# Assessment Requirements for TLIX5038 Organise the deployment and delivery of logistics support

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing and validating numerical information accurately
- analysing task complexities such as limitations, freedoms, vulnerabilities, time limitations
- applying a broad range of problem-solving strategies
- communicating effectively verbally
- drafting and releasing complex forms of written communication
- interpreting instructions and applying this information to actions and tasks
- interpreting policies and procedures
- making informed decisions that align with organisational requirements
- managing own planning tasks in accordance with organisational requirements
- moving forward despite task difficulty
- negotiating effectively
- undertaking analysis to determine where internal and external factors impact on logistics support requirements
- using appropriate information technology and software.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- environmental considerations for planning logistics support
- logistics analysis principles and processes
- logistics concepts
- organisation, its function and logistic capabilities
- organisational policy and procedure relevant to logistics

- organisational role relevant to specialist logistic support
- organisational writing conventions
- planning process
- regulatory standards and requirements for logistics
- risks to logistics support
- siting considerations.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
