Australian Government

UEG11 Gas Industry Training Package

Release: 2.0

CONTENTS

UEG11 Gas Industry Training Package 10
Preliminary Information 21
Overview 23
The Gas Industry Training Package 28
Outline of this Training Package 41
1.0.00 Qualification Framework 44
1.1.00 The Australian Qualifications Framework 44
1.1.01 Gas Industry Qualification Framework 50
1.1.02 Qualification Pathways 52
1.1.03 Qualification Employability Skills Statements 55
1.1.04 Qualification Scope, Work Function and Environment 76
1.1.05 Qualifications and Packaging Rules 79
1.1.06 Skill Sets 81
1.2 Competency Standards 82
1.2.00 Introduction 82
1.2.01 Development of Competency Standards for the Gas Industry 82
1.2.02 Industry Coverage 83
1.2.03 Unit Construction 85
1.2.04 Assessment Guidelines 86
1.2.05 National Qualifications 86
1.2.06 Regulatory Arrangements - Gas Industry 86
1.2.07 Maintenance of Competency Standards 89
1.2.08 What is Competency? 89
1.2.09 Index of Competency Standard Units 95
1.2.10 Diagrams Showing Unit Relationships 139
1.3.00 Assessment Guidelines 181
1.3.01 Introduction 181
1.3.02 Assessment System Overview 181
1.3.03 Learning and Assessment pathways 192
1.3.04 Assessment Principles within the Gas Industry 197
1.3.05 Assessment Processes within the Gas Industry 203
1.3.06 Assessor Requirements 204
1.3.07 Assessment Tools 209
1.3.08 Guidelines for Designing Assessment Materials 213
1.3.09 Sample assessment instruments to support training and assessment material design 217
1.3.10 Guide to Assessment Methods and Items 218
1.3.11 Guidelines for Conducting Assessments 223
1.3.12 Maintenance of Assessment Guidelines 227
1.3.13 General Resources 227
1.3.14 Further Sources of Information 231
1.3.15 Appendix A - New Apprenticeships Application 233
1.3.16 Appendix B - Sample Assessment Instruments to Support Training and Assessment Material Design 237
1.3.17 Appendix B - Enclosure A: List of Sample Assessment instruments 249
1.3.18 Appendix B - Enclosure B: Administrative Forms 286
1.3.19 Appendix B - Enclosure C: Glossary of Terms 291
2.1 Preliminary Information & Glossaries 300
2.1 Competency Standard Units 376

© Commonwealth of Australia, 2025 Powering Skills Organisation

2.3.1 Language, Literacy and Numeracy 377
UEG20114 Certificate II in Gas Supply Industry Operations....388
UEG30114 Certificate III in Gas Supply Industry Operations 395
UEG40114 Certificate IV in Gas Supply Industry Operations....409
UEG50114 Diploma of Gas Supply Industry Operations....424
UEG60114 Advanced Diploma of Gas Supply Industry Operations 434
UEGSS00001 Basic gas supply industry work activities 445
UEGSS00002 Construct and lay steel gas distribution mains....447
UEGSS00003 Construct and lay nylon or PVC gas distribution mains....449
UEGSS00004 Construct and lay Polyethylene gas distribution mains 451
UEGSS00005 Construct, lay and connect a gas distribution service to steel mains....453
UEGSS00006 Construct, lay and connect gas distribution service to plastic mains....455
BSBCUS401B Coordinate implementation of customer service strategies 457
BSBCUS501C Manage quality customer service....464
BSBFLM303C Contribute to effective workplace relationships 470
BSBFLM305C Support operational plan 477
BSBFLM306C Provide workplace information and resourcing plans 485
BSBFLM309C Support continuous improvement systems and processes....493
BSBFLM311C Support a workplace learning environment....501
BSBFLM312C Contribute to team effectiveness....509
BSBINM401A IMPLEMENT WORKPLACE INFORMATION SYSTEM 516
BSBINM501A Manage an information or knowledge management system 522
BSBINM601A Manage knowledge and information 529
BSBINN301A Promote innovation in a team environment....536
BSBINN502A Build and sustain an innovative work environment....544
BSBINN601B Manage organisational change....552
BSBLED401A Develop teams and individuals....559
BSBLED501A Develop a workplace learning environment....566
BSBMGT402A Implement operational plan....573
BSBMGT403A Implement continuous improvement....580
BSBMGT502B Manage people performance 586
BSBMGT515A Manage operational plan....593
BSBMGT516C Facilitate continuous improvement 600
BSBWHS301A Maintain workplace safety....607
BSBWHS303A Participate in WHS hazard identification, risk assessment and risk control615
BSBWHS501A Ensure a safe workplace 623
BSBWHS601A Apply legislative frameworks for WHS....629
BSBWHS602A Facilitate WHS activities....636
BSBWHS603A Implement WHS risk management 643
BSBWOR301B Organise personal work priorities and development....652
BSBWOR401A Establish effective workplace relationships....659
BSBWOR402A Promote team effectiveness....667
BSBWOR404B Develop work priorities....674
BSBWOR501B Manage personal work priorities and professional development....681
BSBWOR502B Ensure team effectiveness....687
CPCCLDG3001A Licence to perform dogging....694
CPCCLRG3001A Licence to perform rigging basic level....704
CPCCLRG3002A Licence to perform rigging intermediate level....717
CPCCOHS1001A Work safely in the construction industry 729
CPCPCM4012A Estimate and cost work 740
CPPFES2005A Demonstrate first attack firefighting equipment....748
HLTAID001 Provide cardiopulmonary resuscitation 754
Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation....757

© Commonwealth of Australia, 2025 Powering Skills Organisation

HLTAID003 Provide first aid 760
Assessment Requirements for HLTAID003 Provide first aid 763
HLTAID005 Provide first aid in remote situations 767
Assessment Requirements for HLTAID005 Provide first aid in remote situations 770
HLTHSE204D Follow safe manual handling practices 775
MEM05004C Perform routine oxy acetylene welding 782
MEM05012C Perform routine manual metal arc welding 788
MEM05015D Weld using manual metal arc welding process 793
MEM05045B Perform pipe welds to code standards using manual metal arc welding process 801
MSAPMOHS110A Follow emergency response procedures 807
MSAPMOHS205A Control minor incidents 813
MSAPMOHS216A Operate breathing apparatus 820
MSAPMOHS217A Gas test atmospheres 826
MSAPMOPS400A Optimise process/plant area 832
MSAPMPER200C Work in accordance with an issued permit 840
MSAPMPER201A Monitor and control work permits 850
MSAPMPER202A Observe permit work 859
MSAPMPER300C Issue work permits 865
MSAPMPER400A Coordinate permit process 876
MSAPMSUP200A Achieve work outcomes 883
MSAPMSUP210A Process and record information 890
MSAPMSUP240A Undertake minor maintenance 896
MSAPMSUP303A Identify equipment faults 903
MSAPMSUP390A Use structured problem solving tools 910
MSS402061A Use SCADA systems in operations 916
MSS402080A Undertake root cause analysis 923
PMAOHS211B Prepare equipment for emergency response 930
PMAOHS310B Investigate incidents 936
PMAOHS311B Lead emergency teams 945
PMAOMIR210B Control evacuation to muster point 953
PMAOMIR346B Assess and secure an incident site 960
PMAOMIR407B Audit incident preparedness and established response systems 967
PMAOMIR418B Coordinate incident response 974
PMAOMIR430B Conduct and assess incident exercises 982
PMAOMIR444B Develop incident containment tactics 989
PMAOMIR512B Establish incident response preparedness and response systems 996
PMAOPS305B Operate process control systems 1004
PMAOPS312B Undertake ship loading/unloading operations 1013
PMAOPS330B Communicate and monitor pipeline activities 1021
PMAOPS402A Respond to abnormal process situations 1029
PMAOPS405B Operate complex control systems 1035
PMAOPS410B Monitor remote production facilities 1045
PMASUP311A Operate communications hub 1053
PMASUP410B Develop plant documentation 1059
PMASUP444A Plan plant preparation and isolation 1066
PMBWELD301B Butt weld polyethylene plastic pipelines 1076
PMBWELD302B Electrofusion weld polyethylene pipelines 1082
PMC563081C Carry out stock control 1088
RIICCM205D Carry out manual excavation 1094
Assessment Requirements for RIICCM205D Carry out manual excavation 1096
RIICCM206D Support plant operations 1098
Assessment Requirements for RIICCM206D Support plant operations 1100

© Commonwealth of Australia, 2025 Powering Skills Organisation

RIICCM207D Spread and compact materials manually 1102
Assessment Requirements for RIICCM207D Spread and compact materials manually 1104
RIICCM208D Carry out basic levelling 1106
Assessment Requirements for RIICCM208D Carry out basic levelling 1108
RIICCM210D Install trench support 1110
Assessment Requirements for RIICCM210D Install trench support 1112
RIICRC208D Lay pipes 1114
Assessment Requirements for RIICRC208D Lay pipes 1116
RIIHAN309D Conduct telescopic materials handler operations 1118
Assessment Requirements for RIIHAN309D Conduct telescopic materials handler operations 1121
RIIMPO304D Conduct wheel loader operations 1124
Assessment Requirements for RIIMPO304D Conduct wheel loader operations 1127
RIIMPO308D Conduct tracked dozer operations 1130
Assessment Requirements for RIIMPO308D Conduct tracked dozer operations 1132
RIIMPO309D Conduct wheeled dozer operations 1135
Assessment Requirements for RIIMPO309D Conduct wheeled dozer operations 1138
RIIMPO318D Conduct civil construction skid steer loader operations 1142
Assessment Requirements for RIIMPO318D Conduct civil construction skid steer loader operations 1145
RIIMPO319D Conduct backhoe/loader operations 1148
Assessment Requirements for RIIMPO319D Conduct backhoe/loader operations 1151
RIIMPO320D Conduct civil construction excavator operations 1154
Assessment Requirements for RIIMPO320D Conduct civil construction excavator operations 1157
RIIRIS301D Apply risk management processes 1160
Assessment Requirements for RIIRIS301D Apply risk management processes 1162
RIISAM201D Handle resources and infrastructure materials and safely dispose of nontoxic materials 1165
Assessment Requirements for RIISAM201D Handle resources and infrastructure materials and safely dispose of nontoxic materials 1167
RIIWHS202D Enter and work in confined spaces 1170
Assessment Requirements for RIIWHS202D Enter and work in confined spaces 1172
RIIWHS204D Work safely at heights 1175
Assessment Requirements for RIIWHS204D Work safely at heights 1178
RIIWHS205D Control traffic with stop-slow bat 1181
Assessment Requirements for RIIWHS205D Control traffic with stop-slow bat 1183
RIIWHS302D Implement traffic management plan 1186
Assessment Requirements for RIIWHS302D Implement traffic management plan 1189
RIIWMG203D Drain and dewater civil construction site 1192
Assessment Requirements for RIIWMG203D Drain and dewater civil construction site 1194
TLIB2004A Carry out vehicle inspection 1196
TLIC2002A Drive light rigid vehicle 1202
TLIC2025A Operate four wheel drive vehicle 1210
TLIC3003A Drive medium rigid vehicle 1220
TLIC3004A Drive heavy rigid vehicle 1228
TLIC3005A Drive heavy combination vehicle 1236
TLIC4006A Drive multi-combination vehicle 1244
TLIC4067A Operate LP gas tanker 1252
TLID2003A Handle dangerous goods/hazardous substances 1261
TLID2010A Operate a forklift 1269
TLID2016A Load and unload explosives and dangerous goods 1277
TLID3015A Identify and label explosives and dangerous goods 1285

© Commonwealth of Australia, 2025 Powering Skills Organisation

TLID3023A Use specialised liquid bulk gas transfer equipment....1293
TLID3027A Prepare for transport of dangerous goods....1301
TLID3033A Operate a vehicle-mounted loading crane....1310
TLID3036A Lift and move load using a mobile crane....1318
TLIF2006A Apply accident-emergency procedures....1327
TLIF2010A Apply fatigue management strategies....1334
TLIF2012A Apply safe procedures when handling/transporting dangerous goods or explosives....1341
TLIF3063A Administer the implementation of fatigue management strategies....1349
TLIF3093A Implement chain of responsibility regulations....1357
TLIF3096A Carry out emergency response to a dangerous goods incident....1363
TLIF4007A Implement and coordinate accident-emergency procedures....1369
TLIF4065A Ensure compliance with Australian Dangerous Goods Code....1377
TLIF4066A Implement and supervise transport regulations compliance systems....1383
TLIF4094A Ensure compliance with chain of responsibility....1389
TLIL4059A Implement asset management systems....1395
TLILIC0012A Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)....1401
TLILIC2001A Licence to operate a forklift truck....1413
TLILIC2014B Licence to drive a light rigid vehicle....1422
TLILIC2015B Licence to drive a medium rigid vehicle....1427
TLILIC2016B Licence to drive a heavy rigid vehicle....1432
TLILIC3006A Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)....1437
TLILIC3008A Licence to operate a slewing mobile crane (up to 20 tonnes)....1449
TLILIC3013A Preparation to transport dangerous goods by road....1461
TLILIC3017B Licence to drive a heavy combination vehicle....1474
TLILIC3018B Licence to drive a multi combination vehicle....1480
TLILIC4009A Licence to operate a slewing mobile crane (up to 60 tonnes)....1486
UEENEEC001B Maintain documentation....1498
UEENEED101A Use computer applications relevant to a workplace....1506
UEENEEE102A Fabricate, assemble and dismantle utilities industry components....1515
UEENEEE107A Use drawings, diagrams, schedules, standards, codes and specifications1527
UEENEEE117A Implement and monitor energy sector OHS policies and procedures..1538
UEENEEM020A Attend to breakdowns in hazardous areas - gas atmospheres....1548
UEENEEM076A Use and maintain the integrity of a portable gas detection device....1559
UEENEEM080A Report on the integrity of explosion-protected equipment in a hazardous area....1569
UEGNSG004A Locate, prove and protect utility assets....1579
UEGNSG005A Prepare to work in the gas industry....1590
UEGNSG006A Use a portable gas detector to locate escape....1600
UEGNSG106B Coordinate repair of pipeline, facilities and equipment....1611
UEGNSG108B Operate and monitor pipeline control systems....1625
UEGNSG109B Control field pipeline operations....1640
UEGNSG110B Supervise technical operations for gas distribution or transmission....1653
UEGNSG111B Produce maintenance strategies and plans for a gas facility....1668
UEGNSG113B Manage a utilities industry OHS management system....1681
UEGNSG114B Coordinate and monitor implementation of a risk management plan for a utilities industry facility....1694
UEGNSG115B Manage gas systems projects....1708
UEGNSG116B Manage Gas Industry Physical Resources....1729
UEGNSG117B Plan and implement the data acquisition and metering requirements of a gas system....1742

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEGNSG118B Select and commission equipment to meet pressure and temperature control specifications 1758
UEGNSG119B Manage workplace risk in a gas industry facility 1775
UEGNSG120B Manage gas system environmental compliance 1793
UEGNSG121B Prepare safe design specifications of a gas system 1811
UEGNSG122B Manage a customer service gas business unit 1831
UEGNSG123B Manage financial resources in a gas industry facility 1848
UEGNSG131A Compile a gas industry technical report 1861
UEGNSG132A Carry out basic work activities in a gas industry work environment 1872
UEGNSG133A Comply with environmental policies and procedures in the utilities industry 1884
UEGNSG134A Establish a utilities infrastructure work site 1897
UEGNSG135A Monitor and control gas odourisation 1910
UEGNSG136A Carry out transmission pipeline construction work activities 1923
UEGNSG137A Operate and Maintain Gas Station Water Bath Heaters 1936
UEGNSG138A Install and commission stationary gas fuelled turbine engines 1949
UEGNSG139A Repair and maintain stationary gas fuelled turbine engines 1962
UEGNSG140A Apply environmental policies and procedures in the utilities industry 1976
UEGNSG141A Apply Workplace Health and Safety regulations, codes and practices in the gas supply industry 1988
UEGNSG142A Conduct isolations under the permit to work system for gas industry work sites 1999
UEGNSG204B Coordinate and conduct gas distribution pipeline repair and modifications 2011
UEGNSG207B Coordinate construction, laying and testing of gas distribution pipelines 2031
UEGNSG210B Supervise and monitor contract staff for work on distribution pipelines 2046
UEGNSG212B Construct, lay and connect a gas distribution service to a plastic main .2066
UEGNSG213B Construct, lay and connect a gas distribution service to a steel main 2079
UEGNSG216A Commission or decommission gas distribution pipelines 2092
UEGNSG217A Launch and recover PIGs in a gas distribution pipeline 2105
UEGNSG218A Carry out surveillance on gas distribution assets 2118
UEGNSG219A Conduct excavations in the utilities industry 2131
UEGNSG220A Construct and lay Polyethylene gas distribution mains 2144
UEGNSG221A First on site response to gas pipeline emergencies 2158
UEGNSG222A Construct and lay Nylon or PVC gas distribution mains 2171
UEGNSG223A Construct and lay steel gas distribution pipelines 2184
UEGNSG224A Construct and lay copper and stainless steel gas distribution pipelines .2197
UEGNSG225A Perform routine maintenance on distribution pipeline facilities and equipment 2210
UEGNSG226A Assist with the construction, laying and connection of gas distribution services to mains 2224
UEGNSG227A Assist with the construction and laying of gas distribution mains 2236
UEGNSG228A Construct and lay large copper gas distribution pipelines 2248
UEGNSG229A Prepare simple drawings of as laid gas mains and services 2261
UEGNSG305B Coordinate gas transmission pipeline repair and modifications 2275
UEGNSG308B Identify, evaluate and control threats to transmission pipelines 2292
UEGNSG310B Supervise and monitor contract work 2309
UEGNSG311B Site control of third party works in the vicinity of a transmission pipeline 2331
UEGNSG314B Liaise with third party and the community to maintain pipeline integrity and community safety 2352
UEGNSG319B Custody transfer metering and gas quality analysis 2368
UEGNSG324A Follow company procedures to deal with incidents related to the abuse of drugs and alcohol 2382

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEGNSG325A Coordinate the operation of relevant plant and equipment for transmission pipeline construction....2392
UEGNSG326A Coordinate and monitor staff and contractors....2405
UEGNSG327A Coordinate transmission pipeline construction operations....2420
UEGNSG330A Coat Metallic Pipelines....2439
UEGNSG331A Establish right of way access for transmission pipeline construction....2452
UEGNSG332A Undertake hydro-testing for transmission pipeline construction....2464
UEGNSG333A Work in proximity of transmission pipeline construction plant and equipment....2477
UEGNSG342A Maintain pipeline easements....2489
UEGNSG344A Commission or decommission gas transmission pipelines....2502
UEGNSG346A Launch and recover PIGs in gas transmission pipelines....2517
UEGNSG347A Perform routine maintenance on transmission pipeline facilities and equipment....2530
UEGNSG348A Supervise the operation of plant and equipment for the construction of gas transmission pipelines....2543
UEGNSG349A Carry out surveillance of gas transmission pipelines....2561
UEGNSG350A First response to a gas facility event....2573
UEGNSG352A Check and report on gas station conditions....2589
UEGNSG353A Carry out aerial surveillance of gas transmission pipelines....2603
UEGNSG354A Control excavations in the vicinity of gas transmission pipelines....2617
UEGNSG355A Monitor and report on cathodic protection systems....2631
UEGNSG356A Monitor and operate flow control, pressure measuring and regulating devices for gas transmission....2646
UEGNSG411A Maintain cathodic protection systems....2662
UEGNSG412A Install cathodic protection systems....2677
UEGNSG506A Respond to gas infrastructure emergencies....2692
UEGNSG507A Remotely monitor and operate gas transmission flow and pressure measuring and regulating devices....2704
UEGNSG508A Remotely check and report on gas station conditions....2719
UEGNSG511A Operate gas infrastructure to meet nominated demand....2733
UEGNSG512A Control centre communication with gas industry stakeholders....2748
UEGNSG513A Manage emergencies and critical incidents for gas infrastructure....2762
UEGNSG514A Managing and Controlling Field Activities....2779
UEGNSG515A Use control centre systems to monitor and control gas infrastructure....2796
UEGNSG611B Control LPG storage/processing operations....2814
UEGNSG612B Supervise technical operations for liquefied petroleum gas storage and processing....2827
UEGNSG614A Load, unload, exchange and connect LPG cylinders....2842
UEGNSG615A Fill LPG cylinders....2855
UEGNSG616A Refurbish gas cylinders....2867
UEGNSG617A Monitor and control the transfer of bulk LPG....2881
UEGNSG618A Process Liquefied Petroleum Gas (LPG)....2894
UEGNSG619A Perform scheduled maintenance on gas processing or storage facilities and equipment....2907
UEGNSG620A Organise the repair of faults in LPG processing or storage facilities and equipment....2922
UEGNSG621A Control bulk storage of LPG....2935
UEGNSG622A Assess the operational capability of gas safety equipment on a delivery vehicle....2948
UEGNSG705A Disconnect and reconnect small capacity gas meters....2962
UEGNSG706A Test New Residential and Small Commercial Gas Installations....2974
UEGNSG708A Pressure Test Residential and Small Commercial Gas Installations....2987

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEGNSG711A Process meter reading information using appropriate technology.....2998
UEGNSG712A Read and record meter readings.....3010
UEGNSG713A Investigate billing exceptions-conditions.....3022
UEGNSG714A Relight Type A gas appliances.....3035
UEGNSG804A Maintain Single Stage and Single Run Gas Flow and Pressure Control and Measuring Devices.....3047
UEGNSG805A Maintain Multi-Stage and Multi-Run Gas Flow and Pressure Measuring and Regulating Devices.....3060
UEGNSG806A Maintain SCADA controlled flow and pressure equipment and electronic gas measurement equipment.....3074
UEGNSG807A Install Gas Flow, Measuring and Pressure Regulating Devices.....3089
UEGNSG811A Monitor and operate complex flow control, measuring and regulating devices for gas distribution.....3103
UEPMNT367A Install and commission stationary gas fuelled reciprocating engines.....3118
UEPMNT368A Repair and maintain stationary gas fuelled reciprocating engines.....3132
UEPOPS203B Operate and monitor communications system.....3145
UEPOPS205B Conduct minor mechanical maintenance.....3154
UEPOPS317B Operate and monitor fixed fire protection systems.....3165
UEPOPS336B Manage, operate and monitor a gas turbine unit.....3176
UEPOPS347B Operate and monitor supervisory, control and data acquisition systems3187
UETTDREL14A Working safely near live electrical apparatus as a non-electrical worker3196

Preliminary Information

Preliminary Information

The Gas Industry

For the purposes of the Gas Industry Training Package, the term ‘Gas Industry’ refers to the industry which supplies natural gas via transmission and distribution pipelines, and Liquid Petroleum Gas (LPG) via cylinders, to a variety of domestic and manufacturing customers.

It does not refer to the extraction of gas from its source, nor the installation or maintenance of gas appliances within domestic or manufacturing environments.

The Gas Industry is a major supplier of energy to Australian homes and factories, supplying around 30% of industry energy needs and 20% of domestic needs.

The technical operation of the Gas Industry requires the involvement of individuals who may be employed as:

- engineers
- technicians
- project managers

© Commonwealth of Australia, 2025 Powering Skills Organisation

- line managers and supervisors
- field operatives

Employment within the industry may involve one or more of the following:

- design of transmission, distribution, processing and/or storage systems
- construction and maintenance of the above systems
- commissioning and decommissioning of the above systems
- metering and billing of customers.

Industry coverage

The formal industry coverage is under ANZSIC Code 3620 — the sector is defined as consisting of units mainly engaged in the manufacture of town gas from coal and/or petroleum or in the distribution of manufactured town gas, natural gas or the liquefied petroleum gas through a system of mains, including pipelines operated on own account.

During the last few years there has been privatisation of many enterprises and the out-sourcing of many functions and activities. The Gas Industry contributes greatly to the economic needs of Australia. The section below ‘The Gas Industry’ provides detail.

Regulatory arrangements

The industry is subject to a high level of legislation, regulation, codes of practice, guidelines and advisory standards related to the research, assembly, installation, construction, diagnostics, maintenance, commission, program, test or repair of networks, systems, equipment, components, appliances, facilities and the like in the field of gas supply. The regulatory requirements are, typically, based on the principle of gas transmission and distribution involving equipment, apparatus and systems, public safety, safety and health of individuals who work on pipelines, tankers, truck, systems and apparatus/equipment and other codes and practices related to the environment in which they operate.

Where possible, relevant and current regulatory requirements have been incorporated into this Training Package to assure outcomes are complementary to regulation. Where regulatory requirements are amended or introduced such outcomes are to be incorporated in training and assessment delivery. Continuous improvement and maintenance arrangements included in this Training Package will try to keep pace with changes.

Statutes, regulations and codes of practice

Federal, State and Territory Gas, Electricity, Telecommunications, Anti discrimination, Occupational Health and Safety and Work Cover Acts and Regulations typically cover the Industry. Additionally, there are many Australian/New Zealand and International Standards, codes of practices and regulations that apply and to which observance is essential for assuring life, property and commerce. Thus, relevant legislative, regulatory codes of practice, guidelines and advisory standard requirements form an integral part of the obligatory requirements in the vocational standards found in this Training Package.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Other Industry Standards

It is recognised that the Gas Industry Standards do not cover all the competencies which are likely to be required and applied within Gas Industry workplaces. Nationally endorsed competency standards from other industries will be used where appropriate and the concept of cross-industry disciplinary standards will be encouraged. Specific rules have been included within this Training Package to address these arrangements.

Overview

Overview of Training Packages

What is a Training Package?

A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing people's skills and may also have optional support materials.
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training and assessment which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable industry outcomes.

How do Training Packages fit within the National Training Framework?

The National Training Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the National Vocational Education and Training Regulator (NVR) or Australian Quality Training Framework (AQTF) and Training Packages endorsed by the National Skills Standards Council (NSSC).

How are Training Packages developed?

Training Packages are developed by Industry Skills Councils to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of a Training Package, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

How do Training Packages encourage flexibility?

Training Packages describe the skills and knowledge needed to perform effectively in the workplace, without prescribing how people should be trained.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

Who can deliver and assess using Training Packages?

Training and assessment, using Training Packages must be conducted by an RTO that has the qualifications or specific Competency Standard Units on its scope of registration, or that works in partnership with another RTO as specified in the AQTF 2010 or the Standards for NVR Registered Training Organisations 2012.

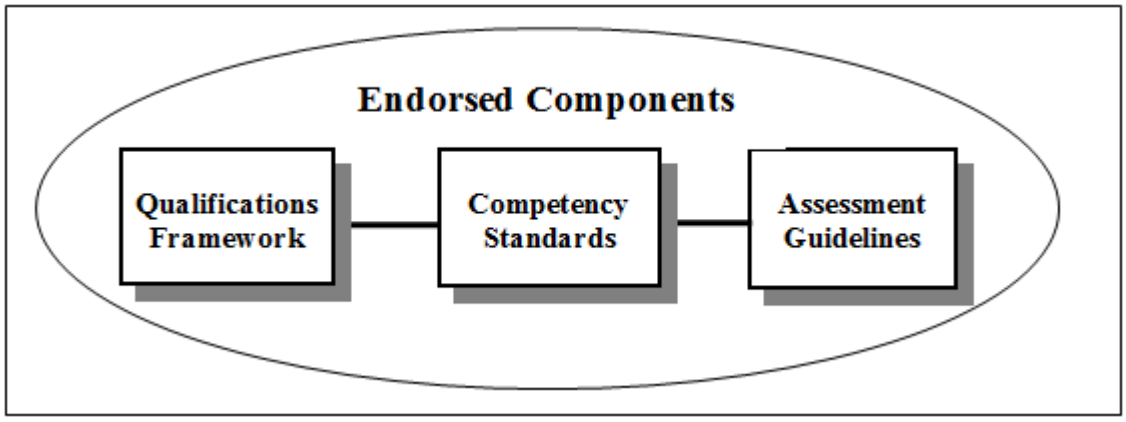
Training Package Components

Training Packages are made up of mandatory components endorsed by the NSSC and optional support materials.

Training Package Endorsed Components

The nationally endorsed components include the Qualification Framework, Competency Standards and Assessment Guidelines. These form the basis of training and assessment in the Training Package and, as such, they must be used.

Training Package Components



Competency Standards

Each Unit of Competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy and Occupational Health and Safety requirements. The Units of Competency must be adhered to in training and assessment to ensure consistency of outcomes.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Qualifications Framework

Each Training Package provides details of those competency standards that must be achieved to award AQF qualifications. The rules around which Units of Competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the "packaging rules". The packaging rules must be followed to ensure the integrity of validating recognised qualifications issued.

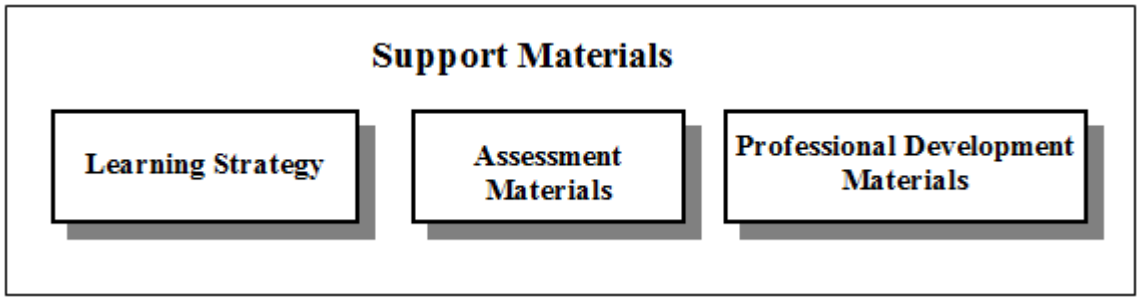
Assessment Guidelines

The Assessment Guidelines provide an industry framework to ensure all assessment outcomes meet industry needs and the nationally agreed standards as expressed in the Training Package and the AQTF 2010 or the Standards for NVR Registered Training Organisations 2012. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

Training Package Support Materials

The endorsed components of a Training Package are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.



Training Package support materials are produced by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

Where such materials have been quality assured through a process of ‘noting’ by the NSSC, they display the following official logo.

It is not compulsory to submit support materials for noting, any resources that meet the requirements of the Training Package can be used.

© Commonwealth of Australia, 2025 Powering Skills Organisation

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, and with the title always following the code.

Training Package Qualification and Unit of Competency Codes

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, and with the code always before the title.

Training Package Codes

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example UEG11. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

Qualification Codes

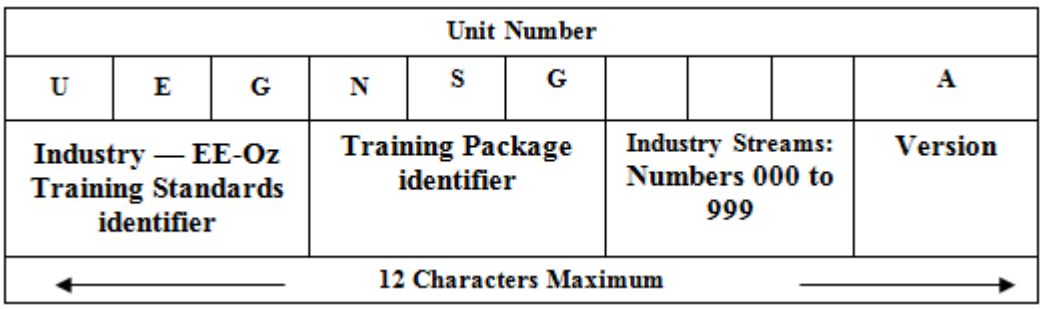
Within each Training Package, each qualification has a unique eight-character code, for example in this Training Package, UEG30211. Qualification codes are developed as follows:

- The first three letters identify the Training Package
- the first number identifies the qualification level (noting that, in the qualification titles themselves, Arabic numbers are not used)
- The next two numbers identify the position in the sequence of the qualification at that level; and
- The last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications, as they identify the year in which those particular qualifications were endorsed).

Unit of Competency Codes

Within each Training Package, each competency standard unit has a unique code. Unit of Competency codes are assigned when the Training Package is endorsed, or when new units are added to an existing Training Package. Unit codes are developed as follows:

- A typical code is made up of a maximum of 12 characters; normally a mixture of upper-case letters and numbers. For example in this Training Package the following approach has been adopted:



- The first three characters signify the Training Package and up to eight characters, relating to an industry sector, function or skill areas follow.

© Commonwealth of Australia, 2025 Powering Skills Organisation

- The last character is always a letter and identifies the unit of competency version. An ‘A’ at the end of the code indicates that it is the original unit of competency. ‘B’ or another incremented version identifier means that minor changes have been made. Typically, this would mean that wording has changed in the range statement or evidence guide, providing clearer intent.
- Where changes are made that alter the outcome, a new code is assigned and the unit title is changed.

Training Package Qualification and Unit of Competency Titles

There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

Training Package Titles

The title of each endorsed Training Package is unique and relates to the industry’s broad coverage.

Qualification Titles

The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma or Advanced Diploma
- this is followed by the words ‘in’ for Certificates I to IV and ‘of’ for Diploma and Advanced Diploma
- then the industry descriptor follows, for example Gas Industry Operations and
- if applicable, the occupational or functional stream follows in brackets, for example (Computer Systems).

Unit of Competency Titles

Each Unit of Competency title is unique. Unit of Competency titles describe the competency outcome concisely, and are written in sentence case. For example:

- UEGNSG117A Plan and implement the data acquisition and metering requirements of a gas system
- FNBLIF29A Undertake risk assessment

The Gas Industry Training Package

Introduction to the UEG11 Gas Industry Training Package

The Training Package for the Gas Industry (UEG11) has been developed on behalf of the EnergyUtilities Industry and community stakeholders from all States/Territories of Australia by E-Oz Energy Skills Australia, with the support of the Department of Industry (DOI). E-Oz Energy Skills Australia operates under a charter from the Australian Government as a declared National ElectroComms and EnergyUtilities Industry Skills Council for the ElectroComms and EnergyUtilities Industry. EnergyUtilities Industry practitioners, regulators, government agencies and community stakeholders contributed much effort, support and knowledge in its development.

The first Training Package for this industry was released in 1998, as the Training Package for the Gas Industry (UTG98). At that time it broke new ground for setting nationally recognised qualifications comprised of Competency Standard Units as they related to work performance. It assisted in benchmarking the design of training and assessment processes and practices.

The Training Package can to be used by all those involved in the delivery and assessment of competencies that cover Gas Distribution; Transmission; Cathodic Protection; Control Centres; LPG — storage, processing and transportation; Meter Reading and Billing and Systems Operations.

Users of this Industry Training Package include:

- large multi-energy utilities companies
- State Training and Recognition Authorities which will use the Training Package as the pre-eminent industry's advice to government; and as a statement of the minimum requirements to be satisfied by Registered Training Organisations in the delivery of services.
- State/Territory Industry Training Bodies/Industry Skills Councils which will use the Training Package to underpin their relationship with, and support for, the State training and recognition authorities quality systems, including providing advice
- Registered Training Organisations which will issue qualifications and or statements of attainment, based on the requirements outlined in the Training Package which contains the vocational standards for industry
- Individual candidates/trainees/learners who will use the provisions of the Training Package to establish their responsibilities and to protect their prerogatives
- Organisations in mapping their human resource processes and arrangements to the National benchmark Competency Standard Units in this Training Package.

RII	Resources and Infrastructure Industry Training Package	3.2	20
TLI10	Transport and Logistics Training Package	3.0	38
UEE11	Electrotechnology Training Package	1.3	8
UEP12	Electricity Supply Industry - Generation Sector Training Package	2.1	7
UET12	Electricity Supply Industry - Transmission, Distribution and Rail Sector Training Package	2.0	1
Total Imported CSUs			**160**

Full details of the Imported Units in this Training Package including: Unit Code, Title, Weighting Points, AQF Level, Pre-requisites and Qualification Mapping, are contained in the Index of Competency Standard Units in Volume 1 Part 3 Competency Standards Index of this Training Package.

Please consult the source Training Package for information, including equivalences, in relation to new and updated imported units included in this version of the Gas Industry Training Package.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Language, Literacy, Numeracy

The Competency Standards have been written to reflect the technical and operational needs of industry and include appropriate language and literacy requirements. A new and specific section related to literacy and numeracy skills has been included in the Competency Standard Units for the purposes of providing advice to RTOs on the entry requirements for each unit. It characterises how participants are to be best equipped to achieve the required, writing and numeracy skill levels.

A specific section for Literacy and Numeracy Skills has been included in Volume 2 of this Training Package. In addition, there is an explanation of their relationship to the Performance Criteria and their assessment in accordance with the critical aspects of evidence within each Competency Standard Unit.

Access, Equity and Cultural Diversity

The skills required of employees in the Gas Industry sector of the EnergyUtilities Industry are comprehensive, with many employment opportunities available. The Competency Standards reflect the range of knowledge and skills and there application, required in the Industry. They are written in a non-exclusive manner so as to increase the participation rates of under-represented community groups and to minimise unintentional bias.

As a matter of policy in the Gas Industry and in this Training Package there is no exclusion of any persons from participating in competency development, training and employment. This includes encouraging under-represented groups such as indigenous peoples, people with disabilities, women, and people from rural and remote areas or cultural diversity to join the Industry.

Acknowledgments

The Board of Directors of the ElectroComms and Energy Utilities Industry Skills Council Ltd trading as E-Oz Energy Skills Australia wishes to acknowledge the important developmental roles played by training advisory and delivery organisations, enterprises, employer and employee representatives, industry practitioners, regulatory authorities, individuals and community stakeholders. Without their level of commitment and support this Training Package would not exist in its current form.

The Board acknowledges and thanks the following organisations and individuals:

- Gas Industry Training Package Review National Steering Group
- Gas Industry Training Package Review Technical Reference Group

© Commonwealth of Australia, 2025 Powering Skills Organisation

- the Chairs, Executive Officers, and Members of the E-Oz Energy Skills Australia State and Territory Network (ITABs) and their various sub-committees
- the State and Territory Training Authorities
- the State and Territory Regulatory Authorities
- OHS Skills Development and Practical Guidance Team of the National Occupational Health and Safety Commission
- industry sector RTOs and practitioners for contributing to and being supportive of the project
- industry sector practitioners for contributing to and being supportive of the project.
-

Outline of this Training Package

Outline of this Training Package

The endorsed components of the Training Package are contained in two volumes. Volume 1 covers the overall Package framework and completion requirements for qualifications, and Volume 2 the content details for respective parts and sub-sections of Volume 1. Both volumes form an integrated whole and are not to be used independently of each other.

Volume 1: Structure and Overview

Qualification Framework

This section describes how the qualifications, scope/descriptions, composition and content are structured. Completion and issuance requirements are provided as well as advice on flexibility arrangements, with entry and exit pathways and articulation arrangements. Titles and codes of the list of qualifications to be issued are also included.

Competency Standards

This section describes how the competency standards were developed (in broad terms), the industry coverage they apply to, as well as the format and construction of the individual Competency Standard Units. The index of Competency Standard Units and their scope/description is included in this part. Matters related to language, literacy and numeracy, access, equity and cultural diversity and regulatory arrangements, for which the Competency Standard Units may apply, is also included. The Definitions/Glossary and Essential Knowledge and Associated Skills sections of the Training Package link directly to the Competency Standard Units and no Unit is to be used in isolation or exported without these interrelated components.

All the Competency Standard Units in the Gas Industry Training Package are detailed in Volume 2, Part 2, each is listed according to its respective industry discipline area.

Part 3 – Assessment Guidelines

This section outlines how the assessment guidelines inform a Registered Training Organisation (RTO) on the infrastructure requirements they will need to enable them to carry out training delivery assessment activities related to the Training Package. The guidelines include assessment systems, the role of RTOs, assessment pathways, recognition arrangements, assessor qualifications and sources of information.

Volume 2: Competency Standard Units — Content and scope

Volume 2 Part 1 contains a Definitions/Glossary, which provides a description/explanation of certain/assigned words that appear in this document.

Volume 2 Part 2 contains the competency standard units in their respective disciplines, eg Transmission Units, Distribution Units, Operation Units, Cathodic Protection Units.

Volume 2 Part 2 also contains the details of Essential Knowledge and Associated Skills referred to in each Competency Standard Unit.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Volume 2 Part 3 provided information on the application of Language Literacy and Numeracy aspects identified with each Competency Standard Unit.

Note: The two volumes form an integrated whole and must not be used independently of each other.

Gas Industry Training Package Layout

The revised Gas Industry Training Package has been developed, reviewed and validated through extensive industry consultation. It reflects the views of a wide cross-section of the industry and its key stakeholders/practitioners throughout Australia.

The Training Package has been constructed as a two volume set. Volume 1 covers the overall Package framework and completion requirements for qualifications. Volume 2 includes the content details of parts and sub-sections of Volume 1. The two volumes form an integrated whole and are not to be used independently of each other.

Important Note to Users

Training Packages are not static documents. They are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

Check the version number before commencing training or assessment

This Training Package is Version 2 – check whether this is the latest version by going to www.training.gov.au and locating information about the Training Package. Alternatively, contact the Training Package developer and technical content custodian ElectroComms and EnergyUtilities Industry Skills Council Ltd, trading as E-Oz Energy Skills Australia http://www.e-oz.com.au/ to obtain relevant content advice and confirm the latest version number.

Explanation of version number conventions

The primary release Training Package is Version 2. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed, it is considered to be a new Training Package for the purposes of version control and is Version 1. Do not confuse the version number with the Training Package's national code (which remains the same during its period of endorsement).

Explanation of the review date

The review date (shown on the title page and in the footer of each page) indicates when the Training Package is expected to be reviewed to meet changes in technology and other circumstances. The review date is not an expiry date. Endorsed Training Packages and their components remain current until they are reviewed or replaced.

1.0.00 Qualification Framework

Volume 1 Part 1 Qualification Framework

1.1.00 The Australian Qualifications Framework

1.0 The Australian Qualification Framework

What is the Australian Qualifications Framework?

A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the AQF Implementation Handbook.
http://www.aqf.edu.au/wp-content/uploads/2013/05/AQF-2nd-Edition-January-2013.pdf

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

Qualifications

Training Packages can incorporate the following eight AQF qualifications:

- Certificate I in ...
- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...
- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the AQF Implementation Handbook and the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Statement of Attainment

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). Issuance of Statements of Attainment must comply with the advice provided in the current AQF Implementation Handbook and the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

Under the AQTF 2010 or the Standards for NVR Registered Training Organisations 2012, RTOs must recognise the achievement of competencies as recorded on a qualification or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

AQF Guidelines and Learning Outcomes

The AQF Implementation Handbook provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

Certificate II

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

demonstrate basic operational knowledge in a moderate range of areas;

apply a defined range of skills;

apply known solutions to a limited range of predictable problems;

perform a range of tasks where choice between a limited range of options is required;

assess and record information from varied sources;

take limited responsibility for own outputs in work and learning

© Commonwealth of Australia, 2025 Powering Skills Organisation

Certificate III

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to Australian environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the section of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team coordination may be involved.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

demonstrate some relevant theoretical knowledge

apply a range of well-developed skills

apply known solutions to a variety of predictable problems

perform processes that require a range of well-developed skills where some discretion and judgement is required

interpret available information, using discretion and judgement

take responsibility for own outputs in work and learning

take limited responsibility for the output of others

© Commonwealth of Australia, 2025 Powering Skills Organisation

Certificate IV

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.

Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop Australian criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills.

Applications involve responsibility for, and limited organisation of, others.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

demonstrate understanding of a broad knowledge base incorporating some theoretical concepts

apply solutions to a defined range of unpredictable problems

identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas

identify, analyse and evaluate information from a variety of sources

take responsibility for own outputs in relation to specified quality standards

take limited responsibility for the quantity and quality of the output of others

© Commonwealth of Australia, 2025 Powering Skills Organisation

Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and coordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgement is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team coordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas

analyse and plan approaches to technical problems or management requirements

transfer and apply theoretical concepts and/or technical or creative skills to a range of situations

evaluate information, using it to forecast for planning or research purposes

take responsibility for own outputs in relation to broad quantity and quality parameters

take some responsibility for the achievement of group outcomes

© Commonwealth of Australia, 2025 Powering Skills Organisation

Advanced Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of Australian criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

demonstrate understanding of specialised knowledge with depth in some areas

analyse, diagnose, design and execute judgements across a broad range of technical or management functions

generate ideas through the analysis of information and concepts at an abstract level

demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills

demonstrate accountability for personal outputs within broad parameters

demonstrate accountability for personal and group outcomes within broad parameters

Regulatory Arrangements

Competency Standard Units, Skill Sets and Qualifications in this Training Package have been developed in consultation with the relevant industry technical and business Regulators so that, where appropriate, these align to the requirements of legislation, regulations and mandated codes of practice.

Licensing and regulatory authorities will recognise a range of Qualifications, Units or Skill Sets contained within this Training Package for respective licensing, registration or accreditation purposes. In constructing these qualifications, E-Oz Energy Skills Australia and respective Regulators have given consideration to the link between the issuance of the qualification and the respective regulatory requirements. It is expected that the assessment and preferred training regime which meets the competency outcomes of the qualification and assessment, will therefore meet the regulatory requirements.

© Commonwealth of Australia, 2025 Powering Skills Organisation

In recognising this interrelationship, every effort has been made to ensure currency in regulatory requirements, thus RTOs must ensure they are observed. This includes utilising any recommended industry training program designed to meet the Competency Standard Units and/or Qualification outcomes related to licensing/registration applications.

As RTO's registered under the Australian Quality Training Framework (AQTF) or National Vocational Education and Training Regulator (NVR) requirements are given full responsibility for deeming a learner/apprentice competent for the respective Competency Standard Units making up a Training Package Qualification or Skill Set, the RTO shall also provide all the necessary documentation (including results preferably percentile based) as required by the regulatory authority to support an application of eligibility for a relevant license, registration or accreditation.

It should be noted that regulatory authorities have advised that the quality of Registered Training Organisations issuing a qualification for regulatory purposes will be monitored. Where deficiencies are identified, regulators may deem it necessary to introduce appropriate actions, including an additional 'external' assessment following the issuing of the qualification to satisfy eligibility requirements for issuing the licence.

Exporting Gas Industry CSUs from this Training Package

Competency Standard Units in this Training Package are interrelated and linked with the Definitions/Glossary and Essential Knowledge and Associated Skills sections of the Training Package This also includes information related to language, literacy and numeracy; access, equity, cultural diversity and regulatory arrangements which apply to respective Competency Standard Units. No Qualification or Competency Standard Unit can be used in isolation or imported into another Training Package, Qualification, Skill Set or Accredited Course without these interrelated components.

1.1.01 Gas Industry Qualification Framework

1.1 Gas Industry Qualification Framework

The qualifications listed in this Training Package adhere to the advice provided in the current version of AQF Implementation Handbook. See www.aqf.edu.au.

The qualifications have been designed to comply with the provisions of and comply with the National Skills Standards Council's (NSSC) Training Package Development Handbook Guidelines
Qualifications Framework to include:

- One Third or more of total units required to gain a VET qualification will be electives.
- The choice of Elective units can be broadened, to allow one sixth of total units to be included from other qualifications in a Training Package, other Training Packages and accredited courses.
- All units as either core or electives.

See:
http://www.nssc.natese.gov.au/__data/assets/pdf_file/0017/71243/GuidelinesQualFrameworks.pdf

© Commonwealth of Australia, 2025 Powering Skills Organisation

It should be noted that under these provisions Licensed and trade occupations are exempt from these measures.

Application of the NSSC Flexibility Formula

Industry has obtained formal agreement to the continued use of its unit weighting system for valuing individual competency standards and the effort required to achieve a qualification under these provisions.

Thus, for the qualifications in this Training Package, the terms "total units" and "total units required to gain a qualification" and the fractions thereof referred to above are calculated using the weighting points assigned to respective Competency Standard Units (CSU) rather than by a count of individual units. The Qualification Completion Requirements table below summarises the relevant weighting points values to satisfy the packaging rules of each qualification in accordance with the NSSC Policy.

To allow for the inclusion of units imported from other qualifications and other Training Packages and accredited courses under this weighting points system, industry also gained agreement to the following process for importing and valuing such imported units, as follows:

- Customisation of these qualifications is permitted in order to meet learner's individual needs, their current, intended or future work context, and a variety of possible industry environments.
- For this purpose the importation of units up to one sixth of the total points value required for completion of a qualification is permitted from either one or a combination of the following three sources:
  - Elsewhere in this Training Package
  - Other Training Packages
  - Accredited Courses
- Units selected for importation under these provisions shall be first packaged in the source Training Package or Accredited Course at the AQF level of the target qualification.
- The importation of units from these sources shall be within the boundaries of the integrity of the intended qualification outcomes, the requirements of the Australian Qualifications Framework, the Australian Quality Training Framework or National Vocational Education and Training Regulator and all regulatory requirements applicable to the imported unit and/or the target qualification.
- Minimum points (10) will be allocated to units imported from sources other than those managed by E-Oz Energy Skills Australia. Advice on the valuation of units selected for importation from sources other than E-Oz Training Packages shall be sought from the relevant E-Oz Technical Advisory Committee.

Advice shall be sought from the relevant state/territory registration and accreditation body to determine if there is a requirement for an extension to a Registered Training Organisation's scope of registration in relation to the inclusion of such imported unit/s into a qualification.

Advice shall be sought from the relevant registration and accreditation body regarding the requirement to record and report the inclusion of units imported under these provisions for the purposes of awarding a qualification.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Where units have been imported under these provisions, this shall be reported to E-Oz Energy Skills Australia so that industry is aware of such units and can consider the endorsement of these into the relevant qualification(s).

Qualification Mapping

Please refer to Volume 1 Preliminary Information for:

- Modifications History of Qualifications in this Training Package
- Mapping of the qualifications in this version of the Gas Industry Training Package to previous versions, including equivalences.

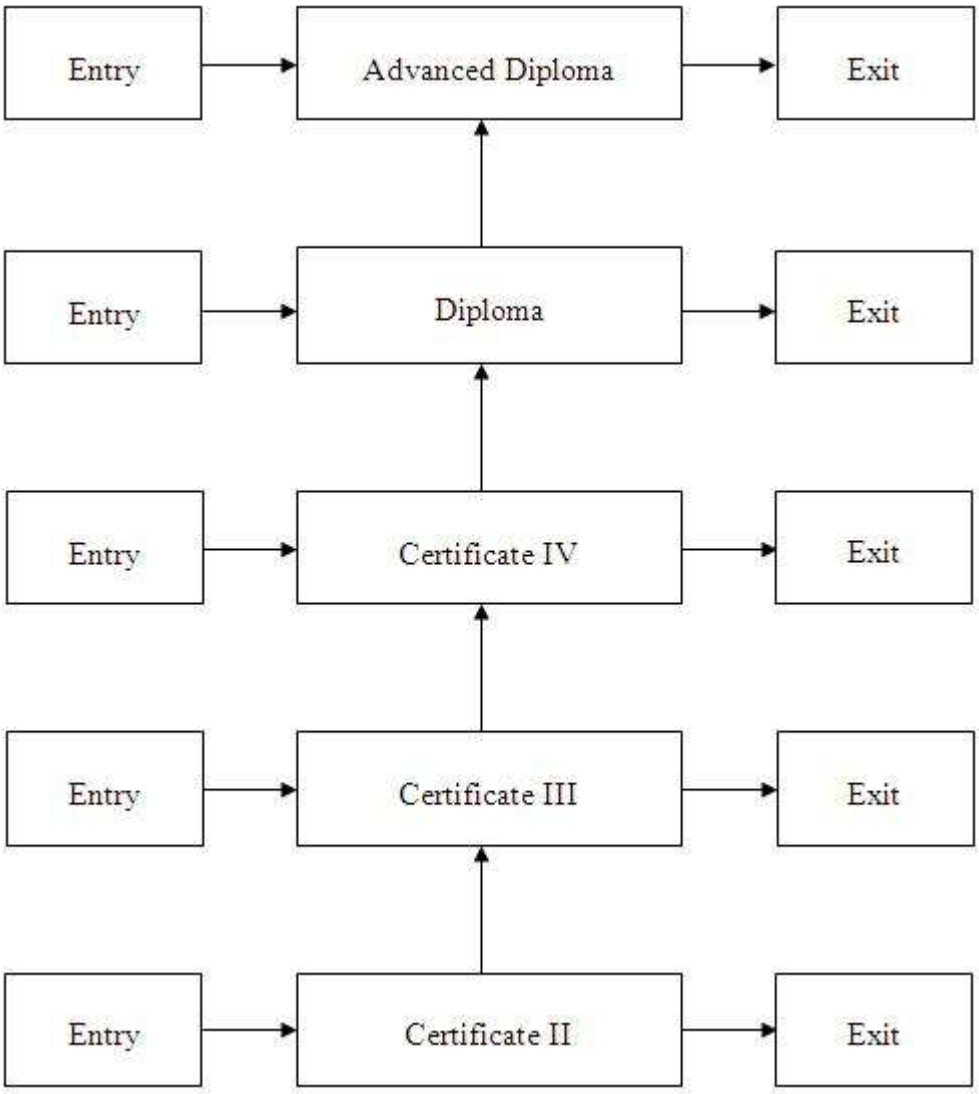
1.1.02 Qualification Pathways

1.2 Qualification Pathways

This Training Package provides open entry at each of the AQF levels. Arrows indicate the pathways that can be followed no matter at which qualification level you enter.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Entry and Exit Points for Gas Industry Qualification



For more information on the latest Training Package vocational standards qualifications and qualification pathways visit ElectroComms and EnergyUtilities Industry Skills Council Ltd trading as E-Oz Energy Skills Australia at www.e-oz.com.au.

Articulation pathways

Qualification articulation and entry and exit arrangements are based on the specific training and education requirements endorsed by the industry. The construction of the Competency standard units and the group of units that make up an individual qualification are of particular significance to the operational, regulatory and safety arrangements of the industry. Each qualification provides a unique vocational outcome that can be used for Australian apprentices as entry-level contracted employees.

© Commonwealth of Australia, 2025 Powering Skills Organisation

All qualifications are open entry and open exit and are available for use as Australian Apprenticeship entry-level contracted employment. Australian apprenticeship arrangements are subject to State/Territory statutory requirements, prescriptions within industrial instruments and policies of State/Territory training authorities and RTOs. Reference to what applies should therefore be made from respective statutory bodies in the first instance.

Australian Apprenticeship arrangements therefore apply to all qualifications; however, they are subject to State/Territory statutory requirements, prescriptions within industrial instruments and policies of State/Territory training authorities.

Open entry is provided into all qualifications, Open entry is available at all levels provided the prospective learner's general education and competency level is equivalent to the outcome of four to five years of secondary school. Additionally, entry levels provide an option for potential learners to choose a qualification suited to their needs while providing flexibility for recruitment action by employers. Entry into all qualifications is also available through Recognised Prior Learning (RPL) arrangements.

School Based Australian Apprenticeships

Australian Apprenticeships are declared in each State or Territory according to the particular processes of the jurisdiction and requirements identified by industry in the State or Territory. Declarations for particular qualifications as either Traineeships or Apprenticeships are made accordingly and therefore the same qualification may be classified differently between jurisdictions. Whilst E-Oz has no control over these processes and declarations, it would recommend that the following qualifications be considered when addressing School based Australian Apprenticeships:

Qualification Code	Qualification Title
Nil	Nil

Access, Equity and Cultural Diversity

The skills required of employees in the Gas Industry are comprehensive. The qualifications in this Training Package reflect the range of competencies required and are written in a non-exclusive manner so as to increase the participation rates of all equity and disadvantaged groups and to minimise unintentional bias.

Language, Literacy and Numeracy

A specific section related to language, literacy and numeracy skills has been included in each Competency standard unit to provide advice on the entry requirements for each unit. It provides Registered Training Organisations (RTOs), industry and career aspirants with relevant language, literacy and numeracy entry-level advice for each Competency standard unit that would maximise an individual's prospects for successful completion of the unit and, where appropriate, the qualification.

The language, literacy and numeracy definitions and requirements are described in more detail in Volume 2, Part 3 — Language, Literacy and Numeracy Skills. Each Competency standard unit in Volume Part 2 references the respective language, literacy and numeracy skills that apply.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Australian Apprenticeship – Application

Australian Apprenticeships are work related competency programs designed for entry-level contracted employment for new entrants to the industry. For further information regarding Australian Apprenticeships and their application in relation to this Training Package refer to Appendix A - Australian Apprenticeship – application. Appendix A is located at the end of Volume 1 Part 3 – Assessment Guidelines.

1.1.03 Qualification Employability Skills Statements

1.3 Qualification Employability Skills Statements

The Employability Skills facets for each AQF level are described below. These are broad industry requirements that may vary depending on qualification packaging rules and electives selected.

Employability Skills Summary for all Qualifications at AQF Level 2

The following table contains a summary of the Employability Skills as identified by the Gas Industry for all UEG11 Gas Training Package qualifications at AQF level 2. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Communication
Collect, organise and understand information related to the work task and its relevant safety procedures
Communicate ideas and information to enable confirmation of work requirement and specifications
Co-operate with other workers/customers and report outcomes and/or any problems
Access, read and comprehend safety instructions and procedures
Share information via speech and in writing
Prepare time sheets
Teamwork
Work with others to generate and review ideas
Work effectively as an individual and as a member of a team
Work with others and in a team to identify work needs and review ideas against those needs
Relate to people from a range of social, cultural and ethnic backgrounds and physical

© Commonwealth of Australia, 2025 Powering Skills Organisation

and mental abilities
Contribute to a positive culture of compliance within an organisation
Develop and maintain networks for the implementation and maintenance of industry knowledge, standards and requirements
Provide feedback
Problem Solving
Apply lateral thinking ideas to generate solutions in response to work problems
Anticipate or clarify problems to avoid interruptions to work flows and processes
Identify, assess and prioritise work risks to maintain efficiency, quality, productivity and work place safety at all times
Initiative & Enterprise
Identify and comply with all requirements and standards for work in the Gas industry
Apply enterprise best practice and quality systems
Interact effectively with both internal and external industry stakeholders
Initiate and follow through on the implementation of industry standards in the workplace
Planning & Organising
Plan and organise activities including the maintenance and layout of own worksite and obtain equipment and materials to avoid work flow interruptions or wastage
Identify related industry compliance requirements
Maintain relevant industry and work records
Establish clear implementation goals and deliverables
Collect, analyse and organise work task information
Apply time management prioritising techniques
Self Management
Plan own work within given task parameters
Set, monitor and satisfy personal work goals

© Commonwealth of Australia, 2025 Powering Skills Organisation

Accept responsibility for given tasks
Apply systematic and effective time management
Learning
Satisfy the competency requirements for the job
Maintain current knowledge of tools, devices, instruments, materials, work practices and systems
Seek learning opportunities
Take control and manage own learning
Adopt an open approach to Australian ideas and techniques
Commit to and promote a culture of continuous learning
Set realistic learning goals for self development
Monitor and respond to learning process achievements
Technology
Use workplace technology related to the particular work tasks including tools, devices, instruments and materials
Attain and maintain required technical accreditation/authority under the industry standards
Attain and maintain IT skills relevant to the Gas industry
Be willing to gain knowledge and skills relevant to Australian and emerging technologies

Employability Skills Summary for all Qualifications at AQF Level 3

The following table contains a summary of the Employability Skills as identified by the Gas Industry for all UEG11 Gas Training Package qualifications at AQF level 3. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Communication
Collect, organise and understand information related to the work task and its relevant safety procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

Communicate ideas and information to enable confirmation of work requirement and specifications
Communicate information using drawing, diagrams, schedules and manuals
Communicate and/or report work outcomes and/or any problems
Communicate ideas, information and advice to co-workers/clients to enable confirmation of product/work requirements and specifications
Communicate effectively in oral and written form
Access, read and comprehend safety instructions and procedures
Collect, organise and understand information related to a work task and its relevant safety procedures
Undertake negotiations if there are conflicts in work requirements and/or priorities
Share industry information
Document work quotations and tender support schedules
Prepare time sheets
Prepare documentation on particular work tasks including evaluations, reports, timesheets and costings
Prepare and present formal reports to clients and/or co-workers
Teamwork
Work with others to generate ideas and review
Work effectively as an individual and as a member of a team
Work with others and in a team to identify work needs and review ideas against those needs
Work with other and in a team to evaluate and report on work tasks and outcomes
Work with others and in a team to present information to a client and/or co-worker
Relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
Influence individuals and teams
Develop and maintain networks for implementation and maintenance of industry

© Commonwealth of Australia, 2025 Powering Skills Organisation

standards in relation to workplace computer systems
Develop and maintain networks for the implementation and maintenance of industry knowledge, standards and requirements
Coach/mentor others and provide feedback
Problem Solving
Apply lateral thinking ideas to generate solutions in response to work problems
Apply operational research and research management skills
Clarify and identify work issues and apply processes to avoid interruptions to work flow/processes
Clarify problems and enterprise ideas to avoid interruptions to work flow/processes
Use testing techniques to anticipate or clarify problems to avoid interruptions to work flows and process
Generate ideas and alternatives
Analyse information to identify opportunities to develop solutions
Identify, assess and prioritise work risks to maintain efficiency, quality, productivity and work place safety at all times
Initiative & Enterprise
Recognise and respond to circumstances outside instructions or personal competence
Be proactive and apply strategies to overcome work blockages
Adopt proactive relationships with clients and co-workers
Identify and comply with all requirements and standards for work in the Gas industry
Apply enterprise best practice and quality systems
Generate ideas and translate into workplace actions and outcomes
Interact effectively with both internal and external industry stakeholders
Initiate and follow through on the implementation of the industry standards in the workplace
Translate ideas into action

© Commonwealth of Australia, 2025 Powering Skills Organisation

Planning & Organising
Plan and organise activities including the maintenance and layout of own worksite and obtain equipment and materials to avoid work flow interruptions or wastage
Plan and organise activities to enable choices of maintenance methods of equipment, tools and related work documentation
Plan activities to enable choice of analysis/testing techniques of work outcomes and systems
Develop industry work plans including key performance indicators
Use mathematical ideas and techniques to correctly complete measurements, calculate quantities, estimate material, labour and overhead requirements and accurately cost the product/service
Use computing capabilities that enable the use of mathematical ideas and techniques to correctly complete measurements, calculate quantities, estimate material, labour and overhead requirements and accurately cost the product/service
Identify related industry compliance requirements
Identify, access and allocate required implementation resources
Maintain relevant industry and work records
Maintain relevant industry/work record systems
Maintain industry related records
Understand computer systems, their relationships and applications in the workplace
Establish clear implementation goals and deliverables
Monitor and optimise resource utilisation
Self Management
Plan own work within given task parameters
Set, monitor and satisfy personal work goals
Accept responsibility for given tasks
Clarify and confirm work instructions
Clarify own roles, goals, prerogatives and limitations in relation to the industry

© Commonwealth of Australia, 2025 Powering Skills Organisation

Take responsibility for industry obligations
Evaluate and monitor own performance
Apply systematic and effective time management
Learning
Satisfy the competency requirements for the job
Maintain current knowledge of tools, devices, instruments, materials, work practices and systems
Seek learning opportunities
Provide technical instruction and learning assistance to assigned apprentices, trainees or other less experienced workers
Take control and manage own learning
Adopt an open approach to Australian ideas and techniques
Commit to and promote a culture of continuous learning
Set realistic learning goals for self development
Monitor and respond to learning process achievements
Technology
Use workplace technology to communicate with the client, document and present information
Use electronic information systems to communicate with co-workers and/or other related personnel
Use workplace technology related to the particular work tasks including tools, devices, instruments and materials
Use work place technology to collate, organise and maintain work documentation and information
Attain and maintain required technical accreditation/authority under the industry standards
Attain and maintain IT skills relevant to the Gas industry
Be willing to learn Australian IT skills
Be willing gain knowledge and skills relevant to Australian and emerging

Employability Skills Summary for all Qualifications at AQF Level 4

The following table contains a summary of the Employability Skills identified by the Gas Industry for all UEG11 Gas Training Package qualifications at AQF level 4. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Communication
Collect, organise and understand information related to the work task and its relevant safety procedures
Communicate ideas and information to enable confirmation of work requirement and specifications
Communicate information using drawing, diagrams, schedules and manuals
Communicate and/or report work outcomes and/or any problems
Communicate effectively in oral and written form
Access, read and comprehend safety instructions and procedures
Undertake negotiations if there are conflicts in work requirements and/or priorities
Share industry information
Share essential business information
Document work quotations and tender support schedules
Process approvals/authorities for industry activities
Prepare time sheets
Prepare documentation on particular work tasks including evaluations, reports, timesheets and costings
Prepare and present formal reports to clients and/or co-workers or other related personnel
Teamwork
Work with others by recognising dependencies and using co-operative approaches to optimise work flow and productivity

© Commonwealth of Australia, 2025 Powering Skills Organisation

Work with others to generate ideas and review
Work effectively as an individual and as a member of a team
Work with others to identify work needs and review ideas against those needs
Work with others to evaluate and report on work tasks and outcomes
Work with others to present information to a client and/or co-worker(s)
Relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
Influence individuals and teams
Develop and maintain networks for the implementation and maintenance of industry knowledge, standards and requirements
Coach/mentor others and provide feedback
Problem Solving
Use testing and analysis techniques to anticipate and/or clarify problems and plan around them to avoid interruptions to work flows/processes
Apply lateral thinking to generate solutions in response to work problems
Apply analytical techniques to anticipate design issues and product needs
Apply operational research and research management skills
Clarify and identify work issues and apply processes to avoid interruptions to work flow/processes
Analyse information to identify opportunities to develop solutions
Identify, assess and prioritise work risks to maintain efficiency, quality, productivity and work place safety at all times
Initiative & Enterprise
Recognise and respond to circumstances outside instructions or personal competence
Create Australian opportunities for the enterprise
Be proactive and apply strategies to overcome work blockages
Adopt a proactive relationship with clients/co-workers

© Commonwealth of Australia, 2025 Powering Skills Organisation

Identify work needs by applying research techniques
Identify and comply with all requirements and standards for work in the Gas industry
Apply best practice and quality systems
Apply computer systems and applications to ensure quality and efficiency of work tasks and documentation
Generate ideas and translate into workplace actions and outcomes
Interact effectively with both internal and external industry stakeholders
Initiate and follow through on the implementation of industry standards in the workplace
Translate ideas into action
Planning & Organising
Plan and organise activities including the maintenance and layout of own worksite and obtain equipment and materials to avoid work flow interruptions or wastage
Plan and organise activities to enable choices of maintenance methods of equipment, tools and related work documentation
Plan activities to enable choice of analysis/testing techniques of work outcomes and systems
Plan and organise activities to enable the most appropriate testing/analysis procedures to be implemented
Plan activities to enable choice of the best computer systems/programs for application on a particular work task
Develop industry work plans including key performance indicators
Use mathematical ideas and techniques to correctly complete measurements, calculate quantities, estimate material, labour and overhead requirements and accurately cost the product/service
Use computing capabilities that enable the use of mathematical ideas and techniques to correctly complete measurements, calculate quantities, estimate material, labour and overhead requirements and accurately cost the product/service
Identify related industry compliance requirements
Identify, access and allocate required implementation resources

© Commonwealth of Australia, 2025 Powering Skills Organisation

Maintain relevant industry and work records
Maintain relevant industry/work record systems
Maintain industry related records
Understand computer systems, their relationships and applications in the workplace
Establish clear implementation goals and deliverables
Monitor and optimise resource utilisation
Self Management
Plan own work within given task parameters
Maintain current knowledge of computer systems and capabilities
Set, monitor and satisfy personal work goals
Accept responsibility for given tasks
Clarify and confirm work instructions
Clarify own roles, goals, prerogatives and limitations in relation to the industry
Take responsibility for industry obligations
Evaluate and monitor own performance
Apply systematic and effective time management
Learning
Satisfy the competency requirements for the job
Maintain current knowledge of tools, devices, instruments, materials, work practices and systems
Maintain current knowledge of computer systems programs and there relevant applications
Seek learning opportunities
Provide technical instruction and learning assistance to assigned apprentices, trainees or other less experienced workers
Take control and manage own learning

© Commonwealth of Australia, 2025 Powering Skills Organisation

Adopt a open approach to Australian ideas and techniques
Commit to and promote a culture of continuous learning
Set realistic learning goals for self development
Monitor and respond to learning process achievements
Technology
Use workplace technology to document and present information
Use workplace technology to communicate with clients, co-workers and/or other related personnel
Use workplace technology related to particular work tasks including tools, equipment, devices, instruments and materials
Use workplace technology for data analysis/investigation
Attain and maintain required technical accreditation/authority under the industry standards
Attain and maintain IT skills relevant to the Gas industry
Be willing to learn Australian IT skills
Use workplace technology to collate, organise and maintain work documentation and information
Use computer applications as a management tool

Employability Skills Summary for all Qualifications at AQF Level 5

The following table contains a summary of the Employability Skills identified by the Gas Industry for all UEG11 Gas Training Package qualifications at AQF level 5. The Employability Skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Communication
Collect, organise and understand information related to the work task and its relevant safety procedures
Communicate ideas and information to enable confirmation of work requirement and specifications
Communicate information using drawing, diagrams, schedules and manuals

© Commonwealth of Australia, 2025 Powering Skills Organisation

© Commonwealth of Australia, 2025 Powering Skills Organisation

The Employability Skills described above are representative of the Gas Industry in general and may not reflect enterprise specific requirements or job roles. Learning and assessment strategies for each qualification should be based on the requirements of the units of competency comprising the qualification and the Assessment Guidelines, Section 1.3.00.

1.1.04 Qualification Scope, Work Function and Environment

1.4 Qualification Scope, Work Function and Environment

The qualifications described in this section of the Training Package have been designed and structured by industry in consultation with a range of stakeholders including regulators, RTOs and the community. They address identified work functions and work environments and facilitate worthwhile career pathways within the industry.

The qualification structures that follow must be read in conjunction with Section 1.2.03 — Competency Standards, Unit Construction.

UEG20114 Certificate II in Gas Supply Industry Operations

Description and scope of the qualification

This qualification provides competencies for entry level gas supply industry activities in transmission, distribution pipeline and cylinder operations and functions as outline below:

- Distribution pipeline activities include laying distribution infrastructure (including pipes), developing gas pipeline infrastructure and reading gas meters in industrial, commercial and rural environments, on pipelines, associated facilities and equipment; and control centres.
- Transmission pipeline activities include right of way preparation, rigging operations, hydrotesting, laying pipelines, operating transmission pipeline construction plant and equipment and conducting minor mechanical maintenance.
- Gas cylinder operations for domestic and industrial supply of gaseous fuels include checking, testing, maintaining and filling of gaseous fuel cylinders and the storage, handling, loading, transportation and distribution of cylinders in accordance with the relevant Australian Standards and regulatory requirements

Typical work function	Typical work environment
Laying utilities distribution infrastructure including pipes, developing gas pipeline infrastructure; reading utilities meters.	Includes working and carrying out activities in industrial, commercial and rural environments on pipelines, control centres and associated facilities and equipment.

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEG30114 Certificate III in Gas Supply Industry Operations

Description and scope of the qualification

This qualification provides competencies to conduct Gas Supply Industry activities including installation, maintenance, fault find and repair, operations of distribution and transmission gas pipelines, cylinders and associated equipment.

Typical work function	Typical work environment
Undertaking and supervising work on a Gas Industry distribution and transmission pipelines; billing processes; cathodic protection processes and system operations processes.	Includes working and carrying out activities in industrial, commercial and rural environments on pipelines, control centres and associated facilities and equipment.

UEG40114 Certificate IV in Gas Supply Industry Operations

Description and scope of the qualification

This qualification provides competencies to supervise and conduct Gas Supply Industry activities including installation, diagnostics and maintenance of distribution and transmission gas pipelines, cylinders and associated equipment.

Typical work function	Typical work environment
Management of processes for the transmission and distribution of natural gas and the storage and processing of LPG. This includes gas distribution control centre operations and transmission pipeline operations.	Includes working and carrying out activities in industrial, commercial and rural environments on pipelines, control centres and associated facilities and equipment.

UEG50114 Diploma of Gas Supply Industry Operations

Description and scope of the qualification

This qualification provides competencies to manage Gas Supply Industry activities including management of projects covering the installation, diagnostics and maintenance of distribution and transmission gas pipelines and associated equipment.

Typical work function	Typical work environment
Performing management functions such as promotion of continuous improvement, managing gas system projects, managing physical resources and OHS systems.	Includes managing activities in industrial, commercial and rural environments on gas pipelines, control centres and associated facilities and equipment.

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEG60114 Advanced Diploma of Gas Supply Industry Operations

Description and scope of the qualification

This qualification provides competencies to design and manage Gas Supply Industry activities and projects.

Typical work function	Typical work environment
Performing management functions such as managing gas system environmental compliance, managing financial and physical resources, planning and implementing systems, managing customer services.	Includes managing activities in industrial, commercial and rural environments on gas pipelines, control centres and associated facilities and equipment.

© Commonwealth of Australia, 2025 Powering Skills Organisation

1.1.05 Qualifications and Packaging Rules

1.5 Qualifications and Packaging Rules

The following table details the full range of qualifications in this version of the Gas Industry Training Package, the completion requirements for each qualification and their respective structure and composition. These qualifications have been designed to comply with the National Quality Council's Packing Rules for Flexibility initiative.

Each qualification is described by the number of core and elective weighted points required for completion and issue of the qualification under the AQF.

Respective qualifications have at least two Elective Groups from which elective competencies may be drawn. Where a range of weighting points is set for a group e.g. 60-120, the lower number indicates both the minimum weighting points required from that particular elective group for completion and the larger number is the maximum required weighting points which may be selected from that group for a valid qualification completion.

Where the lower number for a group is 0 no competencies are required to be selected from that group, however, sufficient weighted points must be selected from other groups to meet the required total elective weighted points for completion.

Note: Individuals may select elective units to a weighting point total greater than the maximum specified for completion from a particular group. Where this is done weighted points in excess of the specified maximum cannot be counted for completion of the qualification.

Where a Competency Standard Unit has pre-requisite Competency Standards Unit requirements, such pre-requisite units shall be completed and their weighted points counted toward qualification completion.

Full details of each qualification follow Table 1 -Qualification Completion Values, below.

Table 1 – Qualification Completion Values

Qualification Code	Qualification Title	Total Core	Total Elective	Elective Units Groups					
				Group A	Group B	Group C	Group D	Group E	Group F

1.1.06 Skill Sets

1.6 Skill Sets

Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording ‘these competencies meet [insert skill set title or identified industry area] need’ on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See the 2013 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment. See:
http://www.aqf.edu.au/wp-content/uploads/2013/05/AQF-2nd-Edition-January-2013.pdf

Identified Skill Sets

There are no identified skill sets in this Training Package.

1.2 Competency Standards

Volume 1 Part 2

Competency Standards

1.2.00 Introduction

Volume 1 Part 2 Competency Standards

2.0 Introduction

This section outlines how the competency standards were developed in broad terms. The industry coverage they can apply to, as well as the format and construction of the individual Competency Standard Units is provided. Matters related to language, literacy and numeracy, access and equity and the regulatory environment in which the units may apply is also covered, as is the interrelated Essential Knowledge and Associated Skills. Competency Standard Units in this Training Package are interrelated and linked with the Definitions/Glossary and Essential Knowledge and Associated Skills sections. No Competency Standard Unit can be used in isolation or exported without these interrelated components.

A definitions/glossary to complement the Competency Standard Units is included in Volume 2 Part 1. It provides a description of the words used in the Competency Standard Units to define terms in more detail. It also forms an integral part of each unit. An Essential Knowledge and Associated Skills section follows the Competency Standard Units and also forms an integrated part of each unit.

Included in this section is:

- an index of the Competency Standard Units with their weighting points
- an index of imported Competency Standard Units and their weighting points
- A mapping of Competency Standard Units in this version of the Training Package and previous versions

1.2.01 Development of Competency Standards for the Gas Industry

2.1 Development of Competency Standards for the Gas Industry

The inaugural National Steering Committee Workshop held in March 1996 developed a framework for the Australian Gas Industry by analysis of existing information and the application of the workshop participants' industry knowledge. The National Steering Group Committee took a broad view of the Gas Industry in order to develop a comprehensive framework that covered all industry and industry-related activities at the conceptual level.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Functional workshops were conducted during July and August of 1996. The information obtained from these workshops formed the basis for the development of a comprehensive listing of competency standards for functions performed in the Gas Industry.

The draft standards were verified through invited comment from various Industry representatives and additional workshops held in Sydney and Perth in late 1996 and January 1997.

The first release of the Gas Industry Training Package (UTG98) was October 1998, with a subsequent update made to the Training Package in October 2001.

1.2.02 Industry Coverage

2.2 Industry Coverage

The Australian Gas Industry is described by ANZIC as the class that consists of units mainly engaged in the manufacture of town gas from coal and/or petroleum or in the distribution of manufactured town gas, natural gas or liquefied petroleum gas through a system of mains, including pipelines operated "on own account". This Training Package delivers competencies and qualifications.

In terms of the regulatory environment, The Australian Competition and Consumer Commission regulates most gas transmission pipelines in Australia, with the exception of Western Australia, which have a State-based regulator. Regulators based in each State jurisdiction, except the Northern Territory, regulate gas distribution networks.

Since implementation of the 1997 Natural Gas Pipelines Access Agreement, most Australian gas distribution networks and pipelines have been regulated in accordance with the National Third Party Access Code for Natural Gas Pipeline Systems (the National Gas Code).

The Australian Gas Associations describe the National Gas Code and its ramifications to industry as follows (AGA website, March 2003):

The National Gas Code is a significant part of national competition policy reforms, and aims to promote free and fair trade in gas. The code sets out principles for access to Australian Natural Gas transmission and distribution pipeline services. It allows third parties to obtain access to pipelines within an independent regulatory framework, with arbitration available to resolve disputes.

Under the code, regulated gas distribution network and pipeline operators must submit an access arrangement to an independent regulator for approval. An access arrangement must set out the terms and conditions of access, including reference tariffs for reference services. The regulator undertakes a consultation process in deciding whether to approve a proposed access arrangement, and may require amendments. These access arrangements are subject to periodic review.

The National Gas Code and its application are core issues of concern for Australian Gas Association members.

© Commonwealth of Australia, 2025 Powering Skills Organisation

The Gas Industry Training Package describes the skills and knowledge which pertain to vocations within the field of gas transmission, distribution and the storage and transportation of LPG. It offers a choice and range of qualifications or Competency Standard Units through appropriate training for organisations and personnel seeking formal recognition of respective skills and knowledge. It is recognised that other training pathways may exist in the form of other national Training Packages and arrangements.

The prime objective of the Gas Industry Training Package is to establish the standards of performance in terms of skills and knowledge required for safe, productive and satisfying work covering a range of work activities. RTOs can develop appropriate industry-approved training programs to meet these objectives or indeed to meet other Training Package objectives. The determining factor will be choice — choice of Training Package, and choice of provider — RTO. Where New Apprenticeships apply, choice in relation to funding to RTOs will be guided by policy enunciated by State and Territory Training Authorities.

Other Industry Standards

It is recognised that the Gas Industry Standards do not cover all the competencies, which are likely to be required and applied within organisations and workplaces. Nationally endorsed competency standards from other industries can be used where appropriate, provided they are imported in accordance with the criteria outlined in this Training Package.

Language, Literacy, Numeracy

The competency standards have been written to reflect the technical and operational needs of industry and include appropriate language, literacy and numeracy requirements. Please refer to Volume 2 Part 3 for more information on these requirements.

Access and Equity

The knowledge and skills required of employees in the Gas Industry are comprehensive. The Competency Standards reflect the range of knowledge and skills required and are written in a non-exclusive manner so as to increase the participation rates of under-represented groups and to minimise unintentional bias.

Contextualisation

In the Competency Standard Units, ‘notes’ have been placed against respective aspects that include scope, Performance Criteria, Range Statement and Essential Knowledge and associated skills and other related sections. The insertion of these ‘notes’ is primarily to provide users and support material developers with examples of the form and type of technical content principles, technology, equipment or processes required. The examples should be treated as information that adds clarity and provides guidance regarding the depth and breadth of learning objectives.

© Commonwealth of Australia, 2025 Powering Skills Organisation

As the type, form, process or technique of technology and equipment may change it is expected and indeed incumbent on RTOs to be current in the content and delivery arrangements. It is therefore appropriate for RTOs to use the notes as advisory information. In these instances RTOs should aim to accommodate the adoption of improved and new technologies in the scope/range and essential knowledge and associated skills of the Competency Standard Units by varying the context examples given in the referenced 'notes' to the Performance Criteria, Range Statement and Essential knowledge and associated skills. However, the contextualisation must not be such that the outcome of the Competency Standard Units is altered in any way.

Where contextualisation of the notes varies the outcome of the Competency Standard Unit and its related content, RTOs should consult with E-Oz Energy Skills Australia to explore options for incorporating and/or covering the new arrangements, so that currency of the Training package is maintained.

It should be noted that any need to alter a Competency Standard Units from its intended outcome requires a new or varied Competency Standard Units. Such changes are to be undertaken through the continuous improvement processes required of Training Packages, which in relation to this Training Package is managed by E-Oz Energy Skills Australia.

Also refer to Section 1.1.01 — Gas Industry Qualifications Framework.

1.2.03 Unit Construction

2.3 Unit Construction

Competency Standard Units that have been successfully attained by learners are to be acknowledged. Some units have been constructed in a manner that will allow reporting without further explanation. However, there are units from related Utilities Industry Training Packages that have been constructed in a manner that requires further reporting of relevant transferable information, i.e. a reporting statement of information that is meaningful for maximum recognition and skills transfer. Generally this would be any endorsement or subset of the unit, as well as detailed formal advice about essential knowledge and skills.

If, in future developments of this Training Package, endorsements are included, further information will be provided. Information can be found in the Gas Industry Training Package or the Electrotechnology Training Package.

Pre-requisites

It is important to note that in relation to training delivery of pre-requisites to Competency Standard Units, training and formative staged assessments may be delivered for all, or part of the sequence of Competency Standard Units concurrently and at a different stage to the final assessment of each unit. However, the final assessment event and judgement for attributing competence for each unit shall follow the pre-requisite sequence.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Exporting CSUs from this Training Package

No Standard Competency Unit from this Training Package is to be used in isolation or exported without including all relevant interrelated components such as definitions, glossary, essential knowledge and skills, matters related to language, literacy and numeracy, access, equity, cultural diversity or any regulatory arrangements that apply.

1.2.04 Assessment Guidelines

2.4 Assessment Guidelines

The Gas Industry has developed guidelines for the assessment of these standards. The guidelines are included Section 1.3.00 of this Training Package.

1.2.05 National Qualifications

2.5 National Qualifications

The Gas Industry has identified qualifications, which are linked to and use the competency standards. These are detailed in Section 1.1.00 — Qualifications Framework of this Training Package.

Included in the Gas Industry Qualifications Framework are details of the content and composition of the qualifications, the, completion requirements and the rules for structuring and flexibility arrangements and the qualifications structure for each qualification. Further, there is a full description provided for each qualification, which explains its application and the grouping of units making up the respective qualification.

1.2.06 Regulatory Arrangements - Gas Industry

2.6 Regulatory Arrangements — Gas Industry

The Gas Industry is subject to a high level of regulation and codes of practice related to the supply of natural gas and LPG and the operation of equipment, apparatus and the like in the supply of such services. The regulations and codes of practice are based on principles of the supply of natural gas and LPG involving equipment, apparatus and systems, public safety, safety and health of individuals who work on systems and apparatus/equipment and other codes and practices related to the environment in which they are installed and maintained.

Competency Standard Units in this Training Package have been developed in consultation with the relevant industry technical and business Regulators so that, where appropriate, these align to the requirements of legislation, regulations and mandated codes of practice.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Licensing and regulatory authorities will recognise a range of Competency Standard Units contained within this Training Package for respective licensing, registration or accreditation purposes. In constructing these Competency Standard Units, E-Oz Energy Skills Australia and respective Regulators have given consideration to the link between the delivery and assessment of Competency Standard Units and the respective regulatory requirements. It is expected that the assessment and preferred training regime which meets a Competency Standard Unit's delivery and assessment requirements will therefore meet the relevant regulatory requirements.

In recognising this interrelationship, every effort has been made to ensure currency in regulatory requirements, thus RTOs must ensure they are observed. This includes utilising any recommended industry training program designed to meet Competency Standard Units which are related to licensing/registration applications.

As RTO's registered under the Australian Quality Training Framework (AQTF) or the National Vocational Education and Training Regulator (NVR) requirements are given full responsibility for deeming a learner/apprentice competent for the respective Competency Standard Units within this Training Package. The RTO shall also provide all the necessary documentation (including results preferably percentile based) as required by the regulatory authority to support an application of eligibility for a relevant license, registration or accreditation.

It should be noted that regulatory authorities have advised that the quality of Registered Training Organisations awarding Competency Standard Units for regulatory purposes will be monitored. Where deficiencies are identified, regulators may deem it necessary to introduce appropriate actions, including an additional 'external' assessment following the issuing of the qualification to satisfy eligibility requirements for issuing the licence.

Statutes, Regulations and Codes of Practice

The Gas Industry is covered by Federal, State and Territory Gas Safety, Telecommunications, Occupational Health and Safety and Work Cover Acts as well as other statutes, regulations, industrial instruments, codes of practice, guidelines and advisory standards, Australian/New Zealand and International Standards.

Information relevant to the Gas Industry sector can be found in the following Internet sites:

1.2.07 Maintenance of Competency Standards

2.7 Maintenance of Competency Standards

The Gas Industry competency standards were developed by, and are therefore owned by, the industry. However, it is acknowledged that copyright ownership with respect to this material rests with the Commonwealth.

The competency standards must be maintained so that they reflect the ongoing needs of the Gas Industry and respond in a timely manner to changed technologies and circumstances.

The parties (as detailed in the Introduction to this Training Package) who constitute the Gas Industry sector of the ElectroComms and EnergyUtilities Industry Skills Council share responsibility for the maintenance of the Competency Standards:

- Competency Standards maintenance will be coordinated and managed by ElectroComms and EnergyUtilities Industry Skills Council Ltd trading as E-Oz Energy Skills Australia or its successor.
- Suggestions and proposals for changes from all parties are welcomed. These should be documented and submitted to E-Oz Energy Skills Australia in accordance with its policies and procedures.
-

1.2.08 What is Competency?

2.8 What is Competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Contextualisation of Units of Competency by RTOs

Registered Training Organisations (RTOs) may contextualise units of competency in this endorsed Training Package to reflect required local outcomes. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can include specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency, or reduce its portability.
- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure—but only where these expand the breadth of the competency and do not limit its use.

Components of Units of Competency

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

Unit Title

The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

Unit Descriptor

The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

Employability Skills

This sub-section contains a statement that the unit contains Employability skills.

Pre-requisite Units (optional)

If there are any units of competency that must be completed before the unit, these will be listed.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Application of the Unit

This sub-section fleshes out the unit of competency's scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

Competency Field (Optional)

The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

Sector (optional)

The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

Elements of Competency

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

Performance Criteria

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

Required Skills and Knowledge

The essential skills and knowledge are either identified separately or combined. Knowledge identifies what a person needs to know to perform the work in an informed and effective manner. Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Range Statement

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Evidence Guide

The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;
- how consistency in performance can be assessed over time, various contexts and with a range of evidence; and
- the required underpinning knowledge and skills

Employability Skills in Units of Competency

The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.

Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

How Employability Skills relate to the Key Competencies

The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

Employability Skills	**Mayer Key Competencies**
Communication	Communicating ideas and information
Teamwork	Working with others and in teams
Problem solving	Solving problems Using mathematical ideas and techniques

© Commonwealth of Australia, 2025 Powering Skills Organisation

Initiative and enterprise	
Planning and organising	Collecting, analysing and organising information Planning and organising activities
Self-management	
Learning	
Technology	Using technology

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

Explicitly embedding Employability Skills in units of competency

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

Sample unit of competency components showing Employability Skills

The following table shows the sequence of a unit of competency, and each cell contains text taken from a range of units. It provides examples of where and how various Employability Skills could be embedded in each component.

Please note that in the example, the bracketed Employability Skills are provided for clarification only and would not be present in units of competency within this Training Package.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Unit Title	Give formal presentations and take part in meetings (Communication)
Unit Descriptor	This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. (Initiative and enterprise)
Element	Proactively resolve issues. (problem solving)
Performance Criteria	Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. (Planning and organising)
Range Statement	Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (technology) Modify activities depending on differing workplace contexts, risk situations and environments. (Learning)
Required Skills and Knowledge	Work collaboratively with others during a fire emergency. (teamwork) Instructions, procedures and other information relevant the maintenance of vessel and port security. (Communication)
Evidence Guide	Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to: assess response options to identified crime-prevention needs and determine the optimal action to be implemented in consultation with relevant others, design an initiative to address identified issues. (Initiative and enterprise).

Employability Skills Summaries and Units of Competency

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

Please refer to Volume 1 Part 1 Qualification Framework for the relevant Employability Skill Summary for qualifications in this Training Package

© Commonwealth of Australia, 2025 Powering Skills Organisation

	systems and processes					UEG50114; UEG60114
BSBFLM311C	Support a workplace learning environment	40	3	Nil		UEG30114; UEG40114
BSBFLM312C	Contribute to team effectiveness	40	3	Nil	UEG30114	UEG40114
BSBINM401A	Implement workplace information system	40	4	Nil		UEG40114
BSBINM501A	Manage an information or knowledge management system	50	5	Nil		UEG50114; UEG60114
BSBINM601A	Manage knowledge and information	80	6	Nil		UEG60114
BSBINN301A	Promote innovation in a team environment	40	3	Nil		UEG30114; UEG40114
BSBINN502A	Build and sustain an innovative work environment	50	5	Nil		UEG50114; UEG60114
BSBINN601B	Manage organisational change	60	6	Nil		UEG60114
BSBLED401A	Develop teams and individuals	40	4	Nil		UEG40114
BSBLED501A	Develop a workplace learning environment	60	5	Nil		UEG50114; UEG60114
BSBMGT402A	Implement operational plan	40	4	Nil	UEG40114	

© Commonwealth of Australia, 2025 Powering Skills Organisation

BSBMGT403A	Implement continuous improvement	40	4	Nil		UEG40114
BSBMGT502B	Manage people performance	70	5	Nil		UEG40114
BSBMGT515A	Manage operational plan	60	5	Nil		UEG50114; UEG60114
BSBMGT516C	Facilitate continuous improvement	60	5	Nil		UEG50114; UEG60114
BSBWHS301A	Maintain workplace safety	40	3	Nil	UEG30114	UEG40114
BSBWHS303A	Participate in WHS hazard identification, risk assessment and risk control	50	3	Nil		UEG30114; UEG40114
BSBWHS501A	Ensure a safe workplace	60	5	Nil		UEG50114; UEG60114
BSBWHS601A	Apply legislative frameworks for WHS	40	6	Nil		UEG60114
BSBWHS602A	Facilitate WHS activities	50	6	Nil		UEG60114
BSBWHS603A	Implement WHS risk management	50	6	Nil		UEG60114
BSBWOR301B	Organise personal work priorities and development	40	3	Nil	UEG30114	UEG40114
BSBWOR401A	Establish effective workplace relationships	50	4	Nil		UEG40114
BSBWOR402A	Promote team effectiveness	50	4	Nil	UEG40114

BSBWOR404B	Develop work priorities	40	4	Nil	UEG40114	
BSBWOR501B	Manage personal work priorities and professional development	60	5	Nil		UEG50114; UEG60114
BSBWOR502B	Ensure team effectiveness	60	5	Nil		UEG50114; UEG60114

CPC08 Construction, Plumbing and Services Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
CPCCLDG3001A	Licence to perform dogging	30	3	Nil		UEG20114; UEG30114; UEG40114
CPCCLRG3001A	Licence to perform rigging basic level	40	3	CPCCLDG3001A		UEG20114; UEG30114; UEG40114
CPCCLRG3002A	Licence to perform rigging intermediate level	40	3	CPCCLRG3001A		UEG30114; UEG40114
CPCCOHS1001A	Work safely in the construction industry	10	1	Nil		UEG20114; UEG30114; UEG40114
CPCPCM4012A	Estimate and cost work	40	4	Nil		UEG40114

CPP07 Property Services Training Package

© Commonwealth of Australia, 2025 Powering Skills Organisation

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
CPPFES2005A	Demonstrate first attack firefighting equipment	15	2	Nil		UEG20114; UEG30114; UEG40114

HLT Health Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
HLTAID001	Provide cardiopulmonary resuscitation	10	2	Nil		UEG20114; UEG30114; UEG40114
HLTAID003	Provide first aid	10	3	Nil		UEG20114; UEG30114; UEG40114
HLTAID005	Provide first aid in remote situations	10	3	Nil		UEG20114; UEG30114; UEG40114
HLTHSE204D	Follow safe manual handling practices	20	2	Nil		UEG20114; UEG30114; UEG40114

MEM05 Metal and Engineering Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective

© Commonwealth of Australia, 2025 Powering Skills Organisation

MEM05004C	Perform routine oxy acetylene welding	20	2	Nil		UEG20114; UEG30114; UEG40114
MEM05012C	Perform routine manual metal arc welding	20	2	Nil		UEG20114; UEG30114; UEG40114
MEM05015D	Weld using manual metal arc welding process	40	3			UEG30114; UEG40114
MEM05045B	Perform pipe welds to code standards using manual metal arc welding process	60	4			UEG40114

MSA07 Manufacturing Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
MSAPMOHS110A	Follow emergency response procedures	20	1	Nil		UEG20114; UEG30114; UEG40114
MSAPMOHS205A	Control minor incidents	30	2	Nil		UEG20114; UEG30114; UEG40114
MSAPMOHS216A	Operate breathing apparatus	20	2	Nil		UEG20114; UEG30114; UEG40114

© Commonwealth of Australia, 2025 Powering Skills Organisation

MSAPMOHS217A	Gas test atmospheres	30	2	Nil		UEG20114; UEG30114; UEG40114
MSAPMOPS400A	Optimise process/plant area	60	4	MSAPMSUP390A		UEG40114
MSAPMPER200C	Work in accordance with an issued permit	20	2	Nil		UEG20114; UEG30114; UEG40114
MSAPMPER201A	Monitor and control work permits	20	2	Nil		UEG20114; UEG30114; UEG40114
MSAPMPER202A	Observe permit work	20	2	Nil		UEG20114; UEG30114; UEG40114
MSAPMPER300C	Issue work permits	20	3	RIIRIS201A		UEG30114; UEG40114
MSAPMPER400A	Coordinate permit process	30	4	MSAPMPER300C		UEG30114; UEG40114
MSAPMSUP200A	Achieve work outcomes	30	2	Nil		UEG30114; UEG40114
MSAPMSUP210A	Process and record information	30	2	Nil		UEG20114; UEG30114; UEG40114
MSAPMSUP240A	Undertake minor maintenance	30	2	Nil		UEG20114; UEG30114; UEG40114
MSAPMSUP303A	Identify equipment faults	40	3	Nil		UEG30114; UEG40114
MSAPMSUP390A	Use structured problem solving tools	40	3	Nil		UEG30114; UEG40114

© Commonwealth of Australia, 2025 Powering Skills Organisation

MSS11 Sustainability Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
MSS402061A	Use SCADA systems in operations	30	2	Nil		UEG20114; UEG30114; UEG40114
MSS402080A	Undertake root cause analysis	50	3	Nil		UEG30114; UEG40114

PMA08 Chemical, Hydrocarbons and Refining Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
PMAOHS211B	Prepare equipment for emergency response	20	2	Nil		UEG20114; UEG30114; UEG40114
PMAOHS310B	Investigate incidents	30	3	Nil		UEG30114; UEG40114
PMAOHS311B	Lead emergency teams	20	3	Nil		UEG30114; UEG40114
PMAOMIR210B	Control evacuation to muster point	20	2	Nil		UEG20114; UEG30114; UEG40114

© Commonwealth of Australia, 2025 Powering Skills Organisation

PMAOMIR346B	Assess and secure an incident site	30	3	Nil		UEG30114; UEG40114
PMAOMIR407B	Audit incident preparedness and established response systems	80	4	Nil		UEG40114
PMAOMIR418B	Coordinate incident response	40	4	Nil		UEG40114
PMAOMIR430B	Conduct and assess incident exercises	35	4	Nil		UEG40114
PMAOMIR444B	Develop incident containment tactics	40	4	Nil		UEG40114
PMAOMIR512B	Establish incident response preparedness and response systems	70	5	Nil		UEG50114; UEG60114
PMAOPS305B	Operate process control systems	60	3	Nil		UEG30114
PMAOPS312B	Undertake ship loading/unloading operations	40	3	Nil		UEG30114; UEG40114
PMAOPS330B	Communicate and monitor pipeline activities	40	3	Nil		UEG30114; UEG40114
PMAOPS402A	Respond to abnormal process situations	50	4	MSAPMSUP390A		UEG40114
PMAOPS405A	Operate complex control systems	80	4	Nil		UEG40114
PMAOPS410B	Monitor remote production facilities	40	4	Nil		UEG40114

© Commonwealth of Australia, 2025 Powering Skills Organisation

PMASUP311A	Operate communications hub	40	4	Nil		UEG40114
PMASUP410B	Develop plant documentation	30	4	Nil		UEG40114
PMASUP444A	Plan plant preparation and isolation	50	4	Nil		UEG40114

PMB07 Plastics, Rubber and Cablemaking Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
PMBWELD301B	Butt weld polyethylene plastic pipelines	20	3	Nil		UEG30114; UEG40114
PMBWELD302B	Electrofusion weld polyethylene pipelines	20	3	Nil		UEG30114; UEG40114

PMC10 Manufactured Mineral Products

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
PMC563081C	Carry out stock control	20	3	Nil		UEG30114; UEG40114

RII Resources and Infrastructure Industry Training Package

© Commonwealth of Australia, 2025 Powering Skills Organisation

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
RIICCM205D	Carry out manual excavation	10	2	Nil		UEG20114; UEG30114; UEG40114
RIICCM206D	Support plant operations	10	2	Nil		UEG20114; UEG30114; UEG40114
RIICCM207D	Spread and compact materials manually	10	2	Nil		UEG20114; UEG30114; UEG40114
RIICCM208D	Carry out basic levelling	10	2	Nil		UEG20114; UEG30114; UEG40114
RIICCM210D	Install trench support	15	2	Nil		UEG20114; UEG30114; UEG40114
RIICRC208D	Lay pipes	40	2	Nil		UEG20114; UEG30114; UEG40114
RIIHAN309D	Conduct telescopic materials handler operations	80	3	Nil		UEG30114; UEG40114

© Commonwealth of Australia, 2025 Powering Skills Organisation

RIIMPO304D	Conduct wheel loader operations	40	3	Nil		UEG30114
RIIMPO308D	Conduct tracked dozer operations	40	3	Nil		UEG20114; UEG30114; UEG40114
RIIMPO309D	Conduct wheeled dozer operations	40	3	Nil		UEG30114; UEG40114
RIIMPO318D	Conduct civil construction skid steer loader operations	70	3	Nil		UEG20114; UEG30114; UEG40114
RIIMPO319D	Conduct backhoe/loader operations	50	3	Nil		UEG30114; UEG40114
RIIMPO320D	Conduct civil construction excavator operations	80	3	Nil		UEG30114; UEG40114
RIIWHS202D	Enter and work in confined spaces	30	2	Nil		UEG20114; UEG30114; UEG40114
RIIWHS204D	Work safely at heights	20	2	Nil		UEG20114; UEG30114; UEG40114
RIIWHS205D	Control traffic with stop-slow bat	10	2	Nil		UEG20114
RIIWHS302D	Implement traffic management plan	20	3	Nil		UEG30114;

© Commonwealth of Australia, 2025 Powering Skills Organisation

						UEG40114
RIIRIS301D	Apply risk management processes	40	3	Nil		UEG40114
RIISAM201D	Handle resources and infrastructure materials and safely dispose of nontoxic materials	15	2	Nil		UEG20114; UEG30114; UEG40114
RIIWMG203D	Drain and dewater civil construction site	20	2	Nil		UEG20114; UEG30114; UEG40114

TLI07 Transport and Logistics Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective
TLIB2004A	Carry out vehicle inspection	20	2	Nil		UEG20114; UEG30114; UEG40114
TLIC2002A	Drive light rigid vehicle	40	2	Nil		UEG20114; UEG30114; UEG40114
TLIC2025A	Operate four wheel drive vehicle	40	2	Nil		UEG20114; UEG30114; UEG40114

© Commonwealth of Australia, 2025 Powering Skills Organisation

TLIC3003A	Drive medium rigid vehicle	40	3	Nil		UEG20114; UEG30114; UEG40114
TLIC3004A	Drive heavy rigid vehicle	40	3	Nil		UEG20114; UEG30114; UEG40114
TLIC3005A	Drive heavy combination vehicle	40	3	Nil		UEG20114; UEG30114; UEG40114
TLIC4006A	Drive multi-combination vehicle	40	4	Nil		UEG40114
TLIC4067A	Operate LP gas tanker	40	4	TLILIC3013A		UEG30114; UEG40114;
TLID2003A	Handle dangerous goods/hazardous substances	40	2	Nil		UEG20114; UEG30114; UEG40114
TLID2010A	Operate a forklift	40	2	Nil		UEG20114; UEG30114; UEG40114
TLID2016A	Load and unload explosives and dangerous goods	30	2	Nil		UEG20114; UEG30114; UEG40114
TLID3015A	Identify and label explosives and dangerous	20	3	Nil		UEG30114;

© Commonwealth of Australia, 2025 Powering Skills Organisation

	goods					UEG40114
TLID3023A	Use specialised liquid bulk gas transfer equipment	40	3	Nil		UEG30114; UEG40114
TLID3027A	Prepare for transport of dangerous goods	50	3	Nil		UEG30114; UEG40114
TLID3033A	Operate a vehicle-mounted loading crane	40	3	Nil		UEG20114; UEG30114; UEG40114
TLID3036A	Lift and move load using a mobile crane	40	3	Nil		UEG30114; UEG40114
TLIF2006A	Apply accident-emergency procedures	20	2	Nil		UEG20114; UEG30114; UEG40114
TLIF2010A	Apply Fatigue Management Strategies	30	2	Nil		UEG20114; UEG30114; UEG40114
TLIF2012A	Apply safe procedures when handling/transporting dangerous goods or explosives	30	2	Nil		UEG20114; UEG30114; UEG40114
TLIF3063A	Administer the implementation of fatigue management strategies	50	3	Nil		UEG40114;
TLIF3093A	Implement chain of responsibility regulations	30	3	Nil		UEG40114;

© Commonwealth of Australia, 2025 Powering Skills Organisation

TLIF3096A	Carry out emergency response to a dangerous goods incident	40	3	Nil		UEG40114;
TLIF4007A	Implement and coordinate accident-emergency procedures	40	4	Nil		UEG40114;
TLIF4065A	Ensure compliance with Australian Dangerous Goods Code	70	4	Nil		UEG40114;
TLIF4066A	Implement and supervise transport regulations compliance systems	80	4	Nil		UEG40114;
TLIF4094A	Ensure compliance with chain of responsibility	40	4	Nil		UEG40114;
TLIL4059A	Implement asset management systems	40	4	Nil		UEG40114;
TLILIC0012A	Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)	40	3	Nil		UEG20114; UEG30114; UEG40114
TLILIC2001A	Licence to operate a forklift truck	40	2	Nil		UEG20114; UEG30114; UEG40114
TLILIC2014B	Licence to drive a light rigid vehicle	40	2	Nil		UEG20114; UEG30114; UEG40114
TLILIC2015B	Licence to drive a medium rigid vehicle	40	2	Nil		UEG20114; UEG30114;

© Commonwealth of Australia, 2025 Powering Skills Organisation

						UEG40114
TLILIC2016B	Licence to drive a heavy rigid vehicle	50	2	Nil		UEG20114; UEG30114; UEG40114
TLILIC3006A	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)	60	3	Nil		UEG30114; UEG40114
TLILIC3008A	Licence to operate a slewing mobile crane (up to 20 tonnes)	70	3	Nil		UEG30114; UEG40114
TLILIC3013A	Preparation to transport dangerous goods by road	50	3	Nil		UEG30114; UEG40114
TLILIC3017B	Licence to drive a heavy combination vehicle	60	3	Nil		UEG20114; UEG30114; UEG40114
TLILIC3018B	Licence to drive a multi combination vehicle	60	3	Nil		UEG30114; UEG40114
TLILIC4009A	Licence to operate a slewing mobile crane (up to 60 tonnes)	70	4	Nil		UEG30114; UEG40114

UEE11 Electrotechnology Training Package

Unit Code	Unit Title	Weighting Points	AQF Level	Pre-requisites	Qualification Core	Qualification Elective

1.3.00 Assessment Guidelines

Volume 1 Part 3

Assessment Guidelines

1.3.01 Introduction

3.1 Introduction

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the Australian Quality Training Framework (AQTF) Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012. Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

Note:

a. Using this guideline to support any assessment strategy or process does not remove the responsibility of employers and employees to ensure appropriate 'duty of care' arrangements are maintained under relevant occupational health and safety legislation, and any other prevailing legislation, regulation, standard or code. RTOs should recognise this in their assessment processes and provide requisite advice.

b. In the assessment process it should be acknowledged that State/Territory regulatory requirements and/or Codes of Practice may vary. Therefore there may be a requirement for the demonstration of a greater range of items to those specified in respective competency standard units. RTOs should incorporate this in their assessment processes and practices.

c.

1.3.02 Assessment System Overview

3.2 Assessment System Overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing/registration requirements; and assessment pathways.

Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

Assessment must be carried out in accordance with the:

- benchmarks for assessment
- specific industry requirements
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF

By way of supporting, and reinforcing, both the concept of competency and the competency standard unit, the Gas Industry embraces the following tenets:

- Wherever practicable, summative (or final) assessment is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accord with any approved industry and, Regulatory policy in this regard.
- All persons may claim formal recognition for an assessment of an individual competency standard unit, or a group of units (skill clusters).
- All persons have the right to have relevant competencies recognised through the most expeditious assessment system and method.

Benchmarks for Assessment

The purpose of assessment is to confirm through evidence whether an individual can perform to the standards expected in the Gas Industry workplace, as expressed in the relevant endorsed competency standard unit.

The competency standard units in this Training Package are the benchmarks for assessment in the Gas Industry. They are the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

The competency standard units in this Training Package include:

- National Gas Industry (UEG) Competency Standards, Version 1, 2006 and subsequent endorsed revisions.
- Imported competency standard units from other endorsed Training Packages that have been valued by the National Gas Industry Competency Advisory Council (NGICAC) for inclusion in Qualifications in this Training Package.

An index of the developed competency standard units is contained in Volume 1 Part 2.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment Requirements of the Australian Quality Training Framework

Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 Essential Standards for Registration or the Standards for NVR Registered Training Organisations 2012.

The AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012 can be downloaded from http://www.training.com.au.

The following points summarise the assessment requirements.

Registration of Training Organisations

Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering/Course Accrediting Body in accordance with the AQTF 2010 or the Standards for NVR Registered Training Organisations 2012. The RTO must have the specific competency standard units and/or AQF qualifications on its scope of registration.

The Registered Training Organisation is to be responsible for all aspects of assessment. The assessment must cover the critical aspects of evidence (assessment) detailed in each competency standard unit. In addressing these critical aspects, and ensuring reasonable consistency, the assessment is to ensure that:

- the individual satisfies the requirements in terms of underpinning/essential knowledge and associated skills so that their ability to transfer the competency to differing circumstances may reasonably be inferred
- the individual is competent to safely perform all the practical applications required.

The RTO is also responsible for the issue of formal recognition in the form of National Qualifications or Statements of Attainment and where regulatory requirements apply provide additional information so required, and enter, where applicable and preferred by industry relevant information into an individual Industry Skills Passport, or other industry approved instrument. The RTO will therefore:

- issue the National Qualification based on individuals having been assessed as competent for the qualification and all the competency standard units which constitute the qualification. (See Part 1 of this Training Package), and/or
- issue formal recognition (Statements of Attainment) in respect of individual or clusters of competency standard units for which candidates have been assessed and found competent, and/or
- where required for regulated or industry purposes, issue additional formal information as specified by the industry and relevant regulator.

Quality Training and Assessment

Each RTO must provide quality training and assessment across all its operations. See the AQTF 2010 Essential Standards for Initial and Continuing Registration, Standard 1 or the Standards for NVR Registered Training Organisations 2012.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessor Competency Requirements

Each person involved in training and assessment must be competent for the functions they perform. See the AQTF 2010 Essential Standards for Initial and Continuing Registration, Standard 1 for assessor (and trainer) competency requirements or the Standards for NVR Registered Training Organisations 2012. See also the AQTF 2010 Users' Guide to the Essential Standards for Registration – Appendix 2.

Assessment Requirements

The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012 or the Standards for NVR Registered Training Organisations 2012.

Assessment Strategies

Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

National Recognition

Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

Access and Equity and Client Outcomes

Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

Monitoring Assessments

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

Recording Assessment Outcomes

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Issuing AQF qualifications and Statement of Attainment

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current AQF Implementation Handbook and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). See the AQTF and the edition of the AQF Implementation Handbook—available on the AQF Council website http://www.aqf.edu.au.

Licensing/Registration Requirements

Licensing and registration requirements that apply to specific industries, and vocational education and training, vary between each State and Territory, and can regularly change. The developers of this Training Package consider that the licensing/registration requirements described in this section apply to RTOs, assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and the Department cannot guarantee that the list is definitive or accurate at the time of reading; the information in this section is provided in good faith on that basis.

Contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. For further information contact:

Jurisdiction	Organisation	Website	Telephone Number
Australian Capital Territory	ACT Accreditation and Registration Council	www.det.act.gov.au/vhe/accreditation_and_registration	02 6205 7091

Western Australia	WA Training Accreditation Council	www.tac.wa.gov.au	08 9441 1910

Licensing and/or registration requirements relevant to training, assessment and performance in the workplace of competencies in the Gas Industry Training Package are documented in the relevant units of competency at: 1.2) License to practice.

Licensing Line News

Licensing Line News is a Department of Education, Employment and Workplace Relations funded communication initiative to support the Council of Australian Governments (COAG) occupational licensing reform agenda. This website provides updated information on licensing and regulatory requirements. See: http://www.licensinglinenews.com/

Requirements for Assessors

In order to conduct assessment for statutory licensing or other industry registration requirements, assessors must meet the requirements of relevant authorities in the jurisdiction within which they are providing training and assessment. For further information contact the licensing/regulatory authorities listed above.

Mutual Recognition

Registered Training Organisations may contact E-Oz Energy Skills Australia as the declared National Industry Skills Council for the ElectroComms and EnergyUtilities Industry, for assistance regarding mutual recognition.

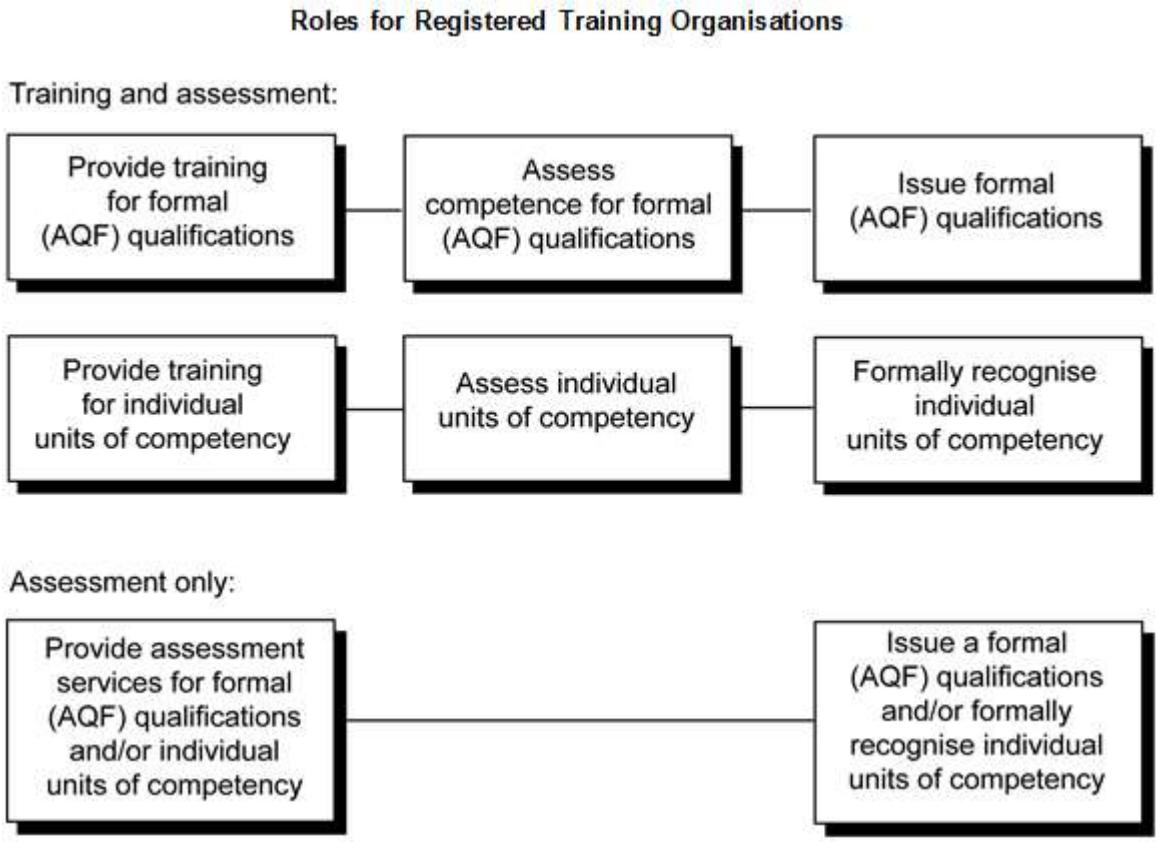
Partnership Arrangements

RTOs must have, and comply with, written agreements with each organisation providing training and/or assessment on its behalf. See AQTF Standard 1.6 of the Standards for Registered Training Organisations or the Standards for NVR Registered Training Organisations 2012.

RTOs operating in partnership with other organisations are responsible for the quality of the partnering organisation services and service outcomes. Under the AQTF, RTOs may through written agreement enter into partnerships with external and/or non-registered third party organisations, such as schools, industry organisations and enterprises, for delivery and assessment within the RTOs scope of registration.

© Commonwealth of Australia, 2025 Powering Skills Organisation

External and/or non-registered third party organisations need not be Registered Training Organisations (RTOs). However, the agreement must specify how each party to the agreement will discharge its responsibilities for compliance with all aspects of the Standards for Registered Training Organisations.



Where the RTO establishes a partnership arrangement it must have a formal agreement with the organisation that provides the training and/or assessment services. The agreement must specify how all parties will discharge their responsibilities for ensuring the quality of the training and/or assessment conducted on its behalf, including the qualification requirements of those to be involved in delivery and assessment.

The RTO has full responsibility for the quality and outcomes of any training or assessment conducted on its behalf, and must maintain a register of all such agreements.

Recording Assessment Outcomes

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.

Statements of Attainment and qualifications issued under the AQF must comply with the relevant provisions in the current Australian Qualifications Framework Implementation Handbook and any other guides issued by the respective State Training Authorities, as well as any regulated requirements and those preferred by industry and advised within this Training Package.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Issuing AQF Qualifications and Statements of Attainment

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the AQF Implementation Handbook and the endorsed Training Packages within the scope of its registration.

An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package, are met as well as a statement of results achieved of the specified Essential Knowledge and Associated Skills underpinning each competency standard unit. A Statement of Attainment is issued where the individual is assessed as competent against fewer competency standard unit(s) (along with the statement of essential knowledge and skills results) than required for an AQF qualification.

For this Training Package the RTO is responsible for the issuance of formal recognition in the form of national qualifications or statements of attainment. Where regulatory requirements apply and if required by the relevant regulatory authority the RTO should enter relevant information into the individual's industry Skills Passport or approved instrument. Where the industry prefers the use of an industry Skills Passport or industry approved instrument this may be negotiated directly with RTOs.

Where regulated requirements advise the use of training support material(s) and it is used to provide the Essential Knowledge and Skills specified in the competency standard unit, then, details of the support material(s) and their achievement should form part of the statement of results attached to the qualification or statement of attainment.

Requirements for Assessors

In order to conduct assessment for statutory licensing or other industry registration requirements assessors must meet the requirements established by regulatory agencies and respective nominees, in addition to the AQTF requirements. Assessors are to liaise with respective agencies to ensure respective requirements are followed and met.

Requirements for RTOs

Selected competency standard units and qualifications in this Training Package provide the basis for a range of statutory licensing and industry registration arrangements. To satisfy these licensing and registration arrangements, RTOs are to keep abreast of developments and any additional requirements detailed by such bodies and their respective nominees. RTOs and their assessors are therefore required to liaise with the Training Package developer and respective agencies to ensure requirements are known and met.

Requirements for Candidates

Individuals being assessed under statutory licensing and industry registration systems may be required to comply with training and experience requirements additional to any minimum requirements identified in this Training Package. These additional requirements are to be formally communicated by the RTOs to individuals prior to the delivery of the Training Package outcomes.

Pathways

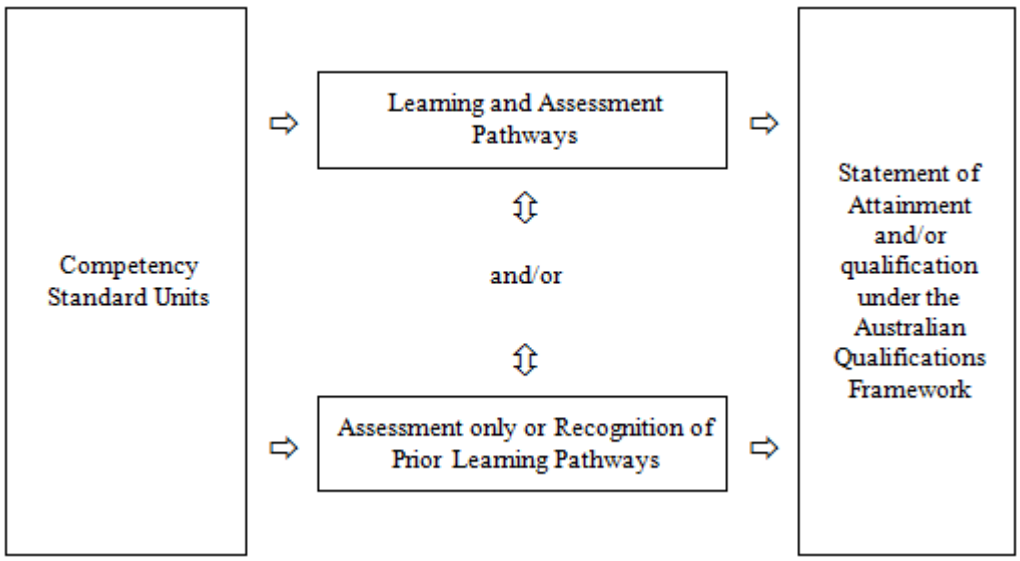
The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training

© Commonwealth of Australia, 2025 Powering Skills Organisation

- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, or a recognition pathway, or a combination of the two as illustrated in the following diagram.



Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired.

Assessment, by any pathway, must comply with the assessment requirements set out in the Standards for Registered Training Organisations.

Learning and Assessment Pathways

Usually, learning and assessment are integrated, with evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process.

Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

© Commonwealth of Australia, 2025 Powering Skills Organisation

New Entrants

Learning and assessment for new entrants is integrated and in part structured, with assessment evidence being collected progressively and feedback being provided to the candidate any time throughout the competency development learning and assessment process. Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be group-based, work-based, project-based, self paced, action learning-based; conducted by distance or e-learning; and involve practice and experience in the workplace.

Learning and assessment pathways that suit New Apprenticeships are a mix of formal training and workplace experience. They may be structured but need to take into account:

- typical irregular work activity
- work availability as it affects access to the range of activities required to be covered
- structured formative assessment activities through which candidates can acquire and demonstrate the practical skills and knowledge identified in the relevant competency standards.

The model that best accommodates a learner who has had no prior experiences (new entrant) in the industry is one that recognises that learning occurs/is facilitated best in directed workplace learning activities followed by recurring practice of these activities in a structured educational program. That is, the model is based on a combination of on-the-job and off-the-job learning experiences aligned to competency standard unit requirements. It recognises that learning occurs in an active way and should involve appropriate learning strategies. The model provides coherence and integration between respective components. It also represents:

- a most effective and efficient means of effecting quality education and training
- a means of assessing if learning has occurred and competence has been attained.

Competency standard units are specifications of work performance which do not provide specific information about the provision of training or detail as to how assessment activities are to be carried out. Given the nature of the information (content and its interrelationship) contained within the competency standard units there is the potential for a variety of interpretations to occur when RTOs are designing training programs.

To improve opportunities for consistency in interpretation, the industry's preferred approach is to support the use of appropriate learning and assessment strategies. To this end it has developed a Guideline Training and Assessment Model detailing the preferred approach. A copy of the model is available from E-Oz Energy Skills Australia.

Recognition of Prior Learning Pathway

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

© Commonwealth of Australia, 2025 Powering Skills Organisation

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

- existing workers;
- individuals with overseas qualifications;
- recent migrants with established work histories;
- people returning to the workplace; and
- people with disabilities or injuries requiring a change in career.

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

- questioning (oral or written)
- consideration of a portfolio and review of contents
- consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component
- mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components
- observation of performance, and
- participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate's own work);
- valid (directly related to the current version of the relevant endorsed unit of competency);
- reliable (shows that the candidate consistently meets the endorsed unit of competency);

© Commonwealth of Australia, 2025 Powering Skills Organisation

- current (reflects the candidate's current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

Credit Transfer

Credit is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

Combination of Pathways

Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.

Where candidates have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of approaches may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competence using an 'assessment only pathway'. Once current competence is identified, a structured training and assessment program may be established to ensure that the candidate acquires the required additional competencies or gap. These would be achieved through a 'training and assessment pathway'.

1.3.03 Learning and Assessment pathways

3.3 Learning and Assessment pathways

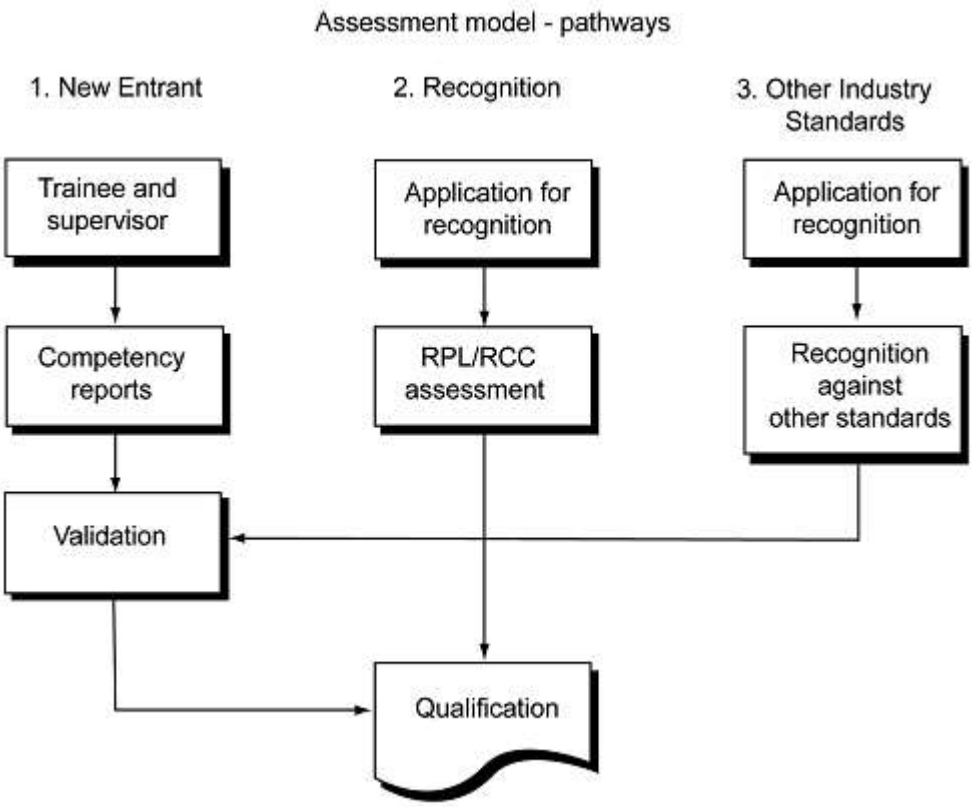
Within the general Training Package Pathways continuum framework, referred to in the previous section, three distinct Assessment Pathways have been identified for use within the Gas Industry.

Pathway 1: New entrant competency development

Pathway 2: Recognition of currently held competencies or prior learning and workplace experience

Pathway 3: Recognition of other currently held competencies (other industry standards)

© Commonwealth of Australia, 2025 Powering Skills Organisation



Although not exclusive, the three pathways provide typical recognition processes for individual competency standard units or groups of units that make up Qualifications or Statements of Attainment. From an industry perspective, assessment is to lead to formal recognition of the Industry's benchmark competencies or formal recognition of competencies from other industries. Formal recognition may be for individual competencies or for groups of competencies, which may also be combined to satisfy the requirements of a National Qualification.

Pathway 1: New Entrant Competency Development

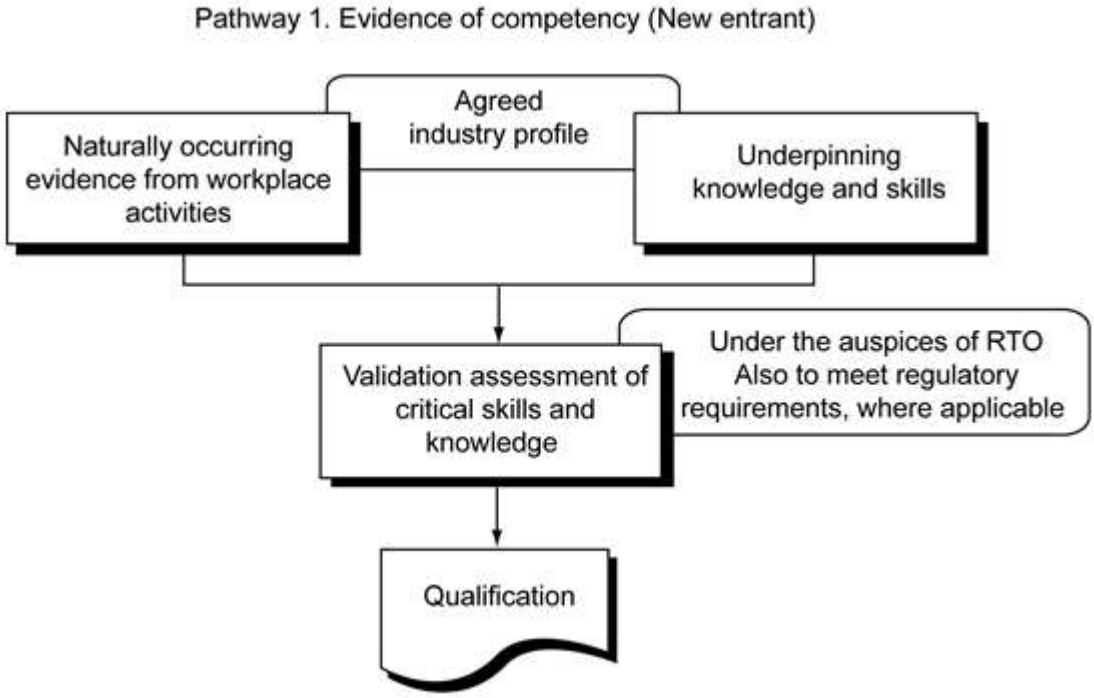
This pathway is for individuals who are undertaking an industry-preferred competency development plan. The users of this pathway may be:

- contracted employment based employees who are generally new apprentices and who undertake an approved training program that supports a competency development plan, **or**
- those that undertake an approved structured training program in an institutional environment to achieve competency outcomes.

Evidence of Competency

© Commonwealth of Australia, 2025 Powering Skills Organisation

In this pathway evidence required to determine competence for the issuance of the qualification or Statement of Attainment is to be in accordance with **3.5 Assessment within the Gas Industry** contained herein. The evidence however, must be sufficient in quality, quantity and type and be gathered in an on-going way and in a timely and accurate manner from several sources, such as workplace and educational experiences based on the approved industry training program and related competency development plan in which individuals are involved.



Pathway 2: Recognition of Prior Learning/Current Competencies (RPL/RCC)

This pathway is for those who may have acquired skills and knowledge in relevant competency standard units outside formally recognised processes. The users of this pathway will include applicants from overseas and also applicants who have developed skills in allied industries but who have no formal recognition in respect of industry standards or qualifications. In using this pathway RTOs should also identify if any equivalence mapping document exists as per Pathway 3.

Additionally, an existing national mechanism for the recognition as a tradesperson exists through the *Tradesmen's Rights Regulation Act*, which is administered by Trades Recognition Australia (TRA), part of the Commonwealth Department of Industrial Relations. TRA grants recognition for the purposes of migration but further analysis of the applicant’s knowledge and skills is often needed before competency can be attributed.

© Commonwealth of Australia, 2025 Powering Skills Organisation

The Trades Recognition Australia process mainly operates to provide formal recognition of the knowledge and skills migrants have developed through structured training and/or work experience in overseas countries. It is also an important mechanism for the assessment and recognition of the competencies of people who may not have had access to the industry-preferred new entrant model of competency development for trade vocations in Australia. For more information visit:

http://www.workplace.gov.au/workplace/Category/SchemesInitiatives/TRA/TRA-TradeClassificationsAssessed.htm

Evidence of Competency

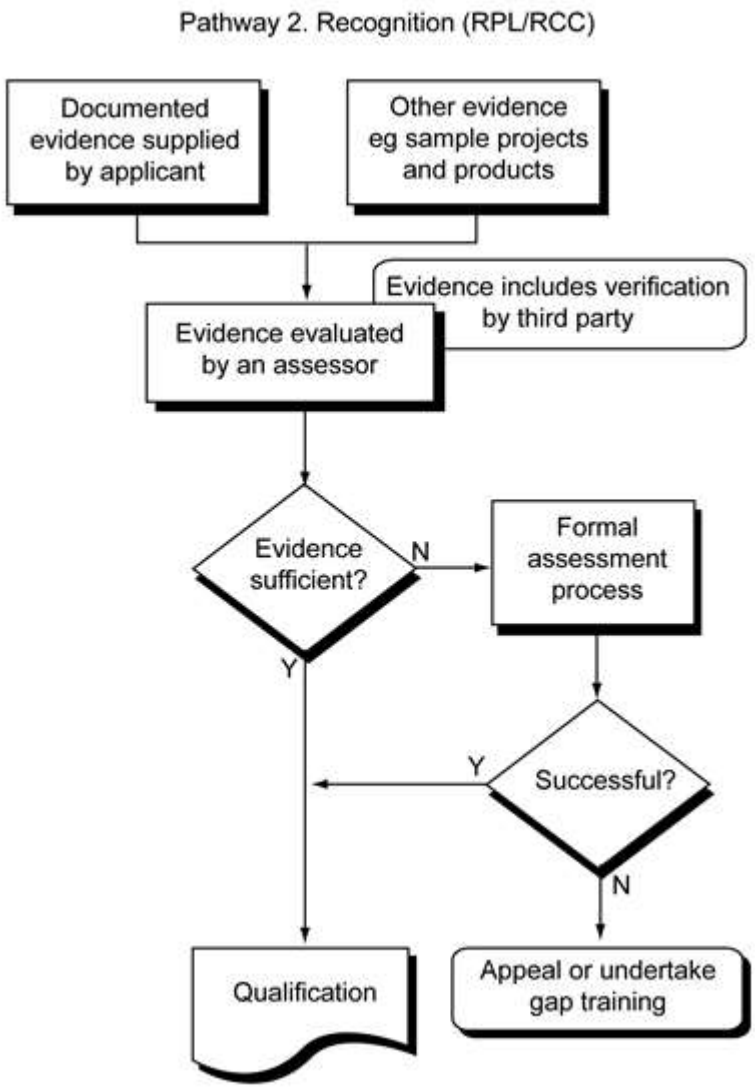
In this pathway many types of evidence can be used to determine competency for the issuance of Qualifications or Statements of Attainment. The evidence may come from records of previous relevant work experience. This type of evidence will need endorsement by a supervisor/mentor skilled in the units for which recognition is sought. Evidence may consist of portfolios, which include projects or products completed for other purposes or from non-registered training programs or ad hoc prior experience or from overseas programs of a similar nature.

Industry would expect this evidence to be assessed by the Registered Organisation (or their nominee – a qualified industry assessor) and a judgement made. The result will be either that the applicant is judged competent for the competency standard unit(s) or gaps are identified and noted.

Where a gap is identified the applicant can either accept the judgement, pursue gap training or elect to appeal the decision. Evidence used in the judgement process may come from a variety of sources including a personal portfolio, curriculum vitae, interview, and comments by peers or employers and challenge tests.

The recognition of a subset of the competency standard units — skills, forming a cluster of Statements of Attainment within a Qualification — would generally require individuals to complete the additional units in order to attain the relevant Qualification Pathway that provides credit. This information may be developed by the Registered Training Organisation in consultation with respective stakeholders.

© Commonwealth of Australia, 2025 Powering Skills Organisation



Pathway 3: Recognition of Other Industry/Enterprise Standards

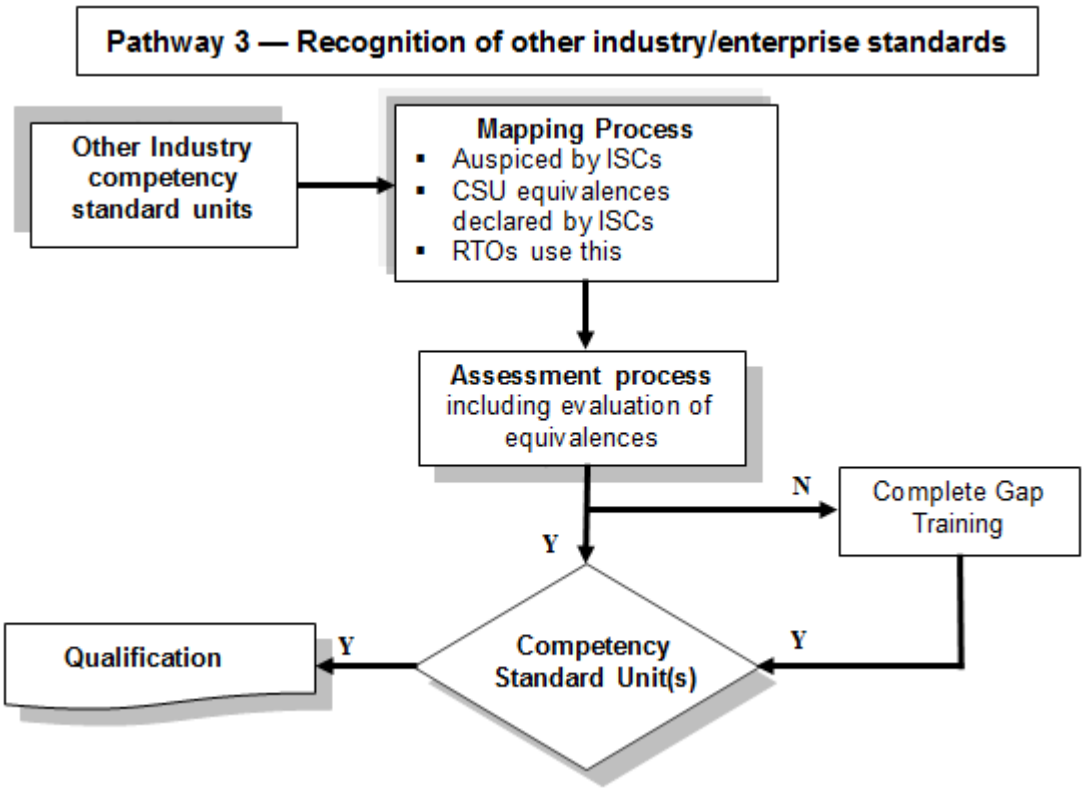
This pathway is for individuals who have developed skills based on other nationally recognised industry or enterprise competency standards and who have received formal recognition in competency standards unit(s) from these areas. Recognition of equivalence of competency standard units between industries is through an agreed and formal mapping process. Equivalence of outcomes are declared by Industry Skills Councils for respective Training Packages. The recognition of Units, as part of any mapping arrangements is the responsibility of the parties who maintain the competency standards; in this instance E-Oz Energy Skills Australia. RTOs should investigate whether there are any existing mapping agreements by contacting the relevant Industry Skills Councils.

Evidence of Competency

© Commonwealth of Australia, 2025 Powering Skills Organisation

In this pathway, evidence will be based on formally-agreed mapping declaration(s) of competency standards unit(s) from other Industry Competency Standards against the unit(s) in the Gas Industry Training Package for which formal recognition is sought. The equivalence mapping declaration agreement would be formalised between Industry Skills Councils.

The applicant would be required to supply details of the unit(s) held including any currency, and the unit(s) sought in consultation with the RTO, including submitting any assessment reports to the RTO for a determination. This equivalence evidence will be reviewed against the mapping advice obtained by the RTO (or their nominee) and a judgement made. The result will be either that the applicant is deemed competent for the unit(s) and a Statement of Attainment issued, or gaps are identified and noted. Where a gap has been identified the applicant can consider the judgement, pursue gap training or appeal the decision. Evidence used in the judgement process is based on the individual's records of achievement relative to the competency standard units for which recognition is sought.



1.3.04 Assessment Principles within the Gas Industry

3.4 Assessment Principles within the Gas Industry

All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:

- validity
- reliability

© Commonwealth of Australia, 2025 Powering Skills Organisation

- flexibility
- fairness
- sufficiency

These principles must be addressed in the:

- design, establishment and management of the assessment system for this Training Package
- development of assessment tools, and
- the conduct of assessment.

Assessment Principles

Validity

Assessment is valid when the process is sound and assesses what it claims to assess.

Validity requires that:

a. assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance
b. assessment of knowledge and skills must be integrated with their practical application
c. judgement of competence must be based on sufficient evidence (that is, evidence gathered on a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency

The assessment instruments and tasks must be designed, implemented and administered in a manner which ensures they measure the intended Essential Knowledge and Associated Skills with workplace performance requirement, and the evidence gathered relates directly to the competency standard unit(s) being assessed.

Validity includes the need to involve others with expertise in the assessments being implemented in the development, selection and review of the instruments and methods used in the assessment process.

To be valid the assessment judgements need to be based on more than one task with evidence gathered on a number of occasions and in a variety of contexts or situations.

Reliability

Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

RTOs will ensure clear guidelines are available to assessors to ensure consistent judgements are made based on the evidence provided. Where industry and/or regulatory-endorsed training support materials are available, it is recommended that this material is used to support and increase the reliability of assessment. This approach will assist in establishing and maintaining consistency of performance of the essential knowledge and skills and work performance requirements specified in the competency standard units.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Flexibility

To be flexible, assessment should reflect the candidate's needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

The assessment approach should be developed to meet the needs of potential candidates and where appropriate negotiated between the candidate and assessor.

Assessments are to cover both the skill and knowledge components of competency as described in the competency standard units without any one-assessment method being prescribed.

A range of assessment instruments and items should be made available and, where appropriate, the time and place of assessment should be determined to suit the availability of resources, assessors and candidates. However, where supported by the Industry for the purposes of enhancing consistency, the preferred assessment arrangements should be adopted and used.

Fairness

Fairness in assessment requires consideration of the individual candidate's needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

Assessment methods and practices shall be equitable to all individuals.

Candidates will be made aware of the assessment methods and procedures together with details of the criteria against which they are to be assessed.

Specific needs of individual candidates will be accommodated as is practicable and reasonable adjustment is made while maintaining the integrity of the assessment outcomes based on the competency standard unit(s) being assessed.

Sufficiency

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

In all instances competency is to be attributed on evidence sufficient to show that a person has the necessary skills required for the scope of work. This includes:

- Task skills — performing individual tasks
- Task management skills — managing a number of different tasks
- Contingency management skills — responding to irregularities and breakdowns in routines, and

© Commonwealth of Australia, 2025 Powering Skills Organisation

- Job/role environment skills — dealing with the responsibilities and expectations of the work environment including working with others.

Evidence must demonstrate that an individual can perform competently across the specified range of activities and has the essential knowledge, understanding and associated skills underpinning competency.

Currency

The principle to be applied in the Gas Industry for currency of evidence is that claims are to be fully substantiated through both direct and supporting assessment processes.

Assessment processes must satisfy the requirement for currency in terms of:

- technology and/or processes
- recency of application

Rules of Evidence

The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

Valid

Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

Sufficient

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

Current

In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

Authentic

To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate’s own work.

Sufficiency of Evidence

In all instances competency is to be attributed on evidence sufficient to show that a person has the necessary skills required for the scope of work. This includes:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- Task skills — performing individual tasks
- Task management skills — managing a number of different tasks
- Contingency management skills — responding to irregularities and breakdowns in routines, and
- Job/role environment skills — dealing with the responsibilities and expectations of the work environment including working with others.

Evidence must demonstrate that an individual can perform competently across the specified range of activities and has the essential knowledge, understanding and associated skills underpinning competency.

Currency of Evidence

Evidence must be relevant to what is outlined in competency standard units and not outdated or irrelevant.

Note: The deeming of competence at a point in time does not mean that competence exists for all time; competency must be maintained by use and/or retraining. Also refer to Section 3.9 Guide to Assessment Methods and Items for more detailed information on currency.

The principle to be applied in the Gas Industry for currency of evidence is that claims are to be fully substantiated through both direct and supporting assessment processes.

Additionally, assessment processes must satisfy the requirement for currency in relation to evidence of competency in terms of technology and/or processes and recency of application.

If there has been a recent change in technology, then evidence of actions before such change is unlikely to reflect the required currency. Similarly, if the individual claiming competency has not performed/applied that competency for extensive periods of time then documentary evidence would not suffice as a basis of assessment.

Authenticity

Evidence is to be genuine and relate to the person being assessed, and no one else.

By way of supporting and reinforcing both the concept of competency and the competency standard units as the currency for the Vocational Education and Training (VET) system, the Gas Industry embraces the following tenets:

- Assessment (summative or final) is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment.
- Simulation must be in accord with any prevailing industry policy. It is recognised that in some circumstances, assessment may occur outside the workplace, however this should only occur where necessary and in accord with any industry policy. In relation to this Training Package the Industry Skills Council for ElectroComms and EnergyUtilities, E-Oz Energy Skills Australia, have developed an industry Simulation Policy. This can be accessed from the E-Oz Energy Skills Australia website at: www.e-oz.com.au.
- All persons may claim formal recognition for an assessment of an individual competency standard unit or a group of units.

© Commonwealth of Australia, 2025 Powering Skills Organisation

- All persons have the right to have relevant competencies recognised through the most expeditious assessment system and method.
- Under-represented groups are not biased from participation and access.

Regulatory/Context of Assessment

Competency is to be determined on evidence of having consistently performed across a representative range of specified equipment, processes and activities for the scope of work and/or endorsement for which competency is being sought; autonomously and to requirements. Equivalent evidence from other sources, eg formal assessment is also acceptable.

With respect to the essential knowledge and associated skills component of each competency standard unit, assessment activities shall be in accordance with the approach required by the regulatory environment. This may include the use of industry-supported essential knowledge and associated skills learning specifications structured in a conducive learning environment to facilitate the development of depth and breadth of learning, aid in retention and enhance transferability. For this component where graded assessment is a regulatory requirement, it will apply to the underpinning knowledge off-the-job component and not the competency standard unit as a whole. The Industry preference is for a percentile based graded assessment system to be used. Also, although it is preferred that assessing competency be carried out in the workplace, it can be undertaken in a simulated work environment approved for that purpose by the industry. Refer to any Industry policy that may apply in this regard.

Assessment Judgments

Attributing Competency

The deeming of competency shall be based on evidence that is sufficient, current and authentic, so that a quality low risk judgment can be made based on the assessment principles outlined herein.

Competencies shall be attributed on evidence showing that the person deemed to be competent is able to undertake the responsibilities for all safety measures, care of technology, plant and equipment, use of standards, manuals and procedures, and care of the environment, directly related to the work function for which such competencies are required.

Note:

a. Where the consequences of unjustifiably or mistakenly deeming a person competent carries a risk of injury to persons, commerce, or damage to property and/or the environment, the level of evidence required for sufficiency is higher than where there is little risk. The risk of attributing competence to an individual should, therefore, form a critical part of the assessment process and methodology. Consideration should be given as to whether all pre-requisites and/or corequisites have been appropriately achieved.

© Commonwealth of Australia, 2025 Powering Skills Organisation

b. The decision to attribute competence differs from training effort and delivery. The decision to attribute competence is based on evidence being present for an assessor to attribute such and not a person in learning. Learners, however, can undertake training in competency standard units without being awarded the competency standard units even when they may not have acquired in the required sequence any of the prerequisite competency standard units. However, they cannot be attributed the competency standard unit until they have acquired the prerequisite.
c. For more detailed information refer to Section 3.9 Guide to Assessment Methods and Items.
d.

1.3.05 Assessment Processes within the Gas Industry

3.5 Assessment Processes within the Gas Industry

Within the Gas Industry sampling, profiling and portfolio are recognised as the three main methods of collecting evidence to assist the assessment processes and, while they are not mandatory, they have become accepted and the preferred industry practice. It is not the purpose of these Guidelines to provide an extensive technical description of each of these methods; however, it is important to recognise the impact each will have on the management of assessment practices. Profiling, however, is the Industry-preferred model for new entrant contracted entry-level employment, eg apprenticeships. Therefore, an overview of each is provided in this Guideline along with sample templates to assist Registered Training Organisations (RTOs) in planning, managing and administering training and assessment delivery.

1. Sampling

Sampling requires evidence of competence to be derived from a limited sample of performance event(s). Technical/application skills are normally assessed by practical measures, and knowledge underpinning performance is assessed, typically in conducive learning environments like classrooms, by conventional written or oral questioning.

© Commonwealth of Australia, 2025 Powering Skills Organisation

2. Profiling

Profiling requires the progressive collection of many samples through structured documentation and progress summative reporting. Progressive monitoring of direct and possibly indirect evidence, over an extended period of time is used to assist in intervention and, making judgements about the developing competency profile of the candidate/learner. The focus of evidence collection is set against the Elements; Range Statement; and critical aspects detailed in the competency standard units and complemented with the level of supervision applied. The evidence collection process is staged against known and predefined work performance outcomes as specified in the Competency standard units. Profiling will assist in obtaining a series of periodical audit assessments and/or a final holistic assessment event where regulatory/licensing requirements apply. Profiling is the preferred industry model that assists with assessment for entry-level contracted employment. Technical educational achievements may be incorporated in the Profiling Model or augment information gathered directly from the workplace into the profile. In the latter case it is preferred that a final summative and holistic assessment event be applied prior to the issuance of the qualification or relevant Statement of Attainment.

3. Portfolio

The Portfolio approach is best suited to assessment conducted as Recognition of Prior Learning (RPL) and is to be in accord with AQTF Standard 8.2 or the Standards for NVR Registered Training Organisations 2012 or its replacement/equivalent. It requires the collection or build-up of indirect evidence of an individual's competence.

The Portfolio of evidence could include Statements of Attainment issued by other RTOs (Mutual Recognition AQTF Standard 5), suitably focused references and testimonials, formal project appraisals, work records and any other evidence which is current and relevant to the competencies sought.

Opportunities for Combined Approaches

The assessment processes described above are not mutually exclusive and a combination of approaches may be implemented. The process selected will be acceptable to the industry if the outcome is valid, the approach supports industry-wide consistency, the requirements of the Competency standard units are satisfied and in accordance with the preferred industry approach and costs are acceptable to the industry.

1.3.06 Assessor Requirements

3.6 Assessor Requirements

This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

The integrity of the Gas Industry assessment processes is centred on the need for all assessments to be conducted under the direction or the authority of a Registered Training Organisation using qualified assessors who may function with or within the Registered Training Organisation.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Within an assessment process, responsibility for some activities may be delegated and it is therefore not necessary that every aspect of assessment must be personally and directly attended to by a qualified assessor. For example, in a long term profiling process the qualified assessor may establish with an approved industry data gathering administrator/manager the system and identify the evidence required. They may then cause the evidence to be gathered by others after which they will examine the evidence and make judgments.

The partnership between assessors and other competent persons is essential if the information is to be qualitative. It should be noted that technical assessment responsibility and systems accountability may only be exercised by a Registered Training Organisation using qualified assessors.

Assessor Qualifications

Assessments against the competencies in this Training Package will be carried out in accordance with these endorsed guidelines. The guidelines include the necessary qualifications for those conducting assessments and provide for those situations where more than one person may contribute to the assessment and where the required technical and assessment competencies may not be held by any one person.

The Assessment for Competency

Assessors are to be competent in the competencies which they are to assess or are to be assisted by an appropriate subject matter expert who is currently competent in the unit being assessed. This may also include such things as language literacy and numeracy (LLN), cultural diversity and under-represented groups, environmental, industrial, occupational health and safety (OHS).

Assessors (and their subject matter expert) are to know current industry practices for the job or the role against which the performance is being assessed, and practice the necessary interpersonal skills required in the assessment process.

All persons required to plan, assess, develop or validate assessment-related matters are to be currently competent and comply with the Australian Quality Training Framework, Standards for Registered Training Organisations, Standard 7.3 (a) and (b)] .

Using Qualified Assessors

All assessment is to be under the authority of a formally qualified assessor. Within this constraint, the Registered Training Organisation may adopt any or all of the following processes:

- using a workplace assessor who is currently competent and complies with the Australian Quality Training Framework, Standards for Registered Training Organisations, Standard 7.3 (a) and (b) and the relevant industry vocational competencies
- using a workplace assessor who is currently competent and complies with the Australian Quality Training Framework, Standards for Registered Training Organisations, Standard 7.3 (a) and (b) and who has ready access to another person who is competent in, and can advise the assessor on, the relevant vocational competencies to at least the level being assessed

© Commonwealth of Australia, 2025 Powering Skills Organisation

- using an assessment panel which includes at least one person who is currently competent and complies with the Australian Quality Training Framework, Standards for Registered Training Organisations, Standard 7.3 (a) and (b) as well as at least one person who is competent in the relevant vocational competencies to at least the level being assessed
- using an external assessor who is currently competent and complies with the Australian Quality Training Framework, Standards for Registered Training Organisations, Standard 7.3 (a) and (b) but with the assessment evidence being collected, utilising industry endorsed assessment procedures, by a workplace supervisor who has the relevant vocational competencies to at least the level being assessed
- using a workplace supervisor, with the relevant vocational competencies to at least the level being assessed, who utilises industry endorsed assessment procedures with the outcome being validated by an externally qualified assessor who is currently competent against the assessor standards and complies with the Australian Quality Training Framework, Standards for Registered Training Organisations, Standard 7.3 (a) and (b).

Notwithstanding, the industry would expect, in relation to the new entrant pathway, that in all instances the Registered Training Organisation will retain the responsibility of managing the competency development training program and related plan, the ultimate attributing of competence against Competency standard units using qualified assessors, and the issuing of qualifications, and/or Statements of Attainment. It will also include any additional information that may be required for licensing requirements and specified by regulators or Industry.

The process should be undertaken in accordance with the recognition processes defined by relevant training authorities.

Assessor Competencies

The AQTF and Standards for NVR Registered Training Organisations 2012 specify mandatory competency requirements for assessors. For information see Element 1.4 from the AQTF 2010 Essential Standards for Registration, or Element 4.4 and 15.4 from the Standards for NVR Registered Training Organisations 2012 follows:

Training and assessment are conducted by trainers and assessors who:

- have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and
- have the relevant vocational competencies at least to the level being delivered or assessed, and
- can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and
- continue to develop their Vocational Education and Training (VET) knowledge and skills as well as their industry currency and trainer/assessor competence.

* See AQTF 2010 Users' Guide to the Essential Standards for Registration – Appendix 2,

© Commonwealth of Australia, 2025 Powering Skills Organisation

or the Standards for NVR Registered Training Organisations 2012

All assessors who are engaged in assessing against this Training Package must be engaged by an RTO or be acting under the registration of an RTO (for example, an assessor working in an enterprise, or a consultant that has a partnership arrangement with the RTO).

This Training Package provides a range of options for meeting these assessor requirements. Assessments can be undertaken in a variety of workplace and enterprise contexts by individual assessors, partnerships involving assessors and technical experts or teams of assessors.

The options below show how the requirement to use qualified assessors can be met.

Assessors, Technical Experts and Workplace Supervisors

Single Assessor — Single Arrangement

Where an individual assessor conducts the assessment the assessor is required to:

- hold formal recognition of competence in the relevant units in the Training Package for Training and Assessment
- be deemed competent and, where possible, hold formal recognition of competence in the specific Competency standard units in this Training Package, at least to the level being assessed.

In addition, it is recommended by the industry that the assessor can:

- demonstrate current knowledge of the Gas Industry, industry practices, and the job or role against which performance is being assessed
- demonstrate current knowledge and skill in assessing against this Training Package which contains the vocational standards for industry in a range of contexts
- demonstrate the necessary interpersonal and communication skills required in the assessment process
- continue to meet the requirements of the industry
- ensure assessment is consistent with the Australian Quality Training Framework Standards or Standards for NVR Registered Training Organisations 2012 for Registered Training Organisations or Standards for NVR Registered Training Organisations 2012
- promote confidence in the system and the assessment outcomes on the part of industry, employers, enterprises, unions, employees, trainees, assessors and trainers
- ensure assessment processes and outcomes are valid, reliable, fair and flexible

© Commonwealth of Australia, 2025 Powering Skills Organisation

- support RTOs in effectively carrying out their responsibilities
- participate in professional development
- have relevant work experience
- participate in professional/industry networks and assessor programs
- have recent planning and review of assessment activities
- participate in assessment validation processes
- have recent assessment and/or workplace training activities.

Partnership Arrangement

Option 1 — Working with a Technical Expert

An assessor works with a technical expert to conduct the assessment. The Assessor is required to hold formal recognition of competence in the relevant units in the Training Package for Training and Assessment.

In addition, it is recommended that the assessor is able to:

- demonstrate current knowledge and skill in assessing against this Training Package which contains the vocational standards for industry in a range of contexts;
- demonstrate capability to assess with a technical expert;
- demonstrate the interpersonal and communication skills required in the assessment process.

A technical expert is one that is required to be deemed currently competent and, where possible, hold formal recognition of competence in the specific Competency Standard Units from this Training Package which contains the vocational standards for industry, at least to the level being assessed.

In addition, it is recommended that the Technical Expert is able to:

- demonstrate current knowledge of the industry, industry practices, and the job or role against which performance is being assessed;
- communicate and liaise with the assessor throughout the assessment process.

Option 2 — Working with a Workplace Supervisor

An assessor works with workplace supervisor in collecting evidence for valid assessment.

The assessor is required to:

- make the assessment decision
- demonstrate a capability to assess using a workplace supervisor as a valid and reliable source of evidence collaboration
- communicate and liaise, where appropriate, with the workplace supervisor throughout the assessment process.

A workplace supervisor is required to be deemed currently competent and, where possible, is to hold formal recognition of competence in the specific competency standard units from this Training Package at least to the level being assessed.

In addition, it is recommended that the workplace supervisor is able to:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- demonstrate current knowledge of the industry, industry practices, and the job or role against which performance is being assessed
- communicate and liaise, where appropriate, with the assessor throughout the assessment process
- use agreed practices to gather and record evidence for the assessor to use in making a valid judgement on competency.

Assessment Team/Panel

A team works together to conduct the assessment.

Members of an assessment team or panel that comprises assessment and industry experience and expertise works together in the collection of evidence and in making judgements about competency. The members of the team must include at least one person who:

- holds formal recognition of competence in training and assessment in the relevant units in the Training and Assessment Training Package
- is deemed competent and, where possible, holds formal recognition of competence in the specific Competency standard units from this Training Package at least to the level being assessed, and where not technically competent uses team/panel members with current technical competence in requisite units.

It is recommended that members of the team/panel involved in the assessment are able to demonstrate:

- current knowledge of the industry, industry practices, and the job or role against which performance is being assessed
- current knowledge and skill in assessing against this Training Package in a range of contexts
- the interpersonal and communication skills required in the assessment process and liaise with other team/panel members throughout the assessment process.

Assessments against the competencies in the Training Package will be carried out in accordance with these endorsed guidelines. The guidelines include the necessary qualifications for those conducting assessments and provide for those situations where more than one person may contribute to the assessment and where the required technical and assessment competencies may not be held by any one person.

1.3.07 Assessment Tools

3.7 Designing Assessment Tools

This section provides an overview of assessment tools and their suggested use in the industry.

Use of Assessment Tools

Assessment resources provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency.

© Commonwealth of Australia, 2025 Powering Skills Organisation

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment materials, such as those specifically developed to support this Training Package — Training and Assessment Advice Manual for the Gas Industry Training Package UEG11, available from E-Oz Energy Skills Australia (www.e-oz.com.au). Alternatively they may develop their own assessment materials to meet the needs of their clients by utilising pre-developed training and assessment instruments included in Section 3.8 Gas Industry Guidelines for designing assessment materials.

Using Prepared Assessment Tools

If using prepared assessment materials, assessors should ensure that the materials are benchmarked or mapped against the current version of the relevant competency standard unit(s) and any industry-preferred model and supported by the industry. This can be done by checking that the materials are listed on www.training.gov.au or E-Oz Energy Skills Australia (www.e-oz.com.au). Specific materials on the list have been noted by the National Skills Standards Council (NSSC) as meeting their quality criteria for Training Packages.

Developing Assessment Tools

When developing their own assessment materials, assessors must ensure that the tools:

- are benchmarked against the selected competency standard unit(s)
- are benchmarked against the industry-preferred competency assessment model
- are reviewed as part of the validation of assessment strategies as required under AQTF Standard 9.2 i of the Standards for Registered Training Organisations or the Standards for NVR Registered Training Organisations 2012
- meet the assessment requirements expressed in the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012.
- A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

Language, Literacy and Numeracy

The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations. Guidance on the appropriate level of LL&N skills to best equip the candidate for successful achievement is provided within each unit of competency at section 2.2) Literacy and numeracy skills.

Conducting Assessment

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

Mandatory Assessment Requirements

Assessments must meet the criteria set out in the AQTF 2010 Essential Standards for Initial and Continuing Registration or the Standards for NVR Registered Training Organisations 2012. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 Essential Standards for Initial and Continuing Registration or Element 4.5 and 15.5 of the Standards for NVR Registered Training Organisations 2012 are as follows:

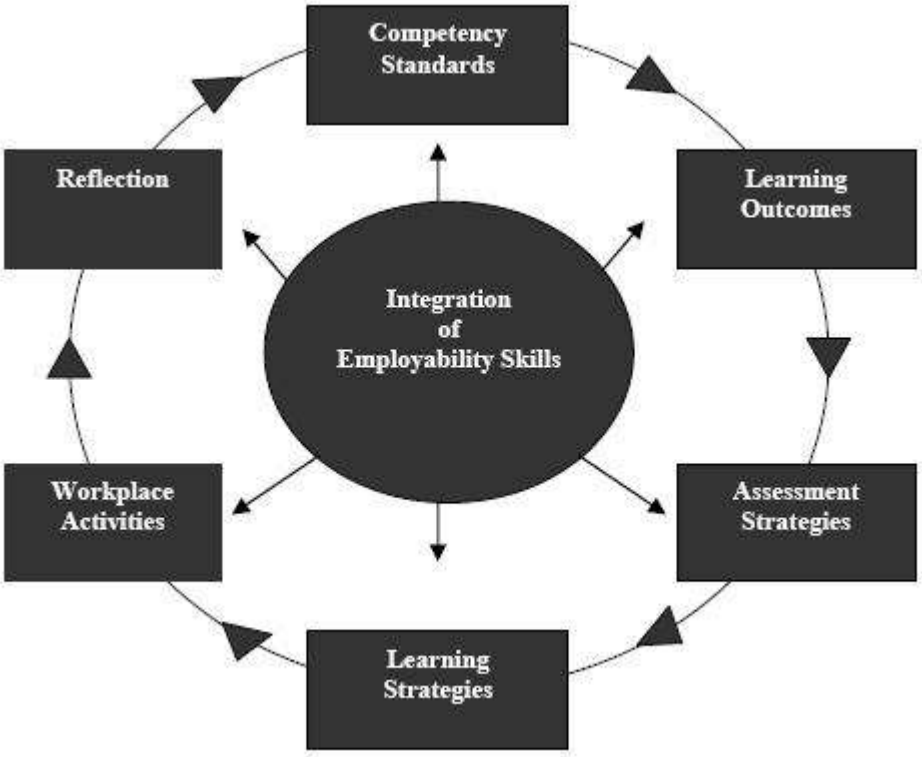
© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment, including Recognition of Prior Learning (RPL):

- meets the requirements of the relevant Training Package or accredited course
- is conducted in accordance with the principles of assessment and the rules of evidence
- meets workplace and, where relevant, regulatory requirements
- is systematically validated.

Assessment of Employability Skills

Employability Skills are integral to workplace competency. As such, they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.



Employability Skills are embedded and explicit within each unit of competency. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

© Commonwealth of Australia, 2025 Powering Skills Organisation

The National Quality Council has endorsed a model for assessing and reporting Employability Skills, which contains further suggestions about good practice strategies in teaching, assessing, learning and reporting Employability Skills. The model is available from http://www.training.com.au/

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at http://employabilityskills.training.com.au

For more information on Employability Skills in this UEG11 Gas Training Package, Version 2, go to the E-Oz Energy Skills Australia website at www.e-oz.com.au

Access and Equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

Reasonable adjustments

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability.

Under the Disability Standards for Education 2005, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While 'reasonable adjustment' and 'unjustifiable hardship' are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.

An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student's disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship.

The Training Package Guidelines provides more information on reasonable adjustment, including examples of adjustments. Go to:

http://www.deewr.gov.au/tpdh/Pages/home.aspx

© Commonwealth of Australia, 2025 Powering Skills Organisation

1.3.08 Guidelines for Designing Assessment Materials

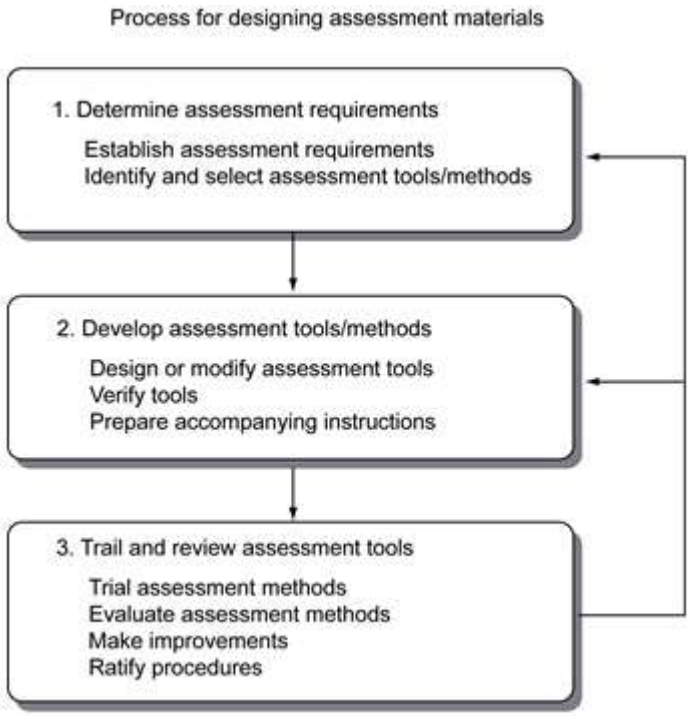
3.8 Guidelines for Designing Assessment Materials

Assessment materials are developed, designed and implemented by appropriately authorised and competent assessors. Materials may range from relatively straight forward questions/answers and task tests to quite elaborate simulations for assessing concepts and values. Assessment materials need to facilitate assessment by:

- detailing the personnel and material preparations required to support the **assessment** process
- establishing and/or confirming the circumstances under which the assessment is to take place
- detailing the evidence to be collected and the method(s) to be used to do this
- providing for the systematic review/analysis of the evidence and for the making of logical and supportable judgments
- providing the means for the recording of the process and the judgments as required and in accordance with any regulatory and/or industry-preferred arrangement
- providing a basis for post-assessment
- providing **counselling** and guidance for the candidate
- identifying specialist technical advice related to such things as OHS, LLN, **environmental** and equity matters.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment Material Design Process



a) Determine assessment requirements

Identify and select assessment tools/methods The assessor will be required to identify and select the assessment methods consistent with Gas Industry assessment guidelines and procedures.

In developing tools and methods the assessor will need to determine the range of methods appropriate to the assessment context and the characteristics of the person being assessed. The assessor may use the following questions when designing the assessment method:

Is the data **gathering** process sufficient, timely, valid and reliable to ensure the decision about competence relates to the overall requirements of the unit?

Do you always need to assess real work?

How is the **critical** evidence specified?

How many **assessment** tasks are required to collect the critical evidence of competency?

Which **assessment** tasks will provide broad coverage of the Range Statement?

Are there any skills that the candidate should have or can develop before they are assessed for the unit?

b) Develop assessment tools/methods

Design or modify assessment tools The assessor will be required to design or modify existing assessment tools so that their format, language, literacy and numeracy requirements are appropriate to the characteristics of the assessment context and the person being assessed.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Verify tools The assessor will need to verify the assessment tools, which maintain validity but are easy to administer and allow sufficient flexibility to meet the range of possible assessment contexts.

Prepare accompanying instructions The assessment system/process must be comprehensively and clearly documented so that the stages of assessment and their constituent parts may be observed and evaluated. The assessment materials must relate directly to the competency standard unit or group of units making up a qualification and address the totality of competency in a realistic, holistic and effective way.

c) Trial and review assessment tools

Trial and validate assessment tools

The assessor will be required to trial and validate the assessment methods with a representative group of people similar to those who will ultimately be assessed. Once trials are conducted the assessor will need to seek responses from all parties and compile and analyse these responses.

Evaluate assessment methods The assessor will evaluate the assessment methods and tools for clarity, reliability, validity, fairness and cost-effectiveness.

Make improvements The assessor will modify the assessment tools based on the responses to the trials.

Ratify procedures The assessor ratifies, with relevant people in the Gas Industry, procedures of the evidence requirements, assessment methods and assessment tools and the processes used in developing them.

Assessment Material Requirements

Essential requirements to be met by assessment materials include the following:

Assessment of Competency Standard Units — assessment must directly address the competency standard unit or group of units making up a qualification or skills cluster and, within this, satisfy the *critical aspects of evidence* including the related performance criteria, Range Statement and essential knowledge and associated skills.

Assessment of practical applications — summative assessment of practical applications should, whenever possible and practicable, be conducted in a real work environment or in a realistically simulated work environment. Removal of the summative assessment from the real work environment should occur only to the extent necessitated by circumstances such as safety, noise, excessive cost and disruption to equipment operation, and access to the required work.

Learning outcomes or other curricula documents — are not to be the primary focus of summative assessment unless their direct relationship to the competency standard unit(s) is formally approved by industry and recorded.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment of essential theory — summative assessment of the theory (essential knowledge and associated skills) underpinning competent performance is to be sufficiently rigorous and searching to ensure that individuals comprehend why they are doing something, the options they may use to achieve the required goal, and the fact that they can recall and/or locate and, interpret and transfer this information in varying contexts if it is needed at some other time. Typically, the specific level of depth and breadth the individual is required achieve is contained in industry and RTO sponsored essential knowledge and associated skills learning specifications that are aligned to respective competency standard units.

Assessment of learners with low language/literacy/numeracy skills/under-represented groups — assessment systems need to be capable of being applied in cases of low language/literacy/numeracy skills/under-represented groups. Reasonable adjustment strategies to address assessment of those with low language, literacy and numeracy skills and under-represented groups should be included in any Assessment Materials used by Registered Training Organisations, and be consistent with the quality assurance requirements of State Training Authorities for registration.

Range of Assessment Methods and their Uses

Types of Assessment

A variety of assessment types apply and can be used individually or in combination. These are:

Direct observation Observe the learner carrying out their usual practical tasks in the workplace. This may be accompanied by questions. Direct observation is probably the easiest and most convenient method of assessment.

Third party reports Information provided by the immediate supervisory or other appropriate persons. An external assessor may not have the opportunity to make multiple observations of a candidate over a period of time, unlike an internal (in-house) assessor. The external assessor may obtain third party reports to supplement an assessment.

Demonstration and questioning The candidate gives a demonstration of a practical task. If there is no opportunity to observe this competency in the standard work environment, the assessor may ask the candidate to provide a practical demonstration. The assessor can see both the process and the finished product.

Pen and paper tests and essays These are used to measure the extent of knowledge or may test problem-solving capability. They can complement practical demonstration.

Oral tests These can be an adjunct to practical demonstration.

Projects — these tend to be unsupervised. The assessor uses the final product as a basis for judgement.

Simulation This may involve an off-site practical test. The actual tasks and conditions are similar to real life situations and are in accord with prevailing industry policy enunciated by the Industry Skills Council for the industry. A Simulation Policy has been developed and can be obtained at www.e-oz.com.

Portfolios These are used for assessing skills achieved in the past. They can include work samples.

Profiling Information gathered over time from a structured profiled data entry card and resultant report.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment Methods

Assessment methods must be appropriate to the situation. Learners can be encouraged to use these methods for self-assessment. Combinations of these methods will be required for most situations (eg. observations and oral questioning). The recommended assessment methods for collecting the various kinds of evidence required to determine the candidate's competency are:

A — Oral questioning

B — Structured observation of work

C — Indirect supporting evidence (supervisor's reports).

Not all the methods need to be used. For example, during the assessment period the assessor may find that they don't need all three methods to collect sufficient evidence. The assessor may also plan to use other, equally valid, combinations of assessment methods. It is recommended that assessors use open questions in conjunction with direct observations to assess the candidate's ability to:

- apply relevant knowledge to the particular task
- perform the required tasks safely and efficiently
- handle unforeseen contingencies and circumstances
- recognise and solve problems associated with the whole job (which may not necessarily occur during the assessment).

It is recommended that supervisor's reports or verified calculations are used to confirm that workplace job activities have been completed on time and meet the required specifications. This is particularly relevant when the assessor is not for the total duration of the workplace job activity and/or the learner/candidate works as part of a team.

More information is contained in the following section 3.10 — Guide to Assessment Methods and Items.

1.3.09 Sample assessment instruments to support training and assessment material design

3.9 Sample assessment instruments to support training and assessment material design

Information related to assessment material design, training and assessment activities, and sample assessment materials against competency standard units in this Training Package is included in Appendix B — Sample assessment instruments to support training and assessment material design.

© Commonwealth of Australia, 2025 Powering Skills Organisation

1.3.10 Guide to Assessment Methods and Items

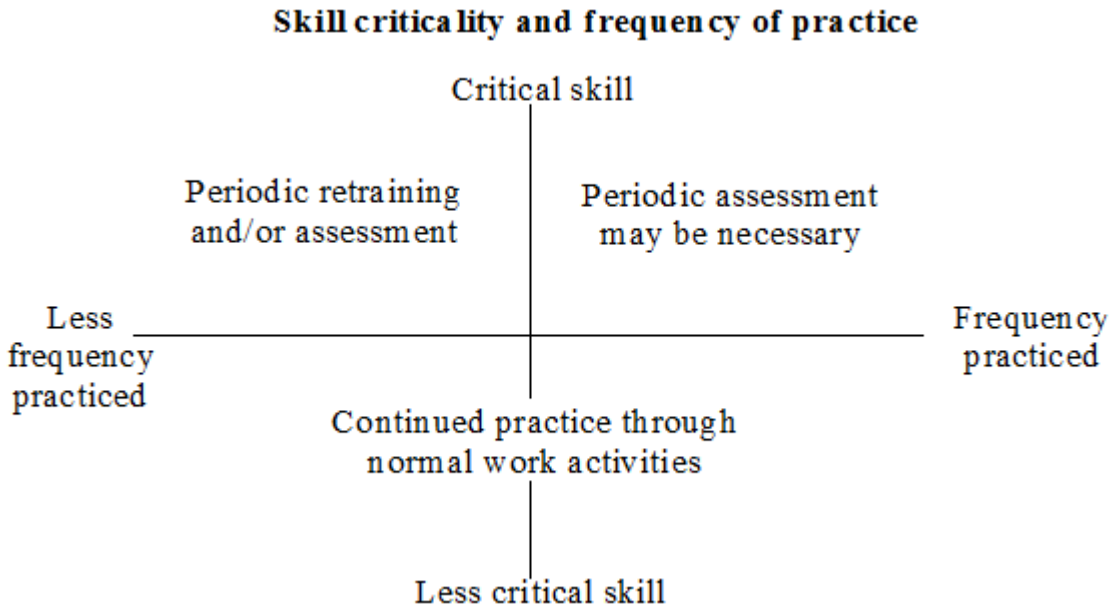
3.10 Guide to Assessment Methods and Items

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity and electrical equipment carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Activities associated with normal every day work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its ‘richness’. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practiced. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. These considerations can be summarised as follows:

© Commonwealth of Australia, 2025 Powering Skills Organisation



Irrespective of these considerations the assessment methods and instruments used should satisfy the conditions associated with sufficiency, currency, authenticity, validity, reliability, and be holistic in nature.

The following *Guide to Assessment Methods and Items* provides a summary of assessment methods in common use and the situations in which they may apply.

Guide to Assessment Methods and Items

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment method	Appropriate instruments	Valid purposes or use	Conditions and numbers	Time constraints	Repeat assessments
Written objective tests	True/false Multiple choice Matching Completion	Confirming essential factual knowledge, principles Assessing deduction, transfer of knowledge Complementing other methods	Controlled classroom High level supervision Large numbers	Moderate	Many
Written responses, short and extended answers	Calculations Definitions, explanations Essays	Assessing use of information Application of knowledge General ideas and solutions Research, organisation and expression of concepts or ideas	Test condition as above or Minimal supervision, and assistance	Moderate	Many
Oral test/ technical interview	Set question Scenarios	Assessing depth and breadth of knowledge Application of knowledge Relative to experience	Interview condition One to one	Moderate	Many
On job or workplace assessment	Observation, checklist Product assessment Questioning to complement observations	Identifying mastery or competence of practical task, technical skill or interpersonal skill in real or simulated setting Identifying gaps in education and training	Normal working conditions Moderate level supervision One to one Avoid expensive or	High	Nil to many depending on assessment of product or process

© Commonwealth of Australia, 2025 Powering Skills Organisation

			hazardous situations		
Practical/ Exercises	Stimulated work exercises Structured practical exercises Fault finding exercises	Checking mastery or competence of a practical task, technical skill, or subset of performance in a simulated work setting	Controlled laboratory or field setting High level supervision 10 to 15	Low	Several
Practical projects	Research task or investigation Product or process development Individual learning contract	Assessing integration and application of a number of work related skills to solve a given problem Assessing individual approaches, innovation, creativity Assessing interaction with others	Access to laboratory, workshop or workplace Little supervision 10 to 15	Low	Several
Assignments	Resource life Case studied Poster presentation Reports of video or speaker presentations Reports of laboratory/field work, excursions Individual learning contracts Writing simple manuals	Confirming competence to research, analyse and synthesise information Assessment of application of knowledge, skills and attitudes where practical testing is not feasible Assessment of communication skills	Moderate of level control Non-test conditions Little supervision 10 to 15	Low	Several

© Commonwealth of Australia, 2025 Powering Skills Organisation

	or procedures				
Personal appraisal	Checklists or criteria which enable peer or self assessment	Establishing readiness for summative assessments Assessment of an individual's performance within a team effort	Non-test conditions Little supervision Small numbers	Low	Many
Verbal assessment	Oral exposition or lecture Seminar, presentation and group discussion Oral/aural tests Interviews	Confirming understanding of principles underpinning performance Supplement other assessment methods Verification of learner's submitted work.	Moderate level of control High level of supervision One to one	Low	Several
Profiling	Structure manual or computer-based log.	Tracks competency development against the industry standard profile specified by CSUs. Identifies when remedial action is required during development period.	[3]Real work conditions under workplace supervision. Off-job assessment events Any number	Low / Medium	On going

[2]A valid profile is based on periodic collection of relevant data over the duration of a competency development training program.

[3]A complete profile is constructed from all required evidence of competency, however where a profile of only workplace performance is used it must be supplemented with other methods such as those outlined in this table.

© Commonwealth of Australia, 2025 Powering Skills Organisation

1.3.11 Guidelines for Conducting Assessments

3.11 Guidelines for Conducting Assessments

The following guidelines describe the industry-preferred process for conducting assessments against the competency standard unit(s) in this Training Package. This process applies to all assessments conducted for the purposes of national recognition in both institutional and workplace contexts.

Assessment within the Gas Industry is to be carried out by a qualified assessor trained in the conduct of assessment:

- Assessment should be planned, arranged and organised well in advance of the event/process.
- The candidate should be involved in the planning and preparation so that their readiness and availability is assured, and their advice on evidence collection opportunities may be considered.
- The environment within which assessment is to occur is acceptable to the parties and conducive to the assessment process.
- The assessor's actions throughout the process are firm, fair, friendly and unambiguous.
- Specific rulings on safety breaches are explained up-front and acted on in accordance with the assessment materials.
- The assessment process should contain no surprises for any party.
- Feedback is provided as required throughout the assessment process.
- Post assessment activities including recording, reporting, counselling etc. are finalised promptly.

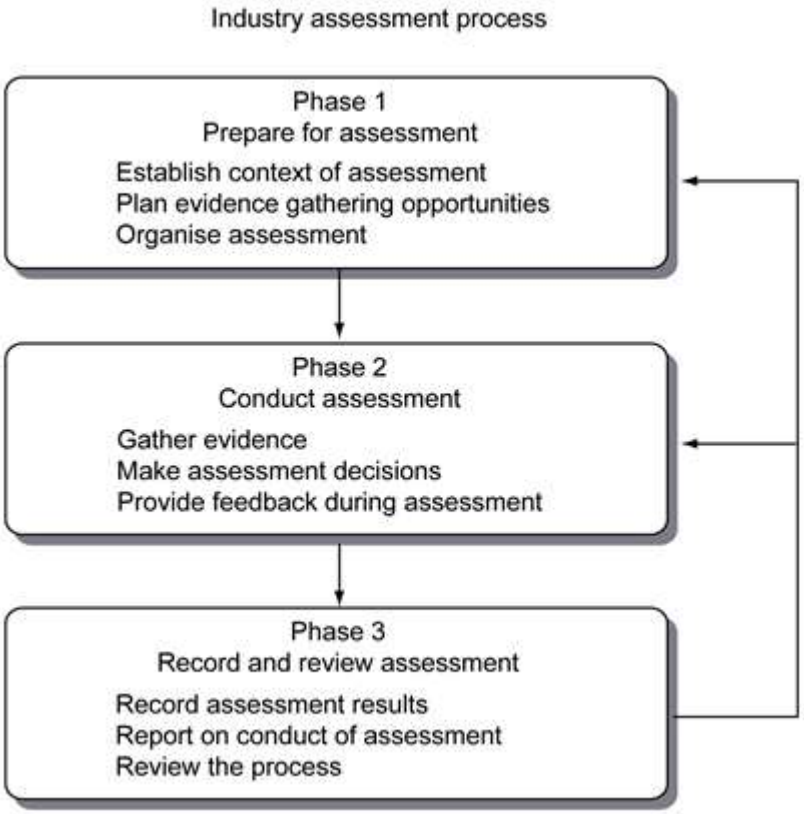
Candidates will invariably be accepting of the outcomes of an assessment process in which:

- they consider they were treated fairly, consistently and with dignity
- they were given the full opportunity to demonstrate their capabilities
- the reasons for the assessment decisions were appropriate, logical and constructively explained
- the assessment judgements are conveyed in a sensitive and constructive manner.

The following provides an overview for assessment within the Gas Industry. It outlines the process involved in conducting assessment in both the institutional and workplace context, and consists of three major components that each assessor will need to do:

© Commonwealth of Australia, 2025 Powering Skills Organisation

Prepare for Assessment



The assessor:

- establishes the context and purpose of the assessment
- identifies the relevant competency standard unit(s), assessment guidelines and qualification framework in this Training Package which contains the vocational standards for industry including the relevant performance measures applying to assessment
- identifies any NSSC noted support materials that have been developed to facilitate the assessment process
- analyses the competency standards and identifies the evidence requirements;
- identifies potential evidence collection methods
- identifies issues related to techniques, OHS, language and literacy, cultural diversity, under-represented groups, key competencies and skills enabling employment.

Prepare the candidate

The assessor meets with the candidate to:

- discuss and confirm the purpose of assessment with the candidate and where appropriate, the employer
- explain the context and purpose of the assessment and the assessment process
- explain the competency standards to be assessed and the evidence to be collected and ensure the candidate has access to the relevant competency standards and other relevant information
- explain and obtain agreement to the assessment procedure

© Commonwealth of Australia, 2025 Powering Skills Organisation

- advise on self-assessment, including processes and criteria
- outline the assessment procedure, the preparation the candidate should undertake, and answer any questions
- assess the needs of the candidate and, where applicable, negotiate reasonable adjustment for assessing people with disabilities without compromising the integrity of the competencies
- seek feedback regarding the candidate's understanding of the competency standard unit(s), evidence requirements and assessment process
- determine if the candidate is ready for assessment and, in consultation with the candidate, decide on the time and place of the assessment
- develop an assessment plan
- discuss the Gas Industry and enterprise assessment policy with the candidate (ie how the competencies to be assessed will fit in with the Industry training policy and preferred framework or enterprise arrangements for training and assessment. The assessor should also understand what the candidate has done to acquire the knowledge and skills).

Plan and prepare evidence-gathering process

Practical assessment should preferably be conducted on site. However, if on-site practical assessment is not possible then off-site assessment at a mutually agreeable site could be appropriate. It can be part of the current work (i.e. observation of current tasks) or a demonstration, ie a simulated task.

The assessor must:

- establish a plan for gathering sufficient quality evidence about the candidate's performance in order to make the assessment decision (and involve industry representatives in the development of plans for the validation of assessment)
- identify opportunities to gather evidence of competence which occurs as part of the workplace activities
- ensure the planned approach to gathering evidence will provide sufficient, reliable, valid and fair evidence of competence
- source or develop assessment materials to assist in the evidence gathering process
- choose the techniques that will be used to assess the candidate's knowledge and skill
- organise equipment or resources required to support the evidence gathering process
- check the assessment environment permits fair, valid and reliable assessment and that it is safe and accessible
- inform other relevant people of assessment plans, coordinate and brief other personnel involved in the evidence gathering process
- identify the need to gather additional evidence which may not occur as part of workplace activities
- consider issues related to techniques, OHS, language and literacy, cultural diversity, under-represented groups, key competencies and skills enabling employment.

Collect the evidence and make assessment decisions

The assessor must:

- establish and oversee the evidence gathering process to ensure its validity, reliability, fairness, flexibility and consistency

© Commonwealth of Australia, 2025 Powering Skills Organisation

- collect appropriate evidence and assess this against the Elements, Performance Criteria, Range Statement and Evidence Guide in the relevant competency standard unit(s)
- evaluate evidence in terms of the four dimensions of competency — task skills, task management skills, contingency management skills, and job/role environment skills
- incorporate allowable adjustments to the assessment procedure without compromising the integrity of the competencies
- evaluate the evidence in terms of validity, consistency, currency, equity, authenticity and sufficiency
- gathers evidence related to techniques, OHS, language and literacy, cultural diversity, under-represented groups, key competencies and skills enabling employment
- consult and work with other staff, assessment panel members or technical experts involved in the assessment process
- document the evidence gathered in accordance with the assessment procedure and record details of evidence collected
- make a judgement about the candidate's competency based on the evidence and the relevant competency standard unit(s) and the criteria specified in the assessment procedure.

Provide feedback on the assessment

The assessor must provide advice to the candidate about the outcomes of the assessment process. This includes providing the candidate with:

- clear and constructive feedback on the assessment decision
- information on ways of overcoming any identified gaps in competency revealed by the assessment
- the opportunity to discuss the assessment process and outcome
- information on reassessment and the appeals process.

Record and report results

The assessor must:

- record the assessment outcome according to the policies and procedures of the RTO
- maintain records of the assessment procedure, evidence collected and the outcome according to the policies and procedures of the RTO
- maintain the confidentiality of the assessment outcome
- organise the issuing of qualifications and/or Statements of Attainment according to the policies and procedures of the RTO.

Review assessment process

On completion of the assessment process, the assessor must:

- review the assessment process
- report on the positive and negative features of the assessment to those responsible for the assessment procedures
- if necessary, suggest to appropriate personnel in the RTO ways of improving the assessment procedures.

Participate in the reassessment and appeals process

© Commonwealth of Australia, 2025 Powering Skills Organisation

The assessor must:

- provide feedback and counsel the candidate, if required, regarding the assessment outcome or process, including guidance on further options
- provide the candidate with information on the reassessment and appeals process
- report any disputed assessment decision to the appropriate personnel in the RTO
- participate in the reassessment or appeal according to the policies and procedures of the RTO.

Review and maintenance of the assessment system

The developer and custodian, E-Oz Energy Skills Australia of this Training Package which contains the vocational standards for industry is responsible for the ongoing monitoring and review of these Assessment Guidelines. This process will be incorporated in the general review and maintenance of this Training Package.

1.3.12 Maintenance of Assessment Guidelines

3.12 Maintenance of Assessment Guidelines

The Gas Industry Assessment Guidelines were developed by, and are therefore owned by, the industry.

The Assessment Guidelines must be maintained so that it reflects the ongoing needs of the Industry sector and responds in a timely manner to changed technologies, work organisation, skills development and related circumstances.

Responsibility for maintaining of the Assessment Guidelines is shared by the parties who constitute the sector:

- Assessment Guidelines maintenance will be coordinated and managed by E-Oz Energy Skills Australia in its role as a declared Industry Skills Council for ElectroComms and EnergyUtilities, and
- Suggestions and proposals for changes from all parties are welcome. These should be documented and submitted to E-Oz Energy Skills Australia the DOI declared Industry Skills Council for the ElectroComms and EnergyUtilities Industry.

Assessment Resources

Registered training organisations (RTOs) are at the forefront of vocational education and training (VET) in Australia. They translate the needs of industry into relevant, quality, client-focussed training and assessment.

RTOs should strive for innovation in VET teaching and learning practices and develop highly flexible approaches to assessment which take cognisance of specific needs of learners, in order to improve delivery and outcomes of training.

Training Package Assessment Guides

A range of resources to assist RTOs in developing Training Package assessment materials (originally developed by DEST with funding from the Department of Education, Training and Youth Affairs) and made up of 10 separate titles, as described at the publications page of <www.dest.gov.au>.

Go to: http://www.resourcegenerator.gov.au/loadpage.asp?TPAG.htm

Printed and CD ROM versions of the Guides can be purchased from Technical and Vocational Education and Training Australia Limited (TVET). The resource includes the following guides:

a. Training Package Assessment Materials Kit
b. Assessing Competencies in Higher Qualifications
c. Recognition Resource
d. Kit to Support Assessor Training
e. Candidate's Kit: Guide to Assessment in Australian Apprenticeships
f. Assessment Approaches for Small Workplaces
g. Assessment Using Partnership Arrangements
h. Strategies for ensuring Consistency in Assessment
i. Networking for Assessors
j. Quality Assurance Guide for Assessment

An additional guide 'Delivery and Assessment Strategies' has been developed to complement these resources.

1.3.15 Appendix A - New Apprenticeships Application

Appendix A — New Apprenticeships Application

New Apprenticeships are work related competency programs designed for entry-level contracted employment for new entrants to the industry. All qualifications in this Training Package could be open to use as New Apprenticeships and are governed by State/Territory Training Authority arrangements and their limitations.

New Apprenticeships offer both employers and employees:

- relevant training
- a range of support service arrangements.

© Commonwealth of Australia, 2025 Powering Skills Organisation

They typically involve paid work and structured training and are underpinned by a training contract, which is registered with the relevant State/Territory Training Authority. Completion of the competency development program leads to an AQF qualification.

In some instances, and subject to any relevant State/Territory Training Authority arrangements, existing non-apprenticed workers may be eligible for New Apprenticeship opportunities. Inquiries with the relevant State/Territory Training Authority should be made in this regard.

Like traditional apprenticeships, New Apprenticeships involve a commitment from:

- the employer to provide an environment for systematic training of the New Apprentice
- the New Apprentices to apply themselves to learning the requirements of their vocation
- a Registered Training Organisation (RTO)[1] to be responsible for providing the vocational education, training and assessment support services and the eventual issuing of a national qualification

[1]For more information on RTOs see DEST's 2005 Australian Quality Training Framework Standards for Registered Training Organisations, effective from 1 July 2005 publication.

In the Gas Industry, New Apprenticeships are available for all the qualifications outlined in this Training Package. New Apprentices seeking one of the national qualifications will be required to undergo a training program or course of study that involves learning and assessment activities. The related learning and assessment activities are documented and involve:

- the employer
- the employee
- the RTO[2]

[2]TAFE Institutions, Universities with TAFE sectors, Skills Centres and similar enterprises that can deliver vocational training are eligible to become RTOs.

On successful completion of the training program or course of study an RTO will issue the New Apprentice a national qualification.

Entry Requirement

Under New Apprenticeships, the employer is able to determine the relevant employment criteria for recruiting a new entrant into the Gas Industry. The choice, however, is usually dependent on enterprise employment practices and needs including requirements that may be imposed by relevant regulations and codes of practice.

There is, however, a common set of attributes/profiles that are industry preferred for the recruiting of New Apprentices. Some of the more common ones are:

- Any person aged 15 years or more can apply for a New Apprenticeship.
- Most employers require applicants who have completed at least Year 10 of a secondary school education program.
- Employers customarily prefer applicants who have successfully completed Years 11 or 12 of a secondary school education program or a post secondary education pre-employment course.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Potential entrants should be aware that employers are looking for the following personal attributes:

- effective numeracy and literacy skills
- effective communications skills
- acceptable presentation
- punctuality
- a positive attitude
- interest in the industry as a career
- ability to work at heights or in confined spaces and around moving machinery
- ability to distinguish between colours.

For entry-level employment based contracted training New Apprenticeships the composition of the relevant qualification needs to be determined in accordance with the completion requirements detailed here and be subsequently agreed to between the respective parties.

General principles regarding the composition of qualifications are as follows:

- Competency Standard Units making up a qualification must be appropriate to the work being performed and be performed by the person seeking the qualification
- Competency Standard Units making up a qualification must be appropriate to the level and integrity of the qualification sought.

The terms and conditions for employment based entry-level contracted training require a training agreement or contract, which will be provided by State or Territory Training Authorities. Such an agreement is called an Apprenticeship/Traineeship Training Contract, which requires parties to the contract to select the appropriate qualification, competency standard units and to adopt an industry-preferred model or design a new training plan/program. Additionally, the responsibilities of the parties to the contract will be contained therein.

The employment of an Apprentice (sometimes also called a Trainee) by an Employer is subject to the relevant legislation and any applicable industrial instrument, order or determination made under that related Statutory Act. Appropriate information should be obtained from relevant authorities in this regard.

General principles governing the Competency Development Program

Consultation between the RTO, the employer and apprentice/trainee will have occurred and agreement reached on the Competency Development Program that will be delivered. Typically the RTO will adopt the industry-preferred approach where regulatory arrangements are in place or design an appropriate program in concert with the Industry. The apprentice/trainee would be expected to undertake the Competency Development Program in order to attain competence in the given qualification.

The Competency Development Program

A training contract provides a description of the process for undertaking training during the life of the program. This is developed in consultation with the RTOs.

The Training Program

© Commonwealth of Australia, 2025 Powering Skills Organisation

1. Expected duration of workplace program in hours

The training program will detail the anticipated duration in hours that the apprentice/trainee is expected to undertake in order to gain the necessary competencies. Information regarding the suggested nominal duration for respective AQF levels of New Apprenticeships is available from respective parties and includes E-Oz Energy Skills Australia. The training plan will outline the requisite on and off-the-job arrangements that apply to it.

2. On-the-job skills development program

In consultation with the apprentice/trainee and employer, the RTO would outline how it intends to monitor the on-the-job component, i.e. providing advice on how evidence is to be gathered when the apprentice/trainee is in the workplace. Apprentices/trainees are expected to assist RTOs in gathering and submitting workplace evidence as per the industry-preferred approach. This is particularly important where regulatory arrangements are in place. RTOs in turn monitor the performance of the apprentice/trainee and provide appropriate feedback to them and the employer.

3. Off-the-job skills development program

The training contract will detail, where applicable, the off-the-job (technical education) program the RTO will deliver in order to gain the necessary underpinning skills and knowledge. This is typically a program preferred by the industry undertaken by the apprentice/trainee. For example where modules or essential knowledge and associated skills strategies apply, the number, title and duration of each will generally be advised. This will also include the expected duration of the technical educational program in hours.

Typical duration — New Apprenticeships

In developing this Training Package due regard has been given, by industry, to a range of influencing factors associated with the typical period of employment and related training for individuals seeking a qualification, using the Australian Qualification Framework (AQF). In developing such, regard has also been given to the NSSC policy on providing industry advice on this matter.

As a general rule it is expected, that by employing the respective techniques and processes detailed in the preferred and adopted industry training model, those employed and undertaking training to satisfy the outcomes of competency standard units, as new entry-level recruits, will take a "nominal duration" of employment to complete. E-Oz Energy Skills Australia has developed industry advice in relation to the nominal duration of employment to assist users in their activities. Detailed information on typical new apprentice durations, at each of the AQF levels is available from E-Oz Energy Skills Australia. This detail can be obtained directly from E-Oz Energy Skills Australia or found on the E-Oz Energy Skills Australia website at www.e-oz.com.au. Additionally, more specific information may be contained within any related support materials that may exist as non-endorsed components of this Training Package and in particular the industry-preferred training plan applicable to each qualification.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Nominal duration of training is generally defined by State, Territory and Federal Training Authorities policies and/or regulations. Typically these are set out in State/Territory Training Package Implementation Guides. Interested State/Territory parties should ensure they refer to the relevant Training Package Implementation Guide. These can be accessed via the respective State/Territory Training Authority websites.

1.3.16 Appendix B - Sample Assessment Instruments to Support Training and Assessment Material Design

Appendix B — Sample Assessment Instruments to Support Training and Assessment Material Design

This Appendix provides advisory and sample information for assessment material design against competency standard units in this Training Package. It is principally about training and assessment activities that can be used to benchmark quality outcomes.

It provides information about assessment material design and other resources available to support implementation of the Training Package. The information contained herein shows how these resources relate to the workplace and where they can be obtained. It includes sample assessment tools (sample instruments) developed to assist those involved in benchmarking their activities for gathering evidence about workplace activities and workplace experiences for training and assessment purposes.

Sample assessment instruments included were developed for documenting workplace experiences related to the requirements of this Training Package. The assessment strategies and instruments are primarily for use as advisory information for workplace assessors and/or their agents (workplace supervisors or technical experts) who may be employees of Registered Training Organisations or enterprises.

A number of terms used refer to aspects of implementing the Training Package. A Glossary of Terms (*see* Appendix B Enclosure C) is included to clarify the specific meaning of these terms.

This Appendix should be read in conjunction with the following publications:

- The respective volumes of this Training Package
- Training Package for Training and Assessment TAE10
- Training Acts and Regulations in the relevant Australian State or Territory
- Policies of the Registered Training Organisation (RTO) involved with training and assessment for the Industry.

Sources of Education, Training and Assessment Information

Introduction

This section shows how the Training Package and associated resources relate to recruitment, training, assessment and recognition activities which may be undertaken by Industry, enterprises and/or Registered Training Organisations.

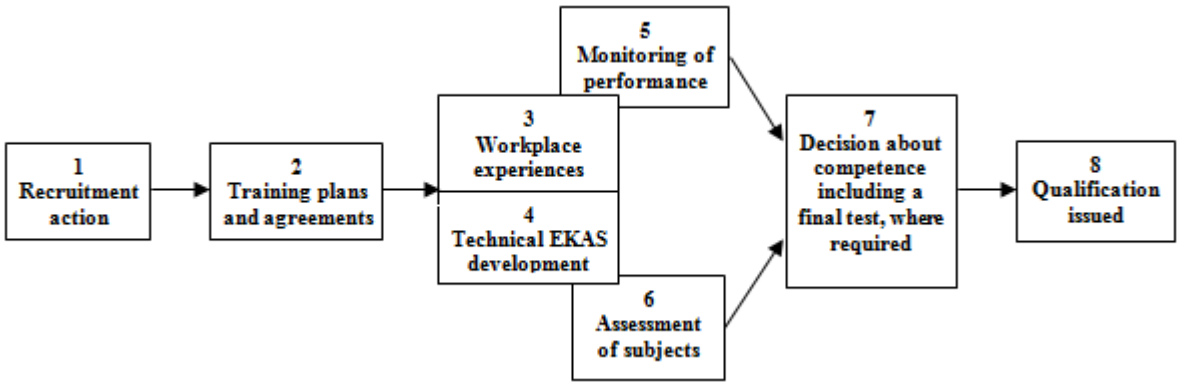
© Commonwealth of Australia, 2025 Powering Skills Organisation

This section also introduces a competency development and/or recognition model based on combined on and off-the-job training, as well as a model that allows individuals to have previous learning and work experience recognised.

Combined on and off-the-job competency development model

The model shown below is a simplified version of the detailed contracted new entry level industry-preferred competency development model which combines on and off-the-job education, training and assessment leading to competent performance. A detailed copy of the model is available from E-Oz Energy Skills Australia website at www.e-oz.com. This model recognises that learning occurs as a result of:

- experience in recurring workplace events
- directed workplace learning activities
- structured off-the-job essential knowledge and associate skills technical educational activities.



Competency Development Model

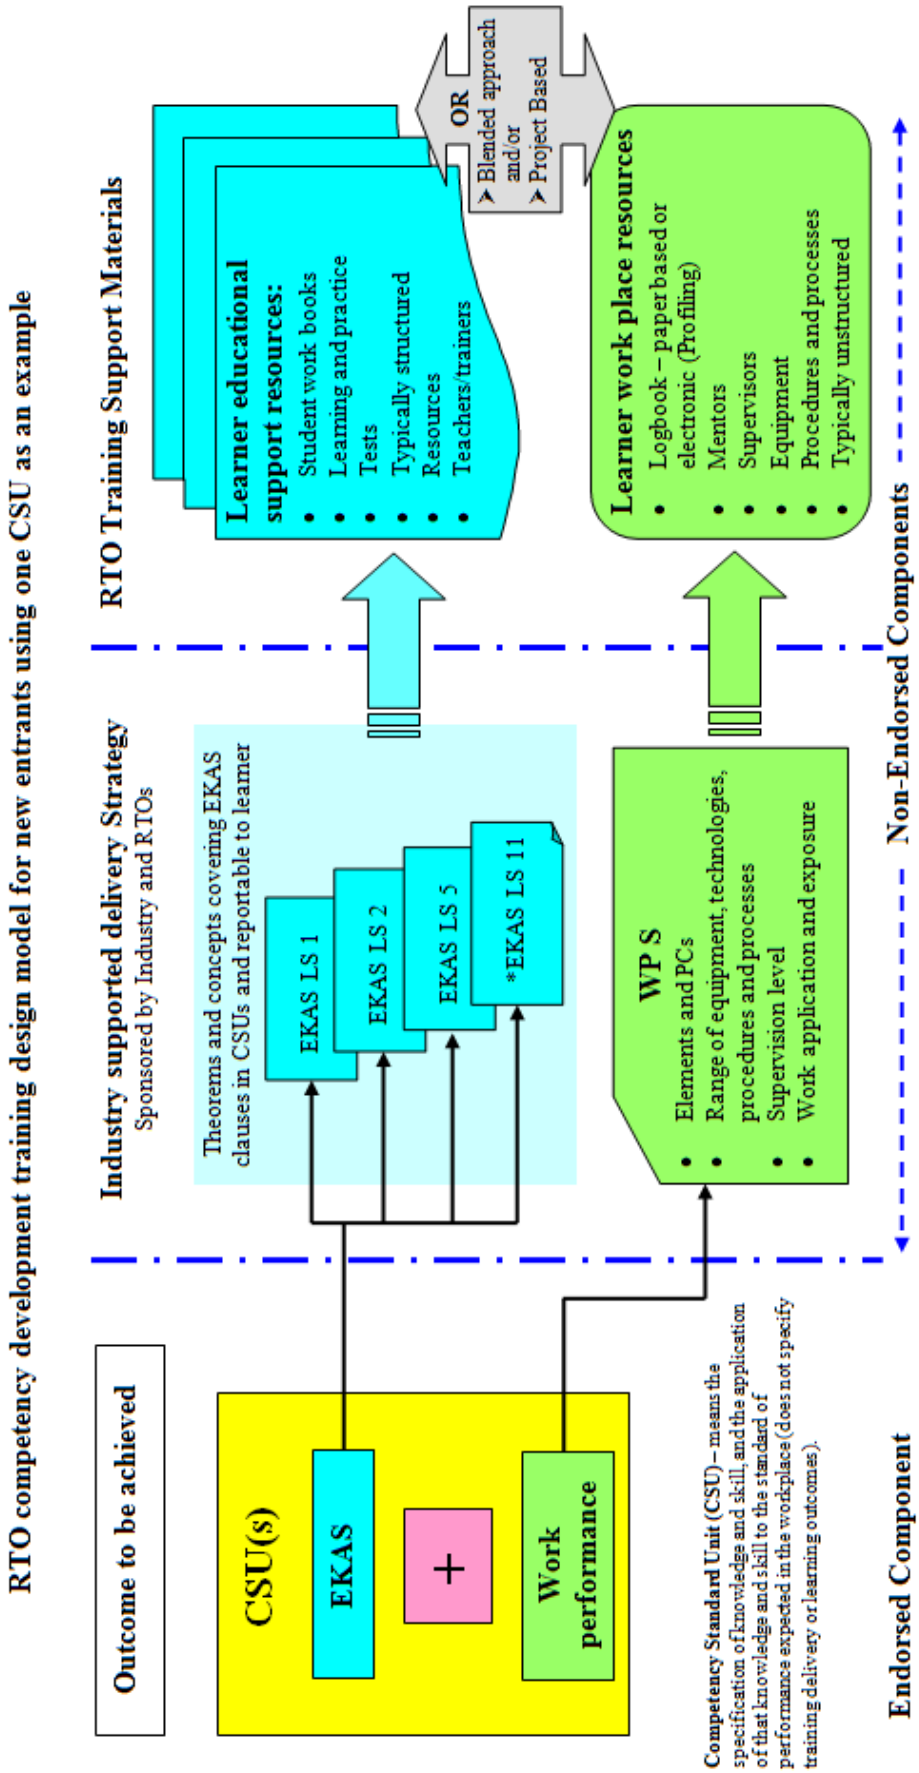
This model is structured around a new entry level learner undertaking a full competency development program. The model can also accommodate the assessment of prior learning within the continuum of new entrant to competent. In this way it is consistent with the Assessment Pathways outlined in this Assessment Guidelines part of the Training Package.

© Commonwealth of Australia, 2025 Powering Skills Organisation

New Entrant Training and Assessment Materials and Resource Design and Development

In designing training and assessment materials and resources to support new entrant competency development consideration should be given to the preferred Industry approach to learner development. The concept model detailed on the next page explores how training and assessment materials and resources may be best developed for one or many competency standard units. RTOs using this approach ensure increased consistency in meeting the specifications in learning and work performance against the competency standard units, and in developing the learner in a cost effective way with little disruption to the day-to-day operation of the workplace. It also assures that a learner having completed aspects of, but not the full array of, competency standard unit(s), can be accorded information that is sufficient to warrant recognition for learning content (Essential Knowledge and Associated Skills) that is transferable to other environments in the Industry.

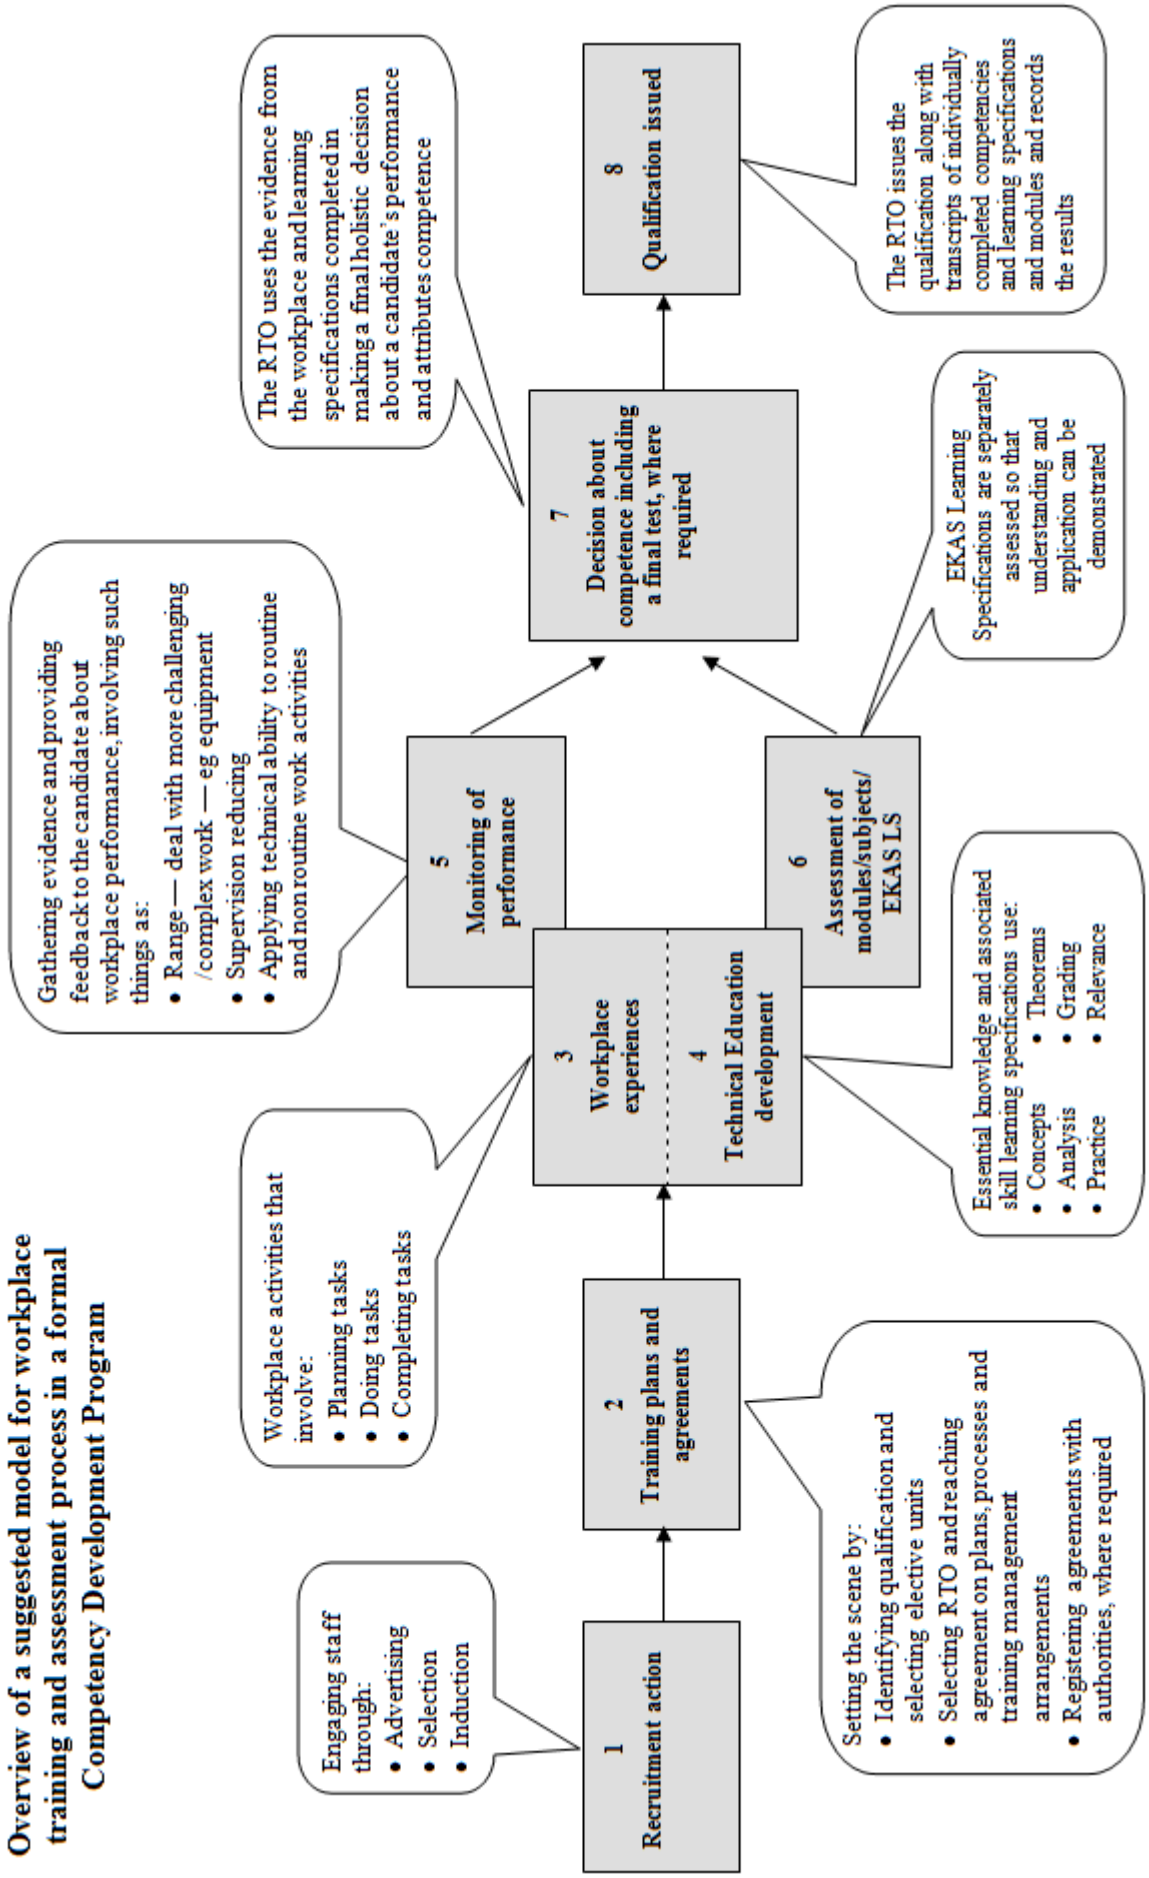
© Commonwealth of Australia, 2025 Powering Skills Organisation



© Commonwealth of Australia, 2025 Powering Skills Organisation

EKAS LS – Essential Knowledge and Associated Skills Learning Specifications = where EKAS LS 1 — may cover many units, EKAS LS 2 — may cover a number of units, EKAS LS 5 — may cover several units, and/or EKAS LS 11 – may be unique to the unit (refer to Volume 1 Part 2 and Volume 2 Part 2 for more detail)

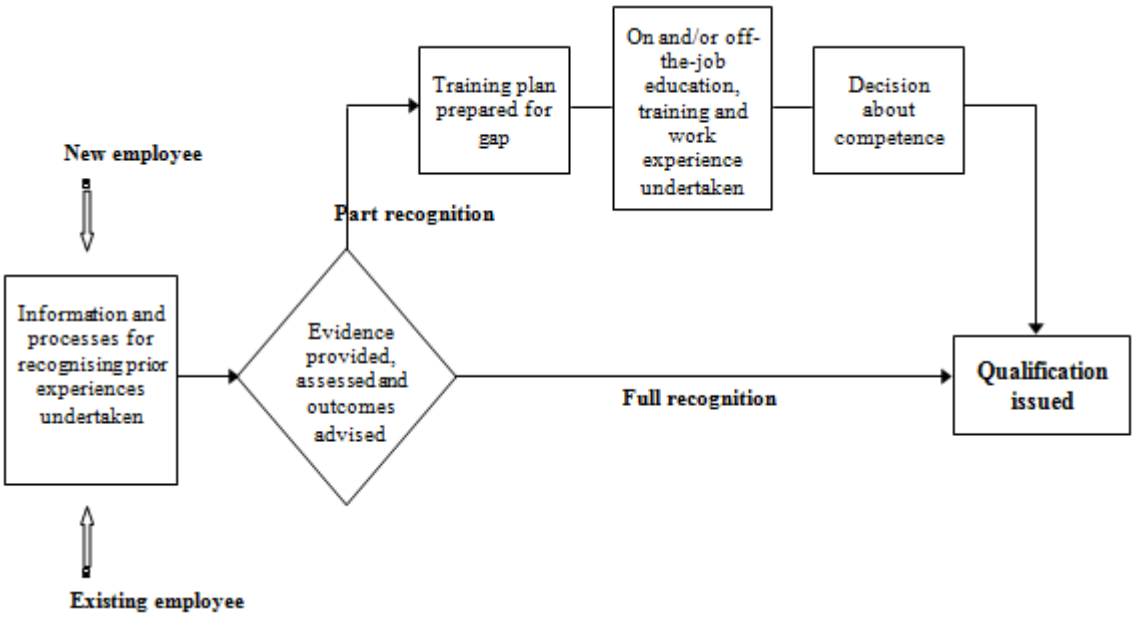
© Commonwealth of Australia, 2025 Powering Skills Organisation



© Commonwealth of Australia, 2025 Powering Skills Organisation

Recognition of Prior Learning/Experience Model

A typical process for candidates seeking to have their prior experiences recognised within the model is shown in the following diagram.



Learning and Assessment strategies

Introduction

The skills and knowledge required by a competent worker are described in terms of competency standard units. To be assessed as ‘competent’, against competency standards, individuals need to demonstrate they have achieved the requisite workplace functions and have also acquired the specified essential knowledge and associated skills (EKAS) underpinning performance.

A candidate wishing to be assessed against a specific competency standard unit(s) must be assessed by a qualified assessor. The assessor must use assessment processes, methods and tools which are in line with this Training Package.

Assessment involves gathering evidence to demonstrate that an individual has the necessary essential knowledge and associated skills required by the specified competency standard(s) together with requisite work performance. This may include assessment of knowledge and skills obtained through educational courses as well as through application of knowledge and skills in the workplace using workplace processes, equipment and activities.

© Commonwealth of Australia, 2025 Powering Skills Organisation

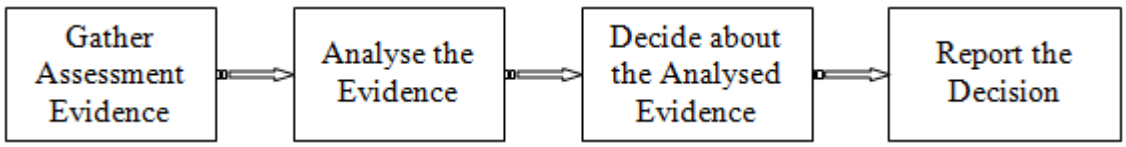
Assessment Planning

Good planning of workplace assessment is most important. The plan is to be based on a suitable process that is in line with the Competency Unit — TAAASS401A Plan and organise assessment from the Training and Assessment Training Package. Assessors need to address the following components of competence in Training Package TAA04, which cover:

- establishing evidence requirements for a specific context
- establishing suitable assessment methods
- developing assessment tools appropriate to a specific assessment context
- trialling assessment procedure.

The Assessment Process

The general process for assessing competence is shown in the following diagram.



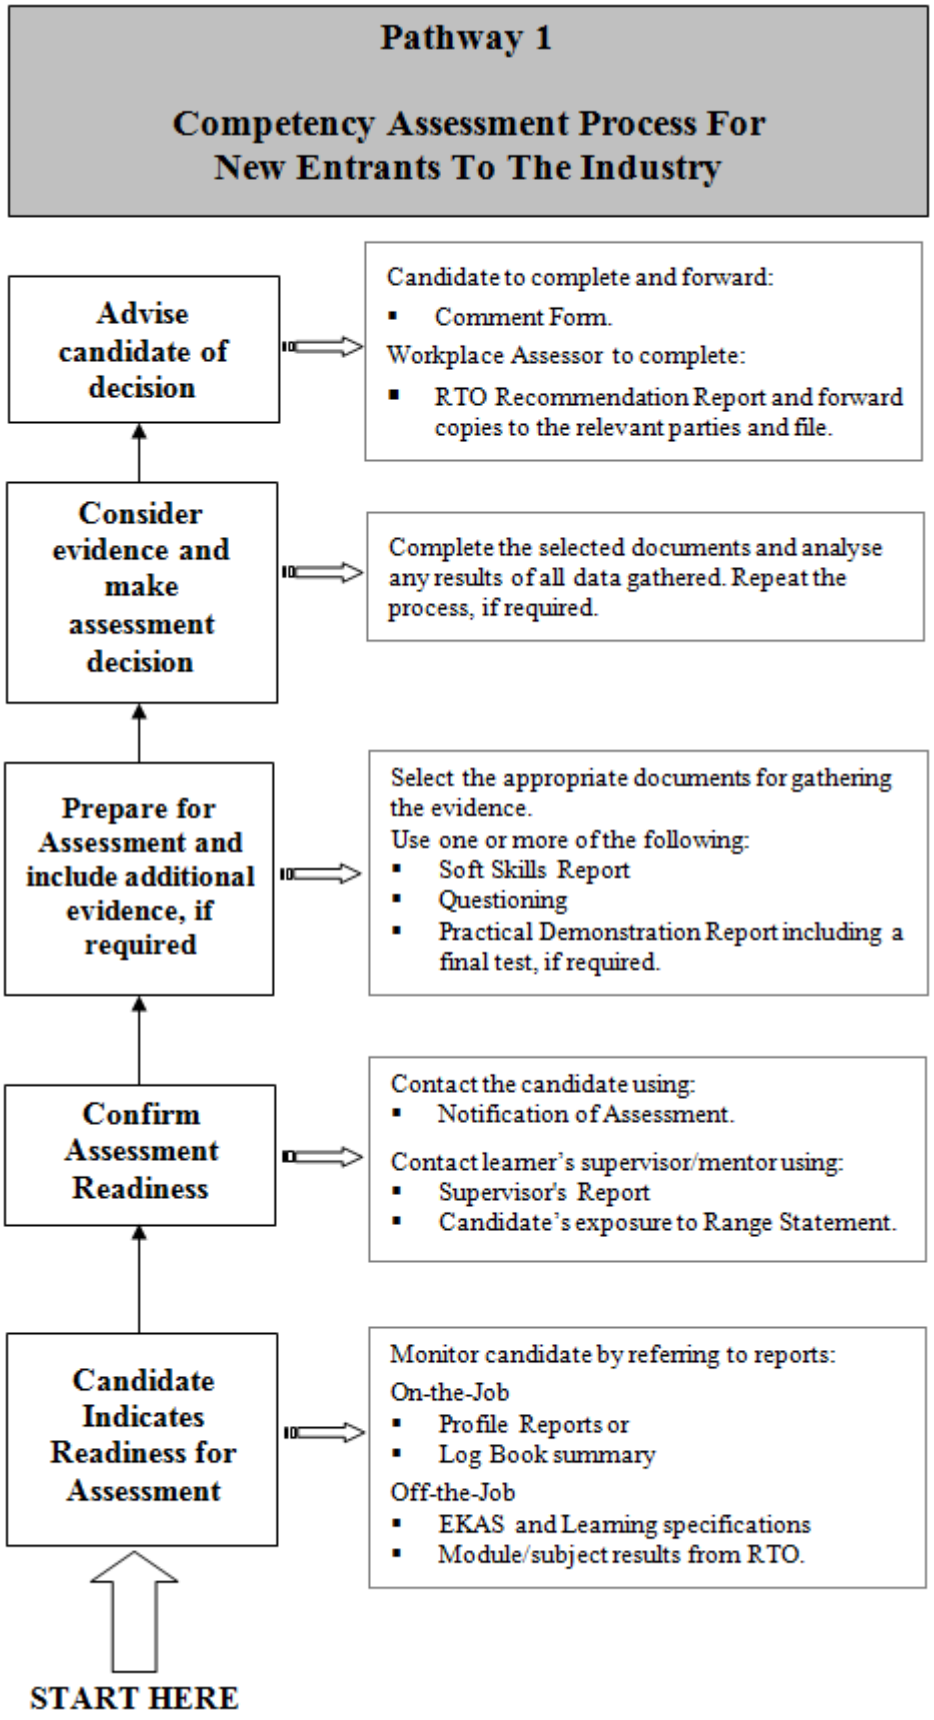
Assessors need to adapt the process to take account of physical and operational conditions as well as the characteristics and background of the candidate being assessed. Once the process has been finalised, the candidate should be advised.

The Assessment Guidelines of this Training Package identify three assessment pathways for the Industry, as follows:

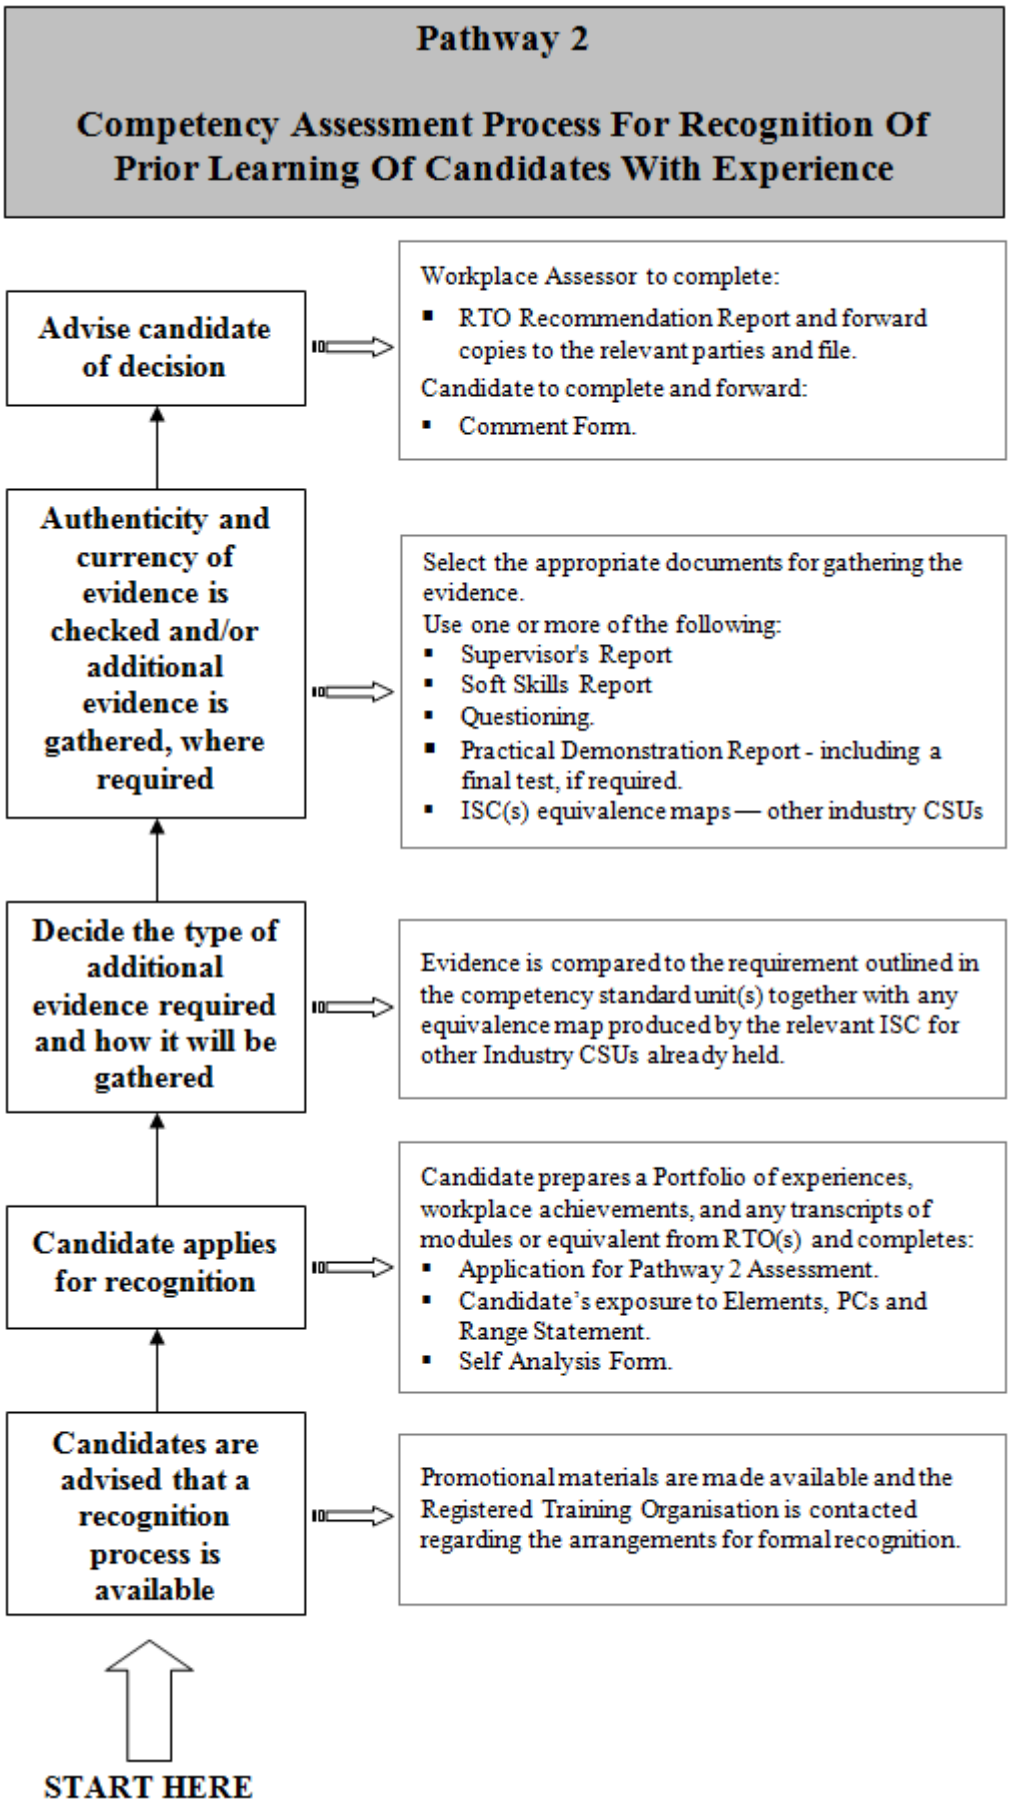
- Pathway 1: For new entrants to the industry
- Pathway 2: Recognition of prior learning of those with experience in the Industry
- Pathway 3: Recognition of equivalent Competency Standards Units from other Industry Training Packages

© Commonwealth of Australia, 2025 Powering Skills Organisation

Pathway 3 can be incorporated within the Pathway 2 processes and activities.



© Commonwealth of Australia, 2025 Powering Skills Organisation



© Commonwealth of Australia, 2025 Powering Skills Organisation

Establishing the Evidence Requirements

The Training Packages provides a clear statement regarding the evidence requirements in the Evidence Guide and in particular the critical aspects of evidence of each competency standard unit. The following is an extract from one competency standard unit.

'***Critical aspects of evidence***

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated performance criteria shall be demonstrated on at least two occasions in accordance with the 'Assessment Guidelines – UEG06'. Evidence shall also comprise:

- A representative body of performance criteria demonstrated within the timeframes typically expected of the discipline, work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:
  - Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the performance criteria and range
  - Apply sustainable energy principles and practices as specified in the performance criteria and range
  - Demonstrate an understanding of the essential knowledge and associated skills as described in Clause 6.1 'Essential knowledge and associated skills' of this unit to such an extent that the learner's performance outcome is reported on a percentile basis consistent with the preferred industry and/or regulatory benchmark requirements
  - Demonstrate an appropriate level of skills enabling employment
  - Conduct work observing the relevant Anti Discrimination legislation, regulations, polices and workplace procedures
- Demonstrated performance across a representative range of contexts from the prescribed items below:
  - Verify compliance and functionality of general electrical installations as listed in Clause '5. Range statement' and including:

    A — Selecting correct tools and testing equipment.
    B — Identifying visual non-compliance defects
    C — Using effective methods for conducting mandatory and optional tests
    D — Identifying non-compliance from test results.
    E — Identifying causes of non-compliance.
    F — Completing mandatory reporting.
    G — Dealing with unplanned events by drawing on essential knowledge and skills to provide appropriate solutions incorporated in the holistic assessment with the above listed items'

The evidence on which competency in this unit is deemed shall be considered holistically. encompassing '**items'** of evidence that industry has deemed critical and that also relate directly to the Performance Criteria and Range Statements. These could include:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- Specific tools, plant and equipment.
- Specific testing techniques
- Any advice limiting assessment to actual workplaces, for example because of licensing, regulatory or unique infrastructure requirements
- Specific licensing and regulatory requirements.
- Any advice dealing with unexpected and non-routine contingencies by drawing on essential knowledge and skills to provide appropriate solutions incorporated in a holistic assessment

Assessment Methods

Appendix B provides detailed information and examples of the methods and tools that may be used in the industry to help the assessment process.

Assessment involves determining whether a candidate has provided sufficient evidence to demonstrate that they have a specified level of skills and knowledge which they can apply in their work environment.

The evidence provided may include, for example:

- Work activity records
- a transcript of training outcomes
- a portfolio of learning experiences
- a self-assessment by the candidate against the relevant competency standard(s).
- supervisor's report(s), addressing requirements of the identified competency standard(s).
- practical demonstration.
- details of training undertaken linked to requirements of the identified competency standard(s), such as a profiling or 'many samples' reports
- outcomes of a challenge test.

The assessor may use a variety of assessment methods to gather evidence. Appropriate methods for documenting workplace experiences related to this Training Package are:

- on-the-job work observation
- practical exercises in the workplace or under simulated workplace conditions
- appraisal and report by a supervisor/trainer or colleague
- questioning and discussion with the candidate
- written/practical test
- any Industry Skills Council equivalence mapping declaration for competency standard units held from other Industry Training Packages

Develop the Assessment Tools

The assessment tools include:

- instruments for gathering evidence — samples included as Enclosure A in Appendix B
- forms for administrating the process — samples included as Enclosure B in Appendix B
- assessment design materials Glossary of Terms — included Enclosure C in Appendix B.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Trial the Assessment Procedure

It is very important to trial the assessment strategy. There is a need to make sure it is appropriate to the context in which the assessment is conducted. This will involve such things as:

- Focus on the specific requirements of the competency standard unit being assessed.
- Consideration of the characteristics and background of the person being assessed to make sure the assessor supports the candidate in their understanding of the process and the skills and knowledge that need to be demonstrated.
- Use of assessment methods and instruments to make sure the evidence gathered:
  - - addresses the conditions required to meet the Critical Aspects of Evidence as outlined in this Training Package and related competency standard units
  - - is drawn from a variety of sources and reflects the required range of work circumstances
  - - provides reasonable certainty that the evidence submitted is sufficient, current and authentic.

The selection and application of assessment tools is a decision made by assessors. There is no standard answer, however the following is provided as general guidance.

- Assessors need only gather enough evidence so they can make a judgment that competence has been demonstrated. Too much evidence may be difficult to analyse in a consistent manner, whereas insufficient evidence fails to satisfy the assessment criteria.
- Assessors need to adjust or modify the assessment processes and tools as required, within the constraints of achieving a valid, reliable and fair outcome.
- Assessors need to make sure assessment procedures satisfy the principles of assessment (validity; reliability; flexibility; fairness).
- Assessors need to be cognisant and use the industry-preferred assessment approach, as a first option.

Enclosure A10 Final/challenge test

Enclosure A11 Contracted entry level Profiling Model

Enclosure A1 — Work Activity Records

Work Activity Records may be produced in paper-based or in electronic form. Each Work Activity Record may relate to a group of Competency Standards or if need be a competency standard unit.

The activities and experiences recorded in this mode mostly relate to recurring workplace events associated with elements of performance involving exposure to a range of plant, tools, equipment, components and operating systems that are representative of normal work activities. Activities such as these, under appropriate levels of supervision, are important to a candidate's development.

Such records provide valuable data for:

- Candidates and their supervisor's to track progress in acquiring work-based competencies.
- Assessors to make decisions about a candidate's level of competence.

Work Activity Records summarise:

- relevant activities – (elements) and jobs/tasks undertaken at work
- associated resources used (such as tools, plant/equipment, procedures, and operating systems)
- the period of exposure to each type of task
- the level of supervision provided in the workplace.

This type of record is completed by the Candidate in conjunction with their Supervisor and signed by this Supervisor. It is important that workplace experiences are documented by candidates to help them see how their work experience is developing respective skills and knowledge specified in the relevant competency standard units. Assessors, as a result of the records, can easily analyse them to determine if:

- exposure to the desired workplace activities has occurred.
- the level of supervision is in keeping with the degree of autonomy required by the competency standard unit.
- The learner is able to perform 'whole of job' activities.

The ElectroComms and EnergyUtilities Industry Skills Council trading as E-Oz Energy Skills Australia has a model paper based document that candidates can use to record their workplace activities and experiences. The document is called a User Guide. It is formatted in a way that links workplace activities to competency standard units.

More information, including User Guides and techniques for recording workplace experiences electronically are available from the E-Oz Energy Skills Australia at website: www.e-oz.com.au.

Enclosure A2 — Transcript of Training Outcomes

© Commonwealth of Australia, 2025 Powering Skills Organisation

Essential Knowledge and Associated Skills (EKAS) learning specifications and related results using training modules/topics/subjects that are completed off-the-job develop an individual's technical underpinning knowledge and skill. This may apply where the industry expects such due to the regulated or preferred nature of work.

These learning specifications provide the learner with the essential underpinning knowledge and associated skills required to:

- deal with both routine and non-routine technical activities
- readily adapt their skills when new technologies are introduced
- transfer skills to new work environments.

The Registered Training Organisation (RTO) who is issuing the credential can generally provide current information about an individual's progress in the essential knowledge and associated skills or mapped modules/topics/subjects.

Learners that have undertaken a recognised structured training program with an RTO should submit a formal transcript – 'Statement of Results' (training outcomes) from the issuing RTO as evidence, for inclusion in the process of competency assessment.

Candidates seeking recognition of prior learning need to provide evidence of knowledge and skills equivalent to the content of the essential knowledge and associated skills specifications (modules/topics/subjects) detailed in the competency standard units in which they are being assessed as well as their workplace experiences. Applicants for recognition of prior learning may also seek advice from the Registered Training Organisation about the equivalence status of available evidence of their acquired knowledge and skills.

The ElectroComms and EnergyUtilities Industry Skills Council trading as E-Oz Energy Skills Australia at www.e-oz.com.au can provide advice in regard to the availability of the essential knowledge and associated skills learning specifications for training modules/topics/subjects, which have been aligned to respective competency standard units and essential knowledge and associated skills clauses.

Enclosure A3 — Portfolio

A portfolio is a collection of documents that demonstrate an individual's professional experiences and achievements in relation to identified competency standards. Typically, portfolios include information from a variety of sources including academic achievements, employment record, work activities, supervisor reports and references.

The candidate should prepare their own portfolio as an accurate reflection of their work and academic history and achievements.

Assessors advise candidates about the amount, type and format of evidence they should submit for assessment against identified competency standard units.

The use of a Portfolio as an assessment instrument can be enhanced by the use of the Self-analysis form included as Enclosure A4.

Enclosure A4 — Self Analysis

A self-analysis involves the candidate in assessing their own level of skills and knowledge acquired through work experience and relevant training programs.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Candidates should complete a Self-Analysis Form in relation to each competency standard being assessed, identifying the evidence they can provide to demonstrate each required component of their skills and knowledge.

Assessors can check the references to determine if the evidence provided links directly or indirectly to the requirements outlined in competency standard units and use this data as part of the overall assessment process.

Typically, the self-analysis form would be used for a Pathway 2 Assessment, however, it could have application in a Pathway 1 Assessment in certain circumstances.

Self-Analysis Application Form

This form allows candidates to summarise their vocational experiences in relation to a particular competency standard unit or a group of units. The information provided is used to identify the list of competencies sought for assessment. They will need to support their responses to questions, claims and/or comments with authentic evidence. To do this, it is recommended that they develop a portfolio of evidence to be submitted with this self-analysis application form. They should be advised to cross reference the information they provide with the information provided in their Portfolio.

They must however, be provided with clear instructions about the information required before they complete each respective form. They also need to view and understand the detailed requirements of the competency standard unit(s) against which they are seeking assessment. A workplace assessor should assist them with the instructions and details.

They may need to submit a separate Self-Analysis Form for each competency standard unit(s) for which they are seeking recognition. The Self-Analysis Application Form could be like the sample provided below.

Sample — Self-Analysis Application Form

Enter the codes and title of the National Qualification and title and codes the competency standard unit(s) from qualification for which you are seeking recognition.

Title of National Qualification	**Title and code of Competency Standard Unit(s)** **(For which recognition is being sought)**

Declaration by Candidate

All the information provided is entirely factual:

Name: ……

Signed ……..…. Date: …….

Enclosure A5 — Candidate Exposure to Range Statement

© Commonwealth of Australia, 2025 Powering Skills Organisation

This assessment instrument augments other information needed for judging competence and, where required, should be completed by the candidate to provide a list of components, tools, systems, plant, test equipment and associated items outlined in the Range Statement in individual competency standard units. As the Range Statement is a component part of the whole competency standard unit assessors should ensure the gathering of evidence by the candidate is considered a formative part of the assessment process and that, once the evidence is presented a holistic approach to judging and attributing competence is exercised in conjunction with other related data.

A separate form is required for each competency standard unit to be assessed. The assessor should complete the following parts of this form in conjunction with the candidate to make sure they are clear about what is required:

- Competency Standard Unit Title and Unit Number
- Candidate's Name
- Date
- Range Statement — Item Group:
  Consult the Range Statement as described in section *Establishing the evidence requirements* of this Document. Each group alpha character is to represent an appropriate group of variables, such as components, tools, system, plant, processes, equipment etc, as required by the particular competency standard.
- Range Statement — Items involved:
  List the particular items that have been predetermined as being critical from the critical aspects of evidence section when the evidence requirements were established (see *Establishing the evidence requirements*).

© Commonwealth of Australia, 2025 Powering Skills Organisation

Candidates place a tick in the column against those items they have been exposed to in a work environment. Candidate should add to the list of items involved, where appropriate. Here is an example.

Competency standard unit – _____ *(Assessor to complete this section)*		***Candidate to complete***
***Range Statement Item Group**	***Range Statement Items Involved**	**Identify the items you have worked on**
A Personal protective equipment	**Goggles**	4
	Gas mask	4
	Boots	
	Gloves	4
B Pipe types	**Cast Iron**	
	Plastic	4

Candidate's work experience with items in the Range Statement listed in this Competency Standard Unit

Competency standard unit title:		**Unit no:**
Candidate's name:		**Date:**

D		

Declaration by Candidate

All the information provided is entirely factual:

Name: ……

Signed ……..…. Date: …….

© Commonwealth of Australia, 2025 Powering Skills Organisation

Enclosure A6 — Supervisor's report

Typically, the 'supervisor' (mentor) approached to provide a report for competency assessment will have spent considerable time guiding or monitoring the candidate in his/her development by providing supervised workplace learning experiences, appropriate to the candidate's ability.

Supervisors should be asked to comment on the candidate's demonstrated ability to:

- demonstrate specific skills as described in the respective aspects of the competency standard units under assessment
- apply required essential underpinning knowledge and associated skills (eg. as learnt in their technical studies) to the work undertaken
- work in a team or independently in a way that is productive and safe.

Comments made by the candidate's supervisor/mentor are an important source of evidence for assessors.

The supervisor's report can be completed as part of the pre-assessment planning process or during any other part of the process. More than one supervisor can provide information.

Assessors should make sure supervisors are clear about the specific detailed requirements of the Gas Industry Competency Standards targeted for assessment.

Supervisor's Report on _____(Learner's Name)	
Name of Supervisor/Assessor: _____	**Date: ___/___/_____**
Position in organisation: _____Contact number:_____	
Approximate time (cumulative) providing guidance to the candidate _____days / hrs in Unit(s): _____ _____	
Responses made by supervisors/mentors are for the purpose of providing information to a workplace assessor. The supervisor is <u>not</u> making a decision about competence. The assessor will include the information with other data in the decision making process.	
Question asked of the supervisor/mentor	**Responses**

© Commonwealth of Australia, 2025 Powering Skills Organisation

Taking into consideration the candidate technical development and work experiences, can they:	**Yes**	**Requires further training**	**No**
Carry out duties with confidence			
Work in a safe manner with care for self and others			
Perform tasks with the minimal amount of waste or rework			
Complete tasks within a reasonable time			
Identify ways of improving how jobs are done			
Initiate action to improve processes or practices			
Work with others to achieve the work outputs of the group			
Work independently to achieve work outputs			
Resolve non-routine work functions			
Other comments:			
Supervisor's/Assessor's Signature: Date: / /			

Enclosure A7 — 'Supporting skills' report

Supporting skills refer to non-technical skills that candidates must demonstrate as part of their competency assessment. They include:

- the ability to work independently or in teams while dealing with customers
- knowledge of and ability to follow enterprise policies
- communication skills used in following and issuing instructions
- knowledge of and ability to address quality assurance requirements
- personal management and development skills

© Commonwealth of Australia, 2025 Powering Skills Organisation

- knowledge of and ability to address environmental protection and sustainable energy policies issues.

Candidates must demonstrate these important attributes which are embedded in all competency standard units in the Training Package.

A supporting skills report may be completed by an assessor, the candidate's supervisor or another third party. Following is a brief description of the various aspects of supporting skills.

Supporting Skills — What do they cover?

1. Enterprise Instructions

Technical manuals

Using enterprise or manufacturers' technical manuals to ensure equipment and parts are installed to manufacturer's specifications.

Quality systems

Plan, apply and contribute to quality systems.

Computers systems

Use enterprise documentation and record systems including, where appropriate, data capture equipment such as computers, information systems and technologies.

Environmental and sustainable energy requirements

The safe disposal of used oil, grease and chemicals and the reduction of electrical energy by turning of the lights and heating devices and the like to minimise the impact that engineering practices have on the environment.

Occupational Health and Safety (OHS) requirements

Follow OHS and standard operating procedures in a manner that is safe to the individual and others.

Equal opportunity/Ethical practice/Cultural diversity

Be familiar with the enterprise, equal employment opportunity polices, ethical practices and principles and awareness of cultural diversity.

Enterprise vehicles

Complete vehicle log book details accurately, ensure the vehicle is kept clean, secured and fuel and liquid levels are maintained.

2. Customer relations

Public

Provide courteous and informative advice during construction, maintenance or service activities.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Workers providing other services

Cooperate with workers providing other construction, maintenance or service activities.

Clients and land owners

Recognise the responsibilities and rights of clients and land owners.

Authorities

Recognise the responsibilities and rights of statutory and other authorities.

3. Self development

Systematic problem solving

Solve problems by using technical literature, exploring theories, performing calculations and by making enquiries.

Personal wellbeing

Maintain and promote personal well being in the workplace through fitness and by avoiding excessive use of alcohol, tobacco and other substances.

Time management

Be punctual, complete work activities on time, and sequence activities to maximise the use of available time.

Professional development

Seek to improve technical ability by discussions with others or by technical research and on-going competency development.

4. Team work

Communications

Communicate plans, information, intentions and safety criteria to others' using appropriate means.

Team involvement

Contribute positively to the work-team environment.

Competency enhancement

Participate in the training of others by sharing ideas, explaining operating systems and detailing the working arrangements of components and equipment.

Instructions for completing the supporting skills report

© Commonwealth of Australia, 2025 Powering Skills Organisation

The supporting skills report on the next page provides a means of recording information about a candidate's skills. A workplace assessor (or nominee) does this by referring to documentation, asking the candidate questions and/or seeking advice from the candidate's supervisor/mentor.

Complete the form in the following way.

Step 1

Place a cross (X) in the box to indicate areas from where evidence has been sourced.

Supporting Skills Report		
Candidate's name		**Date**
Supervisor's/Assessor's name		/ /
Enterprise instructions 1. Applies correctly without constantly making reference to them. 2. Refers to them regularly and applies information correctly. 3. Awareness of their existence but not referred to or used.	**Rating** (1) 2 3	
Technical manuals	X	Identify a minimum of three.
Quality systems	X	
Computer systems	X	
Environmental requirements	X	

Step 2

Review documentation and/or ask questions of the learner or their mentor/ supervisor.

Step 3

For each area, establish the appropriate level (1, 2 or 3) that reflects the capability of the learner. Place a circle around the corresponding number. Evidence should be collected from a number of sources before rating the candidate.

Step 2

Review documentation and/or ask questions of the learner or their mentor/ supervisor.

Step 3

© Commonwealth of Australia, 2025 Powering Skills Organisation

For each area, establish the appropriate level (1, 2 or 3) that reflects the capability of the learner. Place a circle around the corresponding number. Evidence should be collected from a number of sources before rating the candidate.

Note: A rating of 2 or 3 indicates further training or experience is required. A rating of 1 indicates the candidate has demonstrated their competence in this area.

Supporting Skills Report		
Candidate's name		Date
Supervisor's/Assessor's name		/ /
Enterprise instructions 1. Applies correctly without constantly making reference to them. 2. Refers to them regularly and applies information correctly. 3. Awareness of their existence but not referred to or used.	***Rating (circle #)*** **1** **2** **3**	
Technical manuals		Identify a minimum of three.
Quality systems		
Computer systems		
Environmental and sustainable energy requirements		
Occupational Health and Safety requirements		
Equal Opportunity/Ethical practice/Cultural diversity		
Enterprise vehicles		
Customer relations 1. Customers are included in discussion effecting operational issues 2. Knowledge of but limited application of customer relations. 3. Requires more understanding of customer needs.	***Rating*** **1** **2** **3**	
Public		Identify a minimum
Workers providing other services

Clients and land owners		of two.
Authorities		
Self development 1. Desire to expand beyond the present job role. 2. Keeps abreast of new products and services. 3. Requires more understanding of the job role.	***Rating*** **1** **2** **3**	
Systematic problem solving		Identify a minimum of two.
Personal well being		
Time management		
Professional development		
Team Work 1. Shares ideas, assists and accepts assistance from others 2. Accepts ideas and assistance from others. 3. Prefers not to assist or accept assistance from others	***Rating*** **1** **2** **3**	
Communications		Identify a minimum of two.
Team involvement		
Competency enhancement		

Enclosure A8 — Questioning

It may be necessary as part of the assessment process, to gather additional evidence to clarify specific aspects of competence, especially in relation to the associated performance criteria. The RTO Assessor (or their nominee) may need to ask questions of the candidate, their supervisor or their trainer. A form is provided in this enclosure for documenting their responses.

The form provides guidelines for questioning a candidate about the Performance Criteria related to each element of competence. Typically, the elements in each of the competency standard units in this Training Package follow a similar structure. Principally they generally cover *planning for*, *carrying out* and *completing* the job function.

In this section of the document you will also find two tables which provide guidelines for assessing a candidate's response to these questions.

If the assessment is formative (as part of a training process) then the response given by the candidate should be consistent with the 'Appropriate coverage to questions -level 1'.

© Commonwealth of Australia, 2025 Powering Skills Organisation

If the assessment is summative (final) the responses should be consistent with the 'Appropriate coverage to questions - level 2'.

Note to assessors:

1. As competency standard units are typically structured around PLAN ⇐ CARRY OUT ⇐ COMPLETE jobs in the workplace, the form for recording responses is generic.

2. Please make reasonable adjustments to the form as required to accommodate particular aspects of individual competency standard units.

Level 1 — Appropriate coverage of responses to questions

Element 1 – Planning for job/task functions (L1)

Issues about involvement of personnel, enterprises operational requirements and the requirements of regulators would not normally be expected.

Coverage should involve such things as:

OHS:

- Clarifying instructions given if any doubt exists as to what is required
- Checking with others involved if any personal protective equipment is needed
- Identifying hazards and risks associated with the wok, including any first aid and other similar requirements

Tools, equipment etc:

- Identifying the tools and equipment that are required
- Explaining where any special equipment is located and how arrangements will be made to have them available, if required.

The work schedule:

- Identifying the work and relevant processes, procedures and personnel required
- Identifying the process of work to be undertaken
- Identifying the work site activities and issues to be attended to
- Identifying the authorities associated with the work.
- Identifying any isolation procedures/permits that may apply.

Element 2 – Carrying out job/task functions (L1)

Coverage should involve such things as:

OHS:

- Keeping the immediate work area clear of debris
- Keeping tools clean and organised when not in use
- Keeping clear of such things as moving parts, live electrical conductors, hazards, and obstacles

© Commonwealth of Australia, 2025 Powering Skills Organisation

- Wearing work clothes and personal protective equipment when required
- Performing the technical work required
- Applying the relevant knowledge and skills underpinning performance.

Tasks:

- Following instructions given by others
- Observing what is occurring, listening to explanations about why tasks are performed in certain ways and asking questions when required.

Element 3 – Completing job/task functions (L1)
Coverage should involve such things as: • Cleaning tools and equipment • Returning tools and equipment to their normal storage place.

Level 2 — Appropriate coverage of responses to questions

Element 1 – Planning for job/task functions (L2)
Coverage should involve, but not limited to, such things as: **OHS:** • Clarifying instructions given if any doubt exists as to what is required • Arranging for any special personal protective equipment to be available • Checking to see if the work site is accessible. **Personnel:** • Identifying other personnel involved in the work and coordinating proposed activities. **Regulatory requirements:** • Arranging for relevant work instructions and installation specifications to be available, if required • Arranging work permits/isolation, etc. **Tools, equipment etc:** • Arranging the tools and equipment that are required • Coordinating where any special equipment is located and how arrangements will be made to have them available, if required. **The work schedule:** • Confirming the plan and process of work to be undertaken • Confirming the work and relevant processes, procedures and personnel required

© Commonwealth of Australia, 2025 Powering Skills Organisation

Element 1 – Planning for job/task functions (L2)
• Confirming the work site activities and issues to be attended to • Confirming the authorities associated with the work • Confirming isolation or work permits authorities.

Element 2 – Carrying out job/task functions (L2)
Coverage should involve, but not limited to, such things as: **OHS:** • Keeping the immediate work area clear of debris • Keeping tools clean and organised when not in use • Keeping clear of such things as moving parts, live electrical conductors and obstacles • Wearing work clothes and personal protective equipment when required • Having barriers in place to exclude public access to the work place, as required • Ensuring all personnel involved are alerted to work activities and communications are established and maintained • Keeping alert to the working environment while watching for unexpected occurrences • Confirming appropriate competence of first aid and persons, including other requirements such as confined space and the like, where appropriate. **Engineering tasks — specific actions should be included that are additional to the following:** • Performing tasks independently with reference to enterprise instructions • Accept and act on initial advice and feedback provided by others • Observing what is occurring, listening to explanations about why tasks are performed in certain ways and asking questions when required • Applying essential knowledge and associated skills and providing solutions to 'what if' scenarios. **Technical assistance:** • Further reference to enterprise instructions • Reference to the requirements of regulations, work instructions or other relevant standard • Recall of theory or application • Involvement of others with greater experience.

Element 3 – Completing job/task functions (L2)
Coverage should involve, but not limited to, such things as:

© Commonwealth of Australia, 2025 Powering Skills Organisation

Element 3 – Completing job/task functions (L2)
Performance checks: • Checking that all guards & covers removed during the activities are replaced and adjusted • Check that all temporary arrangements required during the process work have been removed • Carrying out any tests required by regulation or work instructions • Operating the installed/repaired parts or system to ensure it functions as specified. **Notification:** • Informing all immediate personnel involved that the work is completed • Informing clients and others that the work is completed • Removing all signs and barriers, as necessary • Reporting any damaged tools and equipment and arrange replacement. **Paperwork:** • Completing store/inventory paperwork • Completing the work log or management reports precisely by recording what occurred and providing recommendations/solutions to be followed up in point form.

Instruction for recording responses to questions

Step 1

Identify the elements of competence on which questions will be asked.

Step 2

Identify if the response expected is to be typical of a candidate who is undergoing a formative assessment (level 1) or summative assessment (level 2). This may be different for each element involved.

Step 3

Ask the main question and indicate (Y or N) whether the candidate's response addresses the coverage required.

Step 4

Ask follow up questions to probe any areas not recorded as Y in Step 3. Record Y or N to the response given in the space provided.

From all the evidence presented a holistic judgement is then made.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Questions

Unit Title: **No.**

Enclosure A9 — Practical Demonstration

As part of evidence provided to demonstrate competence against detailed competency standards, the assessor may need to observe the candidate demonstrating practical tasks.

The Engineering Practical Skills Form is provided herein to help assessors record these work-based observations. The notes taken are analysed and from this a rating is given about the candidate's engineering skills.

Note to assessors:

- The form for recording responses is generic to all competency standard units.
- Make reasonable adjustments to the form as required to accommodate particular aspects of individual competency standard units.
- You may only need to observe candidates on particular (not all) Elements of Competence.
- If the assessment is formative (for feedback purposes), then the level of supervision that applies during work activities should apply during the assessment activity.

Instructions for completing the Engineering Practical Skills Form

The form provides a means of recording information about a learner's engineering practice. A workplace assessor (or nominee) does this by an observation of pre-arranged activities and determining an engineering skills rating.

Step 1

Enter the title of the competency standard unit and its Unit Number in the space provided.

Step 2

Enter the learner's name in the space provided.

Step 3

Enter the name of the person who is completing the form (this may be the assessor or someone who the assessor nominates to gather the information).

Step 4

Enter the date on which the evidence is gathered.

Step 5

Determine the elements of competence being observed (circle yes or no).

Step 6

Determine the level of supervision that is to apply to the elements being observed. Use the supervision — Level code from the bottom left of the form (A, B or C) and enter in the second column.

Step 7

Observe the learner perform tasks related to the element(s) being assessed, checking that they address the required Performance Criteria. Record in the first column of the table under the heading 'Notes from Observation' key points to indicate whether the learner:

- Has acted in a way that meets specifications required by manufacturers, regulations or client specifications

© Commonwealth of Australia, 2025 Powering Skills Organisation

- Has followed established enterprise procedures
- Met the requirements of the Competency Standard being assessed
- Needed to be shown or told how to perform tasks beyond what is reasonably expected given his/her level of experience and therefore requires further training.

Step 8

Using the engineering skills rating codes at the bottom right of the table, enter the appropriate letter in the space provided to indicate the level of competence demonstrated in relation to the competency standard being assessed.

© Commonwealth of Australia, 2025 Powering Skills Organisation

From all the evidence presented a holistic judgement is then made.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Engineering practical skills form

Competency standard unit title: _____ **Date:** _____/_____/_____

Candidate's name: _____ *Assessor's Name:* _____

Notes from observation	Supervision Enter A, B or C	Engineering Practice Enter D, E, F, G
Plan activities: Yes or No (circle to indicate if evidence is being gathered)		
Carry out activities: Yes or No (circle to indicate if evidence is being gathered)		
Complete activities: Yes or No (circle to indicate if evidence is being gathered)		

Supervision Level		Engineering Skills Rating	
A	The learner is working under direct supervision.	D	Met required specifications.
B	The learner is working under limited supervision	E	Followed established enterprise procedures.
C	The learner is working under general supervision with a high degree of autonomy	F	Met competency standard requirements
		G	Further training required

Learner's Signature ……

Assessor's Signature ……

Enclosure A10 — Final/Challenge Test

A test may be required if the assessment process does not provide:

- sufficient, authentic or current evidence
- particular aspects of evidence related to equipment operation
- particular aspects related to safety
- all the requirements related to the influence of external bodies such as regulatory authorities.

A final test should:

- cover the conditions associated with the 'Critical Aspects of Evidence' statement in competency standard units
- take into account the principles of assessment and be sufficiently rigorous
- be consistent with the policies and practices of the Registered Training Organisation who is providing the recognition.

Enclosure A11 — Contracted Entry Level Profiling Model

In relation to the industry-preferred assessment model for contract entry-level competency development programs (New Apprenticeships), longitudinal approaches to assessment activities are considered more efficient and effective. This is best achieved by implementing a process where the learner frequently gathers reliable data from the workplace has it verified in a form that can be easily used and consistently interpreted.

One option is to use a machine-readable data scan card or direct web entry process, operating in conjunction with a sophisticated computer software program to achieve this result. The design of the system known as Profiling reflects the key requirements outlined in the relevant competency standard units making up the competency development plan/program. Learners report directly on their exposure to required work experiences in a structured way. Additional to the off-the-job technical training required for contracted entry level learners Profiling gathers specific workplace information reliably and systematically.

Data gathered frequently from the workplace accumulates over the competency development period and is reported graphically at given periods. This approach encourages self review and participation in the system and eliminates bias and minimises the effects of low levels of literacy (see over the page for an example).

The information gathered under Profiling, forms one component of a two part, in some cases three part, Training Program that supports competency development in a way preferred by the industry. The components are:

off-the-job training (technical subjects/topics), and

on-the-job training (workplace activities), and

a specific final 'safety systems (capstone)' test, where applicable.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Typically the off-the-job component requires the successful completion of technical subjects/topics of training against essential knowledge and associated skills (EKAS) clauses included in the respective competency standard units. More often than not the EKAS are aligned to EKAS learning specifications that expand on the essential knowledge and associated skills clauses; providing more detailed information on depth and breadth of learning required, for RTOs. The on-the-job component requires a profile to develop from workplace experiences/exposures. Finally, a specific safety assessment test is conducted, where applicable, for regulatory and industry requirements.

In relation to the on-the-job workplace data (experiences/exposures) is gathered and reported on against the respective aspects of industry determined competency standards, using predefined industry norms. Typically the information gathered pertains to the:

- activity against each element of competency and indirect information against the performance criteria
- quality, breadth and range of equipment, processes, techniques and applications experienced and worked with/on in the workplace
- level of supervision of a learner's workplace experiences
- hours of exposure (recording hours only is not generally considered Profiling).

Entry against the prescribed criteria is completed regularly (eg weekly) by the learner, the software program calculates the data against industry predefined norms and regular reports are produced (typically quarterly) for the use and information of RTOs, employers and the learner. Assessors use this information in a holistic way to identify and analyse trends and anomalies against the predefined industry norms.

The advantage of Profiling over many other mediums such as manually based log-books which require extensive and laborious analysis is that it is simple and directly reflective of the workplace experiences undertaken at the time. It provides evidence for:

- managing workplace skill development/ performance of competency required to produce quality work
- progressive assessment and supporting the attainment of a national qualification
- the attainment of an electrical workers' licence/regulated registrations, where appropriate
- the need for job rotation
- allocating work
- RTOs — thus reducing the demand for an array of workplace assessors.

1.3.18 Appendix B - Enclosure B: Administrative Forms

Appendix B — Enclosure B: Administrative Forms

Enclosure B1	**Notification of Workplace Assessment**
Enclosure B2	**Application for Recognition of Prior Learning/ Current Competence**
Enclosure B3	**Assessee Comment/Feedback**
Enclosure B4	**Candidates Competency Achievement Report to a RTO**

Enclosure B1 — Notification of Workplace Assessment

This form is used to notify a learner about their assessment. The learner is advised of the type of evidence being sought, the competency standard unit(s) of competence being considered, who will be involved and the time and place of the activity.

Enclosure B2 — Application for Recognition of Prior Learning/ Current Competence

Candidates should use this form to apply for recognition. The applicant needs to provide their personal details, the competency standard unit(s) for which they seek recognition, the type of evidence being provided and the names of referees.

Enclosure B3 — Assessee Comment/Feedback

This form is used by the learner (or RPL applicant) to make comments about the workplace assessment process and/or decision. It should be distributed prior to an assessment event being conducted. The workplace assessor should be sent a copy of each form completed and should retain completed forms in case of any future review and/or inquiry.

Enclosure B4 — Candidate's Competency Achievement Report to an RTO

This form summaries a workplace assessment process and allows workplace assessors to make recommendations to an RTO about deeming competence of a learner or RPL applicant.

Enclosure B1 — Notification of a Workplace Assessment

Learner's Name: _____ **Date of notification:** / /

Assessor's Name: _____Tel: _____

Qualification Title: _____

1.3.19 Appendix B - Enclosure C: Glossary of Terms

Appendix B — Enclosure C: Glossary of Terms

© Commonwealth of Australia, 2025 Powering Skills Organisation

Definitions of all terms used in assessment design materials are below.

Term	Definition/Explanation
Appeal process	A process whereby the person being assessed or other interested party, such as an employer, may dispute the outcome of an assessment and seek reassessment.
Assessment	The process of collecting evidence and making judgements on whether competency has been achieved to confirm that an individual can perform to the standard expected in the workplace as expressed in the relevant endorsed industry/enterprise competency standards or outcomes of accredited courses.
Assessment context	The environment in which the assessment will be carried out. This will include physical and operational factors, the assessment system within which assessment is carried out, opportunities for gathering evidence in a number of situations, the purpose of the assessment, who carries out the assessment and the period of time during which it takes place.
Assessment guidelines	Assessment guidelines are the endorsed component of a Training Package which underpins assessment and which sets out the industry approach to valid, reliable, flexible and fair assessment. Assessment guidelines include the assessment system overview, assessor requirements, designing assessment resources, conducting assessment and sources of information on assessment.
Assessment judgement	Assessment judgement involves the assessor evaluating whether the evidence gathered is valid and authentic, and whether there is sufficient and reliable evidence to make the assessment decision. The assessment judgement will involve the assessor in using professional judgement in evaluating the evidence available.
Assessment materials	Assessment materials are any resources that assist in any part of the assessment process. They may include information for the candidate, assessment tools or resources for the quality assurance arrangements of the assessment system.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Assessment plan	An assessment plan is a document developed by an assessor that includes the elements and competency standard units to be assessed, when the assessment will occur, how the assessment will occur, the assessment methods to be used and the criteria for the assessment decision.
Assessment process	The assessment process is the agreed series of steps that the candidate undertakes within the enrolment, assessment, recording and reporting cycle. The process must suit the needs of all stakeholders and be both efficient and cost-effective. The agreed assessment process is often expressed as a flow chart.
Assessment strategy	Assessment strategy means the approach to assessment and evidence gathering used by the assessor or RTO. It encompasses the assessment process, methods and assessment tools.
Assessment system	An assessment system is a controlled and ordered process designed to ensure that assessment decisions made in relation to many individuals, by many assessors, in many situations are consistent, fair, valid and reliable.
Assessment tool	An assessment tool contains both the instrument and the instructions for gathering and interpreting evidence: • Instrument[s] — the specific questions or activity developed from the selected assessment method[s] to be used for the assessment. A profile of acceptable performance and the decision making rules for the assessor may also be included. • Procedures — the information/instructions given to the candidate and/or the assessor regarding conditions under which the assessment should be conducted and recorded.
Candidate	A candidate is any person presenting for assessment. The candidate may be: • a learner undertaking training in an institutional setting • a learner/worker undertaking training in a workplace • an experienced worker wanting their skills recognised • any combination of the above.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Competency	The specification of knowledge and skill and the application of that knowledge and skill to the standards of performance required in the workplace.
Competency standard	Competency standards define the competencies required for effective performance in the workplace. Standards are expressed in outcome terms and have a standard format comprising of Unit title, Unit descriptor, Elements of Competency, Performance Criteria, Range Statement and Evidence Guide. See also *Unit[s] of Competency*.
Competency standard unit	Also see Unit of Competency
Critical aspects of competency	A statement in a Unit of Competency that provides clear meaning as to what is to be achieved in the assessment process.
Currency of evidence	Evidence that is relevant to what is outlined in competency units and not outdated or irrelevant.
Dimensions of competency	The concept of competency includes all aspects of work performance and not only narrow task skills. The four components of competency are: • task skills • task management skills • contingency management skills • job/role environment skills.
Electronic Profiling	An innovative electronic based logbook system used by apprentices to record, and report on their workplace activities. A specially designed data entry card is used to capture work experiences (eg weekly) against industry approved competency standards and reported against industry-defined benchmarks. *See* Section 3.5 Assessment Processes within the Electrotechnology Industry and section Appendix B — Enclosure A11 Contracted entry level Profiling Model.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Element of Competency	The basic building block of the competency standard unit. Elements describe the tasks that make up the broader function or job described by the unit.
Essential Knowledge and Associated Skills clauses	EKAS clauses provide the content specifications that must be achieved by learners in terms of the body of essential knowledge and associated skills.
Essential Knowledge and Associated Skills learning specification	EKAS learning specification is specific learning content that is complete in itself and expands on the competency standard units EKAS clauses in terms of depth and breath. It may underpin many, few or one competency standard unit(s). It covers one or more aspects of knowledge and skills. An EKAS LS can be separately delivered and assessed with percentage achievement reporting, and may be linked with other EKAS LSs for delivery purposes in the same discipline area.
Evidence/ quality evidence	Evidence is information gathered which, when matched against the performance criteria, provides proof of competency. Evidence can take many forms and be gathered from a number of sources. Assessors often categorise evidence in different ways for example: • direct, indirect and supplementary sources of evidence • evidence collected by the candidate or evidence collected by the assessor • historical and recent evidence collected by the candidate and current evidence collected by the assessor. Quality evidence is valid, authentic, sufficient and current. It enables the assessor to make the assessment judgement.
Evidence gathering techniques	Evidence gathering technique means the particular technique or method used to gather different types of evidence. This may include methods or techniques such as questioning, observation, third party reports, interviews, simulations and portfolios.
Evidence Guide	Evidence Guide is part of a competency standard unit. Its purpose is to guide assessment of the unit in the workplace and/or a training

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	environment. The Evidence Guide specifies the context of assessment, the critical aspects of evidence and the required or underpinning knowledge and skills. The Evidence Guide relates directly to the Performance Criteria and Range Statement defined in the competency standard unit.
Fairness	See section 3.4 Assessment Principles
Flexibility	See section 3.4 Assessment Principles
Holistic/ integrated assessment	An approach to assessment that covers the clustering of multiple units/elements from relevant competency standards. This approach focuses on the assessment of a 'whole of job' role or function that draws on a number of units/elements of competence. This assessment approach also integrates the assessment of the application of knowledge, technical skills, problem solving and demonstration of attitudes and ethics.
Industry Skills Council/Industry Training Advisory Bodies (ITABs)	National bodies comprising representation from the industry parties responsible for the development, review, implementation, and providing advice on qualifications scopes and competency standards in given industries.
Module	A specific learning segment that is complete in itself. It deals with one or more aspects of knowledge and skills. A module is separately delivered and assessed and may be linked with other modules in the same study area and aligned to a competency standard unit(s).
New Apprenticeship Centre	An organisation who provides information on apprenticeships, traineeships and the related qualifications and processes.
Portfolio	See section 3.5 Assessment Processes in the Electrotechnology Industry.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Profiling	See section 3.5 Assessment Processes in the Electrotechnology Industry.
Performance Criteria	Evaluative statements which specify what is to be assessed and the required level of performance. The Performance Criteria specify the activities, skills, knowledge and understanding that provides evidence of competent performance for each Element Of Competency.
Qualification	Qualification means, in the vocational education and training sector, the formal certification, issued by a Registered Training Organisation under the Australian Qualifications Framework, that a person has achieved all the requirements for a qualification as specified in an endorsed Training Package or in an Australian Qualifications Framework accredited course where no relevant Training Package exists.
Range Statement	Part of a competency standard, which sets out a range of contexts in which performance can take place. The range helps the assessor to identify the specific industry or enterprise application of the competency standard unit.
Reasonable adjustment	The nature and range of adjustment to an assessment tool or assessment method which will ensure valid and reliable assessment decisions but also meet the characteristics and background of the person(s) being assessed.
Recognition **[Recognition of Prior Learning, Recognition of Current Competency and Skills Recognition]**	Recognition is a term that covers Recognition of Prior Learning, Recognition of Current Competency and Skills Recognition. All terms refer to recognition of competencies currently held, regardless of how, when or where the learning occurred. Under the Australian Recognition Framework, competencies may be attained in a number of ways. This includes through any combination of formal or informal training and education, work experience or general life experience. In order to grant recognition of prior learning/current competency the assessor must be confident that the candidate can present evidence that he or she is currently competent against the endorsed industry or enterprise competency standards or outcomes specified in Australian Recognition Framework

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	accredited courses. The evidence may take a variety of forms and could include certification, references from past employers, testimonials from clients and work samples. The assessor must ensure that the evidence is authentic, valid, reliable, current and sufficient.
Records of assessment	The information of assessment outcomes that is retained by the Organisation that is responsible for issuing the nationally recognised Statement of Attainment or qualification.
Registered Training Organisation (RTO)	Registered Training Organisation (RTO) means a training organisation registered in accordance with the Australian Recognition Framework, within a defined scope of registration (refer definition Scope of Registration).
Reliability	See section 3.4 Assessment Principles
Sampling	See section 3.5 Assessment Processes in the Electrotechnology Industry.
Statement of Attainment	Statement of Attainment means a record of learning, recognised under the AQF, which although falling short of an AQF qualification, may contribute towards a qualification outcome, either as attainment of competencies within a Training Package, partial completion of an AQF accredited course leading to a qualification, or completion of a nationally accredited short course which may accumulate towards a qualification through Recognition of Prior Learning processes.
Sufficiency of evidence	See section 3.4 Assessment Judgments
Training Package	Training Package means an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework qualifications for a specific industry, industry sector or enterprise.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Training Agreement	An agreement outlining the training and assessment which forms part of a New Apprenticeship Training Contract and is registered with the relevant State or Territory Training Authority.
Training Plan	Training Plan means a program of training and assessment which forms part of a New Apprenticeship/traineeship Training Contract and is registered with the relevant State or Territory Training Authority.
Transcript of results — statement	List of candidate's modules/subjects/ EKAS learning specifications completed as part of a competency standard unit(s) or qualification.
Unit(s) of Competency / Competency standard units	Competency standard unit means the specification of knowledge and skill and the application of that knowledge and skill to the standard of performance required in the workplace. Competency Standard Units define the outcomes for training delivery and assessment and lead to the issuing of Australian Qualifications Framework qualifications and Statements of Attainment. See also *Competency Standard*.
Validity	See section 3.4 Assessment Principles
Validation	Validation involves reviewing, comparing and evaluating assessment processes, tools and evidence contributing to judgements made by a range of assessors against the same standards. Validation strategies may be internal processes with stakeholder involvement or external validations with other providers and/or stakeholders.

© Commonwealth of Australia, 2025 Powering Skills Organisation

2.1 Preliminary Information & Glossaries

Volume 2 Part 1

Preliminary Information

This Volume (Vol 2 Part 1) contains the Definitions/Glossary of Gas Terms — a major section of the Gas Industry Training Package which is to be used in conjunction with the competency standard units. Section 7 of each competency standard unit lists a range of variables — the Range Statement. These, as well as other Gas Supply Industry terms, are explained in the Glossary of Gas Supply Industry Terms. In addition, the National Occupational Health and Safety Commission Glossary of Terms has been included. Users will find definitions here that clarify any Occupational Health and Safety specific terms. Where a term in the glossary is followed by a number, eg *Tools and equipment (2),* the number indicates the AQF level.

Volume 2, Part 2 contains competency standard units and the Essential Knowledge and Associated Skills (EKAS). Each competency standard unit has a reference to the relevant Knowledge and Associated Skills, which are detailed separately from the competency standard units. This is designed to make the package easier to interpret and apply. In the Essential Knowledge and Associated Skills section of each unit there is reference to the relevant EKAS, identified by a unique clause number and title. This separate Essential Knowledge and Associated Skills forms an integral part of each competency standard unit, and all assessment evidence activities and reporting processes are to incorporate this specification.

Training Package Layout

This revised Gas Industry Training Package has been developed, reviewed and validated through extensive industry consultation. It reflects the views of a wide cross-section of the industry and its key stakeholders/practitioners throughout Australia.

The Training Package has been constructed as a two volume set. Volume 1 covers the overall Package framework and completion requirements for qualifications. Volume 2 includes the content details of parts and sub-sections of Volume 1. The two volumes form an integrated whole and are not to be used independently of each other.

Volume 1

Part 1 Definitions/Glossary

Part 2 Competency Standards

2.1 Competency Standard Units

2.1.0 Independent Units

2.1.1 Cross Discipline Common Units

2.1.2 Distribution Discipline

2.1.3 Transmission Discipline

2.1.4 Cathodic Protection Discipline

2.1.5 Control Centre Discipline

2.1.6 Liquefied Petroleum Gas (LPG) Discipline

2.1.7 Support Services Discipline

2.1.8 Pressure Control Discipline

2.1.9 Imported Units

2.2 Essential Knowledge and Associated Skills

Table 1 — Knowledge and Associated Skills —Reference Codes and Reference Names

Table 2 — Essential Knowledge and Skills to Unit Matrix

Part 3 Language, Literacy and Numeracy

Volume 1: Structure and Overview

Part 1 – Qualification Framework

Part 1 outlines how the qualifications are structured, along with scope/descriptions, composition and content. Completion and issuance requirements are provided as well as advice on flexibility arrangements, with entry and exit pathways and articulation arrangements. Titles and codes of the respective list of qualifications to be issued are also included.

Part 2 – Competency Standards Overview and Index

© Commonwealth of Australia, 2025 Powering Skills Organisation

Part 2 outlines how the competency standards were developed (in broad terms), the industry coverage they apply to, as well as the format and construction of the individual competency standard units. The list of competency standard units and their scope/description is included in this part. Matters related to language, literacy and numeracy, access, equity and cultural diversity, and any regulatory arrangements, for which the competency standard units may apply is also included. Importantly, each Unit is interrelated and linked with the Definitions/Glossary and Essential Knowledge and Associated Skills sections of the Volume. No competency standard unit is to be used in isolation or exported without these interrelated components.

There are over 125 competency standard units included in Volume 2, each listed according to its respective industry discipline area.

Alignment to and incorporation of Competency Standards Units from the allied Transmission, Distribution and Rail Training Package are also included as are relationships between competency standard unit(s) and the key competencies and skills for employers.

Part 3 – Assessment Guidelines

Information in Part 3 outlines how the assessment guidelines inform a Registered Training Organisation (RTO) about the infrastructure requirements to enable them to carry out training delivery assessment activities related to the Training Package. It includes such things as assessment systems, the role of RTOs, assessment pathways, recognition arrangements, assessor qualifications and sources of information.

Included also are two Appendices — Appendix A: New Apprenticeships Application and Appendix B: Sample Assessment Instruments. Appendix B contains Enclosures A, B and C: A — a List of Sample Assessment Instruments, B — Administrative Forms and C — the Glossary of Terms.

Volume 2: Competency Standard Units — Content and scope

Volume 2 Part 1 contains a Definitions/Glossary, which provides a description/explanation of certain/assigned words that appear in this document.

Volume 2 Part 2 contains the competency standard units in their respective disciplines, eg Transmission Units, Distribution Units, Operation Units, Cathodic Protection Units.

Volume 2 Part 2 also contains the details of Essential Knowledge and Associated Skills referred to in each Competency Standard Unit.

Volume 2 Part 3 provided information on the application of Language Literacy and Numeracy aspects identified with each Competency Standard Unit.

Note: The two volumes form an integrated whole and must not be used independently of each other.

1.0 Definitions/Glossary

1.1 Scope

The competency standard unit described in this Part of the Training Package covers competency standard units for the Gas Industry.

© Commonwealth of Australia, 2025 Powering Skills Organisation

1.2 Application

The information contained in each competency standard unit includes the intended use of the unit for assessment and a training program(s).

1.3 References

Regulations

The work functions described by competency standard units in this Training Package may be subject to statutory regulations. Where this is the case the particular regulations will depend on local jurisdictions and knowledge and application of such regulations within the scope of the unit will be an aspect of evidence in deeming a person competent.

Reference documents

Each part of the Training Package will include a list of reference documents. These are a component of competency which assist in developing training programs and assessing competency. Reference documents include relevant legislation, regulation, industrial instruments, codes of practice, guidelines and advisory standards and policies.

Examples may include industry-preferred training and assessment models, anti-discrimination and equal employment opportunity statutes encompassing application of access, equity and cultural diversity principles associated with under-represented groups.

1.4 Definitions/Glossary

The definition of terms used in this Part of the Training Package form an integral part of the overall competency standard units and they must be used with Volume 2, Part 2.

Definitions of Gas Industry Terms

Term	**Definition/Explanation**
Abnormalities	To confirm any abnormal condition of an item whether or not this could eventually result in a failure.
Accessory	A component of a pipeline other than pipe, valve or fitting, but including a relief device, pressure containing item, hanger, support and every other item necessary to make the pipeline operable.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Acquisition and allocation of resources	Identified priorities, suitability, type of physical resource, urgency, cost of use, accessibility, endurance, maintenance demands, deployment time, customer needs, hazard and risk analysis.
Activities	May include product receipt, processing and/or dispatch; rectification of gas system faults; scheduling of maintenance, repairs and/or modifications; commissioning of new plant and/or equipment; standard operating and quality assurance procedures; stock control.
Analyse	To examine and investigate data / information.
Applicable Australian Standards/Legislation	Relevant to CP System may include OHS legislation; utility codes and standards; safe working procedures and practices; AS 2885; AS 2430 — hazardous areas; AS 1768; AS 1596; AS 1697; AS 2832.1; AS 3000; AS 2239; AG 603.
Appropriate and relevant persons	Organisation employees, contractors, consultants, maintenance persons, appropriately experienced and qualified persons, drivers, cleaners, grounds and site security persons, other managers, other supervisors, inter-company departments, other utilities, council representatives, producers, transporters/shippers, consultants, government bodies/agencies, refinery persons, customers, land owners.
Appropriate authorities	May include local councils; road authority; sewage and stormwater authorities; providers of service such as electricity, water and telephones.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Appropriate parts	To be replaced may include excess flow valves; relief valves; pressure regulators/springs; pump seals/compressor seals; pressure gauges; bypass valves; meters; solenoids; valves; break away couplings; meter heads.
Appropriate persons (1)	May include site manager; maintenance persons; shift supervisor.
Appropriate persons (2)	May include site manager; maintenance persons; shift supervisor. For LPG it could also include site manager; clerical persons; supervisors; other road tanker operators.
Appropriate persons (3)	May include site manager; maintenance persons; project manager; engineers and technical officers; security persons; maintenance persons; contractors; company persons; other persons designated by the organisation.
Appropriate persons (5)	May include appropriately experienced and qualified persons; company employees; contractors; drivers; maintenance persons; cleaners, ground and site security persons.
Appropriate persons (6)	Organisation employees; maintenance persons; appropriately experienced and qualified persons; site security persons, contractors and their employees, inspectors and regulatory authority representatives.
Areas of responsibility	Includes emergency management; resource management; field response; communications; media liaison; emergency

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	services liaison, asset owners and relevant stakeholders; security supply; product containment; product specification; public safety; exclusion zones; business continuity; reporting and logging documentation.
Areas to be monitored	Includes gas infrastructure, site security, rate of change, supply and demand line pack response, communication and data transfer, process values and constraints (gas quality, pressure and temperature), field work activities, third party activities, permit systems, location of field staff, gas flows, information gathering systems, job and equipment status including tagging and equipment out of service.
Areas to be controlled	Includes gas infrastructure, site security, rate of change, supply and demand line pack response, communication and data transfer, process values and constraints (gas quality, pressure and temperature), field work activities, third party activities, permit systems, location of field staff, gas flows, information gathering systems, job and equipment status including tagging and equipment out of service.
Ariel	Includes helicopter, fixed wing.
Ariel hazards	Includes weather, birds, other aircraft and power lines.
Aspects to consider when sequencing a route	When sequencing a route for an individual include distance; weather conditions; terrain; time available; urban/rural area; experience of meter reader.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
AQF	Australian Qualifications Framework which describes qualifications in terms of levels characterised by the outcomes of vocational education and training.
Assemble	To take raw stock and make detailed parts by a variety of methods, such as cutting, bending, attaching, etc. It may be applied to metal and composite structures, electrical parts etc.
Assessing risk	Determining the likelihood and severity of adverse consequences from hazards; Occupational Health and Safety audits; workplace inspections; maintenance of plant and equipment; purchasing of materials and equipment; planning or implementing alterations to site, operations or work systems; and analysis of relevant records and reports, for example, injuries and incidents, hazardous substances inventories/registers, audit and environmental monitoring reports and Occupational Health and Safety committee records. Includes hazard and incident reports; workplace inspection in area of responsibility; consulting work team members; housekeeping; workplace inspections; daily informal team consultation and regular formal team meetings; internal and external audits; industry information such as journal, newsletters and networking.
Assessment	Refers to the process of collecting evidence and making judgements on the extent and nature of progress towards the performance requirements set out in a standard and at the appropriate point making the judgement whether competency has been achieved.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Authorisation	Responsibility assigned for the application of relevant management practices to approve measures according to company policies, procedures and processes, legislative and/or regulatory requirements.
Authoritative sources	Includes industry associations; industry reports; industry journals and publications; statutory authorities; legislative and regulatory requirements.
Backfill	Includes sand padding; spoil; stone free soil; crushed rock; rubble.
Budget	Capital expenditure, recurrent expenditure, output investment proposals, cash flow. Also includes costs for labour, materials, training, services, tools and equipment.
Budget formats	Zero based budgeting, program budgeting, line item budgeting.
Civil activities	Includes laying of geotextile; gabion baskets; concreting; reseeding of environment; cased crossings; fauna and flora control.
Coating defect assessment surveys	For identifying condition and location of irregularities. May include DCVG method; person technique method.
Coatings	Includes heat shrink sleeves; wrapping tapes; epoxy paints; coating patches.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Commonwealth and State OHS requirements	Includes general duty of care requirements; Privacy Act in relation to requirements for the maintenance and confidentiality of records of occupational injury and disease; provision of information; relevant requirements of Environmental Protection Authority.
Communication or communication strategy	Liaison with customers, staff and other stakeholders and clients; verbal directions; relevant documentation; project records/reports, electronic communications, Internet communication.
Community awareness	Inform people and organisations that could in anyway be affected by transmission pipeline anomalies, ie those residing, commerce or working near such. Promote community awareness of gas leak identification and safe practices associated with activities on or near transmission pipelines, including promoting use of Dial Before You Dig. Promote emergency response procedures for gas leak identification and safe practices associated with activities on or near transmission pipelines to emergency service agency personnel.
Competency	Focuses on what is expected of a worker/employee in the workplace rather than on the learning process, and embodies the ability to transfer and apply skills, knowledge and attitude to new situations and environments.
Competency Standard Unit(s) also refers to Unit(s) of competency	Competency standards are made up of a number of Competency Standard Units.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	These units describe a key function or role in a particular job function or occupation. Each unit identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency, as well as language, literacy and numeracy and Occupational Health and Safety requirements. A competency standard unit is usually linked to one or more AQF qualifications.
Components and system	May include solar powered power generation systems; 240 volt power generation systems; insulation and monolithic joints; galvanic anode beds; battery banks — nicad and lead acid; transformer rectifiers and CPUs; lightning protection equipment; CP test points; Kirk cells.
Contingency plans	Emergency responses to a range of abnormal operating conditions; plans for responses to critical incidents; prioritise proposed responses.
Contributions to OHS	Includes listening to the ideas and opinions of others in the team; sharing opinions, views, knowledge and skills; identifying and reporting risks and hazards; using equipment according to guidelines and operating manuals; behaviour that contributes to a safe working environment which includes following OHS procedures.
Controlling risks **See also OHS Glossary — Controls and Control Measures**	Assessing the Occupational Health and Safety consequences of materials, plant or equipment prior to purchase; obtaining expert advice; appropriate application of measures according to the hierarchy of control, namely:

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	• elimination of the risk • engineering controls • administrative controls • personal protective equipment • designing safe operations and systems of work • inclusion of new Occupational Health and Safety information into procedures • checking enterprise compliance with regulatory requirements.
Control measures **See also OHS Glossary — Controls and Control Measures**	May include elimination of hazards, work procedures, standard operating procedures, personal protective equipment, fire safety, plant and equipment isolation, training of appropriate persons, communications with appropriate persons, supervision of appropriate persons, maintenance of control measures.
Damage or faults	To meters may include unreadable meters; incorrect meter locations; suspected tampering with the meter; suspected illegal connections.
Damage to cylinders	Includes valve spindle leaks; safety valve leak; corrosion; unacceptable paintwork; fire/heat damage; valve to cylinder connection leak; base/bosy damage leak; out-of-date; physical defects.
Data acquisition may include	Temperature, pressure and flow rates from regulator or custody transfer stations, water bath heater operation (water temperature, pilot light and main burner operation), faulty equipment (over pressure and under pressure, slamshut operation and filter problems), pipeline ruptures, security system monitoring and pressure and volume data for "balancing the system".

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Defect	Any confirmed abnormal condition of an item whether or not this could eventually result in a failure.
Delivery area	An area to be checked for ignition sources and other hazards. Area to be appropriately designated. Smoking is not allowed.
Designated persons for OHS	Include employers; chair of OHS committee; OHS nominee; elected OHS representative/employee representative. Supervisors; managers; team leaders; management Occupational Health and Safety persons; and Other persons authorised or nominated by the enterprise or industry to: perform specified work, approve specified work, inspect specified work, and direct specified work.
Diagnostic, testing and restoration	Diagnostic, testing and restoration may involve: appropriate documentation relating to the protection device; voltage, current and resistance measuring instruments; microprocessor based diagnostic test equipment; laptop computer and diagnostic software; loop control test instruments.
Documentation (2)	Related to tasks includes time sheets; requisitions; work sheet/job cards; organisational forms/electronic templates.
Documentation (3)	May include standard operating procedures; OHS and environmental

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	legislative requirements; manufacturer's specifications; Australian Standards; maintenance records; standard operating procedures; OHS and environmental legislative requirements; manufacturers' specifications; codes.
Documentation (5)	Includes coordinated maintenance plans and/or strategies, maintenance scheduling documents, budgets, reports, submissions, cost benefit risk assessments and work plans and/or other developments
Downstream	With or in the direction of the current or flow of a stream, i.e. farther down a stream. For example, the meter for a home or business is downstream from the city gate.
Drawings and specifications	May include instrument electrical drawings; circuit diagrams; component charts; wiring diagrams; site layout drawings.
Easement	Environmental surroundings of the pipeline.
Effective communication (5)	May include verbal directions; relevant documentation; activity records/reports; emergency response systems and procedures.
Effective communication (6)	Verbal directions; relevant documentation; project records/reports, presentations and meetings.
	May include solar powered power

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Electrical equipment	generation systems; 240 volt power generation systems; insulation and monolithic joints; galvanic anode beds; battery banks — nicad and lead acid; transformer rectifiers and CPUs; lightning protection equipment; CP test points; Kirk cells.
Electrical and instrumentation equipment powered by extra low voltage	Includes: communications systems; telemetry; battery banks and charges; valve control systems; regulators; ESD systems; 24 volt lighting; control panels; fire and gas detection systems; solar panels; transmitters; gas quality analysis equipment; PLCs; RTUs; process control equipment; compressor control systems; gas metering equipment; DC motors.
Electrical test equipment	Meggers; digital volt meters; deadweight testers; computers; infared temperature probes; manometer; process calibrators; RTDs; frequency generation, oscilloscope.
Emergency and/or hazardous work situations **See also OHS — Emergency**	May include fire; gas leak or vapour emission; utilities failure; failure to supply; environmental damage; injury or death; significant threat to gas infrastructure.
Emergency appliances **See also OHS Glossary — Emergency**	May include emergency trucks/trailers; emergency plant (compressors, cranes, welding equipment etc); breathing apparatus; fire fighting equipment.
Emergency exercises	May include emergency trucks/trailers; emergency exercises (involving fire; explosion; vapour/liquid leak); excavation/ruptured pipeline; LPG road/rail accidents; loss of supply), testing of contingency plans.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Emergency response manual	Operations manual utilised by staff in attending and addressing Gas Industry emergencies.
Emergency responses	Include gas leaks and fire; equipment failure; hazards and incidents.
Environment	The area surrounding the work site which can be directly or indirectly affected by occurrences at the work site. Includes the atmosphere, soils, drains, underground water tables and ecosystem. Protection of the environment requires proper disposal of waste materials, restriction of burning off, correct handling of toxic substances, containment of CFCs and the like. The protection of the environment would also include the minimisation of those factors that contribute directly, or indirectly to the production of greenhouse gases. These contributing factors might include the minimisation of waste materials, the correct use of enterprise vehicles and machinery, the re-use or recycling of trade materials where possible and the overall reduction of energy usage through general awareness and the use of appropriate technologies.
Environmental and Sustainable Energy Procedures	Environmental and sustainable energy procedures as laid out in the appropriate environmental legislation and may include relevant Federal legislation; relevant State/Territory legislation; relevant local government by-laws; relevant government or quasi government policies and regulations; relevant community planning and development agreements (eg. Land

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	care agreements) Sustainable energy practice refers to workplace actions that contribute to the reduction of greenhouse gases. Sustainable Energy Practice is closely related to the 'environment'. Sustainable energy practice aims to reduce the amount of wastage in electricity and other forms of energy that lead to the production of greenhouse gases. Many of the principles and practices that apply in the workplace also apply in the home and the general environment. Environmental sustainable procedures include: examining work practices that may use excessive electrical energy; reducing energy by using energy efficient machines and appliances (eg. Star ratings); switching off devices such as lights, machines and computers when not in use; using power-save devices, such as those incorporated in photocopiers, business machines and the like; replacing incandescent lamps with compact fluorescent lamps; using natural light to replace artificial light; regularly cleaning air conditioner filters; closing windows and doors when climate control units are used; insulating dwellings, offices and workplaces and preventing draughts; using reflective curtains to control heat; using natural or artificial shade to control sunlight; using solar water heating; using automatic processes to manage energy usage; reusing materials used in construction, engineering and manufacturing; recycling waste materials; driving motor vehicles and other machines with care; using natural gas for heating rather than oil or coal based fuels; using devices to reduce water usage; checking for leakage in hot water system pressure relief valves and elsewhere in plumbing systems; sharing information about energy conservation with other workers.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Environmental features	Include, but are not limited to, fauna/flora habitats; indigenous cultural features; indigenous and non indigenous heritage features; water catchments.
Environmental hazards	Hazards associated with LPG or natural gas, geological features, soil types, neighbouring plants, residential areas, separation distances and emission and contamination hazards.
Environmental issues	Political, legal, community and aesthetic impact of installations.
Equipment (2)	Includes cylinder trolley; hose/tools; leak detection devices; gauges; spindles; tanks, valves and fittings; seals and gaskets; pump and drive shaft; meters; emergency equipment; pipes; pneumatic/electronic control equipment; gauges; hoses and connections including hose protection systems; earthing straps; personal protective clothing; hydraulic equipment.
Equipment (pigging)	Equipment required for ‘pigging’ operation may include valves; PIG launcher; PIG receiver; tracking equipment; pipeline locater; technical drawings; hand tools; crane; PIG signals; pilot tube; PPE; fire extinguisher; time piece.
Equipment (inspected)	Inspected and tested may include valves, actuators and flanges; heaters and heat exchanges; station power supplies; metering equipment; process control equipment; gas analysis equipment; piping systems; sumps and drains; pressure

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	vessels/filtration equipment.
Equipment (3)	May include pumps and compressors; pipes; hoses; valves; gauges; tank connections and fittings; personal protective equipment and clothing; articulated arms and earthing clamps and connections.
Equipment maintenance and fault repair	Includes: cabling faults; earth faults; instrumentation failure; instrument calibration; intermittent faults; equipment installation and replacement; troubleshooting of process control systems; approved software modifications and upgrades; commissioning.
Essential knowledge and associated skills (EKAS) learning specification (LS)	Provide specific advice in facilitating consistency and reliability in resource development and delivery. The learning specifications are premised on the separate content of the essential knowledge and associated skills referred to in each competency standard unit. The specifications are designed to: • provide the depth and breadth of essential knowledge and associated skills to be learned • ensure they support the needs of the workplace • contain assessment strategies, including a table of specifications, to increase validity, reliability and fairness • detail the resources required for satisfactory delivery in the learning environment • provide clarification regarding the type and quantity of evidence needed for assessment purposes • support a variety of delivery modes, eg face-to-face, distance, computer assisted learning or other

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	• provide content and structure that maximizes learning retention • provide a clear purpose statement about their relationship to the overall educational program
Established procedures and requirements **See also Standard operating procedures and Approved procedures**	Include any company procedures; manufacturers' manual/specifications; quality assurance procedures; technical standards; work instructions; standard operating procedures; OHS and emergency response and evacuation procedures.
Event	Includes gas/product leaks, odourant leaks, incorrect valve positions, electrical/instrumentation problems, compressor or pump failures, communication failures, abnormal process conditions, security alarms, third party complaints.
Excavation	May occur in a variety of conditions including varying surface types such as open ground (lawn/garden) bitumen or concrete; wet/dry conditions; in a variety of traffic levels such as road or rail; in differing soil types such as rock, clay or sand; day or night; city or rural areas.
Excavation tools	Includes hand tools; backhoe; jack hammer; trenching machine; boring equipment; compacting equipment.
Exceptions and conditions	May include long term bill accounts (12 months); meter changes; manual bills; daily accounts; active and inactive accounts; gas used on an inactive account, ie vacant premises; meter reader is unable to find the meter; missing meter/records;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	unknown consumer investigations; vacant premises investigations; meter relocations.
Expected lifetime of equipment	The life cycle of equipment is determined by factors such as the organisation's corporate and strategic plans, the organisation's financial and other resource management guidelines, government policy, the capacity of equipment to perform to operational requirements.
External interference	External interference threats to the transmission pipelines, easements and/or surrounding environs – environmental damage, erosion, land slip, subsidence, fire, gas leak, dead vegetation, exposed pipe, earth moving activities, earthquake, military, fallen marker signs, compromised security and vandalism, and unauthorised land development.
Facilities and equipment/station	To be repaired may include valves, actuators and flanges; heaters and heat exchanges; station power supplies; metering equipment; process control equipment; gas analysis equipment; piping systems; sumps and drains; pressure vessels/filtration equipment; prime movers; pumping systems and equipment; compression systems and equipment.
Fault find	Identifying problems including functional faults.
Faults	Includes water leaks; oil leaks; damaged hoses; gas leaks; valves not operating; air leaks; electric control cable damage.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Financial reports	Annual reports, program financial statements, accrual reports, monthly/quarterly financial reports.
Fitting	A component, including associated flanges, bolts and gaskets used to join pipes, to change the direction or diameter of a pipeline, to provide a branch, or to terminate a pipeline.
Gas characteristics	Could include temperature, chemical composition, pressures and pressure reduction, reverse quantities and LPG evaporation rates.
Gas chromatography	Is the separation and measurement of the multiple components that make up natural gas, or any other product being measured with an appropriate chromatograph.
Gas infrastructure	Includes pipes, valves, scraper stations, compresors, regulators, communications equipment, heat exchanges, stations instrumentation equipment, condition monitoring equipment, process control equipment, gas measurement equipment, gas quality and analysis equipment, cathodic protection equipment, pressure vessels, data transfer equipment.
Gas systems could include	Either LPG or natural gas systems may dominate, however it is expected that systems will be selected across both, and include transmission and distribution pipelines, LPG storage facilities greater than 50kL, underground storage, tankers and ships, control systems, custody transfer stations, odorising plant, corrosion control, interconnecting systems.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Gas systems may include but are not limited to	Custody transfer stations, tanker transfer, decantation, tempered liquid petroleum systems, field or district regulators, LPG systems, meters and regulators, transmission and distribution systems.
Gas systems	Natural gas transmission, distribution and storage; liquefied petroleum gas tanker and ship transport, storage and processing terminals and distribution systems.
Hand tools	Includes, but not limited to, adjustable spanners; crow bars and pinch bars; bolt cutters; brooms; chisels; hacksaws; hammers; measuring tapes; nips; picks and mattocks; pliers; sealant guns; shovels and spades; sledge hammers; spanners and wrenches; spirit levels; string lines; trowels and floats; wire cutters; screw drivers; tube squeezers and blenders.
Hazardous materials	Materials that could cause serious illness or injury.
Hazards (5) **See also OHS Glossary — Hazard**	Something with the potential to cause injury and disease to persons, property or disruption to productivity. Hazards arise from workplace environment; use of equipment; poor work design; inappropriate systems, procedures and or human behaviour. May include confined spaces, electricity, gas, manual handling, noise, plant and equipment, infected blood, chemicals, temperature extremes, lightning and radiation.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	Making inventories of and inspecting high risk operations; and inspecting systems and operations associated with potentially hazardous events, for example, emergency communications, links to emergency services, fire fighting, chemical spill containment, bomb alerts and First Aid services.
Hazards (6) **See also OHS Glossary — Hazards**	Confined spaces, gas, electricity, manual handling, noise, plant and equipment, infected blood, chemicals, temperature, lighting, radiation.
Identifying hazards **See also OHS Glossary — Hazard Identification**	Workplace inspections, including plant and equipment; audits; maintaining and analysing Occupational Health and Safety records, including environmental monitoring and health surveillance reports; maintenance of plant and equipment; reviews of materials and equipment purchases, including manufacturers and suppliers information; and employee reporting of Occupational Health and Safety issues.
Implement	To carry out or put in place a new requirement.
Incident	An event that has caused or has the potential for injury, ill health or damage to community, employees, environment, assets. (‘Incident’ is the preferred term rather than ‘accident’)
Industry products and services	Includes organisational products; companies emerging products and services;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	historical products and services.
Information	On the account includes identification number; meter number; property number; position of meter; street name.
Information systems	Includes Supervisory Control And Data Acquisition (SCADA), Global Position System (GPS), Geographic Information System (GIS), maintenance management system, outage management systems, incident management systems, document management and information systems, proprietary information systems.
Inspect	To examine or check a system, assembly, component or part by visual or physical means, for the purpose of identifying defects or limits.
Inspection and testing (2)	Detailed in the National Road Transport Standard TDTC407A and TDTC597A.
Inspection and testing techniques (3)	May include hydrostatic testing; magnetic particle inspection; radiography; ultrasonic inspection; dye penetrant inspection; gas leakage detection equipment.
Inspection checks	Are made to determine test date on cylinder is within the required period; organisation’s ownership; corrosion and impact damage; valve threads are clean and in good condition; safety relief valve is capped and free from obstruction; internal deposits.
	Flow control equipment, pressure and

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Instrument and control system	temperature transmitters and transducers, telemetry equipment, gas chromatographs, moisture analysers, gas sampling equipment, PLCs.
Integrity testing (the testing of integrity)	To ensure the system conforms to required operating parameters.
Interpersonal skills	Includes the use of appropriate body language; summarising and paraphrasing to check understanding; providing opportunities for the client to confirm their request; questioning to clarify and confirm the client's needs; listening actively to what the client is communicating.
Investigating billing exceptions	Conditions may involve field calls undertaken to determine owner/occupiers' of properties; dates of entry of owner/occupier; meter reading and billing purposes; meter identification details; other relevant information such as forwarding address, payment arrangement.
Key features of plans and elevations	Involves the type of structure; shape of structure/building; service requirements; location of plant/equipment; vertical and horizontal measurements; clearance distance; geological features; service layouts and bore/casing details.
Leaks	May be classified into Class 1 — repair until completed; Class 2 — repair within 7 days; Class 3 — monitor, repair not economic; Class 4 — no leak found.
Learning Specification (LS)	See Essential knowledge and associated skills (EKAS) learning specification (LS)

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Legislation **See also OHS Glossary — Legislation relevant to OHS**	Includes relevant sections of Federal and State OHS and Environmental Protection Acts.
Legislative and company requirements **See also OHS Glossary — Legislation relevant to OHS**	Occupational Health and Safety legislation; government acts and regulations; Australian Standards and Codes of Practice; environmental legislative requirements, company standard operating procedures and authorisation requirements and technical standards requirements
Legislative compliance **See also OHS Glossary — Legislation relevant to OHS**	Occupational Health and Safety legislation; government acts and regulations; Australian Standards and Codes of Practice; environmental legislative requirements.
Legislative requirements (2) **See also OHS Glossary — Legislation relevant to OHS**	Includes OHS; environmental; traffic control and are also set out in AS 1596, AS 2030 and AS 3509.
Legislative requirements (3) **See also OHS Glossary — Legislation relevant to OHS**	As set out in AS 1596.
Legislative requirements (5) **See also OHS Glossary — Legislation relevant to OHS**	May include Occupational Health and Safety legislation; government acts and regulations; Australian Standards and Codes of Practice; environmental legislative requirements. May also include; State or Territory gas and petroleum acts and regulations; workers compensation legislation; employee code of conduct; anti

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	discrimination legislation; equal employment opportunity legislation; disability legislation; trade practices legislation; native title legislation; related regulations; common law.
Liaison with customers	In person or by telephone; fax; letter; Internet.
Loading and discharging LPG	Factors which need to be taken into account when loading and discharging LPG includes curfews; number of customers; volume of LPG to be delivered; duration of shift; distance to be travelled; equipment type; Australian Dangerous Goods Code; site access; weather conditions; delivery area is checked for ignition sources and other hazards; local environment, according to standard operating procedures.
Loading and unloading of cylinders	Is undertaken in both the terminal and customer's location, includes exchanging cylinders, according to standard operating procedures.
Location	For maintaining CP systems may be urban, country or remote. Third party monitoring.
Location for maintaining CP systems	May be urban, country or remote. Monitor third party activities and installations.
LPG transfer	Is transferred by either pump or compressor to either LPG tanks or to cylinders.
	That maintenance is performed at defined

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Maintenance schedules/servicing	intervals to retain a system, component or part in a serviceable condition by systematic inspection, detection, replacement of worn-out items, adjustment, calibration or cleaning, etc.
Management information systems	Computers, communication channels, records management data, procedures, protocol, legislation, guidelines and awards, organisation, legal and policy materials, client information, market trends, registry and file records, library, financial records, basic statistical information, persons.
Maps and drawings	Maps include topographical maps; alignment sheets and plans; pipeline maps; city and town maps; regional/location maps; road maps. Drawings include instrument electrical drawings; circuit diagrams; component charts; wiring diagrams; site layout drawings.
Materials (2)	Includes liquid withdrawal valves; vapour service valves; relief valves; contents gauges; in situ valves; multiport valves; sullage tubes.
Materials (3)	Required for pipeline installation may include various pipes (eg PVC, nylon, PE, cast iron); fittings; coating material; bedding materials; detecta tape; trace wire; meters; valves; filters; regulators.
Measurement principles	Is the understanding of the various systems, technologies and associated components which are used to measure a product. These principles include an understanding of chemistry, physics associated with the medium which you are wanting to measure. A good understanding of electronics is required.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Methods	Used to record meter readings may include meter reading cards; meter reading sheets; electronic reading devices such as Portable Data Entry Terminal (PDET).
Minor mechanical maintenance	Is limited to visual inspection; lubrication; gland nipping; draining of water taps; degreasing; replacing readily accessible gaskets; limited mechanical re-assembly.
Modification	Where a change or update is made.
Monitoring **See also OHS — Monitoring**	Of pipeline systems may include fire and gas extinguishing and deluge systems; emergency systems; alarm and communication systems; SCADA; prime movers and compression systems; shutdown systems.
Monitoring of storage facilities **See also OHS — Monitoring**	May include monitoring, pressure; temperature; levels; corrosion; gas leaks; stock levels; pressures; security; temperature; water sprays; shutdown system.
MSDS **See also OHS — Material Safety Data Sheet (MSDS)**	Material Safety Data Sheets Information and handling of chemicals/flammable liquids are involved.
Necessary materials	May include gas detectors; purging gas; hand tools; LPG hoses; flare; valves; compressor; vessels; pump; personal protective equipment and clothing; road tanker; control and instrumentation equipment.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Negotiating skills	Utilise a range of influencing techniques to gain a positive result in achieving and maintaining the integrity of the transmission pipeline. Negotiations are held with relevant: • land owners • councils • utilities including telecommunications • earth moving contractors • cultural, heritage parks, lands and buildings • native title • national parks • government agencies • general contractors and/or organisations • personnel • internal and external clients and other related parties
New or changed information	Includes special customer requirements; addition of new meters; deletion of meter when necessary; changes to meter numbers; changes to property information; change in location of meter.
Nominated person(s)	Includes persons with the relevant knowledge and authority to exercise the responsibility
OHS	See OHS Glossary
OHS information to co-workers including training **See also OHS Glossary — inspection;**	Arrangements for ongoing assessment of training needs, for example, relating to: • supervisors and managers, specific

Term	Definition/Explanation
specialists; management system (OHSMS); action plans; audit; records; reporting requirements; responsibilities; plan; systematic approach to managing OHS	hazards, specific tasks or equipment, emergencies and evacuations • training required under Occupational Health and Safety legislation; • allocation of resources for Occupational Health and Safety training, including acquisition of training resources, development of staff training skills and purchase of training services • induction training • training for new operations, materials or equipment.
OHS issues	These could be raised by workers or designated persons and include hazards identified; problems encountered in managing risks associated with hazards; clarification on understanding of OHS policies and procedures; communication and consultation processes; follow up to reports and feedback; effectiveness of risk controls; training needs. Issues can also be raised at Occupational Health and Safety committees and other committees, for example, consultative, planning and purchasing; health and safety representatives; employee and supervisor involvement in Occupational Health and Safety management activities, for example, Occupational Health and Safety inspections, audits, environmental monitoring, risk assessment and risk control; procedures for reporting hazards, risks and Occupational Health and Safety issues by managers and employees; and inclusion of Occupational Health and Safety in consultative or other meetings and processes.
OHS legislative arrangements	The legislative requirements for OHS vary

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	across different states and the requirements of the particular state should be reflected in the training and assessing of the competency standard. The particular differences could relate to consultation, participation and incident reporting. Commonwealth, State and Territory OHS Acts, regulations, codes of practices and standards including regulations and codes of practice relating to hazards present in the workplace or industry. General duty of care under OHS legislation and common law Requirements for the maintenance and confidentiality of records of occupational injury and disease; Requirements for the provision of OHS information and training; Provisions relating to health and safety representatives and or OHS committees Provisions relating to OHS issue resolution
OHS management system	That part of the overall management system that manages the risks associated with the business of an organisation — usually includes organisational structures, policies, planning activities, procedures, processes and human, technical and financial resources. OHS system evaluation involves: • reviewing the effectiveness of the Occupational Health and Safety management system • regular review of operating procedures • regular analysis of Occupational Health and Safety records • audits against Occupational Health and Safety legislative requirements.
OHS policies and procedures	Include policies and procedures to be

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	followed to ensure a safe working environment. These include company standards, advisory codes of practice and any other instructions such as MSDS. Personal safety principles; workplace hazards — safety checks within the workplace; identification of potential workplace hazards; working with electrically operated tools and equipment nature of electric shock; causes of electrical accidents; First Aid; emergency/evacuation procedures.
OHS requirements	Are to be in accordance with state/territory legislative regulations which includes workshops/worksite safety practices; control of noise and dust; use of ladders and working platforms; control of exhaust emission; isolation of work areas; confined pace equipment and procedures; manual handling techniques; environmental requirements.
OHS safety records	Identifying records required under Occupational Health and Safety legislation, for example: • worker's compensation and rehabilitation records, hazardous substances registers, Material Safety Data Sheets (MSDS), major accident/injury notifications, and certificates and licences • manufacturer's and supplier's Occupational Health and Safety information • Occupational Health and Safety audits and inspection reports • maintenance and testing reports • workplace environmental monitoring and health surveillance records • records of instruction and training • First Aid/medical post records.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Operating budget	Staffing costs, capital expenditure/income, recurrent expenditure/income, forward estimates, cash flow.
Operational	Variations, unexpected events may include emergencies including gas leaks and fire; equipment failure; hazards and incidents; mandatory or statutory inspections; scheduled maintenance activities; electrical power failure.
Operational requirements (5)	May include product levels; product blending/mixing/odourising; manufacturers' maintenance requirements; rectification of gas system faults.
Organisational policy and procedures	These may vary between sectors and organizations. They include legislation relevant to the management of physical resources, legislation relevant to the organisation, operational, corporate, strategic plans, organisational performance standards, organisational persons practices and guidelines, organisational quality standards, government policies, Standard Operating Procedures, Australian/New Zealand Standards, ISO Standards.
Organisational procedure for managing risks including an OHS framework	Hazard management policies and procedures; hazard management documents including policies and procedures on specific hazards as well as hazard and incident reporting and investigation, workplace inspections and maintenance; communication, consultation and issue resolution procedures; human resources management procedures such as grievance procedures, induction programs, team meetings, management of

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	performance levels; standard operating procedures and work instructions; post injury management such as first aid, critical incident debriefing, compensation and return to work; other related procedures including waste management and security. It also includes policy development and updating; determining the ways in which Occupational Health and Safety will be managed. This may include distinct Occupational Health and Safety management activities, or inclusion of Occupational Health and Safety functions within a range of management functions and operations such as maintenance of plant and equipment, purchasing of materials and equipment, designing operations, work flow and materials handling, and planning or implementing alterations to site, plant, operations or work systems; mechanisms for review and allocation of human, technical and financial resources needed to manage Occupational Health and Safety, including defining and allocating Occupational Health and Safety responsibilities for all relevant positions; mechanisms for keeping up to date with relevant information and updating the management arrangements for Occupational Health and Safety, for example, information on health effects of hazards, technical developments in risk control and environmental monitoring and changes to legislation; mechanisms to assess and update Occupational Health and Safety management arrangements relevant to legislative requirements; and a system for communicating Occupational Health and Safety information to employees, supervisors and managers within the enterprise.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Organisational requirements (4)	Include organisational goals, objectives, plans, systems and processes; business plans, mission statements; Occupational Health and Safety policies, procedures and programs; legal and organisational policy/guidelines and requirements; quality and continuous improvement processes and standards; confidentiality and security requirements; ethical standards; filing and documentation storage processes; work method statements; standard operating procedures; relevant environmental and cultural sensitivity legislation, regulations, policies and procedures.
Orientation of the site	Includes relationship to 'north'; currency of plan and relationship between plan and site.
Other persons	Include issuing officers, isolating officers, recipient in charge, testing officers or their equivalent.
Other services	May include water; electricity; telecommunication; sewerage and stormwater authorities; other pipeline authorities.
Parameters	Set guidelines to be worked within.
Participative arrangements **See also OHS Glossary — Participative arrangements**	Includes regular information sessions (using clear and understandable language) on existing or new OHS issues; formal and informal OHS meetings; meetings called by OHS representatives; health and safety committees; contributing suggestions and reports to management; easy access to relevant written workplace information.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
PC(s)	Personal computer(s).
Permit to work **See also OHS Glossary — Permit to work**	The permit to work is an authorisation for an individual to work to in required activities and functions associated with the Gas Industry.
Permits	Include any documents or forms approved for use by enterprise safety rules and permit to work procedures.
Personal protective equipment **See OHS Glossary — Personal protective equipment (PPE)**	May include protective head wear; face masks; gloves; safety boots; clothing such as overalls; hearing protection.
Persons	May include organisation employees; contractors; consultants; maintenance persons; appropriately experienced and qualified persons; drivers, cleaners, grounds and site security persons.
Physical resources	Properties/facilities, fixtures and plant, vehicles, equipment, stock and supplies, gas systems and plant, works depots, pipelines, distribution systems, storage depots and installations.
PIG	Pipeline Inspection Gauge A PIG is a plug style piece of equipment designed to tightly fit inside a pipeline. It is propelled from a launcher usually by water or compressed air to clear the inside of a pipeline. In addition, recent developments in computer technology has been utilised

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	and this has produced 'Intelligent' PIGs, which can record information as to a pipeline's physical condition.
Pipeline control systems	Include compressor systems and equipment (compressors, monitoring systems, power supply systems, pumps, coolers, scrubbers, expanders, anti surge systems, safety systems and compressor control systems).
Pipeline systems	May include pipes; valves; compressors; electrical and electronic components; PLCs; cathodic protection; pressure regulation and meters.
Plant and equipment **See also OHS — Plant**	Includes but is not limited to air compressors and hoses; concrete mixer; industrial wet and dry vacuum cleaner; pallet trolley; rollers; compactors; pumps and hoses; brick/masonry saw; ladders; trestles and planks; wheelbarrows; LPG cylinders; traffic barriers; lighting; boring equipment; concrete cutters; trenching equipment; pneumatic hammers; leakage location equipment; cathodic protection equipment; pipe locaters; fire fighting equipment; electrofusion equipment; welding equipment.
Policy	Supply, procurement, expenditure, audit, reporting and recording policies.
Power tools	Includes drills; nail guns; staplers; screwdrivers; sanders; angle grinders; pneumatic tools and sand blasters.
Preparation and implementation strategies	Include the use of the services of staff associated with maintenance and planning.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Pressure vessels and fittings	May include such items as pressure vessel; vaporisers; earth connections; relief valves; emergency shut-down valving (eg. ISC valves); manual shutdown valving; pipework; vessel footings; regulators; hoses and couplings; pumps; compressors.
Prime movers	May include turbine engines, reciprocating engines, electric motors (fuel and carburetion systems, ignition systems, lubrication systems, induction and exhaust systems, governing systems, power supply systems, safety and shutdown systems).
Problems	May include consumption that is abnormally high or low; reading lower than previous reading (step down); access to meter; discrepancy between meter reader's reading and that of the consumer; missing meter; meter breakdown; meter relocation.
Procedures	Includes standard operating procedures; quality procedures; organisation continuous improvement strategy.
Process monitoring	May include the following checks, stock levels; pressures; water sprays; security; gas heating valves; shutdown system; odourant dosing levels.
Processing LPG	May include blending/mixing LPG; manufacturing TLGP; odourising LPG.
Product and service issues	Includes the market and demand data; organisational product knowledge; customer delivery; faults and downtime.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Product information	Includes competitive features of products or services; product trends; information to correct problems with products or services; innovations to products or services; cost and production data; distribution processes; transmission processes.
Project activities	Major construction and maintenance activities in either the LPG or natural gas sector, including installations, transmission and distribution pipelines, LPG storage facilities greater than 50kL, underground storage, tankers and ships, control systems, custody transfer stations, odorising plant, corrosion control, interconnecting systems.
Record keeping	May require the use of computers and or paper records.
Records	Relating to previous routes may include meter access details; warnings relating to dogs; obstacles to access.
Records and reports (6)	Business plans and marketing plans, KPI's reports, financial reports and forecasts, monthly statements/invoices, persons reports, Lost Time Injury reports, debtor/creditor reports.
Records/documentation	Includes Occupational Health and Safety and environmental legislative requirements; erosion control documentation; vegetation control documentation; workplace mapping, eg pipeline alignment drawings, geographical maps, topographical maps; pipeline access route manuals; MSDS information;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	standard operating procedures.
Records/reports (5)	May include relevant documentation; routine inspections (daily readings, weekly/monthly checks); product reconciliation; maintenance activities; mandatory or statutory inspections; safety; hazard and incident; product quality; transfer documentation; corrosion control; control centre log.
Reduced or eliminated	Where something is either decreased or completely removed.
Reference information	Includes benchmarking reports, maintenance data, market requirements, plant budgets, business plans and risk assessment reports.
Regulatory guidelines	Where something is set as a compulsory part of a work environment.
Relevant authorities and other stakeholders	Government authorities, landowners (both current and traditional indigenous), stakeholders, local councils, other utilities; emergency services; road transport authorities; rail department.
Relevant documentation (5)	May include OHS consultation and reporting requirements; localised Occupational Health and Safety audits; injury reporting; claims management and rehabilitation; contractor control; purchasing control; plant and maintenance handling; contracts; drawings/plans; manufacturer's specifications; company standard operation and safety procedures; work permits; confined space entry

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	permits; hot work permits; company forms; records/reports; emergency plans; environmental requirements; quality assurance documentation.
Relevant documentation (6)	Company risk management policy; codes of practice; standard operating procedures; Australian Dangerous Goods; trade practices; Occupational Health and Safety reporting requirements; injury reporting; claims management; contractor control; hazardous substances management. Contracts; specifications; drawings/plans; 'as-constructed' drawings/plans; manufacturer's specifications; work permits; company standard operation and safety procedures; company management plans and policies; hot work permits; company forms and files; OHS, laws and codes of practice; government legislation, acts and regulations; environmental legislative requirements; pipeline licenses; quality assurance; commercial agreements.
Relevant persons	Managers; other supervisors; inter-company departments; other utilities; council representatives; producers, transporters/shippers; consultants; government bodies/agencies; refinery persons; customers; land owners.
Relevant regulation and procedures	Refers to, but not limited to, the use of machinery/equipment; cleaning materials and aids; equipment operation; personal protective equipment e.g. safety boots, eye and ear protection, safety helmets etc.
Relevant resources	Relevant persons, materials and equipment, personal protective equipment, company

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	standard operating procedures, equipment manuals, training resources.
Relevant sections of Standard Operating Procedures	Includes hazard policies and procedures; emergency, fire and accident procedures; procedures for the use of personal protective clothing and equipment; hazard identification and issue resolution procedures; job procedures and work instructions; relevant guidelines relating to the use of machinery and equipment.
Repair and maintenance equipment	May include oxyacetylene cutting equipment; pipe cutters; cranes; dogging and slinging activities; cold cutting equipment; linepipe and station pipe; screwed and welded fittings; flanges, gaskets and stud/nuts; hand and power tools; transport equipment.
Repair/modification techniques	May include hot tapping operations; hot tap and stroppling operations; pipe threading machinery; welding and cutting operations; gluing; fitting of pipeline repair sleeves and clamps; use of Lam Air Movers; use of pipe alignment clamps; use of Chiksans; fusion.
Reports (2)	May require the use of personal computers, other hardware media and associated software.
Reports (5)	Include routine inspections (daily readings, monthly checks); scheduled maintenance activities; mandatory or statutory inspections; hazard and incident reports.
Representatives in other utilities	Include other pipeline operators; electrical;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	rail; telecommunications.
Requirements **See also Standard Operating Procedures/Established Procedures**	To which equipment and procedures and outcomes must conform and includes statutory obligations and regulations, by-laws and standards called up by legislation or regulations. May include: • statutory regulations and codes of practice — National, State and Local Government • job specifications • transport documentation • standards in specifications (Australian/NZ/international) • procedures and work instructions • quality assurance systems • manufacturers' specifications • maintenance manuals, schedules and specifications/standards • circuit/cable schedules • design specifications • customer/client requirements and specifications • specified underpinning knowledge (specified in Evidence Guides) • National and State and Local Government guidelines, policies and imperatives relating to the environment
Resource requirements	To enable efficient planning and scheduling of routes may include availability of competent meter readers, vehicle and appropriate meter reading equipment.
Resources	May include appropriate persons; relevant persons; materials, tools and equipment etc., vessels, pumps; compressors, valves; product; personal protective equipment and clothing; control and monitoring

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	equipment; mixing and sampling equipment; air equipment. To meet storage and/or processing operations and include appropriately experienced and qualified persons; process control equipment; station power supply; heater and heat exchangers; station instrumentation; drawings and schematics; metering equipment and gas analysis equipment; valves, actuators and flanges; compressors and prime movers; sumps and drains; PIGs; personal protective equipment and clothing.
Responsibility	For tasks and workload may include interpreting work instructions and direction; prioritise work; using time effectively; arranging work materials.
Risk management **See also OHS — Risk; Risk analysis; Risk assessment; Risk evaluation; Risk management; Risk ranking; Risk register**	Identification and control of those risks that threaten the profitability or viability of an organisation. Includes identifying and assessing risks associated with occupational hazards, and designing programs to limit exposure to those hazards. See also 'Occupational Health and Safety management system'.
Risk management plans **See also OHS — Risk**	Identification of hazards, assessment of risks, identification of control measures, implementation of control measures and review of control measures, reference to conduct and reporting of hazard and operational studies (HAZOPS) and hazard analysis studies (HAZANS) for critical incidents, recognition of six categories of exposures (personal, property, financial, environmental, product and administrative), legislative compliance, workplace health and safety, standard operating procedures, vicarious liability, professional liability, reducing loss and exposure in the work environment from

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	personal loss-injury/common law, property loss-damage, financial-loss of income/theft, environmental liability, product-project work, administrative exposure, identification and use of manufacturer's specifications and Australian/New Zealand and ISO standards, contingency plans for response to critical incidents.
Risk management principles	Six categories of exposures (personal, property, financial, environmental, product and administrative, legislative compliance, workplace health and safety, procedure systems, vicarious liability, professional liability.
Risks	May include injury, death or illness, damage to plant or equipment, financial loss, non-compliance with legislation (OHS, environmental), damage to products.
Safe working procedures	Standard operating procedures may include wearing personal protective equipment; controlling traffic; controlling access to the site; ensuring trenches are correctly shored; using welding screens; the availability of correct fire extinguishers; enterprise procedures and practices; manufacturer's specifications.
Safety devices	May include deluge systems; emergency stop devices, Personal Protective Equipment. Deluge systems; emergency stop devices; Personal Protective Equipment.
Safety equipment	Includes fire extinguishers and blankets;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	hoses; pumps; branches; fittings/nozzles; breathing apparatus; alarms; sprinkler systems; First Aid kits.
Safety issues	Occupational Health and Safety of operatives, ongoing maintenance of facilities emergency plans, safety cases and environmental impact assessments.
Schedule requirements	Should include number of days; address and location; previous schedule date; route number; meter count.
Security breach investigation practices	Established procedures used to deal with the following scenarios; bomb/fire threat; intrusion; theft of equipment; damage to equipment/sabotage; personal risk of injury, disease or death; potential environmental damage.
Services	Include gas; water; electricity; telecommunication; sewerage and stormwater authorities; other pipeline authorities.
Simulated work environment	Circumstances that may arise in the work environment are constructed and used as a tool for assessing workers/employees operating under working conditions.
Solutions	Include arrange the removal of inactive meters; accounts billed; change meters; arrangements for payment made; adjust accounts; access for future meter reading made.
	Includes asset owners; internal clients;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Stakeholders	emergency services; land owners both current and traditional Indigenous owners; the general public; statutory authorities.
Standards **See also OHS Glossary — Standards**	Technical documents which set out specifications and other criteria for equipment, materials and methods to ensure they consistently perform as intended. The Standards referred to in competency standard units are those published by Standards Australia or in joint venture with Standards New Zealand and Australian Gas Association Standards. Competency in the use of other technical standards may be required in industries not restricted to Australian requirements. For example, shipping and off-shore petroleum industries are subject to standards agreed to by underwriters and enterprises or some other international convention.
Standard Operating Procedures **See also Established Procedures**	Formal arrangements of an organisation, enterprise, statutory authority or manufacturer of how work is to be done. This may include Quality assurance systems; Work Clearance systems; OHS Practices; Other Legislative requirements and testing in accordance with AG 603, AS 1697, AS 3723, AG 2885 and any other Australian or International Standard that may apply
Stations	See facilities and equipment
Strategies	Methods of conducting operations that could be over long, medium of short term.
Structures	Structure is a facility with footings deeper than 450mm and or being fuller than 2

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	meters.
Surface reinstatements	Include bitumen; concrete; loam/top soil; dolomite; lawn.
System logistics	Could include land and sea transport routes and equipment, transmission and distribution pipelines, land ownership and easements, siting.
Tankers	Include heavy rigid or heavy combination truck.
Technology	Includes a range of information processing equipment for storing; retrieving and using data such as electronic equipment; fixed, remote, wireless or the like; PCs, hand held recording devices.
Telephone contacts	Current contacts should be kept for consumers; Councils/rate offices; real estate agents; internal employees/departments; other statutory authorities.
Test equipment	May include reference half cells; multimeters; dataloggers; trycorders; syncorders; interrupters; CDA equipment; soil restivity test equipment.
Testing	Testing and refurbishing is covered by a range of legislative requirements and standards.
Testing and application equipment	Includes abrasive blasting equipment;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	compressors; low voltage and high voltage holiday detectors; paint thickness coating gauges and meters; mobile plant; pipe wrapping machines; spray painting equipment; abrasive blast comparators and standards; densitometers; coating defect assessment survey equipment (DCVG method equipment, Pearson technique method equipment); hand/power tools; heating torch.
Third parties	Include land owners (both current and traditional indigenous), both current and traditional Indigenous; local authorities; emergency services; other pipeline operators; producers, customers, shippers and vendors; government agencies and departments; contractors.
Third party liaison	Liaise with third parties whose activities can be a threat to the transmission pipeline. Informing third parties of the restrictions and requirements when working near a transmission pipeline.
Tools and equipment for LPG	May be required to perform painting, cleaning, refurbishing and testing of equipment.
Tools and equipment (1)	The types of equipment and tools used to carry out work activities include general concrete mixers; general vacuum cleaner; general trolley, non pressurised pumps and hoses; wheelbarrows; traffic barriers; extra low voltage lighting equipment; hand held tools; basic technology (e.g. PCs)
Tools and equipment (2)	Required for pipeline installation may include but is not limited to pneumatic

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	tools and equipment; boring equipment; plastic fusion and solvent glue kits; welding plant equipment; various hand tools; trucks; slings; generators; location equipment; electrofusion equipment; window cutter; steel plates; administration equipment for documentation; lifting equipment. Tools and equipment are also required to perform painting, cleaning, refurbishing and testing of equipment and could also include cylinder trolley; hose/tools; leak detection devices; truck tail gate loader; tray gates and ropes; pipes; hoses; valves and gauges; protective and safety equipment.
Tools and equipment (3)	Required for pipeline installation may include but is not limited to pneumatic tools and equipment; boring equipment; plastic fusion and solvent glue kits; welding plant equipment; various hand tools; trucks; slings; pressure testing equipment; compressors; generators; location equipment; electrofusion equipment; window cutter; steel plates; administrative equipment for documentation; lifting equipment; pigging equipment. To odourise gas may include odourmeter; tools such as lance, hoses, regulators; emergency response kit including absorption material; sodium hypochlorite (neutraliser); masking agent; reference standard; level indicator (magnetic detector); personal protective equipment; fire extinguishers; emergency container; emergency equipment; transfer pump; molecular sieve for venting.
Tools and equipment (4)	Includes vehicles; pipe locator; gas detector; pipeline probe; hand held tools; mobile phone/satellite phone; high

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	frequency radio; GPS; binoculars; camera; personal computers; intrinsically safe lighting (torch).
Tools, equipment and testing devices	Includes hand tools; valves; actuators and flanges; heaters and heat exchanges; metering equipment; process control equipment; gas analysis equipment; piping systems; sumps and drains; pressure vessels/filtration equipment; prime movers; pumping systems and equipment; compression systems and equipment; PIG.
Tools, materials and equipment	May include hand tools including power operated tools; plant; emergency equipment; electrical and electronic test equipment; gas detectors; air compressor; water pump.
Traffic control	Traffic control is the controlling of traffic around a work site, eg laying a gas pipe in the vicinity of a road. Materials used in traffic control include barriers; witches hats (cones); flashing hazard lights; star iron pickets; traffic signs; stop/go paddles.
Transfer equipment	May include compressors; transfer pumps.
Transfer of LPG	May be undertaken by tank to tanker; ship to storage terminal; tanker to tank; tank to tank.
Transmission pipeline standards	AS/NZS 2885 part 3 sections 5 & 6.
Troubleshooting techniques	Methods used to locate or determine the reason for a fault in a system, component or part by means of a systematic checking

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	or analysis.
Types of adjustments	Include downstream pressure adjustment; storage pressure adjustment (vaporiser systems only); bypass pressure adjustment for pumps.
Types of checks and tests	On CP systems may include on potential surveys; on/off potential surveys; coating defect assessment surveys (DCVG method, Pearson technique/method, over pipeline potential method); loop impedance testing; anode bed testing; soil resistivity testing; interference testing.
Types of CP faults	May include coating damage/deterioration; interference from other systems; anode not working; equipment fault/failure. The use of personal computers, other hardware mediums and associated software may be required to detect faults.
Types of details	Include, but are not limited to, bore and casing details; ground voltages; connection details; common trenching details/distances and conversion details.
Types of drawings	Include site plans; elevations; sectional plans/elevations; detailed and specification providing illustrations and dimensions.
Types of equipment faults	May include electrical problems; over-filled vessel; compressor failure; pump failure; out-of-current inspection status; gauge failure; hose rupture/leaks;

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
	instruments out of calibration; non-flow of LPG.
Types of faults	May include gas leaks; electrical problems; compressor or pump failure; out of current inspection status; gauge failure or hose rupture leaks; instruments out of calibration; non-flow of gas; instruments and equipment require cleaning; routine servicing is due; tight nuts, valve castings and fasteners.
Types of gas system faults	May include liquid/vapour leaks; electrical problems; mechanical failure; over-filled vessel; out-of-current inspection status; gauge failure; hose rupture/leaks; instruments out of calibration; non-flow of Liquefied Petroleum Gas; cathodic protection system failure; corrosion.
Types of structures	Include buildings; bridges; fabricated towers; fences; wells; dams; poles; heritage/cultural features and environmental barriers.
Types of variations or irregularities	May include corrosion; impact damage; point deterioration; leakage; non-operability of shutdown systems; equipment out of calibration.
Unit(s) of competency	see also competency standard unit(s)
Upstream	Towards or in the higher part of a stream; against the current. Situated farther up the stream. For example, the city gate is upstream from the home or business meter.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Term	Definition/Explanation
Valve system	Flow control equipment, pressure and temperature transmitters and transducers, telemetry equipment, gas chromatographs, moisture analysers, gas sampling equipment, PLCs.
Work instructions	Include verbal instructions, written instruction and instructions provided visually such as video, OHS signs, symbols and other pictorial presentation.
Workplace hazard reports	Include face-to-face reports; phone messages; notes; memos; specially designed report forms.
Work completion details	May include log books or computer input.
Work plans/schedules	Includes formal and informal means of prioritise activities; daily plans; quality plans; safe working plans; work allocation and resource needs.

Glossary of Terms Related to Occupational Health and Safety

Introduction

This Glossary of Occupational Health and Safety (OHS) Terms has been adapted from the NOHSC official glossary of terms and developed to assist competency developers and writers, reviewers of training packages and those developing any training specification or learning materials for the Vocational Education and Training environment.

In Australia we consider that the rate of workplace fatality, injury and ill health is far too high. To reduce this toll we need to make some changes in the work place and this requires training to enable business and workers to effectively manage safety. We must get OHS right in the competency so that the resultant learning contributes to improving the capacity of those in the workplace to manage safety. This applies not only to the ‘designated’ OHS units but to the integration of OHS, as appropriate, into all competencies, learning programs and learning resources.

© Commonwealth of Australia, 2025 Powering Skills Organisation

The competency standard unit TAADES505A *Research and develop competency standards*, specifies the outcomes and the knowledge and skills required to research and develop documents which outline competency requirements for a particular job function, work process, work role or specific vocational outcome. This unit cites four phases in developing a competency:

1. Research the competency area
2. Formulate competency specifications
3. Validate competency specifications
4. Finalise competency specifications.

OHS is a critical aspect of research into the area of competency and is also an important aspect of work performance to be integrated within a competency.

As in many technical areas, OHS has its own terminology. OHS affects all of us, however key words and terms are not always used in a consistent manner and this can lead to confusion. To maximise the effectiveness of our training and education we need to ensure that our use of OHS terminology is as consistent and clear as possible.

This glossary is not intended as a definitive dictionary of OHS terms but is designed to be used in the second phase of competency development, to formulate the competency specifications. It is also an invaluable tool for those involved in the design and development of learning resources.

Further information on OHS hazards, practical guidance material, standards and codes of practice is available at the National Occupational Health and Safety Commission (NOHSC) website at www.nohsc.gov.au

The glossary is intended to be an evolving and dynamic document and those wishing to comment on the terms or suggest additions or modifications should email the Team Leader of the OHS Skills Development Team at NOHSC.

NOHSC term	**Definition/Explanation**
Accident	A term that is now considered out of date. Preferred term is *incident.*
Accountability	The process by which a person with OHS responsibilities is answerable to a higher authority.
Action level	The level at which a risk is considered to be unacceptable and action is required to reduce the level of risk. May be specific such as a

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	noise level at which hearing protection must be worn, a concentration of chemical or more generic.
Action plans	Documented plans developed within the workplace to implement OHS management, which include allocated responsibilities and time frames.
Administrative controls	Management practices that aim to control employees' exposure to specific hazards, and generally improve health and safety – examples include the use of job rotation, job enlargement
ALARA (As Low As Reasonably Achievable)	A basic concept where risks are kept as low as is reasonably achievable. ALARA is determined by reference to established codes and standards and consultation with groups impacted by the decision outcomes including those exposed to the risk.
Anthropometry	The science dealing with the comparative measurement of the size and proportions of the human body, the range of movement of limbs, as used in ergonomics.
Audit	A systematic examination against an agreed benchmark of the approach to managing safety to evaluate an organisation's arrangements for identifying hazards, assessing and controlling risks, and monitoring and improving the effectiveness of the management of OHS and compliance. (Note a workplace inspection is NOT an audit.)
Audit tools	The instruments for collecting evidence and conducting the analysis and evaluation (they are not the same as the audit criteria or benchmark), they may be: • developed specifically for the purpose • adapted from existing tools • purchased or accessed from existing tools. They include: • performance checklists • sets of questions to be asked • descriptions of required characteristics to be checked • limitations and instructions for use.
Authorisation of permit	Signing of permit by competent person.
Biomechanics	The application of mechanics (forces and motion) to analyse body movement and the stresses involved in body posture during movement.

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
Causative event	Key event that resulted in the particular outcome(s) of injury or damage.
Circumstance	Short-term situation that is relatively unusual, such as a storm or when a key person is absent.
Certification	Refer *operator certification.*
Common law	Law that is derived from the English legal system and has evolved through judicial decision and practice (case law) that establishes and follows precedent. Note difference to 'statute law'.
Condition	Permanent situation such as type of equipment, work practice, design of work environment (often different to detect or identify) that may contribute to risk.
Consequence	The injury or damage outcome of an event, which may be expressed quantitatively or qualitatively, there may be a range of possible outcomes for a specific event or scenario.
Confined space	An enclosed or partially enclosed space which: • is at atmospheric pressure during occupancy • is not intended or designed primarily as a place of work, and is liable at any time to: • have an atmosphere which contains potentially harmful levels of contaminant • not have a safe oxygen level or • cause engulfment • may have restricted means for entry and exit. A confined space is determined in part by the hazards associated with a defined set of circumstances (restricted entry or hazardous atmosphere, risk of engulfment) and not just with work performed in a restricted space. Examples include but may not be limited to: • storage tanks, tank cars, process vessels, boilers, pressure vessels, silos and other tank-like compartments • open-topped spaces such as pits or degreasers • pipes, sewers, shafts, ducts and similar structures • shipboard spaces entered through a small hatchway or access point, cargo tanks, cellular double bottom tanks, duct keels, ballast and oil tanks and void spaces (but not including dry cargo holds). A person is deemed to have entered a confined space when their head (i.e. the breathing zone) or upper part of the body is within the

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	boundary of the confined space. (Note that inserting an arm for atmospheric testing is not considered an entry to a confined space). References: • AS/NZS 2865:2001 *Safe working in a confined space* • Handbook – *HB 213:2003 Guidelines for safe working in a confined spa*ce
Consultative arrangements	State and Territory OHS legislation specifies obligations for workplace consultation. The workplace arrangements to meet these obligations may include: • OHS and other consultative and planning committees • health and safety and other employee representatives • employee and supervisor involvement in OHS activities such as inspections and audits • procedures for reporting hazards, and raising and addressing OHS issues • employee and workgroup meetings. When developing consultative arrangements, consider: • language • shift work and rostering arrangements • timing of information and data provision • literacy and numeracy levels • workers with special needs • workplace organisational structures (for example, size of organisation, geographic, hierarchical) • cultural diversity • management approach • workplace culture and approach to OHS by managers, supervisors and employees.
Controls **See also Hierarchy of control**	The devices and methods of controlling the effect of the hazard so that the risk of injury is minimised. The 'quality' of the control is the level and reliability of the control compared with the level of risk. The quality of the controls is determined by the best available technology or approach which: • should be applied when the most probable outcome is death or serious injury • may be applied where the most probable outcome is less serious. Refer also *Hierarchy of control*. Workplace factors that impact on the controls selected and the implementation include*:*

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• language • shift work and rostering arrangements • literacy and numeracy • workplace organisational structures (e.g. geographic, hierarchical) • cultural diversity • training required • workplace culture related to OHS, including commitment by managers and supervisors and compliance with procedures and training.
Control measures	Devices, systems (including work methods) or approaches that reduce exposure to workplace hazards.
Crisis management plan	A flexible document that can cope with a broad range of crisis types and: • is approved at the highest levels of the organisation • focuses on management control • identifies responsibilities for decision making • details communication processes and psychological support • addresses arrangements with any contractors or shared tenancy • integrates the emergency response plans as well as recovery • incorporates dealing with external agencies and support • addresses planning for recovery before crisis occurs. Documentation for crisis management plan may include: • policy, emergency response structure, initial response instructions for various roles/areas, responsibility and authority of individual roles, warning systems, training requirements, resource inventory for response and recovery, program review and monitoring processes • crisis risk management documentation, such as risk management team lists, communications strategies, identification of issues, risk assessments/evaluations, vulnerability profiles, risk registers and treatment strategies. The term *emergency management* may also apply but *crisis management* infers a more holistic approach encompassing the full range of business affairs.
Dangerous Goods (DG)	Those gases, liquids and solids identified and classified under the internationally agreed system which is followed in Australia and that are subject of so called ‘dangerous goods’ standards and legislation. The objective of the Dangerous Goods legislation is to control the

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	storage, handling and transport of DGs to protect the safety of workers, the public, property and the environment. While dangerous goods may also be hazardous the terms should not be confused.
Dangerous parts of plant	Potential contact or entrapment points to which the operator may be exposed during: • operation • examination • lubrication • adjustment • maintenance.
Design	The process of bringing together innovation, aesthetics, and functionality to plan and create a product, process or system to meet the artistic, industrial or performance requirement of an individual or group. The design process involves a series of activities where an idea is conceived, shaped, developed, produced and then acted upon to produce a designed-product. It also includes any subsequent alteration (redesign or retrofit).
Design process	There are two stages of the design process: The concept design phase considers preliminary design options, which are assessed against product specifications to determine the best preliminary design to be developed. This phase includes concept design, research and development, feasibility and risk management (including OHS risks). The detailed design phase develops the selected design to its final state. It includes research and development, feasibility studies, concept and detail design, technical and functional specifications, plans and drawings, operational systems, construct/manufacture options and detailed quantities, cost and risk analysis (including analysis of OHS risks).
Designed product	The item to be designed, including a built environment, structure, an item of plant or equipment, chemical, work system or process or any other physical attribute or system associated with either the work or its interface with people.
Duty of care	Arises from common law but is enshrined in OHS statute law and/that places into a legal form a moral duty to anticipate possible causes of injury and illness and to do everything reasonably practicable to remove or minimise these possible causes of harm. The key factors relating to duty of care are that: • duty of care applies wherever there is special relationship

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	(employer – employee, employer – contractor, supervisor – work team member, tradesperson – apprentice) • duty of care applies to all circumstances of the relationship • individual duty of care cannot be delegated (but roles and functions may be delegated) • applies personally to individuals • applies to all risks that are foreseeable and preventable • includes the concept of *reasonable*.
Elements of systematic approaches to managing OHS including OHSMSs	A list of key requirements or major principles that are combined in a methodical and ordered manner to minimise the risk of injury or ill health in the workplace; and may include processes of OHS planning, allocation of resources, communication and consultation, hazard management, record keeping and reporting, training and competency, and review and evaluation for ongoing improvement of OHS.
Emergency	Events such as: • serious injury events • emergencies requiring evacuation • fires and explosions • hazardous substance and chemical spills • explosion and bomb alerts • security emergencies — armed robberies, intruders • internal emergencies, such as loss of power or water supply and structural collapse • external emergencies and natural disasters, such as flood, storm and traffic accident impacting on the organisation. May also be referred to as a *hazardous event*.
Emergency agency	Includes fire, police, ambulance, relevant government departments, hazardous materials response teams (HAZMAT) and OHS authorities.
Emergency control organisation (ECO)	Structured group within the organisation that includes roles such as emergency controller, communications recorder, media liaison and employee support.
Emergency equipment	Includes: • First Aid equipment • eye wash shower or portable eye washes • fire extinguishers and equipment • communication equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• evacuation alarms • evacuation equipment, especially that for disabled persons • torches • clothing items such as coloured hats and vests.
Emergency stops and warning devices	Are fitted to plant and equipment that have a risk of entrapment or other hazard and must be: prominently, clearly and durably marked coloured red (push buttons, bars or handles) unable to be affected by electrical or electronic circuit malfunction fitted where risk assessment identifies a need.
Enforcement	Processes and instruments available to the OHS regulator under legislation may include*:* • prosecution • prohibition notices • improvement notices • on-the-spot fines • provisional improvement notices.
Epidemiology	The study of the distribution and determinants of disease within human populations. Patterns of injury or illness in groups of people are studied to determine causes, identify groups at risk and to identify and evaluate methods of treatment and prevention.
Ergonomics	The study of the relationship between people, the equipment they use and their physical and social work environment.
Ergonomic interventions	Includes: • design of tools • design of workplaces • design of products • design of equipment • design of work systems, processes or organisation including work flow, planning and control • job design • development of new decision making processes • new forms and organisations of work.
Ergonomic tools and databases	May include: • engineering models • Australian and International Standards

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• Australian and International anthropometric databases
Explosive substance	Substance that explodes if it comes into contact with heat, flame, an ignition source or incompatible substance.
Fail-to-safe	Design feature of equipment that ensures if there is a failure or defect in the product, or another factor such as loss of power, then the product is left in a safe condition.
Functional areas and management systems	Other than OHS but that impact on the management of OHS may include: • strategic planning • purchasing, procurement and contracting • logistics • HR, IR and personnel management, including payroll • engineering and maintenance • information, data and records management • finance and auditing • environmental management • quality management.
Guarding	Devices fitted to machinery to separate the operator from dangerous parts of the machine. Devices may include: • permanently fixed physical barriers where no access of any part of a person is required • interlocking physical barriers where access to dangerous areas is required during operation • physical barriers securely fixed by means of fasteners or devices • presence-sensing safeguarding systems.
Hazard	A source or a situation with a potential for harm in terms of human injury or ill health, damage to property, damage to the environment, or a combination of these.
Hazards of long latency	Conditions, illnesses and other health risks that result from longer term exposure to specific triggers such as chemicals, noise, radiation and psychosocial factors.
Hazards of low frequency/high consequence	High impact events that occur rarely such as explosions, fires and building collapses but may result in very serious injury, death or multiple death situations.
Hazard identification	The process of identifying sources of harm. Hazard identification may be required: • at design or pre purchase of buildings, equipment and materials

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• at commissioning or pre-implementation of new processes or practices • before new forms of work and organisation of work are implemented • before changes are made to workplace, equipment, work processes or work arrangements • as part of planning major tasks or activities, such as equipment shutdowns • following an incident report • when new knowledge becomes available • at regular intervals during normal operations • prior to disposal of equipment, buildings or materials. Different methods may be used to identify hazards including observation; consultation with workers, clients or other users; trial of models or prototypes; review of technical standards and other information sources; monitoring and measurement.
Hazard identification tools and processes	Include: • analysis of incident investigations • analysis of incident, injury and claims statistics • workplace inspections • job safety analysis (JSA) • audits • cause and effect diagrams • surveys • review of research and industry literature.
Hazardous event(s)	Includes incidents with the potential to seriously harm life, health, property, the environment or a combination. May also be referred to as *emergencies*.
Hazardous substance	A substance that is listed on the National Commission's List of Designated Hazardous Substances (NOHSC:10005) or has been classified as a hazardous substance by the manufacturer or importer in accordance with the National Commission's Approved Criteria for Classifying Hazardous Substances (NOHSC:1008).
Hazardous substance register	Listing of all the hazardous substances that are used or produced in a workplace together with a current Material Safety Data Sheet for each substance. May also contain risk assessments for individual hazardous substances.
HAZCHEM	An initial response emergency action code that provides information vital to emergency services to enable them to stabilise the incident

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	scene during the early stages of a HAZMAT incident. The Code is displayed on emergency information panels on transport vehicles and on signs on buildings. HAZCHEM codes are assigned to chemicals on the basis of their flammability, toxicity, reactivity and other relevant chemical and physical properties.
HAZMAT	A contraction of the words *hazardous materials* and may be used in a range of circumstances including HAZMAT emergency response units, HAZMAT emergency response equipment and HAZMAT registers of hazardous substances.
HAZOP (Hazard and Operability Study)	An advanced risk analysis technique that involves a systematic review of a process to determine risks and risk minimisation strategies.
Health and safety representative	An employee, elected by the workgroup, who represents the OHS interests of the people with whom they work. The function is carried out in addition to the normal work role. Processes for election of health and safety representatives, their role and rights are specified in State and Territory legislation.
Health promotion	The promotion of health, especially as a workplace program, designed to improve and enhance employee health undertaken as a complementary activity to the prevention of work-related injury and disease. Also called *wellness*.
Health surveillance	Monitoring or checking individuals for the purpose of identifying changes due to exposure to hazards in the workplace. May include biological monitoring.
Hierarchy of control	The priority order in which hazard and risk controls should be considered with the eventual outcome often being a combination of measures. The prime emphasis is on: • elimination, and where this is not practicable, minimisation of risk by: • substitution • isolating the hazard from personnel • engineering controls • administrative controls, eg procedures, training • personal protective equipment (PPE).
Hot work	Involves using equipment that generates heat, sparks, flames or any other sources of ignition in an atmosphere that may be flammable. Includes work with welders, cutters including oxygen cutters, power

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	tools, grinding, mobile phones. Hot work can also include breaking into 'live' equipment or performing work on live equipment that has the potential to release its contents (eg hot tap in chemical plants).
Housekeeping	Describes workplace and personal routines designed to improve hygiene and safety, for example, cleaning up spills and keeping walkways, exits and traffic areas clear.
Incident	An event that has caused or has the potential for injury, ill health or damage. (*Incident* is the preferred term rather than *accident*)
(Sources of OHS) Information	May be **internal** and include: • hazard, incident and investigation reports • workplace inspections • incident investigations • minutes of meetings • Job Safety Analyses (JSA's) and risk assessments • organisational data such as insurance records, enforcement notices and actions, workers compensation data, OHS performance data • reports and audits • material safety data sheets (MSDSs) and registers • employees handbooks • employees including questionnaire results • OHS advisors • manufacturers' manuals and specifications.
(Sources of OHS) Information	May be **external**, including: • regulatory bodies and OHS Acts regulations, codes and guidance material • other relevant legislation • National Occupational Health and Safety Commission (NOHSC) and Australian Bureau of Statistics • databases such as national and state injury data and NICNAS (National Industrial Chemicals Notification and Assessment Scheme) • OHS specialists and consultants • newspapers and journals, trade/industry publications • Internet sites • industry networks and associations including unions and employer groups • OHS professional bodies

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• research information.
Isolation	A safety device system that includes devices such as isolating switches, locks, safety bars, shields, full pressure blanks, spectacle blanks to lock controls, especially moving parts, equipment, systems or devices with stored energy, to an 'off' position while a worker is in a vulnerable position such as carrying out maintenance on rotating equipment, and electrical and hydraulic systems. Isolation systems generally use locking switches that need keys to open the lock and are used in conjunction with a danger tag system that promotes greater safety consciousness amongst the workforce for all situations in which danger to persons could arise from: • the operation of machinery, plant or equipment • the flow of steam, electricity, gases or liquids • the use of faulty or unsafe plant and equipment • include multiple locking systems and involve written authorisation by a competent person. Also called *lock-out* and *tag-out*.
Job Safety Analysis (JSA)	Process of examining all aspects of a task to identify hazards and conditions with a potential for injury or ill health with the objective of developing risk controls including written job instructions.
Legislation relevant to OHS	Includes Commonwealth and relevant State/Territory OHS specific acts and regulations as well as: • workers compensation • privacy legislation • contract law • trade practices • criminal law • common law • industrial relations law • equal employment opportunity and anti-discrimination law.
Life cycle	All phases in the life of a product. Specific phases depend on the type of product but may include design, development, manufacture, construction, assembly, import, supply, distribution, sale, hire, lease, storage, transport, installation, erection, commissioning, use or operation, consumption, maintenance, servicing, cleaning, adjustment, inspection, repair, modification, refurbishment, renovation, recycling, resale, decommissioning, dismantling, demolition, discontinuance, disposal.
Likelihood	The likelihood of the occurrence of the consequence, not the

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	likelihood of the hazard or the particular scenario.
Locked out	Equipment, which is not to be operated for any reason, may be padlocked, or otherwise prevented from operation using a keyed lock. A lockout may be accompanied by a tag out, or a lock out system may incorporate a tag. Lockout means the isolation by a mechanical device, generally a lock, which, when applied at the source, physically prevents the control to any electrical or mechanical equipment being turned on. Refer also to *Isolation*.
Manual handling	The use of force applied by a person to lift, move, carry, push, pull or otherwise move or restrain an animate or inanimate object.
Material Safety Data Sheet (MSDS)	Document describing the properties and hazards of a material or substance including statements about its chemical and physical properties, health hazards, precautions for use and safe handling instructions. All manufacturers and suppliers of chemicals are obliged to produce an MSDS for each hazardous chemical.
Monitoring	Involves the use of valid and suitable techniques to estimate the exposure of employees to a hazard.
Musculoskeletal disorder (MSD)	An injury, illness or disease that arises in whole or part from manual handling in the workplace, whether occurring suddenly or over a prolonged period of time. (Does not include injuries caused by crushing, entrapment or cut resulting primarily from the mechanical operation of plant.
Occupational Overuse Syndrome (OOS)	Previously called RSI and refers to arrange of conditions characterised by persistent discomfort and pain in and around joints and associated with repeated movement of the joint. Recent State and Territory legislation tends to group these conditions with those arising from manual handling as Musculoskeletal Disorders.
OHS inspection	The process of physically examining and evaluating the extent to which hazards and risks exist, and/or particular OHS requirements, procedures or standards are being met. Refer also to *workplace inspection*.
OHS specialists	Include: • safety professionals • ergonomists • occupational hygienists • safety engineers

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• injury management advisors • health professionals.
Operator certification	The process by which a certificate to use or operate industrial equipment is issued by a certifying authority.
OHS management system (OHSMS)	That part of the organisation's overall management system that covers developing, implementing, reviewing and maintaining the activities for managing OHS. It is NOT a standard, a commercial package or folders on the shelf; however it may involve use of OHS management systems developed in the workplace to meet the OHS situation in that particular workplace. Also referred to in broader context as systematic approaches to managing OHS.
Operational controls for plant and equipment	Should: • be suitability identified • have nature and function clearly indicated • be readily and conveniently located • be guarded to prevent unintentional activation • be capable of locking in 'off' position to enable disconnection of all motive power and forces • be of 'fail safe' type.
Participative arrangements	Are those arrangements that inform employees and other stakeholders of OHS matters, seek their input and offer opportunity for stakeholders to participate in decisions that may impact on their OHS. May also be referred to as *consultative arrangements*, however *participation* implies a higher level of involvement.
Permit to work	A written authority document such as hot work and confined space entry that: • includes approval to undertake work and activities including tests, measurements and monitoring • is authorised by a responsible or designated person directly in control of the work • certifies appropriate precautions and controls to be followed • incorporates checklists, conditions and actions such as the frequency and duration of the work and atmospheric tests • follows recognised industry standard recording practices.
Plant	As defined in National Standard for Plant includes: • machinery, equipment (including scaffolding), appliance, implement or tool and any other component, fitting or accessory

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• fixed and or specified plant as cited in commonwealth, state and territory OHS legislation • mobile plant and load shifting equipment • pressure equipment such as boilers, pressure vessels and pressure piping • electrical installation and plant such as wiring, accessories, fittings, consuming devices, control and protective gear, converters and generators.
Plant Registration	The administrative process by which a certifying authority or state OHS regulator requires an organisation or industry to register plant, machinery and equipment.
Personal protective equipment (PPE)	Equipment designed to be worn to provide protection from hazards, and may include: • head protection • face and eye protection • respiratory protection • hearing protection • hand protection • clothing and footwear. PPE is considered the least satisfactory control measure.
Policies and procedures	Relevant to OHS include: • policies and procedures underpinning OHS including those for hazard and incident reporting, OHS communication, consultation, issue resolution and risk management • quality system documentation • purchasing and contracting procedures • documents describing how tasks, projects, inspections, jobs and processes are to be undertaken • standard operating procedures, work instructions • job or batch sheets, recipes • operators manuals • employee and contractor handbooks • job/task statements.
Positive performance indicators	Focus on assessing how successfully a workplace is performing through measuring OHS processes.
(OHS) Records	Requirements for OHS record keeping may be defined in: • OHS legislation and regulations governing reporting of incidents and maintenance of records related to specific hazards, including

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	chemical registers and material safety data sheets (MSDSs) • privacy legislation • organisational procedures • OHS records may include: • hazard and incident reports, First Aid records • risk assessments • hazardous substances and dangerous good registers, MSDSs • risk registers • OHS audit and inspection reports • maintenance and testing records • OHS training records • outcomes of health surveillance and environmental monitoring • workers compensation claims and return to work records. OHS records must be stored taking account of: • privacy • confidentiality • enabling access to personal records, within legislative requirements • commercial in confidence issues as appropriate.
(OHS) Reporting requirements	Under legislation include serious injury and serious incident reporting to OHS authorities.
(OHS) Responsibilities	Those with legislated OHS responsibilities include: • company director • manager • supervisors • OHS representatives • employees and contractors • designers, manufacturers, installers, suppliers.
Residual risk	That risk that is unable to be designed out of a product or process.
Risk	The chance of something occurring that will result in injury or damage. It is measured in terms of consequences (injury or damage) and likelihood of the consequence. Refer also to *Consequence* and *Likelihood*.
Risk analysis	Analysing the risk to: • identify factors influencing the risk and the range of potential consequences • effectiveness of existing controls

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• likelihood of each consequence considering exposure and hazard level • combining these in some way to obtain a level of risk. Factors influencing the risk may be associated with: • equipment • work environment/organisation • task • the individual/operator • frequency and duration of exposure • number of people exposed/involved.
Risk assessment	Risk assessment is a two-step process that involves risk analysis and risk evaluation. Risk assessment as required under various OHS legislation does not necessarily require this second step of evaluation. Refer also to *Risk Analysis* and *Risk evaluation*.
Risk evaluation	Comparison of risk with pre-established criteria for tolerance (or as low as reasonably achievable) and the subsequent ranking of risks requiring control. This activity will usually be carried out by or in conjunction with others with advanced OHS skills and knowledge.
Risk management	The whole systematic process directed towards identifying hazards, assessing the risk and developing controls to minimise the risk and monitoring the effectiveness of the controls (and taking further action as required).
Risk ranking	A process of rating risks according to their severity and likelihood. Common systems are based on matrices or nomograms but are usually highly subjective.
Risk register	Includes: • a list of hazards, their location and people exposed • a range of possible scenarios or circumstances under which these hazards may cause injury or damage • the results of the risk assessment, and may also include; • possible control measures and dates for implementation. May also be referred to as *Hazard Register.*
Safe Design	A design process that generates options to eliminate hazards, or minimise potential risk to health and safety of those who make the product and those that use it by involving decision makers and considering OHS risks throughout the life cycle of the designed

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	product.
Stakeholders	In workplace OHS include: • managers • supervisors • health and safety and other employee representatives • OHS committees • employees and contractors • the community.
Standards	Relevant to OHS include: • OHS regulations and standards developed by OHS regulators • national standards (NOHSC) • Australian standards • International national standards • industry standards • codes of practice • exposure standards • guidance notes.
Statute Law	Law created by legislation passed by government (acts and regulations) as distinct from common law.
(OHS) plan	A document that: • is usually developed annually but may be developed for a shorter or longer period • is reviewed regularly • has OHS performance indicators (ie objectives and targets that are achievable and practical) reflecting systematic approaches to managing OHS.
System of work	The overall process of work including: • method by which the work is carried out • organisation of the work • selection and maintenance of tools and equipment • supervision and training • selection of workers • allocation of tasks and responsibilities.
Systemic approach to managing OHS	Requires: • comprehensive processes that are combined in a methodical and ordered manner to minimise the risk of injury or ill health in the workplace

© Commonwealth of Australia, 2025 Powering Skills Organisation

NOHSC term	Definition/Explanation
	• processes of planning, allocation of resources, communication and consultation, hazard management, record keeping and reporting, training and competency, and review and evaluation for ongoing improvement. Factors that may impact on the implementation of a systematic approach to managing OHS may include: • barriers to communication, such as language/literacy • workplace culture issues, such as management commitment, supervisors' approach to compliance and general acceptance of the priority of safety • diversity of workers • structural factors, such as multiple locations, shift work and supervisory arrangements.
Tag out	Refer to *Isolation*.
Technical advisors	To the OHS function may include: • legal practitioners • engineers (such as design, acoustic, mechanical, civil) • security and emergency response personnel • workplace trainers and assessors • maintenance and trade persons.
Wellness	Refer to *Health promotion*.
Workplace policies	Comprise written statements of employer's intentions and how the employers will action those intentions in the workplace. For example: OHS, access and equity, discrimination and manual handling.
Workplace inspection	Process of examining the workplace, usually with the aid of a checklist, to identify hazards and level of compliance with workplace procedures.

2.1 Competency Standard Units

Volume 2 Part 2

2.1 Competency Standard Units

Accessing the Competency Standard Units from this Industry Training Package

This section of the National Gas Industry Training Package outlines the industry Competency Standard Units. The Competency Standard Units have been arranged into discipline categories for ease of presentation and to facilitate quick access and referencing for users.

They are presented in the following order:

PART NUMBER	UNIT DISCIPLINE	SERIES
2.1.0	Independent Units	000
2.1.1	Cross Discipline Common Units	100
2.1.2	Distribution Discipline	200
2.1.3	Transmission Discipline	300
2.1.4	Cathodic Protection Discipline	400
2.1.5	Control Centre Discipline	500
2.1.6	Liquefied Petroleum Gas (LPG) Discipline	600
2.1.7	Support Services Discipline	700
2.1.8	Pressure Control Discipline	800
2.1.9	Imported Units	N/A

Competency Standard Components

All of the Competency Standard Units found in this National Gas Industry Training Package have been developed in accordance with DEST requirements with minor enhancements. All Parts in Volume 2 of this Training Package form an integrated component of each Competency Standard Unit and must be included when developing learning strategies and assessment processes. Importantly, each Competency Standard Unit is interrelated and linked with the Definitions/Glossary and Essential Knowledge and Associated Skills sections of the Volume. No Competency Standard Unit is to be used in isolation or exported without these interrelated components.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Qualification Codes

Each Training Package qualification has a unique eight-character code, for example in this Training Package UEG30106. In qualification codes, the:

- first three characters are letters identify the Training Package
- fourth is a number reflecting the AQF level for the qualification
- fifth and sixth characters represent the number of the qualification for the given level. That is in the case of UEG30106, it is the first and only AQF level 3 qualification on offer in the Training Package
- seventh and eight numbers identify the year in which the qualification was endorsed. Any subsequent amendments to the qualification result in this number changing to reflect the new year of endorsement.

Competency Standard Unit Codes

Each competency standard unit has a unique code. A typical code is made up of a maximum of 12 characters; normally a mixture of upper-case letters and numbers. For example in this Training Package the following approach has been adopted:

<table>
<tr><td colspan="10">Unit Number</td></tr>
<tr><td>U</td><td>E</td><td>G</td><td>N</td><td>S</td><td>G</td><td></td><td></td><td></td><td>A</td></tr>
<tr><td colspan="6">Industry — E-Oz Energy Skills Australia identifier</td><td colspan="2">Training Package identifier</td><td colspan="2">Industry Streams: Numbers 000 to 999</td></tr>
<tr><td colspan="10">12 Characters Maximum</td></tr>
</table>

Where an amendment is made to a Competency Standard Unit the following applies:

- where changes do not affect the outcome of the unit the last character alpha identifier is incremented to indicate the new version. For example, UEGNSG100**A** is changed to UEGNSG100**B**

Where changes alter the outcome, a new unit title and code is assigned.

2.3.1 Language, Literacy and Numeracy

Volume 2 Part 3

3.1 Language, Literacy and Numeracy

The reading, writing and numeracy skills/competencies in each competency standard unit describe the recommended prerequisite entry requirements typically needed to successfully achieve the competency. A nationally-recognised language, literacy and numeracy framework has been used to provide advice as to the relevant entry level required.

© Commonwealth of Australia, 2025 Powering Skills Organisation

The information has been derived from the National Reporting System report, *A mechanism for reporting outcomes of adult English language, literacy and numeracy programs*, The Australian National Training Authority (ANTA) and the Department of Employment Education and Training (DEET), 1994-5, jointly funded the report. Australian Training Products Ltd (ATP) distributes it for and on behalf of Language Australia Victorian Office. Stock code 3010A, ISBN: 0 7306 7493 2, April 1999.

The report:

- identifies adult English language, literacy and numeracy competencies required in the industry
- facilitates student pathways
- generates ideas for curriculum and assessment.

The report identifies a national framework of five vertical levels of competence related to complexity of language, literacy and numeracy competence. Six interrelated horizontal aspects of communication were found to apply in relation to differing orientations of social activity involving reading, writing, speaking, listening and/or numeracy. These were categorised as:

- procedural communication for performing tasks
- technical communication for using technology
- personal communication for expressing identity
- cooperative communication for interacting in groups
- systems communication for interacting in organizations
- public communication for interacting in the wider community.

The National Reporting System report should be referred to at all times for clarification, more detailed information and advice.

For the purposes of this Training Package writing, reading and numeracy competencies, have been selected from the five-level competence structure (using the Technical Communication aspect of the national framework), as a means of providing relevant entry-level advice. Registered Training Organisations should use this information to assist them in developing appropriate entry-level learning strategies and to assist learners to meet the entry-level requirements of respective competency standard units.

Table 6 — Reading, Writing and Numeracy: Indicators of Competence

Note: It is important to note that the five levels of competence, interrelated with six aspects of communication of the National Reporting System, is **not** an assessment system. It is not a curriculum. It is not a model of language acquisition. It is not a means for categorising students by a simple "level", nor is it a set of broad competency statements. It is not a recruitment instrument for employers. The NRS suggests that the "*report of a person's competence derives from the interplay between the chosen activity, the features of the text/task, and the context and level of support under which the activity is performed*".

Reading

Scale	IoC*	**Indicators of Competence**	**Technical Communication**

Scale	IoC*	**Indicators of Competence**	**Technical Communication**
5	5.1 5.2 5.3	Reads and interprets structurally intricate texts in chosen fields of knowledge and across a number of genres, which involve complex relationship between pieces of information and/or propositions. Interprets subtle nuances, infers purpose of author and makes judgements about the quality of an argument. Reads and critically evaluates texts containing data which includes some abstraction, symbolism, and technicality presented in graphic, diagrammatic, formatted or visual form.	Defines the purpose and objectives for the use of a particular technology, e.g. writes a report, which includes a detailed analysis of technology as, applied in a particular workplace or environment. Draws on prior knowledge of the application of technology in researching the capacity of a new system, e.g. writes a briefing and recommends purchase or use of a particular system. Uses technological principles to reduce constraints presented by environmental or physical capacity, e.g. writes a report, which compares the effectiveness and efficiency of manual and computerised record management systems. Prepares a written or oral report, which critically evaluates the content, structure, and purpose of technical texts including graphic, diagrammatic or numerical information. Adapts task instructions to suit changes in technology, e.g. writes plain English instructions for the operation of a new machine based on the manufacturer's instructions. Draws from a number of sources and uses computer skills to prepare a report, e.g. CV and job application letter.
4	4.1 4.2	Reads and interprets structurally intricate texts in chosen fields of knowledge which require integration of several pieces of information for generating meaning. Interprets texts, which include ambiguity, and inexplicitness where reader needs to distinguish fact from opinion and infer purpose. Interprets and extrapolates from texts containing data which includes some abstraction, symbolism, and technicality presented in graphic,	Compares and contrasts views on technology in newspaper articles. Interprets the purposes and objectives for the use of technology after the reading a brochure or manual. Selects technological practices to conform with the guidelines for health and safety, environmental impact and ethical practice, and uses them within those guidelines. Uses guidelines to ensure technological equipment is used to its full capacity. Uses a computer to prepare a typed report

		diagrammatic, formatted or visual form.	from a hand-drafted report. Compares and contrasts different technologies and their impact, e.g. argues the case for new practices when using new technologies, reports on the effects of installation of new machinery. Writes a report on the impact of a particular technology for a specific audience, e.g. management committees, tri-partite committees. Reads a complex diagram to identify components and procedures for dealing with a technical fault or breakdown.

Reading — continued

Scale	IoC*	Indicators of Competence	Technical Communication
3	3.1 3.2 3.3	Reads and interprets texts of some complexity, integrating (where relevant) a number of pieces of information in order to generate meaning. Displays awareness of purpose of text, including unstated meaning. Interprets and extrapolates from texts containing data which is unambiguously presented in graphic, diagrammatic, formatted or visual form.	Reads a technical manual where the information is supported by diagrams, sufficiently well to be able to locate and comprehend particular information required, e.g. programs a VCR to record two programs in advance. Uses the author, title, key word and other search indexes of a library computer. Comprehends short summary information on computer-managed learning packages to choose a relevant package to suit own needs. Uses the word processing program on a computer to produce texts. Writes simple instructions for using familiar technology, e.g. how to use an automatic teller machine. Completes a formatted workplace test, e.g. damage or breakdown report. Writes a brief report on uses of technology, e.g. for classroom, workplace, domestic or community purposes.

© Commonwealth of Australia, 2025 Powering Skills Organisation

2	2.1 2.2	Reads and interprets short simple texts on a personally relevant topic. Locates specific information relating to familiar contexts in a test which may contain data in simple graphic, diagrammatic, formatted or visual form.	Reads short, relevant, explicit, clearly formatted texts related to technology, e.g. the author and title index of a library computer. Chooses a computer assisted learning package, having read short descriptions of one or two programs, to acquire a defined skill or area of knowledge. Writes a short description, e.g. describes a damaged part of a machine to facilitate repair. Extracts information from a list with language and numeracy components, e.g. price lists of components for computer systems. Records simple and routine information using the telephone, e.g. takes a phone message, on a form designed for this purpose. Interprets instructions, which combine pictorial and written information, e.g. directions on how to operate a piece of machinery safely.
1	1.1 1.2	Reads and identifies letter of the alphabet in the context of whole words, numbers, signs and symbols relating to personal details and immediate environment. Identifies specific information in a personally relevant text with familiar content, which may include personal details, location or calendar information in simple graphic, diagrammatic, formatted or visual form.	Recognisees very short, explicit, pictorial texts, e.g. understands logos related to worker safety before using a piece of machinery, reads letters on a keyboard. Reads graphic instructions accompanying a new piece of technology to learn new information or skills about a technology or medium, e.g. uses an automatic teller machine by following instructions given graphically on the screen. Types own name or single words into a computer-assisted learning program.

Note: IoC* — Indicators of Competency sub-level

Writing

Scale	IoC*	**Indicators of Competence**	**Technical Communication**
			on the effects of installation of new machinery. Writes a report on the impact of a particular technology for a specific audience, e.g. management committees, tri-partite committees. Reads a complex diagram to identify components and procedures for dealing with a technical fault or breakdown.

Note: IoC* — Indicators of Competency sub-level

Writing — continued

Scale	**IoC***	**Indicators of Competence**	**Technical Communication**
3	3.4 3.5	Communicates relationships between ideas through selecting and using grammatical structures and notations, which are appropriate to the purpose. Produces and sequences paragraphs according to purpose of text.	Reads a technical manual where the information is supported by diagrams, sufficiently well to be able to locate and comprehend particular information required, e.g. programs a VCR to record two programs in advance. Uses the author, title, key-word and other search indexes of a library computer. Comprehends short summary information on computer-managed learning packages to choose a relevant package to suit own needs. Uses the word processing program on a computer to produce texts. Writes simple instructions for using familiar technology, e.g. how to use an automatic teller machine. Completes a formatted workplace test, e.g. damage or breakdown report. Writes a brief report on uses of technology, e.g. for classroom, workplace, domestic or community purposes.
2	2.3 2.4	Writes about a familiar topic using simple sentence structure and joining ideas through conjunctive links where appropriate. Completes forms or writes notes	Reads short, relevant, explicit, clearly formatted texts related to technology, e.g. the author and title index of a library computer. Chooses a computer assisted learning package, having read short descriptions of one or two programs, to acquire a defined skill or area of

Scale	IoC*	Indicators of Competence	Technical Communication
		using factual or personal information relating to familiar contexts.	knowledge. Writes a short description, e.g. describes a damaged part of a machine to facilitate repair. Extracts information from a list with language and numeracy components, e.g. price lists of components for computer systems. Records simple and routine information using the telephone, e.g. takes a phone message, on a form designed for this purpose. Interprets instructions, which combine pictorial and written information, e.g. directions on how to operate a piece of machinery safely.
1	1.3 1.4 1.5	Copies letters of the alphabet, numbers, and dates in order to convey personal details such as name, address, telephone number. Writes basic personal details about self or others such as name, address, and signature. Writes one or two phrases/simple sentences conveying an idea, message or opinion drawing from a modelled text.	Recognisees very short, explicit, pictorial texts, e.g. understands logos related to worker safety before using a piece of machinery, reads letters on a keyboard. Reads graphic instructions accompanying a new piece of technology to learn new information or skills about a technology or medium, e.g. uses an automatic teller machine by following instructions given graphically on the screen. Types own name or single words into a computer-assisted learning program.

Note: IoC* — Indicators of Competency sub-level

Numeracy

Scale	IoC*	Indicators of Competence	Technical Communication
5	5.10 5.11 5.12	Interprets, selects and investigates appropriate mathematical information and relationships highly embedded in an activity, item or text. Selects and applies a wide range of mathematical strategies flexibly to generate solutions to problems across a	Calculates distance, length and location using the trigonometry and geometry of triangles in relevant situations, e.g. locates grid reference on a map for a boat travelling on an given bearing with time and speed specified; uses dimensions provided on a scaled plan of a roof to find the pitch or slope of the roof. Calculates quantities of materials to title the roof applying a 4% allowance for wastage. Plans and gathers information on a negotiated

Scale	IoC*	Indicators of Competence	Technical Communication
		broad range of contexts. Uses a wide range of oral and written informal and formal language and representation including symbols, diagrams and charts to communicate mathematically.	topic form a variety of sources including government, industry and media about relevant community or workplace issues. Organises information by grouping. Graphically represents and analyses information for a particular purpose. Presents, individually or in a team, a report expressing a viewpoint, which is substantiated by discussion of supporting statistical evidence. Interprets and applies metric quantities and numbers in scientific notation, e.g. calculates the amount of oil in litres spilled from a tanker if it covers a surface area of water of approximately 1200 hectares (1.2 x 107m2) to a thickness of 6 x 103mm. Uses financial formulae, e.g. simple and compound interest to calculate and contrast the interest incurred in borrowing money from financial institutions.
4	4.10 4.11 4.12 4.13	Selects and investigates appropriate mathematical information and relationships embedded in an activity, item or text. Selects and applies an expanding range of mathematical strategies flexibly to solve problems in a variety of contexts. Examines and questions the appropriateness, possible interpretations and implications of aspects of a mathematical activity. Uses a range of oral and written informal and formal language and representation including symbols, diagrams and charts to communicate mathematically.	Uses ratio and scale to interpret dimensions on a basic plan. Applies similarity and ratio to estimate and calculate lengths, e.g. finds height of a building, a tree. Compares quality and costs of using imported vs Australian tiles, discount vs brand name paints. Presents information in appropriate graphical format to show different interpretations and influences, e.g. analysis of government spending on education. Applies formulae and interprets results relevant to a familiar practical situation, measuring the dimensions needed and substituting them into the formula, adjusting units where necessary, e.g. length of edging for circular garden or pond, capacity of a water tank or bath. Uses area and perimeter to calculate a range of options, e.g. given a certain length of fencing, plan a range of options for paddock dimensions, which meet specific area requirements. Calculates and contrasts monthly income from average sales, given a variety of salary options

			involving retainers and commission rates.

Note: IoC* — Indicators of Competency sub-level

Numeracy — continued

Scale	IoC*	Indicators of Competence	Technical Communication
3	3.10 3.11 3.12 3.13	Selects appropriate mathematical information embedded in a real life activity, item or text. Selects and applies a range of mathematical strategies to solve problems in a number of contexts which are familiar and may be interrelated. Reflects on and questions reasonableness and appropriateness of the purpose, process and outcomes of a mathematical activity. Uses oral and written informal and formal language and representation including symbols and diagrams to communicate mathematically.	Uses a distance scale to find the shortest route between two locations on a map and considers road terrain conditions in deciding preferred route. Expresses and calculates with metric quantities, e.g. interprets and costs quantities of cheese given different forms such as 350g, 0.35kg. Measures common three-dimensional shapes, e.g. room, and represents the information on an appropriate diagram drawn to scale. Calculates with common, fractions and metric measurements, e.g. adjusts the quantities in a recipe by halving or doubling to obtain the required amount. Uses a variety of methods to analyse advertising by comparing savings on a number of different items, e.g. at 12% off, 15% off, 1/3 off, price reduced by $10. Compares casual and permanent rates of pay over a given time span for work of the same nature.
2	2.9 2.10 2.11 2.12	Locates relevant mathematical information in a familiar real life activity text. Selects and uses straightforward mathematical actions in a familiar and predictable contexts. Uses estimation and prior experience to examine purpose and check reasonableness of the process and outcomes of a mathematical activity.	Compares measurements taken with estimated lengths of familiar objects, e.g. estimates and measures storeroom dimensions.

UEG20114 Certificate II in Gas Supply Industry Operations

Modification History

Not applicable.

Description

Scope

This qualification provides competencies for entry level gas supply industry activities in transmission, distribution pipeline and cylinder operations and functions as outline below:

- Distribution pipeline activities include laying distribution infrastructure (including pipes), developing gas pipeline infrastructure and reading gas meters in industrial, commercial and rural environments, on pipelines, associated facilities and equipment; and control centres.
- Transmission pipeline activities include right of way preparation, rigging operations, hydrotesting, laying pipelines, operating transmission pipeline construction plant and equipment and conducting minor mechanical maintenance.
- Gas cylinder operations for domestic and industrial supply of gaseous fuels include checking, testing, maintaining and filling of gaseous fuel cylinders and the storage, handling, loading, transportation and distribution of cylinders in accordance with the relevant Australian Standards and regulatory requirements

This entry level qualification is at Australia Qualification Framework (AQF) level 2 and provides the required knowledge and skills for defined work activities to be carried out under close supervision

Completion requirements

The requirements for granting this qualification will be met when competency is demonstrated and achieved for:

- All the Core competency standard units to achieve a total weighting of 120 points, defined in the Core Competency Standard Units table below and
- A combination of Elective competency standard units to achieve a total weighting of 240 points in accordance with the Elective Competency Standard Units tables below, resulting in the achievement of overall weighting of 360 points.
- All the required pre-requisite competency standard units have been met as required.

Core Competency Standard Units All Core competency standard units to be achieved		**Weighting Points**
UEGNSG005A	Prepare to work in the gas industry	20
UEGNSG132A	Carry out basic work activities in a gas industry work environment	60
UEGNSG140A	Apply environmental policies and procedures in the utilities industry	20
UEGNSG141A	Apply Workplace Health and Safety regulations, codes and practices in the gas supply industry	20
Total points in core		**120**

Elective Competency Standard Units Complete Elective units to achieve a total of weighting of **240** points from the following groups:			
Group		**Minimum points**	**Maximum points**
A	Imported and Common Elective Units Imported units from other qualifications, training packages and/or state accredited courses can be added to this group, but they must be at AQF level 2. If units have not being assigned a weighting by the relevant E-Oz Industry Technical Advisory Committee, their weighting will be 10 points. Note: For further information see Application of the NQC Flexibility Formula, refer to UEG11 Gas Industry Training Package, Version 2,	**0**	**60**

	Training Package, Version 2, Qualification Framework	

Group B – Qualification AQF 2 Electives At least **180** points to be achieved from this group. You may select all your elective units from this Group.		**Weighting Points**
UEENEEE102A	Fabricate, assemble and dismantle utilities industry components	40
UEENEEE107A	Use drawings, diagrams, schedules, standards, codes and specifications	40
UEENEEM080A	Report on the integrity of explosion-protected equipment in a hazardous area	20
UEGNSG004A	Locate, prove and protect utility assets	60
UEGNSG006A	Use a portable gas detector to locate escape	40
UEGNSG134A	Establish a utilities infrastructure work site	60
UEGNSG136A	Carry out transmission pipeline construction work activities	60
UEGNSG219A	Conduct excavations in the utilities industry	60
UEGNSG221A	First on site response to gas pipeline emergencies	90
UEGNSG224A	Construct and lay copper and stainless steel gas distribution pipelines	60
UEGNSG226A	Assist with the construction, laying and connection of gas distribution services to mains	40
UEGNSG227A	Assist with the construction and laying of gas distribution mains	40
UEGNSG330A	Coat metallic pipelines	80
UEGNSG331A	Establish right of way access for transmission pipeline construction	60
UEGNSG332A	Undertake hydro-testing for transmission pipeline construction	60
UEGNSG333A	Work in proximity of transmission pipeline construction plant and equipment	40

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEGNSG342A	Maintain pipeline easements	40
UEGNSG615A	Fill LPG cylinders	80
UEGNSG616A	Refurbish gas cylinders	80
UEGNSG705A	Disconnect and reconnect small capacity gas meters	40
UEGNSG708A	Pressure Test Residential and Small Commercial Gas Installations	40
UEGNSG711A	Process meter reading information using appropriate technology	40
UEGNSG712A	Read and record meter readings	40
UEGNSG714A	Relight Type A gas appliances	60
UEGNSG804A	Maintain Single Stage and Single Run Gas Flow and Pressure Control and Measuring Devices	80
UEPOPS203B	Operate and monitor communications system	20
UEPOPS205B	Conduct minor mechanical maintenance	30
UETTDREL14A	Working safely near live electrical apparatus as a non-electrical worker	40

Note:

1. Prerequisite pathways shall be identified and met for all elective units selected.

2. In selecting elective units considerations to career planning advice should be given to units that form part of a prerequisite pathway for the progression to achieve particular competencies or qualification at a higher level.

UEG30114 Certificate III in Gas Supply Industry Operations

Modification History

Not applicable.

Description

Scope

This qualification provides competencies to conduct Gas Supply Industry activities including installation, maintenance, fault find and repair, operations of distribution and transmission gas pipelines, cylinders and associated equipment.

It is an Australia Qualification Framework (AQF) level 3 qualification and provides the required knowledge and skills to carry out work activities autonomously and takes responsibility for their own work

Pathways Information

Not applicable.

Licensing/Regulatory Information

Group D – Qualification AQF 4 Electives You may complete units to maximum weighting of **130** points		**Weighting Points**
UEGNSG207B	Coordinate construction, laying and testing of gas distribution pipelines	110
UEGNSG210B	Supervise and monitor contract staff for work on distribution pipelines	120
UEGNSG305B	Coordinate gas transmission pipeline repair and modifications	110
UEGNSG308B	Identify, evaluate and control threats to transmission pipelines	40
UEGNSG310B	Supervise and monitor contract work	60
UEGNSG311B	Site control of third party works in the vicinity of a transmission pipeline	80
UEGNSG314B	Liaise with third party and the community to maintain pipeline integrity and community safety	40
UEGNSG319B	Custody transfer metering and gas quality analysis	80
UEGNSG324A	Follow procedures to deal with incidents related to the abuse of drugs and alcohol	60
UEGNSG325A	Coordinate the operation of relevant plant and equipment for transmission pipeline construction	80
UEGNSG326A	Coordinate and monitor staff and contractors	60
UEGNSG327A	Coordinate transmission pipeline construction operations	60
UEGNSG511A	Operate gas infrastructure to meet nominated demand	120
UEGNSG512A	Control centre communication with gas industry stakeholders	110
UEGNSG514A	Monitoring and controlling field activities	110
UEGNSG515A	Use control centre systems to monitor and control gas infrastructure	110
UEGNSG611B	Control LPG storage/processing operations	110
UEGNSG612B	Supervise technical operations for liquefied petroleum gas storage and processing	120
UEGNSG806A	Maintain SCADA controlled gas flow and pressure & electronic gas measurement equipment	100

UEG40114 Certificate IV in Gas Supply Industry Operations

Modification History

This is a replacement qualification for UEG40311 Certificate IV in Gas Supply Industry Operations

Description

Scope

This qualification provides competencies to supervise and conduct Gas Supply Industry activities including installation, diagnostics and maintenance of distribution and transmission gas pipelines, cylinders and associated equipment.

It is an Australia Qualification Framework (AQF) level 4 qualification and provides the required knowledge and skills to carry out specialised and/or skilled routine and non-routine work activities autonomously and takes limited responsibility for the work of others.

Pathways Information

Not applicable.

Licensing/Regulatory Information

Not applicable.

Entry Requirements

Not applicable.

Employability Skills Summary

Not applicable.

Packaging Rules

The requirements for granting this qualification will be met when competency is demonstrated and achieved for:

- All the Core competency standard units to achieve a total weighting of 290 points, defined in the Core Competency Standard Units table below and

© Commonwealth of Australia, 2025 Powering Skills Organisation

- A combination of Elective competency standard units to achieve a total weighting of 990 points in accordance with the Elective Competency Standard Units tables below, resulting in the achievement of overall weighting of 1280 points.
- All the required pre-requisite competency standard units have been met as required.

Core Competency Standard Units All Core competency standard units to be achieved		**Weighting Points**
UEGNSG005A	Prepare to work in the gas industry	20
UEGNSG132A	Carry out basic work activities in a gas industry work environment	60
UEGNSG133A	Comply with environmental policies and procedures in the utilities industry	40
UEGNSG141A	Apply Workplace Health and Safety regulations, codes and practices in the gas supply industry	20
UEENEEE117A	Implement and monitor energy sector OHS policies and procedures	20
BSBMGT402A	Implement operational plan	40
BSBWOR402A	Promote team effectiveness	50
BSBWOR404B	Develop Work Priorities	40
	Total points in core	**290**

Elective Competency Standard Units

Complete Elective units to achieve a total of weighting of **990** points from the following groups:

Group		**Minimum points**	**Maximum points**
A	Imported and Common Elective Units Imported units from other qualifications, training packages and/or state accredited courses can be added to this group, but they must be at AQF level 4. If units have not being assigned a weighting by the relevant EE-Oz Industry Technical Advisory Committee, their weighting will be 10 points. Note: For further information see Application of the NQC Flexibility Formula,	**0**	**220**

© Commonwealth of Australia, 2025 Powering Skills Organisation

	refer to UEG11 Gas Industry Training Package, Version 2, Qualification Framework.		
B	Qualification AQF 2 Electives You may select some elective units from this Group	**0**	**180**
C	Qualification AQF 3 Electives You may select some elective units from this Group	**0**	**670**
D	Qualification AQF 4 Electives You may select all your elective units from this Group	**200**	**990**

Group A – Imported and Common Elective Units You may complete units to maximum weighting of **220** points		**Weighting Points**
BSBCUS401B	Coordinate implementation of customer service strategies	40
BSBFLM303C	Contribute to effective workplace relationships	40
BSBFLM305C	Support operational plan	40
BSBFLM306C	Provide workplace information and resourcing plans	40
BSBFLM309C	Support continuous improvement systems and processes	40
BSBFLM311C	Support a workplace learning environment	40
BSBFLM312B	Contribute to team effectiveness	40
BSBINM401A	Implement workplace information system	40
BSBINN301A	Promote innovation in a team environment	40
BSBLED401A	Develop teams and individuals	40
BSBMGT403A	Implement continuous improvement	40
BSBWHS301A	Maintain workplace safety	40
BSBWHS303A	Participate in WHS hazard identification, risk assessment and risk control	50
BSBWOR301B	Organise personal work priorities and development	40
BSBWOR401A	Establish effective workplace relationships	50

© Commonwealth of Australia, 2025 Powering Skills Organisation

CPCCLDG3001A	Licence to perform dogging	30
CPCCLRG3001A	Licence to perform rigging basic level	40
CPCCLRG3002A	Licence to perform rigging intermediate level	40
CPCCOHS1001A	Work safely in the construction industry	10
CPCPCM4012A	Estimate and cost work	40
CPPFES2005A	Demonstrate first attack firefighting equipment	15
HLTAID001	Provide cardiopulmonary resuscitation	10
HLTAID003	Provide first aid	10
HLTAID005	Provide first aid in remote situations	10
HLTHSE204D	Follow safe manual handling practices	20
MEM05004C	Perform routine oxy acetylene welding	20
MEM05012C	Perform routine manual metal arc welding	20
MEM05015D	Weld using manual metal arc welding process	40
MEM05045B	Perform pipe welds to code standards using manual metal arc welding process	60
MSAPMOHS110A	Follow emergency response procedures	20
MSAPMOHS205A	Control minor incidents	30
MSAPMOHS216A	Operate breathing apparatus	20
MSAPMOHS217A	Gas test atmospheres	30
MSAPMOPS400A	Optimise process/plant area	60

© Commonwealth of Australia, 2025 Powering Skills Organisation

MSAPMPER200C	Work in accordance with an issued permit	20
MSAPMPER201A	Control work permits	20
MSAPMPER202A	Monitor and control work permits	20
MSAPMPER300C	Issue work permits	20
MSAPMPER400A	Coordinate permit process	30
MSAPMSUP210A	Process and record information	30
MSAPMSUP240A	Undertake minor maintenance	30
MSAPMSUP303A	Identify equipment faults	40
MSS402061A	Use SCADA systems in operations	30
MSS402080A	Undertake root cause analysis	50
PMAOHS211B	Prepare equipment for emergency response	20
PMAOHS310B	Investigate incidents	30
PMAOHS311B	Lead emergency teams	20
PMAOMIR210B	Control evacuation to muster point	20
PMAOMIR346B	Assess and secure an incident site	30
PMAOMIR407B	Audit incident preparedness and established response systems	80
PMAOMIR418B	Coordinate incident response	40
PMAOMIR430B	Conduct and assess incident exercises	35

© Commonwealth of Australia, 2025 Powering Skills Organisation

PMAOMIR444B	Develop incident containment tactics	40
PMAOPS312B	Undertake ship loading/unloading operations	40
PMAOPS402A	Respond to abnormal process situations	50
PMAOPS405A	Operate complex control systems	80
PMAOPS410B	Monitor remote production facilities	40
PMASUP410B	Develop plant documentation	30
PMASUP444A	Plan plant preparation and isolation	50
PMBWELD301B	Butt weld polyethylene plastic pipelines	20
PMBWELD302B	Electrofusion weld polyethylene pipelines	20
PMC563081C	Carry out stock control	20
RIICCM205D	Carry out manual excavation	10
RIICCM206D	Support plant operations	10
RIICCM207D	Spread and compact materials manually	10
RIICCM208D	Carry out basic levelling	10
RIICCM210D	Install trench support	15
RIICRC208D	Lay pipes	40
RIIHAN309D	Conduct Telescopic Materials Handler Operations	80
RIIMPO304D	Conduct wheel loader operations	40
RIIMPO308D	Conduct tracked dozer operations	40
RIIMPO309D	Conduct wheeled dozer operations	40
RIIMPO318D	Conduct civil construction skid steer loader operations	70
RIIMPO319D	Conduct backhoe/loader operations	50
RIIMPO320D	Conduct civil construction excavator operations	80

© Commonwealth of Australia, 2025 Powering Skills Organisation

RIIWHS202D	Enter and work in confined spaces	30
RIIWHS204D	Work safely at heights	20
RIIWHS205D	Control traffic with stop-slow bat	10
RIIWHS302D	Implement traffic management plan	20
RIIRIS301D	Apply risk management processes	40
RIISAM201D	Handle resources and infrastructure materials and safely dispose of non-toxic materials	15
RIIWMG203D	Drain and dewater civil construction site	20
TLIB2004A	Carry out vehicle inspection	20
TLIC2002A	Drive light rigid vehicle	40
TLIC2025A	Operate four wheel drive vehicle	40
TLIC3003A	Drive medium rigid vehicle	40
TLIC3004A	Drive heavy rigid vehicle	40
TLIC3005A	Drive heavy combination vehicle	40
TLIC4006A	Drive multi-combination vehicle	40
TLIC4067A	Operate LP gas tanker	40
TLID2003A	Handle dangerous goods/hazardous substances	40
TLID2010A	Operate a forklift	40
TLID2016A	Load and unload explosives and dangerous goods	30
TLID3015A	Identify and label explosives and dangerous goods	20
TLID3023A	Use specialised liquid bulk gas transfer equipment	40
TLID3027A	Prepare for transport of dangerous goods	50
TLID3033A	Operate a vehicle-mounted loading crane	40
TLID3036A	Lift and move load using a mobile crane	40
TLIF2006A	Apply accident-emergency procedures	20

© Commonwealth of Australia, 2025 Powering Skills Organisation

TLIF2010A	Apply Fatigue Management Strategies	30
TLIF2012A	Apply safe procedures when handling/transporting dangerous goods or explosives	30
TLIF3063A	Administer the implementation of fatigue management strategies	50
TLIF3093A	Implement chain of responsibility regulations	30
TLIF3096A	Carry out emergency response to a dangerous goods incident	40
TLIF4007A	Implement and coordinate accident-emergency procedures	40
TLIF4065A	Ensure compliance with Australian Dangerous Goods Code	70
TLIF4066A	Implement and supervise transport regulations compliance systems	80
TLIF4094A	Ensure compliance with chain of responsibility	40
TLIL4059A	Implement asset management systems	40
TLILIC0012A	Licence to operate a vehicle loading crane (capacity 10 metre tonnes and above)	40
TLILIC2001A	Licence to operate a forklift truck	40
TLILIC2014B	Licence to drive a light rigid vehicle	40
TLILIC2015B	Licence to drive a medium rigid vehicle	40
TLILIC2016B	Licence to drive a heavy rigid vehicle	50
TLILIC3006A	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)	60
TLILIC3008A	Licence to operate a slewing mobile crane (up to 20 tonnes)	70
TLILIC3013A	Preparation to transport dangerous goods by road	50
TLILIC3017B	Licence to drive a heavy combination vehicle	60
TLILIC3018B	Licence to drive a multi combination vehicle	60
TLILIC4009A	Licence to operate a slewing mobile crane (up to 60 tonnes)	70
UEENEEC001	Maintain documentation	20

© Commonwealth of Australia, 2025 Powering Skills Organisation

B		
UEENEED101A	Use computer applications relevant to a workplace	20
	Imported units from other qualifications, training packages and/or state accredited courses can be added to this group, but they must be selected from qualifications where the unit is first packaged at AQF level 3. If units have not being assigned a weighting by the relevant EE-Oz Industry Technical Advisory Committee, their weighting will be 10 points. Note: For further information see Application of the NQC Flexibility Formula, Page 10, UEG11 Gas Industry Training Package, Version 1, Volume 1 Qualification Framework	**Up to 220 points**

Group B – Qualification AQF 2 Electives You may complete units to maximum weighting of **180** points		**Weighting Points**
UEENEEE102A	Fabricate, assemble and dismantle utilities industry components	40
UEENEEE107A	Use drawings, diagrams, schedules, standards, codes and specifications	40
UEENEEM080A	Report on the integrity of explosion-protected equipment in a hazardous area	20
UEGNSG004A	Locate, prove and protect utility assets	60
UEGNSG006A	Use a portable gas detector to locate escape	40
UEGNSG134A	Establish a utilities infrastructure work site	60
UEGNSG136A	Carry out transmission pipeline construction work activities	60
UEGNSG140A	Apply environmental policies and procedures in the utilities industry	20
UEGNSG219A	Conduct excavations in the utilities industry	60
UEGNSG221A	First on site response to gas pipeline emergencies	90
UEGNSG224A	Construct and lay copper and stainless steel gas distribution pipelines	60

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEGNSG226A	Assist with the construction, laying and connection of gas distribution services to mains	40
UEGNSG227A	Assist with the construction and laying of gas distribution mains	40
UEGNSG330A	Coat metallic pipelines	80
UEGNSG331A	Establish right of way access for transmission pipeline construction	60
UEGNSG332A	Undertake hydro-testing for transmission pipeline construction	60
UEGNSG333A	Work in proximity of transmission pipeline construction plant and equipment	40
UEGNSG342A	Maintain pipeline easements	40
UEGNSG615A	Fill LPG cylinders	80
UEGNSG616A	Refurbish gas cylinders	80
UEGNSG705A	Disconnect and reconnect small capacity gas meters	40
UEGNSG708A	Pressure Test Residential and Small Commercial Gas Installations	40
UEGNSG711A	Process meter reading information using appropriate technology	40
UEGNSG712A	Read and record meter readings	40
UEGNSG714A	Relight Type A gas appliances	60
UEGNSG804A	Maintain single stage and single run gas flow and pressure control and measuring devices	80
UEPOPS203B	Operate and Monitor Communications System	20
UEPOPS205B	Conduct Minor Mechanical Maintenance	30
UETTDREL14A	Working safely near live electrical apparatus as a non-electrical worker (moved from Group A)	40

Group C – Qualification AQF 3 Electives You may complete units to maximum weighting of **670** points	**Weighting Points**

© Commonwealth of Australia, 2025 Powering Skills Organisation

Group C – Qualification AQF 3 Electives You may complete units to maximum weighting of **670** points		**Weighting Points**
UEENEEM020A	Attend to breakdowns in hazardous areas — gas atmospheres	20
UEENEEM076A	Use and maintain the integrity of a portable gas detection device	20
UEGNSG135A	Monitor and control gas odourisation	100
UEGNSG137A	Operate and maintain gas station water bath heaters	60
UEGNSG138A	Install and commission stationary gas fuelled turbine engines	60
UEGNSG139A	Repair and maintain stationary gas fuelled turbine engines	60
UEGNSG142A	Conduct isolations under the permit to work system for gas industry work sites	80
UEGNSG212B	Construct, lay and connect a gas distribution service to a plastic main	60
UEGNSG213B	Construct, lay and connect a gas distribution service to a steel main	60
UEGNSG216A	Commission or decommission gas distribution pipelines	100
UEGNSG217A	Launch and recover PIGs in a gas distribution pipeline	100
UEGNSG218A	Carry out surveillance on gas distribution assets	90

Group D – Qualification AQF 4 Electives At least **200** points to be achieved from this group. You may select all your elective units from this Group.		**Weighting Points**
UEGNSG131A	Compile a gas industry technical report	20
UEGNSG204B	Coordinate and conduct gas distribution pipeline repair and modifications	110
UEGNSG207B	Coordinate construction, laying and testing of gas distribution pipelines	110
UEGNSG210B	Supervise and monitor contract staff for work on distribution pipelines	120
UEGNSG305B	Coordinate gas transmission pipeline repair and modifications	110
UEGNSG308B	Identify, evaluate and control threats to transmission pipelines	40
UEGNSG310B	Supervise and monitor contract work	60
UEGNSG311B	Site control of third party works in the vicinity of a transmission pipeline	80
UEGNSG314B	Liaise with third party and the community to maintain pipeline integrity and community safety	40
UEGNSG319B	Custody transfer metering and gas quality analysis	80
UEGNSG324A	Follow company procedures to deal with incidents related to the abuse of drugs and alcohol	60
UEGNSG325A	Coordinate the operation of relevant plant and equipment for transmission pipeline construction	80
UEGNSG326A	Coordinate and monitor staff and contractors	60
UEGNSG327A	Coordinate transmission pipeline construction operations	60
UEGNSG511A	Operate gas infrastructure to meet nominated demand	120
UEGNSG512A	Control centre communication with gas industry stakeholders	110
UEGNSG514A	Managing and controlling field activities	110
UEGNSG515A	Use control centre systems to monitor and control gas infrastructure	110
UEGNSG611B	Control LPG storage/processing operations	110

© Commonwealth of Australia, 2025 Powering Skills Organisation

Group D – Qualification AQF 4 Electives At least **200** points to be achieved from this group. You may select all your elective units from this Group.		**Weighting Points**
UEGNSG612B	Supervise technical operations for liquefied petroleum gas storage and processing	120
UEGNSG806A	Maintain SCADA controlled flow and pressure equipment and electronic gas measurement equipment	100

Note:

1. Prerequisite pathways shall be identified and met for all elective units selected.

2. In selecting elective units considerations to career planning advice should be given to units that form part of a prerequisite pathway for the progression to achieve particular competencies or qualification at a higher level.

UEG50114 Diploma of Gas Supply Industry Operations

Modification History

This is a replacement qualification for UEG50211 Diploma of Gas Supply Industry Operations

Description

Scope

This qualification provides competencies to manage Gas Supply Industry activities including management of projects covering the installation, diagnostics and maintenance of distribution and transmission gas pipelines and associated equipment.

It is an Australia Qualification Framework (AQF) level 5 qualification which provides integrated technical and theoretical concepts in a broad range of contexts to undertake advanced skilled or paraprofessional work which includes the analysis of information to complete a range of activities, developing solutions to complex problems and providing information and skills to others.

and achieved for:

- All the Core competency standard units to achieve a total weighting of 280 points, defined in the Core Competency Standard Units table below and
- A combination of Elective competency standard units to achieve a total weighting of 1320 points in accordance with the Elective Competency Standard Units table below, resulting in the achievement of overall weighting of 1600 points.
- All the required pre-requisite competency standard units have been met as required

Core Competency Standard Units All Core competency standard units to be achieved		**Weighting Points**
UEGNSG005A	Prepare to work in the gas industry	20
UEGNSG132A	Carry out basic work activities in a gas industry work environment	60
UEGNSG133A	Comply with environmental policies and procedures in the utilities industry	40
UEGNSG141A	Apply Workplace Health and Safety regulations, codes and practices in the gas supply industry	20
UEGNSG113B	Manage a utilities industry OHS management system	80
UEGNSG120B	Manage gas system environmental compliance	60
Total points in core		**280**

Elective Competency Standard Units Complete Elective units to achieve a total of weighting of **1260** points from the following groups:		
Group	**Minimum points**	**Maximum points**

© Commonwealth of Australia, 2025 Powering Skills Organisation

A	Imported and Common Elective Units Imported units from other qualifications, training packages and/or state accredited courses can be added to this group, but they must be at AQF level 5. If units have not being assigned a weighting by the relevant E-Oz Industry Technical Advisory Committee, their weighting will be 10 points. Note: For further information see Application of the NQC Flexibility Formula, refer to UEG11 Gas Industry Training Package, Version 2, Qualification Framework.	0	260
B	Qualification AQF 2 Electives	0	180
C	Qualification AQF 3 Electives	330	670
D	Qualification AQF 4 Electives	300	810
E	Qualification AQF 5 Electives	180	340

Group A – Imported and Common Elective Units You may complete units to a maximum weighting of **260**		**Weighting Points**
BSBCUS501C	Manage quality customer service	40
BSBFLM309C	Support continuous improvement systems and processes	40
BSBINM501A	Manage an information or knowledge management system	50
BSBINN502A	Build and sustain an innovative work environment	50
BSBLED501A	Develop a workplace learning environment	60
BSBMGT502B	Manage people performance	70
BSBMGT515A	Manage operational plan	60
BSBMGT516C	Facilitate continuous improvement	60
BSBWHS501A	Ensure a Safe Workplace	60
BSBWOR501B	Manage personal work priorities and professional development	60
BSBWOR502B	Ensure team effectiveness	60
PMAOMIR512B	Establish incident response preparedness and response systems	70

	Imported units from other qualifications, training packages and/or state accredited courses can be added to this group, but they must be selected from qualifications where the unit is first packaged at AQF level 3. If units have not being assigned a weighting by the relevant EE-Oz Industry Technical Advisory Committee, their weighting will be 10 points. Note: For further information see Application of the NQC Flexibility Formula, Page 10, UEG11 Gas Industry Training Package, Version 1, Volume 1 Qualification Framework	**Up to 260 points**

Group B – Qualification AQF 2 Electives You may complete units to maximum weighting of **180** points		**Weighting Points**
UEENEEE102A	Fabricate, assemble, and dismantle utilities industry components	40
UEENEEE107A	Use drawings, diagrams, schedules, standards, codes and specifications	40
UEENEEM080A	Report on the integrity of explosion-protected equipment in a hazardous area	20
UEGNSG004A	Locate, prove and protect utility assets	60
UEGNSG006A	Use a portable gas detector to locate escape	40
UEGNSG134A	Establish a utilities infrastructure work site	60
UEGNSG136A	Carry out transmission pipeline construction work activities	60
UEGNSG140A	Apply environmental policies and procedures in the utilities industry	20
UEGNSG219A	Conduct excavations in the utilities industry	60
UEGNSG221A	First on site response to gas pipeline emergencies	90
UEGNSG224A	Construct and lay copper and stainless steel gas distribution pipelines	60
UEGNSG226A	Assist with the construction, laying and connection of gas distribution services to mains	40
UEGNSG227A	Assist with the construction and laying of gas distribution mains	40

© Commonwealth of Australia, 2025 Powering Skills Organisation

Group B – Qualification AQF 2 Electives You may complete units to maximum weighting of **180** points		**Weighting Points**
UEGNSG330A	Coat metallic pipelines	80
UEGNSG331A	Establish right of way access for transmission pipeline construction	60
UEGNSG332A	Undertake hydro-testing for transmission pipeline construction	60
UEGNSG333A	Work in proximity of transmission pipeline construction plant and equipment	40
UEGNSG342A	Maintain pipeline easements	40
UEGNSG615A	Fill LPG cylinders	80
UEGNSG616A	Refurbish gas cylinders	80
UEGNSG705A	Disconnect and reconnect small capacity gas meters	40
UEGNSG708A	Pressure Test Residential and Small Commercial Gas Installations	40
UEGNSG711A	Process meter reading information using appropriate technology	40
UEGNSG712A	Read and record meter readings	40
UEGNSG714A	Relight Type A gas appliances	60
UEGNSG804A	Maintain single stage and single run gas flow and pressure control and measuring devices	80
UEPOPS203B	Operate and Monitor Communications System	20
UEPOPS205B	Conduct Minor Mechanical Maintenance	30
UETTDREL14A	Working safely near live electrical apparatus as a non-electrical worker (moved from Group A)	40

Group C – Qualification AQF 3 Electives Complete units to at least **330** points, with a maximum weighting of **670** points		**Weighting Points**
UEENEEM020A	Attend to breakdowns in hazardous areas — gas atmospheres	20

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEENEEM076A	Use and maintain the integrity of a portable gas detection device	20
UEGNSG135A	Monitor and control gas odourisation	100
UEGNSG137A	Operate and maintain gas station water bath heaters	60
UEGNSG138A	Install and commission stationary gas fuelled turbine engines	60
UEGNSG139A	Repair and maintain stationary gas fuelled turbine engines	60
UEGNSG142A	Conduct isolations under the permit to work system for gas industry work sites	80
UEGNSG212B	Construct, lay and connect a gas distribution service to a plastic main	60
UEGNSG213B	Construct, lay and connect a gas distribution service to a steel main	60
UEGNSG216A	Commission or decommission gas distribution pipelines	100
UEGNSG217A	Launch and recover PIGs in a gas distribution pipeline	100
UEGNSG218A	Carry out surveillance on gas distribution assets	90
UEGNSG220A	Construct and lay Polyethylene gas distribution mains	60
UEGNSG222A	Construct and lay nylon or PVC gas distribution mains	60
UEGNSG223A	Construct and lay steel gas distribution pipelines	60
UEGNSG225A	Perform routine maintenance on distribution pipeline facilities and equipment	100
UEGNSG228A	Construct and lay large copper gas distribution pipelines	60
UEGNSG229A	Prepare simple drawings of as laid gas mains and services	40
UEGNSG344A	Commission or decommission gas transmission pipelines	120
UEGNSG346A	Launch and recover PIGs in gas transmission pipelines	100
UEGNSG347A	Perform routine maintenance on transmission pipeline facilities and equipment	110
UEGNSG348A	Supervise the operation of plant and equipment for the construction of gas transmission pipelines	60

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEGNSG349A	Carry out surveillance of gas transmission pipelines	110
UEGNSG350A	First response to a gas facility event	60
UEGNSG352A	Check and report on gas station conditions	40
UEGNSG353A	Carry out aerial surveillance of gas transmission pipelines	60
UEGNSG354A	Control excavations in the vicinity of gas transmission pipelines	60
UEGNSG355A	Monitor and report on cathodic protection systems	60
UEGNSG356A	Monitor and operate flow control, pressure measuring and regulating devices for gas transmission	100
UEGNSG411A	Maintain cathodic protection systems	100
UEGNSG412A	Install cathodic protection systems	110
UEGNSG506A	Respond to gas infrastructure emergencies	80
UEGNSG507A	Remotely monitor and operate gas transmission flow and pressure measuring and regulating devices	90
UEGNSG508A	Remotely check and report on gas station conditions	40
UEGNSG614A	Load, unload, exchange and connect LPG cylinders	80
UEGNSG617A	Monitor and control the transfer of bulk LPG	100
UEGNSG618A	Process Liquefied Petroleum Gas (LPG)	100
UEGNSG619A	Perform scheduled maintenance on gas processing or storage facilities and equipment	110
UEGNSG620A	Organise the repair of faults in LPG processing or storage facilities and equipment	80
UEGNSG621A	Control bulk storage of LPG	110
UEGNSG622A	Assess the operational capability of gas safety equipment on a delivery vehicle	40
UEGNSG706A	Test New Residential and Small Commercial Gas Installations	60
UEGNSG713A	Investigate billing exceptions-conditions	60
UEGNSG811A	Monitor and operate complex flow control, measuring and	110

	regulating devices for gas distribution	
UEGNSG805A	Maintain Multi-Stage and Multi-Run Gas Flow and Pressure Measuring and Regulating Devices	80
UEGNSG807A	Install Gas Flow, Measuring and Pressure Regulating Devices	80
UEPMNT367A	Install and commission stationary gas fuelled reciprocating engines	60
UEPMNT368A	Repair and maintain stationary gas fuelled reciprocating engines	60
UEPOPS317B	Operate and Monitor Fixed Fire Protection Systems	30
UEPOPS336B	Manage, operate and monitor a gas turbine unit	60
UEPOPS347B	Operate and monitor supervisory, control and data acquisition systems	40

Group D – Qualification AQF 4 Electives Complete units to at least **300** points, with a maximum weighting of **810** points.		**Weighting Points**
UEENEEE117A	Implement and monitor energy sector OHS policies and procedures	20
UEGNSG106B	Coordinate repair of pipeline, facilities and equipment	110
UEGNSG108B	Operate and monitor pipeline control systems	60
UEGNSG109B	Control field pipeline operations	60
UEGNSG110B	Supervise technical operations for gas distribution or transmission	60
UEGNSG111B	Produce maintenance strategies and plans for a gas facility	80
UEGNSG131A	Compile a gas industry technical report	20
UEGNSG204B	Coordinate and conduct gas distribution pipeline repair and modifications	110
UEGNSG207B	Coordinate construction, laying and testing of gas distribution pipelines	110
UEGNSG210B	Supervise and monitor contract staff for work on distribution pipelines	120

© Commonwealth of Australia, 2025 Powering Skills Organisation

UEGNSG305B	Coordinate gas transmission pipeline repair and modifications	110
UEGNSG308B	Identify, evaluate and control threats to transmission pipelines	40
UEGNSG310B	Supervise and monitor contract work	60
UEGNSG311B	Site control of third party works in the vicinity of a transmission pipeline	40
UEGNSG314B	Liaise with third party and the community to maintain pipeline integrity and community safety	40
UEGNSG319B	Custody transfer metering and gas quality analysis	80
UEGNSG324A	Follow company procedures to deal with incidents related to the abuse of drugs and alcohol	60
UEGNSG325A	Coordinate the operation of relevant plant and equipment for transmission pipeline construction	80
UEGNSG326A	Coordinate and monitor staff and contractors	60
UEGNSG327A	Coordinate transmission pipeline construction operations	60
UEGNSG511A	Operate gas infrastructure to meet nominated demand	120
UEGNSG512A	Control centre communication with gas industry stakeholders	110
UEGNSG514A	Managing and controlling field activities	110
UEGNSG515A	Use control centre systems to monitor and control gas infrastructure	110
UEGNSG611B	Control LPG storage/processing operations	110
UEGNSG612B	Supervise technical operations for liquefied petroleum gas storage and processing	120
UEGNSG806A	Maintain SCADA controlled flow and pressure equipment and electronic gas measurement equipment	100

Group E – Qualification AQF 5 Electives Complete units to at least **180** points, with a maximum weighting of **340** points.		**Weighting Points**
UEGNSG513A	Manage emergencies and critical incidents for gas infrastructure	120

© Commonwealth of Australia, 2025 Powering Skills Organisation

Group E – Qualification AQF 5 Electives Complete units to at least **180** points, with a maximum weighting of **340** points.		**Weighting Points**
UEGNSG114B	Coordinate and monitor implementation of a risk management plan for a utilities industry facility	100
UEGNSG115B	Manage gas systems projects	80
UEGNSG116B	Manage Gas Industry physical resources	80

Note:

1. Prerequisite pathways shall be identified and met for all elective units selected.

2. In selecting elective units considerations to career planning advice should be given to units that form part of a prerequisite pathway for the progression to achieve particular competencies or qualification at a higher level.

BSBCUS401B Coordinate implementation of customer service strategies

Modification History

Release	Comments
Release 1	This version first released with *BSB07 Business Training Package version 6.0.* Revised unit. Performance criteria amended so that the learner is not required to 'incorporate evidence of customer satisfaction in decision to modify products or services'. Required skills updated to focus on learning and development practices and compliance with policy and procedures. Replaces BSBCUS401A Coordinate implementation of customer service strategies

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to advise on, carry out and evaluate customer service strategies, including the design of improvement strategies based on feedback. Operators may have responsibility to provide guidance or to delegate aspects of these tasks to others.

Application of the Unit

This unit applies to individuals with a broad knowledge of customer service strategies who contribute well developed skills in addressing customer needs and problems.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	**Performance Criteria**
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Advise on customer service needs	1.1 Clarify and accurately assess ***customer needs*** using appropriate ***communication techniques***
	1.2 Diagnose problems matching service delivery to ***customers*** and develop options for improved service within ***organisational requirements***
	1.3 Provide relevant and constructive advice to promote the improvement of customer service delivery
	1.4 Use ***business technology*** and/or ***online services*** to structure and present information on customer service needs
2. Support implementation of customer service strategies	2.1 Ensure customer service strategies and opportunities are promoted to ***designated individuals and groups***
	2.2 Identify and allocate available budget resources to fulfil customer service objectives
	2.3 Promptly action ***procedures to resolve customer difficulties*** and ***complaints*** within organisational requirements
	2.4 Ensure that decisions to implement ***strategies*** are taken in consultation with designated individuals and groups
3. Evaluate and report on customer service	3.1 Review client satisfaction with service delivery using verifiable data in accordance with organisational requirements
	3.2 Identify and report changes necessary to maintain service standards to designated individuals and groups
	3.3 Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions of

© Commonwealth of Australia, 2025 Powering Skills Organisation

	client service strategies 3.4 Maintain systems, records and reporting procedures to compare changes in customer satisfaction

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to
  - communicate effectively with personnel and clients at all levels
  - articulate customer service strategies
- interpersonal skills to:
  - build relationships with customers
  - establish rapport
- literacy skills to:
  - prepare general information and papers
  - read a variety of texts
  - write formal and informal letters according to target audience
- planning skills to develop implementation schedules
- problem-solving skills to diagnose organisational problems relating to customer services
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - environmental issues
  - occupational health and safety (OHS)
- principles of customer service
- organisational business structure, products and services
- product and service standards and best practice models.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifying needs and priorities of the organisation in delivering services to customers • responding to and reporting on customer feedback • designing strategies to improve delivery of products and services • knowledge of the principles of customer service.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of customer complaints, feedback and strategies.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation reporting changes necessary to maintain service standards • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • oral or written questioning to assess knowledge of customer service techniques and strategies • review of systems, records and reporting procedures to compare changes in customer satisfaction.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Customer needs may relate to:	• accuracy of information • advice or general information • complaints • fairness/politeness • further information • making an appointment • prices/value • purchasing organisation's products and services • returning organisation's products and services • specific information.
Communication techniques may include:	• analysing customer satisfaction surveys • analysing quality assurance data • conducting interviews • consultation methods, techniques and protocols • making recommendations • obtaining management decisions • questioning • seeking feedback to confirm understanding • summarising and paraphrasing.
Customers may include:	• corporate customers • individual members of the organisation • individual members of the public • internal or external • other agencies.
Organisational requirements may include:	• access and equity principles and practice • anti-discrimination and related policy • confidentiality and security requirements • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• payment and delivery options • pricing and discount policies • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals • replacement and refund policy and procedures • who is responsible for products or services.
Business technology may include:	• answering machine • binder • computer • fax machine • photocopier • printer • shredder • telephone.
Online services may include:	• access to product database by customers online • access to purchase, delivery and account records • contact centre • online ordering • online payments • online registration • quick/reasonable response • two-way communication online.
Designated individuals and groups may include:	• colleagues • committee • customers • external organisation • line management • supervisor.
Procedures to resolve customer difficulties may include:	• external agencies (e.g. Ombudsman) • item replacement • referrals to supervisor • refund of monies • review of products or services • using conflict management techniques.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Customer complaints may include:	• administrative errors such as incorrect invoices or prices
	• customer satisfaction with service quality
	• damaged goods or goods not delivered
	• delivery errors
	• products not delivered on time
	• service errors
	• specific e-business problems and issues:
	  • difficulty accessing services
	  • inactive links
	  • not appreciating differing hardware and software
	  • services not available
	  • supply errors such as incorrect product delivered
	  • time taken to access services
	  • unfriendly website design
	  • website faults
	• warehouse or store room errors such as incorrect product delivered.

Customer service ***strategies*** may include:	• courtesy/politeness • delivery times • merchandise characteristics • price offers • product/refund guarantees • product/service availability.

BSBCUS501C Manage quality customer service

Modification History

Release	Comments
Release 1	New release of this Qualification released with *version 6 of BSB07* Business *Services Training Package*. Revised unit. Required skills updated to focus on learning and development practices and compliance with policy and procedures.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

Operators may have staff involved in delivering customer service and are responsible for the quality of their work. In many instances the work will occur within the organisation's policies and procedures framework. At this level, the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies, will be required.

Application of the Unit

Many managers are involved in ensuring that products and services are delivered and maintained to standards agreed by the organisation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to:
  - coach and mentor staff and colleagues
  - monitor and advise on customer service strategies
- literacy skills to:
  - edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
  - prepare general information and papers according to target audience
  - read and understand a variety of texts
- problem-solving skills to:
  - deal with customer enquiries or complaints
  - deal with complex and non-routine difficulties
- technology skills to select and use technology appropriate to a task
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - Australian consumer law
  - ethical principles
  - codes of practice
  - privacy laws
  - financial legislation
  - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs
- techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  - customer behaviour
  - customer needs research
  - customer relations
  - ongoing product and/or service quality

© Commonwealth of Australia, 2025 Powering Skills Organisation

- problem identification and resolution
- quality customer service delivery
- record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans, policies or procedures for delivering quality customer service • demonstrated techniques in solving complex customer complaints and system problems that lead to poor customer service • knowledge of techniques for solving complaints.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • assessment of written reports • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • evaluation of leadership, supervision, coaching and mentoring used to assist colleagues to overcome difficulty in meeting customer service standards • review of strategies developed and used to monitor progress in achieving product and/or service targets and standards • review of records, reports and recommendations about managing customer service.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Customers may be:	• Board members • clients, purchasers of services • co-workers, peers and fellow frontline managers • members of the general public who make contact with the organisation, such as prospective purchasers of services • potential funding bodies • supervisors • suppliers of goods and services and contractors providing goods and services.
Quality may refer to:	• characteristics of a product, system, service or process that meet the requirements of customers and interested parties.
Products and services may include:	• either products or services • goods • ideas • infrastructure • private or public sets of benefits.
Strategies may refer to:	• databases and other controls to record and compare data over time • electronic feedback mechanisms using intranet, internet and email • feedback forms and other devices to enable communication from customers • long-term or short-term plans for monitoring achievement and evaluating effectiveness • policies and procedures • questionnaires, survey and interviews • training and development activities.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Resources may include:	• buildings/facilities • equipment • finance • information • people • power/energy • technology • time.

BSBFLM303C Contribute to effective workplace relationships

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to gather information and maintain effective working relationships and networks, with particular regard to communication and representation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers have a key role in contributing to efficient and effective work teams within the context of the organisation. They play a prominent part in motivating, mentoring, coaching and developing team cohesion through providing leadership for the team and forming the bridge between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures which require the exercise of some discretion and judgement. This unit is related to BSBWOR401A Establish effective workplace relationships.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- coaching and mentoring skills to provide support to colleagues
- functional literacy skills to access and use workplace information
- relationship management and communication skills to:
  - interpret information from a variety of people
  - respond to unexpected demands from a range of people

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• gain the trust and confidence of colleagues • deal with people openly and fairly • forge effective relationships with internal and/or external people.
Required knowledge

• principles and techniques associated with relationship management, including:
  • developing trust and confidence
  • behaving consistently in work relationships
  • identifying the cultural and social environment
  • identifying and assessing interpersonal styles
  • establishing networks
  • identifying and resolving problems
  • handling conflict
  • managing poor work performance
  • monitoring and improving work relationships
  • using anti-discrimination/bias strategies and making contributions
• relevant legislation from all levels of government that may affect business operation, especially in regard to:
  • occupational health and safety and environmental issues
  • equal opportunity
  • industrial relations
  • anti-discrimination.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • using culturally appropriate communication techniques to share work-based information with teams and individuals in accordance with organisation policies • developing networks and building team relationships

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	• regularly reviewing workplace outcomes to identify and resolve issues and implement improvements within own level of responsibility and according to organisational policies.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge and understanding of principles of relationship management and organisation's social, ethical and business standards • presentation of examples of actions taken by the candidate to build networks and contribute to positive workplace relationships and outcomes.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other management or frontline managementunits.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	• archived, filed and historical background data • electronic or manual transmission • individual and team performance data • marketing and customer-related data

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• organisation policies and procedures • planning and organisational documents including the outcomes of continuous improvement and quality assurance • written or verbal communications

Sources of information may be:	• external, such as:
	  • external customers
	  • web based resources
	  • reports
	• internal, such as:
	  • supervisors, managers and peers
	  • organisation policies and procedures
	  • workplace documents

Diverse audiences may include:	• persons with specific social, cultural and other needs that require a range of strategies and approaches including adjusting communication
Consultation processes may include:	• feedback to the work team and relevant personnel in relation to outcomes of the consultation process • opportunity for employees to contribute ideas and information
Relevant personnel may include:	• OHS committees and OHS representatives • people with specialist responsibilities • supervisors, managers and other employees • union representatives/groups

The organisation's social, ***ethical and business standards*** may refer to:	• implied standards such as honesty and respect relative to the organisation culture and generally accepted within the wider community
	• rewards and recognition for high performing staff
	• standards expressed in legislation and regulations such as anti-discrimination legislation
	• written standards such as those expressed in:
	  • vision and mission statements
	  • policies
	  • code of workplace conduct/behaviour
	  • dress code
	  • statement of workplace values

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Colleagues, customers and suppliers may include:	• employees at the same level and more senior managers • internal and external contacts • people from a wide variety of social, cultural and ethnic backgrounds • team members
Workplace networks may be:	• formal or informal • individuals or groups • internal or external • structured or unstructured
Workplace outcomes may include:	• OHS processes and procedures • performance of the work team
Poor work performance may relate to:	• self or work team; or it may extend to the organisation as a whole

BSBFLM305C Support operational plan

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to provide support for operational practices and procedures within the organisation's productivity and profitability plans. This includes contributing to the operational plan, assisting in recruiting employees and acquiring resources, and monitoring and adjusting operational performance. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers are actively engaged in planning activities to achieve the measurable, stated objectives of the team and the organisation. This key role is carried out to provide safe, efficient and effective products and services to customer satisfaction within the organisation's productivity and profitability plans. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non routine activities that require some discretion and judgement. This unit is related to BSBMGT402A Implement operational plan.

Licensing/Regulatory Information

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Contribute to implementation of operational plan	1.1. Collect and record details of ***resource requirements*** and report to ***relevant personnel*** 1.2. Ensure the ***operational plan*** contributes to the achievement of the organisation's performance and business plan 1.3. Identify ***key performance indicators*** to measure own and work team's performance 1.4. Undertake ***contingency planning*** as required 1.5. Support the development and presentation of proposals for resource requirements as required
2. Assist in recruiting employees and acquiring resources	2.1. Assist with employee recruitment and/or induction as required, within ***the organisation's policies***, ***practices and procedures*** 2.2. Acquire physical resources and services according

ELEMENT	PERFORMANCE CRITERIA
	to the organisation's policies, practices and procedures and in consultation with relevant personnel
3. Support operations	3.1. Identify and utilise ***performance systems and processes*** to assess team progress in achieving plans and targets 3.2. Compare actual productivity and performance with identified short-term budgets, targets and performance results 3.3. Identify and report unsatisfactory performance to relevant personnel, to enable action to be taken to rectify the situation 3.4. Provide coaching to support individuals and teams to use resources effectively, economically and safely 3.5. Support ***consultation processes*** for the development and/or variation of the operational plan as required 3.6. Present recommendations for variation to operational plans to relevant personnel 3.7. Follow performance ***systems***, ***procedures and recording processes*** in accordance with organisation requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- coaching and mentoring skills to provide support to colleagues
- functional literacy skills to access and use workplace information
- skills to:
  - maintain a safe workplace and environment
  - access and use feedback to improve operational performance
  - prepare recommendations to improve operations
  - access and use established systems and processes.

Required knowledge

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

• principles and techniques of:
  • short-term operational scheduling
  • physical resources and services acquisition procedures and/or systems
  • budget and performance figures interpretation
  • performance monitoring within defined job role
  • performance reporting
  • problem identification and resolution
  • alternative approaches to improving resource usage and eliminating resource inefficiencies and waste within defined job role
• relevant legislation from all levels of government that may affect business operations, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
• support for individuals and teams who have difficulty in performing to the required standard.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • sharing information with members of the work team about implementing and monitoring the operational plan • assisting in planning resource acquisition and usage including human resources, risk management and contingency planning • monitoring, analysing and reporting individual and team performance against identified targets.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess

EVIDENCE GUIDE	

	practical skills and knowledge. The following examples are appropriate for this unit:
	• direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
	• records produced while working with the operational plan, such as:
	  • suggestions for variations to the operational plan
	  • rosters and staff allocation
	  • short-term resource acquisition planning, contingency planning and/or risk management plans
	  • induction programs conducted
	  • suggestions and input into management decisions related to the operational plan
	  • records of actions taken to address day-to-day resource shortfalls.

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBFLM303C Contribute to effective workplace relationships • BSBFLM306C Provide workplace information and resourcing plans • BSBFLM312C Contribute to team effectiveness • BSBCMN311B Maintain workplace safety.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Resource requirements may include:	• purchasing or ordering of goods • stock requirements and requisitions

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• supply of resources.
Relevant personnel may include:	• colleagues, supervisors and managers • OHS committees and other people with specialist responsibilities • specialist resource managers • unions/employee groups • other employees.
Operational plan may include:	• organisational plans • tactical plans developed by the department or section to detail product and service performance.
Key performance indicators may refer to:	• measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and identify areas for improvements.
Contingency planning may refer to:	• contracting or outsourcing human resource and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-use • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables • succession planning.
The organisation's policies practices and procedures may include:	• organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources • organisational culture • Standard Operating Procedures • undocumented practices in line with organisational operations.

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	

Performance systems and processes may be:	• formal or informal processes within the organisation, such as:
	  • Key Performance Indicators (KPIs)
	  • specified work outcomes
	  • individual and team work plans
	  • feedback arrangements
	• informal systems used in the place of existing organisation-wide systems.

Consultation processes may refer to:	• mechanisms used to provide feedback to the work team in relation to outcomes of consultation • meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans.
Performance systems, procedures and recording processes may include:	• databases and other recording mechanisms • individual and team performance plans • organisational policies and procedures relative to performance.

Present and record information to support the preparation of business plans and/or budgets in accordance with the organisation's guidelines and requirements 4.3. Follow ***contingency plans*** in the event that alternative action is required
5. Support the preparation of resource proposals	5.1. Consult with ***colleagues*** to collect ***resource planning data*** as required 5.2. Report estimated resource needs and usage according to organisational requirements as necessary 5.3. Facilitate ***resourcing*** within limits of own role

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities • coaching and mentoring skills to provide support to colleagues • communication and research skills covering information collection, analysis and reporting • functional literacy skills to access and use workplace information • information preparation skills • skills to improve information usage in decision making • technical skills to extract and input information
Required knowledge
• a general understanding of:

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• workplace information systems • operational plans and budgets • resource proposals • basic financial concepts relating operational plans and budgets • methods to gain efficiencies in operational resource management • relevant legislation from all levels of government which may affect business operations, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • using management information system to collect, store and retrieve data supporting the preparation of business plans and/or budgets • involving the work team in planning and budget preparation • estimating resource needs and usage according to organisational requirements and allocating or acquiring resources within limits of own role.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • records produced from working in a team, such as:

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	• reports • minutes or records of meetings • work journals or diaries • learning and development plans developed with team members • records of actions taken to address issues raised by team members.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBCUS301A Deliver and monitor a service to customers • BSBFLM305C Support operational plan • BSBFLM312C Contribute to team effectiveness • BSBCMN311B Maintain workplace safety.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	• archived, filed and historical background data • continuous improvement and quality assurance data • data available internally or externally • data shared and retrieved in various forms such as in writing or verbally, electronically or manually • financial and contractual data • marketing and customer-related data • organisational performance data • planning and organisational documents • policies and procedures.
Plans and procedures may	• action plans, project plans or more formal

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
include:	planning tools in line with organisational procedures and levels of own responsibility • informal documents outlining a series of planned actions or steps • organisational procedures such as Standard Operating Procedures, record keeping procedures • organisational processes and procedures used to obtain information, with consideration given to meeting legislative requirements, such as privacy, anti-discrimination.
Relevant personnel may include:	• colleagues and specialist resource managers • OHS committees and OHS representatives • supervisors, managers and other staff/employees • other people with specialist responsibilities.
Management information systems may be:	• the entire infrastructure of an organisation, including personnel, and the components for the collection, processing, storage, transmission, display, dissemination, and disposition of information.
Technology may include:	• computerised systems and software such as databases, project management and word-processing • telecommunications devices • other technology available in the workplace and used to carry out work roles and responsibilities.
Designated persons or groups may include:	• groups designated in workplace policies and procedures • the frontline manager's supervisors or others with management roles and responsibilities concerning information systems • other stakeholders accessing the information system such as customers and service providers • other work groups or teams whose work will be affected by the system.
Business plans and/or budgets may refer to:	• cash flow projections • long or short term budgets/plans relative to own responsibilities • operational plans

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• spreadsheet-based financial projections • targets or Key Performance Indicators (KPIs) for production, productivity, wastage, sales, income and expenditure.
Contingency plans will usually be developed by others and may include:	• contracting out or outsourcing human resource and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-use • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables.
Colleagues may include:	• employees at the same level or more senior managers • OHS representatives • people from a wide variety of social, cultural and ethnic backgrounds and physical and mental abilities • team members.
Resource planning data may relate to:	• buildings/facilities • equipment/technology • finance • information • people • power/energy • targets or Key Performance Indicators (KPIs) for production, productivity, wastage, sales, income and expenditure • time.
Resourcing may include:	• purchasing or ordering of goods • stock requirements/requisitions • supply of resources.

BSBFLM309C Support continuous improvement systems and processes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit specifies the outcomes required to support the organisation's continuous improvement systems and processes. Particular emphasis is on actively encouraging the team to participate in the process, on monitoring and reporting on specified outcomes and on supporting opportunities for further improvements. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit replaces BSBFLM309A Support continuous improvement systems and processes. Frontline managers have an active role in supporting continuous improvement processes in achieving the organisation's objectives. Their position, closely associated with the creation and delivery of products and services, means that they have an important responsibility in influencing the ongoing development of the organisation. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non-routine activities that require some discretion and judgement. Consider co-assessment with BSBFLM305C Support operational plan, BSBFLM312C Contribute to team effectiveness, BSBCUS301A Deliver and monitor a service to customers, BSBCMN311B Maintain workplace safety, and BSBFLM311C Support a workplace learning

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Contribute to continuous improvement systems and processes	1.1. Actively encourage and support team members to participate are in decision making processes and to assume responsibility and exercise initiative 1.2. ***Communicate*** the organisation's ***continuous improvement processes*** to individuals and teams

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.3. Effectively utilise ***mentoring and coaching*** to ensure that individuals/teams are able to support the organisation's continuous improvement processes
2. Monitor and report on specified outcomes	2.1. Utilise the organisation's ***systems*** and ***technology*** to monitor team progress and to identify ways in which planning and operations could be improved 2.2. Apply continuous improvement techniques and processes to improve ***customer service***
3. Support opportunities for further improvement	3.1. Communicate ***agreed recommendations*** for improvements in achieving the business plan to team members 3.2. Document and use work performance to identify opportunities for further improvement 3.3. Maintain records, reports and recommendations for improvement within the organisation's systems and processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- functional literacy skills to access and use workplace information
- research, analysis, interpretation and reporting skills
- monitoring and evaluation skills
- communication skills to:
  - gain the commitment of individuals and teams to continuous improvement
  - deal with people openly and fairly
  - use consultation skills effectively
- skills to consolidate opportunities for improvement
- coaching and mentoring skills to provide support to colleagues

Required knowledge

- legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal

REQUIRED SKILLS AND KNOWLEDGE

opportunity, industrial relations and anti-discrimination
• principles and techniques of:
  • continuous improvement systems and processes
  • benchmarking
  • best practice
• benefits of continuous improvement
• quality approaches which the organisation may implement
• methods that can be used in continuous improvement
• barriers to continuous improvement
• recording, reporting and recommendation processes to facilitate continuous improvement applied within the organisation

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • examples of actions taken by the candidate to support continuous improvement including: • use of work performance to identify improvement • adjusted plans to reflect changes • effective communication to all stakeholders • use of technology to monitor operational progress • application of suitable recordkeeping processes.
Context of and specific resources for assessment	Assessment must ensure: • access by the learner and trainer to appropriate documentation and resources normally used in the workplace • that this unit is assessed in the workplace or in a closely simulated work environment.
Method of assessment	A range of assessment methods should be used to assess skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	

	• Direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
	• Review of records supporting the organisation's continuous improvement systems and processes, such as:
	  • contributions to organisational policies and procedures
	  • contributions to procedures and policies for dealing with continuous improvement processes, and related codes of conduct
	  • actions taken to address information collection, retrieval and use in the workplace
	  • actions taken to address issues and problems within work team
	  • actions taken to address methods of reporting information
	  • learning and development plans for team members
	  • materials developed for coaching, mentoring and training
	  • induction programs developed and/or delivered
	  • actions taken to address internal and external information management issues
	  • reviews of people management
	  • advice and input into management decisions related to continuous improvement
	  • records of people management lessons learned.

Guidance information for assessment	This unit should be assessed with other frontline management units taken as part of this qualification, as applicable to the candidate's leadership role in a work team, and as part of a holistic assessment activity.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

Required skills

- coaching and mentoring skills to support learning
- communication skills to:
  - gain the trust and confidence of colleagues
  - deal with people openly and fairly
  - use consultation skills effectively
- culturally appropriate communication skills to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- functional literacy skills to access and use workplace information
- skills in facilitating learning, including:
  - identifying learning needs

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• developing learning plans • selecting and using work activities to create learning opportunities • establishing a workplace conducive to learning • negotiating learning arrangements with training and development specialists • encouraging colleagues to share their knowledge and skills • evaluating the effectiveness of learning
Required knowledge

• principles and techniques of:
  • adult learning
  • a learning environment and learning culture
  • work based learning
  • structuring learning
  • coaching and mentoring
• relevant legislation from all levels of government that may affect business operation, especially in regard to:
  • occupational health and safety
  • environmental issues
  • equal opportunity and anti-discrimination
  • industrial relations

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • liaising with stakeholders, especially members of the work team, to develop, promote and maintain a workplace learning environment • developing learning plans and arranging learning opportunities in line with identified needs • compiling and interpreting data about learning arrangements and outcomes in accordance with

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	organisational requirements.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge and understanding of workplace learning principles and organisational procedures and policies for applying learning systems • presentation of examples of actions taken by the candidate to support a workplace learning environment • review of materials developed for coaching, mentoring and training.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBCUS301A Deliver and monitor a service to customers • BSBFLM305C Support operational plan • BSBFLM312C Contribute to team effectiveness • BSBCMN311B Maintain workplace safety • BSBWOR301A Organise personal work priorities and development.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
regional contexts) may also be included.	

Learning opportunities may include:	• action learning
	• coaching
	• exchange/rotation
	• induction
	• mentoring
	• shadowing
	• short courses
	• structured learning activities conducted outside and within the workplace such as:
	  • accredited training through an independent organisation such as a State OHS authority
	  • training through an RTO leading to a nationally recognised Australian Qualifications Framework (AQF) qualification or Statement of Attainment, for example through a traineeship or Australian Apprenticeship
	• workplace learning activities, that may also contribute to a recognised credential, such as:
	  • workshops.

Learning plans may include:	• codes of conduct • key performance indicators (KPI) • negotiated agreement with individual • OHS requirements • performance standards • team competencies • team roles and responsibilities • work outputs and process.
Diversity of needs may include:	• different learning needs that relate to social, cultural and other types of workplace diversity, such as the need for varied communication styles and approaches.
Training and development specialists may be:	• internal or external.
Promoting a learning culture may include:	• encouraging learning and sharing of skills and knowledge across the work team and the wider organisation in order to develop competencies of team members and the team • informally supporting and recognising

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	learning achievements and sharing success stories • promoting participation and learning opportunities • using formal processes to reward training participation in line with organisational processes • utilising workplace activities as opportunities for learning.
Coaching and mentoring may refer to:	• providing assistance with problem solving • providing feedback, support and encouragement on a range of matters • teaching another member of the team, usually focusing on a specific work task or skill.
Learning and development needs may include:	• developmental learning, for example the learning required to progress through an organisation and take on new tasks and roles • gaps between the competencies held by the employee and the skills and knowledge required to effectively undertake workplace tasks.
Workplace achievement may refer to:	• achievements of set goals and performance outcomes by the work team and/or individuals.

BSBFLM312C Contribute to team effectiveness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This specifies the outcomes required to by frontline managers to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers have a key role in developing efficient and effective work teams within the context of the organisation. They play a prominent part in motivating, mentoring, coaching and developing team cohesion by providing leadership for the team and forming the bridge between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve a number of complex or non routine activities that require some discretion and judgement.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Contribute to team outcomes	1.1. Consult team members to identify ***team purpose***, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** 1.2. Support team members to meet expected outcomes
2. Support team cohesion	2.1. Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility 2.2. Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities 2.3. Provide ***feedback*** to team members to encourage, value and reward team members' efforts and contributions 2.4. Identify and address issues, concerns and problems identified by team members to ***relevant persons*** as

ELEMENT	PERFORMANCE CRITERIA
	required
3. Participate in work team	3.1. Actively encourage and support team members to participate in team activities and communication processes and to take ***responsibility for their actions***
	3.2. Support the team to identify and resolve problems which impede its performance
	3.3. Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers
4. Communicate with management	4.1. Maintain open ***communication*** with ***line manager*/*management*** at all times
	4.2. Communicate information from line manager/management to the team
	4.3. Communicate ***unresolved issues*** to line manager/management and follow-up to ensure action is taken in response to these matters

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills

- ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- communication skills, including listening
- basic training skills, including mentoring and coaching
- planning and organising skills
- problem solving skills
- attributes:
  - empathic
  - communicative
  - self aware
  - supportive
  - trusting

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• open • flexible • accommodating • initiating • loyal • fair • adaptable
Required knowledge

Required knowledge
• relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
• organisational policies and procedures
• organisational goals, objectives and plans at both tactical and strategic levels
• organisational structure including organisational chart
• learning and development options available within and through organisation
• a general understanding of the principles and techniques of:
  • group dynamics and processes
  • motivation
  • planning
  • negotiation
• individual behaviour and difference

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • demonstrate leadership in contributing to team plans • lead and facilitate teamwork • actively communicate with management • manage communication within the team

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	• induct new team members • implement performance management system • handle problems
Context of and specific resources for assessment	Assessment must ensure: • that this unit can be assessed in the workplace or in a closely simulated work environment • access by the learner and trainer to appropriate documentation and resources normally used in the workplace • where assessment is part of a learning experience, evidence will need to be collected over a period of time, involving both formative and summative assessment • that examples of actions taken by candidate to contribute to team effectiveness are provided

Method of assessment	A range of assessment methods should be used to assess skills and knowledge. The following examples are appropriate for this unit:
	• Direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
	• Records produced from working in a team, such as:
	  • reports
	  • minutes or records of meetings
	  • work journals or diaries
	  • learning and development plans developed with team members
	  • records of actions taken to address issues raised by team members

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify and source information needs	1.1. Determine and locate ***information*** required by teams 1.2. Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to ***organisational policies***
2. Collect, analyse and report information	2.1. Collect information, which is adequate and relevant to the needs of teams, in a timely manner 2.2. Ensure information is in a format suitable for analysis, interpretation and dissemination 2.3. Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired
3. Implement information systems	3.1. Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes 3.2. Use ***technology*** available in the work area to manage information effectively

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	3.3. Submit recommendations for improving the information system to ***designated persons and/or groups***
4. Prepare for information system changes	4.1. Collect information about information system future needs in consultation with ***colleagues***, including those who have a specialist role in resource management 4.2. Ensure estimates of information system future needs reflect the organisation's ***business plans***, and customer and supplier requirements 4.3. Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes 4.4. Prepare team members to work with new technology and information system changes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to work with information, and to research and present information in ways that are appropriate to the work team
- technology skills to work with a range of information systems.

Required knowledge

- information management systems and technology that would be associated with the workplace such as:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • analysis of the information that is required for the effective functioning of the team's work together • knowledge of the range of information systems that are, or should be, available in the workplace • ability to recognise what information system changes and improvements will be required in the future.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • demonstration of techniques in working with information management systems • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of relevant technology • review of documentation analysing information trends and developments • written reports on future information system needs • review of preparation undertaken for team members to work with new technology and information system changes.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Organise learning to use information or knowledge management system	1.1. Identify learning needs of ***relevant personnel*** and ***stakeholders*** for input into, and use of, ***an information or knowledge management system*** 1.2. Identify and secure human, financial and physical resources required for ***learning activities*** to use an information or knowledge management system 1.3. Organise and facilitate learning activities 1.4. Promote and support use of the system throughout the organisation 1.5. Monitor and document effectiveness of learning activities
2. Manage use of information or knowledge management system	2.1. Ensure implementation of ***policies and procedures for the information or knowledge management system*** are monitored for compliance, effectiveness and efficiency 2.2. Address implementation issues and problems as they arise

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.3. Monitor integration and alignment with data and information systems 2.4. Collect information on achievement of ***performance measures*** 2.5. Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required
3. Review use of information or knowledge management system	3.1. Analyse effectiveness of system and report on strengths and limitations of the system 3.2. Review business and operational plan and determine how effectively the system is contributing to intended outcomes 3.3. Make recommendations for improvement to system, policy or work practices

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem-solving skills to ensure the system is working in accordance with organisational expectations and to deal with contingencies
- technology skills to work with and manage the use of the information or knowledge management system.

Required knowledge

- legislation, codes of practice and national standards, for example:
  - privacy and confidentiality legislation
  - freedom of information legislation
  - AS 5037:2005 Knowledge management - A guide
- organisational policies and procedures, for example:
  - records management
  - information management
  - customer service
  - commercial confidentiality
- organisational operations, and existing data and information systems.

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Obtain information relevant to business issues	1.1. Review staff and customer feedback and business performance data 1.2. Identify, define and analyse business problems and issues 1.3. Identify information required to reach a decision on problems/issues 1.4. Source and gather reliable information 1.5. Test information for reliability and validity, and reject where contradictory or ambiguous 1.6. Utilise formal and informal networks to access corporate knowledge/memory not held in formal systems and review appropriately
2. Analyse information and knowledge	2.1. Ensure objectives for analyses are clear, relevant and consistent with the decisions required 2.2. Identify patterns and emerging trends correctly and interpret as to cause and effect 2.3. Utilise ***statistical analyses*** and interpretation where appropriate 2.4. Undertake ***sensitivity analysis*** on any proposed options 2.5. Ensure documentation reflects a logical approach to the evaluation of the evidence and conclusions drawn

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.6. Adjust ***management information systems*/*decision support systems*** to meet information processing objectives
3. Take decisions on business issues identified	3.1. Ensure sufficient valid and reliable information/evidence is available to support a decision 3.2. Utilise ***risk management*** plans to determine acceptable courses of action 3.3. Utilise appropriate ***quantitative methods*** to assist decision making 3.4. Consult specialists and other ***relevant groups and individuals*** 3.5. Ensure decisions taken are within the delegation/accountability of the group/individual responsible 3.6. Make decisions in accordance with organisational guidelines and procedures 3.7. Ensure decisions taken are consistent with organisational objectives, values and standards 3.8. Ensure decisions are taken in a timely manner
4. Disseminate information to the organisation	4.1. Ensure advice/information needs are documented and are specific to location, format and time line requirements 4.2. Document information and update databases regularly 4.3. Design and test systems to meet information requirements of decision makers 4.4. Ensure information is up-to-date, accurate, relevant and sufficient for the recipient 4.5. Develop ***communication plans*** and disseminate information 4.6. Adhere to confidentiality/privacy policies in the transmission/release of information/advice 4.7. Review and update communication plans regularly 4.8. Utilise ***technology*** which provides optimum efficiency and quality 4.9. Maintain ***corporate knowledge*** and ensure security

EVIDENCE GUIDE	
	normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • assessment of written reports on knowledge management and information management • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of information management systems • review of documentation identifying, defining and analysing business problems and issues • evaluation of communication plans • evaluation of the transmission/release of information/advice in terms of adhering to confidentiality/privacy policies.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Advanced Diploma of Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Statistical analyses may include:	• correlation calculations • long-term trend analyses • probability assessment • regulation analyses • short to medium-term trend analyses
Sensitivity analyses means:	• applying 'what if' scenarios to available

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	options
Management information systems means:	• formal systems for collecting, storing and synthesising information to be used in management decision making
Decision support systems are:	• management information systems which include some form of computer-based assistance to decision making (expert systems)
Risk management means:	• process of identification of potential negative events and the development of plans to mitigate or minimise the likelihood or consequences of the negative event if it occurs
Quantitative methods may include:	• dynamic programming • linear programming • queuing theory • simulation • transportation methodology
Relevant groups and individuals means:	• those personnel who have knowledge about the issue being dealt with and the expertise to assist the decision making process
Research may include:	• focus groups • group interviews • individual interviews • surveys
Communication plans means:	• structured program for the dissemination of information and the receipt of feedback information from individuals relevant to the process or activity
Technology may include:	• audio-visual media • internet • intranet • print media • radio • telephone • television
Corporate knowledge may include:	• copyright • intellectual property • technology

BSBINN301A Promote innovation in a team environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to be an effective and pro active member of an innovative team. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies individuals who play a pro active role in demonstrating, encouraging or supporting innovation in a team environment. The individual may be a team participant or a team leader. The team may 'make itself' or be constructed by others. It may have core members and members who participate at certain times or for particular purposes. It may be permanent or temporary, or come together at different times to work on specific projects. The team could consist of a team of contractors/freelancers, permanent staff, clients and service providers, or any combination of these groups. It may operate within an organisation or across several organisations - or simply across a group of individuals. The key focus of the unit is on what makes for an innovative team, what keeps it working well, how the structure of work can make a difference and what skills and knowledge are needed to maximise opportunities for innovation. Where a greater focus on team leadership is required this unit should be combined with units such as BSBLED401A Develop teams and individuals.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Create opportunities to maximise innovation within the team	1.1. Evaluate and reflect on ***what the team needs and wants to achieve*** 1.2. Check out ***information about current or potential team members' work*** in the context of developing a more innovative team 1.3. Bring people into the team or make suggestions for team members based on what needs to be achieved and the potential for cross-fertilising ideas 1.4. Acknowledge, respect and discuss the ***different ways that different people may contribute*** to building or

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	enhancing the team
2. Organise and agree effective ways of working	2.1. Jointly establish ***ground rules*** for how the team will operate 2.2. Agree and communicate responsibilities in ways that encourage and reinforce ***team-based innovation*** 2.3. Agree and share tasks and activities to ensure the best use of skills and abilities within the team 2.4. Plan and schedule activities to allow time for thinking, challenging and collaboration 2.5. Establish personal reward and stimulation as an integral part of the team's way of working
3. Support and guide colleagues	3.1. Model ***behaviour that supports innovation*** 3.2. Seek ***external stimuli and ideas*** to feed into team activities 3.3. Pro-actively share information, knowledge and experiences with other team members 3.4. Challenge and test ideas within the team in a positive and collaborative way 3.5. Pro-actively discuss and explore ideas with other team members on an ongoing basis
4. Reflect on how the team is working	4.1. De-brief and reflect on activities and on opportunities for improvement and innovation 4.2. Gather and use feedback from within and outside the team to generate discussion and debate 4.3. Discuss the ***challenges of being innovative*** in a constructive and open way 4.4. Take ideas for improvement, build them into future activities and communicate key issues to relevant colleagues 4.5. Identify, promote and celebrate successes and examples of successful innovation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• communication skills to work collaboratively as part of a team, to provide guidance and support to others, and to participate in open and constructive discussions • creative thinking skills to generate, explore, test and challenge ideas • learning skills to stretch boundaries of own knowledge and skills • literacy skills to analyse a wide range of information from varied sources • planning and organisational skills to participate in the effective allocation of work in a team context • problem-solving skills to work constructively to overcome issues and challenges of both a practical and conceptual nature and to make ideas become realities • self-management skills to take a pro-active team role and to reflect on own performance in modelling and encouraging behaviour that supports innovation.
Required knowledge
• barriers to innovation that can occur within a team and broader barriers that sometimes hinder innovation • broad concepts of innovation including what innovation is, different types of innovation and the benefits of innovation • characteristics of teams that are more likely to be innovative and characteristics of broader environments that support and encourage innovation • different roles that people may play within a team, how this impacts on the way a team works and what it might achieve • group dynamics in a team.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • active participation in a team where the team takes a pro-active and considered approach to innovation and innovative practice • collaborative and open communication within the team • knowledge and understanding of the internal and external factors that contribute to a team becoming

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	and remaining innovative.
Context of and specific resources for assessment	Assessment must ensure: • demonstration of skills as part of a team.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • direct observation of team interactions • evaluation of reports by the candidate or the team (could be oral or written) discussing the ideas, challenges and opportunities associated with teams, and how they can be more innovative • evaluation of feedback from other people in the team about the candidate's communication approaches and abilities • oral or written questioning to assess knowledge of the characteristics of innovative teams, innovation concepts more broadly and they ways in which innovation can be encouraged • review of jointly established 'groundrules' for how the team will operate.
Guidance information for assessment	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
What the team needs and wants to achieve may relate to:	• addressing particular customer feedback • conceiving and implementing a particular

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	project • developing new services or products • generating ongoing ideas within the work unit • improving budgetary performance • improving or changing work conditions • new ideas that impact beyond the workplace (e.g. that have a broader social or community impact)
Information about current or potential team members' work may relate to:	• interests • lifestyle preferences • past jobs • technical strengths • work preferences • working styles
Different ways that different people may contribute may relate to individual strengths around:	• creating positive energy within the team • fundamental literacy strengths (e.g. particularly strong in visual literacy, written or spoken communication) • generating ideas • networks or spheres of influence • particular ways of thinking • powers of persuasion • problem-solving capacities • specific technical skills or knowledge
Ground rules may relate to:	• boundaries or lack of boundaries for team activities and ideas • confidentiality • copyright, moral rights or intellectual property • regularity of communication • key roles and responsibilities • time lines • ways of communicating
Team-based innovation may be encouraged through:	• accessing training and learning opportunities • enough but not too much guidance and structure • equitable sharing of workload • follow-through with ideas • supportive communication
Behaviour that supports innovation may include being:	• collaborative • equitable

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• fair • fun • hardworking • reflective • responsible • sympathetic
External stimuli and ideas might be from:	• Australia or overseas • colleagues outside of the team • family and friends • internet • journals • networks or technical experts • other organisations
Challenges of being innovative may relate to:	• budgetary or other resource constraints • competing priorities • organisational culture • problems with breaking old patterns of behaviour or thinking • time pressures

BSBINN502A Build and sustain an innovative work environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to create an environment that enables and supports the application of innovative practice. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self formed team of individuals. The work group could be permanent or temporary in nature. The unit focuses on the skills and knowledge required to develop and implement a holistic approach to the integration of innovation across all areas of work practice. It also acknowledges the importance of wider contextual evaluation for potential innovations to ensure their value and benefit.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Lead innovation by example	1.1. Make innovation an integral part of ***leadership and management activities*** 1.2. Demonstrate positive reception of ideas from others and provide constructive advice 1.3. Establish and maintain relationships based on mutual respect and trust 1.4. Take considered ***risks*** to open up opportunities for innovation 1.5. Regularly evaluate own approaches for consistency with the wider organisational or project context
2. Establish work practices that support innovation	2.1. Consult on and establish ***working conditions*** that reflect and encourage innovative practice 2.2. Introduce and maintain ***workplace procedures*** that foster innovation and allow for rigorous ***evaluation of innovative ideas*** 2.3. Facilitate and participate in ***collaborative work arrangements*** to foster innovation

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.4. Build and lead teams to work in ***ways that maximise opportunities for innovation***
3. Promote innovation	3.1. Acknowledge suggestions, improvements and innovations from all colleagues 3.2. Find appropriate ***ways of celebrating and promoting innovation*** 3.3. Promote and reinforce the value of innovation according to the vision and objectives of the organisation or project 3.4. Promote and support the evaluation of innovative ideas within the wider organisational or project context
4. Create a physical environment which supports innovation	4.1. Evaluate the ***impact of the physical environment*** in relation to innovation 4.2. Collaborate with colleagues about ideas for enhancing the physical work environment before taking action 4.3. Consider potential for supporting innovation when selecting physical resources and equipment 4.4. Design, fit-out and decorate workspaces to encourage creative mindsets, collaborative working and the development of positive workplace relationships
5. Provide learning opportunities	5.1. Pro-actively share relevant information, knowledge and skills with colleagues 5.2. Provide or encourage ***formal and informal learning opportunities*** to help develop the skills needed for innovation 5.3. Create opportunities in which individuals can learn from the experience of others

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication, consultation and negotiation skills to model and lead, open and collaborative relationships

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• comprehension skills to interpret and develop information that may deal with complex ideas and relate to issues both within and outside a given workplace context • planning and organisational skills to implement wide-ranging practical processes and procedures that support innovation • problem-solving skills to assess and respond to challenges and risks around innovation at an operational management level • self-management and learning skills to evaluate and enhance personal effectiveness, and to promote a culture of ongoing learning and development.
Required knowledge
• benefits of providing coaching and learning opportunities in relation to innovation • concept of innovation, what it is and what it means for different people either working independently or within an organisation • context for innovation in the relevant workplace context including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects • different ways of rewarding performance • factors and tools that can motivate individuals to use creative thinking and apply innovative work practices • legislative framework that impacts on operations in the relevant workplace context • management principles and leadership styles, including the impact of different approaches on innovation • typical challenges and barriers to innovation within teams and organisations, and ways of overcoming these • ways in which workplace climate can affect individual attitudes and performance.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • establishment of procedures and practices (for a project or a workplace) which support and foster innovative work practice and include sound

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	evaluation processes • modelling of behaviour that supports innovative work practice • knowledge and understanding of the role of leaders and managers in encouraging innovation, and the issues and challenges associated with building and sustaining an innovative work environment.
Context of and specific resources for assessment	Assessment must ensure: • involvement of a team for which the candidate provides leadership and guidance.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • evaluation of outcomes and processes from activities managed by the candidate, particularly in relation to how innovation and innovative practice was encouraged and supported • oral or written questioning to assess knowledge of ways that innovation can be fostered and the typical challenges and barriers to innovation.
Guidance information for assessment	Innovation does not occur in isolation. Holistic assessment with other units relevant to the industry sector, workplace and job role is highly recommended.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Leadership and management activities may include:	• people management practices • planning processes

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• regular management meetings • review processes
Risks may include:	• budgetary issues • challenging changes in relationships, work practices and general workplace climate • unforseen impacts of innovative ideas
Working conditions may include:	• family-friendly leave entitlements • flexible working hours • social leave • study leave • time provided for coming up with ideas
Workplace procedures may relate to:	• briefing processes • client relations • performance management • project management • staff meetings • training
Evaluation of innovative ideas may relate to:	• analysing consistency with overall goals, values or vision • assessing resource requirements and practicalities • assessing the potential to find 'champions' or supporters • evaluating the external factors that may impact on the idea • exploring the implications of ideas that may stretch or change existing ways of doing things
Collaborative work arrangements might be:	• cross section • vertical teams • within a section • working with supplier organisations or partner organisations
Ways that maximise opportunities for innovation may relate to:	• collaborating • collecting data • creative thinking • future scanning • getting feedback • making suggestions • networking
Ways of celebrating and	• congratulating the project team

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
promoting innovation may include:	• ensuring management acknowledgment • providing a newsletter story about the idea • using the idea to help foster other ideas • well-planned group incentive schemes
Impact of the physical environment may relate to:	• eating areas • extent to which design or style links with declared philosophies or objectives • external areas • general ambience of the work environment • location of different people • presence and ambience of relaxation areas • style of dÃ©cor • use of creative messages or images in the workplace • workspace design and dÃ©cor • workstation arrangements and opportunities for interaction
Formal and informal learning opportunities may include:	• coaching • conferences • formal training courses/programs • information seminars • job rotation • mentoring • online learning

BSBINN601B Manage organisational change

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to determine strategic change requirements and opportunities; and to develop, implement and evaluate change management strategies. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers with responsibilities that extend across the organisation or across significant parts of a large organisation. They may have a dedicated role in human resources management, human resources development, or work in a strategic policy or planning area. The unit takes a structured approach to change management and applies to people with considerable work experience and organisational knowledge.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

© Commonwealth of Australia, 2025 Powering Skills Organisation

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify change requirements and opportunities	1.1. Identify ***strategic change needs*** through an analysis of organisational objectives 1.2. Review existing policies and practices against strategic objectives to identify change requirements 1.3. Monitor trends in the ***external environment*** to identify events or trends that impact on the achievement of organisation's objectives 1.4. Identify major operational change requirements due to performance gaps, business opportunities or threats, or management decisions 1.5. Review and prioritise change requirements or opportunities with ***relevant managers*** 1.6. Consult specialists and experts to assist in the identification of major change requirements and opportunities
2. Develop change management strategy	2.1. Undertake cost-benefit analysis for high priority change requirements and opportunities 2.2. Undertake risk analysis, identify ***barriers to change***, and agree and record mitigation strategies 2.3. Develop change management project plan 2.4. Obtain approvals from relevant authorities to

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	confirm the change management process 2.5. Assign ***resources*** to the project and agree reporting protocols with relevant managers
3. Implement change management strategy	3.1. In consultation with relevant groups and individuals, develop communication or education plan to promote the benefits of the change to the organisation and to minimise loss 3.2. Arrange and manage activities to deliver the communication or education plans to relevant groups and individuals 3.3. Consult with relevant groups and individuals for input into the change process 3.4. Identify and respond to barriers to the change according to risk management plans 3.5. Action ***interventions and activities*** set out in project plan according to project timetable 3.6. Activate strategies for embedding the change 3.7. Conduct regular evaluation and review, and modify project plan where appropriate to achieve change program objectives

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- high level interpersonal and leadership skills to obtain acceptance of change processes and to inspire trust
- innovation skills to think laterally and to develop creative means to enable people to accept change positively
- learning skills to enable openness to new ideas and techniques which could contribute to ongoing organisational improvement
- planning and organising skills to sequence events and to enable staff to be clear in times of change or turbulence
- problem-solving skills to identify and respond to barriers to the change and analyse risks
- project management skills to implement the change management strategy
- teamwork skills to consult with relevant groups and individuals for input to the

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
change process • verbal communication skills to consult with relevant stakeholders and promote the change management plan
Required knowledge
• change management process or cycle • components of a change management project plan • impact of the external environment on change strategies • organisational behaviour • potential barriers to change • range of strategies for embedding change

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • development of a change process that detailsrationale for the change and its objectives • implementation of a change process • critical evaluation of how the change process was managed • demonstration of techniques for responding to resistance to change.
Context of and specific resources for assessment	Assessment must ensure access to appropriate documentation and resources normally used in the workplace.
Method of assessment	The following assessment methods are appropriate for this unit: • analysis of responses to case studies and scenarios around change management • assessment of reports on change management • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • review of change management project plan and communication

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	or education plans • review of records outlining consultation with relevant groups and individuals for input to the change process • oral or written questioning to assess knowledge of change management strategies.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Strategic change needs may include:	• actions arising from strategic planning activities to bring about major change in the organisation, which may relate to: • people • processes • technology • structure.
External environment may refer to factors that are:	• consumer-driven • ecological • economic • ethical • global • legal • political • social • technological • the drive to corporate sustainability • the move to a knowledge economy • workforce-driven.
Relevant managers may	• affected by the change

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
include those:	• holding a leadership position in the organisation • participating in the change project.
Barriers to change may include:	• challenges to group norms or established roles • existing organisational culture • existing reward systems • fear of loss of status, security, power or friends • interdepartmental rivalry or conflict • lack of involvement in the change • low morale • vested interests.
Resources may include:	• contractors • employees and managers • external and internal consultants • financial and budget allocation • hardware and software • physical assets.
Interventions and activities may include:	• action research • career planning • job redesign • sensitivity training • succession planning • surveys (with feedback) • team building • termination or redeployment • training • transition analysis.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine development needs	1.1. Systematically identify and implement ***learning and development needs*** in line with ***organisational requirements*** 1.2. Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and implemented 1.3. Encourage individuals to self-evaluate performance and identify areas for improvement 1.4. Collect ***feedback on performance*** of team members from relevant sources and compare with established team learning needs
2. Develop individuals and teams	2.1. Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry 2.2. Ensure that ***learning delivery methods*** are appropriate to the learning goals, the learning style of participants, and availability of ***equipment and resources*** 2.3. Provide workplace learning opportunities, and ***coaching and mentoring assistance*** to facilitate individual and team achievement of competencies 2.4. Create development opportunities that incorporates a

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	range of activities and support materials appropriate to the achievement of identified competencies 2.5. Identify and approve resources and time lines required for learning activities in accordance with organisational requirements
3. Monitor and evaluate workplace learning	3.1. Use feedback from individuals or teams to identify and implement improvements in future learning arrangements 3.2. Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support 3.3. Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning 3.4. Document and maintain records and reports of competency according to organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to receive and report on feedback, to maintain effective relationships and to manage conflict
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- leadership skills to gain trust and confidence of clients and colleagues
- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- negotiation skills to achieve mutually acceptable outcomes
- technology skills to support effective communication and presentation.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• codes of practice • privacy laws • occupational health and safety (OHS) • facilitation techniques to encourage team development and improvement • organisational policies, plans and procedures • career paths and competency standards relevant to the industry.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifying and implementing learning opportunities for others • giving and receiving feedback from team members to encourage participation in and effectiveness of team • creating learning plans to match skill needs • knowledge of relevant legislation.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of learning and development plans, policies and procedures • examples of documents relating to diversity policies and procedures.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	• oral or written questioning to assess knowledge of career paths and competency standards relevant to the industry • review of records and reports of competency.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • management units • other learning and development units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Learning and development needs may include:	• career planning/development • coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • performance appraisals • personal study • recognition of current competence/skills recognition • work experience/exchange/opportunities • workplace skills assessment
Organisational requirements may include:	• access and equity principles and practices • anti-discrimination and related policy • business and performance plans • confidentiality and security requirements • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals
Feedback on performance may include:	• formal/informal performance appraisals • obtaining feedback from clients • obtaining feedback from supervisors and colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery
Learning delivery methods may include:	• conference and seminar attendance • formal course participation • induction • involvement in professional networks • on-the-job coaching or mentoring • presentations/demonstrations • problem-solving • work experience
Equipment and resources may include:	• facilities • funding • guest speakers • technological tools and equipment • time • training equipment such as whiteboards and audio-visual equipment
Coaching and mentoring assistance may include:	• fair and ethical practice • non-discriminatory processes and activities • presenting and promoting a positive image of the collective group • problem-solving • providing encouragement • providing feedback to another team member • respecting the contribution of all participants and giving credit for achievements

BSBLED501A Develop a workplace learning environment

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to encourage and support the development of a learning environment in which work and learning come together. Particular emphasis is on the development of strategies to facilitate and promote learning, and to monitor and improve learning performance. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers. All managers have a prominent role in encouraging, supporting and facilitating the development of a learning environment in which work and learning come together. At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Create learning opportunities	1.1. Identify potential formal and informal ***learning opportunities*** 1.2. Identify ***learning needs*** of individuals in relation to the needs of the team and/or enterprise, and available learning opportunities 1.3. Develop and implement ***learning plans*** as an integral part of individual and team performance plans 1.4. Develop strategies to ensure that learning plans reflect the ***diversity of needs*** 1.5. Ensure organisational procedures maximise individual and team access to, and participation in, learning opportunities 1.6. Ensure effective liaison occurs with ***training and development specialists*** and contributes to learning opportunities which enhance individual, team and organisational performance

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Facilitate and promote learning	2.1. Develop strategies to ensure that workplace learning opportunities are used and that team members are encouraged to share their skills and knowledge to ***encourage a learning culture*** within the team 2.2. Implement organisational procedures to ensure workplace learning opportunities contribute to the development of appropriate workplace knowledge, skills and attitudes 2.3. Implement policies and procedures to encourage team members to assess their own competencies, and to identify their own learning and development needs 2.4. Share the benefits of learning with others in the team and organisation 2.5. Recognise workplace achievement by timely and appropriate recognition, feedback and rewards
3. Monitor and improve learning effectiveness	3.1. Use strategies to ensure that team and individual learning performance is monitored to determine the type and extent of any additional work-based support required, and any occupational health and safety (OHS) issues 3.2. Use feedback from individuals and teams to identify and introduce improvements in future learning arrangements 3.3. Make adjustments, negotiated with training and development specialists, for improvements to the efficiency and effectiveness of learning 3.4. Use processes to ensure that records and reports of competency are documented and maintained within the organisation's systems and procedures to inform future planning

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to: • deal with people openly and fairly

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• encourage colleagues to share their knowledge and skills • gain the trust and confidence of colleagues • use consultation skills effectively • literacy skills to access and use workplace information • planning and organisational skills to facilitate, promote and monitor learning by: • developing learning plans • establishing a workplace which is conducive to learning • evaluating the effectiveness of learning • identifying learning needs • negotiating learning arrangements with training and development specialists • selecting and using work activities to create learning opportunities • using coaching and mentoring to support learning.
Required knowledge
• management of relationships to achieve a learning environment • principles and techniques involved in the management and organisation of: • adult learning • coaching and mentoring • consultation and communication • improvement strategies • leadership • learning environment and learning culture • monitoring and reviewing workplace learning • problem identification and resolution • record keeping and management methods • structured learning • work-based learning.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • methods for reviewing performance development needs and techniques for providing feedback on those needs • models for planning professional development • options available for professional development • knowledge of relationship management required to achieve a learning environment.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • oral or written questioning to assess knowledge of the principles and techniques involved in the management and organisation of adult learning • review of the development and implementation of learning plans • evaluation of how workplace achievement is recognised • review of processes used to record and report competency.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Management.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	

Learning opportunities may include:	• structured learning activities conducted outside and within the workplace such as:
	  • accredited training through an independent organisation such as a state/territory OHS authority
	  • action learning
	  • short courses
	  • training through a Registered Training Organisation (RTO) leading to a nationally recognised Australian Qualifications Framework (AQF) qualification or Statement of Attainment
	  • workshops
	• workplace learning activities, that may also contribute to a recognised credential, such as:
	  • coaching
	  • exchange/rotation
	  • induction
	  • mentoring
	  • shadowing

Learning needs may include:	• developmental learning, for example the learning required to progress through an organisation and take on new tasks and roles • gaps between the competencies held by the employee, and the skills and knowledge required to effectively undertake workplace tasks
Learning plans may include:	• codes of conduct • key performance indicators • negotiated agreement with individual/s • OHS requirements • performance standards • team competencies • team roles and responsibilities • work outputs and processes

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Diversity of needs may include:	• learning needs that relate to social, cultural and other types of workplace diversity, such as the need for varied communication styles and approaches
Training and development specialists may be:	• internal • external
Encourage a learning culture may refer to:	• encouraging learning and sharing skills and knowledge across the work team and the wider organisation to develop competencies of individual team members and the team as a whole

BSBMGT402A Implement operational plan

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, producing short term plans for the department/section, planning and acquiring resources and providing reports on performance as required. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers are actively engaged in planning activities to achieve the measurable, stated objectives of the team and the organisation. This key role is carried out to provide safe, efficient and effective products and services to customer satisfaction within the organisation's productivity and profitability plans. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Implement operational plan	1.1. Collate, analyse and organise details of ***resource requirements*** in consultation with ***relevant personnel***, ***colleagues and specialist resource managers*** 1.2. Implement ***operational plans*** to contribute to the achievement of organisation's performance/business plan 1.3. Identify and use ***key performance indicators*** (KPIs) to monitor operational performance 1.4. Undertake ***contingency planning*** and ***consultation processes*** 1.5. Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes
2. Implement resource acquisition	2.1. Recruit and induct employees within ***organisation's policies***, ***practices and procedures*** 2.2. Implement plans for acquisition of physical

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel
3. Monitor operational performance	3.1. Monitor ***performance systems and processes*** to assess progress in achieving profit/productivity plans and targets 3.2. Analyse and use budget and actual financial information to monitor profit/productivity performance 3.3. Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies 3.4. Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely 3.5. Present recommendations for variation to operational plans to the ***designated persons***/***groups*** and gain approval 3.6. Implement ***systems***, ***procedures and records*** associated with performance in accordance with organisation's requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

Required knowledge

- principles and techniques associated with:
  - contingency planning
  - methods for monitoring and reporting on performance
  - monitoring and implementing operations and procedures
  - problem identification and methods of resolution

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• relevant budgeting and financial analysis, interpretation and reporting requirements • resource management systems at the tactical implementation level • resource planning and acquisition • tactical risk analysis including identification and reporting requirements.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • ability to monitor and adjust operational performance, produce short-term plans for the department or section, plan and acquire resources, and provide reports on performance as required • knowledge of principles and techniques associated with monitoring and implementing operations and procedures.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of documentation outlining contingency planning and consultation processes undertaken • demonstration of techniques in managing performance • evaluation of mentoring, coaching and supervision provided to support individuals and teams to use resources effectively, economically and safely.

EVIDENCE GUIDE	
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Resource requirements may refer to:	• goods and services to be purchased and ordered • human, physical and financial resources - both current and projected • stock requirements and requisitions
Relevant personnel, ***colleagues and specialist resource managers*** may include:	• colleagues and specialist resource managers • managers • occupational health and safety committees and other people with specialist responsibilities • other employees • people from a wide range of social, cultural and ethnic backgrounds, and people with a range of physical and mental abilities • supervisors
Operational plans may refer to:	• organisational plans • tactical plans developed by the department or section to detail product and service performance
Key performance indicators may refer to:	• measures for monitoring or evaluating the efficiency or effectiveness of a system, and which may be used to demonstrate accountability and to identify areas for improvements

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Contingency planning may refer to:	• contracting out or outsourcing human resources and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-use • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables • succession planning
Consultation processes may refer to:	• mechanisms used to provide feedback to the work team in relation to outcomes of consultation • meetings, interviews, brainstorming sessions, email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans
Organisation's policies, ***practices and procedures*** may include:	• organisational culture • Standard Operating Procedures • organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources • undocumented practices in line with organisational operations

Performance systems and processes may refer to:	• informal systems used by frontline managers for the work team in the place of existing organisation-wide systems
	• formal processes within the organisation to measure performance, such as:
	  • feedback arrangements
	  • individual and teamwork plans

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• KPIs • specified work outcomes
Designated persons*/*groups may include:	• other affected work groups or teams and groups designated in workplace policies and procedures • those who have the authority to make decisions and/or recommendations about operations such as workplace supervisors, other managers
Systems*, *procedures and records may include:	• databases and other recording mechanisms for ensuring records are kept in accordance with organisational requirements • individual and team performance plans • organisational policies and procedures relative to performance

BSBMGT403A Implement continuous improvement

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to implement the organisation's continuous improvement systems and processes. Particular emphasis is on using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position, closely associated with the creation and delivery of products and services, means that they have an important role in influencing the ongoing development of the organisation. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, and leadership and guidance of others.

Licensing/Regulatory Information

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Implement continuous improvement systems and processes	1.1. Implement ***systems*** to ensure that individuals and teams are actively encouraged and supported to ***participate in decision making processes***, assume responsibility and exercise initiative 1.2. Communicate the organisation's ***continuous improvement processes*** to individuals and teams, and obtain feedback 1.3. Ensure effective ***mentoring and coaching*** allows individuals and teams to implement the organisation's continuous improvement processes
2. Monitor and review performance	2.1. Use the organisation's systems and ***technology*** to monitor and review progress and to identify ways in which planning and operations could be improved 2.2. Improve ***customer service*** through continuous improvement techniques and processes

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.3. Formulate and communicate recommendations for adjustments to those who have a role in their development and implementation
3. Provide opportunities for further improvement	3.1. Implement ***processes to ensure that team members are informed of savings and productivity/service improvements*** in achieving the business plan 3.2. Document work performance to aid the identification of further opportunities for improvement 3.3. Manage records, reports and recommendations for improvement within the organisation's systems and processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills

• communication skills to:
  • coach and mentor team members
  • gain the commitment of individuals and teams to continuously improve
• innovation skills to design better ways of performing work.

Required knowledge

• principles and techniques associated with:
  • benchmarking
  • best practice
  • change management
  • continuous improvement systems and processes
  • quality systems.

BSBMGT502B Manage people performance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to all managers and team leaders who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement. The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers. This is a unit that all managers/prospective managers who have responsibility for other employees should strongly consider undertaking.

	objectives and policies 2.2. Train participants in the performance management and review process 2.3. Conduct performance management in accordance with organisational protocols and time lines 2.4. Monitor and evaluate performance on a continuous basis
3. Provide feedback	3.1. Provide informal feedback to staff on a regular basis 3.2. Advise relevant people where there is poor performance and take necessary actions 3.3. Provide on-the-job coaching when necessary to improve performance and to confirm ***excellence in performance*** 3.4. Document performance in accordance with the organisational performance management system 3.5. Conduct formal structured feedback sessions as necessary and in accordance with organisational policy
4. Manage follow up	4.1. Write and agree performance improvement and development plans in accordance with organisational policies 4.2. Seek assistance from human resources specialists where appropriate 4.3. Reinforce excellence in performance through recognition and continuous feedback 4.4. Monitor and coach individuals with poor performance 4.5. Provide support services where necessary 4.6. Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary 4.7. ***Terminate*** staff in accordance with legal and organisational requirements where serious misconduct occurs or ongoing poor-performance continues

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to articulate expected standards of performance, to provide effective feedback and to coach staff who need development • risk management skills to analyse, identify and develop mitigation strategies for identified risks • planning and organisation skills to ensure a planned and objective approach to the performance management system.
Required knowledge
• relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination • relevant awards and certified agreements • performance measurement systems utilised within the organisation • unlawful dismissal rules and due process • staff development options and information.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • documented performance indicators and a critical description and analysis of performance management system from the workplace • techniques in providing feedback and coaching for improvement in performance • knowledge of relevant awards and certified agreements.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.

EVIDENCE GUIDE	
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • demonstration of techniques in providing feedback and coaching • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of work plans, performance indicators, risk analysis,performance management and review processes, performance improvement and development plans.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other management units.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Performance standards mean:	• level of performance sought from an individual or group which may be expressed either quantitatively or qualitatively
Code of Conduct means:	• agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or an agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or customers
Performance indicators mean:	• measures against which performance outcomes are gauged

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Risk analysis means:	• determination of the likelihood of a negative event preventing the organisation meeting its objectives and the likely consequences of such an event on organisational performance
Performance management means:	• in accordance with relevant industrial agreements • process or set of processes for establishing a shared understanding of what an individual or group is to achieve, and managing and developing individuals in a way which increases the probability it will be achieved in both the short- and long-term
Excellence in performance means:	• regularly and consistently exceeding the performance targets established while meeting the organisation's performance standards
Termination means:	• cessation of the contract of employment between an employer and an employee, at the initiative of the employer within relevant industrial agreements

BSBMGT515A Manage operational plan

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans. Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to people who manage the work of others and operate within the parameters of a broader strategic and/or business plan. The task of the manager at this level is to develop and implement an operational plan to ensure that the objectives and strategies outlined in the strategic and/or business plan are met by work teams. However in some larger organisations operational plans may be developed by a strategic planning unit. At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

practical plan • technology skills to use software to produce and monitor the plan against performance indicators • planning and organisational skills • coaching skills to work with people with poor performance • numeracy skills to allocate and manage financial resources.
Required knowledge
• models and methods for operational plans • budgeting processes • alternative approaches to improving resource usage and eliminating resource inefficiencies and waste.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • development of an operational plan with details of how it will be implemented and monitored • knowledge of models and methods for operational plans.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of budgeting processes • review of operational plan, key performance

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	indicators and contingency plans • evaluation of employee recruitment and induction strategies • evaluation of processes implemented to acquire physical resources and services.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Resource requirements may include:	• goods and services to be purchased and ordered • human, physical and financial resources - both current and projected • stock requirements and requisitions
Relevant personnel, ***colleagues and specialist resource managers*** may include:	• employees at the same level or more senior managers • managers • occupational health and safety committee/s and other people with specialist responsibilities • supervisors • union or employee representatives
Consultation processes may refer to:	• email/intranet communications, newsletters or other processes and devices which ensure that all employees have the opportunity to contribute to team and individual operational plans • mechanisms used to provide feedback to the work team in relation to outcomes of

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	consultation • meetings, interviews, brainstorming sessions
Operational plans may also be termed:	• action plans • annual plans • management plans • tactical plans
Key performance indicators may refer to:	• measures for monitoring or evaluating the efficiency or effectiveness of a system which may be used to demonstrate accountability and to identify areas for improvements
Contingency plans may include:	• contracting out or outsourcing human resources and other functions or tasks • diversification of outcomes • finding cheaper or lower quality raw materials and consumables • increasing sales or production • recycling and re-using • rental, hire purchase or alternative means of procurement of required materials, equipment and stock • restructuring of organisation to reduce labour costs • risk identification, assessment and management processes • seeking further funding • strategies for reducing costs, wastage, stock or consumables • succession planning
Organisation's policies, ***practices and procedures*** may include:	• organisational culture • organisational guidelines which govern and prescribe operational functions, such as the acquisition and management of human and physical resources • Standard Operating Procedures • undocumented practices in line with organisational operations
Designated persons/***groups*** may include:	• groups designated in workplace policies and procedures • managers or supervisors whose roles and responsibilities include decision making on operations • other stakeholders such as Board members

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• other work groups or teams whose work will be affected by recommendations for variations

BSBMGT516C Facilitate continuous improvement

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives. Where managers are closely associated with the creation and delivery of products and services, they play an important part in influencing the ongoing development of the organisation. At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Lead continuous improvement systems and processes	1.1. Develop ***strategies*** to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative as appropriate 1.2. Establish ***systems*** to ensure that the organisation's ***continuous improvement processes*** are communicated to ***stakeholders*** 1.3. Ensure that change and improvement processes meet ***sustainability requirements*** 1.4. Develop effective mentoring and coaching processes to ensure that individuals and teams are able to implement and support the organisation's continuous improvement processes 1.5. Ensure that insights and experiences from business

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	activities are captured and accessible through ***knowledge management systems***
2. Monitor and adjust performance strategies	2.1. Develop strategies to ensure that systems and processes are used to monitor ***operational progress*** and to identify ways in which planning and operations could be improved 2.2. Adjust and communicate strategies to stakeholders according to organisational procedures
3. Manage opportunities for further improvement	3.1. Establish processes to ensure that team members are informed of outcomes of continuous improvement efforts 3.2. Ensure processes include ***recording of work team performance*** to assist in identifying further opportunities for improvement 3.3. Consider areas identified for further improvement when undertaking future planning

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills tocommunicate opportunities for improvement • learning skills to coach and mentor staff, using a range of methods to cater for different learning styles • innovation and lateral thinking skills to design better ways for achieving work outcomes • planning skills to establish and monitor systems and process for continuous improvement • teamwork and leadership skills to gain the confidence and trust of others
Required knowledge
• continuous improvement models • knowledge management systems • quality systems • sustainability principles

© Commonwealth of Australia, 2025 Powering Skills Organisation

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • development and use of a range of strategies and approaches that improve work outcomes or organisational functioning, using continuous improvement models • monitoring performance and customer service.
Context of and specific resources for assessment	Assessment must ensure access to appropriate documentation and resources normally used in the workplace.
Method of assessment	The following assessment methods are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of reports • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • observationof presentations • oral or written questioning to assess knowledge of quality systems • review of strategies developed to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative • evaluation of how customer-service strategies were communicated to stakeholders • review of documentation outlining work team performance.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Strategies may refer to:	• clarification of roles and expectations • communication devices and processes, such as intranet and email communication systems, to facilitate input into workplace decisions • long-term or short-term plans that factor in opportunities for team input • mentoring and 'buddy' systems to support team members to participate in decision making • performance plans • reward and recognition programs for high performing staff • training and development activities.
Systems may refer to:	• forums and meetings • newsletters and reports • policies and procedures • electronic communication devices.
Continuous improvement processes may include:	• cyclical audits and reviews of workplace, team and individual performance • evaluations and monitoring of effectiveness • modifications and improvements to systems, processes, services and products • policies and procedures that allow an organisation to systematically review and improve the quality of its products, services and procedures • seeking and considering feedback from a range of stakeholders.
Stakeholders may include:	• business or government contacts • funding bodies • individuals within the work team • internal and external contacts • organisation's clients and customers • professional associations • senior management and board members • unions and employee groups.
Sustainability requirements may	• addressing environmental and resource sustainability initiatives, such as environmental management systems,

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
include:	action plans, green office programs, surveys and audits • applying the waste management hierarchy in the workplace • complying with regulations and corporate social responsibility considerations for sustainability to enhance the organisation's standing in business and community environments • determining organisation's most appropriate waste treatment, including waste to landfill, recycling, re-use, recoverable resources and wastewater treatment • implementing ecological footprinting • implementing environmental management systems, e.g. ISO 14001:1996 Environmental management systems life cycle analyses • implementing government initiatives, e.g. Australian government's Greenhouse Challenge Plus • improving resource and energy efficiency • initiating and maintaining appropriate organisational procedures for operational energy consumption • introducing a green office program (a cultural change program) • introducing green purchasing • introducing national and international reporting initiatives, e.g. Global Reporting Initiative • introducing product stewardship • reducing emissions of greenhouse gases • reducing use of non-renewable resources • referencing standards, guidelines and approaches, such as sustainability covenants and compacts or triple bottom line reporting • supporting sustainable supply chain.
Knowledge management systems may include:	• best practice transfer • communities of practice • cross-project learning • expert directories • knowledge brokers' knowledge mapping • knowledge repositories • measuring and reporting intellectual capital • mentoring • performance management • post-project reviews • proximity and architecture

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• social software • storytelling.
Operational progress may refer to:	• customer service indicators • OHS indicators • productivity gains • success in meeting agreed goals and performance indicators.
Recording of work team performance may include:	• annotated performance plans • quantitative data, such as production figures • recommendations for improvement • records and reports.

BSBWHS301A Maintain workplace safety

Modification History

Release	Comments
Release 1	This Unit first released with *BSB07 Business Training Package version 7.0*. Replaces and is equivalent to BSBCMN311B Maintain workplace safety.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement and monitor the organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

Application of the Unit

This unit applies to workers who have a key role in maintaining workplace safety in an organisation. In their role they closely monitor aspects of work associated with the safe delivery of products and services, and they have an important responsibility in influencing ongoing safety in the workplace.

At this level, work will normally be carried out within known routines, methods and procedures but may also involve a number of complex or non-routine activities that require some discretion and judgement.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Assist with incorporating WHS policies and procedures into work team processes	1.1 Use ***WHS legislation*** as the basis for meeting the health and safety requirements of a small work team 1.2 Assist in providing and clearly explaining information to the work team about the organisation's ***WHS policies, procedures, programs and legislative requirements***, including the legal duties, powers, rights, obligations and responsibilities of individuals and parties inside and outside the workplace 1.3 Assist in regularly providing and clearly explaining information to the work team about ***identifying hazards*** and the outcomes of ***risk assessment***
2. Support participative arrangements for managing WHS	2.1 Implement and monitor ***organisational consultative procedures*** to facilitate participation of the work team in managing work area hazards 2.2 Promptly deal with issues raised through consultation according to organisational procedures for issue resolution 2.3 Encourage and assist work team members to contribute to managing WHS 2.4 Engage with individuals and work teams to identify and implement improvements in managing WHS feedback
3. Support the	3.1 Provide advice on ***WHS training needs*** of individuals and the

© Commonwealth of Australia, 2025 Powering Skills Organisation

organisation's procedures for providing WHS training	work team 3.2 Provide advice on strategies and opportunities for developing work team's WHS competence 3.3 Provide ***coaching and mentoring assistance*** to work team members to support the effective development of individual and team WHS competence
4. Participate in identifying hazards, and assessing and controlling risks for the work area	4.1 Provide advice on ***hazards in the work area*** according to organisational policies and procedures, and WHS legal requirements 4.2 Support the implementation of ***procedures to control risks*** using the hierarchy of control and according to organisational procedures and WHS legal requirements 4.3 Identify and report inadequacies in existing risk control measures according to organisational procedures, the hierarchy of control and WHS legal requirements 4.4 Accurately complete and maintain WHS incident records in the work area according to organisational procedures and WHS legislative requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - assess resources required to apply risk controls
  - assist with environmental monitoring
  - identify hazards and assess risks appropriate to own work area and job role
  - monitor incidents and hazards
  - evaluate effectiveness of risk controls
- coaching and mentoring skills to provide support to colleagues
- communication skills to communicate with people from a range of backgrounds and with a range of abilities
- literacy skills to understand workplace procedures and work instructions for identifying and reporting hazards, and for interpreting WHS signs and symbols.

Required knowledge

© Commonwealth of Australia, 2025 Powering Skills Organisation

- characteristics and composition of the work team
- hazards and associated risks in the workplace
- organisational policies and procedures relating to WHS, including hazard management, fire, emergencies, evacuation, incident investigation and reporting
- relevant Acts, regulations and codes of practice from all levels of government that impact on business operations, especially with regard to WHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- WHS aspects of other organisational systems and procedures.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • implementing organisational management systems and WHS procedures in own work area • understanding of and meeting WHS legal and organisational requirements as they apply to own work area and job role • knowledge of procedures for identifying hazards in the work area • knowledge of procedures for assessing and controlling risks to health and safety associated with those hazards according to organisational WHS procedures.

Context of and specific resources for assessment	Assessment must ensure access to:
	• safety processes relevant to the area of work
	• relevant information and documentation on compliance requirements, such as:
	  • organisational policies and procedures, standard operating procedures and plans
	  • relevant Acts, regulations, codes of practice, licensing requirements and standards
	• relevant internal and external information
	• appropriate office equipment and resources used in

© Commonwealth of Australia, 2025 Powering Skills Organisation

	the identification and rectification of WHS compliance breaches.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate • review of documents on WHS Acts, regulations, codes of practice, standards, policies and procedures developed and communicated to workers • analysis of responses to case studies and scenarios • demonstration of applying WHS legislation • oral or written questioning to assess knowledge of research and data-collection methods to obtain evidence of compliance with WHS legislation • assessment of duty of care arrangements.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

WHS legislation may include:	• WHS Acts, regulations and codes of practice
	• components of Acts and regulations, such as:
	  • dangerous goods
	  • environmental protection
	  • equal opportunity and anti-discrimination
	  • industrial relations
	  • privacy
	  • workers' compensation.

© Commonwealth of Australia, 2025 Powering Skills Organisation

WHS policies, procedures, programs and legislative requirements may include:	• consultative arrangements for workers in the work area • emergency plan and procedures • first aid provision, and medical practitioner contact and attention • hazard reporting procedures • incident investigation • plant and equipment maintenance and use • procedures for hazard identification • procedures for risk assessment, and the selection and implementation of risk control measures • purchasing policy and procedures • safe operating procedures and instructions • site access and egress • transport and storage of dangerous goods • use and care of personal protective equipment • use and storage of hazardous substances • WHS arrangements for on-site contractors, visitors and members of the public • WHS audits and safety inspections.
Individuals and parties may include:	• contractors and subcontractors • customers • persons conducting businesses or undertakings (PCBUs) or their officers • workers • other persons at a workplace • WHS entry permit holders • WHS inspectors • WHS regulators.

Methods for ***identifying hazards*** and ***risk assessment*** include:	• as specified in WHS Acts, regulations and codes of practice
	• checking equipment before and during work
	• consulting work team members
	• housekeeping
	• reviewing records, for example:
	  • equipment maintenance
	  • hazardous chemicals, including labels and safety data sheet (SDS) register, and dangerous goods storage list
	  • injury
	  • training plan
	• workplace inspections in area of responsibility.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Organisational consultative procedures may include:	• attendance of health and safety representatives at management meetings • counselling and disciplinary processes • early response to worker suggestions, requests, reports and concerns put forward to management • formal and informal meetings • health and safety committees • other committees, for example planning and purchasing.
WHS training needs may include:	• coaching, mentoring and/or supervision • formal and informal learning programs • internal and external training programs • personal study.
Coaching and mentoring assistance may include:	• explaining and clarifying • presenting and promoting a safe workplace • problem solving • providing encouragement • providing feedback to another team member • respecting the contribution of all participants and giving credit for achievements.

Hazards in the work area may include:	• anything that has the potential to cause harm
	• as specified in WHS Acts, regulations and codes of practice
	• blocked exits
	• ergonomically unsuitable workstations and task design, for example:
	  • repetitive work
	  • poor lighting or glary surfaces
	  • non-adjustable work surfaces and seating
	• internal or external threat of occupational violence or bullying
	• lack of adequate storage
	• reliance on low order control measure (such as personal protective equipment) to reduce worker risk exposure, instead of controlling the hazard itself
	• slippery and uneven floors
	• unguarded and poorly maintained machinery and equipment
	• unlabelled chemicals and substances
	• untidy or noisy work areas.

Procedures to control risks may	• as specified in WHS Acts, regulations and codes of

© Commonwealth of Australia, 2025 Powering Skills Organisation

include actions, such as:	practice
	• application of the hierarchy of control, namely:
	  • eliminate the risk
	  • reduce or minimise the risk through:
	  • engineering controls
	  • administrative controls
	  • personal protective equipment
	• regular consultation with workers.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Participate in workplace hazard identification	1.1 Participate in selecting hazard identification methods suitable for the workplace, as appropriate 1.2 Use selected methods to identify, report and record hazards according to workplace procedures and WHS Acts, regulations and codes of practice 1.3 Provide information and assistance to ***persons conducting hazard identification***
2. Participate in WHS risk assessment	2.1 Participate in selecting suitable risk assessment methods for the workplace, as appropriate 2.2 Use selected methods to assess and record risks according to workplace procedures and WHS Acts, regulations and codes of practice 2.3 Provide information and assistance to ***persons conducting risk assessments***
3. Promote and support worker consultation and participation in hazard identification and risk assessment	3.1 Advise workers of, and consult them about, hazard identification and risk assessment activities according to workplace WHS consultation and participation policies, procedures and processes 3.2 Encourage workers to participate appropriately in these activities according to workplace WHS consultation and participation policies, procedures and processes 3.3 Advise workers of, and consult them about, the results and outcomes of these activities according to workplace WHS consultation and participation policies, procedures and processes
4. Participate in developing, selecting and implementing WHS risk controls	4.1 Obtain workplace records of the outcomes of hazard identifications and risk assessments, and use them to participate in developing ***risk control options*** 4.2 Apply knowledge of WHS Acts, regulations, codes of

© Commonwealth of Australia, 2025 Powering Skills Organisation

	practice, other sources of information and guidelines, and workplace policies, procedures and processes to identify ***duty holders***
	4.3 Participate in selecting risk control options using ***appropriate criteria***
	4.4 Identify and report ***factors impeding*** successful implementation of selected risk controls
	4.5 Participate in developing a risk control ***implementation and evaluation plan***
	4.6 Provide information about the implementation and evaluation plan to ***individuals and parties***
5. Support effective worker consultation and participation in the risk control process	5.1 Advise workers of, and consult them about, developing risk control options, and selecting and implementing risk controls according to workplace WHS consultation and participation policies, procedures and processes
	5.2 Encourage workers to participate ***appropriately*** in these activities according to workplace WHS consultation and participation policies, procedures and processes

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - contribute effectively to hazard identification and risk assessment activities
  - communicate with people from a range of backgrounds and with a range of abilities
- literacy skills to:
  - participate in hazard identification and risk assessment activities, and to record the results and outcomes of these activities
  - communicate risk control activities to workers, health and safety committees, health and safety representatives, managers, supervisors, and persons conducting businesses or undertakings (PCBUs) or their officers
- organisational and time-management skills to sequence tasks and meet timelines
- planning skills to choose appropriate methods for hazard identification and risk assessment
- research skills to:
  - identify sources of, and obtain information about, relevant WHS hazards

© Commonwealth of Australia, 2025 Powering Skills Organisation

- help workplace parties to obtain information about hazards.
-

Required knowledge

- basic principles of incident causation and injury processes
- concept of hazards, risks and risk factors
- hazard identification and risk assessment methods
- internal and external sources of WHS information and data, and how to access them
- organisational design and structure
- organisational WHS policies, procedures, processes and systems
- range of WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- risk control options for different hazards and work situations
- risk control requirements as specified in WHS Acts, regulations, codes of practice, standards and guidance material, other relevant publications, workplace conditions and organisational WHS policies, procedures, processes and systems
- types of hazard and risk registers
- WHS legislative requirements about:
  - communication, consultation and participation
  - notification of incidents
  - recordkeeping
  - specific hazard identification and risk assessment methods
- workplace communication processes.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • collection of information about workplace hazards and participation in the identification of hazards in a workplace • using hazard identification methods appropriately • participating in risk assessments for hazards

© Commonwealth of Australia, 2025 Powering Skills Organisation

	identified in the workplace • participating in developing, selecting and implementing risk controls in a workplace • knowledge of relevant commonwealth and state or territory Acts, regulations, codes of practice standards and guidance material.

Context of and specific resources for assessment	Assessment must ensure access to:
	• relevant information on WHS compliance requirements, such as:
	  • organisational policies, standard operating procedures and plans
	  • relevant Acts, regulations, codes of practice, licensing requirements and standards
	• relevant internal and external data files
	• appropriate computer resources needed to manage the identification and rectification of breaches in compliance requirements.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • demonstration of applying hazard identification, risk assessment and risk control techniques in the workplace • direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate • oral or written questioning to assess knowledge of consequences and likelihood of risks associated with hazards in the workplace • review of research into WHS hazards and their associated risks • review of information provided to individuals and parties about selected risk controls • assessment of documentation completed when identifying hazards, assessing risks and developing risk control options.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• other BSB07 WHS units.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Persons conducting hazard identification and ***risk assessments*** may include:	• health and safety representatives • internal or external consultants and WHS specialists • PCBUs or their officers • WHS entry permit holders • WHS inspectors • workers • workplace assessors with experience in language or disability issues.

Risk control options may include:	• actions taken to eliminate risks entirely
	• actions taken to minimise risks by:
	  • eliminating the hazard
	  • substituting the hazard with something safer
	  • isolating the hazard
	  • reducing the risk through engineering controls
	  • reducing the level of harm by improving administrative controls, such as changing policies, procedures and processes or providing training
	• using personal protective equipment (PPE), such as:
	  • clothing and footwear
	  • face and eye protection
	  • hand protection
	  • head protection
	  • hearing protection
	  • respiratory protection.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Duty holders may include:	• as specified in WHS Acts:
	  • PCBUs or their officers
	  • workers
	  • other persons at a workplace.

Appropriate criteria may include:	• relevant sections of WHS Acts, regulations, and codes of practice • other sources of information and guidelines • workplace policies and procedures • workplace conditions.
Factors impeding may include:	• access to technology or information • cultural differences arising from ethnic diversity • geographic dispersal of workers • lack of a systematic approach to managing WHS in the workplace • lack of support from key management personnel • language, literacy and numeracy levels of the workforce • shift work and rostering arrangements • unrealistic timeframes • unsupportive workplace culture • workplace organisational structures.
Implementation and evaluation plan may include:	• how controls will be implemented and how factors impeding successful implementation will be addressed • identifying who has the responsibility for implementing the components of the plan and evaluating risk controls • timetable for implementing and evaluating risk controls.
Individuals and parties may include:	• contractors and subcontractors • external people and organisations • health and safety committees • health and safety representatives • managers and supervisors • PCBUs or their officers • self • unions • WHS entry permit holders • WHS inspectors • WHS regulators • workers.
Appropriate ways to participate	• briefings

© Commonwealth of Australia, 2025 Powering Skills Organisation

may include:	• communicating with workplace parties • education and training • obtaining and communicating feedback on controls • trialling new processes and/or equipment.

Unit Sector(s)

Regulation, Licensing and Risk – Work Health and Safety

© Commonwealth of Australia, 2025 Powering Skills Organisation

BSBWHS501A Ensure a safe workplace

Modification History

Release	Comments
Release 1	This Unit first released with *BSB07 Business Training Package version 7.0*. Replaces and is equivalent to BSBOHS509A Ensure a safe workplace.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area according to WHS legislative requirements.

Application of the Unit

This unit applies to managers working in a range of contexts. It takes a systems approach and addresses compliance with relevant legislative requirements.

Those who have or are likely to have responsibility for WHS as part of their broader management role should undertake this unit.

The unit is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or their officers (as defined by relevant legislation).

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Element	**Performance Criteria**
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Establish and maintain a WHS management system	1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation's commitment to complying with ***WHS legislation***
	1.2 Identify ***duty holders*** and define WHS responsibilities for all workplace personnel according to WHS legislation, policies, procedures and programs
	1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS)
2. Establish and maintain effective and compliant participation arrangements for managing WHS	2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation
	2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation
	2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand
3. Establish and maintain procedures for effectively identifying	3.1 Develop procedures for ongoing hazard identification, and assessment and ***control of associated risks***
	3.2 Include hazard identification at the planning, design and

© Commonwealth of Australia, 2025 Powering Skills Organisation

hazards, and assessing and controlling risks	evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled 3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements 3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures 3.5 Identify requirements for expert WHS advice, and request this advice as required
4. Evaluate and maintain a WHS management system	4.1 Develop and provide a WHS induction and training program for all workers as part of the organisation's training program 4.2 Use a system for ***WHS recordkeeping*** to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision 4.3 Measure and evaluate the WHSMS in line with the organisation's quality systems framework 4.4 Develop and implement improvements to the WHSMS to achieve organisational WHS objectives 4.5 Ensure compliance with the WHS legislative framework so that, as a minimum, WHS legal requirements are achieved

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical and problem solving skills to examine relevant workplace information and data to identify hazards, and to assess and control risks
- communication skills to consult with staff and to promote a safe workplace
- information technology skills to store and retrieve relevant workplace information and data
- literacy skills to adapt and communicate WHS policies that reflect WHS legislative requirements
- problem-solving skills to deal with complex and non-routine difficulties.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required knowledge

- hazard identification and risk-management processes
- hierarchy of risk control
- in-house and WHS legislative reporting requirements
- relevant WHS Acts, regulations and codes of practice that apply to the business operation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • detailed knowledge and application of all relevant WHS Acts, regulations and codes of practice • establishing and maintaining arrangements for managing WHS within the organisation's business systems and practices • identifying requirements for expert WHS advice.
Context of and specific resources for assessment	Assessment must ensure access to: • appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • review of WHS policies, information provided on the WHSMS, and information about the outcomes

© Commonwealth of Australia, 2025 Powering Skills Organisation

	of participation and consultation provided to workers • oral or written questioning to assess knowledge of WHS and WHS legislation • evaluation of WHS induction and training • review of WHS recordkeeping system.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

WHS legislation may include:	• applicable commonwealth and state or territory WHS Acts, regulations and codes of practice
	• common law duties to meet general duty of care requirements
	• WHS legislative and regulatory requirements for:
	  • effectively managing hazards
	  • establishing consultation arrangements, including those for health and safety representatives and health and safety committees
	  • providing information and training, including training in safe operating procedures; procedures for workplace hazards; hazard identification, risk assessment and risk control; and emergency and evacuation procedures
	• WHS legislative, regulatory and other requirements for the maintenance and confidentiality of records of occupational injury and disease.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Duty holders may include:	• as specified in WHS Acts:
	  • officers
	  • PCBUs or their officers
	  • workers
	  • other persons at a workplace.

Control of associated risks may include:	• administrative • as specified in WHS Acts, regulations and codes of practice • counselling/disciplinary processes, such as those associated with alcohol and other drugs • education about alcohol and other drugs work-related issues • engineering • hazard elimination • housekeeping and storage • issue resolution • personal protective equipment • purchasing of supplies and equipment • workplace inspections, including plant and equipment.

WHS recordkeeping may relate to:	• audit and inspection reports
	• consultation, such as:
	  • meetings of health and safety committees
	  • work team meeting agendas, including WHS items and actions
	• first aid/medical post records
	• hazardous chemicals registers
	• induction, instruction and training
	• manufacturer and supplier information, including dangerous goods storage lists
	• plant and equipment maintenance and testing reports
	• workers' compensation and rehabilitation records
	• workplace environmental monitoring records.

Elements and Performance Criteria Pre-Content

Element	**Performance Criteria**
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Assist with providing appropriate advice about legal frameworks relevant to WHS	1.1 Ensure assistance provided is appropriate to own job responsibilities and functions 1.2 Understand own limits of skills, knowledge and competence when providing assistance 1.3 Identify situations where it is necessary to seek advice from or refer matters to ***legal advisors and others*** and seek or refer accordingly
2. Assist with determining legal frameworks relevant to WHS	2.1 Monitor current ***WHS legislation and other legislation, related documentation and other sources*** relevant to the organisation and its operations 2.2 Identify changes, amendments and emerging issues in legislation relevant to the organisation 2.3 Assist with determining current and future legal requirements relevant to WHS in the workplace 2.4 Assist with identifying, confirming, reviewing and updating the duties, rights and obligations of individuals and parties as specified in legislation 2.5 Communicate changes, amendments and emerging issues in legislation to individuals and parties 2.6 Seek advice from legal advisors and other sources where necessary
3. Assist with providing advice on compliance with legal frameworks relevant to WHS	3.1 Assist with providing advice to individuals and parties about their compliance with legal duties, rights and obligations under WHS legislation and other legislation relevant to WHS 3.2 Assist with providing advice to individuals and parties about the functions and powers of WHS and other relevant regulators, and how they are exercised

© Commonwealth of Australia, 2025 Powering Skills Organisation

4. Assist with evaluating and implementing measures to comply with legal frameworks relevant to WHS	4.1 Assist with assessing how the workplace complies with WHS and other relevant legislation 4.2 Assist with identifying the training needs of individuals and parties about duties, rights and obligations 4.3 Assist with developing, delivering and evaluating training to meet identified training needs and any legal requirements for training 4.4 Assist with developing, implementing and evaluating changes to ***workplace procedures, activities, processes, policies and systems*** that will achieve compliance

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - read and understand WHS-related legislation and information
  - identify, analyse and address training needs
- communication skills to:
  - communicate with and advise people from a range of backgrounds and with a range of abilities
  - work with legal advisors and others
- literacy skills to prepare reports for a range of target groups, including health and safety committees, health and safety representatives, managers, supervisors, and persons conducting businesses or undertakings (PCBUs) or their officers.

Required knowledge

- duties, rights and obligations of individuals and parties as specified in relevant WHS legislation and where this information is located in WHS legislation
- effective consultation and participation processes
- existing work health and safety information system (WHSIS) or other workplace information systems
- functions and powers of WHS regulator, and how they are exercised
- limits of own skills, knowledge and competence when providing assistance
- objectives and principles underpinning WHS legislation and related legislation

© Commonwealth of Australia, 2025 Powering Skills Organisation

- relationship between the WHS Act, regulations, codes of practice, standards and guidance material, and other legislation relevant to WHS
- relevant sections of commonwealth and state or territory WHS Acts, regulations, codes of practice, standards, guidance material and other instruments
- sources of information about WHS legislation and related legislation
- systematic approaches to managing and complying with WHS legislation
- workplace policies, procedures, activities, processes and systems that will achieve compliance with WHS legislation and related legislation.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • assisting with determining current and future legal frameworks relevant to WHS in the workplace • assisting with providing advice about legal and regulatory frameworks for WHS legislation • providing advice on WHS-related legal compliance issues, including training needs analyses, talks, briefings, training sessions, and paper-based or electronic materials • seeking timely and relevant advice from legal advisors and others • using this advice to ensure legislative compliance.
Context of and specific resources for assessment	Assessment must ensure access to: • relevant Acts, regulations, codes of practice, standards and guidance material • other appropriate workplace documentation • reports from other parties consulted in ensuring compliance with WHS-related legislation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate • demonstration of activities used to assist with compliance with WHS legislation and related legislation • oral or written questioning to assess knowledge of how advice was provided in the workplace, interpreting and applying legislation, and reporting requirements of legislation • review of WHS action plans, documented WHS training needs and associated documents, and recording processes undertaken to ensure WHS-related compliance • simulated project-based activities, scenarios, case studies, role plays or actual activities associated with applying legislative frameworks for WHS.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBWHS602A Facilitate WHS activities • BSBWHS603A Implement WHS risk management • BSBWHS604A Evaluate the WHS performance organisations.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legal advisors and others may include:	• lawyers • WHS inspectors • WHS regulators • other regulators • WHS specialists.
WHS legislation and other	• common law relevant to WHS

legislation, related documentation and other sources may include:	• consumer protection
	• current applicable commonwealth and state or territory WHS Acts, regulations and codes of practice
	• current applicable commonwealth and state or territory:
	  • workers' compensation legislation
	  • equal opportunity legislation
	  • food safety legislation
	  • health legislation
	  • privacy legislation
	  • trade practices legislation
	• other documents, such as policies, standards, guidance material and publications, alerts and prosecutions information issued by regulators
	• regulator websites.

Individuals and parties may include:	• contractors and subcontractors
	• customers
	• duty holders as specified in WHS Acts:
	  • PCBUs or their officers
	  • workers
	  • other persons at a workplace
	• suppliers
	• health and safety committees
	• health and safety representatives
	• unions
	• WHS entry permit holders
	• WHS inspectors
	• WHS regulators
	• Workers.

Workplace procedures, activities, processes, policies and systems may include:	• human resources and other management systems
	• risk-management systems and processes
	• WHS management systems and processes
	• WHS-related planning and design activities and processes, such as:
	  • information technology systems
	  • jobs and tasks
	  • maintenance processes and procedures
	  • physical and psychosocial work environments
	  • plant, equipment and tools, including their specification and acquisition

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• shift work and general work rosters • specification and acquisition of services • work and workplace systems • work processes, policies, structures and procedures • workplace communications systems and processes • workstations and work areas • work processes and activities • workers' compensation, claims management and return-to-work systems and processes • WHSIS and processes.

BSBWHS602A Facilitate WHS activities

Modification History

Release	Comments
Release 1	This Unit first released with *BSB07 Business Training Package version 7.0*.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify, engage, communicate and work effectively with key work health and safety (WHS) personnel and stakeholders; and to work with WHS and other professionals.

It involves identifying and engaging with key WHS personnel and stakeholders, selecting communication strategies to provide them with information and tools for managing WHS, and gaining feedback to evaluate the effectiveness of facilitation processes.

Application of the Unit

This unit applies to individuals who are required to coordinate and facilitate WHS activities. Working with WHS and other professionals is also an important component of facilitation.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	**Performance Criteria**
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Identify and engage with key WHS personnel and stakeholders	1.1 Apply knowledge of workplace and organisation to identify ***key WHS personnel and stakeholders*** 1.2 Liaise and negotiate with key WHS personnel and stakeholders individually and in groups, both formally and informally 1.3 Review effectiveness of working relationships with key WHS personnel and stakeholders, and make changes to achieve any required improvements 1.4 Apply professional practice and ethics in working with others
2. Communicate effectively with key WHS personnel and stakeholders	2.1 Identify WHS information and communication needs and requirements of key WHS personnel and stakeholders 2.2 Identify and implement communication strategies using appropriate tools and methods 2.3 Review effectiveness of communication strategies and make changes to achieve any required improvements
3. Work effectively with key WHS personnel and stakeholders	3.1 Determine WHS roles, functions and responsibilities of self and key WHS personnel and stakeholders 3.2 Collaborate with key WHS personnel and stakeholders to gain agreement on roles, functions and responsibilities 3.3 Fulfil own WHS roles, functions and responsibilities and support others to fulfil their WHS roles, functions and responsibilities 3.4 Review own effectiveness and that of others and work with

© Commonwealth of Australia, 2025 Powering Skills Organisation

	others to achieve required improvements
4. Work with WHS and other professionals	4.1 Recognise scope of WHS competencies of self and others 4.2 Identify ***particular WHS issues*** beyond own role, responsibilities and competencies requiring WHS and other professional expertise 4.3 Identify appropriate types and sources of expertise required to address particular WHS issues 4.4 Collaborate with WHS and other professionals to develop and agree on scope of work to be undertaken, types of services required and how these professionals will work with self and others 4.5 Facilitate and support the work to be undertaken 4.6 Evaluate if the work undertaken was that required and, if necessary, respond to ensure it is

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to analyse relevant workplace information and data
- facilitation, communication and negotiation skills to:
  - apply listening techniques
  - conduct formal and informal meetings
  - contribute structure and process to interactions so groups are able to function effectively and make high-quality decisions
  - employ consultation and negotiation skills to develop plans and to support, implement and monitor designated actions
  - enable groups to work effectively, to collaborate and achieve synergy
  - expand and confine conversations as required to meet objectives
  - gain commitment
  - prepare reports and communications for a range of target groups, including WHS committee, WHS representatives, managers, supervisors and other stakeholders
  - recognise emotional states in self and others, and work with key WHS personnel and/or WHS and other professionals to respond effectively
  - relate effectively to personnel at all levels of the organisation, WHS and other professionals

© Commonwealth of Australia, 2025 Powering Skills Organisation

    - support everyone to do their best thinking and practice
    - use language appropriate to the work team and the task
    - work with objections and other difficult situations
- information technology skills to:
    - access and download internal and external information and data on WHS
    - prepare reports, and analyse and evaluate a range of information and data formats, including graphs, maps, matrices and technical reports
    - use a range of communication media
    - use electronic information and data systems to enter workplace information and data, and produce graphical representation
- organisational skills to manage own tasks within a timeframe
- project-management skills to:
    - achieve continuous improvement and change in WHS matters
    - contribute to strategic WHS performance of the organisation
- research skills to obtain internal and external WHS information and data.

Required knowledge

- benefits, limitations and use of a range of communication strategies and tools appropriate to the workplace
- ethics related to professional practice
- formal and informal communication and consultation processes, and key personnel related to communication
- key WHS personnel and stakeholders
- language, literacy and cultural profile of the work team
- legal liability in relation to providing advice
- nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- organisational behaviour and culture as they impact on WHS and on change
- organisational culture as it impacts on the work team
- organisational WHS policies, procedures, processes and systems
- particular WHS issues requiring WHS and other professional expertise to be addressed
- principles of effective meetings, including agendas, action planning, chair and secretarial duties, minutes and action items
- roles and responsibilities in relation to communication and consultation for health and safety committees, health and safety representatives, line management, workers and inspectors
- roles, functions, skills and knowledge of WHS and other professionals
- workplace policies, procedures, processes, systems, activities, actions and arrangements that support and enable effective consultation on, and participation in, effective WHS management.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • understanding of own communication, facilitation and negotiation skills and knowledge • acknowledging WHS issues that are beyond own skills, knowledge, role and responsibilities and that require WHS and other professional involvement • developing a comprehensive brief or case to engage a WHS or other professional to address a particular WHS issue.
Context of and specific resources for assessment	Assessment must ensure access to: • a workplace, including key WHS personnel and stakeholders • organisational documentation, information and data.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate • demonstration of techniques used to facilitate, negotiate and communicate • observation of performance in role plays • observation of presentations • oral or written questioning to assess knowledge of communication, facilitation and negotiation skills and knowledge • evaluation and documentation of performance outcomes.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBWHS601A Apply legislative frameworks for WHS • BSBWHS603A Implement WHS risk management • BSBWHS606A Conduct a WHS audit.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Key WHS personnel and stakeholders may include:	• contractors and subcontractors
	• customers
	• duty holders as specified in WHS Acts:
	  • persons conducting businesses or undertakings (PCBUs) or their officers
	  • workers
	  • other persons at a workplace
	• health and safety committees
	• health and safety representatives
	• suppliers
	• unions
	• WHS and other professionals
	• WHS entry permit holders
	• WHS inspectors
	• WHS regulators
	• Workers.

Particular WHS issues may include:	• WHS issues that arise:
	  • before changes to work practices and systems of work are introduced
	  • during periodic WHS reviews of the business operations
	  • prior to major shut-down, decommissioning or

© Commonwealth of Australia, 2025 Powering Skills Organisation

	demolition of premises or plant • when a hazardous exposure or incident, injury, illness or adverse result of environmental or health monitoring indicates that risk controls are inadequate • when developing and implementing systems for the long-term management of WHS • when establishing new operations or projects • when establishing workplace WHS consultative and issue-resolution structures • when managing complex issues related to psychological health, such as bullying and stress • when planning to modify the work premises, plant, substances or materials for use at work • when new WHS information and data become available from an authoritative source.

BSBWHS603A Implement WHS risk management

Modification History

Release	Comments
Release 1	This Unit first released with *BSB07 Business Training Package version 7.0*. Replaces but is not equivalent to BSBOHS603B Analyse and evaluate OHS risk.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement work health and safety (WHS) risk management.

The unit addresses the processes and techniques necessary for the implementation of WHS risk management.

Application of the Unit

This unit applies to people who apply advanced practical knowledge to coordinate, facilitate and maintain the WHS program within an organisation.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Manage effective WHS risk-management consultation and participation processes	1.1 Identify ***individuals and parties*** who need to participate in, contribute to, and be consulted during all stages of WHS risk management 1.2 Apply knowledge of effective WHS consultation and participation processes to review existing consultation and participation processes 1.3 Modify existing consultation and participation processes and/or implement new processes to ensure effective consultation and participation during all stages of WHS risk management 1.4 Use consultation and participation processes to ensure WHS risk-management processes are appropriate to the organisation and the WHS risks
2. Arrange for necessary resources during WHS risk management	2.1 Identify necessary ***resources*** required for all stages of WHS risk management 2.2 Budget for necessary resources 2.3 Procure resources and ensure availability as required
3. Review existing WHS risk-management processes	3.1 Access existing workplace WHS information and data 3.2 Identify existing WHS risk-management processes 3.3 Consult with individuals and parties on WHS risk-management processes 3.4 Review processes with regard to effectiveness of current risk controls, lessons learnt from ***events***, changes in the internal and external contexts, emerging risks and performance against

© Commonwealth of Australia, 2025 Powering Skills Organisation

	indicators 3.5 Use results of review to develop and implement effective WHS risk management
4. Establish the WHS risk-management framework	4.1 Identify ***sources of information and data*** 4.2 Obtain information and data to determine the purposes, objectives, principles and framework of a systematic approach to WHS risk management
5. Establish the context for WHS risk management	5.1 Apply knowledge of ***WHS legislation***, to identify ***duty holders*** and legislative requirements for WHS risk management 5.2 Identify individuals and parties impacting on WHS risk management 5.3 Identify factors that will impact on WHS risk management 5.4 Establish ***context*** of the WHS risk-management process 5.5 Define ***risk criteria***
6. Assess risk	6.1 Apply knowledge of WHS hazards and risks to undertake ***hazard identification*** 6.2 Apply knowledge of WHS legislation, WHS risk assessment and workplace WHS information and data to undertake ***risk analysis and evaluation***
7. Treat risk	7.1 Apply knowledge of outcomes of risk assessment, WHS hazards and risk controls, and WHS legislation to select ***risk treatment options*** 7.2 Prepare and implement risk treatment
8. Monitor, review and record the WHS risk-management process	8.1 Apply knowledge of the organisation's WHS management system (WHSMS) to monitor and review WHS risk management 8.2 Apply knowledge of the organisation's WHS information system (WHSIS) to record the WHS risk-management process

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to analyse relevant workplace information and data

© Commonwealth of Australia, 2025 Powering Skills Organisation

- communication skills to:
  - conduct effective formal and informal meetings and communicate effectively with personnel at all levels of the organisation, and with external parties and individuals
  - use language appropriate to the work team and the task
  - write policies, procedures and plans
- consultation and negotiation skills to:
  - develop plans
  - implement and monitor designated actions
- information technology skills to:
  - access and enter internal and external information and data on WHS
  - use a range of communication media
- numeracy skills to:
  - analyse workplace information and data
  - carry out calculations
  - identify trends
- organisational skills to manage own tasks within a timeframe
- project-management skills to:
  - achieve continuous improvement
  - action processes about WHS matters
- research skills to:
  - access relevant WHS information and data
  - identify areas for improvement
  - interpret information and data.

Required knowledge

- any existing workplace WHSIS or other information systems
- any existing workplace WHSMS or other information systems
- different definitions of hazard and risk and how they are used by different individuals and parties
- internal and external sources of WHS information and data, and how to access them
- legislative requirements for WHS
- organisational WHS policies, procedures, processes and systems
- other functional areas that impact on the management of WHS
- principles and practices of a systematic approach to managing WHS
- principles of duty of care, including concepts of causation, foreseeability and preventability
- principles of incident causation and injury processes
- range of risk analysis and assessment techniques and tools, and their application and limitations

© Commonwealth of Australia, 2025 Powering Skills Organisation

- relevant and applicable Australian standards and publications, including:
  - AS/NZS ISO 31000–2009 Risk management – Principles and guidelines
  - Standards Australia publication HB 327:2010 Communicating and consulting about risk (Companion to AS/NZS ISO 31000:2009)
  - Standards Australia publication HB 158-2010 Delivering assurance based on ISO 31000:2009 – Risk management – Principles and guidelines
  - relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications (including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks)
- risk as the effect of uncertainty on objectives
- risk management as a duty of persons conducting businesses or undertakings (PCBUs) or their officers under WHS legislation
- standard industry controls for a range of hazards
- techniques, tools and processes for identifying and controlling health and safety hazards and risks:
  - hazard and risk checklists
  - hazard hunts
  - job safety analyses
  - manifests and registers, including for dangerous goods, hazardous chemicals and plant
  - safe work method statements
  - surveys using questionnaires, interviews and other survey techniques
  - workplace inspections and walk throughs
- toxicology of hazardous chemicals and potential health effects in the workplace.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • documented risk-management plans • actions taken as part of the risk-management process • ensuring continuous improvement is part of the ongoing review process • knowledge of relevant sections of relevant Australian standards, WHS Acts, regulations and

© Commonwealth of Australia, 2025 Powering Skills Organisation

	codes of practice, including the Safe Work Australia model code of practice: How to Manage Work Health and Safety Risks.
Context of and specific resources for assessment	Assessment must ensure access to: • actual workplaces and stakeholder groups • office equipment and resources • relevant legislation, standards and guidelines • workplace documentation • reports from other parties consulted during the approach to WHS risk management.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • demonstration of techniques used to identify, analyse, evaluate, control and monitor risks • direct questioning combined with review of portfolios of evidence and third-party reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • oral or written questioning • review of information and data communicated to stakeholders about the WHS risk-management process • assessment of comparison of outcomes of WHS risk analysis with criteria • review of documentation of process and outcomes of analysis and evaluation of WHS risk of a task or process.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • BSBWHS601A Apply legislative frameworks for WHS • BSBWHS602A Facilitate WHS activities.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Individuals and parties may include:	• contractors and suppliers • health and safety committees • health and safety representatives • industry associations • managers and supervisors • PCBUs or their officers • unions • WHS inspectors • WHS regulators • WHS specialists • workers • other specialists.
Resources may include:	• access to internal and external sources of information • equipment • external personnel, including WHS specialists and advisors • information technology resources for communication, planning, management, documentation and risk-management software • internal personnel • training and training resources.
Events may include:	• failures • near misses • successes • trends.
Sources of information and data may include:	• Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines • Standards Australia publication HB 327:2010 Communicating and consulting about risk (Companion to AS/NZS ISO 31000:2009) • Standards Australia publication HB 158-2010 Delivering assurance based on ISO 31000:2009 – Risk management – Principles and guidelines

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks • industry associations • unions • WHS specialists.
WHS legislation may include:	• Acts • regulations • codes of practice.

Duty holders may include:	• as specified in WHS Acts:
	  • PCBUs or their officers
	  • workers
	  • other persons at a workplace.

Context may include:	• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines • as specified in WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks • organisational requirements, such as integration with work processes, and other organisational systems, for example environmental, information technology, human resources, quality and management.
Risk criteria may include:	• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines • as specified in WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks.
Hazard identification may include:	• analysing existing WHS information – ‘desktop identification’ • as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines • incident investigations • using hazard registers • workplace inspections.
Risk analysis and evaluation may include:	• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines • assessing who may be harmed and how many may

© Commonwealth of Australia, 2025 Powering Skills Organisation

	be harmed by a hazard • examining 'acceptability' of a risk • examining severity and likelihood of harm occurring • gathering information on hazards to see what harms they may cause • meeting requirements of (as specified in) WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks • using risk level matrices to rate and prioritise risks
Risk treatment options may include:	• as specified in Australian Standard AS/NZS ISO 31000–2009 Risk management – Principles and guidelines • options based on the as low as reasonably practicable (ALARP) principle • options based on the hierarchy of control • options that meet the requirements of WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks.

BSBWOR301B Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with *BSB07 Business Training Package version 6.0* Revised unit. Performance criteria and required skills updated to focus on learning and development practices, KPIs and compliance with policy and procedures. Replaces BSBWOR301A Organise personal work priorities and development

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to organise own work schedules, to monitor and obtain feedback on work performance, and to maintain required levels of competence. Operators may exercise discretion and judgement using appropriate theoretical knowledge of work scheduling and performance improvement to provide technical advice and support to a team.

Application of the Unit

This unit applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.*

Elements and Performance Criteria

1. Organise and complete own work schedule	1.1 Ensure that ***work goals, objectives*** or ***KPIs*** are understood, negotiated and agreed in accordance with ***organisational requirements***
	1.2 Assess and prioritise workload to ensure tasks are completed within identified timeframes
	1.3 Identify ***factors affecting the achievement of work objectives*** and incorporate contingencies into work plans
	1.4 Use ***business technology*** efficiently and effectively to manage and monitor scheduling and completion of tasks
2. Monitor own work performance	2.1 Accurately monitor and adjust personal work performance through self-assessment to ensure achievement of tasks and compliance with legislation and work processes or KPIs
	2.2 Ensure that ***feedback on performance*** is actively sought and evaluated from colleagues and clients in the context of individual and group requirements
	2.3 Routinely identify and report on variations in the quality of and ***products and services*** according to organisational requirements
	2.4 Identify ***signs of stress*** and effects on ***personal wellbeing***
	2.5 Identify ***sources of stress*** and access appropriate ***supports and resolution strategies***
3. Coordinate personal skill development and learning	3.1 Identify personal learning and professional development needs and skill gaps using self-assessment and advice from colleagues and clients in relation to role and organisational requirements
	3.2 Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel
	3.3 Access, complete and record ***professional development***

© Commonwealth of Australia, 2025 Powering Skills Organisation

	opportunities to facilitate continuous learning and career development 3.4 Incorporate formal and informal feedback into review of further learning needs

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to give and receive constructive feedback relating to development needs
- literacy skills to read and understand the organisation's procedures
- planning skills to organise work priorities according to work goals and objectives
- problem-solving skills to solve routine problems
- self-management skills to:
  - comply with policies and procedures
  - consistently evaluate and monitor own performance
  - seek learning opportunities.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
  - anti-discrimination legislation
  - ethical principles
  - codes of practice
  - privacy laws
  - occupational health and safety (OHS)
- organisational policies, plans and procedures
- methods to elicit, analyse and interpret feedback
- principles and techniques of goal setting, measuring performance, time management and personal assessment
- competency standards and how to interpret them in relation to self
- methods to identify and prioritise personal learning needs.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • preparing work plans • scheduling and prioritising work objectives and tasks • knowledge of the principles and techniques of goal setting, measuring performance, time management and personal assessment.
Context of and specific resources for assessment	Assessment must ensure: • access to an actual workplace or simulated environment • access to office equipment and resources • examples of work schedules and performance improvement plans.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of self-assessment documentation outlining learning and development needs • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of methods to identify and prioritise personal learning needs • evaluation of planning for personal skill development activities and professional development opportunities.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work goals and objectives may include:	• budgetary targets • production targets • reporting deadlines • sales targets • team and individual learning goals • team participation.
KPIs may include:	• key performance indicators on customer satisfaction • key performance indicators on customer effort • monitoring time taken to answer calls • operating within reporting protocols • score tools such as net promoter • understanding metrics.
Organisational requirements may include:	• access and equity principles and practice • business and performance plans • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals.
Factors affecting the achievement of work objectives may include:	• budget constraints • competing work demands • environmental factors such as time, weather • resource and materials availability • technology/equipment breakdowns • unforeseen incidents • workplace hazards, risks and controls.
Business technology may include:	• computer applications • computers • email

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• facsimile machines • internet/extranet/intranet • modems • personal schedulers • photocopiers • printers • scanners.
Feedback on performance may include:	• formal/informal performance appraisals • obtaining feedback from clients • obtaining feedback from supervisors and colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery.
Products and services may include:	• either products or services • goods • ideas • infrastructure • private or public sets of benefits.
Signs of stress may include:	• absence from work • alcohol or other substance abuse • conflict • poor work performance.
Personal wellbeing may include:	• cultural • emotional • social • spiritual.
Sources of stress may include:	• complex tasks • cultural issues • work and family conflict • workloads.
Supports and resolution strategies may include:	• awareness raising • counselling • employee assistance programs (EAP) • family support • group activities • job design • mediation • sharing load • time off • training.
Professional development	• career planning/development

© Commonwealth of Australia, 2025 Powering Skills Organisation

opportunities may include:	• coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • performance appraisals • personal study • quality assurance assessments and recommendations • recognition of current competence/skills recognition • work experience/exchange/opportunities • workplace skills assessment.

BSBWOR401A Establish effective workplace relationships

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to collect, analyse and communicate information and to use that information to develop and maintain effective working relationships and networks, with particular regard to communication and representation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers play an important role in developing and maintaining positive relationships in internal and external environments so that customers, suppliers and the organisation achieve planned outputs and outcomes. They play a prominent part in motivating, mentoring, coaching and developing team cohesion through providing leadership for the team and forming the bridge between the management of the organisation and team members. At this level, work will normally be carried out within routine and non routine methods and procedures, which require planning and evaluation, and leadership and guidance of others.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Collect, analyse and communicate information and ideas	1.1. Collect relevant ***information*** from appropriate sources and analyse and share with the work team to improve work performance 1.2. Communicate ideas and information in a manner which is appropriate and sensitive to the cultural and social diversity of the audience and any specific needs 1.3. Implement ***consultation processes*** to encourage employees to contribute to issues related to their work, and promptly relay feedback to the work team in regard to outcomes 1.4. Seek and value contributions from internal and external sources in developing and refining new ideas and approaches

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5. Implement ***processes*** to ensure that issues raised are resolved promptly or referred to ***relevant personnel*** as required
2. Develop trust and confidence	2.1. Treat all internal and external contacts with integrity, respect and empathy 2.2. Use the ***organisation's social***, ***ethical and business standards*** to develop and maintain effective relationships 2.3. Gain and maintain the trust and confidence of ***colleagues***, ***customers and suppliers*** through competent performance 2.4. Adjust interpersonal styles and methods to meet organisation's social and cultural environment 2.5. Encourage other members of the work team to follow examples set, according to ***organisation's policies and procedures***
3. Develop and maintain networks and relationships	3.1. Use ***networks*** to identify and build relationships 3.2. Use networks and other work relationships to provide identifiable benefits for the team and organisation
4. Manage difficulties into positive outcomes	4.1. Identify and analyse difficulties, and take action to rectify the situation within the requirements of the organisation and relevant legislation 4.2. Guide and support colleagues to resolve work difficulties 4.3. Regularly review and improve ***workplace outcomes*** in consultation with relevant personnel 4.4. Manage ***poor work performance*** within the organisation's processes 4.5. Manage conflict constructively within the organisation's processes

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• coaching and mentoring skills to provide support to colleagues

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

• literacy skills to research, analyse, interpret and report information
• relationship management and communication skills to:
  • deal with people openly and fairly
  • forge effective relationships with internal and/or external people, and to develop and maintain these networks
  • gain the trust and confidence of colleagues
  • respond to unexpected demands from a range of people
  • use supportive and consultative processes effectively.

Required knowledge

• relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety (OHS), and environmental issues, equal opportunity, industrial relations and anti-discrimination
• theory associated with managing work relationships to achieve planned outcomes:
  • developing trust and confidence
  • maintaining consistent behaviour in work relationships
  • understanding the cultural and social environment
  • identifying and assessing interpersonal styles
  • establishing, building and maintaining networks
  • identifying and resolving problems
  • resolving conflict
  • managing poor work performance
  • monitoring, analysing and introducing ways to improve work relationships.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • range of methods and techniques for communicating information and ideas to a range of stakeholders • range of methods and techniques for developing positive work relationships that build trust and

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	confidence in the team • accessing and analysing information to achieve planned outcomes • techniques for resolving problems and conflicts and dealing with poor performance • knowledge of the theory associated with managing work relationships to achieve planned outcomes.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • demonstration of techniques in managing poor performance and communicating effectively • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • oral or written questioning to assess knowledge of relevant legislation • review of consultation processesimplemented to encourage employees to contribute to issues related to their work • review of documentation outlining reviewing ofworkplace outcomes.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT

RANGE STATEMENT	
wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Information may include:	• data appropriate to work roles and organisational policies that is shared and retrieved in writing or verbally, electronically or manually such as: • archived, filed and historical background data • individual and team performance data • marketing and customer related data • planning and organisational documents including the outcomes of continuous improvement and quality assurance • policies and procedures
Consultation processes may include:	• feedback to the work team and relevant personnel in relation to outcomes of the consultation process • opportunities for all employees to contribute to ideas and information about organisational issues
Processes to ensure that issues raised are resolved promptly or referred may include:	• conducting informal meetings • coordinating surveys or questionnaires • distributing newsletters or reports • exchanging informal dialogue with relevant personnel • participating in planned organisational activities
Relevant personnel may include:	• managers • OHS committee and other people with specialist responsibilities • other employees • supervisors • union representatives/groups
Organisation's social, ***ethical and business standards*** may refer to:	• implied standards such as honesty and respect relative to the organisational culture and generally accepted within the wider community • rewards and recognition for high performing staff

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	

	• standards expressed in legislation and regulations such as anti-discrimination legislation
	• written standards such as those expressed in:
	  • code of workplace conduct/behaviour
	  • dress code
	  • policies
	  • statement of workplace values
	  • vision and mission statements

Colleagues, customers and suppliers may include:	• both internal and external contacts • employees at the same level and more senior managers • people from a wide variety of social, cultural and ethnic backgrounds • team members
Organisation's policies and procedures may refer to:	• Materials Safety Data Sheets • organisational tasks and activities undertaken to meet performance outcomes • sets of accepted actions approved by the organisation • Standard Operating Procedures
Networks may be:	• established structures or unstructured arrangements and may include business or professional associations • informal or formal and with individuals or groups • internal and/or external
Workplace outcomes may include:	• OHS processes and procedures • performance of the work team
Poor work performance may refer to:	• individual team members • organisation as a whole • self • whole work team

BSBWOR402A Promote team effectiveness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to promote teamwork. It involves developing team plans to meet expected outcomes, leading the work team, and proactively working with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	Frontline managers have an important leadership role in the development of efficient and effective work teams. They play a prominent part in team planning, supervising the performance of the team and developing team cohesion. They provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Plan to achieve team outcomes	1.1. Identify, establish and document ***team purpose***, ***roles***, ***responsibilities***, ***goals***, ***plans and objectives*** in ***consultation*** with team members 1.2. Support team members in meeting expected outcomes
2. Develop team cohesion	2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2. Encourage and support team members to take ***responsibility for own work*** and to assist each other in undertaking required roles and responsibilities 2.3. Provide ***feedback*** to team members to encourage, value and reward individual and team efforts and contributions 2.4. Recognise and address issues, concerns and problems identified by team members or refer to ***relevant persons*** as required

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
3. Participate in and facilitate work team	3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2. Give the team support to identify and resolve problems which impede its performance 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1. Maintain open ***communication*** with ***line manager***/***management*** at all times 4.2. Communicate information from line manager/management to the team 4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - boost team morale
  - deal with team conflict
  - deliver messages from management
  - facilitate discussion
  - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

• organisational goals, objectives and plans
• organisational policy and procedures framework
• organisational structure, including organisational chart
• principles and techniques associated with:
  • delegation and work allocation
  • goal setting
  • group dynamics and processes
  • individual behaviour and difference
  • leadership
  • motivation
  • negotiation
  • planning.

BSBWOR404B Develop work priorities

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to plan one's own work schedules, to monitor and to obtain feedback on work performance and development. It also addresses the requirement to take responsibility for one's own career planning and professional development. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to individuals who are required to design their own work schedules and work plans, and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

Licensing/Regulatory Information

ELEMENT	PERFORMANCE CRITERIA
professional development	organisational benchmarks to determine development needs and priorities 3.2. Research and identify sources and plan for opportunities for improvement in consultation with colleagues 3.3. Use ***Feedback*** to identify and develop ways to improve competence within available opportunities 3.4. Identify, access and complete ***professional development activities*** to assist career development 3.5. Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to recognise and develop new and necessary skills and knowledge
- literacy skills to understand the organisation's policies, procedures and communications, to write personal work plans and professional development plans, and to request and receive feedback about performance
- organising skills to prioritise, manage time and meet deadlines
- problem solving skills to develop contingency plans

Required knowledge

- knowledge of relevant business technology applications to schedule tasks and plan work
- knowledge of techniques to prepare personal plans and establish priorities
- methods to identify and prioritise personal learning needs
- understanding of a range of professional development options
- understanding of methods to elicit, analyse and interpret feedback
- understanding of methods to evaluate own performance

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • preparing and communicating own work plan • scheduling work objectives and tasks to support the achievement of goals • seeking and acting on feedback from clients and colleagues • reviewing own work performance against achievements through self-assessment • accessing learning opportunities to extend own personal work competencies • using business technology to monitor self development.
Context of and specific resources for assessment	Assessment must ensure: • the learner and trainer should have access to appropriate documentation and resources normally used in the workplace
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • observation of presentations • review of work and professional development plans.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • Other units from the Certificate IV in Frontline Management.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Workgroup plans may include:	• budgetary plans • production plans • reporting plans • sales plans • team and individual learning goals • team participation • work schedules
Work objectives may include:	• budgetary targets • production targets • reporting deadlines • sales targets • team and individual learning goals • team participation
Factors affecting the achievement of work objectives may include:	• budget constraints • competing work demands • environmental factors such as time, weather, etc • personnel • resource and materials availability • technology/equipment breakdowns • unforeseen incidents
Business technology may include:	• computer applications • computers • email and internet/intranet/extranet • facsimile machines • modems • personal schedules • photocopiers • printers • scanners
Feedback on performance may include:	• formal/informal performance appraisals • obtaining comments from clients • obtaining comments from supervisors and

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery
Professional development activities may include:	• career planning/development • coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • performance appraisals • personal study • Recognition of Prior Learning • work experience/exchange/opportunities • workplace skills assessment

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to manage own performance and professional development. Particular emphasis is on setting and meeting priorities, analysing information and using a range of strategies to develop further competence. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers and focuses on the need for managers to be organised, focussed and skilled, in order to effectively manage the work of others. As such it is an important unit for most managers, particularly as managers serve as role models and have a significant influence on the work culture and patterns of behaviour.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish personal work goals	1.1. Serve as a positive role model in the workplace through personal work planning and organisation 1.2. Ensure personal work goals, plans and activities reflect the organisation's plans, and ***own responsibilities and accountabilities*** 1.3. Measure and maintain personal performance in varying work conditions, work contexts and contingencies
2. Set and meet own work priorities	2.1. Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives 2.2. Use ***technology*** efficiently and effectively to manage work priorities and commitments 2.3. Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to
3. Develop and maintain professional competence	3.1. Assess personal knowledge and skills against ***competency standards*** to determine development needs, priorities and plans 3.2. Seek feedback from employees, ***clients and colleagues*** and use this feedback to identify and

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	develop ways to improve competence 3.3. Identify, evaluate, select and use ***development opportunities*** suitable to personal learning style/s to develop competence 3.4. Undertake participation in networks to enhance personal knowledge, skills and work relationships 3.5. Identify and develop new skills to achieve and maintain a competitive edge

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to receive, analyse and report on feedback • literacy skills to interpret written and verbal information about workplace requirements • organisational skills to set and achieve priorities.
Required knowledge

• principles and techniques involved in the management and organisation of:
  • performance measurement
  • personal behaviour, self-awareness and personality traits identification
  • personal development plan
  • personal goal setting
  • time management
• management development opportunities and options for self
• organisation's policies, plans and procedures
• types of learning style/s and how they relate to the individual
• types of work methods and practices that can improve personal performance.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the

EVIDENCE GUIDE	
performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • systems and processes (electronic or paper-based) used to organise and prioritise tasks, which show how work is managed • personal development plan, with career objectives and an action plan
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • oral or written questioning to asses knowledge of work methods and practices that can improve personal performance • review of personal work goals, plans and activities • evaluation of work-life balance • review of documentation assessing personal knowledge and skills against competency standards.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • other units from the Diploma of Management.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different

RANGE STATEMENT	
work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Own responsibilities and accountabilities may include:	• expectations of workplace performance as expressed in a performance plan • outputs as expressed in position descriptions or duty statements • statement of conduct outlining an individual's responsibilities/actions/performance
Technology may include:	• computerised systems and software, databases, project management and word processing • electronic diary • personal digital assistant (PDA)
Competency standards may include:	• enterprise-specific units of competency consistent with work requirements • nationally endorsed units of competency consistent with work requirements
Clients and colleagues may be:	• colleagues at the same level and more senior managers • internal or external customers • people from a wide range of social, cultural and ethnic backgrounds and with a range of physical and mental abilities • team members
Development opportunities may include:	• action learning • coaching • exchange/rotation • induction • mentoring • shadowing • structured training programs

BSBWOR502B Ensure team effectiveness

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to facilitate all aspects of teamwork within the organisation. It involves taking a leadership role in the development of team plans, leading and facilitating teamwork and actively engaging with the management of the organisation. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit	This unit applies to managers and addresses the need for managers to facilitate work teams and to build a positive culture within work teams. The unit takes a systematic and planned approach to developing teams. It includes the soft skills as well as more structured approaches to the management of teams. At this level, work will normally be carried out within complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

ELEMENT	PERFORMANCE CRITERIA
	others to undertake required roles and responsibilities 2.3. Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4. Develop ***processes*** to ensure that issues, concerns and problems identified by team members are recognised and addressed
3. Facilitate teamwork	3.1. Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes 3.2. Support the team in identifying and resolving work performance problems 3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all ***stakeholders***
4. Liaise with stakeholders	4.1. Establish and maintain open communication processes with all stakeholders 4.2. Communicate information from ***line manager***/***management*** to the team 4.3. Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders 4.4. Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
• communication skills to explain team goals, to address team conflict and to build an environment of trust • planning and organisational skills to keep team on track and focussed on work outcomes.
Required knowledge

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• group behaviour • strategies for mentoring and coaching to informally guide and instruct team members • issue resolution • strategies for gaining consensus.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • range of techniques that can be used to build work teams, strengthen communications in the team and resolve issues • methods for engaging with stakeholders and obtaining advice from outside the work team, to ensure team is focussed and on track • knowledge of group behaviour.
Context of and specific resources for assessment	Assessment must ensure: • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • analysis of responses to case studies and scenarios • assessment of written reports • demonstration of team building techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of performance in role plays • review of performance plans developed for work team • review of policies and procedures developed to

CPCCLDG3001A Licence to perform dogging

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform slinging techniques, including the selection and inspection of lifting gear and/or the directing of the crane operator in the movement of the load when the load is out of view of the crane/ operator for licensing purposes.

Application of the Unit

Application of the unit

This unit covers the scope of work to demonstrate competency in the application of slinging techniques, selection and inspection of lifting gear and/or the directing of the crane/ operator in the movement of the load.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. ***Site information*** is obtained and related to the task. 1.2. ***Hazard*** s and potential hazards associated with the slinging and directing of loads are identified. 1.3. ***Hazard control measures*** consistent with ***appropriate standards*** are identified to ensure the safety of personnel and equipment. 1.4. The weight, dimensions and centre of gravity of the load are identified and assessed. 1.5. Suitable lifting/slinging points on the load are identified. 1.6. Appropriate ***lifting equipment*** needs are assessed. 1.7. Appropriate ***communication methods*** are assessed with ***crane***/ operators and other ***appropriate personnel***. 1.8. Manufacturer's specifications/information is obtained for special loads where necessary.
2. Select and inspect equipment.	2.1. Lifting equipment appropriate to the task is selected. 2.2. Lifting equipment is inspected for serviceability. 2.3. Damaged or excessively worn lifting equipment is identified, labelled and rejected.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.4. Appropriate communication methods for the crane/operator and appropriate personnel are selected.
	2.5. Appropriate ***communication equipment*** is selected and its serviceability is checked.
	2.6. Appropriate ***personal protective equipment*** (PPE) is selected and checked.
3. Prepare site and equipment.	3.1. Hazard prevention/control measures are applied consistent with appropriate standards to ensure the safety of personnel and equipment.
	3.2. Appropriate slinging method is selected.
	3.3. Lifting equipment is prepared and assembled where appropriate.
	3.4. Load destination is prepared.
4. Perform task.	4.1. Lifting equipment is attached and secured to the lifting hook using appropriate techniques.
	4.2. Lifting hook is positioned over the load centre of gravity.
	4.3. Lifting equipment is attached and secured to the load in an appropriate manner.
	4.4. Tag line is attached and secured where appropriate.
	4.5. Test lift is conducted to ensure security of load.
	4.6. Load is moved maintaining stability and control at all times.
	4.7. Appropriate communication methods and ***communication signals*** are applied to safely coordinate the load movement both within sight and out-of-sight of crane operator.
	4.8. The load is landed to ensure that it is stable and secure from movement.
	4.9. Lifting equipment is removed or disconnected from load and prepared for next task or storage.
5. Shut down job and clean up.	5.1. Unserviceable lifting equipment inspected and rejected.
	5.2. ***Defective equipment*** is isolated and tagged.
	5.3. Lifting equipment is stored in accordance with procedures and appropriate standards.
	5.4. Hazard prevention/control measures are removed where appropriate.
	5.5. Excess materials from the work area are removed (where applicable).

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	5.6. Defects are reported and recorded according to procedures and appropriate action is taken.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication techniques in the workplace including whistles, hand signals and use of fixed channel two-way radios
- communication skills at a level sufficient to communicate with other site personnel
- calculate rated capacity of lifting equipment
- apply different methods for making temporary connections to loads using fibre and synthetic ropes
- ability to interpret rated capacity and working load limit tags
- hazard identification and control
- slinging techniques
- selection and inspection of lifting equipment
- directing crane operators in the moving of loads in a safe manner, using a slewing crane
- inspection and care of a wide range of lifting equipment to appropriate Australian Standards and/or manufacturer's specifications.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- basic knowledge of types of cranes and their functions
- Commonwealth, state or territory OHS legislation, standards and codes of practice relevant to the full range of techniques for undertaking dogging activities
- load stability and safety factors in line with manufacturer's specifications
- types of lifting equipment and slinging techniques for use, and their limitations and performance in a wide range of conditions (including but not limited to slings, beams, accessories, clamps, work-boxes, bins and pallets)
- understanding of the hierarchy of control.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work. State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment of this unit which have been endorsed by the national body responsible for OHS matters.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • comply with Commonwealth, state or territory OHS legislation, standards relevant to safe dogging and crane operations. • communicate and work safely with others in the work area. • apply Hazard prevention and control measures consistent with appropriate standards. • apply to move loads in conjunction with cranes including, the reading of tags, slinging, loading, directing and landing loads with a slewing mobile crane with a telescopic boom and a winch, in and out of sight of the crane/ operator, moving four loads of varying shapes, sizes and weights. • use fibre and/or synthetic rope as tag lines, and connecting to loads using clove hitch, rolling hitch, bowline and single sheetbend. • conduct pre and post operational checks of the lifting equipment.
Context of and specific resources for assessment	• Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the national OHS endorsed Assessment Instrument • Assessment of performance must be

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

	undertaken either in the workplace or in a realistically simulated workplace setting
	• Assessors must ensure that the assessment in the workplace is organised through a workplace supervisor to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace
	• Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints
	• Assessment is to comply with the requirements of any relevant Standards or operating procedures for dogging activities
	• Applicants must have access to:
	  • personal protective equipment (PPE) for the purpose of the performance assessment.
	  • four different loads as prescribed in the endorsed assessment instrument
	  • lifting and associated equipment
	  • suitable slewing crane
	  • communication equipment (eg. fixed channel, two-way radios) as applicable.

Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instrument. This Instrument provides instruction on the application of the assessment. Assessment may be in conjunction with the assessment of other units of competency. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Site informationmay include but not be limited to	• local conditions such as access and egress • work method statements.
Hazards may include but not limited to:	• ground stability (eg. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes, trees, buildings, etc) • insufficient lighting • traffic (e.g. pedestrians, vehicles, plant) • weather (e.g. wind, lightning, storms) • other specific hazards (e.g. trip hazards, heights, radio interference, etc).
Hazard prevention/control measures	The systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of controls, including: 1. elimination. 2. substitution. 3. isolation. 4. engineered control measures. 5. safe work practices. 6. personal protective equipment.
Appropriate standard s may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards.

CPCCLRG3001A Licence to perform rigging basic level

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit specifies the outcomes required to perform basic rigging work associated with movement of plant and equipment, steel erections, hoists (including mast climbing hoists), placement of pre-cast concrete, safety nets and static lines, perimeter safety screens and shutters; and cantilever crane loading platforms for licensing purposes.

Application of the Unit

Application of the unit

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLDG3001A Licence to perform dogging* or holding a valid licence for dogging.

Licensing/Regulatory Information

Refer to Unit Descriptor

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. Task to be undertaken is assessed. 1.2. Potential workplace ***hazards*** are identified. 1.3. ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment. 1.4. Site information is obtained. 1.5. All ***forces and loads*** associated with erecting and dismantling ***structures*** and ***associated plant*** are considered in consultation with ***appropriate personnel***. 1.6. ***Rigging equipment*** and ***associated equipment*** are identified in consultation with appropriate personnel according to ***procedures*** and site information.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.7. *Safety equipment* is identified.
	1.8. Appropriate ***communication methods*** are identified with appropriate personnel.
2. Select and inspect equipment.	2.1. Rigging equipment and associated equipment are selected and inspected according to procedures and the appropriate standard.
	2.2. Safety equipment is selected and inspected according to procedures.
	2.3. All defective rigging equipment, associated equipment and safety equipment is isolated, reported and recorded according to procedures.
	2.4. ***Communication equipment*** is selected and inspected for serviceability (where applicable.
3. Set up task.	3.1. Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to procedures.
	3.2. ***Ground suitability*** is inspected and checked (where appropriate).
	3.3. Site information is reviewed, interpreted and communicated to appropriate personnel and ***appropriate personnel***.
	3.4. All forces and loads associated with erecting and dismantling structures and associated plant are determined in consultation with appropriate personnel.
	3.5. Safety equipment is fitted and worn correctly (where appropriate).
	3.6. Rigging equipment and associated plant are positioned for work application and stability according to procedures.
	3.7. Methods of applying ***temporary connections*** using fibre rope are applied according to procedures and the appropriate standard.
4. Erect structures and plant.	4.1. Structures and associated plant are erected according to procedures and site information.
	4.2. Stability of structures and associated plant is maintained during erection according to procedures.
	4.3. Work is conducted safely at heights including safe and effective use of safety equipment.
	4.4. Appropriate communication methods and communication equipment, are used to co-ordinate the tasks.
	4.5. Associated plant and rigging equipment is used

ELEMENT	PERFORMANCE CRITERIA
	according to procedures and the appropriate standard. 4.6. Temporary guys, ties, propping and shoring, including ***flexible steel wire rope***, and tubing, are connected where required. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable).
5. Dismantle structures and plant.	5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of structures and associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects. 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored. according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate).

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)
- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of basic structural charts and structural plans (site information)
- applying methods for making temporary connections of ropes using fibre and synthetic types
- apply methods of splicing and whipping fibre and synthetic ropes
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations.
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Successful assessment of this unit meets the competency requirement of the National Standard for licensing Persons Performing High Risk Work.

State/Territory OHS regulators have mandated the use of Assessment Instruments and Instructions for Assessment endorsed by the national body responsible for OHS matters for the assessment of this unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- comply with OHS licensing legislation.
- effectively communicate and work safely with others in the work area.
- effectively conduct risk assessment and management procedures.
- effectively complete the following tasks:-
  - inspection of all plant and equipment, and
  - installation of a fall arrest system (Static line), and
  - use of a safety harness / fall arrest system, and
  - installation of crane loading platforms and
  - installation of a safety net, and
  - installation of a shutter and safety screen, and
  - demonstrated ability to work safely at heights, and
  - erection of structural steel, and
  - erection of precast panel, and
  - set up and operation of a winch for load movement, and
  - installation of a materials hoist, or
  - installation of a mast climber.
- effectively demonstrate the following knots,

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

	bends and hitches:- • Sheet bend, • Becket hitch, • Running bowline, • Double bowline. • effectively demonstrate the following splices and whippings:- • Eye splice, • Back splice, • Short splice, • Sail makers whipping, • Common whipping, • West countryman's
Context of and specific resources for assessment	Assessment of the safe and effective application of knowledge and skill to workplace tasks (performance) must be undertaken using the National OHS endorsed Assessment Instrument. Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. Assessors must ensure that the assessment in the workplace is organised to ensure that all the required equipment and materials and a suitable working area is made available to suit the assessment and the workplace. Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with the requirements of any relevant Standards or operating procedures for basic rigging. Applicants must have access to: • personal protective equipment (PPE) for the purpose of the Performance Assessment. • appropriate safety equipment in safe condition • appropriate rigging equipment, associated equipment associated plant in safe condition as described in the endorsed assessment instrument • communication equipment (e.g. two-way

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	radios) where applicable • appropriate materials as required for safe erection of structures • appropriate materials for conducting fibre rope slicing, whipping, knots, bends and hitches.
Method of assessment	Assessment must be conducted using the national OHS endorsed Assessment Instruments. These Instruments provide advice on their application. The use of **'simulators'** in the assessment of this unit of competency is **not acceptable**. Assessment may be in conjunction with the assessment of other units of competency. Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for assessment	Further information about endorsed Assessment Instruments may be obtained from state/territory OHS regulators.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Hazards may include but are not limited to:	• ground stability (e.g. ground condition, recently filled trenches, slopes) • overhead hazards (e.g. power lines, service pipes) (**NB**: minimum clearance distance from powerlines or electrical equipment as determined by relevant state authority or

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	electrical supply authority.) • traffic (e.g. pedestrians, vehicles, other plant) • insufficient lighting • environmental conditions (e.g. wind, lightning, storms) • other specific hazards (e.g. dangerous materials).
Hazard control measures:	Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls. It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk: • elimination • substitution • isolation • engineering control measures • using safe work practices • personal protective equipment.
Appropriate standards may include:	• codes of practice • legislation • Australian Standards • manufacturer's specifications • industry standards (where applicable).
Site Information may include, but not limited to:	• local conditions such as access and egress, • work method statements, • site specific job safety analyses and other site specific documentation as required. • task plans / Schedules and structural plans.
Forces and Loads may include, but not limited to:	• dead loads • live loads • static load • dynamic loads • wind loads.
Structures may include but are not limited to:	• structural steel • precast panels.
Associated plant may include but not limited to:	• static lines • safety nets • hoists

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• mast climbers • loading platforms.
Appropriate personnel may include:	• engineers • supervisors • colleagues • managers who are authorised to take responsibility for the workplace or operations.

Rigging Equipment may include but is not limited to:	• scaffolds
	• elevated work platforms
	• personnel box
	• cantilevered crane loading platforms
	• mast climbers.
	• safety screens and shutters
	• cranes including but not limited to:
	  • non-slewing cranes
	  • mobile slewing cranes
	  • vehicle loading cranes
	  • tower cranes
	  • self-erecting tower cranes
	  • portal boom cranes
	  • derrick cranes
	  • bridge and gantry cranes.

Associated equipment may include but is not limited to:	• all types of power and manually operated lifting gear • fibre ropes • flexible steel wire rope (FSWR) • chains • wire and synthetic slings • shackles • terminations • wedge sockets • eye bolts • beam clamps • plate clamps • rope grips • turnbuckles • rigging screws • chain blocks • lever blocks • lever-action winches

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• sheaves • spreader bars • lifting beams • jacks • levers • skates • wedges • rollers • girder trolley
Procedures may include but is not limited to:	• manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures, relevant codes of practice • workplace procedures (work instructions, operating procedures, checklists).
Safety Equipment may include but not limited to:	• safety harness • energy absorber • lanyard • inertia reel • static safety lines • safety nets.
Communication Methods may include but is not limited to:	• verbal and non-verbal language • written instructions • signage • hand signals • listening, • questioning to confirm understanding, and appropriate worksite protocol. **NB**: Mobile phones are not to be used for signalling purposes during the rigging process.
Communication equipment may include but is not limited to:	• fixed channel two-way radios
Hazard prevention/control measures may include but is not limited to:	• safety tags on electrical switches/isolators • powerlines are insulated • safety observer used inside exclusion zone • power disconnected • traffic barricades and control • pedestrian barricades • trench covers

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• movement of obstructions • personal protective equipment • adequate illumination • safety shutters and screens.
Ground suitability may include but is not limited to:	• rough uneven ground • backfilled ground • soft soils • hard compacted soil • rock • bitumen • concrete • suspended concrete floors • building roofs • landings • ground bearing pressure.
Appropriate personnel may include but not limited to	• other riggers • doggers • crane operators.
Temporary connections may include but not limited to:	• knots • bends • hitches • spicing • whipping.
Flexible Steel Wire Rope (***FSWR***) includes:	• identification, uses and connections. May include termination for: • static lines, • guys, • purchase systems, • lashing, • cranes, • hoist and winch ropes.

CPCCLRG3002A Licence to perform rigging intermediate level

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit specifies the outcomes required to perform rigging work at the intermediate level, which includes all the outcomes for rigging work at the basic level, and also includes rigging of cranes, rigging of conveyors, rigging of dredges and excavators, rigging associated with tilt slabs, rigging associated with demolition work, and dual lifts for licensing purposes.

Application of the Unit

Application of the unit

This unit requires the applicant to be able plan the work, select and inspect equipment, set up task, erect structures and plant and dismantle structures and plant.

This unit is based upon the National Standard for Licensing Persons Performing High Risk Work.

This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.

This unit has a pre-requisite requirement. This requirement may be met by either the successful completion of the unit *CPCCLRG3001A Licence to perform rigging basic level* or holding a valid licence for basic rigging.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan job.	1.1. Task to be undertaken is assessed 1.2. Potential workplace ***hazards*** are identified 1.3. ***Hazard control measures*** are identified consistent with ***appropriate standards*** to ensure the safety of personnel and equipment 1.4. Site information is obtained 1.5. All ***forces and loads*** associated with erecting and dismantling ***structures*** and ***associated plant*** are considered in consultation with ***appropriate personnel***. 1.6. ***Rigging equipment*** and ***associated equipment*** are identified in consultation with appropriate personnel

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	according to ***procedures*** and site information.
	1.7. *Safety equipment* is identified.
	1.8. Appropriate ***communication methods*** are identified with appropriate personnel.
2. Select and inspect equipment.	2.1. Rigging equipment and associated equipment are selected and inspected according to procedures and the appropriate standard.
	2.2. Safety equipment is selected and inspected according to procedures.
	2.3. All defective rigging equipment, associated equipment and safety equipment is isolated, reported and recorded according to procedures.
	2.4. ***Communication equipment*** is selected and inspected for serviceability (where applicable)
3. Set up tasks.	3.1. Appropriate ***hazard prevention***/***control measures*** are applied to the work area according to procedures.
	3.2. ***Ground suitability*** is inspected and checked (where appropriate).
	3.3. Site information is reviewed, interpreted and communicated to appropriate personnel and ***appropriate personnel***.
	3.4. All forces and loads associated with erecting and dismantling structures and associated plant are determined in consultation with appropriate personnel.
	3.5. Safety equipment is fitted and worn correctly (where appropriate).
	3.6. Rigging equipment and associated plant are positioned for work application and stability according to procedures.
4. Erect structures and plant.	4.1. Structures and associated plant is erected according to procedures and site information.
	4.2. Stability of structures and associated plant is maintained during erection according to procedures.
	4.3. Work is conducted safely at heights including safe and effective use of safety equipment.
	4.4. Appropriate communication methods and communication equipment, are used to co-ordinate the tasks.
	4.5. Temporary guys, ties, propping and shoring, including ***flexible steel wire rope***, and tubing, are connected where required.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	4.6. Associated plant and rigging equipment is used according to procedures and the appropriate standard. 4.7. Associated equipment is used in a safe and appropriate manner. 4.8. The completed task is inspected according to the appropriate standard. 4.9. Excess materials are removed from the work area (where applicable)
5. Dismantle structures and plant.	5.1. Structures and associated plant are dismantled according to procedures and the appropriate standard. 5.2. Work is conducted safely at heights including safe and effective use of safety equipment. 5.3. Stability of structures and associated plant is maintained during dismantling according to procedures. 5.4. Rigging equipment, associated equipment, safety equipment and associated plant are inspected for damage and defects 5.5. All defective rigging equipment, associated equipment, associated plant and safety equipment are isolated reported and recorded according to procedures. 5.6. Rigging equipment and associated equipment are stored according to procedures and the appropriate standard. 5.7. Hazard prevention/control measures are removed (where appropriate)

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- ability to calculate Safe Working Load (SWL) and Working Load Limit (WLL)

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

- ability to erect and dismantle, level, plumb and stabilise associated plant and structures
- ability to work safely at heights including the correct application of safety equipment.
- accurate interpretation of structural charts and structural plans (site information)
- correct application and use of all rigging and associated equipment
- risk assessment and hazard control strategies
- interpersonal and communication skills at a level sufficient to site/workplace requirements. This includes the relevant communication methods and equipment.
- verify problems and equipment faults and demonstrate appropriate response.

Required knowledge

Required knowledge for this unit is:

- appropriate mathematical procedures for estimation and measurement of loads
- ability to interpret manufacturer's specifications for all plant and equipment use in rigging operations
- knowledge of principles relating to all plant, equipment and structural stability
- knowledge of the types and functions of rigging, safety and associated equipment including an understanding of their limitations
- organisational and workplace standards, requirements, policies and procedures for rigging
- understanding of the hierarchy of hazard identification and control
- relevant Commonwealth, state or territory and local government OHS legislation, standards and codes of practice for undertaking rigging activities
- understanding of inspection and maintenance requirements of a wide range of appropriate plant and equipment in line with Australian Standards or manufacturer's specifications
- estimation of ground bearing pressures of the full range of soil types and associated ground conditions for setting up plant and equipment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Successful assessment of this unit meets the competency requirement of the National Standard

CPCCOHS1001A Work safely in the construction industry

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify OHS legislative requirements.	1.1. Applicable ***OHS legislative requirements*** relevant to own work, role and responsibilities are identified and explained. 1.2. Duty of care requirements are identified. 1.3. Own responsibilities to comply with ***safe work practices*** are identified and explained.
2. Identify construction hazards and control measures.	2.1. Basic principles of risk management are identified. 2.2. ***Common construction hazards*** are identified and discussed. 2.3. ***Measures for controlling*** hazards and risks are identified.
3. Identify OHS communication and reporting processes.	3.1. OHS communication processes, information and documentation are identified and discussed. 3.2. Role of ***designated OHS personnel*** is identified and explained.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	3.3. ***Safety signs and symbols*** are identified and explained. 3.4. Procedures and ***relevant authorities*** for reporting hazards, ***incidents*** and injuries are identified.
4. Identify OHS incident response procedures.	4.1. ***General procedures*** for responding to incidents and ***emergencies*** are identified and explained. 4.2. Procedures for accessing first aid are identified. 4.3. Requirements for the selection and use of relevant ***personal protective equipment*** are identified and demonstrated. 4.4. ***Fire safety equipment*** is identified and discussed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - clarify OHS legislative requirements
  - verbally report construction hazards and risks
  - ask effective questions
  - relay information to others
  - discuss OHS issues and information
- comprehension skills to:
  - explain the basic OHS legislative requirements which will be applicable to own work
  - explain the meaning of safety signs and symbols
  - identify common construction hazards
  - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own

REQUIRED SKILLS AND KNOWLEDGE

work, role and responsibilities

- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
  - persons in control of construction work/projects
  - employers and self-employed persons
  - supervisors
  - employees
  - designers
  - inspectors
  - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
  - housekeeping
  - identification of hazards
  - preventing bullying or harassment
  - smoking
  - use of amenities
  - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence must confirm personal awareness of the following: • applicable OHS legislative and safety requirements for construction work including duty of care • the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control • OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries • general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.
Context of and specific resources for assessment	• Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program. • It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes. • Where applicable, physical resources should include equipment modified for people with disabilities • Access must be provided to appropriate assessment support when required. • Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed • In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

	manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.
Method of assessment	Assessment methods may include more than one of the following: • practical assessment • oral questioning • written test • work-based activities • simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:	• Australian standards • construction industry OHS standards and guidelines • duty of care • health and safety representatives, committees and supervisors • licences, tickets or certificates of competency • National Code of Practice for Induction Training for Construction Work • national safety standards • OHS and welfare Acts and regulations • safety codes of practice.
Duty of care requirements relate to:	• legal responsibility under duty of care to do everything reasonably practicable to protect others from harm

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency • relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.
Safe work practices include:	• access to site amenities, such as drinking water and toilets • general requirements for safe use of plant and equipment • general requirements for use of personal protective equipment and clothing • housekeeping to ensure a clean, tidy and safer work area • no drugs and alcohol at work • preventing bullying and harassment • smoking in designated areas • storage and removal of debris.
Risk relates to:	• likelihood of a hazard causing injury or harm.
Principles of risk management include:	• assessing the risks involved • consulting and reporting ensuring the involvement of relevant workers • controlling the hazard • identifying hazards • reviewing to identify change or improvement.
Hazard relates to:	• any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.
Common construction hazards include:	• confined spaces • electrical safety • excavations, including trenches • falling objects • hazardous substances and dangerous goods • HIV and other infectious diseases • hot and cold working environments • manual handling • noise • plant and equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• traffic and mobile plant • unplanned collapse • ultraviolet (UV) radiation • working at heights.
Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:	• elimination • substitution • isolation • engineering control • administrative control • personal protective equipment.
OHS communication processes include:	• discussions with OHS representatives • OHS meetings • OHS notices, newsletters, bulletins and correspondence • OHS participative arrangements • processes for raising OHS issues • toolbox talks • workplace consultation relating to OHS issues and changes.
OHS information and documentation includes:	• accident and incident reports • Acts and regulations • Australian standards • codes of practice • construction documentation and plans • emergency information contact • evacuation plans • guidance notes • job safety analyses • labels • material safety data sheets (MSDS) • proformas for reporting hazards, incidents and injuries • reports of near misses and dangerous occurrences • risk assessments • safe work method statements • safety meeting minutes • site safety inspection reports.
Designated OHS personnel includes:	• first aid officers • OHS committee members

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• OHS representatives • supervisors.
Safety signs and symbols include:	• emergency information signs (e.g. exits, equipment and first aid) • fire signs (e.g. location of fire alarms and firefighting equipment) • hazard signs (e.g. danger and warning) • regulatory signs (e.g. prohibition, mandatory and limitation or restriction) • safety tags and lockout (e.g. danger tags, out of service tags).
Relevant authorities include:	• emergency services (e.g. police, ambulance, fire brigade and emergency rescue) • OHS regulatory authority • supervisor.
Incidents include:	• accidents resulting in personal injury or damage to property • near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example: • breathing apparatus malfunctioning to the extent that the user's health is in danger • collapse of the floor, wall or ceiling of a building being used as a workplace • collapse or failure of an excavation more than 1.5 metres deep (including any shoring) • collapse or partial collapse of a building or structure • collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment • damage to or malfunction of any other major plant • electric shock. • electrical short circuit, malfunction or explosion • uncontrolled explosion, fire or escape of gas, hazardous substance or steam • any other unintended or uncontrolled incident or event arising from operations carried on at a

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	workplace.
General procedures for responding to incidents and emergencies include:	• basic emergency response (keep calm, raise alarm, obtain help) • evacuation • notification of designated OHS personnel and authorities • notification of emergency services (e.g. when and how) • referring to site emergency plans and documentation.
Emergencies include:	• chemical spill • fire • injury to personnel • structural collapse • toxic and/or flammable vapours emission • vehicle/mobile plant accident.
Personal protective equipment includes:	• aprons • arm guards • eye protection • gloves • hard hat • hearing protection • high visibility retro reflective vests • protective, well fitting clothing • respiratory protection • safety footwear • UV protective clothing and sunscreen.
Fire safety equipment includes:	• breathing apparatus • fire blankets • firefighting equipment.

CPCPCM4012A Estimate and cost work

Modification History

Changes to performance criteria, required skills and knowledge, range statement and critical aspects

Not equivalent to CPCPCM4002A

Unit Descriptor

This unit of competency specifies the outcomes required to estimate materials, labour and time requirements and to establish costs for provision of services or products.

The unit covers the gaining of information, the estimation of materials, labour and time, the calculation of costs and the associated documentation.

Application of the Unit

This unit of competency supports the development of estimating and costing skills relevant to minor plumbing jobs.

Licensing/Regulatory Information

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills

© Commonwealth of Australia, 2025 Powering Skills Organisation

unit of competency.	and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Gather information.	1.1	Details of customer requirements are obtained through discussion with customer or from information supplied.
		1.2	Plans and specifications are accessed and site is inspected.
		1.3	Details of products and services to be provided are sourced.
		1.4	Delivery point and methods of transportation are determined where necessary.
		1.5	Details are recorded according to workplace procedures.
2	Estimate materials, labour and time.	2.1	Work, including preparatory tasks, is planned and sequenced.
		2.2	Types and quantities of materials required for product work are ***estimated***.
		2.3	Labour requirements to perform work are estimated.
		2.4	Time requirements to perform work are estimated.
		2.5	***Sustainability principles and concepts*** are observed when preparing for and undertaking work process.
3	Calculate costs.	3.1	Total materials, labour and overhead costs are calculated according to workplace procedures using appropriate ***equipment***.
		3.2	Total work cost is calculated, including overheads and mark-up percentages.
		3.3	Final cost for work is calculated.

© Commonwealth of Australia, 2025 Powering Skills Organisation

4	Document and verify details.	4.1	Details of costs and charges are documented according to workplace procedures.
		4.2	Costs, calculations and other details are verified according to workplace procedures.
		4.3	Customer quotation and tender are prepared.
		4.4	Details are documented for future reference according to workplace procedures and using relevant ***information***.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - identify customer requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication
- literacy skills to:
  - complete workplace documentation
  - prepare quotes and tenders
  - record details, including costs and charges
- numeracy skills to:
  - estimate materials and labour required for provision of services or products
  - determine costs for the provision of a quotation or tender in the plumbing and services industry
  - apply calculations

Required knowledge

- estimating and calculating processes
- impact of time on wages and other costs
- job safety analysis (JSA) and safe work method statements (SWMS)
- process for estimating and costing work
- processes for accessing information and for calculating material requirements
- relevant statutory requirements related to estimating and costing work

© Commonwealth of Australia, 2025 Powering Skills Organisation

- SI system of measurements
- relevant Australian standards applicable to the work to be undertaken
- tendering and contracting processes
- workplace and equipment safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, standards and specifications to the estimation and costing of work
- applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
- estimating and costing three varied jobs in at least Class 1 buildings, including:
  - applying sustainability principles and concepts
  - estimating quantities of material required
  - determining types and amount of labour required to complete the work
  - estimating time required to complete the work
  - estimating overheads associated with the job
  - providing a written quotation and tender for each of the work requirements
  - communicating and working effectively and safely with others.

Context of and specific resources

This competency is to be assessed using standard and

© Commonwealth of Australia, 2025 Powering Skills Organisation

for assessment

authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and

© Commonwealth of Australia, 2025 Powering Skills Organisation

the practical requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Factors for ***estimating*** and costing must include:

- labour
- materials
- overheads.

Sustainability principles and concepts:

- cover the social, economic and environmental use of resources to meet current and future needs
- may include:
  - use of materials and resources to meet the current needs of society while preserving the environment for the future
  - efficient use and recycling of material

© Commonwealth of Australia, 2025 Powering Skills Organisation

- disposing of waste material to ensure minimal environmental impact
- energy efficiency
- water efficiency.

Equipment may include:

- calculators
- computers running appropriate software to estimate and calculate necessary details
- measuring equipment appropriate to work
- stationery.

Information may include:

- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- job drawings
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- organisation work specifications and requirements
- regulatory and legislative requirements, particularly those pertaining to:
  - codes of practice
  - contracts
  - building codes
  - WHS and environmental requirements
  - plumbing regulations
- relevant Australian standards
- safe work procedures relating to estimating and costing work
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

CPPFES2005A Demonstrate first attack firefighting equipment

Modification History

Revised unit

Unit updated and equivalent to PRMPFES05B Use portable fire fighting equipment

Unit Descriptor

This unit of competency specifies the outcomes required to demonstrate the use of portable fire extinguishers, fire hose reels and fire blankets.

Application of the Unit

This unit of competency supports fire protection equipment service technicians responsible for demonstrating to customers how to interpret and follow manufacturers' instructions on various first attack firefighting equipment in emergency situations.

Licensing/Regulatory Information

Work in this area must be completed according to relevant legislative, industry, customer and organisational requirements, including occupational health and safety (OHS) policies and procedures.

Different states and territories may have regulatory mechanisms that apply to this unit. Candidates are advised to check for regulatory limitations.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

© Commonwealth of Australia, 2025 Powering Skills Organisation

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Demonstrate correct use of portable fire extinguishers to extinguish simulated fires.	1.1	***Fire type*** and ***classification*** are determined.
		1.2	***Fire extinguishers*** are selected to attack different fires.
		1.3	Safe use of fire extinguishers is demonstrated according to manufacturers' instructions and relevant ***OHS and workplace policies and procedures***.
2	Demonstrate correct use of fire hose reels.	2.1	Safe use of ***hose reels*** is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.
		2.2	Water is turned off in the approved sequence and hose reel is checked for leaks.
		2.3	Hose reel is rewound correctly after use.
3	Demonstrate correct use of fire blanket.	3.1	Safe use of fire blankets is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- decision-making skills to select correct first attack firefighting equipment for different types of fires
- effective customer service
- language, literacy and numeracy skills to:
  - communicate with others in a clear and concise manner
  - read and comply with work instructions and specifications

© Commonwealth of Australia, 2025 Powering Skills Organisation

- interpersonal skills to relate to people from a range of social and cultural backgrounds
- skills to work safely when:
  - applying recommended manufacturers' techniques for operating equipment and fire fighting
  - using firefighting equipment

Required knowledge

- basic methods of locating a fire
- correct use of fire extinguishers and hose reels on different classes of fire and implications of incorrect use
- how fire can be spread by conduction, convection, radiation and direct burning
- how water pressure influences the discharge distance for hose reels
- key actions in a fire emergency, commonly known by the acronym RACE:
  - rescue
  - activate alarm
  - confine fire
  - evacuate or extinguish
- meaning of secondary damage
- reasons for cooking oil and fat fires requiring special attention
- theory of fire, including the triangle of combustion
- types and operation of fire protection equipment classified as first attack equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by practical demonstration, using simulated fire situations. Due to safety and cost factors, methods of extinguishing class D, E and F fires are confined to oral explanations and role play or simulations only. All practical demonstrations involving the use of simulated fires must adhere to the safety and environmental regulations relevant to each state or territory.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to: • select correct portable firefighting equipment for a particular type of fire

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• demonstrate the use of portable firefighting equipment • use portable firefighting equipment safely and correctly.
Context of and specific resources for assessment	Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements. Resource implications for assessment include: • actual or simulated work environment • portable firefighting equipment.
Method of assessment	Assessment methods must: • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. This unit could be assessed on its own or in combination with other units relevant to the job function, for example: • CPPFES2004A Identify types of installed fire safety equipment and systems • CPPFES2006A Prepare for installation and servicing operations.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Fire types may include:	• combustible metals • cooking oils and fats • energised electrical equipment • flammable and combustible liquids • flammable gases • ordinary combustibles.
Classifications of fires include:	• classes A, B, C, D, E and F.
Fire extinguishers may include:	• carbon dioxide • foam • powder • vaporising liquid • water • wet chemical.

OHS and workplace policies and procedures may be located in quality assurance and/or procedures manuals relating to:	• appropriate techniques to use in relation to emergency management of fires
	• assessing work site for hazards and risks prior to preparing the work site for the work procedure
	• displaying signs and using barriers in the work area
	• OHS policies, procedures and programs, including:
	  • risk and hazard recognition
	  • emergency procedures
	  • awareness of electrical hazards
	  • following confined spaces procedures
	  • first aid
	• personnel practices and guidelines outlining work roles, responsibilities and delegations
	• safety procedures, including those for working safely:
	  • around electrical wiring, cables and overhead powerlines
	  • around tools and equipment
	  • on ladders and raised platforms
	• using personal protective equipment, including:
	  • safety glasses or goggles
	  • safety boots or shoes
	  • hard hats
	  • earmuffs or plugs.

Hose reel types may be:	• swing-hinged • vehicle-mounted • wall-mounted.

HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Updated mapping information. Equivalent outcome.
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria Revised evidence requirements, including volume and frequency of assessment

Application

This unit of competency describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR in a range of situations, include community and workplace settings.

Specific licensing requirements relating to this competency, including requirements for refresher training should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to an emergency	1.1 Recognise an emergency situation

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
situation	1.2 Identify, assess and minimise immediate hazards to health and safety of self and others 1.3 Assess the casualty and recognise the need for CPR 1.4 Seek assistance from emergency response services
2. Perform CPR procedures	2.1 Perform CPR 2.2 Display respectful behaviour towards casualty 2.3 Operate automated external defibrillator (AED) according to manufacturer's instructions
3. Communicate details of the incident	3.1 Accurately convey incident details to emergency response services 3.2 Report details of incident to workplace supervisor as appropriate 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

Foundation Skills

The Foundation Skills described those required skills (language, literacy and numeracy) that are essential to performance.

- *Oral communication* – in order to make an accurate verbal report to supervisor and emergency response services

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit.

Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 1	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory regulations, first aid codes of practice, ARC guidelines and workplace procedures:

- conducted a hazard assessment and identified strategies to minimise risk
- demonstrated safe manual handling techniques
- assessed airway, breathing and responsiveness of casualty
- performed at least four minutes of uninterrupted CPR on both an adult and an infant resuscitation manikin placed on the floor, demonstrating the following techniques on each:
  - checking for response and normal breathing
  - recognising abnormal breathing
  - opening and clearing the airway
  - using correct hand location, compression depth rate in line with the ARC recommended ratio of compressions and ventilations
  - acting in the event of regurgitation or vomiting
  - following single rescuer procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- provided an accurate verbal report of the incident
- responded to at least one simulated resuscitation scenario contextualised to the candidate's workplace/community setting.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to the provision of CPR
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
  - need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing CPR, including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - chain of survival
  - standard precautions
- basic anatomy and physiology relating to:
  - absence of normal breathing
  - anatomy of the external chest
  - physiology relating to response/consciousness
  - upper airway anatomy and effect of positional change.

Assessment Conditions

Skills must be demonstrated working individually:

- in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

In addition, assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- equipment, including:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- an Automated External Defibrillator (AED) training device.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors. In addition, assessors must hold:

- a current advanced first aid certificate

OR

- at least three years' experience as a health professional, nurse or emergency services provider

  - allergic reactions
  - anaphylaxis
  - asthma
  - basic wound care
  - severe bleeding
  - burns
  - cardiac arrest
  - choking and airway obstruction
  - convulsions
  - envenomation (using pressure immobilisation)
  - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation techniques)
  - poisoning
  - respiratory distress
  - shock
- provided an accurate verbal report of the incident
- responded to at least two simulated emergency scenarios contextualised to the candidate's workplace/community setting.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid including:
  - airway obstruction due to body position

© Commonwealth of Australia, 2025 Powering Skills Organisation

  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - standard precautions and infection control
- principles and procedures for first aid management of the following scenarios:
  - abdominal injuries
  - allergic reactions
  - anaphylaxis
  - bleeding control
  - burns
  - cardiac conditions
  - choking and airway obstruction
  - cold and crush injuries
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - environmental impact (including hypothermia, hyperthermia, dehydration and heat stroke)
  - epilepsy
  - eye and ear injuries
  - fractures
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress, including asthma and other respiratory conditions
  - seizures
  - severe allergic and anaphylactic reactions
  - shock
  - soft tissue injuries
  - unconsciousness, abnormal breathing or not breathing
- basic anatomy and physiology relating to:
  - absence of normal breathing
  - anatomy of the external chest
  - physiology relating to response/consciousness
  - upper airway anatomy and effect of positional change
  - anatomy and physiology considerations in provision of first aid for specified conditions

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment Conditions

Skills must be demonstrated working individually:

- in an environment that provides realistic in-depth, industry-validated scenarios and simulations to enable assessment of candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- first aid equipment including
  - roller bandages
  - triangular bandages cloth
  - trauma dressings
  - placebo bronchodilator and spacer device
  - adrenalin auto-injector training device
  - an AED training device
  - emergency rescue blanket
  - workplace first aid kit.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold:

- a current advanced first aid certificate

OR

- at least three years' experience as a health professional, nurse or emergency services provider.
-

HLTAID005 Provide first aid in remote situations

Modification History

Release	Comments
Release 3.0	Updated mapping information. Equivalent outcome.
Release 2.0	Minor changes to formatting to improve readability.
Release 1.0	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment, including use of contextualised remote scenarios.

Application

This unit of competency describes the skills and knowledge required to provide first aid response and emergency life support to a casualty in a remote and/or isolated situation.

The unit applies to workers who may be required to prepare for and provide a first aid response in locations beyond the reach of timely medical assistance.

Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
1. Respond to a remote emergency situation	1.1 Plan for isolated travel or work if required, accounting for expected contingencies

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	1.2 Recognise an emergency situation
	1.3 Identify, assess and manage immediate hazards to health and safety of self and others
	1.4 Assess the casualty and recognise the need for first aid response
	1.5 Assess the situation and evaluate options for medical assistance
	1.6 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, risks, transport availability and casualty condition
2. Apply appropriate first aid procedures	2.1 Perform cardiopulmonary resuscitation (CPR)
	2.2 Provide first aid in accordance with established first aid principles
	2.3 Display respectful behaviour towards casualty
	2.4 Obtain consent from casualty where possible
	2.5 Use available resources and equipment to make the casualty as comfortable as possible
	2.6 Operate first aid equipment according to manufacturer's instructions
	2.7 Monitor the casualty's condition and respond in accordance with first aid principles
3. Manage the incident	3.1 Seek assistance from others present to manage incident circumstances
	3.2 Establish communication links with emergency response services and convey incident details
	3.3 Report details of casualty condition, changes in condition, management and responses
	3.4 Assist in the evacuation of the casualty by following directions given by emergency response services as required
	3.5 Maintain confidentiality of records and

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
Elements define the essential outcomes.	*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*
	information in line with statutory and/or organisational policies
4. Evaluate own performance	4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents
	4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills described those required skills (language, literacy and numeracy) that are essential to performance.

- *Oral communication* – in order to make an accurate verbal report to emergency response services and workplace supervisor

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

No equivalent unit

Assessment Requirements for HLTAID005 Provide first aid in remote situations

Modification History

Release	Comments
Release 1.1	Minor changes to formatting to improve readability.
Release 1.0	This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the New Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment, including use of contextualised remote scenarios.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- prepared a contingency plan in relation to providing a first aid response in a remote situation
- conducted a hazard assessment and identified strategies to minimise risk
- demonstrated safe manual handling techniques
- assessed airway, breathing and responsiveness of casualty
- performed at least four minutes of uninterrupted CPR on both an infant resuscitation manikin and an adult resuscitation manikin placed on the floor, demonstrating the following techniques on each:
  - checking for response and normal breathing
  - recognising abnormal breathing
  - opening and clearing the airway
  - using correct hand location, compression depth rate in line with the ARC recommended ratio of compressions and ventilations
  - acting in the event of regurgitation or vomiting

© Commonwealth of Australia, 2025 Powering Skills Organisation

    - following single rescuer procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- activated and followed the prompts of an Automated External Defibrillator (AED)
- conducted a secondary survey, including checking pulse of at least one person and recording the rate
- applied first aid procedures for the following:
    - allergic reactions, including severe reactions
    - anaphylaxis
    - asthma
    - basic wound care
    - severe bleeding and haemorrhage
    - burns
    - cardiac arrest
    - choking and airway obstruction
    - convulsions
    - environmental impacts
    - envenomation (using pressure immobilisation)
    - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation techniques)
    - poisoning
    - respiratory distress
    - shock
- provided an accurate verbal report of the incident
- responded to at least three simulated emergency scenarios contextualised to the candidate's remote and/or isolated situation

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory regulations, first aid codes of practice and workplace procedures including:
    - ARC guidelines relevant to provision of CPR and first aid
    - safe work practices to minimise risks and potential hazards
    - infection control principles and procedures, including use of standard precautions
    - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
    - need for stress-management techniques and available support following an emergency situation
    - duty of care requirements
    - respectful behaviour towards a casualty

© Commonwealth of Australia, 2025 Powering Skills Organisation

  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing first aid, including:
  - airway obstruction due to body position
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - standard precautions and infection control
- principles and procedures for first aid management of the following scenarios, contextualised to the candidate's remote and/or isolated situation:
  - abdominal injuries
  - allergic reactions
  - anaphylaxis
  - bleeding control
  - burns
  - cardiac conditions
  - choking and airway obstruction
  - cold and crush injuries
  - convulsions
  - diabetes
  - dislocations
  - drowning
  - envenomation
  - hypothermia
  - hyperthermia
  - dehydration
  - heat stroke
  - epilepsy
  - eye and ear injuries
  - fractures
  - head, neck and spinal injuries
  - minor skin injuries
  - needle stick injuries
  - poisoning and toxic substances
  - respiratory distress including asthma
  - seizures
  - shock
  - soft tissue injuries
  - unconsciousness, abnormal breathing or not breathing

© Commonwealth of Australia, 2025 Powering Skills Organisation

- remote considerations in the provision of first aid, including:
  - typical hazards and strategies for preparing supplies to address contingencies
  - management options relating to transporting casualty, including aero-medical evacuation
  - how to identify and prepare areas for safe evacuation, including aero-medical evacuation
  - how and when to access emergency response services
  - communication systems, equipment and methods available in remote situations
  - priorities of management in first aid when dealing with life-threatening conditions
  - specific considerations contextualised to alpine, desert, marine, rural/remote settings and tropical environments
- basic anatomy and physiology relating to:
  - absence of normal breathing
  - anatomy of the external chest
  - physiology relating to response/consciousness
  - upper airway anatomy and effect of positional change
  - anatomy and physiology considerations in provision of first aid for specified conditions, including specific considerations for remote settings

Assessment Conditions

Skills must be demonstrated working individually:

- in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

In addition, assessment resources must include:

- adult and infant resuscitation manikins in line with ARC guidelines for the purpose of assessment of CPR procedures
- first aid equipment including:
  - roller bandages
  - triangular bandages cloth
  - trauma dressings
  - placebo bronchodilator and spacer device
  - adrenalin auto-injector training device
  - an AED training device
  - clinical thermometer
  - evacuation stretcher
  - emergency rescue blanket
  - workplace first aid kit.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors. In addition, assessors must hold:

- a current advanced first aid certificate

OR

- at least three years' experience as a health professional, nurse or emergency services provider

HLTHSE204D Follow safe manual handling practices

Modification History

HLT07 Version 4	HLT07 Version 5	Comments
HLTHSE204C Follow safe manual handling practices	HLTHSE204D Follow safe manual handling practices	ISC upgrade changes to remove references to old OHS legislation and replace with references to new WHS legislation. No change to competency outcome.

Unit Descriptor

Descriptor

This unit is concerned with the workers ability to carry out their work in a safe manner within the health care environment

Work will usually be performed within a prescribed range of functions involving known routines and procedures

Application of the Unit

Application

This unit is based on the *National Guidelines for Integrating Occupational Health and Safety Competencies into National Industry Competency Standards, National Code of Practice for Manual Handling 1990, An Employer's Guide to the Manual Tasks Advisory Standard 2000, National Standard for Manual Handling* (*1990*), the *Work Health and Safety Act (2011),* Safe Work Australia publications

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains Employability Skills

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in italics are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Follow organisation procedures, for a particular task, to minimise risk of injury	1.1 Use *appropriate posture and handling techniques* to reduce muscle load on exertion 1.2 Manage work tasks involving vibration in accordance with *workplace policies* and procedures 1.3 Use appropriate *manual handling* techniques and equipment to meet customer needs within own scope of responsibility 1.4 Package loads appropriately for easy handling 1.5 Follow lifting limitations prescribed within relevant guidelines 1.6 Use safe work practices in handling loads 1.7 Wear appropriate *personal protective equipment*
2. Utilise and implement strategies as directed to improve workplace organisation	2.1 Identify work health and safety (WHS) hazards, assess risk and report to *supervisor* 2.2 Contribute to workplace design and task analysis to ensure appropriate work areas are developed

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.3 Follow workplace policies and procedures in relation to pacing and scheduling of tasks
	2.4 Carry out equipment and environmental maintenance in accordance with a workplace preventative maintenance schedule
	2.5 Follow workplace procedures for reporting symptoms and injuries to self and or others
	2.6 Follow workplace procedures for any *return to work program*

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- Legislative requirements and best practice approaches to WHS
- Location and use of safety equipment such as fire extinguishers and emergency units and alarms
- Potential hazards in the workplace and the risks/potential risks of certain behaviours, layouts/features
- Reporting mechanisms required for workplace injury and compensation claims
- Rights and obligations of employees and employers regarding WHS
- Significant hazards in the workplace both indoors and outdoors
- Workplace procedures that apply to fire, accidents and emergency situations

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Work safely using safe manual handling techniques and equipment
- Comply with the organisation's WHS policies and procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

- Implement strategies designed to improve manual handling processes within the workplace

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Apply lifting, lowering and transfer techniques of manual handling
- Apply safe handling practices and other safety procedures
- Demonstrate correct use of equipment according to manufacturers' specifications
- Implement practices to prevent or minimise risk
- Take into account opportunities to address waste minimisation, environmental responsibility and sustainable practice issues
- Use reading and writing skills required to fulfil job roles in a safe manner and as specified by organisation/service, which may include the ability to:
  - understand symbols used in WHS signs
  - read workplace safety pamphlets or procedure manuals
  - read labels and handling chemicals such as cleaning fluids
  - understand that literacy support is available in the workplace and may range from having access to support or assistance from expert/mentor/supervisor, to having no communication supports available
  - literacy in English or a community language depending on the language used in pamphlets or workplace manuals
- Use oral communication skills required to fulfil job roles in a safe manner and as specified by the organisation/service, including skills in:
  - asking questions
  - providing clear information
  - listening to and understanding workplace instructions
  - clarifying workplace instructions when necessary
  - English or a community language, depending on client group

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment

- The individual being assessed must provide evidence

© Commonwealth of Australia, 2025 Powering Skills Organisation

and evidence required to demonstrate this competency unit:	of specified essential knowledge as well as skills • This unit is most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions • This unit can be assessed independently however holistic assessment practice with other general health services units of competency is encouraged

Context and resources for assessment:	• Resource requirements may include access to:
	  • workplace health and safety policies and procedures
	  • infection control procedures
	  • other organisation policies and procedures
	  • duties statements and/or job descriptions
	  • manual handling equipment
	• Assessment may include:
	  • observation of performance
	  • written tasks
	  • interviewing and questioning
	  • formal appraisal systems
	  • staff/client feedback
	  • portfolio/CV
	  • supporting statement of supervisor(s)
	  • authenticated evidence of relevant work experience and/or formal/informal learning
	  • case studies and scenarios as a basis for discussion of issues and strategies to contribute to best practice in the work environment

Access and equity considerations:	• All workers in the health industry should be aware of access and equity issues in relation to their own area of work • All workers should develop their ability to work in a culturally and linguistically diverse (CALD) environment • In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people • Assessors and trainers must take into account relevant access and equity issues, in particular

© Commonwealth of Australia, 2025 Powering Skills Organisation

	relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Appropriate posture and handling techniques may include:	• Bending from the knees • Maintaining a straight back when lifting and carrying • Using two hands to lift or carry • Avoiding lifting objects above shoulder height • Adopting non repetitive movements • Positions not held for long periods of time • Correct use of mechanical aids
Workplace policies and procedures will include:	• Hazard identification policies and procedures • Emergency, fire and accident procedures • Procedures for the use of personnel clothing and equipment • Hazard identification and issue resolution procedures • Job procedures and work instructions • Waste management • Security procedures
Manual handling equipment may include:	• Lifting apparatus • Hoists • Trolleys • Belts • Pallet jacks
Personal protective equipment	• Plastic aprons

© Commonwealth of Australia, 2025 Powering Skills Organisation

may include:	• Gowns • Gloves including heavy duty • Overalls • Enclosed shoes • Eye protection
Hazards include:	• Manual handling • Client handling • Toxic or hazardous substances/radiation • RSI prevention mandatory
Supervisor may by:	• Nominated personnel • WHS representative
Workplace organisation may include:	• Grievance procedures • Appropriate induction of staff • Team meetings • Debriefing procedures following crisis • Management performance levels • Employee assistance with problems and introducing them to services available in the community
Return to work program may include:	• Persons returning from injury and/or stress • Persons returning after extended leave

MEM05004C Perform routine oxy acetylene welding

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers preparing materials and performing routine oxy acetylene welding.

Application of the Unit

Application of the unit	This unit applies in a maintenance or manufacturing environment where the welding is not required to meet an Australian standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels. Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, OHS regulations and/or licensing requirements, Unit MEM05022C (Perform advanced welding using oxy acetylene process) should be selected. **Band**: **A** **Unit Weight**: **2**

Licensing/Regulatory Information

Refer to Application of the Unit

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected.
4. Perform routine welding using *oxy acetylene*	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Materials	Mild and low carbon steel and cast iron
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, blowpipes, regulators
Consumables	Filler rods, fluxes
Oxy acetylene	The term 'oxy-acetylene' is used here to describe a range of fuel gases, including acetylene, LPG, hydrogen etc.
Cleaned	Fluxes

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Materials	Low and mild carbon steel or similar
Prepared	Cleaning, setting up jigs, fixtures, clamps, joint preparation
Welding equipment	Welding leads, welding machines, electrode holder etc.
Cleaned	Slag and spatter, cleaning, using files and grinders

MEM05015D Weld using manual metal arc welding process

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit of competency covers the preparation, positioning, fixing, and manual welding techniques associated with general trade level welding using manual metal arc welding (MMAW) equipment including the selection and set up of the equipment appropriate to both the material and the weld to be performed, carrying out the MMAW to prescribed standards, and examining for and correcting defects, in a range of welded fabrications.

Application of the Unit

Application of the unit	This unit of competency applies to welds associated with heavy or light metal fabrications. Welds are fillet and butt welds in all positions on a range of ferrous and non-ferrous materials that may include carbon steel or stainless steel. Weld quality would conform to Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent. This unit has been primarily developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade level skills in MMAW. It may also apply to other trade occupations requiring higher level MMAW welding skills. Where manual thermal processes associated with preparation, pre-heat and/or post-heat are required, MEM05007C Perform manual heating and thermal cutting and/or MEM05008C Perform advanced manual thermal cutting, gouging and shaping should be considered for selection. **Band**: **A** **Unit Weight**: **4**

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
Path 1	MEM05012C	Perform routine manual metal arc welding
	MEM05051A	Select welding processes
	MEM05052A	Apply safe welding practices
	MEM12023A	Perform engineering measurements
	MEM18001C	Use hand tools
	MEM18002B	Use power tools/hand held operations

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials for manual metal arc welding (MMAW)	1.1. Weld requirements are identified from specifications and/or drawings 1.2. Materials are correctly prepared 1.3. Materials are assembled/aligned to specification, where required
2. Select welding equipment and consumables	2.1. Welding equipment and electrodes appropriate to the material and the weld are identified and selected
3. Assemble and set up welding equipment	3.1. Welding equipment is assembled and set up
4. Minimise and rectify distortion	4.1. Appropriate distortion prevention measures are selected and applied 4.2. Distortion is rectified
5. Weld to job specification using MMAW	5.1. Weld deposit is to specification 5.2. Joints are cleaned to specifications
6. Ensure weld conformance	6.1. Defects are rectified with minimum loss of sound metal using correct techniques and tools 6.2. Weld joints are visually inspected for conformance to specifications
7. Where required, maintain weld records	7.1. Where required, weld records are completed correctly

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent
- selecting and using appropriate tools and equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• using a variety of welding machines and electrodes • identifying and rectifying weld defects • applying techniques for distortion prevention and rectification • cleaning welds • reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings • recording routine information including routine weld records related to MMAW onto proformas and standard workplace forms • following oral instructions • measurement skills relating to joint preparation and MMAW
Required knowledge
Required knowledge includes: • material preparation • joint preparations • electrode classification • causes of distortion for materials within the scope of this unit • causes of defects and methods of rectification • the relationships between amperage, electrode and material • safe welding practices • use and application of personal protective equipment for MMAW

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare materials, select and set up the welding equipment, carry out MMAW and examine for and correct defects, in a range of welding activities associated with MMAW. Competency in this unit cannot be awarded until all prerequisites have been satisfied.
Critical aspects for assessment and evidence required to demonstrate	Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
competency in this unit	this unit of competency in new and different workplace situations and contexts. Critical aspects of assessment and evidence include: • following all safety procedures to protect self, other workers and members of the public • identifying and interpreting specifications for MMA welding including Australian Standard 1554 General Purpose • interpreting welding specifications including standard welding symbols used to show weld procedure • selecting appropriate weld preparation methods for material and position of welds. • preparing materials, setting up of jigs, fixtures, clamps,etc. and joint preparation including bevelling • consistently welding different ferrous and non-ferrous materials to AS 1554 General Purpose or equivalent • identifying defects as described in the range statement across a range of welded materials • rectifying defects.
Context of and specific resources for assessment	Welding to AS 1554 General Purpose or equivalent requires both theoretical knowledge and high level practical skills. The assessment process must be designed to identify consistent performance to the standard and the specifications across a range of materials and positions. The assessment must also identify a level of workplace performance in terms of defect rates and weld failure rates. It is recommended that assessment involve demonstrations of competency under both workshop and site conditions. This means that the ideal assessment environment is either on the job or a combination of both on and off the job. The competencies covered by this unit may be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.
Method of assessment	Typically an Engineering Tradesperson - Fabrication and other tradespersons engaged in welding are required to exercise MMAW skills and techniques across a range of jobs and specifications. A single assessment event is not appropriate. On the job assessment should be included as part of the assessment

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	process wherever possible. Where assessment occurs off the job, judgement must consider evidence of the candidate's performance in a productive work environment that includes a sufficient range of appropriate tasks and materials to cover the scope of application for this unit. Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with welding using MMAW process or other units requiring the exercise of the skills and knowledge covered by this unit. Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Range Statement

RANGE STATEMENT
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Welds	Welds include fillet and butt welds carried out in all positions
Materials	Materials may include ferrous materials including carbon or stainless steel, as well as non-ferrous metals and alloys suitable for MMA welding
Prepared	Preparation of materials may include: • pre-heating • setting up of jigs, fixtures and clamps • joint preparation (e.g. bevelling)
Equipment	Equipment may include AC or DC welding machines
Distortion prevention measures	Distortion prevention measures may include: • pre heating • setting up of jigs, fixtures and clamps
Rectified	Rectified refers to oxy acetylene, air arc equipment and grinding devices
Defects	Defects may include: • porosity • slag inclusions • discontinuities • lack of penetration • undercut

MEM05045B Perform pipe welds to code standards using manual metal arc welding process

Modification History

Release 3 - equivalent. Australian Standard code corrected to AS4041.

Unit Descriptor

Unit descriptor	This unit covers preparing and producing pipe welds to code standards using manual metal arc welding (MMAW).

Application of the Unit

Application of the unit	This unit applies to MMAW to code standard carried out using a range of materials. Welds in this unit are associated with high quality fabrications. Butt welds in pipe with the axis horizontal, vertical and/or askew would be applied to meet Australian Standards 1210, AS 4041, ASME IX or equivalent. The unit, together with Unit MEM05026C (Apply welding principles), may satisfy the requirements of AS 1796 Certificates 2 and 4. Where advanced manual thermal cutting, gouging and shaping is carried out, Unit MEM05008C (Perform advanced manual thermal cutting, gouging and shaping) should also be selected. **Band**: This unit has dual status and is to be regarded as both a Specialisation band A unit and Specialisation band B unit for progression to C7 (AQF level IV). **Unit Weight**: **6**

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
Path 1	MEM05007C	Perform manual heating and thermal cutting
	MEM05012C	Perform routine manual metal arc welding
	MEM05015D	Weld using manual metal arc welding process
	MEM05016C	Perform advanced welding using manual metal arc welding process
	MEM05026C	Apply welding principles
	MEM05051A	Select welding processes
	MEM05052A	Apply safe welding practices
	MEM09002B	Interpret technical drawing
	MEM12023A	Perform engineering measurements
	MEM18001C	Use hand tools
	MEM18002B	Use power tools/hand held operations

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range

© Commonwealth of Australia, 2025 Powering Skills Organisation

	statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain welding equipment	1.1. Routine maintenance is performed on welding equipment.
2. Prepare welding materials and equipment for MMAW pipe welding to code standards	2.1. Weld requirements for MMAW welding to code standards are determined. 2.2. Welding equipment is set up correctly. 2.3. Materials are prepared to produce pipe weld to code standard.
3. Weld pipe using MMAW to procedure specifications	3.1. Materials are welded as per weld procedure specification.
4. Ensure weld quality	4.1. Discontinuities are rectified to ensure conformance to code requirements. 4.2. Weld records are maintained in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This section describes the skills and knowledge required for this unit.
Required skills
Look for evidence that confirms skills in: • depositing welds to procedure requirements. • determining weld outcomes, consumables and settings from welding procedure specification • interpreting technical drawings and weld specifications for welding to code standards using MMAW • using hand and power tools to prepare and weld materials to code standard • using measurement and numeracy skills for welding to code standards

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• using language and literacy skills to enable completion of weld records
Required knowledge
Look for evidence that confirms knowledge of: • requirements to produce welds to quality of AS 1210, AS 4041, ASME IX or equivalent • safe welding practices • use and application of personal protective equipment for MMAW • knowledge of appropriate standards or codes • methods for preparing pipe for code standard welding • pre-welding and post-welding heating methods and requirements for pipe welding to code standard • requirements for maintaining weld records to code standard • hazards and control measures associated with welding, including housekeeping

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to perform pipe welds to code standards using MMAW process. Competency in this unit cannot be claimed until all prerequisites have been satisfied.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	This unit may be assessed on the job, off the job or a combination of both. Where assessment occurs off the job, i.e. the candidate is not in productive work, appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with the preparation and production of welds or other units requiring the exercise of the skills and knowledge covered by this unit.
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Routine maintenance	Ensuring leads, hand pieces etc. are in serviceable condition, and correct current carrying capacity
Prepare welding materials	Preheating, setting up of jigs, fixtures, clamps, etc.

MSAPMOHS110A Follow emergency response procedures

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit relates to the appropriate response to emergency situations for any new workers at the workplace, possibly delivered as part of an induction program.

Application of the Unit

Application of this unit

This competency applies to operators who are required to know the signals when an emergency situation takes place as well as the proper procedures to follow in order to save oneself from possible injury and/or death.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Know when emergency happens.	1.1 Locate emergency signals and controls on machines and/or at the worksite. 1.2 Interpret the signals to take appropriate action. 1.3 Identify emergency where there is no mechanical/ electronic signal.
2. Follow emergency procedures.	2.1 Report emergency according to procedures. 2.2 Identify emergency leader. 2.3 Follow workplace procedures and work instructions for dealing with a range of emergencies, under direct supervision of emergency leader. 2.4 Describe the potential consequences of failing to follow these procedures and instructions. 2.5 Describe what to do if the emergency leader cannot be located when emergency occurs.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit. Knowledge and understanding of the emergency response procedures sufficient to recognise emergency situations and then determine the appropriate action.

Knowledge of the relevant OHS and environmental requirements, and organisation standard operating procedures, is required along with an ability to implement them in a manner that is relevant to emergency response practices.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Competence includes the ability to:

- identify location of emergency signals on machines and/or at the worksite
- identify emergency situations in which there is no mechanical/electronic signal
- report identified emergency signals/situations to the designated person
- identify the emergency leader
- follow emergency procedures.

Evidence of knowledge of all relevant workplace procedures will include:

- emergency, fire and accident procedures
- chemical spill procedures
- procedures for the use of personal protective clothing and equipment
- organisation standard operating procedures (SOPs)
- hazard policies and procedures
- safety procedures
- personal protective clothing relevant to the required response to the emergency situation.

Language, **literacy and numeracy requirements**

This unit requires the ability to recognise and respond to emergency signals or other communication of an emergency.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.

Assessment will occur over a range of situations that will include disruptions to normal, smooth operation.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- recognise potential emergency situations
- take the appropriate action.

Emphasis should be on the ability to follow proper procedures in order to save oneself from possible injury and/or death.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Consistent performance should be demonstrated. For example, look to see that:

- emergency situations are recognised and communicated promptly
- emergency procedures are understood and followed.

These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems that may have been generated from the past incident history of the workplace and incidents on similar operations around the world.

Assessment method and context

Assessment for this unit will be on a processing plant or in a manufacturing environment.

Simulation may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual work environment and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. Emergency drills are a common and appropriate simulation.

This unit of competency requires a body of knowledge which will be assessed through questioning and the use of 'what if' scenarios both in the workplace (during demonstration of normal operations and walk throughs of abnormal operations) and off the job.

Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

It is expected that this competency may be applicable in combination with other industry, occupation or workplace-specific competencies. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Specific resources for assessment

Assessment will require access to an operating plant or work environment over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios, case studies and 'what ifs' will be required as will a bank of questions that will be used to probe the reasoning behind the observable actions.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

© Commonwealth of Australia, 2025 Powering Skills Organisation

This unit of competency describes emergency situation requirements applicable to all workers. It involves the use of workplace policies and procedures to maintain a safe work environment for oneself and others.

All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This unit of competency includes use of equipment and tools such as PPE required for emergency response.

Hazards

Typical hazards include:

- handling chemicals and hazardous materials
- chemical and or hazardous materials spillage
- gases and liquids under pressure
- moving machinery
- materials handling
- working at heights, in restricted or confined spaces, or environments subjected to heat, noise, dusts or vapours
- fire and explosion.

Personnel

Appropriate personnel for reporting of emergency may include:

- employer
- supervisor
- employees elected as emergency team leader
- other personnel with emergency team leader responsibilities.

Emergency issues

Emergency issues that may need to be raised by workers with designated personnel/ responded to may include:

- observation of injury or incident in the workplace
- fires
- chemical or oil spills
- gas leak or vapour emission
- utilities failure

© Commonwealth of Australia, 2025 Powering Skills Organisation

- bomb scares
- failure or malfunction of plant/machinery.

Emergency signals

Emergency signals include:

- visual - flashing lights
- auditory - alarms.
-

Unit Sector(s)

Not applicable.

© Commonwealth of Australia, 2025 Powering Skills Organisation

MSAPMOHS205A Control minor incidents

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers control of minor incidents. The competency would be possessed generally by most/all operations personnel and some non-operations personnel. It would require training in addition to that which might typically be part of an induction program, but does not require specialist training such as is given to members of an incident response team. The general purpose of this initial response is to prevent any incident from escalating. In the event of an incident this person may be expected to respond to an incident team member in line with procedures.

This unit does NOT apply to major incidents (see *MSAOHS210A Control non-fire incidents* and *MSAOHS212A Control fire incidents*).

Application of the Unit

Application of this unit

This competency applies to operators who may be called upon to control small incidents in the workplace.

It includes:

- fires of the A,B,C,D,E and F classes
- fuel and other spills
- process overheating
- equipment failure.

The person would:

- safely use first response equipment and coordinate with other actions
- operate incident equipment
- report the use of incident equipment
- mark or position incident equipment to indicate that it has been used and requires servicing.

Generally the person would be part of a team during an incident response. However, he/she may be required to take independent action. At all times they would be liaising and cooperating with other members of the team.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Evaluate the incident	1.1 Recognise an incident has occurred or is about to occur. 1.2 Assess the incident for type of response and the likely effectiveness of first response action. 1.3 Identify the hazards arising from the incident.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	1.4 Raise the alarm and seek assistance as required. 1.5 Select appropriate response to control incident. 1.6 Determine hazard control measures to be employed. 1.7 Recommend evacuation if appropriate.
2. Control the incident.	2.1 Maintain personal safety at all times. 2.2 Confine the incident to the area of origin where possible. 2.3 Select appropriate equipment to control incident. 2.4 Use equipment in accordance with procedures. 2.5 Clear and secure the incident area. 2.6 Monitor the incident and surrounding conditions and modify response as appropriate. 2.7 Handover to specialist incident response personnel as appropriate.
3. Conclude the incident control.	3.1 Report the use of equipment according to procedures. 3.2 Mark or position incident control equipment after use to indicate it requires servicing or replacing. 3.3 Participate in incident debrief and reporting in accordance with procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

The knowledge referred to in the Evidence Guide for this unit includes:

- classification of fires and incidents
- limitations of first response equipment
- situations that must not be responded to because of the risk to life
- the hazards involved with first response action
- understanding relevant workplace procedures
- selecting appropriate first response equipment
- understanding the theory of fire and other relevant incidents.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Competence also includes the ability to isolate the causes of problems within the incident response system and to be able to distinguish between causes of problems indicated by:

- damage to first response equipment
- exceeding the limitations of use of incident control equipment or facilities
- inappropriate actions when first response action is undertaken
- inadequacies in facilities that may be used to confine emergencies
- inappropriately identifying the type of incident
- the incorrect use of equipment.

Language, literacy and numeracy requirements

This unit requires the ability to recognise and respond to the signs of an incident and communicate to relevant people as part of the response.

Writing is required to the level of completing required workplace forms and reports.

Numeracy is required to respond to relevant incident data.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

Assessment will occur using a simulation and will be undertaken in a work-like environment.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- correctly respond to incident situations
- implement appropriate action.

Emphasis should be on the ability to stay ahead of the problem rather than to have to take drastic action in order to recover the situation.

Consistent performance should be demonstrated. For example, look to see that:

- the incident is evaluated appropriately
- an appropriate response to the incident, and appropriate response equipment, is selected
- the safety of persons is given the highest priority
- actions taken are effective and do not cause escalation or other incidents
- all reporting is completed in accordance with procedures.

© Commonwealth of Australia, 2025 Powering Skills Organisation

These assessment activities should cover a range of problems, including new, unusual and improbable situations which may have been generated from past workplace incident history, incidents in similar workplaces around the world, hazard analysis activities and/or similar sources.

Assessment method and context

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Competence in this unit may be assessed:

- in an appropriate, industrial scenario
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

© Commonwealth of Australia, 2025 Powering Skills Organisation

This unit applies to all sectors of the industry.

This unit will assist individuals to meet some of their obligations under the relevant State/Territory legislation. Responsibility for appropriate contextualisation and application of the unit to ensure compliance however, remains with the individual organisation.

Organisations within the Chemical, Hydrocarbons and Oil Refining industries may find themselves falling under the provisions of various Major Hazard Facilities legislation. In developing this unit consideration has been given to the requirements of Sections 8 and 9 of the National Standard for the Control of Major Hazard Facilities [NOHSC:1014(2002)] and the National Code of Practice for the Control of Major Hazard Facilities [NOHSC:2016(1996)].

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

All operations to which this unit applies are subject to stringent Health, Safety and Environment (HSE) requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Tools and equipment

This competency includes use of equipment and tools such as:

- fire doors
- fire sprinkler systems
- fire alarm systems
- First Aid kits
- fire extinguishers
- hose reels
- smoke vents
- spill control kits.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- determining the nature and size of the incident
- predicting the incident's likely development
- lack of support in an incident
- inappropriate or lack of a means of escape
- lack of availability of control equipment or facilities.

MSAPMOHS216A Operate breathing apparatus

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit covers competence associated with the operation and maintenance of breathing apparatus equipment in an irrespirable atmosphere.

Application of the Unit

Application of this unit

This competency applies to operators who are required to wear breathing apparatus for part of their job - because they are working in a confined space, with hazardous gases/vapours, in an anoxic atmosphere or for other applications requiring the wearing of breathing apparatus. They may also be required to wear it in emergency situations, however this is not the prime focus of this unit, and so makes this unit different from *PUAFIR207A Operate breathing apparatus open circuit*, as it has no prerequisite and is much broader in its application.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Conduct pre-donning checks and tests on breathing apparatus.	1.1 Inspect breathing apparatus for immediate use in accordance with procedures. 1.2 Report/record faulty or damaged equipment in accordance with procedures.
2. Operate breathing apparatus.	2.1 Identify, monitor and control hazards in accordance with the procedures. 2.2 Establish and maintain communication with appropriate personnel throughout the activity. 2.3 Demonstrate effective application of breathing apparatus, undertaking activities as a member of a team, in accordance with procedures. 2.4 Implement entrapment procedures in accordance with procedures. 2.5 Maintain personal safety at all times.
3. Conclude operations.	3.1 Close down breathing apparatus set in accordance with procedures. 3.2 Remove breathing apparatus set in accordance with procedures. 3.3 Undertake after-use cleaning and maintenance of breathing apparatus in accordance with procedures. 3.4 Make equipment ready for operational use in accordance with procedures.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Underpinning knowledge:

- respiratory system, effects of irrespirable atmospheres on the body, protective equipment
- characteristics, component parts, operation of compressed air breathing apparatus
- operational testing, standard operating procedures and safe work practices when wearing breathing apparatus
- operating breathing apparatus
- use of procedures, personal lines and tallies
- pre-use tests and checks, including serviceability of components, integrity of components, cylinder pressure, integrity of air flow system, ancillary equipment.
- breathing apparatus control, including principles of BA Control, organisation procedures, Stage 1 (one entry point), Stage 2 (multiple entry points), entry/exit control point, entry/exit control officer, timing device
- entrapment procedures, including cease all strenuous activity, activate the distress signal unit, remain calm, relocate to safest available place, call for assistance
- communications, including distress signal unit, portable radio, communications sets, signal lines, hand signals.

Underpinning skills:

- Inspecting, donning, operating in, removal, cleaning, maintaining and returning to operational status of breathing apparatus.

Language, **literacy and numeracy requirements**

This unit requires the ability to interpret any permits or other documentation associated with the wearing of breathing apparatus for the job.

Writing is required to the level of completing required workplace reports.

Numeracy is required to enable the determination of the available working time from a breathing apparatus set and similar activities.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment. Assessors must be satisfied that the person can consistently perform the competency as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment will occur using industrial breathing apparatus and will be undertaken in a work-like environment.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

In accordance with AS/NZ 17151716, it is essential that competence is demonstrated in the ability to:

- appropriately conduct pre-donning tests
- correctly don breathing apparatus
- operate breathing apparatus
- move in conditions of reduced visibility
- use breathing apparatus in emergency procedures
- follow organisation procedures
- correctly remove breathing apparatus
- return breathing apparatus to operational status.

Assessment method and context

Competence in this unit may be assessed:

- by using an appropriate, industrial breathing apparatus and scenarios
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to breathing apparatus and associated equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Powering Skills Organisation

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to anyone required to wear breathing apparatus as part of their job.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of breathing apparatus, including:

- open circuit
- airline equipment.

Hazards

Typical hazards include:

- fire
- failure to maintain a face seal
- exhaustion of air supply
- malfunction of equipment
- disorientation in smoke/darkness or confinement
- structural hazards and/or hazardous materials
- entrapment.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'.

Variables

Key variables to be monitored for an irrespirable atmospheres include

- heated atmospheres
- asphyxiating atmosphere (oxygen deficient)
- (non-skin absorption) toxic or poisonous atmosphere
- smoke or suspended particles/fibres in atmosphere.
-

MSAPMOHS217A Gas test atmospheres

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit is about testing the working atmosphere to determine if it is safe for the proposed work. Testing involves the use of electronic test apparatus.

Application of the Unit

Application of this unit

In a typical scenario an individual may be required to carry out gas testing of an atmosphere prior to entering a specific area or workspace. The competency requires the person to interpret readings and take actions based on the interpretation.

This unit is modelled on the Public Safety unit PUAFIR307A Monitor hazardous atmospheres, but does not have the prerequisites, which are not required in the industrial context. The unit is more focused on the needs of that sector and has some wording changes.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Prepare for gas testing.	1.1 Determine type of gas/atmosphere to be tested. 1.2 Select and calibrate equipment in accordance with procedures. 1.3 Determine gas testing regime/sampling pattern required. 1.4 Identify hazards from possible atmosphere contaminants. 1.5 Implement hazard control measures, including use of appropriate personal protective equipment.
2. Test gas.	2.1 Use gas testing equipment to test gas as required. 2.2 Interpret and report readings. 2.3 Monitor gas on an ongoing basis as required. 2.4 Take required action(s) if readings are unacceptable.
3. Maintain equipment.	3.1 Clean and maintain gas testing equipment in accordance with procedures. 3.2 Inspect and fault find monitoring equipment in accordance with procedures. 3.3 Return gas testing equipment to required location and in required condition. 3.4 Maintain records of tests and results in accordance with procedures.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

As may be relevant to the plant/site/process, knowledge of the following may be required:

- common chemical asphyxiants, including hydrocarbons, carbon dioxide, carbon monoxide, hydrogen cyanide, and hydrogen sulphide
- common irritants and corrosives, including chlorine, ammonia and acid bases
- common flammable gases, including acetylene, petroleum, methane, ethane, propane and butane
- narcotics
- (explosive range, upper and lower explosive limits)
- exposure standards (time weighted average, short term exposure limits, peak limitation values, examination of toxic effect at the level of a range of flammable gases)
- conditions under which atmospheres become hazardous
- units of measurement used to express concentration of atmospheric contaminants (mg/cubic m. ppm, % v/v).

Underpinning skills could include interpretation and communication of results of sampling.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret a meter and then communicate the conclusions.

Writing is required to the level of completing required workplace reports/forms.

Numeracy read the instrument and interpret the results as being safe/not safe and so determine the required actions.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- apply personal safety principles
- interpret atmospheric conditions using atmospheric monitoring equipment
- recommend appropriate action
- maintain monitoring equipment.

Consistent performance should be demonstrated. For example, look to see that:

- gathered evidence covers a range of variables, all using different types of monitoring equipment.

Assessment method and context

Assessment will occur using industrial test equipment on an industrial site/plant and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- through written assignments
- by a demonstration activity using workplaces/atmospheres with detectable but safe levels of contaminants should be used
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

Working environment may be hazardous, unpredictable, subject to time pressure, chaotic and expose responders to risk, on land or water, by day or night.

Safety information and procedures must include relevant legislation, Australian Standards, codes of practice, manufacturer instructions and organisational procedures.

Situations include

- confined spaces
- enclosed and partially enclosed spaces
- storage tanks, silos, pits, pipes, shafts, ducts, transport vehicles and ships
- testing as part of issuing a work permit
- monitoring as part of working under a work permit
- open areas
- holding the gas tester by hand
- lowering the gas tester into a space, eg on a line.

Workplace atmospheres may

- include visible and invisible hazards
- include hazardous surfaces
- range from safe to unsafe.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

All operations to which this unit applies are subject to stringent Health, Safety and Environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Tools and equipment

This competency includes use of equipment and tools such as:

- portable instruments
- radiation detectors
- sampling tubes and pumps
- oxygen level meter
- carbon monoxide detector
- combustible gas detectors.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'.

MSAPMOPS400A Optimise process/plant area

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the ability to optimise the process performance of a complete plant area. It includes ensuring that production systems comply with Health, Safety and Environment (HSE) requirements, that process, plant and equipment utilisation is planned and carried out, and that problems are solved to fully meet operational needs and ensure that production of finished goods meets customer requirements.

Application of the Unit

Application of this unit

This competency requires the application of detailed operational and process knowledge, including the principles of operation of equipment, and the chemistry and/or physics and/or biology/biochemistry of changes to materials occurring during processing. It embodies a significant breadth and depth of technical knowledge and process understanding.

Assessment of this competency should ensure that the applicant can apply this knowledge to a process, and should typically rely on the applicant undertaking, or leading, a significant process improvement project.

This competency is typically performed by a senior operator, team leader or frontline manager.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit **has** prerequisites of

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
1. Analyse and evaluate current plant, equipment and processes.	1.1 Compare actual process, plant and equipment performance with requirements and/or historical data/records and/or design performance. 1.2 Identify abnormal or sub-optimal process, plant and equipment performance. 1.3 Identify hazards associated with the plant and equipment. 1.4 Collect and evaluate product, materials and/or process records to determine possible causes for sub-optimal performance. 1.5 Use appropriate techniques to rank possible causes from most to least probable cause.
2. Develop plan for corrective and/or optimisation action.	2.1 Analyse cause(s) to determine appropriate corrective action. 2.2 Predict the impact of a change in one unit/area on other related plant units/areas. 2.3 Predict the impact of a change on health, safety and environmental performance 2.4 Develop measurable objectives and evaluate alternatives.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	**PERFORMANCE CRITERIA** Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
	2.5 Identify requirements to implement change. 2.6 Consult with stakeholders regarding planned changes and impacts. 2.7 Develop optimisation plan taking account of hazards identified and HSE implications and communicate to appropriate personnel. 2.8 Evaluate optimisation action to determine measures of effectiveness.
3. Coordinate corrective and/ or optimisation action plan	3.1 Coordinate all appropriate unit areas and operations in order to rectify problem causes in process, plant and equipment performance. 3.2 Initiate and/or implement all required corrective/ optimisation actions. 3.3 Communicate corrective/optimisation outcomes to all relevant personnel. 3.4 Implement procedures/systems to eliminate possible future causes. 3.5 Record and maintain log of all relevant information.
4. Develop continuous improvement strategies.	4.1 Review sources of information to identify possible factors causing sub-optimal performance. 4.2 Identify options for removing or controlling the risk of sub-optimal performance. 4.3 Assess the adequacy of existing control and quality methods and systems. 4.4 Identify opportunities to continuously improve performance. 4.5 Develop recommendations for continual improvement of process, plant and equipment effectiveness. 4.6 Consult with appropriate personnel and implement continuous improvement strategies. 4.7 Document implementation of continuous improvement strategies.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the:

- equipment,
- processes
- systems

sufficient to

- identify hazards associated with the process
- recognise opportunities to improve and/or enhance the quality of performance of the plant.

This knowledge needs to include:

- the relevant technical theory of the plant area
- an in depth understanding across the entire plant area
- the organisation standard procedures and work instructions
- relevant regulatory requirements, including those related to OHS risk control as appropriate to process/plant area optimisation.

Competence includes the ability to:

- apply analytical skills which enable corrective or optimal conditions to prevail
- identify and control hazards by applying the hierarchy of control as part of the optimisation process
- interpret information and make appropriate process control decisions.

Competence includes the ability to distinguish between:

- optimum and marginal performance of the plant
- effective and marginal performance corrections and actions.

as is relevant to the practical operation of all major equipment/process/systems within the area.

Optimising process systems requires application of detailed operational and process knowledge to address issues such as:

- starting material quality
- yield maximisation
- throughput maximisation
- energy efficiency
- use of utilities
- labour utilisation
- overall cost
- efficient use of equipment
- reducing downtime
- minimisation of waste and rework
- improved workplace layout and workflow.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Language, literacy and numeracy requirements

This unit requires the ability to communicate at all levels about what may be complex technical matters. It also requires the ability to evaluate complex information and sort often conflicting information into *useful* and *distracting* and to rank/prioritise information.

Writing is required to the level of reading and interpreting technical information, developing and modifying plans and procedures and interpreting relevant regulatory requirements.

Numeracy is required to the level of analysing product/process performance data, interpreting process condition information and deriving useful information from technical brochures, papers and similar. Calculation will be required to assist this and to determine priorities for optimisation plans (ie benefit/cost or other quantitative criteria)

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Competence must be demonstrated in the ability to analyse and evaluate current production performance, and develop and implement plans to optimise process systems.

While the technician is expected to take a lead technical role, and to demonstrate competence as defined above, optimisation is rarely undertaken by an individual alone and liaison with all relevant stakeholders is an expected part of this competency.

Where the assessee does not currently possess evidence of competency in *MSASUP390A Use structured problem solving tools*, it may be coassessed with this unit.

Criticalaspects for assessment and evidence required to demonstrate competency in this unit

It is essential that the equipment/process/system be understood in depth and that the importance of critical material properties/settings/readings is known. Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that:

- non-routine problems are recognised and defined
- hazards are identified and controlled by applying the hierarchy of control

© Commonwealth of Australia, 2025 Powering Skills Organisation

- possible causes of complex problems are identified based on experience and the use of analytical techniques in solving the problem, including identifying variations and cause, separating single problems from multiple problems and the recognition of recurring problems
- fundamental cause of process or equipment faults is determined
- corrective/preventative actions are developed to avoid recurrence of the problem and optimise the condition of the process, plant and equipment
- product quality and uniformity are maintained.

Competence must be demonstrated in the operation of all ancillary equipment to the level required for this competency unit.

Competence also includes the ability to implement improvements within appropriate time constraints and in a manner relevant to the operation of the equipment, processes and systems.

Context of assessment

Competence in this unit may be assessed by:

- observation over time in a processing plant allowing for adequate assessment of operation under all normal and a range of abnormal conditions. Where this is not practical, additional assessment techniques must be used.
- using a suitable simulation and/or a range of case studies/scenarios
- undertaking a specific project based in the plant
- a combination of these techniques.

Method of assessment

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Powering Skills Organisation

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit describes the work conducted by senior operators, team leaders or front line managers who optimise process systems as part of their work function. It includes all items of equipment and unit operations which form part of the production process of a complete area.

Typical problems will require the application of detailed operational and process knowledge over the entire production/manufacturing area, including the principles of operation of the equipment and the chemistry, physics, biology and/or biochemistry of the changes to materials occurring within that area.

All operations are performed in accordance with organisation procedures, licensing requirements, legislative requirements and industrial awards and agreements.

Procedures

All operations are performed in accordance with procedures. Procedures means all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards. These may include or have been prepared from/to comply with:

- industry codes of practice
- materials safety data sheets
- equipment manuals
- equipment start up, operation and shut down procedures
- calibration and maintenance schedules
- quality manuals and procedures
- organisation recording and reporting procedures
- production and laboratory schedules
- material, production and product specifications.

Data/records

Historical data/records may include:

- hazard logs
- incident reports
- maintenance records
- product non-conformance reports
- production records.

Implementing change

Requirements to implement change may include:

- changes to procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

- training of operators
- equipment modifications
- ensuring all HSE requirements are addressed.

Relevant/appropriate personnel

Relevant/appropriate personnel may include:

- managers
- OHS representatives and OHS committee.

Relevant information

Relevant information logged to include:

- modifications to plant or equipment
- modifications to procedures or practices.

Sources of information

Sources of information may include:

- hazard logs
- incident reports
- maintenance records
- work practices
- procedures
- industry journals
- equipment supplier information
- industry best practice information.

Health, **Safety and Environment** (**HSE**)

All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

Unit Sector(s)

MSAPMPER200C Work in accordance with an issued permit

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor	This unit aims to ensure that people working under a permit to work understand the system, know the limitations of the permit under which they are working and comply with all the requirements of the permit. The people to whom this unit applies may be called 'permit recipients' or 'permit holders' by some organisations. Some organisations call 'permits' 'clearances' This unit covers the basic competency of working under a permit. Where entry to a confined space is required, then *MSAPMPER205B Enter confined space* is also required. The safety observer (standby person) competencies are covered by *MSAPMPER202A Observe permit work*. Atmospheric testing is covered by *MSAPMOHS217A Gas test atmospheres*. The issuing of permits is covered by *MSAPMPER300B Issue work permits*.

Application of the Unit

Application of the unit	This competency applies to persons who are required to conduct work activities under the authority of an issued permit to work and within the context and requirements of that permit. This typically applies to all work done by maintenance staff and contractors, and also to any other non-process work performed on the plant. It includes: • identifying the range and scope of work covered by the permit • checking that the right type of permit has been issued for the type of work • adequately preparing to undertake the work, including obtaining all necessary safety equipment and PPE • undertaking the work strictly in accordance with the provisions of the permit • maintaining correct housekeeping with permit activities • completing work in accordance with the permit requirements • querying or raising matters about the permit if the scope of work/nature of the tools to be used varies from that covered by the permit • handing back the permit in accordance with procedures and obtaining appropriate sign off as required.

ELEMENT	PERFORMANCE CRITERIA
	permit issued 2.3. Check that the hazard controls specified on the permit are consistent with the hazard analysis 2.4. Check that preparations specified on the permit have been completed 2.5. Sign onto/receive the permit.
3. Prepare for permitted work.	3.1. Maintain safe working conditions and environment by using available isolation procedures, safety equipment and emergency procedures. 3.2. Monitor plant conditions and hazards to ensure work under the permit remains safe. 3.3. Ensure that appropriate safety equipment and clothing are selected and worn as required by the permit and relevant procedures. 3.4. Inspect work area to ensure safety and compliance with permit requirements and procedures.
4. Work in accordance with an issued permit.	4.1. Use required hazard reduction/control measures. 4.2. Comply with requirements of the permit including safety observer if required. 4.3. Display issued permit on work site as required 4.4. Ensure compliance with scope, location and timeframe specified in the permit or seek re-authorisation as required 4.5. Suspend job and make work site safe before leaving job. 4.6. Formally seek and receive authorised extensions to the permit when required. 4.7. Give end of day status report to permit issuer.
5. Complete permit(s) to work.	5.1. Obtain new permit(s) or have existing permit(s) revalidated before work is recommenced. 5.2. Check the work conducted against the issued permit(s) to ensure that all the nominated work requirements have been satisfied. 5.3. Monitor general housekeeping to ensure that the site has been left in a clean and safe condition. 5.4. Ensure personal lockouts/tag outs/isolations are removed in accordance with procedures 5.5. Communicate status of the work conducted and the results of the permit to relevant personnel. 5.6. Complete documentation as required and have permit signed off when job is completed.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills:
Competence includes the ability to: • access and interpret information relevant to specific tasks (eg labels, MSDSs hazchem signs) • identify changes to conditions which may lead to the permit being revoked before the job is completed • describe and/or explain hazards associated with tasks covered by the permit, types of tests required for the issue of work permits - the types of tests to include, atmospheric/oxygen/breathability, flammability/explosivity, toxicity/TWA, temperature, humidity • the impact of the regulatory framework and organisation procedures under which the permit operates upon the particular job(s) requiring the permit. Language, literacy and numeracy requirements • This unit may require the ability to read and correctly interpret complex P&ID's; speak clearly and unambiguously in English; and to explain, describe and verify sometimes complex needs and issues. • Writing is required to the level of completing workplace forms. • Numeracy is required to the level of being able to correctly differentiate between high and low pressures and temperatures, voltages or masses.
Required knowledge:
Knowledge and understanding of the relevant OHS and environmental requirements, in particular those relating to various situations requiring work permits, with an ability to implement the requirements in a manner that is relevant to the job. Knowledge of the organisation's standard procedures and work instructions and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and in a manner relevant to the job. Sufficient knowledge of all types of permits is required to ensure work is not carried out without the correct permit. This includes recognizing hot work and confined spaces. Knowledge of regulatory frameworks should include: • licence requirements for the job, • company policy and procedures • permit control systems

© Commonwealth of Australia, 2025 Powering Skills Organisation

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment of this unit should demonstrate competence on actual plant and equipment in a work environment The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Simulation may be required to allow for assessment of parts of this unit. Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to distinguish between situations requiring the types of permit and to list the major requirements of each type of permit. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster. It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to: • provide reasons for a permit system • recognise the importance of different work permits • comply with permit conditions including the wearing of appropriate personal protective equipment (PPE) • take appropriate action to resolve faults or report faults to appropriate personnel • explain and implement incident response procedures. Consistent performance should be demonstrated, e.g. look to see that: • communications are timely and effective • deviations from permit conditions are recognised, reported, corrected and re-authorization arranged • actions specified in the permit/standard procedures are carried out • all safety procedures are followed.
Context of and specific resources	A holistic approach should be taken to the assessment.

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
for assessment	Assessment will occur over a range of situations which may include disruptions to normal, smooth operation. Competence in this unit may be assessed: • on a plant/in the work place/a work situation • by using a suitable simulation based on the actual plant and including walk throughs of the relevant competency components and/or a range of case studies/scenarios and role plays • by questioning and using 'what if' scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant • through a combination of these techniques. These aspects may be best assessed using a range of simulations/scenarios/case studies and 'what ifs' as the stimulus with a walk through forming part of the response. These assessment activities should cover a range of problems, including new or unusual situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources. In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed. In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. While oral assessments may be appropriate there needs to be a written record for audit purposes. This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions which will be used to probe the reasoning behind the observable actions will also be required to the extent that they form part of the assessment method.

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.
Method of assessment	Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed and the safety standard required.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version/version specified by the local regulatory authority must be used.
Context	This unit typically applies to all work done by maintenance staff and contractors, and also to any other non-process work performed on the plant. All work is to be conducted using the appropriate personal protective equipment. The types of work permits may include: • cold work/general permit to work • excavation • hot work • vehicle entry • minor repairs • working at heights • other special permits. Note that entry to a confined space is covered by *MSAPMPER205C Enter confined space*. The Australian Standard (*AS2865*) definition given for

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	confined space entry is used in this Training Package. All operations are performed in accordance with standard operating procedures (SOPs). Checks to ensure a workplace is safe may include: • process isolations complete • mechanical and electrical isolations in place • atmospheric testing complete and atmosphere safe. If it is not safe and cannot be made safe, then appropriate measures are implemented as per SOPs. • relevant personnel informed of work and agree that it is safe and appropriate to proceed.
Procedures	All operations are performed in accordance with procedures. Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards. These may include: • legislation/codes • OHS legislation, codes of practice and guidance material • EPA • National and Australian standards • licence and certification requirements • internal permit control system. • process isolations complete • mechanical and electrical isolations in place • atmospheric testing complete and atmosphere safe. If it is not safe and cannot be made safe, then appropriate measures are implemented as per SOPs. • relevant personnel informed of work and agree that it is safe and appropriate to proceed.
Information required for permit	Information required for a permit includes: • work description • tools to be used • process/methods of work/SOPs • MSDSs • JHA/JSA/SWMSs
Tools and equipment	This competency includes use of safety equipment and tools such as: • eye protection (eg goggles) • ear protection • gloves

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• clothing • respiratory protection • helmets • safety footwear.
Hazards	Typical hazards include: • heat, smoke, dust or other atmospheric hazards • sharp edges, protrusions or obstructions • limited head spaces or overhangs • equipment or product mass • slippery surfaces, spills or leaks • noise, rotational equipment or vibration.
Display issued permit	Display issued permit on work site means to have the permit on the worksite and displayed/ready to be shown as required by the site/job requirements and may include: • displaying it in a provided mounting • having it accessible in a folder which is on the work site • having it folded in overall pockets in a manner which allows it to be readily shown on request.
Problems	'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical problems may include: • provision of the wrong permit • incorrect information being supplied with the permit • errors being made in the understanding of permit data • failure to correctly correspond to the requirements of the permit • failure to seek clarification when anomalies occur.
Variables	Key variables to be monitored include: • sites under which permit activities must be applied • type of permit to be executed • types of tools and equipment to be employed • size of work team • scope and urgency of work.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

MSAPMPER201A Monitor and control work permits

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the monitoring of the operational conditions in which a permit to work has been issued, and the required activities and functions associated with the production/process of chemical, hydrocarbons, oil, and other process manufactured products. This role may be carried out by the standby person or other appropriately qualified persons.

While this competency carries with it high levels of responsibility the role is usually prescribed by the permit process and may be exercised by any competent operator.

Application of the Unit

Application of this unit

This competency applies to personnel who are required to monitor a work situation in which the activity is conducted under the auspices of a permit to work. During this activity the individual will monitor the work situation for conformance to the permit and will immediately intervene if the parameters of the permit are exceeded or work proceeds outside the boundaries set by the permit. It includes:

- identifying and understanding the requirements of the permit
- monitoring any changes in the conditions of work under the permit
- ensuring work sequences are followed as permitted by the permit
- constantly inspecting the site for changed work or site circumstances
- reporting any non-conformance with permit conditions
- withdrawing or causing work to cease outside permit conditions
- confirming conformance with permit conditions and reporting conclusion of activities.
-

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	**PERFORMANCE CRITERIA**
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	**PERFORMANCE CRITERIA**
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify and monitor permit conditions.	1.1 Identify permit requirements. 1.2 Monitor permit holder and conditions to ensure that the work being conducted conforms to the issued permit requirements. 1.3 Identify and communicate changes in the operating conditions or requirements of the permit to permit holders to ensure they are kept aware of any hazards.
2. Monitor work permit systems.	2.1 Control work activities to comply with the organisation or site work permit system and safety procedures. 2.2 Check and verify the permit holder's knowledge of the issued permit and its requirements before allowing any repair or maintenance work to be

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	undertaken on the production/process equipment. 2.3 Undertake site inspections to ensure that the work to be undertaken is in sequence and completed in a safe and coordinated manner. 2.4 Identify hazards, and confirm with those undertaking the permitted work that control measures, as defined in the permit are established.
3. Identify and action non-compliance.	3.1 Identify conditions of active permits. 3.2 Report and record incidents of non-compliance according to procedures. 3.3 Take corrective action upon incidences of non-compliance with permit conditions through the withdrawal or suspension of the issued permit.
4. Confirm compliance with permit.	4.1 Complete checklists in accordance with standard procedures. 4.2 Document and communicate findings to appropriate personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of permit requirements sufficient to distinguish between situations requiring permits and then implementing the appropriate corrective action where required.

Knowledge of the organisation standard procedures and work instructions and relevant regulatory requirements, along with the ability to implement them within appropriate time constraints and in a manner relevant to the job.

Competence includes the ability toapply and/or explain:

- an awareness of hazards associated with the permit
- Australian Standard AS2865 - Safe working in a confined space and relevant legislation
- identification of container and goods coding and HAZCHEM markings
- production workflow sequences and requirements for working in confined spaces
- focus of operation of work systems and equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

- application of relevant agreements, codes of practice and other legislative requirements
- hazards of the materials and process and appropriate hazard control procedures
- identification and correct use of equipment, processes and procedures
- planning own work including predicting consequences and identifying improvements; as is relevant to the practical completion of the job.

Demonstration of competence in this unit should include knowledge of the following as appropriate to the process:

- blank/blind lists and P&IDs
- tagging procedures
- isolation procedures
- incident response procedures, including evacuation
- gas types, toxicity and explosivity and limits of each
- oxygen levels
- area knowledge including plant and processes
- permit types and limitations
- product tolerances and specifications
- static electricity and cathodic protection
- environmental hazards
- hot work protective measures
- columns
- vessels
- fire fighting equipment
- blinds/blanks
- pumps
- compressors
- prime movers
- valves.

An understanding of alarm and communication systems is required.

The regulatory framework to include:

- OHS
- EPA
- OHS authorities and NOHSC
- licence and certification requirements
- company policy and permit control systems.

Language, **literacy and numeracy requirements**

This unit requires the ability to:

- read and correctly interpret complex P&IDs
- speak clearly and unambiguously in English
- explain, describe and verify sometimes complex needs and issues.

Writing is required to the level of completing workplace forms and producing reports.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Numeracy is required to the level of being able to correctly differentiate between high and low pressures and temperatures, voltages or masses.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

Assessment will occur using industrial equipment and will be undertaken in a work like environment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to distinguish between situations requiring the major types of permit and to list the major requirements of each type of permit. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- provide reasons for a permit system
- recognise the importance of different work permits
- comply with permit conditions including the wearing of appropriate personal protective equipment (PPE)
- take appropriate action to resolve faults or report faults to appropriate personnel
- explain and implement incident response procedures.

Consistent performance should be demonstrated. For example, look to see that:

- communications are timely and effective
- deviations from permit conditions are recognised, reported, corrected and re-authorisation arranged
- action specified in the permit/standard procedures is carried out
- all safety procedures are followed.

Assessment method and context

The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which may include disruptions to normal, smooth operation.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Competence in this unit may be assessed:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- on an operating plant over an extended period
- by using a suitable simulation based on the actual plant and including walk throughs of the relevant competency components and/or a range of case studies/scenarios and role plays
- by questioning and using 'what if' scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant
- through a combination of these techniques.

These aspects may be best assessed using a range of simulations/scenarios/case studies and 'what ifs' as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new or unusual situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed. In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions which will be used to probe the reasoning behind the observable actions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The application of this unit is defined by the level and area of responsibility.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Legislative and site specific safety procedures and/or requirements, including in hazard identification, assessment and application of control measures, must be met.

Compliance is required with:

legislation/codes:

- OHS
- EPA
- OHS authorities and NOHSC
- licence and certification requirements
- other relevant standards
- workplace specific permit control system.

Monitor means continual personnel presence to observe conditions of the workplace and work practices to ensure compliance with permit conditions. This may include:

- supervision/monitoring of contractors
- verification of permits, licences, tests
- document control
- compliance with legislation/codes.

Corrective action may include:

- ceasing job
- leaving the job site safe if it is safe and practical to do so
- report reason for ceasing job and request new permit when safe.

Indicative functions include:

- supervision/monitoring of contractors
- verification of permits, licences, tests
- document control
- compliance with legislation/codes.

This unit may be applied to either an individual or team related context within the workplace.

Procedures

All operations are performed in accordance with procedures.

Procedures cover all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards. These may include:

- legislation/codes
- OHS legislation, codes of practice and guidance material
- EPA
- National and Australian standards
- licence and certification requirements
- internal permit control system.
- process isolations complete
- mechanical and electrical isolations in place

© Commonwealth of Australia, 2025 Powering Skills Organisation

- atmospheric testing complete and atmosphere safe. If it is not safe and cannot be made safe, then appropriate measures are implemented as per SOPs
- relevant personnel informed of work and agree that it is safe and appropriate to proceed.

Tools and equipment

This competency includes use of equipment and tools such as:

- danger tags and lockouts
- out of service tags
- blinds/blanks
- blind/blank list
- gas testers and monitors
- lights
- ladders
- cathodic protection bonds
- barricades
- signage
- communications equipment
- process and equipment drawings.

The types of work permits may include:

- evacuation
- clearance
- hot work
- vehicle entry
- confined space
- minor repairs
- working at heights
- other special permits.

Safety equipment may include:

- eye protection (eg goggles)
- ear protection
- gloves
- clothing
- respirators and masks
- helmets.

Hazards

Typical hazards include:

- heat, smoke, dust or other atmospheric hazards
- sharp edges, protrusions or obstructions
- limited head spaces or overhangs
- equipment or product mass
- slippery surfaces, spills or leaks

© Commonwealth of Australia, 2025 Powering Skills Organisation

- noise, rotational equipment or vibration.

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- provision of the wrong permit
- incorrect information being supplied with the permit
- errors being made in the understanding of permit data
- failure to correctly correspond to the requirements of the permit
- failure to seek clarification when anomalies occur.

Variables

Key variables to be monitored include:

- sites under which permit activities must be applied
- type of permit to be executed
- types of tools and equipment to be employed
- size of work team
- scope and urgency of work

Health, **Safety and Environment** (**HSE**)

All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

MSAPMPER202A Observe permit work

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor	This competency covers the safety observer role for permits requiring a safety observer. It may be undertaken by a member of the work team or an operator may perform this role.

Application of the Unit

Application of the unit	This competency covers the knowledge and skills required for a safety observer (sometimes called a hole watcher or a fire watch). Safety observers can stop permit work, but do not have the authority to restart it. It includes: • understanding the permit system and the individual permit's requirements • observing work being performed • noting any change in conditions and taking required action.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for the job	1.1. Check the permit(s) issues are appropriate and sufficient for the work to be done 1.2. Prepare a rescue/incident response plan in accordance with procedures 1.3. Check plan is workable within the approved job procedures and issued permit(s) 1.4. Request revision of job procedures and or permit(s) to ensure rescue/incident response plan is practical.
2. Control the permit site.	2.1. Interpret the hazard controls required by the permit(s) 2.2. Check all hazard controls are complied with all the time 2.3. Maintain constant communication with workers 2.4. Control entry to and exit from the work site in accordance with the requirements of the permit(s) 2.5. Monitor the environment of the work site and adjacent areas 2.6. Monitor scope and location of work as defined by the permit(s) 2.7. Withdraw permit(s) and shut down work site if conditions vary from those required by the permit.
3. Take appropriate action for potential incident.	3.1. Ensure all required first response equipment is in the location specified by the permit(s) and is in working condition 3.2. Ensure all required monitoring is carried out as required by permit(s) 3.3. Withdraw permit and shut down work site in the event of an alarm or monitoring failure 3.4. Raise the alarm in the event of an incident 3.5. Implement rescue/incident response plan as required by procedures.
4. Complete safety observer role.	4.1. Hand over to oncoming safety observer before leaving role 4.2. Complete all required documentation and reports

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills:
This competency includes the following skills: • observation • decision making • communication • leadership
Required knowledge:
Competence in this unit includes the following knowledge: • hazards associated with the job and the plant • hazard analysis and control • HSE legislative requirements related to plant • incident response procedures • permit principles and procedures.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should demonstrate competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk throughs of the relevant competency components. Simulations may

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	also include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what if scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to specify the requirements and then select the best solution to meet the necessary and desirable requirements.
Context of and specific resources for assessment	Assessment will require access to a plant or workplace over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with other relevant units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Context	This competency covers any work permits which requires a safety observer. Permits are called clearances by some organisations. Typical types of permit requiring a safety observer include: • excavation • hot work • confined space • other relevant permits. Requirements identified on the permit may include testing of atmospheric conditions, ventilation and control measures such as isolation, barriers, tag out/lockout signs, communications, incident response. A 'competent person' is a person who has, through a combination of training, education or experience, acquired knowledge and skills enabling that person to correctly perform a specified task. Safety structures and controls may include automatic plant shut down buttons, cords/lanyards, alarms, barriers, guards, earth leakage devices, tag out/lock out procedures, warning lights.
Incident response	The required incident response may include: • first response to fire • some initial rescues • first aid/CPR • other responses These responses are not included in this units of competency but are the subject of their own unit of competency.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Unit Descriptor

Unit Descriptor	This competency unit addresses the need for personnel who issue work permits to understand the permit system, know the limitations of each permit and make decisions regarding the need for and correct use of each permit. This competency unit includes the issue of any and all permits. It applies to the issuing of permits covering a single plant or plant area such as might be an operators scope of responsibility.

Application of the Unit

Application of the unit	This competency applies to personnel who are required to issues appropriate permits to work to persons conducting a variety of activities in workplace environments in which hazards exist or specific procedures need to followed and monitored to protect the safety of personnel and the integrity of plant or process. It includes: • reviewing the conditions under which the work will be undertaken • examining the site to determining the hazards and safety requirements applicable to the site • ensuring the appropriate permit(s) is (are) selected depending on the organisations procedures • determining the appropriate conditions for the permit(s) • raising, authorising and issuing the necessary permit(s) • monitoring compliance with the permit conditions • reporting any indiscretions or violations of permit conditions and where necessary revoking permits • managing the permit process especially in shift hand overs or extensions to work activities • withdrawing and signing off work permits on completion of the work and verification that the requirements of the permit have been complied with.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify need for work permit	1.1. Understand work permit system. 1.2. Identify and confirm with appropriate personnel the need for work permit. 1.3. Identify the correct permit for each situation.
2. Prepare work site for authorised work	2.1. Undertake an inspection of the work site. 2.2. Identify OHS and environmental requirements. 2.3. Conduct hazard identification and risk assessment. 2.4. Ensure work site is prepared in accordance specified work permit conditions. 2.5. Check permit conditions and report to appropriate personnel. 2.6. Identify need for and carry out testing in accordance with

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	standard operating procedures.
3. Raise and issue work permits	3.1. Ensure conditions are documented on permit. 3.2. Ensure appropriate testing carried out and results documented on permit. 3.3. Determine an appropriate validity period 3.4. Check that permit conditions are met (ie validate permit). 3.5. Complete and authorise permit. 3.6. Ensure recipient(s) is advised of and agrees to abide by the requirements of the permit(s). 3.7. Ensure recipient(s) signs permit(s).
4. Monitor work for compliance	4.1. Undertake regular site inspections. 4.2. Monitor conditions and work progress and respond appropriately to changing conditions and circumstances. 4.3. Ensure permit currency and revalidate as required. 4.4. Ensure permit is displayed in prominent position. 4.5. Identify and, act on incidences of non-compliance and report promptly to relevant personnel. 4.6. Report any issues which arise with regard to work under the permit in accordance with procedures.
5. Receive end of day report	5.1. Receive end of day report from permit recipients 5.2. Confirm job progress and status. 5.3. Revalidate/arrange for revalidation of permit as required 5.4. Confirm work area has been left safe 5.5. Handover ongoing permits and status of suspended permits to oncoming shift.
6. Close work permit	6.1. Inspect job status. 6.2. Check that work undertaken satisfies permit conditions. 6.3. Ensure that work site is ready for a safe return to working conditions. 6.4. Check required returns to work status have been completed. 6.5. Sign off documentation and close permit in accordance with standard operating procedures. 6.6. Communicate work site and process status to relevant personnel.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills:

Competence includes the ability to select, apply and/or explain:
• appropriate PPE
• Australian Standard AS2865 -Confined Space
• Australian Standard AS1674.1 Safety in welding and allied processes (covers all hotn work)
• types of permits and what they cover
• hazards associated with each type of permit
• permit control system
• hazards of the area for which permit is being issued
• hazards that may be created by the interactions of the permit, the process and the plant area
• identification of container and goods coding and HAZCHEM markings
• production workflow sequences
• focus of operation of work systems and equipment
• application of relevant agreements, codes of practice and other legislative requirements
• methods of hazard analysis
• hazards of the materials and process and appropriate hazard control procedures, including hierarchy of control
• identification and correct use of equipment, processes and procedures
• selecting appropriate tests and knowing what the tests are for
• conducting and interpreting tests for contaminant gases and other hazards
• testing - types of testing may include:
  • atmospheric, including explosivity, O_2
  • flammability
  • toxicity
  • temperature
  • humidity
  • combustibles' oxygen, enriched or reduced
• estimating ventilation required for making vessels safe (eg for confined space entry, hot work)y including applying the formula for factors such as:
  • space turnover rate,
  • number of turnovers
• challenging/checking performance of monitoring and testing equipment against a standard sample
• supervision/monitoring of contractors.

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
Some sources of underpinning OHS knowledge include appropriate OHS and Dangerous Goods legislation, Australian Standards and Safework Australia, State or Territory codes such as: • NOHSC:1010 - National Standard for Plant • AS4024.1 Safeguarding of machinery - general principles • NOHSC: 1003 National exposure standards for atmospheric contaminants in the occupational environment. The regulatory framework to include: • OHS • EPA • OHS authorities and Safework Australia • licence and certification requirements • company policy and permit control systems • other relevant standards. This unit requires the ability to: • read and correctly interpret complex P&IDs • speak clearly and unambiguously in English • explain, describe and verify sometimes complex needs and issues.
Required knowledge:
Knowledge and understanding of the materials, equipment and process sufficient to recognise situations requiring different types of work permits and then implement the appropriate action. Knowledge of the organisation's standard procedures and work instructions and relevant regulatory requirements under which permit systems operate, along with the ability to implement them within appropriate time constraints and in a manner relevant to the job. Knowledge of the relevant requirements under AS2865. Writing is required to the level of completing workplace forms and producing reports. Numeracy is required to the level of being able to correctly differentiate between high and low pressures and temperatures, voltages or masses.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should demonstrate competence on actual plant and equipment in a work environment.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to distinguish between situations requiring the major types of permits and to list the major requirements of each type of permit. It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to: • correctly identify situations requiring work permits • identify and apply legislative requirements, relevant standards and codes of practice (which may be incorporated in the organisation's procedures) to the issuing of work permits • list the requirements of each type of permit • plan own work process within workplace procedures and explain the reasons for the steps in the process. Consistent performance should be demonstrated. For example, look to see that: • correct permit issued • hazards are identified and controlled in the permit by applying the hierarchy of control • required personal protective equipment (PPE) is specified • problems are anticipated • problems are efficiently resolved. These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new or unusual situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.
Context of and specific resources	Assessors must be satisfied that the person can

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
for assessment	consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge. A holistic approach should be taken to the assessment. Competence in this unit may be assessed: • by use of a suitable simulation and/or a range of case studies/scenarios. Simulations should be based on the actual plant and will include walk throughs of the relevant competency components • through questioning and the use of "what if" scenarios both on the plant and off the plant. • by a combination of these techniques. In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions. Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed. This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.
Method of assessment	Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the

EVIDENCE GUIDE	
	work being performedand the safety standard required.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version/version specified by the local regulatory authority must be used.
Context	This competency covers the issue of any and all work permits. Permits are called clearances by some organisations. The types of permit include: • cold work • excavation • vehicle entry • minor repairs • working at heights • hot work • confined space • electrical • increased hazard • other relevant permits. Requirements identified on the permit may include testing of atmospheric conditions, ventilation and control measures such as isolation, barriers, tag out/lockout signs, communications, incident response. A 'competent person' is a person who has, through a combination of training, education or experience, acquired knowledge and skills enabling that person to correctly perform a specified task. Safety structures and controls may include automatic plant shut down buttons, cords/lanyards, alarms, barriers, guards, earth leakage devices, tag out/lock out procedures, warning lights.
The work permit system	The work permit system includes: • types of permits

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• legislative/regulatory/standards framework • roles and responsibilities of parties under the permit system • equipment which can and cannot be used for types of permit • alternative ways of conducting a job
Confined space	The Australian standard (AS2865-2009) definition given for confined space is used in this Training Package, i.e.: 'An enclosed or partially enclosed space that is not intended or designed primarily for human occupancy, within which there is a risk of one or more of the following: (a) An oxygen concentration outside the safe oxygen range. (b) A concentration of airborne contaminant that may cause impairment, loss of consciousness or asphyxiation. (c) A concentration of flammable airborne contaminant that may cause injury from fire or explosion. (d) Engulfment in a stored free-flowing solid or a rising level of liquid that may cause suffocation or drowning.'
Procedures	All operations are performed in accordance with procedures. Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards. These may include: • OHS • EPA • OHS authorities and AASCC • Australian Standards • licence requirements • company policy and permit control systems • other relevant standards.
Preparation	Preparation of work site includes: • mechanical, electrical and other energy sources, and process isolations • de-energising all sources of energy/pressure • purging of lines • lock out/tag out procedures • blinding/blanking lines.
Tools and equipment	This competency includes use of equipment and tools such as: • writing instruments • computers and printers • calculators

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• testing equipment.
Hazards	Typical hazards include: • unsafe conditions developing through failure to conform with the provisions of the permit • injuries to personnel • equipment failures • releases of toxic or noxious substances.
Returns to work status	Returns to work status may include: • de-isolation • removal of lockouts/tag outs • removal of drain covers • etc.
Problems	Anticipate and solve problems means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/ a solution recorded in the procedures. Typical process and product problems may include: • selection of the wrong permit • incorrect information being supplied with the permit • errors being made in the completion of permit data • failure to correctly correspond to the requirements of the permit • failure to seek clarification when anomalies occur.
Variables	Key variables to be monitored include: • types of permits being issued • permit issuing procedures • permit protocols for extended work activities beyond the end of shift • permit hand-over procedures.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

MSAPMPER400A Coordinate permit process

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor	This competency covers the issuing and auditing of any and all permits across multiple plant areas or an entire site. It is typically undertaken by a senior process technician. This may be a routine job, a role in part of a job or a temporary role in a shut down or similar.

Application of the Unit

Application of the unit	This competency covers both the issuing of permits directly and also the coordination of permits issued by others. It focuses on potential conflicts between work being undertaken as well as checking that the permit system is being used correctly. It includes: • coordinating permits and the permit system • plant preparations and isolations and the preparation system • live auditing of permit issuers, permit recipients/holders • auditing of permit paper trails • overseeing and checking test regimes • quality checking of risk assessment • coordinating the issue of additional hazard control resources

Employability Skills Information

Employability Skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Not applicable.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess planned work for conflicts.	1.1. Identify all planned work for a time period 1.2. Determine the scope and HSE impacts of each planned job 1.3. Confirm hazard analysis and controls for each planned job 1.4. Compare hazard profiles for each planned job 1.5. Identify conflicts between planned jobs 1.6. Negotiate a solution between conflicts 1.7. Communicate results of negotiations to relevant stakeholders.
2. Issue required permits.	2.1. List those jobs which will be allowed to proceed in the time period 2.2. Confirm hazard controls required for these jobs 2.3. Identify jobs which have impacts across plant areas 2.4. Ensure controls and communications are adequate 2.5. Issue/cause to be issued required permits 2.6. Report as required by procedures.
3. Audit live permits.	3.1. Audit plant preparations 3.2. Audit permit issuing process 3.3. Check appropriate controls have been specified 3.4. Audit handover/sign on process 3.5. Audit work in progress for conformance to permit conditions 3.6. Audit work completion and hand back/closing process 3.7. Audit deisolation and return to work preparations 3.8. Take immediate and appropriate action on any problems found 3.9. Report on audit as required by procedures.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
4. Audit past permits.	4.1. Obtain relevant paper work 4.2. Check for conformance to procedures 4.3. Check for appropriateness of specified hazard controls 4.4. Identify any non-conformance 4.5. Identify systemic non-conformances 4.6. Take any immediate action which is appropriate 4.7. Report on audit as required by procedures.
5. Analyse audit findings.	5.1. Identify improvements to the permit system 5.2. Identify improvements to the implementation of the permit system 5.3. Suggest improvements to the permit system as appropriate 5.4. Suggests improvements to hazard analysis processes 5.5. Suggest improvements to the plant preparation/return to operations processes 5.6. Suggest improvements to hazard controls 5.7. Suggest training required as appropriate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills:
This competency includes the following skills: • analysis • decision making • communication • priortisation • leadership • negotiation • problem solving
Required knowledge:
Competence in this unit includes the following knowledge: • the operations of the plant and each major unit in it

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• hazards associated with all plant materials, processes and process conditions • hazard analysis and control • HSE legislative requirements related to plant • plant preparation procedures • auditing principles

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should demonstrate competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what if scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to specify the requirements and then select the best solution to meet the necessary and desirable requirements.
Context of and specific resources for	Assessment will require access to an operating plant over an extended period of time, or a suitable method

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
assessment	of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with other relevant units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. MSAPMSUP200A Achieve work outcomes

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

The competency covers the ability to identify and implement actions to achieve workplace targets and to suggest improvements. This unit applies to all employees who may work either individually or as part of a team.

This unit does not cover maximisation of process/equipment efficiencies undertaken as part of the normal work role, which is covered in the relevant unit of competency.

Application of the Unit

Application of this unit

This competency is typically performed by an operator, perhaps working as part of a team, in achieving required work outcomes of quality and productivity within the scope of their job. They would be liaising and cooperating with other members of the work place.

The operator will:

- understand the production process
- recognise production inefficiencies within their area
- participate in and implement ways of improving production efficiencies.
-

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify raw material components and their application in production.	1.1 Outline the properties of materials/components used in the production process. 1.2 Describe or construct a flow chart of the production process relevant to the area/plant. 1.3 Outline parts of the production process where extra care and attention are required. 1.4 Identify the safety and environmental requirements for relevant materials and processes.
2. Identify production targets in work area.	2.1 Identify production targets for work area and work roles taking account of OHS requirements. 2.2 Identify techniques used to measure production performance against workplace targets/standards.
3. Recognise key areas effecting production efficiencies.	3.1 Explain importance of reducing wastage of resources. 3.2 Identify potential sources of wastage/production inefficiencies. 3.3 Outline possible approaches to minimise wastage/ inefficiencies. 3.4 Demonstrate effective techniques to ensure wastage/

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	production minimisation within scope of job.
4. Implement actions to achieve production targets.	4.1 Identify the role of the individual and/or the team in achieving production targets. 4.2 Carry out required role to achieve production targets.
5. Participate in an improvement activity in accordance with organisation procedures.	5.1 Explain organisation procedures for identifying and suggesting improvements. 5.2 Explain the use of information in developing improvements related to work area. 5.3 Investigate a problem. 5.4 Suggest options for causes of problem. 5.5 Suggest options for improvement. 5.6 Discuss a proposed improvement with appropriate people.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the process, normal operating parameters and product quality to recognise non-standard situations. Knowledge of the relevant OHS and environmental requirements is required along with an ability to implement them in a manner which is relevant to determining the corrective action and provision of recommendations.

Thorough knowledge of organisation standard operating procedures is required. Some appreciation of business goals is required as a basis for decision-making and action.

Competence to include the ability toapply and explainsufficient for the identification and implementation of ways to maximise production efficiencies:

- relevant equipment and operational processes
- hazards associated with the process
- application of the hierarchy of control in controlling the hazards
- the safety implications of improving efficiencies
- organisation policies and procedures
- organisation goals, targets and measures
- organisation OHS, quality, and environmental requirements

© Commonwealth of Australia, 2025 Powering Skills Organisation

- individual and team roles and responsibilities in achieving safety, quality and environmental targets
- principles of decision making strategies and techniques
- organisation information systems and data collation
- industry codes and standards.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is also required, e.g. to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Consistent performance should be demonstrated. Critical aspects of competency include:

- hazards are identified and controlled
- production targets and measures are identified
- wastage and production inefficiencies for the functional area are identified
- work is conducted in a manner to minimise wastage/inefficiencies
- organisation procedures for identifying and suggesting improvements are followed
- effective participation in process improvement teams/activities is demonstrated.

Assessment method and context

Assessment will occur on-the-job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

© Commonwealth of Australia, 2025 Powering Skills Organisation

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version will be used.

Context

This competency applies to all work environments and sectors within the industries.

This competency unit applies to a wide range of processes and equipment. In large plants with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

Properties of materials/components

Properties of materials/components includes:

- physical and chemical properties relevant to the process and the product
- hazardous properties.

Production targets/performance

Production targets/performance may include a range of factors where relevant to the job such as:

- volume
- quality

© Commonwealth of Australia, 2025 Powering Skills Organisation

- cost.

Wastage

Wastage may include:

- overproduction.
- waiting
- transporting
- inappropriate processing
- unnecessary inventory
- unnecessary/excess motion
- defects (quality).

Sources of information

Sources of information may include:

- yearly, monthly, weekly and daily production targets
- business objectives and goals
- control charts, run charts and graphs
- organisation manuals and procedures
- equipment specifications.

Inefficiencies

Sources of process inefficiencies and wastage may include:

- equipment downtime
- spillages
- leaks
- contamination
- raw material quality
- utilities usage
- productivity issues
- incorrect work allocation/priorities/planning
- incorrect processes/procedures.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This unit of competency includes use of equipment and tools such as:

- workplace forms and logs
- communication equipment for gathering and exchanging information such as telephones, two way radios, fax machines.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Problems

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'.

Typical problems include:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.
-

Unit Sector(s)

Unit Descriptor

Unit descriptor

This unit of competency covers the provision and processing of all relevant information by responding to the information requirements of the plant including the completion of all workplace documents and clearly and concisely providing relevant information to others.

Application of the Unit

Application of this unit

This competency applies to operators who are required to provide information, orally or in writing in a one on one situation or as part of a group discussion.

The operator would:

- complete appropriate workplace forms
- provide appropriate workplace and technical information within their area of expertise
- identify routine information requirements seeking clarification where necessary.
-

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Access information.	1.1 Identify the need for information. 1.2 Request appropriate information. 1.3 Access information in accordance with procedures. 1.4 Comply with security procedures in accessing appropriate information.
2. Provide appropriate information.	2.1 Deal with enquiries promptly and courteously. 2.2 Establish details of enquiry by questioning and summarising. 2.3 Provide appropriate information relevant to enquirer's request. 2.4 Organise information clearly, concisely and logically. 2.5 Provide information in a form that is readily understood by others. 2.6 Provide information in a timely manner. 2.7 Redirect enquiries to relevant personnel for resolution where outside the operator's area of responsibility.
3. Give and follow routine instructions.	3.1 Give accurate, clear and concise instructions that are consistent with the skills of the receiver. 3.2 Ensure that interaction with others is efficient, effective, responsive, courteous and supportive. 3.3 Confirm that instructions are understood.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	3.4 Follow prescribed and routine work related sequences.
4. Provide reports.	4.1 Complete all workplace reports clearly and accurately in accordance with procedures. 4.2 Report all relevant information clearly and concisely.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes the ability to:

- describe importance of workplace documentation in relation to job role
- apply organization, operational, quality and safety policies and procedures
- apply workplace codes such as numbers, symbols, signs, colour and other codes.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret work instructions, procedures, operating manuals, job card and other documents provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required to the extent required by work instructions and procedures.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

Assessment will occur on the job or in a simulated workplace. In all cases it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

© Commonwealth of Australia, 2025 Powering Skills Organisation

Competence must be demonstrated in the ability to provide and assess all required information and that the information provided both verbally and in writing is completed in a clear and concise manner, that is easily understood by others and in accordance with workplace requirements

Consistent performance should be demonstrated. For example, look to see that:

- reports and records are completed accurately, concisely and in accordance with procedures
- all information is provided in an efficient, effective, courteous and timely manner
- completion of shift handover, log books and company production records conveys all relevant information
- information sharing demonstrates effective communication processes such as turn-taking, participating in discussions and tolerating views of others in a way that contributes to the overall discussion
- notes of discussion are prepared so that they can be clearly interpreted by the receiver
- communication distinguishes between relevant and peripheral issues.

Assessment method and context

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge. A holistic approach should be taken to the assessment.

Competence in this unit may be assessed:

- by observation and questioning to indicate understanding
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- by a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Reasonable adjustment of assessment tasks will be undertaken as required.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes items of equipment such as:

- telephone
- two way radio
- computer equipment.

Information sources and plant documentation may include:

- operating procedures
- work instructions
- incident procedures
- operating manuals
- quality procedures
- training program contents/materials
- safety data sheets
- job cards
- maintenance logs
- non compliance reports
- incidence and accident reports
- permits
- schematics/process flows/engineering drawings.

Reports

Reports includes the following as appropriate to workplace requirements:

- oral

© Commonwealth of Australia, 2025 Powering Skills Organisation

- written
- electronic
- handovers (giving/receiving).

Problems

Respond to routine problems means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- difficulty in quickly locating information required
- missing forms, logbooks etc.
- conflicting work priorities
- delays in reporting of information
- information is inaccessible
- absence of approver/ other signatories
- breakdown of communication equipment.

Appropriate action for non-routine problems may be reported to designated person

or other action identified in the procedures.

Unit Sector(s)

Not applicable.

© Commonwealth of Australia, 2025 Powering Skills Organisation

MSAPMSUP240A Undertake minor maintenance

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit applies to operators who are involved in providing basic maintenance and the resolving of routine problems to procedures. It does not cover activities normally requiring traditional trade training.

Application of the Unit

Application of this unit

In a typical scenario a plant operator does minor maintenance activities on the plant and equipment being operated. For instance the pressure drop across a filter unit may be high, indicating the filter cartridge needs changing. The operator takes the filter unit out of operation, cleans the unit, uses the correct spanner to open the lid, installs a fresh cartridge, closes the unit using the spanner again, then cleans up the area and disposes of the spent cartridge. Typically this sort of maintenance will be done on the plant and will not require workshop type facilities.

The operator will:

- be aware of and contribute to a safe working environment
- identify and check equipment for faults
- perform basic maintenance to procedures
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisites

This unit has **no** prerequisites.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify maintenance requirements.	1.1 Identify equipment variations/irregularities using observed data and plant records. 1.2 Assess the urgency/priority of the situation. 1.3 Identify appropriate corrective action. 1.4 Identify correct tools and materials. 1.5 Assess the impact of the maintenance activity and communicate to appropriate personnel. 1.6 Identify hazards and risk controls. 1.7 Identify work permit requirements.
2. Prepare for maintenance activity.	2.1 Ensure equipment is turned off and isolated as required. 2.2 Clear the area of obstructions and hazardous materials. 2.3 Obtain appropriate tools, parts, materials and procedures. 2.4 Obtain the appropriate work permits and adhere to the requirements. 2.5 Communicate the impending maintenance activity to the appropriate personnel.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
3. Perform maintenance activity.	3.1 Access all relevant information. 3.2 Undertake maintenance activity according to procedures. 3.3 Use tools and maintenance techniques correctly. 3.4 Restore equipment to normal working condition. 3.5 Leave the work area in a clean and safe condition. 3.6 Ensure permits are signed off as appropriate.
4. Test equipment.	4.1 Test equipment according to procedures. 4.2 Return equipment to service. 4.3 Ensure equipment meets normal operating requirements.
5 Record maintenance activity.	5.1 Complete maintenance logs/plant history records. 5.2 Report maintenance activity to relevant personnel. 5.3 Identify and report outstanding maintenance requirements to relevant personnel.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of equipment operation and maintenance practices sufficient to recognise fault and no-fault conditions in standard and non-standard situations and then determine appropriate action which is consistent with operational guidelines is required.

Knowledge of organisation procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving maintenance problems, including:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults

© Commonwealth of Australia, 2025 Powering Skills Organisation

- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- urgency and timeliness factors in maintenance
- maintenance planning/scheduling/records systems
- identification of tools, materials and spare parts
- basic techniques for using and handling tools
- physical measurement, alignment and clearance principles.

Competence also includes the ability to:

- plan own work, including predicting consequences and identifying improvements
- identify factors which may affect product quality or production output and appropriate remedies
- identify when the operator is able to rectify faults and when assistance is required.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret typical equipment specifications schematics and diagrams.

Writing is required to the level of completing workplace forms and production reports.

Basic numeracy is required, to interpret plant data and maintenance schedules.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Where the completion of this unit requires working under a permit/clearance, then competency must also be established in *PMAPER200C Work in accordance with an issued permit*, or other appropriate unit.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- understand the procedures and know the importance of critical operational systems
- recognise potential situations requiring action and then implement appropriate action.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- appropriate equipment tests are undertaken and analysed appropriately
- proposals for equipment repair are based upon the most appropriate and cost effective method to return equipment to full performance in a timely manner
- maintenance activities are completed safely and to procedures.

Assessment method and context

Assessment will occur on industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade level skills. It is not intended that this competency would cover maintenance that is carried out in a workshop.

Procedures

All operations are performed in accordance with procedures.

Procedures mean all relevant workplace procedures, work instructions, temporary instructions, standard operating procedures, plant description manuals, manufacturer instructions, specifications, service manuals, machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits and relevant industry and government codes and standards.

Maintenance activities

This competency unit includes minor maintenance such as the following:

- operational maintenance (eg connection-disconnection of hoses, greasing, lubrication and lubricant systems, adjusting sealing glands, cleaning and changing filters, 'nipping up' flanges)
- general cleaning
- removal and replacement (eg gland packing, changing blades or cutters, replacing gaskets, replacing /maintaining seals, changing filter elements, servicing strainers).

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools
- specialised tools
- measuring and aligning equipment.

Hazards

Typical hazards include:

- rotating and moving machinery
- process materials, solids, liquids and gases under pressure or flowing
- hot surfaces or materials
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out of specification operation.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'. Typical process and product problems may include:

- out-of-specification product or variations
- response of equipment to materials variations

© Commonwealth of Australia, 2025 Powering Skills Organisation

- equipment in need of maintenance.

Variables

Key variables to be monitored include:

- equipment performance (eg speed, output, variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired).

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures
- manufacturer specifications, instructions, service manuals and other information.
-

Unit Sector(s)

MSAPMSUP303A Identify equipment faults

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit requires the application of planning, technical knowledge and skills to check and isolate routine and non-routine equipment faults used in production and report on the status of equipment. It applies to all sectors of the industry.

This competency is typically performed by operators demonstrating some relevant theoretical knowledge and using a range of well developed skills requiring some discretion and judgement

Application of the Unit

Application of this unit

This competency applies to operators who are required to apply knowledge of materials, product purpose and processes to the identification and isolation of faults in equipment. The key factors are the planning, checking and identification of routine and non-routine faults, in order to return the equipment to production.

The operator will:

- identify and plan scope of equipment checks
- check settings, adjustments and performance of equipment
- check materials for conformity to job requirements
- identify and isolate faults in equipment
- propose solutions and carry out solutions within scope of authority
- complete logs and reports.
-

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify scope of operational check.	1.1 Identify and classify equipment components and operating systems. 1.2 Match appropriate tests and procedures to the equipment operating systems. 1.3 Identify special test procedures and parameters in manufacturer's specifications and procedures. 1.4 Explain the operating principles of hydraulic, pneumatic, mechanical and electrical/electronic systems as related to workplace equipment. 1.5 Implement measures to control identified hazards in line with procedures and duty of care. 1.6 Observe and undertake checks on the physical condition of equipment as per procedures. 1.7 Record preliminary observations. 1.8 Discuss test procedures with appropriate personnel and obtain necessary permission where required.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
2. Plan operational checks.	2.1 Check specifications and notes from preliminary observations and identify areas to be clarified. 2.2 Plan testing sequence/s noting areas where results and observations should be recorded. 2.3 Identify safe area for testing. 2.4 Make arrangements for any additional resources (including other employees).
3. Check unit through full operational range.	3.1 Undertake testing, observing relevant safety and operational requirements. 3.2 Confirm results and findings.
4. Identify fault and/or formulate recommendations.	4.1 Identify impact of fault on work schedule. 4.2 Record proposals for equipment repair based on faults found, cost/time implications and workplace approval systems. 4.3 Explain report to relevant workplace personnel including any options and recommendations. 4.4 Undertake repairs where appropriate in accordance with procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of equipment operation and maintenance practices sufficient to recognise fault and no-fault conditions in standard and non-standard situations and then determine appropriate action which is consistent with operational guidelines is required.

Knowledge of organization procedures and relevant regulatory requirements along with the ability to implement them within appropriate time constraints and work standards.

Application of the knowledge of managing risks using the hierarchy of controls applied to the process. Application of approved hazard control, safety procedures, use of PPE in relation to handling materials, equipment operation and clean up.

Knowledge as a basis for solving processing and material problems, including:

- principles of the operation of the equipment to be maintained
- functions and troubleshooting of internal components and their problems

© Commonwealth of Australia, 2025 Powering Skills Organisation

- routine and non-routine causes of equipment failures and the service conditions which may increase maintenance
- maintenance techniques, (eg reactive maintenance, predictive and preventative operational maintenance)
- appropriate testing procedures and use of equipment for a range of equipment faults
- operating principles for mechanical, hydraulic, pneumatic, electrical/electronic systems
- urgency and timeliness factors in planning maintenance activities in relation to production requirements
- collection, analysis and reporting of data.

Competence also includes the ability to:

- identify and select testing methods based on cost and time effectiveness
- conduct inspections, checks and tests on equipment as appropriate
- read and interpret circuit diagrams for mechanical, hydraulic, pneumatic and electrical/electronic operating systems
- use technical information and manufacturer information to locate relevant data
- interpret technical specifications and manufacturer instructions
- ensure workplace is safe for testing and maintenance of equipment
- identify hazards of the materials and process
- implement appropriate procedures for hazard control
- use PPE, safely handle products and materials, read relevant safety information
- apply safety precautions appropriate to the task.

Language, **literacy and numeracy requirements**

This unit requires the ability to read and interpret typical equipment specifications schematics and diagrams.

Writing is required to the level of completing workplace forms and production reports.

Basic numeracy is required, to the level of calculating equipment throughputs and performance.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

© Commonwealth of Australia, 2025 Powering Skills Organisation

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to:

- understand the procedures and know the importance of critical operational systems
- recognise potential situations requiring action and then implement appropriate action.

Consistent performance should be demonstrated. For example, look to see that:

- early warning signs of equipment in need of attention/with potential problems are recognised
- appropriate tests are undertaken and tests are analysed appropriately
- proposals for equipment repair are based upon the most appropriate and cost effective method to return equipment to full performance in a timely manner
- items initiated are followed through until final resolution has occurred.

Assessment method and context

It is preferred that assessment takes place on industrial equipment in a work environment.

Competence in this unit may be assessed:

- on a processing plant, allowing for operation under all normal and a range of abnormal conditions
- in a situation allowing the generation of evidence of the ability to recognise, anticipate and solve problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Powering Skills Organisation

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This competency applies to all work environments and sectors within the industry. It does not include maintenance that would require trade level skills. It is not intended that this competency would cover maintenance that is carried on in a workshop.

Procedures

All operations are performed in accordance with procedures.

Procedures mean all relevant workplace procedures, work instructions, temporary instructions, standard operating procedures, plant description manuals, manufacturer's instructions, specifications, service manuals, machine circuit diagrams for hydraulic/pneumatic and electrical/electronic circuits and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

- hand tools specific for the task
- product testing equipment (eg flowmeter, scales, tape measure, micrometer, caliper, ultrasonic thickness)
- machinery measuring equipment (eg vibration meter, tachometer, current tester, thermal imaging, temperature gauge)
- measuring and aligning equipment.

Hazards

Typical hazards include:

- rotating and moving machinery
- process materials, solids, fluids and gases under pressure or flowing
- temporary connections or by-passes
- electrical, hydraulic or pneumatic energy sources
- out-of-specification operation.

Problems

Respond to/rectify 'non-routine problems' means 'apply known solutions to a variety of predictable problems'. Typical process and product problems may include:

- out-of-specification product or variations
- response of equipment to materials variations
- new or changed materials
- changed equipment settings (eg higher speed or throughput)
- equipment in need of maintenance

© Commonwealth of Australia, 2025 Powering Skills Organisation

- procedures requiring update or modification.

Variables

Key variables to be monitored include:

- equipment performance (eg speed, output, variations)
- equipment component performance
- sequences and timing of operations
- materials changes (desired and not desired).

Data and Records

Typical information sources, observed data and plant records may include:

- plant data
- log sheets
- operational and performance reports
- physical aspects such as noise, smell, feel and pressure condition monitoring information
- planned maintenance schedules
- procedures.

MSAPMSUP390A Use structured problem solving tools

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor.

Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify the problem.	1.1 Identify variances from normal operating parameters and product quality. 1.2 Define the extent, cause and nature of the problem by observation and investigation. 1.3 State and specify the problem clearly.
2. Determine fundamental cause of problem.	2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques. 2.2 Develop possible cause statements. 2.3 Identify fundamental cause.
3. Determine corrective action.	3.1 Consider all possible options for resolution of the problem. 3.2 Consider strengths and weaknesses of possible options. 3.3 Determine corrective action to remove the problem and possible future causes. 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures. 3.5 Develop recommendations for ongoing monitoring

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
	and testing.
4. Communicate recommendations.	4.1 Prepare report on recommendations. 4.2 Present recommendations to appropriate personnel. 4.3 Follow up recommendations if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, **literacy and numeracy requirements**

© Commonwealth of Australia, 2025 Powering Skills Organisation

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
  - identifying variations
  - identifying cause and effect
  - separating single problems from multiple problems
  - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units.

In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non- routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.

MSS402061A Use SCADA systems in operations

Modification History

New unit, superseding MSACMT261A Use SCADA systems in manufacturing - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required by an individual to interact with a System Control and Data Acquisition (SCADA) system as part of their job.

Application of the Unit

This unit applies to an individual in an organisation using a SCADA system and the individual must interface with that system. The individual will need to access this system as part of their routine and take actions based on the information they obtain from the SCADA system in accordance with procedures.

This unit requires the application of skills associated with using communication tools and technology for management of own work, planning and problem solving.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Elements and Performance Criteria

1	Use operator interface	1.1	Identify SCADA terminals relevant to own work station and functions
		1.2	Use keyboards, track ball, monitor and/or stand alone controllers to access/interrogate system
		1.3	Use correct level of access and find all relevant screens and information
		1.4	Access message section and acknowledge messages
		1.5	Input and output information correctly according to program and organisation requirements
2	Use information	2.1	Obtain data and information from SCADA, as required, including process, supply and product chain data
		2.2	Interpret data and information as required by own job
		2.3	Find and use relevant historical data and information
		2.4	Use manufacturer manuals or specifications, as required, to expand knowledge of SCADA system relevant to own work
		2.5	Determine and prioritise required actions
3	Make required changes in accordance with procedures	3.1	Adjust production/process in response to SCADA information
		3.2	Record adjustments and variations to specifications/schedules and report to appropriate personnel
		3.3	Seek feedback and information on adjustments to further improve procedures, where required

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- using SCADA terminals and other input devices
- reading and interpreting electronic and hard copy SCADA operating instructions and documents, including where used:
  - work instructions
  - standard operating procedures
  - temporary instructions
  - other provided operating instructions
- working within security and access control requirements of the SCADA system
- identifying modules, screens, and so on, of SCADA system relevant to own work
- accurately inputting and outputting data
- searching and retrieving data
- accessing SCADA system nominated assistance, when required

Required knowledge

Required knowledge includes:

- technical knowledge needed to operate own work processes
- hierarchy of SCADA system and operation
- information available from and controls exercised by/through the SCADA system

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • identify the scope and relevance of the SCADA system to their own work • access correct levels of the SCADA system • enter and retrieve data, including normal performance and variations

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• use SCADA system to assist in own work.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented ,or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess responses to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as SCADA software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
SCADA	SCADA refers to: • a number of systems which automatically collect

© Commonwealth of Australia, 2025 Powering Skills Organisation

	critical process data, perform required mathematical manipulations on it and then make control decisions and/or give required information to personnel for action In some industry sectors, the SCADA system is sometimes integrated into other sophisticated computer control systems, such as Distributed Control System (DCS). These sectors may simply refer to their SCADA as the DCS or other similar term (such as the proprietary name of the computer system). SCADA systems may provide information from outside of the process, such as stock/material levels in a customer plant and/or available supply, supply rates and pricing from a supplier plant. This information may all be accessed by the SCADA system and the employee using it in order to make production rate and other control decisions (either automatically or human assisted) about their own operations and work processes
Supply and product chains	The supply chain Includes: • all suppliers in the chain from the initial raw material up to the current step in the operations process The product chain includes: • all steps after the current step up to the final customer Competitive systems and practices organisations encompass the entire production system, beginning with the customer, and includes: • the product sale • outlet • the final assembler • product design • raw material mining and processing • all tiers of the value stream (sometimes called the supply chain) Any truly 'competitive' system is highly dependent on the demands of its customers and the reliability of its suppliers. No implementation of competitive systems and practices can reach its full potential without including the entire 'organisation' in its planning
Procedures	Procedures may include: • work instructions • standard operating procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• formulas/recipes • batch sheets • temporary instructions and similar instructions provided for the smooth running of the plant • good operating practice as may be defined by industry codes of practice (e.g. good manufacturing practice (GMP) and responsible care) • government regulations Procedures may be: • written, verbal, computer-based or in some other format

MSS402080A Undertake root cause analysis

Modification History

New unit, superseding MSACMT280A Undertake root cause analysis - Equivalent

Unit Descriptor

This unit of competency covers the skills and knowledge required to undertake root cause analysis (RCA) by any person. This will often be undertaken by people working in a team. This unit also covers the competencies needed by operators to contribute to an advanced maintenance strategy using RCA coupled with diagrams and charts.

Application of the Unit

This unit applies to individuals working in an organisation which is applying competitive systems and practices strategies. The unit applies to the formal problem solving to root cause that the individual must undertake in their own work area or where the individual contributes to problem solving to root cause as part of a team.

This unit requires an ability to seek and apply information from a variety of sources in order to inform RCAs. Initiative and enterprise is also required to identify quick fix and permanent solutions to problems.

Where training in a wider range of problem solving techniques and tools is required the unit MSAPMSUP390A Use structured problem solving tools should be selected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

© Commonwealth of Australia, 2025 Powering Skills Organisation

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Recognise problems	1.1	Identify features or occurrences indicative of a problem
		1.2	Use appropriate tools, techniques and charts to define the problem
2	Implement quick fix	2.1	Recommend a quick fix within the scope of competency and authority
		2.2	Use technology or processes relevant to the problem to implement quick fix
3	Determine root cause	3.1	Identify a range of possible causes
		3.2	Gather data and other information to eliminate or confirm possible causes
		3.3	Use available data and information to link causes and effects
		3.4	Seek assistance, as required
		3.5	Identify root cause
4	Develop permanent solution	4.1	Identify a range of methods to eliminate the root cause or break the cause tree
		4.2	Select the most appropriate solution
		4.3	Liaise with relevant people
		4.4	Recommend or implement solution within the limits of competency and authority

© Commonwealth of Australia, 2025 Powering Skills Organisation

4.5 Monitor impact of solution and make further recommendations, as required

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- cooperating and working with others on problem solving
- assessing and recording information from a variety of sources
- defining potential problems factually, including:
  - location and extent of problem or incident
  - sequence of events where relevant
  - extent of deviation from normal operation or performance
- analysing potential problems across a range of varied activities and knowledge applications
- reading and constructing simple charts, such as cause and effect diagrams

Required knowledge

Required knowledge includes:

- RCA methodology, including difference between quick fixes and root cause elimination or breaking of causal tree
- principles and normal operation of equipment, plant and processes in own work area sufficient to undertake a RCA and propose solutions
- common variances to normal performance that are indicators of a problem
- use of relevant analysis tools (e.g. cause/effect diagrams, Pareto charts and 5 Whys)
- operations in own work area

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and	A person who demonstrates competency in this unit must

© Commonwealth of Australia, 2025 Powering Skills Organisation

evidence required to demonstrate competency in this unit	be able to provide evidence of the ability to: • undertake problem identification • use appropriate processes to achieve root cause identification • prioritise solutions • recommend solutions and implementation procedures to problems within own area and range of technical skills and knowledge • evaluate implementation of solutions.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace using or implementing one or more competitive systems and practices. Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned, currently being implemented, or implemented changes to work processes and procedures relevant to the assessee • documentation and information in relation to production, waste, overheads and hazard control/management • reports from supervisors/managers • case studies and scenarios to assess response to contingencies.
Method of assessment	A holistic approach should be taken to the assessment. Competence in this unit may be assessed by using a combination of the following to generate evidence: • demonstration in the workplace • workplace projects • suitable simulation • case studies/scenarios (particularly for assessment of contingencies, improvement scenarios, and so on) • targeted questioning • reports from supervisors, peers and colleagues (third-party reports) • portfolio of evidence. In all cases it is expected that practical assessment will be combined with targeted questioning to assess underpinning knowledge. Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and

© Commonwealth of Australia, 2025 Powering Skills Organisation

	disability.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the candidate and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Competitive systems and practices	Competitive systems and practices may include, but are not limited to: • lean operations • agile operations • preventative and predictive maintenance approaches • monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems • statistical process control systems, including six sigma and three sigma • Just in Time (JIT), kanban and other pull-related operations control systems • supply, value, and demand chain monitoring and analysis • 5S • continuous improvement (kaizen) • breakthrough improvement (kaizen blitz) • cause/effect diagrams • overall equipment effectiveness (OEE) • takt time • process mapping • problem solving • run charts • standard procedures • current reality tree

© Commonwealth of Australia, 2025 Powering Skills Organisation

	Competitive systems and practices should be interpreted so as to take into account: • the stage of implementation of competitive systems and practices • the size of the enterprise • the work organisation, culture, regulatory environment and the industry sector
Features or occurrences indicative of a problem	Examples of features or occurrences indicating problems include: • variation to normal plant or equipment operation • unplanned or non-conforming process or operations outcomes • out of specification products • excess scrap • accidents and emergencies • regulatory breaches • customer returns and complaints • reduction or loss of sales
Root cause	There are many possible causes of any problem. The root cause contrasts with other possible causes of a problem which when eliminated have no impact or only ameliorate the problem. Elimination of the root cause permanently eliminates the problem. There should only be one root cause for any problem and so the analysis should continue until this one cause is found.
Cause tree	The series of causes is referred to as the cause tree. Not all root causes are accessible and able to be eliminated. Breaking the cause tree is such a way that the problem cannot recur is an acceptable alternative. Not all situations can wait for the RCA and eventual elimination of the root cause as there may be serious current impacts. The quick fix will control these immediate impacts, but does not eliminate the root cause.
Quick fix	A quick fix is not a short cut or side step for a permanent solution to the root cause. It is a necessary step designed to control the immediate impacts of a problem, for example, to prevent ongoing errors or to ameliorate damage.
Appropriate techniques/charts	Appropriate techniques/charts may include: • control charts • Pareto charts

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• run charts • flow charts • cause and effect diagrams • tree diagrams • 5 Whys analysis

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify emergency equipment.	1.1. Locate emergency equipment 1.2. Ensure access is provided to emergency equipment.
2. Inspect and assemble emergency equipment.	2.1. Inspect emergency equipment for faults or damage 2.2. Secure couplings/connections and operational condition 2.3. Assemble equipment in accordance with manufacturer specifications 2.4. Identify and report any missing or damaged components.
3. Carry out minor servicing of equipment.	3.1. Maintain and clean equipment according to specifications/procedures 3.2. Conduct servicing in accordance with specifications/procedures 3.3. Ensure equipment is 'made-ready' and stored in designated location 3.4. Ensure equipment functions in accordance with specifications.
4. Report and record equipment status.	4.1. Record and report equipment status 4.2. Raise maintenance requests as required 4.3. Undertake corrective actions as required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
• hand skills • follow procedures • observation • completing records • assembling and operating various pieces of emergency response equipment • servicing various pieces of emergency response equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• storing various pieces of emergency response equipment.
Required knowledge
Knowledge and understanding of the emergency response procedures and equipment, sufficient to recognise standard and non-standard situations with regards to the equipment used, and then determine the appropriate action which is consistent with operating guidelines. These include: • principles of operation of the emergency response equipment • hazards policies and procedures • emergency, fire and accident procedures. Knowledge of the relevant OHS and environmental requirements, and enterprise standard operating procedures (SOPs), along with an ability to implement them in a manner that is relevant to emergency response practices. These include procedures for the use of personal protective clothing and equipment.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. This unit of competency requires a body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk- throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
required to demonstrate competency in this unit	implementing appropriate action. The emphasis should be on the ability to minimise the affect of an emergency situation. Consistent performance should be demonstrated. In particular look to see that: • early warning signs of equipment in need of servicing are recognised • equipment is always 'made ready' • equipment is always stored in the designated location at all times when not in use • access to equipment is available at all times when not in use. These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus, with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and extreme situations that may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities (eg HAZOP) and similar sources.
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork, OHS and communication units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the

RANGE STATEMENT	
candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all items of equipment that are required for emergency response.
Emergency response equipment	Emergency response equipment may include: • fire extinguishers • fire hoses • fire blankets • pumps • branches, fittings and nozzles • foam equipment/units • personal protective clothing • breathing apparatus • deluge/safety showers.
Functions	Required functions include: • inspections • visual • mechanical • servicing • lubrication • pressure checks • refilling • communication • maintenance • external authorities.
Hazards	Hazards may include: • chemicals and hazardous materials • gases and liquids under pressure • moving machinery • materials handling • working at heights, in restricted or confined spaces, or • environments subjected to heat, noise, dusts or vapours.
Emergency situations	Emergency situations may include: • accidents

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• fires • chemical or oil spills • gas leak or vapour emission • utilities failure • bomb scares.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMAOHS310B Investigate incidents

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This competency unit refers to the investigation of incidents that occurred at the workplace. These incidents can vary from large to small, completely internal or partially externally coordinated. They include, but are not limited to, all types of emergencies, fires, OHS and/or environmental incidents.

Application of the Unit

Application of the unit	In a typical scenario, minor incidents which are subject to internal investigation will be conducted by the plant operator/technician, and for a more major investigation, or one subject to external investigation, he/she will assist with the investigation and/or undertake identified parts of the investigation. The exact definition of the scope of responsibility will depend on company policy, as will the level of the person undertaking these investigations. These investigations will be in accordance with company procedures for such investigations which will be consistent with any relevant regulations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor and review emergency situation	1.1. Undertake site inspections of incident scene 1.2. Communicate with relevant personnel regarding specific aspects of the emergency situation 1.3. Monitor corrective action procedures 1.4. Communicate changes to the situation to appropriate personnel.
2. Record investigation process and results as appropriate	2.1. Establish and secure boundaries of the incident scene to prevent contamination of prospective evidence/exhibits 2.2. Identify and interview persons relevant to the incident 2.3. Identify and record evidence/exhibits at the scene prior to examination to ensure continuity 2.4. Assess relevant information, documentation and evidence/exhibits 2.5. Determine point of origin and most likely cause of incident of the emergency 2.6. Determine risk factors affecting the emergency 2.7. Identify and analyse a range of other possible causes 2.8. Identify and utilise support services to investigate the incident scene 2.9. Process, record and communicate information/evidence/ exhibits, forms and documents to appropriate personnel following enterprise policies and procedures.
3. Make suggestions to	3.1. Identify and assess tactical factors and resulting priorities

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
improve handling of emergency situation	occurring during the emergency 3.2. Formulate appropriate suggestions to improve handling of similar emergency situation based upon information available 3.3. Identify obvious problems in related plant area and make an appropriate contribution to their solution.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence includes the ability to apply and describe or explain:

- factors affecting fire behaviour
- characteristics of fire and fuel types
- security of an incident scene
- examination of an incident scene
- collection of physical evidence
- workplace documentation and recording systems
- use of personal protective equipment
- liaison techniques with third parties
- workplace procedures and work instructions
- company policies regarding health and safety and environment
- hazard identification, assessment and control of risk
- basic risk assessment of workplace jobs/tasks
- environmental impacts likely to arise from activities
- measures for eliminating and/or reducing impacts on the environment.

Required knowledge

Knowledge and underpinning skills are required in:

- communication (listening, questioning) and negotiation in questioning witnesses
- analytical and decision making skills
- problem solving skills in responding to a range of emergency situations
- exhibit handling and preserving continuity of evidence
- witness management, in particular demonstration of ethical behaviour and cultural awareness.

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
Knowledge and understanding of the investigation of incidents sufficient to recognise and assess causes of emergency situations and then to determine improvements to the actual response within the scope and level of the IR responsibilities and competencies. A demonstrated working knowledge and application of the company-specific work organisations and workflow would be highly regarded. An ability to coordinate own work and the work of other team members is also regarded as a component of this unit of competency.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action within the scope and level of their

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	responsibilities and competencies. Consistent performance should be demonstrated. In particular look to see that wherever possible: • the scene is secure and evidence is preserved • evidence is collected in accordance with legislative requirements • point of origin and most likely cause of incident is determined • a range of other possible causes can be identified and analysed • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution • emergency reporting procedures are understood and followed. These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and extreme situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities (eg HAZOP) and similar sources.
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	Job safety and environment analysis will be conducted in accordance with required company procedures and policies. This competency covers process manufacturing plants which may involve workplace hazards such as: • chemicals and hazardous materials • gases and liquids under pressure • moving machinery • materials handling • working at heights, in restricted or confined spaces, or environments subjected to heat, noise, dusts or vapours.
Incidents/emergencies	Incidents/emergencies may include, but are not limited to: • accidents • fire • chemical or oil spills • gas leak or vapour emission • utilities failure • bomb scares • OHS incidents • environmental incidents.
Enterprise policies and procedures	Enterprise policies and procedures include those which directly or indirectly cover emergency situations, such as: • emergency, fire and accident procedures • hazard policies and procedures • standard operating procedures (SOPs) • safety procedures • work instructions • personal protective clothing and equipment procedures.
Evidence gained	Evidence gained as a result of investigations may include: • video tapes

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• audio tapes • drawings • photographs • plans • manifests • relevant documents • personal notes • physical evidence/materials • debris • soil.
Support services	Support services may include incident scene specialists: • pathologists • forensic investigators • coroner • government medical officers • interpreters • technical services • legal officers • undertakers • forensic accountants • information technology consultants • document examiners • handwriting experts • financial organisations • external law enforcement agencies.
Interview strategies	Interview strategies may vary but require consideration of: • location • timing • method (direct questioning, empathetic questioning) • strategies for developing rapport • who is being interviewed • exclusion of leading questions • avoidance of cross-examination.
Legal and policy requirements	Legal and policy requirements differ according to the status of the person being interviewed. Such requirements may include: • the presence of a solicitor, independent person, family member or interpreter • special consideration that applies disabled, child, parent, age, gender, ethnicity and race.

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Post investigation documentation	Post investigation documentation may include: • statements • proformas • photographs • tape recordings.

Designated personnel	Designated personnel for incident investigation referrals may include:
	• employer
	• personnel directly involved in responding to the incident, including:
	  • first response personnel
	  • emergency response team members
	  • emergency team leader(s)
	  • First Aid officers
	• other personnel with emergency team leader responsibilities.

Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess the nature and extent of the emergency	1.1. Determine the nature and extent of the emergency in order to ascertain the level and degree of the emergency and what required actions and management strategies should be implemented 1.2. Communicate the nature and extent of the emergency in a timely and appropriate manner to other nominated emergency or facility personnel 1.3. Facilitate the rescue of personnel at risk, control/extinguish the emergency and to make the affected area safe through application of rescue and control strategies 1.4. Ensure all team members are adequately instructed, protected and equipped to function safely and effectively in the emergency situation through the application of personal protective equipment.
2. Effect rescue of personnel at risk.	2.1. Instruct rescue teams to effect the search for, and rescue of, personnel identified as being at risk 2.2. Allocate resources to potentially exposed or threatened personnel and assets, and minimise the likelihood of escalation of the risk.
3. Confine the spread of emergency	3.1. Initiate control/extinguishing responses promptly in order to eliminate the emergency 3.2. Render affected areas safe in order to prevent the likelihood of further re-occurrence, or threat to personnel or assets 3.3. Provide feedback to facility or other nominated personnel concerning the status of the emergency.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
A person undertaking this competency must be able to demonstrate: • leadership skills • organisation skills • planning skills • team management skills • hazard awareness and safety awareness skills • communication skills.
Required knowledge
Knowledge and understanding of the process sufficient to recognise emergency situations and then determine an action that is appropriate within operating guidelines and the scope of their responsibilities and competencies. It would be expected that a person would be able to communicate with team members the nature and extent of the emergency and provide the actions required. Demonstrated knowledge of: • characteristics of fires and fuel types • hazard identification, assessment and control of risk • principles and procedures of self contained breathing apparatus (SCBA) • search and rescue techniques (including self rescue techniques) • relevant facility fire management and safety systems • communication systems • emergency response plans • teamwork principles and techniques.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to minimise the effects of the critical situation. Consistent performance should be demonstrated. In particular look for: • ability to work effectively as a team and as a team leader • recognition of the behaviour of fire and other emergency situations • impact of emergency tactics • evidence that emergency operations are conducted in accordance with the organisation's safe work practices. These aspects may be best assessed using a range of scenarios/case studies/what ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and extreme situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities (e.g. HAZOP) and similar sources.

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	The skills and knowledge contained within this unit of competency could be utilised as a normal part of a person's responsibilities and duties. In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. It would be expected that a person undertaking this competency would have completed or be able to demonstrate competence in the following unit of competency before undertaking this unit: • *MSAPMOHS212A Undertake first response to fire incidents* • *PMAOHS213B Undertake fire control and emergency rescue*.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	

Context	Those persons who normally operate or are based permanently or regularly assigned to an onshore or offshore installation or facility and lead an emergency response team would require this unit of competency.
	
	This unit could be applied to any of the following installations or facilities:
	
	• onshore/offshore rig/installation
	• island based facility
	• floating production vessel or platform
	• onshore production, processing and/or storage facilities
	• pipeline easements
	• maintenance bases.
	
	This competency covers process manufacturing plants which may involve workplace hazards such as:
	
	• chemicals and hazardous materials
	• gases and liquids under pressure
	• moving machinery
	• materials handling
	• working at heights, in restricted or confined spaces, or environments subjected to heat, noise, dusts or vapours.
	
	Emergency situations may include:
	
	• accidents
	• fires
	• chemical or oil spills
	• gas leak or vapour emission
	• utilities failure
	• bomb scares.
	
	Equipment may include:
	
	• fire extinguishing agents and water curtains
	• hoses
	• mobile extinguishers
	• stretchers
	• personal protective clothing and equipment such as:
	  • chemical protective clothing
	  • distress alarms
	  • structural fire protective clothing
	• self contained breathing apparatus (SCBA)
	• communication equipment.
	
	Emergency extinguishing media may include:
	
	• water

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• foam • extinguishing powder • gaseous extinguishing agents • vapourising liquids • other fire extinguishing substances. On-scene hazards may include: • smoke, darkness and heat • electricity • gas • structural hazards • structural collapse • industrial - machinery, equipment, product • hazardous products and materials • unauthorised personnel. Emergency strategies and tactics may include: • direct attack • indirect attack • combination attack • exposure protection • internal/offensive attacks • confining the spread of incident • rescuing occupants • cooling the fuels • removal of fuels • interrupting the chemical chain reaction • exclusion of oxygen. Relevant facility fire management and safety systems include: • fire management systems • communication systems • relevant facility emergency management and contingency response plans. Relevant legislative and safety case management principles and agreements must be adhered to.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMAOMIR210B Control evacuation to muster point

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competence applies to a person who is required to control the evacuation of personnel from the workplace to a muster point and includes moving mobility/sensory impaired people including persons with either temporary or permanent sensory impairment and casualties, or others who require assistance during an evacuation.

Application of the Unit

Application of the unit	Contributing circumstances might include: • fire or smoke spread • hazardous releases - loss of containment • earthquakes, severe storm damage, cyclones, floods and other nature and human-made disasters. The individual would: • control the evacuation • conduct head counts • instigate checks for missing persons • relocate evacuated persons to other areas Generally the person would be part of a team during the incident but may be required to act independently. At all times they would be liaising and cooperating with other members of the team. This unit incorporates features from 145/01 React safely in emergency situations (level one), 145/06 Safeguard endangered persons (level three), 145/11 Coordinate actions to safeguard endangered persons (level four).

Licensing/Regulatory Information

Not applicable.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to evacuate	1.1. Recognise alarm or other signs of incident 1.2. Determine nature and location of incident, wind direction and other relevant information 1.3. Assess incident situation and instigate relevant procedure 1.4. Predict probable changes/escalation to incident 1.5. Prepare the area and personnel for evacuation 1.6. Facilitate incident roles and the operation of incident response stations according to procedures 1.7. Coordinate incident response actions according to procedures 1.8. Maintain communication channels with relevant personnel
2. Control evacuation	2.1. Identify hazards associated with evacuation 2.2. Identify and communicate most appropriate path for evacuation to the desired muster point 2.3. Implement relevant hazard control procedures 2.4. Initiate evacuation when appropriate 2.5. Ensure evacuation of mobility/sensory-impaired people

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.6. Control incident evacuation according to procedures 2.7. Undertake roll call of evacuated persons 2.8. Communicate required details of evacuation to relevant personnel.
3. Complete evacuation.	3.1. Arrange and coordinate the first aid, welfare and other needs of evacuated persons 3.2. Maintain control over evacuees 3.3. Arrange for/provide assistance to the incident controller as required 3.4. Maintain communication channels with relevant personnel 3.5. Move evacuees to a new location, or dismiss and return to work as appropriate 3.6. Debrief evacuees and seek possible improvements 3.7. Complete all required records and reporting 3.8. Arrange for suggested improvements to be incorporated into procedures as appropriate

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to isolate the causes of hazards within the incident response system and to be able to distinguish between causes of hazards indicated by: • misunderstandings concerning coordination and communication methods • failure to liaise with emergency services • lack of timeliness in reporting unsatisfactory outcomes • failure to carefully check evacuated areas • incident assessment, response and coordination • inability to apply incident procedures.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • incident response reports or signals • hazards and precautions to be taken during incidents • actions to take in response to developing situations

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• accounting procedures and analysis of reports from evacuation areas • miscellaneous incident activities.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment for this unit of competency will be by way of simulation or under incident conditions. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which can include a variety of incident circumstances. Simulations must, as closely as possible, approximate actual incident conditions and should be based on the actual facility. Assessments should include 'walk-throughs' of the relevant competency components and may include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what-if' scenarios both in the facility (during demonstration of normal operations and walk-throughs of abnormal operations) and off the site.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to correctly respond to incident situations and in implementing appropriate action. The emphasis should be on the ability to stay ahead of the problem rather than to have to take drastic action in order to recover the situation. In particular look to see that: • incident responses are in accordance with company procedures • correct incident response equipment (where required) is used appropriately

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	• the safety and/or successful recovery of the individual and others affected by the incident response is afforded priority in the actions taken • actions taken do not inhibit incident response effectiveness or further contribute to the incident • appropriate documentation including reports, journal entries, logs and/or clearances are completed in accordance with procedures These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.
Context of and specific resources for assessment	Assessment will require (1) access to an accurately simulated environment in the absence of an on-site incident environment, or (2) a suitable method of gathering evidence of responding ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all workplace environments it may be appropriate to assess this unit concurrently with other relevant units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all such items of equipment and workplace operations which form part of the incident response system which is relevant to evacuations. For your work environment this may include (select relevant items): • hard hats • armbands • torches • smoke hoods • lifejackets • incident communications equipment • check lists and floor plans. Typical hazards for your work environment may include: • spread of fire • threat to adjoining areas • danger of explosion • loss of communications • falling or shifting debris • obstruction of evacuation routes.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.
Relationship to Major Hazard Facility Legislation	Organisations within the Chemical, Hydrocarbons and Oil Refining industries may find themselves falling under the provisions of various Major Hazard Facilities legislation. In developing this unit consideration has been given to the requirements of Sections 8 and 9 of the National Standard for the Control of Major Hazard Facilities [NOHSC:1014(2002)] and the National Code of Practice for the Control of Major Hazard Facilities [NOHSC:2016(1996)]. This unit will assist individuals to meet some of their obligations under the relevant State or Territory legislation. Responsibility for appropriate contextualisation and application of the unit to ensure compliance however, remains with the individual organisation.

PMAOMIR346B Assess and secure an incident site

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit applies to a person who would typically be an incident team leader and who, following an incident, undertakes the inspection of the site and makes an initial assessment as to the immediate safety of the area.

Application of the Unit

Application of the unit	The incident team leader typically responds to the incident coordinator, who may be stationed in the incident control centre. In a typical scenario, following the occurrence of an incident the person would take action to ensure the immediate incident site is safe and take steps to maintain facility safety, record details of the scene and preserve it from contamination. The person may also be required to manage the scene pending the arrival of appropriate authority or company representatives as required by company procedures, legislation or regulations. Incident scenes may be the consequences of: • explosions • loss of containment of hazardous materials • environmental incidents • hydrocarbons fires or releases of noxious or toxic gasses The person would: • ensure that the site is rendered safe and that access to the area is limited • take steps to ensure the site is preserved intact • ensure that site is isolated from ancillary processes to prevent secondary incidents • note or record all pertinent details • take statements or conduct interviews of witnesses Generally the person would be part of a team during an investigation however may be required to take independent action. At all times they would be liaising and cooperating with other members of the organisation's incident

	management team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Secure and preserve the scene	1.1. Undertake an initial assessment of the site to identify factors which will impact on safety and scene preservation 1.2. Ensure that secondary incidents are prevented by isolating the site from associated or ancillary processes 1.3. Coordinate arrangements to secure the incident/accident site to preserve the site and maintain the safety of personnel in line with procedures 1.4. Restrict access to the site until the arrival of authorised company or external authority representatives

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
2. Record details of the incident site	2.1. Record details of the scene according to the organisation's policies and procedures 2.2. Note the status of any equipment in the incident area 2.3. Communicate information to relevant personnel in line with the procedures
3. Gather information	3.1. Record witness details and note any information given in accordance with procedures 3.2. Take statements from witnesses and record details of persons believed to be near the site prior to or during the incident 3.3. Develop an initial timeline of events leading up to the incident
4. Ensure safety when responding to an incident	4.1. Identify hazards 4.2. Assess the risks arising from those hazards 4.3. Implement measures to control those risks in line with procedures and duty of care
5. Respond to problems	5.1. Identify possible problems in equipment or process 5.2. Determine which problems need action 5.3. Determine possible fault causes 5.4. Rectify problem(s) using appropriate solution(s) within area of responsibility 5.5. Follow through items initiated until final resolution has occurred 5.6. Report problems outside area of responsibility to designated person

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to isolate the causes of issues within the incident response system and to be able to distinguish between causes of issues indicated by: • materials being moved from the site without approval • vehicular or personal traffic contaminating the site • personnel being injured or contaminated on the site

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• loss of evidence from the site.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • methods of securing the site • techniques for removing survivors and non-survivors from the area • organisation requirements for taking witness details and information • regulatory requirements for taking witness details and information • legislative and organisation requirements relating to scene preservation • types of information which may assist in investigations.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment for this unit of competency will be by way of simulation or under incident conditions. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which can include a variety of incident circumstances. Simulations must, as closely as possible, approximate actual incident conditions and should be based on the actual facility. Assessments should include walk-throughs of the relevant competency components and may include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what-if' scenarios both in the facility (during demonstration of normal operations and walk- throughs of abnormal operations) and off the site.
Critical aspects for assessment and	Competence must be demonstrated in the ability to

PMAOMIR407B Audit incident preparedness and established response systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the competency to assess the extent to which a facility is prepared to respond to an incident. This could apply to all of the realistically potential incidents which might occur to an organization, including those under its safety case. The person undertaking the audit would typically respond to the incident manager.

Application of the Unit

Application of the unit	In a typical scenario the person would undertake an analysis of existing incident preparedness and response systems as part of a continuous improvement process or spot check. Part of the audit may involve the conducting of an unscheduled incident response drill, analysing the results and providing a thorough debrief of the persons involved. The person then may make recommendations for changes to the system Key aspects of the competency include: • thorough examination of each of the various systems in place • identifying key areas where systems overlap or system breakdowns occur • ensuring that the established systems are working in accordance to the incident response plan and legislative requirements The person may: • communicate extensively within and outside the organisation • review and audit practices and processes relevant to incident response • identify and as necessary reinforce system benchmarks • provide input towards system continuous enhancement. • conduct and assess incident exercises as required. Generally the person would be an incident coordinator, manager or technical specialist and be part of an incident response team during the incident. They may have an ongoing role for managing incident information and/or the

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Benchmarks for audit are clearly identified	1.1. Access, interpret and clarify the legislative, statutory and site requirements relating incident preparedness and response systems 1.2. Access and review relevant documentations of the plan and established management systems 1.3. Conduct consultations with stakeholders and specialist as necessary
2. Plan, organise and undertake audit of the established incident	2.1. Identify or develop methods to audit the established management systems and processes as prescribed by the plan and/or legislation in consultation with relevant

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
response systems	personnel 2.2. Identify and secure the resources required to conduct the audit 2.3. Gather and sight relevant documents and all other evidence required in accordance with procedures 2.4. Conduct the audit according to prescribed/pre-agreed methodology and in a manner that enhances the organisation's confidence and commitment to the incident response system
3. Evaluate and report the results of the audit	3.1. Evaluate evidence gathered for reliability, validity, authenticity, sufficiency, currency and consistency 3.2. Promptly bring to the attention of relevant personnel any findings which have serious or immediate risks 3.3. Disseminate records of the process and outcomes of the audit, including justifiable recommendations complying with procedures, to appropriate personnel in a timely manner
4. Follow up results of the audit	4.1. Discuss and confirm results with relevant personnel and provide feedback including advice on corrective actions 4.2. Follow up corrective actions relating to deficiencies until resolution has been achieved

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to isolate the causes of problems within the incident response system and to be able to distinguish between causes of problems indicated by: • audit methods fail to provide sufficient qualitative and quantitative data • audits fail to identify key system failures • actions arising from audits do not translate into improvements in the system • relationships between incident response partner organisations do not function as intended.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes:

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• relevant legislation • relevant company policy management systems/procedures relating to incident preparedness and response • company requirements in relation to audit and review procedures • hazard identification and control • OHS requirements • risk management principles and techniques • incident containment tactics.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment for this unit of competency will be by way of simulation or observation under incident conditions. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which can include a variety of incident circumstances. Simulations must, as closely as possible, approximate actual incident conditions and should be based on the actual facility. Assessments should include walk-throughs of the relevant competency components and may include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what-if' scenarios both in the facility (during demonstration of normal operations and walk-throughs of abnormal operations) and off the site.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Consistent performance should be demonstrated. In particular look to see that competence in this unit reflects successful assessment in the critical aspects of:

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	• safe conduct of audit and review • identification of benchmarks for audit and review • development of methodologies for effective audit and review • compliance with prescribed methodologies for audit and review • evaluation of documents and evidence • demonstrated understanding of the value of accuracy, attention to detail and impartiality • information gathering, analysis and communication These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.
Context of and specific resources for assessment	Assessment will require (1) access to an accurately simulated environment or (2) a suitable method of gathering evidence of responding ability over a range of situations. A bank of scenarios/case studies/what-ifs and a bank of questions to probe the reasoning behind the observable actions will likewise be required.
Method of assessment	It may be appropriate to assess this unit concurrently with other relevant units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT
The Range Statement relates to the unit of competency as a whole. It allows for different work

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	Management systems include (but are not limited to): • evacuation • emergency operations structure • communications • information management • documentation and reporting requirements • resource management • training • audit and review system • financial management Documents and evidence may include: • electronic databases • videos • photographs • written information/records • training and learning programs
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.
Relationship to Major Hazard Facility Legislation	Organisations within the Chemical, Hydrocarbons and Oil Refining industries may find themselves falling under the provisions of various Major Hazard Facilities legislation. In developing this unit consideration has been given to the requirements of Sections 8 and 9 of the National Standard for the Control of Major Hazard Facilities [NOHSC:1014(2002)] and the National Code of Practice for the Control of Major Hazard Facilities [NOHSC:2016(1996)]. This unit will assist individuals to meet some of their obligations under the relevant State or Territory legislation. Responsibility for appropriate contextualisation and application of the unit to ensure compliance however, remains with the individual organisation.

PMAOMIR418B Coordinate incident response

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the coordination of the response to off-shore or on-shore incidents. The person may be the incident coordinator, or could be a member of the incident control centre team. The incident coordinator typically responds to the incident manager, who may be stationed away from the facility or plant.

Application of the Unit

Application of the unit	In a typical scenario, the person is in charge of an incident control centre on or near the facility. The incident coordinator is responsible for interactions between corporate headquarters, the on site incident response teams and the person in charge of the facility. There may be more than one incident response team involved depending on the size and complexity of the incident. Key aspects of the competence include: • minimising the escalation of the incident • allocation of resources and assets • tactical response planning, consistent with the philosophies and strategies of the organisation • close communication with the incident response team(s) • interactions with external agencies required to assist with the emergency • gathering information concerning the incident The individual may: • effectively communicate and consult with a range of individuals and organisations • develop incident response and/or incident search and rescue tactics based on information available • negotiate and communicate with internal support structures set up to assist with logistics planning, operations and external affairs Generally the individual would assume command of the incident response team(s) during an incident response though may be required to take advice from the incident support management group. At all times they would be

© Commonwealth of Australia, 2025 Powering Skills Organisation

	liaising and cooperating with members of the incident support management group.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess the situation and determine priorities	1.1. Seek incident information from appropriate on-site personnel 1.2. Monitor changes in the nature, extent and potential implications of the incident 1.3. Develop an incident response tactics based on analysis of the situation and consistent with the philosophies and strategies of the organisation 1.4. Identify required resources in accordance with the tactics developed

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	1.5. Continually review objectives in light of information updates, reports and feedback
2. Manage incident control centre	2.1. Brief incident control centre personnel on the scenario and tactics, their roles and responsibilities and of the way the centre will operate 2.2. Allocate tasks to incident control centre personnel commensurate with their roles and level of competence 2.3. Monitor performance of incident control centre personnel and review as the incident unfolds to determine ongoing requirements
3. Liaise with internal management and support structures	3.1. Regularly brief and provide communications to appropriate personnel in accordance with procedures 3.2. Monitor and review resources to determine changing requirements in accordance with changing circumstances 3.3. Ensure resources are available as required 3.4. Provide or obtain guidance and support to/from management and support structures.
4. Ensure communications systems are effective	4.1. Establish communications with personnel at the incident scene 4.2. Establish communications with other personnel on or off-site as required 4.3. Ensure communications systems are managed to provide optimum capability.
5. Conclude and review incident activities	5.1. Account for all personnel and other resources 5.2. Conduct a debrief and complete company incident reports 5.3. Evaluate and review tactics and procedures 5.4. Evaluate and document effectiveness of the control function and its interaction with command organisations 5.5. Communicate reports in accordance with company procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
Required skills
Competence includes the ability to isolate the causes of issues within the incident response system and to be able to distinguish between causes of issues indicated by: • incorrectly determining the range and performance of resources required to address the incident • inappropriate resources being assigned to the incident response operation • failure of communications systems within the command post • overestimating the capabilities and competence levels of personnel.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • incident management techniques • operational duration of essential equipment • legislative and regulatory requirements • coaching and team building concepts • the organisation's policies and procedures protocols • how to communicate effectively under stress.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment for this unit of competency will be by way of simulation or observation under incident conditions. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which can include a variety of incident circumstances. Simulations must, as closely as possible, approximate actual incident conditions and should be based on the actual facility. Assessments should include walk-throughs of the relevant competency

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	components and may include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what-if' scenarios both in the facility (during demonstration of normal operations and walk-throughs of abnormal operations) and off the site.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate responsive action. The emphasis should be on the ability to deal effectively with the incident or to contribute effectively to the recovery from the incident. Consistent performance should be demonstrated. In particular look to see that: • incident responses are in accordance with company procedures • correct incident response equipment (where required) is used appropriately • the safety and/or successful recovery of personnel and others affected by the incident response is afforded priority in the actions taken • actions taken do not inhibit incident response effectiveness or further contribute to the incident • appropriate documentation including reports, journal entries, logs and/or clearances are completed in accordance with procedures These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from past workplace incident history, incidents in similar workplaces around the world, hazard analysis activities and/or similar sources.
Context of and specific resources for assessment	Assessment will require (1) access to an accurately simulated environment in the absence of an on-site incident environment, or (2) a suitable method of gathering evidence of responding ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	behind the observable actions.
Method of assessment	In all workplace environments it may be appropriate to assess this unit concurrently with relevant PMAOMIR units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency covers incidents that may include: • fire, explosion • loss of containment, eg gas leaks, spills • damage to facilities, eg accidents, crashes, aircraft • natural disasters, eg cyclones, wind, rain, earthquake, flood • other, eg riot, civil unrest, terrorism It includes all such items of equipment and unit operations that form part of the incident response system, and may include: • schematics, designs, detail drawings, maps/charts • data systems, computers systems, electronic aids • manuals, designs, operation procedures and instructions • emergency vehicles or equipment • vessels and aircraft Incident response may include: • search and rescue operations • engagement of emergency services (fire, ambulance, rescue,

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	military) • liaison with other agencies (environmental, clean-up, specialised troubleshooters) Typical problems for your facility may include: • communications problems • inappropriate information • confusion over roles and responsibilities • lack of cooperation • inappropriate location of command post in relation to incident
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.
Relationship to Major Hazard Facility Legislation	Organisations within the Chemical, Hydrocarbons and Oil Refining industries may find themselves falling under the provisions of various Major Hazard Facilities legislation. In developing this unit consideration has been given to the requirements of Sections 8 and 9 of the National Standard for the Control of Major Hazard Facilities [NOHSC:1014(2002)] and the National Code of Practice for the Control of Major Hazard Facilities [NOHSC:2016(1996)]. This unit will assist individuals to meet some of their obligations under the relevant State or Territory legislation. Responsibility for appropriate contextualisation and application of the unit to ensure compliance however, remains with the individual organisation.

PMAOMIR430B Conduct and assess incident exercises

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit addresses the competence required to conduct and assess incident exercises. The person would be engaged in the construction of scenarios that approximate incident situations and exercises in dealing with those incidents.

Application of the Unit

Application of the unit	In a typical scenario the person would be a member of the incident room team and would be responsible for ensuring that both scheduled and unscheduled incident exercises took place. Results of these exercises would provide essential input into the audit and evaluation of incident preparedness of the facility. However, a proper post-exercise debrief is critical, as the exercise likewise has a strong educative value that promotes awareness and understanding among participants. Key aspects of the competence include: • establishing key objectives and strategic outcomes from incident exercises • improving the organisation's level of preparedness should an incident occur • improving the ability of personnel to respond appropriately and safely during an incident The person may: • communicate extensively both inside and outside the organisation • establish and support mechanisms for the design and conducting of incident exercises • review and evaluate the soundness of incident response plans and management systems. Generally the person would be an incident coordinator, manager or technical specialist and be part of an incident response team during the incident. They may have an ongoing role for managing the training and incident exercise system.

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine objectives	1.1. Identify the need for the incident exercise in consultation with stakeholders 1.2. Determine the objectives of the exercise which meet the identified need
2. Design exercise	2.1. Select the exercise style, consistent with the objectives, in consultation with stakeholders 2.2. Design the exercise to ensure that objectives are met and address health, safety and environment issues 2.3. Identify and secure the resources to support the exercise 2.4. Distribute the exercise plan stating the objectives to appropriate personnel

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
3. Manage exercise	3.1. Brief personnel involved in the exercise in respect of aims, objectives, expectations and activity outcomes 3.2. Use the exercise plan to initiate and facilitate the conduct and direction of the exercise 3.3. Conduct the exercise in a manner that addresses health, safety and environment issues 3.4. Monitor the progress of the exercise and provide feedback to personnel
4. Evaluate outcomes	4.1. Plan a post exercise debrief based on the conduct and outcomes of the exercise 4.2. Conduct a debrief with activity personnel 4.3. Review outcomes of the activities against objectives 4.4. Prepare and distribute a report of the activity to stakeholders

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to isolate the causes of problems within the incident response system and to be able to distinguish between causes of problems indicated by: • exercises are not conducted according to expectations • unintended or inappropriate exercise outcomes • mismatches between equipment and incident requirements • lack of appropriate feedback at the conclusion of training exercises • an injury occurs during the conducting of the training exercise.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • legislative and regulatory arrangements relating to incident management • incident response plan and management systems • incident management concepts and principles • adult learning principles • relevant networks • problem solving and decision making techniques • assessment and review techniques

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• project management principles.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment for this unit of competency will be by way of simulation or observation under incident conditions. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which can include a variety of incident circumstances. Simulations must, as closely as possible, approximate actual incident conditions and should be based on the actual facility. Assessments should include walk-throughs of the relevant competency components and may include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what-if' scenarios both in the facility (during demonstration of normal operations and walk-throughs of abnormal operations) and off the site.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Consistent performance should be demonstrated. In particular look to see that competence in this unit reflects successful assessment in the critical aspects of: • clearly identifying the need for the exercise • planning, conduct and evaluation of exercise • hazard identification and control • demonstrated understanding and ability to address health, safety and environment issues • briefing and debriefing These assessment activities should include a range of

PMAOMIR444B Develop incident containment tactics

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the competency required in the development of tactics that are to be used in the containment of incidents in on-shore and off-shore facilities. The person would typically be an incident coordinator who would respond to the incident manager.

Application of the Unit

Application of the unit	In a typical scenario the person must ensure that the tactics proposed to be employed in response to an incident are appropriate to the circumstances and that actions taken in changing circumstances are effective in dealing with the incident. For instance the options available to incident response teams may be limited and include the need to follow specific procedures or sequences of events. In such a situation the organisation may need clearly defined procedures to ensure that all levels of incident response are aware of how the incident is to be confronted. Key aspects of this competency include: • forming clear and unambiguous views about the nature of the potential incident • evaluating and prioritising alternative tactics • analysing and interpreting information for trends and impacts • forwarding key information to those who require it The person may: • undertake critical analysis and problem solving • examine specific scenarios and develop tactics to physically contain those events • evaluate alternative tactics • recommend the most appropriate strategy • document strategies Generally the person would be an incident coordinator, manager or technical specialist and be part of an incident response team during the incident. They may have an ongoing role for managing incident information and/or the incident information system.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify incident containment tactics	1.1. Identify risk characteristics of the possible incident scenarios 1.2. Identify specific objectives of incident containment 1.3. Identify existing tactics 1.4. Develop a range of alternative tactics
2. Evaluate tactics	2.1. Predict incident behaviour and growth under alternative strategy scenarios 2.2. Consider issues relating to health, safety and environment 2.3. Identify and secure resource requirements for alternative tactics 2.4. Identify the impact of tactics on a range of factors 2.5. Identify and clearly document tactics

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	2.6. Obtain, collate and record feedback on tactics from stakeholders and incident managers and ensure this is reflected into the documentation according to procedures 2.7. Negotiate stakeholder needs and address
3. Select tactics	3.1. Document findings and feedback on the suitability of different tactics 3.2. Recommend preferred tactics according to procedures 3.3. Document tactics and build into strategies and training doctrines
4. Adopt strategies	4.1. Incorporate documentation on selected tactics into the appropriate incident management manuals 4.2. Notify stakeholders of new tactics 4.3. Incorporate selected tactics into incident training exercises

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to isolate the causes of problems within the incident response system and to be able to distinguish between causes of problems indicated by: • tactics fail to achieve the desired outcomes • input to tactic development is limited or of less value than expected • tactics when exercised show gaps or limitations in effectiveness • adoption of tactics proves problematic or resistance is encountered • incident containment proves to be of limited success.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • different types of incidents and risks • incident prediction • equipment required • rescue techniques • intervention and control techniques for heating, fires and explosions • incident resources and how to access them • incident response and disaster planning processes and techniques

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• relevant legislation • hazard identification and control • risk management principles and techniques • structure, roles, capabilities and operational limitations of external resources and agencies • insurance policies and considerations • economic impact and considerations.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment for this unit of competency will be by way of simulation or observation under incident conditions. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which can include a variety of incident circumstances. Simulations must, as closely as possible, approximate actual incident conditions and should be based on the actual facility. PMAOMIR512B Establish incident response preparedness and response systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the strategic management functions required to develop and establish incident response preparedness and response systems. Using the results of hazard analyses as a starting point, a person would establish an interactive process and manage a collaborative effort which raises the ability of the organisation to respond to an incident.

Application of the Unit

Application of the unit	In a typical scenario a person would gather strategic operational and risk information and translate that into a framework of management and operational systems which enable organisation personnel to effectively prepare for and respond to an incident. During development of and on completion of the system the person would liaise with external agencies or mutual assistance partners. Key features of the competence would be: • establishment of management and operational systems • production of written strategies, tactics and procedures • testing and assessing aspects of the incident response system The person may: • identify and familiarise themselves with appropriate and relevant legislation • consult widely within the organisation • facilitate and manage the introduction and operation of the system • facilitate the review of the incident response system Generally, the person would be part of an incident management team and typically respond to an incident manager. While independent action may sometime be required, the person is expected to liaise, cooperate and consult with other members of the team as necessary.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Clarify the requirements for incident preparedness and response systems	1.1. Access, interpret and clarify the legislative and statutory requirements and standards related to incident preparedness and response systems. 1.2. Access, interpret and clarify the site requirements relating to systematic analysis of hazards, technical and operational information. 1.3. Consult and collaborate with relevant stakeholders, specialists and emergency services as necessary and in accordance with legislative requirements
2. Design incident response plans and systems	2.1. Develop an organisational structure for the management of incident preparedness and response from an analysis of relevant technical and operational

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	information 2.2. Establish incident response procedures for management of decision making processes and decision monitoring systems 2.3. Develop incident response procedures for the containment of various types of incidents from an analysis of relevant technical and operational information 2.4. Identify and develop required management and operational systems to support incident preparedness and response in compliance with legislative and site requirements 2.5. Build in processes for evaluation into the plan and system and comply with legislative requirements and/or special site needs 2.6. Ensure all aspects of the plan are consistent with commitments to health, safety and protection of the environment 2.7. Review the plan and systems in conjunction with relevant stakeholders and specialists
3. Manage the implementation of the incident preparedness plan and response systems	3.1. Document and disseminate plans and systems to the appropriate personnel 3.2. Identify required services, personnel, equipment and resources for various types of incidents 3.3. Ensure arrangements are made to ensure required services, personnel, equipment and resources are ready for immediate mobilisation/deployment
4. Ensure periodic and timely evaluation of the incident preparedness plans and response systems	4.1. Encourage, receive and review suggestions and recommendations for changes to incident preparedness plans and response systems and where appropriate, assist implementation 4.2. Initiate and conduct evaluations as prescribed by the plan and in accordance with commitment to health, safety, protection of the environment and legislative requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence includes the ability to isolate the causes of problems within the incident response system and to be able to distinguish between causes of problems indicated by:

- poorly formulated and developed incident preparedness plans
- inaccurate or misleading site plans
- lack of access to site information and recording systems
- poor hazard identification and control practices
- inaccurate evaluation of systems
- inaccurate or misleading reports
- lack of identified or established site facilities for incident management
- inability to communicate effectively with people personally or through technical devices during incidents
- ineffective of disorganised personnel and resources
- poorly developed action plans
- inappropriate or improper information analyses
- inappropriate or ineffective decisions
- inability to participate as a team member.

Required knowledge

The knowledge referred to in the Evidence Guide for this unit includes:

- incident response and disaster planning processes and techniques
- relevant legislation and standards
- equipment required for different types of equipment
- incident resources and how to access them
- different types of incidents and risks
- hazard identification and control methods and procedures
- risk management principles and techniques
- structure, roles, capabilities and operational limitations of external resources and agencies
- rescue techniques
- intervention and control techniques for heating, fires and explosions
- media policies and procedures
- insurance policies and considerations
- economic impact and considerations.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment for this unit of competency will be by way of simulation or observation under incident conditions. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which can include a variety of incident circumstances. Simulations must, as closely as possible, approximate actual incident conditions and should be based on the actual facility. Assessments should include walk-throughs of the relevant competency components and may include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of 'what-if' scenarios both in the facility (during demonstration of normal operations and walk-throughs of abnormal operations) and off the site.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate responsive action. T he emphasis should be on the ability to deal effectively with the incident or to contribute effectively to the recovery from the incident. Consistent performance should be demonstrated. In particular look to see that: • incident response planning is appropriate for the circumstances • containment strategies are developed for management of different types of incidents • understanding of the role of stakeholders and specialists at incidents is demonstrated • understanding of the structure and roles of on-site functions and personnel is demonstrated

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	• information gathering, analysis and communication are conducted effectively • action plan development and evaluation meets organisational requirements • establishment of incident operations facilities meets organisational requirements • effective post-incident management planning is undertaken • evaluations of incident preparedness and response plans are successfully demonstrated These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from past workplace incident history, incidents in similar workplaces around the world, hazard analysis activities and/or similar sources.
Context of and specific resources for assessment	Assessment will require (1) access to an accurately simulated environment or (2) a suitable method of gathering evidence of responding ability over a range of situations. A bank of scenarios/case studies/what-ifs and a bank of questions to probe the reasoning behind the observable actions will likewise be required.
Method of assessment	It may be appropriate to assess this unit concurrently with other relevant units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	Incidents may include: • fire • explosion • gas or oil leak • accident • bomb threat • missing personnel • combination of the above Management and operational systems to support incident preparedness and response include (but are not limited to): • evacuation • emergency operations structure • communications • information management • documentation and reporting requirements • resource management • training • audit and review system • financial management • post incident actions External services may include (but are not limited to): • fire brigade • ambulance • medical services • local emergency management organisations • media • security services • solicitors • engineers • scientists
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.
Relationship to	Organisations within the Chemical, Hydrocarbons and Oil Refining

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
Major Hazard Facility Legislation	industries may find themselves falling under the provisions of various Major Hazard Facilities legislation. In developing this unit consideration has been given to the requirements of Sections 8 and 9 of the National Standard for the Control of Major Hazard Facilities [NOHSC:1014(2002)] and the National Code of Practice for the Control of Major Hazard Facilities [NOHSC:2016(1996)]. This unit will assist individuals to meet some of their obligations under the relevant State or Territory legislation. Responsibility for appropriate contextualisation and application of the unit to ensure compliance however, remains with the individual organisation.

PMAOPS305B Operate process control systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the operation of a centralised control panel. These controllers use a range of control algorithms and multiple control loops. The panel will control multiple vessels/plant items and or products. It will typically be located off plant in a control room.

Application of the Unit

Application of the unit	In a typical scenario an operations technician uses a centralised process control system to operate and monitor the plant. This control system would typically be a distributed control system (DCS) and may include other local controllers which are integral to its operation (stand alone local controllers are covered by *PMAOPS216B Operate local control system*). This panel technician/central control room operator has an overall responsibility for the operation of all units of equipment covered by the control system. As such they often also take a lead role as part of the operating team. Competencies required by this role other than panel competencies as such are not covered by this unit. The operations technician would: • identify, correct and report operational problems • be aware of and contribute to a safe working environment • contribute to the safe and productive operation of the system • operate, monitor and maintain equipment using relevant procedures • take appropriate action following an alarm or out of specification condition developing Generally the operations technician would be part of a team during start up, shut down and normal operating conditions and would be expected to be capable of demonstrating competence in all parts of this unit. He/she would be taking a leading role in liaising and cooperating with other members of the team. Typically the panel operator will liaise with other 'outside operators', however this unit does not preclude the situation where the panel operator may also undertake 'outside' functions.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Use operator interface.	2.1. Use keyboards, track ball and monitor and/or stand alone controllers to access control system/panel 2.2. Monitor the process using the operator interfaces 2.3. Select appropriate controller modes 2.4. Access historical data and information 2.5. Acknowledge messages and alarms.
3. Access control information.	3.1. Obtain relevant data and information from the control

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	system by applying systems knowledge 3.2. Identify the status of individual pieces of equipment from the control panel and use information to identify potential faults 3.3. Minimise fluctuations and variations in process through the interpretation of existing trends and control schematics 3.4. Record process variations/irregularities to procedures.
4. Control process variations and monitor operations.	4.1. Use historical data to assist the identification of problems 4.2. Process available information to identify potential faults 4.3. Undertake required set point/output changes to meet plant and process requirements 4.4. Optimise plant operating conditions in accordance with guidelines 4.5. Adjust production in response to test results and control panel information 4.6. Monitor key process and environmental variables and take appropriate action 4.7. Adjust controller settings in accordance with procedures 4.8. Use fine tuning software as appropriate 4.9. Coordinate with up stream and downstream units as appropriate 4.10. Record adjustments and variations to specifications/schedules 4.11. Communicate to appropriate personnel as required.
5. Facilitate planned and unplanned process start-ups and shut-downs.	5.1. Select and apply procedures to planned startup and shutdown processes 5.2. Select and apply procedures to unplanned shutdown processes 5.3. Implement all required emergency responses 5.4. Communicate necessary information to all personnel affected by events 5.5. Log all required information.
6. Respond to alarms or out of specification conditions.	6.1. Identify system(s) affected by the alarm or condition 6.2. Interpret alarms and prioritise actions to be taken 6.3. Take appropriate action to respond to the alarm or

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	incident 6.4. Deal with any out of specification material in accordance with procedures 6.5. Communicate the problem/solution to appropriate personnel 6.6. Record the information as required 6.7. Provide details of the alarm and action taken to the next shift at change over

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to distinguish between causes of problems/alarms/fault indications such as: • instrument failure/malfunction • electrical failure/malfunction • mechanical failure/malfunction • equipment design deficiencies • product parameters (temperature, flows, pressure and levels) • process control system malfunction • power/utility failures. An ability to communicate with other work groups and personnel during the operation and monitoring of this panel is considered an essential Element of this unit of competency.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • the architecture and location of the process/production equipment • specific plant process operations • interactions between plant items/processes • product specifications and tolerances • systems operating parameters • system integrity limits • process control philosophies and strategies • emergency shutdown procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• process specific physics, chemistry and mathematics • basic science of upstream and downstream processes • relevant chemistry of the process to the level of interpreting chemical equations and manipulating factors controlling rate of reaction and yield (or equivalent physics for a physical process/biochemistry for a biochemical process) - chemistry to include both intended products and interfering reactions, eg salts, hydrates • impact of external factors, eg variations in weather, feed etc • process drawings, eg P&ID, PFD • cause and effect • basis of control for the plant/s • instrumentation and control systems, including feed forward, feed back and open control • instrumentation and control system components, eg relevant primary sensing devices, final control elements, transducers/transmitters • control loops, including PID control, set points, controlled variable, indicated variable • interaction between multiple control loops, including cascade control • impacts of changing controller settings and the limits within which changes can be made • effective communication techniques • organisation procedures • UPS and its applications and use.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems. In the case of evacuation training or of training for competencies practiced in life threatening situations, simulation may be used for the bulk of the training. This unit of competency requires an application of the knowledge contained in the use of the process control system and its integral equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate responses. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster. Consistent performance should be demonstrated. In particular look to see that: • early warning signs of equipment/processes needing attention or with potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations, which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.
Context of and specific resources for assessment	Assessment will require access to a process control system over an extended period of time, or a suitable

EVIDENCE GUIDE	
	method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork, communication and leadership units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicized wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all such items of equipment and unit operations which form part of the control system. For your control room this may include (select relevant items): • process control systems, eg Distributed Control Systems • personal computers • printers • fire and gas detection/protection systems • emergency shutdown systems • communications systems. Typical problems for your plant may include: • loss of power/utilities • analysing failure modes

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• variation/loss of feed • unstable control of pressure, temperature level and flows • control equipment failure • process plant trips • change in atmospheric conditions (rain, temperature, wind, lightning) • emergency situations.
Alarms or abnormal conditions	Alarms or other abnormal conditions includes: • emergency, including emergency shut down • partial or complete controller failure.
Other problems	Other problems includes: • problem solving control functions
Appropriate action	Appropriate action includes: • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMAOPS312B Undertake ship loading/unloading operations

Modification History

Release 2 – Minor changes to clarify unit and broaden its application, and minor editorial corrections.

Unit Descriptor

In a typical scenario, the operations technician is responsible for the custody transfer of materials/products from the loading area to vessels or from vessels to storage areas. The operations technician will report the state of readiness of the loading facilities before starting transfer to the loading master and to the terminal operator.

Application of the Unit

Loading areas can include:

- terminal facilities
- jetties
- production platforms
- floating storage and offtake/floating production storage and offtake (FSO/FPSO).

The operations technician will control the cargo transfer rate within safe limits, which are agreed between the ship and/or the terminal prior to commencing transfer. Jetty and platform operators will observe the mooring and direct the positioning of ships in order to facilitate the safe connection and operation of loading arms and gantries. The operations technician will complete all necessary documentation for the control and calculation of product volumes.

Generally the operations technician would be part of a team during loading activities and may be expected to be capable of performing all parts of this unit. At all times they would be liaising and cooperating with other members of the team.

This unit applies to products such as liquefied natural gas (LNG), liquefied petroleum gas (LPG), oil, chemicals and particulates.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Prepare for work	1.1	Identify work requirements
		1.2	Identify and control hazards
		1.3	Coordinate with appropriate personnel
2	Prepare for ship transfer	2.1	Check that the vessel is ready for product transfer
		2.2	Activate/bring on line all safety systems
		2.3	Ensure all operational conditions for transfer of product are satisfied
		2.4	Ensure safety check documentation is completed
3	Transfer product to/from ship	3.1	Check transfer advice/documentation and complete required records
		3.2	Engage fire and deluge protection systems as required
		3.3	Launch and retrieve batching pigs as required
		3.4	Commence the transfer process of the specified product
		3.5	Control and monitor transfer rates and take appropriate action
		3.6	Monitor the progress of the transfer and levels and take appropriate action

© Commonwealth of Australia, 2025 Powering Skills Organisation

		3.7	Identify vapour or product leakages/spills and take appropriate action
		3.8	Apply emergency procedures as required
4	Complete transfer process	4.1	Achieve or satisfy capacities and transfer requirements within the allowable timeframes and schedules
		4.2	Retrieve batching pigs as required
		4.3	Decommission, isolate and disengage transfer systems from or to the vessel as required
		4.4	Continue to monitor and control fire, deluge and safety systems during the finalization of the loading process and let-go of the vessel as required
		4.5	Complete all required logs and documentation and communicate the results of the transfer to the appropriate personnel
		4.6	Shut down and bring transfer facilities off line, ensuring that the area has been made safe after the transfer has been completed
5	Isolate and de-isolate plant	5.1	Isolate plant
		5.2	Make safe for required work
		5.3	Check plant is ready to be returned to service
		5.4	Prepare plant for return to service

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills

Competence includes the ability to isolate the causes of problems to an item of equipment within the compressor system and distinguish between causes of problems/alarm/fault indications, such as:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- instrument failure/wrong reading
- electrical failure
- mechanical failure
- operational problems
- metering problems
- spills/leaks
- meteorological events

Required knowledge

The knowledge referred to in the Evidence Guide for this unit includes:

- all items on a schematic of the ship loading/unloading system and the function of each
- the nature/condition of materials being transferred to and from the vessel and the factors to be considered in the transfer operation
- effects of temperature and pressure in transfer operations
- storage and product transfer techniques and mediums
- principles of operation of plant/equipment
- physics and chemistry relevant to the process unit and the materials/products being transferred
- process parameters and limits (e.g. temperature, pressure, flow, pH and amps)
- duty of care obligations
- hierarchy of control
- communication protocols (e.g. radio, phone, computer, paper and permissions/authorities)
- routine problems, faults and their resolution
- relevant alarms and actions
- plant process idiosyncrasies
- correct methods of starting, stopping, operating and controlling flow
- corrective action appropriate to the problem cause
- function and troubleshooting of major internal components and their problems
- types and causes of flow problems within operator's scope of skill level and responsibility

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of

© Commonwealth of Australia, 2025 Powering Skills Organisation

competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation.

Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3-D virtual reality interactive systems. In the case of evacuation training or of training for competencies practised in life threatening situations, simulation may be used for the bulk of the training.

This unit of competency requires an application of the knowledge contained in the use of ship loading and its integral equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from a disaster.

Consistent performance should be demonstrated. In particular look to see that:

- early warning signs of equipment/processes needing attention or with potential problems are recognised
- the range of possible causes can be identified and analysed and the most likely cause determined
- appropriate action is taken to ensure a timely return to full performance
- obvious problems in related plant areas are recognised and an appropriate contribution made to their solution.

These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.

Context of and specific resources for assessment

Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of

© Commonwealth of Australia, 2025 Powering Skills Organisation

	questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. Consider co-assessment with relevant fluid flow and tank farming units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.

Codes of practice/ standards

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

This unit of competency includes all items of equipment and unit operations which form part of the ship loading/unloading system. For your plant this may include (select relevant items):

- loading/unloading systems
- loading arms
- gantries
- fire extinguishers, hoses and jets
- gas and other hazard monitoring systems
- mooring lines
- compressors
- storage tanks
- pipelines, trunklines and conveyors
- pig launcher, pig trap and batching pigs
- measurement systems

Typical problems

Typical problems for your plant may include:

- surging
- control of temperature and pressure
- variations in feed
- product leakage

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• environmental hazards
Ship transfer	Ship transfer includes: the transfer of product or materials to or from ships (i.e. loading or unloading of ships)
Ready for transfer	Ready for transfer includes: • secured and properly moored • transfer points aligned
Safety systems	Safety systems include systems required to protect the vessel and personnel during product transfer, such as: • deluge • fire protection
Operational conditions for transfer	Operational conditions for transfer include: connect and initiate loading pumps/conveyors arms/hoses
Control of transfer rates	Transfer rates may be controlled to ensure: • the product is transferred safely • transfer is within the defined storage capacities
Appropriate action	Appropriate action includes: • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person
Procedures	Procedures may be written, verbal, computer-based or in some other form. They include: • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (e.g. Responsible Care) and government

PMAOPS330B Communicate and monitor pipeline activities

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	In this scenario operations technicians maintain a watching brief over the pipeline from the pipeline control centre. The centre will be the hub for pipeline activities in order to achieve minimum risk to continued safe and efficient operation of the pipeline system. The pipeline control centre operations technician will communicate with field personnel to obtain information and direct field operators to check and maintain pipeline operations.

Application of the Unit

Application of the unit	The operations technician will: • ensure the safety of the system and check operational equipment prior to start up • maintain productivity through the monitoring of flows, pressures and temperatures in the field • maintain communication with product suppliers and user customers to maintain the safe and efficient operation of the pipeline. Generally the pipeline control centre operations technician would be part of a team during pipeline startup and shutdown procedures. However, they will be expected to be capable of performing all parts of this unit on their own. At all times they would be liaising and cooperating with other members of the team and customers. AS 2885 Part 3 forms the principle reference standard for this competency.

Licensing/Regulatory Information

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Gather information about pipeline operation needs.	1.1. Respond to and record messages and information received from field operations and pipeline system stations 1.2. Interpret and acknowledge alarm codes correctly to ensure the correct response strategy is selected and applied to the situation 1.3. Clarify additional information needs and select an appropriate communication medium to deliver the information required 1.4. Improve operational efficiency through adequate and timely application of information provided 1.5. Interpret and action customer/shipper gas forecasts to ensure correct gas flow rates into the pipeline system are achieved.
2. Communicate pipeline information.	2.1. Monitor activities of pipeline personnel in the field and data from the control centre 2.2. Evaluate internal messages and response communications concerning system alarms/incidents to establish the scope and severity of the alarm/ incident 2.3. Convey pipeline system operation information to relevant personnel in other work areas to ensure safe and efficient operation of the pipeline system 2.4. Relay information to technicians and other services/parties

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	so that fault finding or safety checks can be conducted to identify risks to product supply, pipeline equipment, environment and personnel 2.5. Authorise, record and monitor permits to work to allow operational activities to be undertaken or cancelled.
3. Coordinate pipeline systems operations.	3.1. Monitor field and pipeline station operations data 3.2. Monitor and observe equipment operating conditions, pressures and temperatures, and maintain correct equipment operating parameters 3.3. Identify faults and initiate the required repair or reporting of the fault 3.4. Isolate identified faults in the pipeline as appropriate 3.5. Respond to system alarms and emergencies 3.6. Determine the required course of action or emergency response to the identified system condition/ emergency 3.7. Complete and document pre-shutdown checks 3.8. Shut down the pipeline system under either normal or emergency conditions in accordance with operating procedures 3.9. Confirm all identified maintenance is in compliance with the permit to work system and administer to ensure that all work complies with all issued permits.
4. Record and report.	4.1. Record and monitor field personnel movements to ensure the safety of all personnel in the field 4.2. Report safety and environmental risks or faulty equipment to designated personnel for further action or advice concerning the selection of the appropriate response or course of action 4.3. Interpret and maintain field inspection records and reports 4.4. Complete operations and production reports 4.5. Perform shift handover procedures.
5. Control hazards.	5.1. Identify hazards in work area 5.2. Assess the risks arising from those hazards 5.3. Implement measures to control those risks in line with procedures and duty of care.
6. Resolve problems.	6.1. Identify possible problems in equipment or process 6.2. Determine problems needing action 6.3. Determine possible fault causes 6.4. Rectify problem using appropriate solution within area of responsibility

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	6.5. Follow items initiated up until final resolution has occurred 6.6. Report problems outside area of responsibility to designated person.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to isolate the causes of problems to an item of equipment within the compressor system and distinguish between causes of problems/alarm/fault indications such as: • pipeline pressure variations • instrument failure/wrong reading • electrical failure • mechanical failure • operational problems.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • pipeline system functions within the design parameters and design philosophy • process information schemata of the pipeline system and associated facilities • pipeline operating principles, parameters and product specifications • relevant workplace documentation • SCADA systems • alarm systems and emergency systems, including fire and shutdown • the 'permit to work' system • architecture of the pipeline system • pipeline system operating parameters • gas quality/analysis equipment operation • MSDS information. • physics and chemistry relevant to the process unit and the materials processed • process parameters and limits, eg temperature, pressure, flow, pH • duty of care obligations • hierarchy of control • communication protocols, eg radio, phone, computer, paper, permissions/authorities

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• routine problems, faults and their resolution • relevant alarms and actions • plant process idiosyncrasies • correct methods of starting, stopping, operating and controlling process • corrective action appropriate to the problem cause • function and troubleshooting of major components and their problems • types and causes of problems within operator's scope of skill level and responsibility.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant/ pipeline and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems. In the case of evacuation training or training for competencies practised in life-threatening situations, simulation may be used for the bulk of the training. This unit of competency requires an application of the knowledge contained in the use of the systems in the pipeline control centre and its integral equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. The emphasis should be on the ability to stay out of trouble rather than on recovery from

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
competency in this unit	a disaster. Consistent performance should be demonstrated. In particular look to see that: • early warning signs of equipment/processes needing attention or with potential problems are recognised • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken to ensure a timely return to full performance • obvious problems in related plant areas are recognised and an appropriate contribution made to their solution. These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. Consider co-assessment with: • *MSAPMPER202A Observe permit work* • *PMAOPS230B Monitor, operate and maintain pipeline stations and equipment*.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT
The Range Statement relates to the unit of competency as a whole. It allows for different work

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all such items of equipment and unit operations which form part of the pipeline control system. For your organisation this may include (select relevant items): • radio communications equipment, email, fax and telephones • heaters, furnaces and exchangers • station instrumentation/metering equipment • condition monitoring equipment • process control equipment • gas quality and analysis equipment • valves, actuators and flanges • piping systems • pressure vessels/filtration equipment • compressors and prime movers • cathodic protection systems.
Typical problems	Typical problems for your plant may include: • communications disruptions • corrosion/hydrate formation • variations in flow temperature and/or pressure • failures of piping, valves or flanges • pipeline leakages.
Appropriate action	Appropriate action includes: • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Procedures	Procedures may be written, verbal, computer-based or in some other form. They include: • all work instructions • standard operating procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.
Occupational Health and Safety (**OHS**)	The identification and control of hazards and the application of OHS is to be in accordance with current, applicable legislation and regulations and company procedures. All work is carried out at all times in accordance with these requirements

PMAOPS402A Respond to abnormal process situations

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit applies an in depth knowledge of process and plant to the recognition and solving of more complex/less obvious process/plant/ technical problems.

Application of the Unit

Application of the unit	In a typical scenario, a senior technician or para-professional investigates a plant unit/part of the process which is not performing as well as it has/as expected. They methodically investigate this technical problem, come to a conclusion as to the cause and then initiate appropriate corrective action. The corrective action may well be beyond the scope of competency and responsibility of the person to implement. This unit applies to problems which are not solvable by direct observation and require systematic investigation: • damage to/wear of tower trays • internal leaks of heat exchangers • collapse of/channelling in tower/column/vessel packing The technician would: • clarify the problem • analyse problem cause(s) • recommend a solution to the problem. Generally the technician would work alone for this unit, although the ability to communicate with all internal and external stakeholders is vital.

Pre-Requisites

Prerequisite units	*MSAPMSUP390A*	*Use structured problem solving tools*

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Recognise there is a problem.	1.1. Compare current performance with expected/historic performance 1.2. Identify plant/process areas with poor performance 1.3. Check the impact of routine adjustments to improve performance 1.4. Identify problems not solved by the routine solutions.
2. Define the problem.	2.1. Apply problem isolation techniques to isolate problem to a small part of the plant/process 2.2. Quantify the effect of the problem in operational terms 2.3. Postulate possible causes of the problem 2.4. Identify types of evidence for each possible cause 2.5. Investigate problem to accumulate evidence of cause type 2.6. Analyse data to confirm cause of problem 2.7. Determine the level of severity of the problem, priority of any required action.
3. Develop solution.	3.1. Discuss possible solutions to cause with relevant people 3.2. Determine whether a quick fix is needed

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	3.3. Arrange for implementation of quick fix if required 3.4. Check effectiveness of quick fix and take appropriate action 3.5. Agree required solution with appropriate people 3.6. Arrange for required solution to be undertaken in appropriate time frame 3.7. Follow items initiated through until final resolution has occurred 3.8. Check effectiveness of solution and take appropriate action 3.9. Complete reports to procedure.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
This unit requires skills of: • analysis • problem solving • negotiation • communication • basic mathematics
Required knowledge
Competence includes a deep understanding of: • plant equipment, its characteristics and limitations • impact of variations in plant/process and the distinctive signs of each variation • process chemistry, physics and biochemistry as relevant, eg to the extent of writing chemical equations and identifying factors controlling reaction rate and yield or equivalent • problem isolation techniques • problem analysis techniques • organisation approval processes

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include a range of problems, problem causes and environments. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual problems and should include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to define and analyse the problem as well as deal with the stakeholders. The stakeholders should be satisfied with the solution, as well as the solution being technically sound. Consistent performance should be demonstrated. In particular look to see that: • different types of problems can be analysed and resolved • different types of stakeholders can be satisfied • the range of possible causes can be identified and analysed and the most likely cause determined • appropriate action is taken. These aspects may be best assessed using a range of scenarios/case studies/what-ifs. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the past history and similar sources.
Context of and specific resources for	Assessment will require a suitable method of

assessment	gathering evidence of problem solving ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes problems in the plant, plant equipment or process which may make itself evident through lower quality, lower rates, greater variability or greater difficulty in control.
Health, safety and environment (HSE)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMAOPS405B Operate complex control systems

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the operation of a complex control panel. These controllers use a large number of control loops and a broad range of control algorithms. The panel will control entire plant areas and multiple products/ process streams. It will typically be located off plant in a control room and will require managing multiple complex tasks.

Application of the Unit

Application of the unit	In a typical scenario an operations technician uses a complex process control system to operate and monitor an entire plant area consisting of several plant units/systems. This control system would typically be an advanced control system and may include operation of simpler control systems as part of its operation. This panel technician/central control room operator has an overall responsibility for the operation of all units of equipment within the entire plant area and may include optimization of the area using the control system. As such they often also take a lead role as part of the operating team. Competencies required by this role other than panel competencies as such are not covered by this unit. The operations technician would: • monitor and operate equipment in the entire plant area • solve process problems related to the plant area • liaise with other plant areas as necessary • use the advanced control features of the control system Generally the operations technician would be part of a team during start up, shut down and normal operating conditions and would be expected to be capable of demonstrating competence in all parts of this unit. He/she would be taking a leading role in liaising and cooperating with other members of the team. Typically the panel operator will liaise with other 'outside operators', however this unit does not preclude the situation where the panel operator may also undertake 'outside' functions.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use operator interface.	1.1. Use keyboards, track ball and monitor and/or stand alone controllers to access control system/panel 1.2. Monitor the process using the operator interfaces 1.3. Select appropriate controller modes 1.4. Access historical data and information 1.5. Acknowledge messages and alarms 1.6. Access advanced control features as appropriate
2. Access control information.	2.1. Obtain relevant data and information from the control system by applying systems knowledge 2.2. Identify the status of individual pieces of equipment from the control panel and use information to identify

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	potential faults 2.3. Minimise fluctuations and variations in process through the interpretation of existing trends and control schematics 2.4. Determine the overall operating effectiveness of the plant area related to the required targets for the area 2.5. Record process variations/irregularities to procedures.
3. Control process variations and monitor operations.	3.1. Use historical data to assist the identification of problems 3.2. Process available information to identify potential faults 3.3. Undertake required set point/output changes to meet plant area and process requirements 3.4. Adjust production in response to test results and control panel information 3.5. Monitor key process and environmental variables and take appropriate action 3.6. Adjust controller settings in accordance with procedures 3.7. Use advanced control features as appropriate 3.8. Optimise entire plant area in accordance with guidelines 3.9. Undertake calibration operations as appropriate 3.10. Coordinate with stakeholders external to the plant area as appropriate 3.11. Record adjustments and variations to specifications/schedules 3.12. Communicate to appropriate personnel as required.
4. Facilitate planned and unplanned process start-ups and shut-downs.	4.1. Select and apply procedures to planned startup and shutdown processes 4.2. Select and apply procedures to unplanned shutdown processes 4.3. Implement all required emergency responses 4.4. Communicate necessary information to all personnel affected by events 4.5. Log all required information.
5. Respond to alarms or out of specification conditions.	5.1. Identify system(s) affected by the alarm or condition 5.2. Interpret alarms and prioritise actions to be taken

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	5.3. Respond to the alarm or incident by following procedures 5.4. Deal with any out of specification material in accordance with procedures 5.5. Communicate the problem/solution to appropriate personnel 5.6. Record the information as required 5.7. Provide details of the alarm and action taken to the next shift at change over 5.8. Follow the incident up see that appropriate action has been taken.
6. Control hazards.	6.1. Identify hazards in the production/processing work area 6.2. Assess the risks arising from those hazards 6.3. Implement measures to control risks in line with procedures and duty of care
7. Resolve other problems within scope of responsibility.	7.1. Identify possible problems in equipment, control systems or process 7.2. Determine problems needing action 7.3. Determine possible fault causes 7.4. Rectify problem using appropriate solution within area of responsibility 7.5. Follow initiated items through until final resolution has occurred 7.6. Report problems outside area of responsibility to designated person.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to distinguish between causes of problems/alarms/fault indications such as: • instrument failure/malfunction • electrical failure/malfunction

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE

- mechanical failure/malfunction
- equipment design deficiencies
- product parameters (temperature, flows, pressure and levels)
- process control system malfunction
- power/utility failures
- software problems
- multitasking.

An ability to communicate with other work groups and personnel during the operation and monitoring of this panel is considered to be an essential element of this unit of competency.

Required knowledge

The knowledge referred to in the Evidence Guide for this unit includes:

- advanced control features
- interactions between control loops
- interactions between plant units within the entire plant
- the architecture and location of the process/production equipment
- specific plant process operations
- interactions between plant items/processes
- product specifications and tolerances
- systems operating parameters
- system integrity limits
- process control philosophies and strategies
- emergency shutdown procedures
- process specific physics, chemistry and mathematics
- relevant chemistry of the process to the level of writing chemical equations and identifying and manipulating factors controlling rate of reaction and yield (or equivalent physics for a physical process/biochemistry for a biochemical process) - chemistry to include both intended products and interfering reactions (eg salts, hydrates)
- basic science of upstream and downstream processes
- interactions between plant area and other value stream members
- impact of external factors, eg variations in weather, feed etc
- complex process drawings, eg P&ID, PFD, cause and effect
- basis of control for the plant/s
- instrumentation and control systems including feed forward, feed back and open control
- instrumentation and control system components (eg relevant primary sensing devices, final control elements, transducers/transmitters)
- control loops (including PID control, set points, controlled variable, indicated variable)
- interaction between multiple control loops (including cascade control)
- impacts of changing controller settings and the limits within which changes can be made
- effective communication techniques

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• organisation procedures • UPS and its applications and use.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios, role plays and 3D virtual reality interactive systems. In the case of evacuation training or of training for competencies practiced in life threatening situations, simulation may be used for the bulk of the training. This unit of competency requires an application of the knowledge contained in the use of the process control system and its integral equipment, to the level needed to maintain control and recognise and resolve problems. This can be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate responses. The emphasis should be on the ability to stay out of

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicized wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all such items of equipment and unit operations which form part of the control system. For your control room this may include (select relevant items): • process control systems (eg Distributed Control Systems) • use of multiple control systems • personal computers • printers • fire and gas detection/protection systems • emergency shutdown systems • communications systems. Typical problems for your plant may include: • operating without advanced control features • loss of power/utilities • analysing failure modes • variation/loss of feed • unstable control of pressure, temperature level and flows • control equipment failure • process plant trips • change in atmospheric conditions (rain, temperature, wind, lightning) • emergency situations.
Alarms or abnormal conditions	Alarms or other abnormal conditions includes: • emergency, including emergency shut down • partial or complete controller failure.
Other problems	Other problems includes: • problem solving control functions
Appropriate action	Appropriate action includes: • determining problems needing action

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Procedures	Procedures may be written, verbal, computer-based or in some other form. They include: • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMAOPS410B Monitor remote production facilities

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	In a typical scenario, a technician in a central location looks after the operation of a remote production facility. This may be achieved by using ground based or satellite communications systems. The competency covers the operation and management of remote plants, treatment stations or satellite locations.

Application of the Unit

Application of the unit	Typically these stations may include: • wellheads • separation facilities • utility systems • remote pumping and compression stations • remote plants • fire and gas safety systems and associated piping and instrumentation. The operations technician would: • identify and rectify operational problems • conduct well testing • conduct critical function testing. Control of a remote production facility may require operation and process monitoring via a remote control system. Generally the operations technician would operate independently and be expected to be capable of performing all parts of this unit. However they may be part of a team during critical inspections or maintenance operations. At all times they would be liaising and cooperating with other members of the team.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work.	1.1. Identify work requirements 1.2. Identify and control hazards 1.3. Coordinate with appropriate personnel
2. Conduct product separation.	2.1. Centralise and prepare well products for initial multi-phase separation, storage and distribution as determined by the required production targets and objectives 2.2. Use multi-phase high and low pressure separation, utilising heat and chemical treatments, to effectively separate the product 2.3. Monitor the separation process via control room operation to ensure all product flows, pressures and temperatures are maintained within correct operating parameters 2.4. Operate and monitor all required utility services to assist in the separation process.
3. Recover and measure product.	3.1. Transfer treated waste water from the separation process for further treatment as required prior to re-injection or disposal 3.2. Ensure that all available product is recovered and all waste water

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	is made safe for further use or disposal within environmental limits 3.3. Measure and sample produced gas as required 3.4. Measure collected product to determine the level of available stocks for further transfer and for accounting purposes 3.5. Take appropriate action.
4. Transfer product.	4.1. Check transfer process equipment required to ensure it is working within agreed operating parameters 4.2. Transfer product to a processing facility for further treatment and enhancement 4.3. Monitor transfers and take appropriate action 4.4. Log and record all product transfers and communicate as required 4.5. Distribute data collected to appropriate personnel.
5. Isolate and de-isolate plant.	5.1. Isolate plant 5.2. Make safe for required work 5.3. Check plant is ready to be returned to service 5.4. Prepare plant for return to service.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence includes the ability to isolate the causes of problems to an item of equipment within the compressor system and to be able to distinguish between causes of problems/alarm/fault indications such as: • product contamination • instrument failure/wrong reading • electrical failure • mechanical failure • operational problems • pressure losses and leakage.
Required knowledge

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
The knowledge referred to in the Evidence Guide for this unit includes: • all items on a schematic of the remote system and the function of each • nature/condition of materials entering and leaving each stage of the process • changes which have occurred in that stage and why they have occurred • methods of changing production rates and the advantages and disadvantages of each • effect of specific climatic and environmental factors • water testing and gas break through testing techniques • storage and transfer techniques related to the transport of oil, gas or water. • principles of operation of plant/equipment • physics and chemistry relevant to the process unit and the fluids involved • process parameters and limits, eg temperature, pressure, flow, pH • duty of care obligations • hierarchy of control • communication protocols, eg radio, phone, computer, paper, permissions/authorities • routine problems, faults and their resolution • relevant alarms and actions • plant process idiosyncrasies • correct methods of starting, stopping, operating and controlling plant • corrective action appropriate to the problem cause • function and troubleshooting of major components and their problems • types and causes of problems within operator's scope of skill level and responsibility.

Evidence Guide

EVIDENCE GUIDE
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of

EVIDENCE GUIDE	
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	Consider co-assessment with other units relevant to the job.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This unit of competency includes all such items of equipment and unit operations which form part of the remote facility. For your enterprise this may include (select relevant items): • valves • pumps • prime movers • compressors • separators • instrumentation • storage tanks, ponds and dams • filters • wellheads

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• hydraulic well control panels • fire and gas safety systems.
Typical problems	Typical problems for your plant may include: • contamination of product • control of temperature and pressure • variations in feed • vibration.
Appropriate action	Appropriate action includes: • determining problems needing action • determining possible fault causes • rectifying problem using appropriate solution within area of responsibility • following through items initiated until final resolution has occurred • reporting problems outside area of responsibility to designated person.
Procedures	Procedures may be written, verbal, computer-based or in some other form. They include: • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMASUP311A Operate communications hub

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This competency covers the using of a range of communication equipment and ensuring that required communications are completed. It includes the coordination and priortisation of communications from/to diverse people in both normal and abnormal situations.

Application of the Unit

Application of the unit	In a typical scenario a control room operator/panel technician receives, relays and acts upon a range of communications as part of their role. This unit may also apply to personnel other than panel operators who perform a similar role. It includes: • process related communications • emergency communications • work related communications • personal communications • miscellaneous communications • communications under both normal and abnormal plant/ process/ weather conditions • communications under stress when multiple activities are occurring simultaneously.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use communication modes.	1.1. Turn equipment on/off as appropriate 1.2. Ensure equipment remains operational 1.3. Follow appropriate protocols for each communication mode being used 1.4. Select appropriate mode for use 1.5. Ensure communication used is safe for environment.
2. Deal with incoming communications.	2.1. Receive communication 2.2. Determine action required from communication 2.3. Prioritise communication in keeping with all current activities 2.4. Decide which communications to action, when and how 2.5. Maintain confidentiality as appropriate 2.6. Take action required by communication in the current circumstances 2.7. Ensure communication reaches its intended destination in an appropriate time frame.
3. Initiate communications.	3.1. Translate process issues into communications as required 3.2. Identify stakeholders for any required communication 3.3. Prioritise communications in keeping with all current

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	activities 3.4. Select appropriate communication mode 3.5. Communicate as required within an appropriate timeframe.
4. Verify communication.	4.1. Identify communications which require follow through 4.2. Identify communications delayed due to other priorities 4.3. Check all required communications have been received 4.4. Check appropriate actions have been initiated 4.5. Identify cause of non-communication/inappropriate action and take required action

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
This competency includes the following skills: • analysis • decision making • communication • prioritisation.
Required knowledge
Competence in this unit includes the following knowledge: • use of different communication modes • relative advantage of different communication modes • communication protocols for organisation in different modes • privacy requirements • methods of prioritising communications with other activities • issues requiring communication, with whom and with what priority • possible actions arising from types of situations and communications.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. T he unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Simulation may be required to allow for assessment of parts of this unit. Simulation should be based on the actual plant and will include walk-throughs of the relevant competency components. Simulations may also include the use of case studies/scenarios and role plays. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Competence must be demonstrated in the ability to specify the requirements and then select the best solution to meet the necessary and desirable requirements.
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with other relevant units.
Guidance information for	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy,

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
assessment	language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This competency covers all communication which might pass through/be initiated by the communications hub.
Communication modes	Communication modes includes: • radios • phones • email • computer messaging • PA • written • verbal
Ensuring operational	Ensuring equipment is operational includes: • charging batteries as required • replacing batteries as required • arranging for maintenance as required
Communication protocols	Communication protocols includes: • radio protocols • verbal protocols • email protocols • memo/reporting/writing protocols • phone protocols
Current activities	Current activities includes all process operations including start up and shut down or other abnormal situations where any individual

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	communication may be vital to the operation or a mere distraction.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMASUP410B Develop plant documentation

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the development, establishment and evaluation of plant documentation in response to identified information requirements including the development of workplace documents for the introduction of new systems, processes, equipment and record keeping requirements. The competency unit applies to a wide range of plant documentation. This unit does not apply to the participation in reviewing workplace documentation, which is covered by *MSAPMSUP210A Process and record information*.

Application of the Unit

Application of the unit	Typically, the employee would: • investigate the need for new plant documentation • determine operating principles and best practice in consultation with others • draft plant documentation • validate and modify plant documentation in response to feedback • communicate changes and amendments.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify information need/deficiency.	1.1. Identify the need for documentation in accordance with company requirements 1.2. Evaluate current documentation where existent 1.3. Define information need/deficiency 1.4. Discuss information requirements with appropriate personnel.
2. Develop plant documentation.	2.1. Specify information need and set/prioritise objectives 2.2. Analyse existing documentation/records in accordance with specified requirements 2.3. Determine operating principles and best practice where required 2.4. Develop/amend documentation as a draft in accordance with specifications to standard format 2.5. Issue documentation to appropriate personnel for review 2.6. Edit documentation and amend in accordance with review requirements 2.7. Complete documentation to satisfy the initial identified need/deficiency.
3. Communicate changes to plant documentation.	3.1. Explain and communicate documentation to all relevant personnel 3.2. Distribute documentation to all appropriate personnel 3.3. Evaluate implementation of documentation

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	3.4. Amend documents if required.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE
This describes the essential skills and knowledge and their level, required for this unit.
Required skills
Competence, sufficient to be able to develop and amend work place documentation, includes the ability to apply and explain: • enterprise information systems and work place documentation • enterprise quality and safety procedures • principles of policy and procedure development • principles of information/data management • importance of effective consultation in developing documentation • relevant equipment and operational processes.
Required knowledge
The knowledge referred to in the Evidence Guide for this unit includes: • organisation policies, standard procedures and work instructions and relevant regulatory requirements for the development of plant documentation • standard codes of practice relevant to developing plant documentation.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment of this unit should include demonstrated competence on actual plant and equipment in a work environment. The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	Assessment will occur over a range of situations which will include disruptions to normal, smooth operation. Assessment will typically use a plant documentation development project. This unit of competency requires a significant body of knowledge which will be assessed through questioning and the use of what-if scenarios both on the plant (during demonstration of normal operations and walk-throughs of abnormal operations) and off the plant.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of satisfactory performance in this unit can be obtained by observation of performance and questioning to indicate understanding and knowledge of the Elements of the competency and Performance Criteria. Consistent performance should be demonstrated. In particular look to see that: • effective maintenance and evaluation of workplace documentation is carried out • effective research and consultation is undertaken to ensure the development of best practice documentation • feedback is provided on how to improve workplace documentation • completed documentation is user friendly, accurate and in accordance with the intended use/requirements • adequate documentation is produced, including documentation for the introduction of new systems, policies, equipment or processes • non routine problems in relation to plant documentation are recognised and appropriate solutions are presented • changes to workplace documentation is communicated in the appropriate manner. These aspects may be best assessed using a range of scenarios/case studies/what-ifs as the stimulus with a walk-through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations which may have been generated from the

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	past incident history of the plant, incidents on similar plants around the world, hazard analysis activities and similar sources.
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. A bank of scenarios/case studies/what-ifs will be required as will a bank of questions which will be used to probe the reasoning behind the observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork units.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

RANGE STATEMENT	
The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs if the candidate, accessibility of the item, and local industry and regional contexts.	
Codes of practice/ standards	Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.
Context	This competency is typically performed by experienced operators, team leaders or supervisors who may be working individually or in a team environment.
Documentation	This competency includes the following indicative plant documentation: • operating procedures • work instructions • incident procedures • operating manuals • quality manuals and procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• training program contents/materials • safety data sheets • job cards • maintenance logs • non-compliance reports • incidence and accident reports • permits • schematics/process flows/engineering drawings.
Information	Sources of information may include: • manufacturing specifications • product specifications • company policies and procedures • customer requirements • industry/work place codes of practice • State/industry OHS legislation and regulations • ISO and other industry standards and regulations • industry associations, networks and professional bodies.
Equipment	Items of equipment for this competency include: • computer equipment.
Procedures	Procedures may be written, verbal, computer-based or in some other form. They include: • all work instructions • standard operating procedures • formulas/recipes • batch sheets • temporary instructions • any similar instructions provided for the smooth running of the plant. For the purposes of this Training Package, 'procedures' also includes good operating practice as may be defined by industry codes of practice (eg Responsible Care) and government regulations.
Health, **safety and environment** (**HSE**)	All operations to which this unit applies are subject to stringent health, safety and environment requirements, which may be imposed through State or Federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between Performance Criteria and HSE requirements, the HSE requirements take precedence.

PMASUP444A Plan plant preparation and isolation

Modification History

New unit

Unit Descriptor

This unit of competency covers the skills and knowledge needed to undertake the planning and organisation needed before plant is isolated and prepared for subsequent work, typically maintenance of some sort. It also includes the planning to prepare for the plant's return to service.

Application of the Unit

This unit applies to a person who has the responsibility for planning to isolate and prepare plant. This is probably part of their work role, although it could be a full time secondment for a major shutdown. The type of people to whom this unit may apply include (but are not limited to):

- operators and maintainers
- supervisors
- maintenance planners
- maintenance personnel
- authorised permit issuers, coordinators or similar.

While this unit is written to apply to an individual they will rarely if ever complete this competency as a lone individual and will usually do so in liaison with relevant experts and stakeholders.

This unit applies:

- after the work scope has been agreed
- before the isolation and preparation commences.

This unit has a strong relationship with the relevant 'permit' units (e.g. MSAPMPER300C Issue work permits) as well as HAZOP (e.g. PMASUP445A Participate in HAZOP studies) and decommissioning/recommissioning units (e.g. PMASUP440B Commission/recommission plant and PMASUP441C Decommission plant). Where relevant, these units should also be accessed.

This unit requires a detailed knowledge of the plant to be prepared and isolated, such as might be obtained from the relevant technical units covering this plant. Hands-on operating competency, however, is not necessarily required.

This unit does not include the actual isolation and preparation of plant – see PMASUP244A Prepare and isolate plant.

© Commonwealth of Australia, 2025 Powering Skills Organisation

This unit has been written with the preparation and isolation of hazardous plant, such as a major hazard facility in mind. However, it should also be applicable to the preparation and isolation of lower hazard plants and mobile plant with appropriate contextualisation.

Much of this unit is iterative and the text below should not be taken as specifying necessary sequence.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Confirm scope of work	1.1	Examine identified work scope
		1.2	Confirm purpose of identified work
		1.3	Identify plant and equipment involved
		1.4	Negotiate any conflicts/inconsistencies with relevant stakeholders
		1.5	Identify possible need for temporary lifting of any isolations
2	Develop isolation	2.1	Apply relevant isolation philosophy/strategy

© Commonwealth of Australia, 2025 Powering Skills Organisation

	philosophy for work	2.2	Determine implications of isolation
		2.3	Identify physical limits of effected plant and equipment
		2.4	Check suitability and effectiveness of existing isolation procedures
		2.5	Assess possible boundaries for isolations
		2.6	Seek local knowledge for similar isolations and preparations
		2.7	Draft strategies for isolation and preparation
		2.8	Communicate, as appropriate, with stakeholders
		2.9	Negotiate isolation and preparation conflicts
		2.10	Prepare isolation philosophy for work
3	Manage hazards	3.1	Identify existing hazards of plant, process and materials
		3.2	Identify hazards associated with performing the isolations and preparation
		3.3	Identify hazards associated with purging/flushing/venting materials
		3.4	Draft strategies for controlling any releases
		3.5	Estimate required preparation durations
		3.6	Make recommendations for improvement in accordance with procedures
		3.7	Liaise with technical experts as required
		3.8	Specify types of isolations and locations of isolations required
		3.9	Specify other required hazard controls
		3.10	
4	Plan required	4.1	Determine required sequencing of all steps

© Commonwealth of Australia, 2025 Powering Skills Organisation

	isolation and preparation	4.2	Develop isolation procedure
		4.3	Develop preparation procedure
		4.4	Develop decontamination procedures
		4.5	Develop required procedures for plant supplementary systems
		4.6	Verify procedures against relevant drawings and the plant
		4.7	Identify and schedule required prework
		4.8	Determine competencies required to complete planned isolations and preparation
		4.9	Plan required deisolation and preparation for return to service
		4.10	Discuss proposed plans with relevant stakeholders
		4.11	Complete required documentation
5	Obtain authority to execute plan	5.1	Obtain approval to implement the isolation and preparation plan
		5.2	Obtain approval to implement the deisoalation and preparation for return to service plan
		5.3	Acquire hardware and resources for isolation and deisolation and preparation for work and return to service

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Ability to:

- read and interpret technical documentation and drawings/graphics
- interpret material safety data sheets (MSDS)
- use appropriate risk assessment tools/risk effect matrices

© Commonwealth of Australia, 2025 Powering Skills Organisation

- calculate vessel inventory
- calculate purging/ventilation times
- calculate required volumes for purging
- calculate required times for ventilation (e.g. to achieve a specified number of turns/volumes)

Required knowledge includes:

Knowledge of:

- work control system for site and organisation
- regulations and other external controls relevant to the proposed work
- isolation philosophy or organisation
- hierarchy of isolations
- fluid hydraulics as applied to draining and purging of vessels
- types of purging and ventilation media and their uses and limitations
- methods and equipment used for purging and ventilation
- physical properties of process materials (e.g. density and viscosity)
- hazardous properties of relevant materials (e.g. process, purging and ventilation materials)
- as low as reasonably practicable (ALARP) concept and methods of achieving it
- vessel chilling causes and controls
- appropriate rates of change for pressure and temperature for vessels and other plant
- organisation's authorisation procedures
-

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit should be assessed as holistically as is practical and will generally be assessed using a workplace project as a significant assessment activity.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	A person who demonstrates competency in this unit must be able to provide evidence of the ability to: • develop an appropriate isolation philosophy for the work on a significant item of equipment or plant area • manage relevant hazards • develop an appropriate plan for the required isolations and preparation.
Context of and specific resources for assessment	Assessment of performance must be undertaken in a workplace.

© Commonwealth of Australia, 2025 Powering Skills Organisation

	Access may be required to: • workplace procedures and plans relevant to work area • specifications and documentation relating to planned work • documentation relating to the plant, process and materials • any other materials which would normally be available in the workplace while conducting this activity.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Isolation	Isolation is a process for ensuring no energy or material can enter the isolated area
Preparation	Preparation is a process for ensuring that plant and equipment is in a safe and appropriate condition for the required work. Preparation may include, but is not limited to: • draining • purging • inerting • decontaminating • cleaning • ventilating • controlling atmosphere (e.g. to ensure it is breathable, and is not within the flammable range) • adjusting temperature to make a workable environment

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• adjusting pressure (usually to atmospheric) • ensuring adequate access and egress
Scope of work	Scope of work includes, but may not be limited to: • what work is to be done • where the work will be done • who will be doing the work • when the work needs to be done • why the work is to be done • how the work will be undertaken (tools and techniques) • frequency with which this work is/will be required • duration of work (from beginning of shutdown to back to normal operations)
Relevant isolation philosophy/ strategy	Relevant isolation philosophy/strategy will normally be that of the organisation for which the isolations are being done although they could include regulatory or similar requirements and may include, but are not limited to: • types of isolations allowed (e.g. positive, double block and bleed), removal of item (e.g. fuse and spool piece), and single block isolations • lock out/tag out • preparation strategies • types of equipment to be used • purging or other preparation fluids/techniques Strategy will be consistent with relevant external standards, such as: • Government of Western Australia, Department of Commerce, Guidance note – Isolation of plant, 2010 • National Offshore Petroleum Safety Authority (NOPSA) requirements • Major Hazard Facility (MHF) Licence to Operate
Hazards	Hazards will include: • hazards to people, environment and plant • other hazards as relevant to the organisation/facility
Implications of isolation	Implications of isolation apply to both the area of the work as well as upstream and downstream implications and may include, but are not limited to: • upstream and downstream process implications

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• ability to prepare plant once isolated • integrity of plant once isolated and prepared
Controlling releases	Controlling releases to the environment may include, but is not limited to: • preventing any release • containing any release • recovery and reuse or disposal of any release
Physical limits of plant	Physical limits of plant may include, but are not limited to: • temperature/pressure limits of plant and equipment • limits on rates of change of temperature/pressure • suitable steam pressures/temperatures
Strategies for isolation and preparation	Strategies for isolation and preparation may include, but are not limited to: • sequence of isolations and preparations • type of isolation, based on hierarchy of isolations • type of preparations to be used
Hierarchy of isolations	Isolations may be categorised according to a hierarchy of: • positive • proven • unproven

Estimating preparation durations	Estimating preparation durations may include, but is not limited to:
	• determining inventory in plant to be drained/purged
	• establishing safe rates of change, such as:
	  • pressurisation
	  • depressurisation
	  • draining
	  • flushing
	  • cooling
	  • heating
	• calculating required volumes and pressures of flushing/purging venting materials
	• calculating the time required to drain, flush, purge, depressure, pressure, cool and heat

Isolation procedure	Isolation procedure may include, but is not limited to: • isolation processes

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• isolation list • multiple isolations • temporary lifting of isolations, when and if required • interlocks and will include consideration of: • isolation alternatives • conflicts of isolation
Verifying procedures	Verifying procedures may include, but is not limited to: • checking existing documents which have been used are accurate, current and complete • checking planned isolation points do exist, are accessible, and are suitable for the isolation planned • having a history of providing the isolation desired
Relevant drawings	Relevant drawings may include, but are not limited to: • piping and instrumentation diagrams (P&IDs) • process flow diagrams (PFDs) • process flow sheets (PFSs) • process engineering flow sheets (PEFs)
Required prework	Required prework may include, but is not limited to: • scaffolding • building up/depletion of inventories/work in progress (WIP) • obtaining of supplies • identification tags • lock out kits
Competencies required	Competencies required for isolation and preparation may include, but are not limited to: • electrical (normal) • electrical high voltage and hazardous area • electrical isolation/deisolation • radiation • heights • mobile plant • plumbing • mechanical fitting • permit preparation

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required documentation	Required documentation may include, but is not limited to: • drawings • procedures • marking up existing documents • punch lists • vendor documents/engineering specifications • documentation required by the site work control system (e.g. permits) Documents will conform to the site requirements and document control systems Documents may be: • paper, electronic or other approved form
Authority to execute	Authority to execute includes both the authorisation to proceed and the timing of that execution. Authority will be obtained through the channels required by the organisation/facility. The level of authority required will vary for different types of work, different types of isolation and different plants/facilities

PMBWELD301B Butt weld polyethylene plastic pipelines

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the butt welding of polyethylene (PE) plastic pipes and pipeline components under industrial conditions both in the field and in factory conditions.

This competency is performed by operators as part of a work team.

Application of the Unit

Application of this unit

This competency applies to operators who are involved in the butt welding of polyethylene (PE) pipes and pipeline components to required quality assurance demands whilst maintaining personal and immediate site safety. The key features in attaining the required quality are:

- identifying materials being used in the installation as compatible for welding
- calculating appropriate welding parameters to be used
- maintaining and calibrating welding equipment
- performing welding
- assessing quality of welded joints made.

End applications include pipelines for transmitting gas and liquids.

Licensing/Regulatory Information

Not applicable.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
1. Identify materials as being compatible for welding.	1.1 Identify materials as polyethylene (PE) from specifications and work site instructions. 1.2 Identify PE materials and pipes supplied as being compatible for welding from specifications.
2. Calculate appropriate pipe welding parameters.	2.1 Identify welding machine type and operating data. 2.2 Identify pipe materials and dimensions. 2.3 Perform welding parameter calculations for individual welding machines and pipe details. 2.4 Prepare field operational sheets as per enterprise requirements.
3. Maintain and calibrate welding equipment.	3.1 Set up welding equipment and work area. 3.2 Ensure safety equipment is available and operational. 3.3 Identify non-conformance, report and rectify. 3.4 Check operation and calibrate where required, heating, trimming, and pressure systems.
4. Perform welding to required standard.	4.1 Assemble pipeline components in welding machine. 4.2 Clean, align and trim pipe ends. 4.3 Perform heating, welding, and cooling phases using

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
	calculated welding parameters. 4.4 Monitor and record achieved weld parameters for each joint as per enterprise requirement. 4.5 Clean up equipment when completed as per enterprise procedures. 4.6 Clean up work site, dispose of scrap materials as per enterprise procedures. 4.7 Use personal protective equipment as per enterprise requirements.
5. Assess quality of completed joints.	5.1 Identify quality requirements for joints 5.2 Assess joints against specification requirements, and report results 5.3 Identify and report non-conformances as per enterprise requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of PE materials and pipeline components as described in national standards to recognise welding compatibility and suitability.

Knowledge of detailed work instructions necessary to perform butt welding, and the ability to implement within required parameters to attain required quality outcomes.

Competence includes the ability to:

- identify materials being used
- calculate welding parameters for individual machines and pipeline components
- maintain and adjust operating conditions in welding machine
- set up and maintain safe working environment
- operate welding machine within required parameters
- assess quality of completed joints
- identify and rectify fault causes arising from machine operation and component variables
- establish and maintain quality records.

Language, **literacy and numeracy requirements**

Read material which is sequenced for instructions, explanations, information or opinions.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Write short and simple messages about routine tasks or activities, or complete forms.

Use hands-on real-life materials and pictures/diagrams based on personal experience and prior knowledge.

Use several pieces of related mathematical information.

Read, write and speak whole numbers and money sums, recognise and interpret simple fractions, decimals and percentages, use simple data, grid references.

Use simple grammatical forms and vocabulary to give instructions, give explanations, ask questions and express viewpoints.

Clarify intended meaning by asking for repetition when listening, and varying speed and changing tone or emphasis when speaking.

Use strategies such as providing verbal and non-verbal feedback in order to show interest or attitude.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that the weld quality meets the requirements of the standard. This may require testing of the weld in accordance with the standard.

Assessment method and context

Assessment will occur using industrial plastic pipes and welding equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- using appropriate, industrial equipment, situations and polymers
- in a situation allowing for the generation of evidence of the ability to recognise, anticipate and respond to problems
  - by using a suitable simulation and/or a range of case studies/scenarios
  - through a combination of these techniques.

© Commonwealth of Australia, 2025 Powering Skills Organisation

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice and/or Australian/international standards, the latest version must be used.

Context

This competency unit includes the butt welding of polyethylene (PE) pipeline components using hydraulic activated welding machines. The end applications include pipelines used for transmission of gaseous and water based fluids.

It also includes the operation of all relevant ancillary equipment.

Specifications include national standards for materials (including but not limited to AS/NZS 4130, AS/NZS 4131, AS/NZS 4401 and AS/NZS 5065), workplace specifications and instructions, and government codes and regulations.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- hydraulic activated butt welding machines, and pipe supports
- measurement devices, including pressure gauges, timers, temperature probes, callipers and computer-based pressure/temperature monitors
- cleaning fluids and spray equipment
- calculators
- relevant safety equipment
- comprehensive work instructions.

Hazards

Typical hazards include:

- hazardous cleaning fluids
- pipe material handling
- heavy stationary and moving machinery
- cutting and heating components.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- variable PE materials, and pipes as supplied
- equipment malfunction or wear and tear
- variable field site conditions.

PMBWELD302B Electrofusion weld polyethylene pipelines

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This competency covers the electrofusion welding of polyethylene (PE) plastic pipes and pipeline components under industrial conditions both in the field and in factory conditions.

This competency is performed by operators as part of a work team.

Application of the Unit

Application of this unit

This competency applies to operators who are involved in the electrofusion of polyethylene (PE) pipes and pipeline components to quality assurance requirements whilst maintaining personal and immediate site safety. The key features in attaining the required quality are:

- identifying materials being used in the installation as compatible for welding
- calculating appropriate welding parameters to be used
- maintaining and calibrating welding equipment
- performing welding
- assessing quality of welded joints made.

End applications include pipelines for transmitting gas and liquids.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
1. Identify materials as being compatible for electrofusion welding.	1.1 Identify materials as polyethylene (PE) from specifications and work site instructions. 1.2 Identify PE materials and pipes supplied as being compatible for welding from specifications.
2. Identify compatibility of commercial electrofusion control systems.	2.1 Identify electrofusion welding control unit type and operating data. 2.2 Identify pipe material and dimension compatibility with electrofusion fittings. 2.3 Identify control unit compatibility with electrofusion fitting control.
3. Maintain and calibrate electrofusion control unit equipment.	3.1 Set up electrofusion welding equipment and work area as per enterprise procedures. 3.2 Ensure safety equipment is available and operational as per enterprise procedures. 3.3 Identify non-conformance, report and rectify according to enterprise procedures. 3.4 Determine equipment is operational according to specifications.
4. Perform electrofusion	4.1 Prepare pipe and fitting as per specification.

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT ELEMENT	PERFORMANCE CRITERIA Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.
welding to required standard.	4.2 Perform heating, welding and cooling phases using selected elecrofusion welding parameters. 4.3 Monitor and record achieved electrofusion weld parameters for each joint as per enterprise procedures. 4.4 Clean up equipment when completed as per enterprise procedures. 4.5 Clean up work site, dispose of scrap materials as per operational procedures.
5. Assess quality of completed electrofusion joints.	5.1 Identify quality requirements for electrofusion joints as per specifications. 5.2 Assess joints against specification requirements and report results. 5.3 Identify and report non-conformances according to enterprise requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of PE materials and pipeline components, as described in national standards, to recognise electrofusion welding compatibility, and suitability. Knowledge of detailed work instructions necessary to perform electrofusion welding, and the ability to implement within required parameters to attain required quality outcomes.

Knowledge as a basis for solving processing and material problems, including:

- identify materials being used
- identify compatibility of commercial operating systems
- select electrofusion welding parameters for individual control units and fittings components
- prepare electrofusion joint assemblies
- set up and maintain safe working environment
- operate control unit within required parameters
- identify and rectify fault causes arising from machine operation and component variables
- establish and maintain quality records
- as relevant for the practical completion of work required.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Language, literacy and numeracy requirements

Read material which is sequenced for instructions, explanations, information or opinions.

Write short and simple messages about routine tasks or activities, or complete forms.

Use hands-on real-life materials and pictures/diagrams based on personal experience and prior knowledge.

Use several pieces of related mathematical information.

Read, write and speak whole numbers and money sums, recognise and interpret simple fractions, decimals and percentages, use simple data, grid references.

Use simple grammatical forms and vocabulary to give instructions, give explanations, ask questions and express viewpoints.

Clarify intended meaning by asking for repetition when listening, and varying speed and changing tone or emphasis when speaking.

Use strategies such as providing verbal and non-verbal feedback in order to show interest or attitude.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for this training package.

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice and/or Australian/international standards, the latest version must be used.

Context

This competency unit includes the electrofusion welding of polyethylene (PE) pipeline components using calibrated output electrofusion control units. The end applications include pipelines used for transmission of gaseous and water based fluids.

It also includes the operation of all relevant ancillary equipment.

Specifications include national standards for materials (including but not limited to AS/NZS 4129, AS/NZS 4130, AS/NZS4131 and AS/NZS 4401), workplace specifications and instructions, and government codes and regulations.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Tools and equipment

This competency includes use of equipment and tools such as:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- calibrated output electrofusion control units and pipe clamp supports
- measurement devices, including timers, temperature probes, callipers and computer based output monitors
- cleaning fluids, spray equipment and scrapers
- relevant safety equipment
- comprehensive work instructions.

Hazards

Typical hazards include

- hazardous cleaning fluids
- pipe material handling
- heavy stationary and moving machinery
- cutting and heating components.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- variable PE materials, and pipes as supplied
- equipment malfunction or wear and tear
- variable field site conditions.

PMC563081C Carry out stock control

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers monitoring and reordering of stock to effectively control the purchase of stock for production. It involves maintaining stock levels, reporting stock variations, liaising with suppliers and facilitating stock control changes.

Application of the Unit

Application of the unit	In a typical scenario, a senior operator, or supervisor in a large plant looks after the monitoring and reordering of stock. This is likely to be as part of their broader role and may be done by an individual working alone or as part of a work team. Stock levels may be monitored visually (e.g. stock on a shelf/on the floor) or may be via a computer which is updated as stock is used, or other means. Stock may be in a store, warehouse or locally in the plant.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor stock reordering	1.1. Monitor stock levels and maintain them at optimum levels 1.2. Adjust stock reorder levels as required in response to customer demand 1.3. Report to suppliers variations to quality and quantity of delivered goods 1.4. Identify alternative suppliers which meet required quality and safety standards and utilise them when required 1.5. Reorder stock in compliance with procedures
2. Maintain inventory records systems	2.1. Maintain accurate records of the storage and the movement of stock 2.2. Identify, and act upon, stock discrepancies 2.3. Ensure minimum inconvenience to customers resulting from stock movements
3. Undertake stocktaking and cyclical counts	3.1. Coordinate stocktaking and cyclical counts as required 3.2. Interpret inventory data and confirm it matches stock 3.3. Reconcile inventory data with actual stock on hand 3.4. Report stock variations or shortages 3.5. Identify missing or damaged stock and report as

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	required by procedures
4. Control hazards	4.1. Identify hazards in the work area 4.2. Assess the risks arising from those hazards 4.3. Implement measures to control those risks in line with procedures and duty of care
5. Respond to problems	5.1. Identify possible problems in stock levels, storage, quantity and quality if stock, timeliness of supplies and production issues 5.2. Determine problems needing action 5.3. Determine possible fault causes 5.4. Rectify problem using appropriate solution within area of responsibility 5.5. Follow through items initiated until final resolution has occurred 5.6. Report problems outside area of responsibility to designated person

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- maintaining accurate stock levels
- acting upon discrepancies
- ensuring stock availability for meeting production needs
- implementing enterprise's standard procedures and work instructions and relevant regulatory requirements within an appropriate timeframe and in a manner relevant to a smooth work flow and production requirements
- reading and numeracy to interpret workplace documents and technical information

Required knowledge

Required knowledge includes:

- production requirements and stock availability
- effective inventory management techniques to meet production requirements
- accuracy of inventory

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED SKILLS AND KNOWLEDGE
• supplier contractual requirements • stock control techniques • stock optimum levels and relationship with cost • relevant enterprise information systems in the reordering and monitoring of stock control • methods of rectification for variations to quality and quantity of delivered goods • method for sourcing alternative suppliers

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	The unit will be assessed in as holistic a manner as is practical and may be integrated with the assessment of other relevant units of competency.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential that the system be understood and that the importance of inventory management in relation to effective production planning is known. Competence must be demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action. Consistent performance should be demonstrated. In particular look to see that: • stock levels are accurate, discrepancies are acted upon and stock levels are maintained • variations to quality and quantity of delivered goods are rectified • alternative suppliers can be sourced on request • stock is on hand to ensure efficient production.
Context of and specific resources for assessment	Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations. Assessment will occur over a range of situations which will include disruptions to normal, smooth operation.

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE	
	Simulation or case studies/scenarios may be required to allow for timely assessment of parts of this unit of competency. Simulation should be based on the actual plant and will include 'walk-throughs' of the relevant competency components. A bank of scenarios/case studies/what ifs and questions will be required to probe the reasoning behind observable actions.
Method of assessment	In all plants it may be appropriate to assess this unit concurrently with relevant teamwork and communication units. Individual enterprises may choose to add prerequisites and co-requisites relevant to their processes.
Guidance information for assessment	Assessment processes and techniques must be culturally appropriate and appropriate to the language and literacy capacity of the candidate and the work being performed.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Procedures	All operations are performed in accordance with standard procedures and work instructions
Equipment and unit operations	This unit of competency includes all such items of equipment and unit operations which form part of the stock control system. These may include: • enterprise inventory system, which may be paper or computer based • scanners • enterprise inventory practices and procedures • production planning and scheduling
Typical problems	Typical problems may include:

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT	
	• stock discrepancies between inventory system and actual stock on hand • deviations from supplier contracts/performance agreements • stock control and production planning discrepancies • stock quality and/or quantity does not meet production standards
Occupational health and safety (**OHS**)	The identification and control of hazards and the application of OHS are to be in accordance with current, applicable legislation and regulations, and company procedures

RIICCM205D Carry out manual excavation

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to carry out manual excavation in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for manual excavation	1.1 Access, interpret and apply manual excavation documentation, and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Dig small excavations by hand	2.1 Confirm the location and specifications of the intended excavation 2.2 Identify service markers/taped areas 2.3 Determine and confirm location of underground services and avoid damage/interference

© Commonwealth of Australia, 2025 Powering Skills Organisation

	2.4 Use hand tools, and dig post holes, small pits and trenches to the required dimensions 2.5 Undertake trench collapse prevention procedures, where excavation is in unstable ground 2.6 Place barricades around the excavation
3. Complete and isolate the excavation	3.1 Clean loose material out of excavation using hand tools 3.2 Check excavation complies with the specification/work instruction 3.3 Clear loose material away from the edge of excavation
4. Conduct housekeeping activities	4.1 Clear work area and dispose of or recycle materials 4.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 4.3 Manage/report hazards, and maintain a safe working environment 4.4 Process written records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIICCM205D Carry out manual excavation

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of manual excavation including:
  - using manual excavation tools
  - using concreting tools, plant and equipment
  - communicating effectively to receive and clarify work instructions
- works effectively with others to undertake and complete the manual excavation in a way that meets all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - complying with written and verbal reporting requirements and procedures
- demonstrates consistent timely completion of manual excavation that safely, effectively and efficiently meet all of the required outcomes on a minimum of three (3) separate occasions including:
  - identifying the location of underground services
  - digging post holes, small pits and trenches to the required dimensions
  - applying trench collapse prevention procedures in unstable ground
  -

Knowledge Evidence

The candidate must demonstrate knowledge in carrying out manual excavation through:

- accessing, interpreting and applying the organisation and site requirements and procedures for;
  - using JSAs/safe work methods
  - achieving project quality outcomes
  - identifying and reporting on hazards related to the worksite and work activity
- organising work activities

© Commonwealth of Australia, 2025 Powering Skills Organisation

- using relevant tools and equipment safely
- identifying types, uses, limitations and maintenance requirements of manual excavation tools
- applying basic principles of soil technology for civil works
- using basic trench collapse prevention techniques including benching and battering
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- completing housekeeping activities
-

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
- where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience.

RIICCM206D Support plant operations

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to support plant operations in Civil construction.

This unit is appropriate for those working in an assistant role.

No licensing, legislation, or certification requirements apply to this unit at the time of publication.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for supporting plant operations	1.1 Access, interpret and apply plant operations documentation, and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, address and report potential hazards and risks and environmental issues 1.6 Select and wear correct personal protective equipment 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Identify and protect services	2.1 Locate services from plan 2.2 Locate, and advise operators of service markers 2.3 Expose, mark services, and erect barriers to prevent damage
3. Support the operators	3.1 Identify and alert operator of unsafe conditions or potential damage to property

© Commonwealth of Australia, 2025 Powering Skills Organisation

	3.2 Check pegs and levels and give advice to machine operator for compliance with job requirements 3.3 Deliver or relocate materials, and check for quality and quantity 3.4 Direct delivery plant/trucks to required location for loading/unloading 3.5 Provide guidance to operator for spreading materials to specified levels 3.6 Provide guidance to operator for compaction of materials in layers 3.7 Finish excavation jobs by hand to specifications 3.8 Complete written and verbal reporting requirements
4. Conduct housekeeping activities	4.1 Clear work area and dispose of or recycle materials 4.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 4.3 Manage/report hazards, and maintain a safe working environment 4.4 Process written records

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of plant operations support including:
  - selecting and using relevant tools/equipment
  - identifying the location of underground services
  - communicating effectively to alert and assist operators
- works effectively with others to undertake and complete the plant operations support in a way that meets all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - complying with written and verbal reporting requirements and procedures
- demonstrates consistent timely completion of plant operations support that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - the completion of four (4) standard shifts requiring the spotting for a minimum of two (2) separate activities involving excavation, fill, spreading of imported material, trimming and pawning
  - location and marking of services on two (2) separate projects
  -

Knowledge Evidence

The candidate must demonstrate knowledge in supporting plant operations through:

- accessing, interpreting and applying the organisation and site requirements and procedures for;
  - using JSAs/JSEA/safe work methods
  - achieving project quality outcomes
  - identifying and reporting on hazards related to the worksite and work activity
  - applying materials handling methods and using safety data sheets

RIICCM207D Spread and compact materials manually

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to spread and compact materials manually in Civil construction.

This unit is appropriate for those working in operational roles.

No licensing, legislation, or certification requirements apply to this unit at the time of publication.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for manually spreading and compacting materials	1.1 Access, interpret and apply spreading and compacting materials documentation, and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Conduct compaction machine operational checks	2.1 Carry out pre-start, start-up and shutdown procedures 2.2 Check machine controls and functions for serviceability, and rectify or report any faults
3. Spread and compact materials	3.1 Conduct basic field identification test and identify material type

© Commonwealth of Australia, 2025 Powering Skills Organisation

	3.2 Direct trucks to required location for loading/dumping 3.3 Direct delivered/relocated materials to correct location 3.4 Check manufactured material for segregation 3.5 Conduct field test to ensure material moisture is suitable 3.6 Direct machine operator to spread materials to specified levels 3.7 Finish materials by hand to specified levels 3.8 Operate mechanical compaction equipment and consolidate materials into layers 3.9 Conduct field test to ensure compaction has been achieved in restricted locations
4. Conduct housekeeping activities	4.1 Clear work area and dispose of or recycle materials 4.2Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 4.3 Manage/report hazards, and maintain a safe working environment 4.4 Process written records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIICCM207D Spread and compact materials manually

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of the manual spreading and compacting of materials including:
  - selecting and using relevant tools/equipment
  - carrying out equipment pre-start, start-up and shutdown
  - conducting practical field tests for moisture content, shrinkage and compaction
  - communicating effectively to direct operators
- works effectively with others to undertake and complete the manual spreading and compacting of materials that meets all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - complying with written and verbal reporting requirements and procedures
  - demonstrates consistent timely completion of manual spreading and compacting of materials that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - completing the hand spreading and the mechanical (hand operated) compaction of two (2) different material types to site specification
  -

Knowledge Evidence

The candidate must demonstrate knowledge in spreading and compacting materials manually through:

- accessing, interpreting and applying the organisation and site requirements and procedures for;
  - using JSAs/JSEA/safe work methods
  - achieving project quality outcomes
  - identifying and reporting on hazards related to the worksite and work activity
  - applying materials handling methods and using safety data sheets

© Commonwealth of Australia, 2025 Powering Skills Organisation

- organising work activities
- using relevant tools and equipment safely
- identifying hand operated mechanical compaction machine types, characteristics, technical capabilities and limitations
- applying basic principles of soil technology for civil works
- identifying basic soil compaction theory including the effects of moisture and mechanical interlock
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- completing housekeeping activities
-

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
- where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience.

RIICCM208D Carry out basic levelling

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to carry out basic levelling in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for basic levelling	1.1 Access, interpret and apply basic levelling documentation, and ensure the work activity is complaint 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic signage requirements 1.6 Select equipment and/or attachments for work activities, and check for faults and serviceability within specified tolerances 1.7 Identify environmental protection requirements 1.8 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Establish offsets to plans and drawings	2.1 Establish offset and recovery pegs from survey controls to specified plans and drawings 2.2 Re-establish earthwork and pavement control lines from offsets and/or recovery pegs

© Commonwealth of Australia, 2025 Powering Skills Organisation

	2.3 Establish drainage offsets from survey control
3. Set up and use levelling device	3.1 Identify heights to be transferred/established from project plans or instructions 3.2 Set up and use levelling instruments, and complete levelling 3.3 Transfer heights from the known to the required 3.4 Document results of levelling procedure
4. Conduct housekeeping activities	4.1 Clear work area and dispose of or recycle materials 4.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 4.3 Manage/report hazards, and maintain a safe working environment 4.4 Process written records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of basic levelling including:
  - selecting and using relevant tools/equipment
  - carrying out basic leveling mathematics
  - following basic civil construction processes
  - communicating effectively to confirm work requirements/plans/drawings
- works effectively with others to undertake and complete the basic levelling in a way that meets all of the required outcomes, including:
  - using a range of communications techniques and equipment to convey information to others
  - complying with written and verbal reporting requirements and procedures
- demonstrates consistent timely completion of basic levelling that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - conducting a minimum of three (3) different levelling tasks, at least one (1) utilising an automatic level. One (1) of the tasks must include closed traverse utilising ***either*** the height of instrument ***or*** rise and fall method of reduction
  - conducting of a two (2) peg test with an automatic level, to confirm instrument meets manufacturer's tolerances
  - accurately recording of the results of each levelling procedure to organisational requirements
  -

Knowledge Evidence

The candidate must demonstrate knowledge in carrying out basic levelling through:

- accessing, interpreting and applying the organisation and site requirements and procedures for;

© Commonwealth of Australia, 2025 Powering Skills Organisation

  - using JSAs/JSEA/safe work methods
  - achieving project quality outcomes
  - identifying and reporting on hazards related to the worksite and work activity
  - applying materials handling methods and using safety data sheets
- organising work activities
- using relevant tools and equipment safely
- identifying leveling devices, characteristics, technical capabilities and limitations
- read, interpret and applying civil construction plan, symbols and construction terminology
- identifying site isolation and traffic control responsibilities and authorities
- completing housekeeping activities
-

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,

RIICCM210D Install trench support

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to install trench support in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for installing trench support	1.1 Access, interpret and apply trench support documentation, and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement traffic signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Install trench shoring	2.1 Communicate with plant operator and ensure the excavation of trenches complies with site plan, line and depth 2.2 Determine and prepare shoring method 2.3 Set out positioning of shoring 2.4 Position/erect shoring within the trench

© Commonwealth of Australia, 2025 Powering Skills Organisation

	2.5 Secure shoring in position and ensure structural conformity with regulations 2.6 Clean out excavation 2.7 Locate ladders for safe access and egress
3. Remove trench shoring	3.1 Release jacking mechanisms and remove ladders 3.2 Check shoring and prepare it for lifting from the trench 3.3 Remove shoring from trench and store it
4. Conduct housekeeping activities	4.1 Clear work area and dispose of or recycle materials 4.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 4.3 Manage/report hazards, and maintain a safe working environment 4.4 Process written records

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of trench support installation including:
  - selecting and using relevant tools/equipment
  - using shoring methods and systems
  - working in confined spaces
  - communicating effectively to confirm work requirements
- works effectively with others to undertake and complete the installation of trench support in a way that meets all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - complying with written and verbal reporting requirements and procedures
- demonstrates consistent timely completion of trench support installation that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - installation of trench support on two (2) projects in trenches deeper than 1.5 metres requiring the trench support to be installed, moved along or within the trench, and removed from the trench
  -

Knowledge Evidence

The candidate must demonstrate knowledge in installing trench support through:

- accessing, interpreting and applying the organisation and site requirements and procedures for;
  - using JSAs/JSEA/safe work methods
  - achieving project quality outcomes
  - identifying and reporting on hazards related to the worksite and work activity
  - applying materials handling methods and using safety data sheets

RIICRC208D Lay pipes

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to lay pipes in Civil Construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare to lay pipes	1.1 Access, interpret and apply pipe laying documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear correct personal protective equipment appropriate for work activities 1.5 Identify, obtain, confirm and implement signage requirements 1.6 Select and check for faults all plant, tools and equipment to carry out tasks 1.7 Survey work area for loading and unloading and stock-piling materials
2. Set out excavation	2.1 Determine location and depths of excavation from job drawings 2.2 Set out and clearly mark excavation location 2.3 Advise plant operator of excavation requirements 2.4 Check excavation depths and grades for conformity to job

© Commonwealth of Australia, 2025 Powering Skills Organisation

	requirements 2.5 Compact and prepare foundation base for testing
3. Install bedding materials	3.1 Determine bedding material type and specification from plans and drawings 3.2 Lay and compact bedding materials to specified depths and grades
4. Lay pipe	4.1 Select, check and attach lifting apparatus to the pipe in preparation for lifting and installation for pipe joining 4.2 Prepare and specify pipe ends 4.3 Align pipe ends and push home 4.4 Check pipe for line and level 4.5 Advise plant operator of backfilling requirements and backfill and compact pipe to required finish level 4.6 Finish inlets and outlets in accordance with pipe/culvert design specifications
5. Clean up	5.1 Clear work area and dispose of or recycle materials 5.2 Clean, check, maintain and store tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of pipe laying including:
  - accessing, interpreting and applying documentation relevant to pipe laying
  - identifying and applying relevant drawings and job specifications to all work activities
  - identifying, addressing and reporting potential hazards and risks
  - identifying, obtaining, confirming and implementing signage requirements
  - selecting and checking for faults all plant, tools and equipment to carry out tasks
  - identifying, addressing and reporting environmental issues and ground conditions
  - surveying work area for loading and unloading and stock-piling materials
- works effectively with others to undertake and complete the laying of pipes to the required outcomes including:
  - preparing for and organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
  - using a range of communication techniques and aids to advise others of work activity and exclusion zones
  - monitoring hazards and identifying and communicating changes to the work environment during the work process
- demonstrates consistent, timely completion of pipe laying that safely, effectively and efficiently meet all of the required outcomes on a minimum of three (3) separate occasions including:
  - set out of and conducting excavation in the correct location to specified depth and grades
  - compacting and preparing foundation base for testing
  - installing required bedding materials
  - laying pipes for correct line and level
  - finishing inlets and outlets in accordance with pipe/culvert design specifications
  - advising plant operator of backfilling requirements

© Commonwealth of Australia, 2025 Powering Skills Organisation

- clearing work area and disposing of, recycling or storing materials
- installation of pipe on two different projects to a minimum of ten (10) pipe joints. The pipes are to have a minimum diameter of DNC two hundred and twenty-five (DN225) m
-

Knowledge Evidence

The candidate must demonstrate knowledge in laying pipes through:

- accessing, interpreting and applying the organisation and site requirements and procedures for laying pipes through:
  - identifying and managing risks
  - identifying, addressing and reporting environmental issues and ground conditions
  - setting up work activity
  - site isolation and traffic control responsibilities
  - work health and safety
  - managing waste
- selecting and checking for faults, tools and equipment to carry out tasks
- carrying out work to drawings and specifications
- applying effective pile laying techniques
-

Assessment Conditions

RIIHAN309D Conduct telescopic materials handler operations

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to conduct telescopic materials handler operations in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Elements and Performance Criteria

1. Plan and prepare for telescopic materials handler operations	1.1 Access, interpret and apply telescopic materials handler documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and apply signage requirements 1.6 Select plant, tools and equipment, check for serviceability/faults and rectify or report verbally or in writing
2. Conduct telescopic materials handler pre-operational checks	2.1 Perform pre-start, start-up, park-up and shutdown procedures 2.2 Check telescopic materials handler controls, brakes, attachments and other implements for manoeuvrability and serviceability and ensure faults are rectified or reported
3. Operate telescopic materials handler	3.1 Assess site and operating hazards and apply safe operating techniques 3.2 Operate telescopic materials handler
4. Attach, secure, lift, carry and place materials	4.1 Use load handling communication methods with all parties 4.2 Establish the weight of the load 4.3 Assess safe working load requirements and select, attach and

© Commonwealth of Australia, 2025 Powering Skills Organisation

	secure appropriate slings and lifting gear 4.4 Locate machinery and ensure stability 4.5 Shift the load 4.6 Use conventional hand and audible signals during the operation
5. Select, remove and fit attachments	5.1 Select attachment for the task 5.2 Move and fit attachment 5.3 Test and confirm correct fitting and operation 5.4 Use attachment per manufacturer's recommendations and design limits 5.5 Remove, clean and store attachment
6. Relocate the telescopic materials handler	6.1 Prepare machine and equipment for relocation 6.2 Transport machine and equipment safely between worksites, observing relevant codes and traffic management requirements
7. Carry out machine operator maintenance	7.1 Park and prepare telescopic materials handler for maintenance and shut down 7.2 Conduct inspection and fault finding 7.3 Remove and replace defective parts 7.4 Perform scheduled operator maintenance 7.5 Process written records
8. Conduct housekeeping activities	8.1 Clean-up work area and dispose of or recycle materials 8.2 Clean, check, maintain and store plant, tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIHAN309D Conduct telescopic materials handler operations

Modification History

Corrected numbering in Performance Criteria.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of conducting telescopic materials handler operations including:
  - applying operational safety
  - accessing, interpreting and applying technical information
  - calculating volume and weights
  - maintaining equipment written records
  - applying fault finding techniques
  - accessing, interpreting and applying environmental management plan
  - carrying out machine operator maintenance
- works effectively with others to undertake and complete the conducting of telescopic materials handler operations that meets all the required outcomes including:
  - complying with written and verbal reporting requirements and procedures
  - communicating clearly and concisely with others to receive and clarify work instructions
  - using load handling communication methods with all parties
  - using conventional hand and audible signals
- demonstrates consistent and timely completion of conducting telescopic materials handler operations that safely, effectively and efficiently meet all of the required outcomes on a minimum of three (3) separate occasions including:
  - performing pre-start, start-up, park-up and shutdown procedures
  - checking controls, brakes and attachments for manoeuvrability and serviceability and rectifying or reporting faults
  - operating the telescopic materials handler
  - selecting, attaching and securing appropriate slings and lifting gear
  - shifting the load
  - selecting, removing and fitting attachments
  - transporting the machine and equipment between work sites

© Commonwealth of Australia, 2025 Powering Skills Organisation

Knowledge Evidence

The candidate must demonstrate knowledge in conducting telescopic materials handler operations through:

- telescopic materials handler types, characteristics, technical capabilities and limitations
- techniques for calculating safe working loads
- telescopic materials handler and attachment operating techniques related to essential tasks
- isolation and traffic control responsibilities and authorities
- safety data sheet and materials handling methods
- methods of changing machine attachments
- safe operating techniques in varying terrain
- basic earthworks calculations
- levelling techniques
- JSA's/safe work method statement

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- assessor requirements differ between sectors as follows:
  - when assessing this unit in the context of the **Drilling** sector:
    - an assessor must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through five (5) years of work in the Industry sector; or,
    - where a co-assessment or partnership arrangement exists between a qualified assessor and an Industry technical expert, the Industry technical expert can hold the unit being assessed, and/or demonstrate equivalency of skills and knowledge at the unit level. An Industry technical expert must also demonstrate a minimum of three (3) years of continuous work in the Industry sector, with the preceding one (1) year in the unit they are co-assessing; or,
  - when assessing this unit in the context of the **Metalliferous Mining** sector:
    - an assessor must demonstrate the skills and knowledge of this unit through five (5) years of current and continuous work with the Industry sector and must hold the TAE Assessor Skill Set or equivalent; or,
  - when assessing this unit in the context of the **Coal Mining** sector:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- an assessor must demonstrate the skills and knowledge of this unit through twelve (12) month work experience in an Industry relevant to the skills being assessed within the last three (3) years; and,
- where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must demonstrate competency in the unit being assessed, and be currently working in the sector with a minimum of twelve (12) months' work experience within the last three (3) years; or,

- when assessing this unit in the context of the **Extractive** sector
  - an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
  - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience; or,
- when assessing this unit in the context of the **Civil Construction** sector
  - an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
  - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience.

RIIMPO304D Conduct wheel loader operations

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to conduct wheel loader operations in the Coal and Metalliferous mining and Extractive.

This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

- Coal mining
- Extractive
- Metalliferous mining
-

Elements and Performance Criteria

1. Plan and prepare for wheel loader operations	1.1 Access, interpret and apply wheel loader operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Access, interpret and apply geological and survey data required to complete the allocated job 1.6 Inspect and prepare work area in coordination with others 1.7 Select, and check for faults, equipment and/or attachments for work activities 1.8 Select and wear correct personal protective equipment and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate the	2.1 Carry out start-up, park, shutdown and secure equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

wheel loader	procedures 2.2 Coordinate activities with others at the site prior to commencing, during, and on completions of the work activity 2.3 Drive loader, select and modify the operating technique to meet changing work conditions 2.4 Monitor and manage equipment performance using indicators and alarms, and ensure efficiency of operation 2.5 Continually monitor hazards and risks , and ensure safety of self, other personnel, plant and equipment 2.6 Complete the work plan, within the operating capacities of the equipment
3. Carry out operator maintenance	3.1 Prepare machine for maintenance 3.2 Conduct inspection and fault finding 3.3 Carry out scheduled maintenance tasks 3.4 Return machine to service 3.5 Process written maintenance records
4. Conduct housekeeping activities	4.1 Clear work area and dispose of or recycle materials 4.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 4.3 Manage and/or report hazards, and maintain a safe working environment 4.4 Process written records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO304D Conduct wheel loader operations

Modification History

Performance Criteria amended to make requirements more explicit; manoeuvring, driving and parking up added; operator maintenance element added.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of wheel loader operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - conducting bucket loading and discharge
  - selecting and using the required tools and equipment
  - inspection and preparation of work area
  - working safely around other machines and personnel
- works effectively with others to undertake and complete wheel loader operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
- demonstrates consistent timely completion of wheel loader operations that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - driving and operating the wheel loader for operations adjusting equipment operations to suit site conditions
  - shifting loads, carries the load as close to the ground as possible and deposits load to the correct location
  - selecting, removing and fitting attachments
  - following the steps to shut down the wheel loader

© Commonwealth of Australia, 2025 Powering Skills Organisation

Knowledge Evidence

The candidate must demonstrate knowledge in conducting wheel loader operations through:

- identifying equipment processes, technical capability and limitations
- identifying, interpreting and using geological and technical data (basic)
- identifying signs of operator fatigue and how it should be managed identifying
- apply loading techniques
- interpreting plans, reports, maps, specifications
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- assessor requirements differ between sectors as follows:
- when assessing this unit in the context of the Metalliferous Mining sector:
  - an assessor must demonstrate the skills and knowledge of this unit through five (5) years of current and continuous work with the Industry sector and must hold the TAE Assessor Skill Set or equivalent; or,
- when assessing this unit in the context of the Coal Mining sector:
  - an assessor must demonstrate the skills and knowledge of this unit through twelve (12) month work experience in an Industry relevant to the skills being assessed within the last three (3) years; and,
  - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must demonstrate competency in the unit being assessed, and be currently working in the sector with a minimum of twelve (12) months' work experience within the last three (3) years; or,
- when assessing this unit in the context of the Extractive sector
  - an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
  - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience.

RIIMPO308D Conduct tracked dozer operations

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to conduct tracked dozer operations in Coal and Metalliferous mining and Extractive.

This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

- Coal mining
- Extractive
- Metalliferous mining
-

Elements and Performance Criteria

1. Plan and prepare for tracked dozer operations	1.1 Access, interpret and apply tracked dozer operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret clarify and confirm work plan 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Access, interpret and apply geological and survey data required to complete the allocated job 1.6 Inspect and prepare work area in coordination with others 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate the tracked dozer	2.1 Carry out pre-start, start-up, park-up, shutdown, and secure equipment procedures 2.2 Determine equipment capacity and operate equipment within capacity

© Commonwealth of Australia, 2025 Powering Skills Organisation

	2.3 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.4 Drive dozer, select and modify the operating technique to meet changing work conditions 2.5 Monitor and manage equipment performance using indicators and alarms, and ensure efficiency of operation 2.6 Connect and tow/push equipment and plant within the equipment and connection capacity 2.7 Continually monitor hazards and risks , and ensure safety of self, other personnel, plant and equipment
3. Carry out operator maintenance	3.1 Prepare machine for maintenance 3.2 Conduct inspection and fault finding 3.3 Carry out scheduled maintenance tasks 3.4 Return machine to service 3.5 Process written maintenance records
4. Conduct housekeeping activities	4.1 Clear work area and dispose of or recycle materials 4.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 4.3 Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

RIIMPO309D Conduct wheeled dozer operations

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to conduct wheeled dozer operations in Coal and Metalliferous mining, Civil construction and Extractive.

This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

- Civil construction
- Coal mining
- Extractive
- Metalliferous mining
-

Elements and Performance Criteria

1. Plan and prepare for wheeled dozer operations	1.1 Access, interpret and apply wheeled dozer operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Access, interpret and apply geological and survey data required to complete the allocated work 1.6 Inspect and prepare work area in coordination with others 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate wheeled dozer	2.1 Coordinate activities with others at the site prior to commencement of, and during the work activity 2.2 Carry out pre-start, start-up, park-up shutdown and secure

RIIMPO318D Conduct civil construction skid steer loader operations

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to conduct civil construction skid steer loader operations in Civil construction.

This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for skid steer loader operations	1.1 Access, interpret and apply skid steer loader operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Obtain, identify and implement traffic signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate skid steer loader	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Continually monitor hazards and risks , and ensure safety of

© Commonwealth of Australia, 2025 Powering Skills Organisation

	self, other personnel, plant and equipment 2.4 Drive and operate loader, and modify the operating technique to meet changing work conditions 2.5 Complete work plan within the operating capacity of the equipment 2.6 Act on or report monitoring systems and alarms
3. Load, carry and place materials	3.1 Conduct communication practices associated with transportation and lifting of materials 3.2 Establish weight of load and ensure it is within safe operational limits of the machine 3.3 Select, attach and apply slings and lifting gear in accordance with safe working load requirements 3.4 Position machinery to ensure stability and locate to effectively shift materials according to job specifications 3.5 Shift load safely and effectively 3.6 Move load using hand/audible/communication signals
4. Select, remove and fit attachments	4.1 Select attachment for the task 4.2 Remove and fit attachment 4.3 Test attachment and ensure correct fitting and operation 4.4 Use attachment in accordance with recommendations and design limits 4.5 Clean and store removed attachments in designated location
5. Relocate the skid steer loader	5.1 Prepare for relocation of skid steer loader 5.2 Move skid steer loader safely between worksites, observing relevant codes and traffic management requirements 5.3 Load and unload machine from float/trailer
6. Carry out machine operator maintenance	6.1 Prepare machine for maintenance 6.2 Conduct inspection and fault finding 6.3 Carry out scheduled maintenance tasks 6.4 Process written maintenance records
7. Conduct housekeeping activities	7.1 Clear work area and dispose of or recycle materials 7.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 7.3 Process records

Assessment Requirements for RIIMPO318D Conduct civil construction skid steer loader operations

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of civil construction skid steer loader operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying leveling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safely parking and securing of equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete civil construction skid steer loader operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates consistent timely completion of civil construction skid steer loader operations that safely, effectively and efficiently meet the required outcomes on a minimum of three (3) separate occasions including:
  - completion of operations to specification in a minimum of two (2) different soil types on three (3) occasions including:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- stripping/spreading topsoil and materials
- backfilling
- lifting, loading vehicles
- excavations
- mixing materials
- site clean-up
-

Knowledge Evidence

The candidate must demonstrate knowledge in conducting civil construction skid steer loader operations through:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed identifying
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil construction activity sequences of road construction, earthworks and drainage
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities
-

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector’s work environment; and,

- works effectively with others to undertake and complete backhoe/ loader operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates consistent timely completion of backhoe/loader operations that safely, effectively and efficiently meet the required outcomes on a minimum of three (3) occasions including:
  - completion of operations to specification in a minimum of two (2) different soil types:

© Commonwealth of Australia, 2025 Powering Skills Organisation

- mixing materials
- stripping/spreading topsoils and materials
- trench excavation
- backfilling
- lifting and carrying materials
- loading dump trucks, wagons, hoppers, chutes, and cutting/boxing
- fitting and removal of a minimum of three (3) attachments selected from the following:
- extending devices
- tilt bucket
- buckets
- compaction wheel
- ripper
- plate compactor
- rock breaker
- auger
- broom
- mower/slasher
- forklift
- 4 in 1 bucket and free/rock grab
-

Knowledge Evidence

The candidate must demonstrate knowledge of conducting backhoe/loader operations through:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed identifying
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil construction activity sequences of road construction, earthworks and drainage
- applying leveling techniques
- using methods for calculating safe working loads

© Commonwealth of Australia, 2025 Powering Skills Organisation

- applying operational, maintenance and basic diagnostics
- completing housekeeping activities
-

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
- where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience.

RIIMPO320D Conduct civil construction excavator operations

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to conduct civil construction excavator operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for excavator operations	1.1 Access, interpret and apply excavator operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Obtain, identify and implement traffic management signage requirements 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Operate excavator	2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity

© Commonwealth of Australia, 2025 Powering Skills Organisation

	2.3 Continually monitor hazards and risks , and ensure safety of self, other personnel, plant and equipment 2.4 Drive and operate excavator, and modify the operating technique to meet changing work conditions
3. Lift, carry and place materials	3.1 Conduct communication practices associated with transportation and lifting of materials 3.2 Establish weight of load and ensure it is within safe operational limits of the machine 3.3 Select, attach and use slings and lifting gear in accordance with safe working load requirements 3.4 Position machinery and ensure stability and locate to effectively shift materials according to job specifications 3.5 Shift load safely and effectively 3.6 Move load using hand/audible/communication signals
4. Select, remove and fit attachments	4.1 Select attachment for the task 4.2 Remove and fit attachment according 4.3 Test attachment and ensure correct fitting and operation 4.4 Use attachment in accordance with recommendations and design limits 4.5 Remove, clean and store attachments in designated location
5. Relocate the excavator	5.1 Prepare excavator for relocation 5.2 Move excavator safely between worksites, observing relevant codes and traffic management requirements 5.3 Load and unload machine from float/trailer
6. Carry out machine operator maintenance	6.1 Prepare machine for maintenance 6.2 Conduct inspection and fault finding 6.3 Carry out scheduled maintenance tasks 6.4 Process written maintenance records
7. Conduct housekeeping activities	7.1 Clear work area and dispose of or recycle materials 7.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 7.3 Process records

© Commonwealth of Australia, 2025 Powering Skills Organisation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO320D Conduct civil construction excavator operations

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of excavator operations including:
  - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
  - carrying out vehicle refuelling requirements and procedures
  - driving and operating the equipment to site conditions
  - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
  - applying problem solving and troubleshooting techniques
  - applying leveling techniques
  - selecting and using the required tools and equipment
  - working safely around other machines and personnel
  - safely parking and securing of equipment
  - applying methods of changing machine attachments
- works effectively with others to undertake and complete excavator operations that meet all of the required outcomes including:
  - using a range of communications techniques and equipment to convey information to others
  - maintaining written and verbal reporting requirements and procedures
  - organising work activities to meet all task requirements
  - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates consistent timely completion of excavator operations that safely, effectively and efficiently meet the required outcomes on a minimum of three (3) occasions including:
- completion of operations to specification in a minimum of two (2) different soil types on three (3) occasions including:

© Commonwealth of Australia, 2025 Powering Skills Organisation

  - loading
  - lifting and carrying materials
  - bulk excavation
  - backfilling
  - trench excavation
  - stockpiling
  - battering
  - benching
  - site clean up
- fitting and removal of a minimum of three (3) attachments selected from the following:
  - tilt bucket
  - buckets
  - lifting device
  - vibrating compaction wheel
  - ripper/tyne
  - compaction plate
  - compaction wheel
  - rock breaker
  - auger
  -

Knowledge Evidence

The candidate must demonstrate knowledge of conducting civil construction excavator operations through:

- identifying, interpreting ground conditions,
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed identifying
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil construction activity sequences of road construction, earthworks and drainage
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics

RIIRIS301D Apply risk management processes

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to apply risk management processes in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational or supervisory roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1 Plan and prepare for risk management	1.1 Access, interpret and apply risk management documentation and ensure the work activity is compliant 1.2 Inspect and analyse work area conditions regularly and systematically to identify potential hazards 1.3 Access, interpret and apply existing procedures to control identified hazards 1.4 Identify hazards not controlled by existing procedures 1.5 Recognise the type and scope of unresolved hazards and their likely impact
2 Assess and identify unacceptable risk	2.1 Consider and determine the likelihood of an event 2.2 Evaluate and determine the consequence of the event 2.3 Consider and determine the risk level (likelihood and consequence combined) 2.4 Identify or source the criteria for determining the acceptability/unacceptability of the risk 2.5 Evaluate the risk and identify 'unacceptable risk' status
3 Review risk management documentation	3.1 Monitor and review working instructions 3.2 Seek authority and approval to amend in writing the working instructions 3.3 Seek authority and approval to action amendments to the working instructions

© Commonwealth of Australia, 2025 Powering Skills Organisation

4 Identify and recommend controls	4.1 Identify the range of controls which may eliminate or minimise the risk 4.2 Conduct a detailed analysis of feasible options including the identification of resource requirements 4.3 Select the most appropriate control for dealing with the situation
5 Contribute to the implementation of controls	5.1 Write up the risk management plans selected control in detail, including resource requirements 5.2 Gain authorisation for selected control 5.3 Document and review controls for the job 5.4 Apply procedures to control recognised hazards 5.5 Communicate information on the control and its implementation

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIRIS301D Apply risk management processes

Modification History

Performance Evidence and Knowledge Evidence replaced with correct information, as endorsed by NSSC.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- apply legislative, organisation and site requirements and procedures
- research, analyse and apply relevant operational information
- demonstrate and apply common industry terminology
- interpret work procedures and processes
- use effective communication skills, including questioning and active listening skills with supervisors and other employees
- write reports
- apply planning and organising skills to the risk management processes
- demonstrate teamwork to involve and engage the employers/supervisors in the risk management processes
- apply problem solving skills to technical resources and infrastructure issues

Knowledge Evidence

The candidate must demonstrate knowledge of apply the risk management process through:

- OHS legislation and regulations
- appropriate resources and infrastructure context and language
- topics or subject areas which are target for assessment and treatment
- site risk management systems and their application
- conventions and requirements for written communications including report writing

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;

© Commonwealth of Australia, 2025 Powering Skills Organisation

- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- assessor requirements differ between sectors as follows:
  - when assessing this unit in the context of the **Drilling** sector:
    - an assessor must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through five (5) years of work in the Industry sector; or,
    - where a co-assessment or partnership arrangement exists between a qualified assessor and an Industry technical expert, the Industry technical expert can hold the unit being assessed, and/or demonstrate equivalency of skills and knowledge at the unit level. An Industry technical expert must also demonstrate a minimum of three (3) years of continuous work in the Industry sector, with the preceding one (1) year in the unit they are co-assessing; or,
  - when assessing this unit in the context of the **Metalliferous Mining** sector:
    - an assessor must demonstrate the skills and knowledge of this unit through five (5) years of current and continuous work with the Industry sector and must hold the TAE Assessor Skill Set or equivalent; or,
  - when assessing this unit in the context of the **Coal Mining** sector:
    - an assessor must demonstrate the skills and knowledge of this unit through twelve (12) month work experience in an Industry relevant to the skills being assessed within the last three (3) years; and,
    - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must demonstrate competency in the unit being assessed, and be currently working in the sector with a minimum of twelve (12) months' work experience within the last three (3) years; or,
  - when assessing this unit in the context of the **Extractive** sector
    - an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
    - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience; or,
  - when assessing this unit in the context of the **Civil Construction** sector
    - an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,

RIISAM201D Handle resources and infrastructure materials and safely dispose of nontoxic materials

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to handle resources and infrastructure materials and safely dispose of nontoxic materials in the Resources and Infrastructure Industry.

This unit is appropriate for those working in operational roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

1 Plan and prepare for handling resources and infrastructure materials and safely disposing of nontoxic materials	1.1 Access, interpret and apply nontoxic materials handling and disposal documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify, obtain and implement the traffic management signage requirements 1.6 Select and check for faults tools and equipment for the work activity 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2 Handle and remove waste	2.1 Comply with safety data sheets and requirements of regulatory authorities 2.2 Identify hazardous materials for separate handling 2.3 Follow procedures for the removal of non-toxic materials 2.4 Apply dust suppression procedures
3 Conduct House	3.1 Clear work area and dispose of or recycle materials

© Commonwealth of Australia, 2025 Powering Skills Organisation

Keeping Activities	3.2 Clean and maintain condition of equipment, ensure suitability for use, and address/report issues 3.3 Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIISAM201D Handle resources and infrastructure materials and safely dispose of nontoxic materials

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of handling resources and infrastructure materials and safely disposing of nontoxic materials including:
  - apply teamwork to a range of situations, particularly in a safety context
  - solve problems particularly in teams and in dealing practically with safety issues
  - show initiative in adapting to changing work conditions or contexts particularly when working across a variety of work placements
  - manage time, particularly in organising priorities and planning work
  - take responsibility for self organisation of work priorities
  - show a willingness to learn and to use a range of mediums to learn
- demonstrates consistent timely completion of handling resources and infrastructure materials and safely disposing of nontoxic materials that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - complying with safety data sheets and requirements of regulatory authorities
  - identifying hazardous materials for separate handling
  - following procedures for the removal of non-toxic materials
  - applying dust suppression procedures
  - clearing work area and dispose of or recycle materials

Knowledge Evidence

The candidate must demonstrate knowledge in handling resources and infrastructure materials and safely disposing of nontoxic materials through:

- identifying the most commonly encountered waste materials on worksites
- applying systems for packing and securing materials for movement

© Commonwealth of Australia, 2025 Powering Skills Organisation

- applying systems and equipment or materials for the short term protection of stacked/stored materials
- applying methods of dust suppression
- identify site isolation and traffic control responsibilities and authorities
- identify and apply Industry and worksite terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,

RIIWHS202D Enter and work in confined spaces

Modification History

Not applicable.

Application

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Elements and Performance Criteria

1 Plan and prepare for working in confined space	1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant 1.2 Obtain, confirm, clarify and apply work instructions and agreed procedure 1.3 Obtain, confirm, clarify and apply safety requirements 1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements 1.5 Confirm the emergency response procedure is with the stand-by person and understood 1.6 Identify, obtain and implement signage and barrier requirements 1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults 1.8 Identify, confirm and apply the environmental protection requirements 1.9 Position rescue equipment by the entry permit
2 Work in confined space	2.1 Gain access to confined space 2.2 Ensure that the atmosphere is tested and monitored for harmful elements

© Commonwealth of Australia, 2025 Powering Skills Organisation

	2.3	Correctly apply tagging and lock-out procedures
	2.4	Enter the confined space correctly
	2.5	Maintain ongoing communication with the stand-by person
	2.6	Comply with entry permit requirements
	2.7	Monitor and adhere to allocated entry time
3 Exit confined space	3.1	Exit confined space correctly
	3.2	Recover tools, equipment and materials
	3.3	Conduct inspection of the confined space
	3.4	Secure access to the confined space
	3.5	Remove tagging and lock-out
	3.6	Accurately complete confined space entry permit
4 Clean up	4.1	Clear work area and dispose of or recycle materials
	4.2	Clean, check, maintain and store tools and equipment
	4.3	Remove, clean and store barriers and signs

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS202D Enter and work in confined spaces

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates consistent timely completion of entering and working in confined spaces that safely, effectively and efficiently meets the required outcomes on three (3) separate occasions including:
- obtain appropriate entry permit and instructions for performing work in confined space
- interpreting and applying safe work method statements
- apply tagging and lock out
- selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
- entering the confined space
- using atmospheric monitoring devices prior to entering the confined space
- working in the confined space
- using atmospheric monitoring devices during confined space activity
- applying safe materials handling methods
- exiting the confined space
- remove tagging and lock out

Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Not applicable.

Application

This unit describes a participant's skills and knowledge required to work safety at heights in the Resources and Infrastructure Industries.

This unit it appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Elements and Performance Criteria

1 Identify work requirements	1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant 1.2 Identify and prepare written documentation for the scope of the task and proposed work practices/activities 1.3 Adhere to WHS requirements 1.4 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards 1.5 Identify, select and check safety equipment for serviceability 1.6 Identify, manage and report potential risks and hazards
2 Identify work procedures and instructions	2.1 Select materials, tools and equipment and check for serviceability 2.2 Select, wear and care for personal protective equipment 2.3 Inspect/install fall protection and perimeter protection equipment 2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights 2.5 Install safety system correctly 2.6 Select and install appropriate signs and barricades

© Commonwealth of Australia, 2025 Powering Skills Organisation

3 Access and install equipment	3.1 Correctly fit, adjust and anchor fall protection and associated equipment 3.2 Make arrangements to install required equipment 3.3 Use recommended methods to access work area for people, tools and equipment 3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down
4 Perform work at heights	4.1 Check access from ground to work area and ensure it is safe 4.2 Keep fall equipment in place and adjusted appropriately for movement during work 4.3 Undertake manual handling of materials and equipment 4.4 Locate materials and equipment ensuring that they are safely secured and distributed 4.5 Check safety system periodically for compliance 4.6 Monitor risk control measures to ensure that they are effective and appropriate 4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations
5 Clean up work area	5.1 Dismantle and remove safety system 5.2 Clear work area and dispose of or recycle materials 5.3 Clean, check, maintain and store tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS204D Work safely at heights

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates consistent timely completion of work at heights that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - accessing, interpreting and applying technical and safety information for working at heights
  - assessing hazards and risk associated with working at heights and implement control methods
  - selecting wearing and caring for personal protective equipment
  - identifying required safety systems including fall protection and associated equipment
  - correctly fitting, adjusting and anchoring of fall protection and associated equipment
  - performing work safely at heights
  - dismantle and remove safety systems

Knowledge Evidence

The candidate must demonstrate knowledge of working safely at heights through:

- names and functions of equipment, components and materials
- complying with equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

© Commonwealth of Australia, 2025 Powering Skills Organisation

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- assessor requirements differ between sectors as follows:
  - when assessing this unit in the context of the **Drilling** sector:
    - an assessor must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through five (5) years of work in the Industry sector; or,
    - where a co-assessment or partnership arrangement exists between a qualified assessor and an Industry technical expert, the Industry technical expert can hold the unit being assessed, and/or demonstrate equivalency of skills and knowledge at the unit level. An Industry technical expert must also demonstrate a minimum of three (3) years of continuous work in the Industry sector, with the preceding one (1) year in the unit they are co-assessing; or,
  - when assessing this unit in the context of the **Metalliferous Mining** sector:
    - an assessor must demonstrate the skills and knowledge of this unit through five (5) years of current and continuous work with the Industry sector and must hold the TAE Assessor Skill Set or equivalent; or,
  - when assessing this unit in the context of the **Coal Mining** sector:
    - an assessor must demonstrate the skills and knowledge of this unit through twelve (12) month work experience in an Industry relevant to the skills being assessed within the last three (3) years; and,
    - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must demonstrate competency in the unit being assessed, and be currently working in the sector with a minimum of twelve (12) months' work experience within the last three (3) years; or,
  - when assessing this unit in the context of the **Extractive** sector
    - an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
    - where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience; or,
  - when assessing this unit in the context of the **Civil Construction** sector

RIIWHS205D Control traffic with stop-slow bat

Modification History

Performance criteria numbering for element 1 corrected.

Application

This unit describes a participant's skills and knowledge required to control traffic with stop-slow bat in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Pre-requisite Unit

Unit Sector

Elements and Performance Criteria

1. Plan and prepare	1.1 Access, interpret and apply site traffic plan procedures and ensure the work activity is compliant 1.2 Obtain, confirm, clarify and apply work instructions 1.3 Obtain, confirm, clarify and apply safety requirements 1.4 Identify, obtain and implement signage and devices 1.5 Select tools and equipment, check for serviceability and rectify or report any faults 1.6 Identify, confirm, clarify and apply environmental protection requirements
2. Control traffic	2.1 Position or confirm temporary traffic signs and barriers 2.2 Direct traffic correctly 2.3 Control vehicles and pedestrian traffic and ensure safety 2.4 Monitor traffic, make adjustments for changing conditions and position waiting vehicles for smooth traffic flow 2.5 Use hand held stop/slow bats 2.6 Use visibly clear and unobstructed hand signals

© Commonwealth of Australia, 2025 Powering Skills Organisation

	2.7 Report traffic offenders
3. Operate communication devices	3.1 Adjust communication device controls for optimum reception/transmission results 3.2 Transmit messages clearly and concisely 3.3 Maintain communication device power supply 3.4 Check communications contact after nominated period of non-contact
4. Clean up	4.1 Remove or cover signs and devices sequentially to provide warning to motorists during shutdown 4.2 Clean, check, maintain and store tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS205D Control traffic with stop-slow bat

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates consistent timely control of traffic with a stop-slow bat that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - reading and interpreting the work instruction and planning work activity accordingly
  - positioning signage and barriers
  - directing and controlling vehicle traffic
  - directing and controlling pedestrian traffic
  - communicating to drivers and pedestrians clearly using hand signals
  - using approved communication devices such as hand held radios or phones to transmit message and report of offenders
  - removing or covering signs after work completion

Knowledge Evidence

The candidate must demonstrate knowledge of controlling traffic with stop-slow bat through:

- site and equipment safety requirements
- traffic controlling requirements and procedures
- complying with traffic management plans
- erecting traffic control signage and barricades
- communication device operations
- determine equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- detailing site isolation and traffic control responsibilities and authorities
- describing the effects of travel speed and vehicle mass on stopping distances
- interpreting and implementing safe work method statement

RIIWHS302D Implement traffic management plan

Modification History

Not applicable.

Application

This unit develops a participant's skills and knowledge required to implement a traffic management plan in Civil construction.

This unit is appropriate for those working in supervisory roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Elements and Performance Criteria

1 Plan and prepare to implement traffic management plan	1.1 Access, interpret and apply traffic management documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify, address and report potential risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for the work activity 1.5 Identify, obtain and implement traffic control signage and devices 1.6 Select, and check for faults, tools and equipment to carry out tasks 1.7 Identify, confirm and apply environmental protection requirements 1.8 Check the designated traffic controllers' training and qualifications for currency 1.9 Advise traffic controllers of the traffic flow requirements
2 Set out the traffic guidance scheme	2.1 Select traffic guidance scheme to suit site conditions, traffic volumes and work activities 2.2 Determine and ensure adherence to work schedule, maximum traffic delays, signals and site communications 2.3 Ensure signs and devices are correctly positioned on the

© Commonwealth of Australia, 2025 Powering Skills Organisation

	approaches to the work area 2.4 Ensure that signs and devices are positioned and displayed on each approach 2.5 Ensure signs and devices are positioned and displayed laterally 2.6 Ensure traffic is controlled effectively to protect the work crew
3 Monitor traffic guidance scheme	3.1 Ensure traffic flow is monitored and effectiveness of guidance scheme determined 3.2 Monitor work activities and provide guidance to adjust scheme 3.3 Apply process for dealing with traffic controllers who fail to adhere to approved procedures 3.4 Apply procedures to deal with offending motorists
4 Close down traffic guidance scheme	4.1 Ensure traffic is controlled to protect work crew removing traffic control devices 4.2 Ensure signs are removed in sequence to provide maximum warning during removal 4.3 Ensure guidance scheme details are recorded and reported as required 4.4 Ensure incidents are recorded and reported as required
5 Clean up	5.1 Ensure work area is appropriately cleared 5.2 Ensure tools and equipment are cleaned, checked, maintained and stored

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS302D Implement traffic management plan

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the traffic management plans that meet all of the required outcomes including:
  - complying with written and verbal reporting requirements and procedures
  - communicating clearly and concisely with others to receive and clarify work instructions
  - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates consistent timely implementation of traffic management plans that safely, effectively and efficiently meets the required outcomes on a minimum of three (3) separate occasions including:
  - complying with State/Territory regulations on three separate live traffic projects, and
  - completing one (1) project controlling site construction vehicles
  - identify and select traffic guidance scheme according to conditions
  - identify and select traffic guidance scheme according to conditions select and implement signage and device requirements, position and display according to site plan
  - monitor and adjust scheme according to variances in requirements
  - apply procedures to deal with non-compliant crew and motorists

Knowledge Evidence

The candidate must demonstrate knowledge of implementing a traffic management plan through:

- accessing, interpreting and applying legislative, organization and site requirements and procedures for:
  - JSAs/JSEA/Safe work method statement
  - potential hazards and risks
  - controlling traffic

© Commonwealth of Australia, 2025 Powering Skills Organisation

  - basic signalling
  - signs and devices
  - radio operations
- identifying equipment types, characteristics, technical capabilities and limitations
- identifying site isolation and traffic control responsibilities and authorities
- identifying quality requirements
- applying civil construction terminology

Assessment Conditions

RIIWMG203D Drain and dewater civil construction site

Modification History

Not applicable.

Application

This unit develops a participant's skills and knowledge required to drain and dewater civil construction sites in Civil construction.

This unit is appropriate for those working in operational roles.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for draining and dewatering	1.1 Access, interpret and apply drain and dewatering documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify, obtain and implement traffic signage requirements 1.4 Select and inspect required plant, tools and equipment and rectify/report any faults 1.5 Identify, clarify and apply environmental protection requirements 1.6 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.7 Select and wear personal protective equipment appropriate for work activities
2. Position sedimentation control	2.1 Position sedimentation controls 2.2 Construct sedimentation control barriers 2.3 Position geo-fabrics and/or woven wire
3. Remove surface water	3.1 Establish temporary drainage systems and drain or divert surface and sub-surface water to the storm water drainage system

© Commonwealth of Australia, 2025 Powering Skills Organisation

	3.2 Remove slab and site surface water and/or direct to the temporary drainage system 3.3 Fill surface holes and depressions 3.4 Drain surface water to drainage system using adequate fall
4. Construct sump/wells	4.1 Locate sump and/or well at the lowest point to be drained 4.2 Construct sumps and/or wells
5. Remove water from sumps/wells, trenches and pits	5.1 Install surface or submersible pumps 5.2 Locate surface pump as close as practicable to the sump or well 5.3 Pump water to temporary drainage system 5.4 Disperse discharged water
6. Clean up	6.1 Clear work area and dispose of or recycle materials 6.2 Clean, check, maintain and store plant, tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWMG203D Drain and dewater civil construction site

Modification History

Not applicable.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of the draining and dewatering of a civil construction site including:
  - selecting and using the required tools and equipment
  - interpreting and applying work instructions
  - draining surface water
  - constructing sumps and wells and removing water
- works effectively with others to undertake and complete the draining and dewatering of civil construction sites that meets all of the required outcomes including:
  - using a range of communication techniques to convey information to others
  - maintaining written and verbal reporting requirements and procedures
- demonstrates consistent and timely completion of the draining and dewatering of civil construction sites that safely, effectively and efficiently meet all of the required outcomes on a minimum of three (3) separate occasions including:
  - dewatering a trench or pit using at least one type of pump on two (2) separate projects
  - establishing sedimentation controls for a minimum of one (1) project
  - constructing a sump
  - installing surface or submersible pumps
  - pumping and dispersing water
  - draining surface water from a site using surface drains

Knowledge Evidence

The candidate must demonstrate knowledge in draining and dewatering civil construction sites through:

- identifying and applying operational, maintenance and basic diagnostic procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

- identifying and complying with construction principles
- interpreting engineering drawings
- identifying equipment types, characteristics, technical capabilities and limitations
- identifying and complying with site isolation and traffic control responsibilities
- using and interpreting civil construction terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed using Resources and Infrastructure Industry sector specific policies, procedures, processes and operational manuals; and,
- an assessor must demonstrate the skills and knowledge of this unit through five (5) years' work experience in the Industry sector; and,
- where the assessor does not have current experience a co-assessment or partnership arrangement needs to exist between the qualified assessor and an Industry technical expert/ subject matter expert. The Industry technical expert/subject matter expert must hold the unit being assessed and be currently working in the sector with a minimum of two (2) years' of current work experience.

TLIB2004A Carry out vehicle inspection

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to carry out an inspection of a commercial vehicle, including action to implement vehicle manufacturers specifications for routine checks, to clean the vehicle, and to ensure that all specified safety requirements are met and that the vehicle is operational to the requirements of both the workplace and the relevant state/territory roads and traffic authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant roads and traffic authority concerned with the inspection of commercial vehicles.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine inspection principles and procedures to check the safety and operation of a commercial vehicle across a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check the vehicle	1.1 A visual check of the internal and external condition of the vehicle is carried out following workplace procedures
	1.2 Pre-operational inspections and checks of the vehicle's tyres, suspension, fluid levels and other critical features are carried out to ensure conformance with the requirements of the relevant roads and traffic authority
	1.3 Associated equipment is tested to ensure it functions correctly to manufacturers specifications
	1.4 Post start-up and shut-down checks are carried out after engine is started to identify possible engine or electrical problems
	1.5 Warning systems (instruments and gauges) are checked to ensure they are operational
	1.6 Where relevant, vehicle monitoring device is logged on/off in accordance with manufacturers instructions and workplace policy
2 Clean vehicle	2.1 Vehicle and associated equipment is cleaned in accordance with workplace procedures and legislation
3 Complete documentation	3.1 Basic faults are identified and/or diagnosed and appropriate action is taken to report or remedy them as required by workplace procedures and legislation
	3.2 Records of inspection are updated and recommended repairs are documented in accordance with workplace polices

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements for the routine inspection of vehicles
- Relevant OH&S and pollution control procedures
- Procedures for the routine inspection of a commercial vehicle in accordance with workplace and manufacturers requirements and established safety rules and regulations, including pre-operational checking procedures, visual inspection procedures and warning systems checking procedures
- Problems that may occur during the routine inspection of a vehicle and appropriate actions and solutions
- Basic principles of operation of systems on commercial vehicles, including electrical systems, fuel systems, cooling systems, steering systems, exhaust systems, tyres, brakes
- Reporting and documentation requirements

Required skills:

- Communicate effectively with others during the routine inspection of a vehicle
- Read and interpret instructions, procedures, information and manuals relevant to the routine inspection of a vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the routine inspection of a vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others during the routine inspection of a vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that are identified during the routine inspection of a vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may occur during the routine inspection of a vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Use cleaning equipment
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation • As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Maintenance may be carried out in typical road transport situations, including:	• operations conducted at day or night • typical weather conditions • in confined spaces, exposed conditions and controlled or open environment • while in the a depot, base or warehouse • while in the vehicle on the road • while at a client's workplace
Type of vehicle may include any commercial road transport vehicles including:	• light vehicles • heavy vehicles • combination vehicles
Inspection may include:	• visual checks of vehicle • routine checks of vehicle systems • checks in accordance with a detailed inspection schedule
Routine checks may include:	• water levels • oil levels • air pressure in tyres • brakes • lights • condition of tyres • battery • exhaust system • suspension
Environmental hazards may include:	• leaking oil and fuel • defective or inappropriately adjusted exhaust systems • inappropriate disposal of vehicle fluids in drains or sewerage systems

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Information/records may include:	• workplace routine inspection procedures, checklists and instructions • relevant state/territory roads and traffic authority vehicle maintenance regulations • vehicle manufacturers instructions, specifications and recommended procedures • precautions and procedures to be adopted to protect the environment when inspecting, servicing and maintaining vehicles • OH&S procedures to be followed when inspecting vehicles
Applicable regulations and legislation may include:	• relevant state/territory roads and traffic authority vehicle maintenance regulations and requirements • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a light rigid vehicle safely including systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition, and performance and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to light rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial light rigid vehicle across a variety of driving contexts.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Drive the light rigid vehicle	1.1 The light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
	1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
	1.3 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.4 The light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
	1.5 The light rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
	1.6 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment, loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Performance and efficiency of vehicle operation is monitored during use
	3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Light rigid vehicle controls, instruments and indicators and their use
- Light rigid vehicle handling procedures
- Driving hazards and related defensive driving techniques
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Map reading and road navigation techniques including the use of a GPS device where applicable
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Workplace driving and operational instructions
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a commercial light rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a commercial light rigid vehicle

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a commercial light rigid vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a commercial light rigid vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a commercial light rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a commercial light rigid vehicle
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checkson the vehicle in the course of work activities

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	• all light rigid vehicles including trucks and buses greater than 4.5 tonnes or seating more than 12 adults including the driver
Driving may be carried out in typical road transport situations, including:	• operations conducted at day or night • typical weather conditions • on the open road

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• on a private road • while at a depot, base or warehouse • while at a client's workplace or work site
Vehicle handling procedures may include:	• starting a vehicle • steering and manoeuvring a vehicle • accelerating and braking • positioning and stopping a vehicle • reversing a vehicle • operating vehicle controls, instruments and indicators • using defensive driving techniques • managing engine performance
Pre-operational checks may include:	• visual check of vehicle • checking and topping up of fluid levels • checks of tyre pressures • checks of operation of vehicle lights and indicators • checks of brakes
Minor routine repairs may include:	• replacement of blown globes in vehicle lights • replacement of broken fan belt • replacement of blown fuse • replacement of door mirrors • repairs to rear tail-light lens • changing of tyres • repair of tyre punctures • replacement of broken coolant hose
Driving hazards may include (examples only):	• wet and iced roads • oil on road • animals and objects on road • fire in vehicle • leaking fuel • faulty brakes • parked vehicles on the road • faulty steering mechanism on vehicle • pedestrians crossing the road • flooded sections of road • windy sections of road • foggy conditions
Factors that can cause traffic delays and diversions may include (examples only):	• traffic accidents • flooded sections of road • road damage • bridge/tunnel damage

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• road works • building construction • emergency situations such as bushfires, building fires, etc. • road closures for special events such as marches, parades, etc. • holiday traffic • road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Documentation/records may include:	• state/territory light rigid vehicle driving licence requirements • state/territory road rules • workplace driving instructions and procedures • vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle • emergency procedures • vehicle log book or record book (where required)
Applicable procedures and codes may include:	• relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to light rigid vehicles • relevant state/territory road rules • relevant state/territory permit regulations and requirements • relevant state/territory OH&S legislation • relevant state/territory fatigue management regulations • relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a four wheel drive vehicle safely in a range of conditions. These include driving a four wheel drive vehicle on normal roads, traversing slopes, ascending and descending steep slopes and stall recovery. It also includes operation of the vehicle in rugged terrain, the use of a jack and the completion of all pre- and post-operational checks. Licensing, legislative, regulatory or certification requirements may be applicable to this unit. Provisional car licence must be held prior to the commencement of this unit of competency for driving on public land/roads.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of four wheel drive vehicle operating principles and procedures to maintain the safety and operation of a commercial four wheel drive vehicle across a variety of on-road and off-road contexts.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate four wheel drive vehicles on normal roads	1.1 Pre-start checks of vehicle and equipment are carried out to manufacturers specifications and roadworthy requirements 1.2 Tyres are checked for pressure suitable for terrain and/or changed in accordance with workplace procedures 1.3 Loads are secured in accordance with workplace and legislative requirements 1.4 Vehicle is driven on-road and off-road to legislative and workplace requirements, at appropriate speeds for conditions and hazards 1.5 Vehicle is parked and shut down in accordance with workplace and manufacturers requirements
2 Operate vehicle on, or across, a slope	2.1 Pre-start checks of vehicle and equipment are carried out to manufacturers specifications and roadworthy requirements 2.2 Tyres are checked for pressure suitable for terrain and/or changed to operational guidelines 2.3 Loads are secured in accordance with workplace and legislative requirements 2.4 Vehicle is driven on-road and off-road to regulatory and workplace requirements at appropriate speeds for conditions and hazards
3 Operate vehicle ascending a steep slope	3.1 Intended vehicle path is inspected prior to negotiation of slope

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
including stall recovery	3.2 Appropriate gear is selected to ascend grade, and engine revolutions are maintained to ensure constant traction 3.3 Air-conditioning unit is turned off to avoid engine acceleration 3.4 Foot brake is applied as vehicle stalls, handbrake applied and ignition turned off 3.5 Clutch is depressed and reverse gear is selected 3.6 Clutch is released and handbrake is slowly released 3.7 Ignition is turned on and brakes are released 3.8 Vehicle is started and allowed to reverse down the slope 3.9 Brakes are applied as necessary to control descent
4 Operate vehicle descending a steep slope including stall recovery	4.1 Intended vehicle path is inspected prior to negotiation of the slope 4.2 Appropriate gear is selected to ascend grade, and engine revolutions are maintained to ensure constant traction 4.3 Air-conditioning unit is turned off to avoid engine acceleration 4.4 Braking is used to control descent and skidding is avoided by the application of brakes to emulate ABS 4.5 Ignition is turned off, foot brake is applied, and handbrake engaged 4.6 Clutch is depressed and low gear is selected 4.7 Clutch is released and handbrake is slowly released 4.8 Ignition is turned on and brakes are released 4.9 Vehicle is started and allowed to continue down the slope 4.10 Brakes are applied as necessary to control descent and skids are steered into
5 Operate vehicle in rugged terrain	5.1 Intended vehicle path is inspected prior to negotiation of rugged terrain 5.2 Correct gear/range is selected to negotiate terrain 5.3 Freewheel hubs are engaged and disengaged in accordance with driving conditions 5.4 Vehicle controls are set in accordance with manufacturers instructions for operation in the surrounding terrain 5.5 Traction is maintained in accordance with requirements of the vehicle and the surrounding terrain 5.6 Selection of appropriate gear/range before negotiating terrain is demonstrated 5.7 Where necessary, chains are fitted to vehicle in accordance with manufacturers instructions 5.8 Vehicle load is inspected, positioned and secured to maximise traction for four wheel driving 5.9 Terrain is negotiated in accordance with requirements for

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	specific driving conditions
6 Operate jack	6.1 Jack is located under vehicle in accordance with vehicle manufacturers specifications and workplace procedures
	6.2 Jack is used and operated in accordance with manufacturers specifications and workplace procedures
7 Complete operations	7.1 Vehicle is parked and shut down to workplace and manufacturers requirements
	7.2 Faults or malfunctions are corrected and/or reported in accordance with workplace requirements
	7.3 Vehicle and equipment are cleaned and stored after use in accordance with workplace requirements
	7.4 Any reports required by the workplace are completed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Workplace procedures for the operation of four wheel drive vehicle in both on-road and off-road situations
- Problems that may occur when operating a four wheel drive vehicle, and action that can be taken to report or resolve the problems
- Hazards that may exist when operating a four wheel drive vehicle in both on-road and off-road situations, and ways of controlling the risks involved
- Vehicle controls, instruments and indicators and their use
- Vehicle handling procedures and techniques for a range of conditions, including rock, mud, sand, ice and snow
- Procedures to be followed in the event of a driving emergency
- Efficient driving techniques and safe driving strategies
- The effect on the centre of gravity of changing fluid loads
- Hazards and risks associated with traversing cross slopes
- Effects of hard surface driving (such as highway wind up) on the 4x4 system

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED KNOWLEDGE AND SKILLS

- The appropriate use of diff locks
- Pre- and post-operational checks and related action
- Documentation and record keeping requirements
- Environmental impact of 4X4 driving

Required skills:

- Communicate effectively with others when operating a four wheel drive vehicle
- Read and interpret instructions, procedures, information and signs relevant to the operation of a four wheel drive vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a four wheel drive vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when operating a four wheel drive vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected situations that may arise when operating a four wheel drive vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of four wheel drive vehicle and its equipment, and take appropriate action if required
- Conduct pre-start checks
- Monitor and anticipate traffic hazards and take appropriate action
- Drive vehicles in a range of conditions

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Demonstrate emergency procedures in the operation of vehicles
- Identify and correct minor operational faults
- Clean and store vehicles and equipment
- Skills and attitude to reduce environmental impact

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
	  • applying the underpinning knowledge and skills
	  • demonstrating operation of a 4x4 vehicle
	  • applying relevant legislation and workplace procedures

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• As a minimum, assessment of knowledge must be conducted through appropriate assessments using written/practical/oral assessments • Practical assessment must occur:

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

- through activities in an appropriately simulated environment, and/or
- in an appropriate range of situations in the workplace

- A simulator/online assessment is not suitable for the final assessment of this unit of competency

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Vehicles include:	• all terrain vehicles • cars and utilities • a range of trailers • light trucks
Operations may be carried out in typical four wheel drive situations, including:	• by day or night • typical weather conditions • on the open road • in rugged terrain off-road conditions that can be smooth, rough, uneven, slippery, boggy, sandy, steep or hilly • on a steep slope • during emergency response • while at a client's workplace or worksite
Vehicle handling procedures may include:	• starting a vehicle • steering and manoeuvring a vehicle • accelerating and braking • positioning and stopping a vehicle • reversing a vehicle • operating vehicle controls, instruments and indicators • using defensive driving techniques • managing engine performance
Considerations when driving may include:	• operational characteristics of the type of four wheel drive vehicle • workplace procedures • traffic conditions • levels of emergency response • adverse weather

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• traffic regulations • warning devices • adverse terrain
Traffic conditions to be taken into account when driving may include:	• speed limits for operation • legal parking • traffic pattern and density • known peak periods and special community functions • effects of weather on roads • road surface/off-road terrain • visibility
Operational hazards may include:	• steep slopes and rugged terrain • wet and iced road/terrain • flooded road/terrain • oil on road • fire in vehicle • leaking fuel • faulty brakes • parked vehicles on the road • faulty steering mechanism on vehicle • pedestrians crossing the road • animals and objects on road • windy or foggy sections of road/terrain
Workplace guidelines/procedures may include:	• pre- and post-operation checks • standards of operation • storage and usage of fuels and lubricants • policies and routines relating to wear and damage • precautions and safeguards • emergency response driving • driving in adverse terrain • driving in special environments • reporting routines
Pre-start checks may include:	• fuel, water, oil • brake and transmission fluid levels • battery water levels and electrolyte checks • tyres • belts • leads • hydraulic lines and connections • air cleaners • air-conditioners

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• brakes • off-road safety equipment in line with manufacturers recommendations
Manufacturers specifications may include:	• engine characteristics • systems warning function • four wheel drive operation • radius of turning circle • safety procedures
Installed devices may include:	• warning lights • tachometer • temperature gauge • electrical charging • ancillary systems indicator • speedometer • oil pressure • brake warning lights • audible warning devices • hose
Minor routine servicing may include:	• the replacement of blown globes in vehicle lights • replacement of broken fan belt • replacement of blown fuse • door mirrors • repairs to rear tail-light lens • changing of tyres • repair of tyre punctures • replacement of broken coolant
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Documentation/records may include:	• state/territory driving licence requirements • state/territory road rules • workplace driving instructions and procedures • vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle • emergency procedures • vehicle log book or record book (where required)
Applicable regulations, legislation	• relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to the

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Drive the medium rigid vehicle	1.1 The medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
	1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
	1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective transmission use
	1.4 Braking system of medium rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions
	1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.6 The medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
	1.7 The medium rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
	1.8 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people

	or damage to property, equipment, loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Performance and efficiency of vehicle operation is monitored during use
	3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority
	3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Medium rigid vehicle controls, instruments and indicators and their use
- Medium rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Workplace driving and operational instructions
- Driving hazards and related defensive driving techniques
- Pre-operational checks carried out on vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Principles of stress management when driving a vehicle
- Map reading and road navigation techniques including the use of a GPS device where applicable
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents

REQUIRED KNOWLEDGE AND SKILLS

- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a medium rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to work activities
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a medium rigid vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a medium rigid vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a medium rigid vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of equipment
- Monitor and anticipate traffic hazards and take appropriate action
- Carry out pre-operational checks on a medium rigid vehicle
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

© Commonwealth of Australia, 2025 Powering Skills Organisation

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	• all medium rigid vehicles, for example any 2-axle rigid vehicle, including truck and bus greater than 8 tonnes GVM
Driving may be carried out in typical road transport situations, including:	• operations conducted at day or night • typical weather conditions • on the open road • on a private road • while at a depot, base or warehouse • while at a client's workplace or work site
Vehicle handling procedures may include:	• starting a vehicle • steering and manoeuvring a vehicle • accelerating and braking • positioning and stopping a vehicle • reversing a vehicle • operating vehicle controls, instruments and indicators • using air brakes • using defensive driving techniques • managing engine performance
Pre-operational checks may include:	• visual check of vehicle • checking and topping up of fluid levels • checks of tyre pressures • checks of operation of vehicle lights and indicators • checks of brakes
Minor routine repairs may include:	• replacement of blown globes in vehicle lights • replacement of broken fan belt • replacement of blown fuse • replacement of door mirrors • repairs to rear tail-light lens • changing of tyres • repair of tyre punctures • replacement of broken coolant hose
Driving hazards may include (examples only):	• wet and iced roads • oil on road • animals and objects on road • fire in vehicle • leaking fuel

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• faulty brakes • parked vehicles on the road • faulty steering mechanism on vehicle • pedestrians crossing the road • flooded sections of road • windy sections of road • foggy conditions
Factors that can cause traffic delays and diversions may include:	• traffic accidents • flooded sections of road • road damage • bridge/tunnel damage • road works • building construction • emergency situations such as bushfires, building fires, etc. • road closures for special events such as marches, parades, etc. • holiday traffic • road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Documentation/records may include:	• state/territory medium rigid vehicle driving licence requirements • state/territory road rules • workplace driving instructions and procedures • vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle • emergency procedures • vehicle log book or record book (where required)
Applicable procedures and codes may include:	• relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to medium rigid vehicles • relevant state/territory road rules • relevant state/territory permit regulations and requirements • relevant state/territory OH&S legislation • relevant state/territory fatigue management regulations • relevant state/territory environmental protection legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to drive a heavy rigid vehicle safely including systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance, and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to heavy rigid vehicles.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial heavy rigid vehicle across a variety of driving contexts.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Drive the heavy rigid vehicle	1.1 The heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions
	1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective gear selection and smooth transition in gear changes
	1.4 Braking system of heavy rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions
	1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
	1.6 The heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning.
	1.7 The heavy rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures
	1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements
	1.9 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Performance and efficiency of vehicle operation is monitored during use
	3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority
	3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy rigid vehicle controls, instruments and indicators and their use
- Heavy rigid vehicle handling procedures
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on heavy rigid vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Workplace driving and operational instructions
- Driving hazards and related defensive driving techniques
- Principles of stress management when driving a vehicle
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies and on-road techniques

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED KNOWLEDGE AND SKILLS

- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a commercial heavy rigid vehicle
- Read and interpret instructions, procedures, information and signs relevant to when the driving of a commercial heavy rigid vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a commercial heavy rigid vehicle
- Work collaboratively with others when driving a commercial heavy rigid vehicle
- Operate electronic communication equipment to required protocol
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a commercial heavy rigid vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a commercial heavy rigid vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of the vehicle and its equipment and take appropriate action where required
- Carry out pre-operational checks in the course of work activities

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	• all heavy rigid vehicles, for example any rigid vehicle with 3 or more axles, including trucks or buses, greater than 8 tonnes GVM
Driving may be carried out in typical road transport situations, including:	• operations conducted at day or night • typical weather conditions • on the open road • on a private road • while at a depot, base or warehouse • while at a client's workplace or work site
Vehicle handling procedures may include:	• starting a vehicle • steering and manoeuvring a vehicle • accelerating and braking • positioning and stopping a vehicle • reversing a vehicle • operating vehicle controls, instruments and indicators • using air brakes • using defensive driving techniques • managing engine performance
Pre-operational checks may include:	• visual check of vehicle • checking and topping up of fluid levels • checks of tyre pressures • checks of operation of vehicle lights and indicators • checks of brakes
Minor routine repairs may include:	• replacement of blown globes in vehicle lights • replacement of broken fan belt • replacement of blown fuse • replacement of door mirrors • repairs to rear tail-light lens • changing of tyres • repair of tyre punctures • replacement of broken coolant hose
Driving hazards may include (examples only):	• wet and iced roads • oil on road • animals and objects on road • fire in vehicle • leaking fuel • faulty brakes

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• parked vehicles on the road • faulty steering mechanism on vehicle • pedestrians crossing the road • flooded sections of road • windy sections of road • foggy conditions • work site hazards including power and service lines, buildings, structures, facilities, underground services, uneven or unstable ground and recently filled trenches, stationary and moving machinery and equipment, hazardous or dangerous materials, noise, light, energy sources, and obstructions
Factors that can cause traffic delays and diversions may include:	• traffic accidents • flooded sections of road • road damage • bridge/tunnel damage • road works • building construction • emergency situations such as bushfires, building fires, etc. • road closures for special events such as marches, parades, sporting events, etc. • holiday traffic • road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Documentation/records may include:	• state/territory heavy rigid vehicle driving licence and permit requirements • state/territory road rules • workplace driving instructions and procedures • vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle • emergency procedures • vehicle log book or record book (where required) • relevant standards and certification requirements • quality assurance procedures
Applicable procedures and codes may include:	• relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to

3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Prime mover and trailer are aligned and coupled in accordance with manufacturers instructions and workplace procedures
	3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
	3.4 Performance and efficiency of vehicle operation is monitored during use
	3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority
	3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Heavy combination vehicle controls, instruments and indicators and their use
- Heavy combination vehicle handling procedures
- Workplace driving and operational instructions
- Procedures to be followed in the event of a driving emergency
- Engine power management and safe driving strategies

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED KNOWLEDGE AND SKILLS

- Efficient driving techniques
- Pre-operational checks carried out on heavy combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques
- Map reading and navigation of the vehicle and related action
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a heavy combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a heavy combination vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a heavy combination vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a heavy combination vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a heavy combination vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when driving a heavy combination vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Apply map reading and road navigation techniques to the operation of a heavy combination vehicle
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required
- Check and replenish fluids and carry out lubrication processes in the course of work activities

	conditions, road standards and other factors likely to cause delays or route deviations
	2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
3 Monitor and maintain vehicle performance	3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
	3.2 Prime mover, dollies and trailer are aligned and coupled in proper sequence in accordance with manufacturers instructions and workplace procedures
	3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
	3.4 Performance and efficiency of vehicle operation is monitored during use
	3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority
	3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority
- Relevant OH&S and environmental procedures and regulations
- Multi-combination vehicle controls, instruments and indicators and their use
- Multi-combination vehicle handling procedures
- Workplace driving and operational instructions
- Engine power management and safe driving strategies
- Efficient driving techniques
- Pre-operational checks carried out on multi-combination vehicle and related action
- Differences between transmission types
- Principles of operation of air brakes and procedures for their use
- Driving hazards and related defensive driving techniques

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED KNOWLEDGE AND SKILLS

- Map reading and road navigation techniques
- Factors which may cause traffic delays and diversions and related action that can be taken by a driver
- Principles of stress management when driving a vehicle
- Causes and effects of fatigue on drivers
- Factors which increase fatigue-related accidents
- Fatigue management strategies including on-road techniques
- Lifestyles which promote the effective long-term management of fatigue

Required skills:

- Communicate effectively with others when driving a multi-combination vehicle
- Read and interpret instructions, procedures, information and signs relevant to the driving of a multi-combination vehicle
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the driving of a multi-combination vehicle
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when driving a multi-combination vehicle
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a multi-combination vehicle in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when driving a multi-combination vehicle
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a multi-combination vehicle
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
	  • the underpinning knowledge and skills
	  • relevant legislation and workplace procedures
	  • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation • As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests • Practical assessment must occur: • through activities in an appropriately simulated

TLIC4067A Operate LP gas tanker

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to operate an LP gas tanker.

Licensing, legislative, regulatory and certification requirements are applicable to this unit.

Application of the Unit

An LP gas tanker must be operated in compliance with the licence requirements and regulations of the relevant state and territory roads and traffic authority pertaining to heavy vehicles.

An LP gas tanker is operated with limited or minimum supervision, with accountability and responsibility for self and others in achieving the prescribed outcomes.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Prerequisite Unit TLILIC3013A Preparation to transport dangerous goods by road

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the required performance needed

essential outcomes of a unit of competency.	to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Recognise the characteristics of LP gas and LP gas tankers to ensure the safe transfer and transport of LP gas	1.1 Properties of the LP gas being transported are identified in accordance with emergency response documentation 1.2 Hazards associated with the transport of LP gas are clarified in accordance with emergency response documentation 1.3 Hazardous atmosphere zones are determined in accordance with organisational requirements 1.4 Functions of equipment fitted to an LP gas tanker are identified 1.5 Factors that cause static electricity are identified
Comply with legislative and organisational requirements for safe transfer and transport of LP gas	2.1 UN number, product class, its packaging group and any sub-risks of the LP gas being transported are identified in accordance with emergency response documentation 2.2 Requirements for the LP gas being transported are identified in accordance with the current Australian Dangerous Goods (ADG) Code and legislative requirements
Conduct pre-trip inspection	3.1 Tanker is checked to ensure Dangerous Goods (DG) compliance plate is attached to the tanker in accordance with current ADG Code requirements 3.2 Tanker load transfer equipment is checked to confirm security and state of repair, and that all hoses are tested and tagged in accordance with current ADG Code requirements 3.3 Tanker is checked to ensure safety equipment is accessible, properly maintained, and stowed and secured in accordance with current ADG Code requirements 3.4 Tanker is checked to ensure personal protective equipment (PPE) is available, ready for use and meets current ADG Code requirements 3.5 Tanker is checked to ensure dangerous goods placards are correct for the load and displayed in accordance with current ADG Code requirements 3.6 Fire extinguisher is checked for current date and pressure gauge

© Commonwealth of Australia, 2025 Powering Skills Organisation

	3.7 Shipping documentation is checked for accuracy and carried with emergency information in accordance with current ADG Code requirements
	3.8 Non-compliant vehicles and equipment are reported in accordance with organisational procedures
Supervise loading	4.1 Tanker is driven into the loading site in accordance with site procedures
	4.2 Tanker is positioned to enable loading to be carried out in accordance with site procedures without injury to people or damage to property
	4.3 Park brake is applied, engine turned off and, where applicable, battery is isolated
	4.4 PPE is used in accordance with site and organisational procedures
	4.5 Transfer equipment is checked for compatibility
	4.6 Loading activities are controlled within level of responsibility
	4.7 Emergency procedures are followed in the event of a spill or leak during loading
	4.8 Strategies to minimise risks associated with static electricity are employed in accordance with organisational requirements
Transport load to a customer site	5.1 Routes are planned to maximise efficiency between delivery sites
	5.2 Any planned or prescribed routes are followed in accordance with regulatory and organisational requirements
	5.3 Tanker is driven and manoeuvred in accordance with legal requirements, taking into consideration eco-driving techniques and exhibiting courtesy and professionalism toward other road users
	5.4 Action is taken to deal with traffic delays and diversions
	5.5 Legislative and organisational procedures are adhered to in driving, parking and leaving the tanker standing, or in the event of the tanker breaking down or stopping on a road
Prepare site to accept delivery	6.1 Pre-delivery assessment is made before entering the delivery site
	6.2 Site features that present a hazard and/or prevent delivery are rectified or reported in accordance with organisational requirements
	6.3 Any site instructions and/or restrictions are complied with
	6.4 Tanker is manoeuvred and positioned to ensure product can be

© Commonwealth of Australia, 2025 Powering Skills Organisation

	delivered safely and efficiently
	6.5 Park brake is applied, engine turned off and, where applicable, battery is isolated
	6.6 PPE is used in accordance with site and organisational procedures and steps are taken to apply personal safety measures and manage potential hazards
	6.7 Delivery site is marked with signs and/or cones
Manage the delivery	7.1 Receiving vessel and components are checked for damage
	7.2 Contents are checked to ensure sufficient ullage exists for delivery
	7.3 Product type and quantity are confirmed against delivery documents
	7.4 Pressure gauges, valves, hoses and connections are checked for serviceability and leaks
	7.5 Product is delivered in accordance with organisational and site procedures and special delivery instructions are observed
	7.6 Emergency procedures are followed in the event of a leak during delivery
	7.7 Strategies to minimise risks associated with static electricity are employed in accordance with organisational requirements
Complete post-delivery operations	8.1 Product transfer equipment is disconnected in accordance with product type and organisational procedures
	8.2 Site is secured and restored to a clean and tidy condition in accordance with site procedures
	8.3 Delivery documentation is completed in accordance with organisational procedures
	8.4 Shipping documentation is amended to reflect changes in vehicle load
	8.5 Pre-departure inspection of tanker is conducted in accordance with organisational procedures
	8.6 Tanker is driven safely from site in accordance with site procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

Follow procedures in emergencies	9.1 Incident is reported to police or fire services as soon as possible 9.2 Incident is reported to nominated person as soon as practicable in accordance with emergency plan 9.3 Reasonable assistance with load content is provided to authorised officer and emergency management supervisor (EMS) 9.4 Warnings are provided to other vehicles and persons in the vicinity who may be at risk 9.5 Escape of gas is prevented or minimised 9.6 Incident is reported in accordance within legislative requirements or as nominated in emergency plan

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills required at the completion of this unit.

Required knowledge:

- Relevant road rules, regulations, permit and licence requirements of the relevant state and territory roads and traffic authority
- Relevant OH&S and environmental procedures and regulations relating to LP gas tanker operations
- Relevant dangerous goods information pertaining to the operation of an LP gas tanker
- Procedures to be followed in the event of a driving emergency and in response to an emergency using a company transport emergency response plan (TERP)
- Workplace driving and operational instructions
- Efficient driving techniques and eco-driving considerations
- Safe delivery of LP gas to a customer site
- Factors that may cause traffic delays and diversions and related action that can be taken
- Techniques and procedures for loading and unloading an LP gas tanker safely
- Factors involved in trip preparation
- Workplace documentation

Required skills:

- Communicate effectively with others operating an LP gas tanker
- Read and interpret instructions, procedures, information and signs relevant to operating an

© Commonwealth of Australia, 2025 Powering Skills Organisation

LP gas tanker
- Interpret and follow operational instructions and prioritise work
- Complete documentation relating to operating an LP gas tanker
- Work collaboratively with others when operating an LP gas tanker
- Adapt appropriately to cultural differences in the workplace and customer sites, including modes of behaviour and interaction with others
- Implement contingency plans for unexpected events when operating an LP gas tanker
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when operating an LP gas tanker
- Monitor and anticipate traffic hazards and take appropriate action
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required PPE, conforming to industry and OH&S standards
- Monitor performance of vehicle, its trailers and its equipment, and take appropriate action where required
- Service tanker ancillary equipment in terms of maintenance schedule and standard operating procedures
- Identify volume of goods
- Make accurate estimates in a range of situations

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - applying techniques for loading and unloading an LP gas tanker
  - applying correct placarding for the product being loaded

© Commonwealth of Australia, 2025 Powering Skills Organisation

- identifying the required PPE for the product being transported
- identifying eco-driving techniques when operating an LP gas tanker
- understanding relevant legislation and workplace procedures for transporting LP gas
- understanding customer requirements when delivering LP gas to a customer's site

Context of and specific resources for assessment

- Access is required to:
  - relevant and appropriate materials and equipment to meet the performance criteria
  - applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Practical assessment must occur:
  - in three different aspects of the job function in the workplace or as it would apply in the workplace.
- A simulator is not suitable for final assessment of this unit of competency

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Properties and hazards of LP gas include:

- effect of heat and pressure on the LP gas when stored in a container
- causes of a boiling liquid expanding vapour explosion (BLEVE)
- characteristics of the LP gas in a leak, fire situation, or in the presence of static electricity
- density
- odour
- expansion rates
- upper and lower explosive limits

Equipment fitted to an LP gas tanker includes:

- emergency information holder
- eyewash facility
- fire extinguishers
- emergency shutdown controls
- fire alarm

© Commonwealth of Australia, 2025 Powering Skills Organisation

	• deluge system • evacuation procedures
LP gas tanker vehicle includes:	• B-Double • B-Triple • AAB-Quad
Loading and unloading site may include:	• refinery • customer site • depot
Personal safety measures include:	• manual-lifting techniques • three points of contact when using ladders • correct use of walkways • safety glasses • safety footwear • high visibility clothing • hearing protection
Product transfer equipment includes:	• external piping and fittings • bonding devices • pressure vessels • master switch • valves • warning devices • brake interlock • pressure and ullage gauges
Eco driving includes:	• observing speed limits • ensuring transmission control • using auxiliary braking systems
Factors that can cause traffic delays and diversions may include:	• traffic accidents • flooded sections of road • road damage • bridge or tunnel damage • road works • building construction • emergency situations, such as bushfires • livestock movement • holiday traffic • road closures for utility works, such as electricity, water, sewerage, telecommunications and LP gas
Depending on the type of organisation concerned and the local terminology used, workplace	• company procedures • enterprise procedures • organisational procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

procedures may include:	• established procedures
Documentation and records may include:	• state and territory heavy vehicle driving licence or permit requirements • state and territory road rules • workplace driving instructions and procedures • vehicle manufacturer instructions, specifications and recommended driving procedures, including pre-operational checks of vehicle • emergency procedures • TERP • vehicle work diaries or record books

Applicable procedures and codes may include:	• relevant state and territory:
	  • roads and traffic authority driving regulations and licence or permit requirements pertaining to operating heavy vehicles on unsealed roads
	  • road rules
	  • OH&S legislation
	  • fatigue management regulations
	  • environmental protection legislation

TLID2003A Handle dangerous goods/hazardous substances

Modification History

Release 2. This is the second release of this unit in the TLI10 Transport and Logistics Training Package Version 4.0.

Minor change to Range Statement 'Requirements for work'.

This release is equivalent to the previous release.

Unit Descriptor

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances, including identifying requirements for working with dangerous goods and/or hazardous substances; confirming site incident procedures; and selecting handling techniques. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

This unit covers anyone working in the transport, warehousing, distribution and storage industries who may handle dangerous goods and/or hazardous substances.

Work must be carried out in compliance with the relevant OH&S regulations concerning the safe handling of dangerous goods and hazardous substances.

Work is performed under general supervision. It involves the application of the codes of practice and established procedures for the safe handling of dangerous goods and hazardous substances.

Licensing/Regulatory Information

Refer to Unit Descriptor.

Pre-Requisites

Nil.

Employability Skills Information

This unit contains employability skills.

© Commonwealth of Australia, 2025 Powering Skills Organisation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Identify requirements for working with dangerous goods and/or hazardous substances	1.1	Dangerous goods and/or hazardous substances are identified from information including class labels, manifests and other documentation
	1.2	Storage requirements for hazardous substances and/or dangerous goods are identified and applied
	1.3	Legislative requirements for hazardous substances and/or dangerous goods are known and used to plan work activities
	1.4	Handling procedures for different classes and characteristics of goods are observed
	1.5	Confirmation is sought from relevant personnel where dangerous goods or hazardous materials do not appear to be appropriately marked
2 Confirm site incident procedures	2.1	Incident reporting processes are identified
	2.2	Emergency equipment is located and checked according to workplace procedures and statutory regulations
	2.3	Emergency procedures are identified and confirmed
3 Select handling techniques	3.1	Load handling and shifting procedures are selected in accordance with identified requirements for particular goods
	3.2	Handling equipment is checked for conformity with workplace requirements and manufacturers guidelines
	3.3	Where relevant, suitable signage is checked for compliance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- All relevant regulations and codes concerning the handling of dangerous goods and hazardous substances
- Application of relevant aspects of current Australian Dangerous Goods Code and relevant Australian Standards
- Permit and licence requirements
- Workplace procedures for handling and storing dangerous goods/hazardous substances
- Problems that may arise during the handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve them
- Risks when handling dangerous goods and hazardous substances and related precautions to control the risk
- Equipment applications, capacities, configurations, safety hazards and control mechanisms
- Housekeeping standards procedures required in the workplace

Required skills:

- Communicate effectively with others when handling dangerous goods and hazardous substances
- Read and interpret instructions, procedures, regulations, information and signs relevant to the handling of dangerous goods and hazardous substances
- Identify containers and goods coding, markings and, where applicable, emergency information panels for the mode of transport storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when handling dangerous goods and hazardous substances
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when handling dangerous goods and hazardous substances in accordance with regulatory requirements and workplace procedures
- Plan own work including predicting consequences and identifying improvements
- Implement contingency plans for unanticipated situations that may arise when handling dangerous goods and hazardous substances
- Recognise hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during the handling of dangerous goods and hazardous substances
- Monitor work activities in terms of planned schedule

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of : • identifying dangerous goods/hazardous substances (from labels, IMDG markings, HAZCHEM signs and other relevant identification criteria) • identifying and selecting the safely requirements for handling dangerous goods/hazardous substances • maintaining workplace records and documentation • determining (any) required permits • identifying job and site hazards and planning work to minimise risks • selecting appropriate equipment and work systems including personal protection equipment • estimating weight and dimensions of load and any special requirements • identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
Context of and specific resources for assessment	Performance is demonstrated consistently over a period of time and in a suitable range of contexts. Resources for assessment include: • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or

© Commonwealth of Australia, 2025 Powering Skills Organisation

- access to an appropriate range of relevant operational situations in the workplace.

In both real and simulated environments, access is required to:

- relevant and appropriate materials and equipment, and
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation.

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests.

Practical assessment must occur:

- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The dangerous goods may be handled in a range of work environments by day or night and may be:	• for short-term storage • for long-term storage • in transit
Customers may be:	• internal or external
Workplace environment may include:	• movement of equipment • movement of goods • materials and vehicular traffic
Requirements for work may include:	• site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • incident breakdown procedures • authorities and permits • hours of operations • noise restrictions • additional gear and equipment • segregation procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• emergency procedures, including response to spillage/leaks, evacuation and firefighting
Hazards may include:	• hazardous or dangerous materials • contamination of, or from, materials being handled • noise, light, energy sources • stationary and moving machinery, parts or components • service lines • spills, leakages, ruptures • fire or ignition • dust/vapours
Hazard management is:	• consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Consultative processes may involve:	• other employees and supervisors • suppliers, potential customers and existing clients • representatives of regulatory authorities with jurisdiction over OH&S, dangerous goods and hazardous substances • management and union representatives • industrial relations and OH&S specialists • other maintenance, professional or technical staff
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Identification of goods may be from:	• material safety data sheets • packaging labels • manifests • stock lists • HAZCHEM interpretative advice
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • mask and respirator • protective clothing • breathing apparatus

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

Information/documents may include:	• goods identification numbers and codes • manifests, stock lists, packaging labels, bar codes, stock lists • goods and container identification • workplace procedures and policies concerning the handling of dangerous goods and hazardous substances • supplier and/or client instructions • material safety data sheets (MSDS) • current Australian Dangerous Goods Code • HAZCHEM interpretative advice • relevant legislation, codes, regulations and related documentation concerning the handling of dangerous goods and hazardous substances • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures pertaining to dangerous goods and hazardous substances

Applicable regulations and legislation may include:	• relevant Australian and state/territory regulations relating to the handling of dangerous goods and hazardous substances
	• current Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • IATA Dangerous Goods by Air regulations
	  • Australian and International Explosives Codes
	• all relevant Australian Standards
	• relevant state/territory OH&S legislation
	• workplace relations regulations
	• equal employment opportunity and affirmative action legislation
	• equal opportunity legislation
	• relevant state/territory environmental protection legislation

TLID2010A Operate a forklift

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check forklift condition	1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task
	1.2 Attachments are checked to ensure appropriate adjustment and operation
	1.3 Mirrors and seats are adjusted for safe operation by the driver
	1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive the forklift	2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions
	2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
	2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
	2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
	2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures
3 Operate a forklift to handle loads	3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected
	3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
4 Monitor site conditions	4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
5 Monitor and maintain forklift performance	5.1 Performance and efficiency of vehicle operation is monitored during use 5.2 Defective/irregular performance and malfunctions reported to relevant personnel 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant duty of care requirements pertaining to the operation of a forklift
- Relevant OH&S and environmental procedures and regulations
- Workplace operating procedures
- Forklift controls, instruments and indicators and their use
- Forklift handling procedures
- Procedures to be followed in the event of an operational emergency
- Engine power management and safe operating strategies
- Efficient driving techniques
- Operating hazards and related defensive driving and hazard control techniques
- Pre-operational checks carried out on forklift and related action
- Principles of stress management when driving a forklift
- Site layout and obstacles

Required skills:

- Communicate effectively with others when operating a forklift
- Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the operation of a forklift
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a forklift
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when operating a forklift
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- Monitor performance of forklift and its equipment and take appropriate action where required
- Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

demonstrate competency in this unit	requirements of the elements and performance criteria of this unit and include demonstration of applying: • the underpinning knowledge and skills • relevant legislation and workplace procedures • other relevant aspects of the range statement

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:	• counterbalance trucks • reach trucks • pallet trucks

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

Operations may be carried out in typical forklift operational situations, including:	• operations conducted at day or night • typical weather conditions • on the open road • on a private road or worksite • while at a workplace
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Loads to be shifted may require:	• special precautions
Loads to be shifted may be:	• irregularly shaped • packaged or unpackaged • labelled or unlabelled • palleted or unpalleted
Hazards in the work area may include exposure to:	• chemicals • dangerous or hazardous substances • movements of equipment, goods and materials
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Forklift handling procedures may include:	• starting a forklift • steering and manoeuvring a forklift • accelerating and braking • positioning and stopping a forklift • reversing a forklift • operating forklift controls, instruments and indicators • using defensive driving techniques • managing engine performance
Pre-operational checks may include:	• visual check of forklift • checking and topping up of fluid levels • checks of tyres • checks of operation of forklift lights and indicators • checks of brakes
Hazards may include (examples only):	• wet and iced operating surfaces • oil on operating surface

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• faulty brakes • workplace obstacles and other operational equipment and vehicles • damaged loads and pallets • other personnel in work area
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures
Personal protection equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes, including IMDG markings and HAZCHEM signs • manifests, bar codes, picking slips, merchandise transfers, stock requisitions, goods and container identification • Australian Standard 2359 - Industrial Truck Code • manufacturers specifications for forklift and associated equipment • operations and service record book or log • workplace procedures and policies for the operation of forklifts • supplier and/or client instructions • ADG Code and material safety data sheets • regulatory requirements concerning the use of forklifts • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures
Applicable procedures and codes may include:	• relevant state/territory regulations pertaining to the operation of forklifts • relevant codes and standards, including Australian Standard 2359 - Industrial Truck Code • relevant state/territory OH&S legislation • relevant state/territory fatigue management regulations • relevant state/territory environmental protection legislation

TLID2016A Load and unload explosives and dangerous goods

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to load and unload explosives and dangerous goods, including identifying explosives/dangerous goods; loading and unloading explosives/dangerous goods using appropriate equipment; securing and protecting the vehicle load; and checking the vehicle to ensure the load is secure and the vehicle is marked in accordance with regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant Australian and state/territory regulations including the current Australian Dangerous Goods (ADG) Code, the current Australian Explosives Code, and mass and loading regulations.

Work is performed under limited or minimum supervision. It involves the application of the basic principles, routine procedures and specific regulatory requirements to the loading and unloading of explosives and dangerous goods in a range of operational situations.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare to load and unload vehicle	1.1 Explosives and/or dangerous goods are identified and their characteristics taken into account when determining appropriate handling, loading and storage procedures including confirmation that the relevant emergency procedures are being carried out
	1.2 Compatibility of explosives and/or dangerous goods is taken into account when assembling and segregating cargo for loading
	1.3 Vehicle and/or loading equipment is checked to ensure it is suitable to handle/carry load
2 Load/unload vehicle	2.1 Vehicle is loaded/unloaded in accordance with workplace procedures and the current ADG/Australian Explosives Code as applicable
	2.2 The load is segregated according to class and subsidiary risk, and the distribution of the load is checked in accordance with workplace procedures, relevant mass and loading regulations and the current ADG/Australian Explosives Code as applicable
	2.3 Personal protective equipment is used during the loading/unloading operations as required for the type of dangerous goods/explosive concerned
	2.4 Emergency procedures are followed in the event of an incident or accident when loading or unloading explosives and/or dangerous goods
3 Secure and protect vehicle load	3.1 The vehicle load is secured using the correct load restraint and protection equipment for different loads, vehicles and carriage conditions concerned
	3.2 The load is protected in accordance with legal and workplace

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	safety requirements
	3.3 The distribution of the load is checked to ensure that it is even, legal and within the safe working capacity of the vehicle
	3.4 Vehicle is clearly marked/placarded to indicate the carriage of explosives and/or dangerous goods, in accordance with government regulations and company procedures
4 Check the vehicle	4.1 The loaded vehicle is inspected and checked to ensure that it is suitable to carry explosives and/or dangerous goods and the load weight and dimensions are within the vehicle's safe carrying capacity and equipment capability
	4.2 The loaded vehicle is checked to ensure that it can be safely parked and secured
	4.3 Dangerous goods declaration and all required transportation documentation for the cargo is completed in accordance with workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification, handling and marking of explosives and dangerous goods
- Relevant state/territory mass and loading regulations
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk
- Workplace procedures and policies for the loading and unloading of explosives and dangerous goods
- Characteristics of various classes of explosives and dangerous goods relevant to handling and transport
- Compatibility of various types of explosives and dangerous goods
- Housekeeping standards procedures required in the workplace
- Manual handling techniques and manually-operated load shifting equipment required for the loading, unloading and handling of explosives and dangerous goods
- Methods of securing a load on a vehicle
- Methods of placarding or marking a vehicle carrying explosives/dangerous goods

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Communicate effectively with others when loading, unloading and handling explosives and dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the loading, unloading and handling of explosives and dangerous goods
- Identify and interpret containers and goods coding, markings and, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to work activities
- Operate electronic communication equipment to required protocol
- Estimate the size, shape and special requirements of loads
- Work collaboratively with others when loading, unloading and handling explosives and dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events when loading, unloading and handling explosives and dangerous goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading, unloading and handling of explosives and dangerous goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Use manual handling techniques and operate manually-operated load shifting equipment when loading, unloading and handling explosives and dangerous goods
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - identifying load characteristics, loading equipment and related practices
  - identifying load label in accordance with identified classification and subsidiary risk information
  - identifying markings/placards for vehicle in accordance with relevant regulatory requirements
  - segregating, distributing and securing load for safe transport in accordance with regulations and current ADG/AEG Code requirements
  - safely loading and unloading explosives and dangerous goods in accordance with workplace procedures and current ADG/AEG Code requirements

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	• in a range of work environments and weather conditions • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• limited and restricted spaces • exposed conditions • controlled or open environments • a workplace, warehouse or depot • in a vehicle on the road • at a client's workplace
Goods/cargo to be loaded and unloaded may require:	• special precautions for handling and stacking
Classes of dangerous goods and explosives are:	• as defined in the respective Australian codes
Standard placarding, marking and signage for identified explosives and dangerous goods are:	• as required in the respective Australian codes, including HAZCHEM Codes
Personnel in the work area may include:	• workplace personnel • site visitors • contractors • official representatives
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• oral, aural or signed communications • company procedures • enterprise procedures • organisational procedures • established procedures
Loading operations may be carried out:	• manually • with the aid of lifting equipment and/or appliances
Load restraint procedures and equipment are:	• as specified in mass and loading regulations and guidelines and current ADG Code/Australian Explosives Code as applicable
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • two-way radios • high visibility clothing
Information/documents may include:	• goods identification numbers and codes, including current ADG Code and IMDG markings and HAZCHEM signs • relevant codes of practice, including the Australian Dangerous Goods Code, the Australian Explosives Code, the Industry Safety Code, and National Standards for Manual Handling • manifests, bar codes, goods and container identification/serial number • material safety data sheets • manufacturers specifications for equipment/tools • workplace procedures and policies for the loading and unloading of vehicles • supplier and/or client instructions • National Load Restraint Guide • Australian Truck Drivers Manual • award, enterprise bargaining agreement, other industrial arrangements • standards and certification requirements • quality assurance procedures • emergency procedures
Applicable regulations and legislation may include:	• Australian and state/territory mass and loading regulations • Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including: • Australian and International Dangerous Goods Codes

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

- Australian Marine Orders and the International Maritime Dangerous Goods Code
- IATA Dangerous Goods by Air regulations
- Australian and International Explosives Codes
- Code of Practice for the Safe Transport of Radioactive Substances
- state/territory legislation covering the safe handling of infectious substances

- relevant state/territory environmental protection legislation
- workplace relations regulations
- equal opportunity legislation
- equal employment opportunity and affirmative action legislation
- relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to identify and label explosives and dangerous goods, including assessing explosives/dangerous goods; handling explosives/dangerous goods in accordance with regulatory requirements; labelling explosives/dangerous goods in accordance with regulatory requirements; and complying with all required documentation. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulatory requirements of the relevant Australian state/territory authorities concerned with the carriage of explosives and dangerous goods including the current Australian Dangerous Goods and Australian Explosives Codes.

Work is performed under limited or minimum supervision. It involves the application of standard procedures and regulatory requirements for the identification and labelling of explosives and dangerous goods.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess explosives/dangerous goods	1.1 Load is checked for explosives/dangerous goods in accordance with the relevant codes and government regulations
	1.2 Types of explosives/dangerous goods are identified from labels, DG declarations and placarding in accordance with workplace procedures, and all required action is taken to ensure compliance with relevant government regulations and ADG/Australian Explosives Codes as applicable
	1.3 Hazards posed by load are identified from labels and material safety data sheets (MSDS)
2 Handle explosives/dangerous goods	2.1 Identified explosives/dangerous goods are handled and loaded/unloaded in accordance with regulatory requirements, codes, National Load Restraint Guide, and employer policy
	2.2 Appropriate personal protective equipment is used when handling explosives/dangerous goods in accordance with class, subsidiary risk and MSDS information
	2.3 Handling of different types of load takes into account the identified hazards posed by the explosives/dangerous goods concerned
	2.4 When loading/storing explosives/dangerous goods, segregation procedures are followed according to the class and subsidiary risk information
3 Label explosives/dangerous goods	3.1 All packages/containers are labelled with the class and subsidiary risk in accordance with current ADG/Australian Explosives Codes as applicable
	3.2 A dangerous goods declaration is included with manifest and other shipping documents

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	3.3 Vehicles carrying explosives and/or dangerous goods are placarded in accordance with current ADG/Australian Explosives Codes as applicable
4 Complete documentation	4.1 All required transport documents are completed in accordance with current ADG/Australian Explosives Codes as applicable

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant Australian and state/territory regulations and codes pertaining to the identification and labelling of explosives and dangerous goods including the current ADG and Australian Explosives Codes
- OH&S procedures and guidelines concerning the lifting and movement of loads
- Risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk
- Workplace procedures and policies for the identification and labelling of explosives and dangerous goods
- Characteristics of explosives and dangerous goods relevant to handling and transport
- Compatibility of various types of explosives and dangerous goods
- Site layout and obstacles
- Housekeeping standards procedures required in the workplace

Required skills:

- Communicate effectively with others when loading, unloading and handling explosives and dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the loading, unloading and handling of explosives and dangerous goods
- Interpret material safety data sheets, containers and goods coding, markings and other information describing explosives and dangerous goods including, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the loading, unloading and handling of explosives and dangerous goods

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Correctly mark/label explosives and dangerous goods
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when loading, unloading and handling explosives and dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when loading, unloading and handling explosives and dangerous goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when loading, unloading and handling explosives and dangerous goods
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading, unloading and handling of explosives and dangerous goods
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit	• The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of: • identifying explosives and dangerous goods from labels in accordance with regulatory requirements and practices

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

	• handling explosives and dangerous goods according to regulatory requirements, codes, National Load Restraint Guide and employer policy as appropriate • locating, interpreting and applying relevant codes and regulations • indentifying the hazards from labels of explosives and dangerous goods • identifying the personal protective equipment required when handling explosives and dangerous goods • maintaining workplace records for the explosives and dangerous goods

Context of and specific resources for assessment	• Performance is demonstrated consistently over a period of time and in a suitable range of contexts
	• Resources for assessment include:
	  • a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
	  • access to an appropriate range of relevant operational situations in the workplace
	• In both real and simulated environments, access is required to:
	  • relevant and appropriate materials and equipment, and
	  • applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment	• Assessment of this unit must be undertaken by a registered training organisation
	• As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
	• Practical assessment must occur:
	  • through activities in an appropriately simulated environment at the registered training organisation, and/or
	  • in an appropriate range of situations in the workplace

TLID3023A Use specialised liquid bulk gas transfer equipment

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to use specialised bulk gas transfer equipment including planning the work; transferring the gas according to regulatory and operational requirements; monitoring and operating controls; and completing all operations, as required. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the ADG Code and relevant state/territory regulations concerning the use of specialised equipment for the transfer of liquid bulk gas.

Work is performed under general supervision. It involves the application of basic principles, routine procedures and regulatory requirements to the use of specialised bulk transfer equipment to load and unload liquid bulk gas.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan work	1.1 Gas transfer method is identified for loading and unloading as liquefied or gaseous state
	1.2 Precautions are undertaken to eliminate all ignition sources
	1.3 Specialised handling requirements for the particular gas are identified and relevant procedures are taken into account when planning the work
	1.4 Traffic flow, vehicle positioning and work area conditions are assessed to ensure safe operation and no injury to people, or damage to equipment, loads or facilities
	1.5 Characteristics of the gas, transfer and holding method are taken into account when evaluating procedural requirements, special precautions for method, equipment and, where applicable, appropriate attachments to transfer the load
	1.6 Any potential occurrences in the work area that may affect the safety and efficiency of operations are reported to the appropriate personnel
	1.7 Gas transfer is planned, taking into account the requirements of the load, transfer method, storage facility and transport mode, load weight, volume and viscosity and the capacity of the equipment
	1.8 Load is checked prior to and at the completion of transfer to ensure ullage and/or maximum permitted capacity complies with ADG Code
	1.9 Adjustments are made to process to accommodate special requirements such as temperature control, combustion, etc.
	1.10 Required personal protective equipment, signage, barriers and special precautions are identified in the plan and utilised
	1.11 Procedures to deal with leakages and ruptures are identified
2 Transfer material	2.1 Equipment is prepared and any appropriate attachment fitted
	2.2 Equipment controls are checked for correct operational status

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	before commencing transfer
	2.3 Instruments and gauges are monitored during operations to ensure that operation is within manufacturers specifications and enterprise schedule and safety requirements
	2.4 Speed of operation is managed for safety and efficiency of materials movement and equipment operations
	2.5 Any faults or damage to equipment are immediately reported to the appropriate personnel
3 Monitor and operate controls	3.1 Equipment controls are monitored and operated in accordance with manufacturers operating instructions
	3.2 Control systems are monitored in accordance with statutory authority regulations, manufacturers guidelines and site operating procedures
	3.3 Gas is transferred ensuring no injury to personnel or damage to equipment or goods
	3.4 Faults are identified and reported in accordance with enterprise guidelines
4 Complete operations	4.1 Equipment is shut down within manufacturers guidelines without injury to personnel or damage to equipment, loads or facilities in accordance with enterprise procedures
	4.2 Clean up methods for transfer equipment are completed following workplace procedures
	4.3 Equipment is secured in accordance with securing procedures for the appropriate equipment
	4.4 Workplace documentation is completed and filed following enterprise procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Australian Dangerous Goods Code and relevant state/territory mass and loading regulations as they apply to vehicles transporting liquid bulk gas
- OH&S procedures and guidelines concerning the use of specialised bulk transfer equipment
- Risks when transferring liquid bulk gas and related precautions to control the risk
- Workplace procedures and policies for the efficient use of specialised equipment to transfer

© Commonwealth of Australia, 2025 Powering Skills Organisation

REQUIRED KNOWLEDGE AND SKILLS

liquid bulk gas

- Housekeeping standards procedures required in the workplace
- Methods of securing a vehicle following transfer of liquid bulk gas
- Relevant permit and licence requirements

Required skills:

- Communicate effectively with others when using specialised equipment to transfer liquid bulk gas
- Read and interpret instructions, procedures, information and signs relevant to the transfer of liquid bulk gas using specialised equipment
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the transfer of liquid bulk gas using specialised equipment
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when using specialised equipment to transfer liquid bulk gas
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when using specialised equipment to transfer liquid bulk gas in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when using specialised equipment to transfer liquid bulk gas
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the transfer of liquid bulk gas using specialised equipment
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to product or equipment
- Operate and adapt to differences in transfer equipment in accordance with standard operating procedures
- Monitor performance of transfer equipment
- Service transfer equipment in terms of maintenance schedule and standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards

© Commonwealth of Australia, 2025 Powering Skills Organisation

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
  - the underpinning knowledge and skills
  - relevant legislation and workplace procedures
  - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

© Commonwealth of Australia, 2025 Powering Skills Organisation

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	• in a range of work environments • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Liquid bulk gas to be transferred may:	• require special precautions
Hazards in the work area may include exposure to:	• hazardous or dangerous materials • contamination of, or from, materials being handled • noise, light, energy sources • stationary and moving machinery, parts or components • service lines • spills, leakages, ruptures • dust/vapours
Hazard management is:	• consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • mask or respirator • high visibility clothing
Exposure during work operations may be to:	• corrosive chemicals • solvents and adhesives • toxic, explosive and other harmful substances • movement of equipment, goods, vehicles
Regulatory controls and enterprise procedures may govern requirements for:	• transport • storage • volume • mass • required controls

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

Ignition sources include:	• naked flames and static sources
Requirements for work may include:	• site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • incident breakdown procedures • additional gear and equipment • noise restrictions • hours of operation • authorities and permits
Consultative processes may involve:	• other employees and supervisors • suppliers, potential customers and existing clients • management and union representatives • industrial relations, OH&S specialists, and other maintenance, professional or technical staff
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures • site procedures
Information/documents may include:	• Safe Working Load (SWL) and Working Load Limit (WLL) • manifests, bar codes, goods and product identification • manufacturers specifications for equipment/tools • workplace procedures and policies for the transfer of liquid bulk gas • goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs • supplier and/or client instructions • codes of practice including the Australian Dangerous Goods Code, relevant Australian Standards and the Industry Safety Code • award, enterprise bargaining agreement, other industrial

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	arrangements • relevant standards and certification requirements • quality assurance procedures • emergency procedures • material safety data sheets

Applicable regulations and legislation may include:	• state/territory mass and loading regulations
	• Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • IATA Dangerous Goods by Air regulations
	  • Australian and International Explosives Codes
	• Australian and state/territory regulations related to the transfer of liquid bulk gas
	• relevant Australian Standards, including AS 2809.1, AS 2809.3, AS 2931, AS 2430.1, AS 2430.3.4, AS 2430.3.7
	• relevant state/territory environmental protection legislation
	• relevant state/territory OH&S legislation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Check dangerous goods load	1.1 Load is compared against transport documentation and discrepancies are noted 1.2 Load is checked to ensure that dangerous goods labels are clearly visible and legible, and that packaged goods are correctly labelled 1.3 Load is checked to ensure containers are not damaged 1.4 Vehicle load is checked for compatibility or, where not compatible, is checked for appropriate segregation in accordance with regulatory requirements 1.5 Load is assessed to ensure that it is stowed and secured in or on vehicles in accordance with the current ADG Code and the National Load Restraint Guide 1.6 Shipping documentation and other relevant documents are located in the cabin in accordance with regulatory requirements
2 Assess vehicle suitability to transport intended load	2.1 Vehicle is assessed for suitability and appropriateness to carry designated dangerous goods including classification, mass and configuration 2.2 Licence and insurance requirements (where relevant) are checked for conformity with the current Australian Code for the Transport of Dangerous Goods by Road and Rail and/or other applicable regulatory requirements 2.3 Load restraint system(s) is/are checked for serviceability and appropriateness to secure intended load 2.4 Vehicle is checked to ensure that it is correctly and clearly marked/placarded for the load being carried
3 Check emergency procedures and equipment	3.1 Emergency information for each type of transported dangerous good is noted 3.2 Regulatory and workplace procedures for an incident are noted including notification of relevant personnel and authorities and, where appropriate, use of equipment for containment, clean up

© Commonwealth of Australia, 2025 Powering Skills Organisation

ELEMENT	PERFORMANCE CRITERIA
	or recovery
	3.3 Personal protective equipment and safety equipment are checked for operational capability and appropriateness to the proposed load
	3.4 Emergency information is located in the cabin in accordance with current ADG Code requirements
4 Evaluate documented route plan	4.1 Selected route plan and potential difficulties including regulatory restrictions, traffic flow and conditions, obstacles, road standards and construction activities are assessed
	4.2 Regulatory and workplace procedures for driving, parking, loading and unloading are identified including actions for disengaging and/or securing the vehicle
5 Complete documentation	5.1 The load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and the current ADG Code
	5.2 All required documentation for the dangerous goods is completed in accordance with regulatory and workplace requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Current Australian Dangerous Goods Code and relevant state/territory mass and loading regulations as they apply to vehicles transporting dangerous goods
- OH&S procedures and guidelines concerning the transport of dangerous goods
- Risks when transporting dangerous goods and related precautions to control the risk
- Workplace procedures and policies for the preparation of dangerous goods
- Problems that may occur when preparing for the transport of dangerous goods and action that should be taken to prevent or solve them
- Housekeeping standards procedures required in the workplace
- Methods of securing a vehicle following loading of dangerous goods
- Relevant permit and licence requirements

© Commonwealth of Australia, 2025 Powering Skills Organisation

Required skills:

- Communicate effectively with others when preparing for the transport dangerous goods
- Read and interpret instructions, procedures, information and signs relevant to the preparation of dangerous goods for transport
- Identify goods coding, markings and, where applicable, emergency information panels for the mode of transport/storage selected
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to the preparation of dangerous goods for transport
- Operate electronic communication equipment to required protocol
- Estimate the mass, volume and special requirements of a load
- Work collaboratively with others when preparing for the transport of dangerous goods
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when preparing for the transport of dangerous goods in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when preparing for the transport of dangerous goods
- Recognise the hazards and apply precautions and required action to minimise, control or eliminate hazards that may exist during the preparation of dangerous goods for transport
- Monitor work activities in terms of planned schedule
- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Identify and correctly use equipment required to load dangerous goods
- Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment

© Commonwealth of Australia, 2025 Powering Skills Organisation

EVIDENCE GUIDE

guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
  - assessing operational suitability of equipment and vehicles pertinent to dangerous goods transportation
  - estimating weight and dimensions of load and any special requirements
  - applying hierarchy of hazard control
  - maintaining workplace records and documentation including completion of dangerous goods declaration
  - determining (any) required permits
  - identifying hazards and planning work to minimise risks when transporting dangerous goods
  - selecting appropriate equipment and work systems to enable safe, efficient work

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
  - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
  - access to an appropriate range of relevant operational situations in the workplace
- In both real and simulated environments, access is required to:
  - relevant and appropriate materials and equipment, and
  - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
  - through activities in an appropriately simulated environment at the registered training organisation, and/or
  - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	• in a range of work environments and weather conditions • by day or night
Customers may be:	• internal or external
Workplaces may comprise:	• large, medium or small worksites
Work may be conducted in:	• restricted spaces • exposed conditions • controlled or open environments
Vehicle refers to:	• all applicable transportation modes
Hazards in the work area may include exposure to:	• hazardous or dangerous materials • contamination of, or from, materials being handled • noise, light, energy sources • stationary and moving machinery, parts or components • service lines • spills, leakages, ruptures • dust/vapours
Hazard management is:	• consistent with the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Personal protective equipment may include:	• gloves • safety headwear and footwear • safety glasses • mask or respirator • breathing apparatus • high visibility clothing
Load restraint systems are:	• as detailed in the National Load Restraint Guide
Preparation of packaged dangerous goods for transport may:	• require special precautions as specified by the manufacturer
Transport documentation may	• Initial Emergency Response Guide

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

include:	• Emergency Procedure Guide • Material Safety Data Sheet (MSDS) • descriptions for dangerous goods (i.e. proper shipping name, class and division number, packing group, subsidiary risk(s) if any) • UN or ID number
Requirements for work may include:	• site restrictions and procedures • use of safety and personal protective equipment • communications equipment • specialised lifting and/or handling equipment • incident breakdown procedures • additional gear and equipment • noise restrictions • hours of operation • authorities and permits
Consultative processes may involve:	• other employees and supervisors • suppliers, potential customers and existing clients • management and union representatives • industrial relations, OH&S specialists, and other maintenance, professional or technical staff
Communication in the work area may include:	• phone • electronic data interchange • fax • email • internet • radio • oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	• company procedures • enterprise procedures • organisational procedures • established procedures • site procedures
Safety equipment on vehicle may include:	• fire extinguishers • portable warning devices • eye wash kit
Information/documents may include:	• current Australian Dangerous Goods Code, relevant Australian Standards and International Standards • Safe Working Load (SWL) and Working Load Limit (WLL) • manifests, bar codes, goods and product identification

© Commonwealth of Australia, 2025 Powering Skills Organisation

RANGE STATEMENT

	• manufacturers specifications for equipment/tools • workplace procedures and policies for the transfer of product • goods identification numbers, codes and signs • supplier and/or client instructions • award, enterprise bargaining agreement, other industrial arrangements • relevant standards and certification requirements • quality assurance procedures • emergency procedures • manufacturers specifications, instructions and labelling advice for the packaged dangerous goods, including material safety data sheets

Applicable regulations and legislation may include:	• state/territory mass and loading regulations
	• current Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	  • Australian and International Dangerous Goods Codes
	  • Australian Marine Orders and the International Maritime Dangerous Goods Code
	  • International Air Transport Association (IATA) Dangerous Goods by Air regulations
	• Australian and state/territory regulations related to the carriage of dangerous goods
	• workplace relations regulations
	• equal opportunity legislation
	• equal employment opportunity and affirmative action legislation
	• relevant Australian and International Standards
	• relevant state/territory environmental protection legislation
	• relevant state/territory OH&S legislation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to operate a vehicle-mounted loading crane to shift loads, including positioning and stabilising the crane, operating the vehicle-mounted crane, monitoring lift conditions, packing up the crane after operations, and completing all required job records. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the licence/permit requirements and regulations of the relevant state/territory authorities pertaining to vehicle-mounted loading cranes.

Work is performed under general supervision. It involves the application of routine principles and procedures to the operation of a vehicle-mounted loading crane in a variety of operational contexts.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Position and stabilise crane	1.1 Crane is driven to position as per job plan to ensure safe operation in accordance with applicable Australian standards, codes of practice, manufacturers specifications and, where applicable, regulatory and local government requirements
	1.2 Where appropriate, barriers, fencing, temporary boundaries, signage and the like are used to isolate working area in accordance with safe working practice and lift requirements
	1.3 Ground is checked to ensure it is firm enough to bear the load
	1.4 Appropriate plates or packing are correctly used to adequately distribute the load
	1.5 Any outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturers instructions and the appropriate Australian standard and other relevant statutory regulations or local authority requirements
	1.6 Outrigger packing is checked for adequacy prior to and after load is taken
2 Operate vehicle-mounted crane	2.1 Planned hazard control strategies are implemented
	2.2 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian standards
	2.3 Load mass is assessed and correlated with lifting capacity of crane throughout proposed radii of operation
	2.4 Appropriate lifting gear is selected and load secured
	2.5 Load is hoisted and lowered into position using crane movements in accordance with the appropriate Australian standard
	2.6 Crane controls are operated smoothly
