Produce veterinary dental oral cavity
images**

Release: 1

Assessment Requirements for ACMVET503 Produce veterinary dental oral cavity images

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- produced veterinary dental oral cavity images for a minimum of five animals, covering at least two of these:
 - feline
 - canine
 - equine
- performed the activities outlined in the performance criteria of this unit during a period of at least 240 hours of work in a veterinary practice or hospital where specialist advanced dental procedures are regularly performed.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- practice dental imaging information recording systems
- legislative requirements, practice policies and work health and safety requirements for the operation of radiographic and other imaging mediums and equipment
- positioning and bisecting angles techniques and terminology for a range dental images for animals
- principles of animal welfare and ethics related to sedation and dental imaging procedures
- radiographic and other imaging development procedures
- radiography and other imaging equipment, supplies and personal protective equipment
- types of emergencies that may occur in dental imaging procedures
- relevant state or territory legislation and regulations relating to radiation safety, work health and safety and animal welfare in sedation and dental imaging techniques
- type of sedation typically used for dental procedures

- storage requirements for dental images
- regulations and practice policies related to the disposal of imaging and sedation chemicals and old images.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - in the workplace or an environment that accurately reflects a veterinary dental surgery
- resources, equipment and materials:
 - a range of real animals requiring advanced dental procedures
 - equipment, instruments and resources typically available for dental veterinary surgery, including dental imaging equipment
- specifications:
 - access to organisational policies and procedures, current legislation, regulations and relevant codes of practice
- relationships (internal and/or external):
 - interactions with a registered veterinarian who is at a minimum a Member of the Veterinary Dental Chapter, Australia and New Zealand College of Veterinary Scientists (ANZCVS), and who regularly performs advanced dental procedures on animals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
