

TLIB2125 Apply awareness of tram or light rail track fundamentals

Release: 2

TLIB2125 Apply awareness of tram or light rail track fundamentals

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

• Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply an awareness of tram or light rail fundamentals.

It includes identifying tram or light rail track terminology, track and system components, and the tools and equipment used on or around tram or light rail track.

People achieving competence in this unit will need to fulfil the applicable state/territory legislated rail safety requirements and to comply with relevant codes of practice and/or guidelines.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

Approved Page 2 of 4

outcomes.

demonstrate achievement of the element.

Identify tram or light rail 1.1 Terminology related to tram or light rail track and structures infrastructure is identified track and structures terminology and components 1.2 Main components of tram or light rail track and structures are identified Identify tram or light rail 2.1 Track components and their purpose are identified and track components explained 2.2 Tram crossing types and components are identified and their purpose is explained 2.3 Manual, electrical and spring-operated points are identified and their use is explained 3 Identify tram or light rail 3.1 Overhead trolley system components, voltages and electrical system features exclusion zones are identified and explained 3.2 Below ground electrical system is identified and explained 3.3 Reporting procedures and protocols for identified electrical system faults and defects are explained 4 Identify tram or light rail 4.1 Tools and equipment for tram or light rail track tools and equipment installation and maintenance are identified 4.2 Track machines for tram or light rail track installation and maintenance are identified 5 Identify tram or light rail 5.1 Possible faults for tram or light rail track and system are track and system faults identified or problems

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

and system faults are explained

Reporting procedures and protocols for identified track

5.2

Approved Page 3 of 4

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIB2125A Apply awareness of tram or light rail track fundamentals.
