Assessment Requirements for TLIW5001 Apply rail communications systems

Release: 1

Assessment Requirements for TLIW5001 Apply rail communications systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and using rail industry standards and safety management systems (SMSs)
- applying relevant safeworking and workplace procedures
- communicating effectively with others and interpreting complex information related to rail operations
- ensuring safeworking systems are incorporated into communications systems
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- preparing to apply rail communications systems
- recording and logging communications
- researching relevant information
- reviewing regulatory information changes.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency management plan
- key concepts and definitions relating to rail communications systems
- key principles and practices associated with railway operations
- key rail industry regulatory requirements and standards
- rail industry terminology, including terminology used in rail industry standards and codes of practice
- rail regulatory framework
- rail SMSs
- relevance of national and international standards to the rail industry.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in rail workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate rail workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, rail industry standards, codes of practice and operation manuals.
