Release: 1

AHCPCM511 Specify plants for landscapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to develop a client brief, select and specify landscape plants, and present a report.

The unit applies to individuals who apply specialised skills and knowledge to specify plants for landscapes, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Plant Culture and Management (PCM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a client brief	1.1 Discuss and clarify client needs and objectives 1.2 Identify purposes of the landscape and client expectations 1.3 Establish plant selection criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Consult with client to finalise agreement of the brief
2. Determine the suitability of a plant for a purpose	2.1 Inspect the site and determine planting area 2.2 Select species and cultivars according to the size and aspect of the site 2.3 Consider and apply environmental conditions to the functional characteristics of the plant 2.4 Determine the suitability of the soil for the plants selected 2.5 Evaluate and document plant selection and rationale
3. Select plants	3.1 Select plants according to client brief and their suitability for the intended purpose 3.2 Determine plant function for the precise location within the plan 3.3 Make recommendations for soil improvements for the selected plant species 3.4 Match species and cultivars according to plant selection criteria for species-specific characteristics 3.5 Identify plant species appropriate for the site 3.6 Research relevant reference sources 3.7 Recommend plant species or cultivars for replacement or new plantings 3.8 Document plant selections, selection criteria and notes on quality expectations and specifications
4. Specify plants	4.1 Evaluate selection criteria for mature plants against capability and availability of transplanted plants 4.2 Assess final selections against the specified soil, site location and client brief, and confirm with client 4.3 Assess selected plants for quality and quantities outlined in the specifications 4.4 Check materials, soils and growing media for specified quality 4.5 Record quality checks on delivered plants and product
5. Correlate and present a report	5.1 Gather and correlate records for client report 5.2 Document and present client report to the client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	Identify and interpret information regarding plant species, cultivars growing requirements, environmental conditions and functional characteristics
Writing	Document client brief
Oral communication	Initiate discussions with client, using clear language to discuss and clarify client needs, objectives and expectations, finalise brief, confirm plant selections and present client report
Numeracy	Calculate quantity of plants, products, soil and growing media for input into plant selection and specifications
