AHCLSC402 Apply building codes and standards to the construction process for Class 10 buildings

Release: 1

AHCLSC402 Apply building codes and standards to the construction process for Class 10 buildings

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to access, interpret and apply relevant building codes and standards applicable to the National Construction Code (NCC) Class 10 buildings, to a maximum of one storey. It includes knowledge of the structure of the NCC, as well as the ability to access relevant information from the code as applicable to various NCC Class 10 building projects.

The unit applies to individuals who apply specialist skills and knowledge to ensure compliance with building codes and standards for Class 10 buildings. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements.

State/territory licensing, legislative or certification requirements apply in some jurisdictions. Users are advised to check with the relevant regulatory authority.

Pre-requisite Unit

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Classify building	1.1 Determine nature of building, its use and arrangement from

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	construction plans and specifications 1.2 Access, read and interpret Australian Standards and codes relevant NCC Class 10 construction projects 1.3 Define NCC building classification 1.4 Identify and interpret NCC multiple classifications
2. Determine construction compliance requirements	2.1 Identify NCC performance requirements relevant to Class 10, up to one storeys, landscape construction projects 2.2 Determine range of criteria to ensure construction methods comply with NCC performance requirements 2.3 Identify and document non-conforming construction methods against NCC performance requirements 2.4 Discuss performance solution with design and building construction professionals 2.5 Analyse and apply assessment methods to determine compliance with performance solution or Deem-to-Satisfy solution (DTS) 2.6 Meet the evidence of suitability requirements for building materials and products stated in the NCC 2.7 Complete documentation according to NCC requirements
3. Determine fire protection requirements	3.1 Identify NCC and other legislative requirements for passive and active fire control elements in buildings 3.2 Determine level of fire resistance required for the construction of various Class 10 buildings 3.3 Check existing buildings for compliance with passive and active fire protection requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Identify and interpret information regarding requirements for NCC Class 10 construction projects

Skill	Description
Oral communication	Initiate discussions with design and building construction professionals, using clear language and standard industry terminology to propose actions to rectify faults and problems

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
AHCLSC402 Apply building codes and standards to the construction process for Class 10 buildings	Not applicable	The unit has been created to address an emerging skill or task required by industry	Newly created
