AHCSS00112 Site Manager for Biosecurity Emergency Response Skill Set

Release 1

AHCSS00112 Site Manager for Biosecurity Emergency Response Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the knowledge and skills required for farm managers or site managers to understand the link between on-farm biosecurity implementation and management, and their role within a biosecurity emergency response agency.

Pathways Information

These units of competency provide pathways into a range of qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBER302 Work effectively in a biosecurity emergency response
- AHCBER503 Manage active operational emergency disease or pest sites
- AHC BIO204 Follow site quarantine procedures
- AHC BIO401 Plan and implement a biosecurity program

Target Group

This skill set is for individuals employed as farm or property managers where there is a potential for a biosecurity threat and the need to work with government agencies during a biosecurity emergency response.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the industry requirements for working with biosecurity emergency response agency staff during a biosecurity emergency response.
