**Release 1**

# AHCSS00137 Permaculture Fundamentals Skill Set

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

## Description

This skill set provides the skills and knowledge required to contribute to the development of a permaculture system for an individual or a community permaculture project. It includes communicating information about a permaculture design and recommending plants and animals suitable for a permaculture system.

## Pathways Information

These units of competency can provide credit towards a range of qualifications and/or build on the skills and knowledge of previous qualifications attained from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

- AHCPER322 Communicate permaculture system principles to stakeholders
- AHCPER335 Select plant and animal species for permaculture systems
- AHCPER414 Develop recommendations for integrated plant and animal systems
- 

## Target Group

This skill set is for individuals who aspire to build skills in the development of new permaculture systems. They may be existing workers in the permaculture environment or land and landscape developers seeking to support the permaculture sector.

## **Suggested words for Statement of Attainment**

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the industry requirements for communicating permaculture designs to clients and selecting and recommending plant and animals best suited to a permaculture system.
