Assessment Requirements for TLIC2074 Couple and uncouple track maintenance vehicles

Release: 1

Assessment Requirements for TLIC2074 Couple and uncouple track maintenance vehicles

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant safeworking and workplace procedures
- communicating effectively with others
- coupling and uncoupling track maintenance vehicles
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- securing vehicles in accordance with manufacturer specifications, before coupling and after uncoupling has been completed
- using correct communications methods
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communications protocols
- operating requirements for coupling and uncoupling track maintenance vehicles
- principles of operation of protective devices, air and electrical couplings, handbrakes, derailleurs and coupling equipment
- relevant manufacturer specifications for coupling and uncoupling of track maintenance vehicles

- relevant rail danger zones
- relevant state/territory legislated work health and safety (WHS)/occupational health and safety (OHS) and rail safety requirements, codes of practice, guidelines and manufacturer specifications.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace procedures, regulations, rules and codes of practice.
