# **Assessment Requirements for TLIC4069 Operate heavy recovery vehicle**

**Release: 1**

# Assessment Requirements for TLIC4069 Operate heavy recovery vehicle

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- checking recovery equipment visually, and stowing appropriately
- conducting a pre-trip check of a heavy recovery vehicle
- positioning vehicle correctly at an incident
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating traffic hazards and taking appropriate action
- recognising and producing appropriate licences and permits used in the recovery industry
- recognising and producing appropriate manufacturer handbooks
- selecting and using required personal protective equipment, conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- servicing heavy recovery vehicle equipment in terms of maintenance schedule and operating procedures
- using communications equipment in a recovery situation
- using eco-driving techniques when operating a heavy recovery vehicle.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques and eco-driving considerations
- factors that may cause traffic delays and diversions, and related action that can be taken
- fatigue management regulations
- guidelines for incidents and hazards
- manufacturer manuals

- mass and dimension legislation and effects on recovery operations
- procedures for using communications systems effectively
- regulatory requirements for heavy recovery
- relevant state/territory roads and traffic authority road rules, regulations, permit and licence requirements
- relevant WHS/OHS and environmental procedures and regulations relating to operating heavy recovery vehicle
- trip planning requirements
- vehicle pre-trip checks and preparation
- workplace documentation
- workplace driving and operational instructions.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment is to be carried out in a heavy recovery vehicle in a workplace environment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

Simulation is not suitable for final assessment of this unit
