**Assessment Requirements for TLIB0117
Assist with preparation of a train prior to
operation**

Release: 1

Assessment Requirements for TLIB0117 Assist with preparation of a train prior to operation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- carrying out all pre-departure checks in accordance with workplace procedures
- communicating effectively with others when preparing a train for operation
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying typical faults and defects for the type of rolling stock being operated
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and rectifying within limits of own role identified problems, faults and malfunctions, in accordance with workplace procedures
- testing braking systems in accordance with workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements and relevant codes of practice and/or guidelines
- contingency management processes
- emergency procedures
- pre-departure train testing procedures
- procedures for preparing a train for operation
- relevant methods to overcome identified faults and defects
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- safeworking systems and requirements
- train characteristics and specifications
- train coupling equipment and methods
- train preparation documentation procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
