Assessment Requirements for TLIC3031 Stable a heritage steam locomotive

Release: 2

Assessment Requirements for TLIC3031 Stable a heritage steam locomotive

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Performance Evidence
- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in heritage steam locomotives and associated equipment and procedures
- checking and replenishing fluids and fuel and carrying out lubrication requirements on a heritage steam locomotive
- communicating effectively with others
- completing relevant documentation
- conducting post-operational inspection of a heritage steam locomotive
- determining heritage steam locomotive stabling location
- identifying job hazards and taking required actions to minimise, control or eliminate identified hazards
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, procedures and information
- recognising problems that may arise when stabling a heritage steam locomotive and taking appropriate actions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines
- heritage steam locomotive controls, instruments and indicators and their purpose, location

and use

- monitoring devices, braking and power equipment, auxiliary systems and signalling systems
- operating controls to start, accelerate, decelerate and stop a heritage steam locomotive
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- speed and load limits
- typical defects that can occur on a heritage steam locomotive and related actions that should be taken
- workplace procedures for:
 - braking and safety system procedures
 - completing relevant documentation
 - emergency response procedures
 - identifying equipment defects, assessing and reporting for appropriate actions
 - managing hazardous situations
 - minor maintenance, cleaning, lubricating and servicing heritage steam locomotives
 - operating and shutting down ancillary systems
 - operating and stabling a heritage steam locomotive.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
