Assessment Requirements for TLIF4095 Apply work health and safety requirements for driving operations

Assessment Requirements for TLIF4095 Apply work health and safety requirements for driving operations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying emergency evacuation procedures
- applying work health and safety (WHS)/occupational health and safety (OHS) requirements
- completing documentation related to WHS/OHS in the workplace including:
    - transport regulations as they apply to the enterprise, including local authority regulations and procedures
    - workplace policies and procedures relating to chain of responsibility regulations
    - relevant Australian Standards and certification requirements
- identifying hazards and other WHS/OHS issues
- implementing contingency plans
- interpreting and following safe work procedures including:
    - job safety analysis (JSA) or safe work method statements (SWMS)
    - operating procedures or workplace policies and procedures
    - safety data sheets (SDS)/material safety data sheets (MSDS)
- maintaining environmental requirements on site
- recognising safety signs and symbols
- using emergency equipment including:
    - emergency shutdown controls
    - evacuation controls
    - eye wash equipment and safety showers
    - fire extinguishers
    - spill control equipment
- using personal protective equipment (PPE) and safety measures including:
    - chemical resistant gloves
    - high visibility clothing and safety vest

- intrinsically safe, full cover protective clothing
- safety glasses
- safety headwear and footwear
- two-way radio
- using signs and signals for WHS/OHS warnings
- using terms in a SDS/MSDS
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable legislative procedures and codes including:
  - Australian Road Rules
  - current Australian Dangerous Goods (ADG) Code
  - environmental protection legislation and regulations
  - fatigue management regulations
  - national heavy vehicle regulations
  - relevant state/territory road and traffic authority driving regulations and licence or permit requirements for operating heavy vehicles on unsealed roads
  - WHS/OHS legislation
- containers and goods coding including:
  - ADG Code markings
  - International Maritime Dangerous Goods (IMDG) Code markings
  - relevant horticultural product markings
- handling broken or damaged equipment safely
- hazardous materials implications
- HAZCHEM symbols and implications for safe work and storage
- location and procedures for safety alarms, manifests, emergency shut-off systems and emergency communication systems
- procedures for storage and use of hazardous substances
- relevant duty of care requirements
- relevant internal data entry books, including logbooks, data sheets and load sheets
- reporting procedures for:
  - safety incidents
  - unsafe situations, fire hazards, broken or damaged equipment or fittings, sickness and accidents
- relevant workplace WHS/OHS procedures and guidelines
- safe work practices
- transport emergency response plan (TERP).

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools equipment, and PPE currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
