Assessment Requirements for TLIF4086 Control and coordinate incident responses

Assessment Requirements for TLIF4086 Control and coordinate incident responses

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Performance Evidence
- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation, regulations, codes of practice, workplace procedures and guidelines concerning incident response
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) legislation, regulations, codes of practice, workplace procedures and guidelines
- collaborating with others
- communicating clearly and effectively with others
- identifying involvement of the following in an incident:
    - containers and goods coding
    - emergency information panels
- implementing contingency plans
- interpreting and following operational procedures and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reporting and rectifying faults and malfunctions promptly in accordance with rail safety worker duty of care responsibilities, regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency management plan
- layout of area under control, and potential obstacles for responding parties

- means to control an incident and to provide practical assistance where required
- procedures for contacting emergency services personnel and other relevant stakeholders
- relevant legislation, regulations, codes of practice, workplace procedures and guidelines concerning incident response
- risks, hazards and related precautions to control risk
- types of incidents that can occur and appropriate action to be taken in each case.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including emergency management plan, workplace procedures, regulations, codes of practice and operation manuals.
