## **Use chemical repair products**

**Release: 1**

# Assessment Requirements for TLIS2036 Use chemical repair products

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- checking compliance with work and job specifications
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- inspecting repair site and determining scope of work
- interpreting and following operational instructions and prioritising work when using chemical repair products
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures, information and labels
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and using relevant equipment and tools
- selecting and using the correct repair method in accordance with safety data sheets (SDSs)/material safety data sheets (MSDSs) and manufacturer instructions
- working systematically with required attention to detail without injury to self or others, or damage to equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of relevant plant and equipment, structures and chemical products used in work activities
- hazards that may exist when using chemical repair products and ways of controlling the risks involved
- information in relevant workplace technical manuals and instructions
- problems that may occur when using chemical repair products and action that can be taken to report or resolve these problems
- relevant recording and documentation procedures
- relevant rail danger zones
- relevant safety, work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- safety data sheets (SDSs)/material safety data sheets (MSDSs) and manufacturer instructions
- workplace procedures for using chemical repair products.
- 

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, SDSs/MSDSs, codes of practice and operation manuals.
