 completed business documents, using at least 2 software applications in the production of each document • using appropriate data storage options • knowledge of the functions and features of contemporary computer applications.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • access to examples of style guides and organisational procedures.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of final printed documents • demonstration of techniques • observation of presentations • oral or written questioning to assess knowledge of software applications.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • general administration units • other IT use units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Technology may include:	• computers • photocopiers • printers • scanners
Software may include:	• accounting packages • database packages • presentation packages • spreadsheet packages • word processing packages
Business documents may include:	• accounts statements • client databases • newsletters • project reviews • proposals • reports • web pages
Organisational requirements may include:	• budgets • correctly identifying and opening files • legal and organisational policies, guidelines and requirements • locating data • log-on procedures • manufacturers' guidelines • occupational health and safety policies, procedures and programs • quality assurance and/or procedures manuals • saving and closing files • security • storing data
Functions may include:	• alternating headers and footers • editing • merging documents

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• spell checking • table formatting • using columns • using styles
Input devices may include:	• keyboard • mouse • numerical key pad • scanner
Naming documents may include:	• appropriate file type • authorised access • file names according to organisational procedure e.g. numbers rather than names • file names which are easily identifiable in relation to the content • file/directory names which identify the operator, author, section, date etc. • filing locations • organisational policy for backing up files • organisational policy for filing hard copies of documents • security
Storing documents may include:	• storage in directories and sub-directories • storage on CD-ROMs, disk drives or back-up systems • storing/filing hard copies of computer generated documents • storing/filing hard copies of incoming and outgoing facsimiles • storing/filing incoming and outgoing correspondence

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use safe work practices	1.1. Adjust workspace, furniture and equipment to suit ***ergonomic requirements*** of the user 1.2. Ensure ***work organisation*** meets organisational and occupational health and safety (OHS) requirements for computer operation
2. Identify and develop keyboard skills	2.1. Identify and apply keyboard functions for both alpha or numeric keyboard functions 2.2. Apply ***touch typing technique*** to complete tasks 2.3. Develop ***speed and accuracy*** in accordance with workplace requirements for level of responsibility
3. Check accuracy	3.1. Proofread document carefully to identify errors 3.2. Amend document, ensure errors are corrected and complete a final accuracy check

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• keyboarding skills to enter text and numerical data • literacy skills to read, proofread and edit documents • numeracy skills to collate and present data, graphs and annotated references.
Required knowledge

• key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
  • privacy laws
  • copyright
  • OHS.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • producing word processed documents • typing with 98% accuracy assessed under test conditions in line with the current version of AS 2708:2001 Keyboarding speed tests • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to office equipment and resources • access to samples of word processed documents and organisational style guides • that it is in accordance with the current version of AS 2708:2001 Keyboarding speed tests, which specifies the test material, the equipment, the environment and how to conduct and score the test • that a speed statement be issued to individuals assessed as competent against the unit.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of outcomes of keyboarding speed tests • review of documents for accuracy • demonstration of techniques.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • word processing units • other units that include requirements to enter text or numerical data.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Ergonomic requirements may include:	• avoiding radiation from computer screens • chair height, seat and back adjustment • document holder • footrest • keyboard and mouse position • lighting • noise minimisation • posture • screen position • workstation height and layout
Work organisation may include:	• exercise breaks • mix of repetitive and other activities • rest periods • visual display unit (VDU) eye testing

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Touch typing technique may vary according to:	• level of competency of operator • workplace requirements
Speed and accuracy must be:	• consistent with degree of experience of operator • relevant to level of responsibility

ELEMENT	PERFORMANCE CRITERIA
	organisational and task requirements
4. Finalise desktop published document	4.1. Review text for possible errors and omissions, and resolve any issues 4.2. Check page order, structure and linkages 4.3. Produce completed document in required format 4.4. ***Name and store*** text documents, in accordance with organisational requirements and exit the application without information loss/damage 4.5. Prepare text documents within ***designated time lines*** and organisational requirements for speed and accuracy 4.6. Use manuals, user documentation and online help to overcome problems with document design and production

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to clarify requirements of documents
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- editing and proofreading skills to check own work for accuracy against original
- keyboarding skills to enter text and numerical data
- literacy skills to read and understand the organisation's procedures and to use models or exemplars to produce a range of documents
- problem-solving skills to edit documents and to resolve issues of consistency of design.

Required knowledge

- energy and resource conservation techniques
- organisational requirements for ergonomics, work periods and breaks
- organisational style guides
- purposes, uses and functions of desktop publishing software
- styles and their effect on formatting, readability and appearance of document.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine development needs	1.1. Systematically identify and implement ***learning and development needs*** in line with ***organisational requirements*** 1.2. Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and implemented 1.3. Encourage individuals to self-evaluate performance and identify areas for improvement 1.4. Collect ***feedback on performance*** of team members from relevant sources and compare with established team learning needs
2. Develop individuals and teams	2.1. Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry 2.2. Ensure that ***learning delivery methods*** are appropriate to the learning goals, the learning style of participants, and availability of ***equipment and resources*** 2.3. Provide workplace learning opportunities, and ***coaching and mentoring assistance*** to facilitate individual and team achievement of competencies 2.4. Create development opportunities that incorporates a

ELEMENT	PERFORMANCE CRITERIA
	range of activities and support materials appropriate to the achievement of identified competencies 2.5. Identify and approve resources and time lines required for learning activities in accordance with organisational requirements
3. Monitor and evaluate workplace learning	3.1. Use feedback from individuals or teams to identify and implement improvements in future learning arrangements 3.2. Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support 3.3. Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning 3.4. Document and maintain records and reports of competency according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to receive and report on feedback, to maintain effective relationships and to manage conflict
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- leadership skills to gain trust and confidence of clients and colleagues
- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- negotiation skills to achieve mutually acceptable outcomes
- technology skills to support effective communication and presentation.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• codes of practice • privacy laws • occupational health and safety (OHS) • facilitation techniques to encourage team development and improvement • organisational policies, plans and procedures • career paths and competency standards relevant to the industry.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifying and implementing learning opportunities for others • giving and receiving feedback from team members to encourage participation in and effectiveness of team • creating learning plans to match skill needs • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of learning and development plans, policies and procedures • examples of documents relating to diversity policies and procedures.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• oral or written questioning to assess knowledge of career paths and competency standards relevant to the industry • review of records and reports of competency.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • management units • other learning and development units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Learning and development needs may include:	• career planning/development • coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • performance appraisals • personal study • recognition of current competence/skills recognition • work experience/exchange/opportunities • workplace skills assessment
Organisational requirements may include:	• access and equity principles and practices • anti-discrimination and related policy • business and performance plans • confidentiality and security requirements • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals
Feedback on performance may include:	• formal/informal performance appraisals • obtaining feedback from clients • obtaining feedback from supervisors and colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery
Learning delivery methods may include:	• conference and seminar attendance • formal course participation • induction • involvement in professional networks • on-the-job coaching or mentoring • presentations/demonstrations • problem-solving • work experience
Equipment and resources may include:	• facilities • funding • guest speakers • technological tools and equipment • time • training equipment such as whiteboards and audio-visual equipment
Coaching and mentoring assistance may include:	• fair and ethical practice • non-discriminatory processes and activities • presenting and promoting a positive image of the collective group • problem-solving • providing encouragement • providing feedback to another team member • respecting the contribution of all participants and giving credit for achievements

BSBLED501A Develop a workplace learning environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to encourage and support the development of a learning environment in which work and learning come together. Particular emphasis is on the development of strategies to facilitate and promote learning, and to monitor and improve learning performance. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers. All managers have a prominent role in encouraging, supporting and facilitating the development of a learning environment in which work and learning come together. At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

Licensing/Regulatory Information

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Create learning opportunities	1.1. Identify potential formal and informal ***learning opportunities*** 1.2. Identify ***learning needs*** of individuals in relation to the needs of the team and/or enterprise, and available learning opportunities 1.3. Develop and implement ***learning plans*** as an integral part of individual and team performance plans 1.4. Develop strategies to ensure that learning plans reflect the ***diversity of needs*** 1.5. Ensure organisational procedures maximise individual and team access to, and participation in, learning opportunities 1.6. Ensure effective liaison occurs with ***training and development specialists*** and contributes to learning opportunities which enhance individual, team and organisational performance

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Facilitate and promote learning	2.1. Develop strategies to ensure that workplace learning opportunities are used and that team members are encouraged to share their skills and knowledge to ***encourage a learning culture*** within the team 2.2. Implement organisational procedures to ensure workplace learning opportunities contribute to the development of appropriate workplace knowledge, skills and attitudes 2.3. Implement policies and procedures to encourage team members to assess their own competencies, and to identify their own learning and development needs 2.4. Share the benefits of learning with others in the team and organisation 2.5. Recognise workplace achievement by timely and appropriate recognition, feedback and rewards
3. Monitor and improve learning effectiveness	3.1. Use strategies to ensure that team and individual learning performance is monitored to determine the type and extent of any additional work-based support required, and any occupational health and safety (OHS) issues 3.2. Use feedback from individuals and teams to identify and introduce improvements in future learning arrangements 3.3. Make adjustments, negotiated with training and development specialists, for improvements to the efficiency and effectiveness of learning 3.4. Use processes to ensure that records and reports of competency are documented and maintained within the organisation's systems and procedures to inform future planning

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to: • deal with people openly and fairly

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• encourage colleagues to share their knowledge and skills • gain the trust and confidence of colleagues • use consultation skills effectively • literacy skills to access and use workplace information • planning and organisational skills to facilitate, promote and monitor learning by: • developing learning plans • establishing a workplace which is conducive to learning • evaluating the effectiveness of learning • identifying learning needs • negotiating learning arrangements with training and development specialists • selecting and using work activities to create learning opportunities • using coaching and mentoring to support learning.
Required knowledge
• management of relationships to achieve a learning environment • principles and techniques involved in the management and organisation of: • adult learning • coaching and mentoring • consultation and communication • improvement strategies • leadership • learning environment and learning culture • monitoring and reviewing workplace learning • problem identification and resolution • record keeping and management methods • structured learning • work-based learning.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • methods for reviewing performance development needs and techniques for providing feedback on those needs • models for planning professional development • options available for professional development • knowledge of relationship management required to achieve a learning environment.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • oral or written questioning to assess knowledge of the principles and techniques involved in the management and organisation of adult learning • review of the development and implementation of learning plans • evaluation of how workplace achievement is recognised • review of processes used to record and report competency.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Management.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Learning opportunities may include:	• structured learning activities conducted outside and within the workplace such as:
	  • accredited training through an independent organisation such as a state/territory OHS authority
	  • action learning
	  • short courses
	  • training through a Registered Training Organisation (RTO) leading to a nationally recognised Australian Qualifications Framework (AQF) qualification or Statement of Attainment
	  • workshops
	• workplace learning activities, that may also contribute to a recognised credential, such as:
	  • coaching
	  • exchange/rotation
	  • induction
	  • mentoring
	  • shadowing

Learning needs may include:	• developmental learning, for example the learning required to progress through an organisation and take on new tasks and roles • gaps between the competencies held by the employee, and the skills and knowledge required to effectively undertake workplace tasks
Learning plans may include:	• codes of conduct • key performance indicators • negotiated agreement with individual/s • OHS requirements • performance standards • team competencies • team roles and responsibilities • work outputs and processes

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Diversity of needs may include:	• learning needs that relate to social, cultural and other types of workplace diversity, such as the need for varied communication styles and approaches
Training and development specialists may be:	• internal • external
Encourage a learning culture may refer to:	• encouraging learning and sharing skills and knowledge across the work team and the wider organisation to develop competencies of individual team members and the team as a whole

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to work with teams and individuals, their standard of conduct and the initiative they take in influencing others. At this level, work will normally be carried out within routine and non routine methods and procedures which require the exercise of some discretion and judgement. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline management provides the first level of leadership within the organisation. This unit applies to people who are making the transition from being a team member, to taking responsibility for the work and performance of others. Frontline managers have a strong influence on the work culture, values and ethics of the teams they supervise. As such it is important that frontline mangers model good practice, professionalism and confidently represent their organisation.

ELEMENT	PERFORMANCE CRITERIA
	resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1. Monitor ***performance systems and processes*** to assess progress in achieving profit/productivity plans and targets 3.2. Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3. Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4. Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5. Present recommendations for variation to operational plans to the ***designated persons***/***groups*** and gain approval 3.6. Implement ***systems***, ***procedures and records*** associated with performance in accordance with organisation's requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

Required knowledge

- principles and techniques associated with:
  - contingency planning
  - methods for monitoring and reporting on performance
  - monitoring and implementing operations and procedures
  - problem identification and methods of resolution

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• relevant budgeting and financial analysis, interpretation and reporting requirements • resource management systems at the tactical implementation level • resource planning and acquisition • tactical risk analysis including identification and reporting requirements.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • ability to monitor and adjust operational performance, produce short-term plans for the department or section, plan and acquire resources, and provide reports on performance as required • knowledge of principles and techniques associated with monitoring and implementing operations and procedures.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation outlining contingency planning and consultation processes undertaken • demonstration of techniques in managing performance • evaluation of mentoring, coaching and supervision provided to support individuals and teams to use resources effectively, economically and safely.

EVIDENCE GUIDE	
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Resource requirements may refer to:	• goods and services to be purchased and ordered • human, physical and financial resources - both current and projected • stock requirements and requisitions
Relevant personnel, ***colleagues and specialist resource managers*** may include:	• colleagues and specialist resource managers • managers • occupational health and safety committees and other people with specialist responsibilities • other employees • people from a wide range of social, cultural and ethnic backgrounds, and people with a range of physical and mental abilities • supervisors
Operational plans may refer to:	• organisational plans • tactical plans developed by the department or section to detail product and service performance
Key performance indicators may refer to:	• measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and to identify areas for improvements

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Contingency planning may refer to:	• contracting out or outsourcing human resources and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-use • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables • succession planning
Consultation processes may refer to:	• mechanisms used to provide feedback to the work team in relation to outcomes of consultation • meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans
Organisation's policies, ***practices and procedures*** may include:	• organisational culture • Standard Operating Procedures • organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources • undocumented practices in line with organisational operations

Performance systems and processes may refer to:	• informal systems used by frontline managers for the work team in the place of existing organisation-wide systems
	• formal processes within the organisation to measure performance, such as:
	  • feedback arrangements
	  • individual and teamwork plans

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• KPIs • specified work outcomes
Designated persons*/*groups may include:	• other affected work groups or teams and groups designated in workplace policies and procedures • those who have the authority to make decisions and/or recommendations about operations such as workplace supervisors, other managers
Systems*, *procedures and records may include:	• databases and other recording mechanisms for ensuring records are kept in accordance with organisational requirements • individual and team performance plans • organisational policies and procedures relative to performance

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Systems may refer to:	• forums, meetings • newsletters and reports • organisational policies and procedures • web-based communication devices
Participation in decision making processes may include:	• feedback in relation to outcomes of the consultative process • processes which ensures all employees have the opportunity to contribute to organisational issues
Continuous improvement processes may include:	• cyclical audits and reviews of workplace, team and individual performance • evaluations and monitoring of effectiveness • implementation of quality systems, such as International Standardization for Organization (ISO) • modifications and improvements to systems, processes, services and products • policies and procedures which allow the organisation to systematically review and improve the quality of its products, services and procedures • seeking and considering feedback from a range of stakeholders
Mentoring and coaching may refer to:	• providing assistance with problem-solving • providing feedback, support and encouragement • teaching another member of the team, usually focusing on a specific work task or skill
Technology may include:	• computerised systems and software such as databases, project management and word processing • telecommunications devices • any other technology used to carry out work roles and responsibilities

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Customer service may be:	• internal or external • to existing, new or potential clients
Processes to ensure that team members are informed of savings and productivity/service improvements may refer to:	• email/intranet, newsletters or other communication devices • newsletters and bulletins • staff reward mechanisms • team meetings

BSBMGT404A Lead and facilitate off site staff

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to supervise staff who perform agreed duties at an alternative site (usually home) during some or all of the scheduled work hours. OFF SITE WORK is a flexible employment option that meets all legal and regulatory employment requirements. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to frontline managers who may be supervisors or team leaders who have responsibility for overseeing the work of off site staff. Increasingly, managers and staff are at different locations and the opportunities for face to face communication are reduced. In these cases managers must develop different techniques and approaches to ensure quality standards and work outcomes are met.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Facilitate off site work outcomes	1.1. Clarify ***roles and responsibilities*** of ***off-site work*** supervisors with management and off-site staff 1.2. Provide leadership and direction to off-site staff to foster independent self-managed work practices that address agreed outcomes in terms of quality and milestones 1.3. Ensure that work objectives for off-site staff are linked to measurable targets and include agreed timeframes 1.4. Use participative, transparent decision making to review work allocation responsibilities of off-site staff and related on-site staff
2. Support off site staff	2.1. Provide guidance to off-site staff to establish and maintain a supportive working environment in accordance with ***legal and organisational***

ELEMENT	PERFORMANCE CRITERIA
	requirements 2.2. Assign key personnel/mentors to support off-site staff and to provide a link between off-site staff and the organisation 2.3. Establish and maintain effective working relations between on-site staff and off-site staff through regular meetings and other occasions used to build organisational culture and values
3. Manage off site staff performance	3.1. Plan and conduct ***regular meetings*** to determine individual progress, identify needs, clarify and solve issues, and provide networking opportunities 3.2. Evaluate performance against agreed goals and targets, and address in accordance with organisational policy and practice 3.3. Address problems in work performance through constructive solutions identified with off-site staff 3.4. Ensure evidence relating to performance is valid, documented and evaluated to identify learning and development requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to negotiate and manage conflict and to manage performance • computer skills to undertake online communication • literacy skills to interpret requirements and to document performance management outcomes • numeracy skills to determine time lines and milestones.
Required knowledge
• e-work policy and practices • legal and ethical requirements for e-work • occupational health and safety • relationship management.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • strategies to facilitate work and provide support for off-site staff • methods for providing feedback and adapting the performance management system so that work outcomes are met • knowledge of legal and ethical requirements for e-work.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
Guidance information for assessment	

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

BSBMGT502B Manage people performance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to all managers and team leaders who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement. The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers. This is a unit that all managers/prospective managers who have responsibility for other employees should strongly consider undertaking.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • demonstration of techniques in providing feedback and coaching • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of work plans, performance indicators, risk analysis,performance management and review processes, performance improvement and development plans.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other management units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Performance standards mean:	• level of performance sought from an individual or group which may be expressed either quantitatively or qualitatively
Code of Conduct means:	• agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or an agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or customers
Performance indicators mean:	• measures against which performance outcomes are gauged

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Risk analysis means:	• determination of the likelihood of a negative event preventing the organisation meeting its objectives and the likely consequences of such an event on organisational performance
Performance management means:	• in accordance with relevant industrial agreements • process or set of processes for establishing a shared understanding of what an individual or group is to achieve, and managing and developing individuals in a way which increases the probability it will be achieved in both the short- and long-term
Excellence in performance means:	• regularly and consistently exceeding the performance targets established while meeting the organisation's performance standards
Termination means:	• cessation of the contract of employment between an employer and an employee, at the initiative of the employer within relevant industrial agreements

BSBMGT515A Manage operational plan

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans. Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to people who manage the work of others and operate within the parameters of a broader strategic and/or business plan. The task of the manager at this level is to develop and implement an operational plan to ensure that the objectives and strategies outlined in the strategic and/or business plan are met by work teams. However in some larger organisations operational plans may be developed by a strategic planning unit. At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • input from a wide range of sources providing evidence in respect to a broad range of activities and application of business ethics • demonstration of personal competence that links to the organisation's requirements for managers • effective communication skills and an ability to win commitment to the organisation and its activities • knowledge of leadership styles and their application • knowledge of legislation, codes and by-laws relevant to the organisation's operations.
Context of and specific resources for	Assessment must ensure:

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
assessment	• access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated leadership techniques • observation of presentations • review of media and language used when communicating with individuals and groups • evaluation of accountabilities and responsibilitiesassigned to teams • review of documentation outlining personal objectives and work program outcomes • review of professional development activities undertaken to improve self performance and professional competence.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Advanced Diploma of Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Expectations of the organisation include:	• environmental management • occupational health and safety • product safety

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• service • values and ethics • other relevant factors
Incidents may include:	• emergency response • environmental event (emissions, noise, etc.) • product failure • workplace accident
Risk management means:	• process of identification of potential negative events and the development of plans to mitigate or minimise the likelihood of the negative event occurring and/or the consequences in the event it does occur
Accountabilities and responsibilities means:	• clarification of who is to be accountable for a decision or action prior to its execution, and identification of groups, individuals and activities for which a person is responsible for managing
Positive work environment means:	• environment where employees identify with the organisation and its purpose and where communication is free-flowing, decisions are transparent and conflict is positive and constructive

BSBMGT616A Develop and implement strategic plans

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to establish the strategic direction of the organisation, and to sustain competitive advantage and enhance competitiveness. It requires analysis and interpretation of relevant markets, capability assessment of the organisation, and its existing and potential competitors and allies. It also covers implementation of the strategic plan. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals working in senior roles in the organisation, who have responsibility for ensuring that the organisation is positioned to ensure its long term viability and success. The unit covers the requirements for analysing the organisation's present position, and for developing specific actions and initiatives that will be undertaken by people working in various roles.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Confirm organisational vision and mission	1.1. Check with ***stakeholders*** that organisational vision and mission are still held to be current and are supported 1.2. Make any changes or refinements to vision or mission statement as required 1.3. Review or develop organisational values to support the vision and mission statement 1.4. Gain support for strategic planning process from all relevant stakeholders
2. Analyse the internal and external environment	2.1. Determine information requirements and undertake or commission ***research*** to deliver relevant information 2.2. Analyse political, economic, social, and technological developments in a ***global context*** 2.3. Seek advice from appropriate experts wherever necessary 2.4. Identify and consider strengths and weaknesses of

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	existing and potential competitors and allies 2.5. Analyse organisation's strengths, weaknesses, opportunities and threats 2.6. Consider co-operative ventures that are supported by risk and cost-benefit analyses, are consistent with the organisational vision, mission and values, and provide for ***due diligence*** 2.7. Check that analysis of internal and external environment is consistent with the perspectives of other informed people
3. Write strategic plan	3.1. Document relevant research and background for inclusion in the strategic plan 3.2. Formulate strategic objectives and strategies needed for the future 3.3. Detail each strategy with an assigned priority, a timeframe, responsible parties and measurable performance indicators 3.4. Circulate strategic plan for comment, support and endorsement
4. Implement strategic plan	4.1. Communicate strategic plan to all relevant parties 4.2. Brief people with a specific role in relation to strategies 4.3. Use performance indicators to monitor progress in implementing plan 4.4. Make necessary refinements to plan 4.5. Evaluate achievement of objectives at agreed milestones 4.6. Review effectiveness of plan and consider methods for improving strategic planning processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• analytical skills to undertake value chain analysis, to review strengths and weaknesses, and to collate and interpret statistical data including trend analysis

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• financial skills to consider resource implications of proposed strategies • research skills to ensure accurate, up-to-date information is available for the environmental analysis • risk management skills to plan and undertake appropriate due diligence.
Required knowledge
• relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination • strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT) • competitor knowledge • codes and by-laws relevant to the organisation's operations.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • thorough analysis of the organisation's own capabilities, those of their existing potential competitors and allies, and the external environment • strategic plan which includes objectives, strategies, timeframes, performance indicators and methods for monitoring the implementation of the plan • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of

BSBMGT617A Develop and implement a business plan

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers. Business plans are critical tools for business growth and development. They will vary depending on the needs of the organisation. This unit covers the typical elements of a business plan and the standard approaches to be used in implementing a business plan. The business plan should be supported by a strategic plan, and may also be supported by a marketing plan and cash flow forecasts.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Develop business plan	1.1. Review and evaluate pre-existing ***strategic***, ***business and operational plan***, if available 1.2. Analyse and interpret business vision, mission, values and objectives 1.3. Consult with ***key stakeholders*** 1.4. Review market requirements for the product or service, profile customer needs and research pricing options 1.5. Develop ***performance objectives and measures*** through consultation with key stakeholders 1.6. Identify financial, human and physical resource requirements for the business 1.7. Consider any permits or licences that may be required for new activity 1.8. Write ***business plan***

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Monitor performance	2.1. Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2. Ensure skilled labour is available to implement plan 2.3. Test performance measurement systems and refine, if necessary 2.4. Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5. Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1. Analyse performance reports against planned objectives 3.2. Review performance indicators and refine if necessary 3.3. Ensure groups and individuals contributing to under-performance are ***coached***, and provide training where appropriate 3.4. Review system processes and work methods regularly as part of continuous improvement

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• analytical and research skills to review the market, to research competitors and to review pricing structures • coaching and communication skills to remediate any under-performance in the work group or individuals • planning and organising skills to sequence activities and to develop a logical structure.
Required knowledge
• performance measurement approaches and benchmarking • options for developing business plans.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Strategic**, **business and operational plan may include:	• previously formulated:
	  • action plan
	  • business goals
	  • competitor analysis
	  • financing arrangements or financial targets
	  • management arrangements and/or personnel requirements
	  • marketing approaches
	  • product or service research or analysis

Key stakeholders may include:	• business partners or financiers • customers • shareholders • staff • technical experts or advisers
Performance objectives and measures may relate to:	• efficiency measures • input measures such as staff time or dollars allocated • outcomes measures • qualitative indicators such as feedback from customers, effect on the wider market or competitors, staff reports • quantitative indicators, such as numbers produced and sold, turnover, customer satisfaction ranking, lower staff turnover

Business plan includes:	• description of the business
	• business products and services
	• marketing activity
	• financial indicators
	• productivity and performance targets for key result areas such as:
	  • community awareness or branding
	  • environmental impact

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• governance or management • quality • sales • triple bottom line • workforce
Coaching refers to:	• informal on-the-job and off-the-job advice and training to improve performance

ELEMENT	PERFORMANCE CRITERIA
promotional activities	the impact of the promotional activity on the delivery of products and services 3.2. Assess effectiveness of planning processes to identify possible improvements in future activities 3.3. Collect ***feedback*** and provide to personnel and agencies involved in promotional activity 3.4. Analyse costs and time lines to evaluate the benefits accruing from the promotional activities 3.5. Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions of promotional activities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read a variety of texts; to prepare general information and papers; and to write formal and informal letters according to target audience
- technology skills to select and use technology appropriate to a task
- problem-solving skills to manage contingencies in promotional activities
- numeracy skills to analyse data and to compare time lines and promotional costs against budgets.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety (OHS)
- planning processes for organising promotional activities
- organisational marketing plan and associated budgets.

BSBPMG510A Manage projects

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to manage a straightforward project or a section of a larger project. This unit addresses the management of projects including the development of a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learnt for application to future projects. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	The unit focuses on the application of project management skills and the requirement to meet time lines, quality standards, budgetary limits and other requirements set for the project. The unit does not apply to specialist project managers. For specialist project managers, the units of competency in the Project Management competency field will be applicable.

Licensing/Regulatory Information

Not applicable.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication and negotiation skills to work with team members and other stakeholders to maintain project schedules • literacy skills to read, write and review a range of documentation • planning and organising skills to develop, monitor and maintain implementation schedules • numeracy skills to analyse data, and to compare time lines and promotional costs against budgets • culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities.
Required knowledge

• relevant legislation from all levels of government that may affect aspects of business operations, such as:
  • anti-discrimination legislation
  • ethical principles
  • codes of practice
  • privacy laws
  • environmental issues
  • OHS
• organisational structure, and lines of authority and communication within the organisation
• how the project relates to organisation's overall mission, goals, objectives and operations.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate	Evidence of the following is essential:

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
competency in this unit	• development of a project plan • details of monitoring arrangement/s and evaluation of the project plan's efficacy to address time lines and budgets of project • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to workplace project documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • oral or written questioning to assess knowledge of how the project relates to the organisation's overall mission, goals, objectives and operations • review of project risk management plan and project plan • evaluation of project reports forwarded to stakeholders • analysis of documentation reviewing project outcomes and processes against the project scope and plan • evaluation of documentation outlining lessons learnt from the project.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other project management units.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. BSBPUR401B Plan purchasing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to prepare invitations to offer, identify suppliers, issue invitations to offer, and prepare purchase recommendations. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals who are required to prepare for complex purchasing agreements up to and including the point at which the organisation selects, without prejudice, a supplier. This is done with strict adherence to legal requirements and the organisation's purchasing strategies, and traditionally by a purchasing officer working under supervision of a purchasing manager or in consultation with senior management. The purchasing role addressed in this unit involves significant risk and/or significant expenditure and detailed legal and documentation arrangements.

Licensing/Regulatory Information

offer	3.2. Conduct briefings as required 3.3. ***Clarify issues*** arising with suppliers in line with purchasing strategies
4. Prepare recommendations to purchase	4.1. Receive offer documents from suppliers 4.2. Assess offer documents against requirements of purchasing strategies 4.3. Seek ***further information*** from suppliers as required 4.4. Obtain specialist expertise to assist with evaluation as required 4.5. Evaluate offers against requirements of purchasing strategies 4.6. Prepare shortlists of suppliers that make offers and who meet purchasing criteria 4.7. Select preferred offers 4.8. Make recommendations about preferred offers and seek approval by relevant personnel 4.9. Obtain approval for recommended offers

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to negotiate and liaise with potential suppliers and relevant personnel involved in purchasing planning
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- information technology skills to use software relevant to conducting purchasing planning activity
- information management skills to ensure all aspects of purchasing planning are conducted in sufficient detail
- literacy skills to write tender or quotation documents and written reports containing complex concepts
- organisational and time management skills to sequence tasks and meet timelines.

Required knowledge

- identification and overview knowledge of key provisions of relevant legislation

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
from all levels of government that affects business operations, codes of practice and national standards, such as: • consumer protection legislation • contract law • import of goods and services, where relevant • sale of goods legislation • Trade Practices Act • organisational practices, policies and procedures for purchasing • product knowledge about the goods and services being supplied • purchasing and procurement principles for: • accountability • probity and transparency • risk management • value for money.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • documents containing preparations to offer • evaluation of suppliers • issuing of an invitation to offer • formation of recommendation to purchase.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • organisation's purchasing strategies and relevant purchasing records.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports documenting the procurement planing process • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of preparation and issuing of invitations to offer • oral or written questioning to assess knowledge • review testimony from team members, colleagues, supervisors or managers.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other purchasing units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Relevant personnel may include:	• CEO • coordinators • internal users of purchased goods and services • leaders • managers • other persons authorised to commit the organisation to purchases • owner and Board • specialist personnel involved in purchasing, asset maintenance and finance • supervisors
Purchasing methods may	• direct negotiations

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
include:	• direct purchases using supply agreements • electronic trading • invitation of open or select tenders • written quotations
Invitations to offer may include:	• criteria for selection of suppliers from offers received • delivery schedules • draft contracts and agreements • quality requirements • required supplier capacity • requirements for off-site storage and warehousing • specifications of goods and/or services required

Purchasing strategies may include:	• criteria for evaluating purchasing performance
	• different policies, procedures and strategies for different dollar values of purchases
	• limits of authority to approve purchases
	• methodology for evaluating purchasing performance
	• organisational and industry codes of conduct and ethics
	• requirements for fairness and transparency in purchasing
	• the organisation's documented strategies for things such as:
	  • purchasing
	  • covering policies
	  • procedures, guidelines and documentation formats for purchasing from suppliers including entities owned by the organisation, partners, alliance members and local and distant suppliers

Clarify issues may include:	• requests for further information about specifications not responded to, misinterpretations of specifications and supplementary/add on products or services
Further information may include:	• requests about specifications not responded to, misinterpretations of specifications and supplementary/add on products or services • supplier briefings and presentations

BSBPUR402B Negotiate contracts

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit specifies the outcomes required to negotiate terms of contracts with suppliers, and prepare and finalise contracts. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals who negotiate and formalise complex purchasing arrangements involving significant risk and/or significant expenditure and detailed legal and documentation arrangements. This unit applies to individuals who negotiate contracts as part of a broad purchasing role but are not specialist legal practitioners. They are typically guided by organisational contract negotiation guidelines and work under minimal supervision of a senior purchasing manager or in consultation with senior management.

Licensing/Regulatory Information

Not applicable.

BSBPUR501C Develop, implement and review purchasing strategies

Modification History

Release	Comments
Release 1	This version first released with *BSB07 Business Training Package version 6.0.* Revised unit. Required knowledge and Range Statement changed to include environmentally sustainable practices. Replaces BSBPUR501B Develop, implement and review purchasing strategies

Unit Descriptor

This unit specifies the outcomes required to develop, implement and evaluate an organisation's purchasing strategies, and implement improvements to those strategies.

Application of the Unit

This unit applies to individuals who develop strategies detailing the organisation's policies, guidelines and procedures for purchasing.

The unit is typically undertaken by a senior purchasing officer or purchasing manager. While they may work closely with other staff members in the organisation, they have individual responsibility and autonomy to develop, communicate and implement organisational purchasing strategies.

Individuals undertaking this unit support the work of other employees carrying out purchasing activities.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

	organisation 3.5 Identify and address problems and issues arising during implementation of purchasing strategies 3.6 Provide reports to relevant personnel and stakeholders on the implementation of purchasing strategies
4. Evaluate purchasing strategies and implement improvements	4.1 Review implementation of purchasing strategies 4.2 Identify improvements to purchasing strategies from review process 4.3 Gain approval to implement improvements to purchasing strategies 4.4 Communicate improvements to relevant stakeholders and provide support to implement improvements 4.5 Monitor and review implementation of improvements to determine their effectiveness

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- communication and negotiation skills to liaise with suppliers and relevant stakeholders and negotiate agreement appropriate purchasing strategies
- literacy skills to write purchasing policies and procedures and reports containing complex concepts
- financial management skills to create and manage a budget framework for conducting purchasing activities
- technology skills to operate software relating to online purchasing.

Required knowledge

- identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:
  - consumer protection legislation
  - contract law
  - import of goods and services, where relevant
  - sale of goods legislation

© Commonwealth of Australia, 2025 Skills Insight

    - Trade Practices Act
- information about industry benchmarks for purchasing, including information from:
    - peak bodies and industry associations
- Australian Standards organisation policies and procedures related to:
    - business terms and conditions for purchasing, tendering and contracting
    - contracting and tendering
    - ethical behaviour
    - purchasing
- product knowledge related to goods and services required by the organisation
- principles and practice in environmentally sustainable purchasing and supply
- range of software programs used in online purchasing.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • development of purchasing objectives and strategies for an organisation • implementation of those purchasing strategies in an organisation • evaluation and implementation of improvements to purchasing strategies in an organisation.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • organisation's purchasing strategies and relevant purchasing records.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of documented purchasing objectives and strategies • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate

© Commonwealth of Australia, 2025 Skills Insight

	• oral or written questioning to assess knowledge • review testimony from team members, colleagues, supervisors or managers • review of authenticated documents from the workplace or training environment.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other purchasing units.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant stakeholders may include:	• clients • contractors • customers • suppliers • tenderers.
Personnel may include:	• Board members • CEOs • coordinators • internal users of purchased goods and services • leaders • managers • owners • relevant staff in other work sections • staff in own work section, team members and colleagues • supervisors.
Purchasing strategies may include:	• criteria for evaluating purchasing performance • different policies, procedures and strategies for different dollar values of purchases • key performance indicators for purchasing • limits of authority to approve purchases • methodology for evaluating purchasing performance

© Commonwealth of Australia, 2025 Skills Insight

	• organisational and industry codes of conduct and ethics • policies, procedures, guidelines and documentation formats for purchasing from suppliers including entities owned by the organisation, partners, alliance members and local and distant suppliers • requirements for fairness and transparency in purchasing • environmentally sustainable purchase and supply of goods and services.
Legal requirements may include issues in relation to:	• access and equity • accreditation, licence, patent and copyright • codes of practice • data collection, storage and retrieval • ethical conduct and governance • industrial relations • insurance • occupational health and safety • operation, maintenance and service of tools, equipment, plant and machinery • planning • privacy and confidentiality • professional development • standards (Australian and international) • warranties.

The five rights are:	• right supplier:
	  • demonstrable expertise and experience
	  • due diligence requirements
	  • ethical conduct requirements
	  • evidence of past legal compliance
	  • requirements to use organisations linked by ownership, partnership, alliance or other arrangements
	• right price:
	  • cost/price analysis
	  • value-for-money
	• right quantity:
	  • supply guarantees
	• right quality:
	  • confidentiality and probity requirements
	  • key performance indicators
	  • measures to manage risk
	  • quality accreditation

© Commonwealth of Australia, 2025 Skills Insight

	• right time: • supply guarantees.
Resources may include human, physical and other resources such as:	• documentation required for purchasing, such as proformas, order forms, standard tender documentation and basic standard contracts • software systems for inventory management or online purchasing • staff to undertake or assist with purchasing.
Support may include:	• information sessions and briefings • training programs • written information including procedures and internet or intranet-based information.

BSBREL401A Establish networks

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to develop and maintain effective work relationships and networks. It covers the relationship building and negotiation skills required by workers within an organisation as well as freelance or contract workers. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals with a broad knowledge of networking and negotiation who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop and maintain business networks	1.1. Use appropriate ***network strategies*** to establish and maintain relationships that promote the development of business opportunities 1.2. Identify and pursue network opportunities to maximise a range of contacts 1.3. Communicate information regarding new networks to inform individuals, colleagues and clients of potential benefits 1.4. Participate in ***professional networks and associations*** to obtain and maintain personal knowledge and skills
2. Establish and maintain business relationships	2.1. Develop and maintain relationships to promote benefits consistent with ***organisational/client requirements*** 2.2. Gain and maintain trust and confidence of contacts through demonstration of high standards of business practices 2.3. Use a high level of ***negotiation skills*** to encourage positive outcomes 2.4. Identify difficult situations and negotiate solutions using collaborative problem-solving techniques

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.5. Seek specialist advice in the development of contacts where appropriate
3. Promote the relationship	3.1. Develop strategies to represent and promote the interests and requirements of the relationship 3.2. Use appropriate presentation skills to communicate the goals and objectives of the relationship 3.3. Effectively communicate issues, policies and practices of the relationship to a range of audiences, in writing and verbally 3.4. Obtain ***feedback*** to identify and develop ways to improve promotional activities within available opportunities

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to receive and report on feedback, to maintain effective relationships and to manage conflict • culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities • leadership skills to gain trust and confidence of clients and colleagues • negotiation skills to achieve mutually acceptable outcomes • technology skills to support effective communication and presentation.
Required knowledge
• client or organisational policies, plans and procedures • related organisations, agencies and networks • trends and forecasts for relevant industries, services and products.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • establishing contacts and participating in networks • identifying opportunities for networking • knowledge of related organisations, agencies and networks • maintaining records of relevant contacts.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • access to examples of networking strategies and documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation communicating issues, policies and practices of the relationship to a range of audiences • evaluation of promotional strategies • observation of negotiation of solutions between groups and individuals • observation of promotional presentations.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • interpersonal communication units • other relationship management units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Network strategies may include:	• association memberships • conference participation • distributing materials • individual marketing • maintaining regular contact • seminar attendance
Professional networks and associations may include:	• advisory committees • colleagues • committees • government agencies • internal/external customers • lobby groups • local inter-agency groups • other organisations • professional/occupational associations • project specific ad hoc consultative/reference groups • specific interest or support groups • suppliers • work team
Organisational/client requirements may be included in:	• access and equity principles and practices • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • marketing plan • occupational health and safety policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Negotiation skills may include:	• assertiveness • bargaining • collaboration • confidence building • conflict reduction • empathising • offers and counter offers • solution designing • stress management
Feedback may include:	• accuracy and sufficiency of information • appropriateness of audience • benefits to organisation • impact of message • liaison with networks • participation of competitors • use of media

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather and organise information	1.1. Gather and organise ***information*** in a format suitable for analysis, interpretation and dissemination in accordance with ***organisational requirements*** 1.2. Access information held by the organisation ensuring accuracy and relevance in line with established organisational requirements 1.3. Ensure that ***methods of collecting information*** are reliable and make efficient use of resources in accordance with organisational requirements 1.4. Identify research requirements for combining online research with non-electronic sources of information 1.5. Use ***business technology*** to access, organise and monitor information in accordance with organisational requirements 1.6. Update, modify, maintain and store information, in accordance with organisational requirements
2. Research and analyse information	2.1. Clearly define ***objectives of research*** ensuring consistency with organisational requirements 2.2. Ensure that data and ***research strategies*** used are valid and relevant to the requirements of the research and make efficient use of available resources 2.3. Identify ***key words and phrases*** for use as part of any online search strategy, including the use of ***Boolean operators*** and other search tools

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. Use reliable ***methods of data analysis*** that are suitable to research purposes 2.5. Ensure that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and ***business objectives***
3. Present information	3.1. Present recommendations and issues in an appropriate format, style and structure using suitable business technology 3.2. Structure and format reports in a clear manner that conforms to organisational requirements 3.3. Report and distribute research findings in accordance with organisational requirements 3.4. Obtain ***feedback*** and comments on suitability and sufficiency of findings in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- problem-solving skills to deal with information which is contradictory, ambiguous, inconsistent or inadequate
- technology skills to select and use technology appropriate to a task
- research skills to identify and access information.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational record keeping/filing systems, security procedures and safe

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
recording practices • organisational policies and procedures relating to distribution of workplace information, and legal and ethical obligations • research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • presenting information and data • maintaining and handling data and documents systematically • analysing and interpreting data to support organisational activities • knowledge of research processes and strategies to identify new sources of information.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of research tasks and resources.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • review of documentation outlining recommendations and issues

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• review of reports outlining research findings.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • general administration units • IT use units • Governance units

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	• demographic data • service delivery records • computer databases (library catalogue, customer records, subscription database, internet) • computer files (letters, memos and other documents) • correspondence (faxes, memos, letters, email) • financial figures • forms (insurance forms, membership forms) • information on training needs • invoices (from suppliers, to debtors) • marketing reports/plans/budgets • personnel records (personal details, salary rates) • production targets • sales records (monthly forecasts, targets achieved)
Organisational requirements may include:	• anti-discrimination and related policy • business and performance plans • Code of Conduct/Code of Ethics

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • information protocols • legal and organisational policies, guidelines and requirements • management and accountability channels • OHS policies, procedures and programs • procedures for updating records • quality assurance and/or procedures manuals • security and confidentiality requirements
Methods of collecting information may include:	• checking research provided by others • checking written material including referrals and client files • individual research • information from other organisations • interviews with community members, colleagues/customers • observation and listening • previous file records • questioning (in person or indirect) • recruitment applications and other forms
Business technology may include:	• answering machine • computer • fax machine • photocopier • telephone
Objectives of research may include:	• comparative analysis • hypothesis testing • identification of trends • industry pricing policies • process mapping • situational diagnosis
Research strategies may include:	• data analysis • documentation reviews • focus groups • interviewing colleagues and clients • online searching • product sampling • subscription databases

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Key words and phrases may include:	• American spellings when searching online • cultural or geographic terms • using different thesauri in different databases
Boolean operators may include:	• exclude - / NOT • include +/ AND • or • phrase searching " "/( ) • variations, depending on the resource being used
Methods of data analysis may include:	• data sampling • feedback on results • peer review • review of previous research • statistical analysis
Business objectives may include:	• community capacity building • community development • service provision • business planning • financial performance • flexibility, responsiveness • interpersonal communication • marketing and customer service • organisational values and behaviours • people management • work procedures and quality assurance manuals
Feedback may include:	• audit documentation and reports • comments from community, board members, clients and colleagues • customer satisfaction questionnaires • quality assurance data • returned goods

BSBRKG304B Maintain business records

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to maintain the records of a business or records system in good order on a day to day basis. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals requiring some understanding of relevant theoretical knowledge relating to recordkeeping functions. It is not assumed that individuals at this level would have responsibility for supervising the work of others; however it is assumed that as a recordkeeping practitioner their work will support effective recordkeeping and governance practices across the organisation. The application is in relation to the maintenance of records from an existing business or records system that has guidelines and processes to assist in the process. Work carried out in the interest of system maintenance will be performed under supervision or in consultation with more senior staff or users of the system.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Collate business records	1.1. Identify individual ***records*** or ***information*** which should be incorporated into ***business or records system*** according to organisational criteria 1.2. Sort records in accordance with workplace requirements 1.3. Adhere to ***security and access requirements*** in accordance with organisational procedures
2. Update business or records system	2.1. Identify and record control information for describing new records to be incorporated into business or records system 2.2. Update control information describing movement or use of records within business or records system 2.3. Accurately record and update control information in business or records system 2.4. Identify and remove records of completed business

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	activities from current system for disposal
3. Prepare reports from the business or records system	3.1. Interpret requests for ***reports*** and clarify the content and frequency sought, where necessary 3.2. Prepare reports from business or records system in accordance with instructions or request 3.3. Prepare reports in accordance with organisational security and access procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain and clarify procedures, and to interview users to identify their records/information needs
- literacy skills to read and interpret nature of record content, functions and problems
- problem-solving and analysis skills to identify and manage records.

Required knowledge

- key provisions of relevant legislation from all forms of government, regulations, standards and documentation that may affect aspects of business operations, such as:
  - AS 5044.1:2002 AGLS Metadata element set
  - AS 5090:2003 Work process analysis for recordkeeping
  - AS ISO 15489:2004 Records management
  - AS ISO 23081.1:2006 Information and documentation - Records management processes - Metadata for records - Principles
  - Australian Stock Exchange(ASX) Principles of Good Corporate Governance
  - ethical principles
  - codes of practice
  - privacy and freedom of information
  - archives and records legislation
  - occupational health and safety
- general principles and processes of records management and records management systems, such as:
  - systems of control
  - records continuum theory

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• mandate and ownership of business process • environmental context • records characteristics.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • complying with organisational procedures and workplace requirements • knowledge and understanding of business or records systems • accurately recording information.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated work environment • access to office equipment and resources • access to examples of records, recordkeeping systems and policies • access to workplace reference materials such as procedural manuals and company policies.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of authenticated documents from the workplace or training environment • oral or written questioning to assess knowledge of

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and gather records required	1.1. ***Identify*** specific information or search criteria required by user 1.2. Identify ***range of records*** likely to contain information required and ascertain their availability using appropriate ***finding aids*** and ***records systems*** 1.3. Obtain range of records likely to contain information required by user, and analyse content 1.4. Track records to record any change in location and use, in accordance with business or records system rules and organisational procedures 1.5. Explain to user any ***obstacles*** to obtaining specific records within specified time and agree a timeframe for provision of records
2. Interpret and administer access rules and procedures	2.1. Identify person requesting record/s and confirm ***access*** category, in accordance with organisational procedures 2.2. Apply access restriction rules and guidelines to record/s requested to match access category of requester 2.3. Inform requester of their rights to review the decision where access restriction rules and guidelines

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	prevent access
3. Provide the required information and/or records	3.1. Prepare requested information/records in appropriate formats, and in accordance with organisational procedures and specified time lines 3.2. Mask specific records, or portions thereof, in accordance with access rules and organisational procedures 3.3. Document records retrieved and used to provide information, in accordance with business or records system operation and organisational procedures 3.4. Record new locations provided to user in accordance with system rules and organisational procedures 3.5. Deliver record, or record information, within specified timeframes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain and clarify procedures, and to interview users to identify their records/information needs
- literacy skills to read and interpret nature of record content, functions and problems
- problem-solving and analysis skills to identify records and information requested
- self management skills to accurately record metadata
- research skills to identify, retrieve and organise information for users.

Required knowledge

- construction and use of language in the organisation in relation to recordkeeping (past and present)
- key provisions of relevant legislation from all forms of government, regulations, standards and documentation that may affect aspects of business operations, such as:
  - AS 5044.1:2002 AGLS Metadata element set

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify risks	1.1. Identify the ***context*** for risk management 1.2. Identify ***risks*** using ***tools***, ensuring all reasonable steps have been taken to identify all risks 1.3. Document identified risks in accordance with relevant policies, procedures and legislation
2. Analyse and evaluate risks	2.1. Analyse and document risks in consultation with relevant ***stakeholders*** 2.2. Undertake ***risk categorisation*** and determine ***level of risk*** 2.3. Document analysis processes and outcomes
3. Treat risks	3.1. Determine appropriate ***control measures*** for risks and assess for strengths and weaknesses 3.2. Identify control measures for all risks

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.3. Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures 3.4. Choose and implement control measures for own area of operation and/or responsibilities 3.5. Prepare and implement treatment plans
4. Monitor and review effectiveness of risk treatment/s	4.1. Regularly review implemented treatment/s against ***measures of success*** 4.2. Use review results to improve the treatment of risks 4.3. Provide assistance to auditing risk in own area of operation 4.4. Monitor and review management of risk in own area of operation

strategies • auditing requirements relating to risk management.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identification, analysis and evaluation of risks • demonstrated understanding of personal role in relation to wider organisational or project context • demonstrated understanding of risk management processes and procedures.
Context of and specific resources for assessment	Assessment must ensure: • access to workplace documentation relating to risk management • access to risk management tools and frameworks.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation outlining risk analysis processes and outcomes • analysis of responses to case studies and scenarios • oral or written questioning to assess knowledge of Australian and international standards for risk management • review of implementation of treatment plans.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

EVIDENCE GUIDE	
	• general administration units • other risk management units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Context may include:	• any related projects or organisations • any resources, including physical assets, which are vital to operations • key operational elements and service of the organisation • organisation or project, how it is organised and its capabilities • own role and responsibilities in relation to overall project or organisation design
Risks may include:	• commercial and legal relationships • economic circumstances and scenarios • human behaviour • individual activities • management activities and controls • natural events • political circumstances • positive risk • technology - technological issues
Tools may include:	• documentation to assist in process of identifying risk, and assessing impact and likelihood of occurrence • standard instruments developed for the organisation and contextualised for sections of the workplace's operations, such as checklists and testing procedures • tools to prioritise risks, including where relevant, numerical scoring systems for risks

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Stakeholders may include:	• contractors • employees • financial managers • insurance agents • managers • public • service providers • suppliers • unions • volunteers

Risk categorisation may include:	• likelihood of risks:
	  • almost certain
	  • likely
	  • possible
	  • unlikely
	  • rare
	• consequences of risks:
	  • insignificant
	  • minor
	  • moderate
	  • major
	  • catastrophic
	  • current control measures

Level of risk may include:	• low, treated with routine procedures • moderate, with specific responsibility allocated for the risk, and monitoring and response procedures implemented • high, requiring action, as it has potential to be damaging to the organisation or project • extreme, requiring immediate action, as it has potential to be devastating to the organisation or project

Control measures may include:	• hierarchy of controls:
	  • reduction in likelihood of risks
	  • reduction of consequences of risks
	  • retention of risks
	  • risk aversion
	  • transfer of responsibility of risks

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Measures of success may include:	• costs • reductions in impact • reductions in likelihood • reductions in occurrence

BSBRSK501B Manage risk

Modification History

Release	Comments
Release 1	This version first released with *BSB07 Business Training Package version 6.0.* Revised unit. Required knowledge updated to incorporate current Australian Standards. Replaces BSBRSK501A Manage risk

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage risks in a range of contexts across the organisation or for a specific business unit or area.

Application of the Unit

This unit addresses the management of the risk across the organisation or within a business unit or area. It does not assume any given industry setting.

This unit applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking ***risk*** management 1.2 Determine ***scope*** for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context 1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with ***relevant parties*** about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 ***Research*** risks that may apply to scope 2.3 Use ***tools and techniques*** to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess ***likelihood*** of risks occurring 3.2 Assess ***impact or consequence*** if risks occur 3.3 ***Evaluate*** and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate ***options*** for treating risks 4.2 Develop an ***action plan*** for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored

© Commonwealth of Australia, 2025 Skills Insight

	4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and literacy skills to consult and negotiate, to prepare communications about risk management, and to encourage stakeholder involvement
- organisational and management skills to plan and implement risk management processes
- problem-solving and innovation skills to find practical ways to manage identified risks.

Required knowledge

- AS/NZS ISO 31000:2009 Risk Management - Principles and Guidelines
- legislation, codes of practice and national standards, for example:
  - duty of care
  - company law
  - contract law
  - environmental law
  - freedom of information
  - industrial relations law
  - privacy and confidentiality
  - legislation relevant to organisation’s operations
  - legislation relevant to operation as a business entity
- organisational policies and procedures, including:
  - risk management strategy
  - policies and procedures for risk management
- overall operations of organisation
- reasonable adjustment in the workplace for people with a disability
- types of available insurance and insurance providers.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • risk management plan which includes a detailed stakeholder analysis, explanation of the risk context, critical success factors, identified and analysed risks, and treatments for prioritised risks • details of monitoring arrangements for risk management plan and an evaluation of the risk management plan's efficacy in treating risks • knowledge of relevant legislation, codes of practice and national standards.
Context of and specific resources for assessment	Assessment must ensure: • access to workplace documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • oral or written questioning to assess knowledge of risk management policies and procedures • review of documented critical success factors, and goals or objectives for area • review of risks prioritised for treatment • evaluation of action plan for implementing risk treatment • evaluation of documentation communicating risk management processes to relevant parties.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • financial management units, governance units, human resource management units, or technology units.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Risks may include those relating to:	• commercial relationships • economic circumstances and scenarios • human behaviour • individual activities • legislation • management activities and controls • natural events • political circumstances • technology.

Scope may apply to:	• given project
	• specific business unit or area
	• specific functional such as:
	  • financial management
	  • OHS
	  • governance
	• external environment
	• internal environment
	• whole organisation.

Relevant parties may include:	• all staff • internal and external stakeholders • senior management • specific teams or business units • technical experts.
Research may include:	• data or statistical information • information from other business areas • lessons learned from other projects or activities • market research • previous experience • public consultation • review of literature and other information sources.
Tools and techniques may include:	• brainstorms • checklists • fishbone diagrams

© Commonwealth of Australia, 2025 Skills Insight

	• flowcharts • scenario analysis.

Likelihood may refer to:	• probability of a given risk occurring, such as:
	  • very likely
	  • likely
	  • possible
	  • unlikely
	  • rare.

Impact or consequence may refer to:	• significance of outcomes if the risk occurs, such as:
	  • disastrous
	  • severe
	  • moderate impact
	  • minimal impact.

Evaluation of risks includes:	• considering the likelihood of the risk occurring • considering the impact of the risk • determining which risks are most significant and are therefore priorities for treatment.
Options may include:	• avoiding the risk • changing the consequences • changing the likelihood • retaining the risk • sharing the risk with a third party.
Action plans should include:	• what actions are required • who is taking responsibility • time lines • monitoring processes.

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Describe business ideas	1.1. Gather information for ***business ideas*** from ***appropriate sources*** 1.2. List details of business ideas and opportunities 1.3. Research alternative business ideas in light of the resources available 1.4. Specify and list products and services to match business ideas 1.5. Identify and research potential ***customer information*** for business ideas 1.6. Identify and take into account financial, business and technical skills available when researching business opportunities
2. Identify market needs	2.1. Collect information regarding market size and potential from appropriate sources 2.2. Investigate market trends and developments to identify market needs relative to business ideas 2.3. Gather market information from ***primary and secondary sources*** to identify possible market needs in relation to business ideas 2.4. Identify ***ethical and cultural requirements*** of the market and their impact on business ideas 2.5. Identify ***new and emerging markets*** and document their features

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.6. Identify and organise information on expected market growth or decline and associated risk factors
3. Investigate factors affecting the market	3.1. Identify projected changes in population, economic activity and the labour force that may affect business ideas 3.2. Identify movements in prices and projected changes in availability of resources 3.3. Review ***trends and developments*** and identify their potential impact on business ideas

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• analytical skills to identify market trends and developments, and to assess their impact on products and services • communication skills to request information from diverse sources • lateral thinking skills to generate ideas for potential businesses • literacy skills to interpret business and market information • numeracy skills to analyse data to aid business/market research • research skills to investigate market needs.
Required knowledge
• ethical and cultural requirements • research methods and data collection tools • sources of business and market information.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

ELEMENT	PERFORMANCE CRITERIA
	non-compliance with legal and regulatory requirements and take corrective action where necessary
3. Negotiate and arrange contracts	3.1. Seek legal advice on contractual rights and obligations, if required, to clarify business liabilities 3.2. Investigate and assess potential products/services to determine ***procurement rights*** and to ensure protection of business interests where applicable 3.3. Negotiate and secure contractual procurement rights for goods and services including ***contracts with relevant people***, as required, in accordance with the business plan 3.4. Identify ***insurance requirements*** and acquire adequate cover 3.5. Identify options for leasing/ownership of business premises and complete contractual arrangements in accordance with the business plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication, reporting, record keeping and consultation skills to operate the business
- literacy skills to interpret legal requirements, to develop policies and procedures and to analyse compliance information
- research skills to investigate legal structures, and taxation and insurance requirements
- time management skills to prioritise tasks and to meet key dates.

Required knowledge

- business registration and licensing requirements
- commonwealth, state/territory and local government legislative requirements relating to business operation, especially in regard to OHS and environmental issues, equal employment opportunity, industrial relations, anti-discrimination, taxation
- creation and termination of relevant legal contracts

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• cultural differences and legal implications • duty of care imposed by Law of Torts • legal rights and obligations of alternative ownership structures • record keeping to meet minimum legal and taxation requirements • relevant consumer legislation • relevant industry codes of practice • relevant insurance requirements and products.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • implementation of a systematic approach to identifying, managing and meeting legal and business requirements within culturally appropriate contexts • interpreting compliance data and formulating appropriate action • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to relevant documentation • candidate's individual circumstances and work in the context of establishing or running a small business, are the basis for assessment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • portfolio of evidence including contracts negotiated and arranged • oral or written questioning to assess knowledge of relevant consumer legislation • review of procedures developed and implemented to ensure full compliance with relevant legislation and regulatory requirements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify costs, calculate prices and prepare profit statement	1.1. Identify and document ***costs*** associated with the production and delivery of the business' products/services 1.2. Calculate prices based on costs and profit margin, as an hourly charge out rate for labour or unit price for products 1.3. Calculate break-even sales point to establish business viability and profit margins 1.4. Identify appropriate ***pricing strategies*** in relation to market conditions to meet business profit targets 1.5. Prepare projected profit statement to supplement the business plan
2. Develop a FINANCIAL PLAN	2.1. Set ***profit targets***/***goals*** to reflect owner's desired returns 2.2. Identify working capital requirements necessary to attain profit projections 2.3. Identify non-current asset requirements and consider alternative asset management strategies 2.4. Prepare ***cash flow projections*** to enable business operation in accordance with business plan and ***legal requirements*** 2.5. Identify capital investment requirements accurately for each operational period 2.6. Select budget targets to enable ongoing monitoring of financial performance
3. Acquire finance	3.1. Identify start-up and ongoing financial requirements according to financial plan/budget

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.2. Identify ***sources of finance***, including potential ***financial backers***, to provide required liquidity for the business to complement business goals and objectives 3.3. Investigate cost of securing finance on optimal terms 3.4. Identify strategies to obtain finance as required to ensure financial viability of the business

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• analytical skills to interpret financial data • communication skills to secure finance • literacy skills to develop a financial plan and to interpret legal requirements and financial reports • numeracy skills to calculate costs, prices, profit and other financial information • research skills to identify costs and sources of finance.
Required knowledge
• break-even analysis • costing for the business, including margin/mark-up, hourly charge out rates and unit costs • financial decision making relevant to the business • methods and relative costs of obtaining finance • principles for preparation of balance sheets • principles for preparation of cash flow forecasts • principles for preparation of profit and loss statements • purpose of financial reports • relevant accounting terminology • working capital cycles.

Evidence Guide

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop marketing strategies	1.1. Analyse the business and its key products or services to determine the focus of marketing activities, in accordance with the objectives of the business plan 1.2. Evaluate the customer base and target market for the small business as a basis for the ***marketing objectives and strategies*** 1.3. Determine marketing objectives and strategies that are ethically and culturally appropriate, in consultation with ***relevant people*** and in accordance with the business plan
2. Determine a marketing mix for the business	2.1. Balance product mix, volumes and pricing to optimise sales and profit 2.2. Evaluate the costs and benefits of using different ***distribution channels*** and/or providing different ***levels of customer service*** and consider the results in determining the ***marketing mix*** 2.3. Determine promotional activities to suit the target market 2.4. Consider customer needs and preferences in determining the marketing mix 2.5. Determine the marketing mix according to market and business needs
3. Implement marketing	3.1. Brief persons involved in the marketing effort on their roles and responsibilities, to ensure the success

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
strategies	of marketing strategies 3.2. Plan and implement ***promotional activities***, in accordance with marketing objectives and budgetary requirements
4. Monitor and improve marketing performance	4.1. Monitor marketing activities and evaluate business performance according to the objectives and targets of the business plan 4.2. Analyse ***performance gaps*** and take corrective action or set new targets 4.3. Encourage all relevant people to propose ways to improve marketing performance 4.4. Seek and analyse ***customer reaction*** to all aspects of the marketing mix, using culturally appropriate processes, to improve targeting and outcomes 4.5. Conduct ongoing research of customer requirements to identify opportunities for change and improvement 4.6. Monitor and investigate changes in the market for new opportunities to aid business development

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to question, clarify and report • literacy and numeracy skills to research information, to analyse data and to interpret market data.
Required knowledge
• industry market trends • methods of analysing costs and benefits of marketing strategies • methods of developing marketing objectives and marketing mix • methods of monitoring customer satisfaction • relevant market analysis and research • relevant marketing concepts and methods.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • developing a marketing strategy and choosing a marketing mix for the small business that are culturally appropriate and that complement the business plan • implementing and monitoring the marketing strategy/plan to optimise the chances of small business success • knowledge of relevant marketing concepts and methods.
Context of and specific resources for assessment	Assessment must ensure: • access to relevant documentation • candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • portfolio of evidence including marketing strategy and monitoring of marketing performance • oral or written questioning to assess knowledge of industry market trends • review of analysis of performance gaps and corrective action taken or new targets set • review of promotional activities implemented.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBSMB404A Undertake small business planning.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Marketing objectives and strategies may include:	• achieving lower costs of production and distribution than competitors • creating a very different product line or service so that the business becomes a class leader in the industry • distribution • pricing, presentation and display of products/services • product design and packaging • product range and mix • promotion and advertising • pursuing cost leadership and/or product differentiation within a specialist market segment
Relevant people may include:	• accountant or other specialist services • family members, work team members, sub-contractors, community members • franchise agency • financial backers, clients • owner/operator, partners, directors, shareholders • regulatory bodies • trade or industry associations
Distribution channels may include:	• dealer, re-seller, franchisee • distributor, delivery service, mail order, telesales • self-access, wholesale, retail
Levels of customer service may include:	• after sales service • one-on-one personal service • sales assistance for problems/queries only
Marketing mix may include:	• distribution • level of service • pricing

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• promotion • quality, range • safety features • technical features, design
Promotional activities may include:	• advertising in national, suburban or local newspapers • advertising on radio or television • canvassing • development of networks and strategic alliances • display posters • exhibitions, in-store promotions • involvement in community projects • mail drops • professional/industry journals • sponsorship • staff development programs to enhance customer service orientation • website • word of mouth, referral, testimonials
Performance gaps may include:	• over achievement of performance targets • under achievement of performance targets
Customer reaction may be determined through:	• customer meetings, focus groups • identification of new business opportunities • informal discussion • sales to contact ratio • survey/other feedback mechanisms • trend analysis

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Business plan may include:	• business opportunities, which may be influenced by:
	  • amount and types of finance available
	  • expected financial viability
	  • skills of operator
	• details of ownership/management
	• finance, expenditure statement, balance sheet and cash flow forecast, projections for the initial years of operation assumptions underlying the business plan, expected level of inflation and taxation, expected trend of interest rate, capital expenditure and its timing, stock turnover, debtors collection period, creditor payment period, return on investment
	• level of risk involved, risk assessment and management
	• market focus of the business
	• marketing requirements
	• need to raise finance and requirements of lenders
	• organisation/operational arrangements
	• proposed size and scale of the business
	• recognition of any seasonal or cyclical (time-based) elements which are crucial to the success of the business
	• resources required and available
	• sources of funding
	• specialist services and sources of advice that may be required
	• staffing
	• stages in the business development

Business goals and objectives may include:	• customer needs/marketing projections • family or community benefits

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• financial projections • goals, objectives, plans, systems and processes • lifestyle issues • market focus of the business • proposed size and scale of the business • short-, medium- or long-term goals • social responsibility
Occupational health and safety issues must include:	• identification of specific hazard issues such as occupational violence, security, manual handling, equipment and hazardous substances • management of the organisation and operation of OHS as part of the business plan • procedures for managing hazards in the workplace (identify, assess and control) • provisions for ensuring safety of members of the public and contractors visiting the premises/worksite
Financial plan may include:	• analysis of sales by product/service, identifying where they were sold and to whom • cash flow estimates for each forward period • current financial state of the enterprise (or owner/operator) • estimates of profit and loss projections for each forward period • financial performance to date (if applicable) • likely return on investment • monthly, quarterly or annual returns • non-recurrent assets calculations • profit, turnover, capital and equity targets • projected profit targets, pricing strategies, margins • projections of likely financial results (budgeting) • projections, which may vary depending on the importance of such information and the stage in the life of the business • resources required to implement the proposed marketing and production strategies (staff, materials, plant and equipment) • review of financial inputs required (sources

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Develop o***perational strategies and procedures***	1.1 Develop an action plan to provide a clear and coherent direction, in accordance with the ***business goals and objectives*** 1.2 Identify ***occupational health and safety (OHS) and environmental issues*** and implement strategies to minimise risk factors 1.3 Develop a ***quality system*** for the business in line with industry standards, compliance requirements and cultural criteria 1.4 Develop performance measures and ***operational targets*** to conform with the business plan 1.5 Develop strategies for innovation, including the utilisation of existing, new or emerging technologies, where practicable, to optimise business performance
2. Implement operational strategies and procedures	2.1 Implement systems and key performance indicators/targets to monitor business performance and customer satisfaction 2.2 Implement systems to control stock, expenditure/cost, wastage/shrinkage and risks to health and safety in accordance with the business plan 2.3 Maintain staffing requirements, where applicable, within budget to maximise productivity 2.4 Carry out the provision of goods/services in accordance with established legal, ethical cultural and ***technical standards*** 2.5 Provide goods/services in accordance with time, cost and quality specifications, and customer requirements 2.6 Apply quality procedures to address product/service and customer requirements
3. Monitor business performance	3.1 Regularly monitor/review the achievement of operational targets to ensure optimum business performance, in accordance

© Commonwealth of Australia, 2025 Skills Insight

	with the business plan goals and objectives 3.2 Review systems and structures, with a view to more effectively supporting business performance 3.3 Investigate and analyse operating problems to establish causes and implement changes as required as part of the business quality system 3.4 Amend operational policies and procedures to incorporate corrective action
4. Review business operations	4.1 Review and adjust business plan, as required, to maintain business viability, in accordance with business goals and objectives 4.2 Clearly record proposed changes to aid future planning and evaluation 4.3 Undertake ongoing research into new business opportunities and adjust business goals and objectives as new business opportunities arise

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to develop criteria and targets for the business plan
- communication skills to question, clarify and report
- literacy skills to interpret legal requirements, company policies and procedures
- numeracy skills to manage performance information and to control the finances
- technology skills to use relevant business equipment.

Required knowledge

- methods for developing and maintaining networks
- methods for implementing operation and revenue control systems
- methods for monitoring performance and implementing improvements
- OHS responsibilities and procedures for managing hazards
- principles of risk management relevant to the business, including risk assessment
- quality system principles and methods
- relevant industry codes of practice
- relevant marketing, sales and financial concepts
- relevant performance measures

© Commonwealth of Australia, 2025 Skills Insight

- role of innovation
- systems to manage staff, stock, expenditure, services and customer service
- environmentally sustainable business practice and operation
- technical or specialist skills relevant to the business operation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • developing strategies and procedures to successfully manage the operation of the business • making appropriate adjustments to the business operations as required • knowledge of quality system principles and methods.
Context of and specific resources for assessment	Assessment must ensure: • access to relevant documentation • candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • portfolio of evidence including operational strategies and procedures • oral or written questioning to assess knowledge of principles of risk management relevant to the business, including risk assessment • review of analysis of operating problems (establishing causes and implementing changes as required as part of the business quality system) • review of records proposing changes to the business operations.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBSMB406A Manage small business finances

© Commonwealth of Australia, 2025 Skills Insight

	• BSBSMB407A Manage a small team.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Operational strategies and procedures may be determined by:	• business premises (size, location, layout) • financial control systems and procedures • management and administrative systems and procedures • methods/techniques/technology • physical and natural resources • plant and equipment , including OHS requirements • premises, plant and equipment, which may be new or previously owned • purchase (sole or shared ownership) or leasing • raw materials • requirements, which may be one-off requirements or recurrent requirements (such as equipment maintenance) specific to the nature of the business • technology • environmentally sustainable principles of business operation • use of existing, new and emerging technologies including e-commerce.
Business goals and objectives may include:	• customer needs/marketing projections • family or community benefits • financial projections • goals, objectives, plans, systems and processes • lifestyle issues • proposed size and scale of the business, market focus of the business • short-, medium- or long-term goals • social responsibility.
Occupational health and safety and environmental issues must include:	• controls, which may include instructions to workplace personnel concerning site hazards and controls, material safety data sheets, use of personal protective equipment,

© Commonwealth of Australia, 2025 Skills Insight

	vehicle access, signs and barricades, traffic control, outside contractors • establishment and maintenance of procedures for assessing and controlling risks • establishment and maintenance of procedures for identifying risks to health and safety • environmentally sustainable purchase and supply of goods and services • waste and by-products.
Quality system may include:	• manual or computer quality control systems • quality assurance/management approaches • random inspections and assessments of goods and services against predetermined standards • random inspections and assessments of processes against predetermined standards • random sampling and follow-up of customers.
Operational targets may include:	• external targets, which may relate to market share and positioning and may involve exploring new markets, building national or international trade links • internal targets, which may relate to size, quality, quantity and diversity, wages to sales, sales to area/stock levels/stock turnover/average debtor payment periods and levels • staffing level and skills mix • targets, which may be short-, medium- or long-term.
Technical standards may include:	• current and generally agreed descriptions of what the product/service is, how it should be produced/delivered and the environmental sustainability, quality, safety, efficiency or other measures to determine the activity is done effectively.

BSBSMB407A Manage a small team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to plan for the management of and to manage staff. It involves industrial relations, staff selection, staff records, induction, training, team development and career planning to enhance business operations through retaining a competent, committed and motivated team in the workplace. Specific legal requirements apply to the management of a small business.

Application of the Unit

Application of the unit	This work is undertaken by individuals who operate a small business. The unit is suitable for existing micro and small businesses or a department in a larger organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop staffing plan	1.1. Determine ***staffing requirements*** to allow the business to run effectively, in accordance with the business requirements as outlined in the business plan 1.2. Identify and compare the existing skills/competencies of owner/s and staff with business requirements to identify any gaps 1.3. Develop ***policies and procedures*** for owner/s and staff, in accordance with the business plan
2. Recruit, induct, train and retain the team	2.1. Develop job/position descriptions, competencies required and selection criteria to meet the needs of the business 2.2. Judge information obtained from each candidate against specified selection criteria and decide selection in accordance with business needs and legal requirements 2.3. Induct new staff members in accordance with the policies and procedures of the business 2.4. Make team members aware of their responsibilities and performance requirements as soon as practicable and take opportunities to coach team members who

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	are unfamiliar with the procedures of the business 2.5. Develop and implement a ***staff development program and career paths*** based on the requirements of business and staff competencies 2.6. ***Advertise staff vacancies*** appropriately in accordance with staffing plan
3. Comply with INDUSTRIAL RELATIONS obligations	3.1. Clarify workplace rights and obligations of employers and employees, in accordance with ***legal requirements and codes of practice*** 3.2. Counsel staff, if required, in a positive and constructive manner and record outcomes accurately
4. Maintain staff records	4.1. Develop ***staff records system*** to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements 4.2. Monitor and accurately maintain the system for recording and retrieving personnel and payroll information and seek specialist advice where required
5. Manage staff	5.1. Regularly review contribution and skills of self and other team members to ensure performance is in line with agreed ***performance measures*** 5.2. Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business 5.3. Support and encourage staff, and acknowledge and reward their contribution to the business 5.4. Regularly provide opportunities for staff to discuss work related issues 5.5. Develop ***contingency plans*** to cope with unexpected or extreme situations and take appropriate corrective action as required
6. Review team performance	6.1. Develop positive and constructive relationships with and between ***team members*** 6.2. Review and update team objectives in support of business goals on a regular basis in consultation with team members 6.3. Identify strengths and weaknesses of team against current and expected work requirements 6.4. Schedule time, on a regular basis, for team members to review work operations in order to maintain and improve operational efficiency 6.5. Encourage team members to monitor their own

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	performance, suggest improvements and to identify professional development needs, in accordance with personal and business requirements 6.6. Monitor and review staff turnover rate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• analytical skills to identify workplace skill gaps • coaching skills • communication skills to relate to staff • conflict resolution skills • literacy skills to interpret legal requirements, to compile reports and to prepare a job/position description • team building and motivation skills.
Required knowledge
• commonwealth, state/territory and local government legislative requirements relating to business operation, especially in regard to occupational health and safety (OHS) and environmental issues, equal employment opportunity (EEO), industrial relations and anti-discrimination • OHS responsibilities and procedures for managing hazards • relevant industry awards/enterprise agreements • staff development and career planning • staff counselling, grievance and disciplinary procedures • unfair dismissal legislation and procedures.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • managing a small team including staff selection, staff records, induction, training and development • developing and maintaining team performance to enhance business operations • knowledge of relevant legislative requirements affecting business operation.
Context of and specific resources for assessment	Assessment must ensure: • access to relevant documentation • candidate's individual circumstances and work in the context of running a small business, are the basis for assessment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • portfolio of evidence including staff policies and records, and contingency plans • oral or written questioning to assess knowledge of staff recruitment procedures, staff development and review programs • review of job/position descriptions and selection criteria developed • review of documentation monitoring and reviewing staff turnover rate.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBSMB405A Monitor and manage small business operations.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Staffing requirements may include:	• full-time, part-time, permanent, temporary or casual • number of staff • responsibilities, competencies required • self, other owners, family and/or friends • sub-contractors or external advisors/consultants • time commitment, performance expectations
Policies and procedures must include:	• complaint and grievance procedures • culturally appropriate entitlements e.g. funeral leave, national/religious days • culturally appropriate procedures e.g. how business will enact cultural requirements for relationships between owner/operator, employees and service providers • employment conditions, equal opportunity, anti-discrimination, cultural diversity • induction and training • OHS • recruitment and selection • performance measures • professional development
Staff development program and career paths may include	• attendance at courses • career planning • coaching • flexible learning • job rotation • mentoring • on-the-job training • professional development • staff exchanges • succession planning
Advertising staff vacancies may include:	• electronic (radio, television and internet) • noticeboards • print media • word-of-mouth
Industrial relations may include:	• awards and/or industrial agreements and

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	relevant industrial instruments • counselling, dismissal procedures
Legal requirements and codes of practice may include:	• award and enterprise agreements and relevant industrial instruments • commonwealth, state/territory and local government legislative requirements affecting business operation, especially in regard to OHS and environmental issues, EEO, industrial relations and anti-discrimination • relevant industry codes of practice
Staff records system must include:	• disciplinary and grievance procedures • employee records (including tax file number, remuneration, leave and training records) • job/position descriptions • OHS record • records of taxation and superannuation payments made
Performance measures may include:	• overall staff productivity • percentage of chargeable hours/days per week • performance of key people • ratio of direct workers to those who support, supervise or manage them • ratio of sales dollars per employee • staff morale, work ethic, work satisfaction
Contingency plans may include:	• accidents or emergencies • environmental issues • fluctuating workloads • OHS • unpredicted customer demand/busy periods • unpredicted staff shortages
Team members may include:	• employees, trainees/apprentices, sub-contractors or external advisers/consultants • owner/s, partners, family members

BSBSUS201A Participate in environmentally sustainable work practices

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to effectively measure current resource use and to carry out improvements including reducing the negative environmental impact of work practices. This unit requires the ability to access industry information, and applicable legislative and occupational health and safety (OHS) guidelines. While no licensing, legislative, regulatory or certification requirements apply holistically to this unit at the time of publication, relevant national, state and territory legislation, regulations and codes of practice impact upon this unit.

Application of the Unit

Application of the unit	This unit applies to operators/team members under supervision or guidance, who are required to follow workplace procedures and instructions, and to work in an environmentally sustainable manner. It covers: efficient resource use potential environmental hazards regulatory compliance improving environmental performance (within the scope of competency, authority and own level of responsibility). It addresses the knowledge, processes and techniques necessary to participate in environmentally sustainable work practices.

ELEMENT	PERFORMANCE CRITERIA
	hazards to appropriate personnel
2. Comply with environmental regulations	2.1. Follow workplace procedures to ensure ***compliance*** 2.2. Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1. Follow ***organisational plans*** to improve environmental practices and resource efficiency 3.2. Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.3. Make ***suggestions*** for improvements to workplace practices in own work area

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to comply with all relevant legislation associated with job specifications and procedures
- communication and problem-solving skills to question, seek clarification and make suggestions relating to work requirements and efficiency
- communication and teamwork skills to recognise procedures; to follow instructions; to respond to change, such as current workplace environmental/sustainability frameworks; and to support team work and participation in a sustainable organisation
- literacy, numeracy and technology skills to interpret workplace information in relation to work role, and to document and measure resource use
- technology skills to select and use technology appropriate for a task.

Required knowledge

- environmental and resource hazards/risks
- environmental or sustainability legislation, regulations and codes of practice applicable to own work role
- OHS issues and requirements
- organisational structure, and reporting channels and procedures
- relevant environmental and resource efficiency systems and procedures
- sustainability in the workplace
- terms and conditions of employment including policies and procedures, such as

REQUIRED SKILLS AND KNOWLEDGE
daily tasks, employee and employer rights, equal opportunity.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • accessing, interpreting and complying with a range of environment/sustainability legislation and procedural requirements relevant to daily responsibilities • accurately following organisational information to participate in and support an improved resource efficiency process and reporting as required • developing and/or using tools such as inspection checklists, to collect and measure relevant information on organisation resource consumption, within work role • identifying organisational improvements by applying efficient resource use to daily activities • knowledge of environmental and resource hazards/risks.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • evidence is relevant to the particular workplace role, including work area, equipment, systems, and documentation • review of current work area directly relating to own work, to assess measurement of resources used, hazards and compliance • individual or team discussion about potential for increased resource efficiency within current work area • access to workplace documents, information and resources (such as compliance obligations, enterprise

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	plans, work responsibilities).
Method of assessment	A range of assessment methods should be used t assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques over time and in a range of situations • analysis of responses to case studies and scenarios • review of documentation measuring current resource usage • evaluation of techniques used to document and measure current usage of resources • review of identified and reported workplace environmental hazards • evidence of active participation in organisational plans to improve environmental practices and resource efficiency.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBINN201A Contribute to workplace innovation • BSBSMB301A Investigate micro business opportunities • BSBWOR202A Organise and complete daily work activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Environmental and resource	• maximising opportunities to improve business environmental performance

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
efficiency issues may include:	• minimising environmental risks • promoting more efficient production and consumption of natural resources, for example minimising waste by participating in or using a waste management system • using resources efficiently such as material usage, energy usage (seeking alternative sources of energy or energy conservation) or efficient water usage
Appropriate techniques may include:	• examining and documenting resources in work area • examining invoices from suppliers • examining relevant information and data • measuring resource usage under different conditions • reports from other parties involved in the process of identifying and implementing improvements

Compliance may include:	• meeting relevant laws, by-laws and regulations or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):
	  • international
	  • commonwealth
	  • state/territory
	  • local government
	  • industry
	  • organisation

Organisational plans may include:	• documented policies and procedures • work plans to minimise waste or to increase efficiency of resources such as a green office program, supply chain program for purchasing sustainable products or an environmental management framework
Suggestions may include ideas that help to:	• improve energy efficiency • increase use of renewable, recyclable, reusable and recoverable resources • maximise opportunities such as use of solar power or other alternative forms of energy, where appropriate

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• prevent and minimise risks • reduce emissions of greenhouse gases • reduce use of non-renewable resources

BSBSUS301A Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 2	New release of this Unit with *version 7.0 of BSB07 Business Services Training Package*. Environmental assets italicised and bolded in PC 3.6 AND identified in Range Statement.
Release 1	Initial release of this Unit.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

This unit requires the ability to access industry information, applicable legislative and occupational health and safety (OHS) guidelines.

Application of the Unit

Application of the unit	This unit applies to those with responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools, such as: • identifying areas for improvement • developing plans to make improvements • implementing and monitoring improvements in environmental performance. A person who demonstrates competence in this unit must be able to provide evidence of the ability to implement and monitor integrated environmental and resource efficiency management policies and procedures within an organisation. Evidence must be strictly relevant to the

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	**Performance Criteria**
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Investigate current practices in relation to resource usage	1.1 Identify environmental regulations applying to the enterprise 1.2 Analyse procedures for assessing ***compliance*** with environmental/sustainability regulations 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate

© Commonwealth of Australia, 2025 Skills Insight

	1.4 Collect, analyse and organise information from a range of ***sources*** to provide information/advice and tools/resources for improvement opportunities 1.5 Measure and document current resource usage of members of the work group 1.6 Analyse and document current ***purchasing strategies*** 1.7 Analyse current work processes to access information and data to assist in identifying areas for improvement
2. Set targets for improvements	2.1 Seek input from ***stakeholders, key personnel and specialists*** 2.2 Access external sources of information and data as required 2.3 Evaluate alternative solutions to workplace environmental issues 2.4 Set efficiency targets
3. Implement performance improvement strategies	3.1 Source and use appropriate ***techniques and tools*** to assist in achieving efficiency targets 3.2 Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management 3.3 Implement and integrate ***environmental and resource efficiency improvement plans*** for own work group with other operational activities 3.4 Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area 3.5 Seek ***suggestions*** and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate 3.6 Implement costing strategies to fully utilise ***environmental assets***
4. Monitor performance	4.1 Use and/or develop evaluation and monitoring, tools and technology 4.2 Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders 4.3 Evaluate strategies and improvement plans 4.4 Set new efficiency targets, and investigate and apply new tools and strategies 4.5 Promote successful strategies and reward participants where possible

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to analyse problems, to devise solutions and to reflect on approaches taken
- change management skills
- communication skills to answer questions, clarify and acknowledge suggestions relating to work requirements and efficiency
- communication/consultation skills to support information flow from stakeholders to the work group
- innovation skills to identify improvements, to apply knowledge about resource use to organisational activities and to develop tools
- literacy skills to comprehend documentation, to interpret environmental and energy efficiency requirements, to create tools to measure and monitor improvements and to report outcomes
- numeracy skills to analyse data on organisational resource consumption and waste product volumes
- planning and organising skills to implement environmental and energy efficiency management polices and procedures relevant to own work area
- problem-solving skills to devise approaches to improved environmental sustainability and to develop alternative approaches as required
- technology skills to operate and shut down equipment; where relevant, to use software systems for recording and filing documentation to measure current usage; and to use word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information
- supervisory skills to work effectively with a team.

Required knowledge

- best practice approaches relevant to own area of responsibility and industry
- compliance requirements within work area for all relevant environmental/sustainability legislation, regulations and codes of practice including resource hazards/risks associated with work area, job specifications and procedures
- environmental and energy efficiency issues, systems and procedures specific to industry practice
- external benchmarks and support for particular benchmarks to be used within organisation, including approaches to improving resource use for work area and expected outcomes

© Commonwealth of Australia, 2025 Skills Insight

- OHS issues and requirements
- organisational structure and reporting channels and procedures
- quality assurance systems relevant to own work area
- strategies to maximise opportunities and to minimise impact relevant to own work area
- supply chain procedures
- terms and conditions of employment including policies and procedures, such as daily tasks, work area responsibilities, employee, supervisor and employer rights, equal opportunity.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • knowledge of relevant compliance requirements within work area • developing plans to make improvements • planning and organising work group activities in relation to measuring current use and devising strategies to improve usage • monitoring resource use and improvements for environmental performance relative to work area and supervision • ensuring appropriate action is taken within work area in relation to environmental/sustainability compliance and potential hazards • implementing new approaches to work area in an effort to resolve and improve environmental and resource efficiency issues and reporting as required.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to a range of environment/sustainability legislation, standards, guidelines and procedural requirements relevant to specific work area, daily

© Commonwealth of Australia, 2025 Skills Insight

	responsibilities and supervision • access to a range of information, workplace documentation and resources such as compliance obligations, organisation plans, work supervision and responsibilities • access to reports from other parties involved in the process of identifying and implementing improvements • evidence is relevant to the particular workplace role, including work area, staff, stakeholders, equipment, systems and documentation.
Method of assessment	A range of assessment methods should be used t assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • response to case studies • review of reports of activities of work group in relation to measuring resource use and developing improvement strategies • review of work plans outlining approaches to improved practices with documented benchmarks • analysis of the way in which advice is sought and suggestions are made about improvements • observation over time and in a range of situations in relation to review of overall work area and staff, to assess and measure resource use, hazards and compliance • review of checklists to identify and assess resource usage at the beginning and end of the unit; reports on meetings around procedures and improvement processes and monitoring within the workplace; lists of environmental hazards/risks or inefficiencies or opportunities for improvements identified in the workplace • analysis of implementation of programs such as a green office program, supply chain program for purchasing sustainable products, or an environmental management framework • oral or written questioning to assess knowledge of environmental and energy efficiency issues, systems and procedures specific to industry practice.

© Commonwealth of Australia, 2025 Skills Insight

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Compliance may include:	• meeting relevant laws, by-laws and regulations or best practice or codes of practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):
	  • international
	  • commonwealth
	  • state/territory
	  • industry
	  • organisation.

Sources may include:	• organisation specifications • regulatory sources • relevant stakeholders • resource use.
Purchasing strategies may include:	• influencing suppliers to take up environmental sustainability approaches • researching and participating in programs such as a supply chain program to purchase sustainable products.

Stakeholders, key personnel and specialists may include:	• individuals and groups both inside and outside the organisation who have direct or indirect interest in the organisation's conduct, actions, products and services, including:
	  • customers
	  • employees at all levels of the organisation
	  • government

© Commonwealth of Australia, 2025 Skills Insight

	• investors • local community • other organisations • suppliers • key personnel within the organisation, and specialists outside the organisation who may have particular technical expertise.
Techniques and tools may include:	• examination of invoices from suppliers • examination of relevant information and data • measurements made under different conditions • others as appropriate to the specific industry context.

Environmental and resource efficiency improvement plans may include:	• addressing environmental and resource sustainability initiatives such as environmental management systems, action plans, green office programs, surveys and audits
	• applying the waste management hierarchy in the workplace
	• determining organisation's most appropriate waste treatment including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment
	• initiating and/or maintaining appropriate organisational procedures for operational energy consumption, including stationary energy and non-stationary (transport)
	• preventing and minimising risks, and maximising opportunities such as:
	  • improving resource/energy efficiency
	  • reducing emissions of greenhouse gases
	• reducing use of non-renewable resources
	• referencing standards, guidelines and approaches such as:
	  • ecological footprinting
	  • Energy Efficiency Opportunities Bill 2005
	  • Global Reporting Initiative
	  • green office program – a cultural change program
	  • green purchasing
	  • Greenhouse Challenge Plus (Australian government initiative)
	  • ISO 14001:1996 Environmental management systems life cycle analyses

© Commonwealth of Australia, 2025 Skills Insight

	• product stewardship • supply chain management • sustainability covenants/compacts • triple bottom line reporting.

Suggestions may include ideas that help to:	• prevent and minimise risks and maximise opportunities such as:
	  • usage of solar or renewable energies where appropriate
	  • reducing emissions of greenhouse gases
	  • reducing use of non-renewable resources
	  • making more efficient use of resources, energy and water
	• maximising opportunities to re-use, recycle and reclaim materials
	• identifying strategies to offset or mitigate environmental impacts:
	  • purchasing carbon credits
	  • energy conservation
	  • reducing chemical use
	  • reducing material consumption
	• expressing purchasing power through the selection of suppliers with improved environmental performance e.g. purchasing renewable energy
	• eliminating the use of hazardous and toxic materials.

Environmental assets may include:	• assets of the natural environment such as:
	  • biological assets (produced or natural)
	  • land
	  • water areas with their ecosystems
	  • subsoil, and
	  • air.

BSBSUS501A Develop workplace policy and procedures for sustainability

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to develop and implement a workplace sustainability policy, including the modification of the policy to suit changed circumstances. This unit requires the ability to access industry information, applicable legislative and occupational health and safety (OHS) guidelines. While no licensing, legislative, regulatory or certification requirements apply holistically to this unit at the time of publication, relevant national, state and territory legislation, regulations and codes of practice impact upon this unit.

Application of the Unit

Application of the unit	This unit addresses the knowledge, processes and techniques necessary to develop approaches to sustainability within workplaces, including the development and implementation of policy. This unit applies to people with managerial responsibility who undertake work developing approaches to create strategies within workplaces, including the development and implementation of policy and includes: • communicating with relevant stakeholders • developing and monitoring policies • reviewing and improving policies. A person who demonstrates competence in this unit must be able to provide evidence of the ability to develop and implement integrated sustainability policies and

© Commonwealth of Australia, 2025 Skills Insight

	procedures within an enterprise. The review of the policy after implementation will also need to be evidenced. The context of the unit applies to all sectors of the business industry; it may be applied to all sections of an organisation, including the office, the factory floor, or work area. With such a broad application, the unit will need to be contextualised as it is applied across an organisation and across different industry sectors.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop workplace sustainability policy	1.1. Define ***scope*** of sustainability policy 1.2. Gather information from a range of ***sources*** to plan and develop policy 1.3. Identify and consult ***stakeholders*** as a key component of the policy development process 1.4. Include appropriate ***strategies*** in policy at all stages of work for minimising resource use, reducing toxic material and hazardous chemical use, and employing life cycle management approaches 1.5. Make recommendations for policy options based on likely effectiveness, timeframes and cost 1.6. Develop policy that reflects the organisation's commitment to sustainability as an integral part of business planning and as a business opportunity 1.7. Agree to appropriate methods of implementation
2. Communicate workplace sustainability policy	2.1. Promote workplace sustainability policy, including its expected outcome to key stakeholders 2.2. Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned
3. Implement workplace sustainability policy	3.1. Develop and communicate procedures to help implement workplace sustainability policy 3.2. Implement strategies for continuous improvement in resource efficiency 3.3. Establish and assign responsibility to use recording systems for tracking continuous improvements in sustainability approaches
4. Review workplace sustainability policy implementation	4.1. Document outcomes and provide feedback to key personnel and stakeholders 4.2. Investigate successes or otherwise of policy 4.3. Monitor records to identify trends that may require remedial action and use to promote continuous improvement of performance 4.4. Modify policy and or procedures as required to ensure improvements are made

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to adjust communication to suit different audiences; to respond effectively to diversity; to work as a member of a team to consult on and validate policy • literacy skills to read and evaluate complex and formal documents such as policy and legislation • problem skills to effectively manage different points of view and dissenting stakeholders • research, analytical and writing skills to research, analyse and present information; to prepare written reports requiring precision of expression and language and structures suited to the intended audience
Required knowledge
• best practice approaches relevant to own work area • environmental or sustainability legislation, regulations and codes of practice applicable to industry and organisation • equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy being developed • policy development processes and practices • principles, practices and available tools and techniques of sustainability management relevant to the particular industry context • quality assurance systems relevant to own organisation • relevant industry competency • relevant organisational polices, procedures and protocols • relevant systems and procedures to aid in the achievement of workplace sustainability

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • candidate's involvement as a key person in planning, developing and implementing organisational policy and that the developed policy complies with legislative requirements • implementation strategy, as part of the policy, that has been devised, implemented and reviewed showing a measurable improvement utilising the chosen benchmark indicators • communicating with stakeholders to discuss possible approaches to policy development and implementation, and contributing to the resolution of disputes among stakeholders • developing and monitoring policies for analysing data on enterprise resource consumption • using software systems for recording and filing documentation for measurement of current usage and using word processing and other basic software for interpreting charts, flowcharts, graphs and other visual data and information • reviewing and improving policies by identifying improvements and benchmarking against industry best practice and attempting new approaches continuously over time.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to relevant legislation/standards/guidelines • access to a range of workplace documentation and personnel, information and resources (such as compliance obligations, organisational plans, work responsibilities) • access to reports from other parties involved in the development and implementation of policy • evidence is collected over time, involving both formative and summative assessment • evidence is relevant to the particular workplace role, including work area, equipment, systems, and documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• direct questioning combined with review of portfolios of evidence and third party workplace reports of on the job performance by the candidate • response to case studies • review of policy developed and procedural documentation outlining the approach taken • review of implementation strategy, plans and work plans • analysis of methods used to involve stakeholders in policy development, implementation and review • analysis of inefficiencies or opportunities for improvements identified in the workplace • evaluation of participation in sustainability work practices and programs such as an environmental management framework • observation over time in relation to review of work area relating to policy and procedures being developed to assess measurement of resources used, hazards and compliance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBATSIM419A Contribute to the development and implementation of organisational policies • BSBHRM506A Manage recruitment, selection and induction processes • BSBHRM602B Manage human resources strategic planning • BSBINN502A Build and sustain an innovative work environment • BSBMGT515A Manage operational plan • BSBMGT516C Facilitate continuous improvement • BSBMGT608C Manage innovation and continuous improvement • BSBMGT616A Develop and implement strategic plans • BSBMGT617A Develop and implement a business plan • BSBRSK501A Manage risk.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Scope of workplace sustainability policy may include:	• addressing sustainability initiatives through reference to standards, guidelines and approaches such as:
	  • ecological foot printing
	  • Energy Efficiency Opportunities Bill 2005l
	  • Global Reporting Initiative
	  • green office program
	  • green purchasing
	  • Greenhouse Challenge Plus (Australian government initiative)
	  • ISO 14001:1996 Environmental management systems life cycle analyses
	  • life cycle analyses
	  • product stewardship
	  • supply chain management
	  • sustainability covenants/compacts
	  • triple bottom line reporting
	• integrated approach to sustainability which includes environmental, economic and social aspects, or a specific approach that focuses on each aspect individually
	• investigating particular business and market context of the industry/organisation
	• meeting relevant laws, by laws and regulations or best practice to support compliance in environmental performance and sustainability at each level as required (such as Environmental Protection or Biodiversity Conservation Act):
	  • international
	  • commonwealth
	  • state/territory
	  • industry

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• organisation • parts of the organisation to which it is to apply, including whether it is for the whole organisation, one site, one work area or a combination of these.
Sources may include:	• regulatory sources • relevant personnel • organisational specifications.

Stakeholders may include:	• individuals and groups both inside and outside the organisation who have some direct interest in the organisation's conduct, actions, products and services, including:
	  • customers
	  • employees at all levels of the organisation
	  • government
	  • investors
	  • local community
	  • other organisations
	  • regulators
	  • suppliers
	• key personnel within the organisation and specialists outside the organisation who may have particular technical expertise.

Strategies may include:	• promotional activities • raising awareness among stakeholders • training staff in sustainability principles and techniques.

BSBWHS401A Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This Unit first released with *BSB07 Business Training Package version 7.0*. Replaces BSBOHS407A Monitor a safe workplace.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

Application of the Unit

This unit applies to workers with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area.

The unit applies to individuals with a broad knowledge of WHS policies who contribute well-developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. These workers provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team, relevant provisions of ***WHS Acts, regulations and codes of practice*** 1.2 Provide information about the ***organisation's WHS policies, procedures and programs***, and ensure it is readily accessible to and understandable by the work team 1.3 Regularly provide and clearly explain to the work team, ***information*** about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply ***consultation procedures*** to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational	3.1 Identify WHS training needs according to organisational requirements, and WHS legislative and regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

procedures for providing WHS training	3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities, and coaching and mentoring assistance, to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures, and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement ***procedures to control risks*** using the hierarchy of control, according to organisational and WHS legislative requirements 4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response
5. Implement and monitor organisational procedures for maintaining WHS records for the team	5.1 Accurately complete and maintain ***WHS records*** of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements 5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem solving skills to:
  - identify hazards
  - assess risks in the work area

© Commonwealth of Australia, 2025 Skills Insight

  - review information relating to monitoring and evaluating incidents, and the effectiveness of risk controls
- coaching and mentoring skills to provide support to colleagues
- literacy skills to understand and interpret documentation, and to interpret WHS requirements.

Required knowledge

- hazards and associated risks in the workplace
- key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business
- organisational policies and procedures relating to hazard management, fire, emergency, evacuation, incident investigation and reporting
- relevance of consultation and participation as key mechanisms for improving WHS and culture
- WHS legislative responsibilities, duties and obligations of managers, supervisors, persons conducting businesses or undertakings (PCBUs) or their officers, and workers in the workplace.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applying organisational WHS management systems and procedures in the work team area • applying procedures for assessing and controlling risks to health and safety associated with those hazards, according to the hierarchy of control and as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice • providing specific, clear and accurate information and advice on workplace hazards to work team • knowledge of legal responsibilities of managers, supervisors, PCBUs or their officers and workers in the workplace.
Context of and specific resources	Assessment must ensure access to:

© Commonwealth of Australia, 2025 Skills Insight

for assessment	• an actual workplace or simulated environment • office equipment and resources • examples of documentation relating to hazards in the workplace • examples of documents relating to workplace safety, hazard identification and risk assessment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • review of records communicating the outcomes of consultation over WHS issues to the work team • analysis of responses to case studies and scenarios • review of reports to management on the costs associated with providing training for the work team • oral or written questioning to assess knowledge of workplace safety and hazards • examples of risk assessments • evaluation of actioning of team member hazard reports • review of WHS records of occupational injury and disease incidents in work area.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Skills Insight

WHS Acts, regulations and codes of practice may include:	• applicable commonwealth and state or territory WHS Acts, regulations and codes of practice
	• common law duties to meet general duty of care requirements
	• duty holders, as specified in WHS Acts:
	  • PCBUs or their officers
	  • workers
	  • other persons at a workplace
	• WHS legislative and regulatory requirements for effective management of hazards
	• WHS legislative and regulatory requirements for establishing consultation arrangements, including those for health and safety representatives and health and safety committees
	• WHS legislative and regulatory requirements for providing information and training, including:
	  • training in safe operating procedures
	  • procedures for workplace hazards
	  • hazard identification
	  • risk assessment and risk control
	  • emergency and evacuation procedures
	• WHS legislative, regulatory and other requirements for the maintenance and confidentiality of records of occupational injury and disease.

Organisation's WHS policies, procedures and programs may address:	• acquisition, use, storage and disposal of hazardous chemicals • alcohol and other drug intoxication • consultation arrangements for workers in work area • emergency and evacuation procedures • family-friendly environment • first aid provision and medical treatment • hazard reporting procedures • incident investigation • life–work balance strategies • maintenance and use of plant and equipment • procedures for hazard identification • procedures for risk assessment, and selection and implementation of risk controls • purchasing policy and procedures • requirements of applicable commonwealth and state or territory WHS Acts, regulations and codes of practice • safe operating procedures and instructions

© Commonwealth of Australia, 2025 Skills Insight

	• site access and egress • transport and storage of dangerous goods • use and care of personal protective equipment • WHS arrangements for on-site contractors and subcontractors, visitors and members of the public • WHS audits and inspections.
Information may result from:	• examining commonwealth and state or territory WHS Acts, regulations and codes of practice • checking equipment before and during work • consulting work team members through daily informal worker consultation and regular formal meetings • housekeeping • reviewing health and safety records, including hazard reports, hazardous substances and dangerous goods registers, and injury records • WHS audits and review of audit reports • workplace inspections in area of responsibility.
Consultation procedures may include:	• attendance of health and safety representatives at management and WHS planning meetings • early response to worker suggestions, requests, reports and concerns put forward to management • election of health and safety representatives according to legislative requirements • formal and informal meetings • health and safety committees • individual performance management processes • other committees, for example planning and purchasing • requirements as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice.

Procedures to control risks may include:	• as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice
	• consultation with workers and their representatives
	• redesign of job, process or workplace, for example:
	  • introducing mechanical handling equipment
	  • raising or lowering work platforms
	  • rearranging material flow, timing and/or scheduling
	• removing the cause of a risk at its source (eliminating the hazard), for example removing stored goods permanently from emergency exit

© Commonwealth of Australia, 2025 Skills Insight

	passageways • selecting controls according to the hierarchy of risk control, for example working through the hierarchy from the most effective to least effective control.

WHS records may include:	• any record of alcohol or drug use
	• as specified in commonwealth and state or territory WHS Acts, regulations and codes of practice
	• audit and inspection reports
	• consultation, for example:
	  • meetings of health and safety committees
	  • work team meeting agendas, including WHS items and actions
	• first aid/medical post records
	• hazardous chemicals registers
	• induction, instruction and training
	• manufacturer and supplier information, including dangerous goods storage lists
	• plant and equipment maintenance and testing reports
	• workers' compensation and rehabilitation records
	• workplace environmental monitoring records.

BSBWOR204A Use business technology

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to select, use and maintain a range of business technology. This technology includes the effective use of computer software to organise information and data. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals who use business technology to perform a range of routine tasks. They use a limited range of practical skills and fundamental knowledge of equipment use and the organisation of data or files in a defined context, under direct supervision or with limited individual responsibility.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select and use technology	1.1. Select appropriate ***technology*** and ***software applications*** to achieve the requirements of the task 1.2. Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.3. Use technology according to ***organisational requirements*** and in a way which promotes a safe work environment
2. Process and organise data	2.1. Identify, open, generate or amend files and records according to task and organisational requirements 2.2. Operate ***input devices*** according to organisational requirements 2.3. ***Store data*** appropriately and exit applications without damage to or loss of, data 2.4. Use manuals, training booklets and/or online help or help-desks to overcome basic difficulties with applications
3. Maintain technology	3.1. Identify and replace used ***technology consumables*** in accordance with manufacturer's instructions and organisational requirements 3.2. Carry out and/or arrange ***routine maintenance*** to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.3. ***Identify equipment faults*** accurately and take action in accordance with manufacturer's instructions or report fault to designated person

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• literacy skills to identify work requirements; to understand and process basic, relevant workplace information; and to follow written instructions • communication skills to request advice, to receive feedback and to work with a team • problem-solving skills to solve routine technology problems.
Required knowledge

• key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  • anti-discrimination legislation
• ethical principles
  • codes of practice
  • privacy laws
  • occupational health and safety (OHS)
• organisational policies, plans and procedures, especially in regard to file-naming and storage conventions
• organisational IT procedures including back-up and virus protection procedures
• basic technical terminology in relation to reading help-files and manuals.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • selection and application of appropriate equipment and software applications in relation to assigned task/s • access, retrieval and storage of required data • performance of basic maintenance on a range of office equipment
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of files and data for storage • manuals and training booklets for equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of office equipment • evaluation of maintaining technology.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • IT use units • other industry capability units.

Range Statement

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Technology may include:	• computer technology, such as laptops and personal computers • digital cameras • modems • printers • scanners • zip drives • photocopiers • shredders • binders • laminators • cutters
Software applications may include:	• email, internet • word processing, spreadsheet, database, accounting or presentation packages
Organisational requirements may include:	• correctly identifying and opening files • legal and organisation policies, guidelines and requirements • locating data • log-on procedures • manufacturer's guidelines • OHS policies, procedures and programs • saving and closing files • storing data
Input devices may include:	• keyboard • mouse • numerical key pad • scanner
Storage of data may include:	• appropriate storage/filing of hard copies of computer generated documents • storage in directories and sub-directories • storage on CD-ROMs, hard and floppy disk drives or back-up systems
Technology consumables may include:	• back-up tapes • CD-ROM • floppy disks

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• print heads • printer ribbons and cartridges • toner cartridges • zip disks
Routine maintenance may include:	• in-house cleaning and servicing of equipment according to manufacturer's guidelines • periodic servicing by qualified or manufacturer approved, technician • regular checking of equipment • replacing consumables
Identifying equipment faults may include:	• checking repairs have been carried out • encouraging feedback from work colleagues • keeping a log book of detected faults • preparing a maintenance program • regular back-ups of data • regular OHS inspections • routine checking of equipment

BSBWOR301B Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with *BSB07 Business Training Package version 6.0* Revised unit. Performance criteria and required skills updated to focus on learning and development practices, KPIs and compliance with policy and procedures. Replaces BSBWOR301A Organise personal work priorities and development

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance, and to maintain required levels of competence. Operators may exercise discretion and judgement using appropriate theoretical knowledge of work scheduling and performance improvement to provide technical advice and support to a team.

Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Organise and complete own work schedule	1.1 Ensure that ***work goals, objectives*** or ***KPIs*** are understood, negotiated and agreed in accordance with ***organisational requirements***
	1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes
	1.3 Identify ***factors affecting the achievement of work objectives*** and incorporate contingencies into work plans
	1.4 Use ***business technology*** efficiently and effectively to manage and monitor scheduling and completion of tasks
2. Monitor own work performance	2.1 Accurately monitor and adjust personal work performance through self-assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs
	2.2 Ensure that ***feedback on performance*** is actively sought and evaluated from colleagues and clients in the context of individual and group requirements
	2.3 Routinely identify and report on variations in the quality of and ***products and services*** according to organisational requirements
	2.4 Identify ***signs of stress*** and effects on ***personal wellbeing***
	2.5 Identify ***sources of stress*** and access appropriate ***supports and resolution strategies***
3. Coordinate personal skill development and learning	3.1 Identify personal learning and professional development needs and skill gaps using self-assessment and advice from colleagues and clients in relation to role and organisational requirements
	3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel
	3.3 Access, complete and record ***professional development***

© Commonwealth of Australia, 2025 Skills Insight

	opportunities to facilitate continuous learning and career development 3.4 Incorporate formal and informal feedback into review of further learning needs

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to give and receive constructive feedback relating to development needs
- literacy skills to read and understand the organisation's procedures
- planning skills to organise work priorities according to work goals and objectives
- problem-solving skills to solve routine problems
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies, plans and procedures
- methods to elicit, analyse and interpret feedback
- principles and techniques of goal setting, measuring performance, time management and personal assessment
- competency standards and how to interpret them in relation to self
- methods to identify and prioritise personal learning needs.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work goals and objectives may include:	• budgetary targets • production targets • reporting deadlines • sales targets • team and individual learning goals • team participation.
KPIs may include:	• key performance indicators on customer satisfaction • key performance indicators on customer effort • monitoring time taken to answer calls • operating within reporting protocols • score tools such as net promoter • understanding metrics.
Organisational requirements may include:	• access and equity principles and practice • business and performance plans • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals.
Factors affecting the achievement of work objectives may include:	• budget constraints • competing work demands • environmental factors such as time, weather • resource and materials availability • technology/equipment breakdowns • unforeseen incidents • workplace hazards, risks and controls.
Business technology may include:	• computer applications • computers • email

© Commonwealth of Australia, 2025 Skills Insight

	• facsimile machines • internet/extranet/intranet • modems • personal schedulers • photocopiers • printers • scanners.
Feedback on performance may include:	• formal/informal performance appraisals • obtaining feedback from clients • obtaining feedback from supervisors and colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery.
Products and services may include:	• either products or services • goods • ideas • infrastructure • private or public sets of benefits.
Signs of stress may include:	• absence from work • alcohol or other substance abuse • conflict • poor work performance.
Personal wellbeing may include:	• cultural • emotional • social • spiritual.
Sources of stress may include:	• complex tasks • cultural issues • work and family conflict • workloads.
Supports and resolution strategies may include:	• awareness raising • counselling • employee assistance programs (EAP) • family support • group activities • job design • mediation • sharing load • time off • training.
Professional development	• career planning/development

© Commonwealth of Australia, 2025 Skills Insight

opportunities may include:	• coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • performance appraisals • personal study • quality assurance assessments and recommendations • recognition of current competence/skills recognition • work experience/exchange/opportunities • workplace skills assessment.

BSBWOR401A Establish effective workplace relationships

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to collect, analyse and communicate information and to use that information to develop and maintain effective working relationships and networks, with particular regard to communication and representation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers play an important role in developing and maintaining positive relationships in internal and external environments so that customers, suppliers and the organisation achieve planned outputs and outcomes. They play a prominent part in motivating, mentoring, coaching and developing team cohesion through providing leadership for the team and forming the bridge between the management of the organisation and team members. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, and leadership and guidance of others.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Collect, analyse and communicate information and ideas	1.1. Collect relevant ***information*** from appropriate sources and analyse and share with the work team to improve work performance 1.2. Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the audience and any specific needs 1.3. Implement ***consultation processes*** to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes 1.4. Seek and value contributions from internal and external sources in developing and refining new ideas and approaches

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.5. Implement ***processes*** to ensure that issues raised are resolved promptly or referred to ***relevant personnel*** as required
2. Develop trust and confidence	2.1. Treat all internal and external contacts with integrity, respect and empathy 2.2. Use the ***organisation's social***, ***ethical and business standards*** to develop and maintain effective relationships 2.3. Gain and maintain the trust and confidence of ***colleagues***, ***customers and suppliers*** through competent performance 2.4. Adjust interpersonal styles and methods to meet organisation's social and cultural environment 2.5. Encourage other members of the work team to follow examples set, according to ***organisation's policies and procedures***
3. Develop and maintain networks and relationships	3.1. Use ***networks*** to identify and build relationships 3.2. Use networks and other work relationships to provide identifiable benefits for the team and organisation
4. Manage difficulties into positive outcomes	4.1. Identify and analyse difficulties, and take action to rectify the situation within the requirements of the organisation and relevant legislation 4.2. Guide and support colleagues to resolve work difficulties 4.3. Regularly review and improve ***workplace outcomes*** in consultation with relevant personnel 4.4. Manage ***poor work performance*** within the organisation's processes 4.5. Manage conflict constructively within the organisation's processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• coaching and mentoring skills to provide support to colleagues

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

• literacy skills to research, analyse, interpret and report information
• relationship management and communication skills to:
  • deal with people openly and fairly
  • forge effective relationships with internal and/or external people, and to develop and maintain these networks
  • gain the trust and confidence of colleagues
  • respond to unexpected demands from a range of people
  • use supportive and consultative processes effectively.

Required knowledge

• relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS), and environmental issues, equal opportunity, industrial relations and anti-discrimination
• theory associated with managing work relationships to achieve planned outcomes:
  • developing trust and confidence
  • maintaining consistent behaviour in work relationships
  • understanding the cultural and social environment
  • identifying and assessing interpersonal styles
  • establishing, building and maintaining networks
  • identifying and resolving problems
  • resolving conflict
  • managing poor work performance
  • monitoring, analysing and introducing ways to improve work relationships.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • range of methods and techniques for communicating information and ideas to a range of stakeholders • range of methods and techniques for developing positive work relationships that build trust and

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	confidence in the team • accessing and analysing information to achieve planned outcomes • techniques for resolving problems and conflicts and dealing with poor performance • knowledge of the theory associated with managing work relationships to achieve planned outcomes.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • demonstration of techniques in managing poor performance and communicating effectively • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • oral or written questioning to assess knowledge of relevant legislation • review of consultation processesimplemented to encourage employees to contribute to issues related to their work • review of documentation outlining reviewing ofworkplace outcomes.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Information may include:	• data appropriate to work roles and organisational policies that is shared and retrieved in writing or verbally, electronically or manually such as:
	  • archived, filed and historical background data
	  • individual and team performance data
	  • marketing and customer related data
	  • planning and organisational documents including the outcomes of continuous improvement and quality assurance
	  • policies and procedures

Consultation processes may include:	• feedback to the work team and relevant personnel in relation to outcomes of the consultation process • opportunities for all employees to contribute to ideas and information about organisational issues
Processes to ensure that issues raised are resolved promptly or referred may include:	• conducting informal meetings • coordinating surveys or questionnaires • distributing newsletters or reports • exchanging informal dialogue with relevant personnel • participating in planned organisational activities
Relevant personnel may include:	• managers • OHS committee and other people with specialist responsibilities • other employees • supervisors • union representatives/groups
Organisation's social, ***ethical and business standards*** may refer to:	• implied standards such as honesty and respect relative to the organisational culture and generally accepted within the wider community • rewards and recognition for high performing staff

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	

	• standards expressed in legislation and regulations such as anti-discrimination legislation
	• written standards such as those expressed in:
	  • code of workplace conduct/behaviour
	  • dress code
	  • policies
	  • statement of workplace values
	  • vision and mission statements

Colleagues, customers and suppliers may include:	• both internal and external contacts • employees at the same level and more senior managers • people from a wide variety of social, cultural and ethnic backgrounds • team members
Organisation's policies and procedures may refer to:	• Materials Safety Data Sheets • organisational tasks and activities undertaken to meet performance outcomes • sets of accepted actions approved by the organisation • Standard Operating Procedures
Networks may be:	• established structures or unstructured arrangements and may include business or professional associations • informal or formal and with individuals or groups • internal and/or external
Workplace outcomes may include:	• OHS processes and procedures • performance of the work team
Poor work performance may refer to:	• individual team members • organisation as a whole • self • whole work team

BSBWOR402A Promote team effectiveness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to promote teamwork. It involves developing team plans to meet expected outcomes, leading the work team, and proactively working with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers have an important leadership role in the development of efficient and effective work teams. They play a prominent part in team planning, supervising the performance of the team and developing team cohesion. They provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

Licensing/Regulatory Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Plan to achieve team outcomes	1.1. Identify, establish and document ***team purpose***, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** in ***consultation*** with team members 1.2. Support team members in meeting expected outcomes
2. Develop team cohesion	2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2. Encourage and support team members to take ***responsibility for own work*** and to assist each other in undertaking required roles and responsibilities 2.3. Provide ***feedback*** to team members to encourage, value and reward individual and team efforts and contributions 2.4. Recognise and address issues, concerns and problems identified by team members or refer to ***relevant persons*** as required

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3. Participate in and facilitate work team	3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2. Give the team support to identify and resolve problems which impede its performance 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1. Maintain open ***communication*** with ***line manager***/***management*** at all times 4.2. Communicate information from line manager/management to the team 4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - boost team morale
  - deal with team conflict
  - deliver messages from management
  - facilitate discussion
  - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

• organisational goals, objectives and plans
• organisational policy and procedures framework
• organisational structure, including organisational chart
• principles and techniques associated with:
  • delegation and work allocation
  • goal setting
  • group dynamics and processes
  • individual behaviour and difference
  • leadership
  • motivation
  • negotiation
  • planning.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • teamwork plan with details of how it was generated and how it will be monitored so that team goals can be met • techniques in communicating information, dealing with team conflict and resolving issues • knowledge of organisational goals, objectives and plans.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques in working with team dynamics • observation of performance in role plays • oral or written questioning to assess knowledge of principles and techniques associated with group dynamics and processes • evaluation of opportunities provided for input of team members into planning, decision making and operational aspects of work team • review of feedback provided to team members • review of teamwork plan.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Team purpose, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** may include:	• action plans, business plans and operational plans linked to strategic plans • expected outcomes and outputs • goals for individuals and the work team • individual and team performance plans and key performance indicators • occupational health and safety (OHS) responsibilities
Consultation may include:	• attending meetings, interviews, brainstorming sessions

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• using email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual effectiveness • using mechanisms to provide feedback to the work team in relation to consultation outcomes
Responsibility for own work may involve:	• individual and joint actions • individuals and teams
Feedback may refer to:	• formal/informal gatherings between team members where there is communication on work related matters • informal communication of ideas and thoughts on specific tasks, outcomes, decisions, issues or behaviours
Relevant persons may include:	• colleagues • direct superior or other management representatives • OHS committees and other people with specialist responsibilities
Communication may include:	• face-to-face • formal/informal interaction • verbal, written or electronic communication
Line manager*/*management may refer to:	• direct superior or other management representatives

ELEMENT	PERFORMANCE CRITERIA
professional development	organisational benchmarks to determine development needs and priorities 3.2. Research and identify sources and plan for opportunities for improvement in consultation with colleagues 3.3. Use ***Feedback*** to identify and develop ways to improve competence within available opportunities 3.4. Identify, access and complete ***professional development activities*** to assist career development 3.5. Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to recognise and develop new and necessary skills and knowledge
- literacy skills to understand the organisation's policies, procedures and communications, to write personal work plans and professional development plans, and to request and receive feedback about performance
- organising skills to prioritise, manage time and meet deadlines
- problem solving skills to develop contingency plans

Required knowledge

- knowledge of relevant business technology applications to schedule tasks and plan work
- knowledge of techniques to prepare personal plans and establish priorities
- methods to identify and prioritise personal learning needs
- understanding of a range of professional development options
- understanding of methods to elicit, analyse and interpret feedback
- understanding of methods to evaluate own performance

BSBWOR501B Manage personal work priorities and professional development

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to manage own performance and professional development. Particular emphasis is on setting and meeting priorities, analysing information and using a range of strategies to develop further competence. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers and focuses on the need for managers to be organised, focussed and skilled, in order to effectively manage the work of others. As such it is an important unit for most managers, particularly as managers serve as role models and have a significant influence on the work culture and patterns of behaviour.

Licensing/Regulatory Information

ELEMENT	PERFORMANCE CRITERIA
	develop ways to improve competence 3.3. Identify, evaluate, select and use ***development opportunities*** suitable to personal learning style/s to develop competence 3.4. Undertake participation in networks to enhance personal knowledge, skills and work relationships 3.5. Identify and develop new skills to achieve and maintain a competitive edge

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to receive, analyse and report on feedback • literacy skills to interpret written and verbal information about workplace requirements • organisational skills to set and achieve priorities.
Required knowledge

• principles and techniques involved in the management and organisation of:
  • performance measurement
  • personal behaviour, self-awareness and personality traits identification
  • personal development plan
  • personal goal setting
  • time management
• management development opportunities and options for self
• organisation's policies, plans and procedures
• types of learning style/s and how they relate to the individual
• types of work methods and practices that can improve personal performance.

Evidence Guide

BSBWRK509A Manage industrial relations

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to manage industrial relations matters within an organisation, with day to day involvement. It includes strategic planning and policy development for industrial relations as well as negotiation, conflict management and dispute resolution. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals with a well established, sound theoretical knowledge base in human resources management and industrial relations who are proficient in using a range of specialised technical and managerial techniques to plan, carry out and evaluate their own work and/or the work of a team. They may or may not have responsibility for supervising the work of others but are authorised to oversee industrial relations in the organisation. However they will have knowledge of current industrial relations trends and legislation. The unit addresses staff who have responsibility for working across the organisation to ensure that there is a policy infrastructure which ensures legislative compliance and clarifies issues. It also addresses the requirement for responding to industrial conflict and grievances.

Licensing/Regulatory Information

ELEMENT	PERFORMANCE CRITERIA
relations strategies/policies and plans	plan for the industrial relations strategies/policies 2.2. Make arrangements for training and development in accordance with identified needs, to support the industrial relations plan 2.3. Undertake ***associated industrial relations activities*** to agree to changes required by policies or implementation plan 2.4. Ensure procedures for addressing grievances and conflict are properly documented 2.5. Communicate key issues about procedures for addressing grievances and conflict
3. Manage negotiations, conflict and disputes	3.1. Train individuals in ***conflict management techniques/procedures*** 3.2. Identify and where possible alleviate or eliminate, sources of conflict or grievance in accordance with legal requirements 3.3. Check documentation and other information sources to clarify issues in dispute 3.4. Obtain expert or specialist advice and/or refer to precedents, if required 3.5. Determine desired negotiation outcomes, negotiation strategy and negotiation timeframes 3.6. Advocate the organisation's position in negotiation to obtain agreement 3.7. Document and if necessary, ***certify*** the agreed outcomes with the relevant jurisdiction 3.8. Implement agreements 3.9. Take remedial action where groups or individuals fail to abide by agreements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to advocate, consult, negotiate and mediate conflict • innovation and problem-solving skills to manage sensitive and important issues • planning and time management skills to meet critical deadlines, to sequence tasks,

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
to prepare submissions and to present cases.
Required knowledge
• enterprise and workplace bargaining processes • key entities in the Australian industrial relations system, including courts and tribunals, trade unions, employer bodies • relevant industrial, occupational health and safety, equal opportunity and anti-discrimination legislation in both the Commonwealth and state jurisdictions.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • demonstrated understanding of contemporary industrial issues and legislation • documented strategies and procedures for dealing with grievances and disputes • performance of negotiation/conflict resolution techniques • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports on industrial issues • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques in negotiation and case presentation

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• observation of presentations • oral or written questioning to assess knowledge of industrial relations legislation • review of documentation outlining long-term industrial relations objectives • review of implementation plan and contingency plan • evaluation of documentation communicating key issues about procedures for addressing grievances and conflict.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Human Resource Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Long-term industrial relations objectives may relate to:	• effective management of grievances, conflict situations and dispute resolution procedures • employee commitment • employee satisfaction • job design • negotiation outcomes • organisational culture • relations with unions or other peak bodies • restructuring • salary, remuneration, benefits or bonuses • workforce planning • workplace reform
Cost benefit means:	• calculation to determine whether the results/outcomes of a particular course of action are sufficient to justify the costs and

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	risks in taking that action
Risk analysis means:	• determination of the likelihood of a negative event preventing the organisation meeting its objectives and the likely consequences of such an event on organisational performance
Implementation plan may include:	• documented objectives, methodology and timeframe • project plan
Associated industrial relations activities may include:	• clarification of terms and conditions of employment of those persons affected • consultation with employee representatives including unions and elected staff representatives • ensuring the legality of proposed strategies, policies and initiatives • referring to employer representatives for advice and support
Conflict management techniques*/*procedures may include:	• controlling difficult situations using legal remedies • dispute resolution procedures • negotiating/bargaining
Certify refers to:	• Australian Workplace Agreements • workplace collective agreements

BSBWRT401A Write complex documents

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to plan documents, draft text, prepare final text and produce documents of some complexity. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals who work in a range of business environments and are skilled in the creation of reports, information and general promotion documents that are more complex than basic correspondence, memos or forms and that require review and analysis of a range of information sources.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan documents	1.1. Determine the ***purposes*** of documents 1.2. Choose ***appropriate formats*** for documents 1.3. Establish ***means of communication*** 1.4. Determine ***requirements of documents*** 1.5. Determine ***categories and logical sequences of data***, ***information and knowledge*** to achieve document objectives 1.6. Develop overview of structure and content of documents
2. Draft text	2.1. Review and organise available data, information and knowledge according to proposed structure and content 2.2. Ensure data, information and knowledge is aggregated, interpreted and summarised to prepare text that satisfies document purposes and objectives 2.3. Include graphics as appropriate 2.4. Identify gaps in required data and information, and collect additional material from ***relevant enterprise personnel*** 2.5. Draft text according to document requirements and genre 2.6. Use language appropriate to the audience

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3. Prepare final text	3.1. Review draft text to ensure document objectives are achieved and requirements are met 3.2. Check grammar, spelling and style for accuracy and punctuation 3.3. Ensure draft text is approved by ***relevant*** enterprise personnel 3.4. Process text amendments as required
4. Produce document	4.1. Choose basic ***design elements*** for documents appropriate to audience and purpose 4.2. Use word processing software to apply basic design elements to text 4.3. Check documents to ensure all requirements are met

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to clarify requirements of documents
- literacy skills to edit and proofread documents; to create documents with a complex, organised structure of linked paragraphs which use simple and complex syntactic structure
- numeracy skills to collate and present data, graphs and annotated references
- problem-solving skills to use processes flexibly and interchangeably.

Required knowledge

- enterprise style guide/house style
- formatting styles and their impact on formatting, readability and appearance of documents
- organisational requirements for ergonomics, work periods and breaks, and resource conservation techniques
- rules and conventions for written English, as defined by general and specialist dictionaries and books about grammar.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • production of documents • editing draft text to ensure accuracy and clarity of information • knowledge of enterprise style guide/house style.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of documents and style guides.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of structure and content of documents • review of draft documents • review of final documents • demonstration of techniques • oral or written questioning to assess knowledge of word processing software functions.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBITU401A Design and develop complex text documents.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Purposes of documents may include:	• conveying research findings • documenting policies, procedures and processes • influencing attitudes, opinions, beliefs • meeting legal requirements • meeting other data, information or knowledge needs of an audience • proposing recommendations, options and actions
Appropriate formats for documents may include:	• detailed business letters • emails • instructions and procedures • manuals • publications, leaflets, brochures • reports • speeches and presentations • submissions tender documentation and public notices • website text
Means of communication may include:	• software packages such as MS Word, MS Excel, MS PageMaker, MS PowerPoint and templates
Requirements of documents may include:	• compliance with genre • compliance with proformas, standardised reporting requirements or undertakings made by the organisation about reporting • file types and sizes for online documents • languages other than English requirements • legal or traditional requirements for the particular document format • organisational policy, procedures and guidelines applying to writing documents, including house style • point numbering systems • requirements for illustrations, photographs, graphs, charts, maps and other illustrative material

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	to explain texts • standards for references, footnotes, citations, acknowledgements • time lines, including deadlines • word length • writing styles, including simplicity of English and use of technical language
Categories and logical sequences of data, information and knowledge may include:	• arguments and rebuttals • categories and sequences traditionally used for the particular type of document being prepared • chronological, alphabetical or operating sequences • facts, observations, conclusions and recommendations • illustrative case studies and other examples • linking and summary statements • recommendations and supporting arguments
Relevant enterprise personnel may include:	• colleagues/staff in own workÂ section/ teamÂ members • consultative committees • internal providers of specialist expertise • managers/leaders/coordinators/supervisors • owners • staff in relevant work sections
Design elements may include:	• capitals and underlining • fonts • headings • illustrations, photographs and other illustrative material for design purposes • justification and alignment • lists and tables • logos, branding, organisational identity requirements • margins and paragraph indentation • page shape • page size • templates • use and amount of colour • use and amount of white space

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop program parameters	1.1 Analyse issues of wide community concern to develop an agency position and to ascertain the need for new program /s 1.2 Undertake appropriate work to ascertain support, capacity for a coordinated effort and factors which will effect provision of services 1.3 Undertake research to identify key people, issues to be addressed, possible *strategies and options for action* 1.4 Undertake appropriate planning and liaison including developing concept plans in consultation with relevant communities and *stakeholders*
2. Design programs with the *community*	2.1 Develop a program plan which reflects identified parameters and incorporates an *evaluation of a range of program options* 2.2 Undertake consultation to determine preferred program options particularly in areas of high need or with targeted communities 2.3 Seek help from participating agencies for implementation arrangements 2.4 Identify and seek *resources*
3. Implement programs	3.1 Where appropriate, conduct and evaluate pilots and make adjustments to ensure the program achieves its objectives 3.2 Implement programs in accordance with the development plan 3.3 Develop and implement *promotion and marketing*

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	strategies
	3.4 Develop and maintain systems and resources for administrative support of *community programs*
	3.5 Encourage target group to participate fully in the program
4. Evaluate programs	4.1 Evaluate program design and outcomes according to criteria and specifications identified in the program plan
	4.2 Use results of evaluation for revision and ongoing development
	4.3 Involve interested and/or relevant people in program evaluation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- The cultures, concerns, beliefs and aspirations of the community in question
- The impact of cultural or community attitudes on appropriate roles, relationships and approaches of the worker
- The impact of cultural and community attitudes within that community
- The implications of differences in attitudes and values
- Community development as a social change strategy
- Decision-making structures and processes at organisation, community, regional and system level
- Relevant legislation and public policies

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- Social, community and youth issues
- Nature of community development work
- Definitions of community
- 'Community' as ideological tool
- Personal values and community development
- Emergence of community development
- Contemporary community development practice
- Social movements
- Sociology
- Social theories
- Social inequality
- Sociology of class
- Sociology of gender
- Contemporary economics and politics and their impact on community development

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Demonstrate effective management of community programs through the application of current accepted best practice

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

- Undertake research and consultation
- Apply a range of community development approaches
- Coordinate people, processes and information
- Analyse data, information and relationships
- Provide support to a diverse range of people/organisations
- Analyse complex issues
- Work with and through community leaders
- Demonstrate application of skills in:
  - advocacy
  - conflict resolution/negotiation and mediation
  - cross cultural communication and negotiation
  - verbal and written communication
  - literacy adequate to prepare a range of resource material appropriate to the target group

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- Maintain documentation as required, including effective use of relevant information technology in line with work health and safety (WHS) guidelines

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:	• The individual being assessed must provide evidence of specified essential knowledge as well as skills • This unit can be assessed in the community or in a simulation which related closely to the experience of the workplace and the community • Consistency in performance should consider specific program and community requirements
Access and equity considerations:	• All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities
Context of and specific resources for assessment:	• This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged • Resources required for assessment include access to

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	an appropriate workplace or an environment that effectively simulates workplace and community conditions
Method of assessment:	• In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios • Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes • Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Community may be:	• Individuals and groups defined by organisation programs and services • Other agencies providing services to the designated individuals and groups • People with specified needs and interests • People using the organisation's services/programs • Geographic

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Community programs may include:	• Community development activities and strategies • Education and information projects
Stakeholders may include:	• Residents within a community • Businesses within or related to a community • Advocacy and special interest groups • Decision-makers and community leaders • Individuals, groups and communities affected by issues or strategies • Owners or managers of resources required • Grants/funding agencies • Government and non government organisations • Peak bodies • Colleagues and collaborators
Strategies and options for action may include:	• Community/public education, awareness raising • Lobbying and advocacy • Development of new services, opportunities • Developing the capacity of individuals, groups and communities to meet their own needs and objectives • Non violent direct action • Participatory action research • Development of new businesses or employment opportunities • Health promotion, development of healthy communities/attitudes and environmental causes of ill health • Development of community resources and facilities • Development of recreational/entertainment • Adjustments to existing programs/services to make them more accessible to young people • Strategies to increase access to facilities, services • Decision-making including cost, physical, information • Public processes
Resources may include:	• Information • Knowledge/skills

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

- Equipment and materials
- Facilities, buildings, transport
- Organisation structures, networks
- Sector/regional networks
- Access to decision-makers
- Management support
- Personnel
- Money

Evaluation of a range of program options may include:

- Projected outcomes to achieve objectives
- Cost efficiency and effectiveness
- Relevance to high needs and priorities
- Scope and coverage
- Capacity to evaluate
- Availability of resources/skills
- Consistency of philosophy
- Ethical considerations
- Impact on organisation/other services/programs
- Personnel/industrial/employment implications
- Legislative/statutory/accountability implications

Promotion and marketing strategies may include:

- Letters (by fax, mail, or any other means of transmission)
- Newsletters/journals
- Internal organisation communication (e.g. Internal memos, minutes of meetings)
- Artwork, graphics
- Reports, discussion papers, briefing papers
- Brochures, fliers and written advertisements
- Posters
- Audio and audio visual productions
- Performing arts presentations
- Verbal/public presentations
- Meetings, seminars, workshops and forums
- Print or telecommunications media

Consultation strategies may include:

- Meetings, seminars, workshops or other forums
- Interviews (formal and informal)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

- Written surveys (questionnaires, letters, submissions)
- Suggestion boxes
- Alternative communication such as graffiti walls
- Networks
- Professional associations
- Call for submissions

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement the food safety program	1.1. Food handling requirements are identified 1.2. Food handling is carried out according to the food safety program 1.3. Food safety hazards are controlled as required by the food safety program 1.4. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken 1.5. Food safety information is recorded to meet requirements of the food safety program 1.6. The workplace is maintained in a clean and tidy order to meet workplace standards 1.7. Work is conducted in accordance with workplace environmental guidelines
2. Participate in maintaining and improving food safety	2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements 2.2. Processes, practices or conditions which could result in a food safety breach are identified and reported according to workplace reporting requirements 2.3. Corrective action is taken in accordance with the food safety program 2.4. Food safety issues are raised with designated

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	personnel
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and follow workplace information relating to food safety responsibilities
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- monitor food safety hazards as required by the food safety program, including methods such as visual inspection, sampling and testing
- record results of monitoring, and maintain records as required by the food safety program
- identify and report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- take corrective action as required by food safety program within level of responsibility
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and dispose of out-of-specification or contaminated food, waste and

© Commonwealth of Australia, 2025 Skills Insight

recyclable material according to food safety program as this requirement relates to own work responsibility
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- record food safety information in appropriate format
- clean and sanitise equipment according to enterprise procedures
- collect samples and conduct tests according to the food safety program according to enterprise procedures
- participate in investigating food safety breaches according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of HACCP-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
- awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work
- methods used to monitor that food safety is under control, including the purpose of sampling and taking measurements, such as temperature and pH, and conducting inspections and tests
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records and the recording requirements of the food safety

© Commonwealth of Australia, 2025 Skills Insight

program
- methods used in the workplace to isolate or quarantine food which may be unsafe
- product and ingredient traceability procedures, such as product recall where required by work responsibilities
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- waste collection, recycling and handling procedures relevant to own work responsibilities
- cleaning and sanitation procedures where relevant
- impact of rework handling/addition on food safety where relevant
- sampling and test methods where relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify own responsibilities with regard to food safety • identify food safety risks in the workplace and the control measures used to manage them • apply control measures in own work • monitor compliance with food safety standards • identify and act on non-compliances and participate in improving safety • maintain required standards of personal hygiene • complete workplace records as required

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• apply safe work practices and identify OHS hazards and controls • apply food safety procedures.

Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to:
	• food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as:
	  • Good Manufacturing Practice (GMP)
	  • related work instructions and procedures
	  • work tasks and responsibilities
	  • appropriate clothing and related apparatus
	  • reporting and monitoring systems
	  • cleaning and sanitation policies and procedures as required
	  • sampling and test procedures and related equipment as required.

Method of assessment	This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be: • FDFOP2004A Clean and sanitise equipment • FDFOP2013A Apply sampling procedures • FDFOP2063A Apply quality systems and procedures • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
A food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures
Workplace information	Workplace information may be provided in: • food safety program • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction
Food handling	Food handling refers to: • food receipt and storage • food preparation • cooking, holding, cooling, chilling and reheating • packaging, disposal
Products/materials handled and stored	Products/materials handled and stored can include: • raw materials • ingredients • consumables • part-processed product • finished product • cleaning materials
Examples of a breach of food safety procedures	Examples of a breach of food safety procedures could include: • failure to check delivery temperatures of potentially hazardous chilled food

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• failure to place temperature-sensitive food in temperature controlled storage conditions promptly • failure to wash hands when required • use of cloths for unsuitable purposes
Responsibility for monitoring food safety	Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace
Monitoring	Monitoring describes the methods used to confirm that a food safety hazard is in control, such as: • taking temperatures • collecting samples • conducting visual inspections • conducting other tests as required
Food safety hazard	A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect
Hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations
Reporting of health conditions and illnesses requirements	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Appropriate clothing and footwear	Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include: • purpose designed overalls or uniforms • hair-nets

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• beard snoods • gloves • overshoes

FDFFS3001A Monitor the implementation of quality and food safety programs

Modification History

November 2011: minor typographical error corrected.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to provide a leadership role in supporting day-to-day implementation of the food safety/quality programs in a work area. It also involves supporting others to implement the requirements of the food safety/quality procedures.

Application of the Unit

Application of the unit	This unit applies to those with formal responsibility for others, and to those required to model workplace policies and procedures but who have no formal management role. This unit is based on and equivalent to the guideline food safety unit GFSOFSA Oversee the day-to-day implementation of food safety in the workplace. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH3001A Monitor and maintain Good Manufacturing Practice procedures.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Ensure others in the work area are able to meet quality and food safety requirements	1.1. Hazard control and clothing and equipment appropriate to work requirements are available, functional and correctly fitted 1.2. Information on food safety/quality responsibilities and procedures is current, accessible and communicated to others in the work area 1.3. Information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area 1.4. Food safety/quality hazards and control measures used in the work area can be identified by those in the work area 1.5. Mentoring and coaching support is available to support individuals/groups to implement quality and

ELEMENT	PERFORMANCE CRITERIA
	safe food handling procedures 1.6. Training needs are identified and addressed within level of responsibility
2. Monitor observance of quality standards and food safety programs in the work area	2.1. Work procedures in the work area are clearly defined, documented and followed 2.2. Deviation from identified procedures is identified, reported and addressed within level of responsibility 2.3. Personal behaviour is consistent with workplace policies and procedures that support food safety and quality 2.4. Food safety and/or quality hazards are identified and reported according to workplace procedures 2.5. Food safety and quality information is recorded to meet workplace reporting requirements 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines
3. Take corrective action in response to quality and food safety non-compliance	3.1. Workplace procedures for responding to quality and food safety non-compliance are promptly implemented 3.2. Hazardous events are investigated to identify cause 3.3. Control measures to prevent recurrence and minimise risks of hazardous events are implemented
4. Maintain and improve quality and food safety in the work area	4.1. Processes or conditions which could result in a breach of food safety procedures or quality specifications are identified, assessed, removed or and/reported within level of responsibility and according to workplace procedure 4.2. Risk assessments are conducted and appropriate control measures are identified and implemented in the work area 4.3. Recommendations arising from risk assessments are implemented within level of responsibility 4.4. Inadequacies in control measures are identified and reported according to company reporting requirements 4.5. Matters raised relating to quality/food safety are promptly resolved and/or referred to appropriate personnel 4.6. The work group is consulted and advised of

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	quality/food safety matters relevant to work role 4.7. Opportunities for improving food safety and quality are identified and raised with relevant personnel 4.8. Procedures are developed or revised to support effective control of quality and food safety hazards 4.9. Quality/food safety records are reviewed to ensure they are complete and meet the quality system, food safety program and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access, interpret and communicate information about the food safety program, quality requirements and related procedures to others in the work area
- demonstrate two-way communication, including active listening and responding constructively to feedback
- provide access to and maintain current food safety/quality documentation
- model safe food handling and quality practices and procedures to achieve required outcomes, including demonstrating:
  - work procedures that meet the requirements of quality and food safety
  - cleaning and sanitising equipment
  - sampling and testing as appropriate according to quality and food safety requirements
  - maintaining personal hygiene
  - wearing appropriate clothing and footwear as required by the work task
  - following procedures when moving within and between work areas
  - reporting health conditions and illnesses according to workplace procedures
  - handling, cleaning and storing equipment, utensils and packaging materials as appropriate
- identify control points in the work area and demonstrate monitoring techniques used (control points include critical, quality and regulatory control points)
- support others to meet quality standards and follow food safety procedures by ensuring that all personnel in the work area receive the information required and have the necessary skills and equipment to carry out their responsibilities

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- identify, report and/or address food safety/quality non-compliance in an appropriate and timely manner within level of responsibility
- determine when and how to make adjustments to maintain output within level of responsibility
- identify, report and/or address food safety/quality training and development needs of others in the work area
- ensure that appropriate and timely action is taken in response to non-compliance
- handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
- participate in investigations of non-compliance and risk assessment processes
- participate in consultation processes to improve quality and food safety outcomes in the workplace
- review practice and procedures to implement recommendations arising from risk assessments and/or improvement proposals within level of responsibility, such as collecting and analysing food safety/quality records, reviewing operating procedures and communicating changes to others in the work area
- ensure that housekeeping standards are maintained and that equipment is in operational order, such as participating in the management of equipment calibration
- monitor the recording of quality and food safety information to confirm that records accurately reflect performance and meet the requirements of the food safety and quality programs
- participate in food recall procedures as required, within level of responsibility
- facilitate consultation processes according to enterprise procedures
- lead investigations of quality and food safety incidents according to enterprise procedures
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relevant to the workplace
- principles of a HACCP-based approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- basic concepts of quality assurance including hazards, risk assessment and control methods
- company programs and systems in place to manage and support quality and food safety in the workplace, which may involve separate or integrated programs, including systems for maintaining and updating documents, such as operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
handling areas, including personal clothing maintenance, laundering and storage requirements • appropriate bandages and dressings to be used when undertaking food handling • housekeeping requirements and responsibilities relating to own work, where relevant this includes use and storage of housekeeping/cleaning equipment • procedures to follow in the event of pest sighting or discovery of infestation • purpose and importance of cleaning and sanitation procedures • legal obligations for food safety and quality, including an awareness of government legislation and customer requirements • food safety and quality responsibilities and requirements relating to the work area • awareness of common micro biological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence • suitable standard for materials, measuring devices, equipment and utensils used in the work area • properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements • current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents within level of responsibility, including an understanding of common micro biological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes • procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials • sampling procedures, test methods and inspections • options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses and level of responsibility for decision making • methods used in the workplace to isolate or quarantine food which may be unsafe • waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, such as hazardous waste where relevant • traceability and recall procedures within level of responsibility • documentation system and procedures, including record keeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace • auditing arrangements, roles and responsibilities as they relate to own work responsibilities, such as internal and external audit processes • appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace • cleaning and sanitation procedures where relevant • impact of rework handling/addition on food safety where relevant • sampling and test methods where relevant

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• facilitation and consultation techniqueswhere relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • describe quality and food safety program, risks and control measures of the work area • confirm that control measures are in place and that personnel in the work area are equipped and informed to implement programs • identify, address and follow up on non-compliances • identify causes of non compliances • conduct risk assessments and recommend responsive action • provide support to others to implement the programs • complete and maintain documentation.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • food safety program for the work area which identifies critical control points, control measures and corrective action • quality policy, system and procedures • work area or system in which quality and food safety practices and procedures are to be monitored • personal protective clothing and equipment as required • review/audit arrangements • reporting and monitoring systems.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Method of assessment	This unit should be assessed together with other units of competence relevant to the function or work role. Examples could be: • FDFPPL3001A Participate in improvement processes • FDFPPL3004A Lead work teams and groups • BSBRES401A Analyse and present research information.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Work responsibilities	Work responsibilities may include formal or informal responsibility for modelling appropriate quality/food safety policies and procedures and providing a support role to others in the work area
Food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Quality systems	Quality systems may be externally accredited, such as an ISO system, or internally designed and managed
Workplace information	Workplace information may be provided in: • food safety and quality policies and programs • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction incorporating food safety and quality requirements
Incidents	A food safety incident is: • a situation where the safe limits or parameters identified by the food safety program are not met A quality incident is: • a situation where the quality limits or parameters identified in specifications or processing instructions are not met
Monitoring	Monitoring describes the methods used to confirm that a food safety or quality hazard is in control, such as: • taking temperatures • collecting samples • conducting visual inspections • additional testing as required
Responsibility for identifying breaches of food safety procedures	Responsibility for identifying breaches of food safety procedures and taking corrective action occurs in the context of the food safety program and within scope of responsibility
Responsibility for identifying non-compliance against quality standards	Responsibility for identifying non-compliance against quality standards occurs within the context of defined standards or specifications and relates to work area
Personal hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	legislation/regulations
Reporting of health conditions and illnesses	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Operator responsibilities	The operator at this level may not have direct responsibility for overseeing the training/development of team members. At a minimum they must be able to identify development needs of others in the work area and refer this information to the relevant personnel. The operator at this level may not have responsibility for independently assessing risks and determining the effectiveness of control measures. However, they would be expected to observe day-to-day effectiveness and participate in assessment and review processes. Responsibilities at this level may include facilitating consultation processes within level of responsibility
Record keeping	Record keeping complies with customer, legal and food safety program requirements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Follow workplace procedures to operate equipment	1.1. Checks are conducted to confirm equipment is ready and safe to operate 1.2. Operating procedures are followed to start and operate equipment to achieve required outcome
2. Monitor and complete equipment operation	2.1. Equipment is monitored to identify variation in operating conditions 2.2. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.3. Equipment is shut down according to workplace procedure 2.4. The work area is maintained according to housekeeping standards 2.5. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • access workplace information on equipment operating requirements and procedures • select, fit and use personal protective clothing and/or equipment • conduct pre-start checks, such as inspecting equipment condition to identify any

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, and confirming that equipment is clean and that all safety guards are in place and operational • start and operate equipment according to procedure • monitor the output of equipment operation against requirements • take corrective action in response to out-of-specification results • shut down and clean equipment as required • respond to and/or report equipment failure within level of responsibility • locate emergency stop functions on equipment • maintain work area to meet housekeeping standards • use basic process control screens and panels according to enterprise procedures • complete workplace records according to enterprise procedures • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • basic operating principles of equipment used, such as main equipment components, status and purpose of guards, emergency stop, isolation and lockout controls, equipment operating capacities and applications • services required and action to take if services are not available • quality requirements of materials/consumables used and the effect of variation on outputs • operating requirements and parameters and corrective action required where operation is outside specified operating parameters • typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems • contamination/food safety risks associated with equipment operation and related control measures • common causes of variation and corrective action required • occupational health and safety (OHS) hazards and controls • shutdown and cleaning procedures, including isolation, lock out and tag out procedures and responsibilities • environmental issues and controls relevant to equipment operation, including waste collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • recording procedures and responsibilities where relevant

FDFOP1006A Monitor process operation

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to monitor the operation of equipment used in a production process.

Application of the Unit

Application of the unit	This unit has application in a food production environment. It typically targets the production worker responsible for monitoring that equipment is operating according to standard operating procedures. Monitoring typically includes visual inspection and checking and replenishing of consumables. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor equipment operation	1.1. Equipment is inspected and monitored to confirm safety and operating condition 1.2. The process is monitored to confirm performance is maintained within specification 1.3. Materials and consumable levels are maintained as required 1.4. Workplace records are maintained in accordance with workplace requirements 1.5. Work is conducted in accordance with workplace environmental guidelines 1.6. The work area is maintained according to housekeeping standards
2. Identify and respond to non-conformance	2.1. Out-of-specification product, process and equipment performance is identified rectified and/or reported according to workplace procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Required skills
Ability to: • select, fit and use appropriate personal protection clothing and/or equipment • monitor the process and equipment operation to maintain the process within the required parameters, such as conducting visual inspections and basic tests • monitor supply and flow of materials and/or consumables to and from the process, such as replenishing material inputs and removing processed materials or product • identify and take action to correct out-of-specification results within level of responsibility (where corrective action is outside level of responsibility, report to appropriate personnel) • maintain work area to meet housekeeping standards • sort, collect, treat, recycle or dispose of waste according to enterprise procedures • demonstrate shutdown and cleaning sequence according to enterprise procedures • record workplace information according to enterprise procedures • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • purpose of equipment • required output and quality requirements to be met by the process • basic operating principles of equipment used, such as main equipment components, status and purpose of guards, and emergency stop, isolation and lockout controls, and where required, the operating features of the control panel and the relationship between control panel functions and the physical equipment • common causes of faults or unacceptable performance and action required within level of responsibility • procedures and responsibility for reporting problems • occupational health and safety (OHS) hazards and controls • waste handling requirements and procedures related to process operation • shutdown and cleaning procedure where relevant • recording system and responsibilities where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Carry out responsibilities in accordance with workplace policies and procedures	1.1. Information on conditions of employment, company policies and procedures is identified 1.2. Policies and procedures are applied when carrying out work role 1.3. Work is conducted in accordance with workplace environmental guidelines
2. Identify and locate company product and processes	2.1. Company product range is identified 2.2. Production/packaging stages and processes carried out on site are identified and located

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify and access information on conditions of employment and workplace policies and procedures (information may be provided in print, audio-visual and/or verbal formats)
- locate workplace amenities and facilities relevant to work responsibilities
- identify and locate materials/storage areas in the workplace, relevant to work role, such as locating tank farms and other bulk storage locations and identifying special storage conditions (e.g. hazardous goods and temperature controlled stores areas)
- identify and locate production and packing processes/main work areas in the workplace

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • workplace structure and key personnel • rights and responsibilities of employees as defined in employment conditions • company policies and procedures relating to work responsibilities, including areas covered by legislation and related responsibilities • appropriate personal conduct in a work area, including minimum clothing and personal hygiene standards when entering and moving around a food processing area in order to protect both employees and product safety,and behaving appropriately towards others in the work area • industrial representation arrangements • site security arrangements, including responsibility to report when coming on and off site • site layout, including main facilities, such as canteens, parking areas, storage areas, processing and packing areas and location of emergency exits and assembly areas • the main products/product range produced in the workplace • stages and processes used to manufacture and package products • personal reporting roles and responsibilities

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify expectations and responsibilities of the work role

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• identify organisational products and processes • identify location of operations.
Context of and specific resources for assessment	Assessment must occur in a real workplace where the assessee has access to: • advice on work roles and responsibilities • advice on workplace policies, codes of practice, procedures, structure and personnel • advice on conditions of employment and entitlements • site maps • workplace access.
Method of assessment	This unit should be assessed together with other units of competency relevant to the work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP
Company policies and procedures	Company policies and procedures referred to are additional to those covered by OHS, quality, food safety and environmental competency standards.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	They include: • codes of practice and general employment policies and procedures in areas, such as sexual harassment • equal employment opportunity (EEO)/affirmative action • anti-discrimination • racial vilification • workplace bullying
Conditions of employment	Conditions of employment typically include: • pay and conditions • leave arrangements • reporting and timekeeping responsibilities • terms of employment, including permanent, casual and probationary periods • disciplinary procedures • staff facilities and amenities
Key personnel	Key personnel may include but are not limited to: • human resource personnel responsible for recruitment, training, pay and conditions issues • relevant site and operations managers • supervisors/team leaders • industrial/work area representatives

FDFOP1009A Follow work procedures to maintain quality

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to follow basic quality assurance practices related to monitoring quality where work involves routine manual processes and/or operation of simple automated equipment.

Application of the Unit

Application of the unit	This unit has application in a food processing environment. It typically targets the production worker responsible for following quality procedures in own work operations. Where numeracy skills beyond those identified to conduct basic quality checks are required, FDFOP2061A Use numerical applications in the workplace or FDFOP1008A Take and record basic measurements, should be selected. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH1001A Follow work procedures to maintain Good Manufacturing Practice.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor quality of work outcome	1.1. Quality requirements are identified 1.2. Inputs are inspected to confirm capability to meet quality requirements 1.3. Work is conducted according to work procedures 1.4. Work is conducted in accordance with workplace environmental guidelines
2. Identify and report unacceptable inputs and/or outputs	2.1. Work area, materials, processes and product are routinely checked to ensure compliance with quality requirements 2.2. Unacceptable quality is identified and corrective action is taken within the level of responsibility to maintain quality standards 2.3. Quality variation is reported according to workplace reporting requirements

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and apply workplace information on quality requirements for own work
- identify control points or inspection points for own work and related methods used to monitor quality
- carry out relevant checks and inspections as required, such as checks and inspections on equipment, materials, product, packaging consumables and processing conditions relevant to own work
- identify and respond to out-of-specification or unacceptable inputs and/or outputs, such as making adjustments within level of responsibility and/or reporting
- maintain quality of own work
- conduct tests related to work responsibilities according to enterprise procedures
- record quality data in required format according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- quality policy, procedures and responsibilities
- quality personnel and their respective responsibilities, such as internal personnel and external auditors
- requirements of internal and external customers
- sources of advice on quality requirements for own work
- control points for own work, including the purpose of the control point, the risk if not controlled and the method of control where relevant
- monitoring, inspection and checking procedures relating to process control requirements
- evidence of out-of-specification or unacceptable performance
- procedures for responding to out-of-specification or unacceptable performance/outcomes
- responsibilities for reporting and recording quality information
- sampling and test procedures where relevant
- recording requirements and responsibilities where relevant

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with company policies and procedures, licensing and regulatory requirements, legislative requirements and industrial awards and agreements
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • quality specifications • food safety and/or Good Manufacturing Practice (GMP) codes • log sheets • basic data • standard forms • written or verbal instruction
Responsibility for monitoring quality	Responsibility for monitoring quality relates to immediate work responsibilities and may require: • visual inspections and checks, including using basic counting skills
Monitoring	Monitoring typically involves visual inspection or checks at control points. Control points refer to those key points in a work process which must be monitored and controlled. This includes food safety (critical) control points
Out-of-specification or unacceptable outcomes	At this level, responding to out-of-specification or unacceptable outcomes typically involves exercising judgment within clearly defined parameters and reporting/referring to others

FDFOP2010A Work with temperature controlled stock

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to store and retrieve temperature controlled stock from appropriate storage facilities.

Application of the Unit

Application of the unit	This unit has application in a food processing environment. Where work is undertaken in a freezer storage environment, also consider FDFOP2007A Work in a freezer storage area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Store stock to meet temperature control requirements	1.1. Goods requiring temperature control are identified 1.2. Goods are located in correct storage areas to meet storage temperature, stores handling and stock rotation requirements 1.3. Stores information is recorded according to workplace requirements
2. Monitor and maintain temperature of stock within specifications	2.1. Stock temperature is monitored to confirm temperature is within specified limits 2.2. Storage areas are monitored to confirm temperature is within storage zone limits 2.3. Residence time in temperature controlled stores is monitored to meet stock control requirements 2.4. Out-of-specification storage temperatures are identified and corrective action is taken
3. Transfer temperature controlled stock	3.1. Goods are handled and transferred to maintain temperature control and meet stock rotation requirements 3.2. Stores transfer information is recorded according to workplace reporting requirements 3.3. Work is conducted in accordance with workplace environmental guidelines

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to determine product handling and storage requirements
- identify storage requirements including temperature limits, minimum duration at given temperatures, and segregation and co-storage requirements
- identify temperature controlled storage facilities and temperature zones available
- select, fit and use personal protective clothing and/or equipment
- use materials handling equipment in a temperature controlled environment as required to undertake work functions
- follow procedures to measure temperature of product, such as use of instrumentation as required to take core and surface temperatures
- read instrumentation, such as temperature gauges, to monitor stores and zone temperatures
- identify and report out-of-specification temperatures in product and storage facilities
- take corrective action in response to out-of-specification temperatures including implementation of procedures to segregate damaged or potentially unsafe product
- complete records of stock receival and transfer as required
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- occupational health and safety (OHS) hazards and controls, including the purpose and limitations of protective clothing and equipment
- temperature controlled storage facilities and capacities available in the work area, such as temperature zones within a single store and concepts (e.g. the Cold Chain compliance) as relevant to work requirements
- temperature control requirements of stock handled in the work area, including acceptable temperature ranges and consequences of failing to meet these ranges, and where required requirements for gradual temperature change
- stock handling procedures for receiving and locating stock within a store, including stock rotation and procedures for identifying, segregating, and disposing of damaged or potentially unsafe stock

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• stock handling procedures for transferring temperature controlled stock from a temperature controlled environment, including maximum duration stock can be held outside a controlled environment • food safety and quality consequences of stock temperature control requirements not being met • monitoring procedures and instrumentation, including use of thermometers or other temperature measuring instrumentation • notification, recording and reporting requirements • operating procedures for goods handling equipment as required • housekeeping requirements for work area • recording requirements and procedures

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify storage requirements of temperature controlled stock • monitor temperature of storage area and stock to ensure standards are maintained • handle and transfer stock to maintain required conditions • identify and act on non-conformances • complete workplace documentation • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	requirements • temperature storage specifications • stock handling and rotation systems • controlled temperature storage facilities • stock requiring storage • load shifting equipment as required • stock information recording system and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2007A Work in a freezer storage area • TLIA1407C Use product knowledge to complete work operations • TLID1007C Operate a forklift • TLIK107C Use infotechnology devices and computer applications in the workplace • TLID207C Shift a load using manually-operated equipment.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Temperature controlled stock	Temperature controlled stock may include: • stock to be stored at a constant temperature and at different temperatures for given durations
Temperature controlled storage facilities	Temperature controlled storage facilities include: • any controlled temperature environment

FDFOP2011A Conduct routine maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to inspect equipment and carry out routine maintenance and/or adjustment using a limited range of hand tools.

Application of the Unit

Application of the unit	This unit has application in a food production environment. It typically targets the production worker responsible for conducting simple and routine maintenance tasks to support the operation of machines or equipment. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Conduct routine inspection of plant and equipment	1.1. Equipment is inspected to identify signs of wear 1.2. Nature of maintenance requirement is assessed
2. Prepare to conduct routine maintenance	2.1. Maintenance task is assessed to determine tools and services required 2.2. Equipment is prepared for maintenance 2.3. Hand tools are selected according to task requirements 2.4. Tools are checked before use and unsafe and/or faulty items are reported within standard procedures 2.5. Maintenance is planned and scheduled in consultation with affected work areas to minimise disruption to production
3. Carry out routine maintenance	3.1. Routine maintenance on equipment is carried out according to workplace procedures 3.2. Maintenance activities are reported according to workplace reporting requirements
4. Complete maintenance tasks	4.1. Equipment is returned to operating order 4.2. Tools and materials are stored according to workplace procedure

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.3. Relevant personnel are notified of maintenance completion 4.4. Housekeeping standards are maintained 4.5. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information such as the equipment history, faults or difficulties
- select, fit and use personal protective clothing and/or equipment
- inspect equipment for signs of wear, such as visual inspections to detect leaks, listening for unusual noises and/or vibrations
- identify and describe maintenance requirements, including the ability to assess the urgency of the maintenance issue, recognise common types of maintenance requirements and run basic checks according to workplace procedures to confirm the need for and type of maintenance support required
- take action to address maintenance requirements, such as carrying out routine maintenance within level of skill and responsibility and/or reporting outstanding maintenance to appropriate personnel using the required forms or request system
- plan and schedule maintenance within level of responsibility, such as consulting affected personnel and/or work areas on timing and notifying of maintenance progress
- prepare equipment and work area for routine maintenance, including cleaning equipment prior to carrying out maintenance and confirming that equipment is safe to work on, and simple isolation or tag out of equipment as required by workplace procedure
- select and use hand tools as required to carry out maintenance task
- select relevant parts and materials as required to carry out maintenance task
- carry out routine maintenance tasks according to workplace procedures
- on completion of maintenance tasks, return equipment to operational order, including confirming that all equipment parts, nuts and bolts are accounted for and correctly tightened, and where required, cleaning and sanitising equipment
- store tools in designated location, including basic tool maintenance, such as oiling
- complete records of maintenance as required

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• maintain work area to meet housekeeping standards • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • system in place to manage maintenance of plant and equipment in the workplace, including programs, such as responsive, preventative and proactive maintenance as appropriate • responsibilities for participating in the maintenance program, including scope of operator responsibilities, roles of others involved in plant and equipment maintenance and procedures for raising maintenance orders where requirements are outside operator role • basic operating principles of equipment to be maintained • signs and symptoms of faulty equipment and early warning signs of potential problems • basic checks used to confirm the nature of maintenance requirements, including distinguishing between mechanical and electrical faults and identifying probable causes or conditions that may increase maintenance requirements of equipment used • procedures for issuing, maintaining and storing tools used • safe use of hand tools and measuring instrumentation relevant to maintenance responsibilities • lubrication requirements, including requirements to use food grade lubricants as required and consequences of using incorrect type or amount of lubricants • safe work procedures, including appropriate signage of maintenance activities as required, use of appropriate personal protective clothing and equipment, and awareness of safety hazards and controls relating to maintenance tasks • methods used to render equipment safe to work on or clean including lock out/tag out and isolation procedures (in some cases this may involve liaising with other maintenance operators) • procedures and inspections to be carried out to confirm that equipment is in operating order and all parts are accounted for • food safety risks arising from poor personal hygiene, cleaning and housekeeping practices and procedures associated with routine maintenance • maintenance planning, scheduling and recording procedures

assessment	a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Routine maintenance	Routine maintenance is carried out according to company policies and procedures, licensing requirements, legislative requirements and industrial awards and agreements
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • specifications • production log books • routine maintenance schedules • manufacturers' advice • condition monitoring information
Typical routine maintenance tasks	Typical routine maintenance tasks will depend on the workplace and may include: • replacement of consumable components, such as O-rings, hoses, filters and other 'bolt-on/bolt-off' equipment parts • lubrication of equipment and maintenance of fluid levels • simple adjustment, alignment or attachment of equipment components, parts, guides and sensors • clearing blocked nozzles, such as glue nozzles • positioning/attaching equipment components • carrying out basic maintenance on video inkjet

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	machines
Tools and materials	Tools and materials depend on the maintenance function and may include: • a limited range of hand tools, such as spanners and screwdrivers, grease guns, Allen keys and measuring and alignment equipment Materials may include: • lubricants and consumables for video inkjet printers
Inspections of equipment	Inspections of equipment may be carried out: • informally or as part of a structured program associated with proactive maintenance

FDFOP2013A Apply sampling procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to understand the requirements of sampling plans, and to collect and transfer samples to retain sample integrity.

Application of the Unit

Application of the unit	This unit has application in a food production environment. Operators requiring this competency would typically be required to follow specific sampling procedures, such as aseptic sampling. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for sampling	1.1. Sampling requirements are identified in accordance with the sampling plan 1.2. Sampling equipment, containers and labels are prepared
2. Collect samples	2.1. Samples are collected according to sampling procedures and the requirements of the sampling plan 2.2. Samples are handled and prepared to preserve sample and source integrity 2.3. Defects or abnormalities in source material and/or sample are identified and reported 2.4. Sample information is recorded according to workplace sample recording requirements 2.5. The work area is maintained according to housekeeping standards 2.6. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and interpret sampling plan to identify sampling requirements
- select, fit and use personal protective clothing and/or equipment
- prepare for sampling to ensure required tools, containers and labels are available
- follow sampling procedures and the sampling plan to collect samples from the points, in the quantities and at the times specified
- identify atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules as required
- complete sample records according to workplace requirements, such as labelling samples as required
- transfer samples for testing
- maintain work area to meet housekeeping standards
- prepare samples according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples and related handling and preparation requirements and responsibilities
- characteristics of materials sampled and common contaminants and related conditions under which contamination is likely to occur
- sampling techniques relevant to samples collected, such as sterilisation methods and procedures
- the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
- procedures and responsibility for reporting and recording sampling information, such as legislative requirements
- procedures for preparing samples where relevant

FDFOP2019A Fill and close product in cans

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a primary packaging process that fills product into cans and hermetically seals containers using a closer or seamer.

Application of the Unit

Application of the unit	This unit has application in a food processing packing environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of a filling and closing process and associated equipment. When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the filling and closing process for operation	1.1. Materials and packaging components/consumables are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the filling process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that filled and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	closed containers meet specifications 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Monitor closure and seaming stage	3.1. The closing stage is monitored to confirm that closures and seams meet specifications 3.2. Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification 3.3. The workplace meets housekeeping standards 3.4. Workplace records are maintained according to workplace recording requirements
4. Shut down the filling and closing process	4.1. The appropriate shutdown procedure is identified 4.2. The process is shut down according to workplace procedures 4.3. Maintenance requirements are identified and reported

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • access workplace information to identify processing requirements • select, fit and use personal protective clothing and/or equipment • confirm supply of necessary materials and services • prepare/condition product for filling as required • conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters to suit filling requirements, cancelling isolation or lockouts as required, confirming that equipment is clean, correctly configured for filling and seaming requirements,

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational
• start, operate, monitor and adjust the filling process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
  • fill temperatures
  • headspace
  • vacuum
  • visual appearance of the product
  • line speed/throughput
• monitor supply and flow of materials to and from the process
• start, monitor and adjust the closer to confirm alignment and formation of the seam
• monitor control points and conduct inspections related to the seaming/closing process, including confirming that coding is correct
• take corrective action in response to out-of-specification results
• conduct product/batch changeovers
• respond to and/or report equipment failure within level of responsibility
• locate emergency stop functions on equipment
• follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
• complete workplace records as required
• demonstrate shift handover procedure
• maintain work area to meet housekeeping standards
• use process control systems according to enterprise procedures
• inspect seams according to enterprise procedures
• collect samples and conduct tests according to enterprise procedures
• clean and sanitise equipment according to enterprise procedures
• use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
• work cooperatively within a culturally diverse workforce

Required knowledge
Knowledge of: • purpose and basic principles of filling and closing, including the properties and requirements of packaging materials used, hermetic sealing and properties of containers used for this purpose, coding requirements and related legal requirements, such as product weight • the flow of this process and the effect of the filling and seaming process on downstream processes

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation • quality characteristics of the filled and closed container, including seam components and integrity requirements within level of responsibility for inspection • effect of raw material characteristics on filling and seaming • quality parameters for cans and ends • methods used to prepare product for filling • effect of process variables, such as headspace, fill temperature and vacuum on the process • operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up • typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems • techniques used to monitor the production/packing process, such as inspecting, measuring and testing as required by the process • inspection or test points (control points) in the process and the related procedures and recording requirements • contamination/food safety issues associated with filling and seaming and related control measures • common causes of variation and corrective action required • occupational health and safety (OHS) hazards and controls • requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage • isolation, lock out and tag out procedures and responsibilities • product/process changeover procedures and responsibilities • procedures and responsibility for reporting production and performance information • environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • sampling and testing procedures, where relevant, such as seam inspection procedures • cleaning and sanitation procedures where relevant

	environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • specifications • production schedules and instructions • batch/recipe instructions • manufacturers' advice • standard forms and reports
Product preparation	Product preparation can include: • acidifying • brining or syruping • exhausting
Product	Product may be hot or cold filled
Can seam components	Can seam components include: • body hook • end hook • countersink • seam thickness • seam juncture and overlap
Operation of equipment and processes	Operation of equipment and processes may require: • the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include: • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services are appropriate to the process to be operated. Typical examples include: • power • steam • water • vacuum • compressed and instrumentation air

FDFOP2023A Operate a packaging process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a packaging process or sub-system.

Application of the Unit

Application of the unit	This unit has application in a food processing packing environment. It typically targets the worker responsible for applying basic operating principles to the operation and monitoring of a packing process and associated equipment. This unit is generic and should be customised for a given process. It should only be selected where no specific packaging unit is available. A packaging process may relate to primary and/or secondary packaging activities. It typically requires the operation of a series of related items of equipment to achieve the required outcome. Where a single item of packaging equipment is operated, refer to FDFOP1005A Operate basic equipment. When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare the equipment and process for operation	1.1. Packaging components/consumables, materials and items to be packaged are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Operating parameters are entered as required to meet safety and production requirements 1.5. Materials, product and packaging components/consumables are loaded or positioned as required to meet packaging requirements 1.6. Equipment performance is checked and adjusted as required

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.7. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • access workplace information to identify packaging requirements • select, fit and use personal protective clothing and/or equipment • confirm supply of necessary packaging components/consumables, materials and services • conduct pre-start checks, such as inspecting equipment condition to identify any

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
signs of wear, setting coders and printers, selecting appropriate equipment settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational • start, operate, monitor and adjust packaging equipment to achieve required outcomes., such as packaging components/consumables and/or product, and monitoring control points (e.g. weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity) as required to confirm process remains within specification • monitor supply and flow of materials to and from the process • take corrective action in response to out-of-specification results • respond to and/or report equipment failure within level of responsibility • locate emergency stop functions on equipment • follow isolation and lock out/tag out procedures as required to take packaging equipment off-line in preparation for cleaning and/or maintenance within level of responsibility • demonstrate batch/process changeovers • complete workplace records as required • maintain work area to meet housekeeping standards • use process control systems according to enterprise procedures • integrity testing of packaging according to enterprise procedures • carry out routine maintenance according to enterprise procedures • clean and sanitise equipment according to enterprise procedures • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • purpose and basic principles of the packaging process, including the purpose and characteristics required of packaging materials used and the principles of the packaging process used (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life) • product and packaging coding requirements and related legal requirements, including product weight • basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation • services required and action to take if services are not available

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• the flow of processes supplying the packaging process and the effect of outputs on downstream processes • quality characteristics required of the packaging process, such as seal integrity requirements • effect of variation in inputs, such as packaging components/consumables, materials and/or services, on process performance • operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up • typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems • methods used to monitor the packaging process, such as visual inspecting, and measuring and testing as required by the process • inspection or test points (control points) in the process and the related procedures and recording requirements • contamination/food safety risks related to stages in the packaging process and related control measures • common causes of variation and corrective action required • occupational health and safety (OHS) hazards and controls • requirements of different shutdowns as appropriate to the packaging process, including emergency and routine shutdowns and procedures to follow in the event of a power outage, and conducting basic equipment referencing where required • product/packaging changeover procedures and responsibilities • isolation, lock out and tag out procedures and responsibilities • procedures and responsibility for reporting production and performance information • environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • routine maintenance procedures where relevant • packaging integrity testing where relevant • cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • conduct pre-start checks on machinery used for packing • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • specifications, control points and operating parameters • packaging and related equipment and services • materials to be packaged and packaging components/consumables as required • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2004A Clean and sanitise equipment

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP
Workplace information	Workplace information may include:

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Typical equipment	Typical equipment that may form a packaging sub-system includes: • conveyor systems • filling • sealing • wrapping • thermo-form equipment • case packers • bundlers • ink jet coders • labellers • palletisers • shrink wrappers • strappers
Packaging	Packaging may include: • vacuum packing • modified atmosphere packaging (MAP) • blister packaging or over wrapping
Operation of equipment and processes	Operation of equipment and processes may require: • the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include: • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)

FDFOP2028A Operate a mixing or blending process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to combine ingredients and additives in the correct quantities and sequence and to operate and shut down mixing and blending equipment to achieve the required mix characteristics.

Application of the Unit

Application of the unit	This unit has application in a production environment within the food processing industry. Mixes may include concentrated pre-mixes or bulk blends. The output of this process may be a product requiring further processing or for external use. This unit is appropriate to select where the mixing or blending process is a stand-alone process and involves an understanding of addition method and sequence. Where mixing is an in-line component of a larger process, this unit is not appropriate. Where the mixing process does not require a detailed understanding of sequencing or ingredient characteristics, FDFOP1004A Prepare basic mixes, may be more appropriate. When operators are required to perform batch or product changeover procedures as part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be selected.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare the mixing or blending equipment and process for operation	1.1. Materials are confirmed and available to meet production requirements 1.2. Pre-mixes are prepared as required 1.3. Cleaning and maintenance requirements and status are identified and confirmed 1.4. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.5. Processing or operating parameters are entered as required to meet production requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.6. Equipment performance is checked and adjusted as required 1.7. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the mixing or blending process	2.1. Ingredients and additives are delivered to the mixer in the required quantities and sequence to meet recipe specifications 2.2. The mixing or blending process is started and operated according to workplace procedures 2.3. Equipment is monitored to identify variation in operating conditions 2.4. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.5. The mixing process is monitored to confirm that specifications are met 2.6. Out-of-specification product or process outcomes are identified, rectified and/or reported to maintain the process within specification 2.7. Mix is transferred to required production or storage location 2.8. The work area is maintained according to housekeeping standards 2.9. Work is conducted in accordance with workplace environmental guidelines 2.10. Workplace records are maintained according to workplace recording requirements
3. Shut down the mixing or blending process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

Ability to:

- access workplace information to identify mixing/blending requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- add/load materials in correct quantities and sequence, such as monitoring automatic ingredient addition and/or manual addition
- start, monitor and adjust mixing or blending process equipment to achieve required outcomes,including monitoring flow rates/quantity, time or temperature and mix/blending settings
- monitorcontrol points and conduct inspections as required to confirm process remains within specification
- monitor supply and flow of ingredients and additives to and from the mixing or blending process
- pace mixing/blending to meet production requirements
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out or tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- demonstrate batch or product changeovers
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- label and store pre-mixes and/or mixes according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- purpose and basic principles of preparing mixes and blends, including the characteristics and basic function of ingredients and additives used, method and sequence of ingredient addition required to achieve required blend characteristics, and where relevant, the purpose of conditioning, maturation or holding stages required prior to further processing of the mix
- basic understanding of specific gravity and bulk density as appropriate for ingredients used
- basic operating principles of mixing/blending equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, the purpose and location of sensors and related feedback instrumentation, and awareness of calibration schedules for scales and related weighing/measuring equipment
- services required and action to take if services are not available
- the flow of the mixing process and the effect of mix preparation on downstream processes
- procedures for requisitioning, receiving and returning ingredients from stores
- ingredient handling requirements and shelf-life or coding
- quality characteristics required of ingredients and additives and their effect on mixing process performance, including methods used to condition or prepare ingredients prior to addition
- methods used to monitor the blending or mixing process, including inspecting, measuring, and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements, such as:
  - flow rates
  - ingredient/additive addition sequence
  - times/temperatures and agitator speeds
  - required characteristics of blend, such as viscosity, appearance and temperature
- required attributes of the mixed or blended output, such as chemical, texture and flavour profiles as required
- the effect of the mixing or blending parameters, such as temperature and length of mix time on mixing outcome
- contamination and food safety risks associated with the process and related control measures, including product compatibility and cross contamination risks and associated cleaning requirements, as well as common allergens used in mixes prepared
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the blending or mixing

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage • product or process changeover procedures and responsibilities • isolation, lock out and tag out procedures and responsibilities • procedures and responsibility for reporting production and performance information • environmental issues and controls relevant to the mixing or blending process, including waste or rework collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • characteristics of solutions, suspensions and emulsions where relevant • sampling and testing associated with process monitoring and control where relevant • product labelling and storage requirements where relevant • routine maintenance procedures where relevant • cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • prepare premixes for mixing or blending • conduct pre-start checks on machinery used for mixing or blending • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to the industry includes: • the Food Standards Code including labelling, weights and measures legislation • legislation covering food safety, environmental management, occupational health and safety, anti-discrimination and equal opportunity When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Extrusion process	The extrusion process typically includes: • feeding/dosing • conditioning/cooking • mixing • extruding • drying and cooling It may also involve screening/sieving, a final additive addition stage and further processing, such as sheeting or aeration according to product type
Extrusion equipment	Extrusion equipment may include: • ingredients handling and addition equipment • mixers • conditioners • cookers • dryers and coolers Some systems may also include: • expanders • oil coating systems • screens and sieves • sheeting • cutting/stamping equipment • tray feeders/take off • stackers
Operation of equipment and processes	Operation of equipment and processes may require: • the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include: • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: • power • steam • water • vacuum • compressed and instrumentation air

FDFOP2040A Operate a heat treatment process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a heat treatment process.

Application of the Unit

Application of the unit	This unit has application in a food processing production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of a heat treatment process and associated equipment. Heat treatment can include hot fill, aseptic processing, pasteurisation, ultra-high temperature (UHT) and high temperature short time (HTST) processing. When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered. Note that this unit overlaps with FDFOP2041A Operate a mixing or blending and cooking process. For further information refer to advice on unit duplication in the section on qualification arrangements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare the heat treatment process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Processing/operating parameters are entered as required to meet safety and production requirements 1.4. Equipment performance is checked and adjusted as required 1.5. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the heat treatment process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that temperature specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the heat treatment process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • access workplace information to identify heat treatment requirements • select, fit and use personal protective clothing and/or equipment • confirm supply of necessary materials and services • prepare materials as required • conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements,positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- start, operate, monitor and adjust the heat treatment process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
  - time and temperature
  - pressure
  - flow rates
  - flow diversion
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate procedure to clean and sanitise equipment
- complete workplace records as required
- maintain work area to meet housekeeping standards
- control related holding and cooling stages according to enterprise procedures
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- conduct product/batch changeovers according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of heat treatment, including the effect of heat treatment on product and on microbiological characteristics
- the relationship between time, temperature and pressure in the heat treatment process, such as associated holding and cooling profiles according to product requirements
- basic operating principles of equipment, such as main equipment components, types and characteristics of heating mediums used, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the heat treatment process and the effect of product output on downstream processes
- quality characteristics required of the heat treated product

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• effect of raw material characteristics on the heat treatment process, such as variation in viscosity/texture, microbial load and acidity • heat treatment requirements for food to be treated, such as low and/or high acid foods • operating requirements and parameters and corrective action required where operation is outside specified operating parameters • typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems • methods used to monitor the heat treatment process, such as inspecting, measuring and testing as required by the process • inspection or test points (control points) in the process and the related procedures and recording requirements • contamination/food safety risks associated with the process and related control measures • common causes of variation and corrective action required • operational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process • requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage • isolation, lock out and tag out procedures and responsibilities • procedures and responsibility for reporting production and performance information • cleaning and sanitation procedures • environmental issues and controls relevant to the heat treatment process, including waste/rework collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • product/process changeover procedures and responsibilitieswhere relevant • routine maintenance procedures where relevant • sampling and testing associated with process monitoring and controlwhere relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • conduct pre-start checks on machinery used for heat treatment • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • heat treatment process and related equipment and services • materials to be heat treated • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2003A Clean equipment in place

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, occupational health and safety, anti-discrimination and equal opportunity When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • specifications • production schedules and instruction, • manufacturers' advice • standard forms and reports
Heat treatment equipment	Heat treatment equipment may include: • pumps • heat exchangers • holding and cooling stages • filters and clarifiers • direct steam injection equipment
Operation of equipment and processes	Operation of equipment and processes may require: • the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include: • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: • power • steam • water • vacuum • compressed and instrumentation air

ELEMENT	PERFORMANCE CRITERIA
	housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the retort process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including confirming container coding, and treating or confirming availability of treated cooling water
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements,positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the cooking and cooling process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
  - time
  - temperature
  - pressure at each stage
- cool, clean and handle post-treated containers to meet requirements
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- demonstrate batch changeovers
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of heat treatment and retort process, including the relationship between time and temperature in the retort process, and the changes and requirements of each stage, such as cooking, cooling and post-treatment container handling
- the purpose and requirements of container coding
- basic operating principles of equipment, such as main equipment components (e.g. thermometers, chart recorder, temperature control system, clock and pressure gauges), status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- the flow of the retort process and the effect of product output on downstream processes
- quality characteristics required of the retorted product
- effect of raw material characteristics on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the retort process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the process and related control measures, including both the risks of contamination related to processing and to

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
post-processing handling of containers • common causes of variation and corrective action required, including the effects of variables, such as container size, product particulates, pH, water activity, time/temperature and pressure on process outcomes • operational health and safety (OHS) hazards and controls • requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage • isolation, lock out and tag out procedures and responsibilities • product/process changeover procedures and responsibilities • procedures and responsibility for reporting production and performance information • environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • sampling and testing associated with process monitoring and controlwhere relevant • routine maintenance procedures where relevant • cleaning and sanitation procedureswhere relevant

FDFOP2045A Operate pumping equipment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to inspect, operate and monitor pumps and related equipment.

Application of the Unit

Application of the unit	This unit has application in a food production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of pumping equipment. This unit should be selected where an operator requires an understanding of the operating principles and components of pumps/the pumping system and related equipment in order to carry out work requirements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare pumps for operation	1.1. Pre-start checks on pumps and related equipment are carried out 1.2. Appropriate settings are selected to meet safety and production requirements 1.3. Condition of pumps and related equipment is monitored and maintenance requirements are identified and reported according to workplace reporting requirements
2. Monitor pump operation	2.1. Pumps and related equipment are started and monitored to identify variation in operating conditions 2.2. Corrective action is taken as required to maintain pump operation within equipment capacity and operating parameters
3. Complete pump operations	3.1. Pumps are prepared for cleaning and/or maintenance 3.2. Work is conducted in accordance with workplace environmental guidelines

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify pumping requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of materials to be pumped and necessary services
- conduct pre-start checks, such as inspecting pump flanges, gaskets and seals to identify any signs of wear, checking related valve assemblies to identify any signs of leaks, cancelling isolation or lockouts as required (where pumps have variable settings, this involves selecting appropriate settings and confirming that related pipework is correctly configured for pumping requirements)
- monitor and adjust pump operation as required, such as identifying variation in amperage and adjusting pump speeds/flow rates to meet pumping requirements
- monitor supply and flow of materials to and from the pump
- follow isolation and lock out/tag out procedures as required to take pumps and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility (preparation of equipment may include flushing or pigging related lines and pipework, and removal of faceplate)
- respond to and/or report pump equipment failure within level of responsibility
- locate stop and reset functions on pumps
- maintain work area to meet housekeeping standards
- operate pumps using process control systems according to enterprise procedures
- conduct routine pump maintenance according to enterprise procedures
- clean pumps and related equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic operating principles of pumps and related equipment, including main pump components, status and purpose of guards, pump system configuration, including valves, taps and pipework
- the effect of pumping system design on operating performance, including flow resistance, pressure and head

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• operating capacities of pumps used in the work area, including different pump types as required to perform pumping operations where relevant • effect of raw material characteristics on pump performance, including variables such as soluble solids, temperature and viscosity • effect of pump operating parameters on product/materials pumped • corrective action required where pump operation is outside specified operating parameters • typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems • services required • isolation, lock out and tag out procedures and responsibilities • operational health and safety (OHS) hazards and controls • procedures and responsibility for reporting problems • environmental issues and controls, including action required in the event of significant leaks or spills • basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment • routine pump maintenance requirements and procedureswhere relevant • cleaning procedureswhere relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • conduct pre-start checks on pumps • start, operate, monitor and adjust pumps to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • pumps, related equipment and services • materials to be pumped • routine preventative maintenance schedule as required • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2004A Clean and sanitise equipment FDFOP2008A Operate a bulk liquid transfer process • FDFOP2011A Conduct routine maintenance • FDFOP2030A Operate a process control interface.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

	operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • access workplace information to identify processing requirements • select, fit and use personal protective clothing and/or equipment • confirm supply of necessary materials and services • conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for processing requirements,positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational • start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
confirm process remains within specification • monitor supply and flow of materials to and from the process • take corrective action in response to out-of-specification results • respond to and/or report equipment failure within level of responsibility • locate emergency stop functions on equipment • follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility • complete workplace records as required • maintain work area to meet housekeeping standards • use process control systems according to enterprise procedures • demonstrate batch/product changeovers according to enterprise procedures (may not apply to some continuous operations) • collect samples and conduct tests according to enterprise procedures • conduct routine maintenance according to enterprise procedures • clean and sanitise equipment according to enterprise procedures • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • purpose and basic principles of the process • basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications and the purpose and location of sensors and related feedback instrumentation • services required and action to take if services are not available • the flow of this process and the effect of outputs on downstream processes • quality characteristics to be achieved by the process • quality requirements of materials and effect of variation on process performance • operating requirements, parameters and corrective action required where operation is outside specified operating parameters • typical equipment faults and related causes, including recognition of signs and symptoms of faulty equipment and early warning signs of potential problems • methods used to monitor the production process, such as inspecting, measuring and testing as required by the process • inspection or test points (control points) in the process and the related procedures and recording requirements • contamination/food safety risks associated with the process and related control measures

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• common causes of variation and corrective action required • operational health and safety (OHS) hazards and controls, including limitations of protective clothing and equipment relevant to the work process • requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage • isolation, lock out and tag out procedures and responsibilities • procedures and responsibility for reporting production and performance information • environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • product/process changeover procedures and responsibilitieswhere relevant • sampling and testing associated with process monitoring and controlwhere relevant • routine maintenance procedureswhere relevant • cleaning and sanitation procedureswhere relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • conduct pre-start checks on machinery used for production process • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • process and related equipment and services • materials to be processed • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Production process or sub-system	A production process or sub-system may require: • operation of a series of related items of equipment to achieve the process outcome
Operation of equipment and processes	Operation of equipment and processes may require: • the use of process control panels and systems
Shutdown procedures	Shutdown procedures may include:

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: • power • steam • water • vacuum • compressed and instrumentation air

FDFOP2056A Operate a freezing process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down a freezing process.

Application of the Unit

Application of the unit	This unit has application in a production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of freezing equipment. Freezing methods may include air freezing, contact freezing and cryogenic freezing. When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the freezing process for operation	1.1. Materials are confirmed and available to meet operating requirements 1.2. Cleaning and maintenance requirements and status are identified and confirmed 1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements 1.4. Processing/operating parameters are entered as required to meet safety and production requirements 1.5. Equipment performance is checked and adjusted as required 1.6. Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the freezing process	2.1. The process is started and operated according to workplace procedures 2.2. Equipment is monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The process is monitored to confirm that specifications are met

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the freezing process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- prepare materials as required
- conduct pre-start checks, such as involve inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust the freezing process and equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, such as:
  - tunnel and product temperatures
  - throughput
  - removal of frozen waste product from equipment

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• visually inspecting product • monitor supply and flow of materials to and from the process • take corrective action in response to out-of-specification results • demonstrate procedure to defrost tunnels as required • respond to and/or report equipment failure within level of responsibility • locate emergency stop functions on equipment • follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility • complete workplace records as required • maintain work area to meet housekeeping standards • use process control systems according to enterprise procedures • conduct product/batch changeovers according to enterprise procedures • collect samples and conduct tests according to enterprise procedures • conduct routine maintenance according to enterprise procedures • clean and sanitise equipment according to enterprise procedures • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • purpose and basic principles of freezing, including the changes which occur to product during freezing • basic operating principles of equipment, such as main equipment components, status and purpose of guards, basic principles and operation of refrigeration system, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation • the flow of the freezing process and the effect of product output on downstream processes • quality characteristics to be achieved by the freezing process • effect of raw material characteristics on the freezing process • operating requirements and parameters and corrective action required where operation is outside specified operating parameters • typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems • methods used to monitor the production process, such as inspecting, measuring and testing as required by the process • inspection or test points (control points) in the process and the related procedures and recording requirements • contamination/food safety risks associated with the process and related control

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
measures • common causes of variation and corrective action required • occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process • requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage • isolation, lock out and tag out procedures and responsibilities • procedures and responsibility for reporting production and performance information • environmental issues and controls relevant to the process, including waste collection and handling procedures related to the process • basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment • product/process changeover procedures and responsibilities where relevant • sampling and testing associated with process monitoring and control where relevant • routine maintenance procedures where relevant • cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • conduct pre-start checks on freezing machinery and equipment • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies

FDFOP2061A Use numerical applications in the workplace

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This is unit of competency covers the skills and knowledge required to apply basic mathematical functions of addition, subtraction, multiplication and division to undertake workplace calculations or to estimate approximate answers when exact calculations are not required.

Application of the Unit

Application of the unit	This unit has application in a production environment where basic mathematics may be required to undertake or support work processes. Typical applications of mathematical concepts in the workplace include but are not limited to measuring or estimating product characteristics, such as weight, capacity, time and temperature; measuring and estimating material usage, quantities and ratios; measuring equipment and processing parameters, such as speed/throughput; and calculating entitlements, such as pay, leave entitlements, and shift allowances. The unit requires both calculation and estimation skills with the choice between calculation and estimation dependent on the particular process and sector.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Apply basic mathematical concepts to calculate workplace information	1.1. Calculation requirements are identified and appropriate method is selected 1.2. Data is obtained from relevant sources and interpreted correctly. 1.3. Calculations are undertaken using addition, subtraction, multiplication and division to support work role
2. Apply basic mathematical concepts to estimate workplace information	2.1. Estimation requirements are identified and appropriate estimation method is selected 2.2. Data is obtained from relevant sources and interpreted correctly. 2.3. Estimations are made to meet work requirements

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify whether a calculation or estimation is required to meet workplace requirements
- carry out calculations involving basic addition, subtraction, division and multiplication to support work role (this may involve use of a calculator and conversion tables where required)
- use estimation techniques to check quantities, ratios, speed and other required data estimates
- use estimation techniques to check calculated results and workplace data
- record calculations and measurement information accurately according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- mathematical processes, including addition, subtraction, multiplication and division
- application of calculation and estimation techniques to meet work requirements
- units of measurement used in the workplace, including whole numbers, fractions and decimals (to one decimal point) (this may include use of conversion charts)
- representation of numerical information relevant to work requirements, such as charts, graphs and tables
- recording requirements and responsibilities where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify calculation or estimation requirements • carry out calculations involving basic addition, subtraction, division and multiplication • where estimations are used, estimated amounts must be consistent with process or product specification and demonstrate knowledge of measurement units used in the workplace • use estimation techniques to check calculated results and workplace data.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • work tasks requiring simple estimation and calculation • conversion tables, calculators and measuring instruments where required • workplace forms/documents used for recording data where required.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role. Example could be: • FDFOP2015A Apply principles of statistical process control.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Calculations	Calculations may include: • the use of whole numbers, decimals, fractions and percentages Calculations may be made: • manually or using calculators and other measuring instruments as appropriate to the task
Estimations	Estimations can be used where the workplace tasks require only an approximate judgment of an amount, ratio, speed, and so on. Estimations can be made from: • observations of other amounts or measurements • supplied data, such as volume or weight information on packaging of raw materials
Conversion charts	Conversion charts are those in common use in the workplace
Results	Results may or may not be recorded depending on workplace requirements
Numerical information	Numerical information may be presented in forms, including: • simple run charts • graphs

FDFOP2063A Apply quality systems and procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to apply quality principles and system requirements when carrying out work responsibilities where work involves the operation of packaging and/or processing equipment.

Application of the Unit

Application of the unit	This unit has application in a food processing environment. It typically targets the production worker responsible for applying quality standards to work operations. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH2001A Apply Good Manufacturing Practice procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor quality of work outcome	1.1. Quality requirements are identified 1.2. Inputs are inspected to confirm capability to meet quality requirements 1.3. Work is conducted to produce required outcomes 1.4. Work processes are monitored to confirm quality of output and/or service 1.5. Processes are adjusted to maintain outputs within specification
2. Participate in maintaining and improving quality at work	2.1. Work area, materials, processes and product are routinely monitored to ensure compliance with quality requirements 2.2. Work is conducted in accordance with workplace environmental guidelines 2.3. Non-conformance in inputs, process, product and/or service is identified and reported according to workplace reporting requirements 2.4. Corrective action is taken within level of responsibility, to maintain quality standards 2.5. Quality issues are raised with designated personnel

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and apply workplace information on quality requirements for own work
- identify control points or inspection points for own work and related methods used to monitor quality
- maintain quality of own work, including relevant checks and inspections where required in order to monitor control points and check and inspect equipment, materials, product, packaging consumables, processing conditions and service standards relevant to own work
- identify and correct variation within boundaries of work role, and use quality data where required
- determine when and how to make adjustments to maintain output within specified parameters
- identify and respond to out-of-specification or unacceptable inputs and/or outputs
- record quality data in required format
- conduct tests related to work responsibilities according to enterprise procedures
- collect samples as required by sampling regime according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- quality policy, procedures and responsibilities
- quality system used in the workplace, including the relationship between the quality system and food safety program, sources of information on quality requirements, the role of internal and external auditors, as appropriate, and performance improvement processes
- basic concepts of quality assurance including hazards, risk assessment and control methods
- requirements of internal and external customers
- control points for own work, including the purpose of the control point, the risk if not controlled and the method of control used
- monitoring, testing and inspection procedures relating to process control requirements
- scope to correct/control variation within equipment and process capacity

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
parameters • evidence of out-of-specification or unacceptable performance • procedures for responding to out-of-specification or unacceptable performance/outcomes, including procedures for identifying or isolating materials or product of unacceptable quality • systems used to trace product ingredients as relevant to own work • requirements to report and record quality information • sampling and test methods and procedures where relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify quality requirements and key elements of the quality system • conduct work according to quality standards • monitor quality and identify and act on non-compliances • participate in identifying quality system improvements.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • quality policy, system and procedures, including company codes of practice/Good Manufacturing Practice (GMP) • work tasks and responsibilities • workplace information relating to work tasks, including specifications, work instruction and other advice on quality requirements and procedures • sampling and test procedures and related equipment

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	as required • systems for recording quality information.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role. Examples could be: • FDFFS2001A Implement the food safety program and procedures • FDFOP2013A Apply sampling procedures • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with company policies and procedures, licensing and regulatory requirements, legislative requirements and industrial awards and agreements
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • quality specifications • food safety plans • log sheets • standard forms and reports
Control points	Control points refer to those key points in a work process which must be monitored and controlled. This includes food safety (critical) as well as

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	quality and regulatory control points
Monitoring quality	Monitoring quality includes observation and other checks, tests or inspections to confirm that the work output meets defined specifications or quality standards. This can include the use of data collection and analysis tools, such as control charts. Tests or inspections may be carried out by the operator, a third party or be automated
Reporting and recording systems	Reporting and recording systems may be: • verbal • written • electronic • screen-based
Participating in improvement	Participating in improvement may involve: • participation in structured improvement programs • one-off projects • day-to-day problem solving

FDFOP3003A Operate interrelated processes in a production system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate and adjust interrelated processes in a production system.

Application of the Unit

Application of the unit	This unit applies to senior operators who are applying skills and knowledge of the operational requirements of the production system for the industry in which it is applied. While the unit does not have specific prerequisites, it is not an entry level unit covering skills and knowledge required for operation of individual items of equipment and individual processes. The unit instead provides the skills and knowledge required for the coordination of multiple processes in a production system at an operational level. Where sector-specific senior operator technical skills are required, a relevant sector specific specialist elective unit should be selected. A system typically involves a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome. Individual processes may be directly operated, automated and/or operated by others. System operation requires higher level planning and problem solving skills applied to the series of processes than is required when operating an individual unit of equipment or multiple pieces of the same equipment. This unit does not supply skills related to the implementation of lean and competitive manufacturing

© Commonwealth of Australia, 2025 Skills Insight

	related skills to improve system performance. Where these skills are required the relevant Manufacturing Skills Australia (MSA) competitive manufacturing elective units should be selected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare the production system for operation	1.1. Equipment, materials and services are confirmed and available to meet production requirements 1.2. Cleaning requirements and equipment status are

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	identified and confirmed 1.3. Machine settings are selected or adjusted as required to meet safety and production requirements 1.4. Processing/operating parameters are entered as required to meet production requirements 1.5. Materials, ingredients and/or product are loaded or positioned as required to meet production requirements 1.6. Pre-start checks are carried out as required by workplace requirements 1.7. Equipment performance is checked and adjusted as required 1.8. Equipment is ready and safe to operate
2. Operate and monitor the production system	2.1. The system is started up and operated according to company procedures 2.2. System equipment components are monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The production system is monitored to confirm that specifications are met 2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines
3. Hand over production system operation	3.1. Workplace records are maintained according to workplace recording requirements 3.2. Handover is carried out according to workplace procedures 3.3. Process operators are aware of system and related equipment status at completion of handover
4. Shut down the production system	4.1. The appropriate shutdown procedure is identified 4.2. The system is shut down according to workplace procedures 4.3. Maintenance requirements are identified and reported
5. Contribute to continuous	5.1. System performance is reviewed against output

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
improvement of the production system	plan/targets 5.2. Opportunities for system improvement are identified and investigated 5.3. Proposals for improvement are developed and implemented within company planning arrangements, authority levels and according to company procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access production schedule and related information to identify system output and operating requirements, such as planning daily production schedules and/or modifying plans to respond to operating conditions and customer requirements
- liaise with relevant work areas to confirm and/or secure necessary materials, services, equipment and labour to meet production requirements
- confirm supply of necessary equipment and related attachments, materials and services
- select, fit and use personal protective clothing and/or equipment
- set and/or adjust equipment to meet process output requirements, including inspecting equipment condition to identify any signs of wear, confirming selection of appropriate settings and/or related parameters, ensuring that isolation or lock outs are cancelled as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational (checks may be done by the system operator or involve observing/supporting others setting and adjusting equipment and conducting pre-start checks)
- load and/or position materials, ingredients and/or product as required
- operate and monitor the production system, such as use of a process control system and/or observing/supporting others to follow correct operating procedures
- monitor materials flow and work-in-progress through the system
- confirm that the system operates within specified parameters and inspection/ control points are monitored
- determine responses to out-of-specification results or non-conformance within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• monitor operating efficiencies of the system, including recognition of signs and symptoms of faulty equipment and early warning signs of other potential problems • investigate, resolve and/or report problems and faults • plan scheduled events to minimise disruption to production • conduct/coordinate product or batch changeovers • conduct/coordinate shift handovers • review and maintain procedures to support system improvements • maintain work area to meet housekeeping standards • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • purpose and basic principles of the production system, including the system process flow, the interrelationships of each process to identify the impact of variation on related processes, and optimisation options • basic operating principles of equipment and related accessories used by the system, including equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments • operating capacities of equipment used in the system, such as different types of equipment and/or components as required by processing/packaging operations • related systems and responsibilities for interaction, such as related production systems, services supply, packaging/warehousing, maintenance, laboratory/quality assurance and planning and scheduling • product characteristics and common types of variation in materials and/or ingredients used, including the effect of variation on each stage of the system and scope to adjust or correct • typical production related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials, incorrect settings and poor operator control • relevant procedures, specifications and operating parameters for the system and the individual processes • isolation, lock out and tag out procedures and responsibilities • hazards, risks, controls and methods for monitoring processes within the system, including occupational health and safety (OHS), food safety, quality and environmental hazards and risks • workplace system and approach to equipment maintenance • process improvement procedures and related consultative arrangements • troubleshooting procedures and problem solving techniques • communication responsibilities to inform related work areas/support functions and

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
other shifts of operational status and production issues • procedures and responsibility for reporting production and performance information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • conduct pre-start checks on production system components • confirm machine setup is ready to achieve production requirements • correctly use required personal protective equipment • start, operate, monitor and adjust process equipment throughout the system to achieve required quality outcomes • identify system problems and take corrective action • conduct operational handovers • shut down system • identify and investigate opportunities for operational improvements within areas of responsibility • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • personal protective clothing and equipment

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• production schedule and related advice on system requirements • information on equipment capacity and operating parameters • production system equipment and related accessories and services • materials/consumables required by the process • communication and recording systems and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2030A Operate a process control interface • FDFPPL3003A Support and mentor individuals and groups.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: • the Food Standards Code, including labelling,

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP
Workplace information	Workplace information may include: • standard operating procedures (SOPs) • specifications • production schedules and instructions • performance records and reports
Systems	A system typically involves: • a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome
System operation	System operation may involve: • coordination of operators of system components
Handovers	Handovers may be done: • in person or via recording/communication systems according to workplace arrangements
Operation and monitoring of equipment and system processes	Operation and monitoring of equipment and system processes typically requires: • the use of control panels and systems
Shutdown procedures	Shutdown procedures may include: • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)
Confirming cleaning requirements and status	Confirming cleaning requirements and status may involve: • accessing cleaning records

FDFOP3004A Operate interrelated processes in a packaging system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, operate and adjust interrelated processes in a packaging system.

Application of the Unit

Application of the unit	This unit applies to senior operators who are applying skills and knowledge of the operational requirements of the packaging system for the industry in which it is applied. While the unit does not have specific prerequisites, it is not an entry level unit covering skills and knowledge required for operation of individual items of equipment and individual processes. The unit instead provides the skill and knowledge required for the coordination of multiple processes in a packaging system at an operational level. Where sector-specific senior operator technical skills are required, a relevant sector specific specialist elective unit should be selected. The system will typically involve a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome. Individual processes may be directly operated, automated and/or operated by others. System operation requires higher level planning and problem solving skills applied to the series of processes than is required when operating an individual unit of equipment or multiple pieces of the same equipment. This unit does not supply skills related to the implementation of lean and competitive manufacturing

© Commonwealth of Australia, 2025 Skills Insight

	related skills to improve system performance. Where these skills are required the relevant Manufacturing Skills Australia (MSA) competitive manufacturing elective units should be selected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare the packaging system for operation	1.1. Equipment, materials and services are confirmed and available to meet packaging requirements 1.2. Cleaning requirements and equipment status is

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	identified and confirmed 1.3. Machine settings are selected or adjusted as required to meet safety and production requirements 1.4. Operating parameters are entered as required to meet production requirements 1.5. Product and/or packaging components and consumables are loaded or positioned as required to meet packaging requirements 1.6. Pre-start checks are carried out as required by workplace requirements 1.7. Equipment performance is checked and adjusted as required 1.8. Equipment is ready and safe to operate
2. Operate and monitor the packaging system	2.1. The system is started up and operated according to company procedures 2.2. System equipment components are monitored to identify variation in operating conditions 2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4. The system is monitored to confirm that packaging specifications are met 2.5. Out-of-specification product/packaging outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted in accordance with workplace environmental guidelines
3. Hand over packaging system operation	3.1. Workplace records are maintained according to workplace recording requirements 3.2. Handover is carried out according to workplace procedures 3.3. Process operators are aware of system and related equipment status at completion of handover
4. Shut down the packaging system	4.1. The appropriate shutdown procedure is identified 4.2. The system is shut down according to workplace procedures 4.3. Maintenance requirements are identified and reported
5. Contribute to	5.1. System performance is reviewed against output

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
continuous improvement of the system	plan/targets 5.2. Opportunities for system improvement are identified and investigated 5.3. Proposals for improvement are developed and implemented within company planning arrangements, authority levels and according to company procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • access production/packaging schedule and related information to identify packaging output and operating requirements, such as establishing daily packaging priorities and/or modifying plans to respond to customer requirements • liaise with relevant work areas to confirm and/or secure necessary materials, services, equipment and labour to meet production requirements • confirm supply of necessary equipment and related attachments, materials and services • select, fit and use personal protective clothing and/or equipment • set and/or adjust equipment to meet packaging requirements, such as inspecting equipment condition to identify any signs of wear, confirming selection of appropriate settings and/or related parameters, ensuring that isolation or lock outs are cancelled as required, confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational (checks may be done by the system operator or involve observing/supporting others setting and adjusting equipment and conducting pre-start checks) • load and/or position product, packaging components and consumables as required • operate and monitor the packaging system, such as use of a process control system and/or observing/supporting others to follow correct operating procedures • monitor materials flow and work-in-progress to and from the packaging system • confirm that the packaging system operates within specified parameters and inspection/control points are monitored • determine responses to out-of-specification packaging or non-conformance within level of responsibility

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- monitor operating efficiencies of the system, including recognition of signs and symptoms of faulty equipment and early warning signs of other potential problems
- investigate, resolve and/or report problems and faults
- plan scheduled events to minimise disruption to production
- conduct/coordinate product/packaging changeovers
- conduct/coordinate shift handovers
- review and maintain procedures to support system improvements
- maintain work area to meet housekeeping standards
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the packaging system, including the process flow and the interrelationships of each previous processes that can affect packaging outcomes, packaging technology, and packaging equipment components
- basic operating principles of equipment and related accessories used by the system, including equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments
- operating capacities of equipment used in the system, such as different types of equipment and/or components as required by processing/packaging operations
- related systems and responsibilities for interaction, such as related production and further packaging/storage stages, services supply, maintenance, laboratory/quality assurance and planning and scheduling
- technical knowledge of product/packaging characteristics and the main factors that impact on shelf-life
- typical packaging related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials and finished product, incorrect settings and poor operator control
- relevant procedures, specifications and operating parameters for the system and the individual processes
- isolation, lock out and tag out procedures and responsibilities
- hazards, risks, controls and methods for monitoring processes within the system, including occupational health and safety (OHS), food safety, quality and environmental hazards and risks
- workplace system and approach to equipment maintenance
- process improvement procedures and related consultative arrangements
- troubleshooting procedures and problem solving techniques
- communication responsibilities to inform related work areas/support functions and other shifts of operational status and production issues

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify recording and reporting requirements	1.1. The purpose of recording performance-related information is identified 1.2. Recording and reporting responsibilities are identified 1.3. Recording and reporting systems and formats are identified
2. Maintain workplace information	2.1. Records are complete, timely and accurate 2.2. Performance information is recorded in required format to meet workplace reporting requirements 2.3. Errors or discrepancies in recording are identified and corrected or notified to appropriate personnel 2.4. Variances are identified, investigated and reported according to workplace procedure 2.5. Requests for information are assessed, prioritised and addressed to meet required timelines
3. Maintain security of workplace information	3.1. Access levels and authorities are identified 3.2. Security of workplace records and reports is maintained 3.3. Security breaches are identified and reported to appropriate personnel

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • identify and use recording/reporting formats and systems • identify information security requirements and procedures for responding to/reporting a security breach • collect and collate information to be recorded as required • assess information to confirm that it is complete and accurate and follow up inaccurate recording with relevant personnel • identify significant performance variation, investigate and report cause/s • prepare reports in required format to meet reporting timelines • respond to information requests on a timely basis • use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor • work cooperatively within a culturally diverse workforce
Required knowledge
Knowledge of: • the purpose and responsibilities for the information records and reports to be maintained or produced, including accuracy levels and timeliness of recording and reporting • techniques used to collate and assess information, including typical recording outcomes to identify unusual or incorrectly recorded information • likely causes of variation and related reporting responsibilities • information system access levels and codes, such as levels within software • communication skills relevant to reporting role

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Support others in the work area	1.1. Individuals are mentored to meet work requirements 1.2. Performance that is inappropriate is identified and corrective action taken 1.3. Feedback on performance is provided
2. Facilitate group processes	2.1. Purpose of group process is identified 2.2. Meeting procedures required to achieve an agreed outcome are determined and applied 2.3. Group members are engaged in the process 2.4. Clear outcomes are reached in a timely manner

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • model behaviour consistent with company policies and procedures • identify behaviour or performance that is unacceptable • structure interventions and feedback to clearly convey required standard of performance • apply appropriate explanation, demonstration, questioning and active listening techniques when interacting with others

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- provide feedback appropriate to the audience requirements
- recognise and respond appropriately to difference and diversity in the workplace
- provide and/or arrange opportunities to develop/practice appropriate skills
- plan group processes, including clearly identifying the purpose of the discussion or meeting, confirming the appropriate people are available and planning a basic outline of the approach and/or agenda
- facilitate meetings, including confirming with group members the purpose of the discussion or meeting, engaging people in discussion and assisting the group to reach an agreed outcome within the allotted timeframe
- record meeting outcomes
- follow up group processes, including identifying actions required to follow up outcomes of a discussion or meeting
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- company policies and procedures as they apply to the work area, including areas covered by legislation, such as sexual harassment, equal employment opportunity (EEO)/affirmative action, anti-discrimination, racial vilification and workplace bullying, occupational health and safety (OHS), food safety and environmental management
- industry awards and enterprise agreements to develop an awareness of the main issues covered as they affect day-to-day work arrangements
- systems and programs in the workplace to support development and mentoring of others
- relevant resources to support mentoring role and responsibilities
- techniques for structuring and explaining work-related information to meet the needs of people in the work area
- interpersonal skills, including appropriate questioning, listening and feedback techniques
- training/assessment arrangements in the workplace and related responsibilities
- boundaries of responsibility and related procedures for feedback, counselling and disciplinary procedures
- formal arrangements and responsibilities for consulting others relating to work role
- meeting procedures and recording requirements as relevant in the workplace

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • model behaviour and performance consistent with company policy and procedures • support others in their behaviour and performance • provide feedback on performance and take corrective action on inappropriate behaviours • plan and organise group meetings or activities to engage participation • support group meetings to gain clear outcomes.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • advice on workplace policies, codes of practice and procedures • opportunities to interact with others using typical workplace communication processes • typical group forums, such as structured group discussions, committee meetings and work groups • workplace systems and procedures for consultation, feedback, counselling and discipline • advice on conditions of employment and entitlements • information systems, including recording and retrieval systems.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2005A Work in a socially diverse environment • FDFPPL3004A Lead work teams and groups.
Guidance information for	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over

FDFSUG218A Operate a boiler - basic

Modification History

New Unit based on *SUGPOBB2A Operate a boiler - basic*.

Unit Descriptor

This unit describes the outcomes required for continuous and short term operation of a basic boiler and for start-up and shut down after a prolonged break. This unit is based on the boiler competency standards from the Worksafe Australia Standards for Users and Operators of Industrial Equipment NOHSC 1006 (2001). It should be selected where boiler operation is a certificated occupation.Boiler operators holding a ticket in Basic Boiler Operation from the relevant state regulatory authority will be granted equivalence in this unit *FDFSUG231A Operate a boiler basic* for the purpose of issuing a qualification.

Application of the Unit

This unit has application in the sugar milling industry.

Licensing/Regulatory Information

General workplace legislative and regulatory requirements apply to this unit; however there are no specific licensing or certification requirements at the time of publication.

Pre-Requisites

There are no pre-requisite units for this competency standard.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare the boiler for operation	1.1 Health and safety hazards / maintenance requirements are identified and reported to appropriate personnel according to workplace reporting procedures
	1.2 The boiler is purged according to workplace procedure
	1.3 Services are confirmed and available
	1.4 Pre-operational checks are conducted to confirm operational status of boiler and related equipment
2 Start and monitor boiler operation	2.1 The boiler is started and brought on line safely according to workplace procedures and manufacturer's specifications
	2.2 Plant is operated within limits of manufacturer's specifications to meet workplace requirements
	2.3 Equipment is monitored to confirm operating condition
	2.4 Water quality is tested and adjusted as required
	2.5 Sluice water is circulated to remove ash from boiler according to duty requirements
	2.6 The workplace meets housekeeping standards
3 Analyse and respond to abnormal performance	3.1 Operating data and plant operating conditions are analysed to identify causes of abnormal performance
	3.2 Corrective action is taken in accordance with workplace procedures in response to Hazards, out-of-specification test results and/or plant performance
	3.3 Emergency procedures are implemented as required according to workplace procedures and manufacturer's recommendations
4 Handover boiler operations	4.1 Workplace records are maintained in accordance with statutory requirements and workplace procedures
	4.2 Handover is carried out according to workplace procedure
	4.3 Boiler operators are aware of boiler status and related equipment at completion of handover
5 Carry out an operational shutdown	5.1 The boiler is shut down according to workplace procedures and manufacturer's recommendations
	5.2 Maintenance requirements are identified and reported according to workplace reporting procedure
6 Shutdown the boiler and prepare for an internal inspection	6.1 The boiler is shut down according to workplace procedures and manufacturer's recommendations
	6.2 The boiler is cleaned internally and externally according to workplace procedures and manufacturer's recommendations
	6.3 Valves and fittings are removed in preparation for maintenance
7 Store boiler in	7.1 The boiler is stored in the appropriate storage mode according to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
shutdown mode	workplace procedures and manufacturer's recommendations
8 Record information	8.1 Workplace information is recorded according to workplace recording requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- access workplace information on combustion and operating requirements
- select, fit and use personal protective clothing and/or equipment
- identify and report hazards and potential hazards in the work area
- confirm status of boiler and related equipment including the fuel supply system, ash removal and services
- demonstrate purge procedure
- conduct pre-start checks including checking:
  - feed water supply and system
  - fuel supply system
  - fans and dampers
  - inspection doors
  - boiler valves - operation and position
  - combustion air supply system
  - boiler water level
- liaise with other work areas to advise of boiler status
- demonstrate set-up and start-up procedures in both manual and automatic modes
- monitor boiler operation including monitoring:
  - steam reticulation line pressure
  - boiler steam pressure
  - steam supply/usage
  - condensate tank level
  - bagasse levels
  - feedwater levels and pressure
  - fuel levels
  - boiler load
  - water quality
  - furnace pressure

© Commonwealth of Australia, 2025 Skills Insight

  - ash pit level and removal system
  - balance draft system
  - superheater temperature
  - drum levels
  - equipment condition
- conduct water quality test
- take corrective action in response to out-of-specification results
- report and/or record corrective action as required
- demonstrate shift handover procedure and confirm that replacement operators are aware of all relevant issues prior to completing handover
- demonstrate procedure to take boiler off line
- demonstrate procedure to shut-down and clean the boiler
- demonstrate removal of valves and fittings to prepare the boiler for inspection
- demonstrate procedure to store boiler
- demonstrate emergency procedures and related re-start including the use of emergency fuel supply
- maintain workplace records
- maintain work area to meet housekeeping standards

Required knowledge includes:

Knowledge of:

- relevant state OHS legislation, standards and codes of practice relating to work responsibilities
- safe work procedures including awareness of health and safety hazards related to boiler operation and associated control measures
- purpose and limitations of protective clothing and equipment
- hierarchy of hazard control measures
- duty of care of the boiler operator
- purpose and basic principles of combustion and boiler operation including principles of heat transfer and properties of steam
- boiler system layout and steam cycle
- the purpose of purging a boiler
- the effect of fuel quality on boiler operation
- impact of ash removal on efficient boiler operation and impact of sluice water flow
- relationship to other processes including an understanding of the impact of sudden load changes on boiler pressure and plant operation
- purpose and limitations of protective clothing and equipment
- methods used to render equipment safe to inspect, maintain and/or clean including lock-out, tag-out and isolation procedures
- water quality test procedures
- typical causes of water/condensate contamination and corrective action required
- equipment purpose and basic operating principles including high pressure feed pumps, fuel

© Commonwealth of Australia, 2025 Skills Insight

supply system and dual fuel systems as required by boiler type
- operating requirements and parameters
- procedures for responding to emergency situations including safe shutdown procedure
- handover and long term shut down and storage procedures
- cleaning procedures and grate dumping
- environmental issues and controls including an understanding of sluice water usage
- requirements to liaise/advise related work areas
- housekeeping standards for the work area
- reporting and recording systems including both statutory and workplace requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • confirm status of boiler and related equipment including the fuel supply system, ash removal and services • demonstrate purge procedure • conduct pre-start checks • liaise with other work areas to advise of boiler status • demonstrate set up and start up procedures in both manual and automatic modes • conduct water quality test • take corrective action in response to out-of-specification results • report and/or record corrective action • demonstrate emergency procedures and related re-start.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • Boiler and related equipment. This includes fuel supply, grate cleaning and ash removal systems • Relevant codes and standards • Operating procedures and related advice on equipment operation

© Commonwealth of Australia, 2025 Skills Insight

	• Personal protective clothing and equipment • Communication systems and equipment • Housekeeping standards and procedures • Workplace information recording systems, requirements and procedures.
Method of assessment	Other units of competency relevant to the work role should be assessed in conjunction with this unit. This may include: • FDFOP2030A Operate a process control interface
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures	Work is carried out in accordance with company policies and procedures, licensing requirements, manufacturer's recommendations, legislative requirements, codes of practice and industrial awards and agreements.
Codes of Practice	Codes of practice include the Sugar Milling Operations Industry Code of Practice.
Workplace information	Workplace information can include • Standard Operating Procedures (SOPs) • manufacturer's specifications.
Boilers [basic]	Boiler (basic) and related equipment may be • fully or partly attended, and include • single fixed combustion air supply • non-modulating single heat source • fixed firing rate. Operation and monitoring of equipment and processes typically requires the use of control panels and systems.

© Commonwealth of Australia, 2025 Skills Insight

Hazards	Hazards typically include: • working around hot surfaces • manual handling • steam, hot gasses and fuel leaks.
Services	Services can include fuel supply of bagasse, coal, gas, oil or other fuel types, steam, mill and instrumentation air, cooling water, general mill water supply and cooling water.
Equipment status	Confirming equipment status involves: • conducting relevant pre-start checks • confirming that cleaning standards are met • all safety guards and manholes are in place • equipment is operational.
Internal cleaning	Internal cleaning is carried out in accordance with statutory requirements regarding confined space entry and does not typically include chemical cleaning.
Teamwork	Work may require the ability to work within a team environment.
Information systems	Information systems may be print or screen based.

FDFSUG222A Operate a waste water treatment system

Modification History

New Unit based on *SUGPWWT2A Operate a waste water treatment system*.

Unit Descriptor

This unit describes the outcomes required to operate waste water treatment systems to comply with workplace requirements, trade waste agreements and site environmental authority.

Application of the Unit

This unit has application in the sugar milling industry.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

There are no pre-requisite units for this competency standard.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare the waste water treatment	1.1 Chemicals and test equipment are available and ready for use

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
process for operation	1.2 Services are confirmed as available and ready for operation 1.3 Pre-operational checks are conducted 1.4 Instrumentation and test equipment is calibrated to manufacturer's specifications to meet workplace requirements 1.5 Health and safety hazards/maintenance requirements are identified and reported to appropriate personnel according to workplace reporting procedures
2 Operate and monitor the waste water treatment process	2.1 The waste water system is started up according to company procedures 2.2 Plant is operated within limits of manufacturer's specifications to meet workplace requirements 2.3 Equipment is monitored to confirm operating condition 2.4 Waste water quality is monitored, tested and adjusted as required to meet water standards as defined by site licence 2.5 First flush systems are operated during rainfall events 2.6 The workplace meets housekeeping standards
3 Analyse and respond to abnormal performance	3.1 Water condition and plant operating conditions are analysed to identify causes of abnormal performance 3.2 Corrective action is taken in accordance with workplace procedures in response to hazards, out-of-specification test results and/or plant performance 3.3 Emergency procedures are implemented as required according to workplace procedures and manufacturer's recommendations
4 Handover waste water treatment system	4.1 Workplace records are maintained in accordance with statutory requirements and workplace procedures 4.2 Handover is carried out according to workplace procedure 4.3 Waste water treatment operators are aware of system status and related equipment at completion of handover
5 Shutdown the waste water treatment system	5.1 The waste water treatment system is shut down according to workplace procedures 5.2 The waste water treatment system is prepared for storage in shut down mode 5.3 Maintenance requirements are identified and reported according to workplace reporting procedure

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

Required skills include:

Ability to:

- access workplace information to identify waste treatment requirements
- select, fit and use personal protective clothing and/or equipment
- confirm services are available and equipment is clean and ready for operation
- handle chemicals safely including follow correct preparation, handling and storage procedures and use of appropriate protective clothing and equipment
- conduct pre-start checks
- liaise with other work areas as required
- demonstrate wastewater system operating procedures in both manual and automatic modes
- demonstrate first flush system operating procedures in both manual and automatic modes
- monitor waste water system operation including monitoring:
  - chemical addition rates and residuals
  - temperatures
  - flow rates
  - equipment condition including calibration of instruments
  - tests as required
  - dissolved oxygen levels
  - pH levels
- conduct water quality tests
- take corrective action in response to out-of-specification results or non-compliance
- monitor supply and quality of waste water to and from the process
- report and/or record corrective action as required
- demonstrate emergency procedures to control chemical spills or other major incidents relevant to the workplace
- demonstrate shift handover procedure
- demonstrate an operational shut down procedure
- maintain workplace records to meet the requirements of the workplace and site environmental authority
- maintain work area to meet housekeeping standards

Required knowledge includes:

Knowledge of:

- relevant state OHS legislation, environmental acts and policies, standards and codes of practice relating to work responsibilities including awareness of standards set out in site license arrangements
- safe work procedures including awareness of health and safety hazards related to waste water system operation and associated control measures
- hierarchy of hazard control measures
- purpose and limitations of protective clothing and equipment
- methods used to render equipment safe to inspect, maintain and/or clean including lock-out,

© Commonwealth of Australia, 2025 Skills Insight

tag-out and isolation procedures
- water cycles for trade waste, storm water and sewerage including sources and flow patterns
- purpose and standards required by environmental agreements and responsibilities
- company policy relating to environmental performance
- consequences of non-conformance
- waste characteristics and treatment methods
- sampling and test procedures as appropriate
- purpose of chemicals used
- purpose of first flush systems and their relationship with the wastewater treatment system
- operating requirements and parameters
- water quality sampling and test procedures including the purpose of test and safe use, care and storage of relevant test equipment, interpretation and recording of results
- typical causes of non-conforming water quality and corrective action required
- equipment purpose and basic operating principles of waste water treatment equipment and methods
- requirements of both operational and long term shut down conditions to ensure the equipment is left in a safe state for the period of the shutdown and to minimise any delays in future start up
- housekeeping standards for the work area
- reporting and recording systems including both statutory and workplace requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • handle chemicals safely • demonstrate wastewater system operating procedures • demonstrate first flush system operating procedures • conduct water quality tests • take corrective action in response to out-of-specification results or non-compliance • monitor supply and quality of waste water • report and/or record corrective action • demonstrate emergency procedures • demonstrate shift handover procedure

© Commonwealth of Australia, 2025 Skills Insight

	• demonstrate an operational shut down procedure.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • Waste water treatment systems and related chemicals • Test equipment • Relevant advice on environmental agreements • Operating procedures and related advice on equipment operation • Personal protective clothing and equipment • Communication systems and equipment • Housekeeping standards and procedures • Workplace information recording systems, requirements and procedures.
Method of assessment	Other units of competency relevant to the work role should be assessed in conjunction with this unit.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with company policies and procedures, manufacturer's recommendations, legislative requirements, site licenses and trade waste service agreements and industrial awards and agreements. Legislation refers to environmental acts and regulations.
Workplace information	Workplace information can include: • Standard Operating Procedures (SOPs) • manufacturer's specifications
Equipment	Equipment may include

© Commonwealth of Australia, 2025 Skills Insight

	• screens • pH correction • oil/grease skimmers • settling and treatment ponds • aeration units • lagoons • first flush systems and wetlands • pumps and valves.
Equipment status	Confirming equipment status involves • conducting relevant pre-start checks • confirming that housekeeping standards are met • all safety guards are in place • equipment is operational.
Hazards	Hazards typically include handling chemicals, manual handling and flammable gases.
Equipment operation and monitoring	Operation and monitoring of equipment and processes typically requires the use of control panels and systems.
Tests	Typical tests may include • pH • solids • colour/turbidity • flow rate • settling rate • settled volume • DO • BOD/COD levels.
Teamwork	Work may require the ability to work within a team environment.
Information systems	Information systems may be print or screen based.

FDFTEC3001A Participate in a HACCP team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to participate in the development and/or review of a HACCP-based food safety program under direction.

Application of the Unit

Application of the unit	This unit is appropriate where the operator requires a detailed understanding of the steps and techniques used to develop and review a HACCP-based food safety program. This unit can be aligned at either AQF 3 or 4. When aligned at AQF 3 the person would typically participate in the development of the food safety program as part of a group. The scope of contribution would typically be limited to their immediate work area. When this unit is applied at AQF 4 the person may take a lead role in facilitating the development of the food safety program and would apply an understanding of food safety across more diverse operations or work areas. This unit is based on and achieves part of the guideline food safety unit GFSDFSPA Develop food safety programs.

Licensing/Regulatory Information

Pre-Requisites

Prerequisite units		
	FDFFS2001A	Implement the food safety program and procedures

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Prepare to develop and/or review a food safety program	1.1. Roles and responsibilities for participating in, developing or reviewing a food safety program are identified 1.2. The scope of the food safety program is identified
2. Identify and/or review food safety hazards	2.1. Processes to be covered by the food safety program are identified and steps within each process are described 2.2. Food safety hazards that are reasonably expected to occur are identified for each process 2.3. Handling methods, processing techniques and existing support programs used in the workplace are identified
3. Establish and/or	3.1. Acceptable methods of control are established for

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
review methods to monitor and control food safety hazards	each food safety hazard that is reasonably expected to occur 3.2. Control methods are validated 3.3. Procedures for taking preventative action are established 3.4. Appropriate methods for monitoring that processes remain within control are established 3.5. Required corrective action to respond to situations where hazards are not effectively controlled is established 3.6. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify personal roles and responsibilities for participating in the development or review of a food safety program
- identify processes and steps to be covered
- identify hazards that are reasonably expected to occur and establish appropriate methods of control, such as participating in validating existing control methods and where there is no adequate control method in place, establishing an appropriate method
- establish or review procedures for implementing preventative action, such as revision of materials, processes and/or food handling procedures, and where required, the revision of workplace practices and documentation, such as specifications, operating procedures and approved supplier programs
- describe the appropriate monitoring requirements for each food safety hazard, including the method or procedure to be followed, the frequency and timing, the person responsible, and the information to be recorded (procedures to be followed would typically be specified in the form of a standard operating procedure or work instruction)
- describe corrective action requirements in the event that acceptable limits or

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

requirements of support programs are not met
- develop or review documentation relating to the design and maintenance of the food safety program, such as flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- develop or review documentation to communicate food safety responsibilities, such as standard operating procedures (SOPs), processing parameters and recording devices (e.g. log sheets)
- communicate food safety responsibilities within level of responsibility using techniques and presentation styles appropriate to the audience
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose and intent of food safety legislation
- purpose and responsibilities for maintaining records as required by legislation and workplace procedures
- roles and responsibilities for development and maintenance of the food safety program, including roles of internal and external auditors and of authorised officers
- techniques for applying HACCP-based principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredient and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards/contamination likely to occur given the type of

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
product and processing methods used • conditions required for bacterial food poisoning to occur, such as water activity, pH, composition, time and temperature as relevant to food handled • acceptable control methods for the hazards identified and required corrective action when control requirements are not met • typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability and personal hygiene, and how they can be used as part of a food safety program • acceptable control methods for the hazards identified and required corrective action when control requirements are not met • validation and verification processes and techniques and responsibilities

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • identify components and parameters of a food safety program • identify food safety hazards in production processes • establish and validate control standards and methods for each hazard • establish procedures for unpredicted hazards • communicate and document hazards and control procedures • complete workplace records • apply safe work practices and identify occupational health and safety (OHS) hazards and controls • apply food safety procedures.
Context of and specific resources for	Assessment must occur in a real or simulated workplace

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
assessment	where the assessee has access to: • workplace food safety program documentation • advice on quality and food safety legislation • procedures for developing or modifying specifications and other advice on food safety requirements • procedures for developing or modifying documentation, such as work instructions and procedures, log sheets and other recording requirements • review/audit arrangements • consultative mechanisms • communication systems • training system • reporting/recording system.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Food safety programs	A food safety program is a written document that specifies how a business will control all food safety hazards that are reasonably expected to occur in the food business. The food safety program must provide for the systematic

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	monitoring of the controls as well as appropriate corrective action if a hazard is found not to be under control. Records must be kept to demonstrate action in relation to, or in compliance with, the food safety program. A food safety program may be developed as a stand-alone program or may be integrated with the quality program in a workplace
Methods used to control hazards	Methods used to control hazards include: • both support programs and specific hazard control limits or requirements Typical examples of support programs include: • product recall • cleaning schedules • pest control programs • personal hygiene practices • calibration procedures and related operating procedures
Food safety hazards	Food safety hazards include: • microbiological • chemical • physical hazards
Validation	Validation refers to: • the use of objective evidence in order to prove that materials, processes, procedures or equipment used are capable of delivering the intended result
Verification	Verification refers to: • reviewing all aspects of the food safety program and related records to determine compliance with and adequacy of the food safety program At a minimum, food safety programs must be verified annually
Scope of the HACCP based plans	The scope of the HACCP-based plan depends on workplace requirements and may extend outside the direct area of responsibility of the team participants

FDFTEC3002A Implement the pest prevention program

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to implement an existing pest management program.

Application of the Unit

Application of the unit	This unit has application in a food production environment. It typically targets the worker responsible for inspecting food products and implementing control procedures. In some states and territories, activities including purchasing and application of some pesticides are covered by licensing arrangements. Where this applies, the appropriate licence is a prerequisite for undertaking this unit. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP.

Licensing/Regulatory Information

Not applicable.

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Monitor the implementation of pest prevention measures	1.1. Inspections are conducted to monitor the effectiveness of pest prevention measures 1.2. Signs of pest infestation are identified, analysed and reported 1.3. Hygiene standards are maintained to meet company requirements
2. Implement pest elimination procedures	2.1. Control measures suited to infestation are selected 2.2. Procedures for the elimination of pests are implemented 2.3. Records are maintained 2.4. Waste is collected, treated and disposed of according to company procedures 2.5. Work is conducted in accordance with workplace environmental guidelines

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3. Review pest control programs	3.1. Pest infestation is monitored to confirm effectiveness of treatment method 3.2. The treatment program is modified within level of responsibility 3.3. Changes to the treatment program are reported to the appropriate personnel

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- recognise indicators of pest invasion
- select appropriate control method according to the control program in place
- select, fit and use personal protective clothing and/or equipment
- follow pest elimination procedures, such as preparing pesticides for use, applying pesticides according to company procedures and licensing arrangements, setting up and operating equipment, such as fumigation and other pesticide application equipment, and preparing and placing baits as required
- follow procedures to measure and monitor pest populations, such as sampling, testing and recording data
- review effectiveness of control methods and amend or recommend changes to program as required
- safely dispose of pesticides, residues, empty containers and pests
- monitor the implementation of housekeeping and cleaning standards
- conduct tests according to enterprise procedures, such as using instrumentation to measure the presence of airborne pesticides
- carry out basic maintenance required to support pest prevention measures according to enterprise procedures
- liaise with external contractors according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Knowledge of: • basic principles of integrated pest management (IPM), including identification of pest hazards, establishment of pest elimination methods and monitoring the effectiveness of these measures • methods used to prevent pest invasion suited to workplace and typical pest invasion, including appropriate work area and storage design features to minimise the possibility of pest infestation through building access points, packaging materials/requirements to protect product from pests and other physical and mechanical control measures • housekeeping and cleaning standards to minimise conditions which attract pests • food safety issues relating to the use of pesticides in a food handling area • characteristics and behaviour of each type of pest at each life cycle stage • conditions required by pests for survival • methods and procedures used to minimise pest resistance to elimination methods • range of pesticides used in the workplace • legislation, codes of practice and procedures relating to the purchase, transport, storage, use and disposal of pesticides • safe procedures for handling, using and storing pesticides and dangerous goods, identifying identification of information provided on labels, and where required, handling of gas cylinders • purpose, application and limitations of protective clothing and equipment • test methods where relevant • basic maintenance procedures where relevant • contractor service arrangements where relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate	Evidence of ability to: • conduct pest inspections

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
competency in this unit	• identify pest infestations and select suitable control measures • implement pest control measures in accordance with procedure • monitor effectiveness of controls • assess control procedures and contribute to improvement of pest control • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • apply food safety procedures
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • work procedures, including advice on safe work practices, food safety and environmental requirements • pesticide labels • MSDS and personal protective clothing and equipment • pest management program and procedures • pest management compounds and equipment • housekeeping procedures and cleaning schedules in the work area, such as storage, production and/or packaging areas • documentation and record keeping system.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with company procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements
Workplace information	Workplace information may include: • pest management program • pesticide labels • work instructions • standard operating procedures (SOPs) • specifications • materials safety data sheets (MSDS) • manufacturers' advice • standard forms and reports
Hazardous substances	Work may involve: • exposure to chemicals and other hazardous substances and may require working in accordance with a permit to work
Pests	Pests include: • vertebrates, such as birds, rats and mice • invertebrates, such as insects
Pest control methods	Pest control methods may include: • fumigation • application of insecticides, dusts, gas and/or baits (using registered controlled and generally available substances) Where use of pesticides include work conditions covered by National Occupational Health and Safety Commission and/or state and territory health and safety authorities, the assessment criteria and methods prescribed by these

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	authorities must also be met
Selection of control measures	Selection of control measures occurs in the context of an existing program
Application equipment	Application equipment may include: • automated reticulation systems • sprayers • misters and dosing equipment
Tests	Tests may include: • testing the level of fumigant in the atmosphere and pressure testing
Records	Records are maintained to meet legal and company requirements

FDFTEC3003A Apply raw materials, ingredient and process knowledge to production problems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers skills and knowledge required to apply knowledge of ingredients and processes to troubleshoot typical problems that occur in preparing, processing and/or packaging product.

Application of the Unit

Application of the unit	This unit applies where problem solving occurs over one or more processes and requires an understanding of the characteristics of raw materials and ingredients and processing methods used. It typically applies to the production operator where responsibility for solving problems relating to non-conforming raw materials, ingredients and processes.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify and respond to non-conforming ingredients/raw materials	1.1. Non-conformance in raw materials/ingredients is identified and reported according to workplace reporting requirements 1.2. Causes of non-conformance are investigated and reported according to workplace reporting requirements 1.3. Corrective action is determined and implemented within level of responsibility and workplace procedures 1.4. Action is taken to prevent recurrence of non-conformance 1.5. Action is reported according to workplace reporting requirements
2. Identify and respond to non-conforming product and processes	2.1. Processing parameters, stages and changes which occur during processing are monitored 2.2. Non-conformance in processing, handling and/or storage is identified and corrective action taken according to workplace requirements 2.3. Causes of non-conformance relating to processing, handling and/or storage are investigated and reported according to workplace reporting requirements 2.4. Corrective action is determined and implemented within level of responsibility and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.5. Action is taken to prevent recurrence of non-conformance 2.6. Action is reported according to workplace reporting requirements 2.7. Work is conducted in accordance with workplace environmental guidelines

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify requirements of ingredient/raw material characteristics within level of responsibility
- follow procedures to identify, remove/isolate and report non-conforming ingredients/materials and/or product according to workplace reporting requirements
- determine likely causes of non-conformance of ingredients/raw materials
- recognise indicators of unacceptable or non-conforming processing, handling and/or storage outcomes
- act promptly to identify, remove/isolate and report non-conforming product and/or processes
- access and apply workplace information relating to process troubleshooting
- investigate non-conformance to determine likely causes and report findings to appropriate personnel
- identify action required to correct non-conformance and implement within level of responsibility
- identify action required to prevent or minimise and control recurrence of non-conformance and implement within level of responsibility
- complete workplace records, including reporting non-conformance and documenting corrective actions according to workplace recording procedures
- conduct tests to confirm raw material/ingredient and/or final product quality characteristics according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Required knowledge
Knowledge of: • basic composition and function of each main raw material/ingredient used, such as awareness of ingredient grades or types • common causes of contamination/unacceptable quality of raw materials/ ingredients • methods used to confirm quality standard, such as accessing information (e.g. certificates of analysis and/or laboratory clearance information) • the effect of variation in raw materials/ingredients on processing stages and final product outcome, including factors likely to cause variation, and scope to adjust or correct for variation at each processing stage • appropriate handling and storage requirements for raw materials/ingredients and final product, and the effect of failing to meet required storage conditions • the changes and reactions that occur through processing stages, including the signs and symptoms of poor/unacceptable processing or equipment operation • factors that affect the shelf-life of product • the inter-relationships between processing stages and the effect of variation in processing parameters on process outcome and on final product, including factors likely to cause variation, and scope to adjust or correct for variation at subsequent process stages • procedures for identifying and isolating non-conforming product • troubleshooting information and techniques • procedures and related documentation required to amend or introduce a new method or procedure, such as short term procedures for amending or updating specifications and processing parameters • reporting requirements and responsibilities • test methods to confirm raw material/ingredient and/or final product quality characteristics where relevant

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: • describe required quality characteristics for raw materials and ingredients • describe required processes to achieve production specifications • identify common non-conforming materials and ingredients and causes • identify common non-conforming processes and causes • determine and undertake corrective action for non-conformances • complete workplace documentation and report non-conformances • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: • ingredient/raw materials specifications and related advice, such as certificates of analysis • ingredients/raw materials and final product and related processing equipment and stores areas • troubleshooting information relevant to workplace processes • sampling and test equipment and procedures as required • system for managing and updating workplace documents, such as Standard Operating Procedures (SOPs) and log sheets/processing parameters • reporting and recording system and procedures.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: • FDFOP2013A Apply sampling procedures • FDFPPL3002A Report on workplace performance • MSL973001A Perform basic tests • PMBQUAL390A Solve problems using quality tools.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out according to company procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements.
Legislative requirements	Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes: • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, occupational health and safety (OHS), anti-discrimination and equal opportunity When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Food Standards Code and reference to food safety is replaced by GMP
Ingredients/raw materials	Ingredients/raw materials are those used to manufacture product
Typical processing and related techniques	Typical processing and related techniques include but are not limited to: • raw materials/ingredient dispensing • preparation • mixing and blending • conditioning

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• primary and further processing • wrapping • packing and storage
Typical process parameters	Typical process parameters include but are not limited to: • temperature • time • pressure • flow rate
Typical reactions	Typical reactions depend on processing method. Examples include but are not limited to: • gelatinisation and hydration
Problem minimisation	Where recurrence of a problem cannot be prevented, procedures should be established to minimise the likelihood of recurrence and to identify any further incidents

Prerequisite units	

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Check and verify supporting documentation	1.1. ***Information*** from ***documents*** is identified, checked and recorded 1.2. ***Supporting documentation*** is examined to establish accuracy and completeness and to ensure authorisation by appropriate personnel
2. Prepare and process banking and petty cash documents	2.1. Deposits and withdrawals are accurately entered and balanced according to organisational procedures 2.2. Cheques and card vouchers are checked for ***validity*** before processing 2.3. Banking documentation is reconciled with organisation's financial records 2.4. Petty cash claims and vouchers are checked, processed and recorded and the petty cash book is balanced according to organisational procedures
3. Prepare and process invoices for payment to creditors and for debtors	3.1. Invoices are prepared in accordance with organisational procedures 3.2. Invoices are checked against source documents for accuracy and any errors corrected 3.3. All invoices and related documents are filed for auditing purposes
4. Prepare journals and	4.1. ***Journals*** are prepared ***accurately and completely***

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
batch monetary items	and items batched within organisational timelines 4.2. ***Batch items*** are precisely matched to initial receipt records 4.3. Journals are authorised in accordance with ***organisational policy and procedures***
5. Post journals to ledger	5.1. Journals are posted to ledger accurately and in accordance with organisation input standards with transactions correctly allocated to system and accounts
6. Enter data into system	6.1. Data is entered into system accurately and in accordance with organisation input standards with transactions correctly allocated to system and accounts 6.2. Related systems are updated to maintain the integrity of relationships between financial systems
7. Prepare deposit facility and lodge flows	7.1. A ***deposit facility*** is selected appropriate to the ***banking method*** to be used 7.2. Batch is balanced with deposit facility without error 7.3. ***Security and safety precautions*** are taken appropriate to the method of banking in accordance with organisational policy and ***industry and legislative requirements*** 7.4. ***Proof of lodgement*** is obtained and filed so that it is easily accessible and traceable
8. Extract a trial balance and interim reports	8.1. Any ***special transactions*** are processed accurately 8.2. Cash and credit journals are completed and posted to general ledger 8.3. A trial balance is extracted and checked and other required ***reports*** prepared 8.4. Any ***errors*** are found and corrected

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• determine and confirm work requirements, using questioning and active listening as required • share information, listen and understand • read and interpret documentation from a variety of sources • use language and concepts appropriate to cultural differences • numeracy skills to make financial calculations • information technology skills for accessing and using spreadsheets and databases • literacy skills for data analysis and interpretation • evaluative and general analytical skills • organisational skills, including the ability to plan and sequence work
Required knowledge
• accounting conventions, processes and procedures • banking procedures and guidelines • industry codes of practice • legislative and regulatory requirements relevant to the work • organisational policy and procedures • relevant Acts and regulations • security procedures for handling cheques, vouchers and cash

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • accurately enter and balance deposits and withdrawals • process and balance petty cash transactions • check and verify supporting documentation • apply relevant security measures for preparing and banking receipts • batch monetary items and prepare deposit facilities • use knowledge of organisational policies and procedures and legislative requirements to accurately enter data into accounting systems and process journal entries

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• prepare and authorise journals and check journal processing reports • extract and check/correct a trial balance • file documentation to meet all organisational and regulatory requirements.
Context of and specific resources for assessment	Assessment must ensure: • competency is demonstrated in the context of the financial services work environment and conditions specified in the range statement either in a relevant workplace or a closely simulated work environment • access to and the use of a range of common office equipment, technology, software and consumables.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples, in combination, are appropriate for this unit: • evaluating an integrated activity which combines the elements of competency for the unit or a cluster of related units of competency • verbal or written questioning on underpinning knowledge and skills which may include formal examinations • setting and reviewing workplace projects and business simulations/scenarios • evaluating samples of work • accessing and validating third party reports.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information includes:	• account numbers • addresses

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• amounts of money, figures • card numbers • cheque numbers • dates • names.
Documents may include:	• application forms • claim forms • petty cash vouchers • invoices • purchase orders • receipts • credit notes • statements • deposit books • delivery dockets • remittance advice.
Supporting documentation may include information that supports the transaction such as:	• suspense reports • reconciliations.
Validity may include:	• signature • dates • amounts.
Journals may include:	• general • cash receipts • cash payments • sales • purchases • returns and allowances.
Preparing journals ***accurately and completely*** means:	• meaningful notation • effective date specified • correct allocation • balanced transaction.
Batch items are:	• grouped receipts treated as a separate transaction entity.
Organisational policy and procedures may include:	• operations manual • internal control guidelines • computer system documentation.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Deposit facilities may include:	• bank deposit slips • direct debit transaction reports.
Banking methods include:	• personal • through a third party security company • by pick-up.
Security and safety precautions may include:	• banking of all negotiable instruments on day received • all batches posted on day of receipt • cash management processes.
Industry and legislative requirements may cover:	• Anti-Money Laundering and Counter Terrorism Financing Acts • Australian Accounting Standards • Australian Securities and Investments Commission (ASIC) Code • consumer credit legislation • industry codes of practice • occupational health and safety (OHS) Acts and guidelines • Privacy Act • relevant Insurance Act • Stamp Duties Act • Taxation Act • Trade Practices Act.
Proof of lodgement may include:	• bank stamped deposit facility • verified transaction listing.
Special transactions may include:	• introduction of additional capital • drawings of cash and goods • purchase and sale of non-current assets at book value • interest payable and receivable on overdue accounts • dishonour of cheques including write-back of discount • bad debts written off or recovered.
Reports may include:	• balance sheet • trial balance • unadjusted income statement.
Errors may include:	• a transaction not being recorded in a journal or recorded incorrectly • a journal entry not posted to the ledger or posted twice • an entry being made in an incorrect ledger account but on the correct side • entries being made on the wrong side of two ledger

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	accounts • offsetting errors (compensating errors) where two independent errors for the same amount are made.

FNSORG604A Establish outsourced services and monitor performance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to establish a scope and criteria for outsourced services such as accountants, actuaries, solicitors, insurers, call centres, investment managers and fund administrators, select and engage suppliers, and monitor their performance. This unit may apply to job roles subject to licensing, legislative, regulatory or certification requirements so Commonwealth, State or Territory requirements should be confirmed with the relevant body.

Application of the Unit

Application of the unit	This unit may apply to job roles where outsourced services are contracted and monitored as a team process or an individual responsibility in a financial services organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Establish scope for outsourced services	1.1. A review is conducted to determine the extent to which selected activities are conducted internally or by outsourced services and identify which activities within the organisation should be outsourced 1.2. Scope of possible ***outsourced services*** is identified and documented 1.3. ***Legislative and regulatory requirements*** in required services are identified and documented 1.4. Recommendation or decision on scope of outsourced services is made according to organisational requirements
2. Establish criteria for outsourced services	2.1. Scope of expertise required for the outsourced service is defined and ***performance standards*** established and documented 2.2. Monitoring and reporting procedures for outsourced

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	services are established and documented 2.3. Procedure for integrating outsourced services with practices is established and documented and briefing and tender documents prepared
3. Select and engage outsourced suppliers	3.1. Tender process is implemented according to organisational guidelines and tender applications assessed according to required criteria with further information obtained if necessary 3.2. Suppliers of outsourced services are selected and engaged formally according to organisational guidelines 3.3. Outsourced supplier is briefed on required service and fund standards and procedures 3.4. Personnel within the organisation are informed about outsourced services and working implications
4. Monitor performance of outsourced services	4.1. Outsourced service performance is assessed against performance outcomes and organisational requirements and further review periods established 4.2. ***Required changes in service*** are negotiated 4.3. Supplier performance is documented and communicated internally as required 4.4. Outsourced services are re-engaged or disengaged as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

• well-developed communication skills to:
  • gather information and data by consulting with staff and potential suppliers, using questioning and active listening as required
  • liaise with others, share information, listen and understand
  • use language and concepts appropriate to cultural differences
• highly developed research and analysis skills for accessing and managing complex information and assessing outsourcing and governance requirements
• well-developed literacy skills to:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• interpret and analyse complex documentation including regulatory and legal compliance requirements and guidelines • draft outsourcing tender documentation, specification and performance measures • produce management reports • well-developed numeracy skills to accurately analyse, record and store data in accordance with organisational requirements • IT skills for accessing and using appropriate integrated financial system software, spreadsheets and databases and using internet information • problem solving skills to identify any issues that have the potential to impact on organisational quality through outsourcing and to develop options to resolve these issues when they arise • organisational skills, including the ability to plan and sequence work
Required knowledge
• features, compliance and reporting requirements of the relevant sector of industry • organisational procedures for ensuring RG146 compliance • performance management procedures • reputation and expertise of service providers in the industry • risk management strategies • scope of service provisions • timeframe requirements for compliance reports for specialist services

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • interpret and comply with legislative and regulatory requirements • establish criteria for outsourced services and select and effectively and efficiently engage them • effectively monitor performance of outsourced services • implement a tender process and assess applications.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Context of and specific resources for assessment	Assessment must ensure: • competency is demonstrated in the context of the financial services work environment and conditions specified in the range statement either in a relevant workplace or a closely simulated work environment • access to and the use of a range of common office equipment, technology, software and consumables • access to financial services information • access to organisational policies and procedures documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples, in combination, are appropriate for this unit: • evaluating an integrated activity which combines the elements of competency for the unit or a cluster of related units of competency • verbal or written questioning on underpinning knowledge and skills • setting and reviewing business simulations or scenarios • evaluating samples of work • accessing and validating third party reports.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Outsourced services may include:	• actuaries • auditors • communication consultants • employer relationship managers • insurers

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• investment managers • IT specialists • planners • sales and marketing specialists • solicitors • trustees.
Legislative and regulatory guidelines may include:	• anti-discrimination legislation (Commonwealth and State or Territory) • Consumer Affairs Act • Corporations Act • Financial Services Reform Act (FSRA) • Income Tax Assessment Act • industrial legislation • industry codes of practice • Insurance Act • National Guarantee Funds Rules • Privacy Act • stamp duty legislation • Superannuation Industry (Supervision) (SIS)Act • Superannuation Industry Regulations • Trade Practices legislation • Trustee Acts or Trust Acts in each State and Territory.
Performance standards may include:	• available personnel • communication and documentation standards • completion dates • data availability • document presentation • experience • interpersonal relations • IT compatibility • location • number of outcomes • performance goals • procedures • reputation • response times • service dedication • staff communication • value for money.
Required changes in	• changes in the way service is implemented

FPICOT2233B Navigate in forest areas

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the outcomes required to navigate in forest areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids

General workplace legislative and regulatory requirements apply to this unit; however there are no specific licensing or certification requirements at the time of publication

This unit replaces FPICOT2233A Navigate in forest areas

Application of the Unit

Application of the unit

The unit involves navigating in forest areas in a forest environment setting

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills This unit contains employability skills

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for navigation	1.1. Applicable ***occupational health and safety*** (OHS), ***environmental***, ***legislative*** and ***organisational requirements*** relevant to navigating in forest areas are identified and followed
	1.2. ***Information*** is gathered and ***relevant factors*** are identified and checked with ***appropriate personnel***
	1.3. Suitable ***maps***, ***equipment*** and ***navigation aids*** are selected and checked for accuracy, currency and operational effectiveness in line with manufacturer recommendations
	1.4. Faults or errors in maps and equipment are detected and corrected
	1.5. ***Communication*** with others is established and maintained in line with OHS requirements
2. Plan the route	2.1. Route is planned according to assignment instructions and OHS requirements
	2.2. Maps are examined to identify relevant ***symbols***, ***information***, ***navigation data and environmental requirements***
	2.3. Emergency or contingency exit routes are planned
	2.4. ***Limitations*** in planning are specified and assistance is sought in line with organisational requirements
3. Conduct navigation	3.1. Navigation is undertaken according to planned route

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	and schedule
	3.2. Maps are correctly orientated to ***surroundings*** according to planned route
	3.3. Equipment and navigation aids are used in line with manufacturer recommendations
	3.4. Alternative routes are navigated to bypass ***obstacles*** and improve efficiency of route or course
	3.5. Impact on the environment as a result of navigation is minimised

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills

- Technical skills sufficient to use and maintain relevant tools and equipment
- Communication skills sufficient to follow legislation, regulations, standards, codes of practice and established safe practices and procedures for navigating in forest areas; use appropriate communication and interpersonal techniques and methods with colleagues and others
- Literacy skills sufficient to follow legislation, regulations, standards, codes of practice and established safe practices and procedures for navigating in a forest area
- Numeracy skills sufficient to calculate bearings using maps and compass correctly
- Problem solving skills sufficient to review and identify work requirements; identify problems and equipment faults; demonstrate appropriate response procedures; interpret maps, charts, distances, relevant symbols, map meaning and line types; estimate resource and equipment requirements; solve problems and bypass obstacles; locate own position on a map

Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for navigating in forest areas
- Environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition on completion of activity
- Organisational and site standards, requirements, policies and procedures for navigating in forest areas

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- Environmental risks and hazards
- Types of maps and charts, and their uses
- Representation of topographic features on maps and plans
- Common scales used on maps and plans
- Features and use of a compass and factors that affect its accuracy
- Advantages and disadvantages of different map and chart types and sources of error
- Techniques for estimating distance travelled within a particular activity context
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace records and information

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to provide evidence that they can safely and efficiently navigate in forest areas demonstrating the correct orientation and use of maps, plans and compass
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of: • following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to navigating in forest areas • following organisational policies and procedures relevant to navigating in forest areas • selecting, interpreting and applying maps and other relevant information in written, diagrammatic and

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	verbal form • using maps, compass and navigation aids to navigate in forest areas, confirming factors affecting the use of navigation equipment • planning and conducting navigation by passing obstacles within designated timeframes

Context of and specific resources for assessment	• Competency is to be assessed in the workplace or realistically simulated workplace
	• Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
	• Assessment is to follow relevant regulatory or Australian Standards requirements
	• The following resources should be made available:
	  • workplace location or simulated workplace
	  • materials and equipment relevant to undertaking work applicable to this unit
	  • specifications and work instructions

Method of assessment	• Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package • Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge • Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills • Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge • Assessment may be applied under project-related conditions (real or simulated) and require evidence of process • Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances • Assessment may be in conjunction with assessment of other units of competency • The assessment environment should not disadvantage

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	the candidate • Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English • Where the participant has a disability, reasonable adjustment may be applied during assessment • Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS requirements:	are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include: • personal protective equipment and clothing • safety equipment • first aid equipment • fire fighting equipment • hazard and risk control • fatigue management • elimination of hazardous materials and substances • safe forest practices, including required actions relating to forest fire • manual handling including shifting, lifting and carrying
Environmental requirements may include:	• legislation • organisational policies and procedures • workplace practices

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Legislative requirements: are to be in line with applicable commonwealth, state or territory legislation, regulations, certification requirements and codes of practice and may include:

- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- OHS
- the environment
- equal opportunity
- anti-discrimination
- relevant industry codes of practice
- duty of care

Organisational requirements may include:

- legal
- organisational and site guidelines
- policies and procedures relating to own role and responsibility
- quality assurance
- procedural manuals
- quality and continuous improvement processes and standards
- OHS, emergency and evacuation procedures
- ethical standards
- recording and reporting requirements
- equipment use, maintenance and storage requirements
- environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)

Information may relate to:

- local inhabitants
- type of terrain or features of the route
- access and exit routes
- natural protection or shelter
- land management and legislative requirements
- guide books

Relevant factors may relate to:

- types of terrain and gradient
- weather conditions
- obstacles
- hazards and access to required resources and

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	facilities • distance • estimated travelling time • magnetic bearings
Appropriate personnel may include:	• supervisors • clients • colleagues • line management
Maps may include:	• cadastral and topographic maps • charts • guide books • aerial photographs • sketches • cave maps • diagrams
Equipment may include:	• compass • track and survey markers • beacons • personal protective equipment and clothing • global positioning system (GPS) units
Navigation aids may include:	• track and creek junctions and crossings • survey markers • beacons • track markers • paths • signs • arrows • compass and man-made objects or features
Communication may include:	• verbal and non-verbal language • constructive feedback • active listening • questioning to clarify and confirm understanding • use of positive, confident and cooperative language • use of language and concepts appropriate to individual social and cultural differences • control of tone of voice
Symbols and information may include:	• grid lines and numbers • contour lines

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Navigation data may include:

- scale
- map legend
- topographic features
- markers and beacons
- water depth
- grid reference points
- distances
- estimated travelling times
- height gain and loss
- gradient
- identifiable features
- exit routes

Limitations may relate to:

- job role and responsibilities
- own competency level
- industry requirements
- own understanding of risk identification processes
- own interpretation of maps
- legislation
- regulations and procedures
- legal responsibilities
- OHS environmental requirements

Surroundings may include:

- ground or terrain
- bodies of water
- beacons and markers
- natural formations
- landmarks
- man-made features

Obstacles may include:

- thick vegetation
- drops and climbs
- marshes and bogs
- fog
- rivers
- lakes and dams
- tides
- hazards, such as rocks

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to collect seed	1.1. Applicable ***occupational health and safety*** (OHS), ***environmental***, ***legislative*** and ***organisational requirements*** relevant to collecting seed are identified and followed 1.2. ***Work order*** is reviewed and clarified with ***appropriate personnel*** 1.3. Site ***environmental protection measures*** are followed in line with relevant legislation and regulations 1.4. Potential locations for the collection of required seeds are identified and required ***approvals*** are sought and obtained from ***relevant authorities*** 1.5. ***Equipment and resources*** appropriate to work requirements are selected and checked for operational effectiveness in line with manufacturer recommendations 1.6. Seed collecting operations are checked to ensure safe working conditions and ***planned*** in line with site procedures 1.7. ***Communication*** with others is established and maintained in line with OHS requirements
2. Select and assess seed	2.1. Plant species and condition are visually assessed and checked to ensure the collection of healthy seeds 2.2. **Method of seed collection** is selected and applied without causing damage to ***health of parent plant*** 2.3. Seed is collected from a range of plants and from different areas of plants to maintain genetic diversity 2.4. Seed is placed in clean containers and accurately

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	labelled in line with industry, site and organisational requirements
3. Clean and store seed	3.1. Seed is ***separated*** from other materials, weighed and stored in line with species requirements and site procedures
	3.2. ***Seed treatment*** is applied to prevent deterioration in line with seed species and site procedures
	3.3. ***Seed information*** is accurately recorded in line with site procedures
	3.4. Seed is ***packaged*** for storage in line with industry, legislative and organisational requirements
	3.5. Seed collection information and results are ***recorded and reported*** in line with site procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills

- Technical skills sufficient to use and maintain relevant equipment and resources; efficiently and safely carry out seed collecting procedures; identify a range of seed species and apply accurate identifying information; use a range of seed collection methods and related equipment
- Communication skills sufficient to use appropriate communication and interpersonal techniques with colleagues and others
- Literacy skills sufficient to record and maintain information, including details of seed species, weight and place of origin
- Numeracy skills sufficient to apply appropriate mathematical techniques to calculate seed weights and quantities
- Problem solving skills sufficient to review and identify work requirements; identify problems and equipment faults; demonstrate appropriate response procedures

Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for collecting seed
- Environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

on completion of activity

- Organisational and site standards, requirements, policies and procedures for collecting seed
- Environmental risks and hazards
- Procedures for minimising environmental impact
- Range of seed species and appropriate collection, treatment and packaging processes, including storage requirements for different seed species
- Types of diseases and pests likely to infect a range of seed species
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person who demonstrates competency in this unit must be able to provide evidence that they can apply safe and efficient techniques to collect, treat and store a range of seed species in line with species requirements and organisational guidelines
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of: • following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to collecting seed • following organisational policies and procedures relevant to collecting seed • safely and efficiently using and maintaining seed collecting equipment and resources

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	• treating and storing seed in line with site and industry specifications • recording seed collection information and results, and maintaining workplace information

Context of and specific resources for assessment	• Competency is to be assessed in the workplace or realistically simulated workplace
	• Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
	• Assessment is to follow relevant regulatory or Australian Standards requirements
	• The following resources should be made available:
	  • workplace location or simulated workplace
	  • materials and equipment relevant to undertaking work applicable to this unit
	  • specifications and work instructions

Method of assessment	• Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package • Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge • Assessment must be by direct observation of tasks, with questioning on required knowledge and it must also reinforce the integration of employability skills • Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge • Assessment may be applied under project-related conditions (real or simulated) and require evidence of process • Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances • Assessment may be in conjunction with assessment of other units of competency • The assessment environment should not disadvantage the candidate • Assessment practices should take into account any

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English • Where the participant has a disability, reasonable adjustment may be applied during assessment • Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS requirements:	are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include: • personal protective equipment and clothing • safety equipment • first aid equipment • fire fighting equipment • hazard and risk control • fatigue management • elimination of hazardous materials and substances • safe forest practices, including required actions relating to forest fire • manual handling including shifting, lifting and carrying
Environmental requirements may include:	• legislation • organisational policies and procedures • workplace practices
Legislative requirements:	are to be in line with applicable commonwealth, state or territory legislation, regulations,

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	certification requirements and codes of practice and may include: • award and enterprise agreements • industrial relations • Australian Standards • confidentiality and privacy • OHS • the environment • equal opportunity • anti-discrimination • relevant industry codes of practice • duty of care
Organisational requirements may include:	• legal • organisational and site guidelines • policies and procedures relating to own role and responsibility • quality assurance • procedural manuals • quality and continuous improvement processes and standards • OHS, emergency and evacuation procedures • ethical standards • recording and reporting requirements • equipment use, maintenance and storage requirements • environmental management requirements (waste minimisation and disposal, recycling and re-use guidelines)
Work order is to include:	• information and instructions for collecting, treating and storing seed and may also include: • instructions for the environmental monitoring of work and procedures • environmental care requirements relevant to the work
Appropriate personnel may include:	• supervisors • suppliers • clients • colleagues • managers

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Environmental protection measures may include:	• ground growth • canopy • general forest lean • wind speed and direction • fallen trees • density of trees • ground slope • soil and water protection • ground hazards • obstacles
Approvals may include:	• licences and permits required for commercial and non-commercial seed collection • government permits • landholder permits
Relevant authorities may include:	• local governments • parks and reserves managers • forestry managers • relevant government departments and agencies/ authorities, such as those involved in sustainability and environmental issues • relevant Indigenous organisations and agencies
Equipment and resources may include:	• personnel • vehicles • pruning and shaking equipment • sheets • tarpaulins • clean containers for holding seeds • vacuum seed collecting machines • ladders or elevated work platforms • personal protective equipment
Planning includes:	consideration of: • seed collection seasons • when the required species have fruit at optimal condition
Communication may include:	• verbal and non-verbal language • constructive feedback • active listening • questioning to clarify and confirm understanding

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• use of positive, confident and cooperative language • use of language and concepts appropriate to individual social and cultural differences • control of tone of voice
Method of seed collection may include:	• collecting after falling or felling • using ladders • climbing • shaking • high-powered rifles • cherry-pickers
Health of parent plant may require:	• hand picking • careful and selective pruning
Labelling may include:	• seed location • genetic identity
Separation methods may include:	• hand selection • wind separation/winnowing • sieving • vibrating • flotation • drying • crumbling of husks
Seed treatment may include:	• heat • mechanical • chemical protection against pests
Seed information may include:	• time and date of harvest • time and date of receipt into store • weight • species • place or origin of seed • container identifier
Packaging may include:	• vacuum sealing • use of inert atmospheres, such as nitrogen and carbon dioxide • control of packing environment, including temperature, light and moisture
Records and reports may be	maintained by: • electronic database • card index

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

- data sheets
- filing systems

and may be:

- manual
- a computer-based system
- other appropriate organisational communication system

FPIFGM3202B Extract seed

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit describes the outcomes required to extract and process native or non-native seed using an extraction unit. It includes seed storage requirements and extraction unit maintenance

General workplace legislative and regulatory requirements apply to this unit; however there are no specific licensing or certification requirements at the time of publication

This unit replaces FPIFGM3202A Extract seed

Application of the Unit

Application of the unit

The unit involves extracting seed in a variety of work settings, including forest environment settings such as farms, agriculture, workshops, domestic, nurseries and local councils

The skills and knowledge required for competent workplace performance are to be used within the scope of the person's job and authority

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Employability Skills Information

Employability skills This unit contains employability skills

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Receive seed-bearing material into store	1.1. Applicable ***occupational health and safety*** (OHS), ***environmental***, ***legislative*** and ***organisational requirements*** relevant to extracting ***seed*** are identified and followed
	1.2. ***Work order*** is reviewed and checked with ***appropriate personnel***
	1.3. Seed bearing material is received, visually assessed, and species are identified and checked with container label
	1.4. Received containers are ***weighed*** and ***identified*** in line with site procedures
	1.5. Material is stored in dry and well-ventilated ***conditions*** in line with site procedures
	1.6. ***Communication*** with others is established and maintained in line with OHS requirements
2. Extract seed	2.1. Seed is extracted in line with work order, and environmental and OHS requirements
	2.2. Seed extraction processes are planned and checked for safe working conditions
	2.3. ***Extraction units and equipment*** are selected appropriate to work requirements and checked for operational effectiveness in line with manufacturer recommendations

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. Seed extraction ***systems*** are operated and monitored in line with manufacturer recommendations
	2.5. Seed-bearing material is placed in or on extraction unit and agitation is undertaken as required to maximise yield
	2.6. Seed capsules are inspected and unextracted seed is reprocessed as required to ensure maximum yield
3. Clean and store seed	3.1. Seed is separated from other material, weighed and stored in line with species requirements and site procedures
	3.2. ***Seed information*** is accurately recorded in line with site procedures
	3.3. Seed is ***packaged*** for storage in line with industry, legislative, organisational and environmental requirements
4. Clean and maintain extraction unit	4.1. Residue and other waste material is disposed of in line with site environmental management guidelines
	4.2. Extraction units and equipment are cleaned, maintained and calibrated in line with manufacturer recommendations, site procedures and environmental requirements
	4.3. Abnormal operation or faults with extraction units and equipment are reported for corrective action in line with site procedures
	4.4. Work areas are cleaned and maintained in line with site procedures, and organisational and environmental requirements
	4.5. Seed extraction information and results are ***recorded and reported*** in line with site procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills

- Technical skills sufficient to use and maintain seed extraction units; efficiently and safely carry out seed extraction techniques; identify a range of seed species from capsules and apply accurate identifying information

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- Communication skills sufficient to use appropriate communication and interpersonal techniques with colleagues and others
- Literacy skills sufficient to record and report workplace information; maintain documentation
- Numeracy skills sufficient to apply appropriate mathematical techniques to calculate seed weights
- Problem solving skills sufficient to identify problems and equipment faults; demonstrate appropriate response procedures

Required knowledge

- Applicable commonwealth, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes for extracting seed
- Environmental protection requirements, including the safe disposal of waste material, the minimisation of environmental impact, and the cleaning of plant, tools and equipment
- Organisational and site standards, requirements, policies and procedures for extracting seed
- Environmental risks and hazards
- Hazards associated with seed extraction, processing and storage
- Range of seed species, including native and non-native
- Seed extraction processes for native and non-native species
- Storage procedures and requirements for different seed species
- Established communication channels and protocols
- Problem identification and resolution strategies, and common fault finding techniques
- Types of tools and equipment, and procedures for their safe use and maintenance
- Appropriate mathematical procedures for estimating and measuring, including calculating time to complete tasks
- Procedures for recording and reporting workplace information

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment A person who demonstrates competency in this unit must

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	be able to provide evidence that they can apply safe and efficient techniques to identify, extract, clean and store seed in line with species requirements and organisational guidelines
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to, and satisfy, all of the requirements of the elements of this unit and include demonstration of: • following applicable commonwealth, state or territory legislative and regulatory requirements and codes of practice relevant to extracting seed • following organisational policies and procedures relevant to extracting seed • applying seed extraction and storage techniques in line with work order instructions and within prescribed organisational tolerances • operating, cleaning and maintaining seed extraction units and equipment • recording seed species information and extraction results, and maintaining workplace information

Context of and specific resources for assessment	• Competency is to be assessed in the workplace or realistically simulated workplace
	• Assessment is to occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment of required knowledge, other than confirmatory questions, will usually be conducted in an off-site context
	• Assessment is to follow relevant regulatory or Australian Standards requirements
	• The following resources should be made available:
	  • workplace location or simulated workplace
	  • materials and equipment relevant to undertaking work applicable to this unit
	  • specifications and work instructions

Method of assessment	• Assessment must satisfy the endorsed Assessment Guidelines of the FPI11 Training Package • Assessment methods must confirm consistency and accuracy of performance (over time and in a range of workplace relevant contexts) together with application of required knowledge • Assessment must be by direct observation of tasks,

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

with questioning on required knowledge and it must also reinforce the integration of employability skills

- Assessment methods must confirm the ability to access and correctly interpret and apply the required knowledge
- Assessment may be applied under project-related conditions (real or simulated) and require evidence of process
- Assessment must confirm a reasonable inference that competency is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances
- Assessment may be in conjunction with assessment of other units of competency
- The assessment environment should not disadvantage the candidate
- Assessment practices should take into account any relevant language or cultural issues related to Aboriginality, gender or language backgrounds other than English
- Where the participant has a disability, reasonable adjustment may be applied during assessment
- Language and literacy demands of the assessment task should not be higher than those of the work role

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS requirements: are to be in line with applicable commonwealth, state or territory legislation and regulations, and organisational safety policies and procedures, and may include:

- personal protective equipment and clothing

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

- safety equipment
- first aid equipment
- fire fighting equipment
- hazard and risk control
- fatigue management
- elimination of hazardous materials and substances
- safe forest practices, including required actions relating to forest fire
- manual handling including shifting, lifting and carrying

Environmental requirements may include:

- legislation
- organisational policies and procedures
- workplace practices

Legislative requirements: are to be in line with applicable commonwealth, state or territory legislation, regulations, certification requirements and codes of practice and may include:

- award and enterprise agreements
- industrial relations
- Australian Standards
- confidentiality and privacy
- OHS
- the environment
- equal opportunity
- anti-discrimination

HLTFA301B Apply first aid

Modification History

Unit Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess the situation	1.1 Identify assess and minimise **hazards** in the situation that may pose a risk of injury or illness to self and others
	1.2 Minimise immediate **risk** to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements
	1.3 Assess casualty and identify injuries, illnesses and conditions
2 Apply first aid procedures	2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness
	2.2 Use available **resources and equipment** to make the casualty as comfortable as possible
	2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner
	2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort
	2.5 Seek consent from casualty prior to applying first aid management
	2.6 Provide **first aid management** in accordance with **established first aid principles** and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements
	2.7 Seek first aid assistance from others in a timely manner and as appropriate
	2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures

© Commonwealth of Australia, 2025 Skills Insight

		2.9 Use safe manual handling techniques as required
		2.10 Monitor **casualty's condition** and respond in accordance with effective first aid principles and procedures
		2.11 Finalise casualty management according to casualty's needs and first aid principles
3	Communicate details of the incident	3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant **communication media and equipment**
		3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
		3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
		3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
		3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
4	Evaluate own performance	4.1 Seek feedback from **appropriate clinical expert**
		4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents
		4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

© Commonwealth of Australia, 2025 Skills Insight

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

ARC Guidelines relating to provision of first aid as outlined

Working knowledge of:

basic principles and concepts underlying the practice of first aid

procedures for dealing with major and minor injury and illness

priorities of management in first aid when dealing with life threatening conditions

basic occupational health and safety requirements in the provision of first aid

infection control principles and procedures, including use of standard precautions

chain of survival

first Aiders' skills and limitations

Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

First aid management of:

abdominal injuries

allergic reactions

altered and loss of consciousness

bleeding

burns - thermal, chemical, friction, electrical

cardiac arrest

casualty with no signs of life

chest pain

choking/airway obstruction

injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

envenomation - snake, spider, insect and marine bites

environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke

fractures

medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

near drowning

© Commonwealth of Australia, 2025 Skills Insight

poisoning and toxic substances (including chemical contamination)

respiratory distress

seizures

shock

stroke

substance misuse - common drugs and alcohol, including illicit drugs

Awareness of stress management techniques and available support

Social/legal issues:

duty of care

need to be culturally aware, sensitive and respectful

importance of debriefing

confidentiality

own skills and limitations

Essential skills:

Ability to:

Conduct an initial casualty assessment

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills

Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit **HLTCPR201A Perform CPR**)

Apply first aid principles

Infection control, including use of standard precautions

Follow OH&S guidelines

Demonstrate:

safe manual handling

consideration of the welfare of the casualty

ability to call an ambulance

site management to prevent further injury

Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available

© Commonwealth of Australia, 2025 Skills Insight

medical/pharmaceutical instructions

Administer medication in line with state/territory regulations, legislation and policies

Prepare a written incident report or provide information to enable preparation of an incident report

Communicate effectively and assertively in an incident

Make prompt and appropriate decisions relating to managing an incident in the workplace

Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition

Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evaluate own response and identify appropriate improvements where required

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:	Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit Competence should be demonstrated working individually and, where appropriate, as part of a first aid team Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines
Context and resources required for	Skills in performing first aid procedures are to be assessed through demonstration, with

© Commonwealth of Australia, 2025 Skills Insight

assessment:	questioning to confirm essential knowledge For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines
Access and equity considerations:	All workers in the health industry should be aware of access and equity issues in relation to their own area of work All workers should develop their ability to work in a culturally diverse environment In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:	Focus on first aid management of specific types of injury First aid provision under specific constraints

© Commonwealth of Australia, 2025 Skills Insight

	or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
Established first aid principles include:	Preserve life Prevent illness, injury and condition(s) becoming worse Promote recovery Protect the unconscious casualty
Vital signs include:	Consciousness Breathing Circulation
A hazard is:	A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
Hazards may include:	Physical hazards Biological hazards Chemical hazards Hazards associated with manual handling
Risks may include:	Risks from equipment, machinery and substances Risks from first aid equipment Environmental risks Exposure to blood and other body substances Risk of further injury to the casualty Risks associated with the proximity of other workers and bystanders

© Commonwealth of Australia, 2025 Skills Insight

	Risks from vehicles
Casualty's condition is managed for:	Abdominal injuries Airway obstruction Allergic reactions Altered and loss of consciousness Bleeding Burns - thermal, chemical, friction, electrical Chest pain/cardiac arrest Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations Near drowning Envenomation - snake, spider, insect and marine bites Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke Fractures Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions No signs of life Poisoning and toxic substances (including chemical contamination) Respiratory distress/arrest Seizures Shock Stroke Substance misuse - common drugs and alcohol, including illicit drugs.
First aid management must take into account applicable aspects of:	The setting in which first aid is provided, including:

© Commonwealth of Australia, 2025 Skills Insight

	workplace policies and procedures industry/site specific regulations, codes etc. OHS requirements state and territory workplace health and safety legislative requirements location and nature of the incident situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents location of emergency services personnel. The use and availability of first aid equipment and resources Infection control Legal and social responsibilities of first aider
Resources and equipment are used appropriate to the risk to be met and may include:	AED First aid kit Auto-injector Puffer/inhaler Resuscitation mask or barrier Spacer device
Communication media and equipment may include but are not limited to:	Telephones, including landline, mobile and satellite phones HF/VHF radio Flags Flares Two way radio Email Electronic equipment Hand signals

© Commonwealth of Australia, 2025 Skills Insight

Appropriate clinical expert may include:	Supervisor/manager Ambulance officer/paramedic Other medical/health worker
Documentation may include:	Injury report forms Workplace documents as per organisation requirements
Documentation may include recording:	Time Location Description of injury First aid management Fluid intake/output, including fluid loss via: blood vomit faeces urine Administration of medication including: time date person administering dose Vital signs

HLTFA311A Apply first aid

Modification History

HLT07 Version 4	HLT07 Version 5	Comments
HLTFA301C Apply first aid	HLTFA311A Apply first aid	Updated in V5 - changes to competency outcomes of first aid units

Unit Descriptor

Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

Application

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements

Employability Skills Information

Employability Skills This unit contains Employability Skills

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess the situation	1.1 Identify assess and minimise *hazards* in the situation that may pose a risk of injury or illness to self and others 1.2 Minimise immediate *risk* to self and casualty's health and safety by controlling any hazard in accordance with work health and safety requirements 1.3 Assess casualty and identify injuries, illnesses and conditions

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2. Apply first aid procedures	2.1 Adopt a communication style to match the casualty's level of consciousness 2.2 Use available *resources and equipment* to make the casualty as comfortable as possible 2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner 2.4 Determine and explain relevant first aid procedures to provide comfort 2.5 Seek consent from casualty prior to applying first aid management 2.6 Provide *first aid management* in accordance with *established first aid principles and procedures* 2.7 Seek first aid assistance from others in a timely manner and as appropriate 2.8 Correctly operate first aid equipment for first aid management according to manufacturer/supplier's instructions and procedures 2.9 Use safe manual handling techniques 2.10 Monitor *casualty's condition* and respond in accordance with established first aid principles and procedures 2.11 Finalise casualty management according to casualty's needs and first aid principles
3. Communicate details of the incident	3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstance 3.2 Accurately convey observation of casualty's condition and management activities to ambulance services / relieving personnel 3.3 Accurately assess and *report details* of casualty's physical condition, changes in conditions, management and response to management in line with established procedures 3.4 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
4. Evaluate own performance	4.1 Seek feedback from *appropriate clinical expert* 4.2 Recognise the possible psychological impacts on

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	rescuers involved in critical incidents
	4.3 Participate in debriefing/evaluation to improve future response and address individual needs

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes a demonstrated understanding of:

- Awareness of stress management techniques and available support
- First aid management, based on a risk assessment relevant to the workplace or community setting of:
  - abdominal injuries
  - allergic reactions
  - altered and loss of consciousness
  - asthma
  - anaphylaxis
  - bleeding
  - burns – thermal, chemical, friction, electrical
  - cardiac arrest
  - chest pain
  - choking/airway obstruction
  - drowning
  - envenomation – snake, spider, insect and marine bites and stings
  - environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
  - injuries- cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
  - medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
  - poisoning and toxic substances (including chemical contamination)
  - respiratory distress

© Commonwealth of Australia, 2025 Skills Insight

  - seizures
  - shock
  - stroke
  - substance misuse – common drugs and alcohol, including illicit drugs
  - unconsciousness, not breathing or not breathing normally
- Guidelines for provision of first aid as outlined in Australian Resuscitation Council (ARC) Guidelines and guidelines of Australian national peak clinical bodies and State / Territory legislation and regulations
- Social / legal issues including:
  - duty of care
  - confidentiality
  - importance of debriefing
  - need to be culturally aware, sensitive and respectful
  - own skills and limitations
- Understanding of:
  - basic work health and safety requirements in the provision of first aid
  - basic principles and concepts underlying the practice of first aid
  - chain of survival
  - infection control principles and procedures, including use of standard precautions
  - priorities of management in first aid when dealing with life threatening conditions
  - procedures for dealing with major and minor injury and illness
- Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to
- Understanding the causes of asphyxia due to body position

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Apply first aid principles
- Call an ambulance and/or medical assistance according to relevant circumstances and report casualty(s) condition
- Communicate effectively and assertively in an incident
- Conduct an initial casualty assessment
- Management of:
  - Anaphylaxis using adrenalin auto-injector
  - Avoiding asphyxia due to body position
  - Bronchospasm using bronchodilator and spacer device
  - Cardiac arrest using single rescuer procedure, including the demonstration of a seamless changeover between operators

© Commonwealth of Australia, 2025 Skills Insight

  - External haemorrhage
  - Fractures, sprains and strains using arm slings, roller bandages and other appropriate immobilisation techniques
  - Unconscious casualty including using a recovery position
- Demonstrate:
  - ability to call an ambulance
  - consideration of the welfare of the casualty
  - safe manual handling
  - site management to prevent further injury
  - understanding of causes contributing to asphyxia due to body position
- Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit *HLTCPR211A Perform CPR*)
- Demonstrate infection control, including use of standard precautions
- Evaluate own response and identify appropriate improvements where required
- Follow State and Territory work health and safety legislative requirements
- Make prompt and appropriate decisions relating to managing an incident in the workplace
- Plan an appropriate first aid response in line with established first aid principles, ARC Guidelines and guidelines of Australian national peak clinical bodies, industry standards and State / Territory legislation and regulations and respond to contingencies in line with own skills
- Prepare a written incident report or provide information to enable preparation of an incident report
- Provide assistance with self-medication as per subject's own medication regime and/or administer medication in line with State/Territory legislation and regulations, organisation policies and any available medical/pharmaceutical instructions
- Unpack, activate and follow prompts of an AED

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:

- The individual being assessed must provide evidence of essential knowledge and essential skills
- Competence should be demonstrated working individually and as part of a first aid team
- Consistency of performance should be demonstrated over the required range of situations relevant to the

© Commonwealth of Australia, 2025 Skills Insight

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

	workplace or community setting • Currency of first aid knowledge and skills is to be demonstrated in line with ARC Guidelines and guidelines of Australian national peak clinical bodies and State / Territory legislation and regulations
Context and resources required for assessment:	• Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge • Demonstration of first aid procedures over the required range of situations relevant to the workplace setting must be demonstrated using standard precautions and first aid equipment including roller bandages, triangular bandages, other trauma dressings, bronchodilator and spacer device, adrenalin auto-injectors and AED • For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines
Access and equity considerations:	• All workers in the health industry should be aware of access and equity issues in relation to their own area of work • All workers should develop their ability to work in a culturally diverse environment • In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities
Related units:	This unit incorporates the content of units: • HLTCPR211A Perform CPR • HLTFA211A Provide basic emergency life support

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

- First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)
- Focus on first aid management of specific types of injury

Established first aid principles and procedures include:

- Australian Resuscitation Council Guidelines
- Guidelines of Australian national peak clinical bodies
- Primary First Aid Principles to:
  - Preserve life
  - Prevent illness, injury and condition(s) becoming worse
  - Promote recovery
  - Protect the unconscious casualty
- State/Territory legislation and regulations

Hazards may include:

- A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
- Relevant hazards may be classified under the headings:
  - Biological hazards
  - Chemical hazards
  - Hazards associated with manual handling Physical hazards

Risks may include:

- Environmental risks
- Exposure to blood and other body substances
- Risks associated with the proximity of other workers and bystanders
- Risks from body position
- Risks from equipment, machinery and substances
- Risks from vehicles
- Risks from first aid equipment
- Risk of further injury to the casualty

Casualty's condition is managed for:

- Abdominal injuries
- Airway obstruction
- Allergic reactions

© Commonwealth of Australia, 2025 Skills Insight

- Altered and loss of consciousness
- Bleeding
- Body position
- Burns – thermal, chemical, friction, electrical
- Cardiac arrest
- Chest pain
- Choking/airway obstruction
- Drowning
- Envenomation – snake, spider, insect and marine bites and stings
- Environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke
- Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations, fractures
- Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions
- Poisoning and toxic substances (including chemical contamination)
- Respiratory distress
- Seizures
- Shock
- Stroke
- Substance misuse – common drugs and alcohol, including illicit drugs
- Unconsciousness, not breathing or not breathing normally

First aid management must take into account:

- Infection control
- Legal and social responsibilities of first aider
- The setting in which first aid is provided, including:
  - industry/site specific regulations, codes etc.
  - location and nature of the incident
  - location of emergency services personnel situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents
  - State and Territory work health and safety legislative requirements
  - workplace policies and procedures
  - WHS requirements
- The use and availability of first aid equipment and

© Commonwealth of Australia, 2025 Skills Insight

	resources
Resources and equipment are used appropriate to the risk to be met and may include:	• AED • Auto-injector • Bronchodilator and spacer device • First aid kit • Puffer/inhaler • Resuscitation mask or barrier
Appropriate clinical expert may include:	• Ambulance officer/paramedic • Appropriately qualified health care professional
Report details should include:	• Time • Description of injury/illness • First aid management • Incident details • Location • Vital signs

Report details may include:	• Administration of medication including:
	  • date
	  • dose
	  • person administering
	  • time
	• Fluid intake/output, including fluid loss via:
	  • blood
	  • faeces
	  • urine
	  • vomit
	  • Injury report forms
	• Workplace documents as per organisation requirements

LGACOM502B Devise and conduct community consultations

Modification History

LGACOM502B Release 2: Layout adjusted. Range statement edited.

LGACOM502B Release 1: Primary release.

Unit Descriptor

This unit covers devising and conducting community consultations and reporting on results. The vital and unique responsibility councils have to engage and consult with communities in order to respond to the needs of the community in a timely and effective manner is recognised.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

© Commonwealth of Australia, 2025 Skills Insight

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise consultation strategies	1.1. A range of consultation strategies is identified and assessed for suitability. 1.2. ***Interested and affected parties*** are identified. 1.3. ***Resources*** required to conduct consultation are assessed. 1.4. ***Consultation strategies*** are chosen that ***enable and encourage relevant groups*** or individuals to be involved. 1.5. ***Legislative*** and council requirements are reviewed to ensure strategies meet all criteria.
2. Conduct consultations	2.1. ***Information*** is prepared that is clear, accurate and appropriate to the needs of all parties. 2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved. 2.3. ***Information is presented*** to affected parties at an appropriate time and place. 2.4. ***Access and equity*** requirements are implemented in the consultations. 2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame. 2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.
3. Record, analyse and report on results	3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed. 3.2. Appropriate suggestions for improvement are incorporated into design parameters. 3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised. 3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern. 3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to devise and conduct community consultations where: • consultation ensures council's image or reputation is maintained or enhanced • community consultation produces valid and useful information

© Commonwealth of Australia, 2025 Skills Insight

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including: • public and community meetings and forums • surveys and door knocks • appropriate communications equipment and aids such as overhead projectors and computer-based presentations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Interested and affected parties may include:	• community groups • other authorities • individuals • emergency authorities (police, fire and ambulance) • private sector business interests • special interest groups • experts
Resources may include:	• human

- financial
- locations

Consultation strategies may include:

- public meetings
- phone-ins
- questionnaires
- informal gatherings
- door knocks
- council meetings

Enabling and encouraging relevant groups to be involved may include:

- physical accessibility
- diverse language needs
- culture, including Indigenous, youth and non-English speaking background
- physical environment
- number of people

Legislation may include:

- local government
- anti-discrimination
- planning

Information may include:

- written and oral records
- anecdotes
- reports
- instructions
- directions from supervisor or management
- interviews
- formal and informal team meetings
-

Access and equity may include:

- subject matter
- manner in which consultations are conducted
- physical accessibility
- community profile
-
-

Presentation of information may include:

- graphics
- models
- computer animations
- video displays
- overhead transparencies
- handouts
- display plans
- interpreter service

MEM15001B Perform basic statistical quality control

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers taking samples and applying a statistical process to monitor production.

Application of the Unit

Application of the unit	This unit applies to the collation and interpretation of statistical data in the context of statistical quality control, for example, tally, run or control charts. Uncontrolled variations are reported to appropriate authority. When the production and interpretation of charts and graphs not dependent on knowledge and understanding of the implications for quality are required, Unit MEM12024A (Perform computations) should be accessed. **Band**: **A** **Unit Weight**: **2**

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take samples	1.1. Difference between population and sample is understood and various sampling schemes are applied in accordance with standard operating procedures.
2. Apply statistical process to monitor production	2.1. Concept of variation in terms of average and spread is understood. Data is used to produce relevant statistical information. 2.2. Data is interpreted accurately and information is presented to appropriate authority according to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Required skills
Look for evidence that confirms skills in: • reading, interpreting and following information on written job instructions, standard operating procedures, charts, lists, drawings and other applicable reference documents • applying statistical process control procedures in accordance with instructions to a given production process • obtaining data from samples including average, range and random or assignable causes • producing tally, run or control charts from sampling data • reporting information from sampling data • checking and clarifying task-related information • completing proformas and standard workplace forms
Required knowledge
Look for evidence that confirms knowledge of: • the difference between population and sample, and the concept of variation in terms of average and range, random and assignable causes • numerical operations and statistical calculations/formulae within the scope of this unit • statistical process control procedures, which may include Six Sigma etc. and the sampling procedures to be followed • the types of charts that can be produced to assist monitoring of products including run charts, tally charts, histograms, control charts • procedures for reporting sample data information • use and application of personal protective equipment • safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	be able to perform basic statistical quality control.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing basic statistical quality control or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment

MEM18001C Use hand tools

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using a range of hand tools for a variety of general engineering applications.

Application of the Unit

Application of the unit	Applications may include hand tools used for adjusting, dismantling, assembling and finishing of items or components, and the finishing, cutting, scraping of metallic and non-metallic material to size and shape. This includes simple tapping and threading and routine maintenance of hand tools. This unit should not be selected if the hand tool is dedicated to a single operation or machine and if only a machine specific/customised tool is used. When using hand held power tools or power tools used for hand held operations, refer to Unit MEM18002B (Use power tools/hand held operations). **Band**: **A** **Unit Weight**: **2**

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Use hand tools	1.1. Hand tools are selected appropriate to the task requirements. 1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape. 1.3. All safety requirements are adhered to before, during and after use. 1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use. 1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	operational procedures, principles and techniques. 1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • reading and following information on standard operating procedures • following verbal instructions • selecting hand tools appropriate to the task • using hand tools safely • identifying hand tool defects and marking for repair • maintaining/sharpening hand tools using appropriate techniques • storing hand tools in accordance with manufacturers'/standard operating procedures
Required knowledge
Look for evidence that confirms knowledge of: • applications of different hand tools in a general engineering context • common faults and/or defects in hand tools • procedures for marking unsafe or faulty tools for repair • routine maintenance requirements for a range of hand tools • storage location and procedures for a range of hand tools • hazards and control measures associated with using hand tools • use and application of personal protective equipment • safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to use hand tools for a range of general engineering applications.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using hand tools or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Hand tools	Hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and types
Job specifications	Finish, tension, size or shape etc.
Routine maintenance	Cleaning, lubricating, tightening, simple tool repairs, hand sharpening and adjustments using engineering principles, tools, equipment and procedures

MEM18002B Use power tools/hand held operations

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers using a range of hand held power tools and fixed power tools for hand held operations for a variety of general engineering applications.

Application of the Unit

Application of the unit	This unit applies to loosening and fastening items or components and shaping, finishing, cutting, grinding metallic and non-metallic materials and/or tool bits to size and shape. This unit should not be selected if the power tools used are dedicated to an operation or machine, e.g. nut-runner, air drill, power driver, etc. For using hand tools, see Unit MEM18001C (Use hand tools). **Band**: **A** **Unit Weight**: **2**

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Use power tools	1.1. Power tools are selected appropriate to the task requirements. 1.2. Power tools are used for a determined sequence of operations - which may include clamping, alignment and adjustment to produce desired outcomes - to job specifications which may include finish, size or shape. 1.3. All safety requirements are adhered to before, during and after use. 1.4. Unsafe or faulty tools are identified and marked for repair before, during and after use according to designated procedures. 1.5. Operational maintenance of tools, including hand sharpening, is undertaken according to standard

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	workplace procedures, principles and techniques. 1.6. Power tools are stored safely in appropriate location according to standard workshop procedures and manufacturers' recommendations.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • reading and following information on standard operating procedures • following verbal instructions • selecting power tools appropriate to the task • using power tools safely • using clamping/securing devices • identifying power tool defects • maintaining power tools using appropriate techniques • sharpening tools/tool bits within the scope of this unit • storing power tools according to manufacturers'/ standard operating procedures.
Required knowledge
Look for evidence that confirms knowledge of: • application of different power tools • clamping/securing methods • adjustments/alignments to a range of power tools • common faults and/or defects in power tools • procedures for marking unsafe or faulty power tools for repair • routine maintenance requirements of a range of power tools • tool sharpening techniques for a range of power tools • storage location and procedures of a range of power tools • hazards/control measures associated with power tools • use and application of personal protective equipment • safe work practices and procedures

MSACMC411A Lead a competitive manufacturing team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed by people who lead teams in a competitive manufacturing environment. The team may be operating in manufacturing or in a manufacturing support function e.g. maintenance, office, warehousing etc.

Application of the Unit

Application of the unit	In a typical scenario, the team leader in a ***competitive manufacturing*** organisation needs to integrate a range of knowledge and skills. The team leader must lead and assist team members to understand and apply a holistic view of their job and the team's role within the organisation and the objectives that the team must meet as part of the competitive manufacturing system used by the enterprise. This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, planning, organising and self management in order to provide leadership in a competitive manufacturing team. This unit has a strong emphasis on planning and implementation, but also requires an ability to learn from experience and feed new information back into strategies to improve both the team's and own performance.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate the development of process and competitive manufacturing knowledge	1.1. Ensure necessary technical documentation and information about the process and ***competitive manufacturing*** is available to the team 1.2. Develop mentoring processes for team members 1.3. Structure team activities in a way which facilitates the ongoing development of the skills and knowledge of team members 1.4. Arrange for the provision of workforce development and training for team members as appropriate 1.5. Encourage team members to apply technical knowledge to the process.
2. Facilitate efficiency improvements in team activities	2.1. Ensure ***budgets***, ***operating procedures*** and other related documentation is available to the team 2.2. Assist team members apply this information to the process responsibilities of the team 2.3. Encourage team members to identify ***waste***

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4. Develop an environment where efficiency improvements are recommended by team members
3. Resource and encourage a proactive maintenance approach	3.1. Develop communications between specialists outside the team and team members 3.2. Develop strategies to monitor and deal with ***key reliability issues*** 3.3. Resource and encourage team members to identify and take appropriate action on potential equipment problems 3.4. Arrange for workforce development and training for team members as required in proactive maintenance procedures and techniques 3.5. Involve team members in relating identified problems to the maintenance strategy, and developing any required changes, to ensure awareness, learning and commitment
4. Implement process and organisation improvements	4.1. Plan the implementation of team suggested and externally directed improvements 4.2. Facilitate team member commitment to, and involvement in, the implementation planning of improvements and to follow improvements to their conclusion 4.3. Encourage the application of the 'plan, do, measure, improve, control' approach to the job 4.4. Arrange for workforce development and training as required to facilitate continued team involvement in improvement processes 4.5. Involve team and other key personnel in identification of skill needs and means of skills acquisition to fill any identified gaps

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills:
• communication techniques

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• negotiation skills • information finding and analysing/using skills • team work • planning and organising • problem solving
Required knowledge:
• understanding of the competitive manufacturing process or processes used at the enterprise

Evidence Guide

EVIDENCE GUIDE The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The competent person would be able to lead a competitive manufacturing team and facilitate their improving the process.
What critical aspects of evidence is required to demonstrate competency in this unit?	Evidence of effective team leadership would be required.
In what context should assessment occur?	Assessment needs to occur in an organisation implementing a competitive manufacturing environment or by a project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other team leader units dealing with change/improvement in the organisation.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment
What evidence is required for demonstration of consistent performance?	Evidence from one significant manufacturing improvement or change process may be sufficient. For less significant improvement or changes, a range of changes will be needed to generate sufficient evidence.
What are the specific resource requirements for this unit?	Access to an organisation implementing a significant change to or in competitive manufacturing.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Competitive manufacturing	***Competitive manufacturing*** is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to: • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems control and data acquisition software (SCADA), enterprise resource planning systems (ERP), Manufacturing resource planning (MRP),

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	and proprietary systems such as SAP etc. • statistical process control systems including six sigma and three sigma • just in time, kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector..
Team	***Team*** may include work teams from all sections of the organisation including production, maintenance, technical, administration/finance, sales/marketing.
Budgets	Budgets include financial, time, materials/product and other business plans which are relevant to the team and the work area.
Waste	Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within manufacturing, categories of waste include: • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers.
Key reliability issues	Key reliability issues are typically things like cleanliness, lubrication and correct adjustment which are most likely to lead to failure.

MSACMC611A Manage people relationships

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to manage the human relationship aspects of implementing and operating competitive manufacturing systems.

Application of the Unit

Application of the unit	In a typical scenario, a person (who may be a manager, technical specialist or other person) is required to work with people, encourage them to accept change and also to increase the quality, quantity and reliability of output. Much of this is due to good relations with the employees and relevant people. This unit primarily requires on strong communication, teamwork, and problem solving skills to achieve effective relationships that support a competitive manufacturing environment. Initiative and enterprise and planning and organising are also required to ensure relationships are monitored and issues are resolved proactively. This also requires aspects of self management and learning to ensure improvement of own performance and communication skills.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Develop an open environment	1.1. Establish and maintain regular dialogue between all levels and all relevant sections of the organisation 1.2. Encourage a flow of communications in both directions 1.3. Identify ***key personnel*** for communications 1.4. Develop and maintain a ***formal mechanism*** for the flow of issues, concerns and suggestions in both directions 1.5. Develop and maintain regular and frequent verbal communication with all key stakeholders
2. Identify significant issues	2.1. In liaison with relevant team members/***stakeholders***, identify current and potential issues 2.2. Assist team members/stakeholders to formulate issues 2.3. Identify and define boundary and ' non-negotiable' issues for all team members/stakeholders 2.4. Negotiate with relevant team members/stakeholders over actual and potential

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	issues
3. Proactively resolve issues	3.1. Liaise with team members/stakeholders to develop agreed, and where possible win-win, solutions 3.2. Negotiate acceptable solutions as required in accordance with company practices/procedures 3.3. Obtain any required official authorisations 3.4. Consult with relevant stakeholders to develop implementation plan 3.5. Implement solution
4. Monitor ongoing situation	4.1. Determine relevant Key Performance Indicators (KPIs) for plan 4.2. Check that implementation is proceeding to plan 4.3. Check for unforeseen consequences 4.4. Take appropriate action to resolve any arising issues

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• negotiating • communication • teamwork • problem solving
Required knowledge
• knowledge of industrial relations structures • relevant awards and agreements • types of workforce structures and reward systems

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.	
Overview of assessment requirements	The person will be able to develop a relationship with the team members which will make a positive contribution to the organisation.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies is required. No other specific resources are required.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of managing people relationships and dealing with issues.
In what context should assessment occur?	Assessment will need to occur in a competitive manufacturing organisation and where the individual is responsible for managing people relationships or by case study.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
What evidence is required for demonstration of consistent performance?	Evidence should be available from an extended period of time and may be historic if the person has been in this role for some time.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive manufacturing	***Competitive manufacturing*** is used to describe the range of systemic manufacturing practice concepts and approaches. It covers but is not limited to: • lean manufacturing • agile manufacturing • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Manufacturing Resource Planning (MRP), and proprietary systems such as SAP • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull related manufacturing control systems • supply, value, and demand chain monitoring and analysis • other continuous improvement systems. Competitive manufacturing should be interpreted so as to take into account the stage of implementation of competitive manufacturing approaches, the enterprise's size and work organisation, culture, regulatory environment and manufacturing sector.
Key personnel	Key personnel for communication include formally identified managers, supervisors and workforce

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	delegates as well as key opinion shapers (such as employees with specialist technical knowledge) on the issue being communicated.
Formal mechanisms	Formal mechanisms for communication will vary according to the enterprise but may include notice boards, employee circulars, consultative committees, staff associations, union representatives, team leaders.
Stakeholders	Stakeholders include team members, personnel officers, industrial officers, union delegates, production management, human relations management, financial management, engineering/technical personnel.

MSACMS201A Sustain process improvements

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills needed to prevent implemented process improvements slipping back to former practices or digression to less efficient practices.

Application of the Unit

Application of the unit	The unit covers the skills needed to ensure that process improvements are sustained and opportunities taken to suggest further improvements. Improvement initiatives can be made by any of a number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known to employees. This unit applies to an environment where continuous improvement in a manufacturing enterprise is being undertaken. The identification of the improvement may occur independently of the application of this unit. The unit can be applied to all areas of a manufacturing enterprise including production, maintenance, logistics and office functions. This unit requires the application of skills associated with problem solving, initiative and enterprise and self management in order to understand, implement and monitor improvement practices with the operation of plant, equipment and manufacturing processes. It also requires the ability to identify and address personal skill gaps in order to manage own ability to implement change.

Not applicable.

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement corrective actions	1.1. Identify impact of process improvements on systems in own work area 1.2. Examine process improvements to equipment, processes or products 1.3. Clarify changes to process improvements as required 1.4. Identify any additional, personal skill gaps and seek skill development 1.5. Adopt improved process
2. Check changes	2.1. Identify claimed ***improvements*** 2.2. Identify methods of observing claimed improvements 2.3. Check if claimed improvements are occurring

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	and report problems in accordance with procedures
3. Check for further improvements	3.1. Look for areas of possible further improvement 3.2. Discuss further improvements with peers and supervisors 3.3. Take action to make improvements in accordance with procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• technical competence to perform job • problem solving • teamwork • communication
Required knowledge
• existing procedures • modified procedures

Evidence Guide

EVIDENCE GUIDE The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will be able to demonstrate their willing adoption of new equipment, processes, procedures and practices as well as their expertise at implementing them and making critical reviews of their performance in line with their level of competence and authority.
What critical aspects of	Evidence of having sustained improvements in their own job

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
evidence are required to demonstrate competency in this unit?	and of assessing these improvements for their real impact.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies or appropriate simulated environment is required. No other specific resources are required.
In what context should assessment occur?	Assessment will need to occur in a workplace where improvements are occurring which impact on the operator's job and they are required to implement changes which sustain these improvements. The unit may also be assessed on a project basis in a simulated environment.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement/kaizen. This unit relates to improvements in a person's own area of responsibility. *MSACMS401A Ensure process improvements are sustained* is an intermediate skill level unit in the CM.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available from multiple small changes, or from a large change which has had multiple facets implemented over a period of some months.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Performance	Performance may be thought of as the rate of output of the plant compared to the rate required to meet demand. Performance might also be thought of in terms of takt where takt time is the allowable time to produce one product at the rate customers are demanding it. This is NOT the same as cycle time, which is the normal time to complete an operation on a product (which should be less than or equal to takt time).
Procedures	All work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.
Improvements	Improvement procedures in some enterprises is also known by baka-yoke which is a manufacturing technique of preventing mistakes by designing the manufacturing process, equipment and tools so that an operation literally cannot be performed incorrectly. An attempt to perform incorrectly, as well as being prevented, is usually met with a warning signal of some sort; the term poka-yoke is sometimes referred to as a system where only a warning is provided.

MSACMS401A Ensure process improvements are sustained

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to ensure that the gains which have been made by using improved methods, processes and equipment are sustained as the new base line/standard to the team's area of work and so prevent regression to former practices, or digression to less efficient practices.

Application of the Unit

Application of the unit	This unit applies to an environment where continuous improvement in a manufacturing enterprise is being undertaken. The team leader or other responsible person then facilitates and implements methods of ensuring that these improvements are sustained. Improvement initiatives can be made by any of any number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known. The unit covers ensuring that team members implement the modified processes to ensure the improvements are sustained and opportunities taken to suggest further improvements. This unit requires the application of skills associated with problem solving, initiative and enterprise, planning and organising in order to check and monitor the impacts of change. It also requires communication and teamwork in order to assess the impact of change in a team's area of work. Self management and learning will be used to continuously monitor change influences and adapt improvements according to new information and

	implementation 1.6. Supervise implementation of corrective action 1.7. Monitor implementation of corrective action 1.8. Make required adjustments
2. Verify systems support improvement	2.1. Ensure ***procedures*** reflect improvements 2.2. Ensure training and assessment systems reflect improvements 2.3. Liaise with relevant people to ensure their support of the new modified system/s
3. Audit the change	3.1. Determine an appropriate audit period/cycle 3.2. Agree relevant measures/indicators for the improvement 3.3. ***Measure performance*** at agreed times using agreed measures 3.4. Investigate the cause/s of under performance 3.5. Take appropriate corrective action to improve performance 3.6. Reaudit the improvement on an agreed basis

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills:
• communication/negotiation skills • teamwork • basic mathematics • planning • problem solving • analysing.
Required knowledge:
• existing procedures • modified procedures • overall process of manufacturing relative to improvements being made • appropriate measures of performance • business performance goals sufficient to determine best measures of improved

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
performance.

Evidence Guide

EVIDENCE GUIDE The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will be able to point to improvements which have been made where they have been active in designing and implementing systems for sustaining the improvement.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of having sustained improvements in the workplace and of reviewing these improvements for their real impact.
In what context should assessment occur?	Assessment will need to occur in a workplace where improvements are occurring, or where specific improvement projects are undertaken for the purpose of providing evidence of competence (among other aims). The unit may also be assessed on a project basis in a simulated environment.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with appropriate units on continuous improvement. This unit relates to a team leader ensuring that their team sustains improvements. *MSACMS201A Sustain process improvements* is a lower level unit for a person's own area of responsibility.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence should be available from multiple small changes, or from a large change which has had multiple facets implemented over a period of some months.
What are the specific resource requirements for this unit?	Access to a workplace implementing competitive manufacturing strategies, or where improvement projects can be conducted and relevant records is required. No other specific resources are required.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Systems	Systems is used to mean any/all of the equipment, process, procedures and work practices that are used to produce the product. A term often used in this context is: • Kaizen - the philosophy of continual improvement, that every process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality, and other aspects relevant to the process.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Procedures	Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.
Improvement	Improvement procedures in some enterprises are also known by baka-yoke which is a manufacturing technique of preventing mistakes by designing the manufacturing process, equipment and tools so that an operation literally cannot be performed incorrectly. An attempt to perform incorrectly, as well as being prevented, is usually met with a warning signal of some sort. The term poka-yoke is sometimes referred to as a system where only a warning is provided. Improvements may be sustained by use of technology so that it is impossible to do the job any other way. However, improvements may also be sustained by changes to process or procedures or other changes to the manufacturing system which, if followed, will sustain the change and this unit may be applied to all these situations.
Measuring performance	Measuring performance is not used literally and may mean the personal taking of measurements, or it may mean arranging for measurements to be taken/made by appropriate personnel. The interpretation of the measurements however is to be undertaken personally.

MSACMT260A Use planning software systems in manufacturing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills needed to access planning software (often known as ERP, MRP, MRPII, and often by its brand name, such as SAP) to make routine business decisions required of the person as a regular part of their job.

Application of the Unit

Application of the unit	In a typical scenario, an organisation has introduced a planning software system which the employees now must interface with. At its simplest level this is just an information system. However when fully implemented the ***planning software*** system can be used as a tool for decision making. This unit requires the application of communication, planning, and problem solving associated with using planning software in own work.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the performance needed to demonstrate achievement of the Element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use interface	1.1. Use keyboards, track ball/mouse and monitor and/or other peripherals to access system 1.2. Navigate through the system and the screens 1.3. Acknowledge messages 1.4. Input and output information in the required format
2. Access information	2.1. Obtain relevant data and information from the system 2.2. Identify the status of items in the ***value chain*** 2.3. Access historical data and information 2.4. Interpret information and prioritise actions
3. Take appropriate actions in accordance with procedures	3.1. Take actions in response to information 3.2. Follow up as appropriate to ensure anticipated results have occurred 3.3. Record adjustments and variations according to procedures 3.4. Identify any learning needs to use planning software and seek appropriate support

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• keyboarding/mousing • communication • teamwork • problem solving
Required knowledge
• technical knowledge and skills needed to operate process • hierarchy of planning software system and operation • information available from and business activities exercised by/through the planning software system

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The employee will routinely use the relevant parts of the planning software system for their job.
What are the specific resource requirements for this unit?	Access to an organisation using a planning software system.
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of routine use of planning software as part of their job is required.
In what context should assessment occur?	Assessment needs to occur in a workplace using a planning software system or a simulation system.
Are there any other units which could or should be assessed with this unit or which relate directly to this	This unit should be assessed concurrently with relevant technical units for the process. This unit covers the lower skill levels of using planning

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
unit?	software. *MSACMT460A Use planning software systems in manufacturing* and *MSACMT660A Develop the application of enterprise systems in manufacturing* cover the intermediate and highest skill levels in the CM respectively.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence of routine use over an extended period should be available. Planning software systems will typically log all interactions with it. Interrogation of the planning software system will therefore provide evidence of the operator's use of it. Actions taken may also be accessible from the planning software system itself, or may need other evidence available from the process.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Planning software	Planning software is a general term applied to a number of software systems which integrate a range of business information such as finance, logistics maintenance and production. It is frequently referred to by names such as ERP, SAP, MRP/MRPII.
Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the ***value chain*** (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.
Procedures	Procedures includes all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Good Manufacturing Practice (GMP), Responsible Care) and government regulations.

MSACMT423A Monitor a manufacturing levelled pull system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills required to monitor the operation of a pull system in a competitive manufacturing environment and recommend improvements.

Application of the Unit

Application of the unit	This unit covers the skills needed by a team leader working in a manufacturing enterprise using a pull manufacturing system. The unit covers the skills needed to monitor daily working of the system, identify problems and take appropriate action on problems. The manufacturing system may be a total pull system or it may be a mixed push/pull system. If additional problem solving skills are required then the following units should be selected: This unit primarily requires the application of skills associated with using information and problem solving skills to monitor pull system and analyse discrepancies. It also requires skill in initiative and enterprise, and planning and organising to determine and act on opportunities for improvement. Aspects of self management and learning are required to ensure own ability to improve systems.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Pre-Requisites

Prerequisite units	*MSACMT280A*	*Undertake root cause analysis*

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor the pull system.	1.1. Identify the ***pacemaker*** process 1.2. Identify rate of production set by the pull system 1.3. Determine actual rate of production at key parts of the process 1.4. Identify ***types of inventories*** within process 1.5. Compare actual inventories with planned inventories 1.6. Note discrepancies between actual and planned rates and inventories
2. Take corrective action.	2.1. ***Determine cause***(s) of discrepancies 2.2. Determining ***action required*** to rectify causes of discrepancies 2.3. Take appropriate action in conjunction with relevant ***stakeholders***
3. Test/improve the pull	3.1. Identify recurrent discrepancies

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
system.	3.2. Determine cause(s) of discrepancies 3.3. Determine action required to rectify cause 3.4. Identify unnecessary levels of inventories 3.5. Discuss impacts of reduced inventories with relevant stakeholders 3.6. Take/initiate appropriate action to rectify recurrent discrepancies/reduce levels of unnecessary inventory 3.7. Monitor the system to determine the effects of the change(s)

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills:
• analysis • problem solving • planning and organising • communication • documenting
Required knowledge:
• processing requirements of products • capabilities of equipment • abilities and skills of personnel

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide describes the underpinning knowledge and skills that must be demonstrated to prove competence. It is essential for assessment and must be read conjunction with the performance criteria, the range statement and the assessment guidelines of the relevant Training Package

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Overview of assessment requirements	The assessment should confirm the ability to understand and monitor a levelled demand pull system of manufacturing..
What critical aspects of evidence is required to demonstrate competency in this unit?	Evidence of pull system improvement undertaken should be available
In what context should assessment occur?	Assessment will need to occur in an organisation using a pull system or by project.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other relevant units.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment
What evidence is required for demonstration of consistent performance?	Generally a number of continuous improvements will be required to generate sufficient evidence
What are the specific resource requirements for this unit?	Access to an organisation using a pull system.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Pull system	A pull system is a manufacturing system is one where: • manufacturing is done to order and not for holding large inventories of parts and completed stock • work flow along the production line is done according to demand pull from the next work stage • manufacturing is in response to customer demand The pull system must therefore be flexible and have cycle times set by parameters calculated from customer demand indicators
Pacemaker	Pacemaker processes is that process which sets the pace for the flow of manufacturing work through the enterprise
Types of inventories	Inventories within process may include: • cycle stock which reflects the replenishment quantity and frequency, • buffer stock to meet demand variability and forecast errors • safety stock required to guard against quality and delivery failures upstream.
Determine cause	Determine cause may include the individual/team leader: • analysing cause themselves • identifying that expert analysis is required and requesting this • setting up an improvement team to analyse cause
Action required	Action required include actions to align actual and planned rates of production and inventories. The actions will vary but can include changes to: • production processes

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• cycle times • equipment • work organisation • training and skill development of employees • The authority of the team leader may influence the actions required for example • actions which can be sanctioned by the individual team member • actions which can be sanctioned by the team leader • actions requiring management sanction • actions requiring expert intervention
Stakeholders	Stakeholders include: • managers • supervisors • employees • shareholders • OHS mechanisms/representatives • IR mechanisms/representatives • suppliers • customers • service providers

MSACMT440A Lead 5S in a manufacturing environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the competencies needed to facilitate and improve the 5S housekeeping environment.

Application of the Unit

Application of the unit	In a typical scenario, an organisation is implementing or practising a 5S approach to housekeeping. While 5S places much of the responsibility on team members, team leaders needs to support, encourage and facilitate effective 5S in the workplace. The manufacturing environment for 5S may include the warehouse, tool shops, office etc. This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, planning, organising and self management in order to provide leadership in a 5S environment. This unit has a strong emphasis on planning and change management, but also requires an ability to learn from experience and feed new information back into strategies to improve performance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate the set up of 5S	1.1. Assist team members to determine what are necessary and unnecessary items in the work area 1.2. Assist team members to determine optimum assigned location for all necessary items 1.3. Liaise with relevant production and occupational health and safety (OHS) personnel in determining optimum locations 1.4. Assist team members to determine optimum location for unnecessary items 1.5. Assist team members to determine 5S schedule 1.6. Ensure ***procedures*** reflect 5S practices 1.7. Assist team members to achieve the required level of skill
2. Monitor 5S	2.1. Check work area for 5S implementation as part of normal routine 2.2. Identify non-conformances 2.3. Negotiate solutions to non-conformances

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3. Improve the 5S	3.1. Work with team members to find areas for improvement 3.2. Assist team members to develop improvement solutions 3.3. Facilitate the availability of resources required for the improvement solution 3.4. Facilitate the implementation of the improvement solution

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills:

- communication
- planning
- organising
- prioritising
- reading and interpretation
- recording
- problem solving
- teamwork.

Required knowledge:

- meaning and application of 5S to their job
- principles of efficient workplace organisation
- purposes of 5S
- procedures relevant to job
- identification of skill gaps
- methods of addressing skill gaps
- ways of encouraging team members to find and suggest areas for improvement
- methods of making/recommending improvements
- methods of accessing required resources
- OHS

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment requirements	There should be evidence of successful application of 5S in the person's work group and their positive interaction with it.
What critical aspects of evidence are required to demonstrate competency in this unit?	There should be evidence of the person's assisting team members to implement 5S and/or to implement improvements to 5S. There should be evidence of continuous improvement.
In what context should assessment occur?	Assessment needs to occur in a workplace practising or implementing 5S.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit could be assessed concurrently with other units relating to the team leader's interactions with their team. This unit differs from *MSACMT240A Apply 5S procedures in a manufacturing environment* which covers the application of 5S to the person's own work.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	of the assessment.
What evidence is required for demonstration of consistent performance?	5S needs to be a routine, natural part of everyone's job. As such there should be evidence of consistent application of 5S over an extended period.
What are the specific resource requirements for this unit?	Access to a workplace implementing or practising 5S. No other specific resources are required.

Range Statement

RANGE STATEMENT The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Procedures	Procedures include all work instructions, standard operating procedures, formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant. They may be written, verbal, computer based or in some other form. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Good Manufacturing Practice (GMP), Responsible Care) and government regulations.
5S	5S is a system of work organisation originally developed in Japan based around: A close translation of the five stages in the housekeeping approach is: • sort • set in order • shine • standardise • sustain

MSACMT460A Facilitate the use of planning software systems in manufacturing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills required by a team leader or technical expert to use and facilitate the use of planning software systems (known by various names such as ERP, SAP and MRP). This unit also covers the interactions of the person with a planning software system as they both use it for their own work and support their team members use it.

Application of the Unit

Application of the unit	In a typical scenario, an organisation will be using planning software. The person will access the planning software system for their own work, but will also need to provide support and organise skill development programs for their team members. The planning software system will be a routine part of their work life. This unit primarily requires the application of skills associated with using communication technology and supporting team use of planning software. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that planning software is used efficiently. This requires aspects of learning and self management to ensure own performance and that of the team.

Licensing/Regulatory Information

• keyboarding/mousing • communication • teamwork • problem solving. • planning and organising
Required knowledge:
• hierarchy of planning software system and operation • information available from/through the planning software system • facilities and information offered by planning software • support/training/skill development mechanisms available for access by team members.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.	
Overview of assessment requirements	The person will need to be able to demonstrate an ability to understand and apply planning software to a work location or area and send, receive and interpret process and production data for that area. They should also be able to assist others in the use of the planning software system. Software editing is not required for this unit but the ability to recognise and suggest application improvements is required

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of competent use of planning software and also of assisting their team to use it effectively and efficiently.
In what context should assessment occur?	Assessment will need to occur on an organisation using planning software or simulation software.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with other relevant units. This unit covers the intermediate skill levels in CM for planning software. *MSACMT260A Use planning software systems in manufacturing* and *MSACMT660A Develop the application of enterprise systems in manufacturing* cover the lowest and highest skill levels respectively. *MSACMT260A Use planning software systems in manufacturing* is specified as a prerequisite, and should be applied to the person's own job.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence of routine use over an extended period should be available. Planning software systems will typically log all interactions with it. Interrogation of the planning software system will therefore provide evidence of the operator's use of it. Actions taken

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	may also be accessible from the planning software system itself, or may need other evidence available from the process.
What are the specific resource requirements for this unit?	Access to an organisation using planning software.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Planning software	Planning software is a general term applied to a number of software systems which integrate a range of business information such as finance, logistics maintenance and production. It is frequently referred to by names such as ERP, SAP or MRP/MRPII. In some cases it can be integrated with engineering applications such as Systems Control and Data Acquisition (SCADA) systems. In such cases *MSACMT261A Use SCADA systems in manufacturing* may also be required. Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.
Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes

MSACMT461A Facilitate SCADA systems in a manufacturing team or work area

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the knowledge and skills required by a person who is required to use System Control and Data Acquisition (SCADA), or other similar systems, and support the team in their use of SCADA.

Application of the Unit

Application of the unit	In a typical scenario, an organisation will be using SCADA. The person will access the SCADA system for their own work, but will also need to provide support and organise skill development programs for their team members. This competency is also relevant to maintenance personnel using a SCADA system to coordinate maintenance activities. This unit primarily requires the application of skills associated with using communication technology and supporting team use of SCADA systems. Problem solving, initiative and enterprise, and planning and organisational skills are required to ensure that system is used efficiently. This requires aspects of learning and self management to ensure own performance and that of the team.

Pre-Requisites

Prerequisite units	*MSACMT261A*	*Use SCADA systems in manufacturing*

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Communicate using the SCADA system	1.1. Send and receive information using SCADA 1.2. Send and receive messages using SCADA
2. Make decisions using SCADA	2.1. Interrogate the SCADA system to find required current, historical or predicted information 2.2. Take actions appropriate to the information
3. Monitor the use of SCADA	3.1. Routinely monitor SCADA information and use along the ***value chain*** 3.2. Identify poor uses of SCADA system within team and system inadequacies 3.3. Identify team members who require additional support 3.4. Take appropriate action to provide required support 3.5. Take appropriate action to improve SCADA system and its use

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
4. Support team use SCADA	4.1. Regularly communicate with team, both using SCADA based communication and face to face 4.2. Identify system improvements required 4.3. Identify skill improvement needs 4.4. Take appropriate actions to have the identified improvements implemented

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills:
• keyboarding/mousing • communication • teamwork • problem solving. • planning and organising
Required knowledge:
• hierarchy of SCADA system and operation • information available from and controls exercised by/through the SCADA system • facilities and information offered by SCADA • support/training/skill development mechanisms available for access by team member.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.	
Overview of assessment requirements	The person will not only be a competent user of SCADA but will also support their team using it.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
What critical aspects of evidence are required to demonstrate competency in this unit?	Evidence of competent use of SCADA and also of assisting the team to use it effectively and efficiently.
In what context should assessment occur?	Assessment will need to occur on an organisation using SCADA or by use of SCADA simulation.
Are there any other units which could or should be assessed with this unit or which relate directly to this unit?	This unit may be assessed concurrently with other relevant units. This unit covers the intermediate skill level of SCADA. *MSACMT261A Use SCADA systems in manufacturing*, and *MSACMT660A Develop the application of enterprise systems in manufacturing* cover the lower and higher skill levels in CM respectively. *MSACMT261A Use SCADA systems in manufacturing* is specified as a prerequisite, and should be applied to the person's own job.
What method of assessment should apply?	Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the elements, performance criteria, skills and knowledge. A holistic approach should be taken to the assessment. Assessors should gather sufficient, fair, valid, reliable, authentic and current evidence from a range of sources. Sources of evidence may include direct observation, reports from supervisors, peers and colleagues, project work, samples, organisation records and questioning. Assessment should not require language, literacy or numeracy skills beyond those required for the unit. The assessee will have access to all techniques, procedures, information, resources and aids which would normally be available in the workplace. The method of assessment should be discussed and agreed with the assessee prior to the commencement of the assessment.
What evidence is required for demonstration of consistent performance?	Evidence of routine use over an extended period should be available. SCADA systems will typically log all interactions with it. Interrogation of the SCADA system will therefore provide evidence of the operator's use of it. Actions taken may also be

	accessible from the SCADA system itself, or may need other evidence available from the process.
What are the specific resource requirements for this unit?	Access to an organisation using SCADA.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
SCADA	System Control and Data Acquisition (SCADA) is a general term applied to a number of systems which automatically collect critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information personnel for action. In the continuous manufacturing sector, the SCADA system is sometimes integrated into other sophisticated computer control systems such as Distributed Control System (DCS) and indeed these systems do merge in advanced systems. These organisations may simply refer to their SCADA as the DCS or other similar term (such as the proprietary name of the computer system).
Value chain	Competitive manufacturing organisations encompass the entire production system, beginning with the customer, and includes the product sales outlet, the final assembler, product design, raw material mining and processing and all tiers of the value chain (sometimes called the supply chain). Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive manufacturing can reach its full potential without including the entire 'enterprise' in its planning.

MSAPMOPS405A Identify problems in fluid power system

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the recognition and diagnosis of control system problems in hydraulic/pneumatic control systems on process equipment. It includes the implementation of appropriate corrective action. It applies to all sectors of the industry.

This competency is typically performed by technicians working either independently or as part of a work team.

Application of the Unit

Application of this unit

This competency applies to operators who are required to apply knowledge of fluid power systems and components to the identification and isolation of faults in equipment. The key factors are the diagnosis and the recommendation of action to resolve routine and non-routine faults, in order to return the equipment to production.

The technician will:

- identify and plan scope of equipment checks
- check settings, adjustments and performance of equipment
- identify and isolate faults in equipment
- propose solutions and carry out solutions within scope of authority
- complete logs and reports.
-

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify pneumatic/ hydraulic control system problems.	1.1 Categorise the types of machine malfunctions due to fluid power faults. 1.2 Describe the effects on product quality of fluid power problems. 1.3 Isolate possible faulty components from a circuit diagram and knowledge of the function of each component.
2. Implement appropriate corrective action.	2.1 Examine other possible faults. 2.2 Shortlist possible fault causes. 2.3 Conduct investigations of machine, products or data to determine most likely fault cause(s). 2.4 Take appropriate action to ensure fault is rectified. 2.5 Follow up on action to ensure completion in an appropriate time frame. 2.6 Recheck after corrective action to ensure fault has been rectified.
3. Identify maintenance	3.1 Check manufacturer instructions to determine

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
requirements.	recommended maintenance schedule. 3.2 Check fault and maintenance history to determine adequacy of current regime and special requirements. 3.3 Determine criticality of machine to production/business. 3.4 Develop maintenance schedule/requirements for machine. 3.5 Liaise with all relevant stakeholders to ensure schedule is appropriate. 3.6 Report outcome to appropriate personnel.
4. Identify pneumatic/ hydraulic control system problems.	4.1 Categorise the types of machine malfunctions due to fluid power faults. 4.2 Describe the effects on product quality of fluid power problems. 4.3 Isolate possible faulty components from a circuit diagram and knowledge of the function of each component.
5. Implement appropriate corrective action.	5.1 Examine other possible faults. 5.2 Shortlist possible fault causes. 5.3 Conduct investigations of machine, products or data to determine most likely fault cause(s). 5.4 Take appropriate action to ensure fault is rectified. 5.5 Follow up on action to ensure completion in an appropriate time frame. 5.6 Recheck after corrective action to ensure fault has been rectified.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the process and the interaction of process conditions on product quality sufficient to recognise and analyse control system faults.

Knowledge of organisation procedures and policies along with the ability to implement them within appropriate time constraints and in a manner relevant to the job.

© Commonwealth of Australia, 2025 Skills Insight

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving hydraulic system problems, including:

- principles of hydraulics/pneumatics
- fluid power circuit diagrams
- principles of circuit components
- appropriate testing procedures and use of equipment for a range of equipment faults
- urgency and timeliness factors in planning maintenance activities in relation to production requirements
- collection, analysis and reporting of data.

Competence also includes the ability to:

- identify and select testing methods based on cost and time effectiveness
- conduct inspections, checks and tests on equipment as appropriate
- read and interpret circuit diagrams for mechanical, hydraulic, pneumatic and electrical/electronic operating systems
- use technical information and manufacturer information to locate relevant data
- interpret technical specifications and manufacturer instructions
- ensure workplace is safe for testing and maintenance of equipment
- identify hazards of the materials and process
- implement appropriate procedures for hazard control
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret technical specifications and manufacturer manuals.

Writing is required to the level of writing procedures and schedules. Basic numeracy is also required to allow the interpretation of machine and product data and the comparison of actual with desired readings.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the ability to:

- recognise potential situations requiring action and then in implementing appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- machine reliability is high.

Assessment method and context

It is preferred that assessment takes place on industrial equipment in a work environment.

Competence in this unit may be assessed:

- on a processing plant allowing for operation under all normal, and a range of abnormal, conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom.

Additional resources might include the provision of equipment with known faults/problems to allow for assessment of the ability to identify problems.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

© Commonwealth of Australia, 2025 Skills Insight

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency unit includes all common equipment used in the manufacturing industry and should be able to be applied to all equipment using fluid power control systems.

This competency applies to all work environments and sectors within the manufacturing industry. It assumes an understanding of the operation of all relevant equipment and processes but does not necessarily require them to be used personally.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions, manufacturer information and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- pumps
- pressure controls
- DCVs (directional control valves)
- flow control actuators
- accumulators
- filters
- heat exchangers
- proportional, servo and cartridge valves.

Hazards

Typical hazards include:

- high pressures (hydraulic and pneumatic)
- hot surfaces
- hydraulic oil spills and leakage
- noise.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'.

Distinguish between causes of faults such as:

- control system failure
- process condition
- materials
- component types.

Typical process and product problems may include:

© Commonwealth of Australia, 2025 Skills Insight

- loss of flow, power
- power failure
- oil leaks (internal and external)
- component malfunction
- poor maintenance procedures
- regular maintenance
- shutdown
- using accumulator as emergency source
- motor failure effect on cycle time
- pressure loss
- short shots
- loss of clamp pressure
- oil temperature.

Variables

Key variables to be monitored include:

- oil levels
- temperatures
- cavitation/aeration/noise
- cleanliness
- poor performance
- safety aspects.
-

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the process and the interaction of process conditions on product quality sufficient to recognise and analyse control system faults.

Knowledge of organisation procedures and policies along with the ability to implement them within appropriate time constraints and in a manner relevant to the job.

© Commonwealth of Australia, 2025 Skills Insight

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving electronic control system problems, including:

- fundamentals of electricity and electronics
- electronic circuit diagrams
- principles of electronic circuit components
- principles of PLC programming, troubleshooting and diagnosis
- appropriate testing procedures and use of equipment for a range of equipment faults
- urgency and timeliness factors in planning maintenance activities in relation to production requirements
- collection, analysis and reporting of data.

Competence also includes the ability to:

- identify and select testing methods based on cost and time effectiveness
- conduct inspections, checks and tests on equipment as appropriate
- read and interpret circuit diagrams for mechanical, hydraulic, pneumatic and electrical/electronic operating systems
- use technical information and manufacturer information to locate relevant data
- interpret technical specifications and manufacturer instructions
- ensure workplace is safe for testing and maintenance of equipment
- identify hazards of the materials and process
- implement appropriate procedures for hazard control
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret technical specifications and manufacturer manuals.

Writing is required to the level of writing procedures and schedules. Basic numeracy is also required to allow the interpretation of machine and product data and the comparison of actual with desired readings.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

It is preferred that assessment takes place on industrial equipment in a work environment.

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the ability to:

- recognise potential situations requiring action and then in implementing appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- machine reliability is high.

Assessment method and context

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Competence in this unit may be assessed:

- on a processing plant allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom.

Additional resources might include the provision of equipment with known faults/problems to allow for assessment of the ability to identify problems.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency unit includes all common equipment used in the manufacturing industry and should be able to be applied to all equipment using electrical/ electronic control systems.

This competency applies to all work environments and sectors within the manufacturing industry. It assumes an understanding of the operation of all relevant equipment and processes but does not necessarily require them to be used personally.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- application and programming of PLC (programmable logic controls) and ancillaries
- application of solid-state control/switching units
- switches, relays and solenoids
- position and pressure transducers
- temperature controllers.

Hazards

Typical hazards include:

- electricity
- temperature from hot surfaces and equipment
- malfunctioning equipment
- test equipment.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'.

Typical process and product problems may include:

- loss of flow, power
- power failure
- component malfunction
- poor maintenance procedures
- regular maintenance
- shutdown

© Commonwealth of Australia, 2025 Skills Insight

- motor failure effect on cycle time
- short shots
- loss of clamp pressure
- no power
- electronic/electrical faults
- analysis with PLC.

Variables

Key variables to be monitored include:

- temperatures
- cleanliness
- poor performance
- safety aspects.
-

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
2. Plan operational checks.	2.1 Check specifications and notes from preliminary observations and identify areas to be clarified. 2.2 Plan testing sequence/s noting areas where results and observations should be recorded. 2.3 Identify safe area for testing. 2.4 Make arrangements for any additional resources (including other employees).
3. Check unit through full operational range.	3.1 Undertake testing, observing relevant safety and operational requirements. 3.2 Confirm results and findings.
4. Identify fault and/or formulate recommendations.	4.1 Identify impact of fault on work schedule. 4.2 Record proposals for equipment repair based on faults found, cost/time implications and workplace approval systems. 4.3 Explain report to relevant workplace personnel including any options and recommendations. 4.4 Undertake repairs where appropriate in accordance with procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of equipment operation and maintenance practices sufficient to recognise fault and no-fault conditions in standard and non-standard situations and then determine appropriate action which is consistent with operational guidelines is required.

Knowledge of organization procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving processing and material problems, including:

- principles of the operation of the equipment to be maintained
- functions and troubleshooting of internal components and their problems

© Commonwealth of Australia, 2025 Skills Insight

- routine and non-routine causes of equipment failures and the service conditions which may increase maintenance
- maintenance techniques, (eg reactive maintenance, predictive and preventative operational maintenance)
- appropriate testing procedures and use of equipment for a range of equipment faults
- operating principles for mechanical, hydraulic, pneumatic, electrical/electronic systems
- urgency and timeliness factors in planning maintenance activities in relation to production requirements
- collection, analysis and reporting of data.

Competence also includes the ability to:

- identify and select testing methods based on cost and time effectiveness
- conduct inspections, checks and tests on equipment as appropriate
- read and interpret circuit diagrams for mechanical, hydraulic, pneumatic and electrical/electronic operating systems
- use technical information and manufacturer information to locate relevant data
- interpret technical specifications and manufacturer instructions
- ensure workplace is safe for testing and maintenance of equipment
- identify hazards of the materials and process
- implement appropriate procedures for hazard control
- use PPE, safely handle products and materials, read relevant safety information
- apply safety precautions appropriate to the task.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret typical equipment specifications schematics and diagrams.

Writing is required to the level of completing workplace forms and production reports.

Basic numeracy is required, to the level of calculating equipment throughputs and performance.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

© Commonwealth of Australia, 2025 Skills Insight

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- understand the procedures and know the importance of critical operational systems
- recognise potential situations requiring action and then implement appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- appropriate tests are undertaken and tests are analysed appropriately
- proposals for equipment repair are based upon the most appropriate and cost effective method to return equipment to full performance in a timely manner
- items initiated are followed through until final resolution has occurred.

Assessment method and context

It is preferred that assessment takes place on industrial equipment in a work environment.

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade level skills. It is not intended that this competency would cover maintenance that is carried on in a workshop.

Procedures

All operations are performed in accordance with procedures.

Procedures mean all relevant workplace procedures, work instructions, temporary instructions, standard operating procedures, plant description manuals, manufacturer's instructions, specifications, service manuals, machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools specific for the task
- product testing equipment (eg flowmeter, scales, tape measure, micrometer, caliper, ultrasonic thickness)
- machinery measuring equipment (eg vibration meter, tachometer, current tester, thermal imaging, temperature gauge)
- measuring and aligning equipment.

Hazards

Typical hazards include:

- rotating and moving machinery
- process materials, solids, fluids and gases under pressure or flowing
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out-of-specification operation.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'. Typical process and product problems may include:

- out-of-specification product or variations
- response of equipment to materials variations
- new or changed materials
- changed equipment settings (eg higher speed or throughput)
- equipment in need of maintenance

© Commonwealth of Australia, 2025 Skills Insight

- procedures requiring update or modification.

Variables

Key variables to be monitored include:

- equipment performance (eg speed, output, variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired).

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures.
-

MSAPMSUP310A Contribute to the development of plant documentation

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit of competency covers the development of relevant plant documentation and systems in response to identified information requirements including the development and/or amendment of workplace documents, procedures and record keeping systems.

Application of the Unit

Application of this unit

This competency is typically performed by an experienced operator, leading hand or supervisor. The employee will:

- determine what needs to be done
- draft new/revised documentation
- arrange for documentation to be checked
- follow document control procedures.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify information need/deficiency.	1.1 Determine the information requirements of the organization. 1.2 Evaluate current documentation. 1.3 Recognise information need/deficiency. 1.4 Discuss information requirements with appropriate personnel.
2. Develop/revise plant documentation.	2.1 Specify information need and set/prioritise objectives 2.2 Analyse existing documentation/records in accordance with specified requirements. 2.3 Develop/amend documentation as a draft in accordance with specifications to standard format. 2.4 Issue documentation to appropriate personnel for review. 2.5 Edit documentation and amend in accordance with review requirements. 2.6 Complete documentation to satisfy the initial identified need/deficiency.
3. Communicate changes to plant documentation.	3.1 Explain and communicate documentation to all relevant personnel. 3.2 Distribute documentation to all appropriate personnel. 3.3 Evaluate implementation of documentation.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	3.4 Amend documents if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge of organisation standard procedures, work instructions and relevant regulatory requirements along with the ability to implement them within appropriate time constraints relevant to the job.

Knowledge of organisation information systems, procedures, equipment and relevant documentation sufficient to be able to develop or amend company documentation.

Knowledge of the relevant OHS and environmental requirements is required along with an ability to implement them in a manner which is relevant to the drafting of all relevant documentation.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify and describe own role and role of other employees.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret typical product specifications, job sheets, work instructions and material labels as provided to operators.

Writing is required to the level of drafting documents for the required audience.

Numeracy is also required to the extent required by production data, work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

© Commonwealth of Australia, 2025 Skills Insight

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Consistent performance should be demonstrated. For example, look to see that:

- information required is researched, and intended use is taken into account
- documentation is completed accurately, concisely and in accordance with requirements
- completed documentation is easily understood by the recipient
- information is communicated in the appropriate manner
- communication distinguishes between relevant and peripheral issues.

Assessment method and context

Assessment will occur using work-based documents and in a work-like environment.

Competence in this unit may be assessed:

- by direct observation and accessing the workplace records system
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments in the industry.

Work is governed by established workplace procedures, and extent of authority for drafting/document approval.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Documentation

This unit of competency includes sources of documentation such as:

- maintenance logs
- non-compliance reports
- incidence and accident reports
- permits
- schematics/process flows/ engineering drawings.
- job cards
- standard operating procedures
- work instructions
- operating manuals
- quality procedures
- training program contents
- materials safety data sheets.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/s recorded in the procedures.

Typical problems may include:

- inaccurate source documents
- out-of-date source documents
- source documents too technical/lacking detail/of wrong focus
- prioritising of document drafting with other work.

Appropriate action for problems outside of area of responsibility may be reported to an appropriate person.

© Commonwealth of Australia, 2025 Skills Insight

Appropriate action for solving problems within area of responsibility includes asking questions and seeking assistance from appropriate persons/sources

Unit Sector(s)

MSAPMSUP390A Use structured problem solving tools

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor.

Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify the problem.	1.1 Identify variances from normal operating parameters and product quality. 1.2 Define the extent, cause and nature of the problem by observation and investigation. 1.3 State and specify the problem clearly.
2. Determine fundamental cause of problem.	2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques. 2.2 Develop possible cause statements. 2.3 Identify fundamental cause.
3. Determine corrective action.	3.1 Consider all possible options for resolution of the problem. 3.2 Consider strengths and weaknesses of possible options. 3.3 Determine corrective action to remove the problem and possible future causes. 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures. 3.5 Develop recommendations for ongoing monitoring

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	and testing.
4. Communicate recommendations.	4.1 Prepare report on recommendations. 4.2 Present recommendations to appropriate personnel. 4.3 Follow up recommendations if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, **literacy and numeracy requirements**

© Commonwealth of Australia, 2025 Skills Insight

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
  - identifying variations
  - identifying cause and effect
  - separating single problems from multiple problems
  - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

© Commonwealth of Australia, 2025 Skills Insight

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units.

In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

© Commonwealth of Australia, 2025 Skills Insight

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non- routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.
-

MSL924001A Process and interpret data

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to retrieve data, evaluate formulae and perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.

Licensing/Regulatory Information

Not applicable.

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Retrieve and check data	1.1. Store and retrieve data using appropriate files and/or application software 1.2. Verify the quality of data using enterprise procedures 1.3. Rectify errors in data using enterprise procedures
2. Calculate scientific quantities	2.1. Calculate statistical values for given data 2.2. Calculate scientific quantities using given formulae and data and estimate uncertainties 2.3. Ensure calculated quantities are consistent with estimations and expectations 2.4. Report all calculated quantities using the appropriate units and correct number of significant figures
3. Present data in tables, charts and graphs	3.1. Present data in clearly labelled tables and charts 3.2. Graph data using appropriate scales to span the range of data or display trends 3.3. Report all data using the appropriate units and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	number of significant figures
4. Interpret data in tables, charts and graphs	4.1. Interpret significant features of graphs, such as gradients, intercepts, maximum and minimum values, and limit lines 4.2. Recognise and report trends in data
5. Keep accurate records and maintain confidentiality	5.1. Transcribe information accurately 5.2. Verify the accuracy of records following enterprise procedures 5.3. File and store workplace records in accordance with enterprise procedures 5.4. File all reference documents logically and keep them up-to-date and secured 5.5. Observe enterprise confidentiality standards

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing calculations of scientific quantities
- using scientific notation
- applying the concepts of metrology
- applying calculations to the workplace
- coding, recording and checking of data accurately
- presenting accurate results in the required format
- preparing graphs, tables and charts (pie, bar, histogram) and interpreting trends
- preparing and interpreting process control charts
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements

Required knowledge

Required knowledge includes:

- concepts of metrology
- the international system of units (SI)
- relevant scientific and technical terminology

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• uncertainty associated with measurement steps • procedures for coding, entering, storing, retrieving and communicating data • procedures for verifying data and rectifying mistakes • converting units involving multiples and submultiples • significant figures, rounding off, estimating, approximating • transposing and evaluating formulae • calculations involving fractions, decimals, proportions and percent • determining statistical values of data such as mean, median, mode and standard deviation • procedures for maintaining and filing records, and maintaining security of data

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors should ensure that candidates can: • code, record and check the documentation of data • calculatescientific and statistical quantities relevant to the workplace and present accurate results in the required format • recognise anomalies and trends in data • maintain the confidentiality of data in accordance with workplace and regulatory requirements • keep records up-to-date and secure.

Context of and specific resources for assessment	This unit of competency is to be assessed in the workplace or simulated workplace environment.
	This unit of competency may be assessed with:
	• *MSL924002A Use laboratory application software*
	• technical units, such as:
	  • *relevant MSL973000 series units of competency*
	  • *relevant MSL974000 series units of competency*.
	Resources may include:
	• data sets and records

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• computer and relevant software or laboratory information system • relevant workplace procedures.
Method of assessment	The following assessment methods are suggested: • review of data worksheets, calculations, computer files (such as spreadsheets, databases, statistical analysis), graphs, tables and/or charts prepared by the candidate • review of records transcribed, maintained or stored by the candidate • feedback from supervisors and peers • questions to assess understanding of relevant procedures and trends in data • observation of the candidate as they process data, file and store records. In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. Access must be provided to appropriate learning and/or assessment support when required. The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.
This competency in practice	Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. **Manufacturing** A laboratory assistant in a materials testing laboratory was performing routine tensile tests on samples of vinyl sheet. The assistant converted the readings from the machine to appropriate units using a simple calculation and recorded them in the logbook for that test method. After comparing these test results with previous results for the same type of vinyl material, the assistant found

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	that the tensile strength was within the required range. However, it was at the lower rather than the upper end of the range as in previous testing. The assistant discussed the results with the laboratory supervisor. The calibration file for that machine showed that it had been calibrated four months previously and had not needed adjustment. Test results for the same period showed that the machine was giving lower than normal tensile strength readings for the few higher strength materials tested over the last two months. The assistant did some more checks and confirmed this trend. The machine was re-calibrated by the instrument company and the frequency of internal calibration checks by the laboratory assistant was increased. This problem would not have been detected or corrected as quickly without the assistant's initiative and competent recording and retrieval of test results and calibration information. **Biomedical** A technical assistant works in a team with laboratory scientists and technical officers. Analyses of electrolytes are routine and occur in large volume throughput even in this small diagnostic laboratory. The assistant is assigned tasks that contribute to the overall production of results, their reporting and the quality control evaluation of the results. One task is the daily collection of the electrolyte analyses from the internal quality control area. In this case, the technical assistant plots the results on a Levy-Jennings graph and computes the mean value. The assistant reports immediately to the supervisor if the plots show deviations which indicate out-of-control results. **Food processing** Cooking and holding temperatures greatly affect the nutrient composition of processed foods. The CSIRO provides documentation of nutrient losses with temperature variations. For cooked foods, there is the added problem of microbial growth in the so called 'danger zone'. In one laboratory, the technical assistant conducts simple testing of foods using a temperature probe and also measures the temperature of the storage areas, holding trays or bainmaries and individual tray units. Careful documentation of the temperatures of the foods and times of measurement must be kept. The technical assistant supplies the data as tables and a plot

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	of temperature versus time. For quality control purposes, the assistant is directed to use a cross reference of mercury thermometer readings versus probe measurements for ambient temperature. The assistant plots the thermometer readings against the probe readings and reports to the supervisor if the plot shows a slope other than the defined value.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, **codes**, **procedures and/or enterprise requirements**	Standards, codes, procedures and/or enterprise requirements may include:
	• Australian and international standards such as:
	  • AS ISO 1000-1998 The international system of units (SI) and its application
	  • ISO 5725 Accuracy (trueness and precision) of measurement methods and results
	  • ISO/IEC Guide 98-3:2008 Uncertainty of measurement - Part 3 Guide to the expression of uncertainty in measurement (GUM)
	• Eurachem/CITAC Guide CG4 Quantifying uncertainty in analytical measurement
	• national measurement regulations and guidelines
	• National Association of Testing Authorities (NATA) Technical notes
	• material safety data sheets (MSDS)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• equipment manuals and warranty, supplier catalogues and handbooks • sampling and test procedures and standard operating procedures (SOPs) • enterprise quality manual and customer quality plan • validation of the equipment and associated software where applicable • validation of spreadsheets developed in-house for assay and process calculations
Concepts of metrology	Concepts of metrology may include: • that all measurements are estimates • measurements belong to a population of measurements of the measured parameters • repeatability • precision • accuracy • significant figures • sources of error • uncertainty • traceability
Data	Data may be recorded on: • worksheets • spreadsheets • databases linked to information management systems Data may include results of: • observations • tests and measurements • analyses • surveys • quality assurance and control assessments Data may be presented in the form of: • graphs • tables • histograms • pie charts • bar charts • control charts

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• semi-quantitative observations and be expressed on a scale (for example, 1 to 4 or + to ++++)
Calculations	Calculations may be performed: • with or without a calculator • using computer software, spreadsheets, databases and statistical packages
Calculations of scientific quantities	Calculated of scientific quantities may include: • converting units involving multiples and submultiples • significant figures, round off, estimate and approximate • transposing and evaluating formulae • fractions, decimals, proportions and percentages • perimeters and angles • percentage and absolute uncertainties in measurements and test results • statistical values of data, such as mean, median, mode and standard deviation • areas (m^2) and volumes (mL, L, m^3) of regular shapes, such as packaging • dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability • ratios, such as mass to mass, mass to volume and volume to volume percentages • concentration, such as molarity, g/100mL, mg/L, mg/(L, ppm, ppb, dilution mL/L • average count, colonies per swab surface and cell counts, such as live and dead/total • process variables, such as pressure, gauge pressure, velocity and flow rates • biological oxygen demand (BOD), chemical oxygen demand (COD) and total organic carbons (TOC) • % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc • food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	viability • stress, strain, moduli and force
Records	Records could include information associated with: • purchase of equipment and materials, service records • safety procedures • history of calibration and test results
Occupational health and safety (OHS) and environmental management requirements	OHS and environmental management requirements: • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSL933001A Maintain the laboratory/field workplace fit for purpose

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the general cleaning of work surfaces, cleaning and storage of equipment and the monitoring of laboratory stocks under direct supervision.

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory assistants and instrument operators working in all industry sectors. This unit of competency forms a major part of the work of laboratory assistants. They work in accordance with work instructions and standard operating procedures which incorporate all relevant aspects of occupational health and safety (OHS) legislation and the codes, guidelines, regulations and Australian standards applying to environmental hazards and dangerous goods. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Clean work preparation areas	1.1. Clean preparation areas using appropriate cleaning agents and equipment according to enterprise procedures 1.2. Remove spillages, if they occur, using appropriate agents, personal protective equipment and enterprise procedures 1.3. Collect and segregate wastes in accordance with enterprise procedures, relevant codes and regulations
2. Clean and store equipment	2.1. Collect used equipment, inspect for faults and, where necessary, remove from service 2.2. Use appropriate agents, apparatus and techniques to clean equipment 2.3. Store clean equipment in the designated locations and manner

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3. Monitor stocks of materials and equipment	3.1. Perform stock checks and maintain records of usage as directed 3.2. Store labelled stocks for safe and efficient retrieval 3.3. Inform appropriate personnel of impending stock shortages to maintain continuity of supply
4. Maintain a safe work environment	4.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other personnel 4.2. Report potential hazards and/or maintenance issues in own work area to designated personnel 4.3. Minimise the generation of wastes and environmental impacts 4.4. Dispose of wastes in accordance with enterprise procedures, relevant codes and regulations

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
- safely removing spillages and disposing of wastes
- minimising the exposure to hazards of self, others and the laboratory
- safely storing equipment and materials using enterprise procedures, relevant codes and guidelines
- monitoring and reporting stock levels and the condition of laboratory materials and equipment
- keeping accurate, up-to-date records
- reporting potential hazards and maintenance issues using enterprise procedures

Required knowledge

Required knowledge includes:

- enterprise procedures for the cleaning of work preparation areas, materials and equipment

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• storage requirements for specific materials and equipment • enterprise procedures for minimisation and disposal of waste • enterprise procedures for monitoring of laboratory stocks • information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks • relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors should ensure that candidates can: • follow enterprise procedures, relevant codes and guidelines when maintaining the laboratory/field workplace • work safely and minimise exposure of hazards to self, others and the laboratory • keep accurate up-to-date records and report potential hazards and maintenance issues.
Context of and specific resources for assessment	This unit of competency is to be assessed in the workplace or simulated workplace environment. This unit of competency may be assessed with: • *MSL943002A Participate in laboratory/field workplace safety*. Resources may include: • access to work preparation areas, stocks, materials and equipment • cleaning, decontamination and/or disinfection agents and equipment • personal protective equipment • stock order firms, labels and records/forms.
Method of assessment	The following assessment methods are suggested: • observation of the candidate's techniques for cleaning

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	and/or removal of spillages and waste disposal • review of stock records completed by the candidate • feedback from supervisors and peers • questioning to assess underpinning knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment. In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. Access must be provided to appropriate learning and/or assessment support when required. The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.
This competency in practice	Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and show its relevance in a workplace setting. **Manufacturing** On receipt of a bulk container of cleaning or sanitising agent, a laboratory assistant always attached to the container a description of its method of use. The assistant also attached a list of the surfaces, apparatus, utensils and machines that could be safely treated with that chemical agent as outlined in the company's quality manual. This practice reduced the likelihood of misuse of the chemical, wastage, damage to equipment and inadequate cleaning and sanitation. **Biomedical and environmental** Laboratory assistants and technical officers routinely examine fluids for micro-organisms using a microscope. They examine fluids, such as urine, seawater, chlorinated pool water, water from catchment areas and bottled water. To maintain microscopes in working order, they

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	thoroughly clean the stage, oculars and each objective after use and sometimes between samples. The 100X objective requires particular care since this is the oil immersion objective. The oil is slightly acidic and will slowly corrode the objective if it is not cleaned thoroughly and regularly. After using the 100X objective they also take care not to drag the other objectives through the oil. **Food processing** A laboratory assistant regularly uses standard pH solutions to calibrate the laboratory's pH meters. The assistant is aware from the label that the shelf life of these solutions after opening is two months and records the opening and disposal dates on the container. The assistant is also aware that the shelf life of unopened buffer solutions is twelve months from the date of manufacture and monitors this by noting the production date on the bottle. Requests for stock replacement take into account the normal rate of use of these buffer solutions so that unopened bottles have not reached their expiry date before use.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used
Standards, **codes**, **procedures and/or enterprise requirements**	Standards, codes, procedures and/or enterprise requirements may include: • Australian and international standards such as: • AS 1678 Emergency procedure guide - Transport

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• AS 1940-2004 Storage and handling of flammable and combustible liquids • AS 2252 Biological safety cabinets • AS 3780-2008 The storage and handling of corrosive substances • AS 4332-2004 The storage and handling of gases in cylinders • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories • AS/NZS 1269 Set:2005 Occupational noise management set • AS/NZS 1337 Eye protection • AS/NZS 2161 Set:2008 Occupational protective gloves set • AS/NZS 2210:1994 Occupational protective footwear • AS/NZS 2243 Set:2006 Safety in laboratories set • AS/NZS 2243.8:2006 Safety in laboratories - Fume cupboards • AS/NZS 2865 Set:2005 Safe working in a confined space set • AS/NZS 2982.1:1997 Laboratory design and construction - General requirements • AS/NZS 4187:2003 Cleaning, disinfecting and sterilising reusable medical and surgical instruments and equipment, and maintenance of associated environments in health care facilities • AS/NZS 4452:1997 The storage and handling of toxic substances • AS/NZS 4501 Set:2008 Occupational clothing set • AS/NZS ISO 14000 Set:2005 Environmental management standards set • animal welfare legislation and codes of practice • Australian code of good manufacturing practice for medicinal products (GMP) • Australian Dangerous Goods Code • Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	1982 • Australian Quarantine and Inspection Service (AQIS) Import Guidelines • Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice • enterprise or standard operating procedures (SOPs) • equipment manuals and warranties, supplier catalogues and handbooks • gene technology regulations • guide to physical containment levels and facility types • HB 9-1994 Occupational personal protection • material safety data sheets (MSDS) • National Code of Practice for the labelling of workplace substances (NOHSC:2012 (1994)) • national environment protection measures • National Health and Medical Research Council (NHMRC) Guidelines • national measurement regulations and guidelines • occupational health and safety (OHS) national standards and codes of practice • principles of good laboratory practice (GLP) • Therapeutic Goods Regulations 1009
Equipment, **material procedures and facilities**	Equipment, material procedures and facilities may include: • animal cages • autoclaves • balances • blenders, centrifuges and separating equipment • brushes • cell counters and staining machines • colorimeters/spectrometers and polarimeters • compaction rammers and soil classification equipment • conductivity meters and pH meters • dishwashers, refrigerators, freezers, ovens, microwave ovens, incubators and water baths • disintegration apparatus, thermometers and incubators

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• fume hoods, biohazard containers and biological safety cabinets • gas cylinders • glassware, plastic ware; glass, plastic and quartz cuvettes • hotplates, mantles, burners and muffle furnaces • instrument chart recorders, penetrometers, force measuring equipment and tensiometers • light and fluorescence microscopes • melting point apparatus, viscometers and hardness testing equipment • microtomes and tissue processors • mixing and separating equipment such as centrifuges, rifflers and splitters and mixers • noise meters and blasting meters • optical microscopes • pipettes, burettes and volumetric glassware • shovels, scoops, plates, rods, cylinder moulds and buckets • steel ruler/tapes and spirit levels • thermometers, thermohygrographs, instrument chart recorders, hydrometers, pH meters and ion-selective electrodes • ultrasonic cleaners • vehicles
Typical materials	Typical materials may include: • consumable items, such as syringes, pipette tips, weigh boats • disposable clothing and personal protective equipment • distilled water, reagents, chemicals, disinfectants, detergents, agar media and plates • equipment spares, such as fuses, bulbs and batteries • oils/lubricants, fuels, industrial gases and cryogenics, such as dry ice and liquid nitrogen • paper and stationery • reference samples and standards
Maintenance	Maintenance may include: • checking serviceability before storage • cleaning

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• prevention of contamination • storing
Cleaning requirements	Cleaning requirements may include: • decontamination and/or disinfection • hygiene monitoring • minimising environmental impacts • operation of automatic cleaning apparatus, such as pipette washer, ultrasonic cleaners and dishwashers • sterilisation and disposal of wastes using boiling, high pressure air or steam, microwaves, chemicals, gas, filtration, ultraviolet radiation and autoclaving • use of specialised techniques, such as chromic acid baths and soaking in hypochlorite
Preparation areas	Preparation areas may include: • benches • fume cupboards • sheds • sinks
Agents for cleaning	Agents for cleaning may include: • cleaning solutions • decontaminants • organic solvents
Spillages	Spillages may include: • chemicals • radioactive materials • biologically active materials
Wastes	Wastes may include: • broken glass • batteries • disposable personal protective equipment • excess test samples • micro-organisms • plastic and metals • sharps • solvents • spent reagents

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• spent samples and test pieces • used containers, boxes, bags and palettes
Stock records	Stock records may include: • calibration and maintenance history • data sheets • handbooks, warranty documents, catalogues, manuals and MSDS • records of usage, loans and breakages
Communication	Communication could involve other people, such as: • laboratory, production, administration and cleaning staff • internal/external contractors • emergency personnel
Maintenance issues	Maintenance issues could involve: • checking materials and equipment are fit for purpose • equipment malfunction • hygiene issues • potential hazards, incidents and emergencies • recycling and waste disposal • spillages, leakages, breakages and contamination • stock requirements and shortages
Hazards	Hazards may include: • aerosols from broken centrifuge tubes and pipetting • chemicals, such as acids, heavy metals, pesticides and hydrocarbons • crushing, entanglement and cuts associated with moving machinery or falling objects • cryogenics, such as dry ice and liquid nitrogen • electric shock • fluids under pressure, such as steam and industrial gas cylinders • manual handling, working at heights and working in confined spaces • microbiological organisms and agents associated with soil, air, water, blood and blood

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	products, and human or animal tissue and fluids • occupational overuse syndrome, slips, trips and falls • pedestrian and vehicular traffic • sharps, broken glassware and hand tools • solar radiation, dust and noise • sources of ignition, flammable liquids and gases
Established safe work practices	Established safe work practices may include: • applying containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets and Class PCII, PCIII, and PCIV physical containment facilities • ensuring access to service shut-off points • following established manual handling procedures for tasks involving manual handling • handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions • identifying and reporting operating problems or equipment malfunctions • labelling of samples, reagents, aliquoted samples and hazardous materials • recognising and observing hazard warnings and safety signs • reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/waste water, gases, smoke, vapour, fumes, odour and particulates • use of MSDS • use of personal protective equipment, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots
Occupational health and safety (OHS) and environmental management requirements	OHS and environmental management requirements: • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

Unit Descriptor

Unit descriptor	This unit of competency covers the ability to perform tests and measurements using standard methods with access to readily available advice from supervisors.

Application of the Unit

Application of the unit	This unit of competency is applicable to laboratory/field assistants working in all industry sectors. In general, they do not calibrate equipment and make only limited adjustments to the controls. They do not interpret or analyse results or troubleshoot equipment problems. Industry representatives have provided case studies to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. These are found at the end of this unit of competency under the section 'This competency in practice'.

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret test requirements	1.1. Review test request to identify samples to be tested, test method and equipment involved 1.2. Identify hazards and enterprise controls associated with the sample, preparation methods, reagents and/or equipment
2. Prepare sample	2.1. Record sample description, compare with specification, record and report discrepancies 2.2. Prepare sample in accordance with appropriate standard methods
3. Check equipment before use	3.1. Set up test equipment in accordance with test method 3.2. Perform pre-use and safety checks in accordance with enterprise procedures and manufacturer's instructions 3.3. Identify faulty or unsafe equipment and report to appropriate personnel 3.4. Check calibration status of equipment and report any out of calibration items to appropriate personnel
4. Perform tests on samples	4.1. Identify, prepare and weigh or measure sample and standards to be tested

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.2. Conduct tests in accordance with enterprise procedures 4.3. Record data in accordance with enterprise procedures 4.4. Perform calculations on data as required 4.5. Identify and report out of specification or atypical results promptly to appropriate personnel 4.6. Shut down equipment in accordance with operating procedures
5. Maintain a safe work environment	5.1. Use established safe work practices and personal protective equipment to ensure personal safety and that of other laboratory personnel 5.2. Minimise the generation of wastes and environmental impacts 5.3. Ensure safe disposal of laboratory and hazardous wastes 5.4. Clean, care for and store equipment and reagents as required

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting enterprise procedure or standard methods accurately
- using safety information, such as material safety data sheets (MSDS) and performing procedures safely
- checking test equipment before use
- completing all tests within required timeline without sacrificing safety, accuracy or quality
- calculating, recording and presenting results accurately and legibly
- maintaining security, integrity and traceability of all samples, data/results and documentation
- cleaning and maintaining equipment

Required knowledge

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Required knowledge includes: • concepts of metrology • the international system of units (SI) • purpose of test • principles of the standard method • pre-use equipment checks • relevant standards/specifications and their interpretation • sources of uncertainty in measurement and methods for control • enterprise and/or legal traceability requirements • interpretation and recording of test result, including simple calculations • procedures for recognition/reporting of unexpected or unusual results • relevant health, safety and environment requirements

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors should ensure that candidates can: • accurately interpret enterprise procedures or standard methods • complete all tests within the required timeline without sacrificing safety, accuracy or quality • demonstrate close attention to the accuracy and precision of measurements and the data obtained • maintain the security, integrity and traceability of all samples, data/results and documentation.
Context of and specific resources for assessment	This unit of competency is to be assessed in the workplace or simulated workplace environment. This unit of competency may be assessed with: • *MSL922001A Record and present data*. Resources may include: • standard laboratory equipped with appropriate

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	equipment standards and materials • enterprise procedures and standard methods, and equipment manuals • MSDS.
Method of assessment	The following assessment methods are suggested: • review of the quality of test data/results achieved by the candidate over time • inspection of records and workplace documentation completed by the candidate • feedback from peers and supervisors • observation of the candidate performing a range of basic tests • oral or written questioning to check underpinning knowledge of test procedures. In all cases, practical assessment should be supported by questions to assess underpinning knowledge and those aspects of competency which are difficult to assess directly. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability. Access must be provided to appropriate learning and/or assessment support when required. The language, literacy and numeracy demands of assessment should not be greater than those required to undertake the unit of competency in a work like environment.
This competency in practice	Industry representatives have provided the case studies below to illustrate the practical application of this unit of competency and to show its relevance in a workplace setting. **Manufacturing** Standard testing methods may be viewed as legal requirements that must be followed to ensure that a product manufactured in a chemical plant meets the specification by which it is sold to the customer. Technical assistants perform tests in a quality control laboratory to ensure that material meets legal requirements and the material is safe and effective in use. Peroxides may be present in ether as a result of

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	light-catalysed air oxidation. Peroxides are toxic and can give rise to mixtures which are explosive when distilled. Technical assistants test ether to ensure that the level of peroxide is within acceptable limits. The test is done by shaking ether with a solution of potassium iodide. After standing for 30 minutes in the dark the yellow colour of the aqueous phase, due to the liberation of iodine, must not be more intense than a prepared standard solution. These tests ensure the quality and safety of the ether. **Food processing** A snack food company produces a range of high quality, impulse purchase snack foods. Some of these products are moisture and/or oxygen sensitive and are therefore packaged in multi-layer flexible packaging to provide optimum shelflife. The packaging must also be able to withstand the rigours of the production and distribution process. While the packaging is purchased to meet the shelflife and distribution specifications, the quality assurance program requires the periodic evaluation of the packaging materials against these specifications. A laboratory assistant uses standard methods to test the tearing resistance, bursting strength, impact resistance and permeability and/or leakage of the snack food packaging. Tests are also conducted on aspects of the manufacturing process that can affect shelflife. These tests involve the measuring of the heat-seam strength and the sealing performance of the closure process. The test results are recorded by the laboratory assistant to verify the conformance of the materials to the supplier specifications and of the process to the manufacturing specifications. The assistant reports any anomalies or non-conformances to the appropriate personnel. **Construction materials testing** A technician performs an Aggregate Stripping Test (AS 1141.50) and enters the results in the laboratory's information management system (LIMS). The resulting 20-30% stripped values (i.e. 70-80% adhering) indicate a 'fail' result. The technician notes that he has repeated the test and obtained the same 'fail' result. The laboratory manager reviews the results and asks the technician to explain how he performed the test. He describes how he prepared 3-4 mm thick plates of bitumen and binding agent in the mould and then placed 50 small clean pieces of aggregate on top. After treatment in an oven for 24

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	hours and a 50°C water bath in accordance with the test method, the technician had then carefully pulled out the pieces of aggregate and avoiding any twisting motion. He then estimated the % of bitumen adhering to each of the stones with the expectation that the stripped value would be about 5% (i.e. 95% adhering). The manager is satisfied that the technician has performed the test in accordance with the method and suggested that he now re-run the test with a known aggregate as a control. This test gives a stripped value of 5-7% (i.e. 93-95% adhering). The manager is now sufficiently confident of the laboratory's results to sign and issue the test report and explain the aggregate's 'test failure' to the client.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Codes of practice	Where reference is made to industry codes of practice, and/or Australian/international standards, it is expected the latest version will be used

Standards, **codes**, **procedures and/or enterprise requirements**	Standards, codes, procedures and/or enterprise requirements may include:
	• Australian and international standards, such as:
	  • AS ISO 1000-1998 The international system of units (SI) and its application
	  • AS ISO 17025-2005 General requirements for the competence of testing and calibration laboratories
	  • AS/NZS 2243 Set:2006 Safety in laboratories set
	• Australian code of good manufacturing practice for medicinal products (GMP)
	• calibration and maintenance schedules

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• enterprise recording and reporting procedures • equipment manuals • equipment startup, operation and shutdown procedures • MSDS and safety procedures • material, production and product specifications • national measurement regulations and guidelines • principles of good laboratory practice (GLP) • production and laboratory schedules • quality manuals • standard operating procedures (SOPs)
Concepts of metrology	Concepts of metrology may include: • that all measurements are estimates • measurements belong to a population of measurements of the measured parameters • repeatability • precision • accuracy • significant figures • sources of error • uncertainty • traceability
Preparation of samples	Preparation of samples may include: • sub-sampling or splitting using procedures, such as riffling, coning and quartering, manual and mechanical splitters • diluting samples • physical treatments, such as ashing, dissolving, filtration, sieving, centrifugation and comminution • moulding, casting or cutting specimens
Typical tests carried out by laboratory/field assistants	Typical tests carried out by laboratory/field assistants may include: • visual/optical tests of appearance, colour, texture, identity, turbidity, refractive index (alcohol content and Baume/Brix) • physical tests: • density, specific gravity and compacted

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	density • moisture content and water activity • particle size, particle shape and size distribution • chemical tests: • gravimetric • colorimetric • electrical conductivity (EC) and pH • specific ions using dipsticks and kits • nutrients (e.g. nitrates and orthophosphates) using basic kits • ashes, including sulphated ashes • biological/environmental tests: • pH, oxygen reduction potential (ORP), dissolved oxygen (DO) and (EC) • E coli using test kits • surface hygiene/presence of microbes • packaging tests: • tearing resistance, bursting strength and impact resistance • permeability and/or leakage • mechanical tests: • Emerson class • concrete slump
Measurements	Measurements may include: • simple ground surveys • meteorological parameters, such as wind direction/strength, rainfall, maximum/minimum temperature, humidity and solar radiation • simple background radiation survey • production/process parameters, such as temperature, flow and pressure • gas levels in a confined space
Common measuring equipment	Common measuring equipment may include: • dimension apparatus • DO and EC • analogue and digital meters and charts/recorders

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• basic chemical and biological test kits • dipsticks and site test kits (e.g. HACK) • timing devices • temperature measuring devices, such as thermometers and thermocouples
Hazards	Hazards may include: • electric shock • biohazards, such as microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids • solar radiation, dust and noise • chemicals, such as sulphuric acid, fluorides and hydrocarbons • aerosols • sharps, broken glassware and hand tools • flammable liquids • dry ice and liquid nitrogen • fluids under pressure • sources of ignition • occupational overuse syndrome, slips, trips and falls • manual handling, working at heights and working in confined spaces • crushing, entanglement and cuts associated with moving machinery or falling objects
Enterprise controls to address hazards	Enterprise controls to address hazards may include: • use of MSDS • use of signage, barriers and service isolation tags • use of personal protective equipment, such as hard hats, hearing protection, sunscreen lotion, gloves, safety glasses, goggles, face guards, coveralls, gowns, body suits, respirators and safety boots • use of appropriate equipment, such as biohazard containers and cabinets and laminar flow cabinets • recognising and observing hazard warnings and safety signs

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• labelling of samples, reagents, aliquoted samples and hazardous materials • handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer's instructions, and enterprise procedures and regulations • cleaning and decontaminating equipment and work areas regularly using recommended procedures • following established manual handling procedures for tasks involving manual handling
Minimising environmental impacts	Minimising environmental impacts may involve: • recycling of non-hazardous waste, such as chemicals, batteries, plastic, metals and glass • appropriate disposal of hazardous waste • correct disposal of excess sample/test material • correct storage and handling of hazardous chemicals
Occupational health and safety (OHS) and environmental management requirements	OHS and environmental management requirements: • all operations must comply with enterprise OHS and environmental management requirements, which may be imposed through state/territory or federal legislation - these requirements must not be compromised at any time • all operations assume the potentially hazardous nature of samples and require standard precautions to be applied • where relevant, users should access and apply current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health

MSS402001A Apply competitive systems and practices

Modification History

New unit, superceding MSACMS200A Apply competitive manufacturing practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

Application of the Unit

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 Skills Insight

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify own place in the value chain	1.1	Identify customers relevant to own work and their needs/requirements
		1.2	Identify suppliers for own work
		1.3	Identify value contributions along the chain
		1.4	Identify and recommend methods of increasing own contribution to the value chain
2	Improve the product and process value	2.1	Identify customer features/benefits in the product and process
		2.2	Identify aspects of product and process which contribute to customer features/benefits
		2.3	Identify aspects of product and process which do not contribute to customer benefits/features
		2.4	Recommend methods of reducing waste and increasing features/benefits
3	Use competitive systems and practices	3.1	Identify competitive systems and practices used in organisation and own work area
		3.2	Apply practices appropriate for the job or process
		3.3	Monitor the job/process and make adjustments to improve it in accordance with procedures
		3.4	Identify own skill requirements and seek skill development, if required

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope of competitive systems and practices implementation and contributing suggestions for improvement
- visualising normal operational procedures in terms of flow and contribution to customer outcomes
- planning own tasks to support competitive systems and practices implementation
- implementing competitive systems and practices in own work area according to instructions
- identifying waste (muda)

Required knowledge

Required knowledge includes:

- internal and external customers and the value they derive from operations
- suppliers, their capabilities and contribution to value (this may be obtained from an existing value stream map or other enterprise documentation)
- waste (muda)
- relevant competitive systems and practices for own job and how to apply them
- factors impacting on product, operations and waste, particularly those wholly or partially under their control (and how to control them)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	A person being assessed against this unit will work effectively in a competitive systems and practices environment, making continual positive contributions to the improvement of the business within the scope of their job.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the scope of competitive systems and

© Commonwealth of Australia, 2025 Skills Insight

	practices implemented in their work area • identify services and/or functions supplied by suppliers and to customers • identify own tasks and responsibilities and relate them to organisation and customer requirements • identify aspects of products and process which add to or detract from customer benefit • contribute suggestions for improvement.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads, and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.

© Commonwealth of Australia, 2025 Skills Insight

Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control And Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted

© Commonwealth of Australia, 2025 Skills Insight

	so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Customers	Customers may include: • internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable • final customers used as the basis for the identification of value and waste The individual does not need to interface directly with the external customer, but should be provided with sufficient information to enable them to identify customer benefits and customer features
Suppliers	Suppliers may be: • internal or external suppliers and should be sufficiently close to the individual's work as to be easily identifiable The operator does not need to interface directly with external suppliers, but should be provided with sufficient information to enable them to identify supplier contribution to their own work and to customer benefit
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the organisation • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS402010A Manage the impact of change on own work

Modification History

New unit, superseding MSACMC210A Manage the impact of change on own work - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an employee to effectively manage the changes in their own work resulting from their organisation's implementation of competitive systems and practices.

Application of the Unit

This unit applies to an employee in an organisation implementing competitive systems and practices that affect the employee's own work. The unit includes the skills required to positively participate in ongoing and continuous change as it affects their work. The employee will be expected to deal with these changes as part of a team and to give feedback from their own perspective.

This unit requires the application of skills associated with problem solving, planning and organising and self-management for assessing and managing the impact of change on own work. This unit also requires the ability to seek information and feedback from team members on the impact of changes and suggested improvements.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 Skills Insight

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Examine the impact of change on own work practices	1.1	Identify competitive systems and practices relevant to changes in own work
		1.2	Examine changes to work flow
		1.3	Examine changes to equipment/process/physical environment
		1.4	Examine changes to work relationship with team members and other teams
		1.5	Examine changes to data collection needs
		1.6	Examine changed work for impacts on health, safety and environment (HSE)
		1.7	Examine changes to quality requirements
		1.8	Identify any additional individual skill needs
		1.9	Identify other areas requiring assistance
2	Implement change	2.1	Review changes which may have an adverse impact with team leader
		2.2	Adopt changes to individual work practice
		2.3	Seek assistance in gathering/processing data, as required
		2.4	Implement the data collection/processing and take actions on resulting information in accordance with procedures
		2.5	Seek assistance/training to meet needs caused by change
3	Implement continuous	3.1	Critically examine all changes
		3.2	Identify impacts of changes both up and down the

© Commonwealth of Australia, 2025 Skills Insight

improvement		immediate value stream
	3.3	Identify areas for improvement
	3.4	Make recommendations for improvement in accordance with procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying the competitive systems and practices being implemented in the organisation that are relevant to own work, including, if implemented:
  - Just in Time (JIT) and kanban systems
  - preventative maintenance
  - 5S housekeeping
  - continuous improvement processes (e.g. kaizen)
  - waste (muda) elimination
  - formal problem solving procedures (e.g. root cause analysis (RCA))
- analysing own work procedures
- communicating with others in work area, team leaders and other employees relevant to changes in own work
- solving problems relevant to changes in own work
- identifying sources of assistance in organisation if difficulty is experienced with changes
- interpreting relevant procedures and instructions
- working as part of a team

Required knowledge

Required knowledge includes:

- features of common competitive systems and practices sufficient for identification, including:
  - JIT and kanban systems
  - preventative maintenance
  - 5S housekeeping
  - continuous improvement processes (e.g. kaizen)

© Commonwealth of Australia, 2025 Skills Insight

  - waste (muda) elimination
  - formal problem solving procedures (e.g. RCA)
- current processes and principles of operation
- sources of data on the process/plant and possible applications to information
- methods of determining own skill needs and developing skills, if required
- HSE principles as relevant to own job
- change implementation contacts and procedures relevant to work area
- employee assistance mechanisms in the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the competitive systems and practices used in their own work • identify changes to their own work flowing from the implementation of the relevant competitive systems and practices • implement changes • know when and how to seek assistance with work changes • make suggestions for improvements.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to

	contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on. • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems such as Systems Control and Data Acquisition (SCADA)

© Commonwealth of Australia, 2025 Skills Insight

	software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Managing impact of change	Managing impact of change may include: • elements being undertaken individually or as part of a team • seeking assistance from team leaders for areas outside the employee's range of responsibility and authority
Procedures	Procedures may include: • all work instructions • standard operating procedures • formulas/recipes • batch sheet • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing

© Commonwealth of Australia, 2025 Skills Insight

	practice (GMP) and responsible care) and government regulations Procedures may be: • written, verbal, computer-based or in some other format
Gathering and monitoring performance data	The gathering and monitoring of performance data may be: • undertaken manually by individual employees through charts, tally sheets or keypad/board entry • collected automatically through software, such as SCADA software, ERP systems, MRP and proprietary systems
Continuous improvement	Continuous improvement in competitive systems and practices (often referred to as kaizen) includes: • the continual evaluation and improvement of all process in terms of time required, resources used, resultant quality, and other aspects relevant to the process
Value stream	The value stream begins with the customer and includes all actions (both value adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement. Depending on the operations and the customer requirement stages where value stream actions may occur include: • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS402021A Apply Just in Time procedures

Modification History

New unit, superseding MSACMT221A Apply Just in Time (JIT) procedures - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to work in an organisation implementing Just in Time (JIT) procedures.

Application of the Unit

This unit applies to an individual working in an organisation following JIT who will need to follow procedures which are specific to JIT, such as the controlled flow of material (e.g. the use of kanban and elimination of waste). This will involve the individual in the application of the pull system to their job and the authorisation of product/material flows in accordance with procedures and their level of authority.

This unit requires the application of skills associated with planning and organising and self-management to deliver product on demand using necessary tools, equipment and processes to meet production requirements. The unit also requires an ability to recognise and act on problems that may interfere with meeting production demands.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1	Respond to indicator of demand	1.1	Identify pull of product through work role
		1.2	Recognise indicator of flow authorisation
		1.3	Identify production or service required
2	Make products or deliver service to demand	2.1	Make product or deliver service as required by ticket
		2.2	Identify any factors likely to prevent demand being satisfied in own work or work of the team
		2.3	Take action in accordance with procedures
3	Update demand information as required	3.1	Record information on ticket to procedures, as required
		3.2	Facilitate operation of flow authorisation as part of work
4	Recommend improvements	4.1	Examine the operation of the JIT system as it relates to own work
		4.2	Identify areas for improvement
		4.3	Identify any additional personal skill requirements to implement JIT procedures
		4.4	Recommend improvements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

© Commonwealth of Australia, 2025 Skills Insight

- receiving ticket, kanban, order or other indicator of demand and interpreting correctly for own work function, including quantity, quality, time and delivery requirements
- ensuring that all production and movement of parts/material or delivery of a service for which the individual is responsible for takes place only as required by a downstream operation
- recognising and taking appropriate action on faults and other issues that may threaten the JIT delivery of own product or service
- reading and recording information on tickets or other indicators of demand
- suggest improvements to JIT system, as appropriate
- performing technical functions to meet indicators of demand from downstream and to issue indicators of demand upstream

Required knowledge

Required knowledge includes:

- relevant indicator of demands for own job
- own role in flow authorisation
- JIT methods relevant to job
- procedures for recommending improvements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the indicators of demand and the flow authorisation system in their work area • relate products and services supplied by suppliers and customers to the flow authorisation system • identify own tasks and responsibilities and relate them to the flow authorisation system • interpret received indicators of demand correctly for quantity, quality and time of delivery • contribute suggestions for improvement.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices.

© Commonwealth of Australia, 2025 Skills Insight

	Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using some combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work

© Commonwealth of Australia, 2025 Skills Insight

environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
JIT	JIT is a scheduling concept that calls for any item or service needed for an operation, whether a service, raw material, finished item, or anything in between to be available:

© Commonwealth of Australia, 2025 Skills Insight

	• precisely when the service, product or operation is to be produced or undertaken • in the right quantity and at the right quality
Product	Product may include: • a physical product • a supporting utility service, such as water, gas, power • some other service (e.g. cranes and forklifts)
Flow authorisation	Flow authorisation refers to: • a system which authorises the worker to make a product without reference to another authority
Indicator of demand	An indicator of demand may include: • kanban bin, ticket or similar • some other indicator of demand pull which authorises production or movement of an item (in some plants, this may also include authorisation using SCADA software) In continuous operations organisations, production is measured in terms of production rate (e.g. kg/h, tonne/day) and rate is increased/decreased according to the flow authorisation which may be a kanban (e.g. ticket, order from a supplier) or may be a SCADA signal from a remote facility (e.g. customer tank) saying that resupply is required or similar
Ticket	A ticket may include: • kanban or some other record, paper or electronic, which constitutes the whole or part of the flow authorising system (where kanban bins are used, there may be no other record)
Kanban	Kanban refers to: • a card or sheet used to authorise production or movement of an item and may vary in format or content between organisations and departments
SCADA	SCADA refers to: • a number of systems which automatically collect critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information to personnel for action
Pull system	A pull system refers to:

© Commonwealth of Australia, 2025 Skills Insight

	• an operations planning system based on making on demand, as opposed to a push system based on making for stock using a sales forecast
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes, batch sheets, temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) and government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS402030A Apply cost factors to work practices

Modification History

New unit, superseding MSACMT230A Apply cost factors to work practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to identify cost components in their work and to be able to determine, in general terms, the cost impacts of alternative actions.

Application of the Unit

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

The unit covers the skills to be able to assess the relative costs of the alternatives and use this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

This unit requires the application of skills associated with problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

unit of competency.	text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify the major cost components of product or process in own work area	1.1	Identify cost components in the product or process in own work area
		1.2	Recognise the impact of current or alternative actions on costs
2	Identify constraints to cost-efficiency	2.1	Identify required production/process rate and major costs
		2.2	Identify costs factors under individual or team control
		2.3	Relate identified costs factors to impact on overall cost of production/process
		2.4	Identify cost factors that are a constraint to cost-efficiency in own work area
3	Apply cost-efficient work practices	3.1	Identify and explain to relevant people the implications of possible actions/changes to improve cost-efficiency in simple financial terms
		3.2	Identify non-financial implications of proposed changes in discussion with relevant people
		3.3	Select actions which minimise overall costs
		3.4	Monitor actions to ensure cost-efficiency in own work area is maintained

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify cost factors and contribute suggestions for improvement
- visualising normal operational procedures in terms of flow
- distinguishing between fixed and variable costs
- identifying fixed and variable cost components relevant to own work, including where applicable:
  - power/energy
  - materials, plant and equipment
  - production or process time, including impact on salary and wages
  - office expenses
  - government taxes and charges

Required knowledge

Required knowledge includes:

- cost components of products made
- costs concepts, such as expense and income
- major cost contributors to product (e.g. energy)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the scope of their own and their teams work and relate it to the overall flow of work in the organisation • express cost factors in specific terms (e.g. cost per

© Commonwealth of Australia, 2025 Skills Insight

	item, process and task) and not just in a general manner • identify and express costs factors in simple financial terms • use cost factors to select lower cost alternatives when making decisions.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and

	literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems

© Commonwealth of Australia, 2025 Skills Insight

	and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Cost components	Cost components include: • fixed and variable costs, such as power/energy, materials, plant and equipment, production or process time, including impact on salary and wages • office expenses, such as telephone • government taxes and charges
Process	Process may include: • a production, maintenance, logistics, office or other support process in an organisation
Overall cost	Overall cost may include: • the assessment of negative and positive financial implications • negative long-term issues, such as occupational health and safety (OHS), environmental and regulatory issues

MSS402031A Interpret product costs in terms of customer requirements

Modification History

New unit, superseding MSACMT231A Interpret product costs in terms of customer requirements - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to be able to identify the major cost components of either products or processes, the basic relationship of these to customer benefit, and use this to help minimise waste (defined as anything not delivering value as defined by the customer). It has a different focus to MSS402030A Apply cost factors to work practices, which focuses on costs in isolation, whereas this unit regards all costs not directly leading to customer benefit as waste.

Application of the Unit

This unit applies to an individual who uses their understanding of the customer's requirements of the product or process being undertaken as the basis for investigating work processes to identify waste sources and then takes action relevant to their level of competency and authority to reduce this waste. It requires an understanding of both the cost factors in the products they make and also the benefits which the customer derives from the product.

This competency may be performed individually or in a team-based environment.

This unit requires the application of skills associated with analysis and problem solving to identify waste and determine ways to minimise waste. This unit requires initiative and enterprise and application of learning in concepts of waste and waste minimisation.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify cost components deriving from customer benefit and other costs	1.1	Identify customer features/benefits in product or process being undertaken
		1.2	Identify cost components which deliver customer features/benefits and those which do not
2	Compare required performance of product or process steps with actual performance	2.1	Identify performance required to meet customer needs in own work and that of team
		2.2	Identify actual performance
		2.3	Compare cost components of products or process with current customer-related targets
		2.4	Separate costs components into those that contribute to customer features/benefits and those that do not
		2.5	Determine non-contributing cost components which are under control of the individual or team
3	Minimise waste	3.1	Recommend changes to eliminate or reduce waste
		3.2	Adopt changes which minimises waste
		3.3	Monitor effect of changes to ensure gains are made against customer features/benefits

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying customer benefit in own work and that of the individual's team
- identifying financial and other performance indicators for own work and of team, including where appropriate, takt time
- communicating with others to clarify cost factors and contribute suggestions for improvement
- visualising normal operational procedures in terms of flow
- distinguishing between fixed and variable costs
- classifying fixed and variable cost components in terms of relevancy to customer benefit, including where applicable:
  - power/energy
  - materials, plant and equipment
  - production or process time, including impact on salary and wages
  - required and unnecessary downtime
  - office expenses
  - government taxes and charges

Required knowledge

Required knowledge includes:

- value as defined by the customer and the relevancy to own and team's work
- ability to access company information about:
  - customer features/benefits
  - cost components of products made
  - costs concepts, such as expense and income
  - major cost contributors to product (e.g. energy)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 Skills Insight

Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify customer benefit from own and team's work • express cost factors (financial and other factors) in specific terms (e.g. cost per item, process and task), and not just in a general manner • identify and express costs factors in simple financial terms • contribute suggestions for improvement to minimise waste and overall costs.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.

© Commonwealth of Australia, 2025 Skills Insight

	Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just In Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving

© Commonwealth of Australia, 2025 Skills Insight

	• run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Customer features/benefits	Customer features/benefits include: • characteristics of the product or service which add value to the customer, this value may be assessed in financial or features terms The customer may be: • internal or external
Performance	Performance may include: • the rate of output of the plant compared to the rate required to meet demand • takt, where takt time is the allowable time to produce one product at the rate and quality customers are demanding it (this is NOT the same as cycle time, which is the normal time to complete an operation on a product – which should be less than or equal to takt time)
Customer-related targets	Customer-related targets include: • internally set financial and operational targets that contribute to meeting customer features/benefits
Contributing and non-contributing cost components	Contributing costs include: • costs that make a direct contribution to customer features/benefits. These costs continue to need to be incurred (although they may be minimised) in order to gain the customer feature/benefit Non-contributing costs include: • other costs that do not contribute to customer features/benefits. These may be costs that must be maintained, such as regulatory compliance and occupational health and safety (OHS) costs and other costs which are not required and do not contribute to customer features and so should be eliminated if possible (this is also defined in terms of ***waste*** – see

© Commonwealth of Australia, 2025 Skills Insight

	below)
Waste	Waste (also known as muda in the Toyota Production System and its derivatives) includes: • any activity which does not contribute to customer or organisation benefit/features in the product Categories of waste include: • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items Waste for this unit may include activities which do not yield any benefit to the organisation or any benefit to the organisations customers

MSS402040A Apply 5S procedures

Modification History

New unit, superseding MSACMT240A Apply 5S procedures in a manufacturing environment - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an employee to apply 5S procedures to their own job and work area. The unit assumes the employee has a particular job and an allocated work area and that processes in the work area are known by the individual.

Application of the Unit

This unit applies to an individual in an organisation who works in an operational position as part of production, maintenance, logistics, and so on. The unit can also apply to individuals in other organisations who have a discrete role and responsibility for individually managed processes. For employees in an office, the specific office-related unit *MSS402041A Apply 5S* in an office should be selected.

This unit applies where an organisation has decided to embark on a competitive systems and practices strategy and as part of this has adopted the philosophy of 5S as one of the tools to improve performance. The employee needs to apply 5S to their job and work area and maintain the housekeeping and other standards set by 5S.

This unit requires the application of skills associated with planning and organising, problem solving and self-management, in order to identify and implement 5S housekeeping practices.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Sort needed items from unneeded	1.1	Identify all items in the work area
		1.2	Sort items to achieve deliverables and value expected by downstream and final customers
		1.3	Sort items required for regulatory or other required purposes
		1.4	Place any non-essential item in a appropriate place other than the workplace
		1.5	Regularly check that only essential items are in the work area
2	Set the workplace in order	2.1	Identify the best location for each essential item
		2.2	Place each essential item in its assigned location
		2.3	After use immediately return each essential item to its assigned location
		2.4	Regularly check that each essential item is in its assigned location
3	Shine the work area	3.1	Keep the work area clean and tidy at all times
		3.2	Conduct regular housekeeping activities during shift
		3.3	Ensure the work area is neat, clean and tidy at both beginning and end of shift

© Commonwealth of Australia, 2025 Skills Insight

4	Standardise activities	4.1	Follow procedures
		4.2	Follow checklists for activities, where available
		4.3	Keep the work area to specified standard
5	Sustain the 5S system	5.1	Clean up after completion of job and before commencing next job or end of shift
		5.2	Identify situations where compliance to standards is unlikely and take actions specified in procedures
		5.3	Inspect work area regularly for compliance to specified standard
		5.4	Recommend improvements to lift the level of compliance in the workplace

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify issues during 5S implementation, communicate results and contribute suggestions for improvement
- visualising operations in terms of flow and contribution to customer outcomes
- planning own tasks in implementation of 5S
- implementing 5S in own work area according to instructions
- identifying waste (muda)
- prioritising activities and items
- reading and interpreting documents describing procedures
- recording activities and results against templates and other prescribed formats
- working with others
- solving problems

Required knowledge

Required knowledge includes:

© Commonwealth of Australia, 2025 Skills Insight

- operations and processes relevant to own job
- meaning and application of 5S steps to own job and work area
- principles of efficient workplace organisation
- purposes of 5S
- methods of making/recommending improvements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify own tasks and responsibilities and relate them to organisation and customer requirements • identify and explain the stages of 5S • implement 5S in own work area • identify waste (muda) in the work area.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects

© Commonwealth of Australia, 2025 Skills Insight

	• suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems

© Commonwealth of Australia, 2025 Skills Insight

	• supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
5S	5S is a system of work organisation originally developed in Japan based around housekeeping principles. A close translation of the five stages in the housekeeping approach is: • sort • set in order • shine • standardise • sustain
Sort	Sort involves keeping only what is absolutely necessary for the processes in the work area. Sort includes: • clearing the work area of all non-essential equipment and materials Non-essential items are those not required to either produce product, conduct process or operations, or make required adjustments to equipment during process or operations
Set in order	Set in order includes: • assigning required equipment and materials appropriate locations in the work area

© Commonwealth of Australia, 2025 Skills Insight

Shine	Shine includes: • keeping the work area clean at all times. This should be carried out to a regular daily schedule against allowed time and, on most occasions, at the end of a job
Standardise	Standardising includes: • activities that help maintain the order and the housekeeping standards • using procedures and checklists developed from a procedure

Sustain	Sustain includes:
	• making sure that daily activities are completed every day regardless of circumstance
	• cleaning up after a job
	• undertaking inspections, including:
	  • informal inspections carried out often, at least weekly
	  • formal inspections carried out at least monthly
	• generating continuous improvement actions from daily activities
	• following up specific actions to generate continuous improvement

Items in work area	Items in work area may include: • tools • jigs/fixtures • materials/components • plant and equipment • manuals • personal items (e.g. bags, lunch boxes and posters) • safety equipment and personal protective equipment • other items which happen to be in the work area
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the operation of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing

© Commonwealth of Australia, 2025 Skills Insight

	practice (GMP) and responsible care) and government regulations Procedures may be: • written, verbal, computer based or in some other format

MSS402050A Monitor process capability

Modification History

New unit, MSACMT250A Monitor process capability - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required for gathering of data and the interpretation of simple information to determine the compliance of the process and the taking of action as defined by the procedures where the information reveals the process is out of control parameters.

Application of the Unit

This unit applies to an individual in an organisation adopting specific competitive systems and practices, usually either six sigma or statistical process control/three sigma, as a means of determining and improving the capability of their process to customer requirements. The individual is involved in collecting specified data and performing specified manipulations to the data (typically by plotting on a chart or by entering into a nominated computer program). The information is typically presented to team members in terms of graphs/charts which they are expected to interpret at a basic level and then take action in accordance with procedures to restore the process to being under control parameters.

This unit requires the application of skills associated with entering and monitoring operational data and information and requires initiative, enterprise and problem solving in identifying production variations and making improvement recommendations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

© Commonwealth of Australia, 2025 Skills Insight

1	Collect and process data	1.1	Take specified measurements/readings, as required
		1.2	Enter data in log, computer or other record
		1.3	Manipulate and/or chart data as required by procedures
2	Identify variations that are not random and take action	2.1	Examine chart and/or reliability information
		2.2	Distinguish between random variations and those with an identifiable cause
		2.3	Take action specified in procedures when a variation with an identifiable cause occurs
3	Assist in process improvement	3.1	Collect data for process capability improvement trials
		3.2	Make recommendations for improvement
		3.3	Implement revised capability monitoring procedures

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting electronic and hard copy operating instructions and documents, including where used:
  - work instructions

© Commonwealth of Australia, 2025 Skills Insight

  - standard operating procedures
  - formulas/recipes
  - production and batch sheets
  - temporary instructions
  - other provided operating instructions
- monitoring performance data against specifications and control parameters
- examining equipment procedures, products and processes for possible causes of variations
- identifying when corrective action is required by reference to procedures

Required knowledge

Required knowledge includes:

- data collection methods for operations in work area
- data processing techniques required
- basic variability and normal distribution
- recognition of identifiable causes in accordance with procedures
- causes of different types of identifiable causes as defined by procedures
- actions to be taken for the different causes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence should be available of data collected and processed. There may also be evidence of assignable causes recognised and action taken. There should not be evidence of assignable causes being ignored. A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the scope of operations, including required performance parameters in their work area • collect, enter and process data, including normal performance and variations • read and interpret data, including identifying variation to set parameters • determine where assignable causes can be allocated to variations and take appropriate action • participate in data collection, when required, for

© Commonwealth of Australia, 2025 Skills Insight

	process capability trials • contribute suggestions for improvement.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems. • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector

© Commonwealth of Australia, 2025 Skills Insight

Six sigma	Six sigma is a process improvement methodology based on statistical process control with six sigma limits which equates to 3.4 defects per million opportunities for each product or service transaction Six sigma is also often used as a general term covering a competitive systems and practices approach. Six sigma training typically covers several units of competency in this Training Package
Three sigma	Three sigma includes: • statistical process control with three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other form
Random variation	Random variation is the term used in statistical control to refer to those variations for which no cause can be found
Identifiable cause	Identifiable cause (also referred to as assignable cause or special cause) refers to: • those variations for which a cause can be found and so the cause of the variation eliminated
Process capability	Process capability means the capability of the process to deliver to customer defined requirements. Process capability includes process stability against standardised practices and documentation to eliminate variation against customer requirements

MSS402051A Apply quality standards

Modification History

New unit, superseding MSACMT251A Apply quality standards - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

Application of the Unit

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1	Assess own work	1.1	Continuously check completed work against workplace standards relevant to the operation being undertaken
		1.2	Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned
		1.3	Identify and isolate faulty components, products or processes
		1.4	Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures
2	Assess quality of received components, parts or materials	2.1	Continuously check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance
		2.2	Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service
		2.3	Identify and isolate faulty components, parts, materials or information that relate to the operator's work
		2.4	Record and/or report faults and any identified causes in accordance with workplace procedures
		2.5	Identify causes of any identified faults and take corrective action as specified in workplace procedures
3	Measure components, parts or materials	3.1	Measure materials, component parts, information, service or products, as required, using the appropriate measuring instruments in accordance with workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

4	Record information on production indicator	4.1	Record basic information on quality and other indicators of process performance in accordance with workplace procedures
5	Investigate causes of quality deviations	5.1	Investigate and report causes of deviations from specified quality standards for components
		5.2	Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting work instructions, specifications, standards and patterns appropriate to own work
- carrying out relevant visual inspections of materials, component parts and final products
- carrying out relevant physical/chemical measurements or tests
- maintaining accurate work records in accordance with procedures
- carrying out work in accordance with occupational health and safety (OHS) policies and procedures
- meeting work specifications
- communicating effectively within defined workplace procedures
- interpreting and applying defined procedures

Required knowledge

Required knowledge includes:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- basic characteristics of materials used in the relevant production processes
- safety and environmental aspects of relevant production processes
- relevant measurement techniques and quality checking procedures
- workplace procedures
- reporting procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • interpret, relevant work instructions, standards and specifications appropriate to own work • check and measure relevant quality parameters • interpret results of quality checks in terms of specifications, patterns and work standards • take required action where standards of materials, component parts, final product or work processes are found to be unacceptable • maintain accurate records.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of

© Commonwealth of Australia, 2025 Skills Insight

	contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis

© Commonwealth of Australia, 2025 Skills Insight

	• 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Quality parameters	Quality parameters may include: • finish • size • durability • product or process variations • materials • alignment • colour • damage and imperfections • time
Quality checks	Quality checks are against set parameters for the process or product. Examples include: • visual inspection • physical measurements • chemical tests • checks against patterns, templates and guides • processing time
Materials	Materials may include: • physical raw materials • orders, forms and other documentation • services required for undertaking an operation (e.g. power, water, compressed air and fuel)

© Commonwealth of Australia, 2025 Skills Insight

Measure	Measure includes: • those measurements which may be taken by the employee in the workplace/at their work station
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the operation of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format
Indicators of production performance	Indicators of production performance may include: • number of items/production rate • delays and causes of delays (where known) • other information as specified in the procedures
Data entry/recording	Data entry/recording may include: • keyboard • written (including ticks or signs) • verbal
Sources of information/ documents	Sources of information/documents may include: • quality and Australian standards and procedures • work instructions, patterns, designs and recipes • organisation work procedures • manufacturer instructions for materials and equipment • organisational or external personnel • customer requirements
Investigate and report	Investigate and report includes: • following set procedures defined for such investigations Set procedures may include: • verbal instructions

© Commonwealth of Australia, 2025 Skills Insight

	• documented procedures • other quality procedures as implemented within an organisation or work environment

Workplace context	Workplace context includes:
	• work organisation procedures and practices relating to the manufacture and quality outcomes for products
	• conditions of service, legislation and industrial agreements, including:
	  • workplace agreements and awards
	  • federal or state/territory legislation
	  • standard work practice

Reporting/communication	Reporting/communication may include: • verbal and written communication in accordance with organisational policies and procedures • oral, written or visual communication and may include simple data
Being responsible for the maintenance of own work quality	Being responsible for the maintenance of own work quality may include: • contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures • following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation
Applicable regulations and legislation	Applicable regulations and legislation may include: • OHS legislation relevant to workplace activities • workers compensation legislation

MSS402061A Use SCADA systems in operations

Modification History

New unit, superseding MSACMT261A Use SCADA systems in manufacturing - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to interact with a System Control and Data Acquisition (SCADA) system as part of their job.

Application of the Unit

This unit applies to an individual in an organisation using a SCADA system and the individual must interface with that system. The individual will need to access this system as part of their routine and take actions based on the information they obtain from the SCADA system in accordance with procedures.

This unit requires the application of skills associated with using communication tools and technology for management of own work, planning and problem solving.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1	Use operator interface	1.1	Identify SCADA terminals relevant to own work station and functions
		1.2	Use keyboards, track ball, monitor and/or stand alone controllers to access/interrogate system
		1.3	Use correct level of access and find all relevant screens and information
		1.4	Access message section and acknowledge messages
		1.5	Input and output information correctly according to program and organisation requirements
2	Use information	2.1	Obtain data and information from SCADA, as required, including process, supply and product chain data
		2.2	Interpret data and information as required by own job
		2.3	Find and use relevant historical data and information
		2.4	Use manufacturer manuals or specifications, as required, to expand knowledge of SCADA system relevant to own work
		2.5	Determine and prioritise required actions
3	Make required changes in accordance with procedures	3.1	Adjust production/process in response to SCADA information
		3.2	Record adjustments and variations to specifications/schedules and report to appropriate personnel
		3.3	Seek feedback and information on adjustments to further improve procedures, where required

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using SCADA terminals and other input devices
- reading and interpreting electronic and hard copy SCADA operating instructions and documents, including where used:
  - work instructions
  - standard operating procedures
  - temporary instructions
  - other provided operating instructions
- working within security and access control requirements of the SCADA system
- identifying modules, screens, and so on, of SCADA system relevant to own work
- accurately inputting and outputting data
- searching and retrieving data
- accessing SCADA system nominated assistance, when required

Required knowledge

Required knowledge includes:

- technical knowledge needed to operate own work processes
- hierarchy of SCADA system and operation
- information available from and controls exercised by/through the SCADA system

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the scope and relevance of the SCADA system to their own work • access correct levels of the SCADA system • enter and retrieve data, including normal performance and variations

© Commonwealth of Australia, 2025 Skills Insight

	• use SCADA system to assist in own work.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented ,or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as SCADA software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
SCADA	SCADA refers to: • a number of systems which automatically collect

© Commonwealth of Australia, 2025 Skills Insight

	critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information to personnel for action In some industry sectors, the SCADA system is sometimes integrated into other sophisticated computer control systems, such as Distributed Control System (DCS). These sectors may simply refer to their SCADA as the DCS or other similar term (such as the proprietary name of the computer system). SCADA systems may provide information from outside of the process, such as stock/material levels in a customer plant and/or available supply, supply rates and pricing from a supplier plant. This information may all be accessed by the SCADA system and the employee using it in order to make production rate and other control decisions (either automatically or human assisted) about their own operations and work processes
Supply and product chains	The supply chain Includes: • all suppliers in the chain from the initial raw material up to the current step in the operations process The product chain includes: • all steps after the current step up to the final customer Competitive systems and practices organisations encompass the entire production system, beginning with the customer, and includes: • the product sale • outlet • the final assembler • product design • raw material mining and processing • all tiers of the value stream (sometimes called the supply chain) Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive systems and practices can reach its full potential without including the entire 'organisation' in its planning
Procedures	Procedures may include: • work instructions • standard operating procedures

© Commonwealth of Australia, 2025 Skills Insight

	• formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS402080A Undertake root cause analysis

Modification History

New unit, superseding MSACMT280A Undertake root cause analysis - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA) by any person. This will often be undertaken by people working in a team. This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

Application of the Unit

This unit applies to individuals working in an organisation which is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

Where training in a wider range of problem solving techniques and tools is required the unit MSAPMSUP390A Use structured problem solving tools should be selected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Recognise problems	1.1	Identify features or occurrences indicative of a problem
		1.2	Use appropriate tools, techniques and charts to define the problem
2	Implement quick fix	2.1	Recommend a quick fix within the scope of competency and authority
		2.2	Use technology or processes relevant to the problem to implement quick fix
3	Determine root cause	3.1	Identify a range of possible causes
		3.2	Gather data and other information to eliminate or confirm possible causes
		3.3	Use available data and information to link causes and effects
		3.4	Seek assistance, as required
		3.5	Identify root cause
4	Develop permanent solution	4.1	Identify a range of methods to eliminate the root cause or break the cause tree
		4.2	Select the most appropriate solution
		4.3	Liaise with relevant people
		4.4	Recommend or implement solution within the limits of competency and authority

© Commonwealth of Australia, 2025 Skills Insight

4.5 Monitor impact of solution and make further recommendations, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- cooperating and working with others on problem solving
- assessing and recording information from a variety of sources
- defining potential problems factually, including:
  - location and extent of problem or incident
  - sequence of events where relevant
  - extent of deviation from normal operation or performance
- analysing potential problems across a range of varied activities and knowledge applications
- reading and constructing simple charts, such as cause and effect diagrams

Required knowledge

Required knowledge includes:

- RCA methodology, including difference between quick fixes and root cause elimination or breaking of causal tree
- principles and normal operation of equipment, plant and processes in own work area sufficient to undertake a RCA and propose solutions
- common variances to normal performance that are indicators of a problem
- use of relevant analysis tools (e.g. cause/effect diagrams, Pareto charts and 5 Whys)
- operations in own work area

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and	A person who demonstrates competency in this unit must

© Commonwealth of Australia, 2025 Skills Insight

evidence required to demonstrate competency in this unit	be able to provide evidence of the ability to: • undertake problem identification • use appropriate processes to achieve root cause identification • prioritise solutions • recommend solutions and implementation procedures to problems within own area and range of technical skills and knowledge • evaluate implementation of solutions.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and

	disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree

© Commonwealth of Australia, 2025 Skills Insight

	Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Features or occurrences indicative of a problem	Examples of features or occurrences indicating problems include: • variation to normal plant or equipment operation • unplanned or non-conforming process or operations outcomes • out of specification products • excess scrap • accidents and emergencies • regulatory breaches • customer returns and complaints • reduction or loss of sales
Root cause	There are many possible causes of any problem. The root cause contrasts with other possible causes of a problem which when eliminated have no impact or only ameliorate the problem. Elimination of the root cause permanently eliminates the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found.
Cause tree	The series of causes is referred to as the cause tree. Not all root causes are accessible and able to be eliminated. Breaking the cause tree is such a way that the problem cannot recur is an acceptable alternative. Not all situations can wait for the RCA and eventual elimination of the root cause as there may be serious current impacts. The quick fix will control these immediate impacts, but does not eliminate the root cause.
Quick fix	A quick fix is not a short cut or side step for a permanent solution to the root cause. It is a necessary step designed to control the immediate impacts of a problem, for example, to prevent ongoing errors or to ameliorate damage.
Appropriate techniques/charts	Appropriate techniques/charts may include: • control charts • Pareto charts

© Commonwealth of Australia, 2025 Skills Insight

	• run charts • flow charts • cause and effect diagrams • tree diagrams • 5 Whys analysis

MSS402081A Contribute to the application of a proactive maintenance strategy

Modification History

New unit, superseding MSACMT281A Contribute to the application of a proactive maintenance strategy - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to make a positive contribution to proactive maintenance strategies, including actions that contribute to equipment uptime and overall equipment effectiveness (OEE).

Application of the Unit

This unit applies to an individual in an organisation which is following a predictive, preventative or reliability-centred maintenance strategy and which requires commitment from all employees. The employee should 'own' their equipment/plant and take an active part in the implementation of the strategy within the scope of their authority.

This unit requires the application of skills associated with accessing and maintaining equipment/plant documentation, It also requires problem solving, initiative and enterprise to continually monitor and maintain operational performance of equipment/plant used in work role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency.	text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Maintain equipment/plant	1.1	Keep equipment/plant within area of responsibility clean
		1.2	Ensure equipment/plant is serviced and adjusted, as required, in accordance with procedures and own level of responsibility
		1.3	Access manufacturer manuals and specifications, where required, to expand knowledge on the maintenance of equipment/plant
		1.4	Access and update documentation on equipment/plant operation and maintenance as appropriate to workplace procedures
2	Monitor operation of equipment/plant	2.1	Regularly check key conditions of the equipment/plant as defined in workplace procedures
		2.2	Regularly check equipment/plant OEE
		2.3	Note any deviation from conditions specified in procedures
		2.4	Identify any previous occurrences of this deviation
3	Identify deviations and patterns	3.1	Identify any previous occurrences of a deviation
		3.2	Identify any related deviations which have occurred
		3.3	Identify any unusual occurrence which may be related to a deviation
4	Take action appropriate to	4.1	Liaise with relevant people regarding the deviation and the solution

© Commonwealth of Australia, 2025 Skills Insight

competency and authority on deviation	4.2	Implement solution and/or assist with the implementation of the solution, as appropriate

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- reading and interpreting electronic and hard copy plant, equipment, and process instructions and documents, including where used:
  - work instructions
  - standard operating procedures
  - workshop manuals and instructions from equipment manufacturers in regards to plant or equipment operation, regular maintenance, troubleshooting, and record of use or production
  - production and batch sheets
  - temporary instructions
  - other provided operating instructions
- examining equipment procedures, products and processes for possible causes of deviations from patterns of normal use
- interpreting OEE rates
- servicing and maintaining plant and equipment consistent with area of responsibility and own technical skills

Required knowledge

Required knowledge includes:

- normal behaviour of the equipment/plant
- indicators of abnormal performance
- principles of operation of plant and equipment sufficient to recognise problems and propose solutions
- appropriate cleaning and adjusting for the equipment/plant/area as required by procedures
- concept of OEE as: *availability x performance x quality rate*

where:

- availability takes into account losses due to breakdown, set up and adjustments
- performance takes into account losses due to minor stoppages, reduced speed and idling

© Commonwealth of Australia, 2025 Skills Insight

- quality rate takes into account t losses due to rejects, re-works and start-up waste

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • recognise deviations from normal performance patterns and deal with them appropriately • undertake operational service and maintenance on plant and equipment according to instructions.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports)

© Commonwealth of Australia, 2025 Skills Insight

	• portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams

© Commonwealth of Australia, 2025 Skills Insight

	• OEE • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Uptime	Uptime refers to: • the overall availability of the plant – it is the inverse of downtime or the unavailability of the plant. Ideal uptime is 100%
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS403001A Implement competitive systems and practices

Modification History

New unit, superseding MSACMS400A Implement a competitive manufacturing system - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to implement and review competitive systems and practices in a person's own work within a team or work area, including the consideration of the impact on the work of others. The unit focuses on the holistic application of competitive systems and practices to achieve improved performance in own work and in activities with others in the team or work area that contribute to improving customer benefit.

Application of the Unit

This unit applies to individuals who are applying competitive systems and practices to their own work in a way that integrates with others in the team or work area who are also implementing competitive systems and practices. Depending on the operations or processes in the team or work area the unit may also include interaction with other teams and work areas.

The unit is suitable for individuals who have formal responsibility for the work of others, such as team leaders. It is also suitable for individuals, such as technicians and tradespeople, who must integrate the application of their technical skills with the implementation of competitive systems and practices in an organisation.

The unit applies to the areas of cost, quality, delivery, safety/environment, and employee capability including continuous reviewing of performance against these five areas in liaison with other relevant people. Improvement initiatives in these five areas are usually developed and implemented with the support of technical support staff. Whereas other units may emphasise the competence to use one or more competitive practices, this unit emphasises the ability to advance on all five key areas over a moderate time period.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to identify opportunities to make improvements and maximise performance. Communication, the ability to work in a team and planning and organising skills are required to implement improvements and address any conflicts that arise. This unit also requires an ability to identify appropriate technology, and to consider and integrate feedback on how personal performance can be improved.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Contribute to the improvement of the operations system in team or work area	1.1	Identify key performance indicators for area of operations
		1.2	Implement and review competitive systems and practices to improve health, safety and environment (HSE) performance of self and others
		1.3	Implement and review competitive systems and practices to maximise quality consistency
		1.4	Implement and review competitive systems and practices and identify any skill and training issues that need to be addressed to improve capability of self and others
		1.5	Implement and review competitive systems and practices to maximise customer benefit/cost ratio
		1.6	Implement and review competitive systems and practices to reduce lead time to delivery within the scope of authority and responsibility
		1.7	Work with relevant stakeholders to resolve conflicts

© Commonwealth of Australia, 2025 Skills Insight

			which arise from implementation of competitive systems and practices
		1.8	Select improvements which will deliver the greatest overall benefit for the resources required/available without reducing current performance on individual factors
2	Implement improvements	2.1	Implement the chosen improvement/s
		2.2	Check the selected improvements improve the system as a whole and do not result in unintended consequences
		2.3	Monitor implementation and make adjustments, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others to clarify scope of implementation of competitive systems and practices, including:
  - value stream mapping
  - 5S
  - Just in Time (JIT)
  - mistake proofing
  - process mapping
  - establishing customer pull
  - kaizen and kaizen blitz
  - setting of key performance indicators/metrics
  - identification and elimination of waste (muda)
- monitoring performance in key areas, including:
  - HSE performance
  - quality consistency
  - capability and performance by team members
  - customer benefit/cost ratio
  - reduce lead time to delivery

© Commonwealth of Australia, 2025 Skills Insight

- contributing suggestions for improvement
- analysing operational procedures in terms of flow and contribution to customer outcomes
- planning tasks to support competitive systems and practices implementation
- identifying and implementing appropriate data gathering and analysis techniques within area of responsibility to identify change over time in indicators relating to:
  - cost
  - quality
  - delivery
  - safety/environment
  - employee capability and support for competitive systems and practices
- solving problems to root causes

Required knowledge

Required knowledge includes:

- customers and the value they derive from products and processes of the organisation or area
- cost components and their relationship to customer benefits/features
- suppliers and their capabilities
- waste (muda)
- factors causing variability in a product and how to control them
- factors that promote standardisation
- relevant competitive systems and practices tools for area and how to apply them
- factors impacting on the product, process and waste, particularly those wholly or partially under own and other immediate area employees control (and how to control them)
- good HSE practice and factors impacting on HSE performance
- own capability and how to improve it
- optimisation techniques appropriate to the organisation and the job
- application of quality standards and processes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of their ability to: • identify key performance indicators appropriate to their own work area

© Commonwealth of Australia, 2025 Skills Insight

	• implement and review competitive systems and practices in own work, including interaction with others in the work area in the areas of:
	  • HSE performance
	  • quality consistency
	  • capability and performance by team members
	  • customer benefit/cost ratio
	  • reduce lead time to delivery
	• select improvements that deliver the greatest overall benefit
	• monitor the implementation of improvements and make appropriate adjustments.

Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning for appropriate portions • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence In all cases it is expected that practical assessment will be combined with targeted questioning to assess

© Commonwealth of Australia, 2025 Skills Insight

	underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping

© Commonwealth of Australia, 2025 Skills Insight

	• problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Competitive systems and practices tools	Competitive systems and practices tools include: • 5S • 6 sigma • continuous improvement • cause effect diagrams
Customer	Competitive systems and practices organisations encompass the entire production system, beginning with the customer, and includes: • the product sales outlet • the final assembler • product design • raw material mining and processing • all tiers of the value stream (sometimes called the supply chain) Customer may include: • internal or external customers, and should also include the final customer as the basis for the identification of waste The unit does not require interfacing directly with the external customer, but there should be sufficient information to identify customer benefits and features
Supplier	Supplier may include: • an internal supplier • an external supplier The unit does not require interfacing directly with external suppliers, but there should be sufficient information to enable identification of supplier abilities
Waste	Waste (also known as muda in the Toyota Production

© Commonwealth of Australia, 2025 Skills Insight

	System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Categories of waste include: • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • other activities which do not yield any benefit to the organisation or any benefit to the organisations customers
Operations	Operations indicate: • the holistic combination of the process, plant and equipment, procedures and practices, including the skills and work organisation of the workforce, which make up the productive organisation
Implement improvements	Implementation of improvements may be undertaken: • within own job role • as part of processes and operations in the work area or team

MSS403005A Facilitate use of a Balanced Scorecard for performance improvement

Modification History

New unit, superseding MSACMS405A Lead a manufacturing team using a balanced score card approach - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to encourage and facilitate others in using a Balanced Scorecard approach to assist in performance improvement.

Application of the Unit

This unit applies in organisations using a Balanced Scorecard approach to performance improvement. In these organisations the unit applies to individuals in a team or workgroup who facilitate the use of the Balanced Scorecard through leading, assisting and/or motivating others in using the Balance Scorecard approach.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, and planning and organising in order to provide leadership in the interpretation, review and strategic response to Balanced Scorecard results. This unit has a strong emphasis on identifying and reviewing required performance measures and requires an ability to use new information to improve performance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 Skills Insight

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Interpret Balanced Scorecard results	1.1	Identify patterns of performance shown on strategy map
		1.2	Identify actions indicated by Balanced Scorecard results
		1.3	Discuss results with fellow employees and other relevant stakeholders
		1.4	Facilitate the selection of required actions with employees and other stakeholders
		1.5	Facilitate he development of implementation plans for team or individuals
		1.6	Facilitate the implementation of required actions from developed plans
		1.7	Follow up on implementation to ensure it occurs as planned
2	Review key performance indicators (KPIs) in the Balanced Scorecard for the organisation and work area	2.1	Relate area and other KPIs to strategy map/strategic objective
		2.2	Review the actions required by self and others to meet each KPI
		2.3	Compare current actions to the optimal actions to achieve strategy
		2.4	Discuss with employees and other stakeholders any modifications to KPIs which will better meet strategy
		2.5	Recommend amendments to KPIs to relevant personnel
3	Review reporting systems for	3.1	Review reporting systems to ensure information needed by self, other employees in area and organisation is

© Commonwealth of Australia, 2025 Skills Insight

	Balanced Scorecard information		available
		3.2	Review the mix of operational and strategic information to ensure it is appropriate for work area
		3.3	Review information provided for relevance and currency, and that it is meaningful and not excessive
		3.4	Recommend improvements to reports and reporting system, as appropriate
4	Lead improvement to work area total performance	4.1	Compare actual performance of teams, work areas or individuals with desired total performance using KPIs and other Balanced Scorecard information
		4.2	Discuss with team ways of improving total performance
		4.3	Lead processes for improvement in total performance

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying KPIs and their application to own work and the work of other employees
- analysing Balanced Scorecard results and determining implications for a work area
- solving problems associated with use or interpretation of Balanced Scorecard
- planning strategies for use of Balanced Scorecard, including:
  - required communication with others
  - negotiations if any required with internal and external suppliers, customers and delegates
  - analysis of any skill gaps in self and others
  - required training
  - data collection
  - work organisation and procedure changes
  - risk identification and contingency measures
- communicating effectively in informal and formal meetings, and with personnel at all levels
- providing effective feedback

© Commonwealth of Australia, 2025 Skills Insight

Required knowledge

Required knowledge includes:

- components of the Balanced Scorecard, including perspectives, feedback loops, targets and metrics, and reporting systems
- responsibilities of self and others in a Balanced Scorecard strategy
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation contacts and procedures relevant to work area
- employee assistance mechanisms in the organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • interpret Balanced Scorecard results • review KPIs in the Balanced Scorecard • review related reporting systems • lead improvement to team performance.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case study and scenarios to assess responses to contingencies
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a

© Commonwealth of Australia, 2025 Skills Insight

	combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems

© Commonwealth of Australia, 2025 Skills Insight

	• statistical process control systems ,including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Team	Team includes: • all individuals in the target work area who are involved in the implementation and use of the Balanced Scorecard The team may or may not be a formally designated team working to a team leader
Balanced Scorecard	The Balanced Scorecard refers to: • an approach to competitive systems and practices that sets out an organisations vision and strategy by establishing and measuring enterprise activity in a number of different perspectives in addition to the normal financial perspective Perspective areas include: • customer • environmental • internal business process • learning and growth

© Commonwealth of Australia, 2025 Skills Insight

	For each perspective area the Balanced Scorecard emphasises establishing and measuring performance (metrics)
KPIs	KPIs may include: • financial and non-financial performance measures against targets within the Balanced Scorecard • other performance indicators not contained with the Balanced Scorecard for the team but relevant for informing the teams activities (e.g. performance indicators for other areas or sections, suppliers or customers)
Actions indicated	Actions indicated may include: • corrective action for poor results • confirming action for acceptable results • taking steps to ensure actions for good results are consistently maintained • changes to performance indicators or performance measurement

MSS403010A Facilitate change in an organisation implementing competitive systems and practices

Modification History

New unit superseding MSACMC410A Lead change in a manufacturing environment - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by individuals responsible for facilitating change processes in an organisation implementing competitive operational practices.

Application of the Unit

This unit applies to people who facilitate the change process resulting from implementing one or more competitive systems or practices. This implementation may also be associated with other changes, such as the introduction of new products, processes or equipment. The unit will usually apply to people whose responsibility is at the team, area or section level rather than the whole organisation. The responsibility may be formally designated or be informal, as in mentoring and assisting fellow employees.

This unit assumes that consultation and agreement on the implementation of the competitive systems and practices and other associated changes has already occurred and the nature and extent of the change has been agreed.

This unit does not cover the negotiation of change in a formal industrial relations sense but does cover the skills needed to identify real or potential change implementation issues, including those that may need to be referred to formal consultation and/or dispute settlement procedures.

This unit has a strong emphasis on planning, encouraging and facilitating in a changing environment within the organisation, including using appropriate communication, teamwork, problem solving, initiative and self-management.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Define nature and impact of change for designated area and processes	1.1	Identify the organisation’s aims and objectives for the competitive systems and practices techniques related to the change process
		1.2	Identify opportunities for implementation of change within work area
		1.3	Determine impacts of change for work area, including potential benefits and impacts on own work and work of fellow employees
2	Identify key performance indicators (KPIs)	2.1	Liaise, where required, with managers, engineers and other staff responsible for designing and/or implementing change
		2.2	Identify KPIs for own work responsibility and that of the work area
		2.3	Communicate KPIs to fellow employees
		2.4	Check that data collection and processing are appropriate for KPIs
		2.5	Raise and resolve issues related to KPIs with relevant personnel

© Commonwealth of Australia, 2025 Skills Insight

3	Liaise with key stakeholders	3.1	Identify key stakeholders impacted by the change
		3.2	Communicate with key stakeholders within scope of authority
		3.3	Identify and address issues and concerns of each stakeholder if within scope of authority
		3.4	Develop and/or locate information required to address key concerns
		3.5	Refer issues and concerns outside of scope of authority to appropriate personnel
4	Develop a strategy to help implement change	4.1	Identify or develop a work plan for implementing change
		4.2	Make information required to support change available to team members
		4.3	Communicate/circulate draft work plan to other employees in work area, supervisors, technical experts and other appropriate personnel for comment
		4.4	Assess suggested changes and incorporate into work plan, where appropriate
5	Implement change	5.1	Obtain authorisation to commence change implementation in accordance with organisation procedures
		5.2	Implement change in accordance with work plan and organisational occupational health and safety (OHS) and consultation procedures
6	Monitor implementation of change	6.1	Maintain open communication channels with all stakeholders during implementation
		6.2	Monitor KPIs during implementation
		6.3	Encourage and facilitate improvement suggestions of team members
		6.4	Identify areas requiring improvement in change

© Commonwealth of Australia, 2025 Skills Insight

implementation

6.5 Make improvements to implementation according to organisation procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying the competitive operational practices being implemented in the organisation, including:
  - Just in Time (JIT) and kanban systems
  - preventative maintenance
  - 5S housekeeping
  - continuous improvement processes (e.g. kaizen)
  - waste (muda) elimination
  - formal problem solving procedures (e.g. root cause analysis (RCA))
- identifying other products, processes or equipment changes being implemented within area of responsibility
- identifying the work and culture changes required for effective implementation of the competitive systems and practices being implemented and other products, processes or equipment changes
- identifying organisation KPIs and contextualise for area of responsibility to determine successful change implementation
- planning strategies for change implementation, including:
  - required communication with others
  - negotiations if any required with internal and external suppliers, customers and delegates
  - analysis of any skill gaps in self and others
  - required training
  - data collection
  - work organisation and procedure changes
  - risk identification and contingency measures
- monitoring performance against KPIs and taking appropriate corrective action in the event of a non-conformance
- identifying and communicating with sources of assistance if difficulty is experienced with changes

© Commonwealth of Australia, 2025 Skills Insight

Required knowledge

Required knowledge includes:

- features of common competitive operational practices, including:
  - JIT and kanban systems
  - preventative maintenance
  - 5S housekeeping
  - continuous improvement processes (e.g. kaizen)
  - waste (muda) elimination
  - formal problem solving procedures (e.g. RCA)
- health, safety and environment (HSE) principles and requirements for area of responsibility
- change implementation contacts and procedures relevant to work area
- employee assistance mechanisms in the organisation
- processes to develop work plans, including consideration of timetable, KPIs, training needs, OHS implications, contingency plans and responsibilities (the work plan must be capable of being coherently communicated to others)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the competitive systems and practices used in their own work • identify changes to their own work flowing from the implementation of the relevant competitive systems and practices • implement changes • know when and how to seek assistance with work changes • make suggestions for improvements.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned,

© Commonwealth of Australia, 2025 Skills Insight

	currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using some combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of

© Commonwealth of Australia, 2025 Skills Insight

the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Team	Team may include: • work teams from all sections of an organisation, including production or other operational areas, maintenance, technical, administration/finance, and sales/marketing
Change	The philosophy of continual improvement is that every

© Commonwealth of Australia, 2025 Skills Insight

	process can and should be continually evaluated and improved in terms of time required, resources used, resultant quality, and other aspects relevant to the process. Superimposed on this is the concept of breakthrough change when a large change/improvement is made which can shift the direction or operation of the organisation. Once such breakthrough change is the introduction of competitive operational practices.
Work plan for change	The work plan for change covers the designated work area and may include, depending on the organisation and work area processes: • timetable • KPIs • training needs • OHS implications • contingency plans • responsibilities with team members and senior managers, engineers and other staff responsible for designing and/or implementing change
Issues and concerns	Issues and concerns may be communicated formally and informally and may include: • individual and group concerns • those expressed by and through industrial processes
Gathering and monitoring performance data	Performance data may be gathered and monitored: • manually by individual employees through charts, tally sheets or keypad/board entry • automatically through software, such as SCADA software, ERP systems, MRP and proprietary systems

MSS403013A Lead team culture improvement

Modification History

New unit, superseding MSACMC413A Lead team culture improvement - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by a team leader or other person responsible for developing a culture within a team appropriate for supporting competitive systems and practices.

Application of the Unit

This unit applies where an organisation has embarked on competitive systems and practices and a team leader or other responsible person is required to change or improve the team culture to be consistent with that required to maximise the benefits from competitive systems and practices.

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative and enterprise, planning and organising, and self-management in order to provide leadership in a changing team environment. This unit has a strong emphasis on planning and change management, but also requires an ability to learn from experience and feed new information back into strategies to improve performance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

© Commonwealth of Australia, 2025 Skills Insight

unit of competency.	text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Facilitate the team's understanding of the competitive systems and practices strategy	1.1	Communicate with all team members the objectives and benefits of the competitive systems and practices strategy
		1.2	Review with team members the techniques and methods that will be used in achieving the competitive systems and practices strategy
		1.3	Using a systems approach, help team members understand how the team fits into the organisation
		1.4	Establish appropriate communication and teamwork within the team and with other teams
		1.5	Develop a work structure with the team that allows for everyone to participate in the application of the competitive systems and practices strategy
2	Facilitate application of knowledge about the importance of controlling variation in competitive systems and practices	2.1	Develop the application of a statistical approach by all team members to all relevant facets of the system with a view to reducing variation
		2.2	Encourage the approach of building quality and ensuring team members assist each other in meeting requirements
3	Facilitate the development of skills and knowledge within the team	3.1	Encourage appropriate training for all team members
		3.2	Involve team members in identification of skill needs and skill gaps, and in development of a strategy for training, skills acquisition and self-improvement so as to ensure awareness, learning and commitment

© Commonwealth of Australia, 2025 Skills Insight

4	Facilitate the development of commitment within the team to the competitive systems and practices strategy	4.1	Ensure that the team has sufficient resources and adequate equipment available to meet the requirements of the competitive systems and practices strategy
		4.2	Encourage the adoption of continuous improvement
		4.3	Encourage employee acceptance of responsibility for the quality of their own work
		4.4	Provide continuous feedback and communication of progress at all levels in implementing the strategy
		4.5	Involve team members in relating identified problems and opportunities for improvement to the competitive systems and practices strategy, and involve them in developing any required changes, to ensure awareness, learning and commitment
		4.6	Establish and monitor indicators of team culture

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying and interpreting team quality standards and customer requirements
- identifying the competitive operational practices being implemented by the team
- communicating with others in the team, other team leaders, other employees and external representatives relevant to team competitive systems and practices
- ensuring team awareness of performance against requirements (e.g. through visual management techniques)
- facilitating team competitive systems and practices review activities
- solving problems to root cause
- identifying and accessing sources of assistance if difficulty is experienced with team implementation of competitive systems and practices
- interpreting relevant procedures and instructions
- identifying, analysing and evaluating information from a variety of sources

© Commonwealth of Australia, 2025 Skills Insight

Required knowledge

Required knowledge includes:

- competitive systems and practices strategies at a broad level, including theoretical concepts of one or more of:
  - six sigma
  - lean manufacturing/lean operations
  - agile manufacturing/agile operations
  - Just in Time (JIT)
  - supply chain management
  - value stream management
  - total quality
  - proactive maintenance
  - elimination of waste
  - Balanced Scorecard
  - 5S housekeeping
  - visual factory/visual operations
- benefits of:
  - standardised work
  - customer pull
  - value stream mapping
- principles of change management

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the competitive systems and practices used by the team • identify changes to their own work flowing from the implementation of the relevant competitive systems and practices • implement and monitor changes designed to improve team culture • know when and how to seek assistance

© Commonwealth of Australia, 2025 Skills Insight

	• make suggestions for improvements.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA)software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Variation	Variation refers to:

© Commonwealth of Australia, 2025 Skills Insight

	• variation from quality standards and customer requirements as expressed in production or operations schedules and technical specifications
Systems approach	A systems approach enables a person to see how work gets done, the effect of changes and shows the internal/external relationships through which products and services are produced. It may include considerations of the role and requirements of: • customers • suppliers • employees • other value stream members • members of the public and community groups • other external individual, group or organisation • technical processes and equipment • statutory and regulatory requirements, including occupational health and safety (OHS) and environment legislation and regulations • quality standards
Team culture	Team culture change is the extent to which the culture of the team is aligned to the goals of customers and the organisation. Team culture may be monitored by: • surveys • evaluation of toolbox or other regular meetings • direct discussion with team members • monitoring of other indicators (e.g. error rates and absenteeism) • analysis of root cause related to status of team culture
Work structures	The work team structure may vary (e.g. be self-directed, cross-functional, and so on, and should be appropriate to the job)

MSS403021A Facilitate a Just in Time system

Modification History

New unit, superseding MSACMT421A Facilitate a Just in Time (JIT) system - Equivalent

Unit Descriptor

This unit of competency covers skills and knowledge required to facilitate the implementation/operation of a Just in Time (JIT)/kanban system in a team or work area.

Application of the Unit

This unit applies to a person who needs to monitor the operation of a JIT system and facilitate its working in a team or work area. This will involve liaison with stakeholders as well as examining the data generated. They will need to be alert to potential problems and areas for improvement.

This unit requires the application of skills associated with gathering, analysing and communicating information to facilitate implementation of the JIT system. It requires planning and organising skills and has a strong emphasis on communication and teamwork skills to ensure the JIT system is being effectively implemented. This unit also requires the ability to problem solve and take the initiative to consider performance issues and learn from experience to improve future performance.

© Commonwealth of Australia, 2025 Skills Insight

unit of competency.	and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Monitor the operation of the JIT system	1.1	Track value of key measures
		1.2	Recognise indicators of poor performance
		1.3	Take appropriate quick fix action
2	Liaise with relevant stakeholders	2.1	Regularly communicate with team or work group members regarding the operation of the JIT system
		2.2	Review JIT key performance indicators (KPIs) with team or work group members
		2.3	Communicate with relevant personnel up and down the value stream regarding the operation of the JIT system
		2.4	Identify issues with stakeholders and take appropriate quick fix action
3	Improve the JIT system	3.1	Identify areas requiring improvement in the JIT system
		3.2	Identify root cause of JIT-related problems
		3.3	Review value of key measures
		3.4	Recognise skill gaps in team members and other stakeholders
		3.5	Determine any other issues in team or work group, other stakeholders and JIT system leading to poor performance indicators
		3.6	Develop appropriate improvement solutions
		3.7	Liaise with relevant people regarding improvement solutions

© Commonwealth of Australia, 2025 Skills Insight

3.8 Implement and/or assist with the implementation of the solutions

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying KPIs for JIT system in team or area of responsibility
- analysing the JIT/kanban implementation in the team or area and the relevant sections of the internal and external value stream, including identifying people-related needs and issues
- identifying and implementing quick fix to JIT problems
- using formal problem solving procedures (e.g. root cause analysis (RCA))
- developing formal and informal communication procedures with others in work area, team leaders, other employees and value stream members relevant to JIT implementation
- establishing sources of assistance in the organisation for people experiencing difficulty with competitive systems and practices changes
- interpreting procedures and instructions relevant to own expertise for others
- establishing KPIs for own work

Required knowledge

Required knowledge includes:

- JIT principles relevant to operations and processes in own area or team and in the organisation generally
- procedures for making/recommending improvements
- typical reasons for delays/storages/inventories in the team or area of responsibility and methods of reducing/eliminating them
- skill gap analysis and methods of filling skill gaps
- principles of the operations process relevant to the section/team
- production data generated by the process and its application to JIT

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Overview of assessment	Evidence should be available of the person's facilitation of the operation of the JIT system and their making of recommendations for/making improvements.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the JIT system and practices used in their team or area of responsibility • identify and monitor JIT key measures • solve JIT-related problems to root cause • implement and monitor JIT-related changes to operations and practices.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge.

© Commonwealth of Australia, 2025 Skills Insight

	Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • JIT, kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving

© Commonwealth of Australia, 2025 Skills Insight

	• run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
JIT	JIT refers to: • a production scheduling concept that calls for any item needed at a production operation (whether raw material, finished item, or anything in between) to be produced and available precisely when needed, neither a moment earlier nor a moment later
Kanban	Kanban is a card or sheet used to authorise production or movement of an item; when fully implemented, kanban operates according to the following rules: • all production and movement of parts and material take place only as required by a downstream operation (i.e. all operations and procurement are ultimately driven by the requirements of final assembly or the equivalent) • the specific tool which authorises production or movement is called a kanban. The word literally means card or sign, but it can legitimately refer to a container or other authorising device. Kanban have various formats and content as appropriate for their usage (e.g. a kanban for a vendor is different than a kanban for an internal machining operation) Kanban is typically applied to batch type operation and the production is measured in units produced. In continuous processing organisations, production is measured in terms of production rate (e.g. kg/h, tonne/day) and rate is increased/decreased according to the flow authorisation which may be a kanban (e.g. ticket, order from a supplier) or may be a SCADA signal from a remote facility (e.g. customer tank) saying that resupply is required or similar
SCADA	SCADA refers to: • a number of systems which automatically collect critical process data, perform required mathematical

© Commonwealth of Australia, 2025 Skills Insight

	manipulations on it and then make control decisions and/or give required information to personnel for action
Key measures	Key measures may include: • inventory levels • lead time • In Full, On Time and In Specification (IFOTIS) delivery • productivity/production rate • other measures of pull through the value stream • quality
Quick fix	Quick fix refers to: • action taken to immediately and cheaply control a problem, prevent it getting worse and/or ameliorate its impact, but which does not necessarily solve it long term
Pull system	Pull refers to: • a system of making to demand rather than for stock or to a forecast
Value stream	The value stream begins with the customer and includes all actions (both value-adding and non-value added) by both internal sections/departments and external organisations to meet a customer requirement. Depending on the operations and the customer requirement, stages where value stream actions may occur include: • sales outlet/representative • information gathering, data analysis and research • product design • raw material sourcing • intermediate processing • final assembler/collation/preparation • support services (e.g. accounting, finance and legal) • storage and delivery to customer • after market support

MSS403030A Improve cost factors in work practices

Modification History

New unit, superseding MSACMT430A Improve cost factors in work practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to evaluate the product or process outcomes of a team in terms of their cost components and to be able to determine, in general terms, the cost impacts of alternative actions.

Application of the Unit

This unit applies to a person who is required to assess the relative costs of alternatives and use this as one of the key factors in decision making. Typical decisions include the efficient organisation of own work and that of others in a work area or within a team and the improvement of throughput and cycle times.

Decisions are made within the scope of the authority of the individual and other employees in the area or team and according to procedures.

This unit primarily requires the application of skills associated with communication and information gathering, teamwork and problem solving to analyse the cost components of work processes. Initiative and enterprise, and planning and organising are also required to identify opportunities for improved cost-efficiency. This unit also requires a degree of self-management and learning to effectively operate and maintain skills and performance.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse cost components of work area or team function	1.1	Identify cost components in the product or process
		1.2	Identify costs factors under control of area or employees in the team
		1.3	Identify causes of variability in costs
		1.4	Analyse impact of costs on production or process activities undertaken
2	Improve cost-efficiency of processes and procedures	2.1	Identify methods of improving productivity and/or reducing costs within area or team’s responsibility
		2.2	Determine cost/benefit ratio of alternative methods of improving productivity and/or reducing costs
		2.3	Consult with all relevant stakeholders regarding possible changes
		2.4	Recommend changes which will increase productivity and reduce cost and variability
		2.5	Implement recommended changes in consultation with relevant stakeholders

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

Required skills

Required skills include:

- identifying fixed and variable costs in products or processes
- analysing costs and determining those that can be controlled by the individuals in an area or team
- analysing costs over time and identifying variability in cost components
- determining cost/benefit ratios
- communicating and negotiating with others on changes using a variety of mediums

Required knowledge

Required knowledge includes:

- cost components of products made
- costs concepts, such as expense, income and cost/benefit
- major cost contributors to product (e.g. energy, materials, labour and distribution, and so on) depending on the product and process)
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the scope of their own work and the team or area work and relate it to the overall flow of work in the organisation • express cost factors in specific terms (e.g. cost per item, process and task) • identify and express cost factors in basic financial terms • analyse variability in costs and recommend improvements • use cost/benefit to select preferred improvement strategies.
Context of and specific resources	Assessment of performance must be undertaken in a

for assessment	workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace project(• suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices, • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Cost components	Cost components may include:

© Commonwealth of Australia, 2025 Skills Insight

	• fixed and variable costs, such as power/energy, materials, plant and equipment, salary and wages, and office expenses (e.g. telephone) • government taxes and charges
Variability in costs	Variability in costs should be assessed over a suitable time. The time should be sufficient to identify: • fluctuations in variable costs related to different volumes of sales, production or operations • abnormal cost fluctuations due to poor design of product or process, poor scheduling, faults, breakdowns and other waste
Process	Process includes all functions that go to meet customer requirements as well as other required functions (e.g. regulatory related functions). Examples include: • design • production • maintenance • logistics • office processes
Procedures	Procedures may include: • work instructions • standard operating procedures • drawings and specifications • manuals • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the organisation • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer based or in some other format
Benefits	Benefits should include: • positive benefits as well as negative benefits, such as quality, safety, reliability and similar issues which may be impacted by a cost saving

MSS403032A Analyse manual handling processes

Modification History

New unit, superseding MSACMT432A Analyse manual handling processes - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to analyse manual handling in terms of its efficiency and safety.

Application of the Unit

This unit applies to an individual who is required to examine the manual handling component of a job and improve it in terms of safety, effort required and efficiency. This may be conducted for a job performed by others or it may be for the person's own job.

This unit primarily requires the application of skills associated with problem solving, initiative and enterprise to identify safe and efficient manual handling, and planning and organising to ensure processes are implemented. This unit also requires communication with, and involvement of, others to ensure they understand the approach and to facilitate training.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1	Assess manual handling risks	1.1	Identify manual handling hazards in work area
		1.2	Assess risks arising from manual handling hazards
2	Analyse physical effort requirements of job	2.1	Determine basic manual handling requirements of job
		2.2	Analyse requirements in terms of components, such as lift, move, place and hold
		2.3	Analyse items to be handled in terms such as weight, size, shape or other hazards
3	Determine time/effort components of physical effort	3.1	Break required movement pattern down into movement components
		3.2	Determine time and effort requirements for movements
		3.3	Develop alternative movement patterns
		3.4	Determine time and effort requirements for alternative movements
		3.5	Determine handling aids required to assist movement
		3.6	Determine preferred movement pattern
4	Analyse the ergonomics of physical effort	4.1	Analyse the ergonomics of the preferred movement pattern
		4.2	Develop substitute movements for any movement which is not ergonomically sound
		4.3	Determine handling aids required to improve ergonomics of required movements
5	Optimise	5.1	Select movement patterns which are ergonomically

© Commonwealth of Australia, 2025 Skills Insight

application of physical effort		sound and time and effort efficient
	5.2	Ensure all relevant people are trained to use these methods
	5.3	Ensure procedures and practices reflect the optimum methods
	5.4	Communicate with team members and involve them in development of alternatives to ensure awareness and facilitate learning

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with others about work processes and jobs
- identifying ergonomically sound and unsound movements both at a general level and related to individual capability
- analysing manual handling processes
- working cooperatively with others
- demonstrating or arranging to have demonstrated ergonomically correct movements
- applying basic mathematics
- solving problems

Required knowledge

Required knowledge includes:

- relevant occupational health and safety (OHS) Acts and regulations as applied to manual handling
- principles of job and work method design as applied to efficient and safe movement
- principles of work analysis
- principles of ergonomics/safe movement
- aids than can assist with or substitute for manual handling

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of their ability to: • analyse manual handling requirements and risks in jobs • distinguish between ergonomically sound and unsound movement • analyse manual handling movements and risks for an individual • relate manual handling requirements to job efficiency.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using some combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence.

© Commonwealth of Australia, 2025 Skills Insight

	In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE)

© Commonwealth of Australia, 2025 Skills Insight

	• takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and Responsible Care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format
Manual handling hazards	Manual handling hazards may include: • loads that pose a risk of injury • ergonomically unsound movements • hazard requirements as defined by relevant OHS Acts and regulations, industry standards and best practice
Ergonomically unsound movements	Ergonomically unsound movements may include: • awkward and repetitive movements • carrying, pushing, pulling or lifting of heavy loads • carrying or movement against hard, sharp, slippery or other difficult to grasp loads Ergonomically unsound movements should be assessed against the capabilities of individual workers as what is a sound movement for one worker may be unsound for

© Commonwealth of Australia, 2025 Skills Insight

	others depending on physique and individual condition
Ergonomically sound movements	Ergonomically sound movements are movements which decrease the risk of injury. Sound movements will vary according to the load and individual. Examples include: • keeping loads close to the body and near the person's centre of gravity • using diagonal foot positions for lifting • moving loads at waist height rather than directly from the floor

MSS403051A Mistake proof an operational process

Modification History

New unit, superseding MSACMT451A Mistake proof a production process - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to make changes to own and others work in a work area which prevents errors and/or backsliding to a pre-improvement level of practice.

Application of the Unit

This unit applies to a person who needs to analyse a process that a team is responsible for and determine methods of mistake proofing it (e.g. ensuring it only produces product within an acceptable range or error-free transport and storage of goods). The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to mistake proof the production process in their area. After improvement activities have been undertaken these improvements need to be sustained.

This unit requires the application of skills associated information gathering and analysis. Initiative, enterprise and problem solving are also required to identify mistakes and determine strategies for eliminating them. This unit also requires communication and teamwork skills to ensure mistake proofing strategies are implemented and self-management and learning skills to continually reflect on and integrate feedback about the effectiveness of strategies.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse process	1.1	Identify sources of variability/non-conformance in the process
		1.2	Identify critical control points in process
		1.3	Analyse causes of variability/non-conformance
2	Develop preventative techniques/systems	2.1	Liaise with team members and other people to develop mistake proof options for performing operation
		2.2	Test and validate mistake proofing options
3	Implement permanent fix	3.1	Liaise with relevant people to have systems/procedures changed to implement solution
		3.2	Liaise with relevant people to implement the solution
		3.3	Liaise with relevant people to ensure self and others in the team or work area have an appropriate skills set
		3.4	Follow through to ensure implementation occurs
4	Monitor implementation	4.1	Critically observe the implementation
		4.2	Compare the results of the implementation against the expected outcomes
		4.3	Modify solution to improve outcomes

© Commonwealth of Australia, 2025 Skills Insight

		4.4	Ensure procedures reflect change
		4.5	Ensure training/assessment reflects change
		4.6	Audit change at agreed period/cycle
		4.7	Take action on any observed deviation
5	Seek improvements	5.1	Observe changes
		5.2	Analyse process again, if required, to ensure improvements are sustained

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- communicating with team or work group members, technical support personnel and other relevant staff
- explaining mistake proofing and related concepts
- facilitating input of others and encouraging acceptance of changes
- analysing and visualising operations in terms of flow and contribution to customer outcomes
- solving problems to determine root cause of errors and possible solutions
- analysing and interpreting information about errors and mistake proofing options in terms of cost, feasibility, regulations and value to the customer
- suggesting design changes to operations and products that eliminate the potential for errors
- suggesting mechanisms or procedures that warn of errors where operations cannot be designed to eliminate errors,

Required knowledge

Required knowledge includes:

- mistake proofing concepts, including, in priority order:
  - eliminate the possibility of the error via changes to the process
  - prevent the error from occurring via physical or virtual barriers
  - reduce likelihood of the error by encouraging correct action

© Commonwealth of Australia, 2025 Skills Insight

  - mitigate the impact of the error if it does occur
- understanding of processes undertaken by team
- factors in the processes which may cause variability
- methods of controlling the variability in the process
- mistake proofing methods relevant to the process/product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • analyse variability and non-conformances • identify, analyse and evaluate information from a variety of sources to identify errors and options for mistake proofing • facilitate implementation of mistake proofing activities that reduce waste • facilitate sustaining the mistake proofing activities.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace

© Commonwealth of Australia, 2025 Skills Insight

	• workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related

© Commonwealth of Australia, 2025 Skills Insight

	operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Mistake proofing	Mistake proofing is based on the concept of zero defects. The first priority is to eliminate the possibility of an error occurring. However, where this is not feasible mistake proofing can be used to reduce the occurrence of errors and/or to minimise their impact. Mistake proofing should target an error in the following priority order: • eliminate the possibility of the error via changes to the process • prevent the error from occurring via physical or virtual barriers, • reduce likelihood of the error by encouraging correct action (e.g. through warning systems) • mitigate the impact of the error if it does occur Mistake proofing is also called error proofing or baka-yoke or poka-yoke
Options for mistake proofing	Factors to consider when prioritising options for mistake proofing will vary according to the process and may include: • success rate in eliminating errors

© Commonwealth of Australia, 2025 Skills Insight

	• feasibility • skills required by employees • cost • capacity to reduce waste
Procedures	Procedures may include: • all work instructions • standard operating procedures • formulas/recipes • batch sheet • temporary instructions and similar instructions provided for the operation of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS404050A Undertake process capability improvements

Modification History

New unit, superseding MSACMT450A Undertake process capability improvements* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to make process capability improvements, including analysing data from the process, developing improvements to eliminate variation due to assignable causes, and then implementing actions.

Application of the Unit

This unit applies to a person who reviews a range of process capability data and information, makes/arranges for changes to be made to procedures, equipment or process and then recalculates the process capability and monitors resulting improvement actions. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to suggest and justify process capability improvements.

Process capability may have been determined using either a six sigma or three sigma processes. This unit applies to the application of statistical methods and the determination of capability based on those methods. Other related units may be *MSS404052A Apply statistics to operational processes* and *MSS404053A Use six sigma techniques*

This unit primarily requires the application of skills associated with communication, information gathering and analysis. Initiative, enterprise and problem solving are also required to identify opportunities to improve process capacity. This unit also requires aspects of self-management and learning to validate own analysis.

For a qualitative approach to improvement (one not using statistics) see *MSS403051A Mistake proof an operational process.*

Pre-Requisites

MSS404052A Apply statistics to operational processes

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Obtain required data	1.1	Identify process for study
		1.2	Obtain/organise process to obtain required data/information
2	Analyse information	2.1	Analyse data and determine assignable causes
		2.2	Develop possible improvements to eliminate assignable causes
		2.3	Incorporate own experience and learning into proposed process improvement proposals
		2.4	Develop process improvement proposals
3	Improve process capability	3.1	Obtain required authorities to implement improvements
		3.2	Liaise with relevant people to implement improvements
		3.3	Obtain/organise required data for improved process

© Commonwealth of Australia, 2025 Skills Insight

3.4 Recalculate process capability

3.5 Implement revised data collection/processing and new capability information

3.6 Monitor improvement actions and make adjustments, as necessary

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- performing relevant mathematical operations
- identifying and using relevant statistical methods
- communicating and explaining data- related changes and procedures to individuals and groups
- negotiating with other employees and managers on proposed improvement actions
- analysing procedures and data to establish variation
- solving problems to root cause where assignable cause of variation is not obvious
- working in a team
- using computer software relevant to required analyses and process

Required knowledge

Required knowledge includes:

- data collection methods
- data processing techniques required
- variability and normal distribution
- three sigma or six sigma processes, as relevant
- random and non-random results (recognition of assignable causes)
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • analyse process information • calculate process capability/trial limits • improve process capability (or organise for it to be improved) • analyse revised process information and recalculate process capability.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence In all cases it is expected that practical assessment will

© Commonwealth of Australia, 2025 Skills Insight

	be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time

© Commonwealth of Australia, 2025 Skills Insight

	• process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Process capability	Process capability is: • the measurable ability of a process to reliably produce within calculated limits (the limits depend on the variation of the process)
Variation	All processes have variation. The approach in this unit is to separate random variation (no assignable cause) from non-random variation (which has an assignable cause). By finding and eliminating assignable causes, total variation is reduced and process capability will be improved
Six sigma	Six sigma refers to: • a statistical tool for recording defects and determining capability. Six sigma limits equate to 3.4 defects per million opportunities for each product or service transaction. Six sigma is also used as a general term covering a competitive systems and practices approach. Six sigma training typically covers several units of competency in this Training Package
Three sigma	Three sigma refers to: • a traditional statistical process control. Three sigma limits equate to 3 defects per thousand opportunities for each product or service transaction
Required data	The calculation of three sigma or six sigma limits requires process data. The data required depends on the nature of the limits being calculated
Assignable cause	Any non-random variation is said to have an ‘assignable cause’. The methods of data analysis common to statistical capability analysis as well as other methods of

© Commonwealth of Australia, 2025 Skills Insight

	root cause analysis should be used to determine the cause of this non-random variation
Improved process capability	Improvements to process capability result from eliminating the causes of non-random variation. The improvements made may be: • as a result of continuous improvement with the process capability being recalculated periodically • as a result of an improvement project with the process capability recalculated as part of that project
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS404052A Apply statistics to operational processes

Modification History

New unit, superseding MSACMT452A Apply statistics to processes in manufacturing - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply statistical theory and principles to the analysis and control of processes and operations.

Application of the Unit

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

The unit includes applying knowledge of frequency distribution and variation to the data/chart to distinguish between random and non-random variation and assumes understanding of the process and/or equipment to help interpret those results.

This unit primarily requires the application of skills associated with gathering and analysing data and communicating statistical information to others. This unit also has a strong emphasis on problem solving, initiative and enterprise, planning and organising, and self-management to solve problems and manage processes.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Collect process data	1.1	Interpret sampling scheme
		1.2	Obtain measurements in accordance with standard procedures
		1.3	Handle data, as required
2	Interpret data	2.1	Plot data on appropriate control chart
		2.2	Distinguish between random and non-random patterns of results
		2.3	Identify results outside the control limits
		2.4	Recognise situations requiring action
		2.5	Take appropriate action in accordance with standard procedures
		2.6	Determine cost of non-conformance
3	Calculate control limits	3.1	Consult relevant stakeholders to determine appropriate limits
		3.2	Use relevant methods to calculate/revise control limits
		3.3	Plot limits on control chart
		3.4	Explain impact of limit to relevant stakeholders

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- applying a range of sampling procedures
- analysing samples and data for variation, relevance, reliability and representativeness
- problem solving the causes of variation in a process
- communicating with other employees to obtain samples/data and to explain results and limits
- plotting or documenting results
- undertaking calculations, including:
  - basic arithmetic functions
  - mean, range, mean of means, standard deviation (using appropriate calculation aids)
- using statistics to support process and operations control

Required knowledge

Required knowledge includes:

- sampling techniques
- purpose of sampling and measurement
- random, systematic and stratified sampling
- purpose of replication of data for statistical control
- samples, populations, finite and infinite populations and the differences
- methods of calculating means, standard deviations and the like and their purpose in statistical control
- the meaning of broad/narrow frequency distributions/range/standard deviations and skewed distributions in process terms
- concept of limits, including:
  - 1 sigma warning limits
  - 2 sigma warning limits
  - 3 sigma control limits
  - 6 sigma limits
- types of control charts and their applications to different types of process/product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process (e.g. measurement) causes of variation
- recognition of stable and unstable processes
- causes of stability/instability in the process

© Commonwealth of Australia, 2025 Skills Insight

- calculation of control limits/process capability and the applications of different control limits
- the standard distribution curve and confidence limits

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • follow sampling procedures • apply basic statistical processes • analyse data to identify variations and non-conformances • plot or document results.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning

© Commonwealth of Australia, 2025 Skills Insight

	• reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen)

© Commonwealth of Australia, 2025 Skills Insight

	• breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Sampling scheme	Sampling scheme may include: • sampling for attributes or sampling for variables • batch, continuous or custom made products • number of items/samples • size of sample • timing of sampling • location of sampling points • type of sample • number/type of measurements to be done on each sample • sampling equipment • measurement/testing equipment/methods
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/ recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other

© Commonwealth of Australia, 2025 Skills Insight

	format
Handle data	Handle data may include: • calculating means, ranges, mean of means and standard deviations (using appropriate calculation aids) • entering data into a software package • recording data either in writing or electronically • other required manipulations of the data
Control chart	Control charts may include: • run • tally • mean/range • attributes • other relevant charts
Random	Random variation is the term used in statistical control to refer to those variations for which no cause can be found
Non-random	Non-random (also called identifiable cause, assignable cause or special cause) are those variations for which a cause can be found and so the cause of the variation eliminated. Non-random variation may also be used to predict possible breaches of the control limits
Control limits	Control limits (also referred to as process capability) are those limits within which the process will operate if it is 'under control'
Cost of non-conformance	Cost of non-conformance includes: • reprocessing/rework • expediting • unplanned service • excess inventory • complaint handline • downtime • returns • scrap • labour costs • material costs • infrastructure costs/overhead • utility costs
Appropriate limits	Appropriate limits may include:

© Commonwealth of Australia, 2025 Skills Insight

	• 1 sigma warning limits • 2 sigma warning limits • 3 sigma control limits • 6 sigma limits

MSS404053A Use six sigma techniques

Modification History

New unit, superseding MSACMT453A Use six sigma techniques* - Equivalent

* *New prerequisite MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to apply six sigma techniques to improve quality, cost and delivery in operations and other supporting processes in the workplace

Application of the Unit

This unit applies where a statistical-based strategy, such as six sigma will be used to establish current quality, cost and delivery performance and then to investigate and improve all or part of a process. This will be undertaken with other members of the process team.

This unit requires the application of skills associated with using information, problem solving, initiative, enterprise, planning and organising in order to identify an area requiring improvement and develop a measured process to make improvements. The unit covers the application of the Define, Measure, Analyse, Improve, and Control and standardise (DMAIC) process.

Depending on the scale of six sigma implementation in the organisation the following units may also be relevant:

- *MSS404050A Undertake process capability improvements*
- *MSS403002A Ensure process improvements are sustained*
- MSS403010A Facilitate change in an organisation implementing competitive systems and practices
- *MSAPMSUP390A Use structured problem solving tools.*

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Identify an area requiring improvement	1.1	Identify customer needs from process
		1.2	Identify customer benefits delivered by process
		1.3	Identify areas requiring improvement
2	Apply DMAIC process	2.1	Define improvement project
		2.2	Acquire required measurements/data
		2.3	Analyse data and determine possible process improvements
		2.4	Develop and test improvement solutions
		2.5	Control and standardise the improvement
3	Review and confirm improvement	3.1	Determine and document benefits
		3.2	Ensure procedures and other relevant documentation is updated for improved procedure
		3.3	Review process data after an appropriate period and

© Commonwealth of Australia, 2025 Skills Insight

confirm the improvement

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- interpreting charts and diagrams
- identifying data relevant to improvement project from a variety of sources
- analysing data using statistical methods
- solving problems to root causes
- communicating with other employees to obtain samples/data and to explain processes, results and limits
- determining extent of benefits gained from improvement projects
- identifying relevant documentation for improvement projects and updating, as required

Required knowledge

Required knowledge includes:

- charting methods and formats, such as Pareto charts, fishbone diagrams
- statistical principles and techniques
- acceptance criteria/confidence levels and other relevant limits and criteria for improvement project
- DMAIC methods
- six sigma principles

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify current and target customer needs and

© Commonwealth of Australia, 2025 Skills Insight

	benefits for an area and improvement project • use DMAIC process for an area related improvement project a project • propose test and document improvement solutions • add to or edit organisation documents using standard procedures.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. MSS404082A Assist in implementing a proactive maintenance strategy

Modification History

New unit, superseding MSACMT482A Assist in implementing a proactive maintenance strategy - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by a maintenance person to assist in the implementation of a proactive maintenance strategy in an organisation. This unit includes the interaction between a maintenance worker and operators, as appropriate.

Application of the Unit

This unit applies to a maintenance person in an organisation that has adopted or is implementing total preventative/productive maintenance (TPM), reliability centred maintenance (RCM) or similar strategies. As part of this, the maintenance person is expected to assist in the implementation by determining appropriate maintenance related schedules and also by providing maintenance related assistance to non-maintenance personnel, such as assisting production personnel to fulfil their role in the TPM/RCM strategy.

This unit requires the application of skills associated with problem solving and initiative and enterprise in order to analyse maintenance requirements. Communication, teamwork and planning and organising skills will be required to implement reliability strategies. This requires aspects of self-management to ensure improvement of own performance and learning.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Develop components of reliability strategy for a work/plant area	1.1	Determine manufacturer's recommended inspection, servicing and related schedules for relevant plant
		1.2	Consult with relevant people with regard to appropriate inspections, services and schedules
		1.3	Discuss any conflicts with relevant people and seek resolution of conflicts
		1.4	Develop schedules in liaison with relevant people
		1.5	Identify inspections and servicing which may be done by operations personnel in liaison with relevant stakeholders
2	Assess current practice for maintenance implications	2.1	Identify the overall equipment effectiveness (OEE) or other organisation targets for equipment/plant
		2.2	Evaluate procedures for plant/equipment reliability implications
		2.3	Discuss current practices with relevant people to determine any plant/equipment reliability implications
		2.4	Recommend changes to improve plant/equipment reliability in accordance with procedures
3	Assist in implementing the reliability strategy	3.1	Arrange for schedules to be incorporated in relevant work plans
		3.2	Identify training needs in discussion with relevant

© Commonwealth of Australia, 2025 Skills Insight

	personnel
3.3	Assist personnel to develop required skills for inspections/servicing within scope of authority
3.4	Collect data/information as required by own work plan
3.5	Compare data/information with performance indicators
3.6	Recommend improvements to reliability strategy in accordance with procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- explaining concepts and processes of chosen proactive maintenance strategy used by the organisation and distinguishing from traditional (breakdown) maintenance strategies
- communicating with operators, other maintenance personnel, team leaders and technical experts in a variety of situations and using different media
- adapting personal communication strategy to different levels of operator and team leader literacy and numeracy
- working in formal and ad-hoc teams to implement proactive maintenance
- solving problems to root cause
- planning proactive maintenance tasks to fit in with maintenance and production schedules and the needs of other staff
- assessing the ability of operations personnel with regard to inspections and servicing of equipment
- reading and interpreting charts and diagrams, manufacturer manuals and specifications and operating procedures

Required knowledge

Required knowledge includes:

- requirements of the proactive maintenance strategy being implemented
- operating principles and procedures for equipment/plant subject to proactive maintenance strategy
- purpose and processes for data collection in proactive maintenance strategies
- procedures relevant to own job and organisation implementation of proactive maintenance

© Commonwealth of Australia, 2025 Skills Insight

- methods of making/recommending improvements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • source information from manuals and other technical documentation or software • effectively communicate with users on equipment operational and maintenance history • develop schedules for maintenance activities including seeking technical assistance, where appropriate • differentiate between proactive and traditional maintenance strategies.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation

© Commonwealth of Australia, 2025 Skills Insight

	• case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and

© Commonwealth of Australia, 2025 Skills Insight

	analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • OEE • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise, the work organisation, culture • regulatory environment and the industry sector
TPM	TPM is an application of total quality management to maintenance with the intention of increasing reliability, getting it right first time and increasing OEE
RCM	RCM moves maintenance from reactive, or even planned/programmed, towards a focus on uptime and OEE
Similar strategies	Similar strategies may include: • mean time between failure (MTBF) which is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing • failure mode and effects analysis (FMEA) which is a systematic approach that identifies potential failure modes in a system, product, or equipment based operations caused by either design or operation/process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or detect failure modes. FMEA is a tool used to prevent problems from occurring • industry sectors have highly adapted forms of FMEA

© Commonwealth of Australia, 2025 Skills Insight

	and which may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification. HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability • condition monitoring which often involves quite sophisticated monitoring of equipment, including such things as vibration monitoring, instrumental analysis of lubricating oil, and so on, to determine the current state of the equipment, monitor the change in this condition and predict when it needs servicing/maintenance to maintain reliability.
OEE	OEE is the combination of the main factors causing loss of productive capacity from equipment/plant and is: *OEE = availability x performance x quality rate* where: • availability takes into account losses due to breakdown, set-up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account the losses due to rejects, reworks and start-up waste
Uptime	Uptime refers to the overall availability of the plant (it is the inverse of downtime) or the unavailability of the plant. Ideal uptime is 100%
Inspection	Inspection may include: • reading dials, gauges and meters • observations, including those using sight, hearing, smell and feel • observations of product quality/faults/rejects
Servicing	Servicing may include: • cleaning • lubricating • topping up • adjusting
Procedures	Procedures may include: • work instructions • standard operating procedures

© Commonwealth of Australia, 2025 Skills Insight

	• formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer based or in some other format

MSS404083A Support proactive maintenance

Modification History

New unit, superseding MSACMT483A Support proactive maintenance - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to lead a production team/work group or maintenance team in a proactive maintenance environment.

Application of the Unit

This unit applies in a competitive systems and practices organisation where proactive maintenance strategies, such as total preventative/productive maintenance (TPM) or reliability centred maintenance (RCM) are used. This unit applies to a team leader or other person who as part of their role assists others in implementing and following the proactive maintenance practices. Team refers to formally designated teams or a group of employees in a common work area.

The unit assumes that team members and in particular the team leader or other support person are in possession of technical knowledge appropriate to their position about the organisation's operational processes and equipment and are able to apply this to the maintenance strategy.

The unit covers the leading of a team in proactive maintenance activities, such as keeping records, visual checks, analysis of failures and effects on production and housekeeping. The unit does not cover breakdown maintenance, condition monitoring or non-destructive testing (NDT).

This unit requires the application of skills associated with communication, teamwork, problem solving, initiative, enterprise, planning and organising in order to lead a team in the development and implementation of proactive maintenance strategies. This unit has a strong emphasis on developing and resourcing the team to interpret information and monitor equipment and operation.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Lead team in monitoring process and equipment	1.1	Demonstrate to team how to observe the process/equipment continuously and critically using appropriate senses (e.g. sight and hearing) to identify any potential or actual problems
		1.2	Identify to team data indicators that must be monitored and recorded
		1.3	Ensure team monitors identified data indicators frequently and critically
		1.4	Ensure symptoms of operations outside the desired range of conditions and performance are recognised
		1.5	Analyse cause of equipment non-standard performance within scope of knowledge and skill
		1.6	Ensure team members take timely and appropriate action to solve problems or to refer problems to appropriate manager or specialist
2	Apply proactive maintenance strategy	2.1	Obtain and discuss maintenance strategy with relevant people
		2.2	Identify aspects of maintenance strategy which require specific input from team

© Commonwealth of Australia, 2025 Skills Insight

		2.3	Discuss maintenance strategy with team members
		2.4	Ensure team members have resources and training to be able to make the required contributions
3	Analyse standard procedures and work practices	3.1	Examine team procedures and practices for compatibility with maintenance strategy
		3.2	Identify areas where production procedures/practices should be changed to comply with maintenance strategy
		3.3	Identify areas where maintenance strategy should change to comply with production procedures and practices
		3.4	Identify other activities or areas where changes might increase equipment reliability
		3.5	Take appropriate action to have the required changes made
4	Facilitate team contribution to proactive maintenance	4.1	Monitor team's contribution to proactive maintenance
		4.2	Arrange for competency development of team members, as required
		4.3	Facilitate ongoing examination by the team of process reliability and overall equipment effectiveness (OEE)
		4.4	Arrange for follow through and implementation of team originated improvements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- explaining concepts and processes to team of the proactive maintenance strategy and associated analyses used by the organisation and distinguishing from traditional (breakdown)

© Commonwealth of Australia, 2025 Skills Insight

maintenance strategies
- communicating with team members, maintenance personnel and technical experts in a variety of situations and using different media
- assessing capability of team as a whole and individually to contribute to proactive maintenance strategy
- identifying resources in the organisation to improve team capability in regards to proactive maintenance strategy
- working in a team
- solving problems

Required knowledge

Required knowledge includes:

- the production process as it applies to the team area of responsibility
- equipment controls and function used in team's work area
- data ranges and indicators for normal team operations
- data and equipment variations and fault indicators able to be identified by team during operations
- proactive maintenance strategies used by the organisation, including:
  - range of date required from team for proactive maintenance strategy
  - typical analyses used by the proactive maintenance strategy and their implication for work of the team
  - responsibilities of the team, maintenance staff and technical experts
- OEE and relationship to team's operational capability

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • communicate effectively with team on the proactive maintenance strategy being adopted and the role expected by the team in its implementation • identify data required from team and for team key from the proactive maintenance strategy • analysing proactive maintenance strategy and current work practices of the team to identifying opportunities for better fit

© Commonwealth of Australia, 2025 Skills Insight

	• differentiate between proactive and traditional maintenance strategies.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP), and proprietary systems statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • OEE • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector

© Commonwealth of Australia, 2025 Skills Insight

Team	Team may include: • work teams from all sections of the organisation including production, maintenance, technical, administration/finance and sales/marketing • a formally designated team or a group of employees in a common work area
Proactive maintenance strategies and associated analyses	Proactive maintenance strategy and associated analyses may include: • TPM and RCM • root cause analysis (RCA) • mean time between failures (MTBF) • failure mode and effects analysis (FMEA) • condition monitoring
TPM	TPM is an application of total quality management to maintenance with the intention of increasing reliability, getting it right first time and increasing OEE
RCM	RCM moves maintenance from reactive, or even planned/programmed, towards a focus on uptime and OEE
OEE	OEE is the combination of the main factors causing loss of productive capacity from equipment/plant and is: *OEE = availability x performance x quality rate* where: • availability takes into account losses due to breakdown, set-up and adjustments • performance takes into account losses due to minor stoppages, reduced speed and idling • quality rate takes into account the losses due to rejects, reworks and start-up waste
MTBF	MTBF is one key measure of the effectiveness of a maintenance procedure, and is an indicator as to whether root causes are being found and resolved. If MTBF is reducing, then it is an indicator that the maintenance regime is failing
FMEA	FMEA is a systematic approach that identifies potential failure modes in a system, product, or operations/assembly operation caused by either design or operations/assembly process deficiencies. It also identifies critical or significant design or process characteristics that require special controls to prevent or

© Commonwealth of Australia, 2025 Skills Insight

	detect failure modes. FMEA is a tool used to prevent problems from occurring. Some industry sectors have highly adapted forms of FMEA and may practice traditional FMEA in say their routine maintenance while using another technique, such as Hazard and Operability Studies (HAZOP) for design and modification. HAZOP is a form of FMEA which has been practiced by the process industries for over 30 years and examines the implications of changes in process conditions to process stability.
Condition monitoring	Condition monitoring often involves quite sophisticated monitoring of equipment, including such things as: • vibration monitoring • instrumental analysis of lubricating oil, and so on, to determine the current state of the equipment, monitor the change in this condition, and predict when it needs servicing/maintenance to maintain reliability For this unit an awareness level only of condition monitoring and its implications for team operations is required.

MSS405001A Develop competitive systems and practices for an organisation

Modification History

New unit, superseding MSACMS600A Develop a competitive manufacturing system - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop new strategies for competitive systems and practices or make improvements to existing systems and practices.

Application of the Unit

This unit applies to a manager, technical specialist or similar in an organisation implementing competitive systems and practices, or in an organisation wishing to embark on the competitive systems and practices path. The person needs to be able to analyse the needs of the organisation and develop strategies and systems for effective implementation and continuous improvement of competitive systems and practices in the organisation.

This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Problem solving, initiative and enterprise, and planning and organising are required to determine effective competitive systems and practices strategies for the organisation. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices strategies.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Determine appropriate analytical techniques	1.1	Liaise with key stakeholders to determine objectives of operations strategy
		1.2	Examine current operations to determine major areas requiring improvement
		1.3	Compare possible strategies, techniques and tools against organisation needs
		1.4	Select possible strategies, techniques and tools
		1.5	Consult with key stakeholders to confirm selected strategies, techniques and tools
2	Develop competitive systems and practices strategies	2.1	Estimate benefit/cost ratio for major stakeholders and the value stream overall
		2.2	Determine preferred operations strategy
		2.3	Examine and adapt strategy to organisation needs and priorities
		2.4	Examine and adapt competitive systems and practices techniques and tools required to implement strategy
		2.5	Negotiate with key stakeholders to develop an implementation plan
		2.6	Determine key information and performance indicators required

© Commonwealth of Australia, 2025 Skills Insight

3	Implement strategy	3.1	Determine data collection required
		3.2	Identify and evaluate methods of collecting and processing required data
		3.3	Determine hardware and other resources required
		3.4	Evaluate skill needs required
		3.5	Ensure all resources/training are available and completed
		3.6	Implement strategy
4	Monitor implementation of strategy	4.1	Compare information/performance indicators with desired levels
		4.2	Liaise with key stakeholders regarding strategy issues
		4.3	Identify areas requiring adjustment
		4.4	Make required adjustments

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- analysing current state/situation of the organisation and value stream, including appropriateness of strategy, operations and internal and external relationships, including value stream members
- determining appropriate key performance indicators (KPIs) and overseeing data collection
- selecting appropriate competitive systems and practices tools and techniques, such as:
  - value stream mapping
  - 5S
  - Just in Time (JIT)
  - mistake proofing
  - process mapping

© Commonwealth of Australia, 2025 Skills Insight

    - establishing customer pull
    - kaizen and kaizen blitz
    - setting of KPIs/metrics
    - identification and elimination of waste
- communicating at all levels in the organisation and value stream and to audiences of different levels of literacy and numeracy
- prioritising situations and actions based on:
    - customer benefit
    - cost/benefit analysis
- reviewing and modifying strategies and KPIs, as required

Required knowledge

Required knowledge includes:

- competitive systems and practices principles and tools, including:
    - value stream mapping
    - 5S
    - JIT
    - mistake proofing
    - process mapping
    - establishing customer pull
    - kaizen and kaizen blitz
    - setting of key performance indicators/metrics
    - identification and elimination of waste
- methods of estimating costs/benefits
- acceptable benefit/cost ratios
- continuous improvement principles
- principles of motivation and leadership
- characteristics and strengths of different types of strategies, techniques and tools, such as 5S, JIT, six sigma, lean operations and agile operations
- business goals sufficient to match the strategy to the business needs
- strategic thinking
- principles of process equipment and how to improve its reliability
- resources required and how to obtain them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the

MSS405020A Develop quick changeover procedures

Modification History

New unit, superseding MSACMT620A Develop quick changeover procedures - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to develop/improve changeovers for equipment, processes or operations. It includes critically analysing existing changeovers, applying quick changeover principles, and developing improved changeover procedures.

Application of the Unit

This unit applies to managers, technical specialists or similar in an organisation that has adopted or is adopting a quick changeover approach to its changeovers. The changeovers may be to equipment, processes or operations. This unit applies to the structured development and/or improvement of the changeover procedures.

This unit requires the application of skills associated with communication, problem solving, initiative, enterprise, planning and organising in order to analyse and determine changeover procedures. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of procedures.

Licensing/Regulatory Information

unit of competency.	text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse changeover	1.1	Critically observe changeover process
		1.2	Identify steps in changeover
		1.3	Identify start situation and required finish situation for changeover
2	Apply quick changeover principles	2.1	Identify changes to the start situation and required finish situation which are possible
		2.2	Identify internal and external changeover activities
		2.3	Identify activities which could be improved/eliminated
		2.4	Eliminate/reduce adjustments required after changeover
		2.5	Develop improved changeover process and recommendations for implementation procedure
		2.6	Liaise with relevant people to validate recommendations
3	Assess and minimise risks in changeover	3.1	Analyse hazards and risks from all steps in changeover
		3.2	Apply ergonomic principles and hierarchy of control to each equipment and manual hazard
		3.3	Assess any regulatory risk in changeover
		3.4	Minimise hazards during changeover ensuring final risk profile is acceptable
4	Implement	4.1	Acquire any required resources and approvals

© Commonwealth of Australia, 2025 Skills Insight

improved changeover	4.2	Organise trials of improved changeover
	4.3	Monitor trial
	4.4	Make adjustments to changeover process
	4.5	Implement improved changeover process

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- critically analysing an existing changeover, including a detailed examination of all actions and delays and the times taken
- determining key steps in changeover
- identifying regulatory implications and other risks changes to procedures
- differentiating between habitual practice and necessary activity
- identifying opportunities to maximise external set up work
- communicating with others to explain and supervise changed procedures

Required knowledge

Required knowledge includes:

- principles of quick changeover
- equipment and operating environment of activities subject to quick changeover
- regulatory and commercial obligations and risk environment for operations subject to quick changeover analysis
- safe movement and other relevant occupational health and safety (OHS) principles
- relevant procedures
- purposes/requirements of changeover
- sourcing of resources
- trialling procedures

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of their ability to: • observe and analyse steps in an existing changeover • manage risks in adjusting changeover procedures • develop changeover adjustments that deliver the greatest overall benefit • supervise changeover procedure trials.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenario, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess

© Commonwealth of Australia, 2025 Skills Insight

	underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping

© Commonwealth of Australia, 2025 Skills Insight

	• problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Changeover	Changeover may refer to: • equipment exchanges, such as an exchange of dies/tools (traditional) • change between batches • change between campaigns (process manufacturing) • quantum equipment/process change to produce a different product
Quick changeover	Quick changeovers may be known by a number of alternative titles depending on the industry sector. In manufacturing quick changeovers may be referred to as: • single minute exchange of die (SMED) • single-digit set-up – performing a set-up activity in a single-digit number of minutes (i.e. fewer than ten) • one touch exchange of die (OTED) – literally, changing a die with one physical motion, such as pushing a button – broadly, an extremely simple procedure for performing a set-up activity While the term die is the traditional term, organisations that require changeovers using other equipment are also covered by this unit. This unit may not be applicable to a totally continuous operation producing only the one product, or simultaneous range of products. This is not applicable to a maintenance/pressure vessel inspection (PVI) shutdown as experienced by the continuous process manufacturers. However, where there are continuous operations on a campaign basis, it may be applied to the development of changeover procedures between campaigns or similar changeovers
Set-up work	Set-up time is the work required to change over a machine or process from one item or operation to the

© Commonwealth of Australia, 2025 Skills Insight

	next item or operation. It can be divided into two types: • internal set-up work that can be done only when the machine or process is not actively engaged • external set-up work that can be done concurrently with the machine or process performing productive duties
Principles	The principles of quick changeover include: • the principles of efficient movement as well as an understanding of equipment features and aids, including jigs, fixtures, locating devices and mechanical aids which will reduce human effort and time required
Improved/eliminated	Activities which should be improved/eliminated include: • those which take time or are unreliable in terms of outcome • those which are difficult to do or have adverse OHS implications (e.g. repetitive strain injury, back injury and finger injuries)
Hazards and risks	Hazards and risks include those related to: • OHS • regulatory compliance • environment • commercial and contractual obligations An acceptable risk profile for changeovers is one which, at the minimum, meets regulatory and organisation requirements and does not increase the current risk profile
Procedures	Procedures may include: • work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plan • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other

MSS405050A Determine and improve process capability

Modification History

New unit, superseding MSACMT650A Determine and improve process capability* - Equivalent

* New prerequisite *MSS404052A Apply statistics to operational processes* superseding MSACMT452A Apply statistics to processes in manufacturing

Unit Descriptor

This unit of competency covers the skills and knowledge required to determine the actual (as distinct from design) capability of a process and then to analyse that process to remove assignable causes and reduce random causes. This would typically be done by a manager or technical expert support person either working in a team, or in close liaison with key stakeholders. Process capability is typically calculated using standard deviations.

Application of the Unit

This unit applies to an individual (who may be a production manager, plant/process engineer, technical specialist or similar) who is responsible for developing plans to stabilise and then improve process capability and following agreement the implementation of the plans to improve process capability. The organisation may use either a six sigma or three sigma process.

This unit primarily requires the application of skills associated with communication in gathering and analysing data and consulting with relevant personnel. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to determine causes to variations and implement solutions. This is done in an environment using computer technology and also requires aspects of self-management and learning to ensure feedback and new learning is integrated into process improvements and operations management control systems.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Obtain data for process capability study	1.1	Identify the process requiring capability analysis including relevant procedures
		1.2	Identify customer specifications for product or service
		1.3	Obtain process capability data
2	Analyse data	2.1	Identify assignable causes of variation in liaison with relevant personnel
		2.2	Develop solutions to eliminate variation due to assignable causes in liaison with relevant personnel
		2.3	Analyse random variations for possible causes in liaison with relevant personnel
		2.4	Confirm causes of random variation
		2.5	Develop solutions to reduce random variations in liaison with relevant personnel
3	Take action to improve process	3.1	Develop plans to implement solutions
		3.2	Liaise with relevant personnel to implement solutions

© Commonwealth of Australia, 2025 Skills Insight

capability	3.3	Gain necessary approvals, as required
	3.4	Monitor implementation and make adjustments, as required
	3.5	Determine new/revised process capability
	3.6	Implement revised process capability regime

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using a variety of statistical methods and calculations
- communicating and negotiating at all levels in the organisation and value stream and with individuals of different levels of literacy and numeracy
- negotiating with employees, suppliers and customers, where necessary, to achieve access to, or collection of, data
- planning process and data collection changes required for process improvement, including:
  - objectives
  - performance indicators to be monitored to indicate success of change
  - resources required
  - training required
  - communication and liaison required with employees, suppliers and customers
  - implementation period required
- analysing variations and categorising into assignable and random cause
- undertaking self-directed problem solving and decision-making on issues of a broad and/or highly specialised nature and in a wide variety of contexts
- working in and leading teams for data collection and process improvement
- using software computers and terminals, as required, to collect and analyse data

Required knowledge

Required knowledge includes:

- data collection methods
- data processing techniques required to establish variability and normal distribution
- calculate three sigma or six sigma processes, as relevant

© Commonwealth of Australia, 2025 Skills Insight

- random and non-random results and processes for recognition of assignable causes
- causes of different types of non-random results
- causes of random variation
- process understanding sufficient to translate the data into variations in the process and determine methods of controlling them

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of their ability to: • collect or obtain data relevant process capability data from a variety of sources data • work with people and analyse data to determine assignable causes • plan and prepare improvement proposals • monitor implementation of improvement proposals.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects

© Commonwealth of Australia, 2025 Skills Insight

	• suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems

© Commonwealth of Australia, 2025 Skills Insight

	• supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Six sigma	Six sigma refers to: • a statistical tool for recording defects and determining capability which equates to only 3.4 defects per million opportunities for each product or service transaction Six sigma is also used as a general term covering a competitive systems and practices approach. Six sigma training typically covers several units of competency in this Training Package
Three sigma	Three sigma refers to: • a traditional statistical process control uses three sigma limits which equates to 3 defects per thousand opportunities for each product or service transaction
Process capability data	Process capability data includes: • customer requirements for product or service • process stability (control chart) performance • other charts and data
Procedures	Procedures may include: • work instructions • standard operating procedures

© Commonwealth of Australia, 2025 Skills Insight

	• formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS405070A Develop and manage sustainable energy practices

Modification History

New unit, superseding MSACMT670A Develop and manage sustainable energy practices - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to identify opportunities for, and make improvements in, sustainable energy practices in an organisation. Areas covered include efficient use of raw materials, management of waste, electricity conservation, heat conservation and management, water management, environment protection and environment obligations of enterprises.

Application of the Unit

This unit applies to an individual who is required to establish systems for improved energy practices in an organisation. The unit involves analysis of energy used in processes and operations and categorising the energy use according to lean principles. The unit covers categorising energy into necessary use and waste with the waste being further categorised into necessary waste and unnecessary waste. Strategies for eliminating or minimising energy waste are covered with benefit/cost analyses being required for strategies.

This unit primarily requires the application of communication and problem solving skills associated with collecting and analysing information. An ability to analyse energy use of technology or processes will be applied. Initiative and enterprise, and planning and organising are also required to develop plans for efficient energy use. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into the development of processes.

Where the quantum of energy used is not easily available or a formal calculation of energy use is required through an energy balancing calculation (e.g. for regulatory purposes) the unit *MSS015011A Conduct a sustainability energy audit* may also be required.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Analyse energy use	1.1	Identify all energy consuming processes
		1.2	Determine quantity and nature of energy consumed
		1.3	Analyse energy consumed and generated in different parts of the process
		1.4	Determine source of energy consumed in process
2	Develop energy conservation plans	2.1	Determine the efficiency of use of energy by all energy consuming processes
		2.2	Determine causes of low efficiency of use
		2.3	Develop plans for increasing the efficiency of energy use
		2.4	Determine benefit/cost of plans
3	Develop energy trading plans	3.1	Compare energy generating activities with energy consuming activities
		3.2	Determine feasibility of energy consuming activities using energy generated by other activities

© Commonwealth of Australia, 2025 Skills Insight

		3.3	Develop plans for energy trading
		3.4	Determine benefit/cost of plans
4	Investigate alternative sources of energy	4.1	Develop a specification for energy required
		4.2	Identify a range of sources for that energy
		4.3	Determine benefit/cost for alternative energy sources
5	Develop plans for more efficient energy use	5.1	Compare benefit/costs for different alternatives developed
		5.2	Rank proposals based on benefit/cost compare to limited resources
		5.3	Check proposals meet regulatory requirements
		5.4	Recommend proposals for improving energy efficiency
6	Implement selected plans	6.1	Liaise with relevant people to implement energy efficiency plans
		6.2	Follow through to ensure implementation occurs
		6.3	Monitor implementation and make adjustments, as required
		6.4	Check new energy usage to ensure improvements have occurred

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using common units, symbols and formulae common in energy-related calculations
- applying mathematics

© Commonwealth of Australia, 2025 Skills Insight

- communicating with a variety of groups and individuals using different media
- solving complex problems individually and as part of a team
- reviewing range of existing data for suitability and determining where new data gathering is required
- planning and organising complex whole of organisation activities relating to energy use, including objectives, timelines, implementation procedures and monitoring strategy
- determining where energy balancing techniques are required
- accessing manufacturers' data and other sources of energy consumption for individual equipment and processes
- mapping processes and energy flows
- calculating, manipulating and interpreting numerical data
- ranking energy consumption and waste for area, sites or processes
- calculating the efficiency of use of energy by equipment and processes
- consulting with technical and operative staff on possible non-obvious energy wastes
- consulting and negotiating with stakeholders on implementation process for sustainability improvement

Required knowledge

Required knowledge includes:

- types and sources of energy
- methods of analysing energy efficiency for different types of energy
- methods of converting energy values from one form to another
- alternative sources of energy
- principles of energy efficiency
- relevant regulatory/legislative requirements
- energy trading schemes and procedures
- organisation and process needs for energy

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of their ability to: • gather appropriate data to allow energy analyses • categorise energy use into necessary use and waste • develop options for energy reduction including

© Commonwealth of Australia, 2025 Skills Insight

	presenting of alternatives and benefit/cost analyses • develop strategies and plans for energy use and monitor implementation.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise

© Commonwealth of Australia, 2025 Skills Insight

	• the work organisation, culture, regulatory environment and the industry sector
Waste	Waste (also known as muda in the Toyota Production System and its derivatives) is any activity which does not contribute to customer benefit/features in the product. Within operations, categories of waste include: • excess production and early production • delays • movement and transport • poor process design • inventory • inefficient performance of a process • making defective items • activities which do not yield any benefit to the organisation or any benefit to the organisations customers
Necessary waste	Necessary waste is: • any activity or cost which does not contribute directly to customer benefit/feature in the product, and which cannot be avoided (e.g. regulatory compliance and fixed costs). Necessary waste cannot be eliminated but should be managed
Unnecessary waste	Unnecessary waste is: • any activity or cost which does not contribute directly to customer benefit/features in the product and can be avoided. Unnecessary waste should be eliminated as quickly as practical
Energy	Energy includes: • all sources of energy used by the process be it electricity, gas or mobile transport fuel The uses of the energy will also be potentially wide and include: • heating and cooling • moving materials (e.g. pumps and conveyors) • modifying materials (e.g. cutting, forming, weaving, knitting, reacting, moulding, extruding and mixing) • generating pressure/vacuum or providing motive power for equipment and transport
Energy trading	Energy trading means both formal trading where the organisation investigates alternatives to:

© Commonwealth of Australia, 2025 Skills Insight

	• the buying of energy through alternative suppliers and tender processes • selling of excess energy produced by the organisation to energy companies or other producers and • internal trading of excess energy from one area to an energy consuming area elsewhere in the organisation

MTMCOR402C Facilitate Quality Assurance process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to oversee a Hazard Analysis Critical Control Point (HACCP)-based Quality Assurance (QA) program. This unit is suitable for meat retail, smallgoods, meat processing and food service establishments producing meat and meat products for domestic and export markets.

Application of the Unit

Application of the unit	This unit is applicable to supervisors or those with responsibility for all or part of a meat establishment HACCP- based QA program.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Facilitate the ongoing implementation of the QA program in the workplace	1.1. Regulatory basis for compliance with the company's HACCP-based QA program is identified. 1.2. Nature and importance of work instructions and ***Standard Operating Procedures*** (***SOPs***) is identified and workers are coached in their implications. 1.3. Work instructions and SOPs are written so that they comprehensively document the details required for competent performance. 1.4. Work instructions and SOPs are reviewed for accuracy. 1.5. Implementation of work instructions and operating procedures is monitored.
2. Monitor inspection and test records	2.1. Control and critical control points in the HACCP program are identified. 2.2. Procedures for monitoring products and processes are identified and implemented, where appropriate. 2.3. Critical limits and the causes for product or process not conforming are identified. 2.4. Inspection and test records are monitored to verify product quality and to identify performance trends. 2.5. Descriptions of proposals to introduce improved processes or procedures are contained in status

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	reports.
3. Respond to non-conforming product or processes	3.1. Procedures for taking corrective action are identified. 3.2. Corrective and preventative measures are implemented to prevent recurrence. 3.3. Procedures are devised or revised to support control measures. 3.4. Processes or conditions which could result in a breach of meat safety procedures are identified and corrective action is taken. 3.5. Process changes are introduced and controlled so that QA requirements are accomplished.
4. Review product samples and test results	4.1. Product ***sampling*** procedures are identified. 4.2. Post-collection procedures are identified according to SOPs. 4.3. Test results are reviewed and responded to in accordance with ***workplace requirements***.
5. ***Calculate*** yield, wastage and productivity indicators	5.1. Yield, wastage and productivity measures are calculated to determine performance outcomes. 5.2. Yield, wastage and productivity measures are compared with targets to determine variation of actual from planned performance.
6. Calculate ***calibration*** adjustments	6.1. ***Mathematical concepts*** associated with equipment calibration are used to determine adjustment to settings. 6.2. Calibration calculation is verified by checking the accuracy of the adjustment in the actual work performance.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • apply appropriate mathematical concepts and measures

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- assemble product and process inspection, test and other quality data in prescribed format
- calibrate equipment accurately and verify calibrations
- communicate quality system and/or food safety system requirements clearly and precisely to workers
- determine and take corrective and preventative action
- establish and manage relevant project teams to develop and implement or update the necessary elements of the quality system and food safety system
- explain actual and potential problems evident from trend analysis
- apply the HACCP principles and the process for developing a QA or food safety program
- identify and apply relevant ***Occupational Health and Safety*** (***OH***&***S***) ***requirements***
- interpret the results and trends of process monitoring
- prepare process and product status ***reports*** recommending changes to improve processes and procedures
- prepare reports using primary and summary data, and appropriate language
- use relevant ***communication skills***
- review communication systems (spoken and written) to minimise the potential for misreporting and misunderstanding of food safety requirements, procedures and plans
- utilise available technology to record, manipulate, analyse and present or report data
- verify calibrating calculations
- explain the data the enterprise uses to record performance
- interpret the resulting trends of product monitoring and testing
- monitor records and documentation for accuracy and compliance
- monitor the accurate and timely recording of quality data

Required knowledge

Knowledge of:

- workplace, ***regulatory*** and customer requirements critical to the workplace's operation and success
- enterprise recall and traceability procedures
- post-collection procedures for handling samples
- purpose of the HACCP development and review process
- risks associated with samples and how they may be minimised
- the actual/potential problems which can occur if SOPs or work instructions or their equivalent are non-existent or not accurate
- document controls associated with a procedure change
- necessary scope of the ***QA system*** and food safety system to ensure requirements

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
are met • purpose of calibrating equipment • purpose of SOPs and work instructions • sampling procedure • implementation process for a change in the process • causes of variation and non-conformance and appropriate courses of action to rectify problems • critical limits for enterprise product or processes • actual and potential risks associated with uncontrolled changes in procedures • legal obligations of the enterprise and individuals for maintenance of the QA system • team requirements and team management processes or strategies

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and	Competency must be demonstrated in terms of current

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
evidence required to demonstrate competency in this unit	regulatory requirements.
Context of and specific resources for assessment	Assessment must involve a demonstration of skills in the workplace.
Method of assessment	Recommended methods of assessment include: • assignment • quiz of underpinning knowledge • simulation • verified work log or diary • workplace demonstration workplace project • workplace referee or third-party report of performance over time. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
SOPs may relate to:	• personal hygiene • food preparation and processing • pest control

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• waste disposal • cleaning • maintenance of premises • product recall • customer complaints • calibration.
Sampling and testing may be conducted by:	• external agencies.
Workplace requirements may include:	• enterprise QA policy, practices and procedures • enterprise-specific procedures • OH&S requirements • QA requirements • SOPs • the ability to perform the task to production requirements • work instructions.
Calculations may include:	• typical workplace circumstances used in primary recording and summary documentation • estimating techniques to confirm the general accuracy of calculations • manual operations or the use of a calculator. •
Mathematical concepts and measures may include:	• trends, norms, variation from norms, percentages, decimals, fractions and time series • quality data, including time series and trends, presented in tables and graphs.
Calibrations will typically relate to:	• measurements associated with weight, volume, temperature and length.

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• OH&S legal requirements
	• personal protective equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Reports may be:	• complex, contain technical, mathematical and graphic information and be presented in standard formats according to enterprise and legal requirements • according to statutory and workplace requirements and may involve: • a manual and/or electronic system • reports and presentations spoken, written and supported by graphs, pictures, charts and tables of primary or summary data • data presented in standard formats • spreadsheets used to record and manipulate data.
Communication skills may include:	• applying numeracy skills to workplace requirements • being appropriately assertive • empathising • establishing/using networks • interpreting the needs of internal/external customers • listening and understanding • negotiating responsively • persuading effectively • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• writing to audience needs.
Regulatory requirements may include:	• Export Control Orders • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state regulations regarding meat processing.
QA systems may:	• incorporate food safety plans and programs. A food safety program systematically identifies the food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. It identifies where and how each hazard can be controlled, describes how these controls are to be monitored, the corrective action required if control conditions are not met and information to be recorded. The food safety program must comply with relevant federal, state, territory and industry legislation and regulations. Regulators may require the development of discrete food safety plans, rather than food safety plans embedded in the QA system.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in workplace inspections	1.1. Group processes are facilitated to identify potential OH&S hazards. 1.2. Workplace inspections are participated in to identify potential hazards as appropriate. 1.3. Reporting obligations are fulfilled. 1.4. Risk control processes are implemented.
2. Participate in OH&S risk control process	2.1. Risk assessment processes are participated in. 2.2. Hazards are controlled in accordance with hierarchy of controls. 2.3. Workplace procedures for dealing with hazardous events are initiated. 2.4. Information is provided to relevant parties in line with action or is reported to designated personnel.
3. Monitor implementation of safe work practices	3.1. Compliance with safe work practices is demonstrated by example. 3.2. Safe work performance by employees is monitored. 3.3. Safe work practices are implemented in accordance with ***regulatory requirements***.
4. Assist development of safe work practices	4.1. Changes to work procedures or Standard Operating Procedures (SOPs) are developed in line with outcomes of risk control processes and regulatory

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	requirements. 4.2. Employees are consulted in relation to the development of safe work practices. 4.3. Employee understanding of safe work procedures on-the-job is reinforced.
5. Contribute to participative arrangements for the management of OH&S	5.1. Organisational procedures for consultation over OH&S issues are implemented and monitored to ensure that all members of the work group have the opportunity to contribute. 5.2. Issues raised through consultation are dealt with and resolved promptly or referred to the appropriate personnel for resolution in accordance with workplace procedures. 5.3. Outcomes of consultation over OH&S issues are made known to the work group promptly.
6. Contribute to workplace rehabilitation program as appropriate	6.1. Contributions are made to workplace rehabilitation programs in accordance with rehabilitation co-ordinator and/or rehabilitation providers requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • demonstrate participative problem-solving techniques to identify and resolve OH&S issues • identify and apply extent of responsibility • identify and apply relevant ***OH&S*** and ***workplace requirements*** • demonstrate safe work practices associated with work tasks • identify OH&S hazards in the workplace • identify relevant ***hazard control equipment*** and explain function, safe operation, maintenance and storage requirements • use facilitation skills to ensure participation from all group members

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• use relevant ***communication skills***
Required knowledge
• procedures for reporting hazards, accidents and incidents • risk management principles • process for developing and altering work procedures or SOPs

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

MTMCOR404A Facilitate hygiene and sanitation performance

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to monitor the hygiene and sanitation performance of a plant.

Application of the Unit

Application of the unit	This unit is applicable to supervisors or those with responsibilities overseeing hygiene and sanitation in meat processing establishments such as Quality Assurance (QA) officers and meat safety officers. It is applicable to meat processing, wholesaling, smallgoods and retailing operations.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMCOR202A	Apply hygiene and sanitation practices

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret statutory and workplace requirements relating to hygiene and sanitation	1.1. ***Hygiene and sanitation***, ***regulatory*** and ***workplace requirements*** are explained to other workers to assist their workplace performance. 1.2. Employer and employee rights, responsibilities and obligations are implemented in achieving hygiene and sanitation compliance.
2. Monitor hygiene and sanitation performance	2.1. Hygiene and sanitation are monitored to workplace and statutory requirements to verify compliance. 2.2. Situations requiring action to improve hygiene and sanitation compliance are reported as part of the continuous improvement process. 2.3. Results of process and product monitoring are evaluated for their impact on hygiene and sanitation.
3. Respond to hygiene and sanitation problems	3.1. Hygiene and sanitation issues are investigated according to established processes and procedures to achieve resolution of the problem under examination. 3.2. Recommended action arising from the investigation is followed up and reported to ensure reinforcement and ***documentation*** of the outcomes.
4. Evaluate results of microbiological testing	4.1. Results of microbiological testing are analysed in terms of regulatory and workplace requirements. 4.2. Corrective action is taken in response to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	microbiological results when required by workplace and regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • define the problem to be investigated • demonstrate understanding and application of HACCP systems • identify and apply ***Occupational Health*&*Safety* (*OH*&*S*) *requirements*** • plan approach to the investigation • evaluate the problem • explain and monitor workplace hygiene and sanitation policies, practices and procedures • ***report*** outcomes of the investigation • follow up post-investigation issues • identify action required to strengthen hygiene and sanitation compliance • implement the monitoring procedures • report monitoring outcomes • use techniques for individual and team resolution of the problem • use relevant ***communication skills***
Required knowledge
Knowledge of: • purpose of hygiene and sanitation monitoring • regulatory and commercial implications of inadequate control of hygiene and sanitation • company processes and procedures to conduct a hygiene and sanitation investigation • employer and employee rights, responsibilities and obligations regarding hygiene and sanitation • statutory requirements related to the site at which the person is employed

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency is demonstrated when taking an appropriate level of responsibility for the implementation of hygiene and sanitation SOPs.
Context of and specific resources for assessment	Assessment should involve analysis of real or simulated data for a meat processing operation.
Method of assessment	Recommended methods of assessment include: • assignment • quiz of underpinning knowledge • simulation • verified work log or diary • workplace demonstration of competency for the assessor • workplace project • workplace referee or third party report of performance over time.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Hygiene and sanitation requirements may include:	• relevant government regulations • workplace requirements. Statutory requirements may include relevant hygiene and sanitation, environmental and food safety legislation, and workplace policy, practices and procedures. Documentation may typically include status reports and technical manuals.
Regulatory requirements may include:	• Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
Workplace requirements may include:	• enterprise-specific procedures • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
Documentation may include:	• status reports • technical manuals.

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• OH&S legal requirements
	• Personal Protective Equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear
	  • lifting assistance
	  • mesh aprons
	  • protective boot covers
	  • protective hand and arm covering
	  • protective head and hair covering
	  • uniforms
	  • waterproof clothing
	  • work, safety or waterproof footwear
	• requirements set out in standards and codes of practice.

Reporting will be:	• according to statutory and workplace requirements and may be in manual and/or electronic systems.
Communication skills may include:	• applying numeracy skills to workplace requirements • being appropriately assertive • empathising • establishing/using networks

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• interpreting the needs of internal/external customers • listening and understanding • negotiating responsively • persuading effectively • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups • writing to audience needs.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Participate in decision about disposition	1.1. Decision is made in relation to whether product is recalled according to workplace and product specifications.
2. Simulate a product recall	2.1. Criteria for a product recall are identified according to product specifications and ***workplace requirements***. 2.2. Product to be recalled is identified and traced according to product specifications and workplace requirements. 2.3. Individuals or groups involved in a product recall are identified and their role described. 2.4. Steps in recall are identified and described. 2.5. Product development is reviewed in consultation with those responsible. 2.6. Manufacturing methods and quality control methods are reviewed to prevent problems re-occurring.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Ability to: • complete records of simulated product recall exercise and review for improvements to the recall procedure • use communications technology such as computers and telephones to facilitate product recall • identify and implement the procedure for a product recall • identify and apply relevant ***Occupational Health and Safety*** (***OH&S***) and ***regulatory requirements*** • identify records of product identification and traceability and use them for trace forward • use relevant ***communication skills***
Required knowledge
Knowledge of: • steps involved in implementing a product recall • reasons and procedures for initiating a product recall

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated when utilising a documented product recall procedure and realistic data.
Context of and specific resources for assessment	Assessment can be based on participation in a comprehensive simulation.
Method of assessment	Recommended methods of assessment include: • assignments • quiz of underpinning knowledge • simulation • workplace project • workplace referee or third-party report of performance over time. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Workplace requirements may include:	• Enterprise-specific procedures • OH&S requirements • QA requirements • standard operating procedures (SOPs) • the ability to perform the task to production requirements • work instructions.

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• OH&S legal requirements
	• Personal Protective Equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear
	  • lifting assistance
	  • mesh aprons
	  • protective boot covers
	  • protective hand and arm covering
	  • protective head and hair covering
	  • uniforms
	  • waterproof clothing
	  • work, safety or waterproof footwear
	• requirements set out in standards and codes of practice.

Regulatory requirements may include:	• Export Control Act • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
Communication skills may include:	• applying numeracy skills to workplace requirements • being appropriately assertive • empathising

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish and implement a valid ***sampling plan***	1.1. Sampling tables from AS 1199.1-2003 and AS 1199.0-2003 are recognised and used. 1.2. Items and purpose of sampling are determined. 1.3. Acceptable quality levels are determined in accordance with relevant Australian Standards. 1.4. Sampling plans are determined. 1.5. ***Sampling*** is conducted according to ***workplace requirements***. 1.6. Test results are recorded and monitored. 1.7. Test results are interpreted and ***reported*** to relevant personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Ability to: • establish a sampling plan according to relevant Australian Standards • demonstrate aseptic sampling techniques (for micro-sample or swabs) • apply ***mathematical*** skills to a level required to undertake accurate sampling • work effectively as an individual and as part of a team • identify and apply relevant ***Occupational Health and Safety*** (***OH***&***S***), ***regulatory*** and workplace requirements • record sampling information accurately to meet workplace and regulatory requirements • report test results promptly to relevant personnel • take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology • use relevant ***communication skills*** • utilise available workplace technology to establish, record and monitor sampling program data
Required knowledge
Knowledge of: • routine tests performed on meat or meat products in the plant • preparation and analysis of specimens or samples • requirements of relevant Australian Standards

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency has to be demonstrated using the current Australian Standard and implementing an approved workplace procedure.
Context of and specific resources for assessment	Assessment must involve a demonstration of skills at a meat processing plant or related work situation.
Method of assessment	Recommended methods of assessment include: • assignments • quiz of underpinning knowledge • simulation • verified work log or diary • workplace demonstration • workplace project • workplace referee or third-party report of performance over time. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Sampling plans may include:	• a range of sampling points • a range of tests and procedures • different products or materials • test methods or procedures which may be developed to meet enterprise and/or regulatory or certification requirements.
Sampling may include:	• selecting carcases to visually inspect • selecting carcases, meat or food contact surfaces to take micro-swabs • selecting cartons to visually inspect.
Workplace requirements may include:	• enterprise-specific procedures • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions. • enterprise recording systems may be electronic or manual.
Reports may:	• be presented orally or in writing in standard formats • be recorded and stored electronically or manually • contain complex information from several sources • include mathematical information • include technical, mathematical and workplace language.
Mathematical information and operations may relate to:	• deviations, norms, variations, acceptable limits and tolerances • digital or analogue controls, dials, measures • frequency • test results and readings, monitoring data.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage animals in ***lairage***	1.1. Animals are received into lairage according to ***workplace requirements***. 1.2. Animals in lairage are handled to minimise stress and according to workplace requirements. 1.3. Animal welfare issues in relation to the ***handling*** of animals in lairage are dealt with according to regulatory and workplace requirements including provision of food and water. 1.4. ***Records of all livestock movements*** on plant are maintained according to workplace requirements. 1.5. Animals are handled according to ***Occupational Health and Safety*** (***OH&S***) ***requirements***.
2. Present animals for slaughter	2.1. Animals are ***selected*** for slaughter according to ***product specifications*** and workplace requirements. 2.2. Animals are ***prepared*** for slaughter at a rate to maintain productivity according to workplace requirements. 2.3. Animals are presented for slaughter in a suitable condition to maintain the ***standards of product***. 2.4. Animals are presented for slaughter according to workplace, animal welfare, ***regulatory*** and OH&S ***requirements***.
3. Maintain flow and order of animals	3.1. Animals are made available to meet start-up times and chain speed requirements. 3.2. Flow and order of animals is maintained according to start-up times and chain speed requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- ensure mob or lot separation and comply with regulatory or importing country's requirements
- follow workplace recordkeeping procedures for receival of animals
- keep accurate stock receival records
- plan and maintain the flow and order of animals to meet production requirements
- move stock around pens and lairage in accordance with workplace requirements
- comply with animal welfare requirements for animals kept in lairage
- deal with sick and injured stock in accordance with workplace and regulatory requirements
- utilise stock identification systems accurately and comply with regulatory requirements related to the identification of stock
- work effectively as an individual and as part of a team
- apply relevant ***communication skills***
- fulfil OH&S requirements for handling stock in lairage
- meet workplace and regulatory requirements in relation to animal welfare requirements
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work cooperatively with other stock handlers

Required knowledge

- workplace Standard Operating Procedures (SOPs) and work instructions for animal handling
- animal welfare requirements
- regulatory and workplace requirements

Evidence Guide

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Lairage facilities will vary according to the species and may include:	• paddocks • pens • sheds • yards.
Workplace requirements may include:	• enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • SOPs • the ability to perform the task to production requirements • work instructions.
Livestock ***handling*** methods may include the use of goads such as:	• audio • dogs • electrical • mechanical.
Records of livestock movement may include:	• receivable documents • reconciliations of livestock on hand • slaughter data.

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• OH&S legal requirements
	• Personal Protective Equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear
	  • lifting assistance
	  • mesh aprons

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Selection of suitable livestock for slaughter may require consideration of:	• health status • length of lairage period • product specification.
Product specification may be described by:	• breed or type • carcase characteristics (e.g. age, sex, weight) • skin, hide or coat characteristics • species • standard of preparation and presentation.
Animal ***preparation*** may include:	• whole or partial wash down.
Standards of product may be described by:	• customer specifications • industry standards • workplace grades or classification.
Regulatory requirements may include:	• animal welfare • hygiene and sanitation requirements • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • state and territory regulations regarding meat processing.
Communication skills may include:	• listening and understanding • reading and interpreting workplace documentation • sharing information • speaking clearly and directly • working and communicating with diverse individuals and groups.

MTMPS5603B Develop, manage and maintain quality systems

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to establish, maintain and control an enterprise quality system. It also covers the skills and knowledge needed to lead people, manage systems and build quality into all enterprise systems and operations. The development and management of quality systems affects the ability of the enterprise to operate in specific markets and influences customer and consumer confidence in enterprise products.

Application of the Unit

Application of the unit	This unit is of particular interest to Quality Assurance (QA) managers and personnel, production managers and supervisors operating in a meat industry context. At this level individuals exercise considerable responsibility and accountability within enterprise structures and are required to make primary contributions to the values, goals and operations of the enterprise. They will typically have responsibility for the establishment and review of systems for the site or department. They may work with the assistance of external experts to develop plans and strategies.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Establish ***requirements of the quality system***	1.1. Policies expressing the organisation's commitment to the quality system and processes are developed. 1.2. Legislative requirements for enterprise quality systems are identified. 1.3. Scope and objectives of the quality system are determined, including links with all enterprise operations, customers, suppliers and contractors. 1.4. Quality performance standards, including customer and supplier service standards, are established consistent with the direction and goals of the enterprise. 1.5. Resource requirements are identified and included in financial, human resource and operational plans.
2. Design and prepare	2.1. ***Quality systems*** are selected and designed to meet

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
for the quality system	enterprise, customer and regulatory requirements. 2.2. Quality principles underpin all enterprise operations to achieve business goals and performance standards. 2.3. Responsibilities for development, implementation and operation of the system are clearly defined and communicated. 2.4. Personnel from all levels and areas of the organisation are involved in the development and implementation of the quality system. 2.5. ***System components***, ***procedures*** and supporting ***documentation*** are developed and validated. 2.6. Consultative and communication strategies are developed to link the quality system with all aspects of enterprise operations. 2.7. Supplier or contractor service standards and ***audit*** requirements are determined and negotiated. 2.8. ***Performance measures*** and indicators are developed to measure performance against policies, goals and performance standards.
3. Implement and ***monitor*** the quality system	3.1. Implementation plan is prepared and resourced. 3.2. Training plans to provide personnel at all levels with quality concepts and skills are prepared and resourced. 3.3. Quality system requirements and customer focus are addressed in the establishment, operation and evaluation of all enterprise systems. 3.4. Control and preventative action measures are identified and validated. 3.5. Corrective action procedures are developed and monitored. 3.6. Procedures for reporting, recording and responding to non-conformances and non-compliances are established. 3.7. Customer and supplier service standards are monitored and documented. 3.8. Quality data is collected and analysed, and implications reported. 3.9. Quality costs and performance are monitored. 3.10. Quality system is prepared for external review and approval by relevant authorities.
4. Continuously improve	4.1. Impacts of the quality system on enterprise

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
the quality system	operations are monitored and reviewed. 4.2. Responses to customer complaints and requests are resolved and used to improve the system. 4.3. Procedures for the ongoing identification and resolution of issues are established. 4.4. Quality system is updated for changes in process, technical information, customer and regulatory requirements. 4.5. ***Stakeholders*** are included in decision making and continuous improvement processes and strategies. 4.6. Quality results, findings and conclusions are fed into improvement processes. 4.7. Costs and benefits of the quality system are analysed. 4.8. Quality goals and targets are continuously reviewed.
5. ***Communicate quality outcomes***	5.1. ***Certification*** of product and processes consistent with quality outcomes is completed according to customer and regulatory requirements. 5.2. Regulatory authorities and agencies are promptly notified of breaches and non-compliance incidents. 5.3. Quality outcomes are used to promote public confidence in enterprise products and services.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • analyse complex ***statistical data*** and prepare corrective responses to non-conformances and variations identified in the data, relevant to enterprise quality systems and operations • apply ***quality*** concepts and ***tools*** to problem solving and the development of quality data collection, ***data management systems*** and analysis strategies • apply substantial product and process knowledge to the development of the quality system and the ***interpretation*** of quality data

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant ***communication*** and ***mathematical skills***
- communicate quality goals, requirements and findings to stakeholders in formats and styles appropriate to the context and purpose
- develop quality policies for the enterprise in consultation with senior management and other stakeholders
- develop consultative and feedback procedures and opportunities for identification and resolution of quality issues and problems
- develop continuous improvement processes and team building using the 'plan, do, check, act cycle'
- consult, negotiate with and report to regulatory authorities openly and promptly, consistent with enterprise ethical standards, including the notification of breaches and the preparation of non-compliance reports
- develop workforce commitment, capability and responsibility for the quality system, including identifying, negotiating and scheduling training, inclusion of responsibilities and duties relating to quality system implementation and integration in all job descriptions and work instructions, clear communication of responsibilities and requirements, delegation of tasks and responsibilities and inclusion of the workforce in consultative and continuous improvement processes
- ensure the quality system meets legislative and ***regulatory requirements***
- exercise judgement, pragmatism and quality knowledge in the management and resolution of quality issues and problems
- identify and apply relevant ***Occupational Health and Safety*** (***OH***&***S***) and ***workplace requirements***
- identify appropriate ***monitoring systems*** and strategies to support the enterprise quality system
- identify, research and update sources of quality information and advice, including technical and regulatory information to support enterprise quality system
- lead personnel (e.g. Hazard Analysis Critical Control Point (HACCP) team, management, quality team, meat inspection team, laboratory, maintenance teams, processors and operators) in the implementation and improvement of the quality system
- monitor and analyse the ***costs*** of the quality system, including prevention costs, appraisal costs, total quality costs and failure costs
- monitor and certify processes and product to meet ***third -party*** requirements (e.g. importing country, public health requirements and customers)
- oversee ***audit processes*** (internal and external), act on audit findings and provide feedback to personnel for improvement of the system
- oversee the preparation for third party certification (where appropriate)
- plan and resource the enterprise training strategy, consistent with regulatory requirements, to assist personnel at all levels in the implementation of the quality system
- prepare and sign off quality policies, manuals and documentation for the enterprise, including the preparation and updating of preventative, corrective and responsive procedures and strategies, supplier criteria and specifications, supplier and

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
contractor audit requirements • prepare quality implementation plans, identifying goals, key personnel and areas, resources, strategies, timelines and milestones • present reports according to legal and enterprise requirements • resolve customer complaints promptly and provide corrective action responses • use appropriate questioning, observation, listening and recording skills in the collection and monitoring of quality data • where quality systems are based on HACCP principles or Good Manufacturing Practice (GMP), explain these principles and the implications for the enterprise quality system.
Required knowledge
Knowledge of: • key concepts, philosophies and tools of quality management • management and organisational structure of the enterprise and its impact on enterprise systems • the role audits play in a quality system • documentation requirements of the quality system, including levels, and their roles in the functioning of the system, including the requirement for effective and secure quality record keeping systems • enterprise goals and directions and their implications for the quality system • ***process capability*** • applicable quality standards, regulations, codes, legislation and customer requirements for the quality system and explain the implications for the enterprise • legal requirements for the establishment and maintenance of the enterprise QA system including responsibilities for reporting breaches to authorities and implementing audit findings • principles and functions of hazard analysis and control, validation, including auditing, and verification in quality systems.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment	Resources may include:
	• a real work environment
	• customer specifications
	• establishment's quality system, performance data
	• relevant documentation, such as:
	  • manufacturer instructions or operations manuals
	  • manufacturer requirements
	  • regulatory requirements
	  • workplace policy and procedures
	• relevant equipment and materials.

Method of assessment	Recommended methods of assessment include: • third party referee report of sustained performance at an appropriate level of authority and responsibility • assignment focusing on understanding and application of principles and theory to workplace operations • workplace projects which focus on the company environment and conditions.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Requirements of the quality system may include:	• control of documents, data and quality records • coverage of contracts, purchasing, supply, processing, handling, storage, packaging, preservation, storage and delivery of meat and meat products • definition of management responsibilities • design and process controls • inspecting and testing, control of non-conforming product, preventative and corrective action, and auditing • management of links and impacts on all systems within the enterprise • production identification and traceability • training.
Quality systems may include:	• Australian, and Australian and New Zealand standards • food and meat safety • industry specific standards • international standards (e.g. ISO 9000 series)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• Meat Safety Enhancement Program (MSEP) • Meat Safety Quality Assurance (MSQA) • Personal Qualities Assessment (PQA) • trade description and certification systems.
Systems components and procedures include:	• correction (e.g. disposition, corrective action, liability management and customer complaint resolution) • prevention (e.g. training, operator feedback, manuals, technology and equipment reliability and maintenance, statistical collection and information, supplier QA, Standard Operating Procedures (SOPs) and work instructions).
Where the quality system relates to food safety, relevant ***documentation*** may include:	• amendment registers • Critical Control Points (CCP) monitoring forms and additional monitoring requirements and supporting programs • critical control point work instructions • HACCP audit table • HACCP team register, product description and use • process flow charts, factory floor plan and hazard analysis table • schedules relating to hygiene, cleaning and sanitation procedures, work instructions, approved chemicals, calibration, pest control, training, and product identification and recall.
Audits of performance may include:	• compliance with regulatory requirements • external reviewers • human resource performance • QA, including meat and food safety • safety, energy and environment.
Performance measures for the total quality cost may include:	• quality cost per kg of product • quality cost per dollar of direct production costs.
Monitoring and analysis may be:	• periodic (e.g. hourly, daily and weekly) • in real time (electronically).
Stakeholders may include:	• company owners, directors, shareholders and financiers • competitors • management and employees • suppliers, customers and consumers

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• unions and employer associations.
Systems for the ***communication of quality outcomes*** may include:	• development of quality teams • newsletters, bulletins and awards • problem-solving teams and sessions • quality meetings or circles • training.
Certification may include:	• AUS-MEAT certification • importing country requirements • Meat Standards Australia (MSA) certification • State, territory or public health requirements.
Statistical data analysis may include:	• correlation and regression analysis, bi-variate and multi-variate analysis • distribution • estimating and hypothesis testing • management • probability and statistical inference • process stability, capability and management • reliability planning • sampling • statistical process control requirements and charting applications • variations and variation monitoring.
Quality tools may include:	• cause and effect and fish bone diagrams • control charts • data points • flow charts • histograms • prioritisation matrices • process improvement models • process capability • pareto charts • team structures.
Data management systems may be manual or computerised, cover data collection, data monitoring and data analysis and interpretation, and may include:	• bar coding, identification, tagging and traceback systems • calculators • charting and graphing materials • computer software packages (e.g. spreadsheets and statistical analysis packages) • computerised equipment • manual measuring equipment (e.g.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	thermometers, pressure gauges and scales) • monitoring sheets and records.
Data analysis and ***interpretation*** may include:	• Acceptable Quality Level (AQLs) • Chemical Lean (CL) levels • microbiological analysis (e.g. Total Viable Counts (TVC) and e-coli counts) • process capability analysis • process variation analysis • product monitoring • statistical process control • temperature (e.g. cooling and chilling rates).
Communication may:	• be with culturally, ethnically and socially diverse individuals and groups • involve information and communications technology (e.g. databases, internet search and e-commerce services) • occur in a variety of sensitive, conflictive, collaborative and supportive environments • be formal or informal and involve face to face, technological and electronic methods • require analysis and presentation of complex concepts, technical information, mathematical information and other data in simple or complex formats • require preparation of reports which may be complex, contain information from a range of technical sources and include mathematical and graphic information and data.

Mathematical skills may relate to:	• complex actual and hypothetical technical and financial modelling
	• calculations and interpretation and analysis
	• mathematical information, such as:
	  • product and product quality
	  • financial operations
	  • personnel
	  • operations
	  • sales and turnover
	  • exports.

Regulatory requirements may include:	• animal welfare • commercial law, including fair trading and trade practices

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• consumer law • corporate law, including registration, licensing and financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • hygiene and sanitation requirements • industrial awards and agreements • relevant regulations • state and territory regulations regarding meat processing • taxation.

OHS requirements may include:	• enterprise OH&S policies, procedures and programs
	• OH&S legal requirements
	• Personal Protective Equipment (PPE):
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear
	  • lifting assistance
	  • mesh aprons
	  • protective boot covers
	  • protective hand and arm covering
	  • protective head and hair covering
	  • uniforms
	  • waterproof clothing
	  • work, safety or waterproof footwear
	• requirements set out in standards and codes of practice.

Workplace requirements may include:	• enterprise-specific requirements • OH&S requirements • QA requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
Monitoring systems and strategies	• audits and reviews • feedback from stakeholders

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
may include:	• inspection and testing procedures and regimes, including chemical and microbiological testing procedures, for validation and verification • statistical collection and analysis.
Quality ***costs*** include:	• appraisal (e.g. design appraisal, inspection, depreciation of quality equipment, process control and end product testing) • failure (e.g. scrap and waste, reinspection or retesting, disposal, down time, product downgrading, product liability, loss of custom, returned product and complaints) • prevention (e.g. training, auditing, process control engineering, testing, reporting and recall systems).
Third-party certification may include:	• Australian Quarantine Inspection Service (AQIS) accountabilities and inspection stamps/seals • customer requirements and specifications, including importing country requirements • licensing or registration requirements • national or international quality endorsement • product description and certification.
Audit processes include:	• planning • establishing controls • developing the team • conducting entry/exit meetings • controlling caucus meetings • issuing corrective action requests • preparing reports • giving feedback and input into the improvement of the system.
Process capability includes:	• operational capability (e.g. resources, risks, opportunities and commitments) • technical capability (e.g. personnel, equipment, systems and suppliers).

MTMPSR406B Manage and maintain a food safety plan

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to manage a food safety plan.

Application of the Unit

Application of the unit	Food safety is critical to public health and safety and the successful operation of meat industry businesses. This unit is suitable for managers in meat retail establishments, and supervisors and team leaders in smallgoods, meat processing and food services establishments, for maintaining the food safety plan or system in a designated work area.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage the implementation of the ***food safety plan***	1.1. Food safety principles, food safety procedures and requirements, including regulatory requirements, are explained to the ***team***. 1.2. Team commitment to, and responsibility for, food safety is developed. 1.3. Procedures to support the food safety plan are put in place. 1.4. Training and mentoring is provided to the team to assist implementation.
2. Monitor the food safety plan and take corrective action	2.1. Team implementation of the food safety plan is monitored. 2.2. ***Records*** and ***reports*** are completed accurately and on schedule. 2.3. Prompt action is taken to correct non-conformance according to enterprise and ***regulatory requirements***. 2.4. Causes of non-conformance are identified and analysed. 2.5. Control measures are implemented to prevent future non-conformance. 2.6. Non-conformance is reported according to enterprise requirements.
3. Maintain the food	3.1. Feedback is sought from all personnel to identify

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
safety plan	potential hazards, corrective actions and controls. 3.2. Processes or conditions which could result in breaches of food safety procedures are identified and preventive or corrective action is taken. 3.3. Corrective action and control procedures are updated to improve food safety. 3.4. Documentation is completed according to enterprise and regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- collect, monitor and interpret data to identify trends and non-conformance
- ***communicate*** with a range of stakeholders, including customers, to convey food safety requirements and programs
- demonstrate current technical and process knowledge for the control of hazards and improvement of the food safety system
- demonstrate enterprise monitoring procedures (including sampling, testing and required records and documents) and explain their purpose
- determine and take corrective action
- identify and apply relevant ***Occupational Health and Safety*** (***OH***&***S***), regulatory and ***workplace requirements***
- identify and review operations and practices for food safety improvement
- identify enterprise ***Standard Operating Procedures*** (***SOPs***) and explain their role in the food safety system
- lead personnel/team in investigation of food safety incidents and potential incidents
- maintain currency of knowledge through independent research or professional development
- monitor records and documentation for accuracy and conformance
- respond to food safety incidents and implement food recall procedures as required
- review communication systems (spoken and written) to minimise the potential for mis-reporting and misunderstanding of food safety requirements, procedures and plans
- take action to improve own work practice as a result of self-evaluation, feedback

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
from others or in response to changed work practices or technology • use a range of communication and team building strategies to gain team commitment to food safety • use detailed product knowledge, including product characteristics and the requirements for safe preparation, processing, storage, handling, display, to monitor food safety • utilise problem-solving strategies required in investigating non-conformance and reviewing the food safety system
Required knowledge
• enterprise recall and traceability procedures • food safety requirements to the team • food safety risk assessment procedures • Hazard Analysis Critical Control Point (HACCP) principles and the process for developing a food safety plan • regulatory requirements that apply to the enterprise's food safety plan

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.

Context of and specific resources for assessment	Resources may include:
	• real work environment
	• relevant documentation such as:
	  • food safety plan and/or HACCP plan
	  • regulatory requirements
	  • workplace policies and procedures
	• relevant equipment and materials.

Method of assessment	Recommended methods of assessment include: • assignment or simulation • workplace project • workplace referee or third-party report on performance. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

RANGE STATEMENT	
conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Food safety plans will be:	• based on HACCP principles • in standard formats and meet mandatory requirements
Teams may be:	• a department or small business • a food safety or HACCP team • all personnel in work area • two or more people.
Record-keeping systems may be:	• electronic and/or manual.
Reports may be:	• complex, contain technical, mathematical and graphic information and be presented in standard formats according to enterprise and legal requirements.
Regulatory requirements may include:	• animal welfare • commercial law including fair trading, trade practices • consumer law • corporate law, including registration, licensing, financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • relevant Australian Standards • relevant regulations • state and territory regulations regarding meat processing • taxation.
Communication may:	• be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures • be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds • involve communication and information technologies • involve presentation of explanations and reports in language styles suitable for the

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	audience and include everyday workplace language, technical and mathematical language • involve reading and interpreting workplace-related documentation • require negotiation, persuasion and assertiveness skills.

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• hygiene and sanitation requirements
	• OH&S legal requirements
	• Personal Protective Equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear
	  • lifting assistance
	  • mesh aprons
	  • protective boot covers
	  • protective hand and arm covering
	  • protective head and hair covering
	  • uniforms
	  • waterproof clothing
	  • work, safety or waterproof footwear
	• requirements set out in standards and codes of practice.

Workplace requirements may include:	• enterprise ethical standards, values and obligations • enterprise-specific procedures, policies and plans • OH&S requirements • Quality Assurance (QA) requirements • SOPs • the ability to perform the task to production requirements • work instructions.
Standard Operating Procedures may relate to:	• personal hygiene • food preparation and processing • pest control

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• waste disposal • cleaning • maintenance of premises • product recall • customer complaints • calibration.

MTMPSR5601B Design and manage the food safety system

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to design and manage food safety programs for a meat industry enterprise including meat processing, smallgoods, retail and food services operations. The unit also covers skills and knowledge for working with customers and consumers on food safety issues.

Application of the Unit

Application of the unit	This unit is appropriate for all managers in a food safety and/or Quality Assurance (QA) role, and for those working in production roles with responsibility for food safety and QA within their job role. Food safety is a critical element of product quality and is a priority for all sectors of the meat processing industry. Food safety is also a community issue and public perceptions of the safety of meat and meat products impact on the viability of meat processing enterprises.

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Establish enterprise meat or food safety system requirements	1.1. Goals, scope and requirements of ***food safety system*** are determined, consistent with customer, enterprise and ***regulatory requirements***. 1.2. Alternative food safety systems are evaluated against enterprise requirements and preferred system is identified. 1.3. Development of the food safety system is carefully planned, using team and consultative approaches. 1.4. Resource requirements, including staff training requirements, for effective systems operation and maintenance are identified and obtained.
2. Develop food safety systems	2.1. Food safety responsibilities, obligations and roles are identified and clearly explained to ***stakeholders***. 2.2. Processes covered by the food safety system are identified and described.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.3. Food safety hazards are identified for all processes within the scope of the food safety system. 2.4. Hazard control measures are identified, developed and validated. 2.5. Procedures for ***preventative action*** are developed.
3. Establish monitoring procedures and corrective actions	3.1. Monitoring procedures are developed and ***monitoring*** information is used to inform ***corrective actions***. 3.2. Corrective actions are developed and implemented to effectively control hazards. 3.3. Recording and ***documentation*** procedures are developed, maintained and secured. 3.4. ***Strategies to support the workforce*** in the routine and consistent application of food safety systems are developed, resourced and implemented.
4. Evaluate food safety system	4.1. ***Audit procedures*** are established and audits monitored. 4.2. ***Verification procedures and schedules*** are established and verification information is used in the review of the food safety system. 4.3. Food safety system is reviewed and updated for changes in Australian Standards, ***technical information*** (including verification data) and process information according to established procedures. 4.4. Food safety systems are prepared for external review and approval by relevant authorities. 4.5. Performance information is used to measure performance against policies and goals.
5. Communicate food safety outcomes	5.1. Interactions with the public, regulatory authorities and agencies are conducted in a positive, cooperative and open manner. 5.2. Food safety incidents and non-compliances are reported promptly to relevant authorities. 5.3. Customer and consumer feedback is gathered, analysed and included in review of the food safety system. 5.4. Food safety system outcomes are documented to promote public confidence in enterprise products and services.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- analyse performance information to determine progress and areas for review or improvement
- consult with stakeholders to determine the scope of the ***food safety systems***, ***procedures and controls*** and identify food handling practices, processing techniques and support programs in use
- demonstrate detailed knowledge of Hazard Analysis Critical Control Point HACCP principles and techniques and where appropriate to the enterprise, Good Manufacturing Practices (GMP)
- demonstrate detailed knowledge of ***validation*** and verification (including audit) purposes and processes
- demonstrate substantial product and process knowledge and the microbiological, physical and chemical impacts on the safety of enterprise meat and meat products in the identification of hazards and the assessment and control of food safety risks
- determine measures for correcting processes or outcomes outside acceptable limits or support program requirements including procedure to be followed, when corrective action must be implemented, the person responsible for taking corrective action and the information to be recorded
- develop and validate control measures using objective data, industry guidelines and codes of practice
- develop performance standards and criteria for the food safety system
- develop strategies to support the workforce in the implementation of the food safety system
- establish internal audit processes and schedules, including developing and leading the audit team
- establish procedures to monitor, review and secure record-keeping systems consistent with regulatory requirements
- establish verification procedures and schedules and identify action required if the outcomes of verification indicate that the program requirements have not been met or that the original program was inadequate
- establish, monitor and continuously improve food safety support systems consistent with regulatory requirements
- evaluate alternative food and/or meat safety systems for suitability for enterprise goals and directions, enterprise operations, enterprise product, cost and customer and regulatory requirements
- identify and apply relevant ***Occupational Health and Safety*** (***OH***&***S***), regulatory

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
and ***workplace requirements*** • identify ***monitoring requirements*** and develop monitoring procedures ***for food safety hazards*** identified in the enterprise • identify workforce training needs and negotiate and schedule training to support system requirements and operation • liaise with suppliers to establish and monitor enterprise food safety and quality requirements for products and processes • maintain currency of knowledge through independent research or professional development • monitor ***public health requirements*** and concerns and prepare reports for the enterprise, public health authorities, customers and consumers on progress and outcomes of the food safety system. • monitor the implementation of preventative action measures, controls and actions to correct non-compliance or non-conformances • prepare accurate reports for senior management detailing compliance breaches/incidents, actions and outcomes and the implications for the enterprise • prepare action plans for the development and review of the food safety system, which include timelines, the establishment, leading and support of the HACCP team • prepare and present food safety system information, procedures, documentation and reports in languages, formats and styles appropriate for the audience and purpose • prepare ***communication*** strategies to inform internal and external stakeholders of progress and outcomes of the food safety system • prepare HACCP plans and support documentation including hazard analysis charts and tables, manuals, data analysis reports, corrective action reports and verifications reports, Standard Operating Procedures (SOPs) and work instructions where appropriate for the enterprise system • provide feedback to the workforce or team on food safety performance • take action to improve own work practice as a result of self-evaluation, feedback from others or in response to changed work practices or technology. • use appropriate communication skills and strategies for informing and confirming the roles, responsibilities and obligations of all participants in the operation of the enterprise • use available technology and ***data management systems*** to gather, record, manipulate, interpret and report food safety data and information
Required knowledge
Knowledge of: • enterprise's ethical standards and the implications for the food safety system • roles, responsibilities and obligations of the enterprise and individuals in the food safety system • regulatory requirements for food safety, including HACCP-based programs,

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
support programs, record-keeping, verification and internal/external audits, and explain the implications for enterprise operations • scope, auditor role and responsibility, and scheduling requirements for internal and external audit process • legal responsibilities for reporting audit findings, including breaches and non-compliances to enforcement agencies, and for conflicts of interest, confidentiality, rights of appeal and giving evidence in court

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and authority under typical operating and production conditions for the enterprise.
Context of and specific resources for assessment	Resources may include:

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Food safety systems:	• are written documents required by legislation which specify how businesses will control all food safety hazards that are reasonably

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	expected to occur within a food enterprise • may be developed by personnel within the enterprise or by external consultants • may be developed within an enterprise's QA system or as a discrete program • must provide for the systematic monitoring of controls and actions to correct hazards not under control (records demonstrating action in relation to or in compliance with the food safety program must be kept) • may be for export or domestic processing, smallgoods manufacturing, wholesaling, cold stores or retail enterprises • may be ISO-based or non ISO-based.
Regulatory requirements may include:	• animal welfare • commercial law including fair trading, trade practices • consumer law • corporate law, including registration, licensing, financial reporting • environmental and waste management • Equal Employment Opportunity (EEO), anti-discrimination and sexual harassment • Export Control Act • industrial awards, agreements • Australian Standards • relevant regulations • state and territory regulations regarding meat processing • taxation.
Stakeholders may include:	• company owners, directors, shareholders, financiers • competitors • management and employees • regulatory authorities • suppliers, customers, consumers • unions and employer associations.
Preventative action may involve:	• revision of materials, processes and/or food handling procedures • revision of workplace practices and documentation such as specifications, SOPs, approved supplier programs, and work

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	instructions.
Product/process ***monitoring*** may be:	• microbiological or chemical testing • online testing • sensory.
A ***corrective action*** plan identifies:	• non-conformance • corrective actions • date by which action must be taken • other follow up requirements.
Food safety ***documentation*** includes:	• amendment registers • Critical Control Point (CCP) monitoring forms and additional monitoring requirements • CCP work instructions • factory/shop floor plan • HACCP audit table • HACCP team register • hazard analysis table • process flow charts • product description or use • supporting programs and schedules relating to hygiene, cleaning and sanitation procedures, work instructions, approved chemicals, calibration, pest control, training, product identification and recall.

Technical information includes:	• conditions for bacterial food poisoning, including:
	  • product composition
	  • temperature
	  • time
	  • aw
	  • pH.

Strategies to support the workforce in the implementation of the food safety system may include:	• clear signage • coaching and mentoring • development and presentation of procedures in plain language and visuals • implementation of problem-solving by work teams to develop and monitor food safety procedures • initial and refresher structured training programs • provision of appropriate work areas and

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	equipment.
Food safety systems, ***procedures and controls*** apply to:	• display, packaging and sale of food, including meat and meat products • equipment design, use and maintenance • handling and disposal of condemned or recalled food, including meat, products • location, construction and servicing of meat premises • processing, further processing and preparation of food including meat and meat products • receival, storage and transportation of food including meat and meat products.
Validation is:	• the identification, collection and analysis of objective information to confirm that operations (e.g. equipment, processes, procedures) are able to provide the required food safety outcomes.
Audit procedures include:	• planning • establishing controls • developing the team • conducting entry and exit meetings • controlling caucus meetings • issuing corrective action requests • preparing reports • giving feedback and input into the improvement of the system.
Verification procedures and schedules may be defined in:	• legislation relevant to the sector (verification applies to all aspects of the food safety program including documentation, auditing and support programs).

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• hygiene and sanitation requirements
	• OH&S legal requirements
	• Personal Protective Equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear
	  • lifting assistance

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Workplace requirements may include:	• enterprise ethical standards, values and obligations • enterprise-specific procedures, policies and plans • SOPs • work instructions.
Monitoring requirements for food safety hazards include:	• a description of the method or procedure to be followed • the frequency and timing • the information to be recorded (procedures to be followed would typically be specified in the form of a SOP or work instruction) • the person responsible.
Public health requirements include the impacts of pathogenic bacteria such as:	• Clostridium etc • E.coli • Listeria • Salmonella • Yersinia.
Communication may:	• be spoken, written, non-verbal and include the use of signs, signals, symbols and pictures • be with colleagues, team members, superiors, customers, clients, external parties from a range of cultural, social and ethnic backgrounds • involve reading and interpreting workplace documents • require the use of negotiation, persuasion and assertiveness skills.
Data management systems may be manual or computerised, cover data collection, data monitoring and data analysis and	• calculators • charting and graphing materials • computer software packages including spreadsheets, statistical analysis packages

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
interpretation and include:	• computerised equipment • inspection regimes • manual measuring equipment (e.g. thermometers, pressure gauges, scales) • monitoring sheets and records • product quality and safety.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare product formulations	1.1. Recipes and product specifications are followed to formulate products in accordance with ***workplace*** and ***regulatory requirements***. 1.2. Products are formulated in accordance with product specifications, ***hygiene and sanitation***, regulatory and workplace requirements. 1.3. ***Ingredients*** are checked to ensure they meet product specifications and regulatory requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Ability to: • follow recipes and product specifications to formulate products • formulate products • apply relevant ***communication*** and ***mathematical skills*** • work effectively as an individual and with other team members • apply relevant Occupational Health and Safety (***OH&S***) ***requirements*** • use ***equipment*** according to manufacturer's specifications and workplace requirements

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
Required knowledge
Knowledge of: • functions, dangers and legal implications of various ingredients • usage and purpose of various ***additives***, spices, binders and ingredients in the products • relevant OH&S requirements

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated over time and under typical operating and production conditions for the enterprise.
Context of, and specific resources for assessment	Assessment must occur in the workplace under normal production conditions.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	Resources may include: • appropriate blending equipment • product specifications and recipes • workplace environment.
Method of assessment	Recommended methods of assessment include: • workplace demonstration • quiz • question and answer • observation of performance over time. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Workplace requirements may include:	• Enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• work instructions.
Regulatory requirements may include:	• Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.
Hygiene and sanitation requirements may include:	• relevant government regulations • workplace requirements.
Types of ***ingredients*** may include:	• additives • spices • binders.
Communication skills may include:	• applying numeracy skills to workplace requirements • listening and understanding • reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse individuals and groups.
Mathematical skills may:	• involve estimation and calculation • relate to own work and work area problem-solving and monitoring • relate to product formulation and specification • require interpretation and drawing conclusions from a range of mathematical tables, charts, bar graphs, pie charts, recipes • require monitoring formula, specifications, outputs and equipment • require synthesis and analysis of mathematical information from more than one source.

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• OH&S legal requirements
	• Personal Protective Equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Equipment may include:	• blenders • choppers • cutters • mixers.
Additives may include:	• antioxidants • binders • curry • Glucono Delta Lactone (GDL) • GO2 • nitrates • nitrites • non-meat proteins • phosphate • salt • spices • sugar • water.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select meat	1.1. Meat is selected according to ***product specifications***. 1.2. Meat is prepared according to product specifications. where part of the work instructions.
2. Prepare ingredients	2.1. Ingredients are prepared according to product specifications and ***workplace requirements***.
3. Prepare facility	3.1. ***Machinery and equipment*** are prepared according to product and manufacturer's specifications.
4. Load products	4.1. ***Product*** is checked to ensure correct spacing prior to loading. 4.2. Product is loaded in a manner that ensures even cooking. 4.3. Product is handled at all times according to Occupational Health and Safety (***OH***&***S***), and ***hygiene and sanitation requirements***.
5. Smoke product	5.1. Core temperature probes are inserted into the centre of the product as appropriate to product specifications and workplace requirements. 5.2. Machinery is programmed, where applicable in accordance with manufacturer's and product specifications. 5.3. A variety of products is smoked to workplace requirements and customer specifications at a speed similar to production requirements. 5.4. Process is monitored and recorded according to workplace requirements.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
6. Monitor smoke cycle	6.1. Smoke cycle is monitored regularly, results are noted and deviations from the program are corrected. 6.2. Internal temperature is manually checked in accordance with workplace requirements to ensure correct smoke time has been achieved and, where necessary, further cooking is undertaken. 6.3. When product type and processing procedures require, a shower cycle is initiated according to process specifications.
7. ***Chill*** product	7.1. On completion of smoke cycle, product is correctly weighed and either ***chilled*** immediately or cooled at ambient temperature to a specified internal temperature before chilling, according to regulatory requirements. 7.2. Product is held at a specific and constant temperature according to product specifications. 7.3. Product is stored according to product specifications. 7.4. Product is identified and stacked according to product specifications and workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- demonstrate correct loading procedure for both a full and less-than-full smokehouse
- activate and operate machinery according to manufacturer's and workplace instructions
- measure and monitor product internal temperature correctly to ensure it meets product specifications
- monitor smoking of meat on a regular basis to meet product specifications (including, where relevant, the interpretation of graphs or flow charts or mimic panels and controls)
- interpret cooking records where appropriate with respect to relevant product
- adjust processing as required to achieve product specifications

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- apply relevant ***communication*** and ***mathematical skills***
- work effectively as an individual and with other team members
- ***describe*** correct smoking procedure for specific product
- ***explain*** chilling requirements for different products
- operate smoke facility according to OH&S, hygiene, ***regulatory***, product specifications and workplace requirements, and meet production requirements
- report machine faults either verbally or in writing according to workplace specifications
- store meat according to OH&S, hygiene, regulatory, product specifications and workplace requirements

Required knowledge

Knowledge of:

- correct smoking procedure for specific product
- storage procedures for smoked products
- meat smoking process
- purpose and effect of smoking processes on meat
- health regulations that apply to smoking of meats
- chilling requirements for different products
- possible effects of inconsistent temperature on product
- effects of smoking on shelf life and taste of product
- purpose of correct water temperature and correct additive sequence, especially phosphate and smoke
- recording requirements for the smoking/cooking process
- relevant workplace requirements related to:
  - appropriate humidity levels
  - effect of moisture on casings
  - smoke generator
  - smoke jet
  - sock
  - wet bulb sock
- use and purpose of ***raw materials*** for smoking meat
- use and purpose of ingredients for smoking meat
- mathematical information in work instructions, specifications and recipes
- meat cuts used in smoking
- cause and effects of, and explain the appropriate corrective action for:
  - cycle out of sequence
  - excess smoke
  - insufficient smoke

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time. These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence. Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence. All assessment must be conducted against Australian meat industry standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competency must be demonstrated over time and under normal operating conditions for the enterprise, within the parameters of the role and responsibilities, and according to workplace requirements.
Context of, and specific resources for assessment	Assessment must occur in the workplace under normal operating conditions in a simulated environment. Resources may include: • equipment that meets safety requirements • product specifications and ingredients • smoking equipment, machinery or production facility.
Method of assessment	Recommended methods of assessment include:

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• demonstration • quiz of underpinning knowledge • workplace referee report of performance over time. Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Product specifications may vary according to:	• customer and workplace requirements.
Workplace requirements may include:	• enterprise-specific procedures • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
Machinery and equipment may include:	• atomising generators • automatic or manual machinery • cookers • friction generators

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• liquid smoke jet • moulds • probe thermometers • sawdust or woodchip burning generators • smoke generators • smokers • sock • wet bulb reservoir.
Product may include:	• beef (e.g. brisket and tongue) • game meat • lamb (e.g. legs and tongue) • mutton • other meat species or products • pork (e.g. hand and spring) • veal.

OH&S requirements may include:	• enterprise OH&S policies, procedures and programs
	• OH&S legal requirements
	• Personal Protective Equipment (PPE) which may include:
	  • coats and aprons
	  • ear plugs or muffs
	  • eye and facial protection
	  • head-wear
	  • lifting assistance
	  • mesh aprons
	  • protective boot covers
	  • protective hand and arm covering
	  • protective head and hair covering
	  • uniforms
	  • waterproof clothing
	  • work, safety or waterproof footwear
	• requirements set out in standards and codes of practice.

Hygiene and sanitation requirements may include:	• relevant government regulations • workplace requirements.
Product may be ***chilled*** by:	• chill cabinets • immersing in ambient running water • placing in cool room

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• showering with ambient water • use of intensive coolers • washing in water or brine.
Communication skills may include:	• reading and interpreting workplace-related documentation • sharing information • speaking clearly and directly • working with diverse groups and individuals • writing to audience needs.
Mathematical skills may include:	• collection • estimation • calculation and interpretation of deviations within cycle, internal temperature, humidity, ambient temperature, weights.
Descriptions and explanations may:	• be in diagrammatic, sketch, tabular or graphic formats • be presented in writing, using standard formats • be presented orally • include information and mathematical data gathered, interpreted and summarised from a range of complex and unfamiliar sources.
Regulatory requirements may include:	• Export Control Act • federal and state regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations.
Smoke-producing ***raw materials*** may include:	• liquid smoke • powder • sawdust • solid timber • woodchips.

Unit Descriptor

This unit of competency describes the outcomes required to demonstrate ethical conduct required of those in public service. It includes applying ethical standards and dealing with ethical problems.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit supports the attainment of skills and knowledge required for applying ethical conduct and accountability required in those working in government employment.

In practice, ethical conduct is demonstrated in the context of other generalist or specialist work activities such as building and maintaining networks, delivering client services, using financial resources, procuring goods or services, etc.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Apply ethical standards**	1.1 Interpretation of ***ethical values and principles*** is reviewed with senior staff to ensure accuracy. 1.2 Personal ***work practices*** are undertaken in compliance with public sector ethics standards, organisational policy and ***guidelines.*** 1.3 Verbal and written advice and reports are prepared containing information which is impartial, substantiated, accurate and complete. 1.4 Public ***resources*** are ***used*** in accordance with public sector ethics standards, organisational policy and guidelines. 1.5 ***Conflicts of interest*** are identified, declared, addressed and documented in accordance with policy and procedures. 1.6 Personal behaviour and relationships with the public, suppliers and business contacts are conducted in accordance with ethics standards, policy and guidelines.
2. **Deal with ethical problems**	2.1 Situations which pose ethical problems are resolved or ***referred*** in accordance with organisational guidelines. 2.2 Decision-making ***processes*** used to resolve ethical problems are recorded in accordance with organisational policy and procedures. 2.3 Organisational policies/codes on the prevention and reporting of ***unethical conduct*** are accessed and applied.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

Look for evidence that confirms skills in:

- applying objective and impartial evaluation of conflicting requirements
- using ethical decision making
- preparing written advice and reports requiring accuracy of expression
- accessing legislation and codes of ethics electronically or in hard copy
- tailoring communication to suit different audiences
- responding to diversity, including gender and disability
- applying occupational health and safety procedures relating to ethical work practices

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- the nature of ethics and ethical values
- fundamental ethical principles such as justice, respect for persons, procedural fairness, confidentiality, responsible care
- values of public sector office
- natural justice/procedural fairness
- equal employment opportunity, equity and diversity principles
- where to access ethical decision making/problem solving models, organisational codes and procedures
- procedures for declaring conflicts of interest
- protocols for reporting fraud, corruption and maladministration
- occupational health and safety procedures relating to ethical work practices

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

© Commonwealth of Australia, 2025 Skills Insight

- PSPGOV303B Build and maintain internal networks
- PSPGOV305B Access and use resources and financial systems
- PSPGOV307B Organise workplace information
- PSPGOV308B Work effectively with diversity
- PSPGOV309A Address client needs
- PSPGOV312A Use workplace communication strategies
- PSPGOV314A Contribute to conflict management
- PSPIM301A Process claims
- PSPLAND302A Investigate tenure and land use history
- PSPLEGN301B Comply with legislation in the public sector
- PSPOHS301A Contribute to workplace safety
- PSPPROC302A Undertake basic procurement

- This unit should be co-assessed with other units to supply the context for ethical behaviour

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- ethical conduct in a range of (3 or more) contexts (or occasions, over time) where contexts may be generalist or specialist work activities such as building and maintaining networks, delivering client services, using financial resources, procuring goods or services etc

Resources required to carry out assessment

These resources include:

- ethics-related legislation and guidelines
- codes of conduct and codes of ethics
- public sector standards, procedures and protocols
- ethical decision making/problem solving models
- manager/mentor/network who role models ethical conduct

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when working ethically in a public sector environment, including coping with ambiguity, difficulties, irregularities and breakdowns in routine
- ethical conduct in a range of (3 or more) contexts (or occasions, over time) where contexts may be generalist or specialist work activities such as building and maintaining networks, delivering client services, using financial resources, procuring goods or

© Commonwealth of Australia, 2025 Skills Insight

services etc.

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Ethical values and principles may include:	• respect for the law • integrity • objectivity • accountability • honesty • openness • responsibility • impartiality • diligence

© Commonwealth of Australia, 2025 Skills Insight

	• trustworthiness
	• confidentiality
	• respect for persons
	• responsible care
	• probity
	• economy and efficiency
	• natural justice/procedural fairness, that is:
	  • the right to be heard/put your case
	  • the right to be informed of a complaint or case against you
	  • the right to know the outcomes/recommendations of an investigation involving you
	  • the right to know reasons for decisions affecting you
	  • the right to privacy
	  • the right to representation
	  • the right to silence
	• the decision maker should not be a judge in his/her own cause

Work practices may include:	• behaviours • conduct • relationships with work colleagues, external individuals and organisations • the manner in which work activities are carried out
Legislation and guidelines may include:	• legislation for public sector management • freedom of information • privacy legislation • equal employment opportunity and anti-discrimination law • public sector standards • Ministerial directions • State/Territory or Commonwealth codes of ethics • organisational codes of conduct • sets of values • organisational mission and values statements • organisational policy, procedures/guidelines • government policy • professional codes of ethics and conduct • equity guidelines, workplace diversity guidelines
Public resources may include:	• time • stationery • equipment • telephones • Internet • Email

© Commonwealth of Australia, 2025 Skills Insight

Use of public resources includes:	• effective use • efficient use - avoiding/minimising waste • not for private use
Conflicts of interest may include:	• potential, perceived and actual conflicts • bribery • improper use of official information • improper use of resources, including plant and equipment • acceptance of gifts • entertainment • previous and outside employment, including voluntary work • favours for friends and/or relatives • memberships of organisations • political activity • pecuniary and non-pecuniary conflicts
Ethical problems which may need to be ***referred*** rather than resolved at this level may include:	• conflict between public sector standards and personal values • conflict between public sector standards and other standards such as professional standards • conflict between public sector standards and directions of a senior officer or Minister • tension between two 'rights', for example, the right to privacy versus the right to freedom of information • conflict regarding issues of personal and organisational intellectual property
Referrals of ethical problems may be made to:	• line management • chief executive officer • public service commissioner • public sector standards body • organisational ethics committee • internal grievance mechanisms, including identified officers • confidant programs (whistleblower protection programs) • organisational professional reporting procedures • unions and professional bodies • ombudsman • police
Processes for resolving ethical problems may include:	• accessing relevant standards and other information • withdrawing from a situation • using models of ethical decision making/problem solving • reflection, discussion, seeking clarification from others.
Unethical conduct may include:	• fraud, corruption, maladministration and waste • unauthorised access to and/or use of information, money/finances, vehicles, equipment, resources, time • improper actions during contractual processes, such as release

© Commonwealth of Australia, 2025 Skills Insight

	of intellectual property, infringing copyright, release of tender information, inappropriate disclosure during tender process • improper public comment on matters relating to the government and/or the organisation • falsifying records • giving false testimonials • dishonesty • improper use of plant and equipment, credit cards, frequent flyer points, telephones, email and Internet • extravagant or wasteful practices • personal favours • preferential treatment • putting barriers in place, hindering, blocking action • compromising behaviour including sexual harassment • lack of confidentiality • directing others to act unethically • oppressive/coercive management decisions • resorting to illegality to obtain evidence

1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the ethical conduct required of those in public service and the responsibility to encourage ethical conduct in others - colleagues or supervised staff. It includes contributing to an ethical public sector workplace and participating in ethical decision making.

In practice, ethical conduct is demonstrated in the context of other generalist or specialist work activities such as applying government processes, delivering and monitoring services to clients, using resources, conducting interviews, giving evidence, awarding contracts etc.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit supports the attainment of skills and knowledge required for applying ethical conduct and accountability required in those working in government employment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to an ethical public sector workplace	1.1 Information on the ***ethical values and principles*** of the workplace is accessed, its interpretation confirmed with others and applied accordingly 1.2 Application of ethical values and principles is discussed with senior management and colleagues to ensure common understanding and application 1.3 ***Others*** are assisted to access and use public sector ethics ***legislation and guidelines*** to ensure their work practices comply with requirements 1.4 The differences between public sector ethics/values and personal beliefs/values are explained to others to encourage understanding and compliance 1.5 Hypothetical work practices that would constitute ***unethical conduct*** are identified and discussed with work colleagues, and strategies to avoid or deal with them are identified in accordance with organisational policy and procedures
2. Participate in ethical decision making	2.1 Real and potential ***ethical problems*** are identified, and decision making processes are used to resolve or ***refer*** them in accordance with organisational policy and procedures 2.2 Information is regularly accessed to ensure currency in ethical knowledge, and ethical judgment is developed through involvement in workplace discussions or ongoing professional development related to ethical standards and practices 2.3 Other staff are supported as necessary to contribute to ethical discussions and problem solving to develop their ethical judgment 2.4 Processes for preventing and reporting unethical conduct are used and others are assisted in their application

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- accessing legislation and codes of ethics electronically or in hard copy
- reading complex and formal documents such as legislation and codes of ethics, applying them and assisting others to apply them to work practices
- applying objective and impartial evaluation of ethical problems
- using participative ethical decision making/problem solving
- preparing written reports that contain information that is impartial, substantiated, accurate and complete
- responding to diversity, including gender and disability
- adjusting communication to suit different audiences
- applying occupational health and safety procedures relating to ethical work practices

Required knowledge:

Look for evidence that confirms knowledge and understanding of:

- the nature of public sector ethics and ethical values as opposed to personal beliefs/value systems
- fundamental ethical principles such as justice, respect for persons and responsible care
- other ethics standards such as professional standards
- natural justice/procedural fairness
- equal employment opportunity, equity and diversity principles
- ethical decision making/problem solving models
- procedures and protocols for reporting unethical conduct
- environmental and occupational health and safety procedures relating to ethical work practice

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to

© Commonwealth of Australia, 2025 Skills Insight

increase the efficiency and realism of the assessment process include, but are not limited to, a range of (2 or more) generalist or specialist units of competency in the Certificate IV in Government. Choice from the following units is recommended:

- PSPGOV402B Deliver and monitor service to clients
- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV406B Gather and analyse information
- PSPGOV408A Value diversity
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV414A Provide workplace mentoring
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC409A Receive and select offers
- PSPREG407B Produce formal record of interview
- PSPREG410B Give evidence

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of Employability Skills as they relate to this unit
- ethical conduct demonstrated and supported in others in a range of (3 or more) contexts (or occasions, over time) where contexts include generalist or specialist work activities such as applying government processes, delivering and monitoring services to clients, using resources, conducting interviews, giving evidence, awarding contracts, etc

Resources required to carry out assessment

These resources include:

- ethics-related legislation and guidelines
- codes of conduct and codes of ethics
- public sector standards, procedures and protocols
- ethical decision making models

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when working ethically in a public sector environment, including coping with ambiguity, difficulties, irregularities and breakdowns in routine
- ethical conduct demonstrated and supported in others in a range

© Commonwealth of Australia, 2025 Skills Insight

of (3 or more) contexts (or occasions, over time) where contexts include generalist or specialist work activities such as applying government processes, delivering and monitoring services to clients, using resources, conducting interviews, giving evidence, awarding contracts, etc

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Ethical values and principles may include:	• respect for the law • integrity • objectivity • accountability

© Commonwealth of Australia, 2025 Skills Insight

	• honesty
	• openness
	• responsibility
	• impartiality
	• diligence
	• trustworthiness
	• confidentiality
	• respect for persons
	• responsible care
	• probity
	• economy and efficiency
	• natural justice/procedural fairness, that is:
	  • the right to be heard/put your case
	  • the right to be informed of a complaint or case against you
	  • the right to know reasons for decisions affecting you
	  • the right to know the outcomes/recommendations of an investigation involving you
	  • the right to privacy
	  • the right to representation
	  • the right to silence
	• the decision maker should not be a judge in his/her own cause

Others may include:	• colleagues • supervised staff • contractors
Legislation and guidelines may include:	• legislation for public sector management • freedom of information • privacy legislation • equal employment opportunity and anti-discrimination law • public sector standards • Ministerial directions • State/Territory/Commonwealth codes of ethics • organisational codes for conduct/ethics • organisational mission and values statements • organisational policy, procedures/guidelines • government policy • professional codes of ethics and conduct • equity guidelines, organisational workplace diversity guidelines
Unethical conduct may include:	• fraud, corruption, maladministration and waste • unauthorised access to and/or use of information, money/finances, vehicles, equipment, resources, time • improper actions during contractual processes, such as release

© Commonwealth of Australia, 2025 Skills Insight

	of intellectual property, infringing copyright, release of tender information, inappropriate disclosure during tender process • improper public comment on matters relating to the government and/or the organisation • falsifying records • giving false testimonials • dishonesty • improper use of plant and equipment, credit cards, frequent flyer points, telephones, email and Internet • extravagant or wasteful practices • personal favours • preferential treatment • putting barriers in place, hindering, blocking action • compromising behaviour including sexual harassment • lack of confidentiality • directing others to act unethically • oppressive/coercive management decisions • resorting to illegality to obtain evidence
Ethical problems which may need to be referred rather than resolved at this level may include:	• conflict between public sector standards and personal values • conflict between public sector standards and other standards such as professional standards • conflict between public sector standards and directions of a senior officer or Minister • tension between two 'rights' - for example, the right to privacy versus the right to freedom of information • conflict regarding issues of personal and organisational intellectual property
Referrals of ethical problems may be made to:	• line management • human resources • workplace relations officer • grievance officer • chief executive officer • public service commissioner • public sector standards body • organisational ethics committee • internal grievance mechanisms • confidant programs (whistleblower protection programs) • organisational professional reporting procedures • unions and professional bodies • ombudsman

PSPFRAU401B Monitor data for indicators of fraud

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the collection of data from a wide variety of sources and its input into appropriate data management systems for interrogation to identify indicators of fraud and corruption. It includes collating and interrogating data and monitoring for indicators of fraud and corruption.

Fraud in the unit title incorporates both *fraud and corruption*.

In practice, monitoring data for indicators of fraud and corruption may overlap with other generalist or specialist public sector workplace activities such as acting ethically, complying with legislation, exercising regulatory powers, etc.

Related units of competency dealing with investigation, evidence, powers of arrest, etc are located in the *Regulatory* Competency field of the Training Package.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Collate data	1.1 Relevant data sources are identified and data is collected that is compatible, useful, relevant, reliable, valid and timely. 1.2 ***Data*** is organised in prescribed form in accordance with the identified information needs and uses. 1.3 Data is checked for accuracy, suitability and compliance with legal and privacy responsibilities and security. 1.4 The need to liaise with specialists is determined and acted on in accordance with organisational policy and procedures. 1.5 Ways to improve fraud and corruption control data content, interfaces and usefulness are monitored, and recommendations are made to supervisors and other ***stakeholders***.
2. Interrogate data	2.1 Quantitative and/or qualitative analyses are performed to obtain required outcomes in accordance with the ***purpose*** of each analysis. 2.2 Analysis and description tools and techniques are selected appropriate to the nature of the information and the required outcome. 2.3 Priority of data to be interrogated is determined in consultation with appropriate people, and work is organised accordingly. 2.4 An understanding of the nature of the program or activity from which the data is obtained, the way in which the information is structured in the system and the likely indications of fraud and corruption activities are reflected in the analysis of material. 2.5 Preliminary recommendations are expressed in the detail,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	format and timeframe required.
3. Monitor for indicators of fraud and corruption	3.1 Fraud and corruption or possible fraud and corruption situations are identified, staff and systems alerted and ***actions*** initiated. 3.2 Where indicators arise for which there are no precedents, information is referred to the appropriate people for further analysis. 3.3 Trends indicating activities outside control limits are reported for further analysis and investigation. 3.4 Checks are made for internal consistency and compliance with established structure, rules and authorities for accessing information. 3.5 Variations from standards and ***guidelines*** are reported in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking research and analysis
- interrogating data to detect patterns indicating fraud and corruption
- applying effective management of data, abiding by all agency guidelines, formats and systems
- correctly recording data into information systems
- using data matching to identify factors required for an investigation
- collating and organising of data to assist in an investigation
- using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using computer software for data analysis and matching
- applying occupational health and safety and environmental procedures in the context of fraud and corruption control data monitoring
- literacy skills to effectively read and interpret data

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation and procedures relating to public interest disclosures, protected disclosures or whistleblowing
- privacy, confidentiality or other specific legislation and guidelines relating to fraud

© Commonwealth of Australia, 2025 Skills Insight

and corruption control
- freedom of information legislation
- guidelines issued by standards-setting organisations
- organisation's programs and client base
- legislation and corresponding links with the organisation's programs
- how data is managed within the organisation
- legislation, policies and procedures relating to fraud and corruption control including occupational health and safety and environment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV406B Gather and analyse information
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPREG401C Exercise regulatory powers
  - PSPREG402C Promote client compliance
  - PSPREG415A Receive and validate data

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- monitoring of data for indicators of fraud and corruption in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- fraud and corruption control guidelines

© Commonwealth of Australia, 2025 Skills Insight

- fraud investigation standards
- public sector values and codes of conduct
- organisational procedures and manuals
- legislation, procedures and protocols relating to fraud and corruption control
- legislation and procedures relating to public interest disclosures, protected disclosures or whistleblowing
- case studies and workplace scenarios to capture the range of fraud/corruption situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when monitoring data for indicators of fraud and corruption, including coping with difficulties, irregularities and breakdowns in routine
- monitoring of data for indicators of fraud and corruption in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and/or apply the

competency in different situations or environments.

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.	
Data may include:	• electronic systems • paper-based systems • client data • other individuals and organisations
Stakeholders may include:	• staff and senior management • clients • law enforcement agencies • organisations providing data • standards-setting organisations
Purposes of data analysis may include:	• response to ongoing or individual requests for information from specified people to check for particular information • matching data as part of a random check • conducting a needs assessment for fraud and corruption prevention and awareness activities • generating and initiating fraud and corruption control activities
Actions resulting from data interrogation may include:	• investigation or inquiry • legislative change • administrative change • policy change • improved referral to another organisation for investigation
Guidelines may include:	• legislation and guidelines prepared by relevant standards-setting organisations

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify legislative requirements	1.1 Information is accessed that covers the range of ***legislation and guidelines*** relating to the workplace and is current and comprehensive. 1.2 Key requirements of relevant pieces of legislation are identified and confirmed with senior staff. 1.3 Requirements of legislation are clarified to confirm understanding and ensure consistency of interpretation and application. 1.4 Clarification is obtained of the way various pieces of legislation are integrated to provide a legislative framework for public sector work. 1.5 Advice is obtained when apparently ***conflicting legislative directives*** are found.
2. Comply with legislative requirements	2.1 Work practices are carried out in accordance with the requirements of legislation relating to the work environment. 2.2 Own conduct is reviewed and feedback from others is used to confirm continuing compliance with legislative requirements.
3. Report incidents of non-compliance	3.1 Possible breaches of legislation are raised promptly with an authorised person/body in accordance with organisational procedures. 3.2 ***Inadequacies in workplace procedures*** which may contribute to non-compliance are raised in accordance with organisational procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for

© Commonwealth of Australia, 2025 Skills Insight

this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking research and evaluation
- undertaking self-assessment
- reading complex and formal documents such as legislation and related materials to apply them to work practices and to identify inappropriate conduct
- communicating with others involving exchanges of complex oral and written information
- using technology to access legislative requirements
- responding to diversity, including gender and disability
- applying environmental and occupational health and safety procedures

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the range of legislation relating to the public sector (including occupational health and safety and environment) and the key requirements of each
- public sector codes of ethics/conduct
- equal employment opportunity, equity and diversity principles
- organisational processes/procedures for responding to legislative issues

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Legislation and guidelines may relate to:

- public sector standards:
  - codes of conduct/ethics
  - guarantee of service
  - legislated standards
  - State/Territory/Commonwealth/organisational standards
  - technical/industrial standards
  - professional standards
  - industry competency standards
  - anti-corruption legislation
  - whistleblowers' protection
- public sector employment:
  - employee relations
  - chief executive officer's instructions
  - Commissioner's instructions
  - public sector notices
- workplace environment:
  - equal employment opportunity
  - affirmative action
  - workplace diversity
  - anti-discrimination
  - workplace harassment
  - occupational health and safety
  - duty of care

© Commonwealth of Australia, 2025 Skills Insight

- security, storage, handling and classification of documents
- financial management and accountability:
  - Treasurer's instructions
  - contractual obligations
- transparency:
  - freedom of information
  - professional reporting
  - accountability
  - fair trading
- business and community:
  - privacy
  - trade practices
  - competition
  - road transport legislation
- information and records management standards and legislation
- the organisation's enabling legislation, regulations
- aspects of common law, criminal law, contract law, employment law and administrative law, including judges' rules
- international legislation/codes of behaviour

Conflicting legislative directives may include:

- apparent contradiction between statutes
- apparent conflict between statutes and policy requirements

Inadequacies in workplace procedures may include:

- insufficient financial/other controls
- insecure Internet/fax access
- non-auditable records processes
- ambiguous guidelines
- no guidelines
- unnecessary complexity
- use of non-current legislation

PSPPOL501A Develop organisation policy

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the development or review of 'in house' policy in an organisation, formulated to facilitate the implementation of government or board directives. It includes anticipating and confirming the need for policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, releasing and promoting policy.

In practice, developing organisation policy may overlap with other generalist or specialist work activities such as developing client services, complying with public sector legislation, acting ethically, engaging the community, coordinating research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Anticipate and confirm the need for policy development or review	1.1 ***Internal and external factors,*** issues, ***events***, directions or government/board policies likely to cause changes to ***organisation policy*** are identified. 1.2 The likely implications and impact of these factors that might require policy development are identified in consultation with ***stakeholders***. 1.3 A critical analysis of the need for new or revised policy is conducted that includes a scan of the wider internal and external environment, that checks related policies for context and identifies other policies likely to be impacted. 1.4 Priority areas for policy development/review are recommended in accordance with organisational procedures. 1.5 Confirmation of the need for policy development/review and supporting evidence is detailed in accordance with organisational procedures.
2. Plan the policy development process	2.1 The ***approving authority*** is confirmed and organisational procedures and protocols for policy development are confirmed and applied. 2.2 ***Issues*** likely to impact on the policy development process are identified, analysed (in terms of risk) and addressed in policy development planning. 2.3 ***Policy requirements*** are outlined in a ***policy development plan*** in accordance with organisational procedures.
3. Gather and analyse information for policy development	3.1 Stakeholders are identified and engaged through the establishment and maintenance of a representative and relevant ***policy network***. 3.2 ***Information*** required to support the policy development process is identified, gathered, analysed and interpreted. 3.3 An ***analytical framework*** for the development of the policy is

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	determined and applied.
4. **Determine policy direction**	4.1 A range of policy options and ***criteria for choice*** are developed and communicated in a timely and understandable way to those responsible for selecting the policy direction.
	4.2 Where appropriate, specific policy options are promoted to executive within the organisation.
	4.3 Preferred policy option is recommended and risk treatments are determined in accordance with the policy development plan.
	4.4 Approvals/endorsements are obtained in accordance with the policy development plan and organisational procedures.
5. **Draft policy**	5.1 Policy is drafted and a cyclical process of consultation, feedback, identification of changes and re-drafting is implemented in accordance with the policy development plan.
	5.2 Risk management processes are implemented in accordance with the policy development plan to ensure progress of the process against the timeframe and milestones.
	5.3 An implementation plan is included in the policy that details responsibilities for implementation and strategies for transition, change management, initial and ongoing training and maintenance of the policy.
	5.4 Mechanisms for monitoring compliance with the policy, quality assurance of the policy, and evaluation of the policy are included within the policy.
	5.5 The policy is developed in accordance with ***organisational requirements for style, format and contents***.
6. **Release and promote policy**	6.1 Policy is cleared through organisational channels, and agreement of critical stakeholders is gained in accordance with organisational procedures.
	6.2 All stakeholders, particularly those who will be responsible for implementing the new or revised policy, are fully informed of the ***outcomes***, and fallout from dissenting stakeholders is managed in accordance with the policy development plan.
	6.3 The policy is released and ***promoted*** in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of a team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental, sustainability and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- policy development processes and practices in the public sector
- policy cycles
- analytical policy development frameworks
- current policies underpinning the work area
- organisation and government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- equal employment opportunity, equity and diversity principles
- environmental, sustainability and occupational health and safety implications of policy/s being developed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- PSPCOM502A Develop and implement community engagement strategies
- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPLEGN501B Promote compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of organisation policy in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector policy and legislation
- public sector standards, procedures and protocols
- policy development guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing policy, including coping with difficulties, irregularities and breakdowns in routine
- development of organisation policy in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people

© Commonwealth of Australia, 2025 Skills Insight

- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Internal and external factors may include:

- internal:
  - restructuring
  - new service models
  - amalgamation with other departments/agencies
  - new work practices
- external:
  - legislative changes
  - changing social trends
  - economic/technological change

Events may include:

- restructure
- amalgamation
- changes to legal risks
- changes in strategic direction
- changes to legislation and whole of government policies
- pilots or trials of policy

© Commonwealth of Australia, 2025 Skills Insight

Organisation policy may include:

- any aspect of an organisation's business, such as policies relating to:
  - core business
  - client services
  - business structure
  - human resources
  - administration
  - financial management
  - work practices
  - training
  - information technology
  - technical/professional requirements
  - legal requirements
  - environmental and sustainability practices

Stakeholders may include:

- all those individuals and groups both inside and outside the organisation that have some direct interest in the organisation's conduct, actions, products and services, including:
  - employees at all levels of the organisation
  - other public sector organisations
  - private sector organisations
  - non-government organisations
  - other jurisdictions
  - union and association representatives
  - boards of management
  - government
  - Ministers
  - clients
  - the public
  - special interest groups

Approving authority may include:

- chief executive officer
- delegated officer, such as policy manager
- senior management
- board of management
- managing director

Issues may include:

- political sensitivities
- social and cultural sensitivities/factors
- equity in service delivery and employment practice
- resource implications (of policy implementation)

© Commonwealth of Australia, 2025 Skills Insight

	• technological influences/implications • jurisdictional boundaries/crossovers • ‘sunk cost’ restrictions • non-consenting stakeholders at the end of the policy development process • existing awards or agreements impacting on staff, including enterprise bargaining agreements
Policy requirements may be defined in terms of:	• context • rationale • issues to be addressed • expected outcomes • timeframe • research methods • resource requirements for development • key stakeholders • communication strategy • feedback mechanisms for review • milestones • precedents • risk analysis • possible complications • success measures • impact on equity • possible resource implications for implementation
Policy development plan may include:	• policy objectives/outcomes • timelines • methodology – a cyclical process of consultation, feedback, identification of changes, and re-drafting • stakeholders • risks/risk management • performance criteria to inform review and evaluation • dissemination and promotion activities • implementation issues
Establishment and maintenance of a ***policy network*** may include:	• communication and information strategy to capture required range of opinions • range of communication channels for providing information • range of input strategies for obtaining information
Information gathering may include:	• consulting with stakeholders, including specialists in relevant issues • focus groups

© Commonwealth of Australia, 2025 Skills Insight

- developments in other public sector or private sector organisations
- evaluation of similar policies
- benchmarking against other organisations/work functions
- accessing information in current and closed files
- surveys
- literature reviews
- Internet

Analytical frameworks may include:

- logical/rational (including best practice)
- incremental
- radical transformation

Criteria for choice of preferred policy option may include:

- likely effectiveness in terms of:
  - meeting policy objectives
  - minimising risks
  - impact on day-to-day implementation throughout the organisation
  - practicality at the coal-face
  - competing priorities in the workplace
  - constraints
  - structure and culture of the organisation
  - implementation timeframe and costs (including infrastructure)
  - interaction with other policies (existing or being developed)
  - consistency with broader government agendas

Organisational requirements for style, format and contents may require policies to be:

- forward-looking
- outward-looking
- principles-based
- innovative, creative, flexible
- evidence-based
- inclusive
- consistent
- self-contained, with adequate coverage of the subject matter
- accessible to the intended audience/understandable to all users
- gender-neutral and written in non-discriminatory language
- version-controlled to support evaluation and revision

Outcomes of the policy development process may include:

- nature of the policy change
- the outcomes expected by stakeholders
- issues

© Commonwealth of Australia, 2025 Skills Insight

	• expected costs • timelines • contextual factors (including any impact on other related policies)
Promotion of policy may include:	• formal launch • information sessions • presentations • ongoing advice • intranet • web site • advertising where policy is located and how to access it

Unit Descriptor

This unit covers the development or review of public policy, to enable the implementation of government objectives. For the purposes of this unit, public policy includes government policy affecting all Australians and public sector policy that is not restricted to a particular organisational structure or individual organisation. The unit includes anticipating and confirming the need for public policy development or review; planning the policy development process; gathering and analysing information; determining policy direction; and drafting, gaining agreement for, and disseminating public policy.

In practice, developing public policy may overlap with other generalist or specialist work activities such as managing change, managing diversity, managing workplace safety, managing the delivery of client services, managing risk, directing the management of contracts.

This unit replaces and, for qualification purposes, is equivalent to *PSPPOLD601A Develop public policy*. Policy evaluation is no longer part of the unit. Evaluation is addressed in *PSPMNGT611A Manage evaluations*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Anticipate and confirm the need for public policy development or review**	1.1 ***Events***, issues or government policies likely to cause changes to ***public policy*** are identified. 1.2 The likely implications and impact of these factors that might require public policy development are identified and prioritised in consultation with ***stakeholders***. 1.3 A critical analysis of the need for new or revised public policy is conducted that includes a scan of both internal and external environments, that checks related policies for context and identifies other public policy likely to be impacted. 1.4 Priority areas for public policy development/review are recommended in accordance with government directions. 1.5 Confirmation of the need for public policy development/review and supporting evidence is detailed in accordance with policy and procedures.
2. **Plan public policy development process**	2.1 The ***approving authority*** is confirmed and procedures and protocols for public policy development are confirmed and applied. 2.2 ***Issues*** likely to impact on the policy development process are identified, analysed (in terms of risk) and addressed in policy development planning.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.3 Public ***policy requirements*** are outlined in a policy development plan in accordance with organisational procedures.
3. Gather and analyse information for public policy development	3.1 Stakeholders are identified and engaged through the establishment and maintenance of a public policy network. 3.2 Information required to support the policy development process is ***gathered***, analysed and interpreted. 3.3 An ***analytical framework*** for the development of public policy is determined and applied.
4. Determine public policy direction	4.1 Strategic input is obtained from high-level staff in accordance with organisational/public sector protocols. 4.2 A range of policy options and ***criteria*** *for* ***choice*** are developed and communicated in a timely and understandable way to those responsible for selecting the policy direction. 4.3 Where appropriate, specific policy options are promoted to key individuals, organisations and groups. 4.4 A preferred public policy option is identified and risk treatments are determined in accordance with the policy development plan. 4.5 Approvals/endorsements are obtained in accordance with the policy development plan and public sector procedures and protocols.
5. Draft public policy	5.1 Public policy is drafted using a cyclical process of consultation, feedback, identification of changes and re-drafting implemented in accordance with the policy development plan. 5.2 Risk management processes are implemented in accordance with the policy development plan to ensure progress of the process against the timeframe and milestones. 5.3 An implementation plan that details responsibilities for implementation and strategies for transition, change management, and initial and ongoing training and maintenance of the policy, is included within the policy. 5.4 Mechanisms for monitoring compliance with the policy, quality assurance of the policy, and for evaluation of the policy are included within the policy. 5.5 The policy is developed in accordance with ***organisational requirements for style, format and contents***.
6. Release and promote public policy	6.1 Public policy is cleared through required channels, and agreement of critical stakeholders is gained in accordance with the policy development plan. 6.2 All stakeholders, particularly those who will be responsible for implementing the new or revised policy, are fully informed of the ***outcomes***, and fallout from dissenting stakeholders is managed in accordance with the policy development plan.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	6.3 The policy is released and ***promoted*** in accordance with government requirements.
	6.4 Advice is provided to those affected by policy changes in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- reading and evaluating complex and formal documents such as policy and legislation
- researching, analysing and presenting information
- preparing written reports requiring precision of expression and language and structures suited to the intended audience
- working as a member of an inter-agency team to consult on and validate policy
- adjusting communication to suit different audiences
- responding to diversity, including gender and disability
- dealing with different points of view and dissenting stakeholders
- accessing policies and legislation electronically or in hard copy
- identifying and addressing the environmental, sustainability and occupational health and safety implications of policy/s being developed

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- policy development processes and practices in the public sector
- current policies underpinning the work area
- government procedures and protocols
- public sector code/s of ethics and code/s of conduct
- principles of community engagement in policy development
- equal employment opportunity, equity and diversity principles
- environmental, sustainability and occupational health and safety implications of policy/s being developed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPMNGT604B Manage change
  - PSPMNGT605B Manage diversity
  - PSPMNGT606B Manage quality client service
  - PSPMNGT608B Manage risk
  - PSPOHS602A Manage workplace safety
  - PSPPROC602B Direct the management of contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- development of public policy in a range of (2 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- public sector policy and legislation
- public sector standards, procedures and protocols
- policy development guidelines

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when developing public policy, including coping with difficulties, irregularities and breakdowns in routine
- development of public policy in a range of (2 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as

© Commonwealth of Australia, 2025 Skills Insight

literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Events may include:

- Machinery of Government changes
- a shift to designing policy around a set of government priorities not organisational structures/individual agencies
- a focus on whole of government policies
- changes to legal risks
- emphasis on policy research focused on the mid to long term, as well as that developed to meet immediate needs of government

© Commonwealth of Australia, 2025 Skills Insight

- national or international events such as:
  - change in government
  - changes in government policy
  - changes in strategic direction
  - changes in legislation
  - changes in the policies of other governments
  - changing social trends
  - economic/technological change

Public policy may include:

- ongoing policy formulation to meet the immediate needs of government
- evidence-based policy
- policy focused on the medium to long term
- any aspect of Australian life or public sector services or practices for which government considers policy development is required

Stakeholders may include:

- all those individuals and groups both inside and outside the government that have some direct interest in government conduct, actions, products and services, including:
  - employees at all levels of the public sector
  - government
  - Ministers
  - clients
  - the public
  - other public sector organisations
  - other jurisdictions
  - union and association representatives
  - boards of management
  - international governments
  - international bodies
  - community groups
  - non-government organisations
  - special interest groups
  - key individuals of influence

Approving authority may include:

- chief executive officer
- delegated officer, such as policy manager
- senior management
- board of management
- managing director

Issues may include:

- political sensitivities
- social and cultural sensitivities/factors

PSPREG401C Exercise regulatory powers

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers the exercise of powers under the organisation's enabling legislation, and other relevant legislation for regulation, monitoring, inspection and investigation. It includes establishing regulatory powers, applying enabling legislation, utilising other legislation and standards, and working with other organisations.

In practice, exercising regulatory powers occurs in the context of other specialist and generalist public sector work activities such as acting ethically, promoting client compliance, assessing compliance, conducting investigations, making arrests, conducting search and seizure, interviewing, gathering evidence, etc.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish regulatory powers	1.1 Current information relating to enabling ***legislation*** and regulations is accessed and used to maintain up-to-date knowledge of requirements. 1.2 Powers provided under the legislation and the boundaries of those powers are confirmed. 1.3 Compliance requirements of the legislation, related regulations, standards, codes of practice and policy are identified and confirmed. 1.4 Acts and omissions that comprise non-compliance/offences under the legislation are identified and confirmed.
2. Apply enabling legislation	2.1 Circumstances where regulatory powers will be exercised are identified and analysed to determine ***response/s or measures*** to apply, in accordance with the legislation and organisational policy and procedures. 2.2 Circumstances requiring the exercise of regulatory powers that are outside own limits are identified and referral to others is made in accordance with organisational policy and procedures. 2.3 ***Risks associated with the exercise of regulatory powers*** are identified and strategies to manage risks are identified in accordance with the organisation's risk management strategy. 2.4 Enabling legislation is applied consistent with the boundaries and powers contained therein and organisational policy and procedures.
3. Utilise other legislation and standards	3.1 ***Other legislation*** and ***standards*** which impact on powers are identified and their requirements confirmed. 3.2 Apparently conflicting legislative directions are resolved or referred in accordance with organisational policy and procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
4. Work with other organisations	4.1 Organisations that have jurisdictions which may overlap are identified and ***relationships*** are established and maintained in accordance with organisational policy and procedures. 4.2 Organisations available to provide assistance and advice or take referrals are identified and relationships are established for mutual benefit. 4.3 Organisational protocols and procedures are followed when working with ***other organisations***. 4.4 Compliance matters are referred to other organisations for action when required in accordance with organisational policy and procedures. 4.5 Lead agency protocols/lines of authority are followed during operations involving more than one organisation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking research and analysis
- using information technology to access relevant legislation and procedures
- reading complex written materials such as legislation, regulations, codes of practice and legal precedents and applying them to work practices
- using scanning techniques to locate main ideas in legislation, guidelines and policy documents
- engaging in discussion involving exchanges of often complex oral information
- communicating with a range of people from diverse backgrounds
- responding to diversity, including gender and disability
- choosing regulatory responses/measures to fit the circumstances and justifying those responses against legislation, guidelines, policy and regulations
- networking, building relationships and working with others
- applying occupational health and safety and environment procedures relating to the exercise of regulatory powers

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

© Commonwealth of Australia, 2025 Skills Insight

- full range of regulatory powers and the limits to those powers
- enabling legislation
- offences under the legislation
- aspects of criminal law, administrative law, industrial law, contract law
- statutory time limits
- applicable standards
- terminology used in legislation and procedures
- organisational policies, guidelines and regulations
- equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to the exercise of regulatory powers

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPCRT401B Carry out court orderly functions
  - PSPCRT402B Manage witnesses
  - PSPCRT403B Handle exhibits and documents tendered
  - PSPCRT404B Serve process
  - PSPCRT405B Handle monies received in satisfaction of warrants or orders
  - PSPCRT406B Compile and use official notes
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPREG402C Promote client compliance
  - PSPREG403B Assess compliance

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Legislation may include:

- State/Territory and Commonwealth legislation related to:
  - public sector management, financial management
  - auditor general
  - audit, customs and excise, quarantine, fisheries, agriculture, land management, conservation, coastal management, environmental protection, environment, insurance, legal administration (sheriffs, young offenders), workers compensation, occupational safety and health, workplace relations
  - planning, construction, transport, energy, mining, resource management, communications
  - education and children's services, employment, vocational education and training, equal employment opportunity and anti-discrimination

Regulatory responses or measures may include:

- audit
- caution
- clearance
- community protection

© Commonwealth of Australia, 2025 Skills Insight

- control
- encouragement to comply
- entry
- impoundment
- initiation of proceedings that may lead to prosecution
- inspection
- investigation
- issue of notices
- on-the-spot fines
- possession
- referral to another agency/jurisdiction
- search
- seizure
- surveillance
- warning

Risks associated with the exercise of regulatory powers may result from:

- workplace hazards
- environmental hazards
- equipment failure
- people engaged in illegal activities
- movement into and out of Australia of:
  - aircraft
  - cargo
  - people
  - postal articles
  - vessels
- client cultural background
- client literacy levels

Other legislation may include:

- aspects of common law
- aspects of Crimes Act 1914 and Criminal Code Act 1995
- contract law
- administrative law
- industrial relations law
- financial management Acts
- public service Acts

Standards may include:

- public sector standards
- government security standards
- fraud control standards

Relationships may include:

- informal
- formal

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Initiate preliminary investigation to confirm non-compliance	1.1 Information is assessed in terms of its accuracy and against legislative requirements to confirm likely non-compliance. 1.2 Information is tested against the legislation to confirm whether the possible breach falls within jurisdiction. 1.3 Importance/urgency of the matter is assessed and the priority is allocated to enable timely and effective action. 1.4 Documentation to commence investigation of alleged breach is initiated and meets legislative and organisational requirements.
2. Plan investigation	2.1 Objectives of the investigation are determined and ***resources*** to conduct the investigation are determined and obtained in accordance with organisational policy and procedures. 2.2 Risks associated with the investigation are identified and planned for, including sensitivities that might affect the organisation. 2.3 ***Methods*** to achieve the investigation's objectives are selected and authorised in accordance with ***legislation, policies and guidelines***. 2.4 Timelines are identified and tasks prioritised to inform the sequence of activities and provide for future review of the investigation process. 2.5 Communication and case management requirements are confirmed and initiated in accordance with organisational policy and procedures. 2.6 Investigation ***planning*** and recording is conducted in accordance with legislative requirements and organisational policy and procedures.
3. Conduct investigation	3.1 Subjects and suspects involved in the possible breach are identified and details are recorded in accordance with legislative

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	requirements and organisational policy and procedures.
	3.2 Information relevant to the investigation is collected and analysed in accordance with legislative requirements, rules of evidence and organisational policy and procedures.
	3.3 ***Exhibits*** are processed and managed in accordance with legislative requirements, rules of evidence and organisational policy and procedures.
	3.4 Likely defences are anticipated and evidence to counter them is included.
	3.5 The need for ***expert assistance*** is determined and arranged in accordance with organisational procedures.
4. Finalise investigation	4.1 If no breach has occurred or no action is to be taken, documentation includes reasons and justification, and is completed in accordance with organisational policy and procedures.
	4.2 If breach is confirmed, appropriate, timely ***action*** is ***recommended*** within the officer's discretion under the legislation and organisational policy and procedures.
	4.3 A record of the investigation and consequent recommendations for action are prepared and submitted in accordance with legislative and organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- acting ethically
- applying legislation, regulations and codes of practice
- using process mapping
- undertaking research, analysis and problem solving in the context of investigating non-compliance
- reading and applying complex information from legislation
- communicating including questioning and negotiating meaning in sometimes difficult situations
- responding to diversity, including gender and disability
- using planning and time management in the context of investigations
- preparing written reports and recommendations requiring accuracy and formal

© Commonwealth of Australia, 2025 Skills Insight

structures and language
- using information technology for data analysis, recording and reporting
- applying public sector legislation such as occupational health and safety and environmental procedures in the context of investigation

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- investigation methodology and techniques
- rules and types of evidence
- storage and continuity of evidence
- applicable legislation
- aspects of criminal, civil or administrative law
- jurisdiction, powers and restrictions to investigate
- organisational policy and procedures
- cultural awareness
- confidentiality and privacy issues
- procedures re lines of reporting
- report procedures which provide a written and/or electronic audit trail
- public sector legislation such as occupational health and safety and environment relating to investigations

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV406B Gather and analyse information
  - PSPGOV408A Value diversity
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector

© Commonwealth of Australia, 2025 Skills Insight

- PSPREG401C Exercise regulatory powers
- PSPREG407B Produce formal record of interview
- PSPREG412A Gather and manage evidence

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- investigation of non-compliance in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of investigation situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when investigating non-compliance, including coping with difficulties, irregularities and breakdowns in routine
- investigation of non-compliance in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios

© Commonwealth of Australia, 2025 Skills Insight

- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment	Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Resources may include:

- human, physical and financial and may include other agencies, such as:
  - other police organisations
  - National Crime Authority
  - Criminal Justice Commission/s
  - other government departments/agencies
  - non-government agencies such as financial institutions and insurance companies

Investigation methods may include:

- forensic examination/analysis
- informants/informers
- listening devices and other covert surveillance techniques
- search and search warrants
- computer interrogation/data retrieval
- door knocks
- using other sources of information, such as the media

Legislation, policies and guidelines may include:

- enabling legislation
- confidentiality
- privacy
- criminal, civil or administrative law
- contract law
- equal employment opportunity and anti-discrimination law
- disciplinary procedures
- government policy

© Commonwealth of Australia, 2025 Skills Insight

- organisational guidelines
- regulatory standards
- codes of practice
- international treaties (equal employment opportunity, world heritage)

Investigation planning may include:

- objectives
- methods
- risks
- timelines
- resources
- activities
- communication
- case management
- evidentiary elements of the offence

Exhibits may include:

- the individual items of evidence that could be presented to a court and may be required for viewing by:
- judicial officers
- prosecutors
- defence counsel
- expert and non-expert witnesses
- those required for audit purposes

Expert assistance may include:

- advice on/assistance with evidentiary matters
- audit matters
- data analysis
- document examination
- execution of search warrants
- fingerprinting
- forensic
- handwriting
- legal advice - director of public prosecutions, government solicitor
- photography
- recovery issues
- scientific or technical matters
- surveillance

Recommended action may include:

- measures to control/contain breach
- warning
- caution
- notice

© Commonwealth of Australia, 2025 Skills Insight

- fine
- arrest
- criminal prosecution
- civil action
- debt recovery strategy
- no action (must specify criteria for use of no action):
  - used where investigation identifies no offence or a relevant defence is raised
  - also used when exercising prosecutorial discretion

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for interview	1.1 ***Interview plan*** is developed in accordance with legislative, ethical and policy requirements. 1.2 Venue, ***equipment*** and ***personnel*** to be involved in/excluded from the interview are determined in accordance with legislative requirements and organisational guidelines. 1.3 ***Exhibits*** to be used in the interview are identified and made readily available for reference. 1.4 ***Risks*** associated with the interview are assessed and procedures for ensuring the safety of self and others are instigated.
2. Conduct and record interview	2.1 ***Interviewee*** is provided with ***preliminary advice*** and questioned to ensure their understanding of the ***interview process*** and their ***rights***. 2.2 ***Questioning techniques*** are used to gather information, and test and confirm its relevance, reliability and sufficiency, prior to concluding the interview. 2.3 Exhibits are introduced and fully described in accordance with legislative and organisational requirements. 2.4 Interview is ***conducted*** and ***recorded*** in accordance with the rules of evidence, ***legislative and organisational requirements*** so that outcomes are admissible in evidence. 2.5 Interview is ***concluded*** in accordance with legislative requirements, organisational policy and procedures. 2.6 A true record of interview is produced and ***post-interview procedures*** are completed in accordance with legislative timeframes and organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using interviewing techniques to suit a range of situations and interviewees, and varying style and language structure to suit a range of interviewees
- using techniques to defuse potentially dangerous situations
- engaging in exchanges of sometimes complex oral information
- using a range of communication techniques/methods that includes establishing rapport, reflective listening, probing, reflecting, negotiation, conflict resolution
- engaging in questioning that meets legal requirements for admissibility
- responding to diversity, including gender and disability
- undertaking research, analysis and problem solving
- using judgment, to test the veracity of information and vary questions and interviewing techniques to suit
- preparing interview documentation requiring accuracy of expression and formality in structure and format
- operating technical and electronic equipment, where necessary
- applying public sector standards and legislation such as occupational health and safety and environment in the context of formal interviewing

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- enabling and other relevant legislation
- organisational policies and guidelines relating to formal interviews
- interview techniques and points of proof
- rules of evidence and admissibility
- use of caution
- legal and ethical considerations for conducting interviews involving juveniles, Aboriginal and Torres Strait Islander peoples and disciplinary matters
- diversity issues in the context of interviewing suspects, witnesses and others
- procedures for using interpreters
- legal and organisational requirements for documentation
- legal requirements relating to electronic recording equipment
- public sector legislation such as occupational health and safety and environment relating to producing a formal record of interview

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPGOV408A Value diversity
  - PSPGOV422A Apply government processes
  - PSPREG401C Exercise regulatory powers
  - PSPREG412A Gather and manage evidence

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- formal records of interview produced in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to formal records of interview
- case studies and workplace scenarios to capture the range of situations likely to be encountered when conducting formal records of interview

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting formal records of interview, including coping with difficulties, irregularities and breakdowns in routine

© Commonwealth of Australia, 2025 Skills Insight

- conduct of formal records of interview in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Interview plan may include:

- allegation that is clear, unambiguous and concise, covering common proofs such as:
  - time
  - date

© Commonwealth of Australia, 2025 Skills Insight

- place
- jurisdiction
- identity

- proofs of an offence, such as:
  - evidence
  - corroboration
  - admissibility
  - elements
  - criminal intent
  - competence (e.g. age requirements, mental faculty etc)
  - legal presumptions
  - any anticipated or known defences
  - exculpations
  - key questions in sequential order, highlighting main points
- interview strategies appropriate to the situation and purpose of the interview, such as:
  - direct questioning
  - empathetic questioning
  - investigative interviewing
  - no leading questions
  - no double-barrelled questions
  - no cross-examination
- safety requirements for interviewer, interviewee and others present
- rapport building techniques
- strategies for working with uncooperative interviewees
- method of recording, and recordkeeping responsibilities

Equipment may include:

- recording equipment for:
  - tape recording
  - videotaping
  - electronic equipment
  - computer equipment
  - stationery

Personnel may include:

- second interviewer
- legal representatives
- consular representative
- senior staff
- colleagues
- interpreter

© Commonwealth of Australia, 2025 Skills Insight

- Aboriginal support persons
- independent person
- family member
- responsible adult in the case of juveniles
- special requirements that may apply for:
  - minor
  - disabled
  - age
  - gender
  - ethnicity
  - those needing to be excluded to maintain the integrity of the investigation

Exhibits may include:

- paper-based and electronic documents, including:
  - maps
  - photographs
  - videotapes
  - physical objects and materials
  - drugs
  - scientific evidence

Risks may include:

- uncooperative or hostile interviewee
- aggression
- violence
- distressed interviewee
- diversity issues

Interviewee may include:

- suspect (who may or may not be under arrest)
- witness
- informant
- informer
- complainant
- victim
- experts (such as persons with medical, scientific, legal or other specialist knowledge in the field)

Preliminary advice may cover:

- interview process
- interview time limits
- effect of prior interview/s occurring within previous 48 hours
- formal caution
- allegation
- voluntariness

© Commonwealth of Australia, 2025 Skills Insight

- recording requirements
- tape protocols (for chain of evidence requirements)
- number of interviewers
- statutory rights
- how the information gathered will be used

Interview process may include:

- purpose
- format/structure
- identification and personal details of interviewee
- roles of interviewers if more than one
- formal identification of interviewers
- full description of exhibits even if videotaped
- recording process, including use of new tapes, to be opened in front of the interviewee
- use of confirming questions, to obtain/record interviewee agreement regarding conduct of the interview and that the record of interview is accurate

Rights may include:

- caution
- legal representation
- consular representation
- interpreter
- silence
- notification of whereabouts to family/friends
- opportunity to make a written statement
- independent adult present (for juveniles)
- support person present (for Indigenous peoples, intellectually disabled)
- being treated with dignity and respect during searches and examinations
- know the purpose and intended use of the interview
- copy of taped record of interview within a given time
- copy of transcript of interview within a given time, if applicable
- sign/not sign statement

Questioning techniques may include:

- summarising
- re-phrasing
- paraphrasing
- clarifying questions
- open and closed questions
- cognitive interviewing
- using silence

© Commonwealth of Australia, 2025 Skills Insight

- establishing event lines or time lines
- non-leading questions

Conduct of interview includes:

- no threat, promise or inducement
- no unfair representation
- no physical abuse
- no acts of misconduct
- no duress
- no coercion
- adherence to standard operating procedures
- adherence to code/s of conduct and ethical requirements

Recording may include:

- audiotaping
- videotaping
- electronic data
- special arrangements, requests and activities not directly related to the interview such as:
  - persons present
  - times for breaks, such as toilet breaks
  - telephone calls
  - refreshments
  - medical attention
  - visitors
  - requests to see superiors
- meeting all legal and administrative requirements
- typewritten record of interview
- hand written record of interview

Legal and organisational requirements may include:

- complying with relevant Commonwealth, State/Territory legislation, such as Part 1C of the Crimes Act 1914
- observation of statutory time limits
- special arrangements for minors
- interviewees' legal rights which must be accorded to them throughout the interview
- ensuring suspects or witnesses understand their rights
- interviewee access to legal advice
- interviewee access to consular assistance
- union representation at interview
- presence of advocates for some groups, for example the intellectually disabled
- special arrangements for the interview of Aboriginal and Torres Strait Islander peoples
- special arrangements for the interview of people who do not

© Commonwealth of Australia, 2025 Skills Insight

	speak English • unwrapping new tapes in front of interviewee at commencement of interview • implementation of organisation agreements • arrangements for written statement when appropriate • other jurisdictional requirements
Concluding the interview may include:	• asking for a concluding statement • confirming that the information given was voluntary • agreement on time of conclusion of interview
Post-interview procedures may include:	• clearly labelling tapes • providing a copy of the audio or video tape to the interviewee at the close of the interview or within statutory time limit • transcribing the record of interview • providing a copy of the transcribed record of interview or statement to the interviewee at the close of the interview or within statutory time limit • securing record of interview in accordance with legislative and organisational requirements • security classification of information • sealing and securing master tape or data • securing recording equipment • acknowledging, signing and verifying record of interview by interviewee, where appropriate • processing/referral of alleged offender • completing organisational records/reports/files

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Analyse evidence**	1.1 All related information is considered, whether likely to be admissible as evidence, or not. 1.2 Information is cross-checked to confirm origin, authenticity and reliability, and to anticipate challenge/s that may occur. 1.3 Gaps and inadequacies are identified and assessed to allow further collection of evidence where possible. 1.4 Information is handled and stored in accordance with legislative requirements and organisational policy and procedures.
2. **Prepare and review admissible evidence**	2.1 Witness and expert statements are prepared in accordance with legislative requirements and organisational policy and procedures. 2.2 ***Evidence*** is prepared in accordance with legislative requirements and organisational policy and procedures. 2.3 All evidence is included in the brief that is likely to be admissible by the court. 2.4 Non-admissible evidence is separated and retained. 2.5 Similar proofs are identified and reviewed to confirm that evidence is sufficient to proceed to prosecution. 2.6 Security, recording and continuity of evidence are maintained in accordance with legislative requirements and organisational policy and procedures.
3. **Develop a brief of evidence**	3.1 Brief of evidence is planned and prepared according to ***standards*** required by the ***prosecution***. 3.2 All ***required information*** is included in the brief and meets all legal requirements. 3.3 Brief is provided to prosecution and other parties as required by law and organisational requirements. 3.4 When required, counsel is briefed on the case and any

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	circumstances that may affect the progress and outcomes.
4. Coordinate witnesses	4.1 When required, expert witnesses are identified, familiarised with the evidence, and utilised in accordance with organisational policy and procedures.
	4.2 When required, witness summonses are organised in accordance with legal and organisational requirements.
	4.3 Contact is maintained with ***witnesses*** to ensure cooperation, communication and attendance at ***proceedings***.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking analysis and research
- undertaking collation and compilation
- writing complex documents - reflecting key points of oral statements in written form in witness statements and in the brief of evidence
- report writing using formal structures and language
- making comparisons and exercising judgment about facts in written materials
- communicating with witnesses from diverse backgrounds
- responding to diversity, including gender and disability

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- sections of Evidence Act, Justice Act relating to preparation of a brief of evidence
- admissible evidence
- burden of proof
- court hearing procedures
- rules of evidence
- requirements of brief of evidence
- principles of disclosure
- anti-discrimination law
- organisational policies, guidelines and regulations
- equity and diversity principles

© Commonwealth of Australia, 2025 Skills Insight

- public sector legislation such as occupational health and safety and environment relating to the preparation of a brief of evidence

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- presenting evidence clearly and concisely
- writing reports
- word processing
- taking notes
- communicating with people from diverse backgrounds
- responding to diversity, including gender and disability
- making comparisons and exercising judgment about facts in written materials
- report writing using formal structures and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of giving evidence

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- court prosecution processes
- common law versus judicial precedent versus legislation
- specific powers of the organisation
- court/tribunal/commission structures
- jurisdiction of each court/tribunal/commission
- appeals systems
- role of legal personnel in judicial or quasi-judicial systems
- procedures and protocols in different judicial or quasi-judicial systems
- types of offences
- general principles of criminal liability
- exemptions and defences
- types of evidence admissible in judicial or quasi-judicial systems
- legislative requirements of presenting evidence
- use of notes in court/tribunal/commission
- organisation policies and procedures relating to preparation of documents and evidence and providing expert opinion
- public sector legislation such as occupational health and safety and environment relating to the presentation of evidence

© Commonwealth of Australia, 2025 Skills Insight

- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPGOV408A Value diversity
  - PSPGOV419A Work with interpreters
  - PSPGOV422A Apply government processes
  - PSPREG401C Exercise regulatory powers

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- giving evidence in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to presentation of evidence
- case studies and workplace scenarios to capture the range of likely offences for which evidence needs to be presented

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when giving evidence, including coping with difficulties, irregularities and breakdowns in routine
- giving evidence in a range of (3 or more) contexts (or

© Commonwealth of Australia, 2025 Skills Insight

occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Arrangements for, role and involvement may include:

- confirmation of time, date and location of proceedings
- confirmation of evidence required to be presented
- working with/briefing legal counsel

Proceedings may include:

- criminal, coronial and civil courts
- defence tribunals

© Commonwealth of Australia, 2025 Skills Insight

- industrial relations commissions
- State industrial tribunals
- workers compensation tribunals
- human rights commissions
- equal opportunity commissions
- land and environment courts
- royal commissions
- disciplinary hearings
- administrative reviews
- Parliamentary hearings

Documentation and exhibits may include:

- reports
- photographs
- items of evidence
- media footage
- reports of incidents
- files, correspondence, meeting notes
- radio/telephone record logs

Legislation, policy and procedures may include:

- legislation relevant to proceedings
- legislation relevant to the organisation
- operational performance standards
- organisational personnel practices and guidelines
- organisational quality standards

Witnesses may include:

- those directly involved
- bystanders
- experts
- organisational personnel
- distressed or unwilling witnesses
- complainants

Protocols may include:

- rules of court
- correct mode of address for judges, magistrates and other court users, in and out of court
- procedures for entering and leaving a courtroom
- complying with security procedures
- file handling procedures
- procedures for handling exhibits

Rules of evidence include:

- admissibility
- contemporaneousness

Deciding authority may

- magistrate

© Commonwealth of Australia, 2025 Skills Insight

include:	• judge
Evidence may include:	• different aspects in chief, cross-examination and re-examination
Standards for giving evidence may include:	• voice clarity • language • impartiality • respect for people and offices held • standards of dress • forms of address
Required action may include:	• follow-up action with legal authorities • re-listing for conciliation conference or arbitration • dealing with evidence, which may include disposal • preparing agreed orders • updating files • closing files

PSPREG411A Gather information through interviews

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers gathering information through interviews that do not result in a formal record of interview in the legal sense. Interviews may be conducted in a range of locations for a range of reasons. They may be overt or covert. The unit includes preparing for the interview, conducting the interview, and reviewing and correlating interview information.

Verbal questioning and other interactions undertaken outside a formal interview structure are not addressed in this unit as these are covered in other communication units in the Training Package, such as *PSPGOV412A Use advanced workplace communication strategies*.

In practice, gathering information through interviews may overlap with other generalist or specialist public sector work activities such as acting ethically, exercising regulatory powers, applying government processes, gathering and analysing information, assessing compliance, receiving and validating information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for interview	1.1 The need for an interview is determined, and the ***context*** and ***requirements*** are established in accordance with ***organisational and legislative requirements***. 1.2 Interview ***planning*** is undertaken to ensure desired outcomes are achieved. 1.3 Interview arrangements are made in accordance with legislative and organisational requirements. 1.4 ***Materials*** to be used during the interview are prepared as required. 1.5 Advice is obtained as required on legislative or administrative issues relating to the conduct of the interview.
2. Conduct interview	2.1 Commencement of the interview is undertaken following organisational ***protocols*** and complies with legislative requirements. 2.2 Interview is conducted in a planned manner, with the sequence evident to others who may use the outcomes. 2.3 ***Questions*** are selected and used that are relevant, comprehensive, appropriate to the situation and the interviewee and adhere to the rules of evidence. 2.4 Problem solving skills are used to test, compare and contrast information as it is provided to influence the direction of further questions. 2.5 Information is ***recorded*** in accordance with organisational policy and procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.6 Personal conduct is maintained in accordance with legal and organisational requirements and takes account of cultural and ethical issues.
3. Review and correlate information	3.1 Information is reviewed and clarified to ensure its relevance and sufficiency prior to concluding the interview.
	3.2 Information is transcribed if necessary and sensitive information is ***dealt with*** in accordance with organisational policy and procedures.
	3.3 Detailed analysis is conducted, and incomplete and irregular information is identified and noted or followed up in accordance with the nature of the interview and organisational requirements.
	3.4 Behavioural characteristics of significance to the purpose of the interview are confirmed.
	3.5 ***Post-interview activities*** are undertaken as required in accordance with organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- using interviewing techniques to suit a range of situations and interviewees
- engaging in exchanges of sometimes complex oral information
- varying style and language structure to suit a range of interviewees
- using techniques to deal with difficult interview situations
- using a range of communication techniques that include establishing rapport, listening, probing, reflecting, negotiation, conflict resolution
- responding to diversity, including gender and disability
- using critical analysis, evaluation and deductive reasoning
- using problem solving and decision making related to interviewing
- using judgment, to test the veracity of information and vary questions and interviewing techniques to suit
- preparing interview documentation requiring accuracy of expression and formality in structure and format
- operating technical and electronic equipment, where necessary
- applying public sector standards and legislation such as occupational health and

© Commonwealth of Australia, 2025 Skills Insight

safety and environment in the context of interviewing

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- application of legislation to interviewing including privacy, ethics, confidentiality and freedom of information
- organisational policies and guidelines relating to interviews
- questioning techniques
- legal and ethical considerations for conducting interviews
- cultural awareness in the context of interviewing
- procedures for using interpreters
- legal and organisational requirements for documentation
- legal requirements relating to recording of information
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment, relating to interviews

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service

- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Contexts may include:

- informal interviews
- interviews against set criteria
- interviews to assess applications
- initial investigation of complaints
- audits
- intelligence gathering
- threat assessment
- security vetting
- overt interviews
- covert interviews, under specific legislative powers

Requirements may include:

- interview location/environment:
  - office
  - designated interview room
  - in the field (including overseas)
  - private home
  - at a client/contractor location
  - in other agencies
- timing
- personnel present:
  - senior staff
  - colleagues
  - interpreter
  - support persons

© Commonwealth of Australia, 2025 Skills Insight

- method of recording:
  - tape recording
  - videotaping
  - hand written
  - typewritten/word processed
  - file notes
- equipment:
  - electronic equipment
  - recording equipment
  - computer equipment
- availability of interviewee

Organisational and legislative requirements may include:

- organisational policy, procedures and guidelines
- international treaties and protocols
- cross-jurisdictional protocols
- organisation's strategic objectives
- national strategic objectives
- security constraints
- public sector codes of conduct/ethics
- confidentiality requirements
- Commonwealth, State/Territory or Local Government legislation such as:
  - Freedom of Information Act 1982
  - Privacy Act 1988
  - Archives Act
  - Crimes Act 1914 and Criminal Code 1995
  - Evidence Act
  - the organisation's enabling legislation

Interview planning may: include

- purpose
- structure
- context
- expectations
- intended/desired outcomes
- criteria for assessment
- risk management considerations
- key questions in sequential order, highlighting main points
- assessing sources of information
- interview strategies appropriate to the situation and purpose of the interview, such as:
  - direct questioning

© Commonwealth of Australia, 2025 Skills Insight

- empathetic questioning
- investigative interviewing
- exclusion of leading questions
- avoidance of cross-examination

- safety requirements for interviewer, interviewee and others present

Materials may include:

- paper-based and electronic documents, including:
  - maps
  - photographs
  - videotapes
  - physical objects and materials
  - audiotapes

Commencement protocols may include:

- introductions
- producing identification/authority
- explaining the purpose, process and recording requirements
- confirming confidentiality of information, if appropriate to the interview purpose

Questioning techniques may include:

- summarising
- re-phrasing
- paraphrasing
- open and closed questions
- cognitive interviewing
- using silence
- active listening
- using and recognising body language
- identifying and overcoming barriers to communication
- investigative interviewing techniques

Recording may include:

- hand written record of interview
- typewritten record of interview
- audiotapes
- videotapes

Dealing with sensitive information may include:

- information security procedures

Post-interview activities may include:

- interview report
- interview assessment report
- informal judgment
- recommendations with supporting reasons/evidence
- suggesting solutions to problems encountered during the interview

© Commonwealth of Australia, 2025 Skills Insight

- informing stakeholders of outcome of interview
- providing briefings on outcomes

PSPREG412A Gather and manage evidence

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor, evidence guide and range statement edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake all activities involved in gathering and managing evidence. It includes planning and activating evidence collection, identifying persons of interest, collecting and storing evidence, and summarising and reporting on evidence.

Licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to individuals in a range of regulatory work environments whose role includes gathering and managing physical or documentary evidence from a range of sources such as search and seizure activities, online research, interviews with persons of interest, audits

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and activate evidence collection	1.1 ***Evidence*** requirements are researched to establish the type and standard of evidence and ***resources*** required when the size of investigation and/or type of offence/s require this. 1.2 Approval to commence investigation is obtained in accordance with organisational policy and procedures. 1.3 Plan of action is agreed in accordance with organisational policy and procedures, and communication and review processes are established. 1.4 Evidence recording process is put in place in accordance with organisational guidelines and legislative requirements.
2. Identify persons of interest	2.1 Possible witnesses are identified, located and contacted to request that they provide information. 2.2 Particulars of witness/es are documented according to correct evidentiary procedures. 2.3 ***Responsible parties*** are identified, located and their ***particulars*** are recorded in accordance with correct evidentiary procedures. 2.4 Responsible parties are contacted for interview in accordance with organisational procedures and legislative requirements, and informed of the nature of the investigation, if required by law.
3. Collect and store evidence	3.1 ***Authority to search*** is obtained/verified, involving other organisations where necessary. 3.2 Evidence is identified, ***collected***, ***labelled***, recorded and preserved according to exhibit management principles for later use in proceedings. 3.3 Evidence is ***managed*** in accordance with the principles of continuity of possession, ***legislation and standards***. 3.4 Corroboratory evidence is collected, documented and preserved. 3.5 ***Expert*** skills and knowledge are accessed when necessary to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	further assist staff in areas where they cannot or are not authorised to act.
	3.6 Constant review is implemented during evidence collection to enable gaps and inadequacies to be addressed in accordance with organisational policy and procedures.
4. Summarise and report on evidence	4.1 Verbal and written summaries/***reports*** are made in accordance with legislative and organisational requirements.
	4.2 Outcomes of investigation are entered into data management systems according to organisational guidelines.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- organising and problem solving
- liaising and negotiating
- communicating with people from diverse backgrounds
- responding to diversity, including gender and disability
- making comparisons and exercising judgment about facts in written materials
- report writing using formal structures and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of gathering and managing evidence

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- rules of evidence relevant to the jurisdiction
- evidence legislation relevant to the jurisdiction
- legislation which contains the offence/s under investigation
- document management systems
- exhibit management principles
- organisational policies, guidelines and regulations
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to gathering and management of evidence

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms consistency of performance in gathering and managing evidence.

This will include evidence of:

planning for, collecting, storing and reporting on evidence (including through interview) for at least three actual or simulated siatuions on three separate occasions or for three different situations/contexts

adhering to legal, ethical and organisational requirements relating to gathering and managing evidence.

Context of specific resources for assessment

Assessment must ensure access to a real or simulated workplace environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered while gathering and managing evidence, including coping with difficulties, irregularities and breakdowns in routine.

Access is required to resources such as:

- applicable legislation, policies and procedures
- case studies and workplace scenarios to capture the range of requirements for situations likely to be encountered

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit of competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- written or oral questions
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

Guidance information for assessment

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

© Commonwealth of Australia, 2025 Skills Insight

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Evidence may include:
- real, oral, computer data or documentary
- photographic or video
- new evidence which results in reopening an investigation
- requirements identified in an evidence guide or evidence matrix

Establishing resource requirements may require:
- an estimate of the costs of gathering evidence

Responsible parties may include:
- suspects
- alleged offenders
- obligation holders
- employers
- principal contractors
- owners
- operators

Particulars of responsible parties may include:
- personal details
- identification of assets and entitlements for criminal or civil recovery purposes

Authority to search may include:
- warrant already issued
- no requirement for search warrant under powers of enabling legislation
- affidavit
- confirming the legal basis for the search and seizure

© Commonwealth of Australia, 2025 Skills Insight

	• appropriate information to ground a warrant • requirement to obtain search/seizure warrant before proceeding • organisational approval/s to undertake search and seizure • completion/submission of organisational documents relating to planned search and seizure • the need for assistance from other agencies/jurisdictions • referral to other agencies
Evidence collection may include:	• voluntary submission • acquisition through legislative powers • following new lines of inquiry suggested during the process of gathering evidence • cautions • safeguards
Labelling of evidence may include:	• date • time • location • details of person/s giving the evidence • person/s collecting the evidence
Evidence management may include:	• systematic recording (such as dating and numbering) • indexing and labelling system • using written or electronic database systems • referral to prosecution organisations at any stage • constant reviews during an investigation • restricting access to evidence • and must follow the principals of chain of evidence/rules of evidence
Legislation and standards may include:	• relevant Commonwealth/State/Territory legislation and guidelines • ethical and conduct standards • judicial standards which must be followed in evidence collection to ensure the continuity of possession and admissibility of the evidence • organisational policies and procedures

Expert skills and knowledge may include:	• police, other law enforcement agencies
	• private provider
	• standards setting organisation
	• input such as:
	  • search warrant
	  • surveillance

© Commonwealth of Australia, 2025 Skills Insight

- scientific analysis

Reports may be:

- to finalise case
- to inform team members and management
- to refer to other sections or organisations
- to prepare for final summation in proceedings
- edited and security coded for a particular audience

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Receive information**	1.1 Required ***information*** is identified, requested and/or received in accordance with legislative powers, organisational policy and procedures.
	1.2 Incoming information is checked for gaps, anomalies, deficiencies or discrepancies, and compared with pre-existing information, where relevant.
	1.3 Additional ***data sources*** are accessed and information is obtained to fill gaps and compare with information received.
	1.4 Incoming information is receipted if required in accordance with organisational policy and procedures.
2. **Record information**	2.1 Accurate recording of information is carried out in line with organisational procedures, confirming relevant details of source.
	2.2 Records are maintained as accurate, complete and up-to-date and are presented in the required format.
	2.3 Legislative requirements for recording and storage of information are complied with.
	2.4 Procedures for storage and management of confidential and sensitive information are adhered to.
3. **Verify authenticity of information**	3.1 Initial selection of information is completed using preliminary cull to eliminate unreliable data.
	3.2 Information is corroborated and assessed for its integrity, validity and reliability.
	3.3 Validation or corroboration is carried out with existing information as well as information from outside organisations and other sources where relevant.
	3.4 Useful and useable information is extracted, interpreted and organised in a form that is accessible to users.
	3.5 Analysis is conducted in accordance with agreed indicators and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	assessment is accurate, relevant and complete.
4. Recommend/take action as a result of information received	4.1 Outcomes are recorded and reported in accordance with organisational policy and procedures.
	4.2 Actions are recommended or taken as a result of the outcomes.
	4.3 Decision is documented showing reasons for proceeding/not proceeding or taking other action, after discussion with management, where required.
	4.4 Areas or other organisations that may be affected by information received or outcomes, are identified and informed, in accordance with organisational procedures and legislative requirements, to optimise usefulness of information.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking research and critical analysis
- using deductive reasoning and evaluation techniques related to information analysis and corroboration
- communicating with a range of diverse clients and staff
- responding to diversity, including gender and disability
- using problem solving and decision making
- using information technology for managing records and files
- applying occupational health and safety and environmental procedures in the context of receiving and validating data

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- public sector legislation, standards and codes of practice
- organisational policy, procedures and guidelines
- international treaties and protocols where these apply
- legislation for freedom of information, privacy, security, occupational health and safety, Crimes Act 1914 and Criminal Code Act 1995
- legislation and procedures relating to public interest disclosures, protected disclosures or whistleblowing
- indicators for analysis of data

© Commonwealth of Australia, 2025 Skills Insight

- profiles and trends related to activities within the organisation
- management of secure information
- equity and diversity principles
- occupational health and safety and environmental considerations relating to receiving and validating data

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC401A Uphold and support the values and principles of public service
  - PSPGOV408A Value diversity
  - PSPGOV422A Apply government processes
  - PSPLEGN401A Encourage compliance with legislation in the public sector
  - PSPREG401C Exercise regulatory powers
  - PSPREG405B Act on non-compliance
  - PSPFRAU401B Monitor data for indicators of fraud

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- receipt and validation of data in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, regulations, policy, guidelines and standards relating to receipt and validation of data

© Commonwealth of Australia, 2025 Skills Insight

- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of situations likely to be encountered when receiving and validating data

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when receiving and validating data, including coping with difficulties, irregularities and breakdowns in routine
- receipt and validation of data in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics i***n the Performance Criteria is explained here.

Information may be:

- written
- oral
- photographic
- electronic
- classified
- not in the public domain
- financial
- personal:
  - academic qualifications/academic transcripts
  - birth certificate
  - citizenship
  - decree nisi/decree absolute
  - deed poll
  - discharge certificate
  - employment histories
  - marriage certificate
  - passport
  - travel documents
- about clients or staff
- checked for age, compatibility and validity

Data sources may include:

- applications
- correspondence
- declarations
- diary entries
- electronic records
- email
- fax records
- files
- graphics
- incident reports

PSPREG418A Advise on progress of investigations

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers ongoing review of activities throughout an investigation to ensure the effective outcome of the investigation. It includes summarising and reporting on the progress of an investigation, identifying and analysing problems and recommending further action.

In practice, advising on the progress of investigations may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.	Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. **Summarise and report on progress of investigation**	1.1 Ongoing monitoring of the investigation, changes in direction and resource implications are recorded and reported. 1.2 ***Progress***, problems and resource usage are reviewed in accordance with the investigation plan. 1.3 Progress reports/***briefings*** are prepared and disseminated in accordance with organisational requirements. 1.4 Records and systems are ***secured*** and updated regularly in accordance with organisational policy and procedures.
2. **Identify and analyse problems**	2.1 Problems are recorded and suggestions made for resolving or referring them. 2.2 ***Modifications*** to the process of investigation are suggested and solutions are implemented where practicable. 2.3 Referral of the investigation to another agency is recommended where jurisdiction/resources make this the preferred option under organisational policy and procedures. 2.4 If no further action is to be taken on an investigation, reasons and supporting documentation are recorded in accordance with organisational policy and procedures. 2.5 If an investigation is terminated, recommendations for referral to another organisation are made if appropriate and are documented for the organisation's information in future similar cases.
3. **Recommend further action**	3.1 Any ***areas of potential risk*** identified by/affecting the investigation are notified in accordance with organisational policy and procedures, together with suggestions for early intervention measures. 3.2 Suggestions are made regarding further avenues of enquiry. 3.3 ***Follow-up tasks*** are identified and actioned in accordance with

ELEMENT	PERFORMANCE CRITERIA
	organisational policy and procedures.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking analysis and problem-solving
- engaging in exchanges of sometimes complex oral information
- varying style and language during briefings to suit a range of audiences
- responding to diversity, including gender and disability
- writing summaries, briefing papers and reports requiring clarity, accuracy and formality of structure and language
- applying public sector standards and legislation such as occupational health and safety and environment in the context of investigations

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation relating to the offences under investigation
- procedures for investigation
- administrative legislation relating to the organisation
- organisational guidelines for reporting and information management
- legal and organisational requirements for documentation
- ethical standards
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment relating to the conduct of investigations

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed

- *Pre-requisite* units that must be achieved prior to this

© Commonwealth of Australia, 2025 Skills Insight

together	unit:*Nil*
	• *Co-requisite* units that must be assessed with this unit:*Nil*
	• *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
	  • PSPETHC401A Uphold and support the values and principles of public service
	  • PSPLEGN401A Encourage compliance with legislation in the public sector
	  • PSPGOV422A Apply government processes
	  • PSPREG401C Exercise regulatory powers
	  • PSPREG404C Investigate non-compliance
	  • PSPREG412A Gather and manage evidence
	  • PSPREG419A Finalise and report on investigations

Overview of evidence requirements	In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms: • the knowledge requirements of this unit • the skill requirements of this unit • application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework) • advice on the progress of investigations in a range of (3 or more) contexts (or occasions, over time)
Resources required to carry out assessment	These resources include: • legislation, policy, procedures and protocols relating to investigations • case studies and workplace scenarios to capture the range of situations likely to be encountered when advising on the progress of an investigation
Where and how to assess evidence	Valid assessment of this unit requires: • a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when advising on the progress of investigations, including coping with difficulties, irregularities and breakdowns in routine • advice on the progress of investigations in a range of (3 or more) contexts (or occasions, over time) Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as: • people with disabilities • people from culturally and linguistically diverse

© Commonwealth of Australia, 2025 Skills Insight

backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Progress in an investigation requires:

- effective administrative processes for all aspects of the investigation
- appropriate resource allocation
- correct evidence collection and management
- availability of witnesses and evidence
- authorisations (e.g. from an authorised justice)

Briefings may include:

- written
- oral

© Commonwealth of Australia, 2025 Skills Insight

	• formal • informal
Securing records and systems may include:	• standard security procedures • security classification of records • restricting access to records • restricting electronic access to systems • restricting physical access to systems and records
Modifications may include:	• re-evaluating the resources of the investigation • referring the matter to another organisation

Areas of potential risk may include:	• those affecting the investigation:
	  • public interest in investigation
	  • hostile witness/es
	  • ill-health of witness
	  • flight risk of those being investigated
	• those identified by the investigation:
	  • potential for fraud/corruption elsewhere in an organisation or other organisations
	  • inadequate security arrangements uncovered
	  • likelihood of other potential perpetrators

Follow-up tasks may include:	• referrals to prosecution organisations • completion of documentation • referral for recovery action, which may be accompanied by liquidity analysis • reporting results to superiors • updating files

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency.

Together, performance criteria specify the requirements for competent performance. Text in ***bold italics*** is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan investigation	1.1 Objectives and desired outcomes of the ***investigation*** are identified, documented and communicated to investigation team. 1.2 Relevant legislation is reviewed and ***stakeholders*** are consulted to ensure sound preparation for the investigation. 1.3 Resource requirements are identified and authorised after considering other organisational needs. 1.4 Communications strategy is established in consultation with team. 1.5 Continuous review mechanisms are put in place to monitor the progress of the investigation. 1.6 ***Investigation management system*** is used to develop investigation plan, allocate resources and provide for systematic recording of investigation decisions.
2. Prepare for investigation	2.1 An evidence matrix is developed and updated as required. 2.2 Assessment is made of possible avenues of enquiry. 2.3 Elements/proofs of the offence are determined and witnesses are identified. 2.4 Consultation is conducted with other organisations when investigation impacts on their organisation. 2.5 Potential for recovery action is assessed and liaison occurs with appropriate authorities to determine when recovery action should begin and what is involved.
3. Lead and support investigation team	3.1 Personnel are allocated to the investigation based upon their skills, knowledge and abilities in relation to the requirements of the investigation. 3.2 Specialist resources are located internally and externally to facilitate successful outcome. 3.3 Administrative support is organised from commencement of investigation. 3.4 Ongoing advice and support are provided to the team in accordance with the requirements of the investigation.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	3.5 Investigation plan is revised as required in response to ***contingencies*** in consultation with investigative team, and incorporating suggestions where practicable.
4. Monitor progress of investigation	4.1 Investigation is monitored against the requirements of the continuously updated investigation plan.
	4.2 Evidence collection and handling of witnesses/alleged offenders is monitored to ensure conduct is in accordance with rules of evidence and procedural fairness considerations.
	4.3 Team members are regularly consulted on progress of the investigation in both informal situations and scheduled reviews.
	4.4 Obstacles encountered during the investigation are discussed and solutions found.
	4.5 ***Key tasks***, deadlines and timelines are monitored, risks anticipated and extra resources and/or external expertise authorised as required in accordance with the investigation are plan.
	4.6 Requirement for specialists is monitored to ensure their cost-effective use.
5. Finalise and report on investigation	5.1 Final stage of investigation is supervised to ensure conclusion in court or other body if appropriate.
	5.2 Investigation is finalised within (revised) budget and time restrictions and results are recorded in accordance with legislative and organisational requirements.
	5.3 Administrative/recovery actions are initiated where appropriate.
	5.4 Witnesses, alleged offenders and other persons/organisations affected by the investigation are provided with sufficient information about the outcome.
	5.5 If planned outcome is not achieved, follow-up actions are planned to progress to next stage or to take no further action.
	5.6 Reports are made to management on outcomes relevant to future compliance activities particularly on how organisational procedures assisted or impeded investigation.
6. Conduct debriefing	6.1 Activities are reviewed against objectives and outcomes of the investigation.
	6.2 Strengths and weaknesses in investigation process are highlighted for future investigations.
	6.3 Precedents and problems are noted for future investigations.
	6.4 Achievements are acknowledged through formal and informal means.
	6.5 ***Debriefing report*** is prepared in accordance with organisational policy and procedures.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- undertaking project management that contributes to achieving stated objectives of the investigation and effective utilization of resources
- managing contracted services and specialist staff where required
- writing reports requiring formal language and structure and precision of expression
- using communication to suit a range of audiences
- conducting complex oral exchanges in briefing sessions and team meetings
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of investigations

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- the role of investigations in achieving the organisation's strategic compliance objectives
- Australian Government Investigation Standards (AGIS)
- legislative and jurisdictional requirements
- organisational policy and procedures
- aspects of criminal, civil or administrative law as apply in that jurisdiction
- investigation methodology and techniques
- powers and restrictions to investigate
- rules and types of evidence
- report procedures which provide a written and/or electronic audit trail
- confidentiality and privacy issues
- procedures regarding lines of reporting
- storage of evidence
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of investigations

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms consistency of performance in coordinating investigation processes.

This will include evidence of:

- coordinating at least three actual or simulated investigations, on three separate occasions or for three different situations/contexts
- adhering to legal, ethical and organisational requirements relating to investigations.

Context of and specific resources for assessment

Assessment must ensure access to a real or simulated workplace environment that closely resembles normal work practice and replicates the range of conditions likely to be encountered while coordinating investigation processes, including coping with difficulties, irregularities and breakdowns in routine.

Access is required to resources such as:

- applicable legislation, policies and procedures
- case studies and workplace scenarios to capture the range of requirements for situations likely to be encountered
- technology for investigation management systems.

Method of assessment

Assessment methods suitable for valid and reliable assessment of this unit of competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- written or oral questions
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses.

Guidance information for assessment

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

© Commonwealth of Australia, 2025 Skills Insight

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Investigations may include:	• complete investigations • joint investigations with other agencies • parts of investigations carried out in-house • outsourced investigations • those referred to other relevant law enforcement agencies (for example police, Independent Commission against Corruption, Criminal Justice Commission) • formal enquiries that do not proceed to investigation
Stakeholders may include:	• law enforcement agencies • standards setting organisations • other government agencies • industry group • informants
Investigation management system may include:	• review process • level of financial and human resources required • use of IT case
Action may include:	• recovery action

Contingencies may include:	• receipt of new information
	• changes in:
	  • times
	  • budgets

© Commonwealth of Australia, 2025 Skills Insight

- plans
- staff

Key tasks may include:

- authorities, powers and limitations on those monitoring the collection and handling of evidence which is vital to the outcome of investigation
- updating information systems and recording

Debriefing report includes:

- whether desired result was achieved
- why the investigation succeeded or failed
- aspects to be used/avoided in the future
- details of issues and recommendations

Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use information-gathering techniques	1.1 ***Potential sources of information*** are identified and assessed 1.2 Identified sources of information are utilised 1.3 Information is obtained from identified sources, in accordance with organisational guidelines, Freedom of Information and Privacy legislation 1.4 ***Informants*** are cultivated and managed 1.5 Persons/locations of interest are monitored
2. Evaluate information	2.1 Elements of offence and coronial needs are identified 2.2 Persons/locations of interest are identified and profiles maintained 2.3 All potential intelligence/***evidence*** is identified from obtained information 2.4 The validity and integrity of the information is evaluated fairly and objectively 2.5 Relevant information is used to inform decision-making 2.6 Information is corroborated independently where possible
3. Respond to information	3.1 Information is placed into relevant information systems in accordance with organisational policy and procedures 3.2 Information is communicated to relevant areas 3.3 Security of information is maintained 3.4 Information gathered is responded to through immediate action or further inquiry or filing

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

© Commonwealth of Australia, 2025 Skills Insight

- written and oral communication (listening, establishing rapport, public relations, negotiation, conflict resolution, feedback)
- sourcing
- collecting and evaluating diverse pieces of information
- using information storage and retrieval systems
- classifying information
- validating information
- compliance with operational safety guidelines when dealing with informants
- identifying and managing informants
- disseminating information in appropriate forms

Required Knowledge

- organisational corporate goals and objectives
- legislation and organisational guidelines relevant to information collection
- storage and retrieval including FOI and Privacy legislation
- organisational guidelines for dealing with informants
- investigative processes
- including surveillance and intelligence processes pertaining to the area of investigational responsibility
- information sources
- security classification criteria and dissemination protocols
- information evaluation processes for establishing validity and reliability
- professional codes of conduct/ethics relating to the investigatory process

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the gathering of information that is accurate and relevant to the investigation. **Consistency in performance** Evidence of competency in this unit will need to be gathered over time and from across a range of simulated and/or actual workplace activities.
Context of and specific resources for assessment	**Context of assessment** Evidence should be gathered over a period of time in a range of actual or simulated workplace environments. **Specific resources for assessment** No special requirements.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Potential sources of information may include:

- internal (documents/databases, intelligence, specialist sections such as covert/surveillance policing, technical services and forensic services and other police)
- external (witnesses, victims/suspects/informants/ informers, government agencies and authorities, private agencies, literature, members of the public, surveillance)

Informants may be cultivated and managed in the following ways:

- researching background reliability
- communicating with persons at all levels
- recording information accurately
- displaying knowledge of specialist crime culture and terminology
- identifying motives of informants (these may include money, revenge, consideration of penalty, civic duty)
- controlling informants effectively
- registering informants correctly
- maintaining personal integrity
- anonymity and own counsel
- maintaining contact with informants regularly
- being self-motivated in cultivating informants

Evidence may include:

- direct
- circumstantial
- physical
- opinion
- documentary
- hearsay

Information systems are:

- either computer based or manual. What relevant information systems are depends on:
  - importance of information
  - sensitivity of information
  - reliability of information
  - where information is to be disseminated

PUATEA001B Work in a team

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers competency in working with others and making a positive contribution to the effectiveness and efficiency of a team in a work environment when predominantly under direct supervision. Limited responsibility towards others is required.

Application of the Unit

This unit applies to all workers working in the Public Safety industry, but is particularly relevant to new workers in assisting integration with the organisational team culture of the agency.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit	Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.	Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to team activities	1.1 Roles and responsibilities of team members are recognised. 1.2 Contribution is made to identifying team goals and objectives. 1.3 ***Activities*** are completed to required standard within timeframe and in accordance with ***organisation's policies and procedures.*** 1.4 ***Assistance*** in the completion of tasks is requested from other team members where appropriate. 1.5 Team members are assisted to ensure efficient and safe completion of tasks in accordance with organisation's policies and procedures. 1.6 Participation by team members is encouraged and acknowledged. 1.7 Changes in allocated role and responsibilities are implemented. 1.8 Team meetings are attended regularly and punctually.
2. Share knowledge and information	2.1 Information relevant to work is communicated effectively with team members to enable efficient completion of tasks in accordance with the organisation's policies and procedures. 2.2 Knowledge and skills are shared between team members.
3. Give and receive support to/from team members	3.1 ***Feedback***/assistance is given to other team members in an appropriate manner. 3.2 Team members are supported in achieving workplace goals. 3.3 Feedback from other team members is acted upon appropriately.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge

- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential for this unit that competence be demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals. **Consistency in performance** Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group.
Context of and specific resources for assessment	**Context of assessment** On the job or in a simulated workplace environment. **Specific resources for assessment** No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

© Commonwealth of Australia, 2025 Skills Insight

Teams comprise	• two or more people working towards a shared purpose
Appropriate situation to request assistance may include:	• difficulty meeting timelines • to comply with occupational health and safety requirements • unsure of best method to complete task • to maximise efficiency
Assisting other team members may include:	• own tasks completed • to comply with occupational health and safety requirements • assistance requested • actions of others do not comply with requirements • other team member appears to be having difficulty completing task
Contribute to workplace goals may include:	• completion of task • achievement of new competencies • development of new skills • attainment of new knowledge • personal development
Activities may include:	• working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies • civil/political emergencies and non emergency operations including community events • public relations – activities • sporting events • parades • festivals
Conditions under which this competency may be required include	• hazardous conditions eg adverse weather • after dark operations • difficult terrain • time pressure • varying time frames from immediate/short term to long term response operations • varying access to equipment/resources necessitating the use of improvised techniques • single or multi organisation responses • dealing with human behaviours that result from emergency situations • non-emergency operations and events eg training and community education
Appropriate feedback on	• acknowledging initiative

© Commonwealth of Australia, 2025 Skills Insight

performance may include:	• aptitude • ideas • performance and assistance • providing constructive criticism
Organisation's policy and procedures may vary between sectors and organisations and may include:	• legislation relevant to the operation/incident/response • legislation relevant to the organisation • operational • corporate and strategic plans • operational procedures • operational performance standards • organisation's personnel practices • policy and procedures • organisation's quality standards • organisation's approach to environmental management and sustainability
Communication processes may include:	• established organisation's procedures for recording and reporting • the use of logs • notebooks • pagers • radios and telephones • team members may be geographically dispersed and require communication systems and technology to remain in contact

RIICCM205A Carry out manual excavation

Modification History

Not applicable.

Unit Descriptor

This unit covers the carrying out of manual excavation in the civil construction industry. It includes preparing for work, digging small excavation by hand, completing and isolating the excavation, and cleaning up. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Access, interpret and apply ***compliance documentation*** relevant to the work activity 1.2. Obtain and confirm ***safety requirements*** from the ***site*** safety plan and organisational policies and procedures, and apply to the allotted task 1.3. Identify, obtain and implement ***signage*** requirements from the project ***traffic*** management plan 1.4. Select plant, ***tools and equipment*** to carry out tasks consistent with the requirements of the job, check for serviceability and rectify or report any faults 1.5. Identify ***environmental protection requirements*** from the project environmental management plan, and confirm and apply to the allotted task
2. Dig small excavations by hand	2.1. Confirm the location and specifications of the intended excavation on the ground before commencing work 2.2. Identify service markers or taped areas 2.3. Determine or confirm location of ***underground services*** to avoid damage or interference 2.4. Use hand tools correctly to dig post holes, small pits and trenches safely and to the required dimensions 2.5. Undertake trench collapse prevention procedures, where excavation is in unstable ground 2.6. Place barricades around the ***excavation***
3. Complete and isolate the excavation	3.1. Clean loose material out of excavation using hand tools 3.2. Check excavation for confirmation with the specification or work instruction
4. Clean up	4.1. Clear loose material away from the edge of excavation 4.2. Clear work area and dispose of or recycle materials in accordance with project environmental management plan

© Commonwealth of Australia, 2025 Skills Insight

	4.3. Clean, check, maintain and store tools and equipment

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to carry out manual excavation:

- apply legislative, organisation and site requirements and procedures for carrying out manual excavation
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to carry out manual excavation:

- types, uses, limitations and maintenance requirements of manual excavation tools
- basic principles of soil technology for civil works
- basic trench collapse prevention techniques including benching and battering
- site safety requirements
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- civil construction terminology
- concreting tools, plant and equipment
- JSAs/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions for carrying out manual excavation • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of manual excavation • working with others to undertake and complete the manual excavation in a way that meets all of the required outcomes • consistent timely completion of manual excavation that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should

© Commonwealth of Australia, 2025 Skills Insight

	include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.

Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:
	• written and/or oral assessment of the candidate's required knowledge
	• observed, documented and/or first hand testimonial evidence of the candidate's:
	  • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
	  • consistent achievement of required outcomes
	• first hand testimonial evidence of the candidate's:
	  • working with others to undertake and complete the manual excavation

Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Relevant compliance documentation may include:	• legislative, organisational and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • Employment and workplace relations

© Commonwealth of Australia, 2025 Skills Insight

	legislation • Equal Employment Opportunity and Disability Discrimination legislation
Safety requirements may include:	• OHS requirements in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan including: protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • safe operating procedures including recognising and preventing hazards associated with high voltage power lines, uneven/unstable terrain, trees, overhead service lines, bridges, surrounding buildings, obstructions, structures, facilities, dangerous materials, recently filled trenches, other machines, personnel, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices including ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • recognising hazards and risks including uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to equipment operation including emergency shutdown and stopping, extinguishing equipment fires, organisational First Aid requirements and evacuation
Site conditions may include:	• dry • wet • mud • dust • varying day/night visibility
Signage may include:	• escort vehicle • highway traffic signs • site safety signage

© Commonwealth of Australia, 2025 Skills Insight

	• temporary signage for the benefit of motorists and pedestrians • traffic conditions signage
Traffic conditions may include:	• congested urban environments • low traffic rural areas • off-road un-trafficked areas • buildings • parking sites • pedestrian areas
Tools and equipment may include:	• picks • crow-bars • shovels • hand augers • string lines • pegs • levels • tape measures • jack hammers • scabblers
Environmental protection requirements may include:	• organisational/project environmental management plan • waste management • water quality protection • noise • vibration • dust and clean-up management
Underground services may include:	• power • water • gas • telephone • sewerage
Excavations may include:	• trenches • post-holes • pits • levelling of the work area
Materials may include:	• clays • silts • stone • gravel • mu • rock

© Commonwealth of Australia, 2025 Skills Insight

	• metamorphic • igneous • sedimentary • sand • topsoil

RIICCM208A Carry out basic levelling

Modification History

Not applicable.

Unit Descriptor

This unit covers the carrying out of basic levelling in the civil construction industry. It includes planning and preparing, establishing offsets for civil works, setting up and using levelling device, and cleaning up. Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Application of the Unit

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply ***compliance documentation*** relevant to the work activity 1.2. Obtain and confirm ***safety requirements*** from the site safety plan and organisational policies and procedures, and apply to the allotted task 1.3. Identify, obtain and implement signage requirements from the project traffic management plan 1.4. Select plant, ***tools and equipment*** to carry out ***levelling tasks*** consistent with the requirements of the job, check for serviceability and rectify or report any faults 1.5. ***Check levelling equipment*** for serviceability within specified tolerances, and report any faults 1.6. Identify ***environmental protection requirements*** from the project environmental management plan, and confirm and apply to the allotted task
2. Establish offsets for civil works	2.1. Establish offset and recovery pegs from survey controls to specified plans and drawings to meet project requirements 2.2. Re-establish earthwork and pavement control lines from offsets and/or recovery pegs in accordance with plans, drawings and specifications 2.3. Establish drainage offsets from survey control
3. Set up and use levelling device	3.1. Identify ***heights*** to be transferred/established from project plans or instructions 3.2. Set up and use levelling instruments correctly in accordance with standard operating procedures and manufacturer's guidelines 3.3. Transfer heights from the known to the required 3.4. Document results of ***levelling procedure*** and close them out to organisational

© Commonwealth of Australia, 2025 Skills Insight

	requirements
4. Clean up	4.1. Clear work area and dispose of or recycle materials in accordance with project environmental management plan 4.2. Clean, check, maintain and store tools and equipment t

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to carry out basic leveling:

- apply legislative, organisation and site requirements and procedures for carrying out basic levelling
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions
- apply basic mathematical techniques associated with levelling

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to carry out basic leveling:

- basic civil construction processes
- civil construction plan, symbols and construction terminology
- levelling device types, characteristics, technical capabilities and limitations
- levelling techniques related to essential tasks
- basic mathematical techniques associated with levelling
- site and equipment safety requirements
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- civil construction terminology
- JSAs/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions for carrying out basic levelling • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of basic levelling • working with others to undertake and complete the basic levelling in a way that meets all of the required outcomes • consistent timely completion of basic levelling that safely, effectively and efficiently meets the required outcomes • the conduct of a minimum of three different levelling tasks, at least one utilising an automatic level. One of the tasks must include closed traverse utilising either the height of instrument or rise and fall method of reduction • the conduct of a two peg test with an automatic level, to confirm instrument meets manufacturer's tolerances • the accurate recording of the results of each levelling procedure to organisational requirements
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills.

© Commonwealth of Australia, 2025 Skills Insight

	• Assessment of this competency requires typical resources normally used in a resources and infrastructure sector environment. Selection and use of resources for particular worksites may differ due to the site circumstances. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required

Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:
	• written and/or oral assessment of the candidate's required knowledge
	• observed, documented and/or first hand testimonial evidence of the candidate's:
	  • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
	  • consistent achievement of required outcomes
	• first hand testimonial evidence of the candidate's:
	  • working with others to undertake and complete the basic levelling

Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

	excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to equipment operation including emergency shutdown and stopping, extinguishing equipment fires, organisational First Aid requirements and evacuation

Tools and equipment may include:	• levelling devices including:
	• spirit levels
	  • laser levels
	  • string lines
	  • tape measures
	  • automatic levels
	  • survey pegs
	  • levelling staffs
	  • plumb bobs
	  • optical square
	  • inclinometers
	  • batter pegs/boards
	• wooded/steel pegs
	• straight edges
	• hammers
	• chalk line

Levelling tasks may include:	• transferring levels/heights for formwork • earthwork • roadwork • pipework • drainage works • positioning offsets • recovery pegs

Check levelling equipment may include:	• tolerance checks including:
	  • two peg test for automatic level
	  • reverse readings for spirit level

Environmental protection requirements may include:	• organisational/project environmental management plan • waste management • water quality protection • noise • vibration • dust and clean-up management

© Commonwealth of Australia, 2025 Skills Insight

Heights may be indicated by:	• drawing/sketch • verbal or written instructions • datum/survey peg • chalk or nail mark • mark on vertical surface
Levelling procedure may include:	• open or closed traverse utilising height of instrument • rise and fall methods of reduction

	cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Where applicable, physical resources should include equipment modified for people with disabilities. Access must be provided to appropriate learning and/or assessment support when required.

Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:
	• written and/or oral assessment of the candidate's required knowledge
	• observed, documented and/or first hand testimonial evidence of the candidate's:
	  • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
	  • consistent achievement of required outcomes
	• first hand testimonial evidence of the candidate's:
	  • working with others to undertake and complete the erection and dismantling of temporary fences and gates

Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Skills Insight

Relevant compliance documentation may include:	• legislative, organisational and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Safety requirements may include:	• OHS requirements in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan including: protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • safe operating procedures including recognising and preventing hazards associated with high voltage power lines, uneven/unstable terrain, trees, overhead service lines, bridges, surrounding buildings, obstructions, structures, facilities, dangerous materials, recently filled trenches, other machines, personnel, traffic control, working at heights, working in proximity to others, worksite visitors and the public • safe parking practices including ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distance from excavations, and secured from unauthorised access or movement • recognising hazards and risks including uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures related to equipment operation including emergency shutdown and stopping, extinguishing equipment fires, organisational First Aid requirements and evacuation
Site locations may include:	• new construction sites • on site locations • off site in an external paddock environment

© Commonwealth of Australia, 2025 Skills Insight

	• existing fencing situations
Traffic control signage may include:	• on unit signage • escort vehicle • highway traffic signs • site safety signage • temporary signage for the benefit of motorists and pedestrians • traffic conditions signage
Traffic conditions may include:	• congested urban environments • low traffic rural areas • off-road un-trafficked areas • buildings • parking sites • pedestrian areas
Tools and equipment may include:	• measuring tapes • rulers • hammers • socket wrenches • fencing strainers • pliers and wire cutters • pop riveters • levelling equipment • docking saws • drop saws • jigs • stops • power drills • screwdrivers • bits and drills • clamps • squares • nail guns
Fencing is erected to:	• prevent potential accidents which may occur by unauthorised access • protect valuable machinery • prevent materials from being contaminated
Environmental protection requirements may include:	• organisational/project environmental management plan • waste management • water quality protection • noise

© Commonwealth of Australia, 2025 Skills Insight

	• vibration • dust • clean-up management
Anchoring of posts may include:	• cement blocks • anchor bolts • sand bags
Fencing and gates may include:	• metal mesh fences and gates • timber cladding fences and gates
Signage at entry gates may include:	• site safety information • security access information
Materials may include:	• fencing mesh • fencing wire • metal posts • metal rails • concrete fencing materials • anchor bolts • timber posts • rails • pickets • palings • cladding • sand bags

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply ***compliance documentation*** relevant to the work activity 1.2. Obtain and confirm ***safety requirements*** from the ***site*** safety plan and organisational policies and procedures, and apply to the allotted task 1.3. Identify, obtain and implement ***signage*** requirements from the project ***traffic*** management plan 1.4. Select ***tools and equipment*** to carry out tasks consistent with the requirements of the job, check for serviceability and rectify or report any faults 1.5. Identify, confirm and apply ***environmental protection requirements*** from the project environmental management plan
2. Set out excavation	2.1. Determine location and depths of excavation from job drawings 2.2. Set out and clearly mark excavation location 2.3. Advise plant operator of excavation requirements 2.4. Check excavation depths and grades for conformity to job requirements 2.5. Compact and prepare foundation base for testing
3. Install bedding materials	3.1. Determine ***bedding material*** type and specification from plans and drawings 3.2. Lay and compact bedding materials to specified depths and grades
4. Lay pipe	4.1. Select, check and attach lifting apparatus to the ***pipe*** in preparation for lifting and ***installation*** for ***pipe joining*** 4.2. Prepare and specify pipe ends 4.3. Align pipe ends and push home 4.4. Check pipe for line and level 4.5. Advise plant operator of backfilling requirements and backfill and compact pipe to required finish level 4.6. Finish inlets and outlets in accordance with

© Commonwealth of Australia, 2025 Skills Insight

	pipe/culvert design specifications
5. Clean up	5.1. Clear work area and dispose of or recycle ***materials*** in accordance with project environmental management plan 5.2. Clean, check, maintain and store tools and equipment

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes the ability to carry out the following, as required to lay pipes:

- apply legislative, organisation and site requirements and procedures for laying pipes
- organise work activities
- select and use relevant tools and equipment safely
- identify and report on hazards related to the worksite and work activity
- communicate effectively to receive and clarify work instructions

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used. This includes knowledge of the following, as required to lay pipes:

- site and equipment safety requirements
- pipes and installation procedures
- confined space entry requirements
- dewatering
- concrete and concrete fabrication
- steel and PVC pipes
- processes for interpreting engineering drawings
- equipment types, characteristics, technical capabilities and limitations
- operational, maintenance and basic diagnostic procedures
- site isolation and traffic control responsibilities and authorities
- materials safety data sheets and materials handling methods
- project quality requirements
- civil construction terminology
- pipe types and characteristics

© Commonwealth of Australia, 2025 Skills Insight

• basic soil types and characteristics • excavation/trench backfilling techniques • processes for calculation of pipe grades and percentages • sedimentation and erosion control • excavation/trench safety • JSAs/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions for laying pipes • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of pipe laying • working with others to undertake and complete the laying of pipes that meets all of the required outcomes • consistent timely completion of pipe laying that safely, effectively and efficiently meets the required outcomes • installation of pipe on two different projects to a minimum of ten pipe joints listed in the Unit Scope: the pipes are to have a minimum diameter of DN225 mm
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency

assessment	equity issues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant compliance documentation may include:	• legislative, organisational and site requirements and procedures • plans, specifications and drawings • manufacturer's guidelines and specifications • Australian Standards • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Safety requirements may include:	• OHS requirements in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan, including protective clothing and equipment, use of tools and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, use of First Aid equipment, hazard control and hazardous materials and substances • safe operating procedures including recognising and preventing hazards associated with underground and overhead services, other machines, personnel, restricted access barriers, traffic control, working at heights, working in proximity to others, worksite visitors and the public • recognising hazards and risks including uneven/unstable terrain, trees, fires, overhead and underground services, bridges, buildings, excavations, traffic, embankments, cuttings, structures and hazardous materials • emergency procedures including emergency

© Commonwealth of Australia, 2025 Skills Insight

	shutdown and stopping, organisational First Aid requirements and evacuation • safe parking practices including ensuring access ways are clear, equipment/machinery is away from overhangs and refuelling sites, safe distances from excavations are kept, and areas secured from unauthorised access or movement
Site may include:	• any ground conditions in urban and rural areas
Signage may include:	• escort vehicle • highway traffic signs • site safety signage • temporary signage for the benefit of motorists and pedestrians • barricades • traffic conditions signage
Traffic conditions may include:	• congested urban environments • low traffic rural areas • off-road un-trafficked areas • buildings • parking sites • pedestrian areas
Tools and equipment may include:	• levelling equipment • shovels • lifting equipment • crow bars • hammers • grinders • jointing equipment • oxy-acetylene equipment • scaffolding • saws
Environmental protection requirements may include:	• organisational/project environmental management plan • waste management • water quality protection • noise • vibration • dust and clean-up management
Bedding materials may include:	• aggregate and sand
Pipe may include:	• pipes used in the construction of road stormwater systems

© Commonwealth of Australia, 2025 Skills Insight

	• pipes used in the construction of road culverts • concrete (RCP) • steel • fibre reinforced concrete (FRC) • ribbed PVC
Installation procedures may include:	• selecting size, type and material of pipes • bedding down pipes • positioning pipes • checking alignment, level and grade • fitting inlets and outlets • repair work where required
Pipe joining may include:	• sand band • rubber ring • mechanical jointed
Materials may include:	• marking materials • pipes • concrete • backfill materials • bedding materials

RIISAM201A Handle resources and infrastructure materials and safely dispose of non toxic materials

Modification History

Not applicable.

Unit Descriptor

This unit covers the handling of materials and safely dispose of non toxic materials in resources and infrastructure industries. It includes planning and preparing for work; handling and removing waste; and cleaning up.

Application of the Unit

This unit is appropriate for those working in operational support roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply ***compliance documentation*** relevant to the work activity 1.2. Obtain, confirm and apply ***work instructions***, ***quality requirements*** and operational details relevant to the allotted task 1.3. Obtain, confirm and apply ***safety requirements*** from the site safety plan and organisational policies and procedures, relevant to the allotted task 1.4. Identify and obtain and implement the signage requirements from the project traffic management plan 1.5. Select ***tools and equipment*** to carry out tasks that are consistent with the requirements of the job, and check them for serviceability and rectify or report any faults 1.6. Identify, confirm and apply ***environmental protection requirements*** from the project environmental management plan to the allotted task
2. Handle and remove waste	2.1. Comply with materials safety data sheets and requirements of regulatory authorities 2.2. Identify ***hazardous materials*** for separate handling 2.3. Use correct procedures to remove ***non-toxic materials*** 2.4. Use ***dust suppression procedures*** to minimise health risks to work personnel and others materials from workplace traffic or access
3. Clean Up	3.1. Clean, check, maintain and store tools and equipment in accordance with manufacturers' recommendations and standard work practices 3.2. Safely store/stack unused materials for future use

© Commonwealth of Australia, 2025 Skills Insight

	3.3. Clear work area and dispose of or recycle materials in accordance with project environmental management plan

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to handle resources and infrastructure materials and safely dispose of non toxic materials:

- apply legislative, organisation and site requirements and procedures
- apply teamwork to a range of situations, particularly in a safety context
- solve problems particularly in teams and in dealing practically with safety issues
- show initiative in adapting to changing work conditions or contexts particularly when working across a variety of work placements
- manage time, particularly in organising priorities and planning work
- take responsibility for self organisation of work priorities
- show a willingness to learn and to use a range of mediums to learn

Required knowledge

Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to handle resources and infrastructure materials and safely dispose of non toxic materials:

- the most commonly encountered waste materials on worksites
- environmental management requirements
- hazardous goods handling in accordance with company procedures
- systems for packing and securing materials for movement
- systems and equipments or materials for the short term protection of stacked/stored materials
- methods of dust suppression
- site and equipment safety requirements
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- industry and worksite terminology
- JSA's/Safe work method statement

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions to handle resources and infrastructure materials and safely dispose of non toxic materials • implementation of requirements, procedures and techniques for the safe, effective and efficient completion of handling of resources and infrastructure materials and safe disposal of non toxic materials • working with others to undertake and complete the handling of resources and infrastructure materials and safe disposal of non toxic materials that meets all of the required outcomes • consistent timely completion of handling of resources and infrastructure materials and disposal of non toxic materials that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those

© Commonwealth of Australia, 2025 Skills Insight

	required on the job • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity • Aboriginal people and other people from a non English speaking background may have second language issues • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required

Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:
	• written and/or oral assessment of the candidate's required knowledge
	• observed, documented and/or first hand testimonial evidence of the candidate's:
	  • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
	  • consistently achieving the required outcomes
	• first hand testimonial evidence of the candidate's:
	  • working with others to undertake and complete the handling of resources and infrastructure materials and safe disposal of non toxic materials

Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Relevant compliance documentation may include:	• legislative, organisation and site requirements and procedures • manufacturer's guidelines and specifications • Australian standards • code of practice • Employment and workplace relations • Equal Employment Opportunity, Disability Discrimination
Work instructions may include:	• verbal or written and graphical instructions • plans and specifications • work bulletins • charts and hand drawings • memos • materials safety data sheets (MSDS) and • diagrams or sketches • organisation's work specifications and requirements • instructions issued by authorised organisational or external personnel

Quality Requirements may include:	• dimensions
	• tolerances
	• standards of work
	• material standards as detailed in:
	  • the project drawings,
	  • specifications and
	  • project documentation to meet client satisfaction

Safety requirements may include:	• protective clothing and equipment and is include that prescribed under:
	  • legislation
	  • regulation and
	  • workplace policies and practices
	• use of tools and equipment

© Commonwealth of Australia, 2025 Skills Insight

	• workplace environment and safety
	• handling of materials
	• use of fire fighting equipment
	• use of First Aid equipment
	• hazard control and
	• hazardous materials and substances
	• emergency procedures related to equipment operation which are to include but may not be limited to:
	  • emergency shutdown and stopping
	  • extinguishing equipment fires
	  • organisational First Aid requirements
	  • evacuation

Tools and equipment may include:	• brooms • hoses • shovels • rakes • wet and dry industrial vacuum cleaners • wheelbarrows • pallet trolley • materials hoists • forklifts
Environmental protection requirements may include:	• organisational/project environmental management plan • waste management • water quality protection • noise • vibration • dust • clean-up management
Hazardous materials are	• those materials that pose a health risk to humans and animals or cause irreversible damage to the environment and may include toxic chemicals, asbestos and radioactive materials
Non toxic materials are	• those materials that do not pose a health risk through poisoning to humans and animals and may include excavated material that exceeds requirements and off cuts of construction materials such as timber
Dust suppression procedures may include but not be limited to:	• spraying with water • covering and

© Commonwealth of Australia, 2025 Skills Insight

	• use of vacuum cleaners

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1 Access, interpret and apply ***compliance documentation*** relevant to the use of hand and power tools 1.2 Obtain, confirm and apply ***work instructions*** for the allotted task 1.3 Obtain, confirm and apply ***safety requirements*** from the site safety plan and organisational policies and procedures relevant to the allotted task 1.4 Identify, confirm and apply ***environmental protection requirements*** for the allotted task from the project environmental management plan
2. Select and use hand tools	2.1 Select ***hand tools*** consistent with needs of the job 2.2 ***Check tools*** for serviceability and safety, and report faults 2.3 Clamp or fix ***materials*** in position 2.4 Use ***hand tools*** safely and effectively according to their intended use 2.5 Safely locate ***hand tools*** when not in immediate use
3. Select and use power tools	3.1 Select ***power tools and equipment*** consistent with needs of job and in accordance with standard work practice, and report any faults 3.2 Check tools for serviceability and safety, and report faults 3.3 Visually check power leads/hoses for serviceability/safety in accordance with the site safety plan 3.4 Clear route for safe placement and connection of leads/hoses 3.5 Clamp or fix material in position for power tool application where applicable 3.6 Use power tools safely and effectively in application processes 3.7 Locate power tools safely when not in use
4. Clean up	4.1 Clear work area and dispose of or recycle materials in accordance with project environmental management plan 4.2 Clean, check, maintain and store machinery, tools and equipment in accordance with manufacturer’s recommendations and standard work practices

Required Skills and Knowledge

Required skills
Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to use hand and power tools: • apply legislative, organisation and site requirements and procedures • speak clearly and directly, listening carefully to instructions and information • interpret and understand the information required for the preparation and application of hand and power tools, including work instructions, quality assurance procedures, manufacturer's instructions, materials safety data sheets and equipment • apply teamwork to a range of situations, particularly in a safety context • solve problems particularly in teams and in dealing practically with safety issues • show initiative in adapting to changing work conditions or contexts particularly when working across a variety of work placements • manage time, particularly in organising priorities and planning work including the scheduling and use of equipment, materials and tools to avoid back tracking and re work • take responsibility for self organisation of work priorities • show a willingness to learn and to use a range of mediums to learn • use technology related to determining requirements, the planning and application of hand and power tools, including the use of calculations, mechanical equipment and the reporting/recording of results
Required knowledge
Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to use hand and power tools: • site and equipment safety requirements • hand tools and their application • portable power tools and their application • energy/power sources • materials associated with use in the industry • equipment types, characteristics, technical capabilities and limitations • operational, maintenance and basic diagnostic procedures • materials safety data sheets (MSDS) and materials handling methods • project quality requirements • industry and worksite terminology • electrical, hydraulic and compressed air safety • JSA's/safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions for the use of hand and power tools • implementation of requirements, procedures and techniques for the safe, effective and efficient use of hand and power tools • working with others to undertake the use of hand and power tools that meets all of the required outcomes • consistent timely use of hand and power tools that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues.

© Commonwealth of Australia, 2025 Skills Insight

	• Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.

Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required knowledge and skill and practical application using more than one of the following assessment methods:
	• written and/or oral assessment of the candidate's required knowledge
	• observed, documented and/or first hand testimonial evidence of the candidate's:
	  • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
	  • consistently achieving the required outcomes
	• first hand testimonial evidence of the candidate's:
	  • working with others to undertake the use of hand and power tools

Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

Relevant compliance documentation may include:	• legislative, organisation and site requirements and procedures • manufacturer’s guidelines and specifications • Australian standards • code of practice

© Commonwealth of Australia, 2025 Skills Insight

	• Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Work instructions may include:	• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, charts and hand drawings, memos, materials safety data sheets (MSDS) and diagrams or sketches • plans and specifications • quality requirements, including: dimensions and tolerances, standards of work and material standards • safe work procedures or equivalent related to using hand and power tools
Safety requirements may include:	• protective clothing and equipment • use of tools and equipment • workplace environment and safety • handling of materials • use of fire fighting equipment • use of First Aid equipment • hazard control • hazardous materials and substances • personal protective equipment • emergency procedures related to equipment operation which may include • emergency shutdown and stopping • extinguishing equipment fires • organisational First Aid requirements and • evacuation
Environmental protection requirements may include:	• organisational/project environmental management plan • waste management • water quality protection • noise • vibration • dust and • clean-up management
Hand tools will include but not be limited to at least one: • cutting tool • tightening tool • impact tool • digging/leverage tool • measuring tool	• clamps • vices • adjustable spanners • crow bars • pinch bars • bolt cutters • chisels

© Commonwealth of Australia, 2025 Skills Insight

• securing/clamping tool	• hacksaws • handsaws • hammers • measuring tapes • axes • rakes • hand augers • picks • mattocks • pliers • shovels • spades • sledge hammers • spanners • wrenches • spirit levels and • wire cutters • file • screwdriver retractable cutters
Checking tools is to include:	• checking of electrical safety/inspection tag for currency • equipment defect identification • assessment of conditions and hazards and determination of work requirements
Materials are:	• to include those associated with the use of hand and power tools such as: timber, rock, concrete, metals, plastics
Power tools will include at least two of those powered by but not limited to:	• 240 volt electricity • compressed air • battery driven and • hydraulics
Power tools may include:	• kanga hammers • cut off saws • drills • screwdrivers • angle grinders • pneumatic wrenches • impact hammers • tampers • rotary hammers/drills

© Commonwealth of Australia, 2025 Skills Insight

	• circular saws • planers • sanders and • scalers
Equipment is to include:	• power leads and • safety switches and • may include air hoses

RIISAM204B Operate small plant and equipment

Modification History

Not applicable.

Unit Descriptor

This unit covers the operating of a range of small plant and equipment in resources and infrastructure industries. It includes the planning and preparation for work, the conducting of pre-operational checks, the use of the plant and/or equipment, and carrying out operator maintenance and cleaning up.

Application of the Unit

This unit is appropriate for those working in operational, service and maintenance roles, at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Not applicable.

	with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare	1.1. Access, interpret and apply ***compliance documentation*** relevant to operate small plant and equipment 1.2. Obtain, confirm and apply ***work instructions*** for the allotted task 1.3. Obtain, confirm and apply to the allotted task ***safety requirements*** from the site safety plan and organisational policies and procedures 1.4. Select plant, tools and equipment to carry out tasks are consistent with the requirements of the job 1.5. Identify, confirm and apply to the allotted task ***environmental protection requirements*** from the project environmental management plan
2. Conduct pre-operational checks	2.1. Select fuel and lubricants according to manufacturer's specifications 2.2. Check and adjust fuel, oil, hydraulic fluid and water levels according to manufacturer's manual 2.3. Secure/tighten and maintain bolts, nuts, guards and attachment couplings in accordance with manufacturer's instructions 2.4. Check and adjust function of controls and gauges where necessary to comply with manufacturer's manual 2.5. Conduct standard start-up and shutdown procedures according to requirements of operator's manual
3. Use small plant and equipment	3.1. Identify site hazards associated with ***small plant and equipment*** operations and establish appropriate controls in accordance with the requirements of the site safety plan 3.2. Identify and apply operating techniques for small plant and equipment to achieve optimum output in accordance with

© Commonwealth of Australia, 2025 Skills Insight

	manufacture's design specifications while maintaining specified tolerances 3.3. Operate machine to produce results within design specifications to meet specified tolerances 3.4. Safely locate plant and equipment when not in immediate use
4. Carry out operator maintenance	4.1. Shutdown plant/equipment and prepare it for ***maintenance*** as per manufacturer's manual and organisational requirements 4.2. Conduct inspection and fault finding in accordance with the manufacture's specifications and/or organisational requirements 4.3. Remove and replace defective parts safely and effectively according to manufacturer's manual and organisational requirements 4.4. Carry out regular programmed maintenance tasks in accordance with the manufacturer's and/or organisational requirements
5. Clean up	5.1. Clear work area and dispose of or recycle ***materials*** in accordance with project environmental management plan 5.2. Clean, check, maintain and store plant, equipment and tools in accordance with manufacturer's recommendations and standard work practices

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.
Required skills
Specific skills are required to achieve the performance criteria in this unit, particularly for the application in the various circumstances in which this unit may be applied. This includes the ability to carry out the following as required to operate small plant and equipment: • apply legislative, organisation and site requirements and procedures • apply clear and direct speaking and active listening skills • apply teamwork to a range of situations, particularly in a safety context

© Commonwealth of Australia, 2025 Skills Insight

• apply problem solving techniques, particularly in teams and in dealing with safety issues • interpret and apply information • show initiative in adapting to changing work conditions or contexts particularly when working across a variety of work placements • manage time, particularly in organising priorities and planning work • take responsibility for self organisation of work priorities • use a range of mediums to learn
Required knowledge
Specific knowledge is required to achieve the Performance Criteria of this unit, particularly its application in a variety of circumstances in which the unit may be used. This includes knowledge of the following, as required to operate small plant and equipment : • small plant and equipment types, characteristics, technical capabilities and limitations • basic soil types and characteristics • site and equipment safety requirements • small plant and equipment operating techniques related to essential tasks • operational, maintenance and basic diagnostic procedures • site isolation and traffic control responsibilities and authorities • materials safety data sheets (MSDS)and materials handling methods • project quality requirements • industry and site specific terminology • JSA's/Safe work method statement

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to worksite operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit and include evidence of the following: • knowledge of the requirements, procedures and instructions to operate small plant and

© Commonwealth of Australia, 2025 Skills Insight

	equipment • implementation of requirements, procedures and techniques for the safe, effective and efficient operating of small plants and equipment • working with others to operate small plants and equipment that meets all of the required outcomes • consistent timely operating of small plants and equipment that safely, effectively and efficiently meets the required outcomes
Context of and specific resources for assessment	• This unit must be assessed in the context of the work environment. Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of workplace performance, including task skills, task management skills, contingency management skills and job role environment skills. • The assessment environment should not disadvantage the participant. For example, language, literacy and numeracy demands of assessment should not be greater than those required on the job. • Customisation of assessment and delivery environment to sensitively accommodate cultural diversity. • Aboriginal people and other people from a non English speaking background may have second language issues. • Assessment of this competency requires typical resources normally used in the work environment. Selection and use of resources for particular worksites may differ due to site circumstances. • Where applicable, physical resources should include equipment modified for people with disabilities. • Access must be provided to appropriate learning and/or assessment support when required.
Method of assessment	This unit may be assessed in a holistic way with other units of competency. The assessment strategy for this unit must verify required

	knowledge and skill and practical application using more than one of the following assessment methods:
	• written and/or oral assessment of the candidate's required knowledge
	• observed, documented and/or first hand testimonial evidence of the candidate's:
	  • implementation of appropriate requirement, procedures and techniques for the safe, effective and efficient achievement of required outcomes
	  • consistently achieving the required outcomes
	• first hand testimonial evidence of the candidate's:
	  • working with others to operate small plants and equipment

Guidance information for assessment	Consult the SkillsDMC User Guide for further information on assessment including access and equity issues.

Range Statement

Relevant compliance documentation may include:	• legislative, organisation and site requirements and procedures • manufacturer’s guidelines and specifications • Australian standards • code of practice • Employment and workplace relations legislation • Equal Employment Opportunity and Disability Discrimination legislation
Work instructions may include:	• verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, charts and hand drawings, memos, materials safety data sheets (MSDS) and diagrams or sketches • plans and specifications • quality requirements, including dimensions, tolerances, standards of work and material standards • safe work procedures related to the operation of small plant and equipment on construction sites
Safety requirements may	• protective clothing and equipment

© Commonwealth of Australia, 2025 Skills Insight

include:	• use of tools and equipment • workplace environment and safety • handling of materials • use of fire fighting equipment • use of First Aid equipment • hazards and risks control, including: • uneven/unstable terrain • trees • fires • overhead and underground services • bridges • buildings • traffic • embankments • excavations and cuttings • structures and • hazardous materials and substances • safe operating procedures • underground and overhead services • other machines • personnel restricted access barriers • traffic control • working at heights • working in proximity to others • worksite visitors and • the public • emergency procedures, including: • emergency shutdown and stopping • extinguishing equipment fires • organisational First Aid requirements and • evacuation
Environmental protection requirements may include:	• organisational/project environmental management plan • waste management • water quality protection • noise, vibration and dust management and • clean-up management
Small plant and equipment must include Power Sources and at least three other categories. These may include but are not limited to:	Power Sources include: • generator • compressor • inverter

© Commonwealth of Australia, 2025 Skills Insight

	• solar Compaction equipment may include: • plate compactor • pedestrian roller • wacker • packer • tamper) Concrete equipment may include: • concrete mixer • batcher • vibration • trowelling machine (helicopter) Excavation equipment may include: • mini loader (dingo) • jackhammer • posthole borer • pedestrian trencher • Cutting equipment may include: • masonry saw • construction saw • band saw Maintenance equipment may include: • mower • brushcutter • mulcher Water equipment may include: • pump • spear • pressure cleaner Lighting equipment may include: • mobile lighting plant Lifting and materials handling • pedestrian forklift • pallet trolleys • hoist Traffic Management may include: • mobile variable message sign

© Commonwealth of Australia, 2025 Skills Insight

Operator maintenance is to include:	• cleaning • authorised servicing • the monitoring, recording and reporting of faults
Operator maintenance may also include:	• the conduct of authorised minor replacements
Materials may include:	• water • clays, silts, stone, gravel, mud, rock sand, topsoil • bituminous mixes • timber • fuels and oils • power leads • replacement parts and consumables

SIRRFSA001A Apply retail food safety practices

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement safe food storage handling processes in a retail food environment according to a food safety program.

Application of the Unit

This unit applies to frontline service personnel involved in preparing, displaying and selling retail food. It requires the frontline service personnel to have knowledge and application of a store food safety program that complies with food safety regulations.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Apply personal hygiene and sanitation.	1.1. Identify and demonstrate good ***personal hygiene practices***. 1.2. Identify, maintain and use ***protective clothing and equipment***. 1.3. Ensure ***personal movement*** within and outside workplace complies with work area requirements. 1.4. Maintain personal presentation, according to store procedures and ***legislative requirements***.
2. Identify food safety program.	2.1. Identify and interpret store food safety program. 2.2. Implement food safety program.
3. Store and handle food products hygienically.	3.1. Transport packaged ***food supplies*** to the appropriate storage area promptly, safely and without damage. 3.2. Identify and practise ***food storage requirements***, according to ***store procedures*** and legislative requirements. 3.3. Identify and use ***food handling implements*** for handling products according to legislative requirements. 3.4. Avoid cross contamination by changing food handling implements between handling different products and appropriate hand washing.
4. Clean work area and equipment.	4.1. Identify and practise cleaning requirements for ***work areas***, according to store procedure, the food safety program and legislative requirements. 4.2. Identify and practise external and internal cleaning requirements for ***equipment***, according store procedures and the food safety program legislative requirements. 4.3. Identify and use appropriate and safe cleaning tools, consumables and equipment for a variety of applications. 4.4. Identify and practise appropriate and safe ***routine maintenance*** requirements for food storage and work areas and equipment, according to store procedures and the food safety program. 4.5. Report maintenance requirements and problems to relevant personnel without delay. 4.6. Identify and observe handling and storage requirements for cleaning chemicals, according to manufacturer safety data sheets

© Commonwealth of Australia, 2025 Skills Insight

	and store procedures and the food safety program. 4.7. Identify and perform waste disposal and pest control procedures, according to store procedures, food safety program and legislative requirements.
5. Monitor food safety.	5.1. Monitor food safety hazards to control food safety risk. 5.2. Identify ***potentially unsafe food safety processes or situations*** and take ***corrective action***. 5.3. Record food safety information, including equipment breakdowns, according to the food safety program.
6. Contribute to continuous improvement.	6.1. Promptly identify hygiene and sanitation problems or situations, including potential sources of food-contamination, and rectify or report to relevant personnel. 6.2. Promptly identify conditions that promote microbial growth and rectify or report to relevant personnel.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - report maintenance requirements
  - take corrective action in relation to food safety and contribute to continuous improvement through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- technical skills to:
  - handle chemicals
  - maintain work area
  - handle product
  - use personal protective equipment
  - avoid of cross-contamination
- self management skills to:
  - ensure personal hygiene
  - conduct cleaning requirements
- literacy and numeracy skills to:
  - interpret store procedures
  - record food safety information

© Commonwealth of Australia, 2025 Skills Insight

Required knowledge

- store policy and procedures and legislative requirements, in regard to:
  - personal hygiene practices
  - correct protective clothing
  - safety requirements to protect self and others
- food handling and hygiene principles, including:
  - awareness of the store food safety program, its purpose and implications for own work
  - own roles and responsibilities and those of food safety personnel for food handling requirements from raw material to finished product
  - techniques for minimising contamination and spoilage
  - common sources and types of contamination and food safety hazards, including conditions conducive to microbial growth and known allergens associated with food handling and processing
  - common types of physical, chemical and microbiological agents that can contaminate food
  - conditions that can cause physical, chemical and microbiological contamination
  - correct storage of food, including hot, cold, raw and cooked, and relevant critical control points
  - causes of deterioration of food, contamination, cross-contamination
  - store procedures for identifying and reporting potential or actual sources of contamination
  - food handling implements, e.g. gloves and tongs
  - need for change of implements between products
  - need for frequent change of storage medium for serving implements
  - shelf life of products
  - Hazard Analysis and Critical Control Point (HACCP)
- load limits of storage, display units to maintain correct temperatures, including:
  - effects of breaking temperature curtain, effects of blocking coils and air vents
  - overloading
- procedures for recording failures in the food safety program, including equipment breakdowns, and immediate action to be taken
- principles of temperature control and the temperature danger zone
- hazardous foods
- cleaning of work area:
  - store cleaning procedures and schedules for work areas and equipment (internal and external)
  - purpose and importance of cleaning and sanitation procedures
  - safe use and storage of cleaning tools, equipment and chemicals, and insecticides and pesticides
  - routine maintenance for work areas and equipment
  - waste collection and disposal, recycling and handling procedures

© Commonwealth of Australia, 2025 Skills Insight

  - pest control procedures used in the workplace
- relevant legislation and statutory requirements
- relevant Work Health and Safety (WHS) requirements
- food safety policy, plans and responsibilities, including an understanding of the relationship between the quality system, the food safety program and audit requirements
- characteristics of materials, products and processes used to carry out work responsibilities
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, which comply with food safety regulations and relevant legislation
- consistently identifies, interprets, applies and implements the store food safety program according to health and hygiene requirements and store procedures
- consistently follows and applies store policy and procedures with regard to cleaning and maintaining equipment and safe handling and disposal of waste
- consistently follows store policy and procedures with regard to personal hygiene practices, including:
  - personal cleanliness, reporting of personal illness and infections
  - store personal presentation requirements for hair, clothes, footwear and jewellery
  - hand washing procedures
  - use and maintenance of clothing, footwear and related apparatus to meet hygiene requirements
- inspects own work area and identifies common food safety hazards and possible hazards
- consistently seeks instruction and applies store policy and procedures with regard to removal and isolation of suspect product or taking other corrective action
- consistently maintains personal conduct to minimise risk to food safety
- consistently monitors critical control points to identify food safety risks in own work area according to store procedures; this may include carrying out checks,

© Commonwealth of Australia, 2025 Skills Insight

	inspections and tests • investigates contamination and cross-contamination events and takes action to prevent contamination from occurring or recurring • consistently records food safety information according to store policy and procedures • consistently contributes to continuous improvement in own work area.
Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated work environment • a food safety program • protective clothing • cleaning materials and chemicals • pest control equipment and chemicals • suitable food products • relevant documentation, such as store policy and procedures on hygiene and sanitation practices • food handling implements • food storage and display equipment.
Methods of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • a role play • third-party reports from a supervisor • customer feedback • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Personal hygiene practices as	• hand washing procedures • personal presentation and cleanliness

© Commonwealth of Australia, 2025 Skills Insight

may include:	• hair tied back, under net or under cap • not touching hair or sneezing near food • removal of jewellery as required by legislation • reporting of personal illnesses and infections • wounds, cuts and wearing of bandages or dressings • changing gloves when handling different products.
Protective clothing and equipment may include:	• wearing of gloves, hairnets, hats, shoes, uniforms, outer garments and aprons when handling food as required • clothing maintenance, laundering and storage requirements • wearing gloves to protect hands from cleaning chemicals, heat or cold (insulation) • wearing mesh gloves when using or cleaning sharp equipment • wearing protective clothing and footwear.
Personal movement may include:	• removing protective clothing prior to moving outside or from one area to another • not moving into defined areas.
Legislative requirements may include:	• food safety regulations • WHS • environmental protection legislation • awards or agreements • waste disposal • hazardous substances and dangerous goods • manual handling.

Food supplies may include:	• supplies received from both internal and external suppliers and maintained within a stock control system, including:
	  • dry goods
	  • hazardous foods
	  • dairy goods
	  • meat and seafood
	  • poultry
	  • fruit and vegetables
	  • frozen goods.

Food storage requirements may include:	• storage in:
	  • refrigeration
	  • freezers
	  • coolrooms
	  • dry stores

© Commonwealth of Australia, 2025 Skills Insight

- refrigerated display cabinets
- food segregation
- food packaging for storage
- labelling of food
- stock rotation
- optimum maintenance of storage areas, including:
  - cleanliness
  - lighting
  - at required temperature
  - free from vermin or infestation
  - free from defects
- optimum temperature management
- ventilation of storage area
- sanitation of storage area
- disposal of damaged or spoiled supplies.

Store procedures may include:

- compliance with food safety standards and the store food safety program
- procedures such as:
  - personal hygiene
  - safe storage of food
  - safe storage and use of cleaning chemicals
  - cleaning regimes and timetables
  - protective clothing and equipment
  - safe handling and use of food preparation equipment
  - food handling procedures
  - control points
  - hazard analysis and critical control point (HACCP).

Food handling implements may include:

- gloves
- tongs
- spoons
- scoops.

Work areas may include:

- floors
- walls to required levels
- benches and working surfaces
- shelves
- store rooms and cupboards
- food service areas
- kitchen areas.

Equipment may include:

- crockery and glassware
- utensils

© Commonwealth of Australia, 2025 Skills Insight

	• pots, pans and dishes • containers • chopping boards • garbage bins • storage and display units • coolrooms, refrigerators and freezers • extraction fans • thermometers, including infra red (for checking surface and air temperature) • probe (for checking core temperature) • ovens, bain-maries, rotisseries, grills, deep fryers and hotplates • knives, slicers, drink machines, milkshake makers and coffee makers • dishwashers.

Routine maintenance may include:	• calibration checks on relevant equipment
	• detailed cleaning to ensure the elimination of crumbs food scraps or dirt build-up
	• blade sharpening
	• checking and reporting equipment faults
	• checking pest control equipment and products, including:
	  • fly screens
	  • automatic doors
	  • ultraviolet insect lights
	  • vermin traps
	• cleaning and sanitising waste bins and areas.

Potentially unsafe food safety processes or situations may include:	• spoiled or contaminated food • out-of-date food • customer complaints regarding food contamination • situations that may indicate a need for food recall.
Corrective action must include:	• promptly report potentially unsafe food safety processes or situations to a supervisor • acting on the advice of the supervisor.

Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare, arrange and present food products, including convenience foods within the store. It includes the setting up and maintenance of displays and labelling or pricing of stock. It also includes the handling, protection and storage of food products for display or sale.

Application of the Unit

This unit applies to frontline staff and supervisors who apply store policy and food safety procedures, including legislative requirements, in all aspects of handling, preparing, displaying, ticketing and storing food in a retail environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Prepare food stock.	1.1. Identify ***preparation and handling requirements*** for specific food products and apply, according to ***legislative requirements*** and ***store policy and procedures***. 1.2. Use food preparation ***tools and equipment***, according to approved Work Health and Safety (WHS) procedures. 1.3. Clean, maintain and store ***food preparation tools and equipment*** according to store procedures and legislative requirements. 1.4. ***Wrap or package*** food products as required, according to store procedures and legislative requirements.
2. Place and arrange food stock.	2.1. Unpack food stock according to legislative requirements and store procedures. 2.2. Check food products for freshness and place in or on ***storage and display units*** in specified locations, according to product handling and WHS requirements. 2.3. Rotate food stock, according to shelf life, use by dates, store procedures and legislative requirements. 2.4. Identify damaged, deteriorated, spoiled or out of date stock and take ***corrective action***, according to store procedures and legislative requirements. 2.5. Display and store food products to avoid cross contamination as indicated in store procedures and legislative requirements.
3. Prepare and display labels and tickets.	3.1. Prepare ***labels and tickets*** for window, wall or floor displays, display units or products according to store policy. 3.2. Date code stock as required. 3.3. Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action. 3.4. Identify and ticket late mark downs and reductions, according to store policy. 3.5. Maintain and store ***ticketing equipment*** in a secure location. 3.6. Ensure tickets and labels are visible, correctly priced and placed on merchandise, according to store procedures and legislative requirements.

© Commonwealth of Australia, 2025 Skills Insight

4. Maintain food displays.	4.1. Reset and dismantle special promotion areas as required. 4.2. Ensure food products are arranged and faced up as directed and according to layout specifications, ***load-bearing and load limit capacity*** of fixtures and display or storage units. 4.3. Identify unsuitable or out of date displays, and reset or remove as directed. 4.4. Identify optimum stock levels and replenish stock according to store procedures. 4.5. Maintain display areas in a clean and tidy manner with excess packaging removed.
5. Protect food stock.	5.1. Identify and use correct handling, storage and display techniques, according to stock characteristics and legislative requirements. 5.2. Use and change ***food handling implements***, according to legislative requirements and store procedures. 5.3. Identify fragile or expensive stock and handle with extra care to prevent damage or ***deterioration***. 5.4. Identify and maintain correct temperatures for ***product ranges***, according to legislative requirements and store procedures. 5.5. Check, maintain and clean storage and display units according to store procedures. 5.6. Report temperature irregularities to ***appropriate personnel*** without delay.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - report temperature irregularities to appropriate personnel through clear and direct communication
  - share information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- technical skills to use and maintain:
  - food preparation tools and equipment
  - electronic labelling and ticketing equipment
  - food storage and display units
- planning and organising skills to complete tasks in set timeframe
- literacy and numeracy skills in relation to:
  - reading and interpreting store procedures and guidelines

© Commonwealth of Australia, 2025 Skills Insight

- weighing and measuring of goods
- machine or manual preparation of labels and tickets

Required knowledge

- store policy and procedures in regard to:
  - merchandising, ticketing and pricing
  - correct storage of stock
  - store promotional themes, including advertising, catalogues and special offers
  - location of display areas
  - principles of display
  - availability and use of display materials
  - stock rotation
  - stock replenishment
  - scheduling, building and rotating displays
  - correct manual handling techniques for protection of self and merchandise
  - correct storage procedures for labelling and ticketing equipment and materials
  - correct storage procedures for food preparation tools and equipment
- food products characteristics and their effects on preparation and handling requirements for display
- placing and arranging food stock and maintaining displays
- types of labelling and ticketing items and displays
- relevant legislation and statutory requirements, in relation to :
  - food safety
  - manual handling
  - environmental sustainability including waste disposal
  - pricing procedures, including GST requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consistently applies store policy and procedures and legislative requirements in regard to hygiene and sanitation practices • consistently applies store policy and procedures and legislative requirements for preparation, arrangement, presentation, handling and storage of food products • consistently applies store policy and procedures and

legislative requirements in regard to displaying, merchandising, ticketing, pricing and storage of stock
- displays merchandise on fixtures, shelves and display areas in determined locations according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise according to store policy and procedures
- operates, maintains and stores a range of electronic ticketing equipment according to:
  - store policy and procedures
  - industry codes of practice
  - manufacturer instructions and design specifications
- arranges correct pricing and information on merchandise according to store procedures, industry codes of practice and legislative requirements
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures
- maintains display areas and replenishes stock as required according to store procedures
- performs correct manual handling, storage and display techniques according to:
  - stock characteristics
  - industry codes of practice
  - WHS regulations
  - food safety practices.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- food preparation equipment
- ticketing equipment
- products for preparation and display
- display materials and props
- cleaning equipment and materials
- relevant documentation, such as:
  - store policy and procedures manuals
  - WHS
  - industry codes of practice and relevant legislation
  - manufacturer instructions and operation manuals for electronic ticketing equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Skills Insight

	• observation of performance in the workplace • third-party reports from a supervisor • customer feedback • written or verbal questioning to assess knowledge and understanding.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SIRRFSA001A Apply retail food safety practices

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Preparation and handling requirements may vary according to food product characteristics, including:	• perishable items • cooked and uncooked items • items requiring defrosting and freezing • separating items to enhance presentation and to prevent cross-contamination and spoiling • items requiring chilling and heating • wet and dry items.
Legislative requirements may include:	• food safety regulations • WHS • pricing procedures, including GST requirements • manual handling • waste disposal • environmental protection • industry codes of practice.
Store policy and procedures in regard to:	• preparation, arrangement, presentation, handling and storage of food stock • maintenance and cleaning of equipment and working areas.
Food preparation ***tools and equipment*** may include:	• knives and slicers • boards • cookware, such as saucepans and baking trays • ovens and cooktops • appliances, such as mixers.
Materials and techniques used to ***wrap or package*** food may	• pre-packaging • separating items to prevent cross-contamination

© Commonwealth of Australia, 2025 Skills Insight

include:	• protection of items • covering to prevent deterioration of product • polystyrene trays • soaker pads • clear plastic containers • plastic wrap • plastic bags • butcher paper.
Storage and display units may include:	• window displays • heaters, ovens, bain-maries and rotisseries • freezers • refrigerated units and coolrooms • display fixtures, bins and cabinets • self-serve.
Corrective action may include:	• return to supplier • disposal • report to supervisor or manager.
Labels and tickets may be provided or produced electronically or manually, and may include:	• Australian Product Number (APN) • name and address of vendor • description of product • price, ingredients, use-by date or shelf life and nominal weight • recommended storage procedures • recommended intended use • nutritional information.
Ticketing equipment may include:	• pricing gun • shelf tickets • shelf talkers • written or electronically produced labels • bar coding equipment • price boards • header boards.
Load limits and load limit capacity may include:	• weight-bearing capacity • temperature maintenance.
Food handling implements may include:	• gloves • tongs • knives • spoons and scoops • slicers.
Deterioration of product may	• contamination • product life and use-by date

© Commonwealth of Australia, 2025 Skills Insight

include:	• crushing • drying out.
Product ranges may include:	• seafood, chicken, meat • delicatessen goods • seasonal varieties • exotic and unusual lines • bakery items • dairy products • frozen foods • dried foods • canned foods • prepared salads and convenience foods.
Appropriate personnel may include:	• team leader • supervisor • manager.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Prepare fast food items.	1.1.Prepare and operate work stations according to ***legislative requirements*** and ***store policy and procedures***. 1.2.Identify, maintain and use ***equipment, utensils and implements*** required according to store procedures and legislative requirements. 1.3.Identify and assemble ingredients for items according to standard store recipes and ***menu range***. 1.4.Identify preparation and ***handling requirements*** for individual food items according to legislative requirements and store procedures. 1.5.Identify products to be sliced, or cut and slice, or cut according to product and legislative requirements. 1.6.Use food preparation equipment safely and switch off after use, as required according to legislative requirements and store procedures. 1.7.Clean and store equipment according to store procedures and legislative requirements. 1.8.Identify, prepare and cook items according to legislative requirements and store procedures. 1.9.Identify items to be heated and place in, and remove from, ovens according to legislative requirements and store procedures. 1.10.Identify items to be defrosted and prepare according to legislative requirements and store procedures.
2. Present food items.	2.1.***Package*** or plate food items according to store procedures and legislative requirements. 2.2.Apply portion control to minimise wastage. 2.3.Place food products in or on ***display and storage units*** in determined locations as required. 2.4.Display food products to achieve a balanced fully stocked appearance and promote sales. 2.5.Check stock for freshness prior to placement on display. 2.6.Identify damaged, deteriorated, spoiled or out of date stock and take ***corrective action*** as required according to store procedures

© Commonwealth of Australia, 2025 Skills Insight

	and legislative requirements.
	2.7. Display and store cooked and uncooked products separately to avoid cross contamination according to store policy and legislative requirements.
	2.8. Place individual products in separate containers or dividers to avoid spoilage.
	2.9. Place food product stock range according to fixtures, ticketing, prices or bar codes.
	2.10. Rotate food product stock according to shelf life, use by dates, store procedures and legislative requirements.
	2.11. Ensure food presentation complies with product handling requirements, techniques and legislative requirements.
3. Prepare display labels and tickets.	3.1. Prepare ***labels and tickets*** for window, wall or floor displays, display units or products according to ***store labelling and pricing policy***.
	3.2. Date code stock as required.
	3.3. Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action.
	3.4. Identify late mark downs and reductions and ticket according to store policy.
	3.5. Use and maintain electronic ticketing equipment according to design specifications.
4. Place, arrange and display price labels and tickets.	4.1. Ensure labels and tickets are visible and correctly placed on merchandise according to legislative and store requirements.
	4.2. Replace labels and tickets according to store policy.
	4.3. Maintain correct pricing and clear information on products according to store procedures and legislative requirements.
5. Maintain food displays.	5.1. Reset and dismantle special promotion areas.
	5.2. Select food items for display as required.
	5.3. Arrange products as directed and according to layout specifications, ***load-bearing and load limit capacity*** of fixtures and display or storage units.
	5.4. Identify, reset or remove unsuitable or out of date displays as directed.
	5.5. Identify optimum stock levels and replenish stock according to store policy.
	5.6. Maintain display areas in a clean and tidy manner.
	5.7. Remove excess packaging from display areas.
6. Protect food items.	6.1. Identify and use correct handling, storage and display techniques according to food characteristics and legislative requirements.
	6.2. Change food handling implements when handling different products according to legislative requirements and store

© Commonwealth of Australia, 2025 Skills Insight

procedures.

6.3. Identify and use implements for handling products according to legislative requirements and store policy.

6.4. Regularly change medium in which serving equipment is stored, to prevent contamination.

6.5. Wrap and package products to prevent ***deterioration*** according to legislative requirements and store procedures.

6.6. Identify fragile or expensive stock and handle with extra care to prevent damage or deterioration.

6.7. Identify and maintain correct temperatures for menu items according to legislative requirements and store procedures.

6.8. Maintain and clean work areas, storage areas and display units according to store procedures.

6.9. Regularly check storage and display units to ensure products are kept at recommended temperatures.

6.10. Report temperature irregularities to ***appropriate personnel*** without delay.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - report temperature irregularities to appropriate personnel through clear and direct communication
  - share information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- technical skills to use and maintain:
  - food preparation tools and equipment
  - electronic labelling and ticketing equipment
  - food storage and display units
- planning and organising skills to complete tasks in set timeframe
- literacy and numeracy skills in relation to:
  - reading and interpreting store procedures and guidelines
  - weighing and measuring of goods
  - machine or manual preparation of labels and tickets

Required knowledge

- store policy and procedures in regard to:

© Commonwealth of Australia, 2025 Skills Insight

  - merchandising, ticketing, pricing and storage of stock
  - store promotional themes, including advertising, catalogues and special offers
  - location of display areas
  - availability and use of display materials
  - stock rotation
  - stock replenishment
  - scheduling for building and rotating displays
  - correct manual handling techniques for protection of self and merchandise
  - correct storage procedures for labelling and ticketing equipment and materials
- fast food menu range
- food safety programs
- shelf life of various products
- pricing procedures, including GST requirements
- placing and arranging fast food items and maintaining display
- relevant Work Health and Safety (WHS) legislation and codes of practice
- relevant legislation and statutory requirements, including food safety
- Australian Consumer Law
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures in preparation, cooking, arrangement, presentation, handling and storage of fast food items
- consistently applies store policy and procedures in regard to displaying, merchandising, ticketing, pricing and storage of stock
- displays merchandise on fixtures, shelves and display areas in determined locations according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise according to store policy and procedures
- operates, maintains and stores a range of electronic ticketing equipment according to:
  - store policy and procedures

© Commonwealth of Australia, 2025 Skills Insight

- industry codes of practice
- manufacturer instructions and design specifications.

- arranges correct pricing and information on merchandise according to store procedures, industry codes of practice and legislative requirements
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures
- maintains display areas and replenishes stock as required according to store procedures
- performs correct manual handling, storage and display techniques according to:
  - stock characteristics
  - industry codes of practice
  - WHS regulations
  - food safety practices.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- food preparation equipment
- ticketing equipment
- products for preparation and display
- display materials and props
- cleaning equipment and materials
- relevant documentation, such as:
  - store policy and procedures manuals
  - WHS
  - industry codes of practice and relevant legislation
  - manufacturer instructions or operation manuals for electronic ticketing equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify product range and develop product knowledge.	1.1. Develop product knowledge by accessing ***relevant sources of information***. 1.2. Identify store food ***product range***. 1.3. Convey ***product information to other staff members*** as required.
2. Advise on food products.	2.1. Apply product knowledge to advise ***customers*** on relevant product information. 2.2. Provide product information for customers on request. 2.3. Recommend complementary products, specials, new lines and seasonal promotions to customers.
3. Advise on food services.	3.1. Promote, quote on and arrange store ***food services*** to meet ***customer requests*** according to ***store policy and procedures***.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

The following skills must be assessed as part of this unit:

- interpersonal communication skills to:
  - apply product knowledge by providing information and advice to customers and staff
  - make recommendations and advise on services through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- ability to interpret store and industry manuals and documentation (paper-based or computerised)
- literacy skills in regard to:
  - reading and understanding product information

© Commonwealth of Australia, 2025 Skills Insight

- reading and understanding store policy and procedures
- recording information
- numeracy skills in regard to pricing, and estimation and weighing of quantities.

Required knowledge

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - the store food safety program
  - the sale of food items
  - quality policy to customers and suppliers
  - allocated duties and responsibilities
  - taking customer orders
- current food services available to customers
- specialist product knowledge, including:
  - specialised products
  - corresponding benefits of various products
  - shelf life and use-by date
  - storage requirements
  - ingredients or materials contained in products
  - features and use of products
  - corresponding or complementary products and services
  - stock availability
- store and industry manuals and documentation (paper-based or computerised)
- stock, merchandise and service range
- pricing procedures, including GST requirements
- other relevant policy and procedures
- relevant legislation and statutory requirements
- relevant industry codes of practice.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consistently applies store policy and procedures, which comply with consumer law and legislative requirements regarding the sale of food items • consistently applies product information contained in

© Commonwealth of Australia, 2025 Skills Insight

store manuals and manufacturer product labels when providing advice to customers
- consistently applies store policy and procedures and industry codes of practice in regard to customer service and selling products and services
- develops, maintains and conveys product knowledge to other staff as required
- applies detailed and specialised product knowledge to provide accurate advice according to customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- sources of product knowledge
- suitable merchandise
- relevant documentation, such as:
  - store policy and procedures manuals
  - customer order forms.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRRFSA001A Apply retail food safety practices.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Relevant sources of information may include:

- store or supplier product manuals
- videos, DVDs and multimedia
- product demonstrations

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Operate point-of-sale equipment.	1.1. Open and close point-of-sale terminal according to ***store policy and procedures***. 1.2. Clear point-of-sale terminal and transfer tender according to store procedure. 1.3. Handle cash according to store security procedures. 1.4. Maintain supplies of change in point-of-sale terminal according to store policy. 1.5. Attend active point-of-sale terminals according to store policy. 1.6. Complete records for transaction errors according to store policy. 1.7. Maintain adequate supplies of dockets, vouchers and ***point-of-sale documents***. 1.8. Inform ***customers*** of delays in the point-of-sale operation where required.
2. Ensure accuracy of transactions.	2.1. Identify and perform ***numerical calculations*** to ensure accurate pricing and collection of money. 2.2. Collect numerical information from various sources and calculate accurately with or without the use of a calculator.
3. Perform point-of-sale transactions.	3.1. Complete ***point-of-sale transactions*** according to store policy. 3.2. Identify and apply store procedures in respect of cash and non cash transactions. 3.3. Identify and apply store procedures in regard to exchanges and returns. 3.4. Move goods through point-of-sale area efficiently and with attention to fragility and packaging. 3.5. Enter information into ***point-of-sale equipment***. 3.6. State price or total and amount of cash received verbally to customer. 3.7. Tender correct change.

© Commonwealth of Australia, 2025 Skills Insight

4. Complete sales.	4.1. Complete customer order forms, invoices and receipts and process any loyalty card transactions. 4.2. Identify and process customer delivery requirements according to set timeframes. 4.3. Process sales transactions or direct customers to point-of-sale terminals according to store policy without undue delay. 4.4. Acknowledge and thank customer in line with store policy and procedures.
5. Wrap and pack goods.	5.1. Maintain and request adequate supplies of ***wrapping and packaging materials***. 5.2. Select appropriate wrapping or packaging material. 5.3. Wrap merchandise neatly and effectively where required. 5.4. Pack items safely to avoid damage in transit, and attach labels where required. 5.5. Arrange transfer of merchandise for parcel pick up or other ***delivery methods*** if required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - inform customers of delays
  - listen actively
  - request adequate supplies of wrapping material or bags through clear and direct communication
  - share information
  - state price or total and amount of cash received
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- self-management skills to:
  - deal with different types of transactions
  - follow set routines and procedures
- literacy and numeracy skills to:
  - document sales and delivery information
  - render change
  - undertake work functions, including addition, division, multiplication, percentages and subtraction

© Commonwealth of Australia, 2025 Skills Insight

Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale equipment
  - calculating non-cash documents
  - change required, denominations of change and tendering change
  - clearance of terminal and transference of tender
  - counting cash
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- functions and procedures for operating point-of-sale equipment, including:
  - calculators
  - electronic scales
  - numerical display board
  - registers
- merchandise handling techniques, including wrapping and packaging techniques
- range of services provided by the store
- relevant legislation and statutory requirements, including:
  - industry codes of practice
  - work health and safety (WHS)
  - Australian consumer law
  - scanners
- store policy and procedures in relation to:
  - allocated duties and responsibilities
  - bag checking
  - customer service
  - exchanges and returns
  - handling, packing and wrapping goods or merchandise
  - point-of-sale transactions
- stock availability
- key features of a calculator

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • operates point-of-sale equipment according to manufacturer instructions and store policy and procedures • applies store policy and procedures in regard to cash handling and point-of-sale transactions • interprets, calculates and records numerical information accurately • processes sales transaction information responsibly and accurately according to store policy and procedures • applies store policy and procedures in regard to the handling, packing, wrapping and delivery of goods or merchandise.

Context of and specific resources for assessment	Assessment must ensure access to:
	• a real or simulated retail work environment
	• relevant documentation, such as:
	  • stock, inventory and price lists
	  • financial transaction dockets and slips
	  • lay-by, credit and product return slips
	  • store policy and procedures manuals
	• a range of point-of-sale equipment.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the work • role play • customer feedback • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, work and job role is recommended, for example: • SIRXCCS202 Interact with customers • SIRXFIN201 Balance and secure point-of-sale terminal • SIRXINV001A Perform stock control procedures • SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Deliver service to customers.	1.1. ***Communicate*** with ***customers*** in a professional, courteous manner according to store policy. 1.2. Meet ***customer needs*** and reasonable requests or refer to supervisor, according to store policy and ***legislative requirements***. 1.3. Record customer details and information where necessary. 1.4. Identify and anticipate possible problems and take action to minimise the effect on customer satisfaction. 1.5. Recognise and act upon opportunities to deliver additional levels of ***service*** beyond the customer's immediate request. 1.6. Maintain contact with customer until sale is completed according to store policy. 1.7. Use verbal and non-verbal communication to develop rapport with customers during service delivery. 1.8. Encourage repeat customers by promotion of appropriate services or products according to store policy. 1.9. Farewell customer appropriately and courteously according to store policy.
2. Respond to customer complaints.	2.1. Convey a positive, helpful attitude to customers when handling ***complaints***, according to store policy. 2.2. Handle complaints sensitively, courteously and with discretion. 2.3. Establish and confirm with customer nature of complaint by active listening and questioning. 2.4. Take action to resolve complaint to customer's satisfaction wherever possible. 2.5. Promptly refer unresolved customer dissatisfaction or

© Commonwealth of Australia, 2025 Skills Insight

	complaints to supervisor. 2.6. Take the opportunity to turn incidents of customer dissatisfaction into a demonstration of high-quality service to customer according to store policy. 2.7. Complete documentation regarding customer dissatisfaction or complaints accurately and legibly. 2.8. Take ***follow-up action*** as necessary to ensure customer satisfaction.
3. Receive and process sales orders.	3.1. Record customer details and information accurately. 3.2. Promptly refer customers to appropriate area as required. 3.3. Provide customers with information in clear, concise manner. 3.4. Process, record and act upon sales orders according to store policy. 3.5. Process customer returns or refunds according to store policy and procedures.
4. Identify special customer requirements.	4.1. Promptly identify customers with special needs or requirements by observation and questioning. 4.2. Verbally and non-verbally convey a willingness to assist. 4.3. Promptly service, refer or redirect customers' needs as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - build rapport and understanding
  - clarify and feed back information
  - deal with difficult customers
  - listen to customers' needs
  - negotiate with and persuade customers to buy
  - promote products and services
  - respond to complaints effectively and politely
- literacy and numeracy skills to:
  - calculate costs and discounts
  - document sales, stock and delivery information
  - follow procedures for recording customer orders that are placed in person, by telephone or by electronic means

© Commonwealth of Australia, 2025 Skills Insight

  - handle legal tender
  - take messages in person or by telephone
  - write records of complaints
  - weigh and measure goods
- observation and analysis skills to anticipate customer behaviour
- self-management skills to follow set routines and procedures

Required knowledge

- add-on selling concepts
- conflict-resolution strategies
- functions and procedures for operating the store telephone system and other communication equipment, and the relevant numbers
- greeting and farewelling techniques
- location of store departments
- merchandise and service range of store departments
- non-verbal cues indicating customer behaviour
- questioning and active listening techniques
- relevant legislation and statutory requirements, including work health and safety (WHS)
- store policy and procedures in regard to:
  - customer service
  - dealing with customer complaints
  - allocated duties and responsibilities
  - customer returns and refunds
  - lay-by, gift voucher and rain-check procedures
- strategies for handling difficult or abusive customers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • accesses, records and processes sales orders accurately and responsibly, according to store policy and procedures • identifies the nature of customer complaints, resolves complaints and provides service to customers according to store policies • collaboratively works within a team to meet customers' needs

© Commonwealth of Australia, 2025 Skills Insight

- applies store policy and procedures and industry codes of practice in regard to customer service
- provides a quality service environment by treating customers and team members in a courteous and professional manner through all stages of the service and sales procedure
- uses effective questioning, active listening and observation skills to identify special customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - sales order forms
  - complaint and return forms
  - stock, inventory and price lists
  - store policy and procedures manuals
- a range of customers with different requirements
- point-of-sale equipment and materials
- a communication system or a range of communication equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXFIN201 Balance and secure point-of-sale terminal
- SIRXINV001A Perform stock control procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Organise work area.	1.1 Maintain ***work areas*** in a safe, uncluttered and organised manner according to ***store policy and procedures***.
	1.2 Carry out all ***routines*** safely, effectively and efficiently with minimum inconvenience to ***customers*** and ***staff*** according to store policy.
	1.3 Apply store policy and procedures for tidying work areas and placing items in designated areas.
2 Clean work area.	2.1 Apply store policy and procedures for personal hygiene.
	2.2 Apply store policy and procedures for cleaning of work area.
	2.3 Remove and dispose of waste promptly according to store policy and ***legislative requirements***.
	2.4 ***Report*** spills, food, waste, or other potential hazards to ***relevant personnel*** and remove from floors according to store policy and legislative requirements.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.5 Promptly display signage in regard to ***unsafe areas***.
	2.6 Maintain equipment and consumable materials and store correctly after use.
	2.7 Use and clean ***tools and equipment*** (including guards) according to manufacturer instructions and legislative requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- using and maintaining cleaning equipment
- using and storing chemicals, hazardous substances and flammable materials
- using electrical and other equipment safely
- literacy and numeracy skills in reading and understanding manufacturer instructions
- reading and understanding warning labels and instructions for the use of chemicals and hazardous substances.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - housekeeping
  - use and maintenance of store cleaning equipment
  - personal hygiene
  - waste disposal and environmental protection
  - reporting problems and faults
- relevant OHS regulations
- relevant labels to identify chemicals and hazardous substances, HAZCHEM labels
- manufacturer instructions for use of cleaning materials or hazardous substances
- manufacturer instructions for use of cleaning equipment
- relevant legislation and statutory requirements
- relevant industry codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies housekeeping duties to work area, point-of-sale terminals, walkways, fixtures and display areas
- consistently applies safe working practices in the operation and maintenance of a range of cleaning and housekeeping equipment according to:
  - store policy and procedures
  - OHS legislation and codes of practice
  - industry codes of practice
  - manufacturer instructions and design specifications
- applies store housekeeping program for work area and reports faults and problems to relevant person or department
- reads, interprets and applies manufacturer instructions for cleaning products, tools and equipment
- completes tasks in set timeframe.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- cleaning and store housekeeping equipment and materials
- relevant documentation, such as:
  - store policy and procedures manuals on housekeeping, cleaning and OHS
  - manufacturer instructions and operation manuals on cleaning equipment and materials
  - manual handling regulations and industry codes of practice
  - plant and equipment regulations.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCOM001A Communicate in the workplace
- SIRXIND001A Work effectively in a retail environment
- SIRXOHS001A Apply safe working practices
- SIRXICT001A Operate retail technology.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Work areas may include:

- counters
- benches
- sinks
- storage areas
- point-of-sale terminals
- point-of-sale areas
- preparation areas
- walkways and aisles
- displays
- fixtures and working surfaces.

Store policy and procedures may relate to:

- housekeeping practices
- personal hygiene
- maintenance and storage of cleaning equipment
- use and storage of cleaning chemicals
- job descriptions and responsibilities
- OHS
- interaction with:
  - customers
  - other team members
  - supervision and management.

Handling and cleaning ***routines*** may vary according to:

- stock characteristics
- industry codes of practice.

Customers may include:

- new or repeat contacts
- internal and external contacts
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Staff may be:

- management
- other staff members
- full-time, part-time, contract or casual staff
- from within or outside own work team
- from a range of social, cultural and ethnic

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	backgrounds.
Legislative requirements may include:	• federal, state and local health and hygiene • waste removal • environmental protection • transport, storage and handling of goods • hazardous substances and dangerous goods • labelling of workplace substances • OHS • use of protective clothing and equipment.
Reporting may be conducted:	• face to face • by email • by phone • by fax.
Relevant personnel may include:	• manager • area supervisor • team leader • colleagues.
Unsafe areas may include:	• spills • sharp edges • loose wiring • customer and public areas • staff-only areas.
Tools and equipment may relate to:	• point of sale • cleaning • display and promotion • food preparation • storage.

SIRXCLM402 Manage store facilities

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXCLM002A Manage store facilities.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves managing the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts, and identifying and locating facilities requirements.

The unit covers the application of store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment.

Application of the Unit

This unit applies to staff with managerial responsibility in a retail environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Manage store maintenance program.	1.1. Monitor and maintain premises, fittings, fixtures and equipment, according to ***store policy and procedures*** and ***relevant legislation***. 1.2. Identify deficiencies in store maintenance procedures and take remedial action as required. 1.3. Obtain ***expert or specialist advice*** as required, according to store policy. 1.4. Initiate contingency plan within scope of authority in the event of maintenance problems.
2. Manage retail equipment maintenance.	2.1. Develop and implement procedures to ensure retail equipment is maintained according to store policy. 2.2. Monitor and implement maintenance program for retail equipment, according to manufacturer design specifications and store policy. 2.3. Identify and rectify equipment faults where possible, without undue delay. 2.4. ***Report*** equipment faults or failures, according to service agreements and store policy.
3. Negotiate maintenance contracts.	3.1. Negotiate maintenance ***contracts*** with contractors and suppliers according to store policy and procedures. 3.2. Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to ***relevant personnel***. 3.3. Monitor maintenance procedures to ensure products and tasks meet contract specifications.
4. Identify facilities and space requirements.	4.1. Identify facilities and space requirements to reflect business needs and volume, according to store policy and budget requirements. 4.2. Locate suitable facilities and space to facilitate expansion or change of use in line with store policy and procedures. 4.3. Consult, as required, with senior manager or business owner to determine optimum strategy for store space and location.

© Commonwealth of Australia, 2025 Skills Insight

4.4. Maximise use of space, with consideration to existing configuration, to optimise the merchandising of existing and incoming stock.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - ensure listening and understanding
  - negotiate contracts and relay contractual requirements to staff
  - obtain expert or specialist advice
  - report faults
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- negotiation skills to negotiate maintenance contracts with contractors and suppliers
- literacy and numeracy skills to:
  - apply accounting processes and record data
  - develop, document and record procedures
  - estimate measurements and volumes
  - maintain records
  - read and interpret manufacturer instructions
  - work within a budget

Required knowledge

- store policy and procedures in regard to:
  - maintenance of store facilities
  - maintenance of retail equipment
- maintenance contract terms and options
- contract specifications
- relevant legislation and statutory requirements relating to managing store facilities, including:
  - work health and safety (WHS) legislation
  - food safety legislation and regulations
- relevant industry codes of practice relating to managing store facilities
- principles and techniques in:

© Commonwealth of Australia, 2025 Skills Insight

- monitoring performance of contracts
- negotiating, in particular contract negotiation
- interpersonal communication

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and uses space and facilities effectively
- evaluates and reports on effectiveness of maintenance contracts.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - maintenance contracts
  - store policy and procedures on maintenance of facilities, and contract negotiation
  - relevant legislation and statutory requirements
  - WHS
  - legislation and industry codes of practice
- a team
- equipment and technology.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- case study or research report
- written or verbal questioning to assess knowledge and understanding

© Commonwealth of Australia, 2025 Skills Insight

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Store policy and procedures in regard to:

- store maintenance
- facilities management
- reporting mechanisms
- WHS
- food safety.

Relevant legislation may include:

- federal, state or territory and local legislation
- food safety regulations
- WHS.

Expert or specialist advice may be sought regarding:

- point-of-sale terminals
- EFTPOS terminals
- computers, scanners and printers
- pricing equipment
- electronic bar coding equipment
- portable data entry
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- fixtures and fittings
- food preparation equipment.

Faults may be ***reported***:

- verbally
- in writing
- by email
- to service personnel

© Commonwealth of Australia, 2025 Skills Insight

- to contractors
- to relevant managers
- to supervisor.

Contracts:

- may be negotiated internally and externally
- may involve:
  - quality standards
  - building maintenance services
  - cleaning
  - security
  - electrical services
  - plumbing services
  - equipment maintenance.

Relevant personnel may include:

- managers
- supervisors
- specialist staff.

SIRXFIN201 Balance and secure point-of-sale terminal

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXFIN001A Balance point-of-sale terminal.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment. It involves clearing the register, counting money, calculating non-cash transactions, and reconciling and recording takings.

The unit requires the application of store policy and procedures in undertaking those tasks.

Application of the Unit

This unit applies to frontline retail staff working under some supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Balance and secure takings from register or terminal.	1.1. Perform ***register or terminal*** balance at designated times according to ***store policy and procedures***. 1.2. Separate cash float from takings prior to balancing procedure and secure according to store policy. 1.3. Supply change to register or terminal according to store policy. 1.4. Obtain and interpret register or terminal reading or print-out. 1.5. Secure cash and ***non cash documents*** according to store security policy and procedures.
2. Reconcile takings.	2.1. Count cash accurately. 2.2. Calculate non cash documents accurately. 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions. 2.4. Report discrepancies between register or terminal reading and sum of cash and non cash transactions to ***relevant personnel*** according to store policy. 2.5. Record store and individual department takings and file ***records*** according to store policy.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
  - balance the register or terminal
  - count cash
  - calculate non-cash transactions
  - calculate discrepancies between reported and actual takings
  - complete documentation

© Commonwealth of Australia, 2025 Skills Insight

  - interpret documentation
  - report on takings
- planning and organising skills to complete tasks in a set timeframe
- technology skills to operate register or terminal

Required knowledge

- cash and non-cash handling procedures, including:
  - balancing point-of-sale terminal
  - calculating non-cash documents
  - change required and denominations of change
  - clearance of terminal and transference of tender
  - counting cash
  - credit and returns
  - credit cards
  - EFTPOS
  - gift vouchers
  - lay-by
  - maintenance of cash float
  - opening and closing point-of-sale terminal
  - recording takings
  - security of cash and non-cash transactions
- store policy and procedures in regard to:
  - cash float
  - operation of equipment used at register or terminal
  - register or terminal balance
  - security of cash and non-cash transactions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates register or terminal equipment according to manufacturer instructions and store policy
- applies store policy and procedures in regard to handling cash and removing takings from register or terminal
- applies store policy and procedures in regard to cash float

© Commonwealth of Australia, 2025 Skills Insight

- applies store policy and procedures in regard to reading registers and recording information
- processes documentation and records responsibly and according to store policy and procedures
- reconciles takings according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- relevant documentation, such as:
  - financial transaction dockets, slips and invoices
  - sample debit card and credit card vouchers
  - recording and tally sheets
  - store policy and procedure manuals in regard to register or terminal balance
- register or terminal and related equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS201 Apply point-of-sale handling procedures
- SIRXRSK201 Minimise loss.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Register or terminal may be:

- cleared at intervals during or at close of trading
- cleared by operator or specialist staff
- electronic

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of ***equipment*** used in store or department. 1.2. Operate equipment, according to design specifications and ***safety requirements***. 1.3. Identify equipment faults and report to ***relevant personnel***. 1.4. Identify and apply maintenance program for retail equipment according to ***store policy and procedures***.
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
  - read store procedures for operating equipment
  - enter data
  - perform point-of-sale transactions
  - follow common fault-finding procedures

Required knowledge

© Commonwealth of Australia, 2025 Skills Insight

- store policy and procedures in regard to:
  - the operation and maintenance of store retail equipment
  - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • operates a range of store retail equipment according to store policy and procedures and industry codes of practice • operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications • applies store maintenance program and reports faults and problems • consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice • reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively • uses keyboard skills to enter and edit data accurately • completes tasks in set timeframe.

Context of and specific resources for assessment	Assessment must ensure access to:
	• a real or simulated work environment
	• relevant documentation, such as:
	  • store policy and procedure manuals

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Use store information technology system.	1.1. Demonstrate operation of store ***information technology system*** to ***staff members*** according to ***store policy and procedures***, as required. 1.2. Identify and operate ***hardware*** and ***software*** according to manufacturer instructions and store policy and procedures. 1.3. Interpret the ***application and uses*** of information technology systems available. 1.4. Transmit data according to electronic data interchange (EDI) procedures as required. 1.5. Use keyboard skills to enter ***information*** accurately and as required by store policy. 1.6. Regularly perform ***back-up procedures*** according to store policy.
2. Edit and update information.	2.1. Identify information to be edited and updated according to store procedures. 2.2. Edit and update information on system according to store policy and procedures. 2.3. Identify and enter price changes into store system as required. 2.4. Ensure shelf data price and computer records match according to store policy.
3. Solve information technology system problems.	3.1. Identify equipment, hardware and software ***faults*** and rectify where possible or seek expert assistance without delay. 3.2. Monitor and implement maintenance program for hardware and software systems according to manufacturer specifications and store procedures. 3.3. Handle routine problems using appropriate ***problem-solving techniques*** and refer to ***relevant personnel*** as required. 3.4. Evaluate and resolve problems arising at point of sale according to store procedures and ***relevant legislation***. 3.5. Provide assistance positively and actively to staff as problems arise.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - convey knowledge of store technology system to other staff members
  - provide assistance to staff through clear and direct communication
  - refer problems to appropriate personnel
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to process and record information
- technology skills to:
  - apply and use hardware and software
  - use store technology information systems

Required knowledge

- manufacturer specifications in regard to operation of hardware and software
- problem-solving techniques
- relevant industry codes of practice
- relevant legislation and statutory requirements, including:
  - consumer law
  - credit procedures
- software licensing specifications
- store policy and procedures in regard to use and operation of store information technology systems, including:
  - efficient and sustainable use of resources
  - work health and safety (WHS) and ergonomic requirements
  - operation of equipment
  - solutions to problems and breakdowns
  - use and maintenance of hardware and software systems
- store products and services range, including pricing structure

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 Skills Insight

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential:
	• applies store policy and procedures in regard to information technology systems, including:
	  • resolving system faults
	  • using and applying store credit and EFTPOS
	  • reviewing and entering information on store system
	• follows requirements of relevant legislation and statutory requirements, including Australian consumer law and credit procedures.

Context of and specific resources for assessment	Assessment must ensure access to:
	• a real or simulated retail work environment
	• hardware and software instruction manuals
	• information technology system
	• relevant documentation, such as:
	  • store or sample policy and procedures on management of information technology systems
	  • legislation and statutory requirements
	  • WHS requirements
	  • industry codes of practice.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • role play • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Skills Insight

Information technology system used may be:	• centrally based • store-based • networked.
Staff members may be:	• full-time, part-time or casual • under contract • people with varying degrees of language and literacy • people from a range of cultural, social and ethnic backgrounds • people with a range of responsibilities and job descriptions.
Store policy and procedures in regard to:	• efficient and sustainable use of resources • information technology systems • WHS • processing sales orders.
Hardware may include:	• bar coding • hand-held pricing equipment • personal computers or terminals (stand-alone or networked) • point-of-sale terminals • scanning equipment.
Software may include:	• databases • EDI • financial • spreadsheets • word processing.

Application and uses may include:	• arrangement of credit for customer via a third party
	• credit checks for granting of credit or loans
	• customer records
	• electronic cataloguing
	• financial management
	• individual, department or item sales performance analysis
	• inventory control
	• point-of-sale operations, including:
	  • credit cards
	  • EFTPOS
	  • loyalty cards
	  • online sales

SIRXINV001A Perform stock control procedures

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to handle stock in a retail environment. It involves receiving and processing incoming goods, rotating stock and dispatching goods.

Application of the Unit

This unit applies to team members who handle and move stock, to ensure efficient stock control within the retail environment. Team members are required to receive and process incoming goods, dispatch outgoing goods, rotate stock and maintain stock levels, assist with stocktaking, and report problems or discrepancies in stock to relevant personnel according to store policy and relevant legislation, whilst using safe working practices.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Receive and process incoming goods.	1.1. Maintain cleanliness and orderliness in receiving bay according to ***store policy and procedures***. 1.2. Unpack goods using correct ***handling techniques*** and ***equipment***, according to store policy. 1.3. Remove and promptly dispose of packing materials, according to store policy and relevant ***legislative requirements***. 1.4. Check incoming stock and validate against purchase orders and delivery documentation, according to store policy and relevant legislative requirements. 1.5. Inspect items received for damage, quality, use by dates, breakage or discrepancies and record, according to store policy. 1.6. Record stock levels on store ***stock systems***, according to store policy. 1.7. Rotate and store stock, according to the first in first out (FIFO) principle. 1.8. Dispatch stock to appropriate area or department. 1.9. Apply stock price and code labels when required according to store policy.
2. Rotate stock.	2.1. Carry out stock rotation procedures, according to store routine and policy. 2.2. Perform store code checking and reporting procedures, including recording of waste and markdowns. 2.3. Place merchandise to achieve a balanced, fully stocked display appearance and promote sales. 2.4. Place excess stock in storage or dispose of, according to store policy and legislative requirements. 2.5. Maintain safe lifting, shifting and carrying techniques according to store Work Health and Safety (WHS) policy and legislative requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- literacy and numeracy skills to:
  - follow set routines and procedures
  - use electronic labelling and ticketing equipment
  - stock records and delivery documentation
  - report problems

Required knowledge

- store policy and procedures in regard to:
  - stock control
  - store labelling policy
  - product quality standards
  - correct unpacking of goods
  - out-of-date, missing or damaged stock
  - equipment used
  - stock location
  - waste disposal
  - methods of storage
  - delivery documentation
  - stock record documentation
  - dispatch documentation
  - reporting faults and problems
- relevant legislation and statutory requirements in regard to stock control, including WHS
- relevant industry codes of practice

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consistently applies store policy and procedures, industry codes of practice, relevant legislation and statutory requirements in regard to stock control • consistently applies safe working practices in the manual handling and moving of stock according to

© Commonwealth of Australia, 2025 Skills Insight

WHS legislation and store policy
- interprets and applies manufacturer instructions with regard to handling stock and using relevant equipment
- receives and processes incoming goods and dispatches outgoing goods according to store policy and procedures
- rotates stock and performs out-of-code checking and reporting according to store policy and procedures
- interprets and processes information accurately and responsibly.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant equipment, including:
  - stock moving equipment
  - manual and electronic labelling and ticketing equipment
- computers and stock recording equipment
- relevant documentation, such as:
  - invoices, packing slips, dispatch documents and order forms
  - recording and tally sheets
  - store policy and procedures manuals
  - WHS regulations
  - relevant legislation and statutory requirements
  - industry codes of practice.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXCCS001A Apply point-of-sale handling procedures
- SIRXRSK001A Minimise theft
- SIRXCCS002A Interact with customers

© Commonwealth of Australia, 2025 Skills Insight

- SIRXFIN001A Balance point-of-sale terminal.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store policy and procedures may relate to:	• stock control • reception and dispatch • WHS • food safety.
Handling techniques may vary according to:	• stock characteristics • industry codes of practice • legislative requirements.
Equipment may include:	• electronic bar coding equipment • weighing machines • thermometers • trolley return equipment • portable data entry • cutting equipment • protective clothing.
Legislative requirements may include:	• WHS • hazardous substances and dangerous goods • labelling of workplace substances • waste removal and environmental protection • transport, storage and handling of goods.
Stock systems may be:	• manual • electronic.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Monitor receipt and dispatch of goods.	1.1. Delegate responsibility for receipt and dispatch of goods to ***appropriate staff.***
	1.2. Implement store procedures in regard to receipt, dispatch and secure storage of goods.
	1.3. Observe ***staff*** functions to ensure store procedures are followed and documentation is completed correctly.
	1.4. Implement store procedures to ensure goods inspected for quantity and quality on receipt.
	1.5. Act upon variations to quantity and quality of delivered goods, according to ***store policy and procedures***.
	1.6. Supervise safe ***handling and storage of goods***, according to store policy.
2. Maintain stock records.	2.1. Monitor and maintain stock levels at required levels.
	2.2. Maintain, monitor and adjust stock reorder cycles as required.
	2.3. Inform team members of their individual responsibilities in regard to recording of stock.
	2.4. Maintain stock storage and movement ***records***, according to store policy.
	2.5. Record stock discrepancies and follow procedures according to store policy.
	2.6. Monitor stock performance and identify and ***report*** fast and slow selling items according to store policy.
3. Coordinate stocktake or cyclical count.	3.1. Interpret policy and procedures in regard to ***stocktaking*** and cyclical counts and explain to team members.
	3.2. ***Roster*** staff, according to allocated budget and time constraints.
	3.3. Allocate stocktaking tasks to individual team members.
	3.4. Provide team members with clear directions for the performance of each task.
	3.5. Allocate team members to ensure effective use of staff resources to complete task.
	3.6. Produce accurate reports on stocktake data, including discrepancies, for management.

© Commonwealth of Australia, 2025 Skills Insight

4. Identify stock losses.	4.1. Identify, record and assess losses against potential loss forecast on a regular basis. 4.2. Identify avoidable losses and establish reasons. 4.3. Recommend and implement possible solutions.
5. Process orders.	5.1. Process and raise orders for stock as requested, according to store policy and procedures. 5.2. Maintain ***ordering and recording system***. 5.3. Ensure availability of sample range, according to buying plan. 5.4. Order pricing materials as required. 5.5. Record negotiated purchase and supply agreements and file for retrieval.
6. Follow up orders.	6.1. Monitor delivery process to meet agreed deadlines. 6.2. Handle routine supply problems or refer to management as required by store policy. 6.3. Maintain ongoing liaison with buyers, store or departments, warehouse and ***suppliers*** to ensure continuity of supply. 6.4. Distribute stock, according to store or department allocation.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- technical skills to:
  - use store stocktaking systems
  - use electronic recording equipment
- interpersonal skills to:
  - inform team members of their responsibilities and give instructions
  - explain policies and procedures to staff
  - allocate tasks and provide directions for performance of tasks
  - liaise with buyers, store and departments, warehouse and suppliers through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- management skills to coordinate stock takes
- negotiation skills to handle supply problems
- literacy and numeracy skills to:
  - prepare and present stock control reports and documentation

© Commonwealth of Australia, 2025 Skills Insight

- process orders
- maintain delivery and supply records
- maintain stock distribution records
- maintain stock ordering and recording systems

Required knowledge

- store policy and procedures in regard to:
  - stock control
  - store merchandising system
  - current and future stock levels
  - bar codes, labels and price tags
  - store stock recording system
  - stock replenishment and reorder procedures
  - inter- and intra-store and department transfers
  - reporting of stock discrepancies and damage
  - identifying and recording stock losses
  - identifying and recording discrepancies
  - existing suppliers
  - quality control procedures and requirements
  - receipt and dispatch of goods, including inspection for quality and quantity
- relevant licensing requirements for moving stock mechanically
- relevant legislation and statutory requirements
- relevant industry codes of practice
- relevant Work Health and Safety (WHS) legislation and codes of practice

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Instruct and coordinate staff.	1.1. Communicate and demonstrate store ***display standards and requirements*** to ***staff***. 1.2. Identify occurrence and timing of promotions and special events and inform staff. 1.3. Identify items to be advertised or promoted, according to store merchandising policy and inform staff. 1.4. Identify appropriate timing for dismantling and disposing of displays and inform staff.
2. Supervise construction and maintenance of presentations.	2.1. Plan and coordinate promotions and special events as directed by management. 2.2. Plan and supervise construction and maintenance of ***displays*** in order to achieve balance and visual impact. 2.3. Ensure product or service ***display information*** accurately depicts product or service being promoted. 2.4. Ensure displays are completed according to required time schedule, with minimum disruption to ***customer*** service and traffic flow. 2.5. Ensure displays are constructed and maintained in a safe and secure manner. 2.6. Regularly monitor replenishment of merchandise and rotation of stock on store displays and take action as required.
3. Implement merchandise pricing.	3.1. Implement store policy and procedures in regard to pricing and ticketing. 3.2. Identify current prices for products and services and amend according to store policy. 3.3. Inform team members of price changes and current pricing policies.
4. Review merchandise presentations.	4.1. Evaluate promotions or special events against sales turnover and store presentation standards. 4.2. Evaluate merchandise presentation against sales turnover and store presentation standards. 4.3. Provide management with feedback in regard to improvement of

© Commonwealth of Australia, 2025 Skills Insight

store marketing and promotional activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - give instructions
  - provide feedback to management through clear and direct communication
  - provide information to staff
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - present and price merchandise
  - read and interpret store policies and procedures
- observation skills to assess display and presentation compliance with visual merchandising standards
- technology skills to operate and maintain electronic labelling and ticketing equipment
- team leadership skills to:
  - instruct and support staff
  - supervise staff activities

Required knowledge

- availability and use of materials
- correct storage procedures for labelling and ticketing equipment and materials
- load-bearing capacity of fixtures and display areas
- location of display areas
- manufacturer specifications for the use of electronic labelling and ticketing equipment
- occurrence and timing of store promotions, including advertising, catalogues and special offers
- pricing procedures, including GST requirements
- principles and techniques of interpersonal communication skills
- principles of display and design
- procedure for accessing information and implementing price changes
- relevant industry codes of practice relating to coordinating merchandise presentation
- relevant legislation and statutory requirements relating to coordinating merchandise presentation, including Australian Consumer Law

© Commonwealth of Australia, 2025 Skills Insight

- relevant work health and safety (WHS) legislation and codes of practice
- store policies and procedures in regard to:
  - efficient use of resources
  - merchandise range
  - merchandising, pricing and ticketing
  - minimum stock levels required
  - stock rotation and replenishment
  - storage of stock
- store promotional themes

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- implements and instructs staff regarding store display, merchandising, ticketing and pricing policies and procedures
- coordinates and monitors display, promotion and presentation of merchandise according to store policies and procedures and legislative requirements
- identifies products to be advertised or promoted according to store merchandising policies
- coordinates construction and maintenance of displays within time schedule set in regard to advertising, catalogues, special offers and in-store promotions in a safe and secure manner
- informs staff of pricing policies, promotions, special events, display standards and requirements, and timing for dismantling and disposing of displays
- evaluates and reports effectiveness of store merchandising and promotional activities to management and staff as required by store policies and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- pricing and ticketing equipment
- merchandise for display
- display materials and props
- relevant documentation, such as:
  - store policy and procedures manuals on merchandising
  - WHS requirements

© Commonwealth of Australia, 2025 Skills Insight

- manufacturer instructions and operation manuals on electronic ticketing equipment
- legislation and statutory requirements
- industry codes of practice
- a work team.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of performance in the workplace • third-party reports from a supervisor • customer feedback • answers to questions about specific skills and knowledge.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Display standards and requirements may include:	• maintaining existing displays • safety • setting up new displays • ticketing and display signage.
Staff may be:	• from a range of social, cultural and ethnic backgrounds • from within or outside own work team • full-time, part-time, casual or contract.
Displays may be located in a variety of areas, including:	• fixtures on floor • interior or exterior • permanent or temporary • publicly accessible areas • shelves • walls • windows.
Display information may include:	• discount information • price

© Commonwealth of Australia, 2025 Skills Insight

- product brand
- special guarantees
- product characteristics, such as:
  - size
  - weight capacity
  - materials.

Customers may include:

- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage store merchandising.	1.1 Ensure layout and presentation support market position and promote customer flow according to store ***visual merchandising policies and plans***.
	1.2 Develop and implement layout assessment checks.
	1.3 Define standards for visual presentations and displays and clearly communicate to all staff
	1.4 Consult floor staff to assess customer response to space allocations.
2 Plan and manage store advertising and promotions.	2.1 Manage and implement store policies and procedures, in regard to store ***promotional activities***.
	2.2 Organise activities in line with anticipated or researched customer requirements.
	2.3 Manage ***promotions*** in order to achieve maximum customer impact.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4 Negotiate arrangements with suppliers in regard to special promotional activities.
	2.5 Coordinate store activities to complement shopping centre or retail complex promotions.
	2.6 Develop and implement assessment checks to measure effectiveness of promotions, including layout, visual impact and customer response.
	2.7 Document and report on promotional activities.
3 Manage store pricing policies.	3.1 Maintain store pricing according to ***organisation pricing policies and procedures*** in regard to pricing.
	3.2 Maintain accurate information on pricing trends and changes and communicate to relevant staff.
	3.3 Develop and implement procedures for pricing according to store policies and ***legislative requirements***.
4 Manage housekeeping.	4.1 Develop and implement store policies and procedures in regard to ***store housekeeping and maintenance***.
	4.2 Develop and manage rosters or schedules, ensuring store housekeeping standards are monitored and maintained.
	4.3 Initiate ***contingency plan*** in the event of merchandise or store presentation problems.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- providing feedback on performance
- interpersonal communication skills to:
  - communicate store standards and expectations to staff
  - consult floor staff
  - negotiate arrangements with suppliers, through clear and direct communication
  - ask questions to identify and confirm requirements

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- roster development
- report writing
- literacy skills in regard to:
  - researching, analysing and interpreting a broad range of written material
  - preparing rosters
  - preparing reports
  - documenting results

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
  - layout and presentation
  - advertising and promotions
  - pricing or marking down of goods, including risk assessment
  - housekeeping for premises, fittings, fixtures and equipment
  - store merchandise and service range
  - store merchandising plan
  - range and availability of new products and services
  - customer demand and market trends
  - product quality standards
- OHS legislation and codes of practice
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements
- principles and techniques in:
  - visual merchandising
  - project management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- collaboratively plans layout and presentation of merchandise according to store policies and procedures
- assesses effectiveness of layout and presentation according to sales targets or predetermined objectives
- collaboratively plans, coordinates and implements advertising and promotions activities according to store policies and procedures
- assesses and reports on effectiveness of advertising and promotions to staff and management according to store policies and procedures
- collaboratively plans, coordinates and implements pricing activities according to store policies and procedures
- collaboratively plans, coordinates and implements housekeeping activities according to store policies and procedures and OHS legislation, regulations and codes of practice.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store merchandising plan
  - legislation and statutory requirements
  - OHS legislation, regulations and codes of practice
- a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

Assessing employability skills	Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Visual merchandising policies and plans may include:	• target market • market research • store image • store layout and space availability • seasonal lines • pricing policy.
Promotional activities may involve:	• external and in-store activities • corporate or locally based activities • dealing with advertising agencies and consultants.
Promotions may include:	• advertising • catalogues • newspapers • posters • radio or TV • suppliers

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• internet • website.
Organisation pricing policies and procedures may include:	• marking down of slow moving stock • soiled or damaged goods • goods close to use-by date • end of season stock • pricing policies, including GST requirements.
Legislative requirements may include:	• Trade Practices and Fair Trading Acts • consumer law.
Store housekeeping and maintenance may include:	• store premises • fittings • fixtures • equipment.
Contingency plan may include:	• major spillages • flood, storm or cyclone • breakages • blackout • break-in.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Monitor and organise staffing levels.	1.1. Maintain ***staffing levels*** and rosters in designated areas within budget and according to ***store policy and procedures*** and ***legislative requirements***. 1.2. Roster ***team*** according to anticipated sales peaks and ***statutory requirements***. 1.3. Inform team members of individual rosters according to store policy and procedures. 1.4. Take corrective action as needed, according to staff availability.
2. Inform team members.	2.1. Inform team of expected standards of ***work*** and behaviour required by store policy in a manner and at a level and pace appropriate to the individual. 2.2. Implement staff ***communication*** and motivation programs according to store policy. 2.3. Compare store targets to individual and team results. 2.4. Conduct staff meetings to address issues within area of authority according to store policy. 2.5. Perform ***staff induction*** into teams, according to store policy.
3. Coach on the job.	3.1. Identify opportunities to ***coach*** team members who are unfamiliar with specific ***procedures***. 3.2. Make team members aware of the work application of the competency or job being taught. 3.3. Use a systematic approach, including explanation and demonstration where appropriate. 3.4. Encourage trainees by positive ***comments and feedback***. 3.5. Design feedback during instruction to help trainees learn from their mistakes. 3.6. Encourage and guide trainees to evaluate their own performance and diagnose it for improvement. 3.7. ***Evaluate*** trainees' performance, according to store policy and procedures.
4. Motivate the team.	4.1. Identify strengths and weaknesses of team against current and anticipated work requirements.

© Commonwealth of Australia, 2025 Skills Insight

	4.2. Encourage individuals within the team to contribute to discussion and planning of team objectives and goals. 4.3. Update and review team objectives and goals on a regular basis in consultation with ***relevant personnel***. 4.4. Develop positive and constructive relationships with and between team members. 4.5. Treat all team members fairly, equally and with respect. 4.6. Accept responsibility for developing own competencies and identify realistic objectives.
5. Maintain staffing records.	5.1. Maintain ***staff records*** as required, according to store policy and relevant awards and agreements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to:
  - inform team members of rosters
  - conduct staff meetings
  - coach team members, including explaining and demonstrating
  - provide feedback and encouragement through clear and direct communication
  - ask questions to identify and confirm requirements
  - give instructions and provide constructive feedback
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- literacy skills to:
  - interpret workplace documents
  - report procedures

Required knowledge

- store policy and procedures in regard to:
  - workplace ethics
  - work teams
  - staffing rosters
  - personnel records
  - trainee assessment
  - supervising new apprentices
  - staff counselling and disciplinary procedures
  - work and overtime periods

© Commonwealth of Australia, 2025 Skills Insight

  - meetings
  - housekeeping
- store organisational structure
- rights and responsibilities of employers and employees in retail workplace
- award and agreement requirements, including employment classifications, such as full-time, part-time and casual
- forms of work in retail
- major changes affecting retail workplaces
- principles and techniques in interpersonal communication
- relevant legislation and statutory requirements, such as:
  - equal employment opportunity (EEO) legislation
  - anti-discrimination legislation
  - industry awards and agreements
- relevant Work Health and Safety (WHS) regulations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently and responsibly applies store policy and procedures and ethical behaviour in regard to the coordination of staff
- consistently applies store policies and procedures in regard to monitoring, organising, maintaining staffing levels, communicating with staff, mentoring, coaching and motivating staff
- consistently and responsibly applies store policy and procedures in regard to the induction of new staff.
- consistently and responsibly applies store policy and procedures in regard to maintaining staffing levels and coordinating work teams within budgetary constraints
- consistently applies state and local statutory requirements and regulations, including relevant industry awards and agreements
- consistently applies appropriate communication and interpersonal skills when motivating the team and informing staff of roles and responsibilities

© Commonwealth of Australia, 2025 Skills Insight

- reports suggestions for improvements in procedures to management.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - legislation and statutory requirements
  - awards and agreements
  - job descriptions and responsibilities
  - training programs
  - store policy and procedures manuals
  - rostering and recording systems
  - a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXMGT002A Maintain employee relations.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Staffing levels may vary according to:

- peak trading times
- special events
- promotion
- stocktakes
- refurbishment.

Store policy and procedures

- staffing requirements
- on the job training

© Commonwealth of Australia, 2025 Skills Insight

may relate to:	• maintaining staffing records • housekeeping.
Legislative requirements may include:	• WHS • equal opportunity • anti-discrimination • workplace relations • industry awards and agreements.
Team may include:	• full-time, part-time or casual staff • staff under contract • people with varying degrees of language and literacy • people from a range of cultural, social and ethnic backgrounds • people with a range of responsibilities and job descriptions.
Statutory requirements may include:	• minimum and maximum hours of work • meal and other breaks • leave entitlements • remuneration scales • penalty rates • relevant industry awards and agreements.
Work may include:	• selling • merchandising • housekeeping • rostering • maintaining equipment • stocktaking.
Communication with team may be:	• face-to-face • written • in languages other than English, Indigenous languages or visual languages, such as sign language • individually or in groups.
Staff induction may include:	• formal training program • one-to-one coaching.
Coaching may be done:	• frequently or infrequently • formally or informally.
Procedures may relate to:	• modes of communication • contact with customers

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Apply routine store security.	1.1 Apply store ***security systems and procedures*** according to store policy. 1.2 Handle and secure cash according to ***store policy and procedures***. 1.3 Observe and deal with suspect behaviour by ***customers*** according to store policy and ***legislative requirements***. 1.4 Deal with internal and external theft according to store policy and legislative requirements. 1.5 Store products and equipment in a secure manner.
2 Minimise theft.	2.1 Take appropriate action to minimise theft by applying store procedures and legislative requirements. 2.2 Match merchandise to correct price tags. 2.3 Maintain surveillance of merchandise according to store policy and ***legislative requirements***.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4 Check customers' bags as required at point of sale according to store policy and legislative requirements.
	2.5 Maintain security of cash, cash register and keys according to store policy.
	2.6 Maintain security of stock, cash and equipment in regard to customers, ***staff*** and outside contractors according to store policy and legislative requirements.
	2.7 Deal with suspected or potential thieves according to store policy and procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy and numeracy skills in:
  - recording of stolen items
  - reporting of theft.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - security
  - checking customers' bags and purchases
  - reporting problems and faults
- relevant legislation and statutory requirements, particularly in regard to checking customers' bags and purchases
- Trade Practices and Fair Trading Acts
- store merchandising system
- security procedures relating to cash and non-cash transactions
- location and operation of store security equipment
- reporting procedures for internal and external theft or suspicious circumstances.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - converse clearly and directly with staff
  - use and interpret non-verbal communication
- literacy and numeracy skills to:
  - access and interpret store policy documents
  - calculate the cost of stock loss
  - document security procedures
  - handle cash
  - maintain records
- research and analysis skills to:
  - analyse stock control data
  - develop procedures
- problem-solving skills to establish and implement stock control procedures

Required knowledge

- organisational policy and procedures that relate to the development of store procedures for:
  - security
  - detection and apprehension of thieves
  - non-cash transactions
  - cash handling
  - stock control
- principles and techniques for:
  - detecting and preventing theft
  - ensuring safety of personnel in the event of robbery
- relevant codes of practice, legislation and statutory requirements, including:
  - industry codes of practice
  - retail case law or common law
  - state laws relating to property offences
  - work health and safety (WHS) legislation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- develops and implements security procedures to facilitate the detection and prevention of theft
- develops and implements procedures to ensure safety and security of internal and external clients in the event of robbery
- calculates, analyses and reports on the cost and potential impact of identified loss and dissipation on:
  - buying
  - ordering patterns
  - planning
  - budgeting
- develops and implements procedures for:
  - opening and closing premises
  - cash security
  - non-cash transactions
  - stock control to minimise loss and dissipation
- communicates procedures to staff and monitors implementation.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures on:
    - security
    - cash handling and non-cash transactions
    - stock control, including buying, ordering, planning and budgeting
  - relevant legislation and statutory requirements
  - industry codes of practice
  - WHS legislation and codes of practice
- a team
- a range of security equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Skills Insight

- observation of performance in the workplace
- role play
- case studies
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Security procedures may relate to:

- armed robbery
- cash and cash movement
- customers
- equipment
- events likely to endanger customers or staff
- opening and closing of premises
- premises
- records
- staff and staff property
- stock
- theft
- visitors, sales representatives and contractors.

Organisational policy and procedures in regard to:

- cash handling
- non-cash transactions
- security
- stocktaking.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions
- people with varying degrees of language and literacy
- small work teams

© Commonwealth of Australia, 2025 Skills Insight

	• store team.
Non-cash transactions may include:	• cheques • customer refunds • EFTPOS and credit cards • gift vouchers.
Techniques used to ***communicate security procedures*** may include:	• mentoring and coaching • on-the-job or off-the-job training • posters and pamphlets • simulated events.
Impact on business operations may include:	• budgeting • buying • ordering patterns • planning.
Stock control procedures may include:	• minimising out-of-date stock • minimising theft • monitoring stock levels • quality control • stocktaking and cyclical counts.

SIRXSLS201 Sell products and services

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSLS001A Sell products and services.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to sell products and services in a retail environment.

It involves the use of sales techniques and encompasses key selling skills, from approaching the customer to closing the sale.

It requires a basic level of product knowledge and the recognition and demonstration of verbal and non-verbal communication skills to determine customer requirements, sell the benefits of products and services, overcome objections and close sales.

Personal evaluation is used to maximise sales, according to industry codes of practice, relevant legislation and store policy.

Application of the Unit

This unit applies to frontline sales personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop and apply product knowledge.	1.1. Develop ***product knowledge*** by accessing ***relevant sources of information*** and confirm with relevant staff. 1.2. Apply knowledge of the use and application of relevant products and services in interactions with customers according to store policy and ***legislative requirements***. 1.3. Identify gaps in product knowledge and resolve by accessing relevant sources of information.
2. Approach customer.	2.1. Identify ***customers*** by name where possible. 2.2. Develop knowledge of customer buying behaviour by accessing relevant sources of information. 2.3. Determine and apply appropriate timing of customer approach according to store policy and customer behaviour. 2.4. Initiate customer contact according to store policy. 2.5. Convey a positive impression to encourage customer interest according to store policy.
3. Gather and respond to information.	3.1. Apply questioning techniques and listening skills to determine customer buying motives and requirements. 3.2. Interpret and clarify non verbal communication cues. 3.3. Direct customer to specific merchandise according to customer requirements and store policy.
4. Sell benefits.	4.1. Match customer needs to appropriate products and services. 4.2. Communicate knowledge of product features and benefits clearly to customers. 4.3. Describe product use and safety requirements to customers. 4.4. Refer customers to appropriate product specialist as required. 4.5. Answer ***routine customer questions*** about merchandise accurately and honestly or refer to senior sales staff.

© Commonwealth of Australia, 2025 Skills Insight

5. Overcome objections.	5.1. Identify and acknowledge customer objections according to store policy. 5.2. Categorise objections into price, time and merchandise characteristics and consider solutions. 5.3. Offer solutions to customer objections according to store policy. 5.4. Apply ***problem solving*** within personal scope of responsibilities to overcome customer objections or refer to senior staff.
6. Close sale.	6.1. Monitor, identify and respond appropriately to customer buying signals. 6.2. Encourage customer to make purchase decisions. 6.3. Select and apply appropriate method of closing sale.
7. Maximise sales opportunities.	7.1. Recognise and apply opportunities for making additional ***sales*** according to store policy. 7.2. Advise customer of complementary products or services according to customer's identified need. 7.3. Review personal sales outcomes and consider strategies to maximise future sales in consultation with relevant staff.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Re**quired skills**

- communication and interpersonal skills to:
  - handle difficult customers
  - verbal and non-verbal communication skills to:
    - question, listen and observe
    - overcome objections and close sale
- literacy and numeracy skills to:
  - handle payments for goods
  - read product information
  - read store policies and procedures
  - record information
  - weigh and measure goods
- selling skills to use a range of selling techniques

Required knowledge

- customer types and needs, including:
  - customer behaviour and cues

© Commonwealth of Australia, 2025 Skills Insight

  - customer buying motives
  - demographics, lifestyle and income
  - individual and cultural differences
  - types of customer needs, such as:
    - functional
    - psychological
- relevant industry codes of practice, legislation and statutory requirements relating to the sale of products and services
- selling techniques, including:
  - add-ons and complementary sales
  - closing techniques
  - opening techniques
  - overcoming customer objections
  - recognising buying signals
  - using strategies to focus customer on specific merchandise
- specific product knowledge for area or section
- store merchandise and service range
- store policies and procedures in regard to:
  - allocated duties and responsibilities
  - selling products and services and sales performance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies product knowledge and uses appropriate sales approach to sell the benefits of products and services, overcome objections and close sales
- uses questioning, listening and observation skills to determine customer requirements
- applies store policies and procedures in regard to selling products and services
- maximises sales opportunities according to store policies and procedures
- applies industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
- evaluates personal sales performance to maximise future

© Commonwealth of Australia, 2025 Skills Insight

sales.

Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated retail work environment • relevant documentation, such as policy and procedures manuals • a range of customers with different requirements • a range of merchandise and products appropriate to the retail workplace • product labels and sources of product information.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the candidate in the workplace • customer feedback • answers to questions about specific skills and knowledge • review of portfolios of evidence and third-party workplace reports of on-the-job performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Product knowledge may include:	• features and benefits • handling and storage requirements • price • safety features • stock availability • use-by dates • warranties.
Relevant sources of information may include:	• demonstrations • internet • labels • product profiles

© Commonwealth of Australia, 2025 Skills Insight

	• staff members • store or supplier product manuals • store tours • videos.
Legislative requirements may include:	• industry codes of practice • liquor laws • lottery legislation • work health and safety (WHS) • sale of second-hand goods • sale of X and R-rated products • tobacco laws • Australian consumer law and fair trading Acts • trading hours • transport, storage and handling of goods.
Customers may include:	• customers with routine or special requests • internal and external contacts • new or repeat contacts • people from a range of social, cultural and ethnic backgrounds • people with varying physical and mental abilities.
Routine customer questions may relate to:	• availability • features and benefits • price and price reductions • quality.
Problem solving may be affected by:	• resource implications • store policies and procedures.
Sales transactions may be completed:	• face-to-face • online • over the telephone.

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop product and service knowledge.	1.1. Develop and maintain ***product knowledge*** according to ***store policy*** and ***legislative requirements***. 1.2. Convey product knowledge to other ***staff*** as required. 1.3. Research and apply comparisons between products and services. 1.4. Demonstrate knowledge of competitors' product and service range and ***pricing structure.***
2. Recommend specialised products or services.	2.1. Evaluate merchandise according to ***customer requirements***. 2.2. Demonstrate features and benefits of products and services to ***custome***r to create a buying environment. 2.3. Apply detailed specialised knowledge of product to provide accurate advice to customers.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - convey product knowledge to staff
  - apply knowledge to provide advice to customers
  - handle difficult customers through clear and direct communication
  - ask questions to identify and confirm requirements
  - share information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- literacy skills in regard to:
  - use a range of communication and electronic equipment
  - access relevant product and service information
  - interpret product information
  - interpret store policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

  - record information
- numeracy skills to:
  - estimate and calculate costs relevant to pricing products

Required knowledge

- specialised product knowledge, including:
  - warranties
  - benefits and features
  - shelf life and use-by date
  - storage requirements
  - ingredients or materials contained in product
  - product and ingredient origins
  - care and handling of products
  - corresponding or complementary products and services
  - stock availability
- store and industry manuals and documentation
- stock and merchandise range
- service range
- store policies and procedures including:
  - procedures for taking orders
  - pricing procedures, including GST requirements
- relevant legislation and statutory requirements and industry code of practice relating to the retail industry

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consistently applies store policies and procedures and industry codes of practice in regard to customer service and selling products and services • develops, maintains and conveys product knowledge to customers and other staff • applies detailed and specialised product knowledge to provide accurate advice according to the needs of the customer.
Context of and specific	Assessment must ensure access to:

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Inform team members about WHS matters.	1.1. Clearly and accurately explain store policy and procedures in regard to WHS and ***emergency procedures*** to ***team members***. 1.2. Ensure access for team members to store ***WHS policy and procedures***. 1.3. Clearly and accurately explain relevant provisions of WHS legislation and codes of practice to team members. 1.4. Regularly provide clear and accurate information on identified ***hazards*** and risk control procedures to team members. 1.5. Model the implementation of WHS and emergency procedures to reinforce information.
2. Involve team members in WHS matters.	2.1. Provide ***opportunities and processes for team members to consult and contribute*** on WHS issues according to store policy. 2.2. Promptly resolve issues raised or refer to relevant personnel according to store policy. 2.3. Promptly convey outcomes of issues raised on WHS matters to team members.
3. Monitor and maintain a safe work environment.	3.1. Implement store policy and procedures with regard to identifying, preventing and reporting potential hazards. 3.2. Take prompt action to deal with hazardous events according to store policy. 3.3. Investigate unsafe or hazardous events, identify cause, and report inadequacies in risk control measures or ***resource allocation*** for risk control to ***relevant personnel***. 3.4. Implement and monitor control measures to prevent recurrence and minimise risks of unsafe and hazardous events according to store policy and ***hierarchy of control***. 3.5. Handle and store ***hazardous goods*** according to store policy and WHS regulations. 3.6. Maintain ***equipment*** according to store policy and WHS regulations. 3.7. Monitor team performance to ensure use of ***safe manual handling techniques***.

© Commonwealth of Australia, 2025 Skills Insight

	3.8. Implement ***store emergency policy and procedures*** promptly in the event of an emergency.
4. Identify need for WHS training.	4.1. Identify WHS training needs, specifying gaps between WHS competencies required and those held by team members. 4.2. Organise and arrange ***training*** according to store policy.
5. Maintain WHS records.	5.1. Complete and maintain WHS ***records*** regarding occupational injury and disease according to store policy and ***legislative requirements***. 5.2. Use information from records to identify hazards and monitor risk control procedures according to store policy.

Required Skills and Knowledge

this section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - provide information, coaching and feedback to team members
  - involve team members
  - refer issues to appropriate personnel through clear and direct communication
  - motivate and lead a team
  - use and interpret non-verbal communication
- literacy and numeracy skills to:
  - generate reports
  - interpret and apply WHS regulations
  - interpret symbols used for WHS signage
  - read store policy and procedures
- technical skills to:
  - identify broken or damaged equipment
  - identify hazardous goods and substances
  - locate and use safety alarms, fire extinguishers and emergency exits

Required knowledge

- hierarchy of risk control:
  - elimination of hazards
  - engineering controls to reduce risk
  - administrative controls
  - use of personal protective equipment

© Commonwealth of Australia, 2025 Skills Insight

- job role and responsibilities
- location of nearest first aid assistant or facility
- manual handling and safe lifting techniques
- possible fire and safety hazards
- principles and techniques in interpersonal communication
- relevant WHS legislation and codes of practice
- sickness and accident procedures
- store policies and procedures in regard to:
  - manual handling
  - WHS emergency procedures
  - unsafe or hazardous goods
  - handling and storage
  - disposal
  - bomb threat procedures
  - store evacuation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies and monitors store policy, industry codes of practice, relevant legislation and statutory requirements in regard to WHS and emergency procedures
- applies and monitors safe work practices in the handling and moving of stock, according to WHS legislation and codes of practice
- interprets and monitors the implementation of manufacturer instructions with regard to handling stock and using relevant equipment
- applies and monitors safe work practices in the handling, storage and disposal of unsafe or hazardous materials
- identifies WHS training needs and maintains WHS records.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant equipment, such as:
  - stock moving equipment
  - alarm systems

© Commonwealth of Australia, 2025 Skills Insight

- first aid equipment
- firefighting equipment
- communication equipment

- relevant documentation, such as:
  - WHS legislation
  - store evacuation procedures
  - store policy and procedures manuals
  - incident reporting forms.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- third-party reports from a supervisor
- customer feedback
- written or verbal questioning to assess knowledge and understanding.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXRSK002A Maintain store security.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Emergency procedures may relate to:

- accidents
- bomb threats
- cyclones
- dealing with dangerous customers
- fire
- flooding
- product recall and contamination
- sickness
- store evacuation involving staff or customers.

Team members may include:

- full-time, part-time, casual or contract
- new or existing staff

© Commonwealth of Australia, 2025 Skills Insight

	• people from a range of cultural, social and ethnic backgrounds • people with varying levels of language and literacy.
WHS policy and procedures may relate to:	• basic safety procedures • customers • dangerous goods • emergency procedures • equipment and tools • issue-resolution procedures • premises • reporting procedures • safe manual handling and lifting • staff • stock.
Hazards may include:	• broken or damaged equipment • chemical spills • damaged packing material or containers • electricity and water • fires • manual handling • sharp cutting tools and instruments • stress • unguarded equipment.
Opportunities and processes for team members to consult and contribute may include:	• identification of health and safety representatives • WHS meetings • staff meetings • suggestions from staff for improving existing tasks and procedures.
Resource allocation may include:	• equipment and technology • finances • materials • people • time.
Relevant personnel may include:	• manager • safety representative • supervisor • team leader.
Hierarchy of control may include:	• appropriate use of personal protective clothing and equipment • eliminating hazards • isolating hazards • substitution • using administrative controls • using engineering controls.

© Commonwealth of Australia, 2025 Skills Insight

Hazardous goods may include:	• chemicals • electrical equipment • flammable goods • waste.
Equipment may include:	• computers • EFTPOS terminals • equipment for carrying or moving merchandise • equipment for storage of merchandise, including refrigerators • point of sale terminals • printers • security tag systems • thermometers • trolley return equipment • weighing machines • wrapping and packing equipment, such as shrink wrapping.
Safe manual handling techniques may include:	• job procedures • lifting or shifting practices • using equipment, such as ladders and trolleys.
Store emergency policy and procedures may relate to:	• alarm systems and procedures • events likely to endanger staff, contractors, customers or visitors • firefighting procedures • medical attention procedures • product recall and contamination • store evacuation procedures for staff and customers • transport arrangements for sick or injured persons.
Training may include:	• emergency procedures • evacuation procedures • first aid • manual handling techniques • reporting procedures • stress management.
Records may include:	• centralised • departmental • electronic • manual.
Legislative requirements may include:	• federal, state or territory and local legislation • WHS regulations • privacy legislation • workers' compensation regulations.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Select and set up equipment and materials.	1.1 Select ***equipment*** for cleaning task. 1.2 Check that equipment is clean and in safe working condition prior to use. 1.3 Select and prepare suitable wet and dry ***cleaning agents*** according to manufacturer instructions, ***work health and safety and environmental requirements***. 1.4 Select and use ***protective clothing*** where necessary.
2. Clean wet and dry areas and associated equipment.	2.1 Take account of potential customer inconvenience in scheduling and performing cleaning tasks. 2.2 Prepare ***wet and dry areas*** to be cleaned and identify ***hazards***. 2.3 Barricade work areas or place warning signs as required reducing risks to others. 2.4 Select and apply correct cleaning agents or chemicals for specific areas, surfaces and equipment, according to manufacturer recommendations, safety and organisational procedures. 2.5 Avoid ***unhygienic personal contact*** with food or ***food contact surfaces***. 2.6 Avoid ***unhygienic cleaning practices*** that may cause food-borne illnesses. 2.7 Use equipment correctly and safely. 2.8 Reduce negative environmental impacts through efficient use of energy, water and other resources. 2.9 Safely dispose of all waste and hazardous substances.
3. Maintain and store cleaning equipment and chemicals.	3.1 Clean equipment after use according to organisational requirements and manufacturer instructions. 3.2 Carry out or arrange ***routine maintenance***. 3.3 Identify and report equipment faults. 3.4 Store equipment in designated area in a condition ready for re use. 3.5 Store chemicals according to health and safety requirements.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to interpret product labels and product safety instructions
- numeracy skills to calculate dilution requirements of cleaning products
- planning and organising skills to complete the cleaning process in a logical and efficient way
- problem-solving skills to identify and resolve routine cleaning problems.

Required knowledge

- cleaning chemicals, equipment and procedures for wet and dry surfaces and materials:
  - wet:
    - toilets
    - basins
    - walls
  - dry:
    - carpet
    - laminate
    - soft furnishings
    - woodwork
- role and use of Material Safety Data Sheets (MSDS)
- safe manual handling techniques:
  - carrying
  - lifting
  - pulling
  - pushing
- safe handling requirements for hazardous cleaning products, including disposal
- hygiene procedures and requirements:
  - hygiene responsibilities of cleaning staff
  - hygiene hazards for cleaning, including potential food contamination and transmission of airborne illnesses
  - cleaning practices that minimise hygiene risks
- ways of minimising negative environmental impacts in the cleaning process:
  - resource conservation – energy and water
  - waste disposal
  - typical procedures and standards for presentation of premises.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • select and safely use cleaning agents and equipment on wet and dry areas • complete cleaning tasks to required standards within commercially-realistic timeframes • use hygienic cleaning practices • integrate knowledge of cleaning products, cleaning techniques, waste disposal and ways of • conserving resources in the cleaning process.
Context of and specific resources for assessment	Assessment must ensure use of: • wet and dry areas to be cleaned, that include a range of different hard and soft surfaces • electrical and manual cleaning equipment • cleaning agents for multiple hard and soft surfaces • protective clothing and other safety equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct observation of cleaning and maintenance activities • inspection of areas cleaned by the individual • oral or written questioning to assess knowledge of cleaning and maintenance procedures, • materials, equipment and hazardous substances and efficient resource use • review of portfolios of evidence and third-party workplace reports of on-the-job performance • by the individual.
Guidance information for assessment	The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example: • SITHACS202 Prepare rooms for guests.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Equipment may include:

- electrically operated equipment:
  - polishers
  - scrubbers
  - vacuum cleaners
- garbage receptacles
- manual equipment:
  - brushes
  - buckets
  - dusters
  - mops and cloths.

Cleaning agents may include:

- agents for specialised surfaces:
  - glass
  - wood
- deodorisers
- disinfectants
- spot cleaning agents
- pesticides.

Work health and safety and environmental requirements may include:

- hazardous substances and storage requirements
- MSDS
- safe manual handling techniques.

Protective clothing may include:

- aprons
- breathing apparatus

SITHCCC003B Receive and store kitchen supplies

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to receive and store supplies in commercial cookery or catering operations. It focuses on the general stock handling procedures required for food and kitchen-related goods.

Supplies refer to all perishable and non-perishable goods received from both internal and external suppliers and maintained within a stock control system.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to all hospitality and catering enterprises where kitchen supplies are received and stored, such as restaurants, hotels, clubs, cafeterias and other catering operations. Those undertaking this role would work under supervision and would usually be part of a team.

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Skills Insight

Pre-Requisites

Prerequisite units This unit must be assessed after the following prerequisite unit:

SITXOHS002A Follow workplace hygiene procedures.

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Take delivery of supplies.	1.1 Check all incoming ***supplies*** against specifications, orders and delivery documentation taking into account quantity, size, weight, quality and freshness, according to enterprise procedures and regulatory requirements.
	1.2 Identify and record information about the supplier, any ***temperature checks*** undertaken, any ***variations and discrepancies*** and report them to the appropriate person.
	1.3 Inspect supplied items for damage, quality, use-by dates, breakages or discrepancies and record details

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	according to enterprise policy and ***regulatory requirements***.
	1.4 Manage excess stock appropriately, according to enterprise policy.
2 Store supplies.	2.1 Transport supplies to appropriate storage area promptly, ensuring that stock is protected from loss, contamination, spoilage, temperature abuse and pests according to OHS and food safety procedures.
	2.2 Store supplies in appropriate ***storage*** area, ensuring compliance with enterprise procedures, food safety program, and regulatory requirements for temperature, ventilation and sanitation.
	2.3 Record supply levels accurately and promptly according to enterprise procedures and regulatory requirements.
	2.4 Label supplies according to enterprise procedures.
3 Rotate and maintain supplies.	3.1 Rotate supplies according to enterprise policy.
	3.2 Move and shift supplies according to safety and hygiene requirements.
	3.3 Check the quality of supplies and complete reports as required.
	3.4 Dispose of damaged or spoiled supplies according to enterprise and regulatory requirements.
	3.5 Safely dispose of all excess or spoilt stock and waste, especially hazardous substances, to minimise negative environmental impacts.
	3.6 Identify and report any problems promptly.
	3.7 Maintain storage areas in optimum condition, ensuring that they are clean, at required temperature, free from vermin or infestation and free from defects.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- ability to use a thermometer correctly to undertake temperature checks using a thermometer for a range of foods at different temperatures
- logical and time-efficient work flow
- safe work practices, particularly in relation to lifting and handling, and stacking and transporting goods
- waste minimisation techniques and environmental considerations in relation to receipt and storage of kitchen supplies.
- problem-solving skills to deal with minor problems such as shortages, variations and errors
- literacy skills to read and check delivery documentation against order requirements and complete records relating to deliveries
- numeracy skills to count and check quantities of stock.

The following knowledge must be assessed as part of this unit:

- principles of stock control, including:
  - rotation
  - correct storage procedures for specific goods
  - food segregation
  - checking for slow moving items
- common examples of stock control documentation and systems
- enterprise requirements and procedures related to the Australia New Zealand Food Standards Code and food safety programs
- suitable storage for the various types of food
- basic supplies and commodities
- hygiene procedures related to stock handling and storage
- correct and environmentally sound disposal methods for waste and in particular for hazardous substances.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency

Evidence of the following is essential:

- ability to receive, handle and store kitchen supplies safely and efficiently
- knowledge of the OHS and hygiene issues related to receipt, handling and storage of supplies.

Context of and specific resources for assessment

Assessment must ensure:

- access to a range of perishable and non-perishable supplies
- demonstration of skills within a fully equipped kitchen storage area as defined in the Assessment Guidelines.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate receiving and storing supplies for an operational commercial kitchen
- written or oral questions to test knowledge of stock procedures for different food items
- review of workplace reports and records related to stock control, prepared by the candidate
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up

© Commonwealth of Australia, 2025 Skills Insight

	the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Supplies:	• must include:
	  • food, including dry goods, dairy products, meat and seafood, poultry, fruit and vegetables and frozen goods
	• may include:
	  • beverages
	  • utensils and equipment for food preparation
	  • cleaning materials and equipment
	  • linen, such as tea towels, serviettes, tablecloths and aprons
	  • stationery, vouchers and tickets.

Temperature checks may be taken for a range of foods at different temperatures, including:	• raw foods • ingredients • cold, frozen or reheated foods or ingredients.
Variations and discrepancies must include:	• rejection of food that is likely to be contaminated, for example, it is at the incorrect temperature (food that is intended to be frozen but has thawed, or cold food that is in the temperature danger zone) • packaged food that is exposed through damaged packaging • incorrect quantities, amounts or weights • wrong product.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Regulatory requirements include:	• Australia New Zealand Food Standards Code • local, state or territory food safety regulations.
Storage may include:	• refrigeration • freezers • coolrooms • dry stores.

SITXINV001A Receive and store stock

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to receive and store stock. It requires the ability to check and take delivery of stock, other than food, and to appropriately store, rotate and maintain the quality of stock items.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

This unit has commonality with SITHCCC003B Receive and store kitchen supplies, which deals specifically with the receipt and storage of food items and related food safety issues. The control and ordering of stock levels is covered in SITXINV002A Control and order stock.

Application of the Unit

Application of the unit

This unit describes a fundamental administrative function for the tourism and hospitality industries and applies to the full range of industry sectors and environments.

Stock control systems might be manual, but increasingly stock control is computerised. This unit covers any type of stock, other than food items.

The receipt and storage of stock is undertaken by frontline operational personnel who work under close supervision and guidance from others. They would be required to apply little discretion and judgement because they operate using predefined organisational procedures. They would report any stock-related discrepancies for the action of a higher level staff member.

	1.2 Identify and record variations and report them to the appropriate person.
	1.3 Inspect items for damage, quality, use-by dates, breakages or discrepancies, and record findings according to organisation procedures.
	1.4 Manage excess stock according to organisation procedures.
2 Store stock.	2.1 Transport stock to appropriate storage area promptly and safely.
	2.2 Store stock in the appropriate location according to organisation OHS and security procedures.
	2.3 Record stock levels accurately according to organisation procedures and using appropriate technology.
	2.4 Label stock according to organisation procedures.
3 Rotate and maintain stock.	3.1 Rotate stock according to organisation procedures.
	3.2 Use safe manual handling techniques when moving and storing stock to avoid any injury.
	3.3 Check on the quality of stock at regular intervals and report findings to appropriate personnel.
	3.4 Place excess stock into storage or dispose of stock according to organisation procedures.
	3.5 Maintain stock area according to organisation and government requirements, and identify and report any problems promptly to appropriate personnel.
	3.6 Use ***stock control systems*** correctly and according to organisation speed and accuracy requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

The following skills must be assessed as part of this unit:

- safe manual handling techniques
- ability to conduct stock activities in a logical and time-efficient work flow
- literacy skills to check incoming stock against order and delivery documentation, to read use-by dates, stock labels, and to read and interpret organisation procedures
- writing skills to record incoming stock and to use stock control systems to record stock-related issues
- communication skills to make accurate verbal or written reports of stock discrepancies
- numeracy skills to count incoming, stored and rotated stock items.

The following knowledge must be assessed as part of this unit:

- basic knowledge of relevant stock, including product life and storage requirements
- different types of storage and their suitability for different kinds of stock
- principles of stock control, including:
  - rotation
  - correct storage procedures for specific goods
  - segregation of non-food items from food items in any storage area that have potential to cross-contaminate
  - checking for slow moving items
- types of stock control documentation and systems that may be applied in the tourism and hospitality industries
- stock security systems and procedures
- OHS procedures and safe work practices that relate to the receipt, transportation and storage of stock

safe and correct use of equipment, such as forklifts.

SITXINV002A Control and order stock

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to control and order stock. It requires the ability to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of stock.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

The skills required by managers to establish and monitor cost-effective order and supply arrangements are covered in SITXINV003A Manage and purchase stock.

Application of the Unit

Application of the unit

This unit describes a fundamental administrative function for the tourism and hospitality industries and applies to the full range of industry sectors and environments.

Stock control systems might be manual, but increasingly stock control is computerised. This unit covers the administrative control of any type of stock.

Supervisory personnel who operate with a considerable level of autonomy or under limited guidance from others would be responsible for controlling and ordering stock. They would be largely responsible for making decisions on the overall administration of stock and would be the contact person for operational staff referring any stock discrepancies.

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain stock levels and records.	1.1 Use ***stock control systems*** to administer all stock control and ordering processes fully and efficiently.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Monitor and maintain ***stock*** levels to organisation requirements.
	1.3 Monitor stock security and adjust systems as required.
	1.4 Monitor and adjust stock reorder cycles as required.
	1.5 Inform colleagues of their individual responsibilities in regard to the reordering of stock.
	1.6 Maintain records of stock storage and movement according to organisation procedures.
	1.7 Monitor stock performance, and identify and report fast or slow-selling items according to organisation procedures.
2 Process stock orders.	2.1 Process orders for stock according to organisation procedures.
	2.2 Maintain and record stock levels ensuring information is complete, correct and current.
	2.3 Check incoming stock records against purchase and supply agreements and record all necessary details.
3 Minimise stock losses.	3.1 Identify and record ***stock losses*** according to organisation procedures.
	3.2 Report losses according to organisation procedures.
	3.3 Identify avoidable losses and establish reasons for them.
	3.4 Recommend solutions to loss situations and implement related procedures to prevent future avoidable losses.
4 Follow up orders.	4.1 Monitor the delivery process to ensure agreed deadlines are met.
	4.2 Liaise with colleagues and suppliers to ensure continuity of supply.
	4.3 Follow up on routine supply problems or refer problems to appropriate person according to organisation policy.
	4.4 Distribute stock to agreed allocations ensuring that it is protected from loss, contamination, spoilage, temperature abuse and pests, and is in line with relevant OHS and food safety procedures.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
5 Organise and administer stocktakes.	5.1 Organise stocktakes at appropriate intervals according to organisation policy and procedures. 5.2 Allocate stocktaking responsibilities to staff. 5.3 Produce accurate stocktake reports within designated timelines.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- literacy skills to process all stock order documents and reconcile incoming stock records against purchase orders
- writing skills to record and maintain all stock records and produce complex stocktake reports
- high-level communication skills to inform colleagues on their individual stock ordering and stocktake responsibilities and liaise with suppliers about deliveries and discrepancies
- critical thinking skills to allow for the analysis of stock records to determine stock losses and to make appropriate recommendations for improvements
- numeracy skills to perform complex calculations involving reconciling stock orders and levels.

The following knowledge must be assessed as part of this unit:

- stock ordering procedures
- stock level maintenance techniques appropriate to industry sector
- stocktake procedures appropriate to industry sector
- stock recording systems
- stock security systems and procedures
- types of stock control documentation and systems
- reasons for stock loss and damage and methods used to control these.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- ordering, control and overall administration of continuous stock supply within a specific tourism and hospitality industry environment
- ability to meet accuracy and speed requirements for completion and maintenance of stock records
- project or work activities conducted over a commercially realistic period of time so that the stock control and maintenance aspects of this unit can be assessed.

Context of and specific resources for assessment

Assessment must ensure:

- ordering, control and overall administration of stock within an operationally realistic tourism or hospitality stock control environment
- use of current technology, equipment, stock documentation and real stock items
- access to stock security and stocktake procedures
- involvement of internal and external suppliers.

Methods of assessment

A range of assessment methods should be used to assess the practical skills and knowledge required to control and order stock. The following examples are appropriate for this unit:

- review of project activities undertaken by the candidate to control stock for a given period of time for a specific outlet
- review of stock control activities undertaken as part of industry placement or training with an industry operator
- written and oral questioning or interview to test knowledge of security and stocktake procedures
- case studies to assess ability to solve problems related to stock control, stock loss or security

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

- review of workplace reports and records prepared by the candidate related to stock control
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXADM001A Perform office procedures
- SITXMGT001A Monitor work operations
- SITXINV003A Manage and purchase stock.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

SITXMPR401 Coordinate production of brochures and marketing materials

Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.2	Correction to mapping to show non equivalence.
1.0	N Replaces and is not equivalent to SITXMPR001A Coordinate production of brochures and marketing materials. Minor adjustments to expression of content to streamline and improve unit. Added trade practices to Required knowledge. Added sustainability. More emphasis on physical and virtual.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to coordinate the development process for brochures and other marketing materials from a content and production perspective.

Application of the Unit

This unit applies to all industry sectors and all types of marketing materials, both physical and virtual. People working independently with limited supervision undertake this role. Depending on the business context, this could include sales and marketing personnel, managers, and owner-operators of small businesses.

This unit reflects the general skills needed by those involved in sales and marketing activities and does not include the skills required by professional graphic designers or copywriters.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

materials. measures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to collaborate with others on technical, organisational and creative issues
- critical thinking skills to evaluate factors that impact on production of marketing materials
- literacy skills to:
  - read and interpret quotations and product conditions
  - proofread draft materials
  - create copy or check quality of outsourced copy
  - research information for inclusion from varied and potentially unfamiliar sources
- planning and organising skills to plan and coordinate all aspects of the production process
- problem-solving skills to respond to challenges that arise in the production of marketing materials
- numeracy skills to:
  - calculate costs and quantities of materials to be produced
  - work with numerical concepts of size, shape and layout
  - work with detailed product costings
- technology skills to:
  - liaise with others about technical production issues
  - work with current industry marketing technologies.

Required knowledge

- objectives of materials and the market for which material is required
- physical and virtual media marketing opportunities and factors that impact production of materials in those contexts
- current digital print production technologies, processes and terminology
- printing and industry conventions in relation to placement of information, page numbering and copyright information
- quality indicators in marketing material production, including:
  - readability
  - photographic quality
  - effective use of colour
  - spacing requirements
- creative writing techniques used for the content of brochures and other marketing materials
- procedures and requirements for preparation and proofing of material

© Commonwealth of Australia, 2025 Skills Insight

- copyright laws and restrictions that apply to the inclusion of certain content in brochures and other marketing materials
- procedures for copyright clearance of restricted materials
- trade practices requirements around the need for accuracy of information in marketing materials.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • coordinate all aspects of the development process and produce materials within specified deadlines • produce materials that meet stated objectives, provide current and accurate information, and are free of errors • demonstrate knowledge of current production processes, terminology and copyright restrictions.
Context of and specific resources for assessment	Assessment must ensure use of: • a real or simulated product or service for which brochures and marketing materials can be developed • current information and communications technology for the development of content • suppliers, such as graphic designers, print production organisations and copywriters with whom the individual can interact.
Method of assessment	A range of assessment methods should be used to assess the practical skills and knowledge required to coordinate the production of brochures and marketing materials. The following examples are appropriate for this unit: • evaluation of brochures or other physical or virtual marketing materials produced by the individual • written or oral questioning to assess knowledge of coordination and production processes, copyright laws and clearance procedures • review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.
Guidance information for	The assessor should design integrated assessment activities

© Commonwealth of Australia, 2025 Skills Insight

assessment	to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example: • SITXMGT501 Establish and conduct business relationships • SITXMPR404 Coordinate marketing activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Brochures and marketing materials may include:	• advertising materials • conference programs and registration forms • destination guides • direct mail pieces • display materials • event prospectus • invitations • product brochures • product support manuals • promotional flyers and leaflets.

Factors for consideration during planning may relate to:	• accessibility, such as the need to provide materials in alternative formats
	• availability of information
	• design issues:
	  • style
	  • size
	• legal requirements
	• marketing considerations:
	  • distribution considerations
	  • market for review of competitive materials
	  • objectives
	• resource constraints:
	  • budget
	  • in-house capability
	• technology:
	  • digital media opportunities
	• objectives of the material

© Commonwealth of Australia, 2025 Skills Insight

	• sustainability considerations • time parameters.
Information for inclusion may be:	• advertisements • logos • maps • photos • special offers or incentives • sponsor messages • supplier information • tariff details.
Accurate and complete specifications include:	• conditions of contract • delivery platform • interactivity requirements • layout and style of text • number of colours • number of photographs • production and delivery deadlines • size • total number required • type of paper (for print-based materials).

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to create a display or stand for the promotion of a product or service. It requires the ability to identify the objectives of the promotion, determine who the audience will be, select all display components and assemble the display or stand.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit describes a fundamental sales and marketing skill for those working within the service industries and applies to the full range of industry sectors and environments.

Promotional displays or stands are set up and operated in a range of contexts, including trade or consumer shows, meeting or conference events, in-house promotions, window displays, visitor information centre displays and shopping centre promotions. They might be used to promote any product, service, or event; a group of products being cooperatively marketed; or even a whole city, region or tourist precinct.

This unit does not include all the skills of a specialist display designer or visual merchandiser. Rather, it reflects the more general display skills needed by a large range of service industry personnel involved in sales and marketing activities. Frontline sales and marketing personnel who operate with some level of autonomy or under limited supervision and guidance from others would be responsible for setting up displays or stands.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Make preparations for display or stand.	1.1 Identify display or stand objectives in consultation with appropriate colleagues.

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	1.2 Obtain operational ***information to assist in display or stand preparation*** to allow time for adequate planning.
	1.3 Plan display or stand to meet the needs of target audience.
	1.4 Select and organise adequate ***display supplies*** and transportation arrangements according to display plan.
	1.5 Identify the need for and seek assistance from display specialists where appropriate.
2 Create the display.	2.1 Create or dress the display or stand, making creative use of available materials and supplies.
	2.2 Use established ***display techniques*** to maximise the visual appeal of the display and reflect the nature of product or service being sold.
	2.3 Use display equipment correctly and safely.
	2.4 Check display or stand to ensure safety of colleagues and customers.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- safe OHS practices that relate to transporting, carrying, assembling and monitoring the display or stand
- basic visual merchandising techniques for creating displays with typically available materials, including techniques for maximising the effectiveness of commonly-used collateral in displays, including brochures and posters
- literacy skills to collect and interpret information about the needs of the target audience and operational aspects of the display or stand.

The following knowledge must be assessed as part of this unit:

- typical tourism industry contexts in which displays are used, such as trade and consumer shows, shopping centre promotions, information centre displays, window displays and promotional functions

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- range of materials and equipment used for display in different locations and settings, such as stages, exhibition booths, permanent displays and window displays.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • creation of a display or dressing of a promotional stand to meet specific objectives using accepted display techniques • ability to create display or stand in a well-organised and safe manner • creation of a display or dressing of a promotional stand within typical workplace time constraints that meet determined deadlines.
Context of and specific resources for assessment	Assessment must ensure: • creation of a display or promotional stand within commercially realistic promotional environments • use of display and promotional material commonly used by tourism and hospitality organisations.
Methods of assessment	A range of assessment methods should be used to assess the practical skills and knowledge required to create a promotional display or stand. The following examples are appropriate for this unit: • evaluation of the creativity and visual appeal of a display created by the candidate • case studies to assess application of different display techniques to typical industry promotional situations • written and oral questioning or interview to test knowledge of basic and different visual merchandising

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

techniques
- written and oral questioning or interview to test knowledge of safe working practices
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SITXMPR004A Coordinate marketing activities
- SITXCOM005A Make presentations.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Information to assist in display or stand preparation may include:

- nature of display area, including booth and stage
- floor plans
- type of surface on which display is to be created
- set-up times and duration
- OHS requirements
- budget allocation
- need for utilities, such as electricity and water
- need for waste management

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

- security.

Display supplies may include:

- furniture
- collateral materials, such as brochures, posters, banners and organisational colours and logo
- scissors
- adhesives and velcro
- pins
- string
- audiovisual systems, including videos and sound systems
- floral arrangements and potted plants
- balloons and other decorations
- mobiles
- computers.

Display techniques must include the use of:

- fabric
- flags
- signs
- printed materials
- three-dimensional materials
- freestanding display options
- product samples
- local produce
- cultural artefacts.

SITXMPR404 Coordinate marketing activities

Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.2	Correction to mapping to show non equivalence.
1.0	N Replaces and is not equivalent to SITXMPR004A Coordinate marketing activities. Minor adjustments to expression of content to streamline and improve unit. Added innovation, legal, ethical and sustainability. Added more on new technologies and media.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and coordinate a range of marketing and promotional activities at an operational level. The unit incorporates knowledge of marketing principles.

Application of the Unit

This unit applies to all industry sectors, and to individuals who take responsibility for coordinating marketing activities within the parameters of an established marketing strategy. People working independently with limited supervision undertake this role. This could include marketing coordinators or managers and owner-operators of small businesses.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan and organise marketing activities.	1.1 Plan ***marketing activities*** according to marketing plan or other organisational systems. 1.2 Identify, analyse and incorporate relevant market information and ***legal***, ***ethical and sustainability issues*** into short term planning. 1.3 Confirm target markets and marketing medium. 1.4 Evaluate ***potential and suitability*** of marketing opportunities that arise. 1.5 Proactively seek and evaluate innovative marketing opportunities, including use of new technologies and media. 1.6 Develop and implement action plans to address ***operational details***.
2. Undertake a general public relations role.	2.1 Establish and conduct positive relationships with industry and media colleagues. 2.2 Use networks to support marketing activities. 2.3 Develop public relations resources as required, including media releases and industry or media support materials.
3. Review and report on marketing activities.	3.1 Review activities according to agreed evaluation methods and incorporate results into future planning. 3.2 Prepare reports according to organisational policy and required timeframes. 3.3 Present current and clear market intelligence to inform sales and marketing planning.

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to establish and conduct positive business relationships
- critical thinking skills to evaluate the potential of different marketing activities
- initiative and enterprise skills to proactively identify and respond to new opportunities
- literacy skills to:
  - interpret market trend information and marketing plans
  - develop detailed action plans for marketing activities
  - prepare media releases and marketing reports
- numeracy skills to work within marketing budgets
- planning and organising skills to coordinate diverse and unpredictable operational details
- problem-solving skills to proactively identify and respond to potentially complex implementation challenges
- self-management skills to take responsibility for the quality and outcomes of marketing activities
- technology skills to work with current web based marketing technologies.

Required knowledge

- content and structure of marketing plans
- key marketing principles, including the marketing management process and the four Ps - product, place, price and promotion
- industry structure and interrelationships, industry networks and information sources
- industry and market knowledge appropriate to the sector and organisation, including:
  - distribution and marketing networks, especially those that support the product or service being promoted, including e-business options and major promotional events
  - commission structures
  - current customer and market trends and preferences
- features, benefits and practical application of marketing activities commonly used in the service industries, including:
  - advertising
  - familiarisations
  - in-house promotions
  - public relations
  - social media
  - trade and consumer shows
  - signage and display
- legal issues that impact on the marketing of products and services, including consumer protection provisions
- ethical considerations for marketing activities, including:

© Commonwealth of Australia, 2025 Skills Insight

  - appropriate use of images and text
  - protection of children
  - targeting of particular groups in the community
- sustainability considerations for marketing activities, including:
  - reducing waste of printed materials
  - sustainability as a marketing tool.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • plan and coordinate multiple and different marketing activities for an operation, product or service • integrate knowledge of the relevant industry, including structure and interrelationships, industry networks, information sources, and distribution and marketing networks • integrate knowledge of the types of marketing activities used in the relevant industry sector and major industry promotional events • demonstrate knowledge of marketing principles and their application to practical workplace activities.
Context of and specific resources for assessment	Assessment must ensure use of: • real or simulated products or services for which the individual can conduct marketing activities • current information and communications technology used by industry for marketing activities • marketing plans and operational marketing documents, such as action plans and marketing reports.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • evaluation of marketing activities planned and conducted by the individual, including reports on lessons to be learned for future activities

© Commonwealth of Australia, 2025 Skills Insight

- evaluation of critiques prepared by the individual about industry marketing activities
- use of case studies to assess the application of marketing knowledge to different industry situations
- written or oral questioning to assess knowledge of marketing principles, structure of the industry, industry interrelationships, distribution networks and legal compliance issues
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITXMPR403 Plan and implement sales activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Marketing activities may include:

- advertising
- display and signage
- events
- familiarisations:
  - media
  - trade
- industry and public relations activities
- market research
- product development within scope of individual responsibility
- web-based and social media activities.

Information to be incorporated into the planning process may include:

- competitive activity
- financial statistics
- marketing reports
- marketplace trends
- sales reports.

Legal, ***ethical and sustainability issues*** may

- consumer law and trade practices

© Commonwealth of Australia, 2025 Skills Insight

relate to:	• work health and safety obligations • resource conservation • targeting of particular groups • ways of presenting information.

Potential and suitability of promotional activities may relate to:	• consistency with overall marketing direction
	• exposure to be achieved
	• matching of attendees to target markets
	• resource considerations:
	  • financial
	  • human
	• timing of the activity or event.

Operational details may include:	• administrative and procedural requirements • availability of promotional materials • available technology • contracting of other services, such as display • equipment requirements • need for external assistance • potential for cooperative approaches • public relations implications • staffing requirements and briefings • strategies to ensure maximum benefits • travel arrangements.

SITXMPR502 Develop and implement marketing strategies

Modification History

The version details of this endorsed unit of competency set are in the table below. The latest information is at the top.

Version	Comments
1.0	E Replaces and is equivalent to SITXMPR005A Develop and manage marketing strategies. Title changed to better reflect the intent and content of the unit. Minor adjustments to expression of content to streamline and improve unit. Added innovation and sustainability.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse internal and external business environments and to develop and evaluate marketing strategies and plans for products and services.

Application of the Unit

This unit applies to all industry sectors, and to individuals in senior marketing or management roles. This may include those whose primary role is marketing related, or those for whom marketing is a part of a broader job responsibility. Units and qualifications for marketing specialists are found in the BSB07 Business Services Training Package.

Marketing strategies could be developed for a new or existing product or service, a small or medium-sized business organisation, a destination or a specific project, such as an event.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Collect and analyse information on the internal business environment.	1.1 Confirm core activities, customer base, business values and current business direction. 1.2 Identify and analyse ***information*** on current and past marketing and its effectiveness. 1.3 Review business performance information to identify strengths, weaknesses and critical success factors. 1.4 Identify and record current ***capabilities and resources***, including the need for specialist assistance. 1.5 Record and report information according to organisational requirements.
2. Collect and analyse information on the external business environment.	2.1 Identify and analyse information on expected market growth or decline with associated risk factors. 2.2 Record and analyse projected changes in the labour force, population and economic activity. 2.3 Gather and analyse ***comparative market information***. 2.4 Identify and analyse industry and customer ***trends and developments***, including emerging technologies and innovations. 2.5 Identify and analyse ***legal***, ***ethical and sustainability issues*** and potential business impacts. 2.6 Record and report information according to organisational requirements.
3. Develop marketing strategies.	3.1 Identify and analyse opportunities based on internal and external market analysis. 3.2 Explore new and innovative marketing approaches. 3.3 Develop marketing strategies that are consistent with direction and values of the organisation. 3.4 Integrate legal, ethical and sustainability considerations. 3.5 Develop strategies in consultation with key stakeholders.

© Commonwealth of Australia, 2025 Skills Insight

4. Prepare marketing plan.	4.1 Formulate marketing plan that clearly communicates priorities, responsibilities, timelines and budgets. 4.2 Provide timely opportunities for colleagues to contribute to marketing plan. 4.3 Submit marketing plan for approval according to organisational policy.
5. Implement and monitor marketing activities.	5.1 Implement and monitor activities detailed in plan according to schedule and contingencies. 5.2 Produce marketing reports according to organisational policy. 5.3 Share information on marketing activities with operational staff to maintain awareness of current organisational focus.
6. Conduct ongoing evaluation.	6.1 Evaluate marketing activities using agreed methods and benchmarks. 6.2 Make adjustments according to evaluation. 6.3 Communicate and implement agreed changes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to lead consultation with stakeholders and colleagues
- critical thinking skills to analyse complex information about internal and external business environments from varied sources
- initiative and enterprise skills to proactively identify creative marketing opportunities
- literacy skills to:
  - research complex and potentially unfamiliar business and marketing information
  - write complex plans and reports
- numeracy skills to develop marketing resource strategies and scenarios
- planning and organising skills to coordinate complex planning and implementation processes
- problem-solving skills to evaluate marketing activities and challenges, and develop strategic responses
- technology skills to evaluate the potential of current and emerging marketing technologies.

Required knowledge

- data collection tools and research methodologies of particular relevance to marketing
- marketing planning techniques and formats, including key features of a marketing plan
- internal and external issues that impact on market planning in a given industry context
- industry marketing and distribution networks in the relevant context

© Commonwealth of Australia, 2025 Skills Insight

- new and innovative marketing strategies in the relevant industry context, including current and emerging marketing technologies and the opportunities they present
- legal issues that impact on marketing activities, including:
  - Australian Consumer Law and consumer protection
  - copyright
  - privacy
  - specific issues arising from use of new technologies
- ethical considerations for marketing, including:
  - appropriate use of images and text
  - codes of practice
  - protection of children
  - targeting of particular groups in the community
- sustainability considerations, opportunities and constraints for marketing in the relevant context, including those related to:
  - cultural and social sustainability
  - economic sustainability of marketing initiatives
  - resource conservation and waste minimisation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • research and critically analyse internal and external business environments • develop a marketing strategy and plan for a product or service that identifies current and relevant marketing issues and includes a detailed, realistic implementation program • integrate knowledge of marketing strategies, techniques and distribution networks for the product or service, including opportunities presented by new technologies • demonstrate knowledge of implementation and monitoring issues specific to the product or service.
Context of and specific resources for assessment	Assessment must ensure use of: • a real or simulated product or service for which

© Commonwealth of Australia, 2025 Skills Insight

market planning can be undertaken
- current information and communications technology to support the research and planning process
- a group of stakeholders who contribute to the planning process
- customers to whom products and services are marketed.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- evaluation of the marketing aspects of a project conducted by the individual
- evaluation of marketing plans prepared by the individual
- use of case studies to assess application of marketing planning principles to different industry situations and contexts
- review of portfolios of evidence and third-party workplace reports of on-the-job performance by the individual.

Guidance information for assessment

The assessor should design integrated assessment activities to holistically assess this unit with other units relevant to the industry sector, workplace and job role, for example:

- SITTPPD503 Research and analyse tourism data.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

SROODR002A Plan outdoor recreation activities

Modification History

Not applicable.

Unit Descriptor

This unit has been developed for the Outdoor Recreation Industry Training Package.This unit covers the knowledge and skills to independently plan and participate unsupervised in outdoor activities within a team environment in situations where extreme environmental conditions are not likely to occur. This unit addresses the basic principles, knowledge and skills to plan general (non activity-specific) requirements for participation in outdoor recreation activities. Activity-specific aspects of clothing and equipment selection are addressed in activity-specific units.This unit incorporates the unit SROODR001A Apply basic outdoor recreation logistics, and this should be taken into consideration when planning to meet pre-and co-requisite requirements.

		7.6	Modify the activity, where necessary, to accommodate the use of ***improvised equipment*** or circumstances

Required Skills and Knowledge

Not applicable.

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

Critical aspects of evidence to be considered	Assessment must confirm sufficient knowledge of the factors influencing the selection and preparation of equipment and its use, as well as food, fluid and clothing

© Commonwealth of Australia, 2025 Skills Insight

requirements for independent participation in outdoor recreation activities

Assessment of performance should be over a minimum of three (3) different occasions covering all prescribed categories from the Range Statements that are applicable to planning for and participation in outdoor activities independently in conditions as specified in the Range Statements in a range of typical weather conditions at a range of different locations or sites

Assessment must confirm the ability to apply this knowledge and appropriate techniques to

apply knowledge of factors affecting the context in order to plan for safe participation

apply in-depth knowledge of equipment and clothing suitable to different contexts

discriminate between features of relevant equipment and clothing

define requirements for specific needs

select the most appropriate equipment, food and clothing

plan for contingencies

operate independently (as part of a group or team) in both routine and predictable non-routine situations

use knowledge of equipment to select and use that which is most appropriate in different contexts

establish and maintain in a safe manner all categories of temporary site relevant to outdoor recreation participation, minimising environmental impact

maintain personal physiological well-being during activities in a range of typical weather condition

Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction

© Commonwealth of Australia, 2025 Skills Insight

	with the following unit(s) Nil For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s) SROOPS003B Apply weather information SRONAV002B Navigate in difficult or trackless areas
Required knowledge and skills	Required knowledge (at a level to undertake activities independently) Minimal impact codes and practices Factors that affect physiological well-being to assist in the planning of food, water and clothing Factors affecting the selection of general equipment used in outdoor activities advantages disadvantages construction features cost ability to repair Dietary requirements when participating in outdoor activities, and the types of food which can supply these requirements Types of food available to suit activity constraints Types of cooking apparatus available for use in outdoor activities, their advantages and disadvantages Clothing requirements for outdoor activities and general principles affecting clothing selection, eg, layering principle, protective clothing Hazard identification in order to develop and apply risk minimisation strategies General land management and legislative requirements which may apply to participation in outdoor activities Use of general equipment in an outdoor

	recreation context
	torches
	tents
	backpacks
	water bottles
	Water purification methods and equipment
	Effects of weather conditions on performance and requirements
	Contents for first aid kits used in outdoor activities
	Communication techniques used in outdoor activities
	Required skills (at a level to undertake activities independently)
	Food preparation in an hygienic manner in an outdoor environment
	Cooking on fires/fuel stoves
	Communication strategies in an outdoor activity and use of communication equipment
Resource implications	Physical resources - assessment of this unit of competency requires access to
	a range of general outdoor equipment, eg, tents, stoves, torches
	a range of types of general outdoor clothing, eg, raincoats, footwear, jackets
	associated resources and information on typical outdoor activity locations/venues and clothing
	Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must
	be competent in this unit but preferably be competent in the unit at the level above, i.e., SROODR003A
	be competent, as a minimum, in the units SRXFAD001A, SRXRIK001A and

© Commonwealth of Australia, 2025 Skills Insight

	SRXEMR001A to ensure adequate risk management during the assessment be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the *Standards for Registered Training Organisations*
Consistency in performance	Due to issues such as variations in contextual issues, this unit of competency must be assessed over a minimum of three (3) different occasions in order to ensure consistency of performance over the Range Statements and contexts applicable to applying general principles of independent participation in outdoor activities
Context for assessment	For valid and reliable assessment this unit of competency must be assessed in the context of participation in a real outdoor recreation activity Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Guidelines for advice on how to use the Key Competencies.

Range Statement

Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency

RANGE STATEMENT	CATEGORIES
Activity constraints	[all categories] all factors which may impact upon food and water requirements within a particular activity, including weight constraints carrying capacity cooking method available water availability length/duration of activity temperature/season budget
Contextual issues	[all categories] includes all factors which may impact upon the particular activity season activity location time of day weather length of activity

© Commonwealth of Australia, 2025 Skills Insight

	participant size and ability
	weight constraints of activity
	destination
	condition of terrain, activity location or medium
	group needs
	unsupervised
Equipment	[all categories]
	includes all aspects of general outdoor equipment required for participation
	general outdoor equipment, eg, tents, backpacks, stoves, torches
	personal equipment, eg, jackets, raincoats
	safety equipment, eg, first aid kit
	group equipment, eg, communications
Hazards	[all categories]
	potential terrain hazards
	environmental hazards
	heat
	cold
	rain
	snow
	flood
	fire
	storms
	ice
	people hazards
	equipment failure
Improvised equipment	[all categories]
	repaired equipment
	protective clothing
	shelters
	first aid resources, eg, slings, bandages
	emergency response resources, eg, stretchers,

SISOOPS304A Plan for minimal environmental impact

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan outdoor activities to ensure that minimal environmental impact occurs. The planning requires consideration of the appropriate combination of an activity with a setting. This involves the learner making informed decisions about the selection of settings and the conduct of the activity during the planning phase.

For Indigenous contexts, the delivery and assessment against this competency standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

Application of the Unit

This unit applies to those who work in a range of roles and settings across the sport and recreation sector.

This may include those working for private outdoor adventure companies, volunteer organisations, not for profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify interrelationships between the natural environment and human activity.	1.1. Source information on ***ecological systems*** and their interrelationship to the activity setting. 1.2. Determine ***human impact*** of outdoor recreational activity on ecological systems and their interrelationships. 1.3. Consult with appropriate ***authorities*** to identify sensitive areas within the setting and aspects unique to it. 1.4. Liaise with ***stakeholders*** to identify ***parameters of use***. 1.5. Identify implications of parameters of use for planning of outdoor recreation activities within the setting.
2. Prepare a minimal impact plan for the activity and setting.	2.1. Analyse current environmental ***management strategies*** for the site implemented by resource managers. 2.2. Identify and assess the ***characteristics of the setting*** according to the proposed outdoor recreation activity. 2.3. Identify other uses of the setting, the relationship to current management strategies and the implications for offering appropriate recreation opportunities. 2.4. Identify ***minimal impact practices*** and procedures to reduce ***impact on the natural environment*** according to ***relevant legislation*** and ***organisational minimal impact policies and procedures***. 2.5. Develop and document a ***minimal impact plan*** for the activity according to relevant legislation and ***resource management principles*** for the setting.
3. Implement and monitor minimal impact plan.	3.1. Explain aims of minimal impact plan to activity participants. 3.2. Communicate ***unique aspects*** of the setting and

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	specific impacts likely to occur during an activity to participants in the activity. 3.3. Conduct activities according to minimal impact plan, relevant legislation and organisational policies and procedures. 3.4. Monitor effectiveness of minimal impact plan.
4. Evaluate minimal impact practices.	4.1. Identify ***techniques*** to determine the nature and degree of impact. 4.2. Evaluate the effectiveness of personal minimal impact practices using basic techniques. 4.3. Modify impact reduction strategies, where necessary, after evaluation.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - consult with authorities, landowners and or custodians regarding strategies to minimise the impact of outdoor activities on specific environments and settings
  - convey information to participants about participating in activities responsibly so that environmental impact is minimised
- problem-solving skills to:
  - identify and match strategies for minimal environmental impact within an outdoor activity to a particular environmental setting
  - develop sustainable solutions that meet the needs of all stakeholders
- language and literacy skills to:
  - read and analyse relevant legislation and organisational policies and procedures
  - develop and document an environmental minimal impact plan
  - source information on ecological systems
- planning and organising skills to:
  - plan goals and strategies to achieve minimal environmental impact for an outdoor activity
  - monitor and evaluate the outcomes of the plan.

Required knowledge

- legislation and organisational minimal impact policies and procedures relating to environmental protection and cultural and heritage protection for the activity area

© Commonwealth of Australia, 2025 Skills Insight

and location to enable outdoor recreation activities to be undertaken responsibly
- area restrictions and resource management requirements to enable compliance during outdoor recreation activities
- biological systems, their interrelationships and terminology used in relation to these to enable understanding of potential causes and consequences of environmental impact
- specific problems of fragile environments or threatened species to enable planning for minimal impact
- environmental management practices used by resource management authorities to minimise impact and factors affecting land management planning, such as limits or parameters of acceptable change to enable identification of appropriate strategies and development of appropriate minimal impact plan
- cultural protocols for making contact and communicating with people and organisations to enable effective consultation in relation to any specific cultural requirements for site access and protection
- roles and responsibilities of resource management agencies.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans outdoor recreation activities that balance the need to minimise environmental impact of recreational activities with appropriate activities and opportunities • applies contingency management techniques to deal with concerns over the degree of impact following recreational activities • adopts and models a responsible attitude towards the natural environment throughout activities.
Context of and specific resources for assessment	Assessment must ensure planning for minimal impact of outdoor activities by implementing environmental management strategies appropriate to local environments on sufficient occasions to demonstrate competency and consistency of performance. Assessment must also ensure access to: • an outdoor environment or site with access to land management personnel, stakeholders and participants

© Commonwealth of Australia, 2025 Skills Insight

- documentation such as organisational minimal environmental impact procedures and practices and relevant environmental protection legislation.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate's ability to implement minimal environmental practices while planning for an outdoor activity
- oral and written questioning to assess knowledge of key environmental management practices to minimise activity impact appropriate to the locality or site of the outdoor activity
- third-party reports from a supervisor detailing evidence of the candidate's planning and implementation of minimal environmental impact practices during an outdoor activity
- a portfolio of evidence of minimal impact plans for specific activities and settings.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOODR302A Plan outdoor recreation activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Ecological systems may include:

- marine
- flora
- fauna
- wetlands
- community
- biosphere
- cycles
- food chains.

Human impact may include:

- introduced species

© Commonwealth of Australia, 2025 Skills Insight

- loss of habitat
- removal of species
- pollution
- physical damage
- alteration to the environment
- noise
- conflicts with other recreational users
- damage to cultural heritage
- crowding.

Authorities may include:

- cultural custodians
- local, state or federal government agencies.

Stakeholders may include:

- authorities
- landowners and or custodians
- relevant state and local government bodies
- land managers.

Parameters of use may include:

- times and duration
- number of users at any one time
- type of activities permitted
- restricted access.

Management strategies may include:

- dispersal of use
- concentration of use
- site hardening or shielding
- zoning
- size limitations
- noise restrictions
- speed restrictions

Characteristics of the setting may include:

- biological
- social
- managerial
- access regulations.

Minimal impact practices may include:

- avoidance of sensitive areas
- appropriate site and route selection
- limited party size
- removal of rubbish
- appropriate sanitation practices
- use of fuel stoves
- use of low impact equipment
- keeping to marked tracks or routes
- appropriate washing procedures
- respect and protection of heritage and cultural sites

© Commonwealth of Australia, 2025 Skills Insight

	• campfire management and rehabilitation.
Impact on the natural environment may include:	• soil • plants • water • geology • wildlife.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Organisational minimal impact policies and procedures may include:	• restricting access • limiting group size • seasonal restrictions • use of permits • protocols for consulting stakeholders • codes of Ethics and Conduct • heritage and cultural site protocols and guidelines.
Minimal impact plan may include:	• activity aims to achieve minimal impact • management strategies to achieve minimal impact.
Resource management principles may include:	• economic • environmental • social.
Unique aspects may include:	• caves • archaeological, heritage and cultural sites • local traditions • protected areas • delicate or fragile formations and strata • flora and fauna with restricted distribution.
Techniques may include:	• identifying the extent or spatial scale of the impact • identifying intensity or severity of the impact • identifying duration of the impact • gauging stakeholder feedback or concerns.

Element	Performance Criteria
1 **Identify conflict situations**	1.1 Identify (quickly) signs and possible causes of conflict
	1.2 Determine accurately the stage of the conflict, with respect to progression and possible escalation
	1.3 Take swift and tactful action to prevent escalation
	1.4 Identify (quickly) situations where personal safety of clients or staff may be threatened and organise appropriate assistance (if required)
	1.5 Identify factors within the individual or workplace environment which relate to the developing conflict
2 **Implement conflict resolution strategies**	2.1 Take responsibility for resolving the conflict within scope of individual responsibility
	2.2 Clarify **factors and issues relevant to the conflict**
	2.3 Demonstrate correct use of **conflict resolution techniques** to manage the conflict after consideration of the particular situation
	2.4 Identify **options for resolution** of the conflict which allow for constructive responses to be negotiated and enable established work relationships to continue
	2.5 Encourage, treat with respect, and accept (where appropriate) all points of view during negotiations and discussions
3 **Use effective interpersonal skills**	3.1 Demonstrate use of effective verbal and non verbal communication during negotiations (including body language, questioning, language style, active listening and reflection)
	3.2 Provide assertive feedback, and receive feedback non-defensively during negotiations

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

Critical aspects of evidence to be considered	Assessment must confirm sufficient knowledge of typical symptoms and causes of conflict in the work environment and conflict resolution techniques Assessment of performance should be over the resolution of a minimum of three (3) different conflict situations, covering the prescribed number of categories from the Range Statements Assessment must confirm the ability to apply this knowledge and appropriate techniques to identify sources of conflict in the workplace resolve a range of different conflict situations, using different options for resolution use suitable communication skills to facilitate effective discussion between all parties and achieve resolution
Interdependent assessment of units	This unit must be assessed after attainment of competency in the following unit(s) Nil This unit must be assessed in conjunction with the following unit(s) Nil For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s) Nil
Required knowledge and skills	Required knowledge

© Commonwealth of Australia, 2025 Skills Insight

	Signs and stages of conflict in the workplace Possible causes/sources of conflict (ideational, status and power, goal conflict) Functions of conflict (functional and dysfunctional) Options for constructive responses to typical conflict situations
	Required skills Interpersonal skills Participation in small informal work groups Problem solving Ability to gather, record, and convey information
Resource implications	Physical resources - assessment of this unit of competency requires access to real or simulated work group situations access to information relevant to the workplace
	Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must be competent in this unit but preferably be competent in the unit at the level above be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the **Standards for Registered Training Organisations**
Consistency in performance	Due to issues such as differences in conflict situations, this unit of competency must be

© Commonwealth of Australia, 2025 Skills Insight

	assessed over the resolution of a minimum of three (3) different conflict situations, to ensure consistency of performance over the Range Statements and contexts applicable to conflict arising in workplaces
Context for assessment	This unit of competency must be assessed in the context of responding to a conflict issue arising during a sport or recreation activity for a group of clients. For valid and reliable assessment the clients should be real, i.e., not peers, and the sport or recreation activity should be similar to those that occur in the learners work environment. The environment should be safe with the hazards, circumstances and equipment likely to be encountered in a real workplace Assessment of this unit of competency will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

TAADEL502B Facilitate action learning projects

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to facilitate a group to engage in action learning projects.

Application of the Unit

Action learning involves a group-based learning model in which the participants contribute their knowledge and expertise to guide the learning experience. The members learn from each other and through their experiences in participating in and directing the action learning process, guided by the trainer/facilitator.

The group may have come together for a number of reasons. They may be an existing work team or group; a class group; a network or community of practice; or a group brought together to work through a specific project, activity, issue or common interest. Action learning can be integrated into work and contribute to improvements at work.

Facilitating an action learning project requires high-level communication, interpersonal and leadership skills to continuously develop, monitor and evaluate the relevance, group interactions, structure and pace, and learning/work outcomes of the process. These skills are simultaneously used with the learners.

This unit is related to a number of training and management work functions. For example, a trainer/facilitator may use action learning facilitation skills as part of a broader training delivery strategy, or as a process for professional development with peers and colleagues, while a manager may facilitate an action learning project to achieve organisational objectives, such as a change process.

The competency specified in this unit is typically required by trainers/facilitators, teachers, coordinators/managers and consultants.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 **Prepare for action learning**	1.1 The **needs of the organisation and the learners** are **researched** and confirmed
	1.2 A **facilitation guide** is developed with **stakeholders**
	1.3 **Resources** which engender a work-based action learning approach are researched and collated
	1.4 Information about the **action learning process** is distributed to all learners in the group
2 **Introduce action learning**	2.1 An **environment conducive to collaboration and safety** is set up
	2.2 **Communication and interpersonal skills** are used to welcome and engage the group
	2.3 The expectations, knowledge and expertise of individuals in the group are identified and acknowledged
	2.4 The **principles of action learning** are explained and discussed
	2.5 Anticipated objectives, outputs and outcomes, and evaluation methods are clarified and confirmed
	2.6 Resources are introduced and discussed

© Commonwealth of Australia, 2025 Skills Insight

3	**Facilitate action learning**	3.1 The group is guided to jointly develop and document an **action plan,** and modify as required
		3.2 Sessions are timetabled and **varied activities** are paced to suit the learning needs and **learning styles** of the participants and to maximise participation and engagement
		3.3 **Generic skill** development is encouraged through facilitated learning
		3.4 The strengths and relationships within the group are observed and extended to drive the learning experience and to maintain group dynamics
		3.5 Problem solving, contingency management and time management skills and strategies are used to address issues as they arise
		3.6 Information to assist with out of session implementation of action learning is distributed and discussed
4	**Continuously evaluate action learning**	4.1 The effectiveness of communication within the group is discussed and evaluated
		4.2 Learners are supported to **self-assess and reflect** on personal and group learning
		4.3 A range of **evaluation methods** is used to periodically evaluate and document progress against the objectives/intended outcomes of the facilitation guide
		4.4 Ongoing evaluations and reflections are synthesised and used to continuously modify or adapt action learning process and individual/group activities, as required
5	**Identify ongoing group purpose and sustainability**	5.1 Learners are supported and encouraged to determine **agreed directions and future** of the group
		5.2 Guidance is provided to address group deliberations
		5.3 The agreed directions and outcomes are defined
6	**Facilitate group evaluation**	6.1 The group's overall evaluation of the action

© Commonwealth of Australia, 2025 Skills Insight

		learning process is facilitated against the action plan in line with the agreed evaluation process
	6.2	The group evaluation is documented and agreed by the group
	6.3	The group is supported to promote and disseminate outcomes and any outputs/products, as appropriate
	6.4	All documentation in relation to the action learning project is filed according to organisational requirements
7 **Reflect on personal facilitation skills**	7.1	Feedback from the action learning group and other stakeholders is gathered and analysed
	7.2	Self-assessment and reflection is carried out to evaluate own performance
	7.3	Feedback on personal facilitation skills is sought from colleagues or other relevant persons
	7.4	Feedback is synthesised to determine improvements for future action learning facilitation

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they can apply organisational, communication, interpersonal and group leadership skills to effectively facilitate a group action learning project.

The trainer/facilitator must demonstrate the ability to engage and motivate the group using a variety of activities, processes or techniques to maintain the interest of all individuals. The trainer/facilitator must also demonstrate the ability to ensure all group members feel able to contribute equally and are able to mutually determine their own direction and outcomes

© Commonwealth of Australia, 2025 Skills Insight

within the parameters set by the work objectives.

The trainer/facilitator must maintain relevance of the group discussion and learning to the purpose of the action learning, and assist the group members to learn from each other and their experiences.

Evidence Requirements

Required knowledge includes:	learning principles, for example: adults have a need to be self-directing and decide for themselves what they want to learn adults have a range of life experience and connecting learning to experience is meaningful adults have a need to know why they are learning adults need to be respected adults prefer learning to be relevant and practical
	action learning principles, for example: a learning cycle based on planning, action, reflection and evaluation work-focused learner-directed based on mutual expertise, support and stimulation open ended solutions using learning to act differently challenging established models and approaches thinking critically
	current and emerging workplace action learning approaches, for example: communities of practice action research structured networks knowledge management theory and practices

© Commonwealth of Australia, 2025 Skills Insight

group learning dynamics, for example:

degrees of structure and formality

forming, storming, norming, performing and terminating

stages of development - potential, coalescing, active, dispersed, memorable

different learning styles and how to encourage and cater for them, for example:

theoretical learners

pragmatic learners

active learners

reflective learners

kinaesthetic learners

audio learners

visual learners

different learning modes or devices, for example:

audio-visual technology

written information

demonstrations

practice opportunities

group work

context in which the action learning is taking place, for example:

the organisation/industry

the site

relevant resources, organisational documents, internal/external policies/strategies/reports

change management models

evaluation and reflection methods for groups

© Commonwealth of Australia, 2025 Skills Insight

	and individuals and their different purposes/outcomes
	relevant policy, legislation, codes of practice and national standards including Commonwealth and state/territory legislation, for example:
	ensuring fairness of learning opportunities
	industrial relations award and other possible barriers to learning competency standards
	licensing
	industry/workplace requirements
	duty of care
	anti-discrimination including equal opportunity, racial vilification and disability discrimination
	workplace relations
	industrial awards/enterprise agreements
	National Reporting System
	OHS relating to the work role, including:
	reporting requirements for hazards
	safe use and maintenance of relevant equipment
	emergency procedures
	sources of OHS information
Required skills and attributes include:	competent use of required technology, for example:
	computers
	audio-visual equipment
	electronic whiteboard
	literacy skills to:
	write legibly and clearly
	develop a facilitation plan
	language skills to:
	effectively hypothesise, plan and influence

© Commonwealth of Australia, 2025 Skills Insight

others

interpret the verbal and non-verbal communication of learners, for example, resistance/reluctance, uncertainty, enthusiasm, confusion and body language

communication and interpersonal skills to:

demonstrate an open, respectful, friendly, welcoming attitude

demonstrate empathy

make people feel safe and at ease

encourage learners to succeed at their tasks

provide positive and negative feedback

explore ideas in discussion by building on others' ideas to advance discussion, and questioning others to clarify

acknowledge contribution of each group member

anticipate the direction of conversation and guide it to maintain relevance

listen effectively to identify emerging themes/issues/ideas; reiterate and paraphrase information; check for meaning and attitude

group management skills to:

guide group dynamics and ensure fair distribution of comment and participation

remain non-judgemental

work with conflict

remain objective

set up boundaries

respect physical space

maintain enthusiasm and energy

manage time

keep sessions learner-centred

manage inappropriate behaviour

© Commonwealth of Australia, 2025 Skills Insight

	problem solving skills to: address individual and group difficulties and issues relating to the action learning process maintain group cohesion and direction address contingencies in sessions modify scope/direction/outcomes of the action learning process
Products that could be used as evidence include:	documentation developed during facilitation evaluation information from participants activities or resources developed for a range of sessions facilitation plans action plans peer assessment documents audio/video of session self-reflection diary/journal journals and notes of learners, within confidentiality requirements
Processes that could be used as evidence include:	how group dynamics were maintained and why how the learners directed the process how communication skills were used effectively in the session how learning principles were applied
Resource implications for assessment include:	relevant workplace project or activity sufficient time with the group for completion of action learning process and cycle
The collection of quality evidence requires that:	assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills a range of appropriate assessment methods/evidence gathering techniques is used to determine competency evidence must be gathered in the workplace whenever possible. Where no workplace is

© Commonwealth of Australia, 2025 Skills Insight

	available, a simulated workplace must be provided the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice assessment meets the rules of evidence a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated
Specific evidence requirements must include:	a minimum of two action learning cycles with different briefs or project outcomes that enable the outcomes, Performance Criteria, knowledge and skills to be demonstrated
Integrated assessment means that:	this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to: **TAADEL401B Plan and organise group-based delivery** **TAADEL402B Facilitate group-based learning** **TAADEL403B Facilitate individual learning** **TAADEL404B Facilitate work-based learning** **TAATAS504B Facilitate group processes**.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be

© Commonwealth of Australia, 2025 Skills Insight

included.

Needs of the organisation and the learnersmay include:	implementing relevant aspects of the organisation's strategic or business plans
	developing/implementing/embedding new ways of working/improved work practices
	addressing change/developing change management approaches
	increasing team capacity and empowerment
	developing a learning organisation
	educational background and experience in learning
	preferred learning styles
	specific needs for learning
Researchmay be undertaken through gathering/ reviewing/ investigating:	employment records/performance reviews/supervisors' reports
	organisational goals, reports and plans
	client feedback
	external reports on policies, changing nature of work and new technologies that impact on work
	learner records and information
	issues/areas of need, as discussed with internal/external peers, colleagues and work personnel
Afacilitation guide:	must outline the action learning methodology to be used
	must outline intended objective outcomes, outputs, time lines, budget, and evaluation and promotional strategies
	must identify the needs, interests and expectations of potential learners/group members
	must include proposed evaluation methods
	may require modification following research, feedback and implementation by the group members
	may include assessment criteria

© Commonwealth of Australia, 2025 Skills Insight

	may be developed by the trainer/facilitator
	may be developed in collaboration with others, e.g. stakeholders/peers/mentors
Stakeholdersinclude:	persons, other than the learners in the group, influenced by the action learning process, such as:
	management
	other employees/workers
	colleagues
	other learners
	clients
	enterprise/industry partners
Resourcesmay include:	identified experts, internal/external
	publications/reports
	organisational documents
	communication tools
	flip chart, white board or overhead projector
	location/facility requirements
	travel/accommodation/meeting needs
Action learning processmay involve:	work-based learning
	action research
	communities of practice
	structure or formal networks
	situated learning
	self-defined or self-managed groups
Anenvironment conducive to collaboration and safetyincludes one where:	equipment works correctly
	occupational health and safety (OHS) requirements are met
	the venue is welcoming and comfortable
	organisational support is obtained
	behavioural norms are established
Communication skillsmust include:	providing an open, warm communication style where effective verbal and body language is used

© Commonwealth of Australia, 2025 Skills Insight

	demonstrating a capacity to communicate clearly to facilitate the group and each individual
	using critical listening and questioning techniques
	providing constructive and supportive feedback
	accurately interpreting verbal messages
	assisting participants to paraphrase advice/instructions to the trainer/facilitator
	providing clear and concrete options/advice
Interpersonal skillsmust include:	showing respect for learners' expertise/background
	demonstrating sensitivity to diversity, disability, culture, gender and ethnic backgrounds
	modelling facilitation and learning behaviours
	engaging in two-way interaction
	using language and concepts appropriate to cultural differences
	accurately interpreting non-verbal messages
Principles of action learninginclude:	a learning cycle based on planning, action, reflection and evaluation
	work-focused
	learning by doing and through action
	learner-directed
	based on mutual expertise, support and stimulation
	open ended solutions
	using learning to act differently
	challenging established models and approaches
	thinking critically
Theaction planmay include:	the organisational context and objectives
	the action learning methodology being used

© Commonwealth of Australia, 2025 Skills Insight

	expected outcomes/outputs
	formal learning and work activities
	time lines and number of meetings/sessions
	resources
	agreed evaluation methods
Varied activitiesmay include:	guiding learners to share their knowledge and expertise
	encouraging critical analyses of practices
	developing common resources/responses/strategies
	using group engagement activities, e.g. problem solving, scenario setting and questioning
	trialling ideas or processes
	reporting on tasks/activities undertaken in the workplace or out of sessions
	using a range of different activities, for example:
	written activities
	role-plays
	audio or visual activities
	practice or demonstration
	visits to other organisations, training and/or assessment organisations, worksites
Learning stylesinclude:	theorist
	pragmatist
	activist
	reflector
	kinaesthetic
	auditory
	visual
Generic skillsmay include:	Employability Skills, including:
	communication
	teamwork

© Commonwealth of Australia, 2025 Skills Insight

	problem solving
	initiative and enterprise
	planning and organising
	self-management
	learning
	technology
	innovation
	language, literacy and numeracy skills
Self-assess and reflectmay include:	asking critical questions about personal performance and answering them objectively and honestly
	analysing what worked and what did not work, and why
	thinking about and planning for improvement in the future
Evaluation methods may include:	formal methods such as surveys and questionnaires
	informal methods such as observations, individual and group questioning and discussions
	journal/diary
	feedback loops
Agreed directions and future may include:	identifying areas of further group work
	bringing project or group to a close
	developing new directions

Modification History

Version	Comments
TAEASS301B	Released with *TAE10 Training and Education Training Package version 2.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the assessment process.

Application of the Unit

This unit typically applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role and for whom collecting evidence for assessment is an adjunct to principal work responsibilities.

This unit is performed under the following conditions:

- the necessary assessment tools and assessment resources to guide the evidence collection process have been provided
- any adjustments to tools are determined by the qualified assessor (as defined by the Australian Quality Training Framework and the assessor requirements of the relevant training package), who provides guidance and supervision.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency .	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Clarify role and responsibilities in the assessment process	1.1 Discuss and confirm ***purpose of assessment*** with ***relevant people***
	1.2 Discuss and confirm ***benchmarks for assessment*** with qualified assessor
	1.3 Access, read and clarify ***assessment plan*** with qualified assessor
	1.4 Discuss and agree with qualified assessor the specific responsibilities in gathering evidence and types of evidence to be gathered
2. Confirm organisational arrangements for evidence gathering	2.1 Access and confirm relevant ***assessment system policies and procedures;*** organisational, legal and ethical requirements; and other relevant advice on assessment
	2.2 Clarify nominated ***assessment tools*** and methods for collecting evidence with qualified assessor, to ensure that procedures to be followed and instruments to be used are clear
	2.3 Discuss and confirm with relevant people ***assessment context,*** including candidate's characteristics and any need for ***reasonable adjustments***
	2.4 Confirm and arrange ***resource requirements*** in consultation with relevant people
3. Collect evidence in accordance with the assessment plan	3.1 Explain assessment process to candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to qualified assessor prior to undertaking assessment activities
	3.2 Use ***assessment instruments*** to gather quality evidence within available time and resources, according to organisational, legal and ethical requirements
4. Record and report findings	4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to assessment system policies and procedures

© Commonwealth of Australia, 2025 Skills Insight

	4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment and whether evidence collected meets the rules of evidence 4.3 Document areas for improvement in collecting evidence, for future assessment activities

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- observation skills to observe candidate performance
- cognitive and interpretation skills to ensure collection of valid and reliable evidence
- organisational skills to collect evidence
- time-management skills to schedule assessment events and activities
- literacy skills to:
  - read and interpret relevant information
  - prepare required documentation and collate evidence in required format
- communication skills to:
  - discuss evidence-gathering processes with practitioners and candidates
  - provide constructive and supportive feedback
  - ask appropriate questions to clarify and confirm instructions for evidence gathering
  - provide clear and concrete options and advice.

Required knowledge

- competency-based assessment, including:
  - criterion referenced
  - competency standards as the benchmarks for assessment
  - competency-based reporting
- principles of assessment
- rules of quality evidence
- different purposes of assessment
- diversity of assessment contexts
- evidence, including different types of evidence
- evidence-gathering methods – what are assessment methods and different types of methods
- purpose and features of assessment tools and assessment plans
- potential barriers and processes relating to evidence-gathering procedures and assessment processes
- organisational assessment system policies and procedures relevant to this unit of competency

© Commonwealth of Australia, 2025 Skills Insight

- technical or subject area being assessed
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation, that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, and OHS considerations to be included in collecting evidence, including:
  - hazard identification and risk control measures
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for use of relevant personal protective equipment
  - safe use of relevant equipment
  - sources of OHS information
  - role of key workplace personnel
  - responsibilities of learners.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • carry out a minimum of three evidence-gathering activities, with different candidates for each activity • present documentation of the evidence in a clear and concise manner • present documented feedback from others involved in the assessment.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Purpose of assessment may be:	• recognise current existing competency of candidates • determine if competency has been achieved following learning • establish candidate progress towards achievement of competence • determine language, literacy and numeracy needs of candidate • certify competence through a Statement of Attainment • establish progress towards a qualification • determine training gaps of candidate • measure work performance • classify employee and support career progression • meet organisational requirements for work, such as operating equipment or developing new skills • satisfy licensing or regulatory requirements.
Relevant people must include:	• qualified assessors • candidates.
Benchmarks for assessment:	• refer to criteria against which candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
Assessment plan must include:	• purpose and aims of assessment • context of assessment • relevant benchmarks for assessment • other assessment information and documentation identified as relevant.
Assessment system policies and procedures may include:	• candidate selection • rationale and purpose of competency-based assessment • assessment records, data management and information management • recognition of current competency, recognition of prior learning and credit arrangements.
Assessment tools include:	• the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance

© Commonwealth of Australia, 2025 Skills Insight

	(i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.
Assessment context may include:	• environment in which assessment will be carried out • relationship between units of competency and candidate's workplace • time period over which assessment takes place.

Reasonable adjustments may include:	• taking into account candidate's language, literacy and numeracy requirements
	• providing personal support services, such as arranging for:
	  • member of the community to accompany the candidate
	  • reader
	  • interpreter
	  • attendant carer
	  • scribe
	• using adaptive technology or special equipment
	• providing flexible assessment sessions to allow for such things as fatigue or administering of medication
	• format of assessment materials, such as:
	  • in Braille
	  • in first language
	  • use of audiotape or videotape
	• making adjustments to the physical environment
	• revising proposed assessment methods and instruments
	• considering age and gender
	• considering cultural beliefs, traditional practices and religious observances.

Resource requirements may include:	• resources specific to evidence-gathering activities • access to assessors • access to policy and procedures • access to subject and technical experts • OHS requirements • plant, equipment and technology.

Assessment instruments may include:	• instruments developed by an assessor as part of formative or summative assessment activities, including:
	  • profiles of acceptable performance measures
	  • templates and proformas
	  • specific questions or activities
	  • evidence and observation checklists
	  • checklists for the evaluation of work samples

© Commonwealth of Australia, 2025 Skills Insight

	• recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.

TAEASS401B Plan assessment activities and processes

Modification History

Version	Comments
TAEASS301B	Released with *TAE10 Training and Education Training Package version 2.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.

Application of the Unit

This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.

The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.

Licensing/Regulatory Information

relating to reasonable adjustment
    - identify opportunities for integrated competency assessment
    - contextualise competency standards to the operating assessment environment, including RPL
    - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
    - obtain competency standards, assessment tools and other relevant assessment resources
    - research candidate characteristics and any reasonable adjustment needs
    - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
    - demonstrate sensitivity to access and equity considerations and candidate diversity
    - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes.
- **Required knowledge**
- ethical and legal requirements of an assessor
- competency-based assessment, including:
    - work focused
    - criterion referenced
    - standards based
    - evidence based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process
- purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL
- rules of evidence and how they guide evidence collection
- different types of assessment methods, including suitability for collecting various types of evidence
- assessment instruments and their purpose; different types of instruments; relevance of different instruments for specific evidence-gathering opportunities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Evidence of the ability to:
	• plan and organise the assessment process on a minimum of two occasions
	• collect evidence that demonstrates:
	  • documented assessment plans
	  • having covered a range of assessment events
	  • catering for a number of candidates
	  • different competency standards or accredited curricula
	  • an RPL assessment
	  • contextualisation of competency standards and the selected assessment tools, where required
	  • incorporation of reasonable adjustment strategies
	  • development of simple assessment instruments for use in the process
	  • organisational arrangements.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Skills Insight

Purposes of assessment/ RPL may include:	• recognising current existing competence of candidates • determining if competence has been achieved following learning • establishing candidate progress towards achievement of competence • determining language, literacy and numeracy needs of candidates • certifying competence through a qualification or Statement of Attainment • licensing or regulatory requirements.

Context of assessment/ RPL may include:	• environment in which the assessment/RPL will be carried out, including real or simulated workplace
	• opportunities for collecting evidence in a number of situations
	• relationships between competency standards and:
	  • evidence to support RPL
	  • work activities in the candidate's workplace
	  • learning activities
	• who carries out the assessment/RPL.

Organisational, legal and ethical requirements may include:	• assessment system policies and procedures
	• assessment strategy requirements
	• reporting, recording and retrieval systems for assessment, including RPL
	• quality assurance systems
	• business and performance plans
	• access and equity policies and procedures
	• collaborative and partnership arrangements
	• defined resource parameters
	• mutual recognition arrangements
	• industrial relations systems and processes, awards, and enterprise agreements
	• Australian Quality Training Framework
	• registration scope
	• human resources policies and procedures
	• legal requirements, including:
	  • anti-discrimination
	  • equal employment opportunity
	  • job role, responsibilities and conditions
	• relevant industry codes of practice
	• confidentiality and privacy requirements
	• OHS considerations, including:
	  • ensuring OHS requirements are adhered to during the

© Commonwealth of Australia, 2025 Skills Insight

	assessment process • identifying and reporting OHS hazards and concerns to relevant personnel.
Benchmarks for assessment/RPL may include:	• criterion against which the candidate is assessed or prior learning recognised, which may be: • competency standard/unit of competency • assessment criteria of course curricula • performance specifications of an enterprise or industry • product specifications.
Types of evidence may include:	• direct • indirect • supplementary.
Rules of evidence ensure that evidence collected is:	• valid • sufficient • authentic • current.
Assessment methods are the particular techniques used to gather evidence and may include:	• direct observation, for example: • real work/real time activities at the workplace • work activities in a simulated workplace environment • structured activities, for example: • simulation exercises and role-plays • projects • presentations • activity sheets • questioning, for example: • written questions, e.g. on a computer • interviews • self-assessment • verbal questioning • questionnaires • oral or written examinations (applicable at higher AQF levels) • portfolios of evidence, for example: • collection of work samples compiled by candidate • product with supporting documentation • historical evidence • journal or log book • information about life experience • review of products, for example: • testimonials and reports from employers and supervisors

© Commonwealth of Australia, 2025 Skills Insight

	• evidence of training • authenticated prior achievements • interview with employer, supervisor, or peer.
Assessment plan may include:	• overall planning document describing: • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
Simple assessment instruments may include:	• instruments developed by an assessor as part of formative or summative assessment activities, including: • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
Available assessment instruments may include:	• commercially available instruments • those created by others inside the registered training organisation.
Map assessment means:	• showing a clear relationship between the evidence and the requirements of the unit.

TAEASS402B Assess competence

Modification History

Version	Comments
TAEASS402B	Released with *TAE10 Training and Education Training Package version 2.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to assess the competence of a candidate.

Application of the Unit

This unit typically applies to assessors.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1. Prepare for assessment	1.1 Interpret ***assessment plan*** and confirm organisational, legal and ethical requirements for conducting assessment with relevant people 1.2 Access and interpret relevant ***benchmarks for assessment*** and nominated ***assessment tools*** to confirm the requirements for evidence to be collected 1.3 Arrange identified material and physical resource requirements according to assessment system policies and procedures 1.4 Organise ***specialist support*** required for assessment 1.5 Explain, discuss and agree details of the assessment plan with candidate
2. Gather quality evidence	2.1 Use agreed ***assessment methods*** and instruments to gather, organise and document evidence in a format suitable for determining competence 2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence 2.3 Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel 2.4 Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required
3. Support the candidate	3.1 Guide candidates in gathering their own evidence to support recognition of prior learning (RPL) 3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to ***individual differences*** and enables two-way ***feedback*** 3.3 Make decisions on reasonable adjustments with the candidate, based on candidate's needs and characteristics 3.4 Access required specialist support in accordance with the assessment plan 3.5 Address any OHS risk to person or equipment immediately
4. Make the assessment decision	4.1 Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence 4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence 4.3 Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan 4.4 Provide clear and constructive feedback to candidate regarding

© Commonwealth of Australia, 2025 Skills Insight

	the assessment decision and develop any follow-up action plan required
5. Record and report the assessment decision	5.1 Record assessment outcomes promptly and accurately 5.2 Complete and process an assessment report according to agreed assessment procedures 5.3 Inform other relevant parties of the assessment decision according to confidentiality conventions
6. Review the assessment process	6.1 Review the assessment process in ***consultation*** with relevant people to improve own future practice 6.2 Document and record the review according to relevant assessment system policies and procedures

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
  - break down competency standards
  - interpret assessment tools and other assessment information, including those used in RPL
  - identify candidate needs
  - make judgements based on assessment of available evidence
- observation skills to:
  - recognise candidate's prior learning
  - determine candidate's performance
  - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
  - access required human and material resources for assessment
  - access assessment system policies and procedures
  - access RPL policies and procedures
  - evaluate evidence
  - evaluate assessment process
- cognitive skills to:
  - weigh up the evidence and make a judgement
  - consider and recommend reasonable adjustments
- decision-making skills to:
  - recognise a candidate's prior learning

© Commonwealth of Australia, 2025 Skills Insight

    - make a decision on a candidate's competence
- literacy skills to:
    - read and interpret relevant information to conduct assessment
    - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
    - explain the assessment, including RPL process
    - give clear and precise instructions
    - ask effective questions
    - provide clarification
    - discuss process with other relevant people
    - give appropriate feedback
    - discuss assessment outcome
    - use language appropriate to candidate and assessment environment
    - establish a working relationship with candidate.

Required knowledge

- competency-based assessment, including:
    - vocational education and training as a competency-based system
    - criterion-referenced assessment as distinct from norm-referenced assessment
    - competency standards as the basis of qualifications
    - structure and application of competency standards
    - principles of assessment and how they are applied
    - rules of evidence and how they are applied
    - range of assessment purposes and assessment contexts, including RPL
    - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
    - reasonable adjustments and when they are applicable
    - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
    - potential barriers and processes relating to assessment tools and methods
    - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
    - copyright and privacy laws in terms of electronic technology
    - security of information

© Commonwealth of Australia, 2025 Skills Insight

  - plagiarism
  - training packages and competency standards
  - licensing requirements
  - industry and workplace requirements
  - duty of care under common law
  - recording information and confidentiality requirements
  - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
  - workplace relations
  - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:
  - requirements for reporting hazards and incidents
  - emergency procedures
  - procedures for use of relevant personal protective equipment
  - safe use and maintenance of relevant equipment
  - sources of OHS information.
-

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan
	• assess at least one candidate for RPL
	• consider reasonable adjustment and the reasons for decisions in at least one assessment
	• cover an entire unit of competency and show:
	  • the application of different assessment methods and instruments involving a range of assessment activities and events
	  • two-way communication and feedback
	  • how judgement was exercised in making the assessment decision
	  • how and when assessment outcomes were recorded and reported

© Commonwealth of Australia, 2025 Skills Insight

	• assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements • how the assessment process was reviewed.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Assessment plan may include:	• overall planning, describing:
	  • what is to be assessed
	  • when assessment is to take place
	  • where assessment is to take place
	  • how assessment is to take place.

Benchmarks for assessment:	• refer to a criterion against which the candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
Assessment tools include:	• the learning or competency unit(s) to be assessed • the target group, context and conditions for the assessment • the tasks to be administered to the candidate • an outline of the evidence to be gathered from the candidate • the evidence criteria used to judge the quality of performance (i.e. the assessment decision-making rules) • the administration, recording and reporting requirements • the evidence of how validity and reliability have been tested and built into the design and use of the tool.

© Commonwealth of Australia, 2025 Skills Insight

Specialist support may include:	• assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels • support from lead assessors • advice from policy development experts.

Assessment methods include:	• particular techniques used to gather different types of evidence, such as:
	  • direct observation
	  • structured activities
	  • oral or written questioning
	  • portfolios of evidence
	  • review of products
	  • third-party feedback.

Individual differences may include:	• English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
Feedback may include:	• ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and

© Commonwealth of Australia, 2025 Skills Insight

	presentation.
Consultation may involve:	• moderation with other assessors, or training and assessment coordinators • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors • technical and subject experts • English language, literacy and numeracy experts.

TAEASS403B Participate in assessment validation

Modification History

Version	Comments
TAEASS403B	Released with *TAE10 Training and Education Training Package version 2.0*

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in an assessment validation process.

Application of the Unit

This unit typically applies to those participating in assessment validation. It does not address leading the validation process.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria

1. Prepare for validation	1.1 Discuss and confirm the approach to validation according to defined purposes, context, and relevant ***assessment system policies and procedures***
	1.2 Analyse relevant ***benchmarks for assessment*** and agree on the evidence needed to demonstrate competence
	1.3 Arrange ***materials*** for ***validation activities***
2. Contribute to validation process	2.1 Demonstrate active ***participation*** in validation sessions and activities using appropriate communication skills
	2.2 Participate in validation sessions and activities by applying the principles of assessment and rules of evidence
	2.3 Check all documents used in the validation process for accuracy and version control
3. Contribute to validation outcomes	3.1 Collectively discuss validation findings to support improvements in the quality of assessment
	3.2 Discuss, agree and record recommendations to improve assessment practice
	3.3 Implement changes to own assessment practice, arising from validation

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- planning skills to participate in validation activities within agreed timeframes
- problem-solving skills to identify information that is inconsistent, ambiguous or contradictory
- evaluation skills to:
  - determine evidence requirements from competency standards
  - review assessment process, tools and methods
  - review collected evidence
- communication skills to share information in validation meetings.

Required knowledge

- how to interpret competency standards and other related assessment information to determine the evidence needed to demonstrate competence, including:
  - criterion-referenced assessment as distinct from norm-referenced assessment

© Commonwealth of Australia, 2025 Skills Insight

  - various reasons for carrying out validation and the different approaches to validation that may be appropriate before, during and after assessment
  - critical aspects of validation, including validation of assessment processes, methods and products
  - relevant OHS legislation, codes of practice, standards and guidelines, impacting on assessment
  - legal and ethical requirements of assessors, particularly in relation to validation activities
- principles of assessment
- rules of evidence.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to: • actively participate in a minimum of two validation sessions or meetings which, in combination, address the critical aspects of validation using different validation approaches and activities • clearly explain purposes of validation and the legal and ethical responsibilities of assessors • collate documentation relating to validation process in a logical manner • demonstrate communication and liaison with relevant people • provide feedback and interpret documentation in validation sessions • record contribution to validation findings.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: • assessment reports and records • other documentation relevant to validation.
Method of assessment	
Guidance information	

© Commonwealth of Australia, 2025 Skills Insight

for assessment	

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Assessment system policies and procedures may include:	• candidate selection • rationale and purpose of competency-based assessment • assessment records, and data and information management • recognition of current competency, recognition of prior learning and credit arrangements • assessment reporting procedures • assessment appeals • candidate grievances and complaints • validation • evaluation and internal audit • costs and resourcing • access and equity, and reasonable adjustment • partnership arrangements • links with human resource or industrial relations system • links with overall quality management system.
Benchmarks for assessment:	• refers to criterion against which the candidate is assessed • may be one or more units of competency or assessment criteria of course curricula.
Materials may include:	• assessment tools • samples of collected evidence • documentation outlining the basis of assessment decisions • reports and records of assessment decisions • samples of benchmarks of appropriate evidence • Assessment Guidelines of the relevant training packages • information from the evidence guide of the relevant units of competency.

Validation activities may include:	• analysing and reviewing:
	  • assessment tools
	  • collected evidence
	  • assessment decisions and records of assessment outcomes

© Commonwealth of Australia, 2025 Skills Insight

	• other aspects of assessment policies, processes and outcomes • recording evidence of validation processes and outcomes.
Participation may include comparison and evaluation of:	• assessment practices • assessment plans • interpretation of units of competency • assessment methods and instruments • assessment decisions • collected evidence.

TAEDEL301A Provide work skill instruction

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about ***learner characteristics*** and learning needs 1.2. Confirm a ***safe learning environment*** 1.3. Gather and check ***instruction and demonstration objectives*** and seek assistance if required 1.4. Access and review relevant ***learning resources*** and ***learning materials*** for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of ***details*** regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any ***OHS procedures*** and requirements prior to and during training 2.4. Use ***delivery techniques*** to structure, pace and enhance learning 2.5. Apply ***coaching*** techniques to assist learning 2.6. Use communication skills to provide information,

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use ***measures*** to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbaland non-verbal communication techniques, such as:
  - asking relevant and appropriate questions
  - providing explanations
  - demonstrating
  - using listening skills
  - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
  - identify hazards
  - conduct prestart-up checks if required
  - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

- ensure all learning objectives are covered
- pace learning

- reflection skills in order to:
  - identify areas for improvement
  - maintain personal skill development
- literacy skills to:
  - complete and maintain documentation
  - read and follow learning programs and plans
  - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
  - engage, motivate and connect with learners
  - provide constructive feedback
  - maintain appropriate relationships
  - establish trust
  - use appropriate body language
  - maintain humour
  - demonstrate tolerance
  - manage a group
  - recognise and be sensitive to individual difference and diversity
- observation skills to:
  - monitor learner acquisition of new skills, knowledge and competency requirements
  - assess learner communication and skills in interacting with others
  - identify learner concerns
  - recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
procedures • risk controls for the specific learning environment

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• carry out aminimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing:
	  • different learning objectives
	  • a range of techniques and effective communication skills appropriate to the audience.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Learner characteristics may include:	• language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
Safe learning environment may include:	• exit requirements • personal protective equipment • safe access • safe use of equipment.

Instruction and demonstration objectives may include:	• competencies to be achieved
	• generic and technical skills, which may be:
	  • provided by the organisation
	  • developed by a colleague
	  • individual or group objectives
	  • learning outcomes.

Learning resources may include:	• any material used to support learning, such as:
	  • learner and user guides
	  • trainer and facilitator guides
	  • example training programs
	  • specific case studies
	  • professional development materials
	  • assessment materials
	• a variety of formats
	• those produced locally
	• those acquired from other sources.

Learning materials may include:	• handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
Details may include:	• location and time • outcomes of instruction or demonstration • reason for instruction or demonstration • who will be attending instruction session.

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
OHS procedures may include:	• emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
Delivery techniques may include:	• coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
Coaching may include:	• learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
Measures may include:	• informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

TAEDEL401A Plan, organise and deliver group-based learning

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to plan, organise and deliver training for individuals within a group.

Application of the Unit

Application of the unit	This unit typically applies to a person working as an entry-level trainer, teacher or facilitator in or with a training and assessment organisation. The person will be working from a learning program developed by someone else, and structuring the learning around that program.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

© Commonwealth of Australia, 2025 Skills Insight

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret learning environment and delivery requirements	1.1. Access, read and interpret ***learning program documentation*** to determine delivery requirements 1.2. Use available information and documentation to identify group and individual learner needs and learner characteristics 1.3. Identify and assess constraints and risks to delivery 1.4. Confirm personal role and responsibilities in planning and delivering training with relevant personnel
2. Prepare session plans	2.1. Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2. Develop ***session plans*** and document these for each segment of the learning program 2.3. Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1. Contextualise existing learning materials to meet the needs of the specific learner group 3.2. Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3. Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1. Conduct each session according to session plan, modified where appropriate to meet learner needs 4.2. Use the diversity of the group as another resource to

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	support learning 4.3. Employ a range of delivery methods as training aids to optimise learner experiences 4.4. Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 5.2. Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3. Manage ***inappropriate behaviour*** to ensure learning can take place 5.4. Maintain and store learner records according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- presentation skills to ensure delivery is engaging and relevant, including:
  - synthesising information and ideas
  - preparing equipment, such as data projectors and computer presentation applications
  - speaking with appropriate tone and pitch
  - using language appropriate to audience
  - encouraging and dealing appropriately with questions
- group facilitation skills to ensure that:
  - every individual has an opportunity for participation and input
  - group cohesion is maintained
  - behaviour that puts others at risk is observed, interpreted and addressed
  - discussion and group interaction are enhanced
- conflict resolution and negotiation skills to:
  - identify critical points, issues, concerns and problems
  - identify options for changing behaviours
- oral communication and language skills to:

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• motivate learners to transfer skills and knowledge • engage with the learner • interpersonal skills to maintain appropriate relationships and ensure inclusivity • observation skills to monitor individual and group progress
Required knowledge

• introductory knowledge of learning theories
• sound knowledge of learning principles
• sound knowledge of learner styles
• industry area and subject matter of the delivery
• learner group profile, including characteristics and needs of individual learners in the group
• content and requirements of the learning program and/or delivery plan
• different delivery methods and techniques appropriate to face-to-face group delivery
• techniques for the recognition and resolution of inappropriate behaviours
• behaviours in learners that may indicate learner difficulties
• organisational record-management systems and reporting requirements
• evaluation and revision techniques
• specific resources, equipment and support services available for learners with special needs
• relevant policy, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
• OHS relating to the facilitation of group-based learning, including:
  • assessment and risk control measures
  • reporting requirements for hazards
  • safe use and maintenance of relevant equipment
  • emergency procedures
  • sources of OHS information
  • role of key workplace persons
• policies and procedures relevant to the learning environment

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• facilitate group-based learning by preparing and delivering a series of training sessions, including:
	  • at least two consecutive sessions, of a duration commensurate with a substantive training session (e.g. 40-60 minutes), that follow one of the learning program designs
	  • at least one session delivered to a different learner group, with evidence of how the characteristics and needs of this group were addressed
	• identify and respond to diversity and individual needs
	• access and use documented resources and support personnel to guide inclusive practices.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided. Assessment must ensure access to: • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Learning program documentation may include:	• competencies or other benchmarks to be achieved
	• for each chunk or segment of the learning program:
	  • specific learning outcomes derived from the benchmarks
	  • overview of content to be covered
	  • learning resources, learning materials and activities
	  • delivery methods
	• number and duration of training sessions or classes required, and overall timelines
	• OHS issues to be addressed in delivery
	• identification of assessment points to measure learner progress
	• assessment methods and tools to be used to collect evidence of competency, where assessment is required.

Session plans may include:	• outline of objectives and content to be addressed • plan of delivery methods and learning activities to be used within the session • timelines and duration for each learning activity • formative assessment points and opportunities • learning materials required.
Inappropriate behaviour may include:	• violent or inappropriate language • verbal or physical abuse or bullying • insensitive verbal or physical behaviour towards other learners or the trainer/facilitator, including cultural, racial, disability or gender-based insensitivities • dominant or overbearing behaviour • disruptive behaviour • non-compliance with safety instructions.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish effective work environment for learning	1.1. Establish and agree upon objectives and scope of the work-based learning 1.2. Analyse work practices and routines to determine their effectiveness in meeting established learning objectives 1.3. Identify and address ***OHS implications*** of using work as the basis for learning
2. Develop a work-based learning pathway	2.1. Address ***contractual requirements*** and responsibilities for learning at work 2.2. Arrange for integration and monitoring of external learning activities with the ***work-based learning pathway*** 2.3. Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1. Identify context for learning and individual's learning style 3.2. Select appropriate technique or process to facilitate learning and explain the basis of the technique to learner 3.3. Develop, document and discuss ***individualised learning plan*** with learner 3.4. Access, read and interpret documentation outlining the OHS responsibilities of the various parties in the learning environment 3.5. Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	learner's health and safety
4. Implement work-based learning pathway	4.1. Sequence introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.2. Explain objectives of work-based learning and the processes involved to learner 4.3. Encourage learner to take responsibility for learning and to self-reflect 4.4. Develop techniques that facilitate learner's transfer of skills and knowledge
5. Maintain and develop the learning/facilitation relationship	5.1. Prepare for each session 5.2. Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3. Observe learner cues and change approaches where necessary to maintain momentum 5.4. Practise ***ethical behaviour*** at all times 5.5. Monitor effectiveness of the learning/facilitation relationship through regular meetings between the parties
6. Close and evaluate the learning/facilitation relationship	6.1. Carry out the closure smoothly, using appropriate interpersonal and communication skills 6.2. Seek feedback from learner on the outcomes achieved and value of the relationship 6.3. Evaluate and document process, including ***impact***, ***self evaluation and reflection***, and file according to legal and organisational requirements
7. Monitor and review the effectiveness of the work-based learning pathway	7.1. Document work performance and learning achievement and keep records according to organisational requirements 7.2. Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used 7.3. Recommend improvements to work-based practice in light of the review process

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- oral communication and language skills to:
  - motivate the learner
  - transfer skills and knowledge
- interpersonal skills to maintain appropriate relationships
- observation skills to monitor individual progress
- literacy skills to:
  - read and interpret organisational documents, legal documents and contracts
  - complete and maintain documentation
- organisational skills to provide guidance and feedback to individuals
- communication skills, including:
  - using effective verbal and non-verbal language
  - using critical listening and questioning techniques
  - giving constructive and supportive feedback
  - assisting learners to paraphrase advice or instructions back to the trainer/facilitator
  - providing clear and concrete options and advice
  - using appropriate industry/profession terminology and language
  - ensuring language, literacy and numeracy used is appropriate to learners

Required knowledge

- systems, processes and practices within the organisation where work-based learning is taking place
- operational demands of the work and impact of changes on work roles
- organisational work culture, including industrial relations environment
- systems for identifying skill needs
- introductory knowledge of different learning styles and how to encourage learning in each, for example:
  - visual learners
  - audio learners
  - kinaesthetic learners
  - theoretical learners
- relevant policy, legislation, codes of practice and national standards that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• specific procedures for work tasks • safe use and maintenance of relevant equipment • emergency procedures • sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the ability to:
	• prepare and facilitate work-based learning
	• provide evidence of a minimum of two examples of developing work-based learning pathways, that include:
	  • identifying needs for learning
	  • analysing work practices, work environment and work activities
	  • organising and allocating work in a way that reflects learning needs and provides effective learning opportunities through work processes
	• provide a minimum of two examples of a learning facilitation relationship being conducted:
	  • with different individuals
	  • demonstrating communication skills and flexibility
	  • demonstrating one or more of the processes or techniques identified.

Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	Assessment must ensure access to information about work activities.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
OHS implications may include:	• OHS obligations • workplace OHS policies and procedures • ensuring work practices, routines and proposed changes do not pose a risk to learners and others.
Contractual requirements may include:	• training plans under apprenticeships/traineeships • requirements of government-funded training programs, such as Workplace English Language and Literacy (WELL).
Work-based learning pathway may include:	• identifying specific goals for work-based learning • identifying job tasks or activities to be included in learning process • appropriate sequencing of job tasks/activities to reflect learner incremental development • direct guidance and modelling from experienced co-workers and experts • opportunities for practice.
Individualised learning plan may include:	• information about individual's learning style, learner characteristics, and the context for learning • clear boundaries and expectations of the learning/facilitation relationship • documented equity or additional support needs for the learner

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• performance benchmarks to be achieved • activities and processes which together will achieve the benchmarks.
Ethical behaviour includes:	• trust • integrity • privacy and confidentiality of the session • following organisational policies • knowing own limitations • having a range of other intervention referrals ready when needed • honesty • fairness to others.
Impact may be:	• successful achievement, rate of achievement, or lack of achievement of identified goals • achievement of other outcomes as a result of the relationship • development of new goals • new or increased motivation to learn • greater capacity to learn • increase in learner's self-confidence.

Self-evaluation and reflection may include:	• asking critical questions about:
	  • own ability
	  • what worked or didn't work
	  • how the relationship building process could be improved
	• reviewing records and journals on sessions and critically evaluating own performance
	• reviewing feedback from learner and identifying critical aspects and areas for improvement.

TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to monitor the condition an seaworthiness of a small commercial vessel up to 24 metres, including awareness of the fundamental principles of vessel construction, load-lines conditions of assignment, structural elements to restrain fires, design characteristics that contribute to watertight integrity, and regulatory requirements for seaworthiness.**

Application of the Unit

Application of the unit	The unit has applications in the qualification for a Coxswain and Master 5 on a small commercial vessel up to 24 m in length operating in coastal waters, i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain) and Certificate III in Transport&Distribution (Coastal Maritime Operations - Master Class 5).

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant State and Territory maritime regulations and the National Standard for Commercial Vessels.

© Commonwealth of Australia, 2025 Skills Insight

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Monitor the condition of a small vessel up to 24 m	a Work to monitor condition and seaworthiness of the vessel is planned and carried out in accordance with procedures and safety regulations b Where required, vessel is slipped as per standard operating procedures c Coverage and frequency of checks and inspections on the vessel complies with the procedures d Checks of the integrity of the vessel's hull are correctly carried out e Action taken in anticipation of environmental changes is timely and appropriate to the change f Action taken in emergency situations is appropriate to the significance of the situation and ensures maintenance of watertight integrity g Precautions are taken to ensure that vessel and on-board powered equipment is operated in accordance with manufacturer's instructions and regulations

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Identify and explain the structural components and material of a small vessel	a Basic structural components are correctly identified b Reasons for deteriorated hull and fittings are identified and explained c Basic understanding of the properties and application of common materials used in small vessel construction is demonstrated and applied when operating a small vessel

ELEMENT	PERFORMANCE CRITERIA
3 Rectify identified problems with the condition of the vessel	a Any deterioration of the vessel's hull or structure is identified either in the water or on a slipway and reported to relevant personnel and appropriate action is initiated to fix the identified problem b Repairs and corrosion control are initiated and coordinated in accordance with procedures and manufacturer's instructions c Communication with others concerning the condition and seaworthiness of the vessel and related action is clear, concise and made at a suitable time and place d Records of problems identified and actions taken are complete, accurate and comply with requirements.

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant State and Territory regulations applicable to small coastal vessels up to 24 m

2 Relevant OH&S legislation and policies

3 Procedures for the checking and inspecting the seaworthiness of a small vessel up to 24 m

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

4 Standard operating procedures for slipping a small vessel up to 24 m

5 The principal stresses which act on the structure of a small vessel up to 24 m

6 Principles and procedures to ensure the watertight integrity of hull of a small vessel up to 24 m in both normal and emergency situations

7 Damage control measures that may be required to maintain the integrity of the hull in a range of typical emergency situations that could occur on a small vessel up to 24 m

8 Procedures for the initiation and coordination of repair and/or replacement on board a small vessel up to 24 m

9 Repairs and corrosion control measures, including surface preparation and painting and antifouling on small vessels up to 24 m

10 Safety, environmental and hazard control precautions and procedures relevant to inspection and maintenance operations, including recommended precautions as per Australian Standard on Entry into Confined Spaces (AS2865)

11 A basic understanding of the properties and application of materials used in the construction of small vessels up to 24 m

12 Construction, layout and subdivision requirements of various types of small vessels up to 24 m

13 Records that must be maintained concerning the seaworthiness of a small vessel up to 24 m

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal communication skills required when monitoring the condition and seaworthiness of a small vessel up to 24 m

2 Read, interpret and apply basic instructions, stability book, vessel plans and specifications relevant to monitoring the condition and seaworthiness of a small vessel up to 24 m

3 Work safely and collaboratively with others when monitoring the condition and seaworthiness of a small vessel up to 24 m

4 Select and use equipment as per operating instructions

© Commonwealth of Australia, 2025 Skills Insight

5 Recognise faulty equipment and components and take appropriate action

6 Recognise routine problems when monitoring the condition and seaworthiness of a small vessel up to 24 m and take appropriate action

7 Adapt to changes in equipment and procedures in the workplace

8 Follow required work schedule as per company requirements

9 Follow all required OH&S procedures and precautions when monitoring the condition and seaworthiness of a small vessel up to 24 m

10 Secure a small vessel up to 24 m before it puts to sea

11 Slip a small vessel up to 24 m

12 Check and inspect the seaworthiness and watertight integrity of a small vessel up to 24 m

Evidence Guide

Evidence Guide

TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Monitor and evaluate the condition and seaworthiness of a small vessel up to 24 m under both on the water and on a slip b Identify any deterioration of the vessel's hull, structure or equipment c Take appropriate preventative and remedial action to maintain the security and watertight integrity of the vessel's hull d Initiate and coordinate maintenance, repair or replacement of faulty or damaged equipment or structure as per procedures and manufacturer's instructions

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES

	e Exercise all required safety, environmental and hazard control precautions and procedures during inspection and maintenance operations, including required precautions and procedures for entry into a confined space f Communicate effectively with others when taking action to maintain the seaworthiness of the vessel
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 carrying out routine and emergency monitoring of a small vessel's seaworthiness both on the water and during slipping of the vessel 2 identifying and evaluating problems concerning the condition of a vessel and the integrity of its hull and determining suitable courses of action 3 initiating and coordinating any required repair or maintenance activities to ensure the seaworthiness of a vessel 4 applying precautions during monitoring, repair and maintenance operations c Shows evidence of application of relevant workplace procedures, including: 1 relevant maritime regulations 2 OH&S regulations and hazard prevention policies and procedures 3 job procedures and work instructions 4 relevant manufacturer's guidelines relating to the seaworthiness the vessel 5 procedures to protect the integrity and security of the vessel's hull

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide (continued)

TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES

2	**Evidence required for demonstration of consistent performance (continued)**	d Action is taken promptly to report and/or rectify problems with the seaworthiness of a vessel and the integrity of its hull e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among crew and others
3	**Context of assessment**	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4	**Specific resources required for assessment**	Access is required to opportunities to: a participate in a range of exercises, case studies and other simulated practical and knowledge assessments that demonstrate the skills and knowledge to monitor the condition and the seaworthiness of a small vessel up to 24 m in a range of operational situations; and/or b assist in maintaining the seaworthiness of a vessel in a range of operational situations either: i using a suitable simulator over an appropriate range of simulated loading and operational situations

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide (**continued**)

TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES

	ii in appropriate practical situations on an operational commercial or training small vessel up to 24 m

Range Statement

Range Statement

TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	**SCOPE**
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with the relevant maritime regulations applicable to monitoring the condition and seaworthiness of a small vessel up to 24 m
b. Work is performed:	1 within a defined range of operations and routine procedures, with responsibility for own outputs in relation to specified quality standards and some responsibility for others
c. Work involves:	1 the conduct of routine monitoring of condition and seaworthiness of a vessel and the specification of solutions to a defined range of typical problems concerning deterioration of a vessel's hull, structure and equipment
d. Work requires:	1 some discretion and judgement in initiating action to report and rectify identified problems with the condition and seaworthiness of the vessel
2. WORKSITE ENVIRONMENT	

© Commonwealth of Australia, 2025 Skills Insight

Range Statement **TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES**	
a Vessel may include:	1 any small Australian commercial vesselup to 24 m
b Seaworthiness of a vessel must be maintained:	1 by day or night in both normal and emergency situations 2 under any possible conditions of sea, weather and loading 3 while underway 4 during berthing and unberthing operations 5 in port 6 in slip or dock 7 while anchoring or mooring

Range Statement (**continued**) **TDMMB4507A MONITOR CONDITION AND SEAWORTHINESS OF A SMALL VESSEL UP TO 24 METRES**	
VARIABLE	**SCOPE**
c Action taken to monitor the condition and seaworthiness of a small vessel up to 24 m (**within limits of responsibility**) **may include**:	1 routine inspections 2 checks prior to departure 3 checks on completion of a voyage 4 checks on completion of maintenance activities 5 checks in anticipation of a change in sea and weather conditions 6 testing of tanks to check watertight integrity 7 checks during an emergency which may have caused damage or changes to the seaworthiness of the vessel

TDMMC707C APPLY SEAMANSHIP SKILLS AND TECHNIQUES WHEN OPERATING A SMALL VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR:

This unit involves the seamanship skills, knowledge and techniques required when operating a small commercial vessel within the limits of responsibility of a coxswain, i.e. a vessel of less than 12 metres in length within inshore limits (within 15 nm).

This includes splicing ropes; using ropes and chains; maintaining ropes, wire and chain; rigging gear and loads; operating winches and windlasses; safe handling hawsers and moorings; stowing and securing anchors for sea; securing vessel for rough weather; maintaining watertight integrity; lashing and securing equipment; and towing and being towed.

This unit has been retitled but covers the same functions as previous unit*TDMMC701C Apply seamanship skills and techniques when operating a small domestic vessel*.

Application of the Unit

Application of the unit	The unit has applications in qualifications for Coxswains on commercial vessels of up to 12 metres in length operating within inshore limits, i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain). This includes but is not limited to the manoeuvring of small passenger vessels, charter vessels, tourist craft, fishing vessels, etc.

© Commonwealth of Australia, 2025
Skills Insight

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory requirements for a Coxswain. This includes applicable sections of State/Territory maritime licensing and regulatory requirements and the National Standard for Commercial Vessels (NSCV).and the USL Code.

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
.	.
1 Use and maintain ropes, wire and chains	a Knots, hitches and bends using fibre and synthetic ropes are correctly made and used in the course of deck operations on board vessel b Eye splices and short splices are made in fibre and synthetic rope in accordance with established nautical practice c Rope, wire and chains are checked and maintained in accordance with company procedures and manufacturer's instructions d Breaking strain and safe working loads of ropes are determined and applied as load limits in the course of deck

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	operations

TDMMC707C APPLY SEAMANSHIP SKILLS AND TECHNIQUES WHEN OPERATING A SMALL VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

ELEMENT	PERFORMANCE CRITERIA
1 **Use and maintain ropes**, **wire and chains** (**continued**)	e Loads are correctly handled using appropriate ropes, chains and rigging gear in accordance with regulations f Rigging gear is checked prior to use and/or going to sea and faulty gear reported and replaced or repaired g Maximum load limits are determined and applied when lifting equipment and loads using ropes, chains, wires and other rigging gear h Lines are made up in preparation for berthing of vessel i Lines are handled as required to assist in berthing and unberthing a vessel j A warping winch/drum is used to heave in surge and veer lines k Berthing lines are turned up and secured to bitts, staghorns and cleats as required l Moorings and hawsers are safely handled as per established nautical practice
2 **Operate anchor equipment**, **winches and windlasses**	a Anchors cables and deck fittings are correctly identified and selected for use when required b Anchor tasks are carried out in accordance with established nautical practice c Vessel is prepared and anchored in varying weather

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	conditions d Anchor is weighed and vessel proceed in varying weather conditions e Winches, capstans and windlasses (as appropriate) are checked and prepared for operation prior to use f Winches, capstans and windlasses (as appropriate) are safely operated to carry out deck operations in accordance with operational requirements an d manufacturer's instructions
3 Tow and be towed	a Preparations for towing are safely made in accordance with established nautical practice b Correct towing procedures and precautions are applied when towing and being towed

TDMMC707C APPLY SEAMANSHIP SKILLS AND TECHNIQUES WHEN OPERATING A SMALL VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

ELEMENT	PERFORMANCE CRITERIA
4 Secure a small vessel for sea	a Accommodation spaces and personnel facilities on board the vessel are checked for cleanliness, hygiene and tidiness and correctly secured for sea in accordance with established procedures and tourism or operational standards b Equipment and items on deck and in equipment and galley spaces are secured in accordance with regulatory requirements c Watertight integrity of vessel is checked and appropriate action is taken to prepare for prevailing and forecast weather and sea conditions
5 Apply	a Rope types and common areas of use are correctly identified

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA	
seamanship skills and techniques	b	Reef knots, bowlines, sheet bends, clove hitches, round turns and two half hitches are correctly identified, explained and demonstrated
	c	Procedures for eye splicing a fibre/synthetic rope end and joining two rope ends are demonstrated in accordance with the rope manufacturer's recommendations
	d	Common whippings are demonstrated
	e	A sea anchor is rigged to control a specified rate and direction of drift and or angle to sea and also for emergency steering and to prevent broaching

TDMMC707C APPLY SEAMANSHIP SKILLS AND TECHNIQUES WHEN OPERATING A SMALL VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant sections of applicable maritime regulations

2 Relevant OH&S legislation and policies as they relate to small vessel deck operations

3 Parts of a small vessel and the materials, fittings and equipment used in a small vessel.

4 Names of lines used from various parts of a vessel and the various ways a vessel is made fast to a wharf

5 Procedures for berthing and unberthing a small vessel

6 Types of anchors, cables and associated deck fittings in common use on small vessels and their purpose

7 Procedures involved in anchor work on a small vessel

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

8 Procedures for checking and operating winches, windlasses and capstans during vessel operations

9 Methods of making appropriate reports by visual and verbal means to others on board during vessel operations

10 Types of knots, bends and hitches in common use, their applications and limitations, and methods of tying them using synthetic and fibre rope of varying construction and size

11 Procedures for splicing synthetic and fibre rope

12 Factors involved in rope deterioration and maintenance requirements for different types of rope

13 Procedures for checking the watertight integrity of a small vessel

14 Methods of securing a vessel before it puts to sea

15 Procedures for stowing galley appliances, food utensils, containers and supplies for sea

16 Procedures for checking and securing personnel accommodation and facilities prior to putting to sea

17 Maritime communication techniques

18 Procedures for the checking and inspecting a vessel's seaworthiness

19 Basic knowledge of fishing operations (where applicable)

TDMMC707C APPLY SEAMANSHIP SKILLS AND TECHNIQUES WHEN OPERATING A SMALL VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal communication skills required when operating a small domestic vessel

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS

2 Read, interpret and apply basic instructions relevant to operations on a small domestic vessel

3 Work safely and collaboratively with others during operations on a small domestic vessel

4 Select and use ropes and equipment as per operating instructions

5 Recognise faulty or worn ropes and equipment and take appropriate action as per operating instructions

6 Recognise routine problems during operations on a small domestic vessel and take appropriate action

7 Tie knots and demonstrate rope handling skills as required in vessel operations

8 Adapt to changes in equipment and procedures in the workplace

9 Follow required work schedule as per company requirements

10 Follow all required OH&S procedures and precautions when operating a small domestic vessel

11 Secure a vessel before it puts to sea

12 Check and inspect a vessel's seaworthiness and watertight integrity

demonstrate competency in this unit		established standards of good seamanship
	b	Exercise all required safety and hazard control procedures
	c	Communicate effectively with others during deck and vessel operations
	d	Carry out fishing operations (where applicable)
2 Evidence required for demonstration of consistent performance	a	Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	b	Consistently applies underpinning seamanship knowledge and skills when:
		1 carrying out deck operations, anchor work and securing a vessel for sea
		2 towing and being towed
		3 applying safety precautions relevant to deck operations
		4 assessing watertight integrity of the vessel and the security of vessel's equipment and spaces
	c	Shows evidence of application of relevant workplace procedures, including:
		1 relevant maritime regulations
		2 OH&S regulations and hazard prevention policies and procedures
		3 job procedures and work instructions
		4 relevant manufacturer's guidelines relating to the use of ropes, wires, cables, anchors, deck equipment and machinery, including instructions on equipment capability and limitations
		5 on-board housekeeping processes
	d	Action is taken promptly to report accidents, safety incidents and operational problems

Range Statement

Range Statement

TDMMC707C APPLY SEAMANSHIP SKILLS AND TECHNIQUES WHEN OPERATING A SMALL VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with the relevant maritime and OH&S regulations
b. Work is performed:	1 within defined operational procedures, with responsibility for own outputs and limited responsibility for others in achieving the specified quality of small vessel operations
c. Work involves:	1 It involves the organisation and conduct of a range of specified deck operations for a small commercial vessel
2. WORKSITE ENVIRONMENT	
a Vessel may include:	1 small fishing and trading vessels engaged on coastal voyages
b Deck operations may be carried out:	1 by day or night in normal operational situations 2 under normal and adverse conditions of sea and weather 3 during berthing and unberthing operations 4 while berthed alongside 5 while anchoring or mooring 6 while towing and being towed

© Commonwealth of Australia, 2025
Skills Insight

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

c Deck operationson a small vessel (dependent upon limits of responsibility) may include:	1 using and maintaining ropes, wires and chains 2 splicing natural fibre and synthetic ropes 3 cleanliness, hygiene and tidiness of accommodation and facilities 4 checking the watertight integrity of the vessel 5 checking the securing deck, engineering and accommodation spaces prior to going to sea 6 assisting in anchor work

Range Statement (**continued**)

TDMMC707C APPLY SEAMANSHIP SKILLS AND TECHNIQUES WHEN OPERATING A SMALL VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

VARIABLE	SCOPE
c Deck operationson a small vessel (dependent upon limits of responsibility) may include: (**continued**)	7 working mooring lines and assisting in the mooring of the vessel 8 checking and operating winches, capstans and windlasses 9 checking and using ropes, chains and rigging gear when lifting loads, including the determination of safe working loads 10 towing arrangements 11 anchoring methods (listed separately below) 12 fishing operations 13 using sea anchors
d Anchor work	1 clearing away an anchor ready for letting go

© Commonwealth of Australia, 2025
Skills Insight

VARIABLE	SCOPE
on a small vessel (dependent upon limits of responsibility) may include:	2 letting go an anchor and laying out cable 3 weighing anchor 4 securing an anchor for sea 5 assessing when a vessel is brought up and is riding to the anchor 6 assessing when an anchor is aweigh 7 operating a winch, windlass and/or capstan as required for anchor work
e Documentation and recordsmay include:	1 relevant regulations 2 safety management system 3 vessel's operational plan 4 vessel manufacturer's instructions and recommended procedures 5 codes of practice 6 instructions of relevant maritime authorities
f Applicable legislation, regulations and codes may include:	1 relevant sections of regulations of State and Territory marine authorities and NSCV and USL Code 2 relevant Commonwealth, State and Territory OH&S legislation

TDMMC907C MANOEUVRE A DOMESTIC VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to manoeuvre a commercial vessel within limits of responsibility of a coxswain, i.e. a vessel of less than 12 metres in length within inshore limits (within 15 nm). This includes berthing, mooring and anchoring operations and manoeuvring during emergencies and exceptional circumstances.** **This unit has been retitled but covers the same functions as previous unit TDMMC901B*Manoeuvre a domestic vessel of less than 12 metres in length operating within inshore limits***

Application of the Unit

Application of the unit	The unit has applications in qualifications for Coxswains on commercial vessels of up to 12 metres in length operating within inshore limits, i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain).

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory requirements for a Coxswain. This includes applicable sections of State/Territory maritime licensing and regulatory requirements and the National Standard for Commercial Vessels (NSCV).and the USL Code.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
.	.
1 Manoeuvrethe vesselin normal conditions	a Manoeuvres are made to safely progress the operation and keep the vessel in safe water b Vessel's heading is maintained within acceptable limits as per the requirements of the manoeuvre, weather, tide, headreach and stopping distances c Alterations of heading or power are smooth and controlled d Communication is clear, concise and acknowledged according to good seamanship e Vessel propulsion units are controlled as required to progress the operation and complement steering movements f Safe operating limits of vessel propulsion and steering systems are not exceeded

TDMMC907C MANOEUVRE A DOMESTIC VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
1 Manoeuvre the vessel in normal conditions (**continued**)	g Adequate resources are organised prior to and during operations h Appropriate action is taken to minimise wash and to prevent damage to the marine environment
2 Manoeuvre the vessel during exceptional circumstances and emergencies	a Appropriate manoeuvres are safely made during the emergency or exceptional circumstance and to keep the vessel in safe water b Vessel's heading is maintained within acceptable limits with respect to the requirements of the manoeuvre, the nature of the emergency or exceptional circumstance and the existing sea, tide and weather conditions c Risks to the vessel and the safety of persons on board are assessed during manoeuvres and appropriate risk minimisation strategies developed and applied d Alterations of heading or power are appropriate to the emergency or exceptional situation e Appropriate action is taken in the event of an emergency to maintain the safety of the vessel and those on board and any other vessels and persons involved f Communication during the emergency is clear, concise and acknowledged at all times

TDMMC907C MANOEUVRE A DOMESTIC VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

1 Relevant maritime regulations

2 Manoeuvring and propulsion characteristics for vessels of less than 12 metres in length operating, including stopping distances and turning circles at various draughts, speeds and loading

3 Effects of displacement and planing hulls on manoeuvring characteristics of small power driven vessels

4 Principles of stability and trim in a small vessel and the disposition of passengers and/or cargo required to maintain stability and trim within safe limits

5 Manoeuvring problems for vessels of less than 12 metres in length and appropriate action and solutions

6 Methods for controlling vessel speed and direction

7 Effects on manoeuvres of wind, currents and bottom topography

8 Effects of vessel wash on other waterways users and the environment

9 Characteristics of entrance bars and knowledge of manoeuvres for crossing those bars

10 Principles for avoiding being caught in severe weather conditions

11 Characteristics of adverse weather and sea conditions and the related precautions and manoeuvring techniques that should be applied to maintain the control and stability of the vessel

12 Requirements of the International Regulations for Preventing Collisions at Sea and other regulations set by local authorities

13 Maritime communication techniques

14 Relevant OH&S legislation and policies

TDMMC907C MANOEUVRE A DOMESTIC VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

REQUIRED SKILLS

This describes the basic skills required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS

1 Communicate effectively with other personnel and passengers during vessel manoeuvres

2 Read and interpret vessel manufacturer's instructions on vessel operation

3 Read and interpret vessel marine regulations, rules and instructions concerning small vessel operations

4 Collect, manage and interpret information required for the safe navigation of the vessel

5 Plan the timing and sequence of vessel operations to be appropriate to the prevailing circumstances, sea and weather conditions and any navigational hazards

6 Work collaboratively with other shipboard personnel and passengers during vessel operations

7 Make appropriate estimates and calculations required during the course of vessel operations (e.g. fuel,

distance, speed, time, etc.)

8 Determine appropriate procedures to allow for interaction effects with passing vessels

9 Recognise the effects of interaction with passing vessels and various operational situations such as squat, shallow water and narrow channel on vessel's handling and determine appropriate manoeuvring action required

10 Operate the vessel in accordance with manufacturer's instructions

11 Turn the vessel in various operational situations

12 Manoeuvre the vessel with minimal wash

Evidence Guide

Evidence Guide

TDMMC907C MANOEUVRE A DOMESTIC VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

© Commonwealth of Australia, 2025 Skills Insight

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Manoeuvre a vessel of less than 12 metres in length within inshore limits: 1 in normal and emergency situations and adverse weather conditions 2 during berthing and unberthing operations 3 while anchoring or mooring 4 when beaching and refloating a vessel 5 while crossing coastal bars b Exercise all required safety and hazard control procedures when manoeuvring a vessel of less than 12 metres in length within inshore limits c Identify manoeuvring problems and take appropriate action d Communicate effectively with others during manoeuvring operations
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 completing defined manoeuvring operations 2 identifying and evaluating manoeuvring problems and determining appropriate courses of action 3 applying safety precautions relevant to manoeuvring operations 4 assessing operational capability of vessel and propulsion plant and equipment c Shows evidence of application of relevant workplace procedures, including:

© Commonwealth of Australia, 2025 Skills Insight

	1 relevant maritime regulations 2 OH&S regulations and hazard prevention policies and procedures 3 job procedures and work instructions 4 manufacturer's guidelines relating to the use of propulsion and other on-board equipment, including information on capability and limitations
	d Action is taken promptly to report accidents and navigational incidents

Evidence Guide (**continued**)

TDMMC907C MANOEUVRE A DOMESTIC VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

2 Evidence required for demonstration of consistent performance (**continued**)	e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among crew and others
3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel

© Commonwealth of Australia, 2025 Skills Insight

4Specific resources required for assessment	Access is required to opportunities to: a manoeuvre a working or training vessel of less than 12 metres in length in an appropriate range of normal and real or simulated emergency inshore situations, including normal and adverse weather conditions; and/or b operate a suitably realistic small vessel simulator over an appropriate range of simulated manoeuvring situations and weather conditions

Range Statement

Range Statement

TDMMC907C MANOEUVRE A DOMESTIC VESSEL WITHIN THE LIMITS OF RESPONSIBILITY OF A COXSWAIN

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with the relevant sections of the NSCV/USL Code dealing with vessels of less than 12 metres
b. Work is performed:	1 to defined procedures/methods either individually or in a team environment
c. Work involves:	1 the use of some discretion and judgement in the application of fundamental nautical principles and known manoeuvring techniques across a variety of operational contexts for vessels of less than 12 metres operating within inshore limits
2. WORKSITE ENVIRONMENT	
a Vessel may include:	1 any commercial vessel of less than 12 metres in length operating up to or within sheltered waters or inshore limits

© Commonwealth of Australia, 2025 Skills Insight

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

b	**Propulsion units may be**:	1 inboard or outboard and may include single or twin propeller systems
c	**Manoeuvres may be carried out**:	1 by day or night in both normal and emergency situations 2 under normal and adverse conditions of weather and tide 3 during berthing and unberthing operations 4 while anchoring or mooring 5 when beaching and refloating a vessel 6 while crossing coastal bars
d	**Manoeuvres may include**:	1 berthing and unberthing 2 berthing in a pen 3 mooring or anchoring

Range Statement (**continued**)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
.	.
1 Communicate with others in course of work	a Instructions are attended to, interpreted and implemented b Effective reading and listening skills are demonstrated c Questions are used to gain additional information d Verbal and written communication with others in the performance of duties is clear and precise and follows established communications practice e Misunderstandings in communications are avoided using appropriate confirmation techniques f Various forms of non-verbal communication are appropriately used when working and communicating with others in the course of duties

TDMME1107A CONTRIBUTE TO EFFECTIVE COMMUNICATIONS AND TEAMWORK ON BOARD A COASTAL VESSEL

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Contribute to teamwork and work standards on board avessel	a Work is carried out individually and in association with others in accordance with established performance standards b Assistance and encouragement are provided to others in workplace activities c Feedback on assessed work performance is acknowledged, discussed and acted upon d Personal skills and knowledge are developed through on-board training and other means to ensure an effective contribution to work activities e Employment conditions are known, understood and followed f Individual rights and responsibilities on board a vessel are known, understood and fulfilled, including allowance for any cross cultural differences and differences in personal interests, beliefs and lifestyles g Appropriate action is taken to avoid and prevent harassment of others h Drug and alcohol abuse are avoided as required by company and vessel's policy and procedures and regulatory requirements
3 Resolveconflicts	a Conflict situations are recognised and appropriate assistance is sought to resolve the conflict with the personnel involved in accordance with vessel's procedures b An appropriate contribution is made to action to solve conflicts by actively participating in conflict resolution procedures

TDMME1107A CONTRIBUTE TO EFFECTIVE COMMUNICATIONS AND TEAMWORK ON BOARD A COASTAL VESSEL

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant codes of practice, policies and procedures related to communications and teamwork on a coastal vessel

2 Basic communication techniques, including barriers to effective communication and how to overcome them

3 Standard terms used when communicating with others on a coastal vessel

4 Anti-discrimination and harassment policies and regulations

5 Industrial award requirements related to personnel responsibilities, obligations and entitlements

6 Instructions and procedures for social behaviour, shipboard work and emergency situations

7 Principles of effective interaction with crew and passengers on board a vessel, including recognising differences, active promotion of anti-discrimination and avoidance of harassment.

8 Conflict resolution and mediation strategies and techniques used on board vessels

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Listen to and interpret verbal instructions, and information concerning work activities

2 Read and interpret written instructions and procedures relevant to work activities on board a coastal vessel

3 Collaborate with other crew members in the course of work activities

4 Interpret and apply established communication practices, including standard marine terms and phrases

5 Identify interpersonal problems that may arise during operations on a vessel and take appropriate action to resolve problems identified

6 Take action to avoid discrimination and harassment and report any identified incidents in accordance with policies and regulations

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

Evidence Guide

TDMME1107A CONTRIBUTE TO EFFECTIVE COMMUNICATIONS AND TEAMWORK ON BOARD A COASTAL VESSEL

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Communicate effectively with others as part of work activities b Read and interpret signs and instructions relevant to duties and responsibilities c Carry out assigned duties to established standards d Maintain required standards of behaviour on a vessel e Contribute to the resolution of shipboard conflicts f Identify typical communication and teamwork problems and take appropriate action
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 communicating on board a vessel 2 carrying out assigned duties to established standards 3 maintaining required standards of behaviour on a vessel 4 contributing to the resolution of shipboard conflicts 5 identifying typical communication and teamwork problems and taking appropriate action

© Commonwealth of Australia, 2025 Skills Insight

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

c Shows evidence of application of relevant workplace procedures, including:

1 job procedures and work instructions

2 relevant regulations policies and procedures

3 safety management system and procedures (where applicable)

d Action is taken promptly to report and/or rectify communication and interpersonal problems in accordance with established procedures

e Work is completed systematically with required attention to detail

f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others

Evidence Guide (**continued**)

TDMME1107A CONTRIBUTE TO EFFECTIVE COMMUNICATIONS AND TEAMWORK ON BOARD A COASTAL VESSEL

3 Context of assessment

a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations

b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation:

1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and

2 Appropriate practical assessment must occur:

i at the registered training organisation; and/or

ii on an appropriate working or training vessel

© Commonwealth of Australia, 2025 Skills Insight

4 Specific resources required for assessment	Access is required to opportunities to: a participate in a range of role plays, case studies and/or other simulated practical and knowledge assessments that demonstrate the skills and knowledge to contribute to effective communications and teamwork on board a vessel; and/or b contribute to an effective communications and teamwork on board an operational commercial vessel

TDMME507B TRANSMIT AND RECEIVE INFORMATION BY MARINE RADIO OR TELEPHONE

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to transmit and receive information by marine radio or telephone on board a commercial vessel, including using marine VHF and HF radiotelephone in accordance with regulations, carrying out user maintenance and fault finding procedures on radio equipment and power supplies, and operating an emergency position indicating radio beacon (EPIRB) and a search and rescue transponder (SART).**

Application of the Unit

Application of the unit	The unit has applications in qualifications for Coxswains and Masters of commercial vessels requiring proficiency in the use of marine radio and telephone equipment to transmit and receive information to and from shore and vessel-based operators.

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations and certification requirements as specified in *Marine Orders, Part 6, Marine Radio Qualifications, Issue 5*

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate VHF and HF Radio equipment to transmit and receive messages	a Types of radiotelephony equipment are selected and operated within limits of specifications b Radio equipment is operated to transmit and receive various types of signal as per manufacturer's instructions, established radio operation procedures and regulatory requirements c Regulations and procedures applicable to vessel stations equipped with radiotelephony and digital selective calling (DSC) facilities are applied during radio communication d OH&S procedures and hazard control strategies are applied when operating radio equipment in accordance with vessel's ISM Code safety management system
2 Maintain and fault-find radio equipment	a Routine maintenance checks are carried out on radiotelephony equipment in accordance with manufacturer's instructions and specifications and company procedures

ELEMENT	PERFORMANCE CRITERIA
2 Maintain and fault-find	b Out-of-specification performance and faults in radio equipment are correctly identified and investigated using

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
radio equipment (**continued**)	prescribed fault finding techniques as per established user maintenance procedures and manufacturer's instructions c Identified faults and defective radio equipment and component parts are rectified or replaced as per manufacturer's instructions and established maintenance procedures
3 Access search and rescue radio facilities	a Application is made to the appropriate organisation for the provision of the required search and rescue services b Information required by AUSREP (Australian ship reporting) system is supplied in the required format
4 Deploy and operate an EPIRB and a SART	a Routine checks are carried out on emergency position indicating radio beacons (EPIRBs) and search and rescue transmitters (SARTs) to confirm their operational capability in accordance with manufacturer's instructions and specifications b Appropriate action is taken to rectify or replace EPIRBs or SARTs that are found to be malfunctioning or are inoperable in accordance with manufacturer's instructions and company procedures c Emergency position indicating radio beacons (EPIRBs) and search and rescue transmitters (SARTs) are deployed as required in accordance with manufacturer's instructions and established search and rescue procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Sections of relevant regulations related to marine radio communication

2 Different types of marine radio equipment, their features, applications, operating characteristics and operating procedures

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

3 Basic principles and procedures for marine radio communication

4 Purpose for and procedures for the monitoring of calling and working frequencies

5 Radio calling, replying and relaying procedures

6 Purpose of silence periods when operating radio equipment

7 Limitations on the performance of different types of marine radio equipment

8 Methods of communicating vessel position

9 Hazards associated with radio transmission and the repair and maintenance of radio equipment and related hazard control measures and OH&S regulations.

10 A basic understanding of the Australian marine search and rescue system

11 Procedures for the transmitting and decoding of the phonetic alphabet excluding the figure code

12 Operational checks, including:

- a checking of radio performance
- b testing fuses
- c measuring capacity of batteries and the specific gravity of the electrolyte
- d measuring on and off load voltage.

13 Typical radio equipment faults and defects and related fault finding techniques and remedial procedures

14 Procedures for deploying and operating EPIRBs and SARTs

15 Typical radio communication problems and appropriate action and solutions

16 Procedures for keeping records of radio communication

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with others during radio communication

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS

2 Read and interpret radio equipment instructions

3 Read and interpret marine radio regulations, rules and instructions

4 Use the phonetic alphabet

5 Keep records of radio communication

6 Work collaboratively with other shipboard personnel and passengers

7 Recognise typical faults and problems with radio equipment and take appropriate action

8 Adapt to changes in radio equipment and related procedures

9 Operate radio equipment in accordance with manufacturer's instructions

10 Conduct operational checks on radio equipment

11 Apply OH&S procedures and precautions when using and checking radio equipment

Evidence Guide

Evidence Guide

TDMME507B TRANSMIT AND RECEIVE INFORMATION BY MARINE RADIO OR TELEPHONE

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Operate VHF and HF radio equipment to transmit and receive messages b Maintain and fault-find radio equipment c Access search and rescue radio facilities

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

TDMME507B TRANSMIT AND RECEIVE INFORMATION BY MARINE RADIO OR TELEPHONE

	d Deploy and operate an EPIRB and a SART e Maintain records of radio communication
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 operating VHF and HF radio equipment to transmit and receive messages 2 maintaining and fault finding radio equipment 3 accessing search and rescue radio facilities 4 deploying and operating an EPIRB and a SART 5 identifying and evaluating radio communication problems and determining appropriate courses of action 6 maintaining records of radio communication c Shows evidence of application of relevant workplace procedures, including: 1 relevant sections of maritime regulations pertaining to radio operation 2 OH&S procedures and legislation 3 job procedures and work instructions 4 guidelines relating to the use of radio communication equipment d Action is taken promptly to report radio communication problems in accordance with established procedures e Work is completed systematically with required attention to detail

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide TDMME507B TRANSMIT AND RECEIVE INFORMATION BY MARINE RADIO OR TELEPHONE	
	f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others

Evidence Guide (continued) TDMME507B TRANSMIT AND RECEIVE INFORMATION BY MARINE RADIO OR TELEPHONE	
3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a demonstrate performance in suitably simulated radio communication activities and exercises covering a range of normal and emergency radio communication situations that are typically experienced on a vessel; and/or b use radio communication in an appropriate range of operational situations on board an operational commercial or training vessel

Range Statement

Range Statement

TDMME507B TRANSMIT AND RECEIVE INFORMATION BY MARINE RADIO OR TELEPHONE

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with the relevant sections of the Radio Regulations adopted by the World Administrative Radio Conference for the Mobile Service (1987), and maritime regulations
b. Work is performed:	1 relatively independently under broad operational requirements, with limited accountability and responsibility for self and others in achieving the prescribed outcomes
c. Work involves:	1 the application of principles of marine radiotelephony to accurately transmit and receive messages. Use of correct procedures for transmitting and receiving of signals using HF and VHF equipment, as well as deployment and operation of satellite EPIRBs and SARTs is required. Limited accountability and responsibility for self and others in achieving the outcomes is involved
d. Work requires:	1 the accurate and consistent use and user maintenance of radio equipment to send and receive messages and signals under normal and emergency situations in accordance with international and national radio regulations
2. WORKSITE ENVIRONMENT	
a Radio and radiotelephony communication may be carried	1 in both normal and emergency situations using shipboard HF and VHF radio equipment, Emergency Position Indicating Radio Beacons (EPIRBs) and SARTs

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

TDMME507B TRANSMIT AND RECEIVE INFORMATION BY MARINE RADIO OR TELEPHONE

out:	
b Radio and radiotelephony communication may be carried out:	1 by day or night in both normal and emergency situations 2 under any possible conditions of weather 3 while underway 4 while anchored or moored

Unit Descriptor

UNIT DESCRIPTOR:

This unit involves the skills and knowledge required to provide elementary first aid on board a vessel or at another maritime workplace, including the performance of immediate lifesaving first aid until qualified medical assistance is available; the recognition of the symptoms and signs of acute illness and/or injury and the taking of appropriate action; the correct management of wounds and bleeding, burns, and bone and muscle injuries; and the adaptation of first aid procedures for remote situations.

The unit is consistent with competency requirements set for the St John Ambulance National Senior Level First Aid Certificate or Level 2 First Aid Certificate

Application of the Unit

Application of the unit	The unit has applications in qualifications for all maritime deck and engineering occupations and covers mandatory requirements for elementary first aid for a range of maritime workers, including from deckhands and integrated ratings to marine engine drivers, masters, engineers. It also has application in qualifications for shoreside linespersons.

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for elementary first aid required for all seafarers and also shoreside linespersons. This includes applicable sections of international, Commonwealth,

© Commonwealth of Australia, 2025 Skills Insight

	State and Territory Maritime licensing and regulatory requirements.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Perform immediate lifesaving first aid pending the arrival of medical assistance	a The priorities of first aid care are correctly applied in a real or simulated first aid situation b The DRABC action plan is correctly used to identify and control danger, loss of consciousness, loss of airway, breathing and circulation c An unconscious casualty is correctly placed in stable side position and the steps in clearing the airways to promote breathing in accordance with established first aid procedures d The correct method of expired air resuscitation (EAR), external cardiac compression (ECC) and cardio pulmonary resuscitation (CPR) is applied in a real life resuscitation situation, or in a simulated exercise using a mannequin

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Recognise the symptoms and signs of acute illness and/or injury and take appropriate action	a The symptoms and signs of the most common causes of unconsciousness are correctly identified b A real or simulated unconscious casualty is cared for in accordance with established first aid procedures c Causes of respiratory failure and breathing difficulty are correctly identified and appropriate care is provided for a real or simulated casualty with obstructed breathing d The symptoms and signs of a casualty with angina pain, heart attack and heart failure are correctly identified e Symptoms and signs of acute abdominal and pelvic injury are correctly identified and appropriate immediate first aid treatment of these conditions is provided in a real or simulated situation f Facial, ear and eye injuries in a real or simulated first aid situation are correctly managed in accordance with established first aid procedures g The symptoms and signs of poisoning, bites and stings are correctly identified and appropriate immediate management of these conditions is provided in a real or simulated situation h A real or simulated conscious casualty with an acute illness and/or injury is cared for in accordance with established first aid procedures
3 Manage wounds and bleeding	a Severe external bleeding is correctly controlled in a real or simulated situation b The symptoms and signs of severe internal bleeding are correctly identified and appropriate immediate management of these conditions is provided in a real or simulated situation c The symptoms and signs of shock as a result of severe injury are correctly identified and appropriate immediate management of shock is provided in a real or simulated

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	situation d A real or simulated laceration, abrasion and a deep puncture wound are correctly managed in accordance with established procedures e The signs of wound infection are correctly identified and a real or simulated wound infection is correctly managed in accordance with established procedures
4 Manage burns	a Immediate rescue procedures are correctly used in real or simulated first aid situations involving a burned casualty b The severity of a burn is correctly assessed in terms of depth, position and size in accordance with established first aid procedures c The correct method of treatment for burns and associated shock is correctly applied in real or simulated first aid situations involving a burned casualty

ELEMENT	PERFORMANCE CRITERIA
5 Manage bone, joint and muscle injuries	a Symptoms and signs of fractures (simple and complicated), are correctly recognised in accordance with established first aid procedures b Problems and treatment associated with dislocated joints are correctly managed in accordance with established first aid procedures c First aid treatment of pelvic and chest injuries and fractures of limbs, including immobilisation techniques is correctly performed as per established procedures d A real or simulated casualty with suspected head, neck or back injuries is correctly cared for in accordance with established first aid procedures

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	e The symptoms and signs of sprains and strains are correctly identified in accordance with established first aid procedures f The RICE method of treatment of sprains and strains is correctly used in real or simulated first aid situations involving sprains and strains
6 Adapt first aid procedures for remote situations	a Safety precautions needed to prevent accidents, illness and injuries and infection in remote area situations are correctly applied in real or simulated situations b Factors involved in the prevention of heat and cold exposure are identified. c The symptoms and signs of a real or simulated casualty exposed to heat or cold are correctly identified, including hyperthermia and hypothermia and appropriate management of the casualty carried out in accordance with established first aid procedures d A real or simulated ill or injured person in remote conditions is correctly cared for until help arrives, including the monitoring of airway, breathing and heart beat, the control of pain, hydration and the maintenance of body temperature. e A real or simulated casualty with 'severe injuries' in a remote situation is correctly cared for, including preparation for transport f First aid and emergency equipment required for remote area situations is correctly identified and used in real or simulated situations in accordance with established first aid procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Sections of relevant maritime regulations dealing with first aid at sea

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

2 ISM safety management system procedures (where applicable) dealing with first aid

3 First aid situations that may occur on board a vessel or at another maritime workplace and appropriate first aid action, treatments and solutions

4 Relevant OH&S and health legislation and procedures

5 The priorities of first aid care

6 First aid duties and responsibilities of personnel on board a vessel or at another maritime workplace

7 Established first aid procedures consistent with 'St John Ambulance National Senior Level First Aid Certificate' or 'Level 2 First Aid Certificate'

8 First aid procedures for:

- a conducting an initial patient first aid assessment
- b managing injuries
- c carrying out resuscitation techniques
- d reporting on first aid situations and action taken

9 Techniques for management and care of casualties in various first aid situations, including:

- a acute illness and/or injury
- b wounds and bleeding
- c burns
- d bone, joint and muscle injuries

10 Causes of respiratory failure and breathing difficulty

11 The DRABC action plan for the identification and control of danger, loss of consciousness, loss of airway, breathing and circulation

12 Correct methods of expired air resuscitation (EAR), external cardiac compression (ECC) and cardio pulmonary resuscitation (CPR)

13 The symptoms and signs of:

- a the most common causes of unconsciousness

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

b poisoning, bites and stings

c sprains and strains

d fractures (simple, compound and complicated)

e dislocated joints

f head, neck and back injuries

g severe internal bleeding

h abdominal, pelvic and chest injuries

i shock as a result of severe injury

j angina pain, heart attack and heart failure

k burns and associated shock

14 The safety precautions needed to prevent accidents, illness and injuries and infection in remote area situations

15 Knowledge of body structures and functions relevant to possible injury and illnesses that may be encountered on board a vessel or at another maritime workplace

16 Communication techniques related to the provision of first aid

17 Marine publications containing information on first aid treatment on board a vessel or at another maritime workplace

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with an injured or ill person when administering elementary first aid

2 Communicate effectively with medical staff and others in the event of an emergency requiring first aid

3 Work with others when administering elementary first aid

4 Recognise and interpret first aid problems and symptoms and taking appropriate

e dislocated joints

action to report and/or address the problems or symptoms

5 Recognise and correctly use first aid equipment and materials contained in a typical first aid box

6 Apply resuscitation techniques

7 Develop an appropriate plan of action when administering first aid as part of a medical emergency

8 Interpret and apply appropriate procedures for various identified symptoms

9 Adapt first aid procedures to the context of a specific medical emergency, including first aid in a remote location

Evidence Guide

Evidence Guide

TDMMF1007B PROVIDE ELEMENTARY FIRST AID

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Perform immediate lifesaving first aid b Recognise the symptoms and signs of acute illness and/or injury and take appropriate action c Manage wounds and bleeding d Manage burns and bone, joint and muscle injuries e Adapt first aid procedures for remote situations f Communicate effectively with others during provision of first aid g Report on first aid situations and activities in accordance with company and regulatory requirements

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

TDMMF1007B PROVIDE ELEMENTARY FIRST AID

2 Evidence required for demonstration of consistent performance

a Performance is demonstrated consistently over a period of time and in a suitable range of contexts

b Consistently applies underpinning knowledge and skills when:

1 performing immediate lifesaving first aid

2 recognising the symptoms and signs of acute illness and/or injury and taking appropriate action

3 managing wounds and bleeding

4 managing burns and bone, joint and muscle injuries

5 adapting first aid procedures for remote situations

c Shows evidence of application of relevant workplace procedures, including:

1 relevant sections of maritime regulations dealing with first aid

2 OH&S regulations and first aid instructions and procedures

3 safety procedures for a vessel or at another maritime workplace

d Action is taken promptly to report and/or manage injuries and first aid in accordance with statutory requirements and company procedures

e Work is completed systematically with required attention to detail

f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to survive at sea in the event of vessel abandonment**. **It includes practising survival techniques**, **operating lifesaving and survival equipment**, **and participating in abandon vessel drills**. **Note**: **Training and assessment may be customised to suit the applicable types and size of vessels and the various survival craft and equipment carried by the vessels to meet regulatory requirements**.

Application of the Unit

Application of the unit	The unit has applications in qualifications for all maritime deck and engineering occupations and covers mandatory requirements in survival skills for all seafarers.

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory requirements for familiarisation and basic safety competency required for all seafarers. This includes applicable sections of international, Commonwealth, State and Territory Maritime licensing and regulatory requirements.

© Commonwealth of Australia, 2025 Skills Insight

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Practise survival techniques	a The timing and sequence of individual survival actions are appropriate to the prevailing circumstances and conditions of the emergency and minimise potential dangers and threats to other survivors b Initial actions when boarding survival craft enhance chance of survival c Jumps safely from a height into the water in accordance with established survival practice d Swims while wearing a life-jacket and floats without a life-jacket in accordance with established survival practice e Inverted liferaft is righted while wearing a life-jacket in accordance with established survival practice f Appropriate handling strategies are applied to manoeuvre survival craft in rough weather and sea conditions g Sea anchors and drogues are deployed in accordance with accepted nautical practice

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
1 Practise survival techniques (**continued**)	h Signs of hypothermia are identified and treated in accordance with accepted survival medical practice i (Where applicable) exposure cover is deployed on survival craft in accordance with accepted survival practice and manufacturer's instructions j Relevant first aid is administered in survival craft k Rationing of food is in accordance with accepted survival practice
2 Operate lifesaving and survival equipment	a Location and accessibility of lifesaving and survival equipment is established Survival craft are launched in a timely and effective manner b Method of boarding survival craft is appropriate and avoids dangers to other survivors c Survival equipment is operated in accordance with instructions and accepted survival practice d Survival radio equipment is operated in accordance with manufacturer's instructions and regulatory protocols e Life-jacket and other lifesaving clothing are correctly used in accordance with instructions
3 Participate in abandon vessel drills	a Abandon vessel musters and drills are attended in accordance with regulatory requirements and company procedures b Action taken on identifying muster signals is appropriate to the indicated emergency and complies with established procedures c Information on the use of lifesaving equipment and procedures to be followed in the event of the order to abandon vessel is obtained and correctly interpreted

© Commonwealth of Australia, 2025 Skills Insight

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant maritime regulations dealing with survival at sea following abandonment of vessel

2 Relevant OH&S legislation and policies

3 SOLAS regulations

4 Emergency muster and abandon vessel signals

5 Importance of being ready for any shipboard emergency

6 Procedures for emergency response on board vessels, including abandoning vessel

7 Initial actions for survival on abandonment of vessel as summarised in maritime survival publications such as the AMSA publication 'Survival at Sea - a Training and Instruction Manual'

8 Value of training and emergency drills for enhancing chances of survival at sea

9 Location of lifesaving appliances on a vessel

10 Construction, outfit and particular characteristics of various types of applicable survival craft

11 Equipment found in survival craft, its function and the procedures for its use

12 Procedures for correctly operating and using lifesaving appliances and personal safety equipment on board vessels and survival craft, and specifically:

   a donning a life-jacket and using a life-jacket light and whistle

   b donning an immersion suit (where applicable)

   c deployment of a mob combination light and smoke float

   d use of hand-held pyrotechnics

   e use of hydrostatic releases

   f launching survival craft

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

14 Threats to survival on abandonment of a vessel and appropriate strategies for countering these threats

15 Ways of maximising detectability and location of survival craft using pyrotechnic distress signals, portable VHF radios, satellite EPIRBs and SARTs

16 IMO safety symbols

17 Procedures for the rationing of food and water in survival craft

18 Personal protective clothing and equipment - its purpose and use

19 Symptoms of hypothermia, its prevention and treatment and the related use of protective covers and garments such as immersion suits and thermal protective aids

20 Maritime communication techniques

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with other personnel and passengers during simulated and real abandon vessel musters and emergencies

2 Read and interpret instructions on emergency procedures and on the use of lifesaving and survival equipment

3 Collect, manage and interpret information on the use of lifesaving equipment and procedures to be followed in the event of the order to abandon vessel

4 Recognise and interpret muster signals appropriately for the indicated emergency

5 Plan the timing and sequence of individual survival actions to be appropriate to the prevailing circumstances and conditions of the emergency and minimise potential dangers and threats to other survivors

6 Work collaboratively with other shipboard personnel and passengers during an emergency

7 Carry out calculations involved in rationing food and water

8 Make appropriate estimates and calculations involved when in charge of

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS

survival craft

9 Determine the type and extent of an emergency and determine the appropriate survival action to be taken

10 Right an inverted liferaft

11 Ration food and water

12 Identify hypothermia and provide appropriate treatment

13 Deploy and use survival craft during a simulated emergency.

14 Operate survival radio equipment

15 Don various thermal protective aids, life-jacket and other lifesaving clothing

Evidence Guide

Evidence Guide

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Practise survival techniques in suitably simulated situations b Operate and use the various types of survival equipment typically found on applicable vessels in suitably simulated situations c Participate in abandon vessel musters and drills d Communicate effectively with others as required when operating survival craft and ancillary survival equipment

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 participating in simulated emergency response musters and drills 2 operating survival equipment 3 applying safety precautions relevant to survival operations 4 assessing operational capability of survival craft and equipment c Shows evidence of application of relevant workplace procedures, including: 1 relevant maritime regulations 2 OH&S regulations and hazard prevention policies and procedures 3 accepted survival procedures and maritime survival practice 4 relevant manufacturer's guidelines relating to the operation and use of survival equipment, including instructions on equipment capability and limitations d Action is taken promptly to address any problems that may arise when following vessel abandonment procedures e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide (continued)

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii in a suitable training pool iii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a carry out a range of suitably simulated practical and knowledge assessments that demonstrate the skills and knowledge to abandon vessel and survive at sea; and/or b participate in vessel musters and drills in appropriately simulations of maritime conditions; and/or c participate in abandon vessel simulations and drills on board an operational commercial or training vessel Note: Simulated abandon vessel and survival situations and assessments may require access to survival equipment typically found on the coastal or ocean-going vessels concerned, a training pool with jumping platform or equivalent and immersion suits (where applicable). Assessments must be conducted in accordance with relevant OH&S requirements. Protective clothing must be worn in accordance with current maritime practices and Australian standards. At least one assessor must hold a current lifesaving qualification appropriate for in-water training and assessment exercises

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

Range Statement

TDMMF1107B SURVIVE AT SEA IN THE EVENT OF VESSEL ABANDONMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with the relevant maritime regulations.
b. Work is performed:	1 in response to abandon vessel alarms and follow a prescribed range of survival procedures either individually or in a team environment with some accountability for the safety of self and others. This includes response to abandon vessel musters in both simulated and real emergency circumstances.
c. Work involves:	1 the use of known and defined survival procedures and techniques across a variety of maritime survival contexts.
2. WORKSITE ENVIRONMENT	
a Vessel may include:	1 any Australian or international commercial vessel
b Emergencies that may lead to abandonment of vessel include:	1 collision resulting in damage to the integrity of the vessel's hull 2 fire 3 foundering 4 flooding of vessel's compartments

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to monitor and control compliance with National Standard for Commercial Vessels (NSCV) and other legislative requirements applying to small commercial vessels operating on coastal voyages, including accessing and interpreting current information on the relevant Commonwealth and State and Territory Acts, legislation, codes and other publications applying to a vessel's operations and security. It also includes the identification, interpretation and application of information on the roles and responsibilities of a vessel's coxswains, skippers, masters, marine engine drivers and crew under relevant coastal maritime law and the monitoring of compliance of vessel's operations and maintenance with both relevant domestic maritime regulations and applicable safety management systems (SMSs).**

Application of the Unit

Application of the unit	The unit applies to qualifications for a Coxswain, Master 5, Skipper 3, Master 4, Skipper 2 on coastal vessels falling under the jurisdiction of State/Territory Marine Authorities and the National Standard for Commercial Vessels (NSCV), including: Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain), Certificate III in Transport&Distribution (Coastal Maritime Operations - Master Class 5), Certificate IV in Transport&Distribution (Coastal Maritime Operations - Master Class 4).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide*.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
.	.
1 Access and interpret information on relevant Australian legislation and codes, including the NSCV/USL Code	a Current documentation on applicable maritime regulations is stored and filed in an accessible location on the vessel in accordance with regulations b Documentation on applicable maritime regulations is updated with relevant publications c Relevant maritime regulations are accessed and interpreted to confirm the requirements for vessel's operations and maintenance and personal responsibilities

© Commonwealth of Australia, 2025
Skills Insight

TDMMF3207C APPLY DOMESTIC REGULATIONS AND INDUSTRY PRACTICESWHEN OPERATING A SMALL COASTALVESSEL

ELEMENT	PERFORMANCE CRITERIA
1 Access and interpret information on relevant Australian legislation and codes, including the NSCV/USL Code (**continued**)	d Certification extensions for the vessel and requirements for renewals are timely and ensure continuous validity e Survey items and equipment reflect effective programs of tests, checks and maintenance in accordance with certificate conditions f Arrangements for renewals and surveys are timely and comply with enterprise and issuing authority requirements g Vessel's documents indicate any effects of damage, alterations or additions to the vessel or operations in accordance with certification requirements and the procedures of the relevant maritime authority h Procedures are developed to ensure that only authorised personnel access documents i Certificates and documentation are stored in a manner which enables their use for the prosecution of vessel's business.
2 Ensure operations and maintenance comply with legal requirements	a Interpretations of relevant sections of applicable maritime regulations are applied to day-to-day operations, security and maintenance of the vessel b Procedures are followed for monitoring operations and maintenance according to applicable maritime regulations and safety management system c Areas and plant and equipment are checked and inspected in accordance with planned procedures d Problems that may lead to potential non-compliance with safety, security and other relevant regulations and instructions are promptly and fully identified e Reporting of problems and any related remedial action is timely and ensures compliance with applicable maritime

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Applicable State and Territory maritime regulations

2 Specific regulations applicable to the operation of small vessels in relation to:

- a safety management systems
- b seaworthiness and unsafe vessels
- c OH&S
- d security on coastal vessels and Australian port facilities
- e operational documentation
- f safety of navigation
- g safety crewing
- h search and rescue operations
- i fishing regulations
- j pollution of the marine environment
- k penalties for breaches of legislative requirements

3 Legal certification requirements for a small vessel engaged on coastal voyages

4 Procedures for conducting a survey of a vessel in accordance with the requirements of the relevant maritime authority

5 Procedures for monitoring compliance with relevant maritime regulations

6 Action that must be taken if non-compliance with applicable maritime regulations is identified

7 Statutory, company and vessel requirements for the carriage of documentation

REQUIRED KNOWLEDGE

8 Requirements for records that must be maintained and reports that must be made under applicable maritime regulations

9 Collision regulations relevant to a domestic Australian vessel

TDMMF3207C APPLY DOMESTIC REGULATIONS AND INDUSTRY PRACTICESWHEN OPERATING A SMALL COASTALVESSEL

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Read and interpret instructions, procedures and information relevant to legislative requirements and measures to ensure the security and safety of the life of crew, passengers and others on coastal vessels

2 Work as a team with others on matters relevant to the security and safety of crew, passengers and others

3 Select and use appropriate communications equipment

4 Take appropriate initiatives related to the security and safety of the life of crew, passengers and others on coastal vessels

5 Interpret and apply security and safety practices and regulations

6 Communicate effectively with others on matters related to the security and safety of the life of crew, passengers and others on coastal vessels

7 Modify activities dependent on differing workplace contingencies, risk situations and environments

8 Identify and solve problems associated with the security and safety of the life of crew, passengers and others on coastal vessels and report security issues and take appropriate action based on available information

9 Monitor and anticipate problems and risks related to the security and safety of the life of crew, passengers and others on coastal vessels, and take appropriate action

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for basic pre-sea safety and emergency procedures on coastal vessels. This includes applicable sections of the National Standard for Commercial Vessels and State/Territory Maritime licensing and regulatory requirements.

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify and follow workplace procedures for hazard identification and risk control	a Safety regulations and vessel's safety and hazard control practices and procedures are obtained, interpreted and applied to day-to-day work activities b Workplace procedures for OH&S and related work instructions for controlling risks on board a vessel are accurately followed c Workplace procedures for dealing with shipboard accidents, fire and emergencies are known and followed d Hazards in the workplace are identified and appropriate action is taken to report them and to minimise or eliminate risk to personnel, vessel and the environment

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
1 Identify and follow workplace procedures for hazard identification and risk control (**continued**)	e Where relevant, procedures and precautions necessary for entry into a pump room, fuel tanks or other confined spaces on a vessel are correctly followed f Personal protection clothing and equipment is correctly used in accordance with established shipboard safety practices and procedures g Appropriate assistance is provided in the event of a shipboard emergency to secure the vessel and its machinery and equipment and to maintain the safety of the vessel and persons involved
2 Contribute to arrangements for the management of OH&S	a OH&S issues and identified safety hazards are raised with designated personnel in accordance with workplace procedures and relevant OH&S legislation b Contributions to OH&S management in the workplace are made within workplace procedures and provisions of relevant legislation c OH&S issues are raised with designated personnel in accordance with workplace procedures and relevant OH&S legislation. d Contributions to participative arrangements for OH&S management in the workplace are made within vessel's procedures and scope of responsibilities and competencies
3 Complete OH&S records	a OH&S records are completed in accordance with workplace requirements b Records of occupational injury and diseases are completed as per legal requirements
4 Take action on becoming aware of an	a Emergency situations are correctly recognised and identified b Response to an emergency situation follows vessel's established emergency response procedures

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
emergency	c Correct action is taken on discovery of an actual or potential emergency in accordance with established vessel procedures d Information given on raising alarm is prompt, accurate, complete and clear
5 Follow established emergency procedures	a Vessel's contingency plans for emergency response are known and are implemented in real and simulated emergency situations

ELEMENT	PERFORMANCE CRITERIA
5 Follow established emergency procedures (**continued**)	b Escape routes and internal and external communications and alarm systems are correctly used in real and simulated emergency situations as per regulatory requirements and established procedures c Emergency communications and alarm signals and systems are correctly interpreted and required action is implemented as per emergency procedures and regulatory requirements d Planned damage control procedures for dealing with damage to the vessel and its hull are implemented as per company procedures and regulatory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant maritime regulations

2 The provisions of OH&S Acts, regulations and codes of practice relevant to the workplace, including the rights and responsibilities of the workplace parties under OH&S Acts, regulations and codes of practice;

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

3 The ways in which OH&S is managed on a coastal vessel, and activities required under OH&S legislation, for example:

   a relevant policies and procedures

   b equipment operation and maintenance

   c hazard identification

   d risk assessment and control

   e OH&S instruction and training requirements

   f requirements for the provision of OH&S information to crew and passengers

4 Hazards that exist on a coastal vessel

5 The preferred order of ways to control risks on a coastal vessel (known as the hierarchy of control)

6 Workplace OH&S procedures relevant to the work being undertaken, including procedures for:

   a recognising and reporting on hazards, for example, work area inspections

   b procedures and precautions for entering and working in confined spaces

   c work operations to control risks, for example, permit to work systems and isolation procedures

   d responding to accidents, fires and emergencies

   e raising OH&S issues

   f employee participation in OH&S management, for example, consultative or OH&S committees on a vessel and joint employer/employee inspections

7 The meaning of OH&S symbols found on signs and labels in the workplace

8 Designated personnel responsible for OH&S on board a vessel

9 Indications of various types of emergency situations that may occur on a coastal vessel and the action to be followed when various types of actual or potential emergency situations are identified

10 Emergency alarm signals and systems in use on coastal vessels and procedures to be followed when an emergency alarm is raised

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

11 Escape routes and internal and external communication systems and alarms on board a vessel

12 Ways of controlling damage during a fire or flooding emergency on a coastal vessel

13 Communication techniques used during emergencies on a coastal vessel

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal communication skills

2 Read and interpret OH&S and emergency instructions and procedures

3 Work safely and collaboratively with others when implementing OH&S requirements and emergency procedures

4 Give instructions and directions on safety issues and emergency procedures on a coastal vessel

5 Recognise safety problems and hazards that may occur on a coastal vessel and take appropriate action

6 Complete required documents related to safety incidents or emergencies that may occur on a vessel

7 Adapt to any changes in safety and emergency equipment and procedures in the workplace

8 Use emergency and safety equipment as per operating instructions

9 Recognise faulty emergency and safety equipment and take appropriate action

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for basic fire prevention and firefighting on coastal vessels. This includes applicable sections of the National Standard for Commercial Vessels and State/Territory Maritime licensing and regulatory requirements.

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Carry out fire minimisation procedures	a Fire hazards on board vessel are identified and action is taken to eliminate or minimise them b Responsibilities for checking fire prevention equipment and systems are fulfilled and appropriate action is taken to ensure that they are operational c A state of readiness to respond to fire emergencies is maintained at all times

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Respond to emergency situations involving fire	a Emergency situations involving fire are correctly identified b Type of fire is identified as per the established classification system for fires c Initial action on becoming aware of fire emergency is in conformity with established practices and procedures d Action taken is timely and appropriate for seriousness of the fire emergency e Action taken on identifying muster signals for a fire emergency is appropriate and complies with established procedures f Appropriate precautions and procedures are implemented when responding to fires involving electricity g Communications are clear and concise at all times and instructions are acknowledged in a timely manner
3 Operate portable firefighting equipment	a Classes of fires are correctly identified in accordance with accepted firefighting practice b Correct portable firefighting equipment is selected and used to fight specific classes of fires c Fires are correctly extinguished with a fire blanket in accordance with accepted firefighting practice d Correct techniques are applied for the use of hose lines to extinguish fires on board a vessel
4 Carry out firefighting operations	a Correct procedures and techniques are followed when fighting fires in simulated or real fire emergencies b Safety clothing, appliances and equipment are appropriate to the nature of the firefighting operations

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	c Extinguishment of a fire is achieved using appropriate procedures, techniques, equipment and firefighting agents d Correct portable fire extinguisher(s) are selected and used for the class of fire involved in a fire emergency e Appropriate safety precautions and procedures are applied when fighting fires in accordance with regulatory requirements, vessel's procedures and established firefighting practice

ELEMENT	PERFORMANCE CRITERIA
4 Carry out firefighting operations (**continued**)	f The timing and sequence of individual actions when fighting fires on board a vessel are appropriate to the prevailing circumstances and conditions g Upper deck and below deck fires are extinguished using appropriate firefighting equipment and procedures as a member of a firefighting team in accordance with accepted firefighting practice h Lifelines are correctly used during interior firefighting operations i Correct procedures are followed when operating fixed fire detection and extinguishing systems in machinery spaces k Emergency fuels and ventilation shut-offs are operated correctly l Boundary cooling techniques are followed m Fixed fire extinguisher systems are operated and tested correctly

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant maritime regulations concerning basic fire prevention and firefighting on board a coastal vessel

2 The chemistry of fire and its relationship to materials typically carried on coastal vessels

3 Principles underlying the spread of fire and its extinguishment, including

- a the elements of fire and explosion (the fire triangle)
- b types and sources of ignition
- c flammable materials and fire hazards
- d factors that influence the spread of fire

4 The importance of constant vigilance in fire prevention and minimisation

5 Principles underlying the spread of fire and its extinguishment

6 The different classes of fire, their characteristics and strategies and equipment needed for their extinguishment

7 Firefighting clothing, outfits and personal safety equipment used when fighting a fire on board a coastal vessel

8 Types of fire detection, firefighting appliances, equipment and systems and emergency shut-offs used on coastal vessels, their features, principles of operation and the procedures for their use and maintenance

9 Fixed fire prevention and extinguishing installations used on coastal vessels and their principles of operation, including machinery space systems

10 Firefighting techniques, agents and precautions applicable to different classes of fire on board a coastal vessel

11 Maritime communication techniques applicable to fire prevention and firefighting activities on board a vessel

12 Problems that can occur with shipboard fire detection and firefighting equipment and operations and appropriate remedial action and solutions

13 Sources of information on shipboard fire prevention and extinguishment

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

14 Procedures to be followed in the event of an engine room fire

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with other personnel and passengers during simulated and real fire emergencies

2 Read and interpret and follow instructions on fire emergency procedures and on the use of fire prevention and firefighting equipment

3 Recognise and interpret fire alarms

4 Work collaboratively with shipboard personnel and passengers during a fire emergency

5 Use portable fire extinguishers as per operating instructions

6 Recognise fire hazards on a coastal vessel and take appropriate action to report them and minimise them

7 Determine the type and extent of a fire and take appropriate action

8 Operate emergency shut-offs

9 Operate fixed installation controls, fire detection and extinguishing systems

10 Operate fire hoses, branches, nozzles and fire pumps

11 Conduct effective boundary cooling

12 Use water spray as an effective firefighting agent

TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Participate in simulated on-board firefighting activities b Participate in on-board and interior search and rescue and firefighting teams c Implement OH&S principles and policies when carrying out firefighting duties d Communicate effectively with others as required during fire emergencies
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 implementing the implementation of fire prevention measures and procedures 2 identifying and evaluating firefighting problems and determining appropriate courses of action 3 participating as a member of an interior search and rescue and firefighting team on board a vessel 4 assessing the operational capability of firefighting appliances, equipment and systems and taking any required maintenance or replenishment action c Shows evidence of application of relevant workplace procedures, including: 1 relevant maritime regulations 2 safety management system procedures, where applicable

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**	
	3 OH&S regulations and hazard prevention policies and procedures 4 relevant manufacturer's guidelines relating to the use of fire detection and firefighting equipment and systems, including instructions on equipment capability and limitations 5 on-board housekeeping practices and fire hazard prevention measures 6 fire prevention procedures and policies

Evidence Guide (**continued**) **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**		
2	**Evidence required for demonstration of consistent performance** (**continued**)	d Action taken promptly to report and/or rectify fire hazards and faulty fire detection and firefighting, equipment and systems in accordance with established procedures e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions between crew and others
3	**Context of assessment**	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur:

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide (continued) **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**	
	i at the registered training organisation; and/or ii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a carry out a range of suitably simulated practical and knowledge assessments that demonstrate the skills and knowledge to carry out firefighting activities on board a vessel; and/or b assist in firefighting drills on board an operational vessel Note: Simulated firefighting assessment exercises may require access to a fire training and assessment facility capable of simulating firefighting activities in a marine environment. Assessments must be conducted in accordance with relevant OH&S requirements. Protective clothing must be worn in accordance with current maritime practices and Australian OH&S standards. Simulated conditions should provide realistic simulated shipboard conditions, including, where practical, conduct of activities in darkness.

Range Statement

Range Statement **TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL**	

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	**SCOPE**
1. GENERAL CONTEXT	
a. Work must be	1 in compliance with the relevant maritime regulations.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement TDMMF5507A FIGHT AND EXTINGUISH FIRES ON BOARD A COASTAL VESSEL		
carried out:		
b. **Work is performed**:	1	as a member of a team within defined firefighting situations, with some responsibility for self and others in achieving the prescribed outcomes.
c. **Work involves**:	1	the application of prescribed principles and practice to the prevention and fighting of fires on board a vessel. Participation as a member of a firefighting team is involved.
d. **Work requires**:	1	some judgement and teamwork in the execution of prescribed procedures for the fighting of fires that may occur on board a vessel.

2. **WORKSITE ENVIRONMENT**

a **Vessel may include**:	1	any Australian coastal vessel
b **Fires on board a vessel may occur**:	1	by day or night in both normal and emergency situations
	2	under any possible conditions of weather and loading
	3	while underway
	4	during berthing and unberthing operations
	5	while anchoring or mooring
	6	while in port
	7	while moored or at anchor
	8	loading or unloading
c **Types of fires which may occur on board a vessel**	1	The standard classification of fires

TDMMH1207B PLAN AND NAVIGATE A SHORT VOYAGE WITHIN INSHORE LIMITS

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to navigate a small vessel on a short voyage within inshore limits (15 nm). This includes the use of a navigational chart, determination of a vessel's position, the use of a magnetic compass and the gathering and interpretation of local weather forecast information.**

Application of the Unit

Application of the unit	The unit has applications in qualifications for Coxswains and Masters of commercial vessels operating within inshore coastal limits, i.e. primarily Coxswain - Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain). However, the unit is also applicable to qualifications for Masters of larger vessels operating under restricted certification.

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory minimum requirements for a Coxswain planning and navigation of short voyages of small commercial vessels within inshore limits. This includes applicable sections of State/Territory maritime licensing and regulatory requirements.

© Commonwealth of Australia, 2025 Skills Insight

Pre-Requisites

Not applicable.

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Use a navigational chart	a Coastal navigational charts are correctly used to plan a safe route and identify coastal features, lights, buoyage and navigational hazards b The compass course to steer between two points is determined
2 Fix a small vessel's position	a Ranges and bearings are matched with charted features, combined with depth soundings and plotted onto a chart b A position on a chart from derived GPS readings is plotted in accordance with established procedures
3 Obtain weather and tidal information	a Weather forecast current for planned voyage is obtained from coast radio station, internet and media and interpreted in terms of the implications for the planned voyage b Local tide tables are used to determine times and heights of low and high tides. c Depth of water at locations on a coastal chart is estimated using charted depth and tidal information

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT		PERFORMANCE CRITERIA
4	**Navigate a short inshore passage**	a Observations of sea and weather are appropriate and are applied during navigation of the vessel on the planned voyage
		b Navigational hazards are identified and avoided
		c Lights, buoyage and coastal features are used to pilot vessel throughout planned voyage
		d Vessel's position is fixed at appropriate times using methods appropriate to an inshore voyage
		e The course steered is regularly monitored to ensure safe passage
		f Alterations to course and speed are appropriate to prevailing circumstances and conditions and do not put at risk the safety of the vessel, passengers or crew.
		g Operational limits of vessel's propulsion, steering, power systems, trim and stability are not exceeded during navigational manoeuvres

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant State and Territory maritime regulations

2 Basic principles and procedures of navigation and inshore passage planning, including contingency planning

3 Information required to develop a typical effective inshore passage plan

4 Procedures for using and handling navigational charts, nautical publications and related documentation

5 Principles and procedures for fixing a small vessel's position

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

6 Procedures for converting one set of coordinates to another

7 Procedures for the calculation of the height of tide for a given time at any place listed using tide tables

8 Errors in common position fixing systems and their effect on observed positions

9 Methods for controlling small vessel speed and direction

10 Effects on vessel handling of wind, currents and bottom topography

11 Manoeuvring procedures in and near traffic separation schemes and vessel traffic service areas

12 Small vessel reporting systems

13 Procedures to correct a magnetic compass direction/reading for variation and deviation

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Communicate effectively with others when planning and navigating an inshore voyage

2 Read and interpret operational requirements for a commercial vessel in terms of their implications for voyage planning and navigation

3 Read and interpret charts and weather and tidal information as required when planning and navigating a short voyage within inshore limits

4 Read and interpret relevant marine regulations, rules and instructions

5 Collect, manage and interpret information required for the safe navigation of the vessel

6 Plan the timing and sequence of vessel operations to be appropriate to the prevailing circumstances, sea and weather conditions and any navigational hazards

7 Work collaboratively with others when planning vessel operations

8 Make appropriate estimates and calculations required for planning and navigating an inshore voyage on a coastal vessel of less than 80 metres within inshore limits

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS

(e.g. fuel, distance, speed, time, etc.)

9 Fix a vessel's position within inshore limits using appropriate methods

10 Convert one set of coordinates to another when plotting a position on a chart

11 Recognise voyage planning and position fixing problems that may be experienced for small vessels on inshore voyages and implement appropriate action and solutions

12 Correct a magnetic compass direction/reading for variation and deviation (suitable for an inshore passage)

13 Conduct voyage as planned

Evidence Guide

Evidence Guide

TDMMH1207B PLAN AND NAVIGATE A SHORT VOYAGE WITHIN INSHORE LIMITS

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Plan the inshore passage of a small vessel b Fix the position of a small vessel within inshore waters using all acceptable and relevant methods c Identify typical navigational hazards and make due allowance for them when planning an inshore voyage d Conduct the passage of a small vessel on an inshore voyage, taking into account all relevant navigational hazards e Access, use and maintain relevant coastal navigational charts, nautical publications and related documentation

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

TDMMH1207B PLAN AND NAVIGATE A SHORT VOYAGE WITHIN INSHORE LIMITS

	f Communicate effectively with others when planning an inshore voyage and conducting navigation g Follow reporting procedures in accordance with the requirements of relevant maritime regulations and authorities h Recognise the operational and navigational safety consequences of estimating bearing and courses without compass error information
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 using a navigational chart 2 fixing a small vessel's position 3 obtaining and interpreting weather and tidal information 4 navigating a short inshore passage c Shows evidence of application of relevant workplace and regulatory procedures, including: 1 relevant maritime regulations and notices 2 OH&S regulations and hazard prevention policies and procedures 3 job procedures and work instructions d Appropriate action is taken promptly in the event of any problems that may occur when planning or navigating an inshore as per established procedures

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide (**continued**)

TDMMH1207B PLAN AND NAVIGATE A SHORT VOYAGE WITHIN INSHORE LIMITS

2 Evidence required for demonstration of consistent performance (**continued**)	e Work is completed systematically with required attention to detail f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among crew and others
3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4 Specific resources required for assessment	Access is required to opportunities to: a plan a simulated inshore passage and conduct navigation using an appropriate marine simulator in simulated coastal areas and across an appropriate range of navigational hazards; and/or b assist in the planning and conduct of an actual passage for a small commercial vessel less than 80 metres in length engaged in an inshore voyage

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

Range Statement **TDMMH1207B PLAN AND NAVIGATE A SHORT VOYAGE WITHIN INSHORE LIMITS**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in accordance with the relevant maritime regulations
b. Work is performed:	1 within a defined range of operations and routine procedures, with responsibility for own outputs in relation to specified quality standards
c. Work involves:	1 the application of basic navigational principles and procedures required to plan and navigate an inshore voyage for a vessel of up to 80 m in length. Limited accountability and responsibility for self and others in planning a coastal voyage and conducting navigation is involved
d. Work requires:	1 some discretion and judgement in devising and conducting the passage of a vessel up to 80 m in length operating within inshore limits
2. WORKSITE ENVIRONMENT	
a Vessel may include:	1 any commercial vessel less than 80 metres in length engaged on an inshore passage, i.e. within 15 nm
b Voyage to be planned and conducted may include:	1 any inshore voyage navigable by the size and type of small vessel concerned 2 passages through 3 traffic separation schemes in inshore areas

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
.	.
1 Operate propulsion systems	a Propulsion system is operated as per standard operating procedures and manufacturer's instructions and specifications b Propulsion system is prepared, started, and shut down as per manufacturer's instructions c Basic faults are identified during operations and appropriate action is taken
2 Carry out basic, routine servicing procedures on propulsion systems	a The operation of propulsion systems is monitored as per manufacturer's instructions and faulty operation is reported or rectified as per procedures b Basic user service checks are carried out on propulsion system before and during operation in accordance with manufacturer's instructions c Faulty machinery and components are identified and are reported and action is initiated as required for isolation, tagging and repair or replacement in accordance with company procedures

© Commonwealth of Australia, 2025 Skills Insight

TDMMR3007B OPERATE AND CARRY OUT BASIC SERVICE CHECKS ON SMALL VESSEL MARINE PROPULSION SYSTEMS

ELEMENT	PERFORMANCE CRITERIA
3 Follow safety and hazard control procedures	a All required safety precaution and regulations are followed when operating and maintaining propulsion systems b Appropriate action is taken in the event of a failure or emergency involving propulsion systems to isolate and secure the relevant equipment and the vessel and maintain the safety of the vessel and persons involved c Emergency and contingency plans are followed in the event of a failure or emergency involving propulsion systems

TDMMR3007B OPERATE AND CARRY OUT BASIC SERVICE CHECKS ON SMALL VESSEL MARINE PROPULSION SYSTEMS

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Procedures for the operation and routine basic servicing on the propulsion system of a small vessel to ensure compliance with safety and pollution control rules and regulations

2 Safety, environmental and hazard control precautions and procedures relevant to the operation and routine servicing of propulsion systems on a small vessel

3 Basic features and operating characteristics of various propulsion systems used on small vessels

4 Problems related to the operation and routine basic servicing of propulsion systems on small vessels and appropriate action and solutions

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

5 Operational and user maintenance records that must be maintained on a small commercial vessel

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal communication skills required when operating and carrying out routine basic servicing on the propulsion system of a small vessel

2 Read, interpret and apply simple instructions standard operating procedures for the operation and routine basic servicing of a propulsion system on a small vessel

3 Read and interpret gauges

4 Complete any required servicing records

5 Work safely and collaboratively with others during the operation and routine basic servicing of a propulsion system on a small vessel

6 Select and use relevant tools and equipment as per instructions

7 Recognise faulty equipment and take appropriate action as per operating instructions

8 Recognise routine problems during the operation and routine basic servicing of propulsion systems on a small vessel and take appropriate action

9 Adapt to changes in equipment and procedures in the workplace

10 Follow required work schedule as per company requirements

11 Bleed a diesel fuel system

Evidence Guide

TDMMR3107B OPERATE AND CARRY OUT BASIC SERVICING ON AUXILIARY SYSTEMS

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR:

This unit involves the skills and knowledge required to operate and carry out routine basic servicing checks on auxiliary systems on a small commercial vessel (including the steering, pumping and any refrigeration systems on the vessel) within the limits of responsibility and skill of a Marine Engine Driver Grade 3 or a Coxswain as per relevant sections of Part D of the National Standard for Commercial Vessels (NSCV).

Note: Relevant State/Territory training and qualification requirements need to be fulfilled by any persons carrying out installation, maintenance and/or repair of refrigeration equipment especially with regard to preventing the escape of refrigerants into the atmosphere and to electrical work. Work on refrigeration systems only includes allowable basic operator servicing as per manufacturer's manual. Maintenance and repair of refrigeration systems on a vessel should only be performed by persons qualified under the relevant regulations.

Application of the Unit

Application of the unit	The unit has applications in the qualification for a Coxswain and Marine Engine Driver Grade 3 (MED 3) as per relevant sections of Part D of the National Standard for Commercial Vessels (NSCV), i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain) and Certificate II in Transport&Distribution (Marine Engine Driving - Grade 3).

© Commonwealth of Australia, 2025 Skills Insight

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant sections of State and Territory maritime regulations and NSCV/USL Code for a Coxswain or MED 3.

Pre-Requisites

Employability Skills Information

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate auxiliary systems	a Auxiliary systems are operated in accordance with procedures and manufacturer's instructions and specifications b Auxiliary systems are prepared, started up and shut down as per manufacturer's instructions c Basic faults are identified during operations and appropriate action is taken as per company procedures

ELEMENT	PERFORMANCE CRITERIA

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
2 Carry out basic, routine checking and servicing procedures on auxiliary systems	a The operation of auxiliary systems is monitored in accordance with manufacturer's instructions, and faulty operation reported in accordance with procedures b Faulty equipment and components are identified and reported, and action is initiated as required for isolation, tagging and repair or replacement as per company procedures
3 Follow safety and hazard control procedures	a All required safety precautions and regulations are followed when operating and maintaining auxiliary systems b Operational hazards are identified and action is taken to minimise or eliminate risk to personnel, vessel and the environment c Where relevant, procedures and precautions necessary for entry into confined spaces on a vessel are correctly followed d Appropriate action is taken in the event of a failure or emergency involving auxiliary systems to isolate and secure the relevant equipment and the vessel and maintain the safety of the vessel and persons involved e Shipboard emergency and contingency are followed in the event of a failure or emergency involving auxiliary systems

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant OH&S and pollution control legislation, codes of practice, policies and procedures

2 Procedures for the operation and routine basic servicing of auxiliary systems on a small vessel

3 Safety, environmental and hazard control precautions and procedures relevant to

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

the operation and routine servicing of auxiliary systems on a small vessel

4 Basic features and operating characteristics of auxiliary systems used on small vessels, including:

a steering systems

b pumping systems

c refrigeration systems

5 Problems related to the operation and routine basic servicing of auxiliary systems on small vessels and appropriate action and solutions

6 Running logs and servicing records that may be kept on a small commercial vessel

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal communication skills required when operating and carrying out routine basic servicing on the auxiliary systems of a small vessel

2 Read, interpret and apply simple instructions on the operation and routine basic servicing of auxiliary systems of a small vessel

3 Complete any required servicing records

4 Work safely and collaboratively with others during the operation and routine basic servicing of auxiliary systems on a small vessel

5 Select and use relevant tools and equipment as per instructions

6 Recognise faulty equipment and take appropriate action as per operating instructions

7 Recognise routine problems during the operation and routine basic servicing of auxiliary systems on a small vessel and take appropriate action

8 Adapt to changes in equipment and procedures in the workplace

9 Follow required work schedule as per company requirements

10 Read and interpret gauges

Evidence Guide

Evidence Guide

TDMMR3107B OPERATE AND CARRY OUT BASIC SERVICING ON AUXILIARY SYSTEMS

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Operate auxiliary systems on a small vessel b Carry out routine basic servicing and checks of auxiliary systems on a small vessel c Identify typical problems related to the basic servicing of auxiliary systems on a vessel and take appropriate action in conjunction with other crew members d Exercise all required safety, environmental and hazard control precautions and procedures during operation and routine servicing of systems e Communicate effectively with others when operating and carrying out basic servicing on auxiliary systems on a small vessel
2 Evidence required for demonstration of consistent performance	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts b Consistently applies underpinning knowledge and skills when: 1 operating auxiliary systems on a small vessel 2 carrying out routine servicing on auxiliary systems on a small vessel 3 identifying and reporting routine operational and basic servicing problems 4 applying safety and pollution control precautions when operating and servicing auxiliary systems on a small vessel

© Commonwealth of Australia, 2025 Skills Insight

Evidence Guide

TDMMR3107B OPERATE AND CARRY OUT BASIC SERVICING ON AUXILIARY SYSTEMS

c Shows evidence of application of relevant workplace procedures, including:

1 relevant sections of State and Territory marine regulations

2 OH&S regulations and hazard prevention policies and procedures

3 job procedures and work instructions

4 relevant equipment manufacturer's guidelines relating to operating and carrying out routine servicing on auxiliary systems on a small vessel

5 environmental protection procedures when carrying out servicing operations

d Action is taken promptly to report and/or rectify problems identified when operating and carrying out routine basic servicing on auxiliary systems

e Work is completed systematically with required attention to detail

f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among crew and others

Evidence Guide (**continued**)

TDMMR3107B OPERATE AND CARRY OUT BASIC SERVICING ON AUXILIARY SYSTEMS

3	**Context of assessment**	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations,

TDMMR3207B OPERATE AND CARRY OUT BASIC ROUTINE SERVICING OF MARINE EXTRA LOW AND LOW VOLTAGE ELECTRICAL SYSTEMS

Modification History

Not applicable.

Unit Descriptor

UNIT DESCRIPTOR:

This unit involves the skills and knowledge required to safely operate and carry out routine basic servicing of extra low voltage and low voltage electrical systems and be aware of the safety precautions for these systems on a small commercial vessel, **including operation and service checks of systems**, **basic care and servicing of batteries and charging systems**, **and basic operation and servicing of starter motors**, **alternators and associated equipment**.

Note: All installation, servicing and repair of AC (50 volts or above) or DC (above 115 volts) must be carried out only by a suitably qualified engineer or licensed tradesman. Relevant State/Territory electrical licensing requirements must be fulfilled by any persons carrying out installation, servicing and repair of electrical circuits and systems at such voltages on a vessel.

Application of the Unit

Application of the unit	The unit has applications in the qualification for a Coxswain and Marine Engine Driver Grade 3 (MED 3) as per relevant sections of Part D of the National Standard for Commercial Vessels (NSCV), i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain) and Certificate II in Transport&Distribution (Marine Engine Driving Grade 3).

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant OH&S legislation and policies

2 Typical standard operating procedures for the operation and basic routine servicing of ELV and LV systems on a small vessel falling specifications.

Note: All installation, maintenance and repair of AC (50 volts or above) DC (above 115 volts) must be carried out only by a suitably qualified engineer or licensed tradesman. Relevant State/Territory electrical licensing requirements must be fulfilled by any persons carrying out installation, maintenance and repair of electrical circuits and systems at such voltages on a vessel.

3 Safety, environmental and hazard control precautions and procedures relevant to the operation and routine servicing of ELV and LV systems on a small vessel

4 Principal features and operating characteristics of typical ELV and LV systems used on small vessels, including:

a basic care and servicing of shipboard electrical systems generally

b DC systems

c batteries - types, care, servicing, hazards and safety precautions

d procedures and precautions when connecting batteries

e use of fuses and circuit breakers, including the selection of correct capacity

f types of starter motors and alternators typically used on small vessels

5 Procedures for isolating equipment in ELV and LV electrical systems

6 Typical problems related to the during the operation and basic servicing of ELV and LV systems on small vessels and appropriate action and solutions

7 Maritime communication techniques needed during the operation and basic servicing of auxiliary systems on small vessels

8 Types of running logs and servicing records that must be maintained on a vessel to meet the requirements of the company and regulatory authorities

Unit Descriptor

UNIT DESCRIPTOR: **This unit involves the skills and knowledge required to operate a coastal vessel up to 24 metres in length in compliance with marine regulations and environmental considerations**.

Application of the Unit

Application of the unit	The unit applications in qualifications for Coxswain, Master 5, Skipper 3, i.e. Certificate II in Transport&Distribution (Coastal Maritime Operations - Coxswain), Certificate III in Transport&Distribution (Coastal Maritime Operations - Master Class 5) and for Marine Engine Drivers 2 and 3, i.e. Certificate III in Transport&Distribution (Marine Engine Driving - Grade 2) and Certificate II in Transport&Distribution (Marine Engine Driving - Grade 3).

Licensing/Regulatory Information

Licensing/legislative requirements	The unit is consistent with the relevant maritime regulations describing mandatory compliance with marine environmental considerations on coastal vessels.

Pre-Requisites

Not applicable.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	*Performance Criteria describe the required performance needed to demonstrate achievement of the element*. *Assessment of performance is to be consistent with the Evidence Guide*.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
.	.
1 Apply relevant domestic legislative requirements	a Relevant domestic legislative and administrative requirements are identified, understood and applied to vessel operations b Basic need for management of environmental issues is identified, understood and addressed during vessel operations c Implications and concerns on environmental issues other than those managed by marine safety authorities are identified and interpreted, and appropriate action is taken in respect of vessel operations
2 Apply principles for preventing oil pollution and for responding to pollution incidents	a Generic precautions for preventing spillage of oil through refuelling bilge pumping transfer of fuel, maintenance, loss of deck cargo, loss of vessel are understood and applied during vessel operations b Generic responses to spilled fuel are understood and applied during vessel operations and pollution incidents c Requirements for the responsible disposal of waste oil are understood and applied during vessel operations and maintenance

© Commonwealth of Australia, 2025 Skills Insight

TDMMU507B ENSURE COMPLIANCE WITH ENVIRONMENTAL CONSIDERATIONS IN A SMALL DOMESTIC VESSEL

ELEMENT	PERFORMANCE CRITERIA
3 Apply requirements for management of garbage	a The rules of disposal of garbage are understood and applied during vessel operations b A garbage record book is maintained in accordance with regulatory requirements and workplace procedures c Principles of responsible management of garbage are applied during vessel operations
4 Apply basic principles of ballast water management	a Basic reasoning and principles for ballast water control are understood and applied during vessel operations
5 Apply the principles of management of sewage discharges	a Basic reasoning and principles for sewage control are applied during vessel operations b Responsible management of sewage is demonstrated during vessel operations
6 Apply environmental and safety principles during the stowage and management of explosive and flammable material	a Environmental and safety principles and regulatory requirements are applied during stowage and management of flammable/explosive liquids, gases, solids and other materials normally carried on board b Dangers inherent with the above materials are understood and appropriate precautions are taken in accordance with regulatory requirements and workplace procedures

© Commonwealth of Australia, 2025 Skills Insight

TDMMU507B ENSURE COMPLIANCE WITH ENVIRONMENTAL CONSIDERATIONS IN A SMALL DOMESTIC VESSEL

Required Skills and Knowledge

REQUIRED KNOWLEDGE

This describes the knowledge required for this unit.

1 Relevant legislation, codes of practice, policies and procedures to protect the marine environment

2 Effects on the marine environment of various possible pollution incidents

3 Pollution control problems and related measures to protect the marine environment

4 Certificates and other documents required by relevant Australian and/or international legislation and conventions for the protection of the marine environment

5 Operational characteristics of emission control equipment used on various types and sizes of vessels

6 Operational requirements of water, bilge, waste, pollution and recycling management processes used on various types and sizes of small vessels

7 Requirements under Australian and/or international legislation and conventions for reporting incidents related to breaches of the statutory codes and measures for the protection of the marine environment

8 Safety implications of the carriage and stowage of flammable or hazardous material in a small vessel

REQUIRED SKILLS

This describes the basic skills required for this unit.

1 Use basic verbal communication skills

2 Read and interpret instructions and procedures related to environmental considerations

3 Work safely and collaboratively with others when implementing environmental considerations

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE

4 Give instructions and directions on environmental considerations on a coastal vessel

5 Recognise pollution control problems and hazards that may occur on a coastal vessel and take appropriate action

6 Complete required documents related to breaches of environmental protection requirements that may occur on a small domestic vessel

7 Adapt to any changes in environmental protection procedures in the workplace

Evidence Guide

Evidence Guide

TDMMU507B ENSURE COMPLIANCE WITH ENVIRONMENTAL CONSIDERATIONS IN A SMALL DOMESTIC VESSEL

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

1 Critical aspects of evidence required to demonstrate competency in this unit	Assessment must confirm appropriate knowledge and skills to: a Maintain compliance with legislative requirements for protection of the marine environment b Implement preventative and remedial anti-pollution procedures as per relevant regulations and procedures c Identify typical pollution control problems and take appropriate action d Maintain all records concerning anti-pollution measures and breaches of anti-pollution regulations e Communicate effectively with others concerning measures to protect the marine environment
2 Evidence required for	a Performance is demonstrated consistently over a period of time and in a suitable range of contexts

© Commonwealth of Australia, 2025 Skills Insight

demonstration of consistent performance	b Consistently applies underpinning knowledge and skills when: 1 completing activities aimed at compliance with relevant regulatory requirements for protection of the marine environment 2 identifying and evaluating problems related to compliance with relevant regulations for environmental protection and determining appropriate courses of action 3 following anti-pollution procedures 4 assessing compliance of vessel with relevant regulatory requirements for protection of the marine environment 5 stowing flammable or hazardous materials on board c Shows evidence of application of relevant workplace procedures, including: 1 relevant regulatory requirements dealing with environmental protection 2 OH&S regulations and hazard prevention policies and procedures 3 job procedures and work instructions related to environmental protection 4 on-board housekeeping processes 5 waste, pollution and recycling management processes, where relevant d Action is taken promptly to report and/or rectify breaches of environmental protection regulations e Work is completed systematically with required attention to detail

Evidence Guide

TDMMU507B ENSURE COMPLIANCE WITH ENVIRONMENTAL CONSIDERATIONS IN A SMALL DOMESTIC VESSEL

© Commonwealth of Australia, 2025 Skills Insight

2 Evidence required for demonstration of consistent performance	f Recognises and adapts appropriately to cultural differences in the workplace, including modes of behaviour and interactions among crew and others
3 Context of assessment	a Assessment of competency must comply with the assessment requirements of the relevant maritime regulations b Assessment of this unit must be undertaken within relevant marine authority approved and audited arrangements by a registered training organisation: 1 As a minimum, assessment of knowledge must be conducted through appropriate written/oral examinations, and 2 Appropriate practical assessment must occur: i at the registered training organisation; and/or ii on an appropriate working or training vessel
4Specific resources required for assessment	Access is required to opportunities to: a demonstrate performance in suitably simulated activities aimed at the protection of the marine environment covering an appropriate range of situations experienced on a vessel and/or b contribute to measures to protect the marine environment on a vessel in an appropriate range of situations, weather and loading conditions

Range Statement

Range Statement

TDMMU507B ENSURE COMPLIANCE WITH ENVIRONMENTAL CONSIDERATIONS IN A SMALL DOMESTIC VESSEL

© Commonwealth of Australia, 2025 Skills Insight

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

VARIABLE	SCOPE
1. GENERAL CONTEXT	
a. Work must be carried out:	1 in compliance with mandatory rules and regulations concerning protection of the marine environment.
b. Work is performed:	1 relatively independently under broad operational requirements, with limited accountability and responsibility for self and others in achieving the prescribed outcomes
c. Work involves:	1 the application of regulations and measures to ensure the protection of the marine environment in a wide variety of operational contexts.
2. WORKSITE ENVIRONMENT	
a Vessel may include:	1 any Australian or international commercial vessel
b Dangers to the marine environment may occur:	1 by day or night in both normal and emergency situations 2 under any possible conditions of sea and weather 3 while underway 4 during berthing and unberthing operations 5 while anchoring or mooring 6 while moored or at anchor 7 during loading and unloading operations 8 during maintenance operations
c Items and equipment which may be checked as part of	1 pumps 2 valves 3 emission control equipment

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to complete and or evaluate import and export documentation, and check documentation in accordance with the requirements of Customs and related legislation and workplace procedures. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Customs and related legislation and workplace requirements concerning the completion and checking of import/export documentation.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments including small to large worksites in the customs broking and freight forwarding industries.

This unit is normally packaged at AQF II or above.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify procedures required for documentation for import/export of goods	1.1 Documents required for import/export of goods are identified 1.2 Required documents are sourced 1.3 Content requirements for each section of the documentation are applied 1.4 Timelines for completion of documents are identified and noted 1.5 Requirements for permits and other documentation (e.g. Quarantine) are identified and implications noted 1.6 Procedures for obtaining clearances including AUTHORITY TO DEAL, Delivered into Home Consumption authorisation and Export Declaration Numbers (EDN) are identified and followed in accordance with the requirements of Customs and related legislation and workplace procedures 1.7 Letters of credit are identified and implications of each noted 1.8 Assistance is sought as required in identifying required documents and to commence process of assessing or completing these documents 1.9 Lodge all documentation if required by legislation (e.g. CITES)
2 Complete documentation to meet legislative and workplace requirements	2.1 Content requirements for each section of the documentation are identified and applied in accordance with the requirements of Customs and related legislation and workplace procedures 2.2 Workplace procedures for authorisations are followed 2.3 Data entry for documents are completed 2.4 Problems arising in completing required documents are identified and assistance sought to resolve these in accordance with the requirements of Customs and related legislation and workplace procedures 2.5 Actions are taken to meet deadlines 2.6 Assistance is sought as required in completing required documents

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3 Check documentation to ensure it meets legislative requirements	3.1 Documents are collated and checked before forwarding to supervisor, manager or more senior personnel for checking within designated timelines in accordance with the requirements of Customs and related legislation and workplace procedures
	3.2 Declarations are checked to ensure they meet the requirements of Customs and related legislation and workplace procedures
	3.3 Letters of credit are checked to ensure they meet commercial, transport and overseas requirements
	3.4 Dangerous goods documentation is checked in accordance with the requirements of Customs and related legislation and workplace procedures
	3.5 Any revisions to documents are finalised and rechecked by self and supervisor, manager or more senior personnel prior to lodgement
4 Lodge documentation for processing	4.1 Documents are forwarded to relevant personnel in accordance with the requirements of Customs and related legislation and workplace procedures
	4.2 Documents are filed, stored and retained in accordance with the requirements of Customs and related legislation and workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian and international standards, codes and regulations relevant to the import and export of cargo and freight
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the completion of import and export documentation
- Focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation
- Problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve the problems
- The Customs Act 1901and related legislation
- Documentation requirements for the import and export of cargo and freight

© Commonwealth of Australia, 2025 Skills Insight

Required skills:

- Communicate effectively with others when completing import and export documentation
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the import and export of cargo and freight
- Complete and/or assess accuracy of import and export documentation
- Work collaboratively with others when completing import and export documentation
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems when completing and/ or assessing import and export documentation in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use relevant communications, computing and office equipment when completing import and export documentation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - identifying procedures required for documentation for import/export of goods
  - completing and checking documentation and records to meet relevant Customs legislation and related legislation and workplace requirements
  - providing customer/client service and work effectively with others
  - selecting and using appropriate workplace colloquial and technical language and communication

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	technologies in the workplace context

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:	• a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited or restricted spaces

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Cargo may include:	• exposed conditions • controlled or open environments • goods with specialist requirements, including temperature controlled goods and dangerous goods • personal effects • consignments imported/exported by parcels post • consignments imported/exported by air freight • consignments imported/exported by sea freight • wildlife or wildlife products (living or non-living) • goods with specialist requirements, including temperature controlled goods and dangerous goods
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials
Consultative processes may involve:	• other employees and supervisors • suppliers, customers and clients • relevant authorities and institutions • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff
Communication in the work area may include:	• phone • electronic data interchange (EDI) • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/documents may include:	• goods identification numbers and codes • manifests, barcodes, and container identification/serial number • relevant Customs legislation, related legislation including quarantine legislation, environment and conservation legislation and Australian and international codes of practice and regulations relevant to import/export of cargo • Australian and international standards, regulations and codes of practice for the handling and transport of

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements including identifying products in a subsection of a warehouse or other storage area, examining quality and reporting on products, and using inventory and labelling systems to identify and locate products. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the identification, handling and storage of various categories of products/stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the handling and storage of various types of products/stock as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Identify products in a subsection of a warehouse or other storage area	1.1 Products are identified against specified criteria in accordance with workplace procedures 1.2 Storage and handling characteristics are identified and applied consistently 1.3 Products are described to internal customers identifying features which may affect location, safety or storage requirements
2 Examine quality and report on products	2.1 Products are inspected in accordance with workplace quality assurance procedures 2.2 Workplace procedures are followed to replace, return or dispose of stock/products which are not useable 2.3 Non-conforming products are recorded/reported in accordance with workplace procedures
3 Use inventory and labelling systems to identify and locate products	3.1 Inventory and labelling systems are used to locate products within the workplace 3.2 Goods are physically located and identified

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Australian codes and regulations relevant to the products being identified, handled, transported, stacked and/or stored as part of work operations
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the identification, handling, stacking and storage of particular categories of products
- Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods
- Categories or groups of products and the special handling, stacking and storage requirements for each
- Purpose and use of cataloguing and labelling systems
- Strategies to seek out sources of knowledge of products and use this information to inform work
- Types of equipment and storage areas appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods
- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when handling, transporting and storing products and providing information on products and services
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures, information and signs relevant to the handling, transporting and storing of products and the provision of information on products and services
- Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels
- Complete documentation related to work activities
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Adapt to differences in products and services in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Select and use relevant communications, computing and load handling equipment
- Estimate the size, shape and special requirements of goods and loads

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian codes and regulations relevant to the regulation of temperature controlled stock
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the regulation of temperature controlled stock
- Focus of operation of work systems, equipment, management and site operating systems for the regulation of temperature controlled stock
- Special handling, stacking and storage requirements for temperature controlled stock
- Procedures for pre-cooling and snap freezing
- Problems that can occur when regulating temperature controlled stock and appropriate action that can be taken
- Hazards when regulating and working with temperature controlled stock and appropriate action to control the risks involved
- Documentation requirements including reports and records concerning damaged or contaminated goods
- Housekeeping standards procedures required in the workplace
- Site layout

Required skills:

- Communicate effectively with others when regulating temperature controlled stock
- Read and comprehend simple statements in English
- Read and interpret instructions, procedures and labels relevant to the regulation of temperature controlled stock
- Complete documentation related to the regulation of temperature controlled stock
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when regulating temperature controlled stock
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions when regulating temperature controlled stock in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events when regulating temperature controlled stock
- Modify activities depending on differing operational contingencies, risk situations and environments

© Commonwealth of Australia, 2025 Skills Insight

Required skills:

- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in stock and equipment in accordance with standard operating procedures
- Select and use relevant equipment, processes and procedures
- Check refrigeration equipment operation in terms of maintenance schedule and standard operating procedures
- Select and implement corrective actions to maintain temperature levels
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites • short -term and/or long-term temperature controlled areas
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Procedures for pre-cooling and snap freezing may include:	• automated • spraying with liquid nitrogen • immersion in a very cold refrigerant • freezing in moving air at less than -30oC • plate freezer with very low refrigerant temperatures
Hazards in the work area may include:	• contamination of, or from, materials being handled • noise, light, energy sources • service lines • spills, leakages, ruptures • cold pipes and chilling equipment • dangerous or hazardous substances • movements of equipment, goods and materials

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• dust/vapours • oil, water or ice on floor • a fire or explosion • damaged packaging or pallets • debris on floor • faulty racking • poorly stacked pallets • faulty equipment
Hazard management is consistent with:	• the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Requirements for work may include:	• site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • incident/accident breakdown procedures • additional gear and equipment • noise restrictions • hours of operations • authorities and permits
Communication in the work area may include:	• phone • electronic data interchange (EDI) • fax • email • internet • radio • RF systems • oral, aural or signed communications
Consultative processes may involve:	• other employees and supervisors • suppliers, customers and clients • relevant authorities and institutions • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment	• gloves and protective clothing

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

may include:	• safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes • manifests, picking slips, merchandise transfers, stock requisitions and bar codes • codes of practice and regulations relevant to the identification, handling and stacking of goods • operations manuals, job specifications and induction documentation • manufacturers specifications for equipment • workplace procedures and policies • supplier and/or client instructions • award, enterprise bargaining agreement, other industrial arrangements • relevant Australian standards and certification requirements • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• relevant codes and regulations for the regulation of temperature controlled goods • relevant state/territory OH&S and environmental protection legislation • water and road use and licence arrangements • export/import/quarantine/bond requirements • workplace relations regulations • workers compensation regulations

TLID1001A Shift materials safely using manual handling methods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe manual handling techniques and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Refer to Unit Descriptor

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess risks associated with the relocation of the load	1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation 1.2 Locations for storage are determined and potential routes to be followed are identified 1.3 Effect of load relocation on original load base is predicted 1.4 Points of balance are estimated 1.5 Required clearances are compared to available space and adjustments are made 1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered 1.7 Potential risks in route(s) which may be followed are considered 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified 1.10 Team lifting processes are considered for application 1.11 Appropriate personal protective equipment is worn 1.12 Size to weight ratio of items to be manually handled are identified
2 Plan load relocation	2.1 Relocation of the load is planned consistent with the code of practice for manual handling 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties 2.3 Proposed process is checked against code of practice and workplace procedures for compliance

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3 Relocate load	3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements 3.2 Applications appropriate for team relocation of load are identified 3.3 Team lifting tasks are coordinated 3.4 Planned process and route are followed 3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability 3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads
- Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load
- Workplace procedures and policies for manual handling
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when manually lifting and handling materials and goods
- Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- Interpret and follow operational instructions and prioritise work
- Work collaboratively with others when manually lifting and handling materials and goods

© Commonwealth of Australia, 2025 Skills Insight

Required skills:

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods
- Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in loads and materials in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
	  • applying the underpinning knowledge and skills
	  • interpreting manual handling risks
	  • using correct manual handling practices
	  • applying relevant legislation and workplace procedures

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Materials to be shifted may include:	• goods • large luggage items • baggage items

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• equipment and tools • cleaning materials • components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc. • materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
Loads to be shifted may be:	• irregularly shaped • packaged or unpackaged • labelled or unlabelled
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • weight of items being handled
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes • manifests, bar codes, goods and container identification • manufacturers specifications for equipment/tools • workplace procedures and policies • supplier and/or client instructions • material safety data sheets • codes of practice including the National Standards for

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess risks associated with the relocation of the load	1.1 Products, goods or materials to be relocated are identified and assessed for the appropriate method of relocation 1.2 Location for storage is determined 1.3 Routes to be followed are identified 1.4 Points of balance are estimated 1.5 Effect of moving contents which may be loose, liquid, dangerous or hazardous are considered 1.6 Potential risks in route(s) which may be followed are considered 1.7 Lifting equipment to minimise potential risks is identified 1.8 Appropriate personal protective equipment is worn 1.9 Tools, load shifting equipment and other materials are selected, checked for serviceability and any defects are reported to the supervisor
2 Plan load relocation	2.1 Load is examined to determine condition, length, bulk, weight 2.2 Load shifting equipment is selected in accordance with workplace procedures 2.3 Safe procedures for using lifting equipment are identified, including the calculation of Safe Working Load (SWL) and/or Working Load Limit (WLL) for weight of goods to be moved 2.4 Process for relocating load is proposed including predicting and planning for potential difficulties 2.5 Proposed process is checked against relevant code of practice and workplace procedures for compliance 2.6 Lifting equipment and accessories are checked for safe operation in accordance with manufacturers instructions and workplace procedures 2.7 Personal protective equipment is selected and worn in accordance with OH&S requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3 Relocate load	3.1 Any unsafe equipment is reported to appropriate personnel in accordance with workplace procedures
	3.2 Load is broken down, where applicable, to allow handling and moving a number of single items to ensure the maximum weight of 500 kg is not exceeded
	3.3 Mechanical aids and field machines are constructed, when required, by the approved shifting method, so that the load can be shifted in accordance with job instructions
	3.4 Safe working limits for lifting equipment are identified and maintained
	3.5 Planned process and route are followed using equipment within necessary range of limitations
	3.6 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
	3.7 Relocation is checked to see that it meets work requirements, and any variances are reported
4 Refurbish equipment and worksite	4.1 Site is cleaned and cleared of debris and unwanted material
	4.2 Field machines, tools and equipment are cleaned, inspected, serviced, maintained and stored in accordance with standard procedures
	4.3 Documentation is completed in accordance with standard procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant OH&S procedures and guidelines concerning the use of manually-operated equipment to shift loads
- Risks when using manually-operated equipment to shift loads, and related precautions to control the risk
- Workplace procedures and policies for the shifting of goods and materials using manually-operated equipment
- Problems that may arise when using manually-operated equipment to shift loads, and actions that should be taken to prevent or solve them
- Housekeeping standards procedures required in the workplace

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE AND SKILLS

- Site layout and obstacles
- Relevant knots and lashings to use
- Method for splicing and maintaining cordage and SWR
- Relevant slings and securing devices to use

Required skills:

- Communicate effectively with others when using manually-operated equipment to shift loads
- Read and interpret instructions, procedures, information and signs relevant to the shifting of loads using manually-operated equipment
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Work collaboratively with others when using manually-operated equipment to shift loads
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when using manually-operated equipment to shift loads in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using manually-operated equipment
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
	  • applying the underpinning knowledge and skills
	  • identifying load limits for lifting
	  • relocating a load safely
	  • identifying manual operating equipment and their capabilities
	  • identifying faults and deficiencies and taking action to rectify problems

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

environments and situations that may affect performance.

The shifting operations may be conducted:	• in a range of work environments • by day or night • under all weather conditions • in a range of terrain, soil, vegetation
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Materials to be shifted may include:	• goods • equipment and tools • cleaning materials • components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc. • materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
Loads to be shifted may be:	• irregularly shaped • packaged or unpackaged • labelled or unlabelled • palleted or unpalleted
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Manually-operated equipment may include:	• pallet jack • hand trolley • electric manual handling equipment • straps • slings • chain blocks • gins • derricks • incline planes • chain blocks

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Communication in the work area may include:	• sheers • phone • electronic data interchange (EDI) • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Measuring aids and field machines may include:	• mechanical strapping equipment • gins, sheers, and derricks • block and tackle, pulleys • hand operated winches • jacks • improvised methods such as Spanish windlass and par buckles • use of expedient materials such as materials obtained on the job from resources available in the local environment
Information/documents may include:	• goods identification numbers and codes • manifests, bar codes, goods and container identification • manufacturers instructions concerning the use and servicing of manually-operated load shifting equipment • workplace procedures and policies • supplier and/or client instructions • material safety data sheets • codes of practice including the National Standards for Manual Handling and the Industry Safety Code • relevant legislation, regulations and related documentation • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Applicable regulations and legislation may include:	• emergency procedures • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • workplace relations regulations • workers compensation regulations • licence, patent or copyright arrangements • dangerous goods and air freight regulations • export/import/quarantine/bond requirements • marine orders

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Load and unload goods/cargo	1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures 1.2 Dangerous or hazardous goods are identified and handled in accordance with the Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements 1.3 Load is packed/unpacked to make safe and effective use of available spaces 1.4 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures 1.5 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation 1.6 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load 1.7 Goods requiring special handling and/or documentation are identified and appropriate procedures followed 1.8 Relocated material is restacked appropriate for the transport method, safe height, weight loading, size and crushability of the goods
2 Secure and protect load	2.1 The distribution of the load is checked to ensure that it is even, legal and within safe working capacity 2.2 Load is checked to ensure that dangerous goods and hazardous substances are appropriately segregated in accordance with the ADG Code 2.3 Load is secured using the correct load restraint and protection equipment for different loads, carrying and storage conditions 2.4 The load is protected in accordance with legal and workplace safety requirements

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
3 Complete documentation	3.1 The load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and the ADG Code where applicable 3.2 All required documentation for the goods is completed in accordance with workplace requirements including the ADG Code where applicable

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian standards and regulations including state/territory mass and loading regulations
- National Load Restraint Guide
- Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks when loading and unloading goods/cargo and related precautions to control the risk
- Security awareness requirements when loading and unloading vehicles and in particular the recognition, isolation and reporting of suspicious cargo and goods
- Workplace procedures and policies for the loading and unloading of goods/cargo
- Housekeeping standards procedures required in the workplace
- Methods of securing a load
- Site layout and obstacles
- Problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve them

Required skills:

- Communicate effectively with others when loading and unloading goods and cargo
- Read and interpret instructions, procedures, information, signs and labels relevant to the loading and unloading of goods and cargo
- Identify containers and goods coding, ADG and IMDG markings and, where applicable, emergency information panels and take appropriate action
- Interpret and follow operational instructions and prioritise work

© Commonwealth of Australia, 2025 Skills Insight

Required skills:

- Complete documentation related to the loading and unloading of goods and cargo
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads and take appropriate action
- Work collaboratively with others when loading and unloading goods and cargo
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when loading and unloading goods and cargo in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may occur when loading and unloading goods and cargo
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading and unloading of goods and cargo
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in cargo and equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources	• Performance is demonstrated consistently over a period

RANGE STATEMENT

	• material safety data sheets • EPGs and Initial Response Guide (HB76:1998 or equivalent) • codes of practice including the National Standards for Manual Handling and the Industry Safety Code • award, enterprise bargaining agreement, other industrial arrangements • relevant Australian standards and certification requirements • quality assurance procedures • emergency procedures • Load Restraint Guide

Applicable regulations and legislation may include	• relevant Australian standards and regulations including state/territory mass and loading regulations
	• Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • IATA Dangerous Goods by Air regulations
	  • Australian and International Explosives Codes
	• relevant state/territory environmental protection legislation
	• relevant state/territory OH&S legislation

TLID2013A Move materials mechanically using automated equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select load moving equipment	1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods
	1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures
2 Move goods	2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures
	2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures
3 Check goods and complete documentation	3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken
	3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED KNOWLEDGE AND SKILLS

Required knowledge:

- Regulations relevant to the use of automated equipment to move materials mechanically
- Relevant OH&S and environmental protection procedures and guidelines
- Workplace procedures and policies for the use of automated equipment to move materials mechanically
- Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically
- The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment
- Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems
- Risks when using automated equipment to move materials and related precautions to control the risks
- Documentation and record requirements
- Housekeeping standards procedures required in the workplace
- Site layout and obstacles

Required skills:

- Communicate effectively with others when using automated equipment to move materials mechanically
- Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the use of automated equipment to move materials mechanically
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using automated equipment to move materials mechanically
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unplanned events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule

© Commonwealth of Australia, 2025 Skills Insight

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of automated equipment and take appropriate action where required
- Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment,

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE

	and • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The operations may be conducted:	• in a range of work environments • by day or night • in a range of typical weather conditions
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Mechanised equipment may include a range of goods and materials handling equipment such as:	• automatic guided vehicle • tow motors • high level order picker • conveyor system • mechanised pallet mover
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

Hazards in the work area may include exposure to:	• high visibility clothing • chemicals • dangerous or hazardous substances • movements of equipment, goods and materials • moving and rotating equipment and vehicles
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/documents may include:	• goods identification numbers and codes • manifests, bar codes, goods and container identification • manufacturers instructions concerning the use and servicing of automated mechanical equipment • workplace procedures and policies • supplier and/or client instructions • material safety data sheets • codes of practice including the National Standards for Manual Handling and the Industry Safety Code • relevant legislation, regulations and related documentation • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • workplace relations regulations • workers compensation regulations • ADG Code and regulations

TLILIC0012A Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor	This unit specifies the outcomes required to operate a vehicle loading crane with a capacity of 10 metre tonnes or more, mounted on a vehicle for the principle purpose of loading and unloading such a vehicle, including the application of load estimation and slinging techniques to move a load, for licensing purposes.

Application of the Unit

Application of the Unit	This unit requires the operator to plan the work, conduct routine checks, set up crane, transfer loads and shut down and secure crane. This unit is based on the requirements of the National Standard for Licensing Persons Performing High Risk Work. This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency	*Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan work	1.1 Potential workplace ***hazards*** are identified 1.2 ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment 1.3 The weight of the load is identified and estimated in consultation with ***associated personnel*** (where applicable) 1.4 Suitable lifting points on the load are identified in consultation with ***associated personnel*** 1.5 Appropriate ***lifting equipment*** is obtained following consultation with ***associated personnel*** 1.6 ***Crane*** is ***appropriate*** to the load/s and workplace conditions 1.7 Appropriate paths for the movement of loads in the work area are inspected and determined 1.8 Appropriate ***communication methods*** are identified with ***associated personnel***
2. Conduct routine checks	2.1 ***Crane*** is visually checked for any damage or defects 2.2 All ***signage and labels*** are visible and legible according to the ***appropriate standard***. 2.3 Routine pre-operational crane checks are carried out according to ***procedures***

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	2.4 All ***controls*** are located and identified 2.5 Crane ***service logbook*** is checked for compliance 2.6 ***Crane*** is started according to ***procedures*** and checked for any abnormal noises 2.7 All crane ***safety devices*** are tested according to ***procedures*** 2.8 Post-start operational checks are carried out according to ***procedures*** 2.9 All ***communication equipment*** is checked for serviceability 2.10 All damage and defects are reported and recorded according to ***procedures***, and appropriate action is taken
3. Set up crane	3.1 ***Ground suitability*** is checked 3.2 ***Crane*** is driven to the work area according to ***procedures*** 3.3 ***Crane*** is positioned for work application and ***stability*** according to ***procedures*** 3.4 Boom/jib and configuration data is input into the crane computer (as required) 3.5 Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to ***procedures*** 3.6 All ***communications equipment*** is tested for functionality 3.7 ***Lifting equipment*** is prepared for load according to ***procedures*** 3.8 ***Load destination*** is prepared
4. Transfer loads	4.1 Loads are determined within the capacity of the crane 4.2 Boom/jib and hoist block is positioned over load following directions from ***associated personnel*** 4.3 ***Lifting equipment*** is attached and secured using ***defined techniques*** according to ***procedures*** 4.4 ***Test lift*** is carried out according to ***procedures*** 4.5 Loads are transferred using all ***relevant crane movements*** according to ***procedures*** and the ***appropriate standard*** 4.6 All required ***communication signals*** are correctly interpreted according to ***procedures*** and the ***appropriate standard***

© Commonwealth of Australia, 2025 Skills Insight

ELEMENT	PERFORMANCE CRITERIA
	4.7 The load is landed ensuring stability and security from movement 4.8 ***Lifting equipment*** is removed or disconnected from load and/or lifting hook according to ***procedures*** (where applicable) 4.9 ***Crane*** is operated according to ***procedures*** 4.10 Load movement is monitored constantly ensuring safety to personnel and load, and crane stability 4.11 ***Unplanned and/or unsafe*** situations are responded to in line with ***procedures***
5. Shut down and secure crane	5.1 ***Crane*** boom/jib and equipment are stowed and secured according to ***procedures*** and the ***appropriate standard*** 5.2 Relevant motion locks and brakes are applied (where applicable) 5.3 Outriggers/stabilisers are stowed and secured according to ***procedures*** 5.4 Plates or packing are stowed and secured. 5.5 ***Crane*** is ***shut down*** according to ***procedures*** 5.6 Routine post-operational crane checks are carried out according to ***procedures*** 5.7 ***Lifting equipment*** is stored according to ***procedures*** and the ***appropriate standards*** 5.8 All damage and defects are reported and recorded according to ***procedures***, and appropriate action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level required for this unit.
Required skills:
• Accurately record and maintain information relating to crane operations • Use communication techniques in the workplace including hand signals, whistles and two-way radios • Use interpersonal communication skills at a level sufficient to communicate with

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
other site personnel • Operate crane including all functions to their maximum extension in the loading and unloading of loads to the safe working rated capacity of the crane, in conjunction with other associated personnel • Use of lifting equipment and basic slinging techniques suitable for the loads to be loaded/unloaded as defined by workplace procedures • Apply risk assessment and hazard control strategies, including hierarchy of control as applied to the positioning and safe operation of the vehicle loading crane (particular awareness of the risks associated with overhead powerlines/electrical cables, ground conditions and vehicle tipping) • Use and interpret crane manufacturer's specifications and data, including load charts to enable the vehicle loading crane to be configured for the load • Verify problems and equipment faults and demonstrate appropriate response procedures
Required knowledge:
• Appropriate mathematical procedures for estimation of loads • Assessment of ground conditions to confirm that the site is suitable (e.g. firm, level and safe) to operate the crane • Awareness of the boom/jib movements and particularly the safe positioning of the operator for any lift • Commonwealth, state or territory OH&S legislation, standards and codes of practice relevant to the full range of processes for the crane class • Use of lifting equipment and basic slinging techniques suitable for the loads to be loaded/unloaded as defined by workplace procedures • Understanding of the hierarchy of hazard identification and control • Level of literacy to be able to read and comprehend manufacturer's instructions, procedures and safety signs • Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class • Procedures for the recording, reporting and maintenance of workplace records and information • Typical routine problems encountered in the process and with equipment and adjustments required for correction • Crane characteristics and capabilities to allow the configuration of the crane to suit the range of loads

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.	
Overview of assessment	• Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work. • State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Compliance with OH&S licensing legislation. • Communicate and work safely with others in the work area. • Assessment of ground conditions to confirm that the site is suitable (e.g. firm, level and safe) to operate the vehicle loading crane. • Risk assessment and hazard control strategies, including hierarchy of control as applied to the positioning and safe operation of the vehicle loading crane (particular awareness of the risks associated with overhead powerlines/electrical cables, ground conditions, wind, pedestrians and tipping). • Set up, position stabilise and operate a vehicle loading crane including all functions to their maximum extension in the loading and unloading of loads to the safe working rated capacity. • Move loads from the vehicle to the ground and/or ground to the vehicle as described in the endorsed assessment tool. • Appropriate mathematical procedures for estimation of loads. • Use of lifting equipment and basic slinging techniques suitable for the loads to be loaded/unloaded as defined in the workplace procedures. • Awareness of the boom/jib movements and particularly the safe positioning of the operator for any lift.
Context of and specific resources for assessment	• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument. • Assessment of performance must be undertaken

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	

	either in the workplace or in a realistically simulated workplace setting.
	• Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace.
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.
	• Assessment is to comply with appropriate standard requirements.
	• Applicants must have access to:
	  • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment
	  • appropriate vehicle loading crane (10 metre tonne or more) and associated equipment in safe condition
	  • appropriate lifting gear in safe condition
	  • Suitable loads as specified by the endorsed Assessment Instrument
	  • communication equipment (e.g. two-way radios, whistles, etc.)
	  • other associated personnel to sling and direct the loads.

Method of assessment	• Assessment must be conducted using the endorsed Assessment Instruments. These Instruments provide advice on their application. • The use of '**simulators**' in the assessment of this unit of competency is **not acceptable**. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	• Further information about endorsed Assessment Instruments may be obtained from state/territory OH&S regulators.

© Commonwealth of Australia, 2025 Skills Insight

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.	
Hazards	May include but not limited to: • ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. powerlines, service pipes) • traffic (e.g. pedestrians, vehicles, other plant) • Insufficient lighting • environmental conditions (e.g. wind, lightning, storms, etc.) • positioning of crane operator • other specific hazards (e.g. dangerous materials)
Hazard control measures	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: 1 elimination 2 substitution 3 isolation 4 engineering control measures 5 using safe work practices 6 personal protective equipment
Appropriate standards	May include but not limited to: • codes of practice • legislation • Australian standards especially AS2550.1 - 2002 (6.5) • manufacturer's specifications • industry standards
Associated personnel	May include but not limited to: • doggers

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• riggers
Lifting equipment	May include but not be limited to: • chain slings • wire and synthetic slings • shackles • eyebolts
Crane	A crane with a capacity of 10 metre tonnes and above mounted on a vehicle for the principle purpose of loading and unloading such a vehicle
Appropriate	May include but not limited to: • crane capabilities • environmental conditions (e.g. wind, lightning, storms, etc.)
Communication method	May include but not limited to: • verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Signage and labels	May include but not limited to: • crane data plates/labels • load charts • crane decals • control labels
Procedures	May include but not limited to: • manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Controls	May include but not limited to: • luffing levers • knuckling levers • hoisting and lowering levers

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• slewing levers including brake • boom extension levers (where fitted)
Service logbook	May include but not limited to: • any logbook • service book • history record system where the service and maintenance history is kept
Crane safety devices	May include but not limited to: • horns/sirens • audible and visual warning devices • lights
Communication equipment	May include but not limited to: • fixed frequency two-way radios • whistles
Ground suitability	May include but not limited to: • rough uneven ground • backfilled ground • soft soils • hard compacted soil • rock • bitumen • concrete
Stability	May include but not limited to: • deploying outriggers • establishing correct size plates or packing • correctly positioning plates or packing
Hazard prevention/control measures	May include but not limited to: • safety tags on electrical switches/isolators • insulated powerlines • safety observer used inside exclusion zone • disconnected power • traffic barricades and controls • pedestrian controls • trench covers • movement of obstructions • personal protective equipment

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• adequate illumination
Load destination	May include but not limited to: • ground • vehicles
Defined techniques	May include but not limited to: • fixed lifting points • basic reeved slings
Test lift	The load is lifted just clear of the lifting plane to allow for checks to be safely made in consultation with associated personnel to ensure that: • near capacity loads do not overload the crane • loads of unusual shape or weight distribution are correctly slung • load measuring equipment can be used to verify the calculated weight of the load • all equipment is functioning properly • adjustments to the slinging can be made in a safe manner
Relevant crane movements	May include but not limited to: • luffing • slewing • knuckling • telescoping • raise and lower hoist
Communication signals	May include but not limited to: • stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle • telescope out - hand • telescope out - whistle

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• telescope in - hand • telescope in - whistle
Unplanned and/or unsafe situations	May include but not limited to: • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental conditions (e.g. wind, lightning, storms, etc.)
Shut down	May include but not limited to: • retracting boom/jib (where applicable) • retracting hoist rope and hook block • folding boom/jib into the transport position • retracting outriggers/stabilisers • idling engine to stabilise temperature • turning off engine (where applicable) • removing key from ignition (where applicable) • locking and securing cabin (where applicable) • securing crane for travel

TLILIC2001A Licence to operate a forklift truck

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor	This unit specifies the outcomes required for the operation of a powered industrial truck equipped with a mast and an elevating load carriage to which is attached a pair of fork arms or other attachment, for licensing purposes. This definition also includes a truck on which the operator is raised with the attachment for order-picking.

Application of the Unit

Application of the Unit	THIS UNIT REQUIRES THE OPERATOR TO BE ABLE PLAN THE WORK, CONDUCT ROUTINE CHECKS ON THE FORKLIFT, SHIFT LOADS IN A SAFE MANNER, AND SHUT DOWN AND SECURE THE EQUIPMENT AFTER THE COMPLETION OF OPERATIONS. This unit is based on the National Standard for Licensing Persons Performing High Risk Work. This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

3. Shift load	3.1 The weight of load is assessed to ensure compliance with ***forklift*** truck data plate specifications 3.2 Appropriate ***hazard prevention***/***control measures*** are implemented and communicated with personnel in the work area 3.3 ***Forklift*** is operated at a safe speed and according to ***procedures*** 3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards 3.5 Load movement is monitored constantly ensuring safety to personnel and load, and structural stability 3.6 ***Unplanned and***/***or unsafe situations*** are responded to in line with ***procedures***
4. Shut down and secure forklift truck	4.1 ***Forklift*** truck is parked to avoid hazards 4.2 Forklift is ***shut down*** according to ***procedures*** 4.3 Routine post-operational forklift checks are carried out according to ***procedures*** 4.4 Forklift is secured to prevent unauthorised access/use 4.5 All defects and damage are reported and recorded according to ***procedures***, and appropriate action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level required for this unit.
Required skills:
• Accurately interpret information relating to conducting forklift truck operations (e.g. procedures) • Safely conduct forklift truck operations including all functions to the maximum height and load capacity • Identify hazards associated with the operation of the forklift truck, assess risks and put into place effective hazard prevention/control measures for those hazards identified • Use communication skills at a level sufficient to communicate with other site personnel (e.g. receive and interpret work instructions, safety information, emergency procedures)

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
• Drive forklift with load in forward and reverse, maintaining visibility • Verify problems and equipment faults and demonstrate appropriate response procedures
Required knowledge:
• Methodology of determining the weight of a load • Commonwealth, state or territory OH&S legislation, standards relevant to the safe operation for the forklift trucks • Understanding of forklift characteristics and capabilities (including use of load data plates) • Understanding of the hierarchy of hazard identification and control • Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class • Procedures for the recording, reporting and maintenance of workplace records and information • Forklift truck operations and safe operating techniques • Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.	
Overview of assessment	• Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work. • State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Compliance with OH&S licensing legislation. • Communicate and work safely with others in the work area. • Identify hazards associated with the operation of the forklift truck and put in place effective hazard controls for those hazards identified.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• Conduct pre-start-up, operational, moving loads and shut down and secure checks of the forklift truck according to procedures. • Operate the forklift truck and move loads safely, including driving and manoeuvring, picking up and placing of loads at various stack heights. • Drive forklift truck with load in forward and reverse, maintaining visibility.

Context of and specific resources for assessment	• Assessment of the safe application of knowledge and skills to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument.
	• Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting.
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.
	• Applicants must have access to:
	  • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment
	  • associated equipment appropriate to forklift truck operations
	  • suitable loads as described by the endorsed Assessment Instrument
	  • manufacturers specifications
	  • appropriate forklift truck in a safe condition.

Method of assessment	• Assessment must be conducted using the endorsed Assessment Instrument. These Instruments provide instruction on their application. • The use of '**simulators**' in the assessment of this unit of competency is **not acceptable**. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for	• Further information about endorsed Assessment Instruments may be obtained from state/territory

assessment	OH&S regulators.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.	
Hazards	May include but not limited to: • ground conditions (e.g. condition of pavement, slopes) • overhead hazards (e.g. powerlines, service pipes) • insufficient lighting • traffic (e.g. pedestrians, vehicles, other plant) • weather (e.g. wind, lightning, rain) • forklift instability (e.g. overloading, poor load placement, irregular loads) • other hazards (e.g. dangerous materials)
Hazard control measures	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: 1 elimination 2 substitution 3 isolation 4 engineering control measures 5 using safe work practices 6 personal protective equipment
Appropriate standards	May include but not limited to: • legislation • Australian standards • manufacturer's specifications • industry standards (where applicable)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Forklift truck	May include but not be limited to: • counterbalanced • reach trucks • rough terrain • internal combustion petrol, diesel, gas • electric
Communications methods	May include but not limited to: • verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Procedures	May include but not limited to: • manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Pre-start operational checks	May include but not limited to: • safety devices fitted where appropriate • forklift data plate fitted and interpreted • logbook, handbook or operating manuals available • external visual check including, evidence of damage, leaks, visual evidence of structural weaknesses (including paint separation or stressed welds) is carried out • forklift attachment is checked for security • approved modifications and/or attachments fitted to manufacturer's specifications (e.g. as per forklift or attachment data plate) are identified • checks for adaptations or modifications outside manufacturer's specifications (e.g. not listed on the forklift or attachment data plate) are carried out • maintenance logbook/records checked

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
Post-start operational checks	May include checks of the forklift truck and equipment after start-up to ensure: • hazard warning systems (for example lights and horns), are functional • attachment movements and control functions are smooth and comply with operating requirements • steering, transmission and brake functions comply with operating requirements
Hazard prevention/control measures	May include but not limited to: • barricades and traffic control • safety tags on electrical switches/isolators • insulated powerlines • safety observer used inside exclusion zone • disconnected power • pedestrian control (barricades, signs, etc.) • excavation safeguards • movement of obstructions • personal protective equipment • adequate illumination
Unplanned and/or unsafe situations	May include but not limited: • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental condition
Shut down	May include, but is not limited to: • parking in a suitable location away from dangerous areas • fork arms are correctly positioned (tips down, tilted forward, lowered to ground) • appropriate transmission/gear is selected for parking (relevant to transmission type) • hand/parking brake is applied • engine power is turned off • ignition key is removed (if applicable) • LPG gas cylinder valve is shut off (where fitted) • securing equipment against unauthorised operation • securing the site • ensuring access ways are clear • identifying and segregating defective equipment

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	and reporting to authorised personnel • batteries are connected to the charger (if applicable)

TLILIC3006A Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor	This unit specifies the outcomes required to operate a mobile crane of greater than 3 tonnes capacity that incorporates a boom or jib which includes articulated type mobile cranes and locomotive cranes, but does not include vehicle tow trucks, for licensing purposes.

Application of the Unit

Application of the Unit	This unit requires the operator to plan the work, conduct routine checks, set up crane, transfer loads, mobile loads, and shut down and secure the crane. This unit is based on the requirements of the National Standard for Licensing Persons Performing High Risk Work. This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

	procedures 2.9 Pos-start operational checks are carried out according to ***procedures*** 2.10 All ***communication equipment*** is checked for serviceability 2.11 All damage and defects are reported and recorded according to ***procedures***, and appropriate action is taken
3. Set up crane	3.1 ***Ground suitability*** is checked 3.2 ***Crane*** is driven to the work area according to ***procedures*** 3.3 ***Crane*** is positioned for work application and ***stability*** according to ***procedures*** 3.4 Appropriate ***crane configuration*** for work task is determined according to ***procedures*** (where applicable) 3.5 Boom/jib and counterweight configuration data is input into the crane computer (where applicable) 3.6 Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to ***procedures*** 3.7 All ***communications equipment*** is tested for functionality
4. Transfer load	4.1 Lifts are determined within the capacity of the crane 4.2 Boom/jib and hoist block is positioned over load following directions from ***associated personnel*** 4.3 ***Test lift*** is carried out according to ***procedures*** 4.4 Loads are transferred using all ***relevant crane movements*** according to ***procedures*** and the ***appropriate standard*** 4.5 All required ***communication signals*** are correctly interpreted according to ***procedures*** and the ***appropriate standard*** 4.6 ***Crane*** is operated according to ***procedures*** 4.7 Load movement is monitored constantly ensuring safety to personnel and load, and crane stability 4.8 ***Unplanned and***/***or unsafe*** situations are responded to in line with ***procedures***
5. Mobile load	5.1 Suitability of ***planned route*** is checked for the crane according to ***procedures*** 5.2 ***Crane*** is configured to mobile load according to procedures

© Commonwealth of Australia, 2025 Skills Insight

	5.3 Load is moved using ***best mobile practice*** according to the appropriate standard
6 Shut down and secure crane	6.1 ***Crane*** boom/jib and equipment is stowed and secured, where appropriate, according to ***procedures*** and the ***appropriate standard*** 6.2 Relevant motion locks and brakes are applied (where applicable) 6.3 Outriggers/stabilisers are stowed and secured according to ***procedures*** (where applicable) 6.4 Crane is ***shut down*** according to procedures 6.5 Routine post-operational crane checks are carried out according to ***procedures*** 6.6 Plates or packing are stowed and secured (where applicable) 6.7 All damage and defects are recorded and reported according to ***procedures***, and appropriate action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills:
• Accurately record and maintain information relating to crane operations • Use communication techniques in the workplace including whistles, hand signals and use of two-way radios • Use communication skills at a level sufficient to communicate with other site personnel • Assessment of ground conditions to confirm that the site is suitable (e.g. firm, level and safe) to operate crane • Operate crane including all functions to their maximum extension in the lifting and moving of loads to the safe working rated capacity in conjunction with other associated personnel • Mobile loads using best mobile practice • Apply risk assessment and hazard control strategies, including hierarchy of control as applied to the positioning and safe operation of the crane (particular awareness of the risks associated with overhead powerlines/electrical cables, ground conditions, crane tipping and demolition sites) • Use and interpret crane manufacturer's specifications and data, including load charts

© Commonwealth of Australia, 2025 Skills Insight

REQUIRED SKILLS AND KNOWLEDGE
to enable the crane to be configured for the load • Verify problems and equipment faults and demonstrate appropriate response procedures
Required knowledge:
• Appropriate mathematical procedures for estimation and measurement of loads • Commonwealth, state or territory OH&S legislation, standards and codes of practice relevant to the full range of processes for the crane class • Ability to read and comprehend manufacturer's instructions, procedures and safety signs • Understanding of crane characteristics and capabilities (including use of load charts) to allow the configuration of the crane to suit the range of loads • Understanding of the hierarchy of hazard identification and control • Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class • Procedures for the recording, reporting and maintenance of workplace records and information • Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.	
Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work. State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	• Compliance with OH&S licensing legislation. • Communicate and work safely with others in the work area. • Risk assessment and management procedures (particular awareness of the risks associated with

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	overhead powerlines/electrical cables, ground conditions, crane tipping, other vehicles and personnel). • Operation of a non-slewing mobile crane including all functions to their maximum extension in the lifting and moving of loads to the safe working rated capacity of non-slewing mobile cranes (over 3t capacity) in conjunction with other associated personnel. • Appropriate mathematical procedures for estimation of loads.

Context of and specific resources for assessment	• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument.
	• Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting.
	• Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace.
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints.
	• Assessment is to comply with relevant appropriate standard requirements.
	• Applicants must have access to:
	  • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment
	  • appropriate non-slewing crane (greater than 3 tonnes) and associated equipment in safe condition
	  • suitable loads as specified by endorsed assessment instrument
	  • communication equipment (e.g. two-way radios, whistles, etc.)
	  • other associated personnel to sling and direct the loads.

Method of assessment	• Assessment must be conducted using the endorsed Assessment Instruments. These Instruments provide advice on their application.

© Commonwealth of Australia, 2025 Skills Insight

EVIDENCE GUIDE	
	• The use of '**simulators**' in the assessment of this unit of competency is **not acceptable**. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstances, but is able to be transferred to other circumstances.
Guidance information for assessment	• Further information about endorsed Assessment Instruments may be obtained from state/territory OH&S regulators.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.	
Hazards	May include but not limited to: • ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. powerlines, service pipes) • insufficient lighting • traffic (e.g. pedestrians, vehicles, other plant) • environmental conditions (e.g. wind, lightning, storms, etc.) • other specific hazards (e.g. dangerous materials)
Hazard control measures	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: 1 elimination

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	2 substitution 3 isolation 4 engineering control measures 5 using safe work practices 6 personal protective equipment
Appropriate standards	May include but not limited to: • codes of practice • legislation • Australian standards • manufacturer's specifications • industry standards (where applicable)
Associated personnel	May include but not limited to: • doggers • riggers
Appropriate	May include but not limited to: • crane capabilities • environmental conditions (e.g. wind, lightning, storms, etc.)
Crane	May include: • a crane (greater than 3 tonnes capacity) which meets the requirements of AS1418 • articulated type mobile cranes • locomotive cranes Does not include vehicle tow truck operations
Communication method	May include but not limited to: • verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Signage and labels	May include but not limited to: • crane data plates/labels • load charts • crane decals

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• control labels
Procedures	May include but not limited to: • manufacturer's guidelines (instructions, specifications, operators manual or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Controls	May include but not limited to: • luffing levers • hoisting and lowering levers • slewing levers including brake • boom extension levers (where fitted)
Service logbook	May include but not limited to: • any logbook • service book • history record system where the service and maintenance history is kept
Crane safety devices	May include but not limited to: • horns/sirens • audible and visual reversing devices • operator restraint devices • lights
Communication equipment	May include but not limited to: • fixed channel two-way radios • whistles • bells • buzzers NB: where radio communication equipment is used the transmitting frequencies of the equipment must be selected to prevent interference to or from other radio equipment being used in the vicinity of the crane
Ground suitability	May include but not limited to: • rough uneven ground • backfilled ground • soft soils • hard compacted soil

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• rock • bitumen • concrete
Stability	May include but not limited to: • deploying outriggers • establishing correct size plates or packing • correctly positioning plates or packing
Crane configuration	May include but not be limited to: • boom/jib • fly-jib • counterweights
Hazard prevention/control measures	May include but not limited to: • safety tags on electrical switches/isolators • insulated powerlines • safety observer used inside exclusion zone • disconnected power • traffic barricades and control/s • pedestrian controls • trench covers • movement of obstructions • personal protective equipment • adequate illumination
Test lift	The load is lifted just clear of the lifting plane to allow for checks to be safely made in consultation with associated personnel to ensure that: • near capacity loads do not overload the crane • loads of unusual shape or weight distribution are correctly slung • load measuring equipment can be used to verify the calculated weight of the load • all crane equipment is functioning properly • adjustments to the slinging can be made in a safe manner
Relevant crane movements	May include but not limited to: • telescope in and out • boom/jib up and down • articulating (as applicable)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• raise and lower hoist (as applicable)
Communication signals	May include but not limited to: • stop - hand • stop - whistle • hoist up - hand • hoist up - whistle • hoist down - hand • hoist down - whistle • luff boom down - hand • luff boom down - whistle • luff boom up - hand • luff boom up - whistle • telescope out - hand • telescope out - whistle • telescope in - hand • telescope in - whistle • slew/articulate right - hand • slew/articulate right - whistle • slew/articulate left - hand • slew/articulate left - whistle
Unplanned and/or unsafe situations	May include but not limited to: • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental conditions (e.g. wind, lightning, storms, etc.)
Planned route	May include but not limited to: • unusual or difficult terrains • obstacles or obstruction
Best mobile practice	May include but not limited to: • minimum speed • gentle acceleration and braking (to minimise load swing) • minimum boom/jib length • carrying the load near to the ground surface • use of handheld taglines
Shut down	May include but not limited to: • retracting boom/jib/fly (where applicable)

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT	
	• retracting hoist rope and hook block • idling engine to stabilise temperature • retracting outriggers/stabilisers (where applicable) • turning off engine

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to source goods/materials/services and evaluate contractors including analysing supply requirements, and evaluating and selecting appropriate potential contractor(s). Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures. This includes the application of established workplace procedures to source goods and to evaluate potential contractors.

A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations' goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant regulatory and code requirements
- Relevant OH&S responsibilities and procedures
- Workplace policies, procedures and protocols for the sourcing and supply of goods/services, and the evaluation of potential supply contractors
- Workplace grievance and disputation handling policies and procedures
- Workplace business policies and plans as they relate to supply contracts, including procedures for maintenance of confidentiality
- Focus of operation of recording, reporting and statistical analysis systems and resources
- Resource availability including the processing capacity of equipment and software systems for statistical analysis of data
- Typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

Required skills:

- Communicate and negotiate effectively with others when sourcing goods and services and evaluating contractors
- Read and interpret instructions, procedures and information and signs relevant to the sourcing of goods and services and the evaluation of contractors
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the sourcing of goods and services and the evaluation of contractors
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when sourcing goods and services and evaluating contractors
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when sourcing goods and services and evaluating contractors in accordance with regulatory requirements and workplace procedures
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and appropriately apply technology, information systems and procedures to workplace

tasks

- Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation,

and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	• single and multi-site location • large, medium or small companies
Services, products, risks, work systems and requirements may:	• potentially vary across different sections of the workplace
Operations require:	• customer and supplier contact and coordination
Contractors may be:	• for one-off or repeat supplies/contract services
Document/data interchange may be:	• electronic • paper-based
Selection processes include:	• procedures for maintenance of confidentiality and integrity
Personnel in work area may include	• other employees and supervisors • customers and suppliers • external authorities and agencies • management and union representatives • industrial relations, occupational health and safety specialists • other professional or technical staff, contractors and maintenance personnel
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/documentation may include:	• quality and work specifications and procedures • specifications for required products or services • manufacturers specifications and/or suppliers handling and storage advice

© Commonwealth of Australia, 2025 Skills Insight

RANGE STATEMENT

	• workplace procedures, policies and instructions • OH&S regulations and procedures • supplier and/or client instructions • materials safety data sheets • relevant agreements, codes of practice including the national standards for manual handling and the industry safety code • legislation, regulations and related documentation, including regulations related to hazardous substances, dangerous goods and environment protection • reports of accidents and incidents within regulatory requirements and enterprise procedures • workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information • quality assurance procedures
Applicable regulations and legislation may include:	• relevant regulations, standards and codes of practice • relevant Australian and state/territory OH&S legislation • equal employment legislation and related policies • environmental protection regulations • hazardous substances and dangerous goods codes • relevant Australian standards and certification requirements • licence, patent or copyright arrangements

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to contract transport and distribution services in accordance with relevant regulatory requirements and workplace procedures. This includes negotiating the contract with a contractor, finalising the contract negotiations, and completing all enterprise contract requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be must be carried out in compliance with the relevant regulations, standards, legal requirements and codes of practice.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplace's goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

ELEMENT	PERFORMANCE CRITERIA
contract requirements	orders and financial transactions 3.2 Workplace systems that require interaction with contractors are identified and actioned 3.3 Quality assurance procedures for supplied goods/services are initiated 3.4 Contract and ancillary documentation is completed and stored in accordance with workplace procedures and, where applicable, regulatory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Regulations, codes of practice and legal requirements relevant to contractual arrangements
- Relevant OH&S and environmental protection procedures and regulations
- Workplace procedures for the negotiation of a contract
- Problems that may occur during the negotiation of a contract and action that can be taken to report or resolve the problems
- Risks that may exist when negotiating a contract and ways of controlling the risks involved
- Focus of operation supply arrangements, resources, management and workplace operating systems
- Applicable aspects of contract law
- Processes for contract formulation and negotiation
- Workplace business policies and plans including procedures for maintenance of confidentiality
- Equipment applications, capacities, and configurations
- Resource availability including the competencies of individuals in the team/group
- Relevant contract documentation requirements

Required skills:

- Communicate effectively with others when negotiating a contract
- Read and interpret instructions, procedures, information and regulatory requirements relevant to the negotiation of a contract
- Prioritise work and coordinate self and others in relation to workplace activities

© Commonwealth of Australia, 2025 Skills Insight

Required skills:

- Complete documentation related to the negotiation of a contract
- Operate electronic communication equipment to required protocol
- Provide leadership and work collaboratively with others when negotiating a contract
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may arise when negotiating a contract in accordance with regulatory requirements and workplace procedures
- Apply precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- Plan and organise work activities
- Monitor work activities in terms of planned schedule
- Modify activities to cater for variations in workplace contexts and environment
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Select and apply appropriate technology and information systems
- Adapt to differences in equipment in accordance with standard operating procedures
