Assessment Requirements for AHCNSY203 Undertake propagation activities

Release: 1

Assessment Requirements for AHCNSY203 Undertake propagation activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for plant propagation according to instructions
- collect propagation material as appropriate to species
- apply pre-treatments
- apply water and nutrients
- carry out a variety of propagation techniques
- collect propagation material
- maintain environmental parameters and temperature controls
- minimise damage to and maximise viability of propagated material
- maintain records of activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of propagation
 - botany and plant physiology as it applies to propagation
 - common problems that occur while performing propagation activities
 - enterprise hygiene requirements
 - enterprise requirements for handling and disposal of nursery wastes
 - maintenance requirements of tools and equipment used for propagation
 - plant nutrition
 - propagation methods required for a range of plant species
 - quality specifications/characteristics of a range of parent plants and propagation materials
 - record keeping relevant to the work function

Assessment Conditions

Assessors must satisfy current standards for RTOs.
