Assessment Requirements for TLID3046 Operate container side lifter

Release: 1

Assessment Requirements for TLID3046 Operate container side lifter

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- conducting a pre-operational check including:
 - checking and replenishing fluids and carrying out lubrication processes during work activities
 - visually checking vehicle and ancillary equipment
 - checking operation of vehicle lights and indicators
 - checking all levers and operational gauges on ancillary equipment
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of vehicle, its trailers and its equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- relocating a container from one vehicle to another with container at $\geq 60\%$ capacity
- relocating a container using a side lifter from ground to vehicle with container at $\geq 60\%$ capacity
- relocating a container using a side lifter from vehicle to ground with container at $\geq 60\%$ capacity
- servicing vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe driving strategies
- pre-operational checks carried out on side lifter and ancillary equipment
- relevant national heavy vehicle legislation and regulatory requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- relevant personal protective equipment for side lifter operations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- side lifter vehicle handling procedures
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment of the task to operate a container side lifter must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national Load Restraint Guide codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

A simulator is not suitable for final assessment of this unit of competency.
