Assessment Requirements for AHCCOM202 Recognise and respond to fire emergencies on a composting site

Release: 1

Assessment Requirements for AHCCOM202 Recognise and respond to fire emergencies on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow emergency procedures
- operate pumps and set up water delivery system
- read and interpret site operation plans or maps
- recognise and report fire risks and incidents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recognising fire emergencies
- characteristics and operation of joints, hoses, valves and sprinkler components
- work health and safety and emergency management plans as part of enterprise operating procedures
- fire behaviour, extinguishing media and operating firefighting equipment
- fire control tactics and techniques, fire hazards and safety techniques
- operation of pumps
- pile size, moisture and porosity as causes of combustion
- procedures for safely using power and hand tools
- standard risk control measures used in the industry to minimise risk associated with fire response

Assessment Conditions

Assessors must satisfy current standards for RTOs.
