Assessment Requirements for AHCNAR504 Manage natural area restoration programs

Release: 1

Assessment Requirements for AHCNAR504 Manage natural area restoration programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- manage a natural area restoration program
- carry out a detailed site assessment for restoration
- select appropriate vegetation restoration techniques for the program
- plan a natural area restoration program effectively
- ensure program complies with relevant legislative and program requirements
- calculate staff and resources required
- supervise staff to carry out natural area restoration works according to the program
- review natural area restoration program against issues identified in the management plan for the area
- monitor staff to ensure work health and safety policies and procedures are followed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- plant species and community recognition
- natural regeneration potential and limits
- ecological restoration theory and techniques
- factors affecting the timing and method of plant establishment
- identification of plant and animal threats to treated areas
- principles and methods relating to the prevention and control of pests and diseases
- safety requirements when handling and using hazardous goods
- soils and nutrients, plant selection and culture
- calculations for materials
- legislative requirements

- preparation of plans and specifications

Assessment Conditions

Assessors must satisfy current standards for RTOs.
