Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted non-surgical procedures on at least three animals, including:

- applied first aid techniques and provided basic animal care
- employed safe, humane and environmentally responsible organisational systems and procedures when handling and working with animals
- maintained the highest standards of hygiene and infection control at all times to reduce the risk of infection and cross-infection
- prepared, used and cleaned the procedures area, materials, tools and equipment correctly and according to industry standards and manufacturers’ specifications
- documented procedures used in the administration of substances and collection of samples.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for conducting non-surgical procedures
- anatomical terminology, structures and physiological features of animals relevant to the administration of substances and collection of samples
- basic animal first aid techniques
- biohazards in the workplace of significance to animals and humans
- ethical practices, protocols and procedures in relation to the administration of substances and collection of samples of animals in animal technology workplaces
- indicators of stress and wellbeing in animals, and methods used to measure, interpret and record objective measures of animal health
- information that should be documented related to the administration of substances, and collection of samples
• methods used to prepare, store and transport samples
• organisational policies and safe work procedures, including WHS and accident requirements
• personal protective clothing and equipment, and when and how it should be used
• animal welfare and ethics
• relevant codes of practice, including the Australian Code of Practice for the Care and Use of Animals for Scientific Purposes for role and work undertaken
• relevant state or territory legislation and regulations relating to the practice of veterinary science, WHS and animal welfare and research for role and work undertaken
• relevant state or territory legislation covering the use of therapeutic and controlled substances for role and work undertaken
• safe animal handling techniques, including approved handling methods during the administration of substances and collection of samples
• situations where the administration of substances or collection of samples should be stopped and reported
• tissue and fluid sample types and methods
• workplace hygiene standards, disinfectants, cleaning agents, cleaning techniques and cleaning equipment and materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in an animal technology laboratory
• resources, equipment and materials:
  • a range of animals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
