AHPCM510 Collect and classify plants

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to collect and classify plants, including preparing for plant collection, collecting plant specimens, preserving specimens and identifying plant specimens using taxonomic keys.

The unit applies to individuals who apply specialised skills and knowledge to the collection and classification of plants, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for plant collecting	1.1 Confirm purpose and objectives for collecting a range of plants 1.2 Define area, location and habitat for collecting 1.3 Determine and prepare resources to assist in locating and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	identifying plants 1.4 Determine and prepare equipment required for collecting and preserving specimens 1.5 Obtain licences or permission to collect specimens from landowner or managing agency 1.6 Assess range of likely operating conditions, hazards and difficult or sensitive environments for impact on collecting and preserving specimens 1.7 Identify workplace health and safety hazards associated with plant collecting, assess risks and implement controls
2. Collect plant specimens	2.1 Observe collection ethics when selecting specimens for picking 2.2 Enter into a field note book relevant information about the specimen, its characteristics and occurrence, and note location coordinates 2.3 Confirm specimen collected provides adequate material for identification and preserving 2.4 Tag and store specimens for later identification 2.5 Follow appropriate work health and safety requirements and work practices
3. Preserve specimens	3.1 Preserve specimen while still fresh 3.2 Clean and prepare specimen for preserving 3.3 Preserve specimen using either pressing or drying techniques 3.4 Mount dried specimen and label with information from note book
4. Identify plant specimen	4.1 Use relevant plant key to identify plant 4.2 Identify and document basic characteristics of a plant 4.3 Confirm plant identity against botanical description of species 4.4 Document plant identity on label according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding the collection of plants and the botanical description and plant key of plant specimens
Numeracy	<ul style="list-style-type: none"> Record specimen collection date and location coordinates into field note book
