Assessment Requirements for TLID2047

Prepare cargo for transfer with slings

Release: 2

Assessment Requirements for TLID2047 Prepare cargo for transfer with slings

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Knowledge Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying relevant high risk work legislation and workplace procedures
- calculating safe working load (SWL) and working load limit (WLL)
- communicating and working effectively with others
- completing relevant documentation
- implementing contingency plans
- inspecting equipment prior to use
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant gear and equipment when preparing cargo for transfer with slings
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using balance points and estimating weights in setting up loads to be shifted
- working systematically with required attention to detail without injury to self or others, or

damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- cargo potential for toxicity, reactivity, material grade, type and purpose, including information from relevant safety data sheets (SDS)/material safety data sheets (MSDS) and current dangerous goods systems documentation requirements
- documentation and record requirements
- gear and equipment used when transferring cargo with slings, and precautions and procedures that should be followed in their use
- housekeeping standards and procedures
- manufacturer instructions
- operational work systems, equipment, management and site operating procedures for transferring cargo with slings
- problems that may occur when preparing cargo for transfer with slings and appropriate actions that can be taken to resolve these problems
- relevant regulations for transferring cargo with slings, including current dangerous goods regulations and bond, quarantine and other high-risk work legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- requirements for SWL and WLL
- site layout and obstacles
- slings, dogging and rigging licence to perform high-risk work requirements
- workplace procedures and policies for transferring cargo with slings.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry.
- applicable documentation, including legislation, regulations, codes of practice, workplace

procedures and operation manuals.
