Assessment Requirements for TLIE2031 Use communication systems for on-track vehicle operations

Assessment Requirements for TLIE2031 Use communication systems for on-track vehicle operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- communicating effectively with others using available communications systems
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying and using required communications equipment and technology
- monitoring performance of communications equipment and taking appropriate action as required
- operating and adapting to differences in communications equipment in accordance with operating procedures
- reading and interpreting relevant instructions and procedures
- reporting and/or rectifying identified problems, faults or malfunctions, in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic principles of effective communication
- communications protocols
- communications security
- hazards that may exist when using communications systems for on-track vehicle operation and ways of controlling the risks involved
- organisational procedures for using communications systems for on-track vehicle operation
- problems that may occur when using communications systems for on-track vehicle operation and action that can be taken to report or resolve these problems
- relevant rail safety, work health and safety (WHS)/occupational health and safety (OHS)

and environmental procedures and regulations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail corridor workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation and terminology as defined by the relevant Rail Infrastructure Manager safeworking system including workplace communications procedures, regulations, rules, codes of practice and operation manuals.
