**Release: 1**

## Assessment Requirements for AHCCHM401 Develop procedures to minimise risks in the use of chemicals

### Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

### Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate implementation of procedures
- identify hazards, assess risks and implement and monitor control measures
- develop risk control procedures
- develop a continuous improvement strategy to minimise risk
- interact with staff members and provide feedback
- implement, monitor and evaluate a chemical risk control strategy maintain records

### Knowledge Evidence

The candidate must demonstrate knowledge of:

- where to source Codes of Practice, legislation and industry requirements relating to chemical use
- hazard identification and risk assessment strategies
- risk factors including human and animal health, product integrity, weather, spray drift, spillage and environmental
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations

### Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.
