TLIL5067 Develop a passenger transport plan

Release: 1

TLIL5067 Develop a passenger transport plan

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify passenger transport needs and to develop an appropriate passenger transport plan.

It includes analysing passenger transport needs, determining requirements for passenger transport services and developing passenger transport plans.

This unit has particular application in the passenger transport industry, where passenger transport providers develop a passenger transport plan.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Analyse passenger transport needs	1.1 Customer and stakeholder requirements are analysed
	1.2 Passenger transport needs are identified based on analysis of client and stakeholder requirements
	1.3 Analysis is used as the basis to develop passenger transport plans

2 Determine requirements for passenger transport services	2.1	Passenger transport issues, risks and contingencies are identified
	2.2	Compliance requirements are identified
	2.3	Required passenger transport resources including human resources requirements are identified
3 Develop passenger transport plans	3.1	Available passenger transport resource requirements are identified
	3.2	Schedules are developed for passenger transport plans
	3.3	Passenger transport resources are allocated
	3.4	Human resources requirements are integrated into passenger transport plans
	3.5	Contingency and critical incident processes are integrated into passenger transport plans
	3.6	Critical tasks, responsibilities and timelines are identified
	3.7	Costing for passenger transport plans is identified
	3.8	Continuous improvement processes for passenger transport plans are identified
	3.9	Passenger transport plans are documented in accordance with industry and workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL5067A Develop a passenger transport plan.
