

# AHCDRG403 Coordinate and supervise installation of an irrigation drainage system

Release: 1

# AHCDRG403 Coordinate and supervise installation of an irrigation drainage system

## **Modification History**

Release	Comments	
	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.	

### **Application**

This unit of competency describes the skills and knowledge required to develop and implement irrigation drainage system construction procedures, coordinate, supervise and commission irrigation drainage system installation and supervise work area rehabilitation.

The unit applies to individuals who apply specialised skills and knowledge in coordinating and supervising the installation of irrigation drainage systems and have responsibility for the output of others. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

# Pre-requisite Unit

Nil

#### **Unit Sector**

Drainage (DRG)

#### **Elements and Performance Criteria**

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Develop and implement construction	1.1 Develop employment and contract management procedures for contractors	
and environmental procedures	1.2 Develop procedures for controlling and recording site deliveries 1.3 Develop procedures for recording the hire of plant and equipment	

Approved Page 2 of 5

Elements	Performance Criteria		
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.		
	1.4 Determine workplace health and safety procedures, including risk assessment for installation works		
	1.5 Develop procedures for dealing with and minimising environmental impacts associated with construction work		
	1.6 Notify client, authorities and agencies of the scheduled works		
2. Interpret the irrigation drainage system design	2.1 Determine the purpose, scale and required output of the irrigation system		
for the site	2.2 Assess the landscape of the site		
	2.3 Determine construction requirements and verify with designer		
	2.4 Select components to meet design specifications and site requirements		
3. Organise resource requirements	3.1 Nominate tasks and timelines for the scheduled works, including the coordination of required resources		
	3.2 Organise and coordinate labour requirements		
	3.3 Verify the correct parts and equipment have been delivered to the site and checked		
	3.4 Select and check equipment and machinery		
	3.5 Allocate tasks to the work team		
	3.6 Carry out safety induction for the task and site		
4. Supervise preparatory	4.1 Interpret construction plan to confirm works to be carried out		
work	4.2 Take levels and plan earth works based on irrigation drainage design		
	4.3 Confirm site is cleaned and marked out		
	4.4 Confirm drainage structures are pegged out		
5. Supervise construction	5.1 Interpret plan and supervise construction work		
and testing of the drainage system	5.2 Confirm trenches are excavated to specification		
dramage system	5.3 Confirm earth works are carried out appropriately		
	5.4 Confirm construction of drainage structures are to specifications		
	5.5 Inspect the lay out and joining of pipes		
	5.6 Check fitting and adjustment of fittings and valves and confirm all joints are secured		

Page 3 of 5 Approved Skills Impact

Elements	Performance Criteria		
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.		
	5.7 Supervise the installation and testing of pumping system		
6. Commission the irrigation drainage system	<ul><li>6.1 Start up the system according to operating instructions</li><li>6.2 Identify operating faults and take corrective actions as required</li><li>6.3 Use testing and monitoring equipment to monitor system performance</li><li>6.4 Make adjustments as required</li></ul>		
7. Supervise the rehabilitation of the works area	7.1 Monitor the resurfacing and sealing earthworks 7.2 Confirm the planting and maintenance of vegetation areas have been carried out 7.3 Confirm disposal of waste and surplus materials has been carried out according to workplace procedures		

# **Foundation Skills**

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description		
Reading	Identify and interpret information regarding installation requirements for irrigation drainage system		
Oral communication	<ul> <li>Initiate discussions with staff, contractors, suppliers and designer using clear language to communicate installation requirements, tasks, timelines, and procedures</li> </ul>		
Numeracy	Calculate soil quantity and volume to be removed		
	Confirm trench excavation against design specifications		
Navigate the world of work	Identify and describe own workplace requirements, including safety requirements, associated with own role and area of responsibility		
	Monitor self and others adherence to workplace requirements including safety requirements		
Interact with others	Use appropriate language and communication skills to disseminate information about installation timelines and procedures		

Approved Page 4 of 5

# **Unit Mapping Information**

	Code and title previous version	Comments	Equivalence status
supervise	AHCDRG401 Coordinate and supervise installation of an irrigation drainage system	Performance criteria clarified Foundation skills added Assessment requirements updated	Equivalent unit
