### Equipment

Equipment may include:
- secateurs
- grafting knife
- grafting machine
- vermiculite boxes
- gloves
- budding tape

### Grafting seals

Grafting seals may include:
- tape
- fungicides
- paint
- wax

### Materials

Vine material may include:
- rootstock
- scion
- rootlings and cuttings (at various sizes)

### Information systems

Information systems may be:
- print or screen based

### Confirming equipment status

Confirming equipment status will include:
- checking that safety standards and pre-start requirements are met and that equipment is operational

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare for potting operations | 1.1 Work instructions on potting operations are confirmed and understood  
1.2 Materials are confirmed as available and ready to meet potting requirements  
1.3 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures  
1.4 Potting media is blended to according to workplace procedures  
1.5 Pots and work areas are cleaned and sterilised to minimise risk of contamination  
1.6 Grafted cuttings are prepared according to instructions |
| 2. Pot on propagated material | 2.1 Callused cuttings requiring potting are identified and collected according to instructions  
2.2 Soil is placed in pots according to workplace procedures  
2.3 Cuttings are planted according to instructions  
2.4 Trays are labelled according to instructions  
2.5 Safe work practices are implemented to minimise risk of hazards |
| 3. Carry out post-potting treatments | 3.1 Potted cuttings are transferred to the glasshouse according to instructions  
3.2 Potted cuttings are watered according to instructions  
3.3 Waste is collected and disposed of according to workplace procedures  
3.4 Work is conducted in accordance with workplace environmental guidelines |
| 4. Record information | 4.1 Workplace information is recorded in the appropriate format |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify potting requirements
- confirm supply of necessary materials
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- implement safe work practices to minimise risk of hazard
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- prepare chemical treatments to required concentration and ensure a homogenous mix
- prepare cuttings as instructed. This may include:
  - grading
  - waxing
  - dipping in hormones
  - hydrating
- plant cuttings as instructed. This may include:
  - putting correct amount of media into the pots
  - placing cuttings with nodes facing upwards
- label trays as instructed
- transfer potted cuttings as instructed
- water potted cuttings as instructed
- collect and dispose of waste as instructed
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.
Knowledge of:

- Occupational health and safety (OHS) hazards and controls
- Purpose and application of protective clothing and/or equipment
- Correct operating procedures of equipment
- Safe and effective handling of equipment
- Safe preparation and handling of potting media
- Cleaning requirements and procedures for work area and equipment
- Environmental issues and controls
- Reporting and recording requirements and procedures
- Procedures and responsibilities for reporting problems and anomalies
- Waste disposal requirements and procedures
- Safe preparation and handling of chemicals
- Commonly occurring problems with potted cuttings
- Principles of nursery hygiene.

FDFWGG2003A Hand prune vines

Modification History
This unit supersedes and is equivalent to FDFWGHPVB Hand prune vines.
April 2012: Minor typographical corrections.

Unit Descriptor

| Unit descriptor | This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to hand prune vines under regular supervision. |

Application of the Unit

| Application of the unit | This unit covers the pruning of vines used in winemaking using a variety of hand operated or handheld equipment. Pruning methods may include spur pruning, cane pruning, rod and spur pruning. Pruning includes the ability to recognise problems and anomalies with vines and to select the best spurs, canes and buds according to instructions. The unit also covers the use of sharpening equipment and air compressors used for power pruning and sharpening equipment. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.
Ability to:

- access workplace information to identify pruning requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- handle pruning equipment safely. This includes following the correct handling and sharpening procedures
- start up and operate automatic pruning equipment as required
- monitor and recognise performance problems with pruning equipment and correct or report them as instructed. This includes oiling moving parts and sharpening blades
- identify different parts of the grape vine. This should include identifying:
  - vine trunk and permanent framework
  - canes and/or cordons
  - tendrils and buds
- prune vines according to instructions. This may include:
  - selecting the best possible spurs and canes
  - positioning spurs or canes
  - cleanly removing sucker shoots
  - leaving the correct quantity of spurs, rods and buds
  - making cuts correctly and cleanly
  - recognising and removing unwanted growth
  - rolling and securing extension canes onto trellis wire as required
- use appropriate cleaning techniques
- recognise and report problems and anomalies
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- clean and store equipment according to instructions
- identify, rectify and/or report environmental non-compliance
- maintain work area to meet housekeeping standards
- dispose of vine cuttings according to instructions
- carry out routine preventive maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose of pruning vines
- basic components of the vine
- basic difference between cane and spur pruning
• pruning requirements
• safe handling of pruning equipment
• purpose and application of personal protective clothing and/or equipment
• correct operating procedures for pruning equipment
• shutdown sequence
• tag-out and lock-out sequence and methods
• cleaning and storage requirements of pruning equipment
• Occupational health and safety (OHS) hazards and controls
• environmental issues and controls
• basic problems and anomalies
• procedures and responsibility for reporting problems and anomalies
• disposal requirements of vine cuttings
• routine preventive maintenance procedures for equipment where relevant.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
• use personal protective clothing and equipment where required
• follow pruning equipment safety procedures
• start and operate pruning equipment correctly
• select best spurs and canes
• prune correctly and according to instructions
• perform routine and emergency shut downs
• follow environmental instructions
• dispose of cuttings according to instructions
• maintain records as required.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:
**EVIDENCE GUIDE**

FDFWGG2005A Maintain callusing environment

Modification History
This unit supersedes and is equivalent to FDFWGGMCEB Maintain callusing environment.
April 2012: Minor typographical corrections.

Unit Descriptor

| Unit descriptor       | This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to maintain a callusing environment under supervision. |

Application of the Unit

| Application of the unit | This unit applies to wine grape nursery staff who work with vine cuttings that are to be callused in preparation for planting. The unit covers the maintenance of the callusing environment, preparation of callusing boxes, pre- and post-callusing treatments and monitoring of callusing process. All work is done to specifications and knowledge of occupational health and safety (OHS), environmental and hygiene requirements is required. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills include:**

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify callusing requirements
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store the required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- prepare callusing media to specified moisture levels
- prepare callusing environment. This may include:
  - turning on heaters and fans
  - setting and monitoring temperature and relative humidity
- prepare callusing boxes. This may include:
  - filling boxes with sand or vermiculite
  - lining boxes
  - storing excess media
- prepare chemical treatments to required concentration and ensure homogenous mix
- prepare cuttings for callusing. This may include:
  - taking cuttings out of storage
  - cutting just below basal bud
- apply pre-callusing treatment. This may include:
• hydrating cuttings
• applying fungicide treatments
• applying root promoter treatment
• prepare labels in a clear and legible manner with waterproof ink
• place cuttings into boxes. This may include:
  • feeling into media
  • watering in
  • placing correct number of cuttings per box
  • placing basal end at bottom
  • dipping into hormone mixes
  • arranging cuttings according to variety, clone and source
  • labelling and mapping of beds
• maintain callusing environment. This may include consideration of:
  • temperature
  • relative humidity
  • moisture levels of growing medium
• monitor cuttings for potential health problems. This may include identifying:
  • uneven callusing
  • dehydration
  • presence of pests and diseases
• apply post-callusing treatments. This may include:
  • hydrating cuttings
  • applying fungicides
• remove callused cuttings. This may include:
  • loading cuttings onto trucks or trailers
  • potting or planting cuttings
• dispose of waste as instructed. This may include:
  • pasteurising callusing media
  • spreading waste material through the vineyard
  • placing waste in bins for removal by disposal company
• use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
• work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

• OHS hazards and controls
- purpose of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- cleaning requirements and procedures for work area and equipment
- environmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- safe preparation and handling of chemicals
- purpose and benefit of pre- and post-callusing treatments
- pre-callusing treatment procedures
- post-callusing treatment procedures
- principles of nursery hygiene
- procedures for preparing pre-mixed callusing media
- factors in a controlled callusing environment that affect the vine cutting
- procedures for maintaining callusing environment
- common problems that occur during callusing and how they should be resolved (e.g. uneven callusing or evidence of dehydrated cuttings on arrival)
- quality control process in the callusing environment.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- use personal protective clothing and equipment where required
- observe hygiene and housekeeping standards including correct cleaning and sterilisation of work area, equipment and boxes
- prepare callusing media and boxes to specification
- prepare cuttings and apply pre-callusing treatment
## EVIDENCE GUIDE

<tr>
<td>record information appropriately</td>
<td></td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment as required
- work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
- instructions, information, specifications and schedules as required
- equipment, services and corresponding information as required
- products and materials as required
- internal and external customers and suppliers as required
- cleaning procedures, materials and equipment as required
- documentation, recording requirements and procedures.

### Method of assessment

This unit should be assessed together with other units of competency relevant to the function or work role.

### Guidance information for assessment

To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
## Range Statement

### RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Skills Impact
FDFWGG2006A Obtain and process rootlings

Modification History
April 2012: Minor typographical corrections.

Unit Descriptor

| Unit descriptor | This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the processing of vine rootlings in wine grape nurseries including, where required, digging of rootlings from field nurseries. |

Application of the Unit

| Application of the unit | This unit applies to wine grape growing and covers the processing of rootlings. Rootlings may include those developed from cuttings in a sand bed or callusing room, or those freshly dug from a field nursery. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare to process rootlings | 1.1 Work instructions for the processing of rootlings are confirmed and understood  
1.2 Facilities are cleaned and sterilised to minimise risk of contamination  
1.3 Materials are confirmed as available and ready to meet requirements  
1.4 Equipment is collected and checked for serviceability and sterilised as required by workplace procedures  
1.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures |
| 2. Obtain rootlings | 2.1 Requirement for rootlings from field nurseries, sand beds or callusing are checked against instructions  
2.2 Rootlings if required are dug from field nurseries using tractor mounted or trailed digging machines or hand-held tools  
2.3 Rootlings are obtained from sand beds or callusing room according to requirements |
| 3. Process rootlings | 3.1 Rootlings are treated and bundled according to instructions  
3.2 Bundles are labelled, packed and stored according to instructions  
3.3 Waste is collected and disposed of according to workplace procedures  
3.4 Work is conducted in accordance with workplace environmental guidelines  
3.5 Problems and anomalies are identified, rectified and/or reported according to workplace procedures  
3.6 Safe work practices are employed to minimise work hazards |
| 4. Prepare rootlings for dispatch | 4.1 Bundles of rootlings are assembled according to instructions  
4.2 Rootlings are prepared and packed for dispatch according to instructions  
4.3 Stock is loaded for dispatch according to instructions |
### ELEMENT | PERFORMANCE CRITERIA
--- | ---
4.4 | Orders are checked against goods being dispatched according to workplace procedures
4.5 | Safe work practices are employed to minimise work hazards
5. | Record information
5.1 | Workplace information is recorded in the appropriate format

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills include:**

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify rootling processing requirements
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping and hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- select and use materials as required
- prepare chemical treatments to required concentration and ensure a homogenous mix
- handle rootlings correctly
- treat rootlings as instructed. This may include:
  - complete hydration of all rootlings
  - complete chemical treatment of all rootlings
  - removal of unwanted plant material
- monitor the standard of rootlings and grade them as instructed. This may include sorting for:
  - diameter of stem
  - appearance
  - length and number of shoots
  - strength of graft union
- bundle and label rootlings as instructed. This may include:
  - ensure correct numbers per bundle
• lay rootlings all the same way in bundles
• tye bundles securely
• label legibly and accurately
• pack and store rootlings as instructed. This may include meeting instructions for:
  • cold room layout
  • cold room temperature variations
  • customer requirements
  • storage time requirements
• collect and dispose of waste as required to minimise risk of environmental damage
• check stock against orders. This may include checking order requirements for:
  • quantity of stock
  • varieties and clones
  • quality of stock is within specifications
• dispatch stock as instructed. This may include:
  • correct manual handling
  • correct use of mechanical transfer equipment
• liaise with customers. This may include:
  • taking orders
  • notifying customers about availability of stock
  • notifying customers about dispatch dates
  • identifying specific treatments of stock
• use oral communication skills/language to fulfil the job role as specified by the organisation,
  including questioning, active listening, asking for clarification and seeking advice from
  supervisor
• work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and
processes that are used in the particular winery or workplace.

**Knowledge of:**

• occupational health and safety (OHS) hazards and controls
• purpose and application of personal protective clothing and/or equipment
• correct operating procedures for equipment
• safe and effective handling of equipment
• principles of nursery hygiene
• cleaning requirements and procedures for work area and equipment
• reporting and recording requirements and procedures
• procedures and responsibilities for reporting problems and anomalies
• waste disposal requirements and procedures
• environmental issues and controls
- equipment operation and maintenance requirements and procedures
- safe preparation and handling of chemicals
- common features of healthy vine rootlings
- common features of unhealthy vine rootlings
- factors that influence how a rootling should be graded and why
- package, storage requirements and procedures for rootlings ready for sale
- rootling preparation requirements and procedures for sales or transfers to customers.

### RANGE STATEMENT

- routine maintenance schedules
- work notes
- Material Safety Data Sheets (MSDS)
- manufacturer instructions
- verbal direction from manager, supervisor or senior operator

### Wine grape nursery facilities

Wine grape nursery facilities may include:

- cold storage
- bins
- water
- fungicide treatment areas
- storage bins or tanks
- soakage tanks

### Equipment

Equipment may include:

- secateurs
- personal protective clothing and/or equipment
- bins
- boxes
- counting machine
- packing machine
- forklift

### Materials

Materials may include:

- string
- labels
- chemicals
- sand
- wax
- pallets

### Waste

Waste may include:

- off-cuts
- dropped or rejected rootlings
- packaging materials

### Work hazards

Work hazards may include:

- damaging fingers or eyes from use of tools and equipment
- manual handling
- lifting bundles
### RANGE STATEMENT

- falling over in an untidy work area
- using chemicals and disinfectants

### Problems and anomalies

Problems and anomalies may include:
- evidence of nematodes
- crown gall
- dehydration
- infection
- physical damage
- damaged buds
- immature wood

### Rootlings

Rootlings may include:
- those developed from cuttings in a sand bed or callusing room
- those freshly dug from a field nursery

### Grading rootlings

Grading rootlings may include sorting for:
- diameter of stem
- appearance
- length of shoots
- number of shoots
- strength of graft union

### Label information

Label information may include:
- class of the material
- variety and clone
- grade of cutting
- the source identification code
- name of customer
- date packed

### Treatments

Treatments may include:
- hydration
- chemical treatment
- trimming
- grading

### Customer requirements

Customer requirements may include:
- quantity
- level of root trimming
- level of shoot trimming

FDFWG2008A Train vines

Modification History
This unit supersedes and is equivalent to FDFWGTVB Train vines.
April 2012: Minor typographical corrections.

Unit Descriptor

| Unit descriptor | This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to train growing vines by hand. |

Application of the Unit

| Application of the unit | This unit covers the training of vines used in winemaking using a variety of handheld hand or operated equipment. The unit requires knowledge of the different parts of a grape vine, the ability to detect problems and anomalies, and to use techniques for selection and training of laterals. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify training requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- set up and operate equipment as required according to instructions
• identify different parts of the grapevine. This should include identifying:
  • vine trunk and permanent framework
  • canes and/or cordons
  • tendrils and buds
  • fruit
• recognise and rectify or report problems and anomalies
• identify, rectify and/or report environmental non-compliance
• train vines according to instructions. This may include:
  • heading height
  • selection of appropriate laterals
  • positioning of laterals
  • securing of laterals
  • removing unwanted laterals from trunk and crown
• maintain work area to meet housekeeping standards
• clean and store equipment according to instructions
• use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
• work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

• safe and effective handling of equipment
• correct operating procedures for equipment
• basic maintenance requirements and procedures for equipment
• purpose and application of personal protective clothing and/or equipment
• Occupational health and safety (OHS) hazards and controls
• procedures and responsibility for reporting problems and anomalies
• range of vine training techniques, features and benefits
• basic components of the vine
• training requirements and procedures
• common vineyard pests and diseases and other common vine problems
• environmental issues and controls
• cleaning and storage requirements and procedures for equipment
• reporting responsibilities and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.
Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:
- access workplace information to identify canopy management requirements
- select, fit and use personal protective clothing and/or equipment
- liaise with other work areas
- identify canopy management requirements. Factors to be considered include:
  - grape variety
  - vine vigour
  - end use of fruit, quality and yield requirements
  - climate
  - operating conditions
  - workplace procedures, manager’s instructions
- attach equipment to tractor
- set up equipment to meet requirements
- confirm equipment status and condition
- operate equipment to meet requirements
- recognise equipment performance problems and rectify and/or report according to workplace procedures
- monitor canopy management activities. This will include monitoring:
  - width of canopy
  - speed of tractor and power take-off rpm
  - density of foliage
  - air circulation
  - light penetration or shade
  - bud numbers, spur length
  - vine damage
  - progress
  - problems and anomalies
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- clean and store equipment
- detach equipment from tractor
- use appropriate cleaning techniques
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- maintain work area to meet housekeeping standards
- carry out routine maintenance of equipment according to enterprise procedures
- use hand tools according to enterprise procedures
- use power tools according to enterprise procedures
- interpret mechanical drawings according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- key factors affecting the canopy management technique adopted. These may include:
  - climate, forecast and current weather conditions
  - vineyard aspect and terrain
  - grape variety and vigour
  - grape quality and characteristics required
  - trellis design
  - harvesting techniques
  - disease risk and occurrence
  - stage of maturity and development
- operating parameters and procedures
- recognition of correct vine growth stages at which to carry out canopy management activities
- factors influencing vine vigour, including:
  - grape variety
  - trellis design
  - vine spacing
  - fertilisers
  - irrigation
  - rootstock
- features and benefits of a range of canopy management styles and techniques and their respective affect on grape quality, cropping yield and wine production requirements. This should include techniques to manage:
  - light penetration and shading
  - air circulation and disease reduction
  - annual growth stages of vine development
  - crop quality and quantity
- significance and method of monitoring canopy management activities
- purpose and basic components of canopy management equipment
- operational procedures for equipment
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- basic vine canopy problems or anomalies
- procedures and responsibility for reporting problems
- cleaning and storage requirements and procedures for equipment
- shutdown sequence
- routine maintenance procedures for equipment where relevant
- procedures for using hand tools where relevant
- procedures for using power tools where relevant
- interpretation of mechanical drawings where relevant.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Evidence of ability to:
- use personal protective clothing and equipment
- select and confirm availability of equipment and prepare according to instructions
- attach, set up equipment to meet requirements
- start and operate equipment in accordance with operation instructions and requirements of workplace and task
- perform emergency and routine shutdowns
- take corrective action in response to out-of-specification results or non-compliance
- demonstrate knowledge of OHS hazards, controls and emergency procedures
- sort, collect, treat, recycle or dispose of waste
- record information appropriately. |
| Context of and specific resources for assessment | Assessment must occur in a real or simulated workplace where the assessee has access to: |
EVIDENCE GUIDE

- personal protective clothing and equipment as required
- work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
- instructions, information, specifications and schedules as required
- equipment, services and corresponding information as required
- products and materials as required
- internal and external customers and suppliers as required
- cleaning procedures, materials and equipment as required
- documentation and recording requirements and procedures.

Method of assessment

This unit should be assessed together with other units of competency relevant to the function or work role.

Guidance information for assessment

To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements

Workplace information

Workplace information may include:
# RANGE STATEMENT

- Standard Operating Procedures (SOPs)
- specifications
- production schedules
- routine maintenance schedules
- work notes
- Material Safety Data Sheets (MSDS)
- manufacturer instructions
- verbal directions from manager, supervisor or senior operator

## Equipment

Equipment may include:
- tractor
- circular saws
- cutter bars
- blades
- knives
- drum pruners
- mechanical leaf pluckers
- wire lifters

## Terrain

Terrain must enable safe and effective operation of equipment. It may include:
- tracks
- access roads
- vineyard rows
- open paddocks
- flat, undulating, steep, hilly or terraced land
- and on- and off-road environments

## Conditions

Conditions must enable safe and effective operation of equipment. These may include:
- dry
- wet
- slippery
- boggy
- icy
- foggy
- windy
- day and night conditions

## Confirming equipment status

Confirming equipment status will include:
- checking that all safety standards and pre-start

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.
Ability to:

- access workplace information to identify grafting requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- confirm supply of necessary materials
- select appropriate vine material for grafting. This may include consideration of:
  - variety and clone
  - matching cambium
  - matching bevels and sizes
  - viable buds
  - achievement of tight unions
- prepare vine material for grafting. This may include:
  - soaking buds
  - working appropriate incisions
  - hot water treatment of cuttings
  - virus tests
  - compatibility tests
  - hydration of cuttings
  - cutting to size
- select and prepare equipment as required
- graft vines in the field according to instructions. This should include:
  - selecting appropriate bud location to graft
  - ensuring cohesion of graft union
- operate equipment safely
- treat vines after grafting. This may include:
  - applying fungicide
  - securing with tape
  - painting
  - waxing
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may include monitoring:
  - percentage take
  - weather conditions
  - pests and diseases (e.g. weevils)
- store unused grafting material
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste as required
- maintain work area to meet housekeeping standards
- Clean equipment after use
• identify, rectify and/or report environmental non-compliance
• conduct routine maintenance of equipment according to enterprise procedures
• use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
• work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

• purpose of grafting and various methods of budding and grafting
• criteria for successful grafting
• advantages of using clonal rootstock material
• criteria for selecting parent vines for scion material
• correct procedure and optimum conditions for the storage and handling of material until required for grafting
• advantages of using clonal and registered vine improvement material
• importance of selection and use of rootstock
• stages of the grafting procedure and their purpose
• common problems and corrective action required
• purpose, components and operation of grafting equipment
• methods of callusing vine cuttings and the criteria for best callus development
• procedures and responsibilities for reporting problems
• Occupational health and safety (OHS) hazards and controls
• environmental issues and controls
• cleaning requirements for work area and equipment
• recording requirements and procedures
• routine maintenance procedures for equipment where relevant.

| 1. Prepare for harvest support activities | 1.1 Work requirements are identified  
1.2 Equipment is checked to confirm readiness for use  
1.3 Equipment is set up to meet harvest support requirements |
| 2. Collect grapes from harvester | 2.1 Tractor towing trailer or gondola is driven alongside mechanical harvester according to instructions  
2.2 Collection activities are monitored to confirm performance is maintained within specification  
2.3 Out-of-specification performance is recognised, rectified and/or reported  
2.4 Problems and anomalies are recognised, rectified and/or reported  
2.5 Equipment is maintained in good working order |
| 3. Transfer grapes to receival point | 3.1 Chemicals are added to grapes according to instructions  
3.2 Grapes are delivered to reception point according to instructions |
| 4. Complete harvest support activities | 4.1 Equipment is cleaned according to workplace procedures  
4.2 Waste generated by the process or cleaning procedures is collected, sorted and disposed of or recycled, according to workplace procedures  
4.3 Work is conducted in accordance with workplace environmental guidelines |
| 5. Record information | 5.1 Workplace information is recorded in the appropriate format |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify harvest support requirements
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, attach and set up appropriate equipment
- carry out pre-operational checks of equipment according to workplace procedures
- operate equipment safely
- identify and rectify, remove and/or report potential occupational health and safety (OHS) hazards
- collect grapes from the discharge conveyor. This should include:
  - avoiding all contact with or damage to other machinery and equipment, vines, trellises or fences
  - safe handling of equipment
  - maintaining appropriate speed and distance
  - starting off and swapping over
  - changing rows
  - day-time and night-time harvesting
  - variety of harvesting conditions and varieties
- monitor grape collection activities. This may include monitoring:
  - equipment breakages or malfunction
  - vine or trellis damage
  - grape quality and quantity
  - matter other than grapes (MOG) collected
  - load weight
  - chemical application to fruit loads
  - collection accuracy of grapes
  - tipping accuracy of grapes at receival point
  - progress
  - congestion or backlog at receival point
  - performance according to specifications
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- handle, prepare and add chemicals according to instructions
- take the necessary action to protect fruit quality where possible. This may include parking fruit carriers in a shaded area
- deliver grapes to receival point according to instructions. This may include tipping the trailer or gondola
- maintain workplace records according to workplace standards
- maintain work area to meet housekeeping standards
- use appropriate cleaning techniques
- carry out routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- key factors that will affect grape and/or wine quality. This may include:
  - temperature
  - oxidation
  - MOG collected
  - speed of processing
  - chemical addition
- features and benefits of methods to preserve grape and/or wine quality
- common problems and anomalies
- procedures and operating parameters
- significance and methods of monitoring performance
- common faults and corrective action required
- OHS hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems
- recording requirements and procedures
- cleaning requirements associated with changeovers
- shutdown sequence of equipment
- cleaning procedures
- routine maintenance procedures for equipment where relevant.

# Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

## Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

### Ability to:

- access workplace information to identify trellis requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- select appropriate materials. This will include type and quantity
- check equipment and complete pre-start checks as required
- repair trellis according to workplace standards. This may include:
  - positioning and depth of posts and strainers
  - positioning and number of wires
  - tightness and grade of wire
- lay out posts and supports according to instructions. This may include:
  - spacing
  - type
  - numbers
  - positioning
  - safe handling procedures
- run out wire according to instructions. This will include:
  - securing of ends
  - safe handling procedures
  - cutting correct length
  - positioning
- operate equipment according to instructions
- erect trellis ends and assemblies according to instructions
- attach foliage and trellis wires according to instructions. This includes:
  - spacing
  - alignment
  - height
  - tension
  - fixing method
  - joining systems (e.g. wire knots)
- recognise, rectify and/or report problems and anomalies of trellis installation
- use hand tools
- collect, sort, treat, dispose of and/or recycle waste
- identify, rectify and/or report environmental non-compliance
- clean and store equipment according to instructions
- use appropriate cleaning techniques
- implement appropriate occupational health and safety (OHS) procedures
- store unused materials
- maintain work area to meet housekeeping standards
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose, features and components of the trellis system
- trellis installation process and procedures
- common maintenance requirements of vineyard trellising and how to repair them
- common faults, problems and how to solve them
- safe handling of materials and equipment
- purpose and application of personal protective clothing and/or equipment
- OHS hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems and anomalies
- cleaning and storage requirements and procedures for equipment
- storage requirements and procedures for materials
- maintenance procedures for equipment where relevant.

**Evidence Guide**

**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

FDFWGG2018A Operate vineyard equipment

Modification History
This unit supersedes and is equivalent to FDFWGGVEQB Operate vineyard equipment.
April 2012: Minor typographical corrections.

Unit Descriptor

| Unit descriptor | This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to operate a range of vineyard equipment that does not require calibration. Where the operation of specialised equipment is required, alternative units should be selected. |

Application of the Unit

| Application of the unit | This unit applies to the operation of equipment used in wine grape growing. It includes the ability to attach, set up and detach equipment as required. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and
processes that are used in the particular winery or workplace.

**Ability to:**

- access workplace information to identify requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas
- select appropriate equipment for the task
- confirm equipment status and condition. This may include checking:
  - fuel
  - water
  - oil (e.g. engine, gearbox and hydraulics)
  - belts
  - air intake
  - tyre pressure
  - metal fatigue or wear and tear
- attach equipment to towing vehicle as required
- set up equipment as required to meet operating instructions
- start up equipment
- operate equipment to meet operating instructions. This should include:
  - driving forward and reversing
  - operating in confined spaces
  - operating amongst other vineyard activities and a variety of conditions as required
- monitor equipment performance. This may include monitoring:
  - status and condition
  - handling and stopping ability
  - operating depth of equipment
  - blockages
  - ground speed or power take-off speed
  - width and/or coverage
  - environmental operating conditions
- recognise equipment performance problems and amend and/or report as instructed
- shut down equipment in response to emergency situations
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning and storage
- clean equipment
- store equipment according to instructions
- maintain work area to meet housekeeping standards
- collect, treat, recycle or dispose of waste according to workplace procedures
- identify, rectify and/or report environmental non-compliance
- use appropriate cleaning techniques
- maintain workplace records
• carry out routine maintenance of equipment according to enterprise procedures.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- purpose, features and components of equipment
- equipment pre-start checks
- equipment operating procedures
- process specifications, procedures and operating parameters
- common causes of variation or malfunction and the corrective action required
- required weather conditions for equipment operation
- Occupational health and safety (OHS) hazards and controls in all operating conditions
- significance and methods of monitoring equipment performance
- lock-out and tag-out procedures
- recording requirements and procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- cleaning requirements of equipment associated with changeovers and types of shutdown
- cleaning procedures
- storage requirements
- shutdown sequence
- routine maintenance procedures for equipment where relevant.

<tr>
<td>record information appropriately.</td>
<td></td>
</tr>
</tbody>
</table>

**Context of and specific resources for assessment**

Assessment must occur in a real or simulated workplace where the assesse has access to:

- personal protective clothing and equipment as required
- work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
- instructions, information, specifications and schedules as required
- equipment, services and corresponding information as required
- products and materials as required
- internal and external customers and suppliers as required
- cleaning procedures, materials and equipment as required
- documentation and recording requirements and procedures.

**Method of assessment**

This unit should be assessed together with other units of competency relevant to the function or work role.

**Guidance information for assessment**

To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
## Range Statement

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.
Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information required to carry out hot water treatments
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- set up equipment for hot water treatment. This will include:
  - placing correct volumes of water in the tanks
  - calibrating data loggers
  - calibrating temperature sensors against a certified thermometer
  - calibrating thermometers
- prepare water for cool down, hot water treatment and hydration. This will include:
  - testing and adjusting chlorination levels
  - checking and adjusting temperature levels
- prepare cuttings for treatment. This may include re-hydration
- dip cuttings, fully submersing for the specified amount of time, at the specified temperature in prepared hot water
- monitor the dipping process to ensure compliance with required specifications. This will include:
  - monitoring critical control points for compliance with specifications
  - analysing readouts from data logging devices
  - maintaining level of agitation in the tanks
  - maintaining chlorine level
  - recalibrating thermometers
- cool down cuttings in prepared cooling water immediately following hot water treatment. This is already mentioned above
- store treated cuttings. This will include:
  - separating from untreated cuttings to prevent contamination
  - covering with clean covers
  - placing cuttings in vented plastic bags to prevent dehydration
  - placing cuttings in the cold room
• dispose of waste. This may include:
  • settling the water
  • racking off clean water
• use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
• work cooperatively within a culturally diverse workforce.

Required knowledge

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:
• purpose of hot water treatment
• importance of precise treatment
• consequences of mistreatment
• AVIA and workplace specifications for hot water treatments
• reasons for using different specifications for hot water treatments
• monitoring techniques to ensure temperature and water quality are within specifications
• quality assurance process for the hot water treatment process
• Occupational health and safety (OHS) hazards and controls when undertaking hot water treatments
• purpose and application of personal protective clothing and/or equipment
• correct operating procedures for equipment
• safe and effective handling of equipment
• principles of nursery hygiene
• cleaning requirements and procedures for work area and equipment
• environmental issues and controls
• waste disposal requirements and procedures
• reporting and recording requirements and procedures
• procedures and responsibilities for reporting problems and anomalies.

Evidence Guide

EVIDENCE GUIDE

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.
Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information required to operate cold storage facilities
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- identify, rectify and/or report environmental non-compliance
- maintain work area and equipment to meet workplace housekeeping and hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- follow safe work procedures to minimise hazards
- collect, treat and dispose of waste according to workplace procedures
- maintain workplace records
- interpret and apply cold room plan
- confirm equipment status and condition. This may include:
  - checking all safety standards
  - conducting pre-start checks
- move material in and out of cold room. This may include:
  - transferring stock manually
  - using a mechanical transfer device
- recognise equipment performance problems and amend and/or report as instructed
- monitor the health of cuttings during storage. This may include identifying:
  - signs of dehydration
  - signs of fungal infection
- monitor cold room facilities according to workplace procedures. This may include identifying:
  - temperature variations
  - humidity variations
  - air flow
- shut down equipment in response to emergency situations
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.
Knowledge of:
- OHS hazards and controls when working in a cold room
- Environmental issues and controls
- Principles of nursery hygiene
- Purpose and application of personal protective clothing and/or equipment
- Procedures and responsibility for reporting problems
- Lock-out and tag-out procedures
- Cleaning requirements and procedures
- Reporting and recording requirements and procedures
- Waste disposal requirements and procedures
- Principles of cold room planning
- Principles of cold room operation
- Purpose and use of components of a cold room
- Cold room equipment operating procedures
- Shutdown sequence
- Principles of maintaining cold room performance
- Methods of maintaining cold room performance
- Methods of monitoring a cold room
- Methods of packing a cold room
- Common causes of variation or malfunction and the corrective action required
- Effect of cold storage on cuttings
- Post-storage treatment of cuttings.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessees and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- Use personal protective clothing and equipment where required
- Observe housekeeping standards
- Monitor cold storage and stock conditions and make
### EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>required adjustments</th>
</tr>
</thead>
<tbody>
<tr>
<td>- shut down, clean and secure cold storage facilities</td>
</tr>
<tr>
<td>- recognise and act upon out-of-specification conditions</td>
</tr>
<tr>
<td>- record information appropriately.</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment as required
- work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
- instructions, information, specifications and schedules as required
- equipment, services and corresponding information as required
- products and materials as required
- internal and external customers and suppliers as required
- cleaning procedures, materials and equipment as required
- documentation and recording requirements and procedures.

### Method of assessment

This unit should be assessed together with other units of competency relevant to the function or work role.

### Guidance information for assessment

To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and wherever possible, over a number of assessment activities.

### Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with
### RANGE STATEMENT

Training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

</table>
| 1. Take vine cuttings | 1.1 Cutting requirements are confirmed and understood  
1.2 Equipment is checked to confirm readiness for use  
1.3 Vine cuttings are taken according to instructions  
1.4 Vine anomalies and problems are recognised, rectified and/or reported  
1.5 Equipment is maintained in good working order |
| 2. Complete vine cutting operations | 2.1 Vine cuttings are collected according to instructions  
2.2 Equipment is cleaned and stored according to instructions  
2.3 Waste is collected and disposed of according to instructions |
| 3. Prepare to process cuttings | 3.1 Work instructions on the processing of cuttings are confirmed and understood  
3.2 Facilities are cleaned and sterilised to minimise risk of contamination  
3.3 Materials are confirmed as available and ready to meet requirements  
3.4 Equipment is collected and checked for serviceability and sterilised as required by workplace procedures  
3.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures  
3.6 Work is conducted in accordance with workplace environmental guidelines |
| 4. Process cuttings | 4.1 Cuttings are treated and bundled according to instructions  
4.2 Bundles are labelled, packed and stored according to instructions  
4.3 Waste is collected and disposed of according to workplace procedures  
4.4 Problems and anomalies are identified, rectified and/or reported according to workplace procedures  
4.5 Safe work practices are employed to minimise work hazards |
| 5. Record information | 5.1 Workplace information is recorded in the appropriate format |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify cutting processing requirements
- confirm supply of necessary materials
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- handle pruning secateurs safely. This includes following the correct handling and sharpening procedures
- recognise performance problems with secateurs and correct or report them as instructed. This includes oiling moving parts and sharpening blades
- identify different parts of the grapevine. This should include identifying:
  - vine trunk and permanent framework
  - canes and/or cordons
  - tendrils and buds
- select and take vine cuttings according to instructions. This may include:
  - correct length and diameter
  - correct number of buds on the cutting
  - degree of straightness
  - cuts made correctly and cleanly
  - top cut at 45° angle or bottom bud flat, 1-2 cm from nearest bud
  - number of buds left on the vine
- collect and store vine cuttings according to instructions. This may include:
  - numbers per bundle
  - all lying the same way in the bundle (basal and distal ends)
  - secure tying of bundles
- labelling
- maintaining hydration of cuttings
- prepare chemical treatments to required concentration and ensure homogenous mix
- treat cuttings as instructed. This may include:
  - completing hydration of all cuttings
  - completing chemical treatment of all cuttings
  - removing unwanted plant material
- monitor the standard of cuttings and grade them as instructed
- bundle and label cuttings as instructed. This may include:
  - including correct numbers per bundle
  - cuttings all lying the same way in the bundle
  - tying bundles securely
  - labelling legibly and accurately
- pack and store cuttings as instructed. This may include:
  - cold room layout
  - cold room temperature variations
  - customer requirements
  - storage time requirements
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- occupational health and safety (OHS) hazards and controls
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- cleaning requirements and procedures for work area and equipment
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- environmental issues and controls
- principles of nursery hygiene
- basic components of the vine
- basic vine problems and anomalies
- cutting requirements and procedures
- cutting collection and storage requirements, including hydration
- specifications of vine cuttings
- factors that influence how a cutting should be graded and why
- common features of healthy vine cuttings
- common features of unhealthy vine cuttings
- safe preparation and handling of chemicals.

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Policies and procedures**

Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements.

**Workplace information**

Workplace information can include:

- Standard Operating Procedures (SOPs)
- specifications
- production schedules
- instructions
- routine maintenance schedules
- work notes
- Material Safety Data Sheets (MSDS)
- manufacturer instructions
- verbal direction from manager, supervisor or senior operator
## RANGE STATEMENT

### Facilities
Facilities may include:
- cold storage
- fungicide treatment areas
- storage bins or tanks
- soaking tanks

### Equipment
Equipment may include:
- secateurs
- personal protective clothing and/or equipment
- bins
- boxes
- packing machine
- counting machine
- forklift

### Materials
Materials may include:
- string
- labels
- chemicals
- sand
- water
- pallets

### Waste
Waste may include:
- off-cuts
- dropped or rejected cuttings
- packaging materials
- chinisol
- chemical containers

### Work hazards
Hazards may include:
- damaging fingers or eyes from use of tools and equipment
- manual handling
- lifting bundles
- falling over in an untidy work area
- using chemicals and disinfectants

### Problems and anomalies
Problems and anomalies may include:
- physical damage or signs of common pests and diseases, such as eutypa, phomopsis, nematodes, crown gall, diseased wood, dehydration, infection,
### RANGE STATEMENT

| Physical damage, damaged buds, immature wood | different wood characteristics indicative of a different vine variety |

### Employability Skills Information

| Employability skills | This unit contains employability skills. |

### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Monitor vineyard soil management requirements | 1.1 Vineyard soil is monitored according to workplace procedures  
1.2 Results are interpreted correctly  
1.3 Appropriate soil management activities are identified and recommended |
| 2. Implement soil management program | 2.1 Resources are coordinated and personnel briefed to deliver requirements  
2.2 Agreed soil management program is implemented |
| 3. Evaluate effectiveness of soil management activities | 3.1 Vineyard is monitored to evaluate effectiveness of activities  
3.2 Surrounding areas are monitored to evaluate environmental impact of soil management activities |
| 4. Record information | 4.1 Workplace information is recorded in the appropriate format |

### Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills include:**

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Ability to:**
• access workplace information to identify soil management requirements
• select, fit and use appropriate personal protective clothing and/or equipment
• liaise with other work areas
• consult with appropriate senior personnel
• apply sampling techniques
• conduct routine tests
• monitor the vineyard and interpret the results to identify vineyard soil management requirements. This may include monitoring:
  • soil moisture content
  • watertable level
  • weed population
  • signs of vine nutrient deficiencies
  • climatic conditions
  • cover crop practices
  • soil analyses (e.g. pH and salinity)
  • evidence of hard pans
  • soil texture
  • vine root distribution
  • nutrient levels in plant and soil
  • irrigation water quality
  • climatic conditions
  • erosion risk
  • soil management history
  • growth of mid-row sward
• calculate application rates for soil addition requirements (e.g. fertilisers and ameliorants)
• present and justify recommendations to senior personnel
• implement the soil management program. This will include consideration of:
  • resources, including operators with appropriate skills
  • equipment availability and capability
  • materials and chemicals
  • maintenance programs and supplies
  • specific needs of individual blocks
  • environmental conditions
  • other vineyard activities
• instruct operators as required
• monitor soil management activities. This will include monitoring:
  • operator performance
  • operating conditions
  • operating results
  • material supplies
- equipment performance
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- maintain work area to meet housekeeping standards
- report and/or record problems according to instructions
- plan and organise
- supervise operators according to enterprise procedures
- apply information technology systems according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

**Required knowledge includes:**

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

**Knowledge of:**

- ideal soil environment for vines plus specific requirements of grapes grown
- soil management techniques and their affect on soil, vine growth, cropping levels and wine quality
- visual signs of vine nutrient deficiencies
- sampling techniques and procedures
- routine testing techniques and procedures
- interpretation of routine tests
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems
- resource requirements and availability
- reporting and recording requirements and procedures
- consultation requirements and procedures
- supervision techniques where relevant
- information technology systems where relevant
- resources required for assessment where relevant

<td>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to assess and manually fall small trees with a low level of complexity and to complete operator maintenance.

Basic trees typical to the scope of this unit may include the following characteristics:

- lean and distribution of the crown weight does not create a complex situation to assess or fell
- small dimensions relative to local forest size distribution
- no excessive lean
- no visible damage or defect
- species that are not prone to free splitting and adverse reactions during felling
- single stem or non-complex multi-stems
- diameter of tree is less than chainsaw bar length
- grown on terrain and slope that does not add significant complexity to the operation

The unit applies to those in a forest, agricultural, local council, emergencies services and other government agency environment. With the exception of minor forest produce, it is not relevant to commercial harvesting operations.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

| 1. Prepare for felling | 1.1 Identify and adhere to work specifications and site environmental protection measures relevant to felling basic trees in line with organisational requirements and relevant regulations  
  1.2 Review and check job requirements with appropriate personnel  
  1.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations  
  1.4 Identify trees to be retained and felled  
  1.5 Establish and maintain communication with others according to WHS requirements |
| 2. Prepare for felling | 2.1 Review location and stability for conditions likely to affect felling activities  
  2.2 Identify and report site environmental conditions to appropriate personnel  
  2.3 Identify and control potential and existing risks and hazards  
  2.4 Monitor and exclude location and activity of other personnel on the work site |
| 3. Assess tree and plan felling | 3.1 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required  
  3.2 Confirm that tree is safe to fell  
  3.3 Visually assess tree for felling characteristics, defects and stresses  
  3.4 Assess and check required falling direction and possible deviation  
  3.5 Plan sequence of cuts to fell tree according to standard felling procedures  
  3.6 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements |
| 4. Apply tree felling techniques | 4.1 Fell individual trees using selected cutting techniques according to WHS and job requirements  
  4.2 Adjust cutting technique in response to movement and condition of tree |
<table>

**Foundation Skills**

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

| Numeracy skills to: | • estimate tree dimensions, including height, length, diameter and volume |
| | • complete routine calculations and report on size, length, diameter of felled trees. |
| Oral communication skills to: | • select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees |
| | • interpret hand signals with other operators to ensure safe tree felling |
| Reading skills to: | • interpret: |
| | • workplace health and safety and other organisational procedures |
| | • work orders |
| | • manufacturers’ maintenance recommendations. |
| Writing skills to: | • complete accurate basic records for tree felling process, equipment faults and maintenance requirements. |
Planning and organising skills to:

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FP111 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at a basic level
- comply with organisational policies and procedures relevant to felling trees manually at a basic level
- comply with applicable licensing or certification requirements relevant to felling trees manually
- effectively communicate and use safe working practices, including maintaining an awareness of activity by other personnel in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at a basic level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
• fell basic trees using an appropriate cuts safely without damage to personnel, equipment and surrounding environment
• identify trees that are hung up
• select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
• assess, plan and safely operate chainsaw equipment to manually fell trees at a basic level in forest, rural and community environments
• use tree felling techniques including scarf cutting, back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction.

Knowledge Evidence
A person competent in this unit must be able to demonstrate knowledge of:
• Workplace health and safety (WHS) requirements including:
  • PPE and clothing
  • safety equipment
  • first aid equipment
  • firefighting equipment
  • hazard and risk control procedures
  • fatigue management procedures
  • appropriate signage
  • elimination of hazardous materials and substances procedures
  • safe forest practices, including required actions relating to fire
  • techniques for manual handling, including shifting, lifting and carrying
• types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
• typical tree defects and how these affect tree felling activities:
  • shakes
  • insect defects
  • knots and resin pockets
  • pipe
  • drysides
• identifying trees:
  • that contain hazards and are deemed unsafe to fell
  • considered outside own skill level
  • trees where cuts made may lead to loss of control of tree in felling
• hazards and related risks and the impact on felling trees of:
  • uneven and unstable terrain
  • unsafe trees
  • fires
  • overhead and underground services
• excavations
• traffic
• structures
• hazardous materials
• insects and animals
• other personnel and machinery
• methods used to remove trees that are hung up and procedures for removal
• methods for assessing chain condition
• environmental protection measures to follow when felling trees related to:
  • native vegetation
  • soil and water
  • heritage and archeological artefacts
  • flora and fauna
  • geomorphologic features
  • landscape
  • external site pollution
  • recreational opportunities
  • regeneration opportunities
  • cleaning plant, tools and equipment
  • disposing of, recycling and reusing timber and other waste
• key features of these varying environmental conditions and their effects on basic tree felling activities:
  • general forest lean
  • ground growth
  • ground hazards and obstacles
  • ground slope
  • gullies
  • presence and density of seed and habitat trees
  • water courses
  • wet and adverse weather conditions
  • wind speed and direction
• the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  • warning signs
  • chainsaw and components
  • PPE and clothing
  • first aid equipment
  • maintenance requirements
  • support tools.
Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment that contains small trees with a low level of falling complexity
- PPE and clothing including:
  - safety helmet
  - safety gloves
  - protective footwear
  - eye protection
  - hearing protection
  - high visibility clothing
  - leg protection (trousers or chaps)
- materials and equipment including:
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers’ instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - relevant state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Application

This unit of competency describes the outcomes required to maintain engine or electrically operated hand-held chainsaws. It includes sharpening chains and completing routine and frequently required service requirements as well as periodic servicing. Work is completed in a variety of work settings including a forest environment, agricultural, workshop, arboretum and horticultural settings.

The unit applies to chainsaw operators.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete these routine and frequently required service requirements on chainsaws in line with manufacturer's instructions:
  - removing, checking and cleaning air filter for damage and penetration of foreign material
  - cleaning saw body, air intake vents and cooling fins
  - cleaning chain brake
  - inspecting chain and guide bar
  - checking screws and nuts for tightness
  - checking safety devices
  - filling fuel tanks and chain oil tanks
- complete these types of periodic service requirements on chainsaws in line with manufacturer's instructions:
  - replacing drive sprocket
  - cleaning or replacing and setting spark plug
  - checking and replacing fuel filter
  - checking chain brake, oil system, flywheel assembly, anti-vibration system, muffler and spark arrestor
  - inspecting and replacing starter cord and starter spring
• matching pitches and gauges of cutting components
• dressing and cleaning cutter bar
• cleaning fly wheel
• removing and cleaning exhaust and fire screen
• complete these activities to check and sharpen chain saw chains in line with manufacturer's instructions:
  • inspecting and adjusting chain
  • inspecting and replacing chain that is worn, damaged or incorrectly sharpened
  • sharpening chain types and setting of depth gauges.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:
• types, purpose, features and operation of chainsaws for which repairs are completed
• features and names of different parts of chainsaws
• purpose, features and operation of tools and equipment used to repair and maintain chainsaws
• specifications and types of bars, chains and sprockets
• differences between frequent and periodic chainsaw maintenance requirements
• techniques for:
  • removing chains and other chainsaw components
  • assessing chain condition
  • sharpening chains to specified requirements
  • reassembling chainsaw components
• hazards for maintaining chainsaws and methods to minimise associated risks:
  • loud noise and exhaust fumes
  • mechanical vibration
  • handling hazardous substances
  • cuts and hot surfaces
  • rotating parts
• organisational procedures specific to repairing and maintaining chainsaws:
  • workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  • communication reporting lines
  • recording and reporting repairs, maintenance activities and equipment faults
• environmental protection practices for repairing and maintaining chainsaws:
  • cleaning plant, tools and equipment
  • disposing of, recycling and reusing materials
  • disposing of hazardous substances.
Assessment Conditions

The following resources must be made available:

- engine or electrically operated hand-held chainsaws
- tools and equipment used to repair and maintain chainsaws
- consumable chainsaw parts, oil and fuel
- personal protective equipment suitable for repairing and maintaining chainsaws including:
  - Safety boots
  - Safety helmet
  - Cut resistant leg protection
  - First aid kit
  - Hearing protection
  - High visibility clothing
  - Eye protection
  - Apron
  - Chain mesh gloves
- manufacturers’ instructions and recommendations for repair and maintenance of chainsaws
- template documents for recording repairs, maintenance activities and equipment faults.
- organisational procedures for repairing and maintaining chainsaws.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and efficiently use a chainsaw to complete these activities:
  - trim and cut hardwood or softwood trees
  - delimb trees
  - trim branches
  - trim burls and other small growths
- use these cutting techniques:
  - bridging cuts
  - swinging cuts
  - side bind cuts
  - boring
  - wedge cut
  - ripping cuts
- trim and cut trees in these environmental conditions:
  - dry weather condition
  - wet weather condition
  - low and moderate wind speeds
- complete the following maintenance on a chainsaw:
• sharpening
• refuelling
• inspection, identification and replacement of bar, chain, drive sprockets
• bar oil checks and top up
• air filter, check, clean and replacement
• cleaning of saw body, air intake vents and cooling fans
• fitting spare chain and tension chain.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

• environmental protection measures including:
  • action to limit the impact of noise, wind speed and direction, fallen trees, ground slope, ground hazards and obstacles, general forest lean
  • action to limit the impact to ground growth, canopy, density of trees
  • action to limit the impact on flora, fauna and habitat
  • soil and water protection
  • cleaning plant, tools and equipment
  • disposing of, recycling and reusing timber and other waste

• key features of these varying environmental conditions and effects on tree cutting and trimming activities:
  • ground growth
  • ground hazards and obstacles
  • ground slope
  • wet and adverse weather conditions
  • wind speed and direction

• typical tree defects and how they affect tree cutting activities:
  • splits
  • falling damage
  • fire damage
  • insect infestation
  • pipe
  • shake
  • twist
  • knots and resin pockets

• typical tree stresses and how they affect tree cutting activities
  • tension (fibres being stretched)
  • compression (fibres being squashed)
  • neutral fibres

• range of chainsaw cutting techniques:
• bridging cuts
• swinging cuts
• side bind cuts
• delimming
• boring
• wedge cut
• ripping cuts
• cutting patterns used to optimise time and recovery of product from trees
• cutting sequences used to maintain control of cut sections and minimise cutting problems
• purpose, features, operation and basic non-specialist repair and maintenance: of chainsaws
• methods for assessing chain condition
• organisational procedures specific to tree trimming and cutting activities:
  • workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  • communication reporting lines
  • recording and reporting tree cutting outcomes, equipment faults and maintenance requirements.

Assessment Conditions

The following resources must be made available:
• chainsaws
• chainsaw fuel and oil containers
• support tools (hammer, wedges, logging tape, cant hook or breaking bar)
• maintenance tools and equipment for chainsaws
• personal protective equipment suitable for cutting trees and maintaining chainsaws
• manufacturers’ instructions for use and maintenance of equipment
• work order with specific instructions for tree cutting activities
• template reports for recording tree cutting outcomes, equipment faults and maintenance requirements
• organisational procedures for tree trimming and cutting activities.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<td>Replaces equivalent FPICOT3202B Navigate in remote or trackless areas, which was first released with FP111 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to navigate in untracked, remote areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids.

The unit applies to Forestry Worker, Plantation Worker, Forest Harvester, Harvesting Technical Forestry Technician, Tree Planter, Mobile Equipment Operator, Arboriculture Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management
Harvesting and Haulage
Sawmilling and Processing

Elements and Performance Criteria

</thead>
<tbody>
<tr>
<td>1. Prepare for navigation</td>
<td>1.1 Identify and gather information and relevant factors and check with appropriate personnel.</td>
</tr>
</tbody>
</table>
1.2 Select suitable maps, equipment and navigation aids and check for accuracy, currency and operational effectiveness.
1.3 Detect and correct faults or errors in maps and equipment.
1.4 Establish communication with others in line with WHS and organisational requirements

2. Plan the route
2.1 Plan route in line with work instructions and WHS requirements.
2.2 Examine maps to identify relevant symbols, information, navigation data and environmental requirements.
2.3 Calculate accurate grid and magnetic bearings using maps and equipment in line with assignment instructions.
2.4 Plan emergency exit routes and contingencies to combat other risks.

3. Conduct navigation
3.1 Undertake navigation in line with planned route and schedule.
3.2 Orientate maps are correctly to surroundings in line with planned route.
3.3 Use equipment and navigation aids in line with manufacturer recommendations.
3.4 Navigate alternative routes to bypass obstacles and improve efficiency of course.
3.5 Minimise impact on the environment as a result of navigation.
3.6 Record and report navigation activities.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

| Numeracy skills to: | • interpret scales, symbols, grid references, distance and data included on maps and navigation equipment |
| Planning and organising skills to: | • estimate resource and equipment requirements |
| Problem solving skills to: | • identify and solve problems with equipment and navigation route |

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPICOT3202B Navigate in remote or trackless areas, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
  - follow organisational policies and procedures for navigating in a remote or trackless area
  - select, interpret, and use maps and other written and diagrammatic information for navigation
  - use maps, compass and navigation aids to plan routes and navigate in remote or trackless area which must be either:
    - standard magnetic compass using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
    - global positioning system (GPS)
    - cadastral maps (maps that show the boundaries and ownership of land parcels)
    - topographic maps
    - general maps
  - plan and conduct an efficient navigation, effectively bypassing obstacles within designated timeframes
  - maintain navigation tools and equipment
  - establish and maintain effective communication with appropriate personnel as required
  - record navigation activities.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:
• regulations, standards, codes of practice and established safe practices for navigating in a remote or trackless area
• environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition on completion of activity
• organisational and site standards, requirements, policies and procedures for navigating in a remote or trackless areas
• factors that may affect navigation, including:
  • types of terrain and gradient
  • weather conditions
  • obstacles
  • distance
  • estimated travelling time
  • availability of resources, including water, rest stops, camp sites
  • access and exit routes
• use and features of various maps, images and charts including:
  • cadastral and topographic maps
  • charts
  • guide books
  • photographs and other digital imagery
  • sketches
  • diagrams
• representation of topographic features on maps and plans, including:
  • grid lines and numbers
  • contour lines
  • magnetic variation
  • scale
  • map legend
  • local features
  • markers and beacons
  • water depth
• common scales and reference information used on maps and plans
• features and uses of environmental navigation aids:
  • survey markers
  • track markers and beacons
  • signs
  • arrows
  • natural landmarks and reference points
purpose, features and operation of navigation equipment, and procedures for their safe use and maintenance, including
  • global positioning system (GPS) device
magnetic compass, including adjustment for local magnetic variation  
- locator beacons  
- personal protective equipment and clothing  
- techniques for estimating distance travelled within a particular activity context  
- established communication modes, methods and protocols  
- procedures for recording and reporting workplace information.

**Assessment Conditions**

The following resources must be made available:

- site to navigate  
- navigation equipment  
- work order, workplace requirements and site standards for navigating in remote or trackless areas.  
- communication devices  

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

**Assessor requirements**

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and  
- be able to demonstrate vocational competencies at least to the level being assessed; and  
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPICOT3238B Operate a pole saw, which was first released with FPI11 Forest and Forest Products Training Package Version 1. Change of title to more accurately reflect the intended application of unit for use of power driven pole-mounted chain saws. This is the first release in the new standards format.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to trim high branches reachable with a power driven pole saw and to promote tree growth by trimming and felling excess branches. Power driven pole saw in this unit refers to professional standard pole-mounted chain saws that are typically fuel types, but may be battery powered, and generally telescopic. It applies to those who operate a pole saw in a forest environment and includes equipment maintenance. No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- undertake trimming with a pole saw to correctly and safely demonstrate competency in the following:
  - assess trees and site conditions to work safely
  - correct use of safety attire and protective equipment
  - conduct pre-operational checks of pole saw
  - trim trees at safe height and angle in line with manufacturer recommendations and organisational safe working practices
  - select/adjust trimming sequence and cutting techniques in response to various tree characteristics and site conditions
  - conduct operator maintenance

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements and site standards for carrying out pole saw operations
- environmental risks and hazards associated with trimming trees with a pole saw
- characteristics of trees and timber defects
- Branch Bark Ridge (BBR) and Bark Branch Collar (BBC)
- appropriate trimming sequence and cutting techniques
- manufacturer recommendations and organisational safe working practices for operating a pole saw at safe height and angle limits
• methods for assessing condition of pole saw chain
• established communication channels and protocols
• problem identification and resolution strategies, and common fault finding techniques
• procedures for recording and reporting workplace information.

**Assessment Conditions**

The following resources must be made available:

• a professional standard fuel or battery powered pole-mounted chain saw with telescopic extension
• work order, workplace requirements and site standards for conducting pole saw operations
• relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

**Assessor requirements**

Assessors must:

• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow applicable workplace safety, environmental and regulatory requirements and codes of practice relevant to operating a 4x4 vehicle
- follow organisational policies and procedures relevant to operating a 4x4 vehicle, including:
  - own work role and responsibilities
  - procedural manuals
  - quality and continuous improvement
  - WHS, emergency and evacuation procedures
  - recording and reporting requirements
  - equipment use, maintenance and storage requirements
  - environmental management requirements
- communicate and work safely with others in rough terrain when operating a 4x4 vehicle
- perform pre-start checks of vehicle and equipment suitable to different terrains by checking loads and tyre pressure, selecting navigation aids and advising passengers of safety precautions
- operate safely, a 4x4 vehicle, on unsealed road conditions and different terrain types, including negotiating steep slopes, by identifying hazards and assessing risks
- use appropriate range, gear, speed, driving and braking techniques safely when operating a 4x4 vehicle on a steep slope
- demonstrate safe use of a jack to support a 4x4 vehicle while changing a tyre under relevant road terrains and conditions within the operating environment
- park and shut down 4x4 vehicle in line with manufacturer specifications and organisational requirements
- perform and document operational maintenance as permitted by vehicle operator handbook.

**Knowledge Evidence**

A person competent in this unit must be able to demonstrate knowledge of:

- four wheel drive operational information
- structural differences between conventional two wheel drive and a four wheel drive including:
  - recovery hooks and mounting features
  - purpose and use of front wheel hubs
  - factors affecting tyre size, fitment, rating and pressure
- applicable regulations, standards, codes of practice and established safe practices relevant to the operating a 4x4 vehicle
- road rules, regulations, permit and licence requirements of the relevant state or territory
- environmental protection requirements including the safe disposal of waste material
- prestart checks for 4 x 4 vehicle on:
  - fuel, either diesel, gas or petrol
  - water
  - oil
  - brake and transmission fluid levels
  - battery water levels and electrolyte checks
  - tyres
  - belts
  - leads
  - hydraulic lines and connections
  - air cleaners
  - brakes
  - off-road safety equipment
  - traction devices
- Types of communication equipment including:
  - personal location beacon (PLB)
  - flares
  - markers
  - phone
  - radio
  - V-Sheet
- safe operating conditions for a 4X4 vehicle
  - interpreting weather conditions to determine suitability for driving
- determining food, water, PPE (sunglasses, high-visibility vest, etc.) and clothing requirements for journey
- selecting routes to minimise damage to the environment
- on and off-road conditions
- traffic pattern and density
- visibility
- loading of four-wheel drive, including techniques to reduce overloading
- types of environmental risks and hazards associated with operating a 4x4 vehicle on unsealed roads including:
  - rocks and other unexpected obstacles
  - damage to vehicle
  - tidal influences
  - fire in vehicle
  - faulty brakes
  - leaking fuel
  - faulty steering mechanism on vehicle
  - animals and objects in vehicle path
  - crocodiles and snakes in some areas
  - windy or foggy sections of terrain
  - steep slopes
  - side slopes
  - slippery surfaces
  - land slides
  - overhead tree limbs
  - black ice
  - towing trailers
  - other vehicles
  - fallen trees, limbs and logs
  - icy terrain
  - flooded terrain
  - oil on road
  - parked vehicles on road
  - pedestrians on or near the road
  - poor visibility
- 4x4 driving techniques in different terrains including:
  - smooth
  - rough
  - uneven
Assessment Requirements for FWPCOT3259 Operate a four wheel drive on unsealed roads

- slippery
- wet
- boggy
- sandy
- steep or hilly
- rock
- icy
- snow
- mud, including:
  - brown clay
  - black silt
  - salt pan mud
  - red
  - hard ground
  - water
- operational knowledge of a 4x4 vehicle, including controls, instruments, indicators and their use
- tyre management principles for checking, changing and maintenance
- workplace communication channels and protocols
- techniques for travelling in convoy
- problem identification and resolution strategies, and common fault-finding techniques relevant to safely operating a four wheel drive vehicle
- types of tools and equipment relating to a 4x4 vehicle, and procedures for their safe use and maintenance
- maintenance equipment including spares and fluids
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:
- workplace location or simulated workplace offering conditions including different terrain on unsealed roads and steep slopes
- materials and equipment relevant to undertaking work applicable to this unit, including manual or automatic four-wheel drive or all-wheel drive
- specifications and work instructions relevant to workplace requirements and the safe operation of four wheel drive vehicles
- personal protective equipment required for operating a four wheel drive on unsealed roads
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

## Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

| Numeracy skills to: | • interpret a range of complex abstract numerical data  
|                     | • complete highly technical and complex calculations using equations  
|                     | • record abstract data with precision and prepare interpretative charts and graphs. |

| Reading skills to: | • interpret highly technical, complex and unfamiliar information within international and Australian protocol and convention documents. |

| Writing skills to: | • document clear explanatory notes for calculations. |

| Planning and organising skills to: | • source, collect and organise a range of data to inform carbon emission calculations  
|                                   | • plan and organise collection of all required information and manage own timing and productivity to complete calculations. |

| Technology skills to: | • use a computer, keyboard and spreadsheet software to prepare and maintain calculations. |

These sections simplify and replace components used in the previous unit format, including ‘Required Skills and Knowledge, Evidence Guide and Range Statement’.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- For a given forest and wood products industry organisation within any sector:
  - identify mandatory and voluntary obligations for carbon accounting
  - define organisational objectives for participating in carbon accounting processes
  - define boundaries for the carbon inventory
  - select a methodology for carbon accounting calculations for emissions and offsets
- Complete two different carbon accounting calculations for two different time periods in line with the selected methodology and include the following factors:
  - direct greenhouse gas (GHG) emissions
  - indirect GHG emissions
  - on-site and off-site emissions (geographical)
  - upstream emissions
  - downstream emissions
  - full cycle accounting
  - non-CO2 emissions; soil disturbance, fertilisation, biomass combustion

In forest applications also consider the following:

- above ground biomass
- below ground biomass
- dead organic matter - wood, litter
- soil organic matter
Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Methods to access, locate and select applicable objectives and key content in relevant international and national conventions, protocols, standards and guidance frameworks, including the following key references:
  - Kyoto Protocol
  - ISO 14000 essentials:
    - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
  - Greenhouse Gas Protocol Corporate Standard
  - Copenhagen Agreement
  - National Greenhouse Accounts (NGA) Factors Workbook
  - Key drivers for carbon accounting
  - Basic theory of the greenhouse effect and its impacts
  - Basic principles of the carbon cycle and influences
  - Carbon accounting terminology, frameworks and methods used to calculate carbon emissions and offsets
- Types of emissions and offset sources included in common calculations:
  - Direct GHG emissions
  - Indirect GHG emissions
  - On-site and off-site emissions (geographical)
  - Upstream emissions
  - Downstream emissions
  - Full cycle accounting
  - Non-CO2 emissions; soil disturbance, fertilisation, biomass combustion
- Sources of secondary data for carbon accounting
  - national statistical agencies
  - research institutes
  - information from sectoral experts
- Organisational and operational boundaries for the carbon inventory
- The full range of organisational emission sources and methods used to select key emission factors for calculations.

Assessment Conditions

The following resources must be made available:

- Computer, keyboard and spreadsheet software to prepare and maintain calculations
- Documents, spreadsheets and commonly used proformas for calculating carbon emissions
• Access to international and national conventions, protocols, standards and guidance frameworks including the following key references:
  • Kyoto Protocol
  • ISO 14000 essentials:
    • ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
  • Greenhouse Gas Protocol Corporate Standard
  • Copenhagen Agreement
  • National Greenhouse Accounts (NGA) Factors Workbook

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:
• Hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</table>
| 1       | Replaces equivalent unit FPICOT6205A Prepare an enterprise carbon management report which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including ‘Required Skills and Knowledge, Evidence Guide and Range Statement’.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- For a given forest and wood products industry organisation within any sector:
  - identify mandatory and voluntary obligations for reporting on carbon management
  - identify content mandated by standards or regulatory bodies
  - develop one report for one specified reporting time period using organisational styles and formats
  - include the following information in the report:
    - content mandated by standards or regulatory bodies
    - organisational drivers for carbon accounting and reporting
    - diagram of organisational and operational boundaries for the carbon inventory
    - organisational emissions sources, offsets and their scope
    - summary carbon inventory table
    - whether or not the organisation’s total carbon emissions breach any reporting thresholds
    - financial implications and risks for the organisation of various carbon price signals
    - setting of carbon reduction targets and objectives for the organisation
    - options for the introduction of new carbon management principles
    - recommended actions for reducing organisational greenhouse gas emissions
    - recommended actions for improving carbon accounting and reporting
    - barriers experienced when developing the inventory and report.
Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Methods to access, locate and select applicable objectives and key content in relevant international and national conventions, protocols, standards and guidance frameworks, including the following key references:
  - Kyoto Protocol
  - ISO 14000 essentials:
    - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
  - Greenhouse Gas Protocol Corporate Standard
  - Copenhagen Agreement
- Voluntary and mandatory requirements for reporting on carbon management to meet requirements of standards and regulation and required content.
- Key drivers for carbon accounting and reporting.
- Basic theory of the greenhouse effect and its impacts
- Basic principles of the carbon cycle and influences.
- Carbon accounting terminology, frameworks and methods used to report calculations for carbon emissions and offsets.
- Types of emissions and offset sources included in common calculations and reports, including:
  - direct GHG emissions
  - indirect GHG emissions
  - on-site and off-site emissions (geographical)
  - upstream emissions
  - downstream emissions
  - full cycle accounting
  - non-CO2 emissions; soil disturbance, fertilisation, biomass combustion
- Organisational and operational boundaries for the carbon inventory.
- The full range of organisational emission sources and methods used to select key emission factors for calculations and reports.

In forest applications a person must also be able to demonstrate knowledge of the following as they apply to preparing an enterprise carbon management report:

- above ground biomass
- below ground biomass
- dead organic matter - wood, litter
- soil organic matter
Assessment Conditions

The following resources must be made available:

- Computer, keyboard and software to prepare and maintain reports.
- Access to International and national conventions, protocols and standards:
  - Kyoto Protocol
  - ISO 14000 essentials:
    - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
  - Copenhagen Agreement
  - Carbon inventory data for the organisation.
  - Organisational formats and style guides for the presentation of reports.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Complete a research project to determine and report on compliance requirements for a given organisation operating in a given forest location covering requirements for:
  - commonwealth, state or territory law
  - local government regulations
  - international treaties, conventions and initiatives.
- Develop a suite of systems and processes to maintain compliance with the identified requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Objectives and key content of commonwealth, state or territory and local government laws and regulation relevant to forest management, including key areas of:
  - land ownership
  - boundary management
  - environmental management
  - access
  - silviculture
  - harvesting
  - forest protection
Assessment Requirements for FWPCO T6207 Develop forest management systems and processes

Methods to access, locate and select applicable objectives and key content of international and national treaties, conventions and initiatives relevant to forest management, the following key references:
- Australian Standard for Sustainable Forest Management AS4708 endorsed by PEFC
- Forest Stewardship Council (FSC) Certification
- Factors to be considered in assessing forest management issues inherent to different types of forests.
- Forest management issues that impact on the organisation and its practices.
- Scope of forest operations and activities of the organisation, including:
  - operations in national parks
  - other operations on public land
  - operations on private land
  - timber growing and harvesting
  - fire management
- Strategic and operational factors impacting on organisational forest management processes and decision making, including:
  - fire management planning
  - flora and fauna planning
  - planning for environmental protection and monitoring
  - regulatory compliance issues
  - compliance with international treaties, conventions and initiatives
  - location and nature of sites
  - organisational policy and operational guidelines
  - public liabilities and exposure to risk
  - risk-management strategies and policies
- Financial and business administration principles relevant to organisational needs.

Assessment Conditions

The following resources must be made available:
- Computers, keyboards and software used to create system documents.
- Commonwealth, state or territory laws and local government regulations (or plain English documents issued by regulators) relevant to forest management.
- International treaties, conventions and initiatives relevant to forest management.
- Publications and journals relevant to forest management.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<td>Release 1</td>
<td>Replaces equivalent unit FPIFGM2207B Undertake brushcutting operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- assess, plan and safely complete brushcutting jobs in line with work order prescribing areas and types of vegetation to be cut
- on completion of each of the above jobs:
  - dispose of cut vegetation in line with environmental protection practices
  - complete operator maintenance operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
  - compete basic records for equipment faults and maintenance requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- typical workplace hazards associated with operating brushcutters and methods of minimising risks:
  - ground growth
  - ground slope
  - ground hazards
  - noise
  - weather
  - kickback
- flying objects
- safe working distances from other people present
- purpose, features and safe operation of brushcutters
- the correct ergonomic position in which to conduct brushcutter operations, including using a safety harness and handle adjustments
- methods for assessing blade condition, removing and replacing
- operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
- different types of vegetation and the appropriate brushcutting methods
- environmental protection practices for disposing of cut vegetation:
  - recycling vegetation where appropriate
  - sending vegetation to landfill only where it cannot be recycled
  - redirecting vegetation for energy recovery.
- organisational procedures specific to brushcutting operations:
- workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
- communication reporting lines
  - recording and reporting equipment faults and maintenance requirements.

**Assessment Conditions**

The following resources must be made available:
- brushcutters
- maintenance tools and equipment for removing and replacing blades
- consumable fuel, brushcutter blades and other components
- personal protective equipment suitable for operating brushcutters
- manufacturers’ instructions for use and maintenance of equipment
- work order with specific instructions for brushcutting operations
- template documents for recording equipment faults and maintenance requirements
- relevant personnel for the purposes of communicating information
- organisational procedures for operating brushcutters.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

**Assessor requirements**

Assessors must:
- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</tbody>
</table>

Application

This unit of competency describes the outcomes required to plan and monitor the implementation of seed collection or sowing programs. The unit includes collection of native and non-native species.

The unit applies to those who manage seed collection in settings such as: forest environments, farms, agriculture, nurseries and local councils.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

<tbody>
<tr>
<td>1. Plan seed collection</td>
<td>1.1 Analyse seeding and/or planting program and identify seed characteristic requirements.</td>
</tr>
</tbody>
</table>
1.2 Identify seed collection opportunities and determine a suitable area for seed collection.

1.3 Select seed collection methods and determine the quantity, cost and impacts on provenances and species.

1.4 Identify the required approvals and seek and obtain from relevant authorities.

1.5 Determine measurable performance indicators, specifications and targets.

1.6 Seed collection plan, costs and performance indicators are clearly documented and communicated to appropriate personnel.

2. Implement and monitor seed collection

2.1 Coordinate and schedule resources required for seed collection.

2.2 Establish and maintain communication with others to ensure safety.

2.3 Implement the seed collection plan.

2.4 Monitor seed collection activities to ensure compliance requirements are adhered to.

2.5 Adjust seed collection activities to meet site conditions and communicate to appropriate personnel.

3. Review seed collection

3.1 Assess and evaluate data from seed collection activity to confirm techniques, methodologies and costs are in line with plan.

3.2 Identify issues and impediments to seed collection activities and program costs.

3.3 Prepare a cost benefit analysis and make recommendations to improve future seed collecting activity.

3.4 Record and report seed collection activity to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
  - follow legal and regulatory requirements, and codes of practice for managing seed collection
  - follow organisational policies and procedures for managing seed collection
  - develop a plan for seed collection which includes measurable performance indicators, specifications and targets
  - coordinate and schedule resources, and manage the work of others to achieve specific outcomes
  - monitor seed collection operations, ensuring that activity follows quality standards
  - document results from seed collection activities and prepare a report for relevant personnel.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for managing seed collection
- organisational and site standards, policies and procedures for managing seed collection
- environmental risks and hazards of seed collection
- seed collection methods including:
  - climbing
• removal of branches with rifle
• elevated platform vehicles
• collecting after falling or felling
• ladders
• shaking
• biological signs that indicate that the seed crop is ready to be collected
• procedures to extract and handle seed from collected material, including handling procedures of the seed crop after picking
• treatment and documentation requirements of extracted seed
• characteristics of seed including:
  • provenance
  • potential growth characteristics
  • forest types
  • optimum time to collect
  • physiology and biology
  • dormancy
  • species
• process for approvals to undertake seed collection
• established communication channels and protocols
• procedures for recording and reporting workplace information.

**Assessment Conditions**

The following resources must be made available:
• seed collection site
• tools and equipment required to collect seed
• relevant personnel for the purposes of communicating information
• organisational requirements and standards for managing seed collection.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

**Assessor requirements**

Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

1.3 Weigh and label containers with identifiers in line with site procedures.
1.4 Store material in dry and well-ventilated conditions.

2. Extract seed
2.1 Plan and check seed extraction processes for safe working conditions
2.2 Select appropriate extraction units and equipment and check for operational effectiveness.
2.3 Operate and monitor seed extraction systems to extract maximum seed yield.
2.4 Inspect seed capsules and reprocess as required to ensure maximum yield.

3. Clean and store seed
3.1 Weigh and store separated seed in line with species requirements and site procedures.
3.2 Accurately record seed information.
3.3 Package seed for storage with label to maintain traceability to collection source.

4. Clean and maintain extraction unit
4.1 Clean, maintain and calibrate extraction units and equipment.
4.2 Dispose of residue and other waste material in line with site environmental management guidelines.
4.3 Report abnormal operation or faults in equipment for corrective action.
4.4 Clean and maintain work areas in line with site procedures, and organisational and environmental requirements.
4.5 Record and report results of seed extraction process.

**Foundation Skills**

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

- calibrate scales, ensuring compliance with weights and measure authority.
- correctly label seeds
- complete records, reports and maintenance logs.

These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- apply safe and efficient techniques to identify, extract, clean and store seed in line with species requirements, work order and organisational guidelines
- operate seed extraction units and equipment including
  - kilns operated by gas, solar energy, oil or electricity
  - sieves of various sizes
  - air-drying racks and trays
  - conveyor belt
- clean, maintain and calibrate seed extraction units and equipment
- record seed species information and extraction results including
  - species name
  - weight
  - place or origin
  - container identifier.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:
• regulations, standards, codes of practice and established safe practices for extracting seed
• organisational and site standards, policies and procedures for extracting seed
• environmental protection requirements for extracting seed
• the cleaning maintenance and calibration of plant, tools and equipment
• hazards associated with seed extraction, processing and storage
• seed species, including native and non-native
• seed extraction processes
• identification of seed species from capsules
• storage procedures and requirements for different seed species
• procedures for recording and reporting workplace information.

Assessment Conditions
The following resources must be made available:
• manual or automated seed extraction equipment
• material with seed to be extracted
• relevant personnel for the purposes of communicating information
• documents, spreadsheets and commonly used proforma documents
• work order, workplace requirements and site standards for extracting seed.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

<td>Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FP111 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

Persons competent in this unit should be able to effectively fell most trees except very large trees, and/or those with significant defects and/or characteristics that cause excessive complexity.

It applies to trees that have a diameter greater than the bar length of the chainsaw.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution, which can be assessed and readily adapted to falling direction with the use of wedges and/or control with hinge-wood
- various dimensions relative to local forest size distribution
- limited visible damage or defect
- species prone to free splitting and adverse reactions during felling
- single or multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at an intermediate level
- comply with organisational policies and procedures relevant to felling trees manually at an intermediate level
- comply with applicable licensing and certification requirements relevant to felling trees at an intermediate level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an intermediate level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell intermediate trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up
- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at an intermediate level in forest, rural and community environments
- use tree felling techniques including scarf cutting, back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction

**Knowledge Evidence**

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
  - PPE and clothing
  - safety equipment
  - first aid equipment
  - firefighting equipment
  - hazard and risk control procedures
  - fatigue management procedures
  - appropriate signage
  - elimination of hazardous materials and substances procedures
  - safe forest practices, including required actions relating to fire
  - techniques for manual handling, including shifting, lifting and carrying
  - types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree

- typical tree defects and how these affect tree felling activities:
  - shakes
  - insect defects
  - knots and resin pockets
  - pipe
  - drysides

- Identifying trees:
  - that contain hazards and are deemed unsafe to fell
  - considered outside own skill level
  - trees where cuts made may lead to loss of control of tree in felling

- hazards and related risks and the impact on felling trees of:
  - uneven and unstable terrain
  - unsafe trees
  - fires
  - overhead and underground services
  - excavations
- traffic
- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
  - native vegetation
  - soil and water
  - heritage and archeological artefacts
  - flora and fauna
  - geomorphologic features
  - landscape
  - external site pollution
  - recreational opportunities
  - regeneration opportunities
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on intermediate tree felling activities:
  - general forest lean
  - ground growth
  - ground hazards and obstacles
  - ground slope
  - gullies
  - presence and density of seed and habitat trees
  - water courses
  - wet and adverse weather conditions
  - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  - warning signs
  - chainsaw and components
  - PPE and clothing
  - first aid equipment
  - maintenance requirements
  - support tools
Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
  - Safety helmet
  - Safety gloves
  - Protective footwear
  - Eye protection
  - Hearing protection
  - High visibility clothing
  - Leg protection (trousers or chaps)
- materials and equipment including:
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers’ instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - applicable state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.

Persons competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution that adds significant complexity yet can be assessed and adapted to site requirements
- larger dimensions relative to local forest size distribution
- substantial lean
- damage or defect that requires complex felling techniques
- multi-legged, hollow butts, culls and stags
- species prone to free splitting and adverse reactions during felling
- single or complex multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add significant complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

© Commonwealth of Australia, 2019
Skills Impact
appropriaive personnel where required

3.6 Monitor and exclude location and activity of other personnel on the work site

4. Apply tree-felling techniques

4.1 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements

4.2 Fell individual trees using planned techniques according to site requirements, at a safe distance from other personnel in the work area

4.3 Adjust cutting technique in response to movement and condition of tree

4.4 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable

4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen

4.6 Identify and implement procedures for removal of trees that are hung-up

4.7 Dispose of waste materials in line with environmental and operational requirements

4.8 Detect, rectify and report blunt or damaged saw chain according to workplace procedures

4.9 Monitor chainsaw for operational effectiveness and record and report faults, malfunctions and problems according to workplace procedures

---

**Foundation Skills**

*This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.*

| Numeracy skills to: | • measure and record tree height, length and diameter
| | • estimate, measure and compare height, size and distance relevant to tree felling
| | • calculate product mass of individual trees and determine fall zone

| Oral communication skills to: | • select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees
| | • interpret hand signals with other operators to ensure safe tree felling

| Reading skills to: | • interpret:
| | • workplace health and safety, industry standards and
regulations for felling trees and other relevant tree felling procedures
  • work orders
  • manufacturers maintenance recommendations

Writing skills to:
  • complete forms to record WHS considerations for felling trees
  • report equipment faults and request maintenance of equipment.
  • complete log book requirements

Planning and organising skills to:
  • identify an unsafe tree.
  • efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.

Problem solving skills to:
  • plan and apply the hierarchy of risk control
  • review and identify work requirements
  • recognise own limitations in conditions and trees for felling
  • identify problems and equipment faults and demonstrate appropriate response procedures

</thead>
<tbody>
<tr>
<td>1</td>
<td>Replaces equivalent unit FPIFGM3213 Fall trees manually (advanced), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including OHS, environmental and organisational policies and procedures relevant to felling trees at an advanced level
- comply with applicable licensing or certification requirements relevant to felling trees manually at an advanced level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an advanced level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell advanced trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment
• identify trees that are hung up
• select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
• assess, plan and safely operate chainsaw equipment to manually fell trees at an advanced level in forest, rural and community environments
• use tree felling techniques including scarf cutting, back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction

**Knowledge Evidence**

A person competent in this unit must be able to demonstrate knowledge of:

• workplace health and safety (WHS) requirements including:
  • PPE and clothing
  • safety equipment
  • first aid equipment
  • firefighting equipment
  • hazard and risk control procedures
  • fatigue management procedures
  • appropriate signage
  • elimination of hazardous materials and substances procedures
  • safe forest practices, including required actions relating to fire
  • techniques for manual handling, including shifting, lifting and carrying
• types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
• typical tree defects and how these affect tree felling activities:
  • shakes
  • insect defects
  • knots and resin pockets
  • pipe
  • drysides
• Identifying trees:
  • that contain hazards and are deemed unsafe to fell
  • considered outside own skill level
  • trees where cuts made may lead to loss of control of tree in felling
• hazards and related risks and the impact on felling trees of:
  • uneven and unstable terrain
  • unsafe trees
  • fires
  • overhead and underground services
  • excavations
  • traffic
• structures
• hazardous materials
• insects and animals
• other personnel and machinery
• methods used to remove trees that are hung up and procedures for removal
• methods for assessing chain condition
• environmental protection measures to follow when felling trees related to:
  • native vegetation
  • soil and water
  • heritage and archeological artefacts
  • flora and fauna
  • geomorphologic features
  • landscape
  • external site pollution
  • recreational opportunities
  • regeneration opportunities
  • cleaning plant, tools and equipment
  • disposing of, recycling and reusing timber and other waste
• key features of these varying environmental conditions and their effects on advanced tree felling activities:
  • general forest lean
  • ground growth
  • ground hazards and obstacles
  • ground slope
  • gullies
  • presence and density of seed and habitat trees
  • water courses
  • wet and adverse weather conditions
  • wind speed and direction
• the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
  • warning signs
  • chainsaw and components
  • PPE and clothing
  • first aid equipment
  • maintenance requirements
  • support tools
Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
  - safety helmet
  - safety gloves
  - protective footwear
  - eye protection
  - hearing protection
  - high visibility clothing
  - leg protection (trousers or chaps)
- materials and equipment including:
  - warning signs
  - chainsaw and components
  - first aid equipment
  - maintenance tools and equipment
  - support tools
  - manufacturers’ instructions for use and maintenance of equipment
  - radio or communication device
  - fire fighting equipment (if prescribed)
- specifications and work instructions, including
  - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
  - policy and procedures for work health and safety (WHS)
  - risk assessment plan
  - general and specific environmental requirements
  - applicable state or territory logging code of practice
  - emergency and evacuation procedures
  - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Application

This unit of competency describes the outcomes required to develop a tree inventory plan to manage an inventory of forestry timber assets. The unit applies to those people who manage forests for enterprises but may also apply to people who have responsibility for sustainable tree management in urban or rural enterprises.

The unit applies to job roles including Forest Auditor, Forest Planner, Environmental Manager, Environmental Planner Forest Sustainability Manager And Sustainability Manager.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including ‘Required Skills and Knowledge, Evidence Guide and Range Statement’.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Develop a comprehensive written plan to manage sustainability tree inventory for a given site.
- Incorporate these inclusions in the plan:
  - risk management strategy to manage and minimise risks
  - quality assurance practices for collecting, documenting and verifying data
  - required data collection and administrative tools
  - required human resources and responsibilities
  - data recording methodology
  - recording and reporting procedures.
- For a specified period, analyse data and record and report on the following types of outcomes:
  - established growth rates
  - established volumes
  - forecasted outputs
  - forecasted sustainability
  - monitored sustainability
  - preserved forest sustainability.
- Evaluate the effectiveness of the tree inventory plan and complete a report including recommendations for improving future plans and tree management approach.
Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Role of wood or waste products in generating renewable energy through biomass.
- Behavioural characteristics of a range of tree species.
- Silvicultural practices associated with management objectives.
- Key sustainability indicators for tree management.
- Key content and application of mensuration theory.
- Risks involved managing a sustainable tree inventory and methods used to minimise impacts, including:
  - biological
  - pests and diseases
  - weather and climate change
  - economic risk
  - erosion
  - fire
  - market failure
  - natural disaster
  - sabotage
  - water
  - structural failure.
- External influences and how they impact on managing a sustainable tree inventory, including:
  - international and Australian forestry and environmental standards
  - state, territory and local laws
  - advisory standards and codes of practice
  - land tenure and access
  - neighbouring tenure and access
  - habitat
  - cultural and heritage sites
  - agriforestry arrangements
  - fire management
  - data availability
  - human resource skills and availability.
- Purpose, features and application of inventory management tools, including:
  - measuring or diameter tapes
  - dataloggers and laptops
  - log sheets
  - compass
  - clinometer
  - height sticks
- prisms
- mobile GPS
- maps
- survey and title data
- survey equipment
- gantt charts
- flow charts.

- Key features and benefits of different recording methodologies, including:
  - dataloggers
  - log sheets
  - manual or electronic data transfer
  - analytical techniques and formulae
  - radio, UV, laser advanced technology
  - digital dataloggers and laptop computers
  - desk or field surveys
  - testing and calibration records.

- Organisational procedures specific to managing sustainable tree inventory:
  - communication reporting lines
  - database management and document control.

**Assessment Conditions**

The following resources must be made available:

- Computers, keyboards, printers and software used to document plans and reports.
- Administrative tools and equipment for managing sustainable tree inventory:
  - filing systems
  - field templates
  - operational manual
  - land access information
  - gantt charts
  - flow charts.
- Documents and commonly used proformas used to document risk management strategies and tree inventory plans.
- Organisational procedures for managing sustainable tree inventory.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

**Assessor requirements**
Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

</tbody>
</table>

Application

This unit of competency describes the outcomes required to operate a mobile chipping or mulching unit to chip or mulch timber refuse such as branches and other timber waste left after felling operations. Work is completed in a forest or forest farm setting. The unit applies to those who operate a mobile chipping or mulching unit in a forest environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Harvesting and Haulage

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements describe the essential outcomes.</th>
<th>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</th>
</tr>
</thead>
</table>
| 1. Prepare for mobile chipping or mulching. | 1.1 Review work order and where required check with appropriate personnel.  
1.2 Select appropriate personal protective and other equipment and check for operational effectiveness.  
1.3 Identify type and quantity of timber refuse to be chipped or mulched. |
FWPHAR2206 Operate a mobile chipper/mulcher

1. Plan chipping or mulching activities in line with work order.

2. Chip or mulch timber refuse

   2.1 Reject timber refuse assessed as unsuitable for chipping or mulching and dispose of or recycle in line with environmental protection practices.

   2.2 Use equipment in line with organisational safety procedures, manufacturer’s instructions and environmental protection requirements.

   2.3 Position, secure and set up chipping and mulching unit in line with manufacturer’s specifications and required size.

   2.4 Direct timber refuse into chipper or mulcher at rate applicable to machine capacity.

   2.5 Chip timber refuse to chip sizes specified in work order.

   2.6 Respond to critical situations requiring emergency shutdown to prevent personal injury or damage to machine or product.

3. Complete operator maintenance.

   3.1 Follow organisational safety procedures to lock out equipment.

   3.2 Check cutters for wear and damage at appropriate or recommended intervals.

   3.3 Remove, replace and dispose of cutters in line with manufacturer’s recommendations, site procedures and environmental protection practices.

   3.4 Complete operator maintenance tasks in line with manufacturer’s recommendations and site procedures.

   3.5 Record and report production outcomes and equipment faults to appropriate personnel.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:

- identify quantities of required material within work orders
- read basic numerical machine settings and choose according to chip size
- complete routine production records involving quantities tallied against orders.

Oral communication skills to:

- ask questions and actively listen to clarify contents of work orders.
Reading skills to:
- interpret workplace health and safety and other organisational procedures
- work orders
- manufacturers’ instructions and maintenance recommendations.

Writing skills to:
- complete accurate basic records for production outcomes and equipment faults.

Planning and organising skills to:
- efficiently and logically sequence the stages of preparation and processing activities using work order to guide activities.

These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</td>
</tr>
</tbody>
</table>

Performance Evidence
A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete chipping and mulching jobs in line with individual work orders which prescribe different quantities of timber refuse and different chip sizes
- complete operator maintenance, including fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement to manufacturer recommendations and site procedures.

Knowledge Evidence
A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest and forest farm settings:
  - reducing water and energy use
  - cleaning plant, tools and equipment
  - disposing of, recycling and reusing timber
- types of timber refuse suitable and unsuitable for chipping and mulching
- purpose, features and operation of mobile chipping and mulching units
- capacity of chippers and mulchers to cope with differing sizes and diameters of branch
- feed rates at which waste is fed into chippers and mulchers to optimise output without damaging or blocking machinery
- methods for checking cutting blade condition
• operator maintenance procedures including for fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement
• common hazards associated with chipping and mulching operations and methods to minimise associated risks
• organisational procedures specific to chipping and mulching timber refuse:
  • workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
  • communication reporting lines
  • recording and reporting production outcomes and equipment faults.

Assessment Conditions
The following resources must be made available:
• mobile chipping and mulching units feeding into a truck or other form of transportation:
  • truck mounted
  • trailer mounted
• tools and consumables for operator maintenance
• tools and equipment for removing and replacing cutters
• consumable cutters
• personal protective equipment suitable for chipping and mulching timber refuse
• timber refuse for processing
• manufacturers’:
  • instructions for equipment use
  • recommendations for operator maintenance
• work order with specific instructions for chipping or mulching timber refuse
• template documents for recording production outcomes and equipment faults
• relevant personnel for the purposes of communicating information
• organisational procedures for chipping and mulching timber refuse.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements
Assessors must:
• hold the appropriate assessor competency standards as outlined in regulations; and
• be able to demonstrate vocational competencies at least to the level being assessed; and
• be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence

- modification history to reflect 2012 standards  
Equivalent outcome. |
| Release 4 | Updated mapping information. Changes to assessment requirements. Equivalent outcome. |
| Release 3 | Updated mapping information. Equivalent outcome. |
| Release 2 | Updated mapping information. Equivalent outcome. |
| Release 1 | This version was released in *HLT Health Training Package release 1.0* and meets the requirements of the 2012 Standards for Training Packages.  
Significant changes to elements and performance criteria.  
Revised evidence requirements, including volume and frequency of assessment. |

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR, in a range of situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*
# Elements and Performance Criteria

</tbody>
</table>

## 1. Respond to an emergency situation

1.1 Recognise an emergency situation
1.2 Identify, assess and minimise immediate hazards to health and safety of self and others
1.3 Assess the casualty and recognise the need for CPR
1.4 Seek assistance from emergency response services

## 2. Perform CPR procedures

2.1 Perform cardiopulmonary resuscitation in accordance with ARC guidelines
2.2 Display respectful behaviour towards casualty
2.3 Operate automated external defibrillator (AED) according to manufacturer’s instructions

## 3. Communicate details of the incident

3.1 Accurately convey incident details to emergency response services
3.2 Report details of incident to workplace supervisor as appropriate
3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

# Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Unit Mapping Information

No equivalent unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
• performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
• responded appropriately in the event of regurgitation or vomiting
• managed the unconscious breathing casualty
• followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
• followed the prompts of an automated external defibrillator (AED)
• Responded to at least one simulated first aid scenario contextualised to the candidate’s workplace/community setting, including:
  • demonstrated safe manual handling techniques
  • provided an accurate verbal or written report of the incident

Knowledge Evidence
The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

• State/Territory regulations, first aid codes of practice and workplace procedures including:
  • ARC Guidelines relevant to the provision of CPR
  • safe work practices to minimise risks and potential hazards
  • infection control principles and procedures, including use of standard precautions
  • requirements for currency of skill and knowledge
• Legal, workplace and community considerations, including:
  • awareness of potential need for stress-management techniques and available support following an emergency situation
  • duty of care requirements
  • respectful behaviour towards a casualty
  • own skills and limitations
  • consent
  • privacy and confidentiality requirements
  • importance of debriefing
• Considerations when providing CPR, including:
  • airway obstruction due to body position
  • appropriate duration and cessation of CPR
  • appropriate use of an AED
  • chain of survival
  • standard precautions
• Basic anatomy and physiology relating to:
  • how to recognise a person is not breathing normally
  • chest
• response/consciousness
• upper airway and effect of positional change

Assessment Conditions
Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment resources must include:
• adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
• AED training device
• workplace injury, trauma and/or illness record, or other appropriate workplace incident report form

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor Requirements
Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Application

This unit describes the skills and knowledge required to recognise and respond to life-threatening emergencies in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide an emergency response in a range of situations, including community and workplace settings.

*Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*
**Elements and Performance Criteria**

</tr>
</tbody>
</table>

1. Respond to an emergency situation

1.1 Recognise an emergency situation

1.2 Identify, assess and minimise immediate hazards to health and safety of self and others

1.3 Assess the casualty and recognise the need for first aid response

1.4 Assess the situation and seek assistance from emergency response services

2. Apply appropriate first aid procedures

2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines

2.2 Provide first aid in accordance with established first aid principles

2.3 Display respectful behaviour towards casualty

2.4 Obtain consent from casualty where possible

2.5 Use available resources and equipment to make the casualty as comfortable as possible

2.6 Operate first aid equipment according to manufacturer’s instructions

2.7 Monitor the casualty’s condition and respond in accordance with first aid principles

3. Communicate details of the incident

3.1 Accurately convey incident details to emergency response services

3.2 Report details of incident to workplace supervisor as appropriate

3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies
Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Significant changes to elements and performance criteria, changes to scope of unit. Changes to evidence requirements relative to revised scope of unit. |

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:  
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate’s workplace/community setting, including:
  - demonstrated safe manual handling techniques
  - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
  - allergic reaction
  - anaphylaxis
  - bleeding control
  - choking and airway obstruction
  - respiratory distress, including asthma
  - shock

**Knowledge Evidence**

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - Infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
  - respectful behaviour towards a casualty
  - own skills and limitations
  - consent
  - privacy and confidentiality requirements
  - importance of debriefing
- considerations when providing basic emergency life support, including:
  - airway obstruction due to body position
• appropriate duration and cessation of CPR
• appropriate use of an AED
• chain of survival
• standard precautions

• principles and procedures for first aid management of the following scenarios:
  • allergic reaction
  • anaphylaxis
  • bleeding control
  • cardiac conditions, including chest pain
  • choking and airway obstruction
  • respiratory distress, including asthma
  • shock
  • stroke

• basic anatomy and physiology relating to:
  • considerations in provision of first aid for specified conditions
  • chest
  • how to recognise a person is not breathing normally
  • response/consciousness
  • upper airway and effect of positional change

**Assessment Conditions**

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment resources must include:

• adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
• adrenaline auto-injector training device
• AED training device
• placebo bronchodilator and spacer device
• roller bandages
• triangular bandage
• workplace First Aid kit
• workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
• wound dressing
Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements
Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.
Elements and Performance Criteria

**ELEMENT**

*Elements define the essential outcomes.*

**PERFORMANCE CRITERIA**

*Performance criteria specify the level of performance needed to demonstrate achievement of the element.*

1. **Respond to an emergency situation**

   1.1 Recognise an emergency situation
   1.2 Identify, assess and manage immediate hazards to health and safety of self and others
   1.3 Assess the casualty and recognise the need for first aid response
   1.4 Assess the situation and seek assistance from emergency response services

2. **Apply appropriate first aid procedures**

   2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
   2.2 Provide first aid in accordance with established first aid principles
   2.3 Display respectful behaviour towards casualty
   2.4 Obtain consent from casualty where possible
   2.5 Use available resources and equipment to make the casualty as comfortable as possible
   2.6 Operate first aid equipment according to manufacturer’s instructions
   2.7 Monitor the casualty’s condition and respond in accordance with first aid principles

3. **Communicate details of the incident**

   3.1 Accurately convey incident details to emergency response services
   3.2 Report details of incident to workplace supervisor as appropriate
   3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies
ELEMENT

Elements define the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface

responded appropriately in the event of regurgitation or vomiting

managed the unconscious breathing casualty

followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions

followed the prompts of an Automated External Defibrillator (AED)

Responded to at least two simulated first aid scenarios contextualised to the candidate’s workplace/community setting, including:

- conducted a visual and verbal assessment of the casualty
- demonstrated safe manual handling techniques
- post-incident debrief and evaluation
- provided an accurate verbal or written report of the incident

Applied first aid procedures for the following:

- allergic reaction
- anaphylaxis
- bleeding control
- choking and airway obstruction
- envenomation, using pressure immobilisation
- fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
- respiratory distress, including asthma
- shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
  - ARC Guidelines relevant to provision of CPR and first aid
  - safe work practices to minimise risks and potential hazards
  - infection control principles and procedures, including use of standard precautions
  - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
  - awareness of potential need for stress-management techniques and available support following an emergency situation
  - duty of care requirements
• respectful behaviour towards a casualty
• own skills and limitations
• consent
• privacy and confidentiality requirements
• importance of debriefing
• considerations when providing first aid including:
  • airway obstruction due to body position
  • appropriate duration and cessation of CPR
  • appropriate use of an AED
  • chain of survival
  • standard precautions
  • how to conduct a visual and verbal assessment of the casualty
• principles and procedures for first aid management of the following scenarios:
  • abdominal injuries
  • allergic reaction
  • anaphylaxis
  • basic care of a wound
  • bleeding control
  • burns
  • cardiac conditions, including chest pain
  • choking and airway obstruction
  • crush injuries
  • diabetes
  • dislocations
  • drowning
  • envenomation
  • environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  • eye and ear injuries
  • fractures
  • febrile convulsions
  • head, neck and spinal injuries
  • minor skin injuries
  • needle stick injuries
  • poisoning and toxic substances
  • respiratory distress, including asthma
  • seizures, including epilepsy
  • shock
  • soft tissue injuries, including strains and sprains
  • stroke
Assessment Requirements for HLT AID003

Provide first aid

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

### 1. Respond to a remote emergency situation

1.1 Plan for isolated travel or work if required, accounting for expected contingencies

1.2 Recognise an emergency situation

1.3 Identify, assess and manage immediate hazards to health and safety of self and others

1.4 Assess the casualty and recognise the need for first aid response

1.5 Assess the situation and evaluate options for medical assistance

1.6 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, risks, transport availability and casualty condition

### 2. Apply appropriate first aid procedures

2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines

2.2 Provide first aid in accordance with established first aid principles

2.3 Display respectful behaviour towards casualty

2.4 Obtain consent from casualty where possible

2.5 Use available resources and equipment to make the casualty as comfortable as possible

2.6 Operate first aid equipment according to manufacturer’s instructions

2.7 Monitor the casualty’s condition and respond in accordance with first aid principles

### 3. Manage the incident

3.1 Seek assistance from others present to manage incident circumstances

3.2 Establish communication links with emergency response services and convey incident details

3.3 Report details of casualty condition, changes in
**ELEMENT**

Elements define the essential outcomes.

**PERFORMANCE CRITERIA**

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

3.4 Assist in the evacuation of the casualty by following directions given by emergency response services as required

3.5 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

  New evidence requirements for assessment, including use of contextualised remote scenarios. |

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
  - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
• performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
• responded appropriately in the event of regurgitation or vomiting
• managed the unconscious breathing casualty
• followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
• followed the prompts of an Automated External Defibrillator (AED)
• Responded to at least three simulated first aid scenarios contextualised to the candidate’s remote and/or isolated situation:
  • demonstrated safe manual handling techniques
  • conducted a visual and verbal secondary survey assessment of the casualty
  • assessed vital signs, including respirations, pulse and temperature
  • post-incident debrief and evaluation
  • provided an accurate verbal and written report of the incident
• Applied first aid response in a remote situation for the following:
  • allergic reaction
  • anaphylaxis
  • basic care of a wound
  • bleeding control
  • choking and airway obstruction
  • envenomation, using pressure immobilisation
  • environmental impacts, including hypothermia, hyperthermia, dehydration and heat stroke
  • fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
  • head, neck and spinal injuries, using immobilisation principles
  • respiratory distress, including asthma
  • shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

• State/Territory regulations, first aid codes of practice and workplace procedures including:
  • ARC guidelines relevant to provision of CPR and first aid
  • safe work practices to minimise risks and potential hazards
  • infection control principles and procedures, including use of standard precautions
  • requirements for currency of skill and knowledge
• legal, workplace and community considerations including:
• awareness of potential need for stress-management techniques and available support following an emergency situation
• duty of care requirements
• respectful behaviour towards a casualty
• own skills and limitations
• consent
• privacy and confidentiality requirements
• importance of debriefing
• considerations when providing first aid, including:
  • airway obstruction due to body position
  • appropriate duration and cessation of CPR
  • appropriate use of an AED
  • chain of survival
  • standard precautions
  • how to conduct a visual and verbal secondary survey assessment
  • assessment and interpretation of vital signs, including respirations, temperature and pulse
• principles and procedures for first aid management of the following scenarios, contextualised to the candidate’s remote and/or isolated situation:
  • abdominal injuries
  • allergic reaction
  • anaphylaxis
  • basic care of a wound
  • bleeding control
  • burns
  • cardiac conditions, including chest pain
  • choking and airway obstruction
  • crush injuries
  • diabetes
  • dislocations
  • drowning
  • envenomation
  • environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
  • eye and ear injuries
  • febrile convulsions
  • fractures
  • head, neck and spinal injuries
  • minor skin injuries
  • needle stick injuries
- poisoning and toxic substances
- respiratory distress, including asthma
- seizures, including epilepsy
- shock
- soft tissue injuries, including sprains and strains
- stroke
- unconsciousness
- remote considerations in the provision of first aid, including:
  - typical hazards and strategies for preparing supplies to address contingencies
  - management options relating to transporting casualty, including aero-medical evacuation
  - how to identify and prepare areas for safe evacuation, including aero-medical evacuation
  - how and when to access emergency response services
  - communication systems, equipment and methods available in remote situations
  - priorities of management in first aid when dealing with life-threatening conditions
  - specific considerations contextualised to alpine, desert, marine, rural/remote settings and tropical environments
- basic anatomy and physiology relating to:
  - how to recognise a person is not breathing normally
  - chest
  - response/consciousness
  - upper airway and effect of positional change
  - considerations in provision of first aid for specified conditions, including specific considerations for remote settings

**Assessment Conditions**

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates’ skills and knowledge.

- Assessment resources must include:
  - adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
  - adrenaline auto-injector training device
  - AED training device
  - placebo bronchodilator and spacer device
  - roller bandages
  - thermometer
  - triangular bandages
  - workplace First Aid kit suitable for remote locations
• workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
• wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements
Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

</thead>
</table>
| Release 3 | Updated:  
  - assessor requirements statement  
  - foundation skills lead in statement  
  - licensing statement  
  - modification history to reflect 2012 standards  
  Equivalent outcome. |
| Release 2 | Minor corrections to formatting to improve readability. Equivalent competency outcome. |
| Release 1 | This version was released in HLT Health Training Package release 1.0 and meets the requirements of the 2012 Standards for Training Packages.  
  Updated to incorporate content of unit HLTWHS200A. Revised scope of unit to reflect requirements of workers. New evidence requirements for assessment. |

Application

This unit describes the skills and knowledge required for workers to participate in safe work practices to ensure their own health and safety, and that of others.

The unit applies to all workers who require knowledge of workplace health and safety (WHS) to carry out their own work, either under direct supervision or with some individual responsibility.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

| ELEMENT | PERFORMANCE CRITERIA |
Elements define the essential outcomes. Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Follow safe work practices
   1.1 Follow workplace policies and procedures for safe work practices
   1.2 Identify existing and potential hazards in the workplace, report them to designated persons, and record them according to workplace procedures
   1.3 Follow workplace emergency procedures

2. Implement safe work practices
   2.1 Identify and implement WHS procedures and work instructions
   2.2 Identify and report incidents and injuries to designated persons according to workplace procedures
   2.3 Take actions to maintain safe housekeeping practices in own work area

3. Contribute to safe work practices in the workplace
   3.1 Raise WHS issues with designated persons according to organisational procedures
   3.2 Participate in workplace safety meetings, inspections and consultative activities
   3.3 Contribute to the development and implementation of safe workplace policies and procedures in own work area

4. Reflect on own safe work practices
   4.1 Identify ways to maintain currency of safe work practices in regards to workplace systems, equipment and processes in own work area
   4.2 Reflect on own levels of stress and fatigue, and report to designated persons according to workplace procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- Reading – in order to accurately read and interpret workplace safety policies and
procedures including safety signs, dangerous goods classifications and safety instructions.

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit.

**Unit Mapping Information**

No equivalent unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- contributed to a WHS meeting or inspection in workplace
- conducted a workplace risk assessment and recorded the results
- consistently applied workplace safety procedures in the day-to-day work activities required by the job role
- followed workplace procedures for reporting hazards
- followed workplace procedures for a simulated emergency situation.
Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
  - state/territory WHS authorities
  - rights and responsibilities of employers and workers, including duty of care
  - hazardous manual tasks
  - infection control
- safety signs and their meanings, including signs for:
  - dangerous goods classifications
  - emergency equipment
  - personal protective equipment (PPE)
  - specific hazards such as sharps, radiation
- hazard identification, including:
  - definition of a hazard
  - common workplace hazards relevant to the industry setting
  - workplace procedures for hazard identification
- workplace emergency procedures
- workplace policies and procedures for WHS

Assessment Conditions

Skills must be demonstrated:

- in the workplace

OR

- in an environment that provides realistic in-depth industry validated scenarios and simulations to assess candidates’ skills and knowledge.

Assessment must ensure use of:

- current workplace policies and procedures for WHS
- PPE relevant to the workplace and job role of the worker

In addition, assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

LGACOM404B Establish cooperative arrangements with other organisations

Modification History
LGACOM404B Release 1: Primary release.

Unit Descriptor
The unit covers identifying, developing, implementing and monitoring cooperative arrangements with other organisations in an effort to improve services provided to the community. The unit is appropriate for staff working in areas of council where community and business development are a major focus.

Application of the Unit
This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be
consistent with the Evidence Guide.

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify opportunities for cooperative arrangements | 1.1. Opportunities for cooperative arrangements are identified through consultation with other organisations.  
1.2. Opportunities identified are analysed to ensure they will provide an increased level, or at least an equivalent level, of service to the community. |
| 2. Develop and implement cooperative policies and projects with other organisations | 2.1. Cooperative policies are agreed upon by all participating organisations and disseminated to all involved staff.  
2.2. Project objectives and performance indicators are determined and plans are drawn up to facilitate the smooth implementation and conduct of collaborative projects.  
2.3. Implementation methods are organised and agreed actions and work programs are allocated to relevant staff.  
2.4. Communications strategies are put in place to enable efficient and coherent implementation and conduct.  
2.5. Resources are identified and accessed in the most cost-effective manner.  
2.6. Communities are informed of the changes and benefits in service delivery due to the new collaborative arrangements. |
| 3. Monitor and evaluate the effectiveness of the collaborative venture | 3.1. Project progress is evaluated with reference to planned time lines and performance criteria at predetermined intervals to assess effectiveness for council and community.  
3.2. Project is reviewed and project plan and resource allocations are revised when necessary.  
3.3. Information gathered from project evaluation is used to provide input to continuous improvement and planning processes.  
3.4. Problems or contingencies that arise are managed and resolved professionally and promptly in conjunction with relevant personnel. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- negotiation with a range of personnel and other agencies
- research and evaluation, including cost-benefit analysis
- written and verbal communication with public and council personnel affected by implementation
- strategic and business planning
- planning and organisational
- time management
- ability to work as part of a team particularly with people from diverse backgrounds
- problem solving
- using appropriate software and technology

Required Knowledge

- relevant council policies and procedures
- sustainable practices
- council operations
- council goals, objectives and strategies
- other organisations potentially interested in cooperative arrangements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- establish cooperative arrangements with other organisations on behalf of council that create measurable benefits to the organisation, incorporate effective evaluation mechanisms and support corporate direction and strategies
- communicate cooperative arrangements and their benefit effectively throughout the organisation.
Context of assessment

Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

Evidence required for demonstration of consistent performance

Evidence will need to be gathered over time across a range of variables depending on council workflow and planning cycle as long as the critical aspects of evidence can be demonstrated.

Resource implications

Access to organisations with whom cooperative arrangements are to be developed or to simulated case studies.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

**Cooperative arrangements** may include:

- joint funding for projects
- shared promotional resources
- joint ventures to build or construct community facilities
- sponsorship arrangements

**Other organisations** may include:

- other councils within the region, state or nation
- regional organisations of councils
- state or commonwealth agencies
- private or business enterprises
- community groups

**Performance indicators** may include:

- increases in revenue
- customer satisfaction reports
- increases in service usage
- increased tourism to the region or municipality

ELEMENT  PERFORMANCE CRITERIA

3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills
- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge
- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide

Overview of assessment requirements
A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered
The demonstrated ability to devise and conduct community consultations where:
- consultation ensures council’s image or reputation is maintained or enhanced
- community consultation produces valid and useful information
**Context of assessment**  
Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.

**Method of assessment**  
The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

**Evidence required for demonstration of consistent performance**  
Evidence should be gathered over a period of time in a range of actual or simulated management environments.

**Resource implications**  
Access to a range of real or simulated consultation processes including:

- public and community meetings and forums
- surveys and door knocks
- appropriate communications equipment and aids such as overhead projectors and computer-based presentations

**Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

*Interested and affected parties may include:*

- community groups
- other authorities
- individuals
- emergency authorities (police, fire and ambulance)
- private sector business interests
- special interest groups
- experts

*Resources may include:*

- human
Consultation strategies may include:
- financial
- locations
- public meetings
- phone-ins
- questionnaires
- informal gatherings
- door knocks
- council meetings

Enabling and encouraging relevant groups to be involved may include:
- physical accessibility
- diverse language needs
- culture, including Indigenous, youth and non-English speaking background
- physical environment
- number of people

Legislation may include:
- local government
- anti-discrimination
- planning

Information may include:
- written and oral records
- anecdotes
- reports
- instructions
- directions from supervisor or management
- interviews
- formal and informal team meetings

Access and equity may include:
- subject matter
- manner in which consultations are conducted
- physical accessibility
- community profile

Presentation of information may include:
- graphics
- models
- computer animations
- video displays
- overhead transparencies
- handouts
- display plans
- interpreter service

Co-requisite Unit/s
LGACOMP008A Apply conflict resolution strategies

Modification History
LGACOMP008A Release 2: Layout adjusted.
LGACOMP008A Release 1: Primary release.

Unit Descriptor
This unit covers dealing effectively with conflict, both in the workplace and outside the organisation. The unit outlines the knowledge and skills required to assess potential conflict situations and deal appropriately with the situation to achieve a resolution. The unit is suitable for all people working within the organisation.

Application of the Unit
This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Unit of Competency | Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be
consistent with the Evidence Guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Assess potential conflict situations** | 1.1 Signs, stages and possible *causes of conflict* are identified and anticipated.  
1.2 Appropriate responses are evaluated against organisational procedures and *legal requirements*.  
1.3 Additional information is identified and sought as required to assist in the assessment of the conflict situation. |
| 2. **Implement conflict resolution strategies** | 2.1 Factors and issues relevant to the conflict are clarified.  
2.2 Strategies for dealing with conflict situations are developed in accordance with organisational procedures.  
2.3 Assistance is sought as required and is appropriate to the person’s skill and responsibility.  
2.4 Options for resolution of the conflict are identified which allow for constructive responses to be negotiated.  
2.5 *Negotiation techniques* are used to maintain positive interaction and to divert and minimise aggressive behaviour.  
2.6 Effective *communication techniques* are used to ensure understanding of information received or relayed.  
2.7 *Social and cultural differences* are taken into account in the negotiation style and approach taken.  
2.8 Mutual agreement to the situation and its resolution is confirmed and follow up action is agreed upon by all parties.  
2.9 Systems, records and reporting procedures are maintained according to organisational procedures. |
| 3. **Evaluate response and outcome** | 3.1 Effectiveness of response is evaluated and reviewed according to information available and organisational practices.  
3.2 Accurate and constructive observations of incidents are provided in reviewing and debriefing the situation.  
3.3 Records and reports are provided and maintained according to organisational requirements.  
3.4 Effects of stress are recognised and addressed through stress management techniques and debriefing. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- problem-solving strategies to know how to deal with unexpected questions or attitudes
- interpersonal skills to develop rapport with other parties in the conflict
- capacity to evaluate own response to situations of conflict and manage own emotions
- communication skills to effectively come to an agreed outcome
- negotiation skills to negotiate difficult situations and resolve problems as they arise
- flexibility to adjust quickly to differing situations
- empathy to develop rapport and understanding with and for the other party
- dealing with difficult people and situations

Required Knowledge

- legislative and/or other legal provisions
- conflict resolution strategies
- organisational policies and procedures relating to managing conflict through negotiation
- recording and reporting procedures
- principles of cooperative team work
- different social and cultural practices

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- interpret accurately and comply with legal and procedural requirements
- identify typical symptoms and causes of conflict in the workplace and ways of resolving conflict situations
- select conflict resolution strategies that are most effective for the objective
- use negotiation techniques to defuse and resolve conflict
- use communication techniques to give clear and accurate
information in a form that is preferred and understood by the receiver

Context of assessment
Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)
To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment
The following assessment methods are suggested:
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance
Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of formal and informal situations, involving different types of problems and clients.

Resource implications
The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement
The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.
**Causes of conflict** may include:
- refusal to follow directions and guidance
- dissatisfaction of client with council service or information
- disagreement between members of the public
- disagreement between members of the organisation
- ejection of persons
- persons suffering from emotional distress
- bystander behaviour

**Legal requirements** may include:
- relevant state and commonwealth legislation
- decisions of relevant tribunals
- roles and responsibilities
- terms and conditions of employment

**Negotiation techniques** may include:
- strategic questioning and listening to gather information and direct the focus of the people involved
- positive, confident and cooperative language
- control of tone of voice and body language
- using language and concepts appropriate to the people involved
- using clear presentations of options and consequences
- demonstrating flexibility and willingness to compromise
- summarising positions and agreements made to confirm understanding between the negotiating parties

**Communication techniques** may include:
- verbal and non-verbal language
- two-way interaction
- constructive feedback
- active listening
- reflection and summarising

**Social and cultural differences** may include:
- verbal and non-verbal language
- beliefs and values
- religious or spiritual observances
- relationships and family structures
- social conventions
- codes of conduct

**Unit Sector(s)**

LGAGCM710A Manage contracts and contractors

Modification History
LGAGCM710A Release 2: Layout adjusted.
LGAGCM710A Release 1: Primary release.

Unit Descriptor
This unit covers the skills and knowledge required of senior managers responsible for overseeing the development of tenders and the subsequent management of contracts and contractors.

Effective and efficient management of external contracts is now a major component of many managers' roles. The need for high levels of accountability and transparency while managing commercial relationships is addressed in this unit.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit
This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations that provide the boundaries for the operation of councils is essential. The unique nature of councils, as a tier of government, directed by elected members and reflecting the needs of local communities must be appropriately reflected.

This unit may also be contextualised to other public or private sectors as long as the essential outcomes of the unit are not changed.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency  Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

<tr>
<td>3.4 Reports of project progress and outcomes are prepared and presented in accordance with management plan and standard organisational procedures.</td>
</tr>
<tr>
<td>3.5 Contracts are concluded in line with management plan and contractual requirements.</td>
</tr>
</tbody>
</table>

#### 4. Manage relationships with contractors

4.1 Code of conduct is used and communicated to contractors to ensure relationship between parties is managed ethically, transparently and in accordance with legal requirements and council policies and procedures.

4.2 Regular and formalised communication processes with contractors are established and rigorously applied.

4.3 Sound business relationships with contractors are established and maintained to ensure effective communication and the early identification of potential service delivery problems.

4.4 Contractual disputes that arise are managed in accordance with contractual requirements and using established mediation mechanisms.

#### 5. Plan for improved contract management and service delivery processes

5.1 Effectiveness and benefits of contracting process and related service delivery are analysed.

5.2 Opportunities for process and service delivery improvements are identified and communicated to appropriate senior personnel within council.

---

**Required Skills and Knowledge**

This describes the essential skills and knowledge and their level, required for this unit

**Required Skills**

- tender management
- high-level negotiation
- literacy and numeracy skills to manage contracts
- project management
- high-level written and oral communication
- analysis of organisational systems, processes and activities
- developing a range of possible options in solving problems
• time management

**Required Knowledge**

• legal and council requirements for letting and managing tenders
• council code of conduct for the management of relationships with contractors

**Evidence Guide**

**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. The candidate will demonstrate the capacity to manage contracts and contractors effectively, ethically and leading to the attainment of stated council objectives.

**Critical aspects of evidence to be considered**

The demonstrated ability to:

• manage contracts and contractors within council

**Context of assessment**

Assessment of performance requirements in this unit should be undertaken with the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the range of variables applicable to the workplace environment.

**Method of assessment**

The following assessment methods are suggested:

• preparation of a major workplace project report/portfolio (that may incorporate assessment of related units) as a key form of assessment that enables candidates to integrate the learning and assessment project into their regular work responsibilities, which enables integrated and holistic assessment of the complex skills and knowledge addressed in this unit
• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies
• written and oral questioning to assess knowledge and understanding
• completion of workplace documentation
• third-party reports from experienced practitioner
• completion of self-paced learning materials, including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance

Evidence should be gathered over a period of time in a range of actual or simulated management environments.

Resource implications

Access to a workplace or simulated case study that provides the following resources:
- relevant council documents, such as strategic and operational plans
- relevant local government legislation and regulations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

1.2 Relevant commonwealth and state or territory legislation and peak local government associations and council policies are researched and documented.  
1.3 Extent to which cultural heritage of other non-Indigenous cultures should be acknowledged is identified and taken into consideration. |
| 2 Identify the correct Indigenous people that are authorised to speak for a place | 2.1 *Indigenous people with rights and interests in a place* are identified through the traditional owners, especially those authorised to speak for a place.  
2.2 Both men and women with rights and interests in an area or place are identified because men and women may be responsible for different heritage places and values and may need to be consulted separately.  
2.3 Other Indigenous people are identified who may not necessarily be traditional owners but who have interests in a place.  
2.4 Indigenous people from surrounding areas who may be affected by a project or activity are identified and consulted.  
2.5 *Protocols* that Indigenous people have established for consultation are identified and adhered to throughout the process.  
2.6 Consultation on each new project is undertaken, unless traditional owners and other Indigenous people agree that this is not necessary.  
2.7 Non-Indigenous people with rights or interests in the place are identified and consulted. |
| 3 Consult with relevant Indigenous people to discuss the project or activity | 3.1 *Potential implications of the project or activity* are outlined factually and clearly.  
3.2 All *relevant documentation and information* are provided to the traditional owners and all other Indigenous people with rights and interests in a place.  
3.3 Sufficient time is allowed for all Indigenous people to decide whether they wish to become involved in the activity or project and to provide informed consent.  
3.4 All Indigenous groups with an interest in a place are provided with the same information and given sufficient time to provide informed consent.  
3.5 Where groups are in dispute, a process for developing
ELEMENT | PERFORMANCE CRITERIA
--- | ---
4 Establish a process for addressing Indigenous cultural heritage matters | separate but consistent and similar agreements is established.
4.1 Manner, timing and level of consultation and involvement with the project or activity are agreed.
4.2 The copyright holders of any work undertaken with Indigenous people and the management regime for Indigenous heritage places are identified.
4.3 Need for separate reports for male and female traditional owners and a further report that is publicly available is established.
4.4 Dissemination of reports is carried out effectively.
4.5 The process for obtaining informed consent for displaying any gathered information is identified and agreed.
4.6 Protocols and agreements are formalised and documented.
4.7 Indigenous people are involved in the development of any terms of reference for, and selection of, consultants.
4.8 Resources required to maintain community involvement are identified and secured.
4.9 Relevant documentation for council is prepared, including presentation of alternative options.

5 Consult with relevant Indigenous people in identifying their cultural heritage places and values | 5.1 Commonwealth and state or territory laws relating to Aboriginal and Torres Strait heritage are complied with by obtaining necessary permits for surveys and other activities required to identify Indigenous heritage values.
5.2 Sensitive information collected in the course of identifying Indigenous heritage places and values is protected from further unnecessary disclosure.
5.3 Details relating to custodians of information are recorded and protected from further unnecessary disclosure.

6 Implement project or activity | 6.1 Meetings are held with identified stakeholders that enable Indigenous people to explain issues relating to Indigenous heritage to non-Indigenous stakeholders.
6.2 Processes for mediation and dispute resolution are identified and established.
6.3 A precautionary approach is identified in cases where Indigenous people refuse to be involved in a project.
6.4 A process to prevent damage or desecration to any Indigenous heritage place is identified and established.
6.5 Proposal or activity is revised or rejected in light of Indigenous people not agreeing because of unacceptable impact on their cultural heritage.
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- oral and written communication
- cross-cultural competence
- gender and disability
- evaluation
- decision making
- research
- networking
- negotiation and dispute resolution

Required Knowledge

- cultural context
- community controls
- location and resources
- organisational processes
- equity and diversity principles
- legal requirements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- conduct research into cultural heritage and protect any sensitive information collected in the course of the research process
- identify Indigenous people with rights and interests in a place
- meet with Indigenous people to discuss a project or activity
LGALAND504A Undertake effective consultation with Indigenous people on matters of cultural heritage

Date this document was generated: 18 March 2019

and reach agreement about involvement and consent to their involvement in the project or activity

- establish a process for addressing Indigenous cultural heritage matters in relation to a project or activity.

Context of assessment

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

Evidence required for demonstration of consistent performance

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

Resource implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in
the Performance Criteria is detailed below.

**Indigenous people with rights and interests in a place** may include:

- traditional owners
- men
- women
- Indigenous people authorised to speak for a place

**Protocols** may include:

- use of interpreters
- talking to the appropriate people
- laws and customs relating to places
- respecting family, kinship and clan relationships

**Non-Indigenous people with rights or interests in a place** may include:

- landholders
- lessees
- tourists and recreational users
- state or territory government agencies
- commonwealth departments and agencies

**Potential implications of the project or activity** may include:

- economic or financial
- cultural
- social
- environmental
- educational
- others

**Relevant documentation and information** may include:

- maps
- reports

**Unit Sector(s)**

Land Management
LGAPLEM508A Manipulate and analyse data within geographic information systems

Modification History
LGAPLEM508A Release 2: Layout adjusted.
LGAPLEM508A Release 1: Primary release.

Unit Descriptor
This unit relates to extracting, comparing and manipulating data in response to customer requests.

Application of the Unit
This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Unit of Competency
Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
Elements and Performance Criteria

ELEMENT | PERFORMANCE CRITERIA
--- | ---
1 Develop procedures for manipulation and analysis of data | 1.1 Desired data format is specified and based on job requirements.
 | 1.2 Parameters are specified for manipulation of the data sets.
 | 1.3 New procedures are documented clearly explaining the procedure and rationale for development.
2 Establish models required to provide outcome | 2.1 Applicability of existing tools, models, theories, applications and solutions is evaluated.
 | 2.2 Feasible parameters, equations and assumptions are specified.
 | 2.3 Models required to provide specified outcome are established.
3 Analyse data | 3.1 Steps to be undertaken to analyse and manipulate data are specified.
 | 3.2 Source data limitations and other restricting factors are taken into account when selecting techniques for analysis.
 | 3.3 Data is isolated and retrieved from its source.
 | 3.4 Data is interrogated to ensure reliability.
 | 3.5 Data is prepared for presentation media.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills
- analysing options
- using tools within software to manipulate data
- reading external data sets into data model

Required Knowledge
- database structures
- scripting and commands
- line instructions and programming
- operating systems:
- range of tools, models, theories, applications and solutions
- data analysis and manipulation techniques.
Evidence Guide

Overview of assessment requirements
A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered
Suitable procedures are developed.
New procedures are documented.
Appropriate models are used and/or created.

Context of assessment
On the job or in a simulated work environment.

Method of assessment
The following assessment methods are suggested:
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance
Evidence will need to be gathered over time across a range of variables.

Resource implications
Access to geographic information systems databases and operating systems.
Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

*Source data limitations* may include:
- currency
- structure
- accuracy
- source of data

*Factors* may include:
- time
- command line operation
- menu drivers options

Elements describe the essential outcomes of a Unit of Competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
Elements and Performance Criteria

**ELEMENT** | **PERFORMANCE CRITERIA**
--- | ---
1 Analyse request to develop solution | 1.1 Specific problem or question is clarified in consultation with *end user* to establish *end result specifications*.  
1.2 Information required to achieve result is defined and required *data* sets are correctly determined.
2 Assess data availability | 2.1 Availability of required data sets is ascertained through research of *internal* and *external sources*.  
2.2 Custodianship of data is confirmed and access and pricing are determined.  
2.3 Data is obtained in line with *industry standards*, statutory requirements and council policy.  
2.4 Where appropriate, *procedures* are developed to capture data.
3 Assess data quality | 3.1 Data is assessed for *integrity* to determine suitability for task.  
3.2 Disparities between data sets are investigated and resolved to ensure integrity of data used.
4 Run standard query | 4.1 Appropriate standard query is selected.  
4.2 Selected query is run to achieve required outcome.
5 Validate outcome | 5.1 Appropriate data validation procedures are determined.  
5.2 *Outcome* is validated in line with predetermined procedures.  
5.3 Procedures to refine model or analytical procedures are developed.  
5.4 End user is consulted regarding suitability of outcome and amendments are negotiated as necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

**Required Skills**

- analysing options
- researching and accessing information
- attention to detail
- negotiating with customers
Required Knowledge

- database structures
- scripting and commands
- line instructions and programming
- operating systems
- SQL or other generic query language
- relationship of spatial features of database
- specific geographic information systems software, such as Genamap, MapInfo or ArcInfo
- potential inaccuracies and problems
- internal and external policies and practices relating to custodianship of data, pricing and access including industry standards, statutory requirements and council policies
- legislation relating to trade practices, copyright, intellectual property, local government acts, roads act and freedom of information legislation.
- UNIX
- DOS
- Windows
- NT

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:
- consider integrity of data
- ensure end result meets customer needs, including time frames.

Context of assessment

Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria applicable to the workplace environment, within the scope of the Range Statement.

Method of assessment

The following assessment methods are suggested:
- observation of the learner performing a range of workplace
tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

**Evidence required for demonstration of consistent performance**
Evidence should be gathered over a period of time in a range of actual or simulated management environments.

**Resource implications**
Access to a workplace or simulated case study that provides the following resources:
- relevant hardware and software such as geographic information systems, CAD, desktop publishing, desktop mapping, spreadsheets, word processing, multimedia, graphic animation, plotters, printers and terminals

**Range Statement**
The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

**End users** may be:
- council departments
- residents and rate payers
- real estate agents
- general public
- council management
- elected members
- state and federal departments
- neighbouring councils
- bus companies
- statutory bodies including land titles office
- land information council
- utilities

**End result specification** may include:
- graph
- map
- table
- equations
Data may include:

- parameters
- graphical
- spatial
- textual
- hard copy and paper documents, including work registers, rate books, plans and maps
- computer records using applications programs (databases, spreadsheets and accounting packages) relating to physical or virtual features, including council assets, community facilities, demographic data, census data, property ownership, property boundaries, zonings, organisations, rateable land, dog ownership, bus routes, property classifications, utilities and services and council facilities

External sources of data sets may include:

- other councils
- water authority
- telecommunications industry
- gas authority
- electricity authority
- land titles office
- valuer general
- private industry
- land information council
- street directory companies
- surveys
- orthophotography

Internal sources of data sets may include:

- old plans
- rates books
- deeds books
- transaction books
- surveys
- aerial photographs

Industry standards may include:

- protocols
- de facto standards
- confidentiality
- privacy

Procedures for manipulation of data sets may include:

- SQL or other generic query language
- scripts
- programming language

Integrity of data may include:

- accuracy
- quality, which may be affected by age or condition of hard copy documents
- currency
- completeness
- resolution
- confidence limits
- scale

**Outcome** may include:
- information for external or internal client
- creation of map layer
- building up elements of database

ELEMENT PERFORMANCE CRITERIA

4.4 Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met.

4.5 Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes.

4.6 Community education and information materials are prepared and distributed to ensure ongoing support for the strategy.

4.7 The strategy is incorporated into council policies and procedures and relevant legislation.

4.8 A timetable for implementation is established and priorities are set.

5 Monitor and review the effectiveness of strategies to protect heritage and cultural assets

5.1 Further research is undertaken on places listed as being of local significance in the study.

5.2 Additional plans of significance are identified and reviewed.

5.3 An annual heritage report is prepared if required.

5.4 Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- research
- collation of information from local, national and international sources
- evaluation methodologies
- consultation with a range of community and government agencies
- strategic planning
- budgeting and lifecycle costings
- community education strategies
- project management

Required Knowledge

- heritage assets
- cultural assets
- asset classification
- council structures and services
- town planning
- community needs and expectations
- regulations, standards and policies
- community information

Evidence Guide

Overview of assessment requirements
A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered
The demonstrated ability to:

- identify and protect heritage and cultural assets
- identify and implement strategies to protect heritage and cultural assets
- put in place monitoring processes

Context of assessment
Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.

Method of assessment
The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance
Evidence should be gathered over a period of time in a range of actual or simulated management environments.
**Resource implications**  Access to a workplace or simulated case study that provides the following resources:

- relevant data such as survey information
- historical research
- existing reports
- studies and texts
- financial and budget information
- real or simulated consultation process
- copies of relevant regulations, standards and policies

**Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Heritage** may include:

- cultural and environmental issues
- national and local area significance
- danger component of heritage element or structure

**Significance** may be:

- aesthetic, historical, scientific and social aspects
- community expectations.
- national
- state
- regional
- local
- contributory

**Data** includes:

- survey information
- historical research
- existing reports
- studies and texts

**Information** may include:

- written and oral records
- reports
- instructions
- directions from supervisor and management
- formal and informal interviews
- team meetings
- reports from other services, agencies, specialists and experts
- media

**Threats** may include:

- political emphasis
• reductions in maintenance
• lack of planning
• other authorities' planning
• competing interests
• community attitudes

Criteria may include:
• community preferences
• budget constraints
• legislative provisions
• resources
• time frames
• age
• outstanding craftsmanship
• architectural style
• construction technology
• an association with important events or figures
• building type
• rarity
• technical or creative achievement
• representing a way of life
• artistic
• religious or cultural associations

Places of significance may include:
• buildings
• structures
• plantings
• subsurface remains

</tr>
</thead>
</table>
| 1 Capture animals or reptiles | 1.1 Response to request for assistance is timely and efficient use of resources is observed.  
1.2 Traffic control precautions are used and access to incident site is controlled to ensure safety of public.  
1.3 Safe and humane methods of handling *animals or reptiles* are observed.  
1.4 Where appropriate, animals or reptiles are disposed of in accordance with legislative and council requirements and relevant statutes. |
| 2 Assess transport or care needs | 2.1 *Transport* or intermediate care is provided according to protocols or legislation.  
2.2 Containment and loading are secure and safe.  
2.3 Temporary holding facilities are arranged or negotiated with landowners where necessary. |
| 3 Impound animals or reptiles | 3.1 Impounding decision is consistent with legislative and council requirements.  
3.2 *Ownership* of animals is determined using council records or stock brands.  
3.3 Advisory/penalty notices are issued according to council regulations. |
| 4 Monitor or care for animals or reptiles | 4.1 Feeding and handling of animals during care is undertaken in accordance with pound procedures and legislative and council requirements.  
4.2 Safe work practices, procedures and environmental conditions are observed during handling, monitoring and care duties. |
| 5 Release animals or reptiles to owners/carers or return to environment | 5.1 Decision to release or restore animal to environment is in accordance with relevant legislation and procedures.  
5.2 Auction of unclaimed stock is performed according to council procedures.  
5.3 Recovery of costs and revenue is assessed and enforced according to relevant legislation and procedures. |
| 6 Report on animals or reptiles that are captured, impounded or disposed of | 6.1 Reports containing accurate information drawn from council registers are forwarded to relevant officers or authorities. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills
- computers
- video, voice recorders and radio communication
- preparing and issuing instructions and/or explanations to the public
- reporting to council

Required Knowledge
- animal and reptile behaviour
- predators
- dominance
- fear
- aggression
- applicable impounding techniques
- animal and reptile handling and disabling techniques
- animal and reptile dietary and impounding needs
- routine medicinal, chemical and dipping application
- animal health treatment
- humane disposal techniques
- safe and effective use of firearms
- stock brands
- identification tags
- microchip reading
- local area geography
- terrain
- urban and rural navigation
- relevant statutes
- notice-serving process
- court evidence
- traffic control licensing requirements and direction

Evidence Guide

Overview of assessment requirements
A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work
practices that underpin the performance of the unit are also required to be demonstrated.

**Critical aspects of evidence to be considered**

- Impounding techniques used are appropriate to animal or reptile species and the condition of the animal or reptile.
- Assessments of animal or reptile health and condition, and the appropriate disposal of animals or reptiles, are in accordance with council policies and procedures.
- Traffic control is in accordance with relevant licensing requirements.
- Use of firearms is in accordance with relevant licensing requirements.
- Notices are served in accordance with council regulations.
- Safe work practices and concern for public safety are displayed by care and control staff.

**Context of assessment**

On the job or in a simulated work environment.

Written or oral testing.

**Method of assessment**

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

**Evidence required for demonstration of consistent performance**

Competency in duties may be displayed with domestic animals, livestock, wildlife or reptiles.

**Resource implications**

Access to a workplace or simulated environment that encompasses impounding processes, techniques and equipment.

**Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in
the Performance Criteria is detailed below.

**Animals or reptiles** may include:
- domestic pets
- livestock
- feral animals
- native animals
- reptiles

**Capture or control** may include:
- traps
- poles and ropes
- tongs
- tranquiliser guns
- firearms
- vehicles
- loading and yarding
- health, condition and behaviour of animal or reptile from observation or reports
- supervision of, or communication to, other staff or agency personnel
- disposal of deceased animals or reptiles

**Transport** may include:
- dedicated or contracted transport
- appropriate for care and human safety.

**Ownership issues** may include:
- verification of claims to ownership by such things as tags or microchips
- recovery of costs relating to transport, sustenance and penalties

<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Identify the need for First Aid</td>
<td>1.1. Initial assessment is made of extent and nature of First Aid required from personal observation and/or witness reports 1.2. Initial assessment is reported to personnel/emergency services in accordance with workplace procedures</td>
</tr>
<tr>
<td>2. Ensure the safety of patient and carer</td>
<td>2.1. Hygiene is maintained for protection of patient and carer 2.2. Hazards to the patient and carer are identified and appropriate action is taken to prevent further injury to either party 2.3. Patient is made as comfortable as possible and reassured by word, manner and actions</td>
</tr>
<tr>
<td>3. Assess patient and apply First Aid</td>
<td>3.1. Patient is assessed against the DRABC (danger, response, airway, breathing, ventilation and circulation) model 3.2. Vital signs are measured, recorded and any changes noted and reported as appropriate 3.3. Treatment appropriate to the patient's injuries is provided in accordance with recognised First Aid techniques 3.4. First Aid equipment is operated/applied in accordance with recognised procedures and standards 3.5. Patient's condition is monitored and reported as required by workplace procedures, with treatment being modified as appropriate 3.6. Treatment is maintained until qualified medical assistants assume responsibility or until the patient is evacuated 3.7. Provide additional assistance as requested by</td>
</tr>
</tbody>
</table>
### ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | medical/emergency services personnel
3.8. Details of First Aid administered are reported in accordance with workplace procedures

### 4. Complete work
4.1. First Aid equipment is recovered (if practical), cleaned, inspected/tested, refurbished, replaced and stored as appropriate
4.2. Medical waste is disposed of in accordance with workplace requirements
4.3. Equipment faults are rectified and reported in accordance with workplace procedures
4.4. Documentation is completed as required by legislative, regulatory and workplace requirements

---

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

- collect, organise and analyse information related to workplace health and safety systems and procedures and the application of these to work situations
- communicate ideas and information on workplace safety issues, including the treating and recording/reporting of workplace incidents/accidents/illnesses and interpersonal communication with casualties
- plan and organise activities, including the inspection of first aid support facilities and treatment areas to ensure their completeness, adequacy, equipment and serviceability
- work with others and in a team to promote an awareness of first aid within the workplace and its provision when required
- use mathematical ideas and techniques to correctly complete measurements and calculations associated with assessment, treatment and monitoring of patient’s condition
- use problem solving skills to assess and determine treatments and priorities in providing first aid to a patient
- use the workplace technology related to the reporting, recording and responding to workplace injuries and illnesses

**Required knowledge**

- workplace procedures and requirements for the treatment of workplace injuries/illnesses
REQUIRED SKILLS AND KNOWLEDGE

- reporting responsibilities and requirements
- the provision of first aid including:
  - systems of the body (respiratory, skeletal, digestive, circulatory, nervous, urinary, skin)
  - causes and management of unconsciousness
  - priorities for life support (DRABC model)
  - resuscitation techniques
  - bleeding control and laceration treatment
  - patient assessment
  - principles of initial patient management
  - management and treatment of fractures and soft tissue injuries
  - management and treatment of burns

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects of evidence

- Accurately follow workplace procedures for reporting injuries/illnesses and providing First Aid in the workplace
- Identify and respond to injuries/illnesses occurring in the workplace
- Apply emergency response First Aid
- Provide appropriate treatment to and monitor patient's condition
- Accurately report and document injuries and illnesses and treatment provided

Resource implications

First Aid kit, stretchers and medical/First Aid facility
Enterprise health and safety policies and procedures
Personal protective equipment
Patients

Method of assessment

Assessment should be by direct observation of tasks and questioning on underpinning knowledge.
Assessment may be conducted in conjunction with
EVIDENCE GUIDE

| Context of assessment       | Assessment may occur on the job or in a workplace simulated facility with relevant equipment, work instructions, casualties and urgency. |

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Unit context

- The provision of First Aid and workplace responsibilities is to conform to OHS legislation, material safety management systems, hazardous substances and dangerous goods code and local safe operating procedures
- Work is carried out in accordance with legislative obligations, relevant health regulations and organisation insurance requirements
- Work involves assessing situations, identifying appropriate control measures, awareness of emergency services responsibilities and responsiveness, treating injuries and maintaining equipment
- Work may be conducted without supervision and guidance

First Aid

- First Aid is that assistance given to a patient who has suffered an injury or illness in the workplace. It is that assistance which is deemed necessary to attempt to resuscitate, stabilise and/or treat the patient until qualified medical personnel assume responsibility or until the patient is evacuated for appropriate medical treatment.
- First Aid may include:
  - cardio-pulmonary resuscitation (CPR)

| 3. Prepare equipment for welding | 3.1. Welding equipment is set up correctly.  
3.2. Settings and consumables are selected. |
| 4. Perform routine welding using oxy acetylene | 4.1. Safe welding practices are applied.  
4.2. Materials are welded to job requirements.  
4.3. Welds are cleaned in accordance with standard operating procedures. |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

### Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

### Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment
**EVIDENCE GUIDE**

**Overview of assessment**

A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

**Context of and specific resources for assessment**

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.

**Method of assessment**

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

**Guidance information for assessment**

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings
- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

**Required knowledge**

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment
REQUIRED SKILLS AND KNOWLEDGE

- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

MEM05015D Weld using manual metal arc welding process

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit of competency covers the preparation, positioning, fixing, and manual welding techniques associated with general trade level welding using manual metal arc welding (MMAW) equipment including the selection and set up of the equipment appropriate to both the material and the weld to be performed, carrying out the MMAW to prescribed standards, and examining for and correcting defects, in a range of welded fabrications. |

Application of the Unit

| Application of the unit | This unit of competency applies to welds associated with heavy or light metal fabrications. Welds are fillet and butt welds in all positions on a range of ferrous and non-ferrous materials that may include carbon steel or stainless steel. Weld quality would conform to Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent.  
This unit has been primarily developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade level skills in MMAW. It may also apply to other trade occupations requiring higher level MMAW welding skills.  
Where manual thermal processes associated with preparation, pre-heat and/or post-heat are required, MEM05007C Perform manual heating and thermal cutting and/or MEM05008C Perform advanced manual thermal cutting, gouging and shaping should be considered for selection. |

4.2. Distortion is rectified |
| 5. Weld to job specification using MMAW | 5.1. Weld deposit is to specification  
5.2. Joints are cleaned to specifications |
| 6. Ensure weld conformance | 6.1. Defects are rectified with minimum loss of sound metal using correct techniques and tools  
6.2. Weld joints are visually inspected for conformance to specifications |
| 7. Where required, maintain weld records | 7.1. Where required, weld records are completed correctly |

Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Required skills include:
- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent  
- selecting and using appropriate tools and equipment
REQUIRED SKILLS AND KNOWLEDGE

- using a variety of welding machines and electrodes
- identifying and rectifying weld defects
- applying techniques for distortion prevention and rectification
- cleaning welds
- reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings
- recording routine information including routine weld records related to MMAW onto proformas and standard workplace forms
- following oral instructions
- measurement skills relating to joint preparation and MMAW

Required knowledge

Required knowledge includes:

- material preparation
- joint preparations
- electrode classification
- causes of distortion for materials within the scope of this unit
- causes of defects and methods of rectification
- the relationships between amperage, electrode and material
- safe welding practices
- use and application of personal protective equipment for MMAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials, select and set up the welding equipment, carry out MMAW and examine for and correct defects, in a range of welding activities associated with MMAW. Competency in this unit cannot be awarded until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate

Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in
**EVIDENCE GUIDE**

**competency in this unit**

| | this unit of competency in new and different workplace situations and contexts. Critical aspects of assessment and evidence include: |
| | • following all safety procedures to protect self, other workers and members of the public |
| | • identifying and interpreting specifications for MMA welding including Australian Standard 1554 General Purpose |
| | • interpreting welding specifications including standard welding symbols used to show weld procedure |
| | • selecting appropriate weld preparation methods for material and position of welds. |
| | • preparing materials, setting up of jigs, fixtures, clamps, etc. and joint preparation including bevelling |
| | • consistently welding different ferrous and non-ferrous materials to AS 1554 General Purpose or equivalent |
| | • identifying defects as described in the range statement across a range of welded materials |
| | • rectifying defects. |

**Context of and specific resources for assessment**

| | Welding to AS 1554 General Purpose or equivalent requires both theoretical knowledge and high level practical skills. The assessment process must be designed to identify consistent performance to the standard and the specifications across a range of materials and positions. The assessment must also identify a level of workplace performance in terms of defect rates and weld failure rates. It is recommended that assessment involve demonstrations of competency under both workshop and site conditions. This means that the ideal assessment environment is either on the job or a combination of both on and off the job. |
| | The competencies covered by this unit may be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. |

**Method of assessment**

| | Typically an Engineering Tradesperson - Fabrication and other tradespersons engaged in welding are required to exercise MMAW skills and techniques across a range of jobs and specifications. |
| | A single assessment event is not appropriate. On the job assessment should be included as part of the assessment |
# EVIDENCE GUIDE

<table>
<thead>
<tr>
<th>process wherever possible. Where assessment occurs off the job, judgement must consider evidence of the candidate's performance in a productive work environment that includes a sufficient range of appropriate tasks and materials to cover the scope of application for this unit.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</td>
</tr>
<tr>
<td>The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</td>
</tr>
</tbody>
</table>

## Guidance information for assessment

<table>
<thead>
<tr>
<th>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with welding using MMAW process or other units requiring the exercise of the skills and knowledge covered by this unit.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</td>

MEM05017D Weld using gas metal arc welding process

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit of competency covers the preparation, positioning, fixing, and manual welding techniques associated with general trade level welding using gas metal arc welding (GMAW) equipment including the selection and set up of the equipment appropriate to both the material and the weld to be performed, carrying out the GMAW to prescribed standards, and examining for and correcting defects, in a range of welded fabrications. |

Application of the Unit

| Application of the unit | This unit of competency applies to welds associated with heavy or light metal fabrications. Welds are fillet and butt welds in all positions on a range of ferrous and non-ferrous materials that may include carbon steel or stainless steel. Weld quality would conform to Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent.

This unit has been primarily developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade level skills in GMAW. It may also apply to other trade occupations requiring higher level GMAW welding skills.

Where manual thermal processes associated with preparation, pre-heat and/or post-heat are required, MEM05007C Perform manual heating and thermal cutting and/or MEM05008C Perform advanced manual thermal cutting, gouging and shaping should be considered for selection. |

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Prepare materials for gas metal arc welding (GMAW) | 1.1. Weld requirements are identified from specifications and/or drawings  
1.2. Material is correctly prepared  
1.3. Materials are assembled/aligned to specification where required |
| 2. Select welding components and consumables | 2.1. Welding machine settings, accessories and consumables are identified and selected |
| 3. Assemble and set up welding equipment | 3.1. Welding equipment is assembled and set up |
| 4. Minimise and rectify distortion | 4.1. Appropriate distortion prevention measures are selected and applied  
4.2. Distortion is rectified |
| 5. Weld to job specification using GMAW | 5.1. Weld deposit is to specifications  
5.2. Joints are cleaned to specifications |
| 6. Ensure weld conformance | 6.1. Weld joints are visually inspected for conformance to specifications  
6.2. Defects are removed with minimum loss of sound metal using correct and appropriate techniques and tools |
| 7. Maintain weld records as required | 7.1. Weld records are completed correctly |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:
- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent
- selecting and using appropriate tools and equipment
### REQUIRED SKILLS AND KNOWLEDGE

- using a variety of welding machines and electrodes
- identifying and rectifying weld defects
- applying techniques for distortion prevention and rectification
- cleaning welds
- reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings
- recording routine information including routine weld records related to GMAW onto proformas and standard workplace forms
- following oral instructions
- measurement skills relating to joint preparation and GMAW

#### Required knowledge

Required knowledge includes:

- types of gases and their uses
- the relationships between amperage/wire feed, voltage, gas flow, electrode and material
- the application of weld metal transfer (short arc, spray etc.)
- correct welding machine, leads, hand pieces and electrodes
- material preparation
- joint preparations
- electrode classification
- causes of distortion for materials within the scope of this unit
- safe welding practices
- use and application of personal protective equipment for GMAW

---

**Overview of assessment**

A person who demonstrates competency in this unit must be able to perform routine gas tungsten arc welding (GTAW).
## EVIDENCE GUIDE

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts. |
| Context of and specific resources for assessment | This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with carrying out routine gas tungsten arc welding or other units requiring the exercise of the skills and knowledge covered by this unit. |
| Method of assessment | Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor’s reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials. |

MEM05050B Perform routine gas metal arc welding

Modification History
Not Applicable

Unit Descriptor

| Unit descriptor | This unit covers preparing materials and routine gas metal arc welding (GMAW). |

Application of the Unit

| Application of the unit | This unit applies in a maintenance or manufacturing environment where the weld quality is not required to meet an Australian Standard or equivalent. Fillet and butt welds would typically be performed on low carbon/mild steels. Where welding is required to meet Australian Standard 1554 General Purpose or equivalent codes, occupational health and safety regulations and/or licensing requirements, Unit MEM05017D (Weld using gas metal arc welding process) should be selected. |

| 1. Identify weld requirements | 1.1. Weld requirements are identified from job instructions.  
1.2. Locations of welds are identified in according to standard operating procedures and job specifications. |
| 2. Prepare materials for welding | 2.1. Materials are cleaned and prepared ready for welding. |
| 3. Prepare equipment for welding | 3.1. Welding equipment is set up correctly.  
3.2. Settings and consumables are selected to suit application. |
| 4. Perform routine welding using GMAW | 4.1. Safe welding practices are applied.  
4.2. Materials are welded to job requirements.  
4.3. Welds are cleaned to standard operating procedures. |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:
- preparing materials
- setting up welding equipment
- welding with GMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instruction
- using measurement skills relating to joint preparation and routine GMAW

Required knowledge

Look for evidence that confirms knowledge of:
- different current and voltage settings, gas flow rates, wire diameters, wire feed speed and other variables to suit typical situations.
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- fuel gas properties and applications
- post-welding treatments
- weld characteristics
- safe welding practices
- use and application of personal protective equipment for routine GMAW

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers/standard operating procedures

**Required knowledge**

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures
## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

### Overview of assessment

A person who demonstrates competency in this unit must be able to use hand tools for a range of general engineering applications.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using hand tools or other units requiring the exercise of the skills and knowledge covered by this unit.

### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor’s reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

 | 1.6. Power tools are stored safely in appropriate location according to standard workshop procedures and manufacturers’ recommendations.

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting power tools appropriate to the task
- using power tools safely
- using clamping/securing devices
- identifying power tool defects
- maintaining power tools using appropriate techniques
- sharpening tools/tool bits within the scope of this unit
- storing power tools according to manufacturers'/ standard operating procedures.

**Required knowledge**

Look for evidence that confirms knowledge of:

- application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements of a range of power tools
- tool sharpening techniques for a range of power tools
- storage location and procedures of a range of power tools
- hazards/control measures associated with power tools
- use and application of personal protective equipment
- safe work practices and procedures
## Evidence Guide

### Overview of assessment

| A person who demonstrates competency in this unit must be able to use power tools/hand held operations. |

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

| Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts. |

### Context of and specific resources for assessment

| This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate. |
| This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using power tools/hand held operations or other units requiring the exercise of the skills and knowledge covered by this unit. |

### Method of assessment

| Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials. |
**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. </table>

© Commonwealth of Australia, 2019
2.2 Display dimensions are measured and needs of the display space assessed

2.3 Sketches and drawings are prepared to illustrate the display

2.4 Plan layout is prepared

2.5 Theme is selected and alternative options provided

2.6 Supplies, products and finishes necessary to complete the project are sourced and costed

2.7 Materials and processes are specified

2.8 Costing and timelines are compiled and developed

3 Style display

3.1 Final selection of products and finishes is coordinated

3.2 Arrangement is resolved to meet client needs and display brief

3.3 Trims and hardware are selected and coordinated with the products or finishes

3.4 Graphics and text style for signage are selected and applied

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit context includes:  
- work health and safety (WHS) requirements, including legislation, building codes, material safety management
systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent

- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures, Liveable and Accessible Housing Design guidelines, and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

**Scope of brief includes:**

- aims
- objectives
- milestones for the project
- organisational or personal profiles
- target audience
- budget
- timeline
- consultation requirements
- colour requirements
- image requirements
- function

**Clients include:**

- suppliers
- manufacturers
- private clients
- colleagues
- retailers
- the public

**Parameters include:**

- approval to make changes (legislative and planning)
- effect or feel trying to be achieved
- functionality (short and long term)
- budget restrictions
- established timelines

**Resources include:**

- computers
- computer software
- design software
- computer-aided design (CAD) software
- colour boards
- storyboards
- swatches
- Pantone Matching System (PMS)
- journals (directions magazines)
- artistic equipment and products
Display include:
- model making equipment
- an effective display of a simulated and designed space to sell and promote ideas, concepts, trends, products and decorations associated with the outlet

Sketches and drawings include:
- hand drawn images or ideation drawings completed freehand
- drafted technical drawings
- drawings produced on computer using CAD software packages (these usually contain project specifications)

Layout includes:
- the plan of how a room will be designed and decorated showing the placement of design elements and decorative features

Themes include:
- variations of colour ways (based on directions media), furnishing trends and decoration trends

Supplies include:
- paints
- furnishings
- decorations
- other internal fit-out products

Products include:
- furniture
- soft furnishings
- floor treatments
- curtain treatments
- built-in cabinetry or fittings
- light fittings
- lamps
- picture framing
- tapware
- laundry fittings
- bathroom fittings
- toilet fittings
- kitchen fittings

Finishes include:
- paints
- waxes
- lacquers
- stains
- pigments
- oils
- plastic coatings
- veneers
- ceramics
- stone
- glass
- textiles
- other textures

**Materials include:**
- solid timber (native and imported)
- manufactured timber products
- plastic
- metal
- alloys
- stone
- glass
- textiles
- fibreglass
- foam
- cardboard
- paper products
- any other manipulable substance

**Costing include:**
- the cost of products and materials used during completion of the project, labour and overhead expenses

**Timelines include:**
- the agreed project time span set and agreed for the project

**Trims and hardware include:**
- haberdashery
- cabinet hardware, such as knobs and handles
- light fittings
- rugs
- tie backs
- curtain rods

**Unit Mapping Information**
Supersedes and is equivalent to LMFID3005A Style a retail display.

**Links**
Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73
Assessment Requirements for MSFID3002 Style a retail display

Modification History

Release 1 - New unit of competency

Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Style a retail display with the products, finishes, trims and hardware to promote trends and design concepts to potential clients effectively apply design elements and principles
- Use mathematical ideas and techniques to correctly complete measurements, calculate area/volume and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Initiating new ideas and work techniques
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

Knowledge Evidence

- State or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for styling a retail display
- Organisational and site standards, requirements, policies and procedures for styling a retail display
- Basic understanding of elements and principles of design
- Concepts of ergonomics, anthropometrics, proxemics and aesthetic values
- Types of equipment and procedures for their safe use, operation and maintenance
- Characteristics of materials, products and defects
- Relevant computer programs
- Design themes and design development
- Colour, furnishing and decoration options
- Procedures for the recording, reporting and maintenance of workplace records and information
Assessment Requirements for MSID3002 Style a retail display

- Appropriate mathematical procedures for estimation and measurement
- Environmental protection requirements
- Established communication channels and protocols
- Relevant decoration and styling problem identification and resolution techniques

Assessment Conditions
- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor’s reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials and equipment relevant to styling a retail display, specifications and work instructions.

MSL904001 Perform standard calibrations

Modification History
Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Application
This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.

This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Calibration

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare items for 1.1 Select the authorised calibration procedure in
# Calibration

1. **Identify hazards and use appropriate personal protective equipment (PPE), safety equipment and procedures**

2. **Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure**

3. **Assemble and set up specified reference standards and associated equipment prior to testing**

4. **Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary**

5. **Identify and minimise potential sources of measurement error**

# Performance

1. **Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement**

2. **Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment)**

3. **Adjust device under test to bring readings within specification and record data (as-left or after adjustment) where required**

4. **Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results**

5. **Seek appropriate advice when interpretation of results is outside authorised scope of approval**

# Document Results

1. **Estimate and document uncertainty of measurement in accordance with workplace procedures, where required**

2. **Document compliance/non-compliance with test requirements and/or specifications**

3. **Record the results of each test/calibration accurately, unambiguously and objectively**
3.4 Ensure confidentiality of workplace information

4 Finalise calibration

4.1 Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information as required

4.2 Report any non-compliance and verify next course of action with supervisor

4.3 Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in workplace procedures

4.4 Store test equipment/measurement standards and results in accordance with workplace procedures

Foundation Skills
This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace procedures include the current version of one or more of:

- Australian and international standards and codes covering:
  - general requirements for the competence of testing and calibration laboratories, laboratory safety, quality and environmental management
  - accuracy of measurement methods and results, expression of uncertainty (GUM), quantifying uncertainty in analytical measurement, quality assurance of measurement equipment
  - national work health and safety (WHS) standards and codes of practice
registration/licensing and/or National Association of Testing Authorities (NATA) accreditation requirements

- safety requirements for equipment, materials or products; material safety data sheets (MSDS); and incident and accident/injury reports
- standard operating procedures (SOPs), recording and reporting procedures
- quality manuals, equipment and operating/technical manuals
- test methods and calibration procedures (validated and authorised)
- test methods and calibration procedures published by international, national or regional standards, reputable technical organisations, scientific texts or journals and equipment manufacturers
- laboratory layout, work flows and schedules

Standard calibrations

Standard calibrations include, but are not limited to, testing and/or calibrating the following equipment and reference materials using standard methods and procedures:

- test equipment, such as anemometers, balances, barometers, callipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments
- electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references
- working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers

Hazards

Hazards include, but are not limited to, one or more of:

- electric shock
- disturbance or interruption of services
- manual handling of heavy equipment boxes
- sources of electromagnetic radiation (lasers and RF generators/transmitters)
- fluids under pressure
- heat sources, such as ovens

**Safety procedures**

Safety procedures include, but are not limited to, one or more of:
- ensuring access to service shut-off points
- use of PPE, such as hearing protection, gloves, safety glasses and coveralls
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

**Reference materials**

Reference materials include, but are not limited to, one or more of:
- colour standards
- graded granular materials
- hardness blocks

**WHS and environmental management requirements**

WHS and environmental management requirements include:
- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations
Links

Assessment Requirements for MSL904001 Perform standard calibrations

Modification History
Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
- selecting and applying appropriate test methods and calibration procedures
- safely calibrating test and measurement equipment in accordance with standard calibration procedures and documented test methods on at least two (2) occasions
- maintaining close attention to all relevant procedures, regulatory requirements and the accuracy and precision of measurement to ensure the quality and integrity of test/calibration results
- critically examining each calibration step to ensure repeatability and validity of data
- using calibration and correction charts
- performing calculations to give results in appropriate accuracy, precision and units
- using statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement, where required (can use software)
- preparing test/calibration documentation that is accurate and complies with requirements
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and reporting opportunities for improvements.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:
- purpose of metrology and calibration, including common terminology, concepts, principles, procedures and applications
- National Association of Testing Authority's (NATA) and National Measurement Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- reporting procedures and legislative requirements
• handling, transport, storage and operation of reference and working standards
• work health and safety (WHS) and laboratory environmental control requirements.

Additional knowledge requirements relevant to the workplace context that apply for different calibration fields must be assessed, including testing and calibration conducted in the following fields:
• acoustic and vibration measurement
• chemical testing
• construction materials testing
• electrical testing
• heat and temperature measurement
• mechanical testing
• metrology
• non-destructive testing
• optics and radiometry
• pressure measurement.

**Assessment Conditions**

• Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
• Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
• This unit of competency may be assessed with:
  • MSL924001 Process and interpret data
  • relevant MSL974000 series unit/s of competency
  • relevant MSL975000 series unit/s of competency
• Holistic assessment methods include:
  • review of calibration results, uncertainty calculations and workplace documentation completed by the candidate
  • feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate
• observation of the candidate performing standard calibrations
• oral or written questioning to check required knowledge of standard calibration procedures.

• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • specialised calibration/test equipment, reference standards and laboratory facilities
  • calibration methods, procedures and equipment specifications
  • workplace quality manual and procedures.

• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

• The assessor must demonstrate both technical competence and currency.

• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience

• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL913002 Plan and conduct laboratory/field work

Modification History
Release 1. Supersedes and is equivalent to MSL913002A Plan and conduct laboratory/field work

Application
This unit of competency covers the ability to plan and complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available guidelines and advice. Work plans may need to be modified with supervisor agreement to suit changing conditions and priorities.

This unit of competency is applicable to instrument operators, laboratory assistants and technical assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

components and efficient sequences

1.4 Review work plan in response to new information, urgent requests, changed situations or instructions from appropriate personnel

1.5 Update work plan and communicate changes to appropriate personnel

2 Complete allocated work

2.1 Locate relevant workplace procedures for required tasks

2.2 Undertake tasks following prescribed and routine work-related sequences

2.3 Seek assistance from relevant personnel when difficulties cannot be handled

2.4 Record completion of activities to confirm outputs in accordance with plan

3 Identify and resolve work problems

3.1 Recognise problems or opportunities for improved work performance

3.2 Apply agreed problem-solving strategies to consider possible causes and solutions

3.3 Identify and access appropriate sources of help

3.4 Consider available alternatives and keep them open before agreeing on the most appropriate action

4 Work in a team environment

4.1 Cooperate with team members to negotiate and achieve agreed outcomes, timelines and priorities

4.2 Recognise personal abilities and limitations when undertaking team tasks

4.3 Confirm personal role and responsibility within the team for particular outputs

4.4 Demonstrate sensitivity to the diversity of other team members' backgrounds and beliefs
5 Update knowledge and skills as required

5.1 Recognise own strengths and weaknesses and take advantage of skill development opportunities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering safety in laboratories, and quality and environmental management
- National work health and safety (WHS) standards and codes of practice

Ethical and professional work performance

Ethical and professional work performance includes:

- Following workplace policy and procedures, regulations and legislation
- Behaving honestly and openly
- Respecting others and treating them with courtesy and impartiality
- Working diligently and responsibly
- Ensuring confidentiality of information, including client information and test results
- Ensuring proprietary rights, intellectual property (IP) and copyright are protected

Workplace activities

Workplace activities include, but are not limited to, one or more of:
• set-up and pre-use checks of laboratory equipment
• calibration status checks
• sampling and testing following standard procedures
• maintenance and cleaning tasks

Workplace procedures
Workplace procedures include, but are not limited to, one or more of:
• standard operating procedures (SOPs)
• job descriptions, job cards, batch cards and production schedules
• test methods, recipes, procedures and protocols

Problem-solving strategies
Problem-solving strategies include one or more of:
• accessing relevant documentation
• identifying inputs and outputs and sequencing a process
• identifying and rectifying a problem step
• obtaining timely help
• implementing preventative strategies wherever possible

Teams
Teams include one or more groups:
• with ongoing responsibility for particular services or functions
• who are project based
• who have a mixture of full and part-time employees and contractors, laboratory, construction and production personnel
• who are separated by distance and work at sites outside laboratory facilities

Team operation
Team operation occurs within one or more of:
• small, medium and large contexts
• internal and external environments
• workplace guidelines covering access and equity principles and practices, licensing requirements, industrial awards, workplace bargaining agreements and codes of practice
• agreed responsibility and accountability requirements
• appropriate goals, objectives and allocated resources
Strategies to maintain work flow

Strategies to maintain work flow include, but are not limited to, one or more of:

- communicating critical events on shift
- recognising shortages in reagents and problems with equipment
- communicating quality breakdowns
- recognising urgent and abnormal results to be processed
- communicating and behaving in a courteous manner
- being punctual

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL913002 Plan and conduct laboratory/field work

Modification History
Release 1. Supersedes and is equivalent to MSL913002A Plan and conduct laboratory/field work

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- clarifying tasks and recognising resource needs
- planning, prioritising and completing tasks individually or in a team context
- following workplace procedures consistently to achieve quality outputs within required timelines
- identifying and resolving work problems
- recognising potential disruptions or changed circumstances and modifying work plan in conjunction with relevant personnel
- working effectively with team members who may have diverse work styles, cultures and perspectives
- promoting cooperation and good relations
- conducting work based on ethical values and principles
- adjusting to a variety of working environments
- seeking assistance from relevant personnel if difficulties arise.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:

- workplace procedures covering:
  - customer service and quality
  - work health and safety (WHS) and environmental legislative requirements relevant to job role
  - technical work that the candidate routinely performs
- ethical issues relevant to the nature of the candidate’s work
- problem-solving strategies
- interpersonal communication and conflict resolution techniques.
Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace, or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.

- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept in each case).

- This unit of competency may be assessed with:
  - MSL913001 Communicate with other people
  - MSL943002 Participate in laboratory or field workplace safety
  - technical units related to the tasks undertaken

- Holistic assessment methods include:
  - review of documents detailing completed tasks, such as completed job cards, a report or suggestions for quality improvements
  - feedback from supervisors, peers and team members
  - review of a flowchart prepared by the candidate to show efficient sequencing of tasks
  - written or oral questions to partly assess the candidate’s ability to handle a range of contingencies and work in a team environment
  - observation of the candidate performing a range of technical tasks over sufficient time to demonstrate their handling of a variety of contingencies.

- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - workplace procedures, equipment and materials for relevant technical tasks.

- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

- The assessor must demonstrate both technical competence and currency.

- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience.

- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

| Release 1 | This version was released in *MSL Laboratory Operations Training Package Release 2.0.*  
Supersedes and equivalent to MSL913002 Plan and conduct laboratory/field work. Range of conditions removed. Assessment requirements amended. Equivalent outcome. |

Application

This unit of competency describes the skills and knowledge to plan and complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available guidelines and advice. Work plans may need to be modified with supervisor agreement to suit changing conditions and priorities.

This unit of competency applies to instrument operators, laboratory assistants and technical assistants working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

1 Plan and organise daily

1.1 Clarify allocated work activities and required resources if necessary
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1.2 Prioritise work activities as directed

1.3 Break down work activities into small achievable components and efficient sequences

1.4 Review work plan in response to new information, urgent requests, changed situations or instructions from appropriate personnel

2 Complete allocated work

2.1 Locate relevant workplace procedures for required tasks

2.2 Undertake tasks following prescribed and routine work-related sequences

2.3 Seek assistance from relevant personnel when difficulties cannot be handled

2.4 Record completion of activities to confirm outputs in accordance with plan

3 Identify and resolve work problems

3.1 Recognise problems or opportunities for improved work performance

3.2 Apply agreed problem-solving strategies to consider possible causes and solutions

3.3 Identify and access appropriate sources of help

3.4 Consider available alternatives and keep them open before deciding on the most appropriate action

4 Work in a team environment

4.1 Cooperate with team members to negotiate and achieve agreed outcomes, timelines and priorities

4.2 Recognise personal abilities and limitations when undertaking team tasks

4.3 Confirm personal role and responsibility within the team for particular outputs

4.4 Demonstrate sensitivity to the diversity of other team
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

5.1 Recognise own strengths and weaknesses

5.2 Take advantage of skill development opportunities

Foundation Skills
This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively planned, prioritised and completed 2 laboratory/field work tasks on 2 separate occasions, including:
  - working independently
  - working in a team context.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures/guidelines for work
- ethical and professional work performance
- problem-solving strategies
- effective interpersonal communication and conflict resolution techniques
- effective team operations for groups
- strategies to maintain work flow
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
• workplace procedures
• equipment and materials for relevant technical tasks.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Application

This unit of competency covers the ability to record and store data, perform simple calculations of scientific quantities and present information in tables and graphs. The unit of competency requires personnel to solve predictable problems using clear information or known solutions. Where alternatives exist, they are limited or apparent.

This unit of competency is applicable to production operators, field assistants and laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Elements and Performance Criteria

Elements describe the performance criteria describe the performance needed to
essential outcomes. demonstrate achievement of the element.

1 Record and check data
   1.1 Enter data into laboratory information system or record sheets as directed
   1.2 Check data to identify transcription errors or atypical entries
   1.3 Rectify errors in data using workplace procedures

2 Calculate simple scientific quantities
   2.1 Calculate simple scientific quantities using given formulae and data
   2.2 Ensure calculated quantities are consistent with estimations and expectations
   2.3 Report all calculated quantities with appropriate precision and units

3 Present data
   3.1 Present data accurately in tables, charts and graphs using given formats and scales
   3.2 Recognise and report obvious features and trends in data

4 Store and retrieve data
   4.1 File and store data in accordance with workplace procedures
   4.2 Maintain workplace confidentiality standards

Foundation Skills
This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
This field allows for different work environments and conditions that may affect performance.
Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Standards, codes, procedures and/or workplace requirements**

Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:
- relevant Australian and international standards, such as the international system of units (SI) and its application
- national measurement regulations and guidelines

**Data**

Data includes:
- worksheets, spreadsheets or databases linked to information management systems
- results of observations, tests and measurements, or surveys
- graphs, tables and control charts
- semi quantitative observations expressed on a scale e.g. 1 to 4 or + to +++

**Work health and safety (WHS) and environmental management requirements**

WHS and environmental management requirements include:
- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accurately coding, checking, recording and storing data in the required format
- performing simple calculations involving scientific quantities, with or without a calculator or computer software. The following must be performed:
  - decimals, fractions, ratios, proportions and percentages
  - unit conversion, multiples and submultiples
  - use of significant figures, rounding off, estimation and approximation
  - substitution of data in formulae
  - conversions between SI units
  - performing at least five (5) of the following calculations:
    - perimeters
    - angles
    - areas (m²) and volumes (mL, L, m³) of regular shapes (e.g. packaging and moulds)
    - average mass, mass %, density, specific gravity, moisture, relative and absolute humidity
    - ratios, such as mass to mass, mass to volume and volume to volume percentages
    - industry specific ratios, such as g/cm² , kg/m²
    - concentration (e.g. g/100mL, mg/L, mg/L)
    - dilution
    - statistical values, such as mean, median, mode and standard deviation
    - average count, colonies per swab surface and cell counts (live and dead/total)
    - process variables, such as pressure, velocity and flow rates
• % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
• food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability
• preparing and interpreting straightforward tables, graphs and charts of data
• recognising obvious features and trends in data, including:
  • maximum and minimum values
  • spread of data
  • increasing/decreasing data, rate of change
  • outliers, data beyond control limits or normal range
• presenting accurate results in the required format
• maintaining the confidentiality of data in accordance with workplace and regulatory requirements.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:
• concepts of metrology, including:
  • that all measurements are estimates
  • repeated measurements belong to a sample of the measured parameter
  • repeatability, precision, accuracy and significant figures
• the international system of units (SI)
• scientific and technical terminology relevant to job role
• procedures for coding, entering, storing, retrieving and communicating data
• procedures for verifying data and rectifying mistakes
• procedures for maintaining and filing records, and security of data

Assessment Conditions
• Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment, and assessment evidence must be relevant to the particular workplace context. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
• Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in either case).

• This unit may be assessed with technical units, such as:
  • MSL973013 Perform basic tests
  • MSL973014 Prepare working solutions
  • MSL973019 Perform microscopic examination

• Holistic assessment methods include:
  • review of data worksheets, calculations, graphs and tables prepared by the candidate
  • review of records transcribed, maintained or stored by the candidate
  • feedback from supervisors and peers
  • observation of the candidate as they record data and perform calculations
  • questions to assess understanding of relevant procedures and trends in data.

• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • data sets and records
  • computer and relevant software or laboratory information system
  • relevant workplace procedures.

• Assessor must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

• The assessor must demonstrate both technical competence and currency.

• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience.

• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL Laboratory Operations Companion Volume Implementation Guide is available from VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=5c63a03b-4a6b-4ae5-9560-1e3c5f462baa
MSL924001 Process and interpret data

Modification History
Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Application
This unit of competency covers the ability to retrieve data, evaluate formulae and perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

This unit of competency is applicable to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

### Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Assessment Requirements for MSL924001 Process and interpret data

Modification History
Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- retrieving coding, recording and checking data
- calculating scientific and statistical quantities with or without a calculator or computer software, including the following items:
  - converting units involving multiples and submultiples
  - scientific notation, significant figures, round off, estimate and approximate
  - transposing and evaluating formulae
  - fractions, decimals, proportions and percentages
  - mean
  - median
  - mode
  - standard deviation
- performing at least five (5) of the following calculations:
  - perimeters and angles
  - percentage and absolute uncertainties in measurements and test results
  - areas (m²) and volumes (mL, L, m³) of regular shapes, such as packaging
  - dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability
  - ratios, such as mass to mass, mass to volume and volume to volume percentages
  - concentration, such as molarity, g/100mL, mg/L, mg/L, ppm, ppb, dilution mL/L
  - average count, colonies per swab surface and cell counts, such as live and dead/total
  - process variables, such as pressure, gauge pressure, velocity and flow rates
  - biological oxygen demand (BOD), chemical oxygen demand (COD) and total organic carbons (TOC)
  - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability, % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
  - mechanical properties, such as stress, strain, moduli and force
  - presenting accurate results in the required format (significant figures, uncertainty units)
- preparing and presenting data in the following formats:
• tables
• graphs
• line graphs
• histograms
• pie charts, bar charts and control charts
• semi-quantitative observations expressed on a scale (e.g. 1 to 4 or + to ++++)
• recognising and interpreting significant points, anomalies and trends in data
• maintaining the confidentiality of data in accordance with workplace and regulatory requirements
• keeping accurate records that are up-to-date and secure.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:
• concepts of metrology, including:
  • that all measurements are estimates
  • measurements belong to a population of measurements of the measured parameters
  • repeatability, precision, accuracy and significant figures
  • sources of error, and uncertainty associated with measurement steps
  • traceability
  • the international system of units (SI)
  • scientific and technical terminology relevant to job role
  • procedures for coding, entering, storing, retrieving and communicating data
  • procedures for verifying data and rectifying mistakes
  • procedures for maintaining and filing records, and maintaining security of data
  • work health and safety (WHS) and environment requirements.

Assessment Conditions

• Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
• Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).

• This unit of competency may be assessed with:
  • MSL924002 Use laboratory application software
  • technical units, such as:
  • relevant MSL973000 series units of competency
  • relevant MSL974000 series units of competency.

• Holistic assessment methods include:
  • review of data worksheets, calculations, computer files (such as spreadsheets, databases and statistical analysis), graphs, tables and/or charts prepared by the candidate
  • review of records transcribed, maintained or stored by the candidate
  • feedback from supervisors and peers
  • questions to assess understanding of calculations, relevant procedures and trends in data
  • observation of the candidate as they process data, file and store records.

• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • data sets and records
  • a calculator
  • spreadsheets, computer software, databases and statistical packages
  • computer and relevant software or laboratory information system
  • relevant workplace procedures.

• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

• The assessor must demonstrate both technical competency and currency.

• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience

• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

Companion Volumes, including Implementation Guides, are available at VETNet: - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=b75f4b23-54c9-4ce9-a5db-d3502d154103
MSL924002 Use laboratory application software

Modification History
Release 1. Supersedes and is equivalent to MSL924002A Use laboratory application software

Application
This unit of competency covers the ability to use and apply computer software in the laboratory, field and/or production plants for analysis and reporting.

This unit of competency is applicable to technical officers and laboratory technicians in all industry sectors. It describes the application and use of software packages in the context of a laboratory or fieldwork. Typically this software would be for the storage, retrieval, analysis and display of information. There is no expectation that candidates would be able to customise the software to meet specific needs.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Data

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Access application software
   1.1 Identify software required for the task
   1.2 Open software from a personal computer or network terminal
   1.3 Use information sources to locate details of software
features and instructions for its use

2 Use software for specified purposes
   2.1 Input a range of scientific data into a computing system
   2.2 Conduct searches for the retrieval of required data
   2.3 Use application features for efficient computation
   2.4 Construct data sets and databases for numerical and graphical analyses

3 Produce reports of retrieved data and/or processed data
   3.1 Analyse data using features of the software package
   3.2 Select options for constructing data reports
   3.3 Print the results of data analyses using features of the software package
   3.4 Integrate data from diverse application software units in a report
   3.5 Report the outcomes and rationale for database searches where appropriate
   3.6 Reference data sources according to the style requirements of the workplace

4 Perform simple record housekeeping
   4.1 Maintain archived data according to workplace standard procedures
   4.2 Maintain hard copy data according to workplace standard procedures
   4.3 Apply approved antivirus software and standard quarantine procedures

Foundation Skills
This section describes those language, literacy, numeracy and employment skills that are essential to performance.
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Assessment Requirements for MSL924002 Use laboratory application software

Modification History
Release 1. Supersedes and is equivalent to MSL924002A Use laboratory application software

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- selecting the most appropriate software package for the task from the suite of software applications available
- using software for the analysis, reporting and management of laboratory and field data and information, such as quality control and instrument performance characteristics
- using software application features and instructions to input, save, analyse, sort, retrieve and display records and data
- using in-house software manuals to augment skills and solve operational problems
- using virus scanning software to protect in-house software and data.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:

- terminology associated with the software packages used in job role
- basic knowledge of the types of spreadsheet, database and data analysis packages that are available
- application of specific software package features to laboratory tasks relevant to job role
- relationship between the protocol for data input and file storage of the data
- general file and record maintenance
- work health and safety (WHS) and environment requirements.

Assessment Conditions
- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
• This unit of competency may be assessed with:
  • MSL925001 Analyse data and report results
  • relevant MSL974000 series units of competency
  • relevant MSL975000 series units of competency
• Holistic assessment methods include:
  • review of analysis tasks linking test results to the generation of reports by the candidate
  • review of simple statistical and/or graphical analysis of quality control data completed by the candidate.
• Access is required to all instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • a computer network, personal computer or laptop
  • software packages that cover databases, spreadsheets, statistical analysis and simple graphics output
  • input and output data.
• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
• The assessor must demonstrate both technical competency and currency.
• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience.
• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months

MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History
Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Application
This unit of competency covers the general cleaning of work surfaces, cleaning and storage of equipment and the monitoring of laboratory stocks under direct supervision.

This unit of competency is applicable to laboratory assistants and instrument operators working in all industry sectors.

This unit of competency forms a major part of the work of laboratory assistants. They work in accordance with work instructions and standard operating procedures (SOPs) which incorporate all relevant aspects of work health and safety (WHS) legislation and the codes, guidelines, regulations and Australian Standards applying to environmental hazards and dangerous goods.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Quality

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.
1 **Clean work preparation areas**

1.1 Clean preparation areas using appropriate cleaning agents and equipment according to workplace procedures

1.2 Remove spillages, if they occur, using appropriate agents, personal protective equipment (PPE) and workplace procedures

1.3 Collect and segregate wastes in accordance with workplace procedures, relevant codes and regulations

2 **Clean, maintain and store equipment**

2.1 Collect used equipment, inspect for faults and, where necessary, remove from service

2.2 Use appropriate agents, apparatus and techniques to clean equipment

2.3 Store clean equipment in the designated locations and manner

3 **Monitor stocks of materials and equipment**

3.1 Perform stock checks and maintain records of usage as directed

3.2 Store labelled stocks for safe and efficient retrieval

3.3 Inform appropriate personnel of impending stock shortages to maintain continuity of supply

4 **Maintain a safe work environment**

4.1 Use established safe work practices and PPE to ensure personal safety and that of other personnel

4.2 Report potential hazards and/or maintenance issues in own work area to designated personnel

4.3 Minimise the generation of waste and environmental impacts

4.4 Dispose of waste in accordance with workplace procedures, relevant codes and regulations
Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards, guidelines and codes covering WHS; laboratory design and construction; occupational protective equipment; labelling of workplace substances; storage, handling and transport of dangerous goods; environmental management; physical containment levels and facility types
- Industry specific codes, regulations and guidelines, such as Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice, Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations and Import Guidelines, gene technology regulations, National Health and Medical Research Council (NHMRC) Guidelines, and animal welfare

Typical equipment

Typical equipment includes, but is not limited to, one or more of:

- balances; glassware; plastic ware; glass, plastic and quartz cuvettes, pipettes, brettes and volumetric glassware
- blending, mixing and separating equipment, such as sieves and centrifuges
- autoclaves, dishwashers, refrigerators, freezers, ovens, hotplates, mantles, burners and muffle furnaces, microwave ovens, ultrasonic cleaners, incubators and water baths, and gas cylinders
- fume hoods, biohazard containers and biological safety cabinets
- microtomes and tissue processors, cell counters and staining machines
- colorimeters/spectrometers and polarimeters, light and fluorescence microscopies
- thermometers, thermodyhydrographs, hydrometers, conductivity meters and pH meters and ion-selective electrodes, noise meters,
melting point apparatus, viscometers and instrument chart
recorders
• steel ruler/tapes and spirit levels, shovels, scoops, plates, rods,
cylinder moulds and buckets
• rifflers and splitters and mixers, compaction rammers and soil
classification equipment, penetrometers, force measuring
equipment and tensiometers, and hardness testing equipment
• animal cages
• vehicles

Typical materials

Typical materials include, but are not limited to, one or more of:
• consumable items, such as syringes, pipette tips and weigh boats
• PPE
• distilled water, reagents, chemicals, disinfectants, detergents, agar
  media and plates
• equipment spares, such as fuses, bulbs and batteries
• oils/lubricants, fuels, industrial gases and cryogenics, such as dry
  ice and liquid nitrogen
• paper and stationery
• reference samples and standards

Cleaning requirements

Cleaning requirements include one or more of:
• decontamination and/or disinfection
• hygiene monitoring
• minimising environmental impacts
• operation of automatic cleaning apparatus, such as pipette
  washers, ultrasonic cleaners and dishwashers
• sterilisation and disposal of wastes using boiling, high pressure air
  or steam, microwaves, chemicals, gas, filtration, ultraviolet
  radiation and autoclaving
• use of specialised techniques, such as chromic acid baths and
  soaking in hypochlorite

Preparation areas

Preparation areas include one or more of:
• benches
• fume cupboards
• sheds
• sinks
•
Agents for cleaning  Agents for cleaning include one or more of:

- cleaning solutions
- decontaminants
- organic solvents

Spillages  Spillages include one or more of:

- chemicals
- radioactive materials
- biologically active materials

Waste  Waste includes, but is not limited to, one or more of:

- broken glass and sharps
- disposable PPE
- spent reagents, spent or excess samples and test pieces, solvents and batteries
- used containers, boxes, bags and palletes, plastic and metals
- microorganisms

Stock records  Stock records include one or more of:

- calibration and maintenance history
- data sheets
- handbooks, warranty documents, catalogues, manuals and material safety data sheets (MSDS)
- records of usage, loans and breakages

Maintenance issues  Maintenance issues include, but are not limited to, one or more of:

- hygiene issues, prevention of contamination, cleaning, recycling and waste disposal
- checking materials and equipment are fit for purpose, equipment malfunction, and checking serviceability before storage
- potential hazards, incidents and emergencies, spillages, leakages, breakages and contamination
- stock requirements and shortages, and storage constraints

Hazards  Hazards include, but are not limited to, one or more of:

- sharps, broken glassware and hand tools
- aerosols from broken centrifuge tubes and pipetting
- microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids
- chemicals, such as acids, heavy metals, pesticides and hydrocarbons
- sources of ignition, flammable liquids and gases
- cryogenic agents, such as dry ice and liquid nitrogen
- electric shock
- fluids under pressure, such as steam and industrial gas cylinders
- crushing, entanglement and cuts associated with moving machinery or falling objects
- manual handling, working at heights and working in confined spaces
- occupational overuse syndrome, slips, trips and falls
- pedestrian and vehicular traffic
- solar radiation, dust and noise

Established safe work practices

Established safe work practices include, but are not limited to, one or more of:

- applying containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets, and Class PCII, PCIII, and PCIV physical containment facilities
- ensuring access to service shut-off points
- following established manual handling procedures for tasks involving manual handling
- handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer instructions
- identifying and reporting operating problems or equipment malfunctions
- labelling of samples, reagents, aliquoted samples and hazardous materials
- recognising and observing hazard warnings and safety signs
- reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/wastewater, gases, smoke, vapour, fumes, odours and particulates
- use of PPE, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots
WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Links

Assessment Requirements for MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
  - following workplace procedures, relevant codes and guidelines when maintaining the laboratory/field workplace
  - applying information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
  - working safely and minimising exposure of hazards to self, others and the laboratory
  - safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
  - safely removing spillages and disposing of wastes
  - safely storing equipment and materials using workplace procedures, relevant codes and guidelines
  - monitoring and reporting stock levels and the condition of laboratory materials and equipment
  - keeping accurate, up-to-date records
  - reporting potential hazards and maintenance issues using workplace procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures for the cleaning of work preparation areas, materials and equipment
- storage requirements for specific materials and equipment
- workplace procedures for minimisation and disposal of waste
- workplace procedures for monitoring of laboratory stocks
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.

Foundation skills are integral to competent performance of the unit and should not be assessed separately.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).

This unit of competency may be assessed with:

- MSL943002 Participate in laboratory or field workplace safety

Holistic assessment methods include:

- observation of the candidate's techniques for cleaning and/or removal of spillages and waste disposal
- review of stock records completed by the candidate
- feedback from supervisors and peers
- questioning to assess required knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment.

Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:

- work preparation areas, stocks, materials and equipment, cleaning, decontamination and/or disinfection agents and equipment
- personal protective equipment (PPE)
- stock order forms, labels and records/forms.

Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

The assessor must demonstrate both technical competence and currency.

Technical competence can be demonstrated through:

- relevant VET or other qualification/Statement of Attainment AND/OR
- relevant workplace experience.

Currency can be demonstrated through:

- performing the competency being assessed as part of current employment OR
- having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Application

This unit of competency covers the ability to perform set-up, pre-use and in-house calibration/validation checks on equipment and assist with its maintenance.

This unit of competency is applicable to laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Assessment Requirements for MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- performing set-up and pre-use checks for at least three (3) items of equipment
- recognising non-standard behaviour of equipment
- performing calibration checks for at least two (2) items of basic equipment using standard procedures
- obtaining reliable calibration data with the required accuracy and precision
- identifying non-compliant equipment by comparing calibration data with specifications and/or previous data records
- following workplace data recording and reporting procedures
- performing basic cleaning and/or maintenance tasks for at least three (3) items of equipment
- following all relevant work health and safety (WHS) and environmental management requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- role and importance of regular calibration checks and maintenance of equipment
- function of key components of the equipment and details of the pre-use, calibration and safety checks and operating procedures for items of equipment used
- sources of uncertainty in equipment operation and their control
- basic equipment cleaning, maintenance and storage procedures for items of equipment used
- workplace procedures for recording data and reporting results
- relevant hazards, WHS and environmental management requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
  - MSL973001 Perform basic tests
- Holistic assessment methods include:
  - review of equipment log book entries, calibration data and maintenance records generated by candidate
  - feedback from peers and supervisors about the candidates ability to perform calibration checks and assist with basic maintenance
  - observation of the candidate performing equipment set-up, pre-use checks, shutdown procedures, calibration checks, cleaning and maintenance tasks
  - oral or written questioning to check required knowledge of workplace procedures for the safe use, cleaning and maintenance of the items of equipment used.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - standard laboratory equipped with appropriate equipment and reference materials; cleaning, decontamination and/or disinfection agents and equipment; and personal protective equipment (PPE)
  - workplace procedures, equipment manuals and information/records management system.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience.
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with a laboratory about performing the competency being assessed within the last twelve months.
Assessment Requirements for MS1933004 Perform calibration checks on equipment and assist with its maintenance

MSL934002 Apply quality system and continuous improvement processes

Modification History
Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

Application
This unit of competency covers the exercise of good laboratory practice (GLP) and effective participation in quality improvement teams. Personnel are required to ensure the quality and integrity of their own work, detect non-conformances and work with others to suggest improvements in productivity and quality.

This unit of competency is applicable to laboratory technicians working in all industry sectors who contribute to quality improvements in areas or processes associated with their own job function and/or specialisation. This unit of competency is relevant to experienced technical officers who may work individually or as part of a team.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Quality

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Satisfy quality system
1.1 Access information on quality system requirements for own job function
requirements in daily work

1.2 Record and report quality control data in accordance with quality system

1.3 Follow quality control procedures to ensure products or data are of a defined quality as an aid to acceptance or rejection

1.4 Recognise and report non-conformances or problems

1.5 Conduct work in accordance with sustainable work practices

1.6 Promote sustainability principles and work practices to other workers

2 Analyse opportunities for corrective and/or optimisation action

2.1 Compare current work practices, procedures and process or equipment performance with requirements and/or historical data or records

2.2 Recognise variances that indicate abnormal or sub-optimal performance

2.3 Collect and/or evaluate batch and/or historical records to determine possible causes for sub-optimal performance

2.4 Use appropriate quality improvement techniques to rank the probabilities of possible causes

3 Recommend corrective and/or optimisation actions

3.1 Analyse causes to predict likely impacts of changes and decide on the appropriate actions

3.2 Identify required changes to standards and procedures and training

3.3 Report recommendations to designated personnel

4 Participate in the implementation of recommended actions

4.1 Implement approved actions and monitor performance following changes to evaluate results

4.2 Implement changes to systems and procedures to eliminate possible causes

4.3 Document outcomes of actions and communicate them to relevant personnel
5 Participate in the development of continuous improvement strategies

5.1 Review all relevant features of work practice to identify possible contributing factors leading to sub-optimal performance

5.2 Identify options for removing or controlling the risk of sub-optimal performance

5.3 Assess the adequacy of current controls, quality methods and systems

5.4 Identify opportunities to continuously improve performance

5.5 Develop recommendations for continual improvements of work practices, methods, procedures and equipment effectiveness

5.6 Consult with appropriate personnel to refine recommendations before implementation of approved improvement strategies

5.7 Document outcomes of strategies and communicate them to relevant personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories,
quality management systems and plans, measurement management, and sampling and testing

- national work health and safety (WHS) standards and codes of practice, and National Association of Testing Authorities (NATA) accreditation program requirements
- national measurement regulations and guidelines
- specific codes, regulations guidelines, procedures and methods, such as Australia New Zealand Food Standards (ANZFS) Code, Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), National Health and Medical Research Council (NHMRC) Guidelines, and Therapeutic Goods Regulations
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- customer-specific requirements/standards

**Quality control procedures**

Quality control procedures include one or more of:

- standards imposed by regulatory and licensing bodies
- working to a customer brief or batch card and associated quality procedures
- checklists to monitor job progress against agreed time, costs and quality standards
- preparation of sampling plans
- the use of hold points to evaluate conformance
- the use of inspection and test plans to check compliance

**Sustainable work practices**

Sustainable work practices include, but are not limited to, one or more of:

- examining work practices that use excessive electricity
- switching off equipment when not in use
- regularly cleaning filters
- insulating rooms and buildings to reduce energy use
- recycling and reusing materials wherever practicable
- minimising process waste

**Quality improvement**

Quality improvement tools and techniques include using one or
tools and techniques

More of:
- Plan, do, check, act (PDCA)
- Ishikawa fishbone diagrams and cause and effect diagrams, logic tree, similarity/difference analysis, Pareto charts and analysis, force field/strength, weakness, opportunities, threats (SWOT) analysis
- Run charts, control charts, histograms and scattergrams to present routine quality control data
- Statistical analysis of quality control data, mean, median, mode, ranges and standard deviations

Communication

Communication includes interactions with one or more:
- Supervisors, managers and quality managers
- Administrative, laboratory and production personnel
- Internal/external contractors, customers and suppliers

Quality improvement opportunities

Quality improvement opportunities include, but are not limited to, one or more of:
- Production processes
- Hygiene and sanitation procedures
- Reductions in waste and re-work
- Laboratory layout and work flow
- Safety procedures
- Communication with customers
- Methods for sampling, testing and recording data

Documenting and reporting information about quality

Documenting and reporting information about quality includes, but are not limited to, one or more of:
- Verbal responses
- Data entry into laboratory or workplace database
- Brief written reports using workplace proformas

WHS and environmental management requirements

WHS and environmental management requirements include:
- Complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- Applying standard precautions relating to the potentially
hazardous nature of samples

- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

**Links**

Assessment Requirements for MSL934002 Apply quality system and continuous improvement processes

Modification History

Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
  - applying relevant quality control procedures and regulatory requirements to ensure the quality and integrity of the products/services or data provided in work area
  - applying and promoting sustainability principles and work practices in work area
  - detecting non-conforming products or services and recognising opportunities for improvements in work area
  - using at least three (3) quality improvement tools and techniques to analyse performance in work area
  - applying effective problem-solving strategies, such as identifying inputs and outputs, sequencing a process, identifying and rectifying a problem step, and root cause analysis
  - following workplace procedures for recording and reporting information about quality
  - implementing and monitoring approved actions, changes and improvement strategies
  - consulting and working with other team members to suggest improvements in productivity and quality.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- business goals and quality requirements associated with job function and/or work area as a basis for decision making and action
- scientific and technical requirements of the processes, procedures, equipment and instrumentation associated with the candidate’s work tasks and duties
- specifications for laboratory products and services in the work area
- sustainable energy principles
- workplace procedures associated with the candidate’s regular technical duties
- layout of the workplace, divisions and laboratory
- organisational structure of the workplace
- lines of communication
- role of laboratory services to the workplace and customers
- work health and safety (WHS) and environment requirements.
Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
  - MSL924001 Process and interpret data
  - MSL954001 Obtain representative samples in accordance with sampling plan
  - relevant MSL974000 series units of competency
  - relevant MSL975000 series units of competency
- Holistic assessment methods include:
  - review of documentation completed by the candidate as part of regular quality control
  - feedback from supervisors and/or customers regarding quality of products/services and/or data regularly provided by the candidate
  - observation of the candidate's performance and participation in quality improvement teams over time in the workplace
  - review of reports from quality improvement teams where the candidate's role is clearly outlined and verified
  - verified reports of improvements suggested and implemented by the candidate individually
  - use of suitable simulations and/or a pilot plant and/or a range of quality improvement case studies and scenarios.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - workplace quality manual and procedures, quality control data/records
  - customer complaints and rectifications.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience.
• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed
    within the last twelve months.

MSL934003 Maintain and control stocks

Modification History
Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Application
This unit of competency covers the ability to order, maintain and control the use of laboratory materials and/or equipment in the work area.

This unit of competency is applicable to technicians and technical officers working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
Nil

Competency Field
Quality

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain and control stocks of materials or equipment
   1.1 Label, document and store stocks in accordance with relevant standards and specific safety requirements
   1.2 Follow stock rotation procedures to maximise use of stocks within permitted shelf life
   1.3 Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level
1.4 Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate

1.5 Initiate quality control sampling and testing procedures when appropriate

1.6 Report stock problems outside own knowledge and authority limitations to relevant personnel

2.1 Determine requirements of customers and suppliers using appropriate communication and interpersonal skills

2.2 Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions

2.3 Place and/or follow up approved orders using workplace systems and procedures

2.4 Check condition of received goods and take appropriate action

3.1 Record all relevant details accurately using the specified forms/computer system

3.2 Ensure that written information is legible and indelible

3.3 File all records in the designated place

4.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel

4.2 Minimise the generation of wastes and environmental impacts

4.3 Ensure the safe collection of redundant/outsdated stocks for subsequent disposal
Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory design and construction; laboratory safety; quality and environmental management; and labelling, storage, handling and transport of hazardous substances
- national work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines, and national environmental protection measures
- specific legislation, regulations, codes, guidelines, procedures and methods, such as Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), dangerous goods, animal welfare, Australian Quarantine and Inspection Service (AQIS) Export Control Orders and Import Guidelines, Australian Radiation Protection and Nuclear Safety Agency (ARPANSA), gene technology, and National Health and Medical Research Council (NHMRC)
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- customer database and supplier catalogues, customer-specific requirements/standards, internal/external stock orders and overdue actions

Workplace

Workplace procedures include, but are not limited to, one or more of:
procedures

- ordering, purchase and receipt of stocks
- verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes)
- organisation of compatible batch or lot numbers
- storage of stocks, stock control and rotation of stock
- quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins)
- reporting non-conformances

Records

Records include, but are not limited to, one or more of:

- current inventories, stock usage, orders and progress of orders
- equipment servicing and repairs
- quality control sampling, testing and stock rotation

Hazards

Hazards include, but are not limited to, one or more of:

- electric shock
- chemicals, such as acids and hydrocarbons
- microbiological organisms associated with blood and blood products
- radioisotopes
- sharps, such as broken glassware
- disturbance or interruption of services
- manual handling of heavy boxes
- fluids under pressure and industrial gas bottles

Safety procedures

Safety procedures include:

- use of personal protective equipment (PPE), such as hearing protection, gloves, safety glasses, coveralls and safety boots
- ensuring access to service shut-off points
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be
compromised at any time

- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

**Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

**Links**

Assessment Requirements for MSL934003 Maintain and control stocks

Modification History
Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accessing online databases and/or catalogues efficiently
- following workplace procedures for predicting and/or determining demand for stock; and researching, ordering and receiving stock, materials and equipment
- maintaining stocks of materials and equipment at prescribed levels for the work area, through regular inspections, timely ordering of replacement items and follow-up of late orders
- performing quality control sampling and testing and rotating stock in accordance with workplace procedures
- managing peak and seasonal variations in stock usage and production conditions
- interpreting labelling information (lot number, batch and date) and material safety data sheets (MSDS) correctly
- applying procedures for safe (manual) handling, storage and transport of stocks
- completing and recording all stock records and documentation accurately
- demonstrating effective communication and interpersonal skills when dealing with customers and suppliers.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:

- terminology associated with ordering and storage of stocks
- laboratory stock, product and service information relevant to job role
- types of hazardous chemical reactions and the rationale for recommended storage systems
- workplace procedures and quality system requirements for stock control
- codes of practice and regulations concerning the labelling, handling, storage and transport of stock relevant to job role
- relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions
- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.

• Foundation skills are integral to competent performance of the unit and should not be assessed separately.

• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).

• This unit of competency may be assessed with:
  • MSL935004 Maintain instruments and equipment

• Holistic assessment methods include:
  • review of documentation for orders prepared by the candidate
  • examination of stock records maintained by the candidate
  • feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers
  • oral or written questioning to check knowledge of the maintenance and control requirements for a selection of stock
  • observation of the candidate handling stock and conducting quality control sampling and testing.

• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • stocks of materials and equipment
  • stock order forms and documentation
  • sampling and testing equipment
  • online information systems, inventories, print records, databases and catalogues
  • codes of practice and regulations concerning the handling, storage and transport of the stock.

• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

• The assessor must demonstrate both technical competence and currency.

• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience.

• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973007 Perform microscopic examination

Modification History
Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Application
This unit of competency covers the ability to set up a light microscope for optimum resolution, to prepare routine samples and to observe, identify and report sample characteristics.

This unit of competency is applicable to laboratory or technical assistants in all industry sectors. The unit of competency covers limited interpretation and analysis of results. Troubleshooting of equipment and procedures is not required.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

6 Maintain a safe work environment

6.1 Ensure safety and minimise cross-contamination through the use of personal protective equipment (PPE)

6.2 Handle all samples and equipment in accordance with workplace safety protocols

6.3 Clean up spills using appropriate techniques to protect personnel, work area and environment

6.4 Minimise generation of waste and environmental impacts

6.5 Collect and dispose of all wastes safely

6.6 Report hazards and incidents to designated personnel using workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- National work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- Specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements, principles of good laboratory practice (GLP), and Australian code of good manufacturing practice for medicinal
products (GMP)

- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- workplace procedures for microscopic examination of samples

### Preparation of samples

Preparation of samples includes, but is not limited to, one or more of:

- drying and cooling
- physical separation, centrifugation, filtration and chemical separation
- sub-sampling
- labelling
- aseptic transfer of specimen
- thin film or smear on a slide
- fixing of films to minimise cell damage and the production of artefacts
- staining of fixed material to illustrate required characteristics
- mounting of stained films, sections and whole mounts to ensure long-term preservation
- permanent labels for smears, films and sections for presentation, storage and retrieval
- selection of diluent to preserve or enhance visibility of the cells to be counted
- serial dilution to enable individual cells to be reliably counted
- filling a counting chamber in one continuous flow without bubbles or overflow
- selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling

### Biological samples

Biological samples include, but are not limited to, one or more of:

- smears, impression smears, sections, squashes, films and whole mounts
- a monolayer of cells in smears and films
- fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques
- blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes
- stained sections of animal tissues using regressive haematoxylin
and eosin to differentiate cytoplasmic and nuclear detail
- differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium)
- stained whole mounts of helminths
- whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae
- pond water organisms
- onion root tip squash
- midstream sample of urine

**Physical samples**
Physical samples include, but are not limited to, one or more of:
- sand
- asbestos fibres
- coal samples
- construction materials for testing
- geological specimens

**Sample characteristics**
Sample characteristics are restricted to what can be viewed by bright light microscopy and include, but are not limited to, one or more of:
- shape and size of particles
- presence of contamination
- colour
- consistency and variability
- number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains)
- type of cells, percentage of atypical cells, presence/absence of cells, size of cells, viable and non-viable cells and trajectory
- presence of stained material, such as starch
- colour/staining and morphology
- motility

**Workplace safety procedures**
Workplace safety procedures include, but are not limited to, one or more of:
- ergonomic layout, correct illumination and organisation of workbench
- use of biohazard containers and laminar flow cabinet
- correctly labelling reagents and hazardous materials
- use of PPE, such as safety glasses, gloves and coveralls
- handling and storing hazardous materials and equipment in
accordance with labels, MSDS and manufacturer instructions

- regularly cleaning and decontaminating equipment and work areas

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time

- applying standard precautions relating to the potentially hazardous nature of samples

- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information
Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Assessment Requirements for MSL973007 Perform microscopic examination

Modification History
Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Performance Evidence
Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely performing microscopic examination of at least three (3) different samples and correctly identifying and reporting the characteristics of each
- checking suitability of samples, such as labelling, spillage, spoilage due to incorrect storage and transport conditions, temperature control and suitability for the examination
- safely preparing routine biological and/or physical samples in accordance with workplace procedures or standard methods
- checking the quality of prepared samples, such as:
  - clean and scratch-free microscope slides to reduce artefacts
  - preparation according to specified procedure/method
  - homogeneous suspension of sample
  - films and smears that have been fixed rapidly
  - thin films with a monolayer of cells
  - appropriate whole mounts for intact organisms
  - correct sample identification during and after processing
- performing pre-use checks of equipment, such as calibration, routine cleaning and maintenance, and use by dates of reagents
- setting up a light microscope for optimal resolution
- accurately observing, identifying and reporting sample characteristics
- performing counts on samples and basic measurements using grids
- performing accurate calculations as required by the method, such as:
  - dilutions
  - percentage viability
  - number of cells in original sample after dilution
  - calculation of cells/ml in a number of squares of a counting chamber
- interpreting and recording test results reliably
- logging and tracking samples through all steps from sample receipt to completion of the examination and reporting
- minimising cross-contamination and contamination of the laboratory and environment
- using personal protective equipment (PPE) and safety procedures to maintain personal safety and that of others
• handling/storing samples and equipment and collecting/disposing of waste in accordance with workplace procedures.

Knowledge Evidence
Must provide evidence that demonstrates knowledge of:
• nature of samples, sample preparation methods, methods of examination and associated hazards
• parts and functions of a light microscope and steps taken to optimise the resolution of images
• importance and appropriate use of controls and certified reference materials
• workplace and/or legal traceability requirements
• relevant work health and safety (WHS) and environment requirements.

Assessment Conditions
• Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
• This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
• Foundation skills are integral to competent performance of the unit and should not be assessed separately.
• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
• Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
• This unit of competency may be assessed with:
  • MSL922001 Record and present data
  • MSL933002 Contribute to the achievement of quality objectives
  • MSL943002 Participate in laboratory or field workplace safety
  • MSL953001 Receive and prepare samples for testing
• Holistic assessment methods include:
  • review of data records prepared by the candidate, such as counts, observations and results
  • feedback from supervisors and peers about adherence to workplace procedures and sample preparation/examination methods
  • observation of the candidate performing microscopic examinations
  • oral/written questions about workplace procedures covering safe preparation and examination of samples.
• Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  • a standard laboratory equipped with appropriate equipment, including light microscopes and samples
  • workplace procedures, standard methods and materials
  • equipment, such as glass slides, counting chambers (e.g. haemocytometer), optical graticules and stage micrometers, and tissue culture flasks
  • a light microscope, such as:
    • bright field illumination microscope up to 1000 x magnification
    • stereomicroscopes and dissection microscopes
    • compound microscope
    • phase contrast microscope
    • inverted microscope.

• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.

• The assessor must demonstrate both technical competence and currency.

• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience.

• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL975017 Perform laboratory-based ecological techniques

Modification History
Release 1. Supersedes and is equivalent to MSL975017A Perform laboratory-based ecological techniques

Application
This unit of competency covers the ability to participate in laboratory investigations involving animals, plants and related environmental parameters. The animals or plants might be single specimens, parts of specimens or be in culture or under propagation. The investigations might also be part of experimental models that examine interactions of animals and/or plants and their environments. Investigations would generally relate to taxonomy, physiology and pathology, and would be oriented to scientific research, food production and manufacture, and to investigation of biological environments and ecosystems.

This unit of competency is applicable to laboratory technicians and technical officers working in biological, biotechnology and environmental industry sectors. It is expected that all work would conform to statutory and work health and safety (WHS) codes of practice. This unit of competency assumes that personnel perform tests and procedures under the close supervision of scientific staff and that the workplace will equip its workers with relevant animal handling skills should they be required. The unit does not cover procedures related to the handling of vertebrates that are subject to national and state/territory animal care and ethics regulations.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit
MSL974006 Perform biological procedures

Competency Field
Testing
Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Process specimens and documentation
   1.1 Check specimens and request forms for labelling and documentation before acceptance
   1.2 Log specimens, applying required document tracking mechanisms
   1.3 Dispatch specimens to referral laboratories as required
   1.4 Store specimens appropriately until required for testing

2 Participate in the identification and classification of species
   2.1 Record macroscopic and/or microscopic details of specimens to assist in their identification and classification
   2.2 Use taxonomic keys to assist in the identification and classification of species
   2.3 Perform laboratory analyses that can assist in identification and classification of species
   2.4 Preserve specimens for future reference
   2.5 Label preserved specimens for storage and reliable retrieval from collections

3 Maintain viability and integrity of specimens during experimentation
   3.1 Provide nutrients and environments to maintain viability of individual specimens and organisms being cultured or propagated
   3.2 Perform procedures and analyses to monitor the experimental environment
   3.3 Perform procedures and analyses to monitor the physiology of organisms in the experimental environment
   3.4 Adjust nutrient requirements and environmental conditions as indicated by monitoring data
3.5 Report to supervisors data and phenomena that may risk viability of individual specimens or cultures

3.6 Report to supervisors data and phenomena that are incompatible with the experimental design parameters

4 Integrate laboratory and field data

4.1 Locate field data relevant to the study or experiment

4.2 Ensure that field and laboratory data codes are matched for tracking, reporting and chain of custody requirements

4.3 Log field and laboratory data into information systems

4.4 Assist with writing reports of experiments and related field studies

5 Maintain a safe work environment

5.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel

5.2 Minimise the generation of waste and environmental impacts

5.3 Ensure the safe collection of laboratory and hazardous waste for subsequent disposal

5.4 Care for and store equipment and reagents as required

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of
Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- National WHS standards and codes of practice, and national environmental protection requirements
- Specific codes, guidelines, procedures and methods, such as animal welfare legislation and codes of practice, guide to physical containment levels and facility types, and Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations
- Workplace documents, such as standard operating procedures (SOPs), quality and equipment manuals, calibration and maintenance schedules, material safety data sheets (MSDS) and safety procedures, safety procedures to minimise contraction of zoonoses, laboratory schedules, workplace recording and reporting procedures, waste minimisation disposal protocols and environment protection procedures
- Workplace procedures for labelling, preparation, storage, transport and disposal of samples and specimens
- Validated and authorised test procedures

Communication

Communication includes interactions with one or more of:

- Scientists
- Field workers
- Local government professionals or representatives of state/territory authorities, such as environmental protection agencies
- Supervisors and managers (laboratory, quality and customer service)
- Clients

Disposal of biohazardous wastes

Disposal of biohazardous wastes includes, but is not limited to, one or more of:

- Collection for sterilisation by autoclaving (e.g. autoclaving of microbiological plates)
- Appropriate storage (e.g. of waste containing radioactive isotopes)
- Use of biohazard waste containers
Safe work practices

Safe work practices include, but are not limited to, one or more of:

- ensuring access to service shut-off points
- recognising and observing hazard warnings and safety signs
- labelling of samples, reagents, aliquoted samples and hazardous materials
- handling and storage of hazardous materials and equipment in accordance with labelling, material safety data sheets (MSDS) and manufacturer instructions
- identifying and reporting operating problems or equipment malfunctions
- cleaning and decontaminating equipment and work areas regularly using workplace procedures
- using PPE, such as gloves, safety glasses, coveralls, gowns, hearing protection and safety boots
- using containment facilities (PCII, PCIII and PCIV physical containment laboratories), containment equipment (biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets) and containment procedures
- following established manual handling procedures
- reporting abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/wastewater, gases, smoke, vapour, fumes, odour and particulates, to appropriate personnel

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL975017 Perform laboratory-based ecological techniques

Modification History

Release 1. Supersedes and is equivalent to MSL975017A Perform laboratory-based ecological techniques

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- identifying and classifying at least five (5) different animal and plant species for scientific and experimental purposes
- processing, labelling, preserving and storing at least five (5) different kinds of specimens
- performing procedures and analyses to monitor the physiology of organisms/specimens in the experimental environment and maintain their viability on at least three (3) occasions
- taking representative samples for analysis
- not contaminating sterile environments or specimens
- integrating field and laboratory data to provide meaningful results in support of laboratory investigations
- using appropriate scientific terminology and technical concepts to report data and phenomena that may risk viability of individual specimens or cultures or are incompatible with the experimental design parameters
- safely collecting, storing and disposing of waste and minimising contamination of the environment
- following workplace safety procedures.

Knowledge Evidence

- Must provide evidence that demonstrates knowledge of:
  - growth requirements of organisms that are subjects of laboratory or greenhouse culture or propagation relevant to job role
  - general anatomy of plants and animals that is useful as classification data
  - processes that are essential for preservation of plant and animal material for use as reference material
  - relationships between field and laboratory data that are useful in giving commentary on the integrity or distress in biological environments
  - rationale for selection of techniques used to monitor the experimental environment and the effects of variables on organisms in the experimental environment
  - uses of environmental impact statements that incorporate the results of field and laboratory analyses
  - workplace and/or legal traceability requirements
relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgment of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
  - MSL925001 Analyse data and report results
  - MSL974007 Undertake environmental field-based monitoring
- Holistic assessment methods include:
  - review of data and results obtained by the candidate over time to ensure accuracy and consistency
  - inspection of records and workplace documentation completed by the candidate
  - feedback from supervisors or clients about the candidate’s ability to perform laboratory-based ecological techniques in support of laboratory investigations involving animals, plants and related environmental parameters
  - observation of the candidate processing specimens and conducting analyses
  - questioning about procedures that form part of experiments relevant to job role
  - review of the candidate’s responses to case studies/scenarios, such as:
    - relating field and laboratory data in an environmental impact statement
    - preservation of plant species and placement in a herbarium
    - plant propagation in a variety of controlled environments
    - maintenance of cultures of protozoans or invertebrates.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
  - equipment and resources for investigating the physiology of plants and animals in the laboratory
  - workplace procedures, sampling plans, test methods and equipment manuals
  - computers and programs for simulated experiments or data analysis
• items of equipment, reagents, specimens and systems for botanical and zoological techniques
• laboratory information management systems (LIMS), databases, record and filing systems, including specimen accessioning.
• Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
• The assessor must demonstrate both technical competence and currency.
• Technical competence can be demonstrated through:
  • relevant VET or other qualification/Statement of Attainment AND/OR
  • relevant workplace experience
• Currency can be demonstrated through:
  • performing the competency being assessed as part of current employment OR
  • having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSMSUP280 Manage conflict at work

Modification History
Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Application
This unit of competency covers the skills and knowledge required to manage conflict in a range of personal conflict situations.

This unit of competency applies to personnel who are required to liaise and cooperate with other members of the team and to work towards finding common ground and opportunities for problem resolution. It applies to any interactions in the workplace, including interactions between co-workers, between staff and customer/client, and between staff and supervisor.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

Competency Field
Support

Unit Sector

Elements and Performance Criteria
Elements describe the essential outcomes
Performance criteria describe the performance needed to demonstrate achievement of the element
1 **Identify potential sources of conflict**

1.1 Identify actions which are likely to promote a reaction in others

1.2 Assess the other person’s needs and/or concerns

1.3 Assess own ability to respond to the other person’s needs

1.4 Recognise possible causes of conflict

1.5 Identify potential conflict situations

2 **Identify range of alternative approaches**

2.1 Discuss with the other person their needs and concerns

2.2 Identify own needs and concerns and discuss with other person

2.3 Identify possible approaches through which the needs and concerns of both may be met

2.4 Develop a range of alternative approaches for achieving goals

3 **Resolve conflicts**

3.1 Identify areas of common ground or objectives that can be mutually supported

3.2 Agree on an approach which will meet the majority of objectives for both parties

3.3 Implement the approach

3.4 Check that the agreed requirements are being met and that conflict has been resolved

4 **Respond to problems**

4.1 Identify possible problems in the conflict management process

4.2 Determine problems needing action

4.3 Determine possible causes

4.4 Rectify problem using appropriate solution within area
of responsibility

4.5 Follow through items initiated until final resolution has occurred

4.6 Report problems outside area of responsibility to designated person

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Conflict

Conflict in the context of this unit refers to interpersonal conflict and may arise in any work-related context.

Potential sources of conflict

Potential sources of conflict include conflicts arising from one or more of the following:

- different learning/problem solving styles
- different work or personal priorities
- different personality styles
- conflicting key performance indicators (KPIs), work goals or targets
- different social, cultural, religious or ethnic background or different gender of sexual preference
- different interpretation of requirements or ‘the rules’
Approaches to resolving conflict

Approaches to resolving conflict will be based on direct communication and include one or more of the following:

- informal, face-to-face discussions
- formal/structured face-to-face discussions
- through the use of:
  - telephones and two-way radios
  - memos, faxes, letters or emails

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- anger or aggression arising from industrial relations matters
- disagreements over processes or work practices
- variations in opinions about circumstances or events
- interpersonal disputes arising from changes in personal circumstances

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to relevant procedures.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Links

Assessment Requirements for MSMSUP280 Manage conflict at work

Modification History
Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Performance Evidence
- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:
  - recognise situations, actions and verbal and non-verbal communication that indicate potential or actual conflict
  - communicate about needs and concerns of self and others and areas of common ground using:
    - appropriate verbal and non-verbal communication
    - statements that focus on issues and facts, not people and personalities
    - accurate reflection of people’s needs and concerns
  - implement conflict resolution approach and monitor its success
  - apply known solutions to routine problems

Knowledge Evidence
Evidence must be provided that demonstrates knowledge of:
- likely sources of conflict in own job/workplace
- indicators of potential conflict
- communication approaches to resolving conflict
- conflict resolution skills relevant to own job/workplace.

Assessment Conditions
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations
  - will use one or a combination of:
    - totally off the job, in which case it will use case studies and role plays as well as questions
    - evidence drawn totally from performance in the workplace
• will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency.

• may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.

• Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

• Assessment in a simulated environment should use evidence collected from one or more of:
  • walk-throughs
  • pilot plant operation
  • demonstration of skills
  • industry based case studies/scenarios
  • ‘what ifs’.

• Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).

• Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

• Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

• Foundation skills are integral to competent performance of the unit and should not be assessed separately.

• As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

NWP203B Plan and organise personal work activities

Modification History
NWP203B Release 2: Layout adjusted. No changes to content.
NWP203B Release 1: Primary release.

Unit Descriptor
This unit of competency describes the outcomes required to plan and organise personal work activities to meet specified outcomes, including identifying and using resources and equipment and applying customer service policies.

Application of the Unit
This unit supports the attainment of skills and knowledge required for field and operational staff who work under supervision but who are required to exercise responsibility for their own effective work performance.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Plan and conduct assigned work activities | 1.1 Identify work activities and relevant *legislation and organisational procedures*.  
1.2 Organise and *plan work activities* to achieve agreed outcomes.  
1.3 Identify and obtain resources to complete planned work activities. |
| 2 Monitor quality of work. | 2.1 Interpret and check instructions against relevant organisational standards of work.  
2.2 Seek clarification of work instructions as required.  
2.3 Monitor and adjust work according to requirements for job quality, customer service, public responsibility and resource use. |
| 3 Provide and obtain feedback and information on work activities. | 3.1 *Record and report* work activities according to organisational requirements.  
3.2 Access appropriate avenues to provide suggestions for improvement to personal work performance. |

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- prepare, identify and respond to operational problems
- complete basic reports, records and logs
- follow work instructions
- follow policies, procedures and standards
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- communicate such things as work requirements effectively
- assertiveness
- time management

Required knowledge:

- organisational reporting and communication systems
- work planning processes
- legislative and organisational policies, procedures and standards
- administrative procedures
- quality systems
- organisational procedures for contractors
- reporting procedures
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to plan and organise personal work activities to meet specified outcomes, including:

- identifying and using resources and equipment
- applying customer service policies
- identifying, prioritising and planning work tasks
- identifying and applying appropriate quality standards
- monitoring work performance and seeking feedback

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be
authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Legislation and organisational procedures** include:

- by-laws and organisational policies
- standard operating procedures
- equal employment opportunity
- OHS

**Plan work activities** will require:

- interpretation of instructions and directions
- assessment and prioritisation of workload
- adherence to timelines
- interaction and communication with team members and individuals
- interpretation of legislation and organisational procedures
- reference to:
  - productivity requirements
  - total quality management principles
  - customer service requirements

**Record and report** information relating to work activities, including:

- completion of time sheets
- requisitions
- work sheets and job cards
- basic workplace records and verbal or written reports

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Interpret maps, plans and drawings. | 1.1 Identify main *types of maps, plans, drawings and specifications* used to support work tasks.  
1.2 Identify parts of water systems and their interrelationship on a range of drawing types.  
1.3 Interpret commonly used symbols and abbreviations.  
1.4 Interpret function of the legend.  
1.5 Verify latest version of map, plan or drawing. |
| 2 Use maps and site plans to support work activities. | 2.1 Apply organisation's *system for managing maps and plans*.  
2.2 Apply relevant *technologies* used to gather, record and monitor, map and plan data.  
2.3 Identify function and *key features of maps and site plans* in the planning of work.  
2.4 Identify *orientation of the site*.  
2.5 Identify and isolate access from roadways to work site.  
2.6 Determine materials and distances from plans and drawings. |
| 3 Read and interpret specifications. | 3.1 Relate specifications to particular maps and plans and identify quality standards.  
3.2 Identify and determine types of details from works specifications. |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required skills:
- read and interpret maps, plans, drawings and specifications  
- measure accurately  
- communicate effectively  
- work effectively as part of a team  
- use literacy skills in regard to verbal and written communication in the workplace  
- use information provided in maps, plans and drawings to complete a job and in different work situations

### Required knowledge:
- measurements and calculations  
- contours  
- datum points  
- planes
- gradients
- sections
- orthographic projection
- symbols
- dimensions
- terminology

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to read and interpret maps, plans, drawings and specifications including:

- locating correct maps, plans, drawings and specifications for work tasks
- interpreting correctly all relevant information in maps, plans, drawings and specifications to enable the work to be performed correctly, effectively and according to organisational quality standards

**Context of and specific resources for assessment**

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the
assessor has complete confidence in the person's competence over time and in various contexts

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Types of maps, plans, drawings and specifications** may include:

- urban and rural topographical maps
- site plans and elevations
- process flow sheets
- survey plans
- sectional plans and elevations
- channel drainage plans
- pipe system plans
- location of assets plans
- details and specifications providing illustrations and dimensions

**System for managing maps and plans** used within organisation may be:

- geographic information systems
- electronic plans management systems
- manual systems
- hard copy systems

**Technologies** used to gather,
record and monitor map and plan data may:

- include use of global positioning system (GPS) technology and require the use of portable navigation devices by operators
- shape and orientation of site
- roads
- railways
- easements
- existing buildings and structures
- services, including:
  - drainage
  - sewerage
  - gas
  - water
  - electricity and telecommunications
- dimensions
- grades of pipelines and channels
- tree preservation orders
- geographical features
- power and transmission lines
- heritage and cultural features
- types of structure, including:
  - buildings
  - bridges
  - fabricated towers
  - fences
  - pipelines
  - regulators
  - poles
- environmental barriers
- environmental features, including:
  - fauna and flora habitats
  - cultural features
  - heritage features
  - water catchments
- shape of structure and building
- service requirements
- location of plant and equipment
- vertical and horizontal measurements
- clearance distance
- geological features
- service layouts

Key features of maps and site plans will include combinations of:
**Orientation of the site** may include:

- bore and casing details
- relationship to north
- currency of plan
- relationship between plan and site

NWP210B Perform basic water quality tests

Modification History
NWP210B Release 2: Layout adjusted. No changes to content.
NWP210B Release 1: Primary release.

Unit Descriptor
This unit of competency describes the outcomes required to perform basic water quality tests.

Application of the Unit
This unit supports the attainment of skills and knowledge required for field and operational staff with responsibility for preparing for, conducting and reporting on basic water quality tests in general water industry and water treatment operations.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare for basic water quality tests. | 1.1 Receive instructions for conducting and recording *basic water quality tests* and confirm with appropriate personnel.  
1.2 Confirm *testing details* and *plan testing work* according to legislative and organisational requirements.  
1.3 Select, fit and use personal protective equipment specified for routine water tests.  
1.4 Prepare and check *testing equipment* according to organisational requirements. |
| 2 Conduct basic water quality tests. | 2.1 Identify and check correct samples for testing and report *abnormal sample characteristics*.  
2.2 Conduct basic water quality tests according to organisational requirements.  
2.3 Maintain integrity of samples during testing.  
2.4 Identify *atypical data* and take appropriate action. |
| 3 Finalise work. | 3.1 Record relevant *information* according to organisational requirements.  
3.2 Dispose of samples and clean and store test equipment according to organisational procedures.  
3.3 Clear and restore work area according to organisational requirements. |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

**Required skills:**

- conduct basic water quality tests  
- calibrate testing equipment  
- operate testing equipment  
- conduct sub-sampling  
- dispose of samples and waste  
- communicate effectively  
- produce reports and logs  
- perform relevant work-related calculations  
- work effectively as part of a team  
- use literacy skills in regard to verbal and written communication in the workplace  
- interpret work requirements
Required knowledge:
- range and purpose of basic water quality testing
- test procedures
- abnormal characteristics of water samples
- atypical test result data
- relevant work-related calculations
- maintenance and storage of reagents
- requirements for maintaining sample integrity
- documentation procedures for test results
- sample and waste disposal procedures
- relevant legislative and organisational requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to perform basic water quality tests by:
- interpreting testing requirements and procedures
- preparing, checking and using equipment correctly
- conducting at least three different types of test safely while maintaining the integrity of samples
- recording all relevant information

Context of and specific resources for assessment

Access to the workplace and resources including:
- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:
- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical
requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice

- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

**Basic water quality tests** include:

- range of tests required for competent performance of work tasks in the organisational context

- should comprise at least three of the following types of test:
  - pH
  - temperature
  - electrical conductivity
  - microscopy
  - turbidity
Testing details may include:
- locations, including:
  - on-site testing
  - field-based testing
  - laboratory
- range of testing procedures and techniques that apply to organisational, plant or field sites
- variety of samples to be tested
- testing equipment to be used
- test reporting systems

Plan testing work may include:
- interpretation of instructions and directions
- timelines
- interaction and communication with team members and individuals
- interpretation of legislative and organisational requirements

Legislative and organisational requirements may include:
- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

Testing equipment may include:
- portable meters, such as:
  - pH meters
  - electrical conductivity meter
  - thermistors
  - comparators
  - pocket colorimeters
  - dissolved oxygen meters
- test kits
- microscopes
- thermometers

Abnormal sample characteristics may include:
- insufficient sample volume
- odour
- visible contaminants, such as:
Maintaining integrity of samples may include:

- scum
- debris
- discolouration

Application of correct:

- holding time
- storage procedures
- sub-sampling procedures

Atypical data may include:

- results that fall outside organisational range requirements
- results that fall outside legislated range requirements

Information may include:

- time and logging of sample receipt and testing
- visual observations
- equipment identification
- atypical results
- test results

NWP215B Install and replace basic volumetric metering equipment

Modification History
NWP215B Release 2: Layout adjusted. No changes to content.
NWP215B Release 1: Primary release.

Unit Descriptor
This unit of competency describes the outcomes required to install and replace basic volumetric metering equipment for domestic, industrial and commercial premises. The unit also includes the identification of defects and the reporting, replacement and adjustment of metering equipment.

Application of the Unit
This unit supports the attainment of skills and knowledge required for staff responsible for the effective and accurate operation of water metering equipment as a vital component of service delivery and compliance reporting.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Plan and prepare to install or replace basic volumetric metering equipment | 1.1 Determine work requirements and work site boundaries from specifications or instructions.  
1.2 Plan work according to job and safety requirements using relevant plans, drawings, standards and technical data.  
1.3 Select and use electrical safety equipment according to legislative and organisational requirements.  
1.4 Check coordination issues, including permission to access third-party sites, isolations and permits to work with relevant personnel.  
1.5 Identify, check and prepare materials, equipment and resources required to satisfy job plan according to organisational requirements.  
1.6 Identify basic metering equipment and recognise specifications for operation.  
1.7 Select, fit and use personal protective equipment. |
| 2 Read metering equipment | 2.1 Read meters according to the organisation's operational requirements.  
2.2 Report readings outside normal parameters and faulty meters and apply organisational procedures for estimating consumption.  
2.3 Collect and report information on performance metering equipment according to organisational requirements. |
| 3 Finalise work and complete documentation | 3.1 Check, maintain and store equipment, tools and materials according to manufacturer guidelines and organisational requirements.  
3.2 Restore work site to meet environmental and organisational requirements.  
3.3 Maintain compliance reports and relevant workplace records as required. |

### Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

**Required skills:**

- identify and respond to operational problems
- produce reports and logs
• operate communications equipment
• give and receive instructions
• follow plans, charts and instructions
• perform work-related calculations
• use safety equipment and personal protective equipment
• communicate with customers and other employees
• work effectively as part of a team
• use literacy skills in regard to verbal and written communication in the workplace
• secure metering devices

**Required knowledge:**

• relevant utilities and service bodies
• organisation’s communication systems
• materials handling
• environmental, landscape and ground structure of water and wastewater systems
• risk factors and potential hazards involved with water systems
• equipment operation, capacity and limitations
• effects of weather and conditions on site
• meter types
• equipment placement and operation
• metering measurement procedures
• data collection and recording system
• lock-out procedures for mechanical and electrical installations

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The candidate should demonstrate the ability to install and replace basic volumetric metering equipment for domestic, industrial and commercial premises including:

• planning and preparing for installation or replacement of basic volumetric metering equipment
• installing or replacing meters
• reading meters and report faults
• completing reports

**Context of and specific resources for assessment**

Access to the workplace and resources including:

• documentation that should normally be available in a water industry organisation
• relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

• competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

• where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice

• the assessor has complete confidence in the person's competence over time and in various contexts

• all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence

• where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time

• assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of
the candidate, accessibility of the item, and local industry and regional contexts.

**Safety requirements** to be considered in planning work include:

- where relevant, meeting requirements to work in confined spaces and at heights
- use of appropriate personal protective equipment
- organisational electrical safety procedures
- adherence to OHS policies, and statutory and regulatory requirements

**Legislative and organisational requirements** may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

**Basic metering equipment** may include:

- domestic
- industrial
- commercial
- volumetric metering equipment

NWP410C Coordinate and monitor asset construction and maintenance

Modification History
NWP410C Release 2: Layout adjusted. No changes to content.
NWP410C Release 1: Primary release.

Unit Descriptor
This unit of competency describes the outcomes required to coordinate and monitor asset construction and maintenance, including site management and associated commissioning and post-commissioning activities.

Application of the Unit
This unit is required by operators with responsibility for ensuring that asset construction and maintenance activities are performed and completed in compliance with all relevant organisational and statutory requirements. The level of responsibility may vary according to the size, scope, location, and technical complexity of individual projects.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1 Plan and prepare for asset construction and maintenance.** | 1.1 Determine *work requirements* according to asset purpose, maintenance history, components, maintenance schedules and known logistics.  
1.2 Confirm maintenance plan and prioritise and schedule work.  
1.3 Confirm *authorisations* and communication with stakeholders.  
1.4 Identify and address *stakeholders* issues that impact on construction or maintenance.  
1.5 Conduct *site inspections* according to organisational procedures and risk management guidelines. |
| **2 Undertake work site maintenance.** | 2.1 Monitor material handling procedures according to organisational requirements.  
2.2 Monitor construction activities to ensure compliance with *occupational health and safety and environmental regulations*.  
2.3 Confirm maintenance requirements by detailed diagnosis of problems and conditions at the site.  
2.4 Carry out *maintenance tasks* according to the condition of the equipment and organisational requirements.  
2.5 Use equipment, tools and technology safely, effectively and productively. |
| **3 Test and commission work.** | 3.1 Conduct tests and apply defined commissioning programs according to *organisational and manufacturers’ requirements*.  
3.2 Monitor test results to ensure that the assets function within agreed specifications.  
3.3 Conduct and record inspections according to commissioning and stakeholders requirements. |
| **4 Conduct post-maintenance activities.** | 4.1 Coordinate and monitor work site inspections and rehabilitation.  
4.2 Undertake a review of the construction or installation and monitor asset performance.  
4.3 Identify defects and make arrangements to rectify them.  
4.4 Complete reports and documentation required by the organisation.  
4.5 Store and secure reports according to information and data management system. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- interpret and make adjustments to asset maintenance plan
- monitor work progress against a plan
- apply relevant organisational procedures based on legislation, risk management, manufacturers guidelines, site conditions and quality standards
- conduct site inspections and investigations
- communicate with supervisors, team members, contractors and the public using clear and direct communication
- prepare reports for management on asset monitoring and maintenance in organisation proformas
- interpret and apply a range of organisation documents
- liaise and negotiate with local and internal stakeholders
- detect and solve operational problems within area of authority and delegation
- work within safety requirements, identify hazards and use equipment and processes safely
- use safety and personal protective equipment
- interpret policies, standard operating procedures and standards related to monitoring and maintenance of water services assets
- control system operations, processes, failure and rectification
- use required forms of transport including marine craft, 4 wheel drive vehicles, aircraft, snow mobiles based on site location and conditions and safety and equipment management procedures
- use organisation equipment, tools and technology

Required knowledge:

- enterprise contract conditions and compliance
- site inspection and investigation procedures
- organisational policies, procedures, guidelines and requirements for asset monitoring and maintenance
- system layout, integrity, design and performance
- evaluation and investigation requirements
- enterprise auditing and recording procedures and reporting requirements
- characteristics, technical capabilities and limitations of materials and equipment according to manufacturers’ specifications
- occupational health and safety policies and procedures including material handling procedures, use of protective equipment, safe driving in hazardous conditions, bush and water survival, working in the location of power supplies, working in confined spaces
- relevant environmental and natural resource management legislation
- risk factors and potential hazards involved with water pressures and flows
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to plan, coordinate and monitor the construction or maintenance of water industry assets, including:

- analysing work requirements
- prioritising and scheduling work
- liaising and negotiating with all relevant stakeholders and work teams
- planning construction or maintenance activities
- monitoring work performance for compliance with OHS and other organisational and statutory requirements
- providing technical advice on maintenance methods
- conducting risk and hazard assessments
- reporting recommendations for risk and hazard prevention
- conducting or supervising asset tests
- implementing commissioning programs and post commissioning inspections
- coordinating and monitoring the rehabilitation of the worksite
- reviewing the construction or installation and monitoring performance
- identifying and reporting defects

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical
requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work requirements** will include the organisation and site specific requirements including:

- purpose and history of site and its assets
- maintenance plans and specifications
- site location and conditions
- risk and hazard management procedures
- communication methods and equipment
- authorisations, permits and restrictions
- environmental and heritage conditions
- recording and reporting asset condition and maintenance
- preparing and coordinating the availability and transporting
of:
- maintenance and construction support
- equipment and tools
- replacement assets
- safety and protective equipment
- communication equipment
- technical expertise
- surveying equipment
- camping and survival resources
- rescue and retrieval resources
- federal, state and local government

**Authorisations may include:**
- quarantine controls
- legal access
- traffic management
- Blue Card

**Stakeholders may include:**
- contractors
- government and regulatory authorities
- property owners
- utility organisations
- specialised work teams
- general public
- asset users

**Site inspections may include:**
- confirmation of:
  - plans
  - contracts
  - purpose
  - asset history
  - fault reports
  - components
  - risk factors
  - inspection of preparation work
  - assessment of compliance with specifications and manufacturers' guidelines
  - assessment of compliance with procedures and legislation including:
    - occupational health and safety requirements
    - environmental
    - natural resource management
    - water quality

**Occupational health and safety and environmental**
- working with, near and in:
requirements will include:
- confined spaces
- heights
- water
- forests
- equipment operation
- plant operation
- contamination issues
- weather exposure
- herbicides
- pesticides

- PC 3.4 and 5.3 revised

Application

This unit describes the skills required to monitor and coordinate the application of environmental plans and procedures to specific projects and to develop environmental procedures for the local work area.

This unit applies to those working in the water industry with a specific responsibility for ensuring that all relevant environmental plans and policies are applied to each project and work site within the scope of their job role, and for ensuring that environmental plans and policies are implemented, monitored, reviewed and reported according to organisational and statutory requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously while performing complex tasks, in a range of familiar contexts.
No licensing, legislative or certification requirements apply to unit at the time of publication.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reporting and recording environmental procedures
- developing local workplace environmental procedures
- coordinating and monitoring the application of environmental plans and procedures
- identifying and analysing environmental plans and procedures relevant to a representative variety of projects and work sites
- interpreting and implementing relevant environmental plans and procedures for a typical project or work site
- developing site or project specific environmental plans and procedures for an atypical project or work site, including consultation with stakeholders
- managing environmental incidents
- monitoring, reporting and reviewing the implementation of environmental plans and procedures
- coordinating participation by relevant sectors of the workforce

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislative requirements and procedures
- sedimentation and erosion control
- rare and endangered plants
Assessment Requirements for NWPGEN005 Coordinate and monitor the application of environmental plans and procedures

Date this document was generated: 18 March 2019

- identification of risks and impacts
- potential environmental risks and incidents
- disposal of dangerous and contaminated soils
- environmental auditing
- concepts of due diligence
- principles of environmental protection
- endangered species and habitat protection
- environmental impact assessment
- waste management

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- collecting and reporting system performance information
- interpreting data
- producing information, including at least one of:
  - meter reading reports
  - daily running sheets
- adjusting and maintaining flow system control mechanisms
- securing flow regulation devices
- identifying flow requirements
- preparing for and conducting flow monitoring
- identifying and reporting operational problems
- completing records and reports

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- impact of the principles of hydraulics on the operation of flows
- system layout
- risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.5 revised

Application

This unit of competency describes the skills required to plan and prepare for the construction of open channels or drains and to complete construction operations and subsequent site restoration.

This unit applies to those working as field and operational staff involved in the construction of earthen channels and drains for stormwater or irrigation systems or the remodelling or reconstruction of unserviceable systems.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturers’ guidelines.

Those undertaking this unit would work under direct supervision, while performing routine tasks and ensuring minimal damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing reports and logs
- using safety and personal protective equipment
- using tools and machinery
- interpreting plans, charts and instructions
- applying procedures and standards
- applying channel, drain and batter construction techniques
- identifying soil types, mechanics and compaction rates
- selecting and operating appropriate compaction plant, including tamping foot and smooth drum roller
- operating communication systems
- performing work related calculations
- constructing open earthen channels and drains
- planning work and preparing work site according to given specifications and instructions
- cutting channels to specification
- compacting soil
- taking soil samples
- checking that work meets specifications
- cleaning and storing equipment
- restoring work site
Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- channel and drain system design basics
- channel and drain system layout
- environmental aspects of construction
- channel, drain and batter construction processes
- measures to reduce channel deterioration, infestation of weeds, pests and seepage
- relevant utilities and service providers
- safe use of lasers
- use of automatic levels
- basic levelling techniques
- profiles and boning rods
- survey principles
- soil types, mechanics and compaction rates
- capabilities of plant used for construction, including equipment operation, capacity and limitations
- communication systems
- work related calculations
- hazardous materials handling
- landscape and ground structure of work area
- risk factors and potential hazards of construction processes
- effects of weather and conditions on construction site or plant
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

1. Plan and prepare for work

1.1 Determine work requirements from specifications and instructions.
1.2 Select, fit and use personal protective equipment.
1.3 Perform site check to identify hazards and prevent damage to other utilities.
1.4 Provide appropriate drainage and diversion from work site.
1.5 Check equipment and excavation methods to meet safety requirements of task and site.

2. Construct and install drains, channels and associated fittings

2.1 Provide bedding and foundations according to structure type, location and specification.
2.2 Select, place and install prefabricated components and fittings.
2.3 Check installed fittings and prefabricated components to ensure that specifications are met.
2.4 Construct components on-site.

3. Finalise work

3.1 Check constructions and installations to ensure that specifications are met.
3.2 Check, maintain and store equipment, tools and materials.
3.3 Backfill, compact and restore work site.
3.4 Maintain workplace records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing reports and logs
- using safety and personal protective equipment
- using tools and machinery
- interpreting plans, charts and instructions
- performing work related calculations
- applying procedures and standards
- using communication equipment
- constructing and installing irrigation delivery or stormwater drainage assets
- planning work and preparing work site
- constructing assets
- installing assets
- checking that work meets specifications
- cleaning and storing equipment
- restoring work site
- completing documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.
Assessment Requirements for NWPIRR013 Construct and install irrigation delivery and stormwater drainage assets

- system layout
- environmental aspects of construction
- construction processes
- relevant utilities and service providers
- communication systems
- hazardous materials handling
- landscape and ground structure of work area
- risk factors and potential hazards of construction processes
- equipment operation, capacity and limitations
- effects of weather and conditions on construction site or plant
- control systems
- pre-cast components
- pipes and fittings

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

- Element 2 and 4 merged
- All PC revised

Application

This unit describes the skills required to install water meters for rural water supplies.

This unit applies to those working as field or operational staff installing meters.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently under direct supervision, while performing routine tasks ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

</tr>
</tbody>
</table>
| 1. Confirm conditions of the site for meter installation | 1.1 Identify the location of the site and establish client information from work plans and job specifications.  
1.2 Identify access to the site and any conditions of access.  
1.3 Assess the conditions of the site.  
1.4 Set out the site.  
1.5 Carry out a job safety analysis and identify and control hazards. |
| 2. Install meter facilities | 2.1 Ensure that excavations provide sufficient width for movements of installation.  
2.2 Install meter as set out in design and specifications.  
2.3 Check fittings, seals and operation.  
2.4 Install ancillary equipment and check for operation and seal.  
2.5 Check meter installation for compliance with manufacturer specifications. |
| 3. Restore site | 3.1 Backfill with suitable material, moisture content and compaction to maximise compaction efficiency.  
3.2 Restore the site to original site conditions. |

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

</tbody>
</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- planning meter installation and construction
- undertaking calculation of head, flow and measurements of pipes and pressure
- undertaking locational assessment and risk analysis for meter installation
- sampling and testing soil for backfill and installation structures
- analysing the impact of water infiltration on the stability of structures
- measuring the head of water to judge sufficiency for meter’s accuracy
- checking power supply and links
- installing ancillary equipment
- positioning solar panels to maximise power collection
- undertaking a job safety analysis and checking hazards and safety requirements
- using and storing equipment on site
- determining excavation requirements
- calculating sump and headwall elevation and orientation
- calculating pipe and meter pit elevation, fall and presentation
- installing transducers and cabling safely
- interpreting manufacturer requirements for fitting meters in meter pits
- using techniques to protect meters from disturbance
- assessing the effectiveness of backfill
- undertaking site restoration
- identifying and analysing client requirements, site conditions and their impact on the types of meter required, and the design of the installation
• identifying and analysing environmental conditions and limitations and the impact of work to be undertaken
• identifying and analysing safety risks and hazards and responding to remove risks and hazards
• preparing sites and equipment for installation
• identifying faults, changes and failure indicators

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

• the purpose and standards for non-urban water metering
• community expectations for water measurement and use
• standards for the installation of non-urban meters in open and closed conduit systems
• the social, environmental, economic and political responsibilities of water authorities in relation to meter installation
• requirements for checking the pattern approval of meters and compliance with meter installation standards
• meter manufacturers’ guidelines and installation manual for specific meters
• the organisation’s policies and procedures for water meter installation
• conditions for meter location and suitable installation assets and meters for the conditions
• causes of flow disturbance
• potential environmental causes of meter failure
• the organisation’s environmental impact guidelines
• maintenance requirements for meter facility within and open channel
• relevant safety requirements including confined space

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

- PC 4.3 removed
- PC 1.3 and 1.4 merged
- PC 2.1, 2.3, 2.4 and 2.5 merged and revised

Application

This unit describes the skills required to maintain the operational integrity of already installed meters, metering systems and their components. This unit covers corrective, predictive and preventative maintenance.

This unit applies to those working in the water industry as field or operational staff maintaining meters for rural water supply.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under independently under direct supervision, while performing routine tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

</tbody>
</table>

1. **Confirm meter type and location within asset management system**
   - 1.1 Obtain organisational maintenance plan and manufacturer guidelines.
   - 1.2 Locate meter emplacement on a map, or by GPS, or according to organisational procedures.
   - 1.3 Confirm that meter type and number match maintenance plan or manufacturer guidelines.

2. **Check condition of meters and metering system**
   - 2.1 Check components and identify faults using an asset condition checklist.
   - 2.2 Establish maintenance requirements.

3. **Maintain meter and meter facilities**
   - 3.1 Repair or replace faulty components.
   - 3.2 Identify faults which need to be rectified by a third party.

4. **Test and recommission**
   - 4.1 Ensure meter complies with standards.
   - 4.2 Perform on-site re-test of meter.
   - 4.3 Record faults and meter performance, maintenance and repairs.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least two of the different fault types listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading and analysing electronic display
- inputting data into electronic controller
- working with low voltage wiring
- reading manufacturers’ instructions, plans, exploded drawings and parts catalogues
- reading verification marks
- using tags and seals
- confirming the site and the meter
- checking meter condition
- replacing components
- documenting the maintenance

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant organisational policies and procedures for water meter maintenance
- organisational rights and responsibilities
- manufacturers’ maintenance procedures for specific meter types
- knowledge of checking pattern approval requirements
- standards for non-urban metering
Assessment Requirements for NWPIRR022 Maintain meters for rural water supplies

Application

This unit describes the skills required to monitor the operation of flow control. This includes measuring and regulating devices, controlling water supply source systems and/or distribution systems.

This unit applies to those working as field staff with a responsibility for monitoring the operation of flow control, measuring and regulating devices, conducting maintenance and ensuring that problems and anomalies are rectified by specialist technicians.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturer specifications.

Those undertaking this unit would work under indirect supervision, performing routine tasks ensuring minimum damage to the environment, in a familiar context.
No licensing, legislative or certification requirements apply to unit at the time of publication.

</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and reporting operational problems
- collecting and reporting system performance information
- inspecting flow regulation, measuring and regulating devices
- producing reports and logs
- using communication systems
- giving and receiving instructions
- interpreting plans, charts and instructions
- interpreting policies, procedures and standards
- monitoring the operation of flow control, measuring and regulating devices
- selecting appropriate equipment and tools, including personal protective equipment
- identifying devices and equipment to be monitored and relevant operational specifications
- collecting and recording information on device performance
- conducting routine maintenance tasks and securing devices
- identifying and reporting problems and anomalies
- inspecting system and networks
- collecting and recording data on system performance
- reporting monitoring and inspecting findings
- identifying and reporting on system performance
Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- monitoring flow control, measuring and regulating devices’ performance
- system hydraulics
- system layout
- relevant utilities and service bodies
- communication systems
- materials handling
- environmental, landscape and ground structure of water distribution system and network risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site
- flow measurement procedures
- data collection and recording
- system flow control mechanisms and control systems
- lock out procedures for mechanical and electrical installations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

<tbody>
<tr>
<td>1</td>
<td>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</td>
</tr>
</tbody>
</table>

This unit supersedes and is equivalent to NWP425B Coordinate and monitor the operation of irrigation delivery systems.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 2.1 removed
- PC 2.2 reworded
- PC 2.4 revised

Application

This unit describes the skills required to coordinate and monitor irrigation delivery systems to meet performance standards and including system maintenance and customer liaison.

This unit applies to those working as field and operational staff with a specific responsibility for ensuring that the operation of irrigation systems complies with organisational and statutory requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or in a team, while performing complex tasks ensuring minimum damage to the environment in a familiar context. However, the level of responsibility may vary according to the size, scope, location, and technical complexity of process.
No licensing, legislative or certification requirements apply to unit at the time of publication.

## Competency Field

Irrigation

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.</td>
</tr>
</tbody>
</table>

1. **Confirm performance measures in irrigation system's management plan**
   1.1 Identify customer requirements for irrigated culture.
   1.2 Identify environmental factors that impact on the irrigation system.
   1.3 Consult historic system information and stakeholders as appropriate.
   1.4 Confirm performance requirements for an irrigation system management plan.

2. **Monitor and coordinate processes and resource targets**
   2.1 Monitor and test programs and identify, investigate and report any deviations from water quantity, quality, release or flow.
   2.2 Evaluate the duration, volume and flow rates of water deliveries and identify, investigate and report deviations from agreed service levels.
   2.3 Evaluate maintenance activities and report deviations from targets.
   2.4 Identify and record links between operational problems and maintenance activities.

3. **Report outcomes of coordination and monitoring**
   3.1 Analyse, record and report coordination and monitoring data.
   3.2 Identify and report current and potential problems.
   3.3 Make recommendations for improvements in system performance and/or customer service.
Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

<table>
<thead>
<tr>

</tbody>
</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assessing environmental impact
- operating irrigation and/or domestic stock supply system
- checking channel flow
- identifying customer requirements for irrigated culture and environmental factors that impact on the irrigation system
- consulting historic system information and stakeholders as appropriate
- confirming performance requirements for an irrigation system management plan
- implementing monitoring and testing programs and investigating and reporting deviations from planned parameters
- evaluating performance of water deliveries and investigating and reporting deviations from agreed service levels
- evaluating performance targets
- analysing and reporting data
- identifying and reporting problems
- making recommendations for system performance or customer service improvements

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislation, policies and procedures
• customer expectations and requirements
• impact of the principles of hydraulics on the operation of flows
• coordination processes
• principles of scheduling
• system layout and operations
• environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
• environment, landscape and ground structure of work area
• risk factors and potential hazards of irrigation and/or domestic and stock supply systems
• equipment operation, capacity and limitations
• water flow calculations
• gravity systems
• control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

|         | • Unit code updated  
|         | • Content and formatting updated to comply with the new standards  
|         | • All PC transitioned from passive to active voice |

Application

This unit of competency describes the skills required to schedule water deliveries for irrigation and/or domestic and stock supply systems, including monitoring flows, analysing data, coordinating hydraulic processes and compiling operational reports.

This unit applies to those working as field staff and operators with a specific responsibility for ensuring that water deliveries meet varying customer requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under indirect supervision, while performing routine tasks ensuring minimum damage to the environment, in a familiar.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing basic reports and logs
- following plans, charts and instructions
- performing work related calculations
- operating irrigation and/or domestic stock supply system
- checking channel flow
- identifying control system faults
- preparing schedules for water deliveries for customer orders for irrigation and/or domestic stock supply systems
- analysing volumes and flow rates required for water deliveries
- monitoring and regulating system performance
- adjusting system according to demand
- coordinating flow regulating devices
- completing relevant documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- system hydraulics
- impact of the principles of hydraulics on the operation of flows
• coordination processes
• principles of scheduling
• system layout and operations
• policies and standard operating procedures
• communication systems
• environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
• environment, landscape and ground structure of work area
• risk factors and potential hazards of irrigation and/or domestic and stock supply systems
• equipment operation, capacity and limitations
• effects of weather and conditions on operation of site plant
• water flow calculations
• flow measurement procedures
• gravity systems
• control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

- Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting and applying legislation and policies
- coordinating measuring and testing activities
- conducting investigations
- assessing environmental impacts
- developing and reviewing the operation and maintenance of irrigation systems
- gathering, interpreting and synthesising information including historical system capacity data, current legislation and standards, stakeholder views and monitoring results to underpin the sound development of the irrigation system management plan
- consulting widely and effectively
- developing effective irrigation system management plans that address the water organisation’s objectives and requirements
- using data from monitoring arrangements to track the performance of the irrigation system management plan and inform the review of the plan
- preparing reports and recommendations for changes to the objectives of the management plan and its implementation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislation, policies and procedures
- measuring and testing procedures
- investigation procedures
- customer expectations and requirements

**Assessment Conditions**

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

1. Plan and prepare for management of surface water flows and quality

1.1 Identify and interpret surface water flow requirements.
1.2 Identify and interpret water flow, quality and quantity requirements, including release.
1.3 Identify and interpret historic source water flow and system capacity information.
1.4 Identify and interpret environmental flows that impact on water flows and quality.
1.5 Identify and interpret environmental factors that impact on surface water.
1.6 Identify, interpret and review the current status of resource and operational protocols.

2. Develop the surface water management plan

2.1 Identify and interpret surface water management requirements.
2.2 Identify, interpret and validate stakeholder issues that impact on surface water.
2.3 Develop a surface water management plan.

3. Review the surface water management plan

3.1 Analyse and report deviations from planned performance measures.
3.2 Review objectives of the management and implementation plans.
3.3 Review parameters for water usage and quality through monitoring and testing programs.
3.4 Make recommendations for changes to plan objectives and procedures, and usage and quality parameters.
3.5 Provide advice and guidance to water users and stakeholders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.
ACSF levels indicative of performance:

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- developing and reviewing a surface water management plan to ensure environmental considerations are met and source of supply is maintained
- reading and interpreting complex numerical data and performing complex calculations to track and manage performance of surface water
- gathering, interpreting and synthesising information, including:
  - historical data
  - current legislation and standards
  - stakeholder views
  - monitoring and test results
- developing effective surface water management plans that address the water organisation’s objectives and requirements
- using data from testing and other monitoring arrangements to track the performance of the surface water management plan and inform the review of the plan
- preparing reports and recommendations for changes to the objectives of the management plan and its implementation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislation, policies and procedures
- risk management principles
- customer expectations and requirements
- climatic and weather characteristics and impacts
- hydraulic analysis

**Assessment Conditions**

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- Unit title changed to better reflect unit outcomes

Application

This unit describes the skills required for the implementation of the management plan for surface water to ensure environmental considerations are met and source of supply is maintained.

This unit applies to those working as managers in water organisations with responsibility for the management of surface water resources.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, managing staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

1. Implement and coordinate monitoring and testing program

1.1 Confirm performance measures of the surface water management plan.
1.2 Design and implement monitoring and testing programs.
1.3 Coordinate activities relating to the surface water plan.
1.4 Interpret and record test results and education programs.
1.5 Identify and investigate current and/or potential problems and report results and recommendations.
1.6 Gather and evaluate historical surface water information.
1.7 Monitor water usage, water flow and water quality according to the plan.

2. Monitor and evaluate performance of surface water management plans

2.1 Identify, investigate and report deviations of planned water usage and quality and management plan procedures.
2.2 Review objectives of the management and implementation plans.
2.3 Review parameters for water usage and quality.
2.4 Monitor and review environmental factors that impact on surface water.
2.5 Make recommendations for changes to plan objectives and procedures and usage and quality parameters.
2.6 Provide advice and guidance to water users and stakeholders.

3. Report on monitoring and implementation activities

3.1 Identify and report deviations from the management plan.
3.2 Review and report objectives of the management and implementation plans.
3.3 Make recommendations for changes to plan objectives.
Foundation Skills

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- designing and managing measuring and testing activities
- analysing test results
- coordinating and overseeing the conduct of investigations
- assessing environmental impact
- reading and interpreting a range of numerical data related to water catchment
- developing implementation plans that reflect management plan objectives and organisational requirements
- implementing and managing activities in water catchments that impact on water yield and quality
- ensuring performance measures for the catchment management plan
- gathering, interpreting and synthesising information (including historical data, current legislation and standards, stakeholder views and water quality test results) to underpin the sound management of the water catchment plan
- consulting widely and effectively
- developing implementation plans that address the objectives and requirements specified in the management plan
- developing, implementing and overseeing testing and other monitoring arrangements to track the performance of the catchment management plan
- preparing reports and recommendations for future action
Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant historical records
- relevant legislation, policies, procedures
- risk management principles

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

</tbody>
</table>

1. Analyse rainfall and run-off regimes
   1.1 Access and interpret historical rainfall run-off and flooding regimes of specific catchments.
   1.2 Study records to determine previous rainfall amounts, durations and time taken to reach catchment.
   1.3 Model simulated, hypothetical or estimated rainfall intensity data and model catchment.
   1.4 Collate, manipulate and interpret data.

2. Estimate flooding
   2.1 Estimate and record flood levels, extents and flow rates using organisational techniques and guidelines.
   2.2 Assess and record flood hazard.

3. Determine management and warning systems
   3.1 Evaluate the roles of storage and/or retarding basins safety and flood attenuation strategies.
   3.2 Evaluate current flood classifications and impacts.
   3.3 Formulate planning controls for flood plain or waterway management.
   3.4 Evaluate current flood warning systems.
   3.5 Recommend or develop changes to existing flood plain or waterway management controls and warning systems.

4. Report and communicate recommendations
   4.1 Collate, analyse and record information.
   4.2 Prepare and present reports.
   4.3 Communicate findings and recommendations to stakeholders.

Foundation Skills

Application

This unit describes the skills required to operate and control reclaimed water irrigation and the use of reclaimed water for irrigation practices.

This unit applies to those working as staff members with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, performing routine tasks in a familiar context, ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Treatment
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.</td>
</tr>
</tbody>
</table>

1. **Assess sites for reclaimed water irrigation**
   - 1.1 Identify soil/water interactions and soil properties important for plant growth.
   - 1.2 Identify soil sampling sites, collect samples and conduct soil testing.
   - 1.3 Classify soils using field texture, pH and structure analysis.
   - 1.4 Monitor and determine the water holding capacity of the soil.

2. **Assess quality of reclaimed water for irrigation**
   - 2.1 Sample and test reclaimed water and interpret quality parameters.
   - 2.2 Determine crops suitable for the quality of reclaimed water and site conditions.

3. **Implement reclaimed water irrigation**
   - 3.1 Identify basic features of irrigation systems.
   - 3.2 Operate and maintain irrigation equipment.
   - 3.3 Identify and apply irrigation scheduling options for reclaimed water.
   - 3.4 Produce water budgets using crop factors and climate data.
   - 3.5 Apply irrigation water and collect and monitor tail water or runoff.

4. **Respond to water or soil quality issues**
   - 4.1 Develop irrigation management options to respond to water quality issues.
   - 4.2 Identify and apply requirements and options for soil ameliorants.
   - 4.3 Monitor infiltration and drainage.

5. **Compile reclaimed water irrigation records**
   - 5.1 Compile reports from system data.
   - 5.2 Report observations outside defined parameters for further action.

**Foundation Skills**

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.
Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

**Unit Mapping Information**

This unit supersedes and is equivalent to NWP362B Monitor, operate and control reclaimed water irrigation.

</tr>
</tbody>
</table>

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- monitoring and managing soil
- solving operational problems
- accessing, interpreting and applying relevant legislation
- apply environmental policies, plans and procedures
- assessing environmental risks at the work site
- identifying soil groups
- using safety and personal protective equipment
- sampling and testing soil and water
- monitoring, operating and controlling reclaimed water irrigation
- analysing critical aspects of reclaimed water reuse management relating to the project or site
- implementing reclaimed water reuse irrigation
- identifying environment, health and safety risks and impact on soil, stock and operators
- applying environmental procedures
- participating in and contributing to reviews of reclaimed water reuse procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- key principles of irrigation practices, including irrigation scheduling
Assessment Requirements for NWPTRT062 Operate and control reclaimed water irrigation

- key characteristics of reclaimed water
- relevant legislative requirements
- standard operating procedures
- primary agencies involved in drinking water quality management
- water quality performance indicators
- an overview of the water supply system
- water hazardous agents and preventative strategies
- community and agency roles and responsibilities in monitoring water quality
- best management practices for the use of reclaimed water for irrigation purposes
- reclaimed water usage licensing procedures and requirements
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site or plant
- interpretation and use of material safety data sheets

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion:

- reading complex and formal documents and providing information on their application
- preparing accurate written reports with language and structures suited to the intended audience
- working with legislation drafters and legal advisers
- consulting on and preparing policy guidelines
- adjusting communication to suit different audiences
- gathering and analysing policy feedback

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- practices and procedures for developing policy guidelines
- policy feedback mechanisms
- current organisation policies
- government policies and international policy obligations that impact on organisation policy
- organisation and government procedures and protocols
- public sector codes of ethics and code/s of conduct
Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Unit Descriptor

This unit covers management of generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project start-up activities, coordinating project implementation, monitoring the project and arranging follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of Procurement and Contract Management.

In practice, managing simple projects overlaps with other generalist and specialist work activities such as applying government processes, using resources, gathering information, managing contracts etc.

This unit, and unit PSPPM405A Administer simple projects, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.
Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Implement start-up activities | 1.1 The *project plan* is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy.  
1.2 Project *stakeholders’* understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.  
1.3 *Required systems* are established and maintained throughout the project in accordance with the project plan.  
1.4 A working knowledge of *project management tools* is used to facilitate integration of project activities and achievement of project outcomes. |
| 2. Coordinate project implementation | 2.1 *Integration* and *management* of project activities are handled in accordance with the project plan.  
2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan.  
2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures.  
2.4 Project *change proposals* are received and changes are recommended/made in accordance with the project plan, and documented in accordance with *policy and procedures*. |
| 3. Monitor project | 3.1 All aspects of the project are continually monitored and corrective action is taken as necessary to maintain progress in |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
 | accordance with the project plan.
3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders.
3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.
3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.
3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan.

4. Arrange project follow-up activities

4.1 Project deliverables are analysed against specifications, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.
4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.
4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.
4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
• using project management tools applicable to small scale or low risk projects
• applying ethical decision making and problem solving related to project management of small scale or low risk projects
• writing recommendations and preparing implementation support packages requiring precision of expression
• applying workplace safety procedures in line with project requirements
• accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:
• legislation, organisational policies and procedures that may impact on project management, for example:
  • public sector codes of ethics/conduct
  • occupational health and safety and environment requirements
  • project governance requirements
  • quality standards
• risk management
• procurement guidelines
• human resources
• equal employment opportunity, equity and diversity principles
• project management tools to suit a range of small scale or low risk projects
• project management principles
• organisational and political context

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

• Pre-requisite units that must be achieved prior to this unit: Nil
• Co-requisite units that must be assessed with this unit: Nil
• Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  • PSPETHC401A Uphold and support the values and principles of public service
  • PSPGOV402B Deliver and monitor service to clients
  • PSPGOV403B Use resources to achieve work unit goals
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC410A Administer contracts
- PSPPM401B Design simple projects
- PSPPM403B Close simple projects
- *Excluded units that may not contribute to the same qualification as this unit:*
  - PSPPM405A Administer simple projects

**Overview of evidence requirements**

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

**Resources required to carry out assessment**

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

**Where and how to assess evidence**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
• Aboriginal and Torres Strait Islander people
• women
• young people
• older people
• people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

• case studies
• demonstration
• portfolios
• questioning
• scenarios
• authenticated evidence from the workplace and/or training courses

**For consistency of assessment**

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

---

**Range Statement**

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in **bold italics** in the Performance Criteria is explained here.

**Project plan** will include some or all of:

• acquisition strategies
• budget and financial management strategy
• contract management
• cost estimates
• evaluation criteria
• expected outcomes/measurable benefits of the project
• facilities
• inclusions and exclusions from project
• information/communication strategy
• intellectual property strategies
• milestones
• objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

**Stakeholders** may include:
- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

**Required systems for project management** may include:
- planning and monitoring system
- financial management including:
  - budget allocation/funding
  - income generated
  - expenditure
- recordkeeping for documented information such as:
  - correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

**Project management tools** may include:
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts
  - Critical Path Method
  - cost schedule control system
  - logistics support analysis
  - life cycle cost analysis
  - spreadsheets
  - recording systems - electronic and manual

**Integration of project activities** may include:
- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

**Management may include:**
- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management
- contract management
Change proposals may include:
- change management
- scope
- administration
- engineering, technical, technology changes
- time
- cost
- resources

Policy and procedures may include:
- government legislation (Federal, State and Local) affecting organisation's administration such as:
  - public sector management acts
  - financial management and accounting legislation and regulations
  - privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements

Specifications may include:
- functional
- technical
- performance
- material

Unit Descriptor

This unit covers management of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes managing start-up, project implementation, project integration and follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of Procurement and Contract Management.

In practice, managing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

</tr>
</thead>
</table>
| 1. Manage start-up activities | 1.1 *Project plans* are refined in consultation with steering committee and team members, and precise details are included for schedules of activities, milestones and resources.  
1.2 *Required systems* are established and maintained throughout the project in accordance with the complexity of the project and in line with the project plan.  
1.3 Project team members' understanding of and commitment to fulfilling the project requirements and their roles and responsibilities for the duration of the project are confirmed.  
1.4 *Project management tools* are selected and applied effectively to achieve project outcomes. |
| 2. Manage project implementation | 2.1 *Integration* and *management* of complex project activities are handled in accordance with the project plan.  
2.2 Leadership and required *development* are provided to the project team, and morale, stress levels and triggers are managed throughout the life of the project in accordance with organisational *policy and procedures*.  
2.3 *Stakeholder* input and expectations are managed throughout the project in accordance with the communication plan.  
2.4 Disagreements and disputes are resolved to the satisfaction of stakeholders or referred to a higher authority in accordance with organisational policy and procedures.  
2.5 Project *change proposals* are negotiated, agreed and documented in accordance with policy and procedures. |
| 3. Manage project integration | 3.1 All aspects of the project and related projects are integrated and links are established to ensure objectives are met in accordance with the project plan. |
ELEMENT PERFORMANCE CRITERIA

3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan and staff and contractors are regularly consulted to discuss progress and ensure effective results.

3.3 Project integration is monitored, and management plans and any related contracts are reviewed and amended as appropriate, with results reported in accordance with mechanisms identified in the communication plan.

3.4 Ongoing progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the project.

3.5 Programmed review of objectives and achievement is planned and implemented in accordance with the project plan.

4. Coordinate project follow-up activities

4.1 Significant judgment is applied in the analysis of project deliverables against specifications, performance standards and project objectives, and the results are reported to stakeholders.

4.2 Support package arrangements are identified and offered to stakeholders who will be required to apply the project results.

4.3 Options for stakeholders to take account of environmental and cultural factors in applying the project results are included in the support package.

4.4 Operational and support authorities are consulted to investigate any testing/trialling/building and evaluation requirements resulting from the project, and funding implications estimated in project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project outcomes
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- negotiating with stakeholders and team members using communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools applicable to reasonably complex projects
• applying ethical decision making and problem solving related to project management of reasonably complex projects
• writing recommendations and preparing project reports requiring precision of expression
• applying workplace safety procedures in line with project requirements
• accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

• legislation, organisational policies and procedures that may impact on project implementation, for example:
  • public sector codes of ethics/conduct
  • occupational health and safety and environmental and sustainability requirements
• project governance requirements
• quality standards
• risk management
• procurement guidelines
• financial management and budgetary framework
• human resources
• equal employment opportunity, equity and diversity principles
• project management tools to suit a range of reasonably complex projects in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
• project management systems
• organisational and political context
• critical analysis in a project management context
• business and commercial issues related to the projects managed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

• Pre-requisite units that must be achieved prior to this unit: Nil
• Co-requisite units that must be assessed with this unit: Nil
• Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment
process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPPM501B Design complex projects
- PSPPM503B Close complex projects
- PSPPROC501A Manage contract risk
- PSPPROC503A Manage contract performance

**Overview of evidence requirements**

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

**Resources required to carry out assessment**

These resources include:

- legislation, guidelines, procedures and protocols relating to project management in the organisation and the public sector
- workplace project documentation
- scenarios and case studies
- examples of project management tools

**Where and how to assess evidence**

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing complete projects, including coping with difficulties, irregularities and breakdowns in routine
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
• Aboriginal and Torres Strait Islander people
• women
• young people
• older people
• people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:
• case studies
• demonstration
• portfolios
• questioning
• scenarios
• authenticated evidence from the workplace and/or training courses

For consistency of assessment
Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement
The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in bold italics in the Performance Criteria is explained here.

Project plans will include some or all of:
• acquisition strategies
• budget and financial management strategy
• contract management
• cost estimates
• evaluation criteria
• expected outcomes/measurable benefits of the project
• facilities
• inclusions and exclusions from project
• information/communication strategy
• intellectual property strategies
• milestones
• objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

*Required systems for project management* may include:

- planning and monitoring system
- financial management including:
  - budget allocation/funding
  - income generated
  - expenditure
- recordkeeping for documented information such as:
  - correspondence
  - quality data including survey, needs, test results
  - contracts
  - time allocated and spent on each aspect of the project
  - progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
  - Gantt and bar charts
  - Program Evaluation and Review Technique (PERT) charts

*Project management tools* may include:
• Critical Path Method
• cost schedule control system
• logistics support analysis
• life cycle cost analysis
• spreadsheets
• recording systems - electronic and manual

**Integration of project activities** may include:

• scope
• time
• cost
• quality
• human resources
• communications
• risk
• procurement

**Management** may include:

• scope management
• communication and reporting
• schedule management
• financial management
• fraud control
• quality management
• resources management
• people management
• logistics management
• risk management
• contract management
• project implementation
• transition
• change management

**Development** may include:

• regular meetings
• feedback
• encouragement
• mentoring and coaching
• additional physical and human resources (within allocated budget) if and as required

**Policy and procedures** may include:

• government legislation (Federal, State and Local) affecting organisation's administration such as:
  • public sector management acts
  • financial management and accounting legislation and regulations
- privacy legislation
- government and organisational guidelines and procedures relating to:
  - project governance
  - resourcing
  - security
  - strategic plans
  - recruitment
  - risk management
  - procurement guidelines
  - designation approvals
  - industrial agreements
  - environment and sustainability

**Stakeholders may include:**
- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

**Contract change proposals may include:**
- administration
- cost
- engineering, technical, technology changes
- resources
- scope
- specifications
- time

**Specifications may include:**
- functional
- technical
- performance
- material

Unit Descriptor

This unit covers closure of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes reviewing project activity and managing project closure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of Procurement and Contract Management.

In practice, closing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.
## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Review project activity</td>
<td>1.1 Evaluation of project process, supplier performance and achievement against objectives is undertaken in consultation with stakeholders and results are reported in accordance with the project plan evaluation framework and organisational policy and procedures. 1.2 The extent to which clients needs were met is evaluated and action to rectify problems is identified and documented. 1.3 Implications of project outputs/outcomes for policies and operating procedures are identified and recommendations are made for their amendment. 1.4 Information obtained from the evaluation of the project is provided in accordance with organisational requirements so it may be used to improve relevant policy and practice.</td>
</tr>
<tr>
<td>2. Manage project closure</td>
<td>2.1 Any funding associated with the project is acquitted against project budget items, and financial records are checked for accuracy and completed in accordance with organisational procedures. 2.2 Project wind-down is managed and documentation, records and approvals are handled in accordance with project plan and organisational policy and procedures. 2.3 Project stakeholders are debriefed, and infrastructure and resources are redeployed in accordance with organisational policy and procedures. 2.4 Project hand-over to user/s is completed in accordance with organisational procedures, and lessons learnt are documented and reported to stakeholders to assist in continuous improvement. 2.5 Stakeholders are advised of procedures and authorities for initial support to apply project results where relevant, and strategies</td>
</tr>
</tbody>
</table>
ELEMENT PERFORMANCE CRITERIA

are provided to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating outcomes against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing stakeholders and redeploying resources and infrastructure
- acquitting and reporting on resource expenditure including time and costs
- using project management tools applicable to reasonably complex projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
  - public sector codes of ethics/conduct
  - occupational health and safety and environmental and sustainability requirements
  - project governance requirements
  - quality standards
  - risk management
  - procurement guidelines
  - financial management
  - human resource management and development
  - equal employment opportunity, equity and diversity principles
  - project specifications and objectives
- project management tools to suit a range of reasonably complex projects in
terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project

- project management principles and systems
- critical analysis in a project management context
- business and commercial issues related to the projects managed
- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- Pre-requisite units that must be achieved prior to this unit: Nil
- Co-requisite units that must be assessed with this unit: Nil
- Co-assessed units that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
  - PSPETHC501B Promote the values and ethos of public service
  - PSPGOV502B Develop client services
  - PSPGOV503B Coordinate resource allocation and usage
  - PSPGOV504B Undertake research and analysis
  - PSPGOV505A Promote diversity
  - PSPGOV507A Undertake negotiations
  - PSPGOV512A Use complex workplace communication strategies
  - PSPGOV517A Coordinate risk management
  - PSPPM501B Design complex projects
  - PSPPM502B Manage complex projects
  - PSPPROC504A Finalise contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- reviewing and closing complex projects in a range of (3 or
more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:
- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools suited to reasonably complex projects

Where and how to assess evidence

Valid assessment of this unit requires:
- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing and closing complex projects, including coping with difficulties, irregularities and breakdowns in routine
- reviewing and closing complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:
- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:
- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of

Evidence must be gathered over time in a range of contexts to
assessment ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Application

This unit describes the skills required to cover the exercise of powers under the organisation's enabling legislation and other relevant legislation for regulation, monitoring, inspection and investigation.

This unit applies to those working in public sector roles conducting regulatory activities. The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently as part of a team, performing routine tasks involving a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

</table>
| **1. Establish regulatory powers** | 1.1 Access and use current information relating to enabling legislation and regulations to maintain up-to-date knowledge of requirements.  
1.2 Confirm powers provided under the legislation and the boundaries of those powers.  
1.3 Identify and confirm compliance requirements of the legislation, related regulations, standards, codes of practice and policy.  
1.4 Identify and confirm acts and omissions that comprise non-compliance or offences under the legislation. |
| **2. Apply enabling legislation** | 2.1 Identify and analyse circumstances where regulatory powers will be exercised to determine response or measures to apply.  
2.2 Identify circumstances requiring the exercise of regulatory powers that are outside own limits and refer to others.  
2.3 Identify risks associated with the exercise of regulatory powers and strategies to manage risks.  
2.4 Apply enabling legislation consistent with the boundaries and powers contained therein. |
| **3. Utilise other legislation and standards** | 3.1 Identify other legislation and standards which impact on powers and confirm their requirements.  
3.2 Resolve or refer apparently conflicting legislative directions. |
| **4. Work with other organisations** | 4.1 Identify organisations that have jurisdictions which may overlap and establish and maintain relationships.  
4.2 Identify organisations available to provide assistance and advice or take referrals and establish relationships for mutual benefit.  
4.3 Follow organisational protocols and procedures when working with other organisations.  
4.4 Refer compliance matters to other organisations for action when required.  
4.5 Follow lead agency protocols and/or lines of authority during operations involving more than one organisation. |
Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPREG401C Exercise regulatory powers.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis
- using information technology to access relevant legislation and procedures
- reading complex written materials and applying them to work practices
- using scanning techniques
- engaging in discussion involving exchanges of often complex oral information
- choosing regulatory responses and/or measures to fit the circumstances and justifying those responses against legislation, guidelines, policy and regulations

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- full range of regulatory powers and the limits to those powers
- enabling legislation
- offences under the legislation
- aspects of criminal law, administrative law, industrial law, contract law
- statutory time limits
- terminology used in legislation and procedures
- organisational policies, guidelines and regulations
- public sector legislation including, health and safety and environment relating to the exercise of regulatory powers
Assessment Conditions
This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking negotiation and conflict resolution
- applying risk management and self-preservation techniques
- using judgment and decision making
- exchanging often complex oral information in a form to suit diverse audiences
- writing requiring accuracy of expression and formality in structure and format

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- public sector legislation
- organisational parameters for decision-making
- range of appropriate actions possible for different offences
- negotiation in the context of achieving compliance
- awareness of social and cultural issues

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of
performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Determine media requirements | 1.1 Organisational protocols are followed when liaising with the media.  
1.2 The media’s potential interest is assessed and arrangements are made to meet needs where appropriate.  
1.3 Operational responsibilities are balanced against the provision of information to the media. |
| 2. Provide information to the media | 2.1 A positive image of the organisation is maintained when liaising with the media.  
2.2 Every opportunity is used to promote the organisation, its services and personnel.  
2.3 Relevant and succinct information is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media. |
| 3. Publicise an event | 3.1 Relationship is established with media contacts.  
3.2 Event details and support materials are gathered and presented in a logical, relevant and concise manner to the media.  
3.3 Information provided to media is recorded and maintained. |

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to
media
- public speaking
- retaining professionalism under duress

**Required Knowledge**

- organisational protocols relating to media liaison, for example legal and organisation requirements relating to:
  - confidentiality
  - libel
  - accuracy
  - discrimination
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
  - newspapers
  - magazines
  - radio
  - television (local, regional, national media)
- communication skills
- establishing media relationship

**Evidence Guide**

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities.

**Consistency in performance**

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

**Context of assessment**

On the job or in a simulated work environment.

**Specific resources for assessment**

No special requirements.
Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Organisation** may include:
- Fire
- Police
- State Emergency Service
- Emergency Management

**Organisational protocols** may include:
- organisational policies and procedures
- personal presentation being as neat as possible considering the operational circumstances
- ensuring media liaison person is fully briefed and prepared
- acknowledge support of other organisations
- seeking advice from headquarters where appropriate
- limiting comments on role of own service
- relevant Federal and State legislation and regulations

**Liaising with the media** may include:
- print (local, community, daily newspapers, magazines)
- television (live or pre-recorded)
- radio (live or pre-recorded)

**Operational responsibilities** may include:
- preservation of life and property, which is the principal concern to all public safety personnel
- presenting information relevant to the public

**Event** may include:
- long service to organisation
- medal presentation
- awarding of certificates
- donations/sponsorships/fundraising
- recruiting
- new equipment
- VIP visit
- open day
- training
- unusual rescues
- self help information

**Media's potential interest** may include:
- enormous media event
- standard report
- human interest
- in the public’s interest

**Media's requirements** may include:
- deadlines
- capabilities
• visual and verbal requirements
• types of medium
• variation
• journalists
• amenities
• briefing area
• access to media liaison person
• bilingual personnel and bilingual information

*Media* may include:
• representatives from mainstream, community and ethnic television
• print and broadcast media

*Organisational positive image* may include:
• promote the relevance and efficiency of the service
• report the facts
• heroism of personnel
• organisational personnel are co-operative and responsive
• organisational personnel well presented
• handling media in most positive manner in even the most adverse conditions/circumstances

*Media opportunity* may include:
• opportunity to promote the services
• provide educational information to the public
• airplay

*Relevant and succinct information* may include:
• information that according to protocol is available for public release
• report facts and avoid speculation
• do not supply classified information
• use language that can be readily understood by all to avoid misinterpretation

**Unit Sector(s)**

Not applicable.

Unit Descriptor

This unit describes the outcomes required to identify, plan and implement treatment options in order to reduce risk.

Application of the Unit

This unit applies to people working in a relatively simple and routine workplace in which they use the organisation’s policy and procedures. They would normally have local supervisory/management responsibility and will apply known solutions to a variety of predictable problems.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR027 Assess operational risk

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

<tr>
<td>1. Make risk decision</td>
<td>1.1 Calculated level of risk is compared to the established <em>risk criteria</em> and determined to be acceptable or unacceptable in consultation with the supervisor.</td>
</tr>
<tr>
<td></td>
<td>1.2 Risk that is determined as unacceptable is documented and noted for treatment.</td>
</tr>
<tr>
<td>2. Identify and select</td>
<td>2.1 <em>Treatment options</em> of known risks are identified and confirmed as contained in <em>organisational standards and guidelines</em> or supervisor’s guidance.</td>
</tr>
<tr>
<td>treatment options</td>
<td>2.2 Treatment options under consideration are evaluated for <em>effectiveness</em> within the given context.</td>
</tr>
<tr>
<td></td>
<td>2.3 Selected treatment options are documented and communicated in accordance with organisational policies and procedures.</td>
</tr>
<tr>
<td>3. Implement treatment</td>
<td>3.1 <em>Treatment plans</em> incorporating selected options are implemented in accordance with organisational policies and procedures.</td>
</tr>
<tr>
<td>options</td>
<td>3.2 Treatment plans are communicated in the workplace in accordance with organisational policies and procedures.</td>
</tr>
<tr>
<td>4. Monitor and review risk</td>
<td>4.1 Effectiveness and efficiency of the treatment plan is <em>monitored</em>, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity.</td>
</tr>
<tr>
<td>and the process</td>
<td>4.2 Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process.</td>
</tr>
<tr>
<td></td>
<td>4.3 Treatments are adjusted and communicated following the review process.</td>
</tr>
</tbody>
</table>
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with personnel at all levels of organisation and risk management specialists
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically treat risks and, where appropriate, access resources
- manage simple project implementation
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- treatment options for risks relevant in the workplace
- team work principles and strategies
- basic project management strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening
Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholders’ involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace.

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplace

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of treating operational risk, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of treating operational risk in a range of 3 or more contexts or occasions, over time

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and should include a combination of two or more of:
• workplace projects
• simulation or role plays
• case studies and scenarios
• observation
• portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

**Risk criteria** may include:
• the nature and types of causes and consequences that can occur and how they will be measured
• how likelihood will be defined
• the timeframe(s) of the likelihood and/or consequence(s)
• how the level of risk is to be determined
• the views of stakeholders
• the level at which risk becomes acceptable or tolerable
• whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

**Treatment options** may include:
• avoidance of the risk
• removing a risk source
• changing the likelihood of
• an initiating event or source of risk occurring
• a hazard impacting on elements at risk
• changing the consequences of an identified hazard impact
• sharing the risk
• retaining the risk based on an informed decision

**Organisational standards and guidelines** may include:
• AS/NZS ISO 31000:2009 Risk management—Principles and guidelines
• regulatory or legislative requirements
• environmental protection and sustainability regulations
• industry standards and codes of practice
• organisational charter/business plan
• organisational OHS, risk management or resilience
policies or operating procedures

**Effectiveness** may include:
- benefits to the individual
- benefits to the organisation
- cost benefits resulting from the implementation of the treatment
- cost of implementing the treatment option

**Treatment plans** may include:
- budgeting
- expected outcome of treatments
- performance measures
- responsibilities
- review process to be set in place
- schedules

**Monitored** may include:
- critical observation
- identification of changes over time
- regular checking
- regular recording

**Unit Sector(s)**
Not applicable.

**Custom Content Section**
Not applicable.
PUAEMR027 Assess operational risk

Modification History
PUAEMR027 Release 1: Primary release.

Unit Descriptor
This unit describes the outcomes required to identify and assess risk in an operational environment.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit
This competency applies to workers at a relatively simple and routine level, in which they use established organisational policy and procedures. Workers would normally have local supervisory or management responsibility and apply known solutions to a variety of predictable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Unit of Competency.
Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| **1. Establish the risk context** | 1.1 Objectives and scope are identified using organisational risk management standards and guidelines.  
1.2 **Risk criteria** are identified and confirmed as contained in organisational policies, procedures or supervisor guidance.  
1.3 **Structure for the planning** required to conduct a risk assessment is determined.  
1.4 **Stakeholder** aims and objectives are identified and recorded in accordance with workplace procedures and guidelines. |
| **2. Identify risk** | 2.1 All possible sources of risk which may affect the situation or objectives are identified and recorded in consultation with stakeholders.  
2.2 Risks are identified using a **specified methodology or tool** in accordance with workplace procedures and guidelines.  
2.3 Risk statements describing consequences are generated. |
| **3. Analyse risk** | 3.1 Risks are analysed by estimating the likelihood of particular consequences occurring.  
3.2 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures. |
| **4. Evaluate risk** | 4.1 Levels of risk are prioritised for treatment.  
4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors.  
4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented. |

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.
Required Skills

- communicating effectively with risk management specialists and people at all organisational levels
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically assess risks and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (e.g. % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care as applies in emergency risk management context
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening
# Evidence Guide

## Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder’s involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

### Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

## Context of and specific resources for assessment

### Context of assessment

• portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Organisational risk management standards and guidelines** may include:

- regulatory or legislative requirements e.g. ohs act
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational ohs, risk management or resilience policies or operating procedures

**Risk criteria** may include:

- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

**Structure for the planning** may include:

- documentation required
- analysis tools which are required to conduct the assessment
- approach taken to conduct the assessment
- depth of assessment

**Specified methodology or tools** may include:

- a risk matrix
- analysis of risk registers
- brainstorming
- business continuity planning
- examining any available data e.g. audit
results/incident reports
- expert judgement
- focus groups
- nomogram
- scenario analysis

Unit Descriptor

This unit covers the competency required to respond to a wildfire, work as a safe and situationally-aware member of a crew to attack and extinguish a fire, participate in mop-up and patrol operations, and prepare equipment for the next crew.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR215 Prevent injury

Employability Skills Information

This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

1. Prepare to respond to fire
   1.1 Information about location of fire, type of wildfire and most effective route to the fire is obtained, taking into account local conditions.
   1.2 Personal protective clothing and equipment, and food and fluid requirements are identified and relevant preparations undertaken prior to departure as per organisational standards.

2. Proceed to fire
   2.1 Location of the fire and type of fuel is confirmed on approach.
   2.2 Access to the area is gained safely without damage to vehicles and equipment, and minimum damage to the environment.
   2.3 Evidence relevant to fire cause is noted and brought to the attention of the supervisor.
   2.4 Indicators of fire behaviour are observed and communicated to supervisor.

3. Obtain and use firefighting equipment and extinguishing media
   3.1 Nominated extinguishing media and firefighting equipment are located and obtained.
   3.2 Equipment is used in accordance with organisational and manufacturer’s procedures.

4. Combat wildfire
   4.1 Instructions are received, firefighting strategies and tactics are confirmed and implemented in accordance with organisational safe work practices and procedures.
   4.2 Suppression techniques, equipment and extinguishing media appropriate to wildfire conditions are used.
   4.3 Control lines are prepared in accordance with supervisor’s instructions.
   4.4 Equipment is positioned, made ready for use and protected from damage in accordance with
organisational procedures.

4.5 Fire is attacked taking into account wildfire hazards as directed and in accordance with organisational procedures.

4.6 Evidence of fire cause and area of fire origin are protected.

4.7 Communication is maintained at all times in accordance with organisational procedures.

5. Observe and react to wildfire and weather conditions

5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor.

5.2 Weather conditions and changes to fire behaviour are observed and reported to supervisor.

5.3 Variations in topography, fuel features and fuel arrangements are observed and effect on fire behaviour is reported to supervisor as required.

5.4 Escape routes and safety zones are identified and maintained at all times.

5.5 Communication is maintained with other firefighting personnel and supervisor throughout operational activities.

6. Participate in mop-up and patrol activities and support operations

6.1 Mopping-up activities are carried out in accordance with organisational procedures.

6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures.

6.3 Activities to support firefighting operations are carried out in accordance with organisational procedures.

7. Recover and store equipment

7.1 Equipment and consumables are recovered as directed.

7.2 Equipment is stored in accordance with organisational procedures.

7.3 Cleaning and maintenance are carried out in accordance with organisational procedures.

7.4 Damaged or lost equipment is reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.
Required Skills
- detect hot spots, hazardous trees, unsecured wildfire perimeter
- undertake dry and wet wildfire attack
- use wildfire control tools and equipment
- work as a member of a team

Required Knowledge
- communication on the fireground
- extinguishing media, water, foam, suppressants
- fire behaviour (fuel, weather and topography)
- health and fitness requirements
- hygiene and wellbeing
- organisational operating procedures
- safe work practices
- wildfire control tactics and techniques
- wildfire hazards, safety techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit
Assessment must confirm the ability to:
- react to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- use firefighting equipment
- participate in dry wildfire control
- use extinguishing media in wildfire control
- maintain health and safety of self, other workers and people in the immediate work area
- participate in mop-up and patrol
- undertake operational activities safely

Consistency in performance
Competency should be demonstrated over time in a range of actual and/or simulated field-based workplace environments.

Context of and specific resources for assessment
Context of assessment
Competency should be assessed in an agency approved simulated and/or field-based workplace environment.

Specific resources for assessment
Access is required to:
Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated workplace or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

Unit Descriptor

This unit covers the competency required to identify and avoid workplace hazards and risks, to maintain personal safety and to report identified issues to supervisors and team members.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit is designed as an introduction to safe work practices and is specifically relevant to a workplace requiring people to be involved in incidents, prescribed burning and/or operational aspects of emergency management.

This unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

This unit contains employability skills.
### Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Identify workplace hazards and risks, and advise others | 1.1 Procedures and practices are followed to identify **hazards and risks** in the **workplace**.  
1.2 Identified hazards and risks in the work area are communicated to team members and supervisors.  
1.3 Identified factors which may create or escalate the immediate risk to life, property or the environment are reported. |
| 2. Implement hazard and risk control procedures | 2.1 Appropriate **personal protective clothing and equipment** is selected and donned in accordance with organisational procedures.  
2.2 Appropriate procedures for dealing with hazards and **controlling risks** in the workplace are followed in accordance with work health and safety guidelines and organisational procedures.  
2.3 Equipment appropriate for dealing with a hazard is selected for use and checked in accordance with standard operating procedures.  
2.4 Personal health and welfare is managed in accordance with organisational policy. |
| 3. Monitor effectiveness of hazard and risk control procedures | 3.1 Situation is monitored to ensure the continued effectiveness of the hazard and risk control procedures.  
3.2 **Changes in incident behaviour and conditions** are reported immediately to supervisor.  
3.3 Activities and **debriefings** regarding hazard and risk control procedures are participated in as appropriate. |
Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply safe work practices in accordance with organisational work health and safety policies and procedures
- identify typical hazards and risks in the workplace, and apply control measures
- select equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- select personal protective clothing

Required Knowledge

- basic principles of risk assessment
- methods of hazard and risk control and reporting, and debriefings
- occupational hazards and risks encountered in the workplace
- organisational health and fitness guidelines
- personal protective clothing and equipment requirements
- risk control measure such as eliminate, isolate and substitute
- signs of fatigue, heat related illness, dehydration, fatigue and stress
- situational awareness
- welfare management, such as signs of occupational stress, limiting stress, dealing with stress and seeking assistance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- correctly identify hazards and risks in the workplace
- apply organisational procedures including the correct selection and use of personal protective equipment and clothing
- advise and report workplace hazards and risks, and apply and monitor control measures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of assessment
resources for assessment  Competency should be assessed on-the-job and/or in a range of simulated environments.

Specific resources for assessment  Access is required to:
- appropriate protective clothing and equipment
- organisational procedures.

Method of assessment  In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:
- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement  The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

**Hazards** may include:
- aerial retardant drops
- aircraft
- broken terrain
- biological, bites, infections, stings
- chemicals
- confined space
- electricity
- entrapment
- environmental
- falling objects
- explosions
### Risks may include:
- damage to property and environment
- injury to self and/or team members
- loss of life and property

### Workplace may include:
Locations where activities and operations may occur such as:
- confined spaces
- mobile property
- open spaces
- public and private property (including crown land)
- structures
- water

### Personal protective clothing and equipment must include:
- emergency response clothing

and may also include:
- chainsaw chaps
- chemical protective clothing
- eye, ear and head protection
- face shield
- personal accessories kit
- personal distress units
- personal lines
- respiratory protection

### Controlling risks must include:
- adequate food, fluid and other welfare needs during operations
- appropriate training
- eye, sight, hearing protection
- fire blankets/roll over protection
- goggles, face shield, hearing protection and chainsaw chaps
- hierarchy of control
- safety warning signs
- use of clothing and equipment to provide protection

**Changes in incident behaviour and conditions** may include:
- environmental conditions
- escalation of incident

**Debriefings** may include:
- end of incident
- end of shift

**Unit Sector(s)**
Not applicable.

**Custom Content Section**
Not applicable.

Unit Descriptor

This unit covers the competency required to work as a situation-aware member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop-up and patrol operations, and prepare equipment for the next crew. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit applies to personnel who work as a member of a team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR204B Respond to wildfire
Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Unit of Competency. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Receive and report details of wildfire | 1.1 Details of the wildfire including its location, *type*, behaviour and development are received and recorded.  
1.2 Fire details are reported in accordance with organisational procedures. |
| 2. Prepare to respond to fire | 2.1 Location of the wildfire is confirmed and the safest effective *access* route is determined.  
2.2 *Personal protective clothing and equipment*, apparel, food and water are obtained before departure, in accordance with organisational requirements.  
2.3 Most appropriate method of transport to the wildfire is selected and used. |
| 3. Proceed to fire | 3.1 Location of the wildfire is confirmed by observation or from instructions while on approach.  
3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or *environmentally sensitive areas*.  
3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of the appropriate authority.  
3.4 *Navigational aids* are used for planning and operational purposes. |
| 4. Protect people and assets | 4.1 As far as conditions allow, number, location and safety of people and *assets* in the threatened area is determined and assessed. |
4.2 Appropriate **protective procedures** are implemented under direction, to protect persons in the path of a wildfire.

4.3 Access by the public and personnel to hazardous locations is controlled as directed and in accordance with organisational procedures.

4.4 Defensibility of property is considered and, if appropriate, assistance is provided to help occupiers.

4.5 Safety of people and assets in the threatened area is monitored during the course of the fire.

4.6 Safety of people and security of assets in the area is checked and reported after the passing of the fire.

5. **Combat wildfire**

5.1 Access to the area of operations is gained in the safest and most effective manner.

5.2 Notification of arrival and appropriate report is provided.

5.3 Briefing is received including area of operations, strategies and tactics to be employed.

5.4 Most suitable location to commence wildfire control operations is selected.

5.5 **Firefighting media and equipment** are selected and used effectively and safely in accordance with organisational procedures.

5.6 **Fire hazards** are identified and action taken to minimise the risk of injury to the public, personnel and self.

5.7 **Firefighting strategies** are implemented to achieve objectives in accordance with organisational procedures.

5.8 Fire control activities are undertaken to minimise overall damage and impact on assets and the environment.

5.9 **Potential fire behaviour** is considered and acted upon to ensure safety and achievement of objective.

5.10 **Fuel, weather and topographical factors** are observed and potential fire behaviour anticipated.

5.11 Communication is maintained with supervisor and other firefighters in the work area.

5.12 **Fire reports** are provided to supervisor as required.

5.13 Area of origin and **evidence of fire cause** are protected and brought to attention of supervisor or relevant authority.

5.14 **Escape routes and safety zones** are established.
and communicated to personnel.

6. **Conduct mop-up and patrol activities**

6.1 Mop-up activities are carried out in accordance with guidelines and conditions.

6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures and guidelines.

7. **Recover and maintain equipment**

7.1 Equipment is made up and made ready for operational use in accordance with organisational procedures.

7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with organisational procedures.

**Required Skills and Knowledge**

This describes the essential skills and knowledge and their level, required for this unit.

**Required Skills**

- communicate effectively in writing and orally
- detect hot spots and hazardous trees
- interpret fire weather, fuels and terrain and predict the likely impact on fire behaviour
- mop-up
- read maps
- receive briefings and confirm instructions
- undertake back burning and burning out
- use wildfire control tools and equipment
- work as part of a team

**Required Knowledge**

- defensive/offensive firefighting strategies and tactics:
  - asset protection
  - backburning and burning out
  - control lines and firebreaks
  - defendable space
  - direct, indirect, parallel attack
  - fire attack procedures
  - lighting patterns
  - standard operating procedures; reporting; patrol; mop-up
  - wet, dry firefighting
  - fire behaviour:
• fire development
• flame height and intensity
• rate of spread,
• junction zones
• spotting
• firefighting protocols
• fireground hazards
• fire weather conditions and impact on fire behaviour:
  • atmospheric stability
  • relative humidity
  • temperature
  • wind speed and direction
• fuel and its impact on fire behaviour
  • moisture content, quantity, type, arrangement and distribution,
  • size, drought effect, curing
• organisational first aid requirements
• organisational procedures for dealing with injury
• protection of area of origin and evidence of fire cause
• safety near vehicles and machines
• terrain and physical feature and their impact on fire behaviour and suppression:
  • aspect
  • fuel variations
  • slope
  • weather variations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:
• anticipate and react to changing wildfire behaviour
• observe and react to weather behaviour
• accurately assess whether or not it is safe to defend assets
• undertake dry wildfire control activity
• monitor effectiveness of tactics
• use firefighting equipment and extinguishing media
• maintain safety and health of self, other workers and
people in the wildfire area
- use communication equipment
- read maps
- protect area of origin and evidence of fire cause

**Consistency in performance**
Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.

**Context of assessment**
Evidence of performance at a wildfire or prescribed burn is required for attainment of Elements 5 and 6 of this unit.

The remaining elements should be assessed in an agency approved field-based environment or simulation.

**Specific resources for assessment**
Access is required to:
- access to wildfire or prescribed burns and/or approved field-based environment
- firefighting equipment and extinguishing media

**Method of assessment**
In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

**Range Statement**
The Range Statement relates to the Unit of Competency as a whole. It allows for
different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

| **Types** must include: | • crown  
| | • ground  
| | • surface  
| **Access** may include: | • aircraft  
| | • boat  
| | • foot  
| | • vehicle  
| **Environmentally sensitive areas** may include: | • areas of:  
| | • fragile soils  
| | • native flora and fauna  
| | • rare and endangered species  
| | • threat to water quality  
| **Navigational aids** must include: | • maps  
| and may also include: | • aerial photographs  
| | • compass  
| | • global positioning systems  
| **Assets** may include: | • area of rare or sensitive flora and fauna  
| | • buildings  
| | • culturally significant sites  
| | • crops  
| | • plantations  
| | • property  
| | • public lands  
| | • stock  
| | • utilities and infrastructure (rail, power and telephone lines, water supply structures, communications towers, bridges)  
| **Protective procedures** may include: | • alerts and warnings  
| | • in-situ protection  
| | • relocation  
| **Firefighting media** must include: | • water  
| and may also include: | • Class A foam  
| | • earth  
| | • fire suppressants (short and long term)  
| | • retardants  

**Firefighting equipment** must include:
- wetting agent
- driptorch
- hand tools
- hose and small gear
- pump
- tanker

and may also include:
- aircraft
- chainsaw
- earth moving machinery
- knap sack
- ropes and lines

**Fire hazards** must include:
- burns
- disorientation
- environmental
- falling branches and trees
- falling objects
- fatigue
- heat-related illness (heat exhaustion and dehydration)
- lack of visibility
- manual handling
- mine shafts
- rolling objects
- smoke inhalation
- snake or insect bite
- sprain or fracture
- trips/falls
- water bombing operation

**Firefighting strategies** must include:
- combination attack
- combined strategy
- defensive strategy
- direct attack
- indirect attack
- mop-up
- offensive strategy
- parallel attack
- patrol

**Potential fire behaviour** may include:
- fire development
- flame height and intensity
- fuel load and arrangement
- rate of spread
### Fuel may include:
- crop
- forest
- grass
- heath
- plantation:
  - stage 1 – post establishment
  - stage 2 – pre-canopy closure
  - stage 3a – canopy closure (unpruned)
  - stage 3b – canopy closure (pruned)
  - stage 4 – thinned
  - stage 5 – mature
  - stage 6 – harvesting/clear felling
- scrub

### Fuel factors which may impact on fire development must include:
- arrangement/distribution
- effects of drought
- moisture content
- quantity
- seasonal effects
- size
- topography
- type

### Weather factors which may impact on fire development must include:
- anabatic winds
- atmospheric stability
- cold fronts
- diurnal variations
- katabatic winds
- land breezes
- local effects
- relative humidity
- sea breezes
- temperature
- vegetation edge effects
- wind changes
- wind direction and speed

### Topographical factors which may impact on fire development must include:
- aspect
- elevation
- local wind effects

Unit Descriptor

This unit covers the competency required to prepare, conduct and evaluate simple prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives.

A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Compliance with legislative requirements will be required.

Application of the Unit

This unit applies to personnel responsible for preparing, conducting, and evaluating a simple prescribed burn on public and private land.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAFIR303B Suppress wildfire
Employability Skills Information

<td>2.4 Lighting techniques and patterns are implemented.</td>
</tr>
</tbody>
</table>
2.5 Burning is monitored to ensure safety and operational changes are made as required.
2.6 Contingencies are implemented in accordance with prescribed burn plan as required.
2.7 Burn records are kept in accordance with organisational procedures.
2.8 Burn operations are concluded and burn security is implemented in accordance with organisational requirements.
2.9 Crews are debriefed and resources released from the burn.
2.10 Incidents are reported and investigated in accordance with organisational procedures.

3. Conduct post burn activities

3.1 Outcomes of the burn are assessed and reported.
3.2 Variations from the burn plan are reported in accordance with organisational procedures.
3.3 Restoration and rehabilitation works are identified and/or carried out in accordance with organisational requirements.
3.4 Prescribed burn activities are recorded in accordance with the organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- apply fuel sampling methods
- conduct briefings and debriefings
- establish control lines for prescribed burns
- interpret a simple prescribed burn plan
- interpret existing and forecast weather conditions
- interpret fire behaviour conditions
- monitor patrol activities
- monitor the burn
- plan for contingencies
- use fire prediction tools

Required Knowledge

- fire prediction tools
• fuel sampling methods
• ground ignition patterns and techniques
• legislative and organisational authorisations required for conducting a burn
• legislative and organisational policy and procedures for conducting a prescribed burn
• procedures for monitoring prescribed burns and securing burn
• resource requirements
• safe work practices
• seasonal restrictions on prescribed burns
• types of prescribed burns

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:
• implement a simple burn plan for a designated area
• conduct an effective operational briefing and debriefing
• conduct a safe and effective burn, utilising the appropriate resources and recording actions taken
• conclude activities once the burn is completed

Consistency in performance

Competency should be demonstrated in a range of actual and/or field-based workplace environments.

Context of assessment

Evidence collected from undertaking a simple prescribed burn is required.

Specific resources for assessment

Access is required to:
• simple prescribed burn plans
• fire management plans
• lighting equipment
• suppression equipment
• lighting and suppression crews

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training
environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

**Range Statement**

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording in the Performance Criteria is detailed below.

| **Burn plan** includes:                        | • approval of the plan for the conduct of prescribed burning  
|                                               | • map identifying the area to be burned  
|                                               | • specifications and conditions under which the operation is to be conducted |

| **Type of burn** must include:                 | • Simple prescribed burn, characterised by low risk, low intensity, small area, low potential impact on assets, completed in one shift and involves minimal variation of fuel and terrain |

| **Contingency planning** may include:          | • dealing with escapes  
|                                               | • resource breakdowns  
|                                               | • resource requirements  
|                                               | • safety considerations (e.g. escape routes and safety zones)  
|                                               | • special resources/secondary control lines  
|                                               | • wind changes |

| **Local conditions at the time of burn** may include: | • actual or anticipated changes in conditions  
|                                                         | • weather conditions (temperature, relative humidity, wind, atmospheric stability, drought index, weather forecasts, fire danger index) |
| **Person/s or organisation/s may include:** | • people or organisations who  
• have an interest in adjacent land to which a burn could spread  
• have an interest in managing the consequences of a burn  
• have an interest in specific assets  
• have an interest in the area to be burned  
• may be concerned by evidence of a burn |
| **Burn notifications may include:** | • verbal notification  
• written notification |
| **Resources may include:** | • contingency resources  
• crews for control and suppression  
• crews for ground ignition  
• equipment and supplies  
• logistical support  
• other vehicles  
• tankers |
| **Assets may include:** | • area of rare or sensitive flora and fauna  
• buildings and other property  
• camps or recreational areas  
• crops  
• cultural values  
• historic relics  
• machinery  
• plantations  
• research plots, reference areas  
• stock  
• utilities (power and telephone lines, water supply structures, communications towers) |
| **Weather conditions must include:** | • relative humidity  
• temperature  
• wind |
| **Lighting techniques and patterns may include:** | • contour lighting  
• echelon  
• grid  
• line  
• multi-line  
• spot |
| **Monitoring burn may include:** | • fire shape and spread  
• flame height  
• fuel moisture content |
- predictions
- rate of spread
- recording
- safety considerations
- smoke development
- weather observation
- wind speed and direction

**Concluding operations and burn security** may include:

- black out
- mitigating hazards for public safety e.g. checking trees for falling limbs
- mop-up
- patrolling burn area
- reopening roads

**Outcomes of the burn** may include:

- achievement of burn objectives
- escapes
- external impacts
- levels of scorch
- percentage of area burnt

**Restoration and rehabilitation works** may include:

- restoring areas disturbed by machinery
- revegetating control lines
- repairing fences
- revegetation of damaged areas
- restoring vehicle track damage

**Unit Sector(s)**

Not applicable.

5. **Assist in the preparation and implementation of organisational business plans**

5.1 Plans are prepared which incorporate the views of others, where appropriate, and contribute to the overall performance of the organisation.

5.2 Organisational business plans are tightly linked to corporate strategic plans.

5.3 Organisational corporate objectives and plans are implemented through the activities and projects of the organisation with consideration of legislation, employment awards and agreements, and organisational policy and procedure.

**Required Skills and Knowledge**

This describes the essential skills and knowledge and their level, required for this unit.

**Required Skills**

- assist in the development of a policy document for a work group
- assist in the evaluation of the development and implementation of a policy
- assist in the implementation of a policy with a work group
- follow consultative processes
- implement strategies to deal with resistance to policy development
- monitor existing policy, processes and practices

**Required Knowledge**

- concepts of policy and policy development
- consultative processes for policy development
- continuous quality improvement programs
- methods for evaluating policy
- methods for implementing policy
- operational plans such as action plans, disaster management plans, hazard assessment plans, pre-incident plans, resource allocations, response priority
- organisational climate and implementing policy development
- organisational objectives
- policy and organisational philosophy/climate
- reasons for resistance to policy development
- role of employees in policy development
- role of management in policy development
- strategies for dealing with resistance
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- assist in the development, implementation and evaluation of a plan or policy for a work group.

Consistency in performance

Competency should be demonstrated over time and in a range of contexts; the evaluation of the development and implementation may require a number of months.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job and by exercises/case studies in a simulated workplace environment.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised**
wording in the Performance Criteria is detailed below.

| External organisations may include: | • associated industries  
• community groups  
• government departments and organisations  
• other agencies |
| Stakeholders may include: | • community groups  
• emergency service organisations  
• employers  
• equipment suppliers  
• general public  
• insurance industry  
• organisational personnel  
• state/territory and local government  
• unions |
| Submissions may include: | • reports on hazard identification and reduction  
• requests and recommendations of plant/equipment/resource allocation  
• revision of policy |

**Unit Sector(s)**

Not applicable.

Unit Descriptor

This unit covers the competency required, on arrival at the scene of an accident or incident, to conduct initial assessment, take action to maintain public safety and preserve the scene, and note and record details and information.

The unit is particularly applicable in cases where organisation personnel are the first to arrive at the scene of an accident or incident.

Application of the Unit

This unit applies to all public safety workers at an incident who need to understand the importance of maintaining the legal integrity of the scene. It is not a specialist Crime Scene Investigation unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Secure and preserve scene | 1.1 Initial *assessment* is participated in to identify *factors which will impact* on public safety and scene preservation.  
1.2 *Incident/accident scene* is effectively secured to *preserve the scene* and maintain public safety in line with legislative requirements. |
| 2. Record and report details of incident scene | 2.1 *Details of the scene* are noted, *recorded and reported* according to organisation's policies and procedures.  
2.2 *Witness details* and information volunteered are recorded in accordance with *organisational and legislative requirements*.  
2.3 Information is communicated to *relevant personnel* in line with organisation's procedures. |

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

**Required Skills**

- listening
- note taking
- observation
- questioning
- reporting

**Required Knowledge**

- legislative and organisation requirements relating to scene preservation
• methods of securing scene
• organisation requirements for taking witness details and information
• regulatory requirements for taking witness details and information
• techniques for estimating distance
• techniques for removing public from scene
• types of information which may assist in investigations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation’s policies and procedures.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of assessment

Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Incident scene** may include:
- urban fire
- wild fire
- vehicle fire
- crime scene
- search for missing persons or evidence
- vehicle accident
- natural disaster
- industrial/mining accident
- incident involving death or injury to person or
damage to property

- urban scene
- rural scene
- indoor scene
- outdoor scene
- animal incident
- marine
- aircraft
- train
- explosions
- hazardous materials

**Assessment of scene** may be conducted:

- at scene
- en route to and from scene

**Factors impacting** may include:

- public safety risk factors including factors that could impact on the safety of investigators
- response team
- the security/preservation of the actual site
- the security and preservation of situational evidence
- traffic
- tactical factors affecting the quality of the investigation including environmental circumstances
- chronology of events
- access to scene
- number of persons at scene
- availability of support services
- boundaries

**Persons at scene** may include:

- incident scene specialists
- forensic experts
- potential witnesses
- victims
- other bystanders
- personnel from other organisations
- media
- coroners
- pathologists
- medical practitioners
- undertakers
- forensic accountants
- information technology consultants
- legal officers
- owners and/or occupiers
Security of scene may be affected by:
- topography
- climatic conditions
- human interference
- animal interference
- preservation of life/property
- structural integrity
- availability of personnel

Securing scene may include:
- removing non-emergency personnel from scene
- isolating scene
- erecting barriers

Details of scene may include:
- date
- time
- location
- damage
- persons present
- property involved
- possible causes
- items of evidence
- injuries
- status of utilities services such as broken water pipes
- animal species present
- flora
- fauna
- size and construction of building
- occupancy
- insurance details

Witness details may include:
- name
- contact details
- other details in accordance with organisation’s policies and procedures

Relevant personnel may include:
- supervisor
- team leader
- police
- investigating officer
- other organisation’s personnel

Communication may include:
- verbal
- completing standard forms
- written

Recording and reporting may include:
- taking notes
- completing standard forms
- making sketches
• taking photographs
• taping
• electronic videoing
• preserving evidence and the area of origin

*Preserving scene* may include:

*Organisational and legislative requirements* may vary between sectors and organisations and may include:

• legislation relevant to the operation/incident/response
• legislation relevant to the organisation
• operational
• corporate and strategic plans
• operational procedures
• operational performance standards
• organisation’s personnel practices and guidelines
• organisation’s quality standards

**Unit Sector(s)**

| 1. Plan and prepare for the briefing and debriefing | 1.1 *Content and format* for briefing and debriefing are determined.  
1.2 Briefing and debriefing plan is prepared in accordance with organisational policies and procedures.  
1.3 *Relevant personnel involved in the activity* are identified and informed of briefing and debriefing requirements.  
1.4 *Safe and appropriate location* for the briefing and debriefing is selected. |
| 2. Conduct the briefing and debriefing | 2.1 Purpose and structure of the briefing and debriefing is outlined to incident personnel.  
2.2 Understanding is sought and clarifications are provided, where required.  
2.3 Contributions from personnel during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged.  
2.4 Briefing and debriefing is *conducted* in accordance with organisational policies and procedures.  
2.5 Briefing and debriefing *checklist* is used as appropriate. |
| 3. Conclude the briefing and debriefing | 3.1 Contributions of personnel are acknowledged in a positive way.  
3.2 *Briefing and debriefing follow-up action* is identified and acted upon in a timely manner.  
3.3 Debriefing activity is reviewed against the policies, practices and training of the organisation to identify opportunities for continuous improvement and to identify lessons learnt.  
3.4 Briefing and debriefing findings are summarised and recorded, if appropriate, in a format suitable for *subsequent action* by appropriate personnel. |
## Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

### Required Skills

- communicate clearly in a group setting
- lead and manage group processes
- prepare briefing and debriefing plans
- provide feedback and encourage contributions from group members

### Required Knowledge

- organisational policies
- organisational procedures for activity briefing and debriefing
- practices and training processes in relation to activity

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- communicate effectively with personnel
- elicit and encourage contributions to the briefings and debriefings in a constructive and positive way

### Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

### Context of assessment

Competency should be assessed conducting briefings and debriefings in a variety of actual and/or simulated workplace contexts.

### Specific resources for assessment

There are no specific resource requirements for this unit.

### Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified
assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the Performance Criteria is detailed below.

**Content and format for briefing and debriefing** may include:
- Collaborative
- Descriptive illustrative
- Facilitator led
- Level of language used
- Predetermined (SMEAC)
- Problem based

**Briefing and debriefing plan** may include:
- Appropriate incident information collected prior to undertaking operational activities
- Location
- Methodology
- Participants
- Purpose
- Subject matter
- Timing

**Organisational policies and procedures** may include:
- Briefing and debriefing formats
- Legislation relevant to the operation/incident/response
- Legislation relevant to the organisation
- Operational, corporate and strategic plans
- Operational performance standards
- Operational policies and procedures
- Organisational personnel and occupational health and safety practices and guidelines
- Organisational quality standards
Relevant personnel may include:
- Organisation's approach to environmental management and sustainability
- Contractors
- Local, state/territory and federal government employees
- Operations personnel
- Support personnel
- Volunteers
- Other agency personnel

Activity may include:
- Incidents
- Meetings
- Public safety campaigns

Safe and appropriate locations may vary according to:
- Ambient conditions (noise, light, smell)
- Distractions
- Timing of the briefing and debriefing which may be before, during or following an activity
- Weather
- Whether briefing and debriefing is under operational or non-operational conditions

Briefing and debriefing may be conducted:
- After a meeting/event
- As soon as possible following an incident
- At convenient time after the incident
- At regular intervals
- At shift change over
- Immediately after the incident
- Prior to undertaking training
- Prior to undertaking workplace projects and other work related activities
- When incident personnel have been relieved
- When personnel return to their home base
- When significant changes are anticipated at an incident

Briefing and debriefing checklist may include:
- Control and command
- Communications
- Damage
- Equipment and plant
- Fatalities
- First aid and medical
- Incident background
- Incident response
- Injuries
- Loss
Briefing and debriefing

Follow-up action may include:

- Resources committed to the incident
- Strategies to improve response
- Stress
- Supporting organisations
- Welfare
- Action taken to address issues identified
- Informing participants on the outcomes of the debriefing
- Reporting to appropriate supervisor or agency
- Reviewing procedures

Subsequent action may include:

5.4 Recommendations are made for changes in policies and procedures |
Required Skills and Knowledge

Required Skills:
- access information and support from the control facility
- brief and debrief personnel
- develop and maintain incident situational awareness
- effectively and efficiently deploy human and physical resources
- identify and correctly use equipment
- lead teams
- make decisions, negotiate and resolve conflict
- manage resources

Required Knowledge:
- agency procedures for managing operations
- Australasian Inter-service Incident Management System (AIIMS) structure
- codes of practice and legislation
- emergency site layout
- equipment and personnel capabilities for incident type
- focus of operation of work systems and equipment
- IAP (objectives, strategies and tactics) and development of appropriate tactics
- industrial awards and agreements, and agency personnel practices and guidelines
- organisational command structure
- post operational procedures
- processes for implementing, monitoring, amending and reviewing tactics
- reporting and recording requirements

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:
- assess effectiveness of strategies and tactics on sector
- implement relevant part of the IAP for the sector
- adapt tactics, where required
- provide reports to operational supervisor.
- Consistency in performance
- Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment
Competency should be assessed in an operational environment or in an industry-approved simulated workplace environment.
Specific resources for assessment

Access is required to:

- emergency situations or simulation of emergency situations, in a multi-team response environment
- equipment, personnel, facilities etc. appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions.

Range Statement

Risk assessment may include:

- Adequacy of allocated equipment
- Capability of assigned personnel
- Forecasts
- Hazards
- Information gathered from existing plans/databases
- Meteorological profiles
- Property and environment
- Risk to life
- Type of incident

Resources may include:

- Aircraft
- Amenities
- Communication devices
- Equipment characteristics
- Human:
  - operations personnel
  - specialised personnel such as aviation authorities
  - support personnel/services
  - volunteers
- Local, federal and state/territory governments
- Parking
- Physical:
  - aircraft
  - equipment
  - machinery
  - material
  - safety equipment
  - vehicles
- Technology devices

**Incidents** may include:
- Life threatening situations
- Protection of property and the environment
- Risks to life and property such as:
  - biological agents
  - fauna rescue
  - fire
  - flood
  - hazardous materials
  - landslip
  - severe storm

**Constraints** may include:
- Aboriginal and Torres Strait Islander sacred sites
- Constraints on road closure
- Existing emergency management plans
- Financial
- Hazardous areas
- Legislative
- Military areas
- Other areas requiring permission and/or authorisation to enter
- Other areas of environmental and cultural significance
- Prevailing weather
- Redirection of water course
- Resources
- Restrictions on duration of work or the conditions under which personnel may be employed
- Seasonal factors
- Time
- Wilderness areas

**Initial response options** will be determined by:
- Availability of resources and estimated outcome
- Legislative requirements
- Organisational guidelines
- Regulatory authorities

**Organisational policies and procedures** may include:
- Civil Aviation Orders
- Corporate and strategic plans
- Legislation relevant to the operation/incident/response
- Legislation relevant to the organisation
- Operational performance standards
- Operational procedures
- Organisational performance standards
- Organisational personnel practices and guidelines
- Organisational quality standards
- Organisation’s approach to environmental management and sustainability
- Procedures/action
- Search and rescue time procedures and action

**Communications systems** may include:
- Computer
- Facsimile
- Mobile data terminal
- Pager
- Radio
- Satellite
- Signage
- Signalling
- Telephone
- Warnings

**IAP** may include:
- Area or region
- Aims and objectives of the response/incident/operation
- Consideration or aircraft type
- Contingencies and alternatives
- Coverage of one or more places
- Document (formal or informal)
- Flight plans
- Limitations
- Monitoring and evaluative procedures
- Part of an overall plan
• Performance and suitability
• Possible strategies to achieve objectives
• Possible tactics to implement strategies
• Pre-plans
• Reporting requirements
• Resources required including their availability

Monitoring of operations may include:
• Progress against plan
• Utilisation of resources and potential of incident
• Welfare of personnel

Documentation may include:
• Assessment of safety procedures utilised
• Completion of logs
• Financial statements
• Input to debriefs
• Journal records
• Post-operational report
• Situational reports

Unit Sector(s)

Unit Descriptor

This unit covers competency in working with others and making a positive contribution to the effectiveness and efficiency of a team in a work environment when predominantly under direct supervision. Limited responsibility towards others is required.

Application of the Unit

This unit applies to all workers working in the Public Safety industry, but is particularly relevant to new workers in assisting integration with the organisational team culture of the agency.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit. Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where **bold italicised** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. **Contribute to team activities** | 1.1 Roles and responsibilities of team members are recognised.  
1.2 Contribution is made to identifying team goals and objectives.  
1.3 *Activities* are completed to required standard within timeframe and in accordance with *organisation’s policies and procedures*.  
1.4 *Assistance* in the completion of tasks is requested from other team members where appropriate.  
1.5 Team members are assisted to ensure efficient and safe completion of tasks in accordance with organisation’s policies and procedures.  
1.6 Participation by team members is encouraged and acknowledged.  
1.7 Changes in allocated role and responsibilities are implemented.  
1.8 Team meetings are attended regularly and punctually. |
| 2. **Share knowledge and information** | 2.1 Information relevant to work is communicated effectively with team members to enable efficient completion of tasks in accordance with the organisation’s policies and procedures.  
2.2 Knowledge and skills are shared between team members. |
| 3. **Give and receive support to/from team members** | 3.1 *Feedback/*assistance is given to other team members in an appropriate manner.  
3.2 Team members are supported in achieving workplace goals.  
3.3 Feedback from other team members is acted upon appropriately. |
Required Skills and Knowledge
This describes the essential skills and knowledge and their level, required for this unit.

Required Skills
- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge
- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit
It is essential for this unit that competence be demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals.

Consistency in performance
Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group.

Context of and specific resources for assessment
Context of assessment
On the job or in a simulated workplace environment.

Specific resources for assessment
No special requirements.

Range Statement
The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the Performance Criteria is detailed below.
Teams comprise • two or more people working towards a shared purpose

Appropriate situation to request assistance may include:
• difficulty meeting timelines
• to comply with occupational health and safety requirements
• unsure of best method to complete task
• to maximise efficiency

Assisting other team members may include:
• own tasks completed
• to comply with occupational health and safety requirements
• assistance requested
• actions of others do not comply with requirements
• other team member appears to be having difficulty completing task

Contribute to workplace goals may include:
• completion of task
• achievement of new competencies
• development of new skills
• attainment of new knowledge
• personal development

Activities may include:
• working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies
• civil/political emergencies and non emergency operations including community events
• public relations – activities
• sporting events
• parades
• festivals

Conditions under which this competency may be required include
• hazardous conditions eg adverse weather
• after dark operations
• difficult terrain
• time pressure
• varying time frames from immediate/short term to long term response operations
• varying access to equipment/resources necessitating the use of improvised techniques
• single or multi organisation responses
• dealing with human behaviours that result from emergency situations
• non-emergency operations and events eg training and community education

Appropriate feedback on
• acknowledging initiative
**Performance** may include:
- aptitude
- ideas
- performance and assistance
- providing constructive criticism

**Organisation’s policy and procedures** may vary between sectors and organisations and may include:
- legislation relevant to the operation/incident/response
- legislation relevant to the organisation
- operational
- corporate and strategic plans
- operational procedures
- operational performance standards
- organisation’s personnel practices
- policy and procedures
- organisation’s quality standards
- organisation’s approach to environmental management and sustainability

**Communication processes** may include:
- established organisation’s procedures for recording and reporting
- the use of logs
- notebooks
- pagers
- radios and telephones
- team members may be geographically dispersed and require communication systems and technology to remain in contact

**Unit Sector(s)**
Not applicable.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of telescope materials handler operations that safely, effectively and efficiently follow workplace procedures to carry out work activity on at least two occasions, and include:

- performing pre-start, start-up and shutdown procedures
- checking controls, brakes and attachments for manoeuvrability and serviceability and rectifying or reporting faults
- operating the telescopic materials handler
- attaching and securing appropriate lifting gear
- shifting the load
- selecting, fitting, testing, using and removing attachments, which must be certified and approved in line with workplace procedures
- transporting the machine and equipment between work sites
- parking and securing equipment

In the course of the above the candidate must also:

- locate and apply required documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting potential hazards and environmental issues, and assess risks
- access, interpret and apply technical information
- apply fault finding techniques
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with telescopic materials handler operations
Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for telescopic materials handler operations, including those relating to:

- isolation and traffic control responsibilities and authorities
- safety data sheet and hazardous materials handling methods
- development and compliance with job safety analyses and safe work method statement
- maintenance and basic diagnostic
- recyclable materials
- housekeeping activities
- environmental management plan

Key factors affecting work activities described in performance evidence above, including:

- telescopic materials handler types, characteristics, technical capabilities and limitations
- calculating safe working loads
- methods of changing machine attachments
- safe operating techniques in varying terrain
- telescopic materials handler and attachment operating techniques

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - telescopic materials handler
  - attachments
  - personal protective equipment
- be conducted in a safe environment and,
- be assessed in context of this sector's work environment and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed and
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements
Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided, and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF indicator level***</th>
<th>Required assessor or industry subject matter expert experience</th>

</tr>
<tr>
<td>Other sectors</td>
<td>Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant</td>
<td></td>
</tr>
</tbody>
</table>
*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272
Assessment Requirements for RIIMPO304E Conduct wheel loader operations

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of wheel loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the wheel loader for operations and adjusting techniques to suit site conditions
- shifting loads, carries the load as close to the ground as possible and deposits load to the correct location
- parking and securing the equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques
- conduct loading and unloading
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment according to original equipment manufacturer manual
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- inspect and prepare work area
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for wheel loader operation without attachments, including those relating to:

- work health and safety, including signs of operator fatigue and how it should be managed
- operational, maintenance and basic diagnostics
- housekeeping activities
- personal protective equipment
- maintenance and basic diagnostics
- fire, accident and emergency

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- geological and technical data
- loading techniques
- plans, reports, maps, specifications

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - wheel loader
  - materials to be shifted
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances
Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

**Assessor requirements**

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>

Application

This unit describes the skills and knowledge required to operate a scraper to load, haul and dump materials.

This unit applies to those working in site-based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

Unit Sector

Coal mining

Extractive

Metalliferous mining

</table>

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of scraper operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating scraper, and adjusting techniques to suit site conditions
- completing a variety of scraper operations including:
  - loading
  - load carrying
  - load discharge
  - equipment positioning
  - towing and pushing
- parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- demonstrate safe working around overhead power line and live stockpiles
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply techniques for load carry and load discharge
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations
• organise work activities to meet all task requirements

Knowledge Evidence
The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for scraper operation without attachments, including those relating to:
• isolation requirements
• fires, accidents and emergencies
• work health and safety, including signs of operator fatigue and how it should be managed
• apply operational, maintenance and basic diagnostics
• personal protective equipment
• recyclable materials
• completing housekeeping activities

Key factors affecting work activities described in performance evidence above, including:
• ground conditions
• equipment processes, technical capability and limitations
• geological and technical data

Assessment Conditions
Mandatory conditions for assessment of this unit are stipulated below. The assessment must:
• include access to:
  • scraper
  • materials to be loaded, hauled and dumped
  • personal protective equipment
• be conducted in a safe environment; and,
• be assessed in context of this sector’s work environment; and,
• be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• confirm consistent performance can be applied in a range of relevant workplace circumstances
Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF indicator level***</th>
<th>Required assessor or industry subject matter expert experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure</td>
<td>1</td>
<td>1 Year</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>2 Years</td>
</tr>
<tr>
<td>Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure</td>
<td>3-6</td>
<td>3 Years</td>
</tr>
<tr>
<td>Other sectors</td>
<td>Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.</td>
<td></td>
</tr>
</tbody>
</table>

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Application

This unit describes the skills and knowledge required to operate a skid steer loader to load, haul and distribute materials.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Unit Sector

Civil infrastructure

<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types (i.e. one different material per occasion) including:
  - stripping/spreading materials
  - backfilling
  - excavations
  - mixing materials
- selecting, fitting, testing, using and removing attachments on at least two occasions (i.e. one attachment per occasion), the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
  - multipurpose bucket
  - forks
  - dozer blade
  - backhoe
  - auger
  - chain digger
  - power broom
  - profiler
  - tiller/mixer
  - rotary hoe
- hammer
- asphalt cutter/saw
- concrete cutter/saw
- rake
- assisting with loading and unloading skid steer loader from float/trailer
- safely parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operations, including those relating to:

- isolation requirements for skid steer loader
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities
Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

**Assessment Conditions**

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - a skid steer loader
  - materials to be shifted
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

**Assessor requirements**

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loader/backhoe operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types (i.e. one different material type per occasion) including:
  - mixing materials
  - stripping/spreading materials
  - trench excavation
  - backfilling
  - lifting and carry materials
  - loading dump trucks, wagons, hoppers, chutes, and cutting/boxing
- selecting, fitting, testing, using and removing at least two attachments (i.e. one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
  - extending devices
  - tilt bucket
  - buckets
  - compaction wheel
  - ripper
  - plate compactor
  - rock breaker
  - auger
• broom
• mower/slasher
• forklift
  • 4 in 1 bucket and free/rock grab
• parking and securing of equipment

In the course of the above work the candidate must also:

• locate and apply relevant documentation, policies and procedures
• select and wear personal protective equipment required for work activities
• carry out vehicle refuelling requirements and procedures where applicable
• apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
• apply problem solving and troubleshooting techniques when operating equipment
• monitor and manage equipment performance using indicators and alarms
• identify common equipment faults
• apply levelling techniques
• establish weight of load
• manage changes in the loads centre of gravity during transportation
• select and use the required tools and equipment
• work safely around other machines and personnel
• apply methods of changing machine attachments
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations
• organise work activities to meet all task requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for backhoe/loader operations, including those relating to:

• isolation requirements
• fires, accidents and emergencies
• work health and safety, including signs of operator fatigue and how it should be managed
• site isolation and traffic control responsibilities and authorities
• project quality requirements
• operational, maintenance and basic diagnostics
• personal protective equipment
• recyclable materials
• housekeeping activities
Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

**Assessment Conditions**

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
  - backhoe/loader
  - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

**Assessor requirements**

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
• having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
• demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
• the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF indicator level***</th>
<th>Required assessor or industry subject matter expert experience</th>

</tr>
<tr>
<td>Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure</td>
<td>3-6</td>
<td>3 Years</td>
</tr>
<tr>
<td>Other sectors</td>
<td></td>
<td>Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.</td>
</tr>
</tbody>
</table>

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

***While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Application

This unit describes the skills and knowledge required to conduct grader operations. This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisted by someone who has completed RIIHAN308F Load and Unload Plant or equivalent.

Unit Sector

Civil infrastructure

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of grader operations that safely, effectively and efficiently follows workplace procedures to meet carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types including:
  - cutting and maintaining drains
  - forming/upgrading/maintaining roads
  - mixing/spreading materials
  - scarifying and ripping
  - cutting and trimming of batters
  - trimming of road sub-grades and pavements
  - site clean-up
  - form and carry a windrow
- selecting, fitting, testing, using and removing at least two attachments, the attachment must be certified and approved in line with workplace procedures
- assisting with loading and unloading skid steer loader from float/trailer
- parking and securing of equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
• apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
• apply problem solving and troubleshooting techniques when operating equipment
• monitor and manage equipment performance using indicators and alarms
• identify common equipment faults
• establish weight of load
• apply levelling techniques
• apply cut and fill techniques
• conduct towing of equipment/plant
• select and use the required tools and equipment
• apply methods of changing machine attachments
• use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
• meet written and verbal reporting requirements and procedures associated with equipment operations
• organise work activities to meet all task requirements

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for grader operations, including those relating to:
• isolation requirements
• fires, accidents and emergencies
• work health and safety, including signs of operator fatigue and how it should be managed
• site isolation and traffic control responsibilities and authorities
• project quality requirements
• chain of responsibility for loading and unloading of equipment
• operational, maintenance and basic diagnostics
• personal protective equipment
• recyclable materials
• housekeeping activities
• machine guidance systems and laser levelling equipment

Key factors affecting work activities described in performance evidence above, including:
• equipment processes, technical capability and limitations
• drawings and sketches
• ground conditions
• materials characteristics, including density and viscosity

Key features associated with civil construction works, including
• civil construction terminology
• basic principles of material technology and material compaction for civil works
• basic earthworks calculations
• civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:
• include access to:
  • a skid steer loader
  • materials to be shifted
  • personal protective equipment
• be conducted in a safe environment; and,
• be assessed in context of this sector’s work environment; and,
• be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:
• vocational competencies at least to the level being delivered and assessed
• current industry skills directly relevant to the training and assessment being provided
• current knowledge and skills in vocational training and learning that informs their training and assessment
• formal relevant qualifications in training and assessment
• having knowledge of and/or experience using the latest techniques and processes
• possessing a high level of RII training product knowledge
• having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
• demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
• the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.
It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

<table>
<thead>
<tr>
<th>Industry sector</th>

Application

This unit describes a participant’s skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Elements</th>
<th>Performance Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Plan and prepare for working in confined space</td>
<td>1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant</td>

</tr>
<tr>
<td></td>
<td>1.3 Obtain, confirm, clarify and apply safety requirements</td>
</tr>
</tbody>
</table>
1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements
1.5 Confirm the emergency response procedure is with the stand-by person and understood
1.6 Identify, obtain and implement signage and barrier requirements
1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults
1.8 Identify, confirm and apply the environmental protection requirements
1.9 Position rescue equipment by the entry permit

| 2 Work in confined space | 2.1 Gain access to confined space |
| 2.2 Ensure that the atmosphere is tested and monitored for harmful elements |
| 2.3 Correctly apply tagging and lock-out procedures |
| 2.4 Enter the confined space correctly |
| 2.5 Maintain ongoing communication with the stand-by person |
| 2.6 Comply with entry permit requirements |
| 2.7 Monitor and adhere to allocated entry time |

| 3 Exit confined space | 3.1 Exit confined space correctly |
| 3.2 Recover tools, equipment and materials |
| 3.3 Conduct inspection of the confined space |
| 3.4 Secure access to the confined space |
| 3.5 Remove tagging and lock-out |
| 3.6 Accurately complete confined space entry permit |

| 4 Clean up | 4.1 Clear work area and dispose of or recycle materials |
| 4.2 Clean, check, maintain and store tools and equipment |
| 4.3 Remove, clean and store barriers and signs |

**Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

</tr>
</tbody>
</table>

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - obtain appropriate entry permit and instructions for performing work in confined space
  - interpreting and applying safe work method statements
  - apply tagging and lock out
  - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
  - entering the confined space
  - using atmospheric monitoring devices prior to entering the confined space
  - working in the confined space
  - using atmospheric monitoring devices during confined space activity
  - applying safe materials handling methods
  - exiting the confined space
  - remove tagging and lock out
Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:
<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF** Level</th>
<th>Required assessor or Industry subject matter expert experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction</td>
<td>1</td>
<td>1 Year</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>2 Years</td>
</tr>
<tr>
<td>Drilling, Coal Mining and Extractive (Quarrying)</td>
<td>3-6</td>
<td>3 Years</td>
</tr>
<tr>
<td>Metalliferous Mining and Civil Construction</td>
<td>3-6</td>
<td>5 Years</td>
</tr>
<tr>
<td>Other sectors</td>
<td></td>
<td>Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.</td>
</tr>
</tbody>
</table>

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level.

Application

This unit describes a participant’s skills and knowledge required to work safely at heights in the Resources and Infrastructure Industries.

This unit it appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

</tbody>
</table>

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - accessing, interpreting and applying technical and safety information for working at heights
  - assessing hazards and risk associated with working at heights and implement control methods
  - selecting wearing and caring for personal protective equipment
  - identifying required safety systems including fall protection and associated equipment
  - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
  - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials
- complying with equipment manufacturer’s instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

**Assessment Conditions**

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF** Level</th>
<th>Required assessor or Industry subject matter expert experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction</td>
<td>1</td>
<td>1 Year</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>2 Years</td>
</tr>
</tbody>
</table>
Drilling, Coal Mining and Extractive (Quarrying)  |  3-6  |  3 Years  
Metalliferous Mining and Civil Construction  |  3-6  |  5 Years  
Other sectors  |  Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level.

Application

This unit describes a participant’s skills and knowledge required to control traffic with stop-slow bat in the Resources and Infrastructure Industries. This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

*Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.*

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>1. Plan and prepare</th>
<th>1.1 Access, interpret and apply site traffic plan procedures and ensure the work activity is compliant</th>

</tbody>
</table>

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of controlling traffic with a stop-slow bat that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - reading and interpreting the work instruction and planning work activity accordingly
  - positioning signage and barriers
  - directing and controlling vehicle traffic
  - directing and controlling pedestrian traffic
  - communicating to drivers and pedestrians clearly using hand signals
  - using approved communication devices such as hand held radios or phones to transmit message and report of offenders
  - removing or covering signs after work completion

Knowledge Evidence

The candidate must demonstrate knowledge of controlling traffic with stop-slow bat through:

- site and equipment safety requirements
• traffic controlling requirements and procedures
• complying with traffic management plans
• erecting traffic control signage and barricades
• communication device operations
• determine equipment types, characteristics, technical capabilities and limitations
• operational and maintenance procedures for equipment
• detailing site isolation and traffic control responsibilities and authorities
• describing the effects of travel speed and vehicle mass on stopping distances
• interpreting and implementing safe work method statement

Assessment Conditions
• An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
• this unit is best assessed in the context of this sector’s work environment;
• where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
• this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
• assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
• assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
• assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
• where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
• assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

<table>
<thead>
<tr>
<th>Industry sector</th>
<th>AQF** Level</th>
<th>Required assessor or Industry subject matter expert experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drilling, Metalliferous Mining, Coal</td>
<td>1</td>
<td>1 Year</td>
</tr>
<tr>
<td>Mining, Extractive (Quarrying) and Civil Construction</td>

Application

This unit develops a participant’s skills and knowledge required to implement a traffic management plan in Civil construction.

This unit is appropriate for those working in supervisory roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

<p>| 1 Plan and prepare to implement traffic management plan | 1.1 Access, interpret and apply traffic management documentation and ensure the work activity is compliant |
|                                                      | 1.2 Obtain, read, interpret, clarify and confirm work requirements |
|                                                      | 1.3 Identify, address and report potential risks, hazards and environmental issues and implement control measures |
|                                                      | 1.4 Select and wear personal protective equipment appropriate for the work activity |</p>

| 4       | Required frequency and volume of evidence amended in Performance evidence.  
          Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the traffic management plans that meet all of the required outcomes including:
  - complying with written and verbal reporting requirements and procedures
  - communicating clearly and concisely with others to receive and clarify work instructions
  - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of implementing traffic management plans that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - complying with State/Territory regulations on three separate live traffic projects, and
  - completing one (1) project controlling site construction vehicles
  - identify and select traffic guidance scheme according to conditions
  - identify and select traffic guidance scheme according to conditions select and implement signage and device requirements, position and display according to site plan
- monitor and adjust scheme according to variances in requirements
- apply procedures to deal with non-compliant crew and motorists

Knowledge Evidence

The candidate must demonstrate knowledge of implementing a traffic management plan through:
- accessing, interpreting and applying legislative, organization and site requirements and procedures for:
  - JSAs/JSEA/Safe work method statement
  - potential hazards and risks
  - controlling traffic
  - basic signalling
  - signs and devices
  - radio operations
- identifying equipment types, characteristics, technical capabilities and limitations
- identifying site isolation and traffic control responsibilities and authorities
- identifying quality requirements
- applying civil construction terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,

SIRRINV001 Receive and handle retail stock

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However, in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

areas. perishable and other stock to prevent loss or damage as required.
1.3. Remove and dispose of waste to minimise safety risks and environmental impacts.
1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.

2. Accept stock delivery.
   2.1. Check incoming stock quantities against order documentation.
   2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.
   2.3. Record stock delivery, and report discrepancies with orders as required.
   2.4. Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.
   2.5. Store or display stock promptly in designated location.

3. Replenish stock levels.
   3.1. Rotate, replenish and present stock according to organisational requirements for stock levels.
   3.2. Record stock waste or shrinkage according to organisational procedures.
   3.3. Maintain optimal stock levels on retail shop floor.

**Foundation Skills**

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to:
- interpret:
  - plain English documents that outline organisational policies and procedures for stock control
  - basic order and delivery documentation and stock labels.

Numeracy skills to:
- calculate stock levels.

Planning and organising skills to:
- complete stock control activities in a logical and time efficient sequence.

Technology skills to:
- use stock control technology to aid stock control processes.

**Unit Mapping Information**

No equivalent unit.

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
  - receive and process incoming stock
  - store retail stock
  - maintain retail stock levels
  - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
  - stock quality is poor
  - stock quantity errors
  - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
  - rotation and replenishment
  - product life cycle
- organisational stock control policies and procedures for:
  - receiving stock from suppliers
  - recording incoming stock
  - recording and reporting stock discrepancies and quality issues
  - recording stock waste and shrinkage
  - stock quality standards
  - unpacking, storage and display of stock
  - damaged or missing stock
• key features of retail products that relate to handling and storage:
  • handling techniques to minimise damage
  • general care
  • optimum storage conditions
  • features of damaged or spoiled stock
  • correct disposal methods
• safe manual handling techniques for moving and storing retail stock
• relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions
Skills must be demonstrated in a retail environment. This can be:
• an industry workplace
• a simulated industry environment.

Assessment must ensure use of:
• manufacturer instructions for stock handling and storage
• organisational policies and procedures for stock handling and control
• retail stock display areas
• range of retail stock
• stock control documentation
  • delivery dockets
  • orders
  • reporting documentation
• stock receiving bay or area
• stock storage areas
• assessment activities that allow the individual to:
  • work within commercial speed, timing and productivity
  • manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SIRRINV002 Control stock

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

correctly.

1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.

1.4. Act on variations to quantity and quality of delivered stock.

1.5. Supervise safe stock handling and storage.

2.1. Monitor stock and maintain stock at required levels.

2.2. Maintain, monitor and adjust stock reorder cycles as required.

2.3. Provide clear information to team members about individual stock recording responsibilities.

2.4. Maintain stock storage and movement records.

2.5. Record and report stock discrepancies.

2.6. Monitor stock performance and identify and report fast and slow-selling items.

3. Process and follow up orders.

3.1. Process and raise stock orders according to organisational procedures.

3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.

3.3. Liaise with suppliers to ensure continuity of supply.

3.4. Resolve routine supply problems or refer to appropriate personnel for action.

3.5. Distribute stock within the organisation according to required allocations.

3.6. Handle routine supply problems or refer to management as required by store policy.

4.1. Regularly check storage of stock and ensure its protection.

4.2. Identify, record and report stock losses.

4.3. Identify avoidable losses and establish reasons for them.

4.4. Recommend solutions and implement procedures to prevent future losses.

5. Coordinate stocktake or cyclical count.

5.1. Explain procedures for stocktake and cyclical counts to team members.

5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.

5.3. Provide team members with clear directions for performance of each task.

5.4. Produce accurate reports for management on stocktake data, including discrepancies.

Assessment Requirements for SIRRINV002 Control stock

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)
• manual handling
• licensing for mechanical movement of stock
• principles of stock control:
  • rotation and replenishment
  • product life cycle
• impact of business planning and sales forecasts on stock control
• types of stock control systems used in the sector
• reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions
Skills must be demonstrated in a retail environment. This can be:
• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:
• current plain English regulatory documents distributed by government regulators outlining
  key aspects of legislation and codes of practice relevant to stock control as listed in
  Knowledge Evidence
• a computerised stock control system
• stock for use in stock control activities
• organisational policies and procedures for stock control
• team members; these can be:
  • individuals in an industry workplace, or
  • individuals who participate in role plays or simulated activities, set up for the purpose
    of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for
assessors.

SIRRMER001 Produce visual merchandise displays

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to display retail merchandise. It requires the ability to prepare, produce and maintain merchandise displays in accordance with visual merchandising requirements.

This unit applies to all businesses that sell retail merchandise. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However, in smaller businesses, senior personnel might also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

</tr>
</tbody>
</table>

© Commonwealth of Australia, 2019
Skills Impact
1. Prepare product labels and price tickets from in-house documents and according to organisational requirements.

2. Unpack merchandise according to manufacturer instructions.

2. Display merchandise.

2.1. Produce display following visual merchandising display guidelines.

2.2. Ensure merchandise is displayed according to manufacturer instructors where specific requirements for display and storage exist.

2.3. Display merchandise labels and price tickets according to organisational requirements.

2.4. Handle and move stock and equipment according to safe manual handling guidelines to prevent injury to self.

2.5. Promptly return excess stock to storage area, and store according to organisational requirements.

2.6. Check and ensure area around the display remains clear of debris.

3. Maintain display.

3.1. Review displays against visual merchandising display guidelines, and refine as required.

3.2. Maintain clear and correct product and pricing information for merchandise.

3.3. Identify damaged or out of date stock, and remove from display as required.

3.4. Rotate and replenish merchandise to maintain optimum stock levels.

3.5. Monitor the display regularly to maintain appearance and cleanliness of display and display area.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to: • interpret plain English documents that outline organisational policies and procedures related to display of merchandise.

Numeracy skills to: • estimate dimensions of display areas and appropriate size of displays from display documentation.

Planning and organising skills to: • prepare for display and complete display activities in a logical and time-efficient sequence.

Technology skills to: • prepare product labels and price tickets.
Unit Mapping Information

Assessment Requirements for SIRRMER001 Produce visual merchandise displays

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines and organisational procedures to prepare and produce three merchandise displays, from the following list, of varying sizes and complexities:
  - an existing merchandise range
  - a new merchandise range
  - a seasonal merchandise range
  - a promotional event
  - discounted merchandise
- maintain each of the above displays and display area, adequate stock level and appearance of display.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- basic principles of visual merchandising as they relate to producing retail visual merchandise displays
- visual merchandise display guidelines and how they are used in creating a retail displays
- organisational procedures for:
  - correct manual handling techniques for protection of self and merchandise
  - correct storage of merchandise and equipment
  - damaged or out of date stock
  - maintenance of display areas
  - merchandise rotation and replenishment
  - product labelling and pricing
  - unpacking merchandise.

Assessment Conditions
Skills must be demonstrated in a retail environment. This can be:
• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:
• a range of retail merchandise
• display areas
• retail display equipment and props
• product labels and price tickets
• ticketing and pricing equipment
• organisational visual merchandise display guidelines
• organisational procedures for:
  • manual handling techniques for protection of self and merchandise
  • storage of merchandise and equipment
  • damaged or out of date stock
  • maintenance of display areas
  • merchandise rotation and replenishment
  • product labelling and pricing
  • unpacking merchandise
• assessment activities that allow the individual to:
  • work within commercial speed, timing and productivity
  • manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

requirements to team members.

1.3. Plan appropriate timing for producing and dismantling visual merchandise displays.

1.4. Communicate roles and responsibilities for visual merchandising to team members.

1.5. Plan and coordinate promotional and special event displays as directed by management.

2. Supervise visual merchandise activities.

2.1. Supervise construction and maintenance of displays to achieve balance and visual impact.

2.2. Ensure display information accurately depicts product or service being promoted.

2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow.

2.4. Ensure displays meet organisational standards and visual merchandising guidelines.

2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.

3. Review impact of visual merchandise activities.

3.1. Evaluate promotions or special event displays and determine impact on sales results.

3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

**SKILLS**  
**DESCRIPTION**

Problem solving skills to:

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
  - an existing merchandise range
  - a new merchandise range
  - a seasonal merchandise range
  - a promotional event
  - discounted merchandise
- for each of the above visual merchandising activities:
  - communicate requirements with team members
  - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - merchandise labelling and pricing
  - required stock levels
  - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
  - Australian Consumer Law
  - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
  - types of displays and their impact
• display location
• display lighting
• display signage
• fundamental elements and principles of visual design and their use in the display and merchandise of products
• commercial impact of incorrect pricing both favourable and unfavourable:
  • customer complaints
  • profitability
• safe work practices for displaying merchandise with particular emphasis on:
  • safe use of equipment
  • safe manual handling techniques for bending, lifting and shifting heavy items
• product knowledge relevant to visual merchandise activities:
  • price
  • features
  • benefits.

**Assessment Conditions**

Skills must be demonstrated in a retail environment. This can be:

• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:

• retail merchandise
• display areas
• retail display equipment and props
• product labels and price tickets
• ticketing and pricing equipment
• relevant documentation:
  • organisational visual merchandise display guidelines
  • organisational policies and procedures for:
    • merchandise labelling and pricing
    • required stock levels
    • merchandise rotation and replenishment
  • relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
    • Australian Consumer Law
    • Work Health and Safety (WHS)
• team members; these can be:
  • individuals in an industry workplace, or
- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessment Requirements for SIRRTF001 Balance and secure point-of-sale terminal

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
  - balance a register or terminal on three occasions with complete accuracy
  - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
  - identify and resolve three different types of balancing discrepancies
  - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
  - opening and closing
  - balancing
  - clearance of terminal and transference of tender
  - recording takings
  - consumables required by system
  - security
- cash handling procedures:
  - counting cash
  - handling cash floats
  - change required, denominations of change and tendering change
  - security
- organisational policies and procedures for non-cash transactions:
  - credit cards
  - EFTPOS
• vouchers
• organisational policies and procedures for:
  • exchanges
  • refunds
  • lay-by
  • cash handling
  • cash float
  • operation of point-of-sale equipment
  • register or terminal balance
  • security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:
• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:
• organisational policies and procedures related to point-of-sale
• point-of-sale equipment and consumables
• financial transaction documentation for non-cash sales
• cash
• assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessment of performance is to be consistent with the evidence guide.</td>
</tr>
</tbody>
</table>
| 1. Maintain office procedures. | 1.1. Monitor, record and order office supplies as required according to store policy and procedures.  
1.2. Implement store policy and procedures in regard to special requests and requirements, according to set timeframes. |
| 2. Process data in response to information requests. | 2.1. Document requests for information and identify responses according to store policy.  
2.2. Identify relevant external information sources.  
2.3. Obtain access to identified sources.  
2.4. Access and extract relevant information.  
2.5. Identify and offer options and alternatives where available information does not match defined needs.  
2.6. Accurately copy or summarise extracted information.  
2.7. Compile and update appropriate records required for regulatory compliance to maintain security and confidentiality of contents. |
| 3. Compose reports and correspondence. | 3.1. Collate relevant information and edit as required.  
3.2. Use clear, concise, easily understood language when writing text.  
3.3. Use correct spelling, punctuation and grammar.  
3.4. Draft and set out correspondence and reports according to store policy.  
3.5. Produced edited report and dispatch to relevant personnel.  
3.6. Copy and securely file final report according to store policy. |
| 4. Maintain existing recording and filing systems. | 4.1. Maintain recording and filing systems according to store policy.  
4.2. Allocate new documents to designated category.  
4.3. Monitor the issue and return of documents to ensure the integrity of the system is maintained.  
4.4. Archive, remove and update documents to ensure appropriate space available for current records.  
4.5. Identify and locate required files and dispatch to nominated person or section within designated time limits. |
4.7. Maintain documents in good condition and in correct location.
4.8. Separate confidential files from general files, with access available to nominated personnel only.
4.9. Monitor security system to ensure issued files are traceable at all times.

5. Maintain computer storage media.
5.1. Maintain storage media and filing system according to store policy and procedures.
5.2. Format digital storage media using correct procedures.
5.3. Create back up files to ensure safety, security and confidentiality of files is maintained.
5.4. Store back up files in the designated manner and location.
5.5. Regularly perform virus checks on the system and back up storage media.
5.6. Store hardware according to manufacturer instructions.
5.7. File and store software according to organisational procedures.
5.8. Observe Work Health and Safety (WHS) guidelines relating to screen based equipment and ergonomic work stations.

6. Maintain computer filing system.
6.1. Determine document filing requirements.
6.2. Create a filing system that reflects the size, nature and complexity of the workplace.
6.3. Implement security checks where necessary.
6.4. Add file names to the filing system as required.
6.5. Update the filing system regularly by deleting or archiving old files.
6.6. Exit programs according to screen prompts to preserve data.

**Required Skills and Knowledge**

This section describes the essential skills and knowledge and their level, required for this unit.

**Required skills**

- literacy and numeracy skills to:
  - process, record and document information
  - write reports
  - use various computer software packages
- interpersonal communication skills to:
  - deal with information requests through clear and direct communication
  - ask questions to identify and confirm requirements
- share information
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication

**Required knowledge**

- store policy and procedures in regard to:
  - store administration and financial systems
  - systems and methods for organisation of work routine
  - appropriate clerical or office systems
  - mail procedures
  - transport procedures, including cab charge and courier systems
  - systems and procedures for processing information
- types and functions of records management systems
- types and functions of office technology, including:
  - computer
  - printer
  - software packages
  - installation of hardware and software packages
  - software licensing requirements
- relevant WHS requirements in relation to the retail office
- principles and techniques in interpersonal communication skills

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

- consistently implements workplace office procedures
- responds accurately and appropriately to requests for information according to store policy
- consistently applies procedures for maintaining records and filing system, including computerised records.

**Context of and specific resources for assessment**

Assessment must ensure access to:

- a retail work environment
- sample policy and procedures in regard to:
  - store administration and clerical or office systems
  - processing of information
• format and technical vocabulary
• WHS legislation and codes of practice
• a range of office equipment, including:
  • computer
  • printer
  • software packages
  • a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

• observation of performance in the workplace
• third-party reports from a supervisor
• answers to questions about specific skills and knowledge
• review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

**Ordering** procedures may include:

• fax
• phone
• email
• internet.

**Store policy and procedures** in regard to:

• store administration and clerical systems
• document format and technical vocabulary.

**Special requests and requirements** may include:

• mail
• ordering of stock
• bill payment
• taxation paperwork
• courier service
• transport, e.g. taxi, cab charge
• special mail procedures.

**External information sources**
may include:
- suppliers
- manufacturers
- technical support personnel
- maintenance personnel.

Modes of access to identified sources may include:
- contact person
- contact details.

Relevant information may include:
- orders
- files
- letters
- correspondence
- warranties.

Options and alternatives may be limited by:
- regulatory requirements
- cost-effectiveness
- store policy.

Relevant personnel may include:
- relevant managers
- supervisor
- team leader.

Recording and filing systems may be:
- paper-based
- electronic.

Digital storage media may include:
- floppy disk
- USB drive
- zip disk
- CD-ROM
- DVD-ROM
- digital tape
- external hard drive.

Hardware may include:
- computer
- keyboard or typewriter
- printer
- scanner
- monitor
- mouse
- storage media.

OHS guidelines may include:
- lighting
- seating
- posture
- ventilation
- glare and reflection
- keyboard equipment and radiation
- eye strain.
• setting up work stations.

1.2. Clearly communicate with customers using appropriate verbal and non-verbal communication.
1.3. Adapt communication style to appropriately communicate with customers from diverse backgrounds.

2. Assist customers.
2.1. Identify and act on opportunities to assist customers and be available to assist customers when needed.
2.2. Question and actively listen to customers to determine their needs.
2.3. Resolve routine customer problems according to individual responsibility level and organisational policies and procedures.
2.4. Address general customer enquiries and provide accurate information in a clear and courteous manner.

3. Contribute to a service culture.
3.1. Act in line with organisational service standards to ensure quality customer service.
3.2. Show interest in customer’s needs and maintain a welcoming customer environment free of complacency.
3.3. Seek assistance from relevant personnel when customer’s needs are beyond scope of own responsibility.
3.4. Identify and take opportunities to improve customer service standards.
3.5. Refer customer service issues and feedback to relevant personnel for action.

Foundation Skills
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information
No equivalent unit.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
  - customers from diverse backgrounds
  - resolution of two routine customer problems
  - provision of accurate information to address two general customer enquiries
  - referral of unresolved customer enquiry
  - use of effective communication techniques and positive body language.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
  - designated customer service response times
  - interacting with customers
  - solving routine customer problems
  - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
  - open and closed questioning
  - paraphrasing
  - effective listening
  - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
  - positive customer service
  - poor customer service
organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational service standards and procedures for:
    - designated customer service response times
    - interacting with customers
    - solving routine customer problems
    - providing information to customers
- customers from a diverse range of backgrounds; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves managing the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts, and identifying and locating facilities requirements.

The unit covers the application of store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment.

Application of the Unit
This unit applies to staff with managerial responsibility in a retail environment.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

</table>

1. **Manage store maintenance program.**  
   1.1. Monitor and maintain premises, fittings, fixtures and equipment, according to **store policy and procedures and relevant legislation.**  
   1.2. Identify deficiencies in store maintenance procedures and take remedial action as required.  
   1.3. Obtain **expert or specialist advice** as required, according to store policy.  
   1.4. Initiate contingency plan within scope of authority in the event of maintenance problems.

2. **Manage retail equipment maintenance.**  
   2.1. Develop and implement procedures to ensure retail equipment is maintained according to store policy.  
   2.2. Monitor and implement maintenance program for retail equipment, according to manufacturer design specifications and store policy.  
   2.3. Identify and rectify equipment faults where possible, without undue delay.  
   2.4. **Report** equipment faults or failures, according to service agreements and store policy.

3. **Negotiate maintenance contracts.**  
   3.1. Negotiate maintenance **contracts** with contractors and suppliers according to store policy and procedures.  
   3.2. Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to **relevant personnel.**  
   3.3. Monitor maintenance procedures to ensure products and tasks meet contract specifications.

4. **Identify facilities and space requirements.**  
   4.1. Identify facilities and space requirements to reflect business needs and volume, according to store policy and budget requirements.  
   4.2. Locate suitable facilities and space to facilitate expansion or change of use in line with store policy and procedures.  
   4.3. Consult, as required, with senior manager or business owner to determine optimum strategy for store space and location.
4.4. Maximise use of space, with consideration to existing configuration, to optimise the merchandising of existing and incoming stock.

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - ensure listening and understanding
  - negotiate contracts and relay contractual requirements to staff
  - obtain expert or specialist advice
  - report faults
  - share information
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- negotiation skills to negotiate maintenance contracts with contractors and suppliers
- literacy and numeracy skills to:
  - apply accounting processes and record data
  - develop, document and record procedures
  - estimate measurements and volumes
  - maintain records
  - read and interpret manufacturer instructions
  - work within a budget

**Required knowledge**

- store policy and procedures in regard to:
  - maintenance of store facilities
  - maintenance of retail equipment
  - maintenance contract terms and options
  - contract specifications
  - relevant legislation and statutory requirements relating to managing store facilities, including:
    - work health and safety (WHS) legislation
    - food safety legislation and regulations
  - relevant industry codes of practice relating to managing store facilities
  - principles and techniques in:
- monitoring performance of contracts
- negotiating, in particular contract negotiation
- interpersonal communication

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and uses space and facilities effectively
- evaluates and reports on effectiveness of maintenance contracts.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - maintenance contracts
  - store policy and procedures on maintenance of facilities, and contract negotiation
  - relevant legislation and statutory requirements
  - WHS
  - legislation and industry codes of practice
- a team
- equipment and technology.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- case study or research report
- written or verbal questioning to assess knowledge and understanding
• review of portfolios of evidence and third-party workplace reports of on-the-job performance.

**Guidance information for assessment**

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

---

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

**Store policy and procedures in regard to:**

- store maintenance
- facilities management
- reporting mechanisms
- WHS
- food safety.

**Relevant legislation may include:**

- federal, state or territory and local legislation
- food safety regulations
- WHS.

**Expert or specialist advice may be sought regarding:**

- point-of-sale terminals
- EFTPOS terminals
- computers, scanners and printers
- pricing equipment
- electronic bar coding equipment
- portable data entry
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- fixtures and fittings
- food preparation equipment.

**Faults may be reported:**

- verbally
- in writing
- by email
- to service personnel
• to contractors
• to relevant managers
• to supervisor.

Contracts:
• may be negotiated internally and externally
• may involve:
  • quality standards
  • building maintenance services
  • cleaning
  • security
  • electrical services
  • plumbing services
  • equipment maintenance.

Relevant personnel may include:
• managers
• supervisors
• specialist staff.

Competency Field
Cleaning and Maintenance
SIRXIND002 Organise and maintain the store environment

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to organise, clean and maintain the work environment to ensure optimal workplace appearance and safety.

It applies to individuals working in frontline operational roles in a diverse range of industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SIRXIND002 Organise and maintain the store environment

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- organise and maintain a designated work area, within a store environment, during three shifts
- correctly use cleaning products and equipment to perform two cleaning tasks within the store environment.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- common cleaning product labels that identify chemicals and hazardous substances and their meaning
- organisational policies and procedures relevant to the organisation and maintenance of the store environment:
  - work health and safety (WHS)
  - general housekeeping
  - personal hygiene
  - reporting problems and faults
  - point of sale stock requirements
  - use, maintenance and storage of cleaning products and equipment
  - use of hazardous cleaning substances
  - waste disposal, recycling and environmental protection.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for:
• work health and safety
• general housekeeping
• personal hygiene
• reporting problems and faults
• point of sale stock requirements
• use, maintenance and storage of cleaning products and equipment
• use of hazardous cleaning substances
• waste disposal, recycling and environmental protection
• cleaning products and equipment
• manufacturer instructions for use of cleaning equipment, cleaning materials and hazardous substances
• workplace waste for disposal
• work areas to be maintained
• assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SIRXINV004A Buy merchandise

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit
Application of the unit
This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

| 5 Negotiate supply of goods. | 5.1 *Negotiate* and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.  
5.2 Authorise special *pricing arrangements* and customer payment agreements and communicate to relevant staff and management personnel according to store policy.  
5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.  
5.4 Identify *market factors* affecting supply and communicate to relevant personnel.  
5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.  
5.6 Take immediate corrective action where potential or actual problems with supply are indicated.  
5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.  
5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback. |
| 6 Monitor quality control. | 6.1 Establish merchandise quality standards with suppliers according to *legal requirements*, customer requirements and store policy.  
6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.  
6.3 Record and analyse stock return figures against target figure. |
| 7 Introduce product ranges. | 7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.  
7.2 Implement *staff training* in product knowledge to introduce product range.  
7.3 Demonstrate or display new ranges to *staff* according to store merchandising plan. |
ELEMENT PERFORMANCE CRITERIA

8 Maximise profit.

8.1 Calculate or estimate individual product range contributions against budget and targets.

8.2 Develop and implement product range assessment checks against budget and targets.

8.3 Calculate or estimate overall selling space contributions according to store merchandising plan.

8.4 Maximise profit margins in negotiations with suppliers.

8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law.

8.6 Negotiate specifications for *terms of trade*.

9 Rationalise stock.

9.1 Review and update stock range at regular intervals.

9.2 Identify stock lines to be *deleted* and take action to minimise adverse effect on profit.

9.3 *Consolidate stock* as required to maximise sales potential.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
  - market trends and projections
  - sales figures and investment levels
  - space requirements
- negotiation skills
  - interpersonal communication skills to:
    - liaise with relevant personnel
    - establish supplier relationships, negotiate supply of goods
    - provide information and training on product range
    - provide feedback and coaching through clear and direct communication
REQUIRED SKILLS AND KNOWLEDGE

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
  - developing pricing policies
  - calculating and estimating product range contributions
  - calculating the cost of stock loss and dissipation
  - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
  - marketing
  - buying
  - profit margins
  - quality control
  - stock inventory levels: current and future
  - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
  - market needs
  - range of merchandise available
  - market competition
  - existing and possible new suppliers
  - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
  - store policy and procedures
  - legislation and statutory requirements
  - industry codes of practice
  - merchandise and supplier data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

**Store merchandise and marketing policies** may include:
- store culture
- current market position
- target market.

**Customer requirements** may be monitored by:
- questionnaires
- surveys
- observation.

**Merchandise range** may include:
- existing stock
- new stock.
RANGE STATEMENT

Impact on business operations may include:
- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:
- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:
- verbally
- in writing
- in groups
- individually.

Performance indicators may include:
- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:
- face-to-face
- correspondence
- meetings
- telephone or electronic media.

Pricing arrangements may include:
- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

Market factors may include:
- fashion trends
RANGE STATEMENT

- product availability
- sales performance.

Legal requirements may include:
- sale of second-hand goods
- Trade Practices and Fair Trading Acts
- licence, patent or copyright arrangements
- pricing procedures, including GST requirements.

Staff training may include:
- on-the-job
- off-the-job
- one-on-one coaching
- any combination of the above.

Staff may include:
- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Terms of trade may include:
- special buys
- payment terms
- promotional deals with supplier.

Stock lines may be deleted due to:
- changes in store policy and culture
- sales performance
- customer requirements
- fashion trends
- product availability
- problems with supply.

Methods to consolidate stock may include:
- movement of stock between departments or stores.

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- providing feedback on performance
- interpersonal communication skills to:
  - communicate store standards and expectations to staff
  - consult floor staff
  - negotiate arrangements with suppliers, through clear and direct communication
  - ask questions to identify and confirm requirements
REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- roster development
- report writing
- literacy skills in regard to:
  - researching, analysing and interpreting a broad range of written material
  - preparing rosters
  - preparing reports
  - documenting results

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
  - layout and presentation
  - advertising and promotions
  - pricing or marking down of goods, including risk assessment
  - housekeeping for premises, fittings, fixtures and equipment
  - store merchandise and service range
  - store merchandising plan
  - range and availability of new products and services
  - customer demand and market trends
  - product quality standards
- OHS legislation and codes of practice
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements
- principles and techniques in:
  - visual merchandising
  - project management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.
EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- collaboratively plans layout and presentation of merchandise according to store policies and procedures
- assesses effectiveness of layout and presentation according to sales targets or predetermined objectives
- collaboratively plans, coordinates and implements advertising and promotions activities according to store policies and procedures
- assesses and reports on effectiveness of advertising and promotions to staff and management according to store policies and procedures
- collaboratively plans, coordinates and implements pricing activities according to store policies and procedures
- collaboratively plans, coordinates and implements housekeeping activities according to store policies and procedures and OHS legislation, regulations and codes of practice.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store merchandising plan
  - legislation and statutory requirements
  - OHS legislation, regulations and codes of practice
- a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the
EVIDENCE GUIDE

industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Visual merchandising policies and plans may include:

- target market
- market research
- store image
- store layout and space availability
- seasonal lines
- pricing policy.

Promotional activities may involve:

- external and in-store activities
- corporate or locally based activities
- dealing with advertising agencies and consultants.

Promotions may include:

- advertising
- catalogues
- newspapers
- posters
RANGE STATEMENT

- radio or TV
- suppliers
- internet
- website.

Organisation pricing policies and procedures may include:
- marking down of slow moving stock
- soiled or damaged goods
- goods close to use-by date
- end of season stock
- pricing policies, including GST requirements.

Legislative requirements may include:
- Trade Practices and Fair Trading Acts
- consumer law.

Store housekeeping and maintenance may include:
- store premises
- fittings
- fixtures
- equipment.

Contingency plan may include:
- major spillages
- flood, storm or cyclone
- breakages
- blackout
- break-in.

</tr>
</tbody>
</table>

1. Place and arrange merchandise.
   1.1. Unpack *merchandise* according to *store policy and procedures* and *legislative requirements*.
   1.2. Place merchandise on floor, fixtures and shelves in determined locations according to work health and safety (WHS) legislative requirements.
   1.3. *Display* merchandise to achieve a balanced, fully-stocked appearance and promote sales.
   1.4. Identify damaged, soiled or out-of-date stock and take corrective action as required according to store procedures.
   1.5. Place stock range in line with fixtures, ticketing, prices and bar codes.
   1.6. Rotate stock according to stock requirements and store procedure.
   1.7. Ensure stock presentation conforms to special *handling techniques* and other *safety requirements*.

2. Prepare and apply labels and tickets.
   2.1. Prepare *labels and tickets* for window, wall or floor displays according to store policy.
   2.2. Prepare tickets using electronic equipment or neatly by hand according to design specifications and store procedures.
   2.3. Identify soiled, damaged, illegible or incorrect labels and tickets and take corrective action according to store procedures.
   2.4. Use, maintain and store electronic ticketing and labelling equipment according to manufacturer’s instructions and store procedures.
   2.5. Place labels and tickets visibly and correctly on merchandise.
   2.6. Replace labels and tickets according to store policy.

3. Maintain displays.
   3.1. Reset or dismantle unsuitable or out-of-date displays and *special promotion areas* as directed.
   3.2. Assist supervisor in selection of merchandise for display.
   3.3. Arrange and face up merchandise as directed and according to layout specifications and load-bearing capacity of fixtures.
   3.4. Maintain correct pricing and information on merchandise according to store procedures, industry codes of practice and
3.5. Identify optimum stock levels and replenish stock according to store policy.

3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.

4. Protect merchandise.

4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**

- literacy and numeracy skills to:
  - prepare machine or manual labels and tickets
  - read and interpret store procedures and guidelines
  - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

**Required knowledge**

- store policies and procedures in regard to:
  - availability and use of display materials
  - correct storage of stock
  - correct storage procedures for labelling and ticketing equipment and materials
  - location of display areas
  - merchandise range
  - merchandising, ticketing and pricing of stock
  - scheduling for building or rotating displays
  - stock replenishment
  - stock rotation
  - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
  - manual handling
  - hygiene and sanitation
- hazardous substances
- labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
  - store policy and procedures
  - industry codes of practice
  - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props
cleaning materials
relevant documentation, such as:
  - store policy and procedure manuals on housekeeping, merchandising and WHS
  - manufacturer instructions and operation manuals for electronic ticketing equipment
  - relevant legislation and industry codes of practice.

Method of assessment
A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment
Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSL201 Sell products and services
- SIRXLS002A Advise on products and services.

Range Statement
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Merchandise may be characterised by:
- type
- brand
- size
- customer needs
- colour
- price.

Store policy and procedures in regard to:
- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.

Legislative
- pricing requirements, including GST requirements
requirements may include:
- industry codes of practice
- discounted items
- Australian Consumer law.

Display may include:
- setting new displays
- maintaining existing displays.

Handling techniques may vary according to:
- stock characteristics
- store policy
- legislative requirements
- industry codes of practice.

Safety requirements may relate to:
- transport, storage and handling of goods
- hazardous substances
- labelling of workplace substances.

Preparation of labels and tickets may involve:
- pricing gun
- shelf tickets
- shelf talkers
- written labels
- swing ticketing
- bar coding
- price boards
- header boards.

Special promotion areas may be:
- permanent or temporary
- interior or exterior
- publicly accessible
- windows
- shelves
- wall fixtures
- on floor.

</table>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

**Required skills**

- artistic interpretation skills to create displays according to visual merchandising standards
- communication skills to share ideas
- creative thinking skills to generate ideas for improving visual merchandising standards
- literacy skills to interpret visual merchandising manuals
• observation skills to identify damage to displays or deviations from visual merchandising standards
• practical skills to maintain and update displays according to the visual merchandising plan

**Required knowledge**

• basic design principles
• basic principles of visual merchandising
• work health and safety (WHS) requirements relating to monitoring displays
• organisation’s visual merchandising principles
• resources required to implement visual merchandising plans
• procedures for safe use of tools, equipment and materials used in visual merchandising displays

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:

• interprets and identifies the design requirements of a visual merchandising plan
• monitors the display closely and completes regular maintenance to ensure it meets the requirements of the visual merchandising plan and the organisation’s visual merchandising standards
• contributes appropriately to the ongoing development of the organisation’s visual merchandising standards.

**Context of and specific resources for assessment**

Assessment must ensure access to:

• a real or simulated retail visual merchandising work environment
• relevant documentation, such as:
  • store policy and procedures manuals
  • store visual merchandising standards.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

• observation of performance in the workplace
• third-party reports from a supervisor
• customer feedback
• answers to questions about specific skills and knowledge.

**Guidance information**

Holistic assessment with other units relevant to the industry sector,
for assessment workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

**Design requirements** may include:
- colours used
- functionality
- layout of display
- location of display in store
- merchandise for display
- size of display.

**Resources required** may include:
- fixtures and fittings
- lights
- materials
- people
- supports
- time.

**Factors that may affect the plan** may include:
- availability of display stands and structures
- availability of staff
- budget requirements
- merchandise availability
- store promotions
- time requirements.

**Visual merchandising plan** may include:
- display location
- retail image
- store plan and design.

**Damage or changes to the display** may include:
- changes in the appearance of the display
- damage to fixtures, fittings or display supports
- damage to items on display.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to profile a retail market.

Application of the Unit
This unit applies to personnel responsible for reviewing the image of the store, researching market demands, profiling store customers and implementing methods to attract customers to the store.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Review the image of the store.
   1.1. Analyse the *components of the store image*.
   1.2. Access and analyse relevant *store documentation* in relation to store image.
   1.3. Promote the store image in an appropriate manner.

2. Research market demands for the store.
   2.1. Select an *appropriate area for research* of market demands.
   2.2. Use appropriate *market research techniques* according to *store policy*.
   2.3. Plan market research according to store policy and procedures.
   2.4. Collect, analyse and present *data* in an appropriate manner.

3. Profile the store’s customers.
   3.1. Research the demography of the store’s *customers*.
   3.2. Develop a demographic *profile*.
   3.3. Access information about *changing trends* and relate to *customer demands*.

4. Implement methods to attract customers to store.
   4.1. Access and analyse information about the customer.
   4.2. Generate *ideas* to develop *methods for attracting customers*.
   4.3. Select and develop a suitable idea in collaboration with others in the organisation.
   4.4. Present and discuss the idea with *relevant personnel*.
   4.5. *Evaluate* the idea to ensure that it meets the requirements for the target customers.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
  - carry out market research
  - generate ideas and discuss with relevant personnel through clear and direct communication
• ask questions to identify and confirm requirements
• use language and concepts appropriate to cultural differences
• use and interpret non-verbal communication
• collaborate with team members
• literacy and numeracy skills to:
  • interpret store policy and procedures
  • conduct research
  • analyse data
  • generate reports

Required knowledge
• store policy and procedures in regard to:
  • accessing documentation
  • promoting store image
• market research methods
• evaluation methods
• creative thinking techniques
• techniques in interpersonal communication

Evidence Guide
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
• analyses components of the store image by accessing relevant store documentation
• promotes the store image in an appropriate manner
• researches market demands using appropriate market research techniques
• accurately profiles store customers
• generates ideas for attracting customers to store
• selects and develops a suitable idea in collaboration with others
• presents and discusses idea with supervisor
• evaluates idea to ensure that it meets requirements for target customers
• implements the idea according to store policies and budgetary requirements.
Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures manuals
  - store documentation in relation to store image
  - market data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- case studies
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

Components of the store image may include:

- logo
- products
- services
- layouts
- displays
- tickets
- visual merchandising
- promotional events and themes.

Store documentation may include:

- sales reports
- customer surveys
- market research.

Appropriate areas for research

- location
may focus on:  

- consumer  
- product  
- brand  
- price  
- layout  
- advertising.

**Market research techniques**  
may include:  

- interviews  
- observations  
- surveys  
- questionnaires.

**Store policy** may relate to:  

- marketing  
- market research.

**Data** may include:  

- internal: customer orders, random surveys, complaints, returns  
- external: ABS statistics, books, newspaper reports, supplier information.

**Customers** may include:  

- new or repeat contacts  
- external and internal contacts  
- business customers or individuals  
- customers with routine or special requests  
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Demographic *profile* may include:  

- age  
- buying power  
- family structures  
- employment patterns  
- education levels  
- tourism  
- mobility  
- occupations  
- marital status  
- cultural and ethnic background  
- income levels  
- population size.

**Changing trends** may include:  

- tourism  
- immigration  
- technology  
- selling approaches.
Customer demands may vary according to:

- leisure time
- environmental issues
- discount operators
- quality demands
- advances in technology.

Ideas may be generated using techniques such as:

- preference
- health factors
- age
- cultural group
- dietary issues
- price.

Methods for attracting customers may include:

- product association
- brainstorming
- visualising
- telling stories
- creative writing
- lateral thinking
- mind mapping, drawings
- using prompts.

Relevant personnel may include:

- team leader
- supervisor
- manager.

Methods used to evaluate ideas may include:

- developing checklists
- discussing the process with colleagues or supervisors
- writing a report of the outcomes.

Assessment Requirements for SIRXPDK001 Advise on products and services

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:
- access and interpret sources of information on four different products or services
- respond to four different customer inquiries for product or service information that individually or cumulatively require provision of information on all of the following:
  - features and benefits
  - price
  - alternative products or services
  - complementary products or services.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:
- organisational policies and procedures for:
  - interactions with customers
  - product or service pricing
- basic key aspects of legislation that impact provision of information for the product or service range:
  - Australian Consumer Law
  - product or service specific legislation
- interpersonal communication techniques:
  - active listening and questioning
  - communication methods which convey information clearly and concisely
- product and service information for the product or service range:
  - features and benefits
  - price
  - care and handling of products
  - availability
  - storage requirements, shelf life and use by date
  - warranties
• ingredients or materials contained in product
• origins
• alternative products and services
• complementary products and services.

**Assessment Conditions**

Skills must be demonstrated in a services industries environment. This can be:

• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:

• a product or service range
• sources of product information
• relevant documentation:
  • current plain English regulatory documents distributed by government regulators outlining factors that impact provision of information for the product or service range
  • price lists
  • organisational policies and procedures relevant to product and service advice
• customers; these can be:
  • customers in an industry workplace, or
  • individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

1.3. Establish benchmarks of supply chain efficiency. |
| 2. Maintain information on suppliers. | 2.1. Obtain and store information on suppliers of products and services to a retail or wholesale business according to business policy and procedures.  
2.2. Update and regularly review information on suppliers of products and services to a business.  
2.3. Store information on nature and feature of business relationship with suppliers to a retail or wholesale business and report, according to confidentiality, security, and business requirements. |
3.2. Review factors affecting supply of retail or wholesale products and services. |
| 4. Devise policy and procedures for distribution and supply. | 4.1. Establish policy and procedures for supply and distribution to business customers and end consumers.  
4.2. Establish procedures to collect and analyse information on distribution chain management. |
| 5. Forecast future contingencies affecting supply chain management. | 5.1. Analyse forecasted market demand to confirm future requirements.  
5.2. Communicate forward supply needs for the business to suppliers according to policy and contract provisions.  
5.3. Confirm factors affecting forward purchasing and supply arrangements.  
5.4. Set standards for supply of products and services to the business in qualitative and quantitative terms.  
5.5. Communicate procedures for enforcing quality of supply to the business to relevant internal and external personnel. |
| 6. Improve supply and distribution chain | 6.1. Evaluate supply chain against agreed benchmarks and overall |
effectiveness. impact on business performance.

6.2.Benchmark comparative performance of supply chain against best in class or competitors.

6.3.Assess factors affecting future distribution and supply of products.

6.4.Make recommendations to relevant personnel to respond to opportunities for improvements in customer supply and distribution relationships.

6.5.Confirm impact of proposed improvements to supply and distribution activities against budget and operational plans.

6.6.Use prevailing trading terms to enhance supply and distribution chain management.

6.7.Generate reports on business relationships with suppliers to the business using available business technology and agreed measures.

6.8.Complete reports to relevant personnel (internal and external to operational unit) to promote recommended implementation of improvement to supply and distribution chain.

---

**Required Skills and Knowledge**

This section describes the essential skills and knowledge and their level, required for this unit.

**Required skills**

- interpersonal skills to:
  - communicate forward business needs to suppliers
  - communicate procedures to relevant internal and external personnel through clear and direct communication
  - ask questions to identify and confirm requirements
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication

- literacy and numeracy skills to:
  - interpret a range of workplace documentation
  - access and maintain information on suppliers
  - generate reports and recommendations for supply and distribution chain improvement to relevant personnel

- analytical skills to collect, organising and evaluate information

- management skills to:
  - implement benchmarks of supply chain efficiency
  - devise effective policy and procedures
Required knowledge

- relevant business policy and procedures
- principles and techniques in analysis, assessment, development and implementation
- approval processes and key personnel
- supply cycle
- supply chain for business and typical supply chain models used in different industry sectors and businesses
- procedures for collecting and analysing distribution chain management
- position of the business in the supply chain
- factors affecting supply and distribution management
- work and team priorities
- current forecasts and trends
- market information and data collection
- sales plans
- principles and techniques for measuring supply chain efficiency and quality standards
- Work Health and Safety (WHS) aspects of job
- relevant commercial law and legislation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- evaluates and seizes opportunities to improve supply chain for a product or service within an operational context
- identifies and understands a range of current and emerging supply chain management models
- applies tools to measure and quantify supply chain quality standards and efficiency for a retail or wholesale business
- develops clear and effective policy and procedures for wholesale or retail distribution or supply activities
- develops and implements realistic and measurable performance benchmarks for supply and distribution into a business.

Context of and specific Assessment must ensure access to:
resources for assessment

- a retail or wholesale work environment
- relevant sources of supply chain information
- relevant documentation, such as:
  - policy and procedure manuals
  - supply and distribution reports
  - supplier records
- a range of suppliers.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording in the performance criteria is detailed below.

**Business relationships** may be influenced by:

- due diligence requirements
- risk sharing
- market position
- planning cycles and timing
- cost and price analysis
- terms and conditions agreed
- intellectual property and technology rights
- value management
- continuous improvement
- supply chain management
- infrastructural and capital outlay requirements
- organisational systems integration and compatibility.

**Suppliers** may be:

- commercial companies
• public agencies or organisations
• governments
• community and not-for-profit organisations
• internal.

**Benchmarks** may include:

• Australian standards
• international standards
• professional standards
• industry standards
• performance indicators
• quality measures and criteria
• planning milestones and timeframes
• manufacturer and supplier standards.

**Information on suppliers** may include:

• representative’s name and contact details
• range of products and/or services
• transaction records
• contact history
• account terms
• prices
• dispatch and shipping procedures
• records of supplier performance
• details of items supplied or returned.

**Business policy and procedures** may relate to:

• purchasing
• supply and distribution of products or services
• approval processes
• storage and transport of goods.

**Methods used to store information** may be:

• manual
• electronic or digital.

**Factors affecting future distribution and supply** of retail or wholesale products and services may include:

• merchandise availability
• transport availability
• time requirements
• budget requirements
• logistics.

**Relevant personnel** may include:

• manager or supervisor
• colleagues
• business or area manager
• specialist or technical personnel.

**Reports** may be delivered:

• verbally
• in writing
• in groups
• individually.

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
  - monitoring adherence to organisational security policies and procedures
  - responding to two occurrences of non-adherence to security policies and procedures
  - communicating security policies and procedures to one team member
  - ensuring security equipment is utilised and in correct working order
  - reporting on opportunities for improved store security.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - use of security equipment
  - suspicious customer behaviour
  - suspicious team member behaviour
  - armed robbery
  - cash and non-cash security
  - merchandise security
  - theft
  - responding to security breaches
  - reporting security risks and breeches
  - surveillance of merchandise
  - personal security
  - general store security
  - team members’ security training
  - security for opening and closing premises
  - reporting problems and faults
  - security of visitors, sales representatives, contractors and vendors
  - security risks likely to endanger customers or team members
• legislation as relevant to store security and own level of responsibility:
  • privacy laws
  • Australian Consumer Law
  • reporting procedures
• impacts of security breaches on individuals and organisation:
  • emotional distress
  • financial loss
  • commercial impacts
• common security risks within the retail workplace and techniques to:
  • identify risk
  • minimise risk
• types of store alarms and security systems used in industry.

**Assessment Conditions**

Skills must be demonstrated in a services industry environment. This can be:

• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:

• relevant equipment:
  • alarm systems
  • surveillance equipment
  • point-of-sale equipment
  • communication equipment
• relevant documentation:
  • current plain English regulatory documents distributed by government regulators
  • legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
  • organisational policies and procedures as listed in the Knowledge Evidence
• customers and team members; these can be:
  • individuals in an industry workplace, or
  • individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

| 1. **Develop store security procedures.** | 1.1. Consider store requirements and identify *security procedures* required to maximise safety of staff, customers and assets.  
1.2. Develop procedures to facilitate the detection and prevention of internal or external theft according to *organisational policy and procedures*.  
1.3. Develop procedures to ensure maximum safety and security of *staff* and customers in the event of robbery.  
1.4. Develop procedures for opening and closing premises and cash registers, *cash security* and *non cash transactions*.  
1.5. Finalise, document and process security procedures according to *organisational policy*. |
| 2. **Implement and monitor store security procedures.** | 2.1. *Communicate security procedures* to staff according to *organisational policy* and procedures.  
2.2. Implement and monitor security procedures to facilitate the detection and prevention of internal or external theft according to *organisational policy and procedures*.  
2.3. Implement and monitor procedures to ensure maximum safety and security of *staff* and customers in the event of robbery.  
2.4. Develop and implement procedures for opening and closing premises and cash registers, *cash security* and *non cash transactions*.  
2.5. Monitor and maintain implementation of security procedures. |
| 3. **Minimise stock loss and dissipation.** | 3.1. Measure and analyse existing, and extrapolate potential, stock loss or dissipation through theft.  
3.2. Report on stock loss or dissipation through theft, its *impact on business operations* and possible solutions.  
3.3. Establish and implement *stock control procedures* to monitor, control and minimise stock loss through theft. |
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
  - ask questions to identify and confirm requirements
  - converse clearly and directly with staff
  - use and interpret non-verbal communication

- literacy and numeracy skills to:
  - access and interpret store policy documents
  - calculate the cost of stock loss
  - document security procedures
  - handle cash
  - maintain records

- research and analysis skills to:
  - analyse stock control data
  - develop procedures

- problem-solving skills to establish and implement stock control procedures

Required knowledge

- organisational policy and procedures that relate to the development of store procedures for:
  - security
  - detection and apprehension of thieves
  - non-cash transactions
  - cash handling
  - stock control

- principles and techniques for:
  - detecting and preventing theft
  - ensuring safety of personnel in the event of robbery

- relevant codes of practice, legislation and statutory requirements, including:
  - industry codes of practice
  - retail case law or common law
  - state laws relating to property offences
  - work health and safety (WHS) legislation
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- develops and implements security procedures to facilitate the detection and prevention of theft
- develops and implements procedures to ensure safety and security of internal and external clients in the event of robbery
- calculates, analyses and reports on the cost and potential impact of identified loss and dissipation on:
  - buying
  - ordering patterns
  - planning
  - budgeting
- develops and implements procedures for:
  - opening and closing premises
  - cash security
  - non-cash transactions
  - stock control to minimise loss and dissipation
- communicates procedures to staff and monitors implementation.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - store policy and procedures on:
    - security
    - cash handling and non-cash transactions
    - stock control, including buying, ordering, planning and budgeting
  - relevant legislation and statutory requirements
  - industry codes of practice
  - WHS legislation and codes of practice
- a team
- a range of security equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
• observation of performance in the workplace
• role play
• case studies
• written or verbal questioning to assess knowledge and understanding
• review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment
Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Security procedures may relate to:
• armed robbery
• cash and cash movement
• customers
• equipment
• events likely to endanger customers or staff
• opening and closing of premises
• premises
• records
• staff and staff property
• stock
• theft
• visitors, sales representatives and contractors.

Organisational policy and procedures in regard to:
• cash handling
• non-cash transactions
• security
• stocktaking.

Staff may include:
• full-time, part-time, casual or contract staff
• people from a range of cultural, social and ethnic backgrounds
• people with a range of responsibilities and job descriptions
• people with varying degrees of language and literacy
• small work teams
Non-cash transactions may include:
- store team.
- cheques
- customer refunds
- EFTPOS and credit cards
- gift vouchers.

Techniques used to communicate security procedures may include:
- mentoring and coaching
- on-the-job or off-the-job training
- posters and pamphlets
- simulated events.

Impact on business operations may include:
- budgeting
- buying
- ordering patterns
- planning.

Stock control procedures may include:
- minimising out-of-date stock
- minimising theft
- monitoring stock levels
- quality control
- stocktaking and cyclical counts.

</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Establish customer needs.</td>
<td>1.1. Connect with the customer within designated response times and establish rapport.</td>
</tr>
<tr>
<td></td>
<td>1.2. Use questioning and active listening to facilitate effective two-way communication.</td>
</tr>
</tbody>
</table>
1. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.

1.4. Determine and clarify customer preferences, needs and expectations.

2. Provide advice on products and services.

2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.

2.2. Clearly explain and promote product and service features and benefits where relevant.

2.3. Advise on promotional events where relevant.

2.4. Provide additional information to address customer questions and objections.

2.5. Offer comparisons to competitor product or service range as required.

2.6. Collaborate with the customer to determine product or service option most suited to their needs.

2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.

3. Facilitate the sale of products and services.

3.1. Select and use appropriate techniques to close sale.

3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.

3.3. Farewell customer on leaving, and invite to return.

3.4. Provide any required after sales service according to organisational procedures.

**Foundation Skills**

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Reading skills to: • interpret:
  • detailed in-house and supplier product information documents
  • plain English documents that outline organisational customer service policy and procedures.

Numeracy skills to: • interpret basic fee information from in-house documents and complete basic pricing calculations.

Problem-solving skills to: • respond to customer objections and provide appropriate solutions to satisfy customer needs.

Technology skills to: • use technologies equipped with search functionality and information systems to source product and service information.
Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXLS001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
  - appropriate communication
  - establishment and clarification of customer needs, wants and expectations
  - product and/or service knowledge
  - appropriate sales approach to sell benefits and features of products and/or services
  - overcome objections and close sales
  - upsell and/or cross sell additional products and/or services that complement the sale
  - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
  - cultural diversity
  - special needs
- sales techniques:
  - opening techniques
  - recognising buying signals
  - strategies to focus customer on specific products and services
  - selling add-ons and complementary products
  - overcoming customer objections
  - closing techniques
primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable

primary components of privacy law, and actions that retail business must take to protect privacy of customer information

for the specific retail sector:
- professional service standards and protocols for retail industry personnel
- attitudes and attributes expected by the retail industry to work with customers
- different customer service needs and expectations

for the particular retail organisation:
- product and service knowledge:
  - product and service range offering
  - product specifications, features and benefits
- designated response times for providing customer service
- customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:
- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:
- relevant documentation:
  - organisational policies and procedures for:
    - customer service
    - sale of products and services
    - resolving customer complaints
    - collection and storage of customer details
  - organisational product information and price lists
  - supplier brochures, information sheets and price lists
  - promotional activity information
  - current plain English regulatory documents distributed by government regulators for:
    - consumer protection law
    - privacy law

- customers with whom the individual can interact to sell products and services; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation
• assessment activities that allow the individual to:
  • work within commercial speed, timing and productivity
  • manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessment Requirements for SIRXSLS002 Follow point-of-sale procedures

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow procedures for set up, maintenance and close of point-of-sale area/terminal on three different occasions
- perform three point-of-sale transactions for each of the following:
  - cash sales
  - non-cash sales
- perform three point-of-sale transactions for each of the following:
  - refunds
  - exchanges
- make six accurate financial calculations relating to product pricing that individually or cumulatively involve:
  - multiple products
  - products of varying prices
  - products with percentage discounts
- follow procedures to complete four sales that require post purchase activity.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - exchanges
  - refunds
  - lay-by
- basic key aspects of legislation that impact point-of-sale activities:
  - Australian Consumer Law
- features of products sold by the organisation
- functions and procedures for operating point-of-sale equipment:
  - opening and closing
  - clearance of terminal and transference of tender
- recording takings
- consumables required by system
- security
- cash handling procedures:
  - counting cash
  - handling cash floats
  - change required, denominations of change and tendering change
  - security
- procedures for non-cash transactions:
  - credit cards
  - EFTPOS
  - vouchers
- types of purchase follow up activities and associated organisational policies and procedures:
  - placing of orders
  - delivery
  - issuing of invoices
  - issuing of receipts
  - wrapping and packing.

**Assessment Conditions**

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for point-of-sale activities
- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation that impact point-of-sale activities as listed in the Knowledge Evidence
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to develop and maintain expert knowledge to provide accurate product information to customers, including post-sales support.

It also covers communication, analysis and sales techniques to plan and implement sales presentations, build positive relationships with customers, and resolve customer complaints to ensure positive business outcomes.

Application of the Unit
This unit applies to senior sales personnel.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.

<tbody>
<tr>
<td>Elements describe the essential outcomes of a unit of competency.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</td>
</tr>
</tbody>
</table>

1. Develop relationships with customers.

   1.1. Establish rapport with customers and express genuine interest to clarify customer requirements and enhance outcomes.
   1.2. Maintain professional ethics with the customer to promote store image and credibility.
   1.3. Identify customer needs and preferences to maximise sales opportunities.
   1.4. Maximise sales opportunities by use of add-on and complementary sales techniques.
   1.5. Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.
   1.6. Use effective methods to close sales.

2. Apply expert knowledge.

   2.1. Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to legislative requirements.
   2.2. Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.
   2.3. Provide evaluation of product range, demonstrate features and benefits of products or services where appropriate, and make recommendations to the customer to maximise sales potential.
   2.4. Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to store policy.
   2.5. Calculate prices and discounts according to pricing determinants and store policy.

3. Provide post-sales support.

   3.1. Provide evidence of ongoing support as sale is concluded.
   3.2. Explain back-up service and reassure customer according to legislative requirements and store policy.
   3.3. Provide customer with store or salesperson’s contact details to ensure customer follow-up according to store policy.
   3.4. Enter customer and transaction details into customer database according to store policy.
4. Plan sales presentations.
   4.1. Plan presentation to complement *product characteristics*.
   4.2. Select client group according to product characteristics and store merchandising policy.
   4.3. Access *promotional materials* where required and distribute to client group.
   4.4. Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.

5. Implement sales presentations.
   5.1. Ensure sufficient numbers of adequately briefed support staff, where required, for presentation.
   5.2. Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups.
   5.3. Demonstrate products or services to create a buying environment.
   5.4. Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future *sales presentations*, according to store sales policy.

6. Maintain and use a customer database.
   6.1. Maintain customer confidentiality as required by store policy and legislative requirements.
   6.2. Develop and maintain accurate *customer records* and store securely according to store policy and procedures.
   6.3. Identify and follow up regular customers according to store marketing policy.
   6.4. Use customer records to advise customers on products and services of possible interest.
   6.5. Implement *customer loyalty schemes* where required according to store promotional activities.

7. Deal with difficult customers.
   7.1. Acknowledge customer complaints and problems and reassuringly support difficult customers to produce positive outcome.
   7.2. Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration.
   7.3. Develop customer’s confidence in the candidate and product or service to promote long-term trust and commitment to store.
   7.4. Establish mutually acceptable resolution of complaint.

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**
• communication and interpersonal skills to resolve conflict
• literacy and numeracy skills to:
  • access and read relevant product information
  • calculate prices and discounts
  • read store policies and procedures
  • record client and sales information
• sales skills to apply selling techniques, including:
  • add-ons and complementary sales
  • identifying buying signals
  • opening and closing techniques
  • overcoming customer objections
  • presenting product information
  • promoting enhanced sustainability features of selected products and services
  • using strategies to focus customer on specific merchandise

Required knowledge
• customer types and needs, including:
  • customer buying motives, customer behaviour and cues
  • functional and psychological needs
  • individual and cultural differences, demographics, lifestyle and income
• work health and safety (WHS) requirements relating to:
  • manual handling
  • plant and equipment
  • hazardous substances and dangerous goods
  • workers compensation
• relevant industry codes of practice, legislation and statutory requirements relating to building relationships with clients
• store policies and procedures in regard to:
  • efficient use of resources
  • establishing, maintaining and using customer records
  • methods of maintaining customer confidentiality and secure storage of customer details
  • price negotiation and payment and credit options
  • pricing, including GST requirements
  • resolving customer complaints
  • updating and maintaining customer mailing lists
• store and area merchandise and service range
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies:
  - detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
  - industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
  - store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations, and providing after-sales support
  - develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and discerning customer buying motives, requirements and preferences
  - establishes, records and maintains customer records and details, maintaining customer confidentiality, ensuring secure storage of data, and using customer records to maximise customer interest and create a buying atmosphere
  - evaluates personal or team sales performance to maximise future sales
  - maximises sales opportunities by using effective selling techniques, applying detailed product knowledge, and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
  - plans, prepares and conducts sales presentations and briefs
  - supports staff where required, to create a buying environment and maximise sales performance
  - resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution
  - uses effective questioning, listening and observation skills to determine customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:
• policy and procedures manuals  
• industry codes of practice and relevant legislation  
• WHS legislation and codes of practice  
• a range of customers with different requirements  
• an appropriate range of products and equipment  
• a customer database system.

Method of assessment  
A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace  
- customer feedback  
- written or verbal questioning to assess knowledge and understanding  
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment  
Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Customers may include:

• a single customer, couples, families or groups  
• customers with routine or special requests  
• internal and external contacts  
• new or repeat contacts  
• people from a range of social, cultural and ethnic backgrounds  
• people with varying physical and mental abilities.

Clarification of customer requirements may be achieved by:

• active listening  
• appropriate questioning  
• empathy  
• observation  
• reassurance and confirmation.

Outcomes may include:

• credibility of store  
• customer commitment
- customers’ trust
- increased return customer base.
- confirmed appraisals of products and services
- honesty
- positive statements.

Maintaining professional ethics with the customer may include:

Customer needs and preferences may include:
- brand
- customer physical needs
- price
- product characteristics
- product type
- size.

Sales techniques will include:
- add-on and complementary products and services
- selling up or down
- suggestive selling
- variety of methods of closing sales.

Legislative requirements may include:
- environmental protection legislation
- health and welfare law specific to local government, state and federal legislation
- liquor laws
- WHS
- pricing procedures, including GST requirements
- privacy laws
- sale of second-hand goods
- tobacco laws
- Australian Consumer Law and fair trading Acts
- transport, storage and handling of goods.

Store policy and procedures in regard to:
- dealing with difficult customers
- maintaining and using client records
- promotional, marketing, discounting and reward programs
- resolving customer complaints
- selling products and services.

Back-up service may include:
- delivery specifications
- financial products and services
- installation
- returns policies
- technical support
- warranties and guarantees.

Customer database may be:
- computer-based
- manual.
**Product characteristics** may include:
- features and benefits
- price range
- supplier or manufacturer information
- target group.

**Promotional materials** may include:
- brochures
- business cards
- pamphlets
- posters
- promotional merchandise
- vouchers.

**Sales presentations** may be:
- at client site
- in-house
- verbal
- visual.

**Customer records** may include:
- anniversaries and special dates
- details of items bought or returned
- name and contact details
- personal preferences
- transaction records.

**Customer loyalty schemes** may include:
- credit or discount facilities
- customer clubs
- customer reward schemes
- special offers.

Unit Descriptor
This unit describes the performance outcomes, skills and knowledge required to monitor, maintain and improve sales and service delivery. It involves market research, developing new markets, and marketing products and services within the culture of the overall store policy.

The unit requires the team member to develop and maintain excellence in sales and service delivery by ensuring the provision of a well-resourced working environment for fellow staff. The team member is required to proactively pursue the continuous improvement of operations by seeking, evaluating and reporting feedback from customers and colleagues on sales and service delivery and working conditions; and locating and negotiating adequate supply of stock and other necessary resources according to store policy.

Application of the Unit
This unit applies to staff with managerial responsibility.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

| 1. Establish and respond to customer requirements. | 1.1 Plan and develop strategies to enhance provision of customer service according to store policy.  
1.2 Research and **analyse customer needs** in regard to local geographic and cultural issues.  
1.3 Resolve **customer complaints** referred by **staff**, according to store policy.  
1.4 Monitor sales and service targets and plans to ensure that customer requirements are met, and take appropriate remedial action if required.  
1.5 Encourage staff to take responsibility for meeting customer requirements.  
1.6 Seek and use feedback from customers to improve future operations. |
| 2. Monitor, maintain and improve sales and service delivery. | 2.1 Implement, communicate and review **policies and procedures for sales and service delivery** on a regular basis.  
2.2 Maintain adequate **resource** allocation for client service provision in line with **store policy and procedures**.  
2.3 Ensure sales and service targets and plans are consistent with quality and functional **specifications**.  
2.4 Communicate sales and service targets and plans to **relevant personnel** according to implementation schedules.  
2.5 Provide **feedback** to staff on operations and outcomes.  
2.6 Take corrective measures to minimise **factors that may cause disruption to operations**.  
2.7 Monitor and evaluate effectiveness of corrective actions for future operational planning.  
2.8 Ensure current and accurate **records** on sales are available to authorised personnel. |
2.9. Interpret and act on relevant reports as required.

3.1. **Negotiate** and implement *arrangements with suppliers*, according to store policies and procedures, and communicate to relevant personnel.

3.2. Authorise and communicate special pricing arrangements and customer payment agreements to relevant staff and management personnel according to store policy.

3.3. Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.

3.4. Identify and communicate market factors affecting *supply* to relevant personnel.

3.5. Convey complete and accurate records of negotiations and agreements to appropriate personnel within designated time limits.

3.6. Take immediate corrective action where potential or actual *problems with supply* are indicated.

3.7. Identify and develop new suppliers to maintain and improve sales and service delivery.

4. Provide productive work environment.

4.1. Establish and maintain a sufficient supply of resources of the necessary quantity and quality to meet customer requirements.

4.2. Regulate and monitor access to and use of resources for maximum efficiency and sustainability.

4.3. Maintain staff working conditions to meet requirements of *relevant legislation* and store policy.

4.4. Ensure that maintenance frequency and use of equipment conform to recommended schedules and procedures.

4.5. Replace, repair or adapt resources that do not meet requirements as soon as practicable and with minimum disruption to work activity.

4.6. Communicate *recommendations* for improving conditions to relevant personnel within designated timeframe.

4.7. Maintain complete, accurate records and make them available to authorised personnel.

---

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**
• communication and interpersonal skills to:
  • ask questions to identify and confirm requirements
  • communicate with staff through clear and direct communication
  • negotiate with suppliers and customers
  • present information
  • share information
  • use and interpret non-verbal communication
  • use language and concepts appropriate to cultural differences
• literacy and numeracy skills to:
  • calculate costs and pricing arrangements
  • document results
  • estimate volume
  • interpret and maintain data
  • prepare reports
  • research, analyse and interpret a broad range of written material
• technical skills to use new technology

**Required knowledge**

• customer demand and market trends
• principles and techniques for:
  • interpersonal communication
  • purchasing and supply specifications
  • stock control
• product quality standards
• range and availability of new products and services, especially those with enhanced sustainability features
• relevant industry codes of practice applicable to the sales environment
• relevant legislation and statutory requirements, including work health and safety (WHS) requirements applicable to the sales environment
• store merchandise and service range
• store merchandising plan
• store policies and procedures in regard to:
  • efficient and sustainable use of resources
  • pricing procedures, including GST requirements
  • quality assurance and control
  • sales and service delivery
  • stock maintenance and control
  • supply specifications
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- maintains, monitors and evaluates sales and service delivery
- communicates sales and service targets and plans and provides feedback on operations and outcomes to relevant personnel according to store policy
- proactively improves sales and service delivery operations
- interprets and maintains data on sales and services delivery
- negotiates and arranges supply of goods according to store policy and procedures
- authorises pricing and payment agreements according to store policy and procedures
- maintains, monitors and evaluates supply of stock.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
  - policy and procedures manuals
  - sales and service delivery targets and plans
  - records of sales and service
  - legislation and statutory requirements
  - industry codes of practice
  - WHS legislation and codes of practice
  - suppliers
  - a team.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.
Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Methods used to analyse customer needs may be:
- qualitative
- quantitative.

Customer may include:
- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Staff may include:
- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Policies and procedures for sales and service delivery may involve:
- customer complaints
- customer service and sales training
- service standards
- staff induction
- staff presentation.

Resource may include:
- equipment and technology
- finances
- materials
- people
- time.

Store policy and procedures in regard to:
- interaction with customers
- interaction with other team members
- WHS
- quality assurance and control
- acquisition and sale of products and services.

Specifications may include:
- customer agreements
- operational means for meeting agreements
- specific functional duties within the organisation.

Relevant personnel may
include:

- members of own or other work teams
- supervisors.

**Feedback** may be sought and given:

- in groups
- in writing
- individually
- verbally.

**Factors that may cause disruption to operations** may include:

- operational resources
- quality of materials
- supply.

**Records** may be:

- electronic
- hard copy.

Techniques used to **negotiate** with suppliers may include:

- correspondence
- email
- face-to-face contact
- meetings
- telephone.

**Arrangements with suppliers** may relate to:

- credit levels
- delivery
- partnerships and exclusivity
- pricing.

**Sources of supply** may include:

- external organisations
- internal departments and teams
- internal and external personnel.

**Problems with supply** may involve:

- cost
- coverage or content
- quality
- quantity
- time schedules or scales.

**Relevant legislation** may include:

- equal employment opportunity and anti-discrimination laws
- federal, state and local legislation
- WHS.

**Recommendations** may be communicated to:

- colleagues, specialists, staff from other departments
- external organisations with a health, safety or environmental responsibility
- government bodies
- higher-level managers
- subordinates.
Unit Sector(s)

Cross Sector

Competency Field

Sales
SISXRES001 Conduct sustainable work practices in open spaces

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to plan and conduct work in open spaces while upholding sustainable practices. This unit requires the ability to conduct research of the current land condition, capability, uses and practices, and develop and implement strategies to achieve sustainable practices for outdoor programs and activities.

This unit applies to operation or program managers who are responsible for planning, implementing and evaluating sport, recreation or fitness programs and activities across a range of activity areas. They work autonomously with responsibility for management of resources and upholding of sustainable work practices.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

1. Conduct sustainable work practices in open spaces within the local community.

1.2 Review and document relevant codes of practice and local government requirements for use of open space.

1.3 Consult with colleagues and other stakeholders about issues of responsibility for environmental and social sustainability.

2. Conduct minimal impact activities.

2.1 Select and use minimal impact techniques and procedures appropriate to the area.

2.2 Conduct activities using positive sustainable outcomes for local communities and environments.

2.3 Advise clients of appropriate behaviours in open space environments and address any unacceptable behaviours.

3. Monitor impacts and changes.

3.1 Monitor and record changes in the natural environment using appropriate technology.

3.2 Collect environmental information on behalf of environmental agencies or local government as required.

3.3 Advise appropriate authorities of environmental and social change promptly.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct at least three sessions in two or more open space environments to minimise environmental impacts of sport, fitness or recreation activities
- for each of the sessions incorporate:
  - local government requirements
  - industry codes of practice
  - provision of advice to clients regarding the use of open spaces
  - management of client behaviour in open spaces
- provide feedback on the environmental impact of at least five sport, fitness or recreation activities conducted in open spaces.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation, regulations and land management requirements and guidelines:
  - permits in national parks or on land under control of traditional owners
  - restrictions on camp site operations and use of open fires
- global environmental issues, in particular a layperson understanding of the science associated with:
  - climate change
  - energy
  - land management
  - waste and consumption
  - water
- environmental and social impacts of sport, fitness or recreation industry in relation to global environmental issues in particular sites and communities
- practical sustainability considerations for sport, fitness or recreation operations, incorporating those related to:
  - environmentally or culturally sensitive areas and associated minimal impact practices
  - handling and disposal of waste, including human waste
Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces

Date this document was generated: 18 March 2019

- industry codes of practice
- use of water sources
- minimal impact techniques and procedures in relation to:
  - activity-specific guidelines
  - energy use
  - group size
  - interaction with wildlife
  - local customs and courtesies
  - noise
  - setting of camps
  - souveniring
  - use of tracks
  - waste disposal
- biophysical and socio-cultural elements in an environment and the relationship between them
- information collection techniques for monitoring environmental and social impact, including what is observed and measured and how specific data is recorded.

Assessment Conditions

Skills must be demonstrated in:

- an outdoor space that could be used for sport, recreation or fitness work purposes.

Assessment must ensure access to:

- areas or locations containing natural systems or components of these systems
- resources and information relevant to the natural system
- relevant information impacting on conservation of natural systems
- relevant stakeholder and local government information regarding the use of open spaces
- industry code of ethical practice
- organisational documentation relevant to open space planning.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SITTGDE001 Interpret aspects of local Australian Indigenous culture

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to share information about a specific local Australian Indigenous culture. It is this localised focus that distinguishes this unit from SITTGDE007 Research and share information on Australian Indigenous cultures.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of local cultural knowledge, appropriate behaviour and local community consultation.

This unit applies to those people who are able to share local Australian Indigenous cultural knowledge with others. They may work at many different levels, as cultural knowledge has no direct relationship with organisational levels of responsibility.

The local Australian Indigenous cultural knowledge necessary to achieve competency in this unit may only be accessible to those individuals who identify as elders or who are authorised by local elders on behalf of their communities.

There are many different Indigenous language groups in Australia, therefore the focus of cultural interpretation will vary and should ultimately be decided in consultation with elders on behalf of the local community.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

1. Consult with local Australian Indigenous community.
   1.1. Liaise with community members regarding tourism activities, and ways in which cultural information can be used to make these activities authentic to the local area.
   1.2. Prepare for and conduct activities according to the needs and wishes of the local Australian Indigenous community.
   1.3. Identify potential conflicts with the local Australian Indigenous community and seek solutions.

2. Share information about local Australian Indigenous culture.
   2.1. Share an appropriate level of information about aspects of Australian Indigenous culture with customers.
   2.2. Advise customers about culturally appropriate behaviour.
   2.3. Show respect for Australian Indigenous cultures and values through appropriate behaviour during activities.
   2.4. Show customers traditional and contemporary practices when appropriate.
   2.5. Use local language and share with customers when appropriate.
   2.6. Invite customers to actively participate and share in the Australian Indigenous cultural experience when appropriate.

Assessment Requirements for SITTGDE001 Interpret aspects of local Australian Indigenous culture

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with local Australian Indigenous community elders or persons approved by relevant local Indigenous community elders on at least three occasions and in a culturally appropriate manner to identify acceptable protocols for sharing aspects of local Indigenous culture with others
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and at three different sites.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- culturally acceptable practices and protocols within a specific local Australian Indigenous community that address:
  - the type of information that can be shared
  - who can give information
  - who can receive the information
  - what activities are appropriate
  - who should be involved in activities
- aspects of a specific local Australian Indigenous culture as appropriate to specific community:
  - art
  - bush foods and medicine
  - dance
  - music
  - storytelling
  - tools and implements
- copyright and intellectual property issues associated with providing information about local Australian Indigenous cultures.
Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace where research is conducted and shared on Australian Indigenous cultures
- a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

- sites where Indigenous cultural experiences take place:
  - cultural centre
  - gallery
  - natural setting
- involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
- customers with whom the individual can interact; these can be:
  - customers in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:

- have worked in the tourism industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE002 Work as a guide

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to work effectively as a guide. It covers key legal, ethical, safety, environmental and professional development issues that guides must consider in their day-to-day work.

This unit applies to guides who may work across multiple industry sectors as employees, volunteers, or independent contractors. They may operate within a single site, or in a particular city, region or tourist precinct, but often move across sites, cities and regions.

Guides apply discretion and judgement within established organisational procedures, and when guiding a tour or activity they take a lead role without supervision. Sometimes guides are the owner-operators of small tour operations.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SITTGDE002 Work as a guide

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct three guiding activities with different customers or groups which involve:
  - liaising with one or more tourism industry operators
  - identifying potential operational problems and appropriate solutions
  - incorporating client requirements and special requests
- undertake a full risk assessment for each of the above guiding activities that:
  - identifies inherent risks
  - identifies hazards
  - reports on hazards
- demonstrate how legal, ethical, safety and sustainability requirements have been met in the planning of each of the above guiding activities.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- interrelationship between tour operations and wholesaling sectors and the role of guiding in the tourism industry
- cultural considerations in dealing with industry colleagues, customers, suppliers and local communities
- roles and responsibilities for guides, and the specific roles of each of these guides:
  - adventure guides
  - city hosts
  - driver guides
  - meet and greet guides
  - site guides
  - tour guides
  - tour managers
- roles and services provided to guides by peak guiding bodies and industry associations to assist in developing guiding knowledge
- industry and legal compliance requirements that affect guiding operations:
• consumer protection laws
• occupational licensing and industry accreditation
• contents of various guiding codes of conduct or practice and the impacts of non-compliance
• public liability and the guide’s duty of care
• environmental laws
• permit requirements for operating in protected areas
• Queensland Tourism Services Act 2003 requirements for guides when working in Queensland
• work health and safety
• different types of technologies and their uses:
  • presentation technologies
  • radio-frequency identification (RFID) codes for handheld devices
  • social networking
• opportunities to update own knowledge as a guide:
  • familiarisation tours
  • industry seminars
  • participation in industry accreditation schemes
  • participation or membership in professional guide associations
  • research
  • social networking
  • training courses
• tourism operators that work in collaboration with guides:
  • inbound tour operators
  • other guides
  • retail outlets:
    • factory outlets
    • opal or souvenir outlets
    • tax free stores
• suppliers of any tourism product or service that is a component of the touring itinerary:
  • accommodation providers
  • airlines
  • attraction or theme parks
  • coach companies
  • cultural sites
  • event venues
  • food and beverage outlets
  • tour operators and cruise operators
• safety issues that affect guiding operations in particular contexts, particularly those related to customer safety in different environments
- ethical considerations for guides:
  - compliance with industry codes of conduct
  - cultural considerations
  - dealings with local communities
  - dealings with Indigenous communities
  - provision of services as promoted or confirmed
  - relationships with industry colleagues, customers and suppliers
  - avoiding unconscionable conduct
- sustainable work practices includes considerations for:
  - economic:
    - business profitability
  - environmental:
    - minimal impact practices
    - waste minimisation
  - social:
    - host community interactions
    - Australian Indigenous contexts.

**Assessment Conditions**

Skills must be demonstrated in an operational guiding environment. This can be:

- a real guiding activity
- a simulated industry environment or activity.

Assessment must ensure access to:

- environments in which guiding activities take place:
  - tourist attractions
  - visitor sites
  - on board various forms of transportation
- organisational specifications:
  - codes of conduct
  - procedures for liaising with tourism industry operators that are involved in the operation of guided activities
  - running sheets for tours and activities
  - incident report templates
  - passenger lists
  - risk assessment template
  - microphone
  - props and signage
- customer groups of a size and nature that reflect the commercial environment in which the guide operates
- tourism industry operators with whom the individual can interact; these can be:
  - those involved in organising a tour or activity who interact with the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context
- participants undertaking a tour or activity for whom the individual can act as guide; participants can be:
  - those participating in a tour or activity who interact with the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:
- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to research and share information about Australian Indigenous cultures in an appropriate way. It focuses on information that is widely available to the general community.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of culturally appropriate behaviour and local community consultation.

This unit applies across many industry sectors. It is particularly relevant to cultural tourism operations and to individuals who work in customer service and guiding roles with differing levels of responsibility. Information could apply to Australian Indigenous communities and cultures across Australia, or to a specific Australian Indigenous community and culture.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with relevant Australian Indigenous community elders or persons approved by relevant Indigenous community elders in a culturally appropriate manner to identify acceptable protocols for sharing knowledge on local Indigenous culture with others
- using relevant sources of information listed in the knowledge evidence, undertake research on Australian Indigenous culture relevant to the regional context to develop current knowledge of:
  - art and music
  - bushcraft, bush food and bush medicine
  - contemporary Australian Indigenous life and culture
  - cultural centres, galleries and natural sites
  - dance
  - history, pre- and post-European contact
  - land ownership
  - tools and implements
  - traditional life and culture
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and using at least three different locations.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on Australian Indigenous cultures:
  - artworks
  - events
  - exhibitions
  - experiences (of self or others)
  - films
  - images
  - internet
Assessment Requirements for SITGDE007 Research and share general information on Australian Indigenous cultures

- music
- performances
- Indigenous people
- traditional owners
- presentations
- professional associations
- printed texts
- protocols for researching and sharing information about Australian Indigenous cultures that address:
  - the type of information that can be shared
  - who can give information
  - who can receive the information
  - what activities are appropriate
  - who should be involved in activities
- fundamental Australian Indigenous intellectual property issues:
  - strong links between intellectual property and cultural heritage
  - issues associated with the reproduction and sale of Indigenous cultural works.

Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace where research is conducted and shared on Australian Indigenous cultures
- a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

- cultural sites, galleries or natural settings
- information sources verified or supported by Indigenous communities
- involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
- customers with whom the individual can interact; these can be:
  - customers in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:
• have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- prepare three different presentations, with each presentation:
  - using at least four credible and reliable sources of information
  - demonstrating knowledge of flora, fauna and landscape as listed in the knowledge evidence
  - using appropriate ecological terminology and concepts
  - incorporating interpretive themes and messages
  - organising information in a logical and suitable manner for presentation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of interpretation in creating a powerful customer experience
- sources of information on flora, fauna and landscape in the relevant geographic context
- landscapes of interest within a local region and their general characteristics
- key ecological terminology and concepts:
  - biodiversity and abundance
  - biotic and physical factors
  - carbon cycle
  - community relations
  - energy flow
  - food web
  - life cycles
  - nutrient cycle
  - populations
  - succession
  - water cycle
  - zonation
- interrelationships between parts of the ecosystem:
• developmental processes related to the formation of local landscapes:
  • geological formations and history
  • soil composition and its relation to plant and animal life and water catchment areas
• principles of Gondwana theory and the impact of Gondwana on plant and animal communities
• major landscape types and their characteristics:
  • alpine
  • coastal
  • desert
  • outback
  • temperate
  • tropical
• major species of flora and fauna within the local landscape:
  • characteristics
  • commonalities
  • interactions between species and the environment
  • nature of species and where it is found
  • nutrition and life cycles
  • roles of individual species
  • species harmful to humans
• identification techniques for flora and fauna
• environmental influences that affect landscape:
  • climate
  • earthquake
  • fire
  • flood
• human impact on landscape:
  • industrial activity
  • land clearing
  • mining
• management regimes and codes of practice for local landscape
• Australian Indigenous perspective on local landscape
• information sources frequently used by guides:
  • artworks
  • events
  • exhibitions
  • experiences and observations (of self or others)
  • films
  • geological societies, plant study groups or wildlife societies
  • images

SITTPPD002 Develop interpretive activities

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives for an activity; develop operational aspects; and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE005 Prepare and present tour commentaries or activities.

The unit applies to many industry sectors and has particular relevance in tourism, sport and recreation, and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and developing interpretive activities may be for a series of activities in a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SITTPPD002 Develop interpretive activities

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and develop one single interpretive activity and one series comprising at least three interpretive activities combined into an overall program, for at least two of the following:
  - attractions
  - guided activities or walks
  - sporting activities
  - theme parks
  - virtual activities
- plan and develop the above interpretive activities using at least two of the following themes:
  - cultural
  - heritage
  - historical
  - nature
- ensure above interpretive activities include key messages that reflect subject matter knowledge and meet the needs of different customer groups and commercial and operational constraints
- identify review mechanisms for above interpretive activities.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- subject matter around which activities are developed
- influential principles and theories of interpretation
- physical and digital interpretive media
- resource considerations for the development of interpretive activities:
  - apps and other digital content
  - costumes
  - guest speakers
  - handouts
• information and communications technology
• natural resources
• props
• professional organisations
• special interest organisations
• specialists:
  • actors and performers
  • creative designers
  • cultural advisers
  • designers
  • environmental educators
  • heritage specialists
  • historians
  • interpretation consultants
  • marketers
  • subject matter experts
  • technical experts
• practical processes that support activity development:
  • budgeting
  • evaluation
  • needs analysis
  • resource development
  • scheduling
• creative communication techniques for interpretive activities:
  • games
  • illustrated talks
  • role-playing
  • sensory awareness exercises
  • storytelling
  • use of apps, podcasts, near response codes, quick response codes
• safety requirements specific to activities
• risk assessment processes:
  • determining overall risk level
  • determining exposure to the risk
  • estimating probability of negative impacts
  • identifying consequences that could result from the identified risk
• legal, ethical and sustainability considerations for activity development:
  • cultural appropriateness
  • duty of care
  • minimal impact
- minimising waste and conserving resources.

**Assessment Conditions**

Skills must be demonstrated in an operational tourism environment. This can be:
- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:
- a real or simulated environment for which interpretive activities can be planned and developed
- information sources on subject matter of interpretive activities, resources and other specialists
- current technology for use in activity development
- customers sufficient in number to reflect different customer, organisational or community needs and locations for interpretive activities; these can be:
  - customers in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:
- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD009 Develop environmentally sustainable tourism operations

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to plan strategically for environmentally sustainable operations. This is subject to a range of regulatory requirements that relate to environmental sustainability at land management agency and federal, state or territory, and local government level. It requires the ability to establish and operate a sustainable operation and to monitor its environmental impact.

The unit applies to those in the tourism industry with managerial responsibilities in strategic planning and product development. Planning may be for a whole region or local area or for a particular venue, organisation, event or product. The unit applies to any operation with a strong focus on environmental sustainability.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

outcomes. demonstrate achievement of the element.

1.2. Conduct evaluations prior to any decision to establish operation.

1.3. Consult stakeholders and incorporate their views into planning process.

1.4. Investigate methods of managing impact.

1.5. Develop strategies that provide social and economic returns to communities.

1.6. Proactively seek opportunities for new, innovative and more sustainable approaches to conducting operations.

1.7. Develop strategies that balance environmental sustainability and economic viability.

2. Implement environmentally sustainable operations. 2.1. Establish and integrate best practice environmental standards to limit negative environmental impacts.

2.2. Evaluate and use technologies for environmental best practice.

2.3. Develop environmentally-friendly codes of practice for the operation and for customer use.

2.4. Conduct operations according to environmentally sustainable practices, guidelines and legal requirements.

2.5. Promote environmental awareness among stakeholders.

3. Evaluate environmental impact. 3.1. Monitor and assess environmental impacts as part of regular management reviews.

3.2. Monitor compliance with codes of practice and legislative requirements.

3.3. Initiate follow-up action based on assessment of environmental impact and compliance.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

**SKILLS** | **DESCRIPTION**
---|---
Reading skills to: | • interpret materials describing environmental regulatory requirements and codes of practice.
Writing skills to: | • develop plans, systems and procedures for tourism operations.
Oral communication skills to:

- consult with diverse stakeholders on potentially divisive and nuanced issues.

Numeracy skills to:

- perform complex calculations to assess profitability considerations.

Problem-solving skills to:

- respond to complex internal and external management challenges.

Initiative and enterprise skills to:

- evaluate complex issues and information, and develop strategic responses.

Planning and organising skills to:

- coordinate interrelated planning and operational processes.

Assessment Requirements for SITTPPD009 Develop environmentally sustainable tourism operations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop a plan for a tourism operation that supports environmental sustainability and provides evidence of:
  - analysis of key environmental issues
  - consultation with key stakeholders
  - evaluation of proposed operation
  - development of strategies and operational approaches that maximise positive impacts
  - integration of current legislation, regulations and industry codes
- implement the above plan, complying with environmentally sustainable practices, guidelines and legal requirements
- monitor and evaluate the environmental impact of the above tourism operation through:
  - community consultation and involvement
  - internal and external education programs
  - implementing sustainable operational initiatives:
    - regularly reviewing optimal group sizes
    - scheduling for optimal weather conditions and seasons
    - selecting most appropriate equipment and transport modes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- current research trends in the area of ecologically sustainable operations
- current and emerging issues and trends relevant to above operation and the environment
- global environmental issues, in particular a layperson’s understanding of the science associated with:
  - climate change
  - energy
  - land management
  - waste and consumption
  - water
Assessment Requirements for SITIPPD009 Develop environmentally sustainable tourism operations

- relevance of particular environmental issues to the area or region of work and the specific features and vulnerabilities of the local environment
- methods of environmental evaluation:
  - environmental impact study (EIS)
  - evaluation of organisational capacity to comply with:
    - environmental and community protection laws
    - industry and ecotourism codes of practice
  - social sustainability
  - site studies
- consultation and communication mechanisms used by organisations in the product development process:
  - features
  - nature
  - objectives and outcomes
  - scope
  - time parameters
- strategic frameworks and operational systems and procedures that support environmentally sustainable operations:
  - customers
  - equipment and supplies
  - staff
- ways of balancing ecological sustainability and the economic viability of an operation
- potential negative environmental impacts:
  - disturbance of flora and fauna
  - introduction of exotic and feral species
  - physical damage
  - pollution
  - visual impacts
  - waste issues
- laws, regulations and land management requirements and guidelines:
  - need for permits in national parks or on land under control of traditional owners
  - restrictions on operations in relevant areas.

Assessment Conditions

Skills must be demonstrated in a destination, location, organisation or event for which an environmentally sustainable operation can be established. This can be:
- an industry workplace
- a simulated industry environment set up for the purposes of assessment.
Assessment must ensure access to:

- current information about environmental practices:
  - legislation
  - guidelines
  - industry codes of practice
- current information and communications technology to support the research and planning process
- stakeholders with whom consultations can take place; these can be:
  - consumer representatives
  - host community
  - investors
  - government authorities
  - land management agencies
  - suppliers of environmentally-friendly products; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITXCCS002 Provide visitor information

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to access general information on facilities, products and services available in the local area and to provide this to visitors.

The unit applies to frontline service personnel working in a range of tourism, travel, hospitality, entertainment and cultural contexts. Information is often provided face-to-face, but may be by telephone or other remote mechanisms.

It applies to frontline service personnel who routinely respond to visitor requests for general local area information. They may be working independently or with guidance from others in restaurants, hotels, wineries, attractions, entertainment venues, tour operations, visitor information centres and at tour desks.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

Competency Field
Client and Customer Service

Unit Sector
Cross-Sector

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Access and update visitor information.
   1.1. Identify and access sources of visitor information.
   1.2. Obtain general information on local facilities, products and services to meet different visitor needs.
   1.3. Share information with colleagues to support the efficiency and quality of service.
   1.4. Identify and use opportunities to update and maintain local area knowledge.

2. Provide information to visitors.
   2.1. Identify specific information and assistance needs of visitors, including those with special needs.
   2.2. Provide appropriate scope and depth of information to meet visitor needs.
   2.3. Identify and use opportunities to promote internal products and services.

3. Seek feedback on information provision.
   3.1. Proactively seek visitor feedback to ensure required information has been provided.
   3.2. Follow procedures for any formal visitor evaluation.
   3.3. Provide information on visitor feedback to relevant colleagues.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

<table>
<thead>

</tr>
<tr>
<td>Learning skills to:</td>
<td>• review own knowledge of information required to assist visitors and participate in activities that continuously update it.</td>
</tr>
</tbody>
</table>

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the
candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Opportunities to update and maintain local area knowledge** must include at least four of the following:

- informal discussions with colleagues and visitors
- internal newsletters and external promotional material
- local information centre
- participating in local familiarisation tours
- local media: newspaper, radio and television
- personal observation or exploration
- principal or supplier of the product or service
- staff noticeboards
- team meetings.

Assessment Requirements for SITXCCS002 Provide visitor information

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information about local area features to three different visitors on three different occasions
- provide above information and assistance in a culturally appropriate manner and according to organisational service standards
- extend personal knowledge of relevant facilities, products and services
- seek formal and informal feedback from visitors on above services.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on the available local area facilities, products and services:
  - brochures
  - library
  - local council
  - local people and local identities with specialised knowledge
  - local visitor guide booklets and maps
  - online reservation systems
  - organisation information
  - organisation-designed information systems
  - principal supplier of a product
  - product library
  - room directories
  - social media websites
  - state or territory government tourism authority information systems
  - timetables
- information on the local area features:
  - accommodation options
  - dining options
- entertainment venues
- local attractions
- local personal services facilities
- local shopping facilities
- local transport options
- organisation-specific information
- road conditions
- sporting facilities
- tours, local outings and trips
- travelling routes
- weather conditions
- organisational service procedures and standards:
  - designated response times for acknowledging customers and their enquiry
  - personal presentation and hygiene standards
- awareness of customs and practices of various social and cultural groups of visitors to assist with meeting visitor needs and expectations in regards to:
  - modes of greeting, farewelling and conversation
  - body language and body gestures
  - formality of language
  - clothing
- methods of collecting feedback:
  - formal:
    - surveys
    - interviews
    - structured questioning
  - informal:
    - observation
    - casual discussion
- organisational service procedures and standards.

**Assessment Conditions**

Skills must be demonstrated in an operational customer service environment in a service based industry such as tourism, travel, hospitality or events where information is sourced and provided to visitors. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:
Assessment Requirements for SITXCCS002 Provide visitor information

Date this document was generated: 18 March 2019

- sources of information on the local area facilities, services and general products, and their availability
- organisational specifications for customer service standards
- visitor surveys and feedback forms
- visitors from different cultural backgrounds with whom the individual can interact; these can be:
  - visitors to an industry workplace during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

SITXCOM004 Address protocol requirements

Modification History
Not applicable.

Application
This unit describes the performance outcomes, skills and knowledge required to source and access information on protocol requirements to fulfil any sales or operational need. It requires the ability to identify appropriate information sources, access and interpret specific details of protocol requirements, and coordinate the use of protocol.

The unit applies to many tourism, travel, hospitality and event sectors and is particularly relevant to events, function coordination, tour operations and tour guiding.

Protocol affects a broad range of business and government activity and the breadth and depth of protocol knowledge required will vary. This unit does not require in-depth knowledge of protocol requirements, but rather focuses on the ability to collect and interpret protocol information.

This unit applies to a range of people working independently or with limited guidance, including tour and event coordinators and managers, tour guides, and front of house or duty managers.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit
Nil

Competency Field

Unit Sector
Cross-Sector
Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Source information on appropriate protocol requirements.
   1.1. Assess the need for protocol to be followed for the particular situation.
   1.2. Identify relevant sources of protocol information.
   1.3. Liaise with customers to determine appropriate protocol.
   1.4. Interpret relevant protocol information to inform work practice.

2. Coordinate the use of protocol.
   2.1. Identify specific work activities requiring a particular protocol to be observed.
   2.2. Provide protocol briefings to staff and suppliers.
   2.3. Coordinate the use of correct protocol for the delivery of product or service.

3. Update knowledge of protocol.
   3.1. Identify and use opportunities to update protocol knowledge.
   3.2. Share updated knowledge with customers and colleagues as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:
- interpret unfamiliar and complex protocol information.

Writing skills to:
- compose correspondence reflecting correct protocols, when preparing correspondence to dignitaries and officials, invitations, and team briefing papers.

Oral communication skills to:
- liaise with customers, clients, their agents and personal assistants to confirm protocol requirements
- address dignitaries and officials using appropriate language.

Self-management skills to:
- take responsibility for meeting protocol requirements.
Unit Mapping Information

Assessment Requirements for SITXCOM004 Address protocol requirements

Modification History
Not applicable.

Performance Evidence
Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source accurate information on protocol requirements for at least two of the following:
  - organising an event or function, such as a meeting, reception or tour
  - organising accommodation
  - issuing marketing materials reflecting correct titles of dignitaries
  - meeting the requirements of dignitaries and officials
  - meeting the requirements of entertainers and masters of ceremony
  - integrate protocol requirements into oral and written material for each of the above
  - update and integrate knowledge of protocol when organising each of the above.

Knowledge Evidence
Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- main types of civic functions held in Australia
- importance and role of protocol in different business situations
- key sources of information on protocol for:
  - Australian honours system:
    - order of precedence
    - ranks and forms of address
    - wearing of honours and medals
  - involvement of Indigenous Australians and other cultural groups in business activities
  - correct use of national and state symbols:
    - flags
    - anthems
    - military salutes
  - forms of address for different dignitaries and officials, both for written correspondence and in oral communication
  - sources of protocol information:
    - Aboriginal Land Councils
• Australia Day Council
• customers, clients, their agents and personal assistants
• federal, state or territory, and local government protocol departments
• internet
• libraries
• Office of the United Nations
• specific work activities impacted by protocol requirements:
  • addressing and introducing dignitaries and officials
  • correspondence to dignitaries and officials
  • issuing invitations
  • liaison with dignitaries and officials
  • preparing:
    • briefing papers
    • marketing materials
  • running sheets
• protocols for the following different situations:
  • invitations to dignitaries and officials
  • arrival procedures, for heads of state or government officials
  • introduction protocols and order of speakers
  • order of precedence for official guests
  • seating arrangements
  • dress styles
• opportunities to update protocol knowledge:
  • informal networking with colleagues
  • internet research
  • reading relevant journals.

Assessment Conditions
Skills must be demonstrated in an operational tourism, travel, hospitality or events environment. This can be:
• an industry workplace
• a simulated industry environment.

Assessment must ensure access to:
• current protocol information relevant to organisation.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

## Elements and Performance Criteria

### Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance Criteria</th>
</tr>
</thead>
</table>
| **1** Identify the core business and establish the strategic direction of the organisation | 1.1 Identify the **core business of the organisation**  
1.2 Identify, explain and document the relationships between the organisation and other **stakeholders**  
1.3 Interact with key **stakeholders** to inform them of achievements and to ensure their input into the determination of strategic goals and directions  
1.4 Document the organisation's strategic direction and priorities  
1.5 Establish performance targets, that form the basis for evaluation of performance |
| **2** Follow legal requirements when carrying out Board duties           | 2.1 Identify and refer to the relevant provisions of the **legal framework** under which the organisation was established  
2.2 Monitor relevant aspects of the appropriate federal, state and local **legislation** and by-laws for organisation compliance |
| **3** Work within the structure of the organisation                     | 3.1 Differentiate and document the member, governance and management issues of the organisation in the **organisation's governance policy guidelines**  
3.2 Identify, document and refer to the relationships between governance issues and management issues  
3.3 Identify and document the role of the Board in the **organisation's governance policy guidelines**  
3.4 Identify and document the role of the individual Directors in the **organisation's governance policy guidelines**  
3.5 Identify and document the role of the Chairperson in the **organisation's governance policy guidelines**  
3.6 Identify and document the role of the Secretary in the **organisation's governance policy guidelines** |
3.7 Document delegations of the Board's authority

3.8 Undertake and evaluate duties outlined in job descriptions of Board members regularly as a whole Board assessment and an individual Director assessment

4 Monitor trends and changes in the industry

4.1 Ensure the Board is aware of emerging issues in the industry that are likely to have an impact on the organisation's business

4.2 Evaluate the identified emerging issues within a risk management and due diligence framework for their impact on the organisation

4.3 Ensure those emerging issues requiring attention by the organisation are dealt with by the Board in an appropriate manner

4.4 Demonstrate how the Board regularly reviews its policies and procedures to take account of the emerging issues

5 Monitor the organisation's operations

5.1 Ensure preparation for meetings is adequate and timely

5.2 Record meeting attendance and encourage effective participation by all Board members

5.3 Utilise information provided in analysing the efficiency and effectiveness of the organisation in meeting its stated objectives and performance targets

5.4 Review policies, procedures, operations and workplace responsibilities of the organisation and adapt accordingly

6 Supervise the senior management of the organisation

6.1 Receive information and advice regularly from the senior management of the organisation to form the basis of informed decision-making

6.2 Provide instructions to the senior management of the organisation to implement specific policy directions as required

6.3 Seek feedback from senior management of the organisation in relation to the implementation of the specific policy directions
6.4 Assess the performance of the Chief Executive Officer (CEO) regularly in accordance with the legal framework under which they are engaged.

**Required Skills and Knowledge**

Not applicable.

**Evidence Guide**

**Evidence Guide**

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements.

**Critical aspects of evidence to be considered**

Assessment must confirm sufficient knowledge of being an effective paid or unpaid member of the Board of a sport or recreation organisation in the work environment.

Assessment of performance should be over a period of time covering all categories of the Range Statements that are applicable in the learner’s environment.

In particular, assessment must confirm the ability to:

- identify the core business and establish the strategic direction of the organisation;
- follow legal requirements when carrying out Board duties;
- work within the structure of the organisation;
- monitor trends and changes in the industry;
- monitor the organisation’s operations;
- supervise the senior management of the organisation.

**Interdependent assessment of units**

This unit must be assessed after attainment of competency in the following unit(s):
Nil

This unit must be assessed in conjunction with the following unit(s)
SRXGOV002B Undertake the role of an individual Director of an organisation

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)
Nil

Required knowledge and skills

Required knowledge

Knowledge of natural justice and fair process as it relates to the evaluation and assessment of the effectiveness and efficiency of a Board and individual Directors

Knowledge of the business and operations of the organisation as it relates to participating in the formulation of strategic directions

Knowledge of the legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation

Knowledge of roles and responsibilities of particular functions on the Board such as Chairperson, Secretary and Director

Knowledge of the role policies and procedures play in the effective running of an organisation

Knowledge of the separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)

Knowledge of performance measurement systems as they relate to the measurement of the efficiency and effectiveness of the organisation in meeting its stated performance targets
Knowledge of effective human resource management practices as they relate to the delegation, monitoring and evaluation of the Chief Executive Officer (CEO) and senior management

Knowledge of issues to do with Occupational Health and Safety (OH&S) as they relate to the employment of staff

Required skills

Literacy and numeracy skills as they relate to the reading, comprehension, evaluation and analysis of documentation that relates to the organisation's strategic direction, governance policy guidelines, undertaking of the function of Director and the monitoring of trends in industry

Research skills as they relate to the monitoring of trends in industry

Verbal communication skills as they relate to the presentation of cogent arguments within the Board processes

Written communication skills as they relate to the presentation of papers at a Board meeting

Negotiation skills as they relate to active participation in Board discussions and decision-making

Consultation skills as they relate to the meaningful engagement of relevant stakeholders in the organisation's operations

Policy development skills as they relate to the drafting of, consultation on and endorsement of policies and procedures for the effective operation of the organisation

Resource implications

Physical resources - assessment of this competency requires access to either real or simulated organisations and their respective Board processes

Human resources - assessment of this unit of competency will require human resources
consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must be competent in this unit but preferably be competent in the unit at the level above be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the Standards for Registered Training Organisations

Consistency in performance

Due to issues such as performing various duties as a member of a Board of an organisation, this unit of competency must be assessed over period of time in order to ensure consistency of performance over the Range Statements and contexts applicable to participating as a member of an effective Board of an organisation

Context for assessment

This unit of competency must be assessed in the context of participating as a member of an effective Board of a sport or recreation organisation

Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

These levels do not relate to the Australian Qualifications Framework. They relate to the seven areas of generic competency that underpin effective workplace practices.

The three levels of performance (1, 2 and 3) denote the level of competency required to perform the task:

- Use routine approaches
- Select from routine approaches
- Establish new approaches

**Collecting, analysing**
and organising information
Collecting information on the core business of the organisation

Communicating ideas and information
Reporting to the Board on a task that was allocated

Planning and organising activities
Planning and organising regular Board meetings

Working with teams and others
Working as a member of a Board of an organisation

Using mathematical ideas and
techniques
- Analysing financial documents for the organisation

Solving problems - Identifying the need to hold an extraordinary meeting

Using technology - Taking part in a teleconference

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies.

Range Statement

Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency

<table>
<thead>
<tr>
<th>RANGE STATEMENT</th>
<th>CATEGORIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Board assessment</td>
<td>[all categories]</td>
</tr>
<tr>
<td></td>
<td>the assessment of the Board as a whole could</td>
</tr>
</tbody>
</table>
be undertaken by four key issues
chat with the Chairperson
yes/no questionnaire
grading questionnaire
written questionnaire

the introduction of an effective process of Board assessment will involve implementation over time
gaining commitment
careful preparation
deciding the issues to be covered by the Board assessment
defining measures of performance: organisation and Board communicating performance implementing changes reviewing the process

Chief Executive Officer assessment [all categories]
the Chief Executive Officer (CEO) assessment should be undertaken by the Board, as the Chief Executive Officer (CEO) is responsible to the Board as a whole, not just the Chairperson part of a policy framework based on objective performance criteria reviewed as part of an organisation and Board performance review linked to a remuneration policy which reflects objective performance

the aim of the performance evaluation is to align the long-term interests of the Chief Executive Officer (CEO) with the long-term interests of the organisation. This would require a three stage process of
the Board setting goals for/with the Chief Executive Officer
monitoring the performance of the organisation against the goals
responding to the difference between expected and actual outcomes

performance measures should be
valid
verifiable
controllable
global
communicable

Core business of the organisation
[all categories]
that business that is consistent with the intent and purpose for which the organisation was established
that business that is consistent with the Memorandum and Articles of Association

Emerging issues
[all categories]
the Corporate Law Economic Reform Bill (1998)
technology
information

Individual Director assessment
[all categories]
the assessment of Directors who are currently on the Board can be undertaken by various means
chat with the Chairperson
chat with the Governance Committee
Director self-assessment
aggregated results to give Board profiles
qualitative peer assessment
the assessment of a Director prior to appointment should consider the following issues

the profile should be related to the goals of the organisation and the organisation and Board performance criteria

an external search process should be used to complement the probable likely suspects known to the Board

the appointment term should be considered

relevant information should be discussed prior to the appointment

current Directors should meet the final candidate to ensure they are comfortable that the new Director will contribute the skills knowledge and experience sought in a team-like manner

a thorough induction process should be undertaken

**Legal framework**

[all categories]

the legal context within which the organisation operates

association - Associations law
corporation - Corporation law

**Legislation**

[all categories]

specific laws

Corporation law

the Corporations law, the complementary State legislation and the Ordinances of the relevant Territories

<tr>
<td>2.2</td>
<td>Ensure new Directors understand the way that the Board operates and the organisation's governance policy guidelines</td>
</tr>
<tr>
<td>2.3</td>
<td>Highlight continuing professional development opportunities to the attention of all Directors</td>
</tr>
<tr>
<td>2.4</td>
<td>Monitor relevant aspects of the appropriate federal, state and local legislation and by-laws for organisation compliance and provide advice to ensure Directors follow legal requirements when carrying out Board duties</td>
</tr>
<tr>
<td>3</td>
<td><strong>Provide detailed information for the Board to deal with the right matters</strong></td>
</tr>
<tr>
<td>3.1</td>
<td>Ensure the Board is aware of emerging issues in the industry that are likely to have an impact on the organisation's business</td>
</tr>
<tr>
<td>3.2</td>
<td>Evaluate the identified emerging issues within a risk management and due diligence framework for their impact on the organisation and provide this information to the Board</td>
</tr>
<tr>
<td>3.3</td>
<td>Differentiate governance and management issues of the organisation to ensure the Board deals with the right matters</td>
</tr>
<tr>
<td>3.4</td>
<td>Collate a well structured Board paper, containing all necessary information items and including a recommendation from management, for all agenda items</td>
</tr>
</tbody>
</table>
3.5 Ensure Board members receive the papers in sufficient time to study them before the meeting

3.6 Establish processes to source appropriate internal and external professional advice for Directors to inform their decision-making (where required)

3.7 Establish processes to deal with extraordinary matters that arise outside scheduled meetings

4.1 Ensure complete and accurate minutes are recorded and reported to the Board

4.2 Identify and implement actions that flow from the decisions clearly

4.3 Implement the appropriate policies and procedures to support the Board's decisions within agreed timeframes

4.4 Advise the Board promptly of issues affecting the implementation of Board decisions

5.1 Provide information and advice regularly to the Board to foster informed decision-making

5.2 Brief the Chairperson in great detail on all substantive issues at all times

5.3 Seek clear instructions from the Board in order to implement specific policy directions (as required)

5.4 Seek feedback from the Board in relation to the performance of staff regarding implementation of the specific policy directions

### Required Skills and Knowledge

Not applicable.

### Evidence Guide

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of
competence and should be read in conjunction with the Range Statements

**Critical aspects of evidence to be considered**

Assessment must confirm sufficient knowledge of working effectively with the Board of a recreation organisation or facility in the work environment.

Assessment of performance should be over a period of time covering all categories of the Range Statements that are applicable in the learner's environment.

In particular, assessment must confirm the ability to:

- differentiate between management and governance issues;
- ensure the Board follows the organisation's governance policy guidelines;
- facilitate the establishment of an effective Board team;
- arrange for the Board to deal with the right matters;
- provide sufficient documentation for the Board to reach informed decisions;
- ensure that the decisions are implemented properly;
- communicate regularly with the Board and ensure the Chairperson is well briefed on current issues affecting the organisation.

**Interdependent assessment of units**

This unit must be assessed after attainment of competency in the following unit(s):

Nil

This unit must be assessed in conjunction with the following unit(s):

Nil

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s):
Nil

**Required knowledge and skills**

**Required knowledge**

Knowledge of the business and operations of the organisation as it relates to the formulation of strategic directions

Knowledge of the legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation

Knowledge of roles and responsibilities of particular functions on the Board such as Chairperson, Secretary and Director

Knowledge of the role policies and procedures play in the effective running of an organisation

Knowledge of the separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)

Knowledge of human resource management practices as they relate to the development of effective working relationships between paid staff and volunteer Boards

**Required skills**

Literacy and numeracy skills as they relate to the reading, comprehension, evaluation and analysis of documentation that relates to the organisation's strategic direction, governance policy guidelines and the monitoring of trends in industry

Research skills as they relate to the monitoring of trends in industry

Verbal communication skills as they relate to the presentation of information to the Board

Written communication skills as they relate to the presentation of papers at a Board meeting

Consultation skills as they relate to the
meaningful engagement of relevant Board members in the organisation's operations

Policy development skills as they relate to the drafting of, consultation on and endorsement of policies and procedures for the effective operation of the organisation

Facilitation and project management skills as they relate to the implementation of Board decisions

Leadership skills as they relate to demonstration of appropriate individual standards of performance, influencing others, making decisions, facilitating group decision-making and the utilisation of appropriate leadership styles

Resource implications

Physical resources - assessment of this competency requires access to either real or simulated organisations and their respective Board processes

Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must be competent in this unit but preferably be competent in the unit at the level above be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the Standards for Registered Training Organisations

Consistency in performance

Due to issues such as the varied issues that are required to be discussed by a Board, this unit of competency must be assessed over period of time in order to ensure consistency of performance over the Range Statements and contexts applicable to working
effectively with the Board or management committee of a sport or recreation organisation

Context for assessment

This unit of competency must be assessed in the context of working effectively with the Board or management committee of a sport or recreation organisation.

Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes.

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons.

Application

This unit describes the skills and knowledge required to plan the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system.

It applies to individuals with assessment planning responsibilities.

In planning activities and processes, individuals are required to identify the components of assessment tools, analyse and interpret assessment tools, and develop assessment instruments (also known as assessment tasks) and assessment plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions following organisational arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards
- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency
- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

**Assessment Conditions**

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements
- reviewing the assessment process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment, including:
  - VET as a competency-based system
  - how competency based assessment differs from other types of assessment
  - competency standards as the basis of qualifications
• structure and application of competency standards
• the principles of assessment and how they are applied
• the distinction between assessment tools and assessment instruments
• the rules of evidence and how they are applied
• the range of assessment purposes and assessment contexts, including RPL
• different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
• reasonable adjustments and when they are applicable
• types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
• the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
• RPL policies and procedures established by the organisation
• cultural sensitivity and equity considerations in assessment activities
• current legislative requirements relevant to the assessor and the assessment process
• workplace health and safety (WHS) responsibilities associated with assessing competence, including:
  • requirements for reporting hazards and incidents
  • emergency procedures
  • procedures for the use of relevant personal protective equipment
  • the safe use and maintenance of relevant equipment
  • sources of WHS information.

**Assessment Conditions**

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

Application

This unit describes the skills and knowledge required to participate in an assessment validation process.

It applies to assessors and workplace supervisors with assessment validation responsibilities participating in, but not necessarily leading, the process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with <em>TAE Training and Education Training Package Version 2.0.</em></td>
</tr>
</tbody>
</table>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- actively participating in a minimum of three validation sessions that address the critical aspects of validation
- clearly identifying the purpose for each validation, and the legal and ethical responsibilities of assessors
- collating and presenting documentation for each validation in a logical manner
- communicating and liaising with relevant people
- providing feedback and interpreting documentation in validation sessions
- recording their contribution to validation findings.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to determine the evidence needed to demonstrate competence in a competency-based environment
- the reasons for carrying out validation and different approaches to validation that may be appropriate before, during and after an assessment
- the components of assessment tools
- critical aspects of validation, including validation of assessment processes, methods and products
- how principles of assessment are addressed in validation
- how rules of evidence are addressed in validation
- work health and safety legislation, codes of practice, standards and guidelines that impact on assessment
- obligations of an assessor under applicable legislation and/or standards, particularly in relation to validation activities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- the texts and tasks usually found in the workplace
- units of competency and other materials used in validation sessions.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the TAE50116 Diploma of Vocational Education and Training or the TAE50111 Diploma of Vocational Education and Training or be able to demonstrate equivalence of competencies.

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one’s own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

#### Description

- **Learning**: Reflects on practice to improve

- **Reading**: Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery

- **Writing**: Accurately maintains learner records and documentation appropriate to the learning context and audience

- **Oral Communication**: Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups

- **Interact with others**: Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes

  - Asks questions in order to clarify understanding, and to provide and seek feedback

  - Builds rapport to establish effective working relationships and to achieve effective outcomes

- **Get the work done**: Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes

  - Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.
Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee’s employer to meet its WHS obligations for the mentee.
Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads, in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific code, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

<td>1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures</td>
</tr>
<tr>
<td></td>
<td>1.2 Hazardous and specialised cargo including powders,</td>
</tr>
</tbody>
</table>
raw grain product and controlled waste are identified and handled in accordance with required workplace procedures, work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and regulated requirements

1.3 Vehicle is loaded in consultation with relevant documentation and personnel in accordance with vehicle loading regulations and workplace safety requirements

1.4 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation

1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load

1.6 Ancillary equipment is operated in accordance with workplace procedures and manufacturer instructions during loading and unloading operations

2 Secure and protect vehicle and load

2.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions

2.2 Load is protected in accordance with legal and workplace safety requirements

2.3 Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity

2.4 Loaded vehicle is inspected and checked for security to travel

3 Complete documentation

3.1 Documentation is completed and proofread in accordance with workplace procedures

3.2 All required cargo transportation documentation is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
**Range of Conditions**

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

**Unit Mapping Information**

This unit replaces and is equivalent to TLID3014 Load and unload vehicles carrying special loads.

 Companion Volume Implementation Guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=bf441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating and working collaboratively effectively with others when loading and unloading special loads
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and correctly using load handling equipment when loading and unloading hazardous cargo and specialised cargo including:
  - powders
  - raw grain product
  - controlled waste
- identifying and interpreting containers and goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of relevant documentation
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment and conforming to industry and work health safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) standards
- using manual handling techniques safely

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of
the requirements of the elements and performance criteria and include knowledge of:

- characteristics of special loads including:
  - powders
  - raw grain product
  - controlled waste
- containers and goods coding, IMDG Code markings and emergency information panels, including their meaning and implications for loading and unloading processes
- housekeeping standards and procedures
- methods for securing special loads
- national Load Restraint Guide (LRG)
- relevant state/territory mass and loading regulations for special loads, including current Australian Dangerous Goods (ADG) Code and Australian Code for the Transport of Explosives by Road and Rail
- risks and hazards when loading and unloading special loads, and related precautions to control the risk
- site layout considerations and obstacles to unloading operations
- WHS/OHS/OSH procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national LRG, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and care for livestock in transit, in accordance with relevant regulations and industry codes of practice for caring for livestock in transit.

It includes preparing to transport livestock, caring for and controlling livestock in transit, using appropriate animal husbandry techniques, and completing relevant documentation as required.

Work is performed under limited or minimum supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1 Prepare to transport livestock</td>
<td>1.1 Health condition and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace procedures</td>
</tr>
</tbody>
</table>
1.2 Vehicle is checked that it is positioned correctly on loading dock, hazards are identified and required action is taken to minimise, control or eliminate identified hazards in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and workplace procedures.

1.3 Livestock crate drainage system is inspected to ensure drainage of livestock effluent from the vehicle is in accordance with regulatory requirements and workplace procedures.

1.4 Livestock crate is checked for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit in accordance with regulatory requirements and workplace procedures.

1.5 Poor quality livestock is identified and reported to specified person/s in accordance with workplace procedures.

1.6 Feed provisions and other requirements including veterinary products for livestock, prior to and during transit, are identified and organised.

1.7 Portable stockyards are assembled as required in accordance with regulatory requirements and workplace procedures.

1.8 National vendor declaration is obtained and checked for accuracy in accordance with regulatory requirements.

1.9 Loaded livestock is visually assessed to ensure correct density of livestock within the pen and adjustments are made as required in accordance with regulatory requirements and workplace procedures.

2 Care for and control livestock in transit

2.1 Wellbeing of livestock is regularly monitored during loading, transit and unloading, and appropriate action is taken in accordance with relevant government regulations, workplace procedures, and humane and permit requirements.

2.2 Relevant handling equipment is used to aid handling of livestock during loading and unloading operations, in accordance with regulations and workplace procedures.

2.3 Action is taken for care and wellbeing of livestock in an
accident during transit

2.4 Distressed livestock is identified and handled in an appropriate manner in accordance with regulatory requirements and workplace procedures

3 Use animal husbandry techniques

3.1 Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in accordance with relevant government regulations, workplace procedures, and humane and permit requirements

3.2 Prescribed medication is administered to livestock in accordance with veterinary directions and workplace procedures

4 Completion of documentation

4.1 National vendor declaration transport section is completed correctly and clearly by transport operator

4.2 National vendor declaration is given to the appropriate person upon reaching destination on the declaration

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3020 Care for livestock in transit.

Links

Companion Volume Implementation Guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- inspecting vehicle to ensure livestock crate drainage system is in place and is effective in control of livestock effluent
- checking livestock crate for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit
- loading livestock to ensure correct density of livestock within the pen
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) requirements and guidelines and workplace procedures
- communicating effectively and working collaboratively with others in the care of livestock in transit
- completing relevant documentation including relevant sections of National Vendor declaration
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit
- insurance rights and requirements of clients
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- WHS/OHS/OSH requirements and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

**Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

TLID1001 Shift materials safely using manual handling methods

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
D – Load Handling

Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>

<td>1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method</td>
</tr>
</tbody>
</table>
relocating load

1.2 Storage locations are determined and potential routes to be followed are identified

1.3 Effect of load relocation on original load base is predicted

1.4 Points of balance are estimated

1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance

1.6 Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered

1.7 Risks in potential routes are considered

1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods

1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified

1.10 Team lifting processes are considered when moving loads

1.11 Appropriate personal protective equipment is determined

1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

2.1 Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment

2.2 Process for relocating load is proposed including predicting and planning for potential difficulties

2.3 Proposed process is checked for compliance with code of practice and workplace procedures

3 Relocate load

3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements

3.2 Applications appropriate for team relocation of load are identified

3.3 Team lifting tasks are coordinated

3.4 Planned process and route are followed
3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability

3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information
This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Links
Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
  - controlled actions on a movement during lifting
  - distance over which load is to be shifted
  - frequency of shifting operations
  - load on the spine during lifting
  - postures and positions during lifting
  - rotation and side movement of the spine during lifting
  - time allowed for shifting the load
  - type, weight and position of the load
  - work layout
  - site layout and obstacles
  - workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice
and operation manuals.

TLID2010 Operate a forklift

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
D – Load Handling

Unit Sector
Not applicable.
### Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

<table>
<thead>
<tr>
<th>1 Check forklift condition</th>
<th>1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1.2 Attachments are checked to ensure appropriate adjustment and operation.</td>
</tr>
<tr>
<td></td>
<td>1.3 Mirrors and seats are adjusted for safe operation by driver.</td>
</tr>
<tr>
<td></td>
<td>1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements.</td>
</tr>
<tr>
<td>2 Drive forklift</td>
<td>2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions.</td>
</tr>
<tr>
<td></td>
<td>2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage.</td>
</tr>
<tr>
<td></td>
<td>2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques.</td>
</tr>
<tr>
<td></td>
<td>2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning.</td>
</tr>
<tr>
<td></td>
<td>2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures.</td>
</tr>
<tr>
<td>3 Operate forklift to handle loads</td>
<td>3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected.</td>
</tr>
<tr>
<td></td>
<td>3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures.</td>
</tr>
<tr>
<td>4 Monitor site conditions</td>
<td>4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made.</td>
</tr>
<tr>
<td></td>
<td>4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs.</td>
</tr>
</tbody>
</table>
5 Monitor and maintain forklift performance

5.1 Performance and efficiency of vehicle operation is monitored during use

5.2 Defective/irregular performance and malfunctions are reported to relevant personnel

5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Assessment Requirements for TLID2010 Operate a forklift

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

TLID2022 Conduct weighbridge operations

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to conduct weighbridge operations in accordance with regulatory requirements and workplace procedures, within the transport and logistics industry.

It includes setting up for weighbridge operations, weighing loaded and unloaded vehicles, finalising weighbridge operations, and completing required records and documentation.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
D – Load Handling

Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
1 Set up for weighbridge operations

1.1 Weighbridge systems, including equipment, computer and recording arrangements, are checked for operational status

1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturer instructions and relevant legislation

1.3 Accurate reporting of results of inspection and testing is kept in accordance with statutory requirements, workplace procedures and industry guidelines

1.4 Hazards are identified, risks are assessed and control measures are implemented

1.5 Faults/discrepancies in weighbridge operation are identified and appropriate action is undertaken in accordance with workplace procedures

2 Weigh loaded vehicles

2.1 Vehicles likely to exceed weighbridge weight limit are turned away in accordance with workplace procedures

2.2 Vehicles are directed onto platform to obtain accurate weight

2.3 Weight of loaded stationary vehicle is registered against vehicle and load identification

2.4 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement

2.5 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

3 Weigh unloaded vehicles

3.1 Vehicles are directed onto platform to obtain accurate weight

3.2 Weight of unloaded stationary vehicle is registered against vehicle

3.3 Proposed load weight is assessed for conformance to statutory requirements

3.4 Loading operations are commenced in accordance with legal loading weight, customer requirements and workplace procedures, and vehicle is re-weighed to establish final load weight, as required

3.5 Vehicle and load information are entered into workplace recording system and invoice is issued to driver, as required
3.6 Driver signatures on weighbridge documents, invoices or receipts are obtained in accordance with statutory and workplace requirements

3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

4 Complete weighbridge operations

4.1 Weighbridge systems, including equipment, computer and recording arrangements are secured or made ready for next shift

4.2 Record of operations is maintained and filed in accordance with workplace procedures and statutory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2022A Conduct weighbridge operations.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLID2022 Conduct weighbridge operations

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- identifying, selecting, and efficiently and effectively using weighbridge equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of weighbridge equipment
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems, errors or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- setting up and maintaining weighbridge equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:
- calculation method and approaches for metric and imperial systems
- classification procedures
- correct weighing procedures including statutory and workplace requirements
- emergency response procedures
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- problems that may occur when conducting weighbridge operations and appropriate action that can be taken to resolve these problems
- records and documentation requirements for weighbridge operations
- relevant regulations for conducting weighbridge operations including current Australian Dangerous Goods (ADG) Code
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout
- weights and measures regulations
- workplace procedures for conducting weighbridge operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) legislation and workplace procedures
- completing workplace documentation and forms
- ensuring processed information and data is checked for relevance, accuracy and completion
- operating and adapting to differences in electronic applications and systems in accordance with standard operating procedures
- reading, interpreting and organising information and data needed for completing and processing workplace documentation and forms
- working collaboratively with others when completing and processing workplace documentation, data and forms
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- writing and entering information and data into electronic applications and systems in a timely manner.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- procedures for processing workplace documentation and data using relevant workplace technology
- relevant procedures and duty of care requirements
- relevant WHS/OHS/OSH legislation, regulatory requirements and workplace responsibilities
- requirements and sources for workplace documentation including:
  - data
  - forms
  - logs
  - diaries
- typical problems in processing workplace documentation and data and appropriate action and
solutions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, electronic applications and systems, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
E – Communication and Calculation

Unit Sector
Not applicable.

Elements and Performance Criteria
Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Estimate loads for transport or storage

1.1 Order forms/work orders are read and requirements are noted

1.2 Shape, balance characteristics, dimensions and mass of load/s are identified

1.3 Area/volume required for storage is estimated

1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system

2 Estimate load limits of transport and/or storage

2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures

2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated

3 Organise load

3.1 Load/s is restricted to allowable range

3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems

3.3 Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002A Estimate/calculate mass, area and quantify dimensions.
Links

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIE3004 Prepare workplace documents

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
E – Communication and Calculation

Unit Sector
Not applicable.

Elements and Performance Criteria

<table>

</table>
1 Plan workplace document

1.1 Purpose and audience for document are identified

1.2 Appropriate format for document is established to meet workplace requirements

1.3 Relevant information is identified and selected for inclusion in document

2 Prepare workplace document

2.1 Document is drafted in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary appropriate for reader/s

2.2 Document is edited and presented in a final version appropriate to task

3 Complete workplace forms

3.1 Work related form/s is interpreted to identify information required for its completion

3.2 Required information for completion of form is gathered from relevant sources in accordance with workplace procedures

3.3 Form/s is completed in accordance with workplace policy and procedures, and applicable regulations and codes

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

TLIF2010 Apply fatigue management strategies

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry. Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
F – Safety Management

Unit Sector
Not applicable.

Assessment Requirements for TLIF2010 Apply fatigue management strategies

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required action to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate action in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance
- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

**Assessment Conditions**

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIH2001 Interpret road maps and navigate pre-determined routes

 Modification History

 Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

 Application

 This unit involves the skills and knowledge required to interpret road maps and to navigate routes as part of transport operations.
 It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements.
 Work is performed under general or limited supervision. It involves the application of map reading principles and procedures when interpreting street directories and road maps, and following pre-determined routes.
 Work must be carried out in accordance with relevant state/territory roads and traffic authority regulations.
 No licensing, legislative or certification requirements apply to this unit at the time of publication.

 Pre-requisite Unit

 Not applicable.

Assessment Requirements for TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing documentation related to route navigation
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment in accordance with workplace protocols
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job role
- reading and interpreting relevant instructions, procedures, information and signs
- using global positioning system (GPS) devices to navigate pre-determined routes as required
- using maps and other route documentation to correctly identify and interpret:
  - map symbols
  - roads and intersections
  - town and suburb locations
- working collaboratively with others as required (such as fleet managers, sales team)
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on a particular route
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations/rest stops as required
- operational procedures for interpreting road maps, using GPS devices and navigating routes
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards and issues
- traffic conditions at various times of the day/night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate action that should be taken
- workplace requirements for recording and documenting route information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

TLIH3002 Plan and navigate routes

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to plan and navigate routes as part of transport operations, in accordance with relevant state/territory roads and traffic authority regulations.

It includes interpreting information from a road map, street directory or global positioning system (GPS) device; planning the most appropriate route taking into account pertinent factors; and completing required trip documentation in accordance with operational requirements.

This unit relates to the work of transport and distribution personnel involved in passenger services and/or the delivery of a range of possible goods and materials including valuables, secured products documents and materials.

Work is performed under general or limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
H – Route Planning and Navigation

Unit Sector
Not applicable.
Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1. Interpret street maps
   1.1 Symbols in a street directory/road map/GPS are recognised and interpreted
   1.2 Places are identified in a directory index and information is used to locate places on appropriate map

2. Plan routes
   2.1 Given a location and a destination, the most direct and alternative routes between two points are identified using a street directory/road map/GPS
   2.2 Hazards are identified, risks are assessed and control measures are implemented
   2.3 Information on height, width and load limits of road infrastructure and other restrictions on thoroughfares is accessed, interpreted and taken into account when planning a route for a journey, as required
   2.4 Suitable route is selected to ensure the most efficient, safe, secure and legal transport operation, taking into account relevant criteria for transport operation concerned

3. Follow planned route
   3.1 Planned route is correctly followed with aid of a street directory, road map and/or GPS system
   3.2 Geographic regions, tourism features and other places of interest are identified, as required
   3.3 Route documentation is completed in accordance with purpose of transportation and workplace requirements
   3.4 Parking procedures are observed in accordance with enterprise procedures and relevant legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH3002A Plan and navigate routes.

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLIH3002 Plan and navigate routes

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and interpreting required information and developing contingency routes (including road restrictions, traffic conditions, service stations/rest stops)
- adapting to changes and difference in vehicle navigation technology, maps and street directories as they relate to route planning
- adapting to changes in vehicle navigation technology, maps and street directories as they relate to route planning
- applying fatigue management techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- implementing contingency arrangements
- interpreting and following operational instructions and prioritising work
- interpreting information to allow effective route planning
- modifying route planning activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in vehicles, loads and equipment in accordance with standard operating procedures
- planning alternative routes for contingencies such as road works, emergencies or delays
- planning and navigating a route effectively
- planning for transport routes to meet workplace requirements
- planning routes in accordance with workplace guidelines
- reading and interpreting relevant instructions, procedures, information and signs:
  - estimating route distances using map information
  - identifying roads and intersections
  - identifying town and suburb locations
  - reading and interpretation of map symbols
- reporting and/or rectifying identified problems promptly, in accordance with workplace procedures
• selecting and using relevant route planning and navigation technology including GPS devices.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

• basic GPS operation
• current information about accidents or emergencies that might close or restrict traffic on particular routes
• features and contents of maps and street directories, and techniques for their use in transport navigation
• known traffic conditions at various times of the day along specific routes
• location of service stations and rest stops
• operational procedures for planning and navigating transport routes
• physical hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
• relevant state/territory permit and licence regulations and requirements
• road conditions for various routes, including sections undergoing road works
• security hazards on long routes
• workplace requirements for recording and documenting route information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy
requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor transport logistics in accordance with relevant regulatory requirements, standards and codes of practice, including the Australian Dangerous Goods (ADG) Code and workplace procedures.

It includes mobilising resources, coordinating multi-modal transport activities, monitoring consignment/s and implementing a contingency management strategy.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
1 Mobilise resources

1.1 Optimal resource level is acquired to meet operational schedule requirements

1.2 Relevant regulatory and insurance requirements are determined and implemented

1.3 Allocated resources are assessed and monitored to ensure operational effectiveness and efficiency

1.4 Changes to resource allocation are undertaken where deficiencies or over-supply are apparent, in accordance with enterprise procedures

2 Coordinate multi-modal transport activities

2.1 Facilities, personnel and equipment are made ready to accommodate interchange functions

2.2 Security arrangements are invoked as required

2.3 Loading and unloading operations are conducted in accordance with operational schedule and applicable statutory requirements, codes of practice and enterprise procedures

2.4 Relevant documentation is completed/updated in accordance with operational schedule and reporting requirements

3 Monitor consignment tracking

3.1 Consignment tracking systems are monitored against workplace quality standards

3.2 Variations from workplace quality standards are identified and appropriate action is initiated to rectify identified problems or to institute required improvements

4 Implement contingency management strategy

4.1 Operational schedule is continually reviewed in taking into account information updates, reports and feedback

4.2 Nature, extent and impact of issues or incidents are identified and assessed against contingency management strategy

4.3 Relevant information is processed to establish priorities and responses for dealing with issues or incidents

4.4 Operations are redirected and controlled to meet changes in transport environment and tasks, in accordance with enterprise procedures

4.5 Liaison is initiated and maintained with organisations/individuals affected by changed operational schedules
4.6 Actions undertaken are clearly documented and filed

Foundation Skills
Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions
Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information
This unit replaces and is equivalent to TLIL5019A Implement and monitor transport logistics.

Assessment Requirements for TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and monitoring transport logistics
- completing documentation related to implementing and monitoring transport logistics
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communication equipment to required protocol
- prioritising work and coordinating self and others in relation to transport logistics activities
- providing leadership and working collaboratively with others
- reading and interpreting transport schedules, regulatory requirements, customer instructions, workplace procedures and manuals relevant to implementing and monitoring transport logistics
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and applying appropriate application of technology, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.
Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant Australian standards and associated certification requirements
- business policies, procedures and plans including procedures for outsourcing components of operations and engaging additional resources
- code, regulatory, permit and licence requirements relevant to transport logistics
- operational transport logistics systems, resources, management and workplace operating systems
- problems that may occur when implementing and monitoring transport logistics and action that can be taken to resolve or report these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and regulations
- relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to transport logistics
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- risks and hazards related to implementing and monitoring transport logistics and ways of controlling the risks involved
- transport and equipment applications, capacities, configurations, safety hazards and control mechanisms
- workplace policies and procedures, including those covering issue resolution and grievance
- workplace procedures for implementing and monitoring transport logistics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

</tr>
</tbody>
</table>
2 Prepare for work/task

2.1 Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures

2.2 Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures

2.3 Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures

2.4 Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures

2.5 Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures

2.6 Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements

2.7 Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures

2.8 Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures

2.9 Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures

3 Perform work/task

3.1 Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures

3.2 Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures
3.3 Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures

3.4 Unplanned and unsafe situations are responded to in accordance with safe work procedures

3.5 Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures

3.6 Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures

4 Pack Up

4.1 Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures

4.2 Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2001 Licence to operate a forklift truck

Companion Volume Implementation Guide -
Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
  - maintaining safe operating speed
  - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
  - battery charge as required by manufacturer requirements
  - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
  - checking for signs of paint separation and stressed welds indicating potential structural weakness
  - document evidence of damage
  - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
  - ensuring availability of correct forklift truck logbook and updating records as required
  - ensuring forklift truck tynes or other attachment/s are securely fitted
  - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
  - fluid leaks
  - lights are working effectively
  - safety equipment checks
  - signage and labels to ensure they are visible and legible
  - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
  - insufficient lighting
  - other specific hazards including dangerous goods
  - overhead hazards and fixed structures, roof beams and doorways
  - restricted and poorly ventilated areas
• surface suitability based on forklift truck and task requirements
• the risk of collision with people, moving plant and fixed structures
• weather conditions
• complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
• conducting operational checks, which must ensure:
  • all controls are located, identified and tested for functionality
  • all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
  • hazard warning systems (e.g. reversing beepers, lights and horns) are functional
  • recording and maintaining accurate information relating to forklift truck operations
  • safety devices as fitted
  • start-up is in accordance with manufacturer requirements
  • steering, transmission and brake functions comply with operating requirements
  • there are no unusual noises
• confirming and following traffic management plan procedures relevant to their role in the work area
• conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
• determining relevant lifting attachment to perform work/task
• determining lift requirements including:
  • positioning of unusually balanced/shaped loads
  • centre of gravity
  • dynamic nature of load
  • tine/attachment positioning
  • weight
• ensuring risk control measures within the work area are effective as per workplace procedures
• identifying, isolating and tagging out defective equipment and reporting to authorised person/s
• interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
• interpreting workplace procedures in relation to various environmental conditions
• maintaining communication with other workplace personnel through using worksite procedures including:
  • audible and visual warning devices
  • signage
  • two-way radio
  • verbal instructions
  • written instructions
• maintaining three points of contact whilst accessing and egressing forklift truck and ensuring
rungs / steps are free of hazards

- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
  - aligning tynes/attachment to load
  - carrying out a lift to 75% of the maximum height
  - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
  - correctly using horns and mirrors in workplace
  - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
  - driving applicable to conditions and moving loads safely
  - driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
    - an 'S' bend with a minimum 90 degrees left and right turn
    - ensuring load/s remains stable through pick up, transport and placement
    - forklift truck speed is appropriate to load and surroundings
    - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
  - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
  - tilting mast (or forks if applicable) to ensure balance of load
  - using gluts/dunnage appropriately and lowering load safely
  - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
  - reporting to relevant person/s on site risk control measures that are not in place or are deficient
  - setting up an exclusion zone
  - securely parking forklift truck and isolating in appropriate position including:
    - minimising possible access by unauthorised person/s
    - tynes/attachment lowered to required position in accordance with manufacturer requirements
    - park brake applied
    - switching off, isolating fuel/power source and removing key according to workplace procedures
    - shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

**Knowledge Evidence**

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:
• Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
• communication procedures including:
  • audible and visual warning devices
  • hand signals
  • questioning techniques
  • signage
  • traffic warning systems
  • two-way radio
  • written instructions
• forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
• impact of the following on the operation of the forklift truck including:
  • failure/loss of control including brakes and steering
  • failure of equipment during forklift truck operations
  • forklift truck instability causes including:
    • deterioration of ground condition
    • overloading
    • pick up and placement of load
    • irregular loads
  • operating on ramps and uneven surfaces and in restricted spaces
  • use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
    • labels on the actual load
    • markings on the actual load
    • paperwork such as consignment notes, running sheets and weighbridge dockets
    • weighing a carton and calculating load
• manufacturer requirements, instructions and operator's manual
• problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
  • wind
  • lightning
  • water/ice impacted surface/ground
  • rain
  • extreme heat
  • Ultra violet (UV) exposure
• problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
  • lock out and tag out procedures
• relevant procedures for refuelling and recharging forklift truck using appropriate PPE
including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling
- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
  - bale clamps
  - carpet spike for carpet rolls
  - drum carrier
  - jib attachment
  - paper roll clamps
  - personnel work platforms
  - rotators
  - slippers/fork extensions on tynes
  - suitability and lifting capability of the attachment to be used
  - shut down procedures for a forklift truck in accordance with manufacturer requirements
  - traffic management plan procedures and requirements
  - typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
  - workplace procedures including work plan which may be verbal, documented/written, or electronically generated
  - work area operating surface suitability including issues with:
    - backfilled ground
    - bitumen (damaged, cracked)
    - concrete (damaged, cracked)
    - hard compacted soil
    - potholes
    - railway tracks
    - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
    - soft soils
    - trench covers
  - Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety
and Health (OSH) requirements, safe work and workplace procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
  - approved codes of practice and relevant guidance material
  - relevant Australian technical standards
  - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck high risk work (HRW) licence.

This unit requires a person operating a forklift truck to plan the work, conduct routine checks on a forklift truck, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1 Plan work

1.1 Potential workplace hazards are identified

1.2 Risk control measures are identified consistent with regulatory requirements and the hierarchy of control

1.3 Appropriate forklift truck is selected in accordance with load and workplace conditions

1.4 Working area is inspected to determine appropriate paths for moving loads and forklift truck in accordance with workplace conditions

1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures

2 Conduct routine checks

2.1 Prior to operation, forklift truck is visually checked for any damage or defects

2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard

2.3 All controls are located, identified and confirmed

2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures

2.5 Forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise

2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
2.7 All forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures.

2.8 Issues, defects and damage identified during routine checks are reported and recorded in accordance with workplace procedures, and appropriate action is taken.

3 Shift load

3.1 Weight of load is assessed to ensure compliance with forklift truck data plate specifications.

3.2 Appropriate hazard prevention/control measures are implemented and communicated to personnel in the work area.

3.3 Forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures.

3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards.

3.5 Load movement is monitored constantly to ensure safety of personnel and load, and structural stability.

3.6 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans.

4 Shut down and secure forklift truck

4.1 Forklift truck is parked to avoid hazards.

4.2 Forklift truck is shut down in accordance with manufacturer specifications and workplace procedures.

4.3 Routine post-operational forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures.

4.4 Forklift truck is secured to prevent unauthorised access/use.

4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken.
Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2001A Licence to operate a forklift truck

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a forklift truck and satisfy all of the unit elements, performance criteria and foundations skills requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating a forklift truck
- carrying out post-start operational checks, which must ensure:
  - attachment movements and control functions are smooth and comply with operating requirements
  - hazard warning systems (e.g. lights and horns) are functional
  - safety devices are checked, including
    - deadman’s switch
    - emergency descent device (hydraulic)
    - reversing beepers
  - start-up is in accordance with procedures
  - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
  - battery charge checks, as required
  - ensuring availability of logbook, records, handbook and/or operating manuals
  - fitting and interpreting forklift truck data plate
  - fluid checks
  - forklift truck attachment security checks
  - identifying approved modifications and/or attachments fitted, to manufacturer specifications in accordance with forklift truck or attachment data plate
  - locating, identifying and confirming all controls
  - safety equipment checks
  - signage and label visibility and legibility checks
  - updating records as required
- communicating with other workplace personnel through
  - using appropriate worksite protocols
• listening
• making and interpreting hand signals
• questioning to confirm understanding
• signage
• verbal and non-verbal language
• written instructions
• complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
• conducting and monitoring safe forklift truck operations that include moving loads safely, driving and manoeuvring, picking up and placing loads at various stack heights and carrying out all functions to the maximum height and load capacity
• driving a forklift truck with load in forward and reverse, while maintaining visibility
• planning and preparing for forklift truck operations including:
  • conducting a workplace risk assessment
  • identifying hazards associated with operating a forklift truck, which must include
    • forklift truck instability (e.g. due to overloading, poor load placement, irregular loads)
    • ground conditions (e.g. condition of pavement, slopes)
    • insufficient lighting
    • overhead hazards (e.g. electric lines, service pipes)
    • traffic (e.g. pedestrians, vehicles, other plant) and the risk of collision with people, moving plant and fixed structures
    • weather conditions (e.g. wind, lightning, rain)
  • selecting hazard prevention strategies in accordance with the hierarchy of control
  • putting in place effective controls for identified hazards
  • visually checking a forklift truck for any damage or defects prior to operation including
    • evidence of damage
    • leaks
    • structural weaknesses (including paint separation or stressed welds)
• receiving and interpreting workplace instructions, safety information and emergency procedures
• shutting down a forklift truck in accordance with manufacturer specifications and workplace procedures including
  • parking in a suitable location away from dangerous areas
  • correctly positioning fork arms (tips down, tilted forward, lowered to ground)
  • selecting appropriate transmission/gear for parking (relevant to transmission type)
  • applying hand/parking brake
  • turning off engine power
  • removing ignition key as required
  • shutting off LPG gas cylinder valve as required
• securing equipment in accordance with manufacturer specifications and against unauthorised operation
• securing site
• ensuring access ways are clear
• identifying and segregating defective equipment and reporting to authorised personnel
• connecting batteries to charger as required
• verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including
  • environmental conditions (e.g. wind, lightning, storms)
  • failure/loss of control (e.g. brakes and steering)
  • failure of equipment (e.g. hydraulic system)
  • forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

• Australian and industry standards relevant to operating a forklift truck
• Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one’s own responsibilities
• forklift truck characteristics and capabilities (including use of load data plates)
• forklift truck operations and safe operating techniques
• hierarchy of control:
  • elimination
  • substitution
  • isolation
  • engineering controls
  • administrative controls
  • personal protective equipment (PPE)
• methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
  • control labels
  • forklift data plates/labels
  • forklift warning decals
• organisational and workplace standards, requirements, policies and procedures for operating a forklift truck
• procedures for recording, reporting and maintaining workplace records and information
• relevant Australian and industry standards, codes of practice and guidelines to safely
operate a forklift truck
- risk control measures including:
  - barricades and traffic control (e.g. traffic management plan)
  - compliance with permit condition requirements from electrical supply authority, including
    - adequate illumination
    - disconnected power
    - excavation safeguards
    - insulated electric lines
    - maintaining safety observer zone
    - movement of obstructions
    - observing limits of approach
    - pedestrian control (barricades, signs, etc.)
    - power disconnection or compliance with electrical supply authority requirements
    - safety tags on electrical switches/isolators
    - using safety observer inside exclusion zone
    - using personal protective equipment
- selecting forklift truck to suit load and workplace conditions
- typical routine problems encountered operating a forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:
- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements.
If the working zone is located at a ‘live’ site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must **not** be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring that candidates have access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of Performance Assessment
- relevant workplace procedures and standards for operating a forklift truck, including:
  - approved codes of practice and guidance
  - relevant Australian and international technical standards
  - manufacturer guidelines (instructions, specifications or checklists) for the purpose of Performance Assessment
  - relevant industry standards and operating procedures (where applicable)
  - safe work method statements (SWMS), as required.

TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit specifies the skills and knowledge required to safely operate a boom-type elevating work platform where the length of the boom is 11 metres or more.

Boom-type elevating work platform means a telescoping device, hinged device, or articulated device, or any combination of these, used to support a platform on which personnel, equipment and materials may be elevated.

A person performing this work is required to hold a boom-type elevating work platform high risk work (HRW) licence.

This unit requires a person operating a boom-type elevating work platform to plan the work, conduct routine checks, set up elevating work platform, operate elevating work platform, and shut down and secure elevating work platform.

Licensing/Regulatory Information
This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit
Not applicable.

Competency Field
LIC – Licensing
Unit Sector
Not applicable.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENTS</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1 Plan work

1.1 Potential workplace hazards are identified

1.2 Hazard control measures are identified consistent with appropriate standards to ensure the safety of personnel and equipment

1.3 Elevating work platform is appropriate for the task

1.4 Appropriate communications methods are identified

2 Conduct routine checks

2.1 Service logbook for elevating work platform is checked for compliance

2.2 Elevating work platform is visually checked for damage or defects in accordance with procedures

2.3 Routine pre-operational checks are carried out in accordance with procedures

2.4 Safety equipment is inspected in accordance with procedures

2.5 Elevating work platform is accessed in a safe manner

2.6 Safety equipment is fitted and secured to elevating work platform in accordance with procedures

2.7 All controls are located and identified

2.8 Elevating work platform is started in accordance with procedures

2.9 All safety devices are identified and tested in accordance with procedures

2.10 Post-start operational checks are carried out in accordance with procedures
2.11 Communications equipment is checked for serviceability

2.12 All damage and defects are reported and recorded in accordance with procedures, and appropriate action is taken

3 Setting up the elevating work platform

3.1 Ground suitability is inspected and checked

3.2 Elevating work platform is driven to or located at work area in accordance with procedures

3.3 Elevating work platform is positioned for work application and stability in accordance with procedures

3.4 Appropriate hazard prevention/control measures are applied to work area in accordance with procedures

3.5 Work gear and tools are stowed and secured

4 Operating the elevating work platform

4.1 Elevating work platform is operated using all relevant plant movements in accordance with procedures and appropriate standards

4.2 Elevating work platform is mobilised using best mobile practice and appropriate procedures

4.3 Elevated working platform operations are monitored constantly, to ensure safety of personnel and stability

4.4 Unplanned and/or unsafe situations are responded to in accordance with procedures

5 Shutting down and securing the elevating work platform

5.1 Elevating work platform is lowered and stowed in accordance with procedures

5.2 Relevant motion locks and brakes are applied as required

5.3 Safety equipment is disconnected from platform

5.4 Egress from elevated work platform is conducted in accordance with procedures

5.5 Outriggers/stabilisers are stowed and secured in accordance with procedures as required

5.6 Plates or packing are stowed and secured as required

5.7 Elevating work platform is shut down in accordance with procedures

5.8 Routine post-operational checks are carried out in
accordance with procedures

5.9 Damage and defects are reported and recorded in accordance with procedures, and appropriate action is taken

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Performance feature</th>
</tr>
</thead>
</table>
| Employment skills to:         | • operate a boom-type elevating work platform with a boom length of 11 metres or more in different types of workplaces transferring key principles of safe operation to different contexts  
                                 • improve own performance in safely and efficiently operating a boom-type elevating work platform by incorporating learnings from different workplaces and different conditions into current performance |
| Numeracy skills to:           | • interpret numerical information including:                                          
                                 • selecting appropriate boom-type elevating work platform in accordance with load and workplace conditions  
                                 • load weight assessment, to ensure compliance with boom-type elevating work platform data plate specifications  
                                 • controlling and monitoring instrument readings |
| Language skills to:           | • use and interpret vocabulary specific to boom-type elevating work platform operations and workplace procedures to communicate with other workplace personnel  
                                 • use non-verbal feedback to support effective communication  
                                 • use relevant two-way radio conventions |
| Literacy (reading) skills to: | • interpret documentation that includes technical specificity including:               
                                 • boom-type elevating work platform data plate  
                                 • plant operation manuals and manufacturer specifications  
                                 • workplace procedures, including emergency plan  
                                 • workplace signage and labels |
| Literacy (writing) skills to: | • accurately record and maintain information relating to operating a boom-type elevating work platform including:  
                                 • incident reports  
                                 • vehicle checking and maintenance records |
| Self-management               | • implement risk control measures  
                                 • initiate emergency management strategies |
Range of Conditions
Range is restricted to essential operating conditions and any other variables essential to the work environment.
Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information
This unit is equivalent to TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more).

Links
Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851
Assessment Requirements for TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
A person who demonstrates competency in this unit must provide evidence of safely operating a boom type elevating work platform with a boom lengths of 11 metres or more and satisfy all of the elements, performance criteria and foundation skills requirements of the unit on at least one occasion including:

- applying appropriate mathematical procedures to estimate loads
- applying best operating practice including:
  - avoiding ground depressions
  - gently accelerating and braking
  - minimum speed
  - minimum boom/jib length
- applying emergency procedures and safety equipment, including the use of safety harnesses, energy absorbers, lanyard and anchor points
- applying hazard prevention/control measures including:
  - disconnected power
  - illumination requirements
  - insulated electric lines
  - moving obstructions
  - pedestrian controls
  - personal protective equipment
  - safety tags on electrical switches/isolators
  - using safety observer inside exclusion zone
  - suitable area for set-up
  - suitable firm and stable standing
  - traffic barricades and controls
  - trench covers
- applying relevant plant movements including:
  - articulating
  - hinging
• lowering boom
• raising boom
• slewing
• telescoping
• applying risk assessment and hazard control strategies, including hierarchy of control as applied to positioning and safely operating an elevating work platform
• assessing ground conditions to confirm site is suitable (e.g. firm, level and safe) to extend and travel the elevating work platform
• communicating with other workplace personnel through:
  • appropriate worksite protocols
  • bells
  • buzzers
  • listening
  • making and interpreting hand signals
  • questioning to confirm understanding
  • signage
  • two way radios
  • verbal and non-verbal language
  • written instructions
• complying with WHS/OHS licensing legislation
• identifying problems and equipment faults and where practicable demonstrating appropriate response procedures
• operating and controlling a boom type elevating work platform including all functions to their maximum extension within the safe working (rated) capacity including:
  • a telescoping device
  • articulated device
  • hinged device
  • or any combination of the above used to support a platform on which personnel, equipment and materials may be elevated to perform work
• positioning, stabilising, set up of elevating work platforms, including the use of outriggers/stabilisers and packing to ensure that the safest lift is performed
• receiving and interpreting workplace instructions, safety information, emergency procedures
• recording and maintaining accurate information relating to operating elevating work platform
• shutting down a boom type elevating work platform in accordance with manufacturer specifications and workplace procedures including:
  • idling engine to stabilise temperature
  • folding boom/jib into the transport position
  • removing key from ignition
  • retracting boom/jib
  • retracting outriggers/stabilisers
• turning off engine
• stabilising a boom type elevating work platform by:
  • correctly positioning plates or packing
  • deploying outriggers
  • establishing correct size plates or packing
• using and interpreting manufacturer specifications and data
• using communications signals including:
  • luff boom down – hand
  • luff boom down – whistle and/or two-way radio
  • luff boom up – hand
  • luff boom up – whistle and/two-way radio
  • stop – hand
  • stop – whistle and/or two-way radio
  • telescope out – hand
  • telescope out – whistle and/or two-way radio
  • telescope in – hand
  • telescope in – whistle and/or two-way radio
• using outriggers/stabilisers and packing to ensure safest lift is performed
• verifying problems and equipment faults and applying appropriate response procedures to unplanned and/or unsafe situations including:
  • contact with overhead electrical conductors
  • damage caused by contact with obstructions
  • environmental conditions (e.g. wind, lightning, storms, etc.)
  • failure of controls
  • illness of personnel
  • loss of power.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

• appropriate mathematical procedures for estimating loads to ensure elevating work platform is not overloaded
• Australian and industry standards relevant to operating a boom-type elevating work platform (boom length 11 metres or more)
• boom length capability including:
  • nominal reach, measured horizontally from centre point of rotation to outer edge of
platform in its most extended position
- vertical distance from floor of platform to surface supporting elevating work platform with platform at its maximum height
- Commonwealth, state or territory WHS/OHS legislation, standards and codes of practice relevant to the full range of processes for the crane class
- ground stability including:
  - backfilled ground
  - bitumen
  - concrete
  - hard compacted soil
  - rock
  - rough uneven ground
  - soft soils
- elevating work platform characteristics, operations and operating techniques
- emergency procedures and safety equipment, including the use of safety harness, energy absorber, lanyard and anchor points
- hazards including:
  - environmental conditions (e.g. wind, lightning, storms, etc.)
  - ground stability (e.g. ground condition, recently filled trenches, slopes)
  - insufficient lighting
  - other specific hazards (e.g. tidal areas, chainsaws, pressure washers, dangerous materials)
  - overhead hazards (e.g. electric lines, service pipes, trees, buildings etc.)
  - traffic (e.g. pedestrians, vehicles, plant)
- hierarchy of hazard identification and control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- procedures for recording, reporting and maintaining workplace records and information, including using the service logbook
- organisational and workplace standards, requirements, policies and procedures for conducting elevating work platform operations
- rated capacity and working load limits
- risks associated with overhead electric lines/electrical cables, ground conditions, wind, pedestrians and tipping
- systematic process of eliminating or reducing risk to personnel and property through the application of controls
- typical routine problems encountered in the process and with equipment, and adjustments required for correction.
Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Boom-type elevating work platform (boom length 11 metres or more) operation assessment must be conducted in a working zone in accordance with state/territory arrangements.

If the working zone is located at a ‘live’ site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must not be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring candidates have access to:

- appropriate boom-type elevating work platform (boom length 11 metres or more) and associated equipment in safe condition
- appropriate safety equipment and devices including:
  - anchor points
  - audible and visual reversing devices
  - energy absorber
  - horns/sirens
  - lanyard
  - lights as required
  - operator restraint devices (platform gate)
  - safety harness
- communications equipment including:
  - mobile phone
  - two-way radios
• required personal protective equipment (PPE) for the purpose of the Performance Assessment

• where appropriate, relevant workplace procedures and standards for operating a boom-type elevating work platform including:
  • approved codes of practice and guidance
  • Australian Standards
  • checklists
  • industry operating procedures
  • relevant industry standards (where applicable)
  • manufacturer guidelines (instructions, specifications or checklists) for the purpose of the Performance Assessment
  • safe work method statement (SWMS), as required
  • service logbooks/logbooks
  • signage and labels
  • history record system where service and maintenance history is kept.

TLIR4002 Source goods/services and evaluate contractors

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.
The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.
It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.
This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.
Work is performed under general guidance on progress and work outcomes.
No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit
Not applicable.

Competency Field
R – Contract Procurement

Unit Sector
Not applicable.
### Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance Criteria</th>
</tr>
</thead>
</table>
| 1 Analyse supply requirements | 1.1 Purpose and specifications of required goods/services are identified  
1.2 Criteria to evaluate potential or existing contractor performance is established  
1.3 Quantities of required goods/services are determined  
1.4 Frequency of ordering/requesting of goods/services is identified |
| 2 Evaluate potential contractors | 2.1 Contractors of requested goods/materials/services are identified  
2.2 Comparative costings for goods/materials/services are obtained  
2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed  
2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures  
2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service  
2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors  
2.7 Information and data generated during selection process is filed and maintained in accordance with workplace procedures |

### Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4002A Source goods/services and evaluate contractors.

Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken
Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services, and evaluating potential supply contractors.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIR4003 Negotiate a contract

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application
This unit involves the skills and knowledge required to contract transport and logistics services in compliance with relevant regulations, standards, legal requirements, codes of practice and workplace procedures.

It includes negotiating the contract, finalising the contract negotiations, as well as completing all contract requirements with a contractor.

The unit generally applies to those with responsibility for resource coordination and allocation, and who lead individuals or teams.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for TLIR4003 Negotiate a contract

Modification History
Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying activities to cater for variations in workplace contexts and environment
- operating electronic communications equipment to required protocol
- planning and monitoring work activities in terms of schedule
- prioritising work and coordinating self and others in relation to workplace activities
- providing leadership and working collaboratively with others when negotiating a contract
- reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
- selecting and applying appropriate technology and information systems.

Knowledge Evidence
Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and the range of conditions on at least one occasion and include:
• applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
• applying relevant legislation and workplace procedures
• communicating and working effectively with others when negotiating a contract
• completing documentation related to negotiating a contract
• modifying activities to cater for variations in workplace contexts and environment
• operating electronic communications equipment to required protocol
• planning and monitoring work activities in terms of schedule
• prioritising work and coordinating self and others in relation to workplace activities
• providing leadership and working collaboratively with others when negotiating a contract
• reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
• selecting and applying appropriate technology and information systems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

• a range of relevant exercises, case studies and/or other simulations
• relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
• applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

UETTDREL14A Working safely near live electrical apparatus as a non-electrical worker

Modification History
Not applicable.

Unit Descriptor
1) Scope:

1.1) Descriptor
This Competency Standard Unit covers compliance with working safely up to the defined “safe approach distance” near energised electrical apparatus (inc. electrical powerlines) for non-electrical workers. It includes work functions that may be performed, such as vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker. Also included is the preparation of risk assessment control measures that encompass job safety assessment. It does not include any work that is or may be performed by other competent operatives within the defined “safe working zone”. The defined “safe working zone” is that so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical and Mechanical Apparatus.

Application of the Unit
2) This competency standards unit shall apply to Transmission, Distribution, Rail Traction, Telecommunications and Vegetation Management Control industry sectors.
Licensing/Regulatory Information

License to practice 3)

The skills and knowledge described in this unit may require a licence/registration to practice in the work place subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, industrial relations, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

Pre-Requisites

Prerequisite Unit(s) 4)

Competencies 4.1)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must be have been completed plus all the competencies in one (1) of the identified Pathway Unit Group(s):

There are no prerequisite competencies to this unit.

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 “Literacy and Numeracy”.

Reading 3 Writing 3 Numeracy 3
Employability Skills Information

Employability Skills 5)

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

| 1.6 | Scope of responsibility and process of relevant work permit(s) issue is identified, received and confirmed according to requirements and established procedures. |
| 1.7 | Relevant responsibility associated with First Aid, Safety Observers and/or other related work safety procedures at the worksite are identified in accordance with requirements and established procedures to ensure safety measures are followed in the instance of an incident. |
| 1.8 | Processes for identifying and reporting client issues to appropriate personnel in accordance with industry/acceptable /community standards are identified. |
| 1.9 | Site and the work schedule to be prepared are confirmed according to given instructions for a quality outcome and to minimise risk and damage to property, commerce, stock and individuals in accordance and established procedures. |
| 1.10 | Electricity infrastructure assets, related voltages and requirements for working safely near live electrical apparatus as non-electrical worker are identified. |
| 1.11 | Safe approach distances including any zones thereof that may apply, as defined in industry guidelines, requirements and/or established procedures for the intended work are confirmed. |

| 2 | Carry out the work safely near live electrical apparatus as non-electrical worker. |
| 2.1 | OHS principles and practices to reduce the incidents of accidents are identified in accordance with given instructions, requirements and/or established procedures. |
| 2.2 | Working safely and complying with all safety requirements for working near live electrical apparatus as a non-electrical worker are followed in accordance with given instructions and |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
2.3 | Processes for monitoring and reporting/referring hazards and OHS risks to the immediate authorised personnel for directions according to established procedures are followed.
2.4 | Non-routine events are referred to the immediate authorised personnel for directions according to established procedures.
2.5 | Unexpected events associated with working safely near live electrical apparatus as a non-electrical worker are responded to using acquired known solutions and skills related to routine procedures to ensure work instructions and established procedures are met.
3 | Complete the work safely near live electrical apparatus as non-electrical worker.
3.1 | Work schedule and anomalies for completion and checking of the work are reported to authorised personnel in accordance with established procedures.
3.2 | Processes for reporting to authorised personnel accidents and/or incidents are confirmed in accordance with established procedures.
3.3 | Requirements for returning work permit(s) and/or access authorisation permits are confirmed.
3.4 | Appropriate personnel are notified of work completion according to established procedures.
3.5 | Works completion records, report forms/data sheets are completed accurately in accordance with given instructions and established procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential
REQUIRED SKILLS AND KNOWLEDGE

Skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of working safely near live electrical apparatus as non electrical worker.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TEL14A Power Line Safety – Non Electrical Workers

Evidence shall show an understanding of power line safety – non electrical workers to an extent indicated by the following aspects:

T1 Basic electrical principles encompassing:

- Fundamental units - basic measurement of units
- Electrical characteristics of material: characteristics of solid materials, insulators; terms electrical charge, electrical current, electromagnetic forces
- Nature of electrical current and change - basic rules of electrical current flow
- Sources of Electricity: basic fundamentals of alternating current, direct current and single EMF source (induction)
- A simple circuit - circuit protection devices used on the network, effects of an open circuit, a closed circuit and a short circuit and earthing – using the ground as a form of conductor to return current back to a source
- Resistance - relationship between voltage and current and resistance (Ohms Law)
- Effects of current - physiological effects and protection for physiological effects; basic principle by which electrical current can result in the production of heat, light and electromagnetic fields and typical effects of current.
- Three phase and single phase power systems: star delta configurations, three phase star connections, relationship between line and phase voltages, three phase 4 wire systems - purpose of the neutral
- Consequences of short circuits - arc flash, ESI Protection schemes
- Magnetism - magnetic field patterns, concepts of electromagnetism, effects of electromagnetism and magnetic fields around straight conductors
- Hazards encountered in an ESI environment - touch and step potentials, electric shock, fire, chemicals, falls, safe use of tools and equipment.

T2 Transmission, distribution and rail power systems encompassing:

- Relationship between the transmission, distribution and rail/tram system within an overall power system - different organisations responsible for generation, transmission, distribution and rail/tram and, how they correlate and their functions
- Characteristics of a transmission, a distribution and a rail system - principal components, typical voltage levels and methods of transmission and distribution including grid type transmission systems, radial, parallel and ring main feeders
- Relationship between an overhead and underground supply systems within an overall power system - advantages/disadvantages, applications.
- Single line drawings and layouts - drawings and layouts of transmission and distribution systems including, radial, parallel and ring main feeders and the HV
REQUIRED SKILLS AND KNOWLEDGE

equipment associated with substations

T3 Fundamentals for working safely near live electrical apparatus for non-electrical worker encompassing:

- Standards, guidelines/codes of practice, State/Territory/local government legislation, supply authority regulations and or enterprise requirements including relevant certification and licensing, applicable to working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker

- OHS policies and procedures for working safely - duties of a safety observer, permit to work systems and isolation procedures, safe application of different types of tools and equipment and operation of mobile plant and machinery (e.g. EWP) near live electrical apparatus

- Techniques and precautions in undertaking different work functions and working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker (work functions that may be performed include, vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely near live electrical apparatus by a non-electrical worker)

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment 9.1)

Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment
intervention. It is the Industry’s preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accord with Industry and, Regulatory policy in this regard.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Activities associated with normal every day work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its ‘richness’. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practiced. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required to demonstrate competency in this unit

9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated on at least two occasions in accordance with the “Assessment Guidelines – UET12”. Evidence shall also comprise:

- A representative body of Performance Criteria demonstrated within the timeframes typically expected of the discipline,
work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:

- Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and

- Apply sustainable energy principles and practices as specified in the Performance Criteria and range; and

- Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner’s performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and

- Demonstrate an appropriate level of employability skills; and

- Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and

- Demonstrated performance across a representative range of contexts from the prescribed items below:

### Context of and specific resources for assessment

9.3) This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual work near live electrical apparatus.

In addition to the resources listed above, in context of and specific resources for assessment, evidence should show demonstrated

competency working below ground, in limited spaces, with different structural/construction types and method and in a variety of environments.

Method of assessment 9.4)

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:
Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with other units 9.5)

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to safe working so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical Apparatus.

Work functions that may be performed, such as vegetation control, operation of cranes, elevating work platforms, excavators, concrete pumps etc, scaffolding,
RANGE STATEMENT

rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker/

Working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker including an understanding of risk assessment control measures that encompass job safety assessment but excluding any work that is or may be performed by other competent operatives within the defined “safe working zone”.

Safe use of plant, equipment and tools within electrical environments including but not limited by the electricity supply infrastructure assets, infrastructure constructions and excavations including an understanding of safe approach distances zones/Safe Working Clearance, work permit(s) and/or access authorisation permits, technical standards and Industry Guidelines, rural applications, road construction, pavements and effect of inclement weather

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

- Appropriate and relevant persons
- Appropriate authorities
- Assessing risk
- Authorisation
- Drawings and specifications
- Emergency
- Established procedures
- Hazards
- Identifying hazards
- Legislation
- Notification
- OHS practices
- OHS issues
- Permits and/or permits to work
- Work clearance systems

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers the performance of rescue procedures from an Elevating Work Platform (EWP) in the work place. It specifies the mandatory requirements of rescue from a raised EWP by a work party member on the ground and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Application of the Unit

2) This competency standard unit shall be selected as part of an endorsed skill set for the purposes of refresher training and/or to meet regulatory and/or network requirements.

Delivery and assessment of this unit should be undertaken within regard to the requirements of License to Practice (1.2 above), Prerequisite Competencies and Literacy and Numeracy skills (2 above) and the recommendations for concurrent assessment and relationship with other units (9.5 below).
Practice in the workplace and during training is also subject to regulations directly related to occupational health and safety and where applicable contracts of training such as apprenticeships.

Note:

1. Compliance with permits may be required in various jurisdictions and typically relates to the operation of plant, machinery and equipment such as elevating work platforms, powder operated fixing tools, power operated tools, vehicles, road signage and traffic control and lifting equipment. Permits may also be required for some work environments such as confined spaces, working aloft, near live electrical apparatus and site rehabilitation.

2. Compliance may be required in various jurisdictions relating to currency in First Aid, confined space, lifting, risk safety measures etc.

**Licensing/Regulatory Information**

License to practice 3)

The skills and knowledge described in this unit may require a licence/registration to practice in the workplace subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

ESI employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

**Pre-Requisites**

Prerequisite Unit(s) 4)

Competencies 4.1)
Prerequisite Unit(s) 4)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must be have been completed.

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 “Literacy and Numeracy”

Reading 3  Writing 3  Numeracy 3

Employability Skills Information

Employability Skills 5)

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit. Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Prepare to perform EWP rescue procedures | 1.1 Instruction in hazards and risk control measures for specific work areas and work activities are identified and obtained. (This will include the risk assessment and control measures taken by the individual performing the rescue).  
1.2 Tools and emergency equipment are checked for safety, functionality and placed in an accessible location to facilitate response and rescue according to established procedures. |
| 2 Carry out EWP rescue procedure | 2.1 Workplace procedures and work instructions for controlling risk are followed.  
2.2 Workplace procedures for removing the victim, where necessary, from contact with or in vicinity of live apparatus and lowering the EWP to the ground are followed.  
2.3 Workplace procedures for removing the victim from the EWP are followed.  
2.4 Workplace procedures for carrying out CPR if required at the site and treatment where necessary by medical professionals are followed.  
2.5 The worksite is secured and entry controlled until appropriate authorities inspect and release the site. |
| 3 Complete the EWP rescue procedure | 3.1 Processes for reporting accidents and/or incidents to authorised personnel are confirmed in accordance with established procedures. |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of performing EWP rescue procedure.
REQUIRED SKILLS AND KNOWLEDGE

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TRF03B EWP Rescue

Evidence shall show an understanding of EWP rescue to an extent indicated by the following aspects:

T1 Emergency procedures for the EWP rescue of a victim encompassing:
- Inspection of rescue equipment
- Assessing hazards to rescuer, victim and others
- Isolation procedures where appropriate
- Knowledge of Safe Approach Distances (SAD’s) appropriate to EWP Rescue
- Involvement of external emergency services
- Emergency retrieval systems

T2 Emergency procedures for the skills required to undertake EWP rescue of a victim encompassing:
- Placement of rescue equipment
- Controlling hazards to rescuer, victim and others
- Maintaining Safe Approach Distances (SAD’s) appropriate to EWP Rescue
- Practical demonstration of rescuing a person
- Removing victim to safe location / place of safety

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment

9.1) In accordance with the National Refresher Training Recognition Protocol for the Electricity Supply Industry, this unit is identified as a Refresher Training unit and is only available for use by industry to meet industry protocols and regulatory requirements.
Industry has defined Refresher Training as:

“A competency confirmation event which may include training, the purpose of which is to compensate for or prevent deterioration in a previously achieved standard of performance”

Under the protocol and the applicable State or Territory legislative and regulatory requirements, Electricity Supply Industry employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

Industry accepts that opportunities to practice emergency procedures are generally restricted to simulated exercises in a controlled environment during competency confirmation programs.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments.

An industry endorsed Learning Assessment Plan (LAP) has been developed to support this unit.

### Critical aspects of evidence required to demonstrate competency in this unit

9.2) 

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated at each competency confirmation event.

- In accordance with State and Territory regulations and the “Assessment Guidelines – UET12”. Evidence shall also comprise:
• Performance demonstrated within the timeframes typically expected of the rescue procedure. In particular the assessment of this unit shall confirm that a candidate is able to:

• Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and

• Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner’s performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and

• Demonstrate an appropriate level of employability skills; and

• Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and

• Demonstrated performance across a representative range of contexts from the prescribed items below:

Context of and specific resources for assessment  

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual performance of EWP rescue procedures in the workplace.

In addition to the resources listed above, in Context of and specific resources for assessment, evidence should show demonstrated competency working in realistic environment and a variety of conditions.

Method of assessment  

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with other units  

9.5)
For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to EWP rescue procedures in the workplace and will include the following:

Applying work procedures and instructions as they apply to risk control and personal safety measures.

Inspection and function of emergency equipment to facilitate a prompt response and rescue from a raised EWP.

Accessing emergency lowering device in accordance with mobile equipment instructions/workplace procedures.

Removing the victim from contact with or in vicinity of live apparatus where necessary in accordance with workplace procedures.

Operation of emergency lowering device in accordance with mobile equipment instructions/workplace procedures.

Lowering the basket to the ground, removing the victim from the basket and performing CPR if required, in accordance with workplace procedures.

Facilitating treatment by medical professionals when and where required

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

Overview of Assessment

9.1)

In accordance with the National Refresher Training Recognition Protocol for the Electricity Supply Industry, this unit is identified as a Refresher Training unit and is only available for use by industry to meet industry protocols and regulatory requirements.

Industry has defined Refresher Training as:

“A competency confirmation event which may include training, the purpose of which is to compensate for or prevent deterioration in a previously achieved standard of performance”

Under the protocol and the applicable State or Territory legislative and regulatory requirements, Electricity Supply Industry employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

Industry accepts that opportunities to practice emergency procedures are generally restricted to simulated exercises in a controlled environment during competency confirmation programs.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the
most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments.

An industry endorsed Learning Assessment Plan (LAP) has been developed to support this unit.

Critical aspects of evidence required to demonstrate competency in this unit

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated at each competency confirmation event.

- In accordance with State and Territory regulations and the “Assessment Guidelines – UET12”. Evidence shall also comprise:
  - A performance demonstrated within the timeframes typically expected of the rescue procedure. In particular the assessment of this unit shall confirm that a candidate is able to:
  - Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and
  - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner’s performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and
  - Demonstrate an appropriate level of employability skills; and
  - Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and
- Demonstrated performance across a representative range of contexts from the prescribed items below:

<table>
<thead>
<tr>
<th>Group No</th>
<th>The minimum number of items on which skill is to be demonstrated</th>
<th>Item List</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>All, to the satisfaction of the assessor</td>
<td>Accessing, inspecting, securing and attaching emergency descent equipment to self in accordance with workplace procedures</td>
</tr>
<tr>
<td>B</td>
<td>All, to the satisfaction of the assessor</td>
<td>Evacuating the EWP and descending to the ground in accordance with workplace procedures</td>
</tr>
</tbody>
</table>

### Context of and specific resources for assessment

9.3) This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual performance of EWP controlled descent escape procedures in the workplace.

In addition to the resources listed above, in Context of and specific resources for assessment, evidence should show demonstrated competency working in a realistic environment and a variety of conditions.

### Method of assessment

9.4)
This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:
Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with other units

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to performing EWP controlled descent escape procedures in the workplace and will include the following:

Inspection of rescue equipment to facilitate a controlled descent from a EWP.

Applying work procedures and instructions as they apply to risk control and personal safety measures.

Accessing, securing and attaching the lowering device to self in accordance with workplace procedures.

Lowering self to the ground from the raised EWP.

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:
RANGE STATEMENT

- Appropriate and relevant persons
- Assessing risk
- Assessment
- Authorisation
- Emergency
- Established procedures
- Fall prevention
- Hazards
- Identifying hazards
- Inspect
- Legislation
- Notification
- OHS practices
- OHS issues
- Permits and/or permits to work
- Personnel
- Requirements
- Testing procedures
- Work clearance systems

</tr>
</tbody>
</table>

Description

This skill set prepares individuals working in the rural and land management sector who are required to consult with stakeholders and design and develop pest management plans.

Pathways Information

These units of competency provide credit towards AHC30318 Certificate III in Rural and Environmental Pest Management and AHC41716 Certificate IV in Pest Management.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCPMG306 Determine pest control techniques
- AHCPMG409 Implement a pest management plan
- AHCPMG412 Develop a pest management plan
- AHCPMG413 Define the pest problem
- BSBPMG418 Apply project stakeholder engagement techniques

Target Group

This skill set is for individuals who are:

- Authorised Control Officers in NSW and the ACT
- Agency biosecurity officers
- Local government officers
- Land owners
- Land managers.

**Suggested words for Statement of Attainment**

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meets the industry standards for applying a strategic planning approach to the principles of integrated pest management.

<td>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to AHCSS00026 Advanced Chemical Spray Application Skill Set. Unit codes and titles amended.</td>
</tr>
</tbody>
</table>

Description

This skill set provides the skills and knowledge required to interpret weather conditions, plan and develop procedures, transport, handle and store chemicals and implement chemicals and monitor the safe application of chemicals using machinery and equipment.

Pathways Information

These units of competency provide credit towards a large number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including but not limited to AHC40116 Certificate IV in Agriculture and AHC40316 Certificate IV in Production Horticulture.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCHM304 Transport and store chemicals
- AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases
- AHCCHM404 Develop procedures to minimise risks in the use of chemicals
- AHCCHM405 Plan and implement a chemical use program
- AHCMOM315 Operate chemical application machinery and equipment
- AHCWRK302 Monitor weather conditions
Target Group

This skill set is for individuals responsible for planning, risk management and application tasks associated with the spray application of chemicals used in primary production.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture, Conservation and Land Management Training Package meet the industry requirements for those responsible for planning and risk management associated with the spray application of chemicals in primary production.
AHCSS00074 Agricultural Chemical Skill Set

<td>Release 1</td>
<td>This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to AHCSS00027 Agricultural Chemical Skill Set. Minor editing changes.</td>
</tr>
</tbody>
</table>

Description

This skill set describes the skills and knowledge required to transport, handle, store, prepare and apply chemicals.

Pathways Information

These units of competency provide credit towards qualifications in Certificate II, Certificate III and Certificate IV in various sectors of the horticulture and agriculture industry including the following broad industries:

- Production Agriculture
- Production Horticulture
- Amenity Horticulture (Arboriculture, Parks and Gardens, Landscaping)
- Nursery Production and Retail
- Turf Management
- Animal Breeding and Racing
- Beekeeping
- Pest Management (Vertebrate, Weeds and Invertebrate)
- Conservation and Land Management (Lands, Parks and Wildlife, Natural Area Restoration)
- Irrigation
- Indigenous Land Management.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.
Skill Set Requirements

- AHCCCHM304 Transport and store chemicals
- AHCCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Target Group

This skill set is for individuals responsible for applying agricultural chemicals.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet state/territory licensing requirements for the application of agricultural chemicals.
AHCSS00075 Basic Beekeeping Skill Set

Modification History

<tbody>
<tr>
<td>Release 1</td>
<td>This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to AHCSS00028 Basic Introduction to Beekeeping Skill Set. Minor edits.</td>
</tr>
</tbody>
</table>

Description

This skill set describes the basic skills and knowledge required to operate a beehive or small apiary.

Pathways Information

These units of competency provide credit toward the AHC31818 Certificate III in Beekeeping.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK203 Open and reassemble a beehive
- AHCBEK205 Prepare and use a bee smoker
- AHCBEK206 Assemble and maintain beekeeping components
- AHCBEK302 Manipulate honey bee brood
- AHCBEK304 Remove a honey crop from a hive
- AHCBEK313 Manage pests and disease within a honey bee colony

Target Group

This skill set is for entry level workers in the beekeeping industry and for hobbyist beekeepers.
Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the basic requirements for the maintenance and monitoring of beehives.
AHCSS00076 Australian Native Stingless Bees Skill Set
