Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair

Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- perform a work health and safety risk assessment and implement safe work procedures and ensure a safe workplace
- read and interpret documentation associated with work site activities
- seek technical advice on the scale of repairs required where necessary
- establish priorities for work to be carried out
- calculate material and resource requirements
- co-ordinate a team to achieve optimum performance
- respond to contingencies and taking corrective actions where necessary
- document activities, timelines and material usage

Knowledge Evidence

The candidate must demonstrate knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery that may be required for the project
- environmental awareness associated with undertaking maintenance and repair work on machinery and equipment to ensure the impact on the environment is minimal
- relevant work health and safety issues, legislative requirements and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.
