AHCBIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity

Release: 1

AHCBIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to inspect and clean machinery, tools and other equipment, including vehicles, of material that may contribute to the spread of biosecurity threats.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to inspect and clean machinery, tools and equipment	1.1 Confirm the work activity to be undertaken with supervisor 1.2 Identify health and safety hazards and risks and apply controls according to supervisor instructions and workplace procedures 1.3 Identify and select tools and equipment required according to

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	supervisor instructions 1.4 Select, check and use personal protective equipment and infection controls
2. Inspect machinery, tools, support vehicles and equipment	2.1 Ensure machinery is safe before inspection and ensure free moving parts are immobilised according to workplace and operating procedures 2.2 Check serviceability of tools and materials required for task 2.3 Inspect machinery and equipment for contamination according to workplace biosecurity procedures 2.4 Remove covers and guards safely 2.5 Identify contamination and cleaning requirements according to workplace biosecurity procedures 2.6 Report observed equipment faults to supervisor according to workplace procedures
3. Clean machinery, tools, equipment and support vehicles	3.1 Select correct equipment and location of site for cleaning 3.2 Clean the machinery, support vehicles, tools and equipment according to workplace biosecurity procedures 3.3 Replace guards and covers safely
4. Complete cleaning work	4.1 Dispose of waste materials according to workplace and environmental procedures 4.2 Record cleaning history on appropriate forms according to workplace procedures
5. Report inspection results	5.1 Document inspection results according to workplace procedures 5.2 Deliver inspection reports according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
-------	-------------

Skill	Description
Reading	Interpret and consolidate information from workplace procedures for application to the cleaning process
Writing	Prepare records and documentation using clear and accurate terminology
Oral Communication	Use clear language, concepts, tone and pace appropriate when reporting to supervisor

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
AHCBIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity	AHCBIO201 Inspect and clean machinery for plant, animal and soil material	Changed unit code Change to title to remove specificity for broader application Removed mapping to Core Skills for Work from Foundation Skills Minor edit to Assessment Conditions	Equivalent
