AHCSS00147 Create and Use Compost to Improve Soil Health Skill Set

Release 1

AHCSS00147 Create and Use Compost to Improve Soil Health Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Description

This skill set provides the skills and knowledge required to create organic compost and use it to improve soil health in a garden, orchard, farm or permaculture environment.

Pathways Information

These units of competency can provide credit towards a range of qualifications and/or build on the skills and knowledge of previous qualifications attained from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCOM304 Operate compost processing plant, machinery and equipment
- AHCCOM403 Develop a composting recipe
- AHCORG411 Manage organic soil improvement

Target Group

This skill set is for qualified horticulturists or agriculturists wishing to develop skills in creating and using compost.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet state/territory licensing requirements for creating and using compost to improve soil organic content.
