**Release: 1**

# Assessment Requirements for AHCDRG302 Measure drainage system performance

## Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify adverse environmental impacts of drainage systems
- identify and apply appropriate remedial action
- identify and correct system problems
- identify hazards and implement safe work procedures
- use technology to record and report drainage system data

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to measure a water table and salinity
- measuring and monitoring procedures for factors contributing to drainage system performance
- positive and negative environmental impacts of drainage systems
- soil moisture measurement procedures
- the environmental role of drainage systems
- water quality monitoring methods and techniques

## Assessment Conditions

Assessors must satisfy current standards for RTOs.
