Assessment Requirements for AHCPRK204 Care for weaner pigs

Modification History

<table>
<thead>
<tr>
<th>Release</th>
<th>TP Version</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>AHCv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare accommodation for weaners
- carry out weaner pig operations
- transition weaners to grower facility
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, characteristics, requirements and care of weaner pigs
- types, functions, characteristics, cleaning and maintenance of relevant pig accommodation and production installations and equipment, such as feeders and drinkers
- range, effects and impacts of ventilation, temperature, humidity and other environmental parameters on weaner pig health and welfare
- optimal range of values for ventilation, temperature, humidity and other environmental parameters for weaner pigs and methods for measuring these values
- requirements and components of enterprise work routines for weaner pigs
- techniques and methods for humane handling and restraint of pigs
- requirements, methods and procedures for weaning piglets
- requirements, methods and procedures for formation of viable weaner groups, and the impacts of a viable group on individual pig health and production
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour
• nutritional requirements and methods and procedures for feeding and watering weaner pigs
• criteria and methods of assessing optimal stocking densities of weaner pigs
• criteria for assessing suitability of weaner pigs for transition to grower facilities
• requirements, methods and procedures for removal and disposal of pig carcasses
• types, uses and procedures of relevant veterinary and preventive treatments of weaner pigs
• withholding periods of veterinary chemicals and medicines and rationale for withholding periods
• types, handling, use and disposal of cleaning agents and disinfectants, work health and safety and environmental practices for these chemicals
• types of documentation and records that are required for weaner pig operations
• relevant work health and safety and biosecurity requirements and environmental practices

**Assessment Conditions**

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check and assess pig health and welfare
- provide an optimal environment for pigs
- establish and maintain hygiene
- administer medication to pigs
- remove dead or non-viable pigs
- report and complete records
- follow work health and safety procedures
- follow biosecurity procedures
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity and quarantine
- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for animal welfare of pigs
- signs of health, signs of ill health, and methods for assessing pig health and welfare
- techniques and methods for humane handling and restraint of pigs
- common diseases of pigs, treatment regimes, prevention and management strategies
- criteria for handling compromised pigs
- relevant documentation, records and reports that are required
• the types, functions and characteristics of housing, housing infrastructure and housing equipment for outdoor pigs, and the criteria and methods for determining that they are in working condition
• types, uses, handling, storage and routes of administration of commonly used vaccines, veterinary medicines and chemicals
• requirements, methods and procedures for removing and disposal of waste and debris
• procedures for conducting a post-mortem examination
• effects and impacts of individual pig health and welfare on herd health status and vice versa
• relevant work health and safety requirements and environmental practices

Assessment Conditions
Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- respond to signs of rectal prolapse
- treat rectal prolapse
- report and reduce incidence of rectal prolapse
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- signs, causes, treatment, management and prevention of rectal prolapse
- anatomy and physiology of relevant organs and tissues
- techniques and methods for humane handling and restraint of pigs for rectal prolapse
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour
- work site requirements, resources and materials for treatment of rectal prolapse
- characteristics, signs, management and control of rectal prolapse outbreaks
- relevant work health and safety requirements for treatment of rectal prolapse
- signs, causes, treatment, management and prevention of rectal strictures
- requirements, functions and procedures for setting up hospital pens
- relevant biosecurity requirements
Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to artificially inseminate pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for artificial insemination
- inseminate pigs and record data
- clean work area and equipment
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- resource and manpower requirements, biosecurity requirements, industry standards, codes of practice and procedures for artificial insemination of pigs
- relevant animal welfare practices for the conduct of artificial insemination in pigs
- procurement, transportation, handling, maintenance, storage and use of porcine semen for artificial insemination
- anatomy and physiology of reproductive organs and structures in pigs
- relevant documentation and records that are required
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas
- types, uses, maintenance, servicing and storage of equipment
- methods and procedures for cleaning and disinfection of equipment used for artificial insemination
- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- work health and safety and biosecurity requirements and environmental practices

**Assessment Conditions**

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessments must be conducted on live animals.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- determine feed rations and schedules
- manage storage of feed
- supervise feeding
- implement work health and safety policies
- implement biosecurity policies
- implement animal welfare policies
- implement environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles of nutrition, feeding strategies and feeding management of pigs
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of pigs
- types, forms and characteristics of pig feeds
- correlation and application of nutritional test results in formulating feeding strategies and feeding plans
- criteria, requirements, types of and principal considerations for feed storage
- features, criteria and requirements for formulating a feeding plan
- requirements, methods and procedures for collecting, preparing and transporting feed samples for testing
- types, calibration and use of measuring equipment
- relevant work health and safety requirements and selection, use and maintenance of personal protective equipment
Assessment Requirements for AHCPK401 Implement a feeding strategy for pig production

- requirements, types and maintenance of potable water supplies to pigs
- signs of health, ill health, good condition and poor condition in livestock, and methods for assessing pig health and condition in relation to nutrition and feeding
- possible production changes in relation to changes in nutrition, feeds and feeding strategies
- types of and disposal methods for organic and non-organic waste
- relevant documentation and records that are required
- relevant animal welfare and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

This unit of competency describes the skills and knowledge required to maintain outdoor pig production environment.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify components of production environment and work required
- check and maintain outdoor pig housing and infrastructure
- carry out manure, effluent and waste operations
- check and maintain production environmental conditions
- complete records
- implement work health and safety policies
- implement biosecurity policies
- implement environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- relevant legislation, codes of practice, industry standards and guidelines for outdoor pig production environments
- characteristics, features and use of environment management plans and nutrient management plans
- regulatory requirements, codes of practice, guidelines, industry standards and enterprise policies for biosecurity
- components of outdoor pig production environment and their effects, impacts, maintenance programs, mitigation measures and protection measures
- relevant regulatory, industry and enterprise work health and safety requirements, codes of practice and standards
- types, functions, characteristics, cleaning and maintenance of relevant outdoor pig housing and production installations and equipment, such as fencing, feeders and drinkers
• requirements, methods and procedures for manure and litter removal and treatment
• types, characteristics, functions, operation and maintenance of effluent storage and treatment systems
• requirements, methods and procedures for waste removal and disposal
• significance, effects and control measures for chemicals, gaseous emissions and odours that impact on the production environment and surrounding community
• relevant documentation, records and reports that are required
• relevant environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- conduct erosion and sediment control activities as instructed by a supervisor
- identify hazards and follow safe operating procedures
- identify erosion and sediment control structures, measures and practices
- carry out routine work with control measures and structures
- identify areas at risk of erosion
- operate or use machinery tools and equipment required for the tasks involved safely and efficiently

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the need for erosion and sediment control, including:
  - the cost of erosion and sedimentation to the community
  - the effect of loss of habitat
  - how water quality is affected
  - how soil erosion can cause loss of production, assets and amenities
  - re-occurring maintenance, repair and monitoring requirements for controls
  - agents and processes of erosion and sedimentation and ways to control them
  - types of erosion and sediment control structures and techniques for constructing them
  - role of vegetation in erosion control
  - basic catchment issues
  - characteristics of soils with an emphasis on erodible soils
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- prepare for construction according to construction plans and enterprise requirements
- carry out planned earthworks, minimising damage to natural areas
- apply finishing techniques
- read maps and plans to identify and peg out construction sites
- identify work site, site indicators and survey pegs
- determine soil properties and types
- use specialist earthmoving equipment relevant to the task
- follow work health and safety policies and procedures in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- erosion and sediment control standards
- soils and soil formation
- principles of conservation earthwork construction and erosion and sediment control including:
  - catchment management and soils
  - earthmoving principles
  - levels and levelling
  - natural area protection (including topsoil) and rehabilitation
  - design
  - natural area protection (particularly topsoil) and rehabilitation principles
- types and application of personal protective equipment
• application of legislation and regulations relating to own role in conservation earthwork construction
• enterprise work health and safety procedures
• risk factors including human health and environmental damage
• environmental impacts and controls for constructing conservation earthworks

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- construct, install and maintain a range of erosion and sediment control measures
- identify hazards and implement safe work procedures
- prepare for implementation and construction
- read and follow plans to carry out implementation and construction
- identify survey pegs and site indicators on site and on the plans
- carry out repairs and maintenance procedures to enterprise standards
- select equipment and materials appropriate for the task
- operate equipment and machinery according to safe work practices and manufacturer instructions
- clean and store equipment, machinery and tools according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- materials cartage pollution control
- sequence of working and timing/duration
- work health and safety issues relating to the equipment and the site
- equipment used
- materials suitable for constructing erosion and sediment control measures and where to source them on site
- limitations of structures including timing of maintenance, structure life cycle, specifications and standards
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- set out conservation earthworks
- identify hazards and ensure the safety of self, field operators and any other person on site
- interpret plans and specifications
- relate plan to site
- measure out site dimensions precisely and peg project
- protect site

Knowledge Evidence

The candidate must demonstrate knowledge of:
- different types of survey equipment
- civil engineering and survey techniques applicable to conservation earthworks
- erosion control and design principles
- principles of native topsoil conservation and protection
- interpretation of plans and general and technical specification

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise the implementation of conservation earthworks
- identify hazards and implement safe systems of work
- plan efficient implementation of works
- protect natural areas from damage
- direct the implementation of planned works
- monitor job specifications
- identify and address risks to achieving planned outcomes
- provide information to the media, community and special interest groups about work undertaken
- providing on the job training to staff where required
- ensure work health and safety policies and procedures are adhered to by all personnel and contractors on site
- monitor application of biosecurity measures and sustainability practices in work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- erosion and sediment control standards and principles
- natural area topsoil protection and rehabilitation principles
- supervision techniques
- erosion control and design principles
- sediment control principles
- earthmoving principles
• principles for machine operation
• work sequence knowledge
• equipment most suitable to the constructing of erosion and sediment control works
• quality assurance systems, processes and practices
• staff deployment, supervision and training
• application of work health and safety and environmental legislation, codes of practice and enterprise requirements to work site

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- produce a design for erosion and sediment control measures and structures
- identify measures to be designed
- apply design procedures
- prepare specification schedule
- cost the project and provide recommendations in line with budget constraints
- use computer design programs
- determine design specifications using methods that meet industry standards
- develop design plan to meet client, organisational and regulatory requirements
- consult with management or client to confirm design meets requirements
- identify how the design applies sustainability principles

Knowledge Evidence

The candidate must demonstrate knowledge of:
- erosion control and design principles:
  - soils and soil formation
  - levels and levelling
  - earthmoving principles
  - total catchment issues
  - managing peak water flows
- subsurface and surface drainage principles and systems
- environmental issues related to the design
- the limitations of design aids provided for industry
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a plan for erosion and sediment control measures that meets regulatory requirements and industry standards
- establish suitability of development proposal to location and environment
- prepare reports on erosion and sediment control plans to enterprise standards
- develop erosion and sediment control measures consistent with industry principles and selection criteria
- prepare an erosion and sediment control plan to industry standards and to comply with relevant regulatory planning authority

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of relevant environmental, planning and groundwater legislation in erosion and sediment control work
- planning process for erosion and sediment control
- erosion control and design principles:
  - soils and soil formation
  - levels and levelling
  - earthmoving principles
  - total catchment issues
  - how to manage peak water flows
  - subsurface and surface drainage principles and systems
• permits or consents potentially required for developing erosion and sediment control structures
• environmental issues related to erosion and sediment
• awareness of the limitations of design aids provided for industry
• work health and safety implications of implementing plans

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a plan of conservation earthworks that meets client needs, conforms to industry standards and complies with legislation and policy requirements
- establish client needs through consultation
- carry out site investigations using surveys, aerial photographs and maps
- negotiate agreed project outcomes
- explain legislation and policies that may impact on the project to the landholder
- develop a strategy to protect natural areas consistent with industry principles and that comply with regulatory requirements
- develop the strategy to utilise earthworks consistent with industry principles and that comply with regulatory requirements
- prepare detailed project costing that meets client’s budget
- prepare a detailed works plan
- communicate design requirements to designer to achieve desired outcomes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how relevant environmental, planning and groundwater legislation impacts on the development of conservation earthworks planning
- environmental, planning and earthwork construction standards and Codes of Practice relevant to planning conservation earthworks projects
- earthwork structures
- erosion control and design principles
- natural areas (particularly topsoil) protection and rehabilitation principles
- soils and soil formation
- levels and levelling survey plans and titles
- earthmoving principles
- total catchment issues
- land use and land development strategies
- environmental issues
- how to manage peak water flows
- subsurface and surface drainage principles and systems
- limitations of design aids provided for industry

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for cultivation
- complete pre- and post-operational checks on tools, vehicles and equipment
- interpret production or planting plans
- produce standards, quality specifications and work procedure documents
- measure materials and site plan specifications
- cultivate soil in accordance with paddock cultivation plans
- service, operate, adjust and calibrate cultivation equipment safely
- complete records and documentation accurately and promptly

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing land for seed crop production
  - pre-planting treatments, their purpose and method of application
  - environmental issues of cultivating soil for planting, such as drainage and irrigation systems, soil amelioration and waste disposal procedures
  - methods of cultivating a range of soil types
  - operation and maintenance of planting equipment
  - procedures and standards for certified seed
  - work health and safety guidelines, procedures and principles, including manual handling and exposure to hazardous substances
Assessment Conditions

Assessors must satisfy current standards for RTOs.

### Element | Performance criteria
--- | ---
1.3 | Identify existing and potential work health and safety hazards in the workplace, assess and control risks
2. Prepare for seed crop establishment | 2.1 Monitor soil and weather conditions for optimal seeding conditions  
2.2 Recognise and confirm soil conservation and sustainable land management practices and procedures  
2.3 Prepare, to seed certification specifications, seeding, fertiliser and pest and weed control requirements  
2.4 Prepare contingency plans for unusual seasonal conditions
3. Sow the crop | 3.1 Select, use and maintain suitable personal protective equipment  
3.2 Undertake seeding and fertiliser applications  
3.4 Coordinate pest and weed control treatment with seeding and fertiliser applications  
3.5 Identify environmental implications associated with sowing operations, assess impacts and adopt procedures
4. Complete seeding operations | 4.1 Maintain seeding, machinery and equipment operation records  
4.2 Report machinery and equipment damage, malfunctions or irregular performance  
4.3 Clean, secure and store machinery and equipment in line with manufacturer specifications and seed certification requirements

### Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

### Unit Mapping Information
This unit is equivalent to AHCSDP302A Establish seed crops.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- carry out sowing operation and fertiliser application
- carry out tillage and apply pre-planting treatments
- clean, secure and store machinery and equipment
- keep records of the sowing operation
- monitoring the environmental impacts of establishing the crop
- prepare and service machinery and equipment

Knowledge Evidence
The candidate must demonstrate knowledge of:
- principles and practices of seed crop establishment
  - effects of weather conditions (normal and adverse) on seeding and fertilising applications
  - enterprise policies with regard to seeding operations, and recording and reporting routines
  - fertiliser types, rates of application and crop nutrient requirements
  - operating principles and operating methods for machinery and equipment
  - positive environmental practices, negative environmental impacts and minimisation measures associated with seeding operations
  - personal protective equipment (PPE) and when and how it should be used
  - pre-operational and safety checks, servicing and maintenance procedures for seeding machinery and equipment
  - principles of weight distribution with regard to load shifting and vehicle movement
  - procedures for cleaning, securing and storing machinery, equipment and materials
• record keeping for certified seed
• relevant state/territory legislation and regulations with regard to licensing requirements and the use and control of machinery and equipment
• relevant state/territory legislation, regulations and codes of practice with regard to workplace health and safety and the use and control of hazardous substances
• seed crop types, preparation of seeds, seeding methods and application techniques
• sustainable land management and soil conservation techniques

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to maintain seed crops. It applies to workers on properties where commercial seed production is undertaken. Workers operate with some judgement and discretion and work would normally be carried out under minimal supervision within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SPD)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement pest and disease control strategies
- monitor crops for levels of pests and diseases and moisture
- monitor the health and maturity of the crop
- complete records and documentation accurately and promptly

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop maintenance
  - appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
  - contractor machinery cleanliness
  - environmental impacts associated with the operation of machinery and equipment in a harvesting context
  - general machine maintenance procedures
  - hygiene requirements for agricultural crops and equipment that comes into contact with the crop
  - machinery operating principles and safe operating methods
  - organisation recording and reporting procedures
  - potential hazards associated with the operation of basic tools and equipment
  - signs of pest and disease infestation (such as bacterial wilt in lucerne), moisture stress and nutrient deficiencies
  - symptoms of crop lacking health and vigour
• types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical)
• work health and safety and pesticides legislative and enterprise requirements

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- complete pre and post operational checks on tools, harvesting machinery and equipment
- handle and manoeuvre harvesting equipment
- monitor efficiency of harvesting equipment and make adjustments to height and other settings
- perform routine safety, service and maintenance procedures on tools, harvesting machinery and equipment
- sample crops to assess moisture content and maturity/ripeness of the crop
- transport, clean and store harvesting equipment
- complete records and documentation accurately and promptly

Knowledge Evidence
The candidate must demonstrate knowledge of:
- principles and practices of seed crop harvesting
  - appropriate legislative requirements, manufacturer’s instructions and organisation procedures/instructions
  - certified seed procedures
  - environmental impacts associated with the operation of machinery and equipment in a harvesting context
  - fire prevention strategies
  - general machine maintenance procedures
  - hygiene procedures for harvesting machinery and equipment
  - machinery operating principles and operating methods
• organisation moisture and hygiene requirements for the crop and equipment that comes into contact with the crop such as bins, augers, trucks and harvesters
• organisation recording and reporting procedures
• pests and signs of pest infestation in the crop
• potential hazards and safe operating procedures for basic tools and equipment
• pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
• requirements for harvesting machinery and equipment transport
• safe operating procedures and standards for harvesting and ancillary equipment
• seed quality and the impact of harvesting practices (such as on lucerne seed)

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess site factors
- determine resources and equipment for planting and post-planting care
- identify threats to pasture establishment including weeds, pests and diseases
- select suitable pasture species and cultivars

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for planning seed crop establishment
  - environmental impacts of seed crop establishment
  - establishment techniques of specific seed crop species and cultivars
  - maintenance requirements and practices for specific seed crop species and cultivars after initial establishment
- planning process, including costing and scheduling of works
- plant identification of seed crops and weed species
- role of crops in sustainable land use
- seed crop varieties and their characteristics, requirements and production potential
- seed production contracts
- the advantages and disadvantages of seed crop establishment procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine planting scheduling for planting and the key responsibilities for preparatory and implementation processes
- carry out pest, weed and disease control either pre- or post-planting if required
- identify the seasonal conditions which affect crop establishment
- plan the planting operation including timing and resources required
- supervise staff and monitor the planting operation
- monitor the planting operation
- adjust the planting plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for supervising seed crop production
  - crop establishment requirements
  - environmental controls and codes of practice applicable to the enterprise
  - equipment servicing requirements
  - integrated pest and weed management techniques
  - legislation, codes of practice and enterprise procedures for workplace health and safety and environmental management
  - management practices and processes to minimise environmental impacts such as noise, soil degradation and debris from planting operations
  - Plant Breeder’s Rights and open market seed
the equipment that is required for a range of tillage methods, and pest and weed control prior to planting

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange storage and delivery requirements
- assess crop maturity and quality in readiness for harvesting
- establish strategies, procedures and controls for crop harvesting, including fire prevention and control plans
- estimate crop yields
- maintain budgetary controls
- negotiate and arrange contracts and agreements
- segregate grain for quality and monitor for moisture content

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop harvesting
  - crop maturity and yield potential
  - crop measurement techniques and parameters
  - environmental controls and codes of practice applicable to harvesting operations
  - functions and limitations of harvesting equipment
  - grain or seed quality
  - hygiene requirements for certified seed
  - location and relative skills and abilities of available contractors
  - market information and sources
  - relevant legislation, codes of practice and enterprise requirements for work health and safety, contractor engagement, environment and pesticides
- supervisor responsibilities in managing the safety of a workplace
- weather conditions which may affect the harvest

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to undertake a field inspection and prepare a report on a commercial seed production crop. It applies to workers on properties where commercial seed production is undertaken.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SPD)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for a field inspection
- visually analyse a commercial seed crop
- complete a crop inspection report
- classify seed to species and/or variety level
- update seed reference collection
- use taxonomic terms to describe seed
- carry out decontamination prior to leaving a site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop inspection
  - concepts of disease pressure
  - concepts of pest pressure
  - crop sampling techniques and use of quadrats
  - crop/seed certification systems for example Organisation for Economic Co-operation and Development (OECD), Australian Seed Authority (ASA)
  - field inspectors reports
  - hygiene requirements for crop inspectors
  - plant breeders’ rights
  - relevant health, safety and environment requirements
  - requirements of Australian Quarantine Inspection service (AQIS) and AQIS Authorised Officers (AAO) phytosanitary reports
Assessment Conditions

Assessors must satisfy current standards for RTOs.

- calculate weights and percentages
- cut and grind seeds
- determine the moisture content of seeds for routine use by an oven method
- prepare working samples
- weigh containers and seed samples
- calculate and report results

Knowledge Evidence

The candidate must demonstrate knowledge of:
- apparatus used in seed moisture testing
- enterprise and/or legal traceability requirements
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to performing germination tests on a seed sample under laboratory conditions. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Prepare for seed germination testing
- Assess seed germination
- Perform germination tests on a seed sample under laboratory conditions
- Prepare growing media
- Record and report test results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Assessment of germination and determining need for retesting
- Calculations, tolerances and rounding results
- Enterprise and/or legal traceability requirements
- Enterprise standard operating procedures (SOPs)
- Relevant health, safety and environment requirements
- Seed biology
- The role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain and monitor a quarantine approved laboratory that meet Department of Agriculture (DA) certification
- initiate appropriate action to rectify potential problems or instances of non-compliance
- keep required records complete, current and secure as required by DA
- design and negotiate changes to work processes and procedures to meet DA compliance
- provide coaching and mentoring support to laboratory personnel to change work practices
- provide information to laboratory staff on DA compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- DA requirements for a quarantine approved laboratory
- compliant laboratory systems, records and reporting procedures
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements
- statutory and legal compliance requirements
- coaching and mentoring strategies

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle and store quarantinable seeds
- maintain records and documentation relating to DA compliance
- redesign work procedures to prevent reoccurrence of non-compliance
- report non-compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- DA requirements required for handling and storing quarantinable seeds
- laboratory systems, records and reporting procedures for dealing with quarantinable seeds
- relevant work health, safety and environment requirements
- statutory and legal compliance requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out an internal audit in a seed testing laboratory. It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and they analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare an audit plan and strategy for a seed testing laboratory audit
- gather data and information by a variety of methods
- undertake an internal audit in a seed testing laboratory
- prepare an audit report for management review
- develop a continuous improvement report with suggested corrective actions

Knowledge Evidence

The candidate must demonstrate knowledge of:

- auditing methods and techniques
- enterprise standard operating procedures (SOPs)
- relevant legislation affecting business operation
- seed testing techniques, equipment and methodologies
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate variance, standard deviation and coefficient of variance
- determine the weight per 1000 pure seeds from a submitted sample
- prepare and weigh replicates
- report results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- apparatus for weighing, counting and dividing seed samples
- calculations such as variance, standard deviation and coefficient of variance
- concepts of metrology
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements
- role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing
- seed biology

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify potential and existing hazards to the supervisor
- select and use equipment and materials appropriate for crutching sheep
- avoid contamination, second cuts and damage to wool, animals and people
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain crutching equipment, site and facilities
- communicate problems, faults and workplace hazards to the owner or overseer
- tally crutched sheep count
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- Enterprise biosecurity policies applying to the job role
- Work health and safety legislation and codes of practice applying to the job role
- Animal welfare legislation and codes of practice applying to the job role

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- select and load comb and cutter for shearing
- prepare combs, cutters, handpieces and downtubes for shearing
- lubricate and maintain handpiece and downtube
- carry out minor maintenance and repairs
- recognise and clearly report any work health and safety hazards to the appropriate person

Knowledge Evidence

The candidate must demonstrate knowledge of:

- components of a shearing handpiece
- components of a downtube
- terminology for handpieces and downtubes
- maintenance and lubrication procedures for shearing equipment and handpieces
- types of combs and cutters to use under different conditions
- work health and safety legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- select and operate equipment appropriate to shearing tasks
- shear goats using industry accepted methods and procedures
- avoid contamination, second cuts and damage to fleece, goats and people
- appropriately treat injured goats
- handle goats with due care
- maintain safe and hazard-free equipment
- effectively communicate with supervisor
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare, biosecurity policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- components and functions of shearing equipment and machinery
- industry accepted handling and shearing techniques and positions
- basic goat anatomy and behavioural characteristics as they impact on shearing of goats
- common goat diseases and treatments as they impact on work health and safety and humane treatment of goats
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role
Assessment Conditions
Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing alpacas.

The candidate must provide evidence that they can:

- identify hazards, apply safe work practices and maintaining safe and hazard-free equipment
- select, set up and operate equipment appropriate to shearing tasks
- position alpaca and restrain for shearer safety
- handle and shear alpacas with due care using industry-accepted methods and procedures
- appropriately treat injured alpacas
- avoid contamination, second cuts and damage to fleece, alpacas and people
- demonstrate safe and environmentally responsible workplace practices
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare and biosecurity policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic alpaca anatomy and behavioural characteristics as they impact on shearing of alpaca
- common goat diseases and treatments as they impact on work health and safety and humane treatment of goats
- components and functions of shearing equipment and machinery
- industry-accepted handling and shearing techniques and positions

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safety directions
- select, prepare and use tools equipment and materials appropriate for shearing sheep work
- ensure health and fitness for shearing
- avoid contamination, second cuts and damage to wool, sheep and people
- catch and shear a sheep in line with organisational, animal welfare and work health safety standards
- demonstrate safe and responsible workplace practices
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing and crutching techniques, and positions and method of shearing
- features of safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe, humane removal of wool
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- animal welfare requirements in relation to sheep
- personal protective clothing and equipment and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- work health and safety legislation and codes of practice apply to the job role
- animal welfare legislation and codes of practice apply to the job role

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed preparing livestock for shearing.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- select equipment appropriate to crutching and shearing tasks
- organise crutching and shearing operations
- muster, move, draft and handle livestock in compliance with animal welfare requirements
- observe and monitor livestock health and condition and detect disease or nutritional disorders and treat appropriately
- organise feed and water supplies
- avoid and remove contamination of fleece
- demonstrate safe and environmentally responsible workplace practices
- communicate verbally with work team and manager
- calculate livestock numbers, keep mobs separate
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types and purposes of shearing boards, yards and catching pens
- components and functions of shearing, cleaning and drenching equipment
- handling, mustering and movement techniques
• livestock breeds, nutritional and hygiene requirements
• possible fleece contaminants and types of pigmentation faults
• biosecurity legislation and codes of practice applying to the job role
• work health and safety legislation and codes of practice applying to the job role
• animal welfare legislation and codes of practice applying to the job role

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed preparing combs and cutters for machine shearing.

The candidate must provide evidence that they can:
- identify hazards and apply safe operating procedures to grinding
- determine need for sharpening combs and cutters
- determine need for dressing combs
- prepare grinder and pendulum for use
- carry out grinding
- set, store and care for grinding papers
- dress combs, including selecting bevels, teeth thinning and polishing

Knowledge Evidence

The candidate must demonstrate knowledge of:
- different types of combs and cutters
- terminology, techniques and procedures for grinding combs and cutters
- tools and equipment used in grinding combs, and cutters and dressing combs
- hazard identification and risk control

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to maintain and service shearing handpieces as part of a shearing operation.

All work must be carried out to comply with workplace procedures and work health and safety requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 120 adult merino sheep or 140 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- identify hazards and work safely
- avoid contamination, second cuts and injury to animals
- shear sufficient sheep within eight hours to match skill level of a professional shearer
- analyse and increase on improver shearer level
- shear with the industry accepted pattern
- use appropriate suturing for cuts to sheep
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- apply enterprise workplace health and safety policies in the context of own work
- apply enterprise biosecurity policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
• the impacts of sheep behaviour on moving and handling sheep and shearing sheep
• Federal and/or State shearing awards and agreements associated with shearing sheep
• enterprise biosecurity policies applying to the job role
• work health and safety legislation and codes of practice applying to the job role
• animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed maintaining shearing control, coordination and rhythm over a working day.

The candidate must provide evidence that they can:
- identify hazards and implement risk controls
- maintain optimum shearing output by correct preparation and set up of equipment
- maintain application of improved techniques
- maintain speed and accuracy
- assess and monitor the shearing conditions and environment to maintain shearing performance
- maintain control, coordination, rhythm and output during shearing

Knowledge Evidence

The candidate must demonstrate knowledge of:
- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- aspects of safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed caring for shorn livestock.

The candidate must provide evidence that they can:
- identify existing and potential hazards implement control measures
- relate weather conditions to livestock requirements
- prepare contingency plan and anticipate emergency action
- handle livestock with due care
- weigh livestock and assess condition
- observe and monitor livestock behaviour, health and condition
- read and interpret weather information
- provide feed and water based on livestock numbers
- rug animals where required
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare and biosecurity policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:
- impacts of adverse weather conditions on shorn livestock
- physiological conditions brought on by stress post shearing, and treatment of same
- types and constructs of livestock shelter
- livestock handling techniques in response to adverse weather
- condition scoring
- appropriate types of feed for stressed livestock
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must produce a shearing work plan and ensure that all required planning and preparation for shearing has been completed.

The candidate must provide evidence that they can:

- carry out cleaning and decontamination of pens and shearing shed to industry standards
- move alpacas according to work health and safety, animal welfare and enterprise requirements
- muster and draft alpacas into pens according to enterprise and industry standards
- operate any necessary equipment to industry standards
- use industry-accepted alpaca handling techniques
- apply enterprise biosecurity policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Alpaca Industry Best Practice Standards for Harvesting of Alpaca Fibre
- elements of effective and appropriate alpaca shearing work plans
- equipment requirements for alpaca shearing
- how to clean and decontaminate sheds and pens
- industry-accepted alpaca handling and moving techniques
- relevant industry awards and conditions
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role

</tbody>
</table>

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed applying advanced shearing techniques while shearing.

The candidate must provide evidence that they can:
- identify potential and existing hazards, assess risks and implement control measures
- prepare and set up equipment to optimise shearing output
- assess and monitor a diverse range of shearing conditions and environments
- maintain control, co-ordination, rhythm, high quality performance and output during shearing
- support and encourage the performance of other shearers as part of a team and respond constructively while maintaining own output
- implement enterprise animal welfare policies in the context of own work

Knowledge Evidence
The candidate must demonstrate knowledge of:
- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- aspects of safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- common sheep diseases
- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
• work health and safety legislation and codes of practice applying to the job role
• animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to prepare a comb for shearing, or experting the comb.

All work must be carried out to comply with workplace procedures and work health and safety policies.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

<td>1.1 Identify signs of non-optimal equipment performance and remedy 1.2 Identify potential and existing work health and safety hazards and</td>
</tr>
</tbody>
</table>
### Performance criteria

Implement control measures

1.3 Confirm that the trim and finish meet the requirements of the current shearing task

1.4 Maintain control of comb and tools throughout the experting process

1.5 Adapt the comb in a form that meets individual shearing style

### Scallop comb

2.1 Recognise and apply the principles and method of scalloping

2.2 Determine the interrelationship between correctly scalloped combs and shearing performance in terms of density of wool, time of year, and breed

2.3 Scallop combs to meet the shearing style of individual shearers

### Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

### Unit Mapping Information

This unit is equivalent to AHCSHG402A Conduct equipment experting for machine shearing

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed conducting equipment experting for machine shearing.

The candidate must provide evidence that they can:

- trim and finish combs
- scallop combs
- identify work health and safety hazards and implement safe work practice

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types of combs and cutters
- trimming and finishing techniques
- tools and equipment used in experting
- scalloping techniques
- the relationship of comb preparation to shearing performance.
- work health and safety legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to take a soil sample and interpret the test results.

This unit applies to individuals whose job role includes undertaking soil or growing media sampling and interpreting the results as a foundation for further horticultural operations such as nutrition programs and irrigation scheduling.

This unit applies to individuals who analyse information and exercise judgment to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- collect soil and media samples using appropriate sampling methodology
- file and record analytic results for future use
- implement a nutrient and nutrition program
- prepare soil and media samples for dispatch to soil analysis laboratory
- receive and interpret analytic results

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices of soils sampling
  - environmental implications associated with soil surveying activities and the application of analytical results
  - practical understanding of the range of sample collection, testing and analytical methods that may be used to perform soil surveys, and the association of surveying methods with site conditions, environmental implications and intended horticultural use of the surveyed site
  - soil ameliorants and soil improvement techniques for addressing site limitations identified through surveying
- the capacity of soils to provide water to plants
- the importance of organic matter in soil in relation to the intended horticultural use
- the physical and chemical properties of soils in relation to their ability to support specified horticultural production
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse survey results
- determine soil characteristics
- identify adverse environmental impact of irrigation activities and take appropriate action
- interpret soil analyses results
- perform a soil survey
- plot topography and soil survey data on a property map

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing soil use maps
  - environmental impacts of irrigation, using water from any ground or underground source
  - methods and techniques of soil sampling
  - nutrient availability in soils
  - physical and chemical properties of soils
  - readily available water
  - soil analyses results
  - soil quality factors
  - soil types and profiles
  - soil water retention testing techniques
  - water table and salinity

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and use field and test data to identify strategies to remediate and manage the site
- complete a desktop assessment of the land for actual and potential ASS risk based on current and proposed land use, site data and compliance issues
- document an ASS management plan and effectively communicate it to the landowner, relevant consent authority and contractors
- support implementation of ASS management plan by reports on materials management and remediation and site rehabilitation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing acid sulphate soil management plans
  - ASS assessment tools
  - earthmoving principles
  - environmental impact issues
  - environmental impacts of ASS
  - environmental plans, strategies and options for management and remediation
  - managing acid leachate water flows
  - planning process for remediation and management plans
  - principles of duty of care and due diligence
  - relevant environmental, planning and groundwater legislation
  - soils and soil chemistry
  - subsurface and surface drainage principles and systems

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify particular soil properties that are relevant to the workplace and research for further enquiry
- apply information from soil testing to production and/or management plan
- develop and conduct soil improvement programs
- document the soil management plan or production plan
- interpret soil analytical data for the purposes of developing management or production plans
- review and analyse ongoing soil monitoring programs

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for managing soils for production
  - basic soil field tests
  - interpreting laboratory results
  - plant nutrition through soil management
  - soil chemical properties
  - soil conservation strategies and sustainable production techniques
  - soil physical properties
  - soil sampling techniques
  - soil types
  - techniques to ameliorate soil properties
Assessment Conditions

Assessors must satisfy current standards for RTOs.

</tr>
</tbody>
</table>

Application

This unit of competency standard covers the process of assessing soil characteristics, developing and implementing a plan to improve the health of soils, and monitoring and reviewing the results.

Soil chemistry, physical chemistry and biology are used in understanding the analysis of soil tests, and the importance of the role of soil biota in soil structure and plant nutrition. Strategies to combine improved production with improved soil biota are considered, and the opportunity to increase biodiversity by strategic use of unproductive land is covered.

Healthy soils are the basis of all sustainable land-based production systems. The principles of developing healthy soils involve improving soil structure, increasing soil macronutrients and micronutrients to optimum levels, balancing exchangeable cations, achieving optimum pH, eliminating toxic nutrient levels, and enhancing activity of soil biota.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to persons who have a role in managing a land based production business. This unit is likely to require consultation with external experts, such as pasture consultants, fertiliser representatives, contractors, extension officers from State Agricultural Departments, agronomists and producer groups.

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research information on soils
- assess soil type, texture and structure in the paddock
- diagnose areas with soil problems or potential soil problems
- diagnose and interpret soil sample test results and determine priorities for improving soil health
- consider and select alternatives including organic products and methods for improving soil health
- calculate amounts of nutrients required and prepare a fertiliser program which reflects needs and priorities
- record and store information
- develop, implement and evaluate a plan to achieve healthy soils through application of soil science
- monitor soil health from the application of soil science.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- physical, chemical and biological properties of soils
- soil biota – types, role in cycling nutrients and improving soil structure
Assessment Requirements for AHCSOL502 Manage soils to enhance sustainability

- basic chemistry concepts related to interpreting soil test analysis: symbols, elements and compounds; valency, anions, cations; reactions; EC (electrical conductivity), CEC (Cation Exchange Capacity); organic matter; pH and its importance in the availability of nutrients; role of macronutrients and micronutrients in plant nutrition. Concept of limiting factors for production
- basic biology: the chemical basis of plants and animals; basic plant structure and function; plant nutrition; water, proteins, sugar, nitrate, lignin content; extent and nature of soil micro organisms
- natural cycling of nutrients: carbon, nitrogen, phosphorous and the role of soil biota in the cycles.
- factors affecting soil biota: moisture, temperature, aeration, nutrient supply, pH, and organic matter
- possibility of problems with the use of conventional chemical fertilisers including acidification contamination of soil and associated water contamination and harm to soil biota
- alternative methods to improve soil fertility, including products and use of machinery for aeration and mulching.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency covers the development and implementation of a plan to address existing erosion problems and to prevent further erosion and sediment problems. The development of the plan will address the relevant legislation and issues associated with land disturbing projects. It requires the ability to identify and establish suitable strategies to develop, implement and monitor an erosion and sediment strategy and manage the project from implementation through to completion to achieve required outcomes.

Planning and managing erosion and sediment control measures requires a knowledge of relevant environmental, planning and ground water legislation, erosion and sediment control techniques, setting work specifications and objectives for the property or catchment system.

This unit is applicable to persons who have a role in the managing of the following land based business:

- Agricultural related industries
- Production Horticulture
- Agro- Forestry
- Natural resource management
- Roadside management and civil construction
- Extractive mining industries

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit will require consultation with external experts such as land management consultants, planning authorities, Catchment Management Authority, Landcare, State and Federal Government Departments who provide advice, contractors, neighbours and other interested groups.
No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify appropriate erosion and sediment control strategy methods
- prepare plans and reports on erosion and sediment control plans
- develop an erosion and sediment control plan
- communicate and collaborate effectively with all stakeholders for planning and conflict resolution
- implement work health and safety control measures at site work operations
- monitor, evaluate and analyse effectiveness of erosion and sediment plan outcomes
- organise required resources and key stakeholders

Knowledge Evidence

The candidate must demonstrate knowledge of:
- environment sustainability as a whole farm system approach
- environmental issues with regard to water catchment, ecosystems, habitats and waste minimisation
- relevant environmental, planning and groundwater legislation including licences and permits to implement erosion and sediment control activities
- erosion control and design principles
- planning processes for erosion and sediment control
- project and risk management techniques and tools for the management of erosion and sediment control
- soils and soil formation
- earthmoving principles
- work health and safety obligations and "Duty of Care"
• subsurface and surface drainage principles and systems

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

<th>TP Version</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>AHCv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Application

This unit of competency covers the development and management of a plan to reclaim salt affected land for profitable, sustainable agricultural production. The plan will include the assessment of the area to determine the source of the salt, the level of salinity and the extent of the infestation as well as plan to reduce flooding and the effect of water logging on the soil. The plan will recommend strategies to be used to reclaim the land. The cost of the plan will be calculated. Plant and pasture establishment and management methods will be recommended for saline sites. Management of the reclaimed area is intended to increase production and profitability. The plan will include strategies for prevention of further salinity problems and for community involvement to reduce salinity in the area.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to a person who has a role in managing the farm. This unit is likely to require consultation with a range of external institutions, groups, government departments and individuals.

No occupational licensing, legislative, regulatory or certification requirements apply to this competency at the time of publication.

Pre-requisite Unit

Soils (SOL)
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1. **Review the saline area to increase productivity**
   1.1 Map the property and determine the type and severity of the salinity and install fencing to subdivide classes of land and salt affected areas for appropriate management of each area.
   1.2 Assess area for water logging, determine the cause and recommend strategies to divert water or drain water from the area.
   1.3 Review and select suitable plant and pasture species and management options available to reclaim the saline area.
   1.4 Calculate the cost and the beneficial returns of reclaiming the area including financial, environmental and social benefits.
   1.5 Outline the management for the reclaimed area to protect it at vulnerable times of the year and certain times in the plant reproduction cycle.

2. **Develop a plan to manage water use and movement**
   2.1 Install fencing to protect the watercourses through the property.
   2.2 Test and modify salinity and pH of the water entering and leaving the property.
   2.3 Calculate the water used by the enterprise and establish targets to reduce the quantity by improving irrigation methods and general management practices.

3. **Develop a plan to protect and manage natural areas**
   3.1 Plan a strategy to protect the natural area from increased salinity and other stresses that will accelerate decline.
   3.2 Develop strategies to increase biodiversity.
   3.3 Plan to manage soil structure and fertility to improve soil biota.
   3.4 Identify review indicators and develop the long-term plan.

4. **Implement a strategy to reduce salinity in the area**
   4.1 Work with adjacent properties and relevant other authorities and community groups to reduce extent and cause of local saline areas by monitoring quality and quantity of water.
   4.2 Monitor improvements in productivity and review against current leading edge and research developments.

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Unit Mapping Information
New unit - equivalent to VBP150 Develop and manage a plan to reclaim land affected by salinity.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess land forms and soil types
- determine categories of saline land
- take soil and water samples for testing
- calculate optimum stocking rate
- identify indicator plant species
- assess the level of degradation and damage through salinity
- research the latest innovations and management techniques
- manage the crop and animal enterprise selected for the farm to utilize the saline area
- calculate the costs of the project
- calculate benefits of salinity reduction to the enterprise and the property
- work with producers and community groups

Knowledge Evidence

The candidate must demonstrate knowledge of:

- salt tolerant plant and pasture species and the management of each
- range of methods for reclaiming saline land
- strategies to profit from the saline area
- value of using natural species and natural systems to improve farm production
- benefits of biodiversity on plant production and the animal enterprise
- strategic and responsible use of susceptible land
- consequences of poor management or removal of vegetation on the land
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- assemble and operate a screen cleaner
- assess the input and outputs of the screen cleaner
- complete and report on cleaning operation
- define the processing requirements of a seed processing job
- disassemble and clean a screen cleaner
- select and place screens and prepare machinery for use

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for operating a screen cleaner
  - ball trays and their purpose
  - documentation associated with seed cleaning
  - machinery safety
  - possible contamination points
  - required maintenance and usual wear points
  - screen types and designs
  - the adjustment and effect of airflow within each of the screen cleaner's chambers
  - the correct clean down procedure
  - the different types of screen cleaners available for the task
  - types of impurities and the machine's ability to handle impurities
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify the need for a particular line of seed to be modified
- set up and prepare machinery for use
- operate seed modification machinery
- report on seed modification machinery and equipment operation

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for operating two kinds of seed modification machinery
  - safe machinery operation
  - seed biology: coleoptiles
  - damage caused to seed by modification machinery such as de-owners/clippers, scarifiers, rice huskers etc.
  - the principles of operation and the expectations and limitations, maintenance and safety associated with seed modification machinery

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to apply a range of treatments or modifications to seed using seed treatment machinery and equipment such as coating machinery and chemical treatment machinery. Workers operate with some judgement. Work would normally be carried out under minimal supervision within enterprise requirements and procedures.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- set up and prepare seed treatment machinery for use
- calculate, calibrate and measure dose rates
- formulate a chemical mix to achieve the best treatment
- operate seed treatment machinery and equipment
- complete and report on seed treatment machinery and equipment operation

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for operating seed treatment machinery
  - basics of programmable logic controller/treatment control systems and electrical process
  - chemical types and classes
  - difference between coating and pelleting [<5% weight gain film coating (insecticide/fungicide) or >5% weight gain is pelleting]
- disposal of waste chemical
- hazards of chemicals
- labelling requirements associated with coated seed
- methods of applying chemical and basic recipe formula
- methods of applying powders
- personal protective equipment (PPE)
- procedures for drying, scalping and aspiration of treated seed
- rules and regulations for storage, transportation and bunding
• the expectations and limitations of different types of seed coating machines
• the interaction of biological components and their effect on other chemicals, powders, polymers and heat
• the use and differences in biological components in seed coatings
• types of seed treatment machinery and equipment

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- label and stencil seed bags
- move and store packaged seed
- operate a pallet wrapper to shrink wrap palletised seed
- operate bag and pallet transportation systems
- operate bulk seed transportation equipment
- operate industrial sewing machines
- operate label printers and label and apply stickers and labels
- operate packaging and labelling machinery
- operate palletising equipment
- perform basic machinery maintenance
- prepare packaging
- seal seed packages
- set up and prepare machinery for use

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for handling commercial quantities of seed
  - alternative methods of bag sealing
  - associated regulations and legislation that covers labelling of packaged seed
  - basic equipment maintenance
  - bulk seed storage
  - chemical warnings and the seed details that must be put on the bag
enterprise labelling requirements
enterprise storage plans
machinery and workplace safety
packaged product transport and storage
seed packaging methods and equipment
types of packaging

Assessment Conditions

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out moisture testing, temperature and seed density tests in accordance with enterprise requirements
- complete relevant sampling documentation
- package and label seed samples
- prepare samples for despatch
- recognise common weed seeds and other seed contaminants
- record workplace information about seed samples
- sample graded and/or treated seed
- sample seed from a truck on arrival at a processing plant using appropriate sampling techniques
- sample seed in bulk containers and/or sacks using appropriate sampling techniques
- select and evaluate the sampling equipment to provide a representative sample within the guidelines of the relevant certification authority
- take seed samples for testing by other agencies
- use appropriate recording and labelling techniques
- use tools for sampling and prepare a sample for despatch

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed sampling
  - correct methods of sampling
  - personnel protective equipment used for sampling treated seed
- relevant workplace records and other documentation
- seed handling and the importance of seed moisture content at all stages of the cleaning process
- the controlling bodies of seed movement - Australian Quarantine and Inspection Service (AQIS), the Organisation for Economic Co-operation and Development (OECD), the Association of Official Seed Certifying Agencies (AOSCA) and other certification agencies
- seed types that require sampling

</table>

Application

This unit of competency covers the development and management of a plan to provide a reliable supply of quality water on a property. The plan will review trading rules and regulations and the costs associated with supply and use of all classes of water. Testing of water is undertaken to assess suitable quality for stock, domestic and irrigation purposes. The plan will include efficient use of minimum quantity of water and maintain the quality of the water in storage and the reticulation system. New farming practices can be improved by the selection and management of pastures and crops. Water is managed to protect sensitive areas from degradation. New and innovative methods of treatment and re-cycling are assessed. The quality of water leaving the farm and down-stream impact is monitored.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to persons who have a role in managing the farm. This unit is likely to require consultation with external experts, such as water authorities, shire council planning personnel, irrigation suppliers and State Government departments.

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Sustainability (SUS)
## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

1. Develop a plan for strategic and sustainable use of water on the farm
   - 1.1 Determine the feasibility of trading water on the short term profitability of the farm and the long term implications
   - 1.2 Contact the authorities to determine rules and regulations for the trading and use of water
   - 1.3 Investigate the availability of different classes of water and the regulations for its use and select suitable crops for each class
   - 1.4 Select appropriate recycling options in the whole farm plan
   - 1.5 Analyse purification options on the basis of their merits and suitability for the environment and the enterprise
   - 1.6 Evaluate information from water management specialists and incorporate in relevant aspects of water management
   - 1.7 Review options, develop and implement strategies to use water efficiently by computer controlled irrigation systems and remote operation

2. Design a water supply and management system for the farm
   - 2.1 Identify planning parameters that affect the design of the water system
   - 2.2 Carry out water testing to determine the suitability for stock, crops, pesticide and domestic use
   - 2.3 Draw a plan and layout of a farm water system, including provision for drainage, recycling and back up water supply

3. Develop and implement a plan to protect watercourses and water quality on the farm
   - 3.1 Develop a strategy to protect the areas susceptible to degradation and contamination
   - 3.2 Identify the environmental implication of water use and run off
   - 3.3 Work with community groups to plan a strategy for water quality improvement in the district
   - 3.4 Develop a strategy to improve the biodiversity of water storage areas and watercourses

### Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse weather patterns, rainfall and variability
- take water samples for testing and interpret test results
- fence eroded areas, dams, streams and rivers to protect vegetation and water quality
- research and source a wide range of local indigenous plants specific to revegetation area
- select pasture and crop species
- construct drains and effluent collection sites
- calculate the total farm water requirement for the enterprise, natural areas, farmhouse and garden
- analyse financial return from purchased water
- irrigate crops and pastures efficiently
- map erosion, salt and problem areas
- compare pumps and other equipment for energy efficiency
- calculate the cost of production including purchased water, storage, transfer and application
- fill out applications and forms for licensing and registration

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the variation and risk associated with weather patterns
- volume of water used for production and living
- the classes of water required for production
- the various sources of water and suitable storage
• methods of water quality testing
• water efficient pasture and native species
• crop cultivation methods for moisture retention and optimum production
• efficient irrigation practice
• methods of recycling water
• the water cycle
• the impact of water shortage on natural systems
• the causes and consequences of contaminated water
• the legal aspects of licensing, registration and trading of water
• methods of transferring water using renewable energy
• appropriate management when water and rain are limited
• water purchasing and water trading policies and procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency covers the development and management of a plan to improve the biodiversity on the property with the view to improving profitability and sustainability of the production system, as well as the long-term viability of the farming enterprise. The focus is to protect, enhance and manage natural areas in balance with the production enterprise. Improved biodiversity is considered a core part of the vision for the property, providing improved profitability, personal fulfilment, community benefits, and the long-term sustainability of soil, water, and local flora and fauna.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to a person who has a role in managing a farm. This unit is likely to require consultation with family members and a range of external institutions, groups, government departments and individuals.

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess natural areas, vegetation type, species, health and value
- assess vegetation ground cover and the risk of erosion
- identify plants using a field guide and recognise endangered species
- identify weed species using a field guide
- take soil tests and water sample tests and interpret test results
- map natural areas and plan improvements on a whole farm plan
- calculate financial value of planned improvements
- calculate costs and prepare implementation plan for improvements
- record personal and family values and goals
- recognise saline areas
- identify bird, frog and macro-invertebrates and estimate populations by a field survey
- communicate and work co-operatively with Landcare and community groups

Knowledge Evidence

The candidate must demonstrate knowledge of:

- complex interdependence of plants and animals
- greater the biodiversity the greater the resilience to change
- need for maintaining biodiversity within a particular species, maintaining the number of different species, and maintaining the range of ecosystem types
- indigenous plants in revegetation projects
- how to manage pests, diseases and weeds in natural areas
- water cycle
• value of biodiversity on the pasture production and the animal enterprise
• consequences of contamination and pollution of water, air and soil
• methods of restoration and regeneration of vegetation
• benefit of natural areas for personal health, family activities and pleasure
• philosophy of working with nature to improve the environment for future generations
• value of natural areas in improving the aesthetic value of the farm

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to provide support to other workers in the green keeping and turf production industry.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- assist with turf work as directed
- clean up on completion of turf work
- handle materials and equipment
- prepare materials, tools and equipment for turf work

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices of turf work
  - mowing patterns and heights
- safe work practices required at turf work sites
- turf and facility maintenance practices
- turf machinery and equipment
- work health and safety and environmental protection legislation and enterprise procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- clean, maintain and store turf construction machinery and equipment
- follow procedures and sequence work during the course of the construction
- use a range of turf construction machinery and equipment
- work in a team on a turf construction project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf construction
  - different soil preparations for construction
  - effective and safe use of tools and machinery
  - influences on the selection of tools, machinery and safety equipment
  - irrigation and/or drainage installation procedures and operational techniques
  - purpose of turf construction in maintaining turf presentation
  - relationship between a well-constructed soil profile for the quality and appearance of the turf

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the condition of the existing surface with advice from senior greenkeepers for subsequent routine preparations, treatments and turf cultural practices
- prepare a turf surface or sports playing field according to the rules of the game
- use turf surface preparation machinery and equipment safely according to manufacturer’s specifications to achieve the desired playing surface outcome

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf preparation for play
  - competition playing requirements affecting preparation of the turf surface
  - effect of adverse outdoor climatic conditions
  - effective and safe use of tools and machinery
  - high performance uses of turf surfaces
  - irrigation and drainage system design and operational techniques
  - potential public nature of turf renovation work sites
  - purpose of turf surface preparation in maintaining turf presentation
  - various requirements of turf species and their cultural requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to construct soil profiles for the establishment of high-performance sports and recreational turf surfaces.

It applies to the construction of turf playing surfaces in new projects and to the complete renovation of existing soil profiles in sporting, commercial and public recreational open spaces such as golf greens and tees, cricket pitches and other turfed sporting surfaces.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

4.2 Check finishing levels, provision for drainage and irrigation to ensure nominated levels are workable  
4.3 Check all measurements against the construction plan, peg out the construction area and account for variances                                                                                           |
| 5. Excavate the construction site           | 5.1 Remove and stockpile excess soil in a designated area  
5.2 Grade the base to the level and slope specified in the design  
5.3 Consolidate the base of the profile to achieve uniform compaction over the entire site  
5.4 Install sub-surface irrigation system components to the required depth and design specified in the plan                                                                                       |
| 6. Install drainage system                   | 6.1 Dig drainage trenches to the depth specified in the plan  
6.2 Lay drainage material on the base of the trench, install pipes and cover trenches                                                                                                                                 |
| 7. Install soil profile                      | 7.1 Calculate quantities of material to be spread over the area  
7.2 Compact each profile layer to reflect the final contour  
7.3 Ensure the interface between profile layers is uniform and unbroken                                                                                           |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine turf construction requirements from plans
- implement a turf construction project
- interpret existing site and construction plans and specifications
- organise work and use tools and equipment for turf construction project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for constructing turf playing surfaces
  - environmental implications associated with construction and excavation activity, drainage and irrigation systems, soil amendments and waste disposal procedures
  - materials, tools, equipment and machinery available to the enterprise for construction of soil profiles, including soil amendments and base construction materials
  - practical understanding of surveying principles and techniques
  - range of construction methods that may be used to construct soil profiles for high performance turf surfaces, and the association of construction methods with site limitations, environmental implications, and end use of the turf surface
  - soil testing techniques and the application of results to the construction process

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to establish turf by sowing, turf laying, sprigging and chaffing or stolonization in sporting, public recreational open space, commercial and residential sites.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- demonstrate turf establishment by sowing, turf laying, sprigging and chaffing/stolonization
- determine turf establishment methods and requirements
- implement successful turf establishment works
- operate and store turf establishment machinery and equipment
- organise work and use tools, equipment and machinery for a turf establishment project

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for establishing turf:
  - common weeds, pests and diseases
  - fertiliser use and application
  - soils and turf nutrition
  - turf identification and growth characteristics
  - turf establishment methods
  - watering practices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a risk assessment for work in a turfed area
- determine the maintenance requirements for a turfed area
- carry out weed control measures
- repair irrigation systems
- safely adjust and use turf maintenance machinery and equipment
- coordinate and report on grassed area maintenance activities
- write a report on the maintenance program activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grassed area maintenance
  - growth rates and cultural requirements of specific turf types
  - methods and practices for maintaining grassed areas
  - range, use and availability of materials, equipment and machinery that may be required for the project
  - turf grass physiology as it applies to grassed area maintenance
  - types of turf and specific maintenance requirements
  - work schedule programming
  - work health and safety issues
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess turf health
- identify deficiencies and diseases in turf
- inspect and report on the condition of turfed surfaces
- perform soil sampling and analyse results
- prepare turf maintenance recommendations according to the playing requirements and desired objectives of the enterprise

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf health
  - botany and turf physiology as it applies to turf health
  - main, simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, rates and cost
  - rates and regularity of recommended fertiliser and pesticide application to achieve optimum plant health objectives while minimising external environment impact through leaching, excessive spraying and overuse
  - role of trace elements and nutrients required by turf grass plants, and symptoms of toxicities and deficiencies
  - soil and plant tissue analysis as a monitoring and turf management tool, the main elements of analysis and their significance as indicators of nutritional deficiency and toxicity
  - turf grass diseases, including commonly occurring regional diseases, seasonality, site history and visual disease symptoms
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a site hazard identification and risk control assessment
- implement a sports turf renovation program
- prepare, check and calibrate turf renovation machinery and equipment
- record outcomes of renovation works
- renovate a sports turf for successful high performance use
- use turf renovation machinery and equipment to restore turf health and condition

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf renovation
  - field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness, and turf sward height
  - nutrition and plant growth regulators
  - planting, care and renovation scheduling requirements of grass species and cultivars
  - specialist turf renovation practices to achieve high performance turf
  - standards for turf surface appearance and quality
  - structure of a sports turf soil profile

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare an seasonal/annual program according to the requirements of the enterprise and the grounds maintenance budget
- outline the scheduled activities in the sports turf maintenance program to green keeping staff and their respective roles and responsibilities
- use existing information and records to determine a comprehensive maintenance program
- monitor and review the program to ensure responsiveness to changing conditions
- implement appropriate courses of action to overcome program shortcomings

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of maintaining a range of sports turf playing surfaces
  - growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
  - maintenance requirements and practices for specific turf plant species and cultivars after initial establishment
  - nutrients required by specific turf plant species and cultivars and the effects of nutrient deficiency and toxicity on individual plant species and cultivars, including visual symptoms
  - plant diseases, pests and disorders and weeds of specific turf plant species and cultivars
  - site evaluation techniques including analysis of the condition of soils, plants, and the site for turf maintenance activities
- soil ameliorants commonly required to treat the soil problems experienced by the enterprise
- the characteristics of soil and other growth media types, uses and additives to enhance the available nutrition for specific turf plant species and cultivars
- the main simple and compound fertiliser products available to the enterprise

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- conduct a site hazard identification and risk control assessment
- plan a sports turf renovation program
- document a sports turf renovation program
- develop a schedule of works and specifications for a sports turf renovation program
- implement the schedule of works for sports turf surfaces
- coordinate a work team and contractors

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices of sports turf renovation
- enterprise and industry standards for turf surface appearance and quality
- environmental implications of renovation activities, turf and soil treatments, and waste disposal procedures
- field measurements, such as infiltration rate, organic fines, hardness, traction, surface smoothness and turf sward height
- planting, care and renovation scheduling requirements of grass species and cultivars
- specialist turf renovation practices to achieve high performance turf

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to establish sports turf playing surfaces and develop a design for the site, its specifications and work procedures. It applies to the planning processes involved in establishing turf in new constructions and major renovations of existing sports turf surfaces.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

</tbody>
</table>
| 1. Carry out preliminary planning activities for turf establishment | 1.1 Confirm client preferences and requirements for the sports turf playing surface  
1.2 Assess the site for biophysical factors, services and site modifications  
1.3 Research turf plant species and cultivars, legal attributes and local by-laws and restrictions that may affect the plan for turf establishment  
1.4 Identify environmental implications of the planned turf establishment works and report to personnel for further research  
1.5 Develop a concept plan that reflects client preferences and requirements and takes into account site factors and any identified environmental requirements and present to the client for discussion and approval |
| 2. Determine requirements of turf establishment works | 2.1 Select turf establishment procedures consistent with the concept plan according to site factors and available resources and equipment  
2.2 Determine resources required for the construction of soil profiles, planting and ongoing maintenance of the playing surface  
2.3 Ensure that the design of the soil profile to support the playing surface takes into account the turf use, soil characteristics and includes irrigation and drainage systems  
2.4 Identify plants that are appropriate to the site and consistent with the concept plan  
2.5 Calculate and cost the quantity and confirm availability with the supplier  
2.6 Provide management of new turf that encourages optimal growth  
2.7 Determine timelines for preparations, construction of soil profiles, planting and maintenance |
| 3. Prepare and document the turf establishment plan and specification | 3.1 Prepare designs of the soil profile and detailed plans of the scope of works, specifications and quotation based on the requirements of the turf establishment work  
3.2 Develop and document on-site procedures and schedules for the establishment of the sports turf playing surface and its ongoing maintenance |

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- design sectional and elevation plans of the turf establishment works
- develop a schedule and a plan of the scope of works
- develop and interpret construction documentation
- develop specifications and prepare a bill of quantities
- identify and incorporate sub-contracted works into the turf establishment plan
- order and arrange for purchase and delivery of goods and services
- prepare a maintenance program for turf establishment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for establishing and maintaining sports turf playing surfaces
  - construction procedures, plant selection and cultural practices for sports turf playing surfaces
  - growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
  - irrigation, drainage and the interrelationship of soil air, water and the physical structure of existing and manufactured soils and sports turf mixes
- legislation and regulations relating to sports turf sites and turf establishment works
- maintenance requirements and practices for specific turf plant species and cultivars prior to and after initial establishment
- site evaluation techniques including analysis of the condition of soils, plants and the site for turf establishment activities
• surveying principles and techniques
• the role of project briefs and client consultation processes in planning turf establishment works

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop renovation documentation
- develop program specifications
- develop a schedule and a plan of the scope of works
- order and arrange purchase and delivery of goods and services
- identify and incorporate sub-contracted works into the turf renovation plan
- prepare an on-going turf maintenance program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing sports turf renovation programs
  - comparative environmental implications of renovation activities, turf and soil treatments and waste disposal procedures
  - enterprise and industry standards for turf surface appearance and quality
  - field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness and turf sward height
- impact of climatic conditions on turf recovery
- planting, care and renovation scheduling requirements of turf grass species and cultivars.
- requirements of the turf’s intended use
- schedule and intensity
- soil physical and chemical properties for imported and existing soils
- specialist turf renovation principles and practices
- turf nutrition and plant growth regulators

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- identify control system faults
- identify hazards and implement safe work procedures
- prepare and apply chemical dosing
- use water sampling and testing techniques

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for monitoring and operating water treatment processes
  - chemical dosing processes
  - environmental impacts of irrigation using water from any ground or underground source
  - environmental issues associated with water treatment
  - hazardous materials handling
  - water quality monitoring methods and techniques
  - water treatment and water filtration techniques
  - work health and safety procedures relating to the operation of machinery and the use of chemicals
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to design water treatment systems.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and analyse information
- develop water treatment system specifications
- identify adverse environmental impacts of water treatment activities and remedial action
- identify design requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of water treatment system design
  - automatic control and monitoring systems
  - budgeting, contractual development and obligations
  - cost/benefit analysis
  - design processes
  - developments in water treatment technology
  - enterprise policies and procedures
  - environmental impacts of water treatment
  - environmental protection agency regulations
  - waste management and environmental issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to work safely. It applies to new employees working under supervision, within established and well-known parameters and with limited autonomy.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Application

This unit of competency describes the skills and knowledge required to recognise and report hazards in the workplace. It also describes the skills and knowledge required to follow workplace safety procedures and directions.

This unit is applicable to supervised workers who are required to follow work health and safety policies and procedures.

All work must be carried out in accordance with enterprise procedures, recommended safe practices and the relevant legislation.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow workplace procedures for hazard identification and risk control
- read safety warning signs
- observe safety during work operations
- follow workplace procedures for dealing with accidents, fire and emergencies within the scope of responsibilities and competencies
- participate in arrangements for maintaining the health and safety of all people in the workplace
- recognise caution or hazard signs and symbols
- identify tasks or information from labels, manuals or written instructions
- record information accurately or verbally reporting information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety legislation, codes of practice and enterprise policies
- employee and employer work health and safety responsibilities
- enterprise procedures relating to hazards, fires, emergencies, accidents and risk control
- relevant machinery and equipment operator manuals
- work health and safety signs and symbols relevant to area of work
- hazards and risks in the industry sector
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out enterprise work health and safety policies and procedures.

This unit is applicable to individuals. They typically work within clear reporting lines and procedures.

All work must be carried out to comply with workplace procedures and work health and safety and other relevant legislation and codes.

This unit applies to individuals who actively participate in the workplace safety system and work under broad direction and take responsibility for their own work. They work in a range of known contexts and complete routine activities.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

The candidate must provide evidence that they can:

- facilitate the participation of workers in work health and safety observance and decision-making
- establish procedures to document the identification of hazards and assessment of risk covering the operations of the enterprise
- identify work health and safety hazards and conducting the risk assessment process
- implement enterprise emergency procedures and organise safety drills
- provide staff with work health and safety training in risk assessment, and other areas nominated by risk controls
- respond to emergencies and work health and safety issues in an appropriate and timely manner
- facilitate meetings and document actions to consider work health and safety issues in the workplace
- distribute information concerning work health and safety processes and requirements to staff
- maintain work health and safety records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hazards in the workplace
- relevant work health and safety legislation and Codes of Practice
- hazard identification and risk control processes
- the hierarchy of work health and safety risk control and its implementation for hazards in land-based industries
Assessment Requirements for AHCWHS401 Maintain work health and safety processes

- work health and safety training
- communication and engagement strategies with workers
- relevant enterprise management systems and procedures
- accident and incident investigation
- enterprise emergency procedures
- participative work practices

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to develop work health and safety policies and procedures that demonstrate enterprise commitment to work health and safety.

This unit is applicable to the development of management systems and procedures. It is also applicable to the management of the implementation process, which is usually conducted within policy guidelines and procedures that require the use of discretion and judgement.

All work must be conducted in accordance with relevant legislative requirements, Codes of Practice, workplace procedures and safe work practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced, skilled activities.

NOTE: The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

**1. Develop work health and safety policies and procedures**

1.1 Develop a work health and safety business plan and program for the enterprise in consultation with designated personnel and management
1.2 Clearly define and allocate work health and safety responsibilities and duties and include them in job descriptions and duty statements for all relevant positions
1.3 Identify, seek and provide financial and human resources for implementing work health and safety policies and procedures as required
1.4 Provide and explain information on the work health and safety system and procedures, for the area of responsibility, in a form which is readily understood by employees

**2. Establish and maintain processes to ensure the participation of all employees in the application of work health and safety**

2.1 Establish and maintain consultation processes with employees and their representatives
2.2 Deal with issues raised through participation and consultation and resolve them promptly and effectively
2.3 Provide information about the outcomes of participation and consultation in a manner readily accessible to employees

**3. Establish and maintain procedures for identifying hazards**

3.1 Identify and confirm existing and potential hazards within the area of responsibility in accordance with trends identified using the work health and safety records system
3.2 Develop and integrate a procedure for the ongoing identification of hazards within systems of work and procedures
3.3 Appropriately monitor activities to ensure that the procedure is effectively adopted throughout areas of managerial responsibility
3.4 Address hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created

**4. Establish and maintain procedures for assessing risks**

4.1 Assess risks associated with identified hazards using information derived from workplace records and industry-wide information
4.2 Develop a procedure for ongoing assessment of risks and integrate it within systems of work and procedures
4.3 Monitor activities to ensure the effective adoption of risk
<table>
<thead>
<tr>

</tbody>
</table>
| **5.** Implement interim risk control measures until a better or permanent control measure is developed. | **5.1** Develop and implement measures to control assessed risks in accordance with the hierarchy of control and trends identified from the work health and safety records system.  
**5.2** Implement interim solutions, when measures which control a risk at its source are not immediately practicable, until a permanent control measure is developed.  
**5.3** Develop a process of ongoing hazard identification and risk assessment, and a review of effectiveness of control programs, and integrate them into enterprise management arrangements.  
**5.4** Monitor activities to ensure effective adoption of the risk control procedure throughout the area of managerial responsibility.  
**5.5** Address risk control at the planning, design and evaluation stages of any change in the workplace to ensure the inclusion of adequate risk control measures.  
**5.6** Design systems to reduce risk and design administrative arrangements to ensure the implementation of safe work health and safety practices where unable to eliminate hazard.  
**5.7** Implement effective work health and safety risk management measures during any modification to buildings and structures or machinery and work activities.  
**5.8** Identify inadequacies in existing risk control measures and seek or provide resources enabling the implementation of new measures. |  |
| **6.** Plan and manage enterprise procedures for dealing with hazardous events. | **6.1** Identify, with accuracy, potential emergencies posing risks to the health and safety of workers and the public.  
**6.2** Develop plans and procedures, which control the risks associated with hazardous events, in consultation with appropriate emergency services.  
**6.3** Provide appropriate information and training to employees to enable the implementation of correct emergency procedures.  
**6.4** Train adequate numbers of workers in First Aid to ensure that first aid is applied to preserve life and minimise injury. |  |
| **7.** Establish and maintain a work health and safety induction and | **7.1** Develop a work health and safety induction program to meet the work health and safety needs of new employees.  
**7.2** Develop a work health and safety training program as part of |  |
### Foundations Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop work health and safety policies and procedures that demonstrate enterprise commitment to work health and safety
- establish and maintain arrangements to ensure the involvement of all employees in the management of work health and safety
- establish and maintain procedures for identifying hazards
- establish and maintain procedures for assessing risks
- establish and maintain procedures for controlling risks
- establish and maintain enterprise procedures for dealing with hazardous events
- establish and maintain a work health and safety induction and training program
- establish and maintain a system for work health and safety records
- analyse recorded data to determine where the work health and safety program can better meet enterprise and employee needs
- evaluate the enterprise work health and safety system and related policies, procedures and programs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- data and documentation for industry injury statistics
- legislated employer and employee work health and safety responsibilities
- significant hazards and areas of risk in the workplace
- all relevant work health and safety legislation and Codes of Practice consistent with the hierarchy of work health and safety risk control and its implementation for hazards in land-based industries
Assessment Requirements for AHCWHS501 Manage work health and safety processes

- risk control measures
- the hierarchy of risk controls
- relevant management systems and procedures
- public safety issues

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use safe work procedures
- prepare materials, tools and equipment for woolshed activities
- provide support to shearing and crutching
- move and pen animals
- assist with wool handling
- undertake woolshed activities as directed
- handle materials and equipment
- clean up on completion of woolshed activities
- communicate with supervisor and team members using industry standard terminology
- apply work health and safety procedures in the context of own work
- apply enterprise animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of safe work practices
- characteristics of wool types and sheep breeds that relate to sorting wool
- features of shearing and wool preparation tools and equipment
- basic wool handling practices
- relevant sections of federal, state and territory industrial awards that relate to working conditions in the woolshed
- enterprise work health and safety, environmental protection and animal welfare policies and procedures
Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, minimise risks and use safe work procedures
- accept and interpret advice from the shed supervisor
- observe differences between mobs of sheep
- monitor shearers workflow and estimate rates for refilling the catching pens and for mob cutout
- move sheep in a shed and pen them up
- use the accepted communications signals in the shed when shearing and sheep movement is in full force
- apply work health and safety in the context of own work
- follow enterprise biosecurity policies where required
- apply animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- types of gates and catches in shearing sheds
- safe handling techniques for catching, dragging, and releasing sheep
- animal welfare requirements in relation to sheep
- features of sheep behaviour in the shearing sheds and yards
- hazards associated with handling livestock
- safety features of personal protective equipment and clothing, and when and how it should be used
- relevant industry awards and conditions that relate to working conditions in the wool industry
• relevant sections of State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, and biosecurity as applied to working in the wool industry

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely onto wool table
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stains
- use correct technique for skirting and rolling fleece
- check quantities in bins
- sweep floors and remove contamination
- work rapidly within specified timeframes
- communicate with supervisor, the wool classer and the shearers
- apply work health and safety practices in the context of own work
- apply enterprise environmental sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of a fleece
- types of shearing shed layouts
- duties and responsibilities of a board person
- types and sources of contamination of the fleece and be able to explain the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to the preparation of skirtings and oddments
• methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques.

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and report on work health and safety hazards and risks
- apply standard operating procedures for the press and equipment
- operate different types of wool presses under supervision
- operate the various types of scales and manual handling devices and supervision
- maintain uniform bale weights for each line
- brand bales clearly and accurately
- handle and stack wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer/supervisor
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of the fleece
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- methods of handling fleece and bales that minimise risk to own health, including safe lifting and bending techniques
- features of industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding
- features of the recording system for bale details in use in the organisation
• enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Application

This unit of competency describes the skills and knowledge required to undertake basic skirting of alpaca fleece during and after shearing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work practices
- pick up and throw alpaca fleeces
- skirt of alpaca fleece to industry standards
- package fleece and skirtings to industry standards
- communicate faults, malfunctions and workplace hazards
- report on and maintain operational records
- communicate with supervisor and work team work team
- follow work health and safety policies
- follow enterprise biosecurity protocols
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of Huacaya and Suri alpaca fleeces
- types of shearing shed layouts
- duties and responsibilities of a board person
- types and sources of contamination of the alpaca fleece
- enterprise policies with regard to recording and reporting routines
- equipment and bag requirements for skirting and handling fleece to industry standards
- relevant state and territory legislation, regulations and codes of practice with regard to work health and safety, environment, biosecurity and animal welfare.
- features of the Alpaca Fleece classing Code of Practice
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Application

This unit of competency describes the skills and knowledge required to appraise wool by applying the industry description system (AWEX-ID) to classed lines of wool.

All work is carried out to industry standards using the AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID) and Code of Practice for the Preparation of Australian Wool Clips.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- source and prepare information on wool to be appraised for industry description (AWEX-ID)
- apply an industry description (AWEX-ID) to lines in a clip and record appraisal result
- use an industry description (AWEX-ID) to establish a market value for lines made
- review clip preparation strategies using industry standard terminology to communicate feedback to the grower

Knowledge Evidence

The candidate must demonstrate knowledge of:
- features of Code of Practice for the Preparation of Australian Wool Clips
- features of AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID)
- features of the Australian Wool Exchange Wool Selling Rules
- interpretation of the wool sale catalogue
- interpretation of wool testing data
- relevant sources of wool sale lot information
- features of subjective assessment of style, colour, type of vegetable matter fault, degree of stain and faults, and defects.

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.
Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classifiers.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess key wool characteristics
- identify and separate wool faults
- identify and separate wool with impurities
- separate wool that does not meet Code of Practice requirements for uniform, predictable, low risk lines of wool
- identify and separate wool from shedding sheep breeds
- identify and separate wools with a high pigmented fibre risk

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics of the breeds of sheep
- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on processing and final wool product
- features of impurities in wool and explain their impact on processing and yield of clean fibre after processing
- types and sources of contamination and explain their impact on processing and final wool product
- features of the main wool faults and explain their impacts on processing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, stages of processing
- wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics
• requirements for handling shedding and pigmented fibres
• relevant aspects of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards that related to preparing wool.

**Assessment Conditions**

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- accurately skirt fleeces at commercial rates
- recognise and remove contamination
- recognise wool faults
- identify impurities in wool
- identify and remove stain
- identify oddments
- prepare skirtings and oddments
- communicate with team members, wool classer and the shearer

Knowledge Evidence

The candidate must demonstrate knowledge of:
- processing methods - woollen and worsted and stages of processing
- features of wool growth, skin and fibre biology
- features of fleece parts, skirtings, locks, crutchings, wool faults, impurities, contamination and stain and their impact on processing
- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques
- requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to the preparation of skirtings and oddments
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to supervise board persons, wool handlers and the wool presser in preparing the wool clip.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- explain clip preparation requirements to shed staff and monitor their performance
- oversee shed staff to ensure quality clip preparation
- communicate preparation requirements with shed staff
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of fleece
- procedures for handling skirtings, bellies, lambs wool, premature shorn wool, locks and crutchings, and stained wool and oddments
- responsibilities of board and table staff
- characteristics of different wool types and parts of the fleece
- premiums and discounts for wool characteristics
- pressing and branding requirements
- skirting technique and appropriate skirting ratios for different clip types
- personal protective clothing and equipment requirements for shed staff
- on job training techniques
- principles of staff supervision
- requirements of work health and safety legislation and animal welfare codes of practice
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Application

This unit of competency describes the skills and knowledge required to prepare the documentation for a wool clip to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise.

It includes instructing others in the use of the system, maintaining the records and advising the owner or manager of issues where appropriate.

The documentation of a wool clip contributes to the wool harvesting operation by optimising efficiency for the grower.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

| 1. Establish recording system and documentation | 1. Select documentation that complies with the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise  
1.2 Establish guidelines for the use of the recording system including the type, frequency and format of recording  
1.3 Inform those who are to use the recording system of their obligations and any specific instructions that are necessary  
1.4 Check documentation regularly to confirm that it is accurately completed and updated at the proper times |
| 2. Complete records for wool classing | 2.1 Complete documents and records required by the organisation and the market  
2.2 Complete wool clip specification prior to consignment, to ensure that the correct lotting advice is provided to the selling broker or buyer  
2.3 Make any additional notes or give advice necessary on the documents so that they are clearly understood  
2.4 Obtain all signatures and registrations that are required and include on documentation  
2.5 Prepare wages statements for contractors according to the agreements reached in employment conditions |
| 3. Provide information and advice to the woolgrower | 3.1 Make suggestions for improved safety and fleece quality that are derived from observations, smoothness of workflow, and discussions with operators within the wool shed  
3.2 Communicate the wool clip specification to the appropriate authority at shed cutout |

### Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop the recording system for wool clips and bales
- communicate recording requirements clearly to wool handlers and pressers
- prepare and maintain records as required by the Code of Practice for the Preparation of Australian Wool Clips, legislation or enterprise
- observe, identify and react appropriately to work health and safety hazards
- observe the work and identify areas of the work or the facilities that could be improved
- communicate information and advice to the woolgrower on improvements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- features of quality assurance schemes used in the organisation and in the industry, and their documentation requirements
- requirements for the completion of a clip specification
- employment conditions and agreements for a range of workers in a wool harvesting and preparation team
- documentation requirements for wool clip preparation and shearing operations

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.
Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classifiers.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- maintain contamination and hazard-free environment for shearing and wool handling
- recognise and remedy health and safety hazards
- carry out minor maintenance and repairs to equipment and facilities
- disposal of waste in an environmentally responsible manner
- pen sheep humanely in line with enterprise animal welfare policies
- communicate with shed staff and direct operations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- sources and types of contamination
- principles of moving and penning animals
- shearing requirements
- features of efficient shed and board layouts
- requirements of work health and safety legislation and animal welfare codes of practice as they relate to the shearing and wool preparation sector

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

| 1. Prepare for wool pressing                 | 1.1 Identify the lines of wool and confirm with the wool classer  
1.2 Check the wool press for safe operation, and lubricate and maintain it as required  
1.3 Inspect the work area to confirm it is free of all contaminants in readiness for pressing  
1.4 Confirm that supplies of wool packs, bale fasteners and hooks, stencils and bale-branding inks are located in appropriate place  
1.5 Identify the appropriate recording system  
1.6 Check the scales to be used for accuracy and calibrate if necessary  
1.7 Check the press and its location for safety  
1.8 Identify any defective equipment and report to the appropriate person |
| 2. Press wool                                | 2.1 Consult the wool classer to determine mob cut-outs and pressing requirements  
2.2 Apply safe work practices at all times and use available safety equipment in line with work health and safety policies  
2.3 Remove contamination from the woolpack and place in the appropriate location  
2.4 Check woolpacks for conformity  
2.5 Seek directions for order of pressing and any special requirements from the wool classer  
2.6 Place all wool correctly and evenly in the press to produce even density bales |
| 3. Carry out the role and responsibilities of the wool presser | 3.1 Press bales to optimal weights to reduce selling costs and within specified weight and length dimensions in compliance with Code of Practice  
3.2 Press lines to avoid mixed bales  
3.3 Monitor wool flow and build-up in bins  
3.4 Maintain work area in a condition that avoids contamination of wool  
3.5 Carry out pressing within time restrictions and workflow of the wool room |
| 4. Close and store bales                     | 4.1 Use approved bale dividers as instructed, and fasten flaps correctly  
4.2 Identify bales for branding before removing them from the press  
4.3 Store bales safely, avoiding injury to presser, risk to other workers, and damage to bales and equipment  
4.4 Store bales to maximise shed space and to avoid weather damage |
| 5. Complete recording                        | 5.1 Brand bales appropriately |
## Element Requirements

### Performance Criteria

- 5.2 Weigh bales appropriately

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- operate different types of wool presses and carry out basic lubrication and maintenance according to manufacturer instructions
- operate the various types of scales and manual handling devices
- check woolpacks and wool to ensure freedom from contamination
- assess and monitor wool-flow and build-up in bins
- maintain uniform bale weights for each line
- brand bales clearly and accurately to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips
- handle and store wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer
- work safely in compliance with enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of wool
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- operating requirements for different types of wool presses
- methods of handling wool and bales that minimise risk to own health, including safe lifting and bending techniques
- industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding
• features of the recording system for bale details in use in the organisation
• enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stain
- use correct technique for skirting and rolling fleece
- sweep floors and remove contamination
- work rapidly within specified timeframes
- interpret verbal and visual communication signals within the wool shed given by the supervisor, the wool classer and the shearers
- monitor sheep supply in pens and fill as necessary
- monitor wool flow and the wool working area to ensure risk of mixing between lines is minimised
- provide mentoring to less experienced staff
- deal with contingencies by supporting other staff in tasks as required
- observe and report on adverse environmental impacts
- apply work health and safety requirements in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:
- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- types of contamination and their sources
- properties of the parts of a fleece
- principles of moving and penning animals
• shearing requirements
• shearing shed and board layouts
• environmental codes of practice with regard to shearing
• relevant work health and safety and animal welfare legislation, codes of practice and enterprise requirements that apply to wool harvesting and pressing

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and apply safe work procedures
- arrange layout of bins and equipment for efficient operation
- handle and skirt fleeces to the required standards
- establish and maintain consistent methods of clip preparation
- class fibre to industry standards
- maintain clean working conditions for clip preparation and classing procedures
- accurately assess fibre quality and types
- measure goat fibre
- apply enterprise work health and safety in the context of own work
- apply enterprise animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- features of the parts of a fleece
- fleece measurement criteria and appraisement types
- fleece handling procedures
- clip analysis reports and comparisons
- classing specifications
- features of the code of practice for Preparation of Australian Cashmere, Cashgora Fleece and Mohair
- sources of fleece contamination
- requirements of the code of practices for animal welfare
- enterprise work health and safety legislative requirements and biosecurity policies
Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to class alpaca fleece.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- arrange layout of bins and fleece table in a variety of sheds for optimum efficiency of fleece flow and pressing
- label bins and containers correctly
- assess pigmented fibre risk and separating fleece as required
- check fleece to ensure freedom from contamination and stain
- check fleece to ensure optimum and adequate skirting
- identify and appraise alpaca fleece characteristics
- identify fleece of higher and lower market value and ensuring lines are made that maximise return to grower
- class alpaca fleece according to the Alpaca Fleece Classing Code of Practice or as required by alternative selling methods
- seek feedback on classing outcomes and compliance with industry standards from owner or processor
- implement enterprise work health and safety polices
- implement enterprise biosecurity policies and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- classing requirements for the range of customers
- effect of genetics and environment on fibre characteristics
- fleece growth, skin and fibre biology
- fleece measurement criteria and techniques used to measure fleece characteristics
• inherent alpaca fleece characteristics (such as diameter, length and strength, colour, vegetable matter amount and type and yield
• interpretation of test results
• preparation of documentation of fleece clips
• Alpaca Fleece Classing Code of Practice
• principles of classing
• raw fleece characteristics and their effect on processing and final product
• features of shed layouts that promote efficient fleece flow and handling.
• requirements of work health and safety legislation, biosecurity and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Huacaya and Suri clips

Application

This unit of competency describes the skills and knowledge required to develop classing strategies to be used for classing a wool clip and communicating the strategy to shed staff and owner and/or manager, then evaluating the strategy for the clip.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a classing strategy based on owners enterprise goals, research of past performance of the clip, current management, growing season, market and processor requirements which conforms with the Code of Practice for the Preparation of Australian Wool Clips
- establish and maintain consistent methods of clip preparation
- analyse classed clips and test alternative classing strategies for profitability
- review classing strategies based on broker and buyer feedback
- adapt classing strategies for buyer requirements, marketing systems and owner manager
- value lines of wool using industry descriptions and test results
- incorporate review of classing strategies into instructions for shed staff
- discuss clip test results, prices and alternative classing strategies with owner/shed manager
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- provide feedback to grower/manager on performance of clip preparation strategy adopted.
- communicate classing strategy to shed staff and owner/manager
- implement work health and safety policies and procedures into classing strategy
- implement animal welfare practices into classing strategy

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the industry description system (AWEX-ID)
- requirements of the organisation's wool marketing and production plans
- implications of wool testing, broking and export organisations on clip preparation
- clip preparation and analysis processes for the major wool types
- requirements and standards of the national wool processing industry
- methods used for processing wool and their impact on clip preparation and marketing
- marketing alternatives and their implications for classing
- wool brokering services
- features of efficient wool room layout
- sale catalogue and market reports
- specifications for classifiers
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

**Assessment Conditions**

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classifiers.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange shed or wool room layout for sampling efficient operation where required
- understand and interpret the individual fleece measurements
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips, or as required by the enterprise classing strategy and marketing plan
- communicate specific and detailed requirements for wool preparation and classing to wool handling staff
- identify wool of higher and lower market value and make lines which maximise return to woolgrower
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of wool room layouts which promote efficient wool flow and handling
- characteristics different breeds of sheep
- inherent wool characteristics, including fibre diameter, staple length and strength, colour, yield, VM type, curvature, comfort factor
- fleece measurement criteria - techniques used to measure wool characteristics
- interpretation of test results
- principles of classing, including mob/flock concept, variability for fibre diameter and staple length, soundness, defects
- classing scenarios requiring detail of clip break-ups
- clip analysis reports and comparisons
• clips and other relevant quality standards
• requirements of work health and safety legislation, codes of practice and enterprise procedures

AssessmentConditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classifiers.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and implement wool harvesting and preparation operations
- organise and schedule staff and work tasks
- supervise staff and monitor productivity
- implement risk management strategies
- monitor environmental impacts and implement control measures
- implement relevant legislative requirements associated with the shearing industry including employment agreements and awards
- communicate using industry standard terminology written and oral information to team members and management
- review and evaluate operational performance and clip preparation standards
- provide feedback to grower on the shearing operation and the preparation and classing of the clip
- calculate resources and bale weights for mob cut outs
- implement and monitor work health and safety requirements for work team
- implement relevant enterprise biosecurity policies and procedures
- implement animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- supervisory procedures with regard to operations and personnel
- principles staff management including team building and conflict resolution
- wool industry codes of practice and quality systems
Assessment Requirements for AHCWOL403 Plan, implement and review wool harvesting and clip preparation

- industry requirements with regard to hygiene and safety for wool harvesting and preparation facilities and equipment
- how weather conditions can impact on wool harvesting programs
- features of workplace documentation required for wool harvesting and preparation
- employment agreements, industrial awards, relevant to the wool harvesting sector
- the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation, biosecurity and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- identify staff training needs and provide on job training, mentoring and coaching as required
- implement effective time management
- use problem solving techniques to address staffing and resource issues motivate and performance manage work team
- manage conflicts within work team
- communicate with team members
- implement and monitor work health and safety policies and procedures
- implement enterprise biosecurity policies and procedures
- implement enterprise animal welfare policies and procedures
- implement enterprise environmental policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shearing industry awards, agreements and personnel processes
- principles of team work, negotiation and time management
- principles of workplace instruction/training and coaching techniques
- principles of conflict management
- features of effective communication for feedback and motivation
- principles of staff performance management
Assessment Requirements for AHCWOL404 Establish work routines and manage wool harvesting and preparation staff

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Application

This unit of competency describes the skills and knowledge required to class fleece wool from merino and crossbred sheep into lines that meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

The unit applies to wool classers who class wool as a professional service after consultation with the grower or shed manager.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>
| 1. Prepare for wool classing | 1.1 Arrange the layout of the shed, equipment and facilities according to the determined classing strategy for efficient wool flow, quality management and pressing  
1.2 Identify potential and existing work health and safety hazards, assess risks and implement control measures  
1.3 Place clearly labelled bins and containers in line with the classing strategy, quality management system and enterprise requirements  
1.4 Establish and maintain sufficient staffing ratio |
| 2. Carry out classing of fleece wool | 2.1 Identify hazards, apply safe working practices and use available safety equipment  
2.2 Handle and skirt fleece wool to the required standards  
2.3 Check wool to ensure freedom from contamination and stain  
2.4 Check wool to ensure adequate and optimum skirting  
2.5 Assess pigmented fibre risk and keep wool separate as required  
2.6 Identify wet wool, stained, cotted and coloured wool and keep separate  
2.7 Appraise wool for its characteristics  
2.8 Class wool to standards of the enterprise classing strategy, the Code of Practice and as required by alternative selling methods  
2.9 Identify wool of higher and lower market value and processing requirements and make lines to maximise return to the wool owner |
| 3. Place wool in bins for pressing | 3.1 Place wool in the correct bins ready for pressing and ensure that cross contamination does not occur  
3.2 Check wool flow into bins and communicate with wool presser |

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Classing must include the classing of Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.
Unit Mapping Information

This unit is equivalent to AHCWOL405A Class fleece wool

Links

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work procedures
- arrange layout of bins and wool table for optimum efficient wool flow and pressing in a variety of sheds
- label bins and containers correctly
- monitor clip preparation and skirting
- assess pigmented fibre risk and separate wool as required
- identify and appraise wool characteristics
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips or as required by alternative selling methods
- identify wool of higher and lower market value and lines made which maximise return to grower.
- separate wools of different processing or end user requirements
- identify and keep separate wet wool, stained, cotted and coloured wool and contamination
- communicate with team members in completing tasks associated with classing fleece wool.
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shed layouts which promote safe, efficient wool flow and classing
- characteristics of the breeds of sheep
- types and sources of contamination
- impact of the wool production areas of Australia on clip characteristics
Assessment Requirements for AHCWOL405 Class fleece wool

- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on classing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, and stages of processing
- effect of raw wool characteristics on wool processing and final product
- features of wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics
- requirements for handling shedding and pigmented fibres
- interpretation of test results, clip feedback and reports
- principles of classing (mob/flock concept, variability for fibre diameter and staple length, soundness, defects)
- documentation requirements for wool clips
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation in a wool preparation workplace

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classifiers.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels, site plan measurements and work health and safety symbols
- communicate effectively with team members and supervisor
- tally work hours, calibrating tools and equipment, measuring volumes to apply cleaning agents, measuring quantities of materials and estimating areas
- minimise noise, dust and water run-off to prevent nuisance-level environmental disturbance
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- enterprise standards for presentation of buildings, structures and surroundings
- the effect of outdoor climatic conditions (including rain, hail, extreme heat and wind, and very high ultraviolet radiation), which may prevent or impede maintenance activities, or influence the selection of tools, equipment and safety equipment to minimise the hazards presented
- the relationship between specific maintenance activities and the external environment, and reasons for procedures that help to minimise the impact that these activities may have on the environment
- workplace hazards and work health and safety symbols, signs and practices in the context of own work.
- sustainability practices in the context of own work.

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor physical signs of weather in the context of available information
- relate forecasts to impact on current operations and activities
- communicate information on weather and situations that may be impacted
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of wind and rain on wind chill
- effects of wind shear and wind chill exposure
- enterprise and industry policies for monitoring weather and climate conditions, and recording and reporting weather and climate conditions
- weather and climate conditions impact upon farming and grazing activities
- effects of wind chill on metabolism of animals
- effects of prolonged dry periods on pastures and animal production, and natural resources
- effects of extreme heat on animals, including during birthing, and effects of heat stress on neonates
- work health and safety requirements and practices, especially as they relate to weather and climate monitoring and preparations for hazardous weather
- sustainability practices in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with supervisors and workplace colleagues
- recognise basic environmental hazards and threats
- follow workplace directions and instructions related to environment
- keep simple environmental records
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation from all levels of government on environmental issues
- relevant environmental policies and workplace and industry practices and procedures
- good practice approaches relevant to work area particularly in regard to minimising environment hazards and risks, and improving environmental performance
- environmental issues, especially in regard to water catchments, air, noise, ecosystems, habitat, efficient use of resources, sustainability and waste minimisation
- potential environmental threats and problems relevant to a given region and occupation
- general work place practices and their potential impact on the environment
- work health and safety in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for operating in remote environments
- prepare for emergency situations
- source and interpret maps of the area
- operate in remote environments
- implement workplace procedures to notify location, activities and travel
- prepare provisions to cover essential and emergency needs
- preparing communication equipment
- use bushcraft skills to modify the living environment and reduce the risk of mishap
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- map reading and navigation skills including direction finding (including GPS, use of compass, stars or watch)
- local topography, nearby inhabitants and locations within that area
- survival techniques and human needs relating to survival situations
- clothing requirements for sun or heat protection
- first aid procedures for common injuries
- bush craft including making a fire, cooking and wild food gathering
- water supplies, sources and generation methods
- emergency vehicle and mechanical equipment repair
Assessment Requirements for AHCWRK203 Operate in isolated and remote situations

- the operation of communication equipment (including field communications by two-way, satellite telephony or HF radio), and distress signalling including use of signalling mirrors
- weather patterns and indicators
- work health and safety in the context of work in isolated and remote situations
- environmental impacts of work in isolated and remote situations
- rope skills including useful knots including: reef, clove hitch, truckie's hitch, and bowline; simple lashings and tying down of loads.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- collect information on the industry
- observe employment requirements
- accept responsibility for quality of own work
- manage own work
- maintain the safety of others
- contribute to a productive work environment
- interpret work schedules
- meet the industry standard for dress and work practices
- communicate effectively with team members and supervisors
- use industry standard terminology

Knowledge Evidence

The candidate must demonstrate knowledge of:
- industry and workplace awards and conditions
- employer’s expectations
- relevant legislation and Codes of Practice applying to the industry
- workplace policies and procedures including those relating to quality systems
- emergency procedures
- organisational structure
- workplace communication channels
- awareness of workplace health and safety in the context of own work
- biosecurity in the context of own work
- animal welfare practices in the context of own work where applicable
- sustainability practices in the context of own work

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to participate in workplace communications.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

The unit applies to individuals who work at various levels and should be contextualised to accommodate the responsibility of the individual.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- following simple spoken messages
- performing routine workplace duties following simple written instructions
- gathering and providing information in response to workplace requirements
- completing relevant work-related documents
- estimating, calculating and recording routine workplace measures
- using basic mathematical processes of addition, subtraction, division, multiplication, percentages, decimal points and ratios
- participating in workplace meetings and discussions
- use of industry standard terminology
- awareness of work health and safety in the context of own work
- appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effective communication, including the role of body language
- different modes of communication (e.g. written and non-verbal)
- effective communication in a work team
- communication procedures and systems, and technology relevant to the organisation and the individual’s work responsibilities.

Assessment Conditions

Assessors must satisfy current standards for RTOs

Application

This unit of competency describes the skills and knowledge required to collect samples as part of a rural production or horticulture monitoring program or while conducting post-mortem examination of livestock or other animals.

Samples collected will usually be analysed by laboratory staff, although collection staff may undertake some testing.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan for collection of samples and moving equipment to the site
- collect and preserve samples for a given site
- record sampling results and observations on data sheets
- carry out sampling procedures
- distinguish atypical circumstances
- prepare samples
- package samples for transport to laboratory
- use and operate relevant tools and equipment
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hydrological cycle
- field procedures for sampling and preservation
- collecting equipment and methods
- preservation equipment and processes
- basic habitat assessment
- water quality issues
- fauna and flora recognition relevant to sampling activities
- topographical, climatic or environmental influence on material or sampling procedure.
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to monitor and interpret weather and climate conditions and assess the likely impact on work functions and activity.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have monitored weather conditions, including:

- monitored and interpreted weather and climate information and considered the impact on work activities and current operations
- interpreted weather and climate conditions to determine preventative actions
- communicated warnings and concerns to others according to workplace procedures
- determined and implemented preventative actions to minimise impact of adverse weather conditions on workplace activities
- monitored ongoing changes to weather conditions and reviewed prevention actions
- reviewed personal currency of skills in weather forecasting and implemented a personal development plan
- recorded weather information according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- weather and climate conditions and its impact upon agriculture, horticulture and conservation activities, including:
  - humidity
  - temperature
  - sunlight
  - $\Delta T (\Delta T)$
  - frosts
  - inversions
• dew point
• wind - force and direction
• rainfall - precipitation rate and frequency
• effect of adverse weather conditions on agriculture, horticulture and conservation activities
• strategies to mitigate effects of adverse weather and climatic conditions on agriculture, horticulture and conservation activities
• methods of monitoring and interpreting weather and climatic conditions, including:
  • bureau of meteorology
  • local weather stations
  • weather meters
• enterprise and industry procedures for monitoring weather and climate conditions and recording and reporting
• strategies for maintaining personal development in weather monitoring and forecasting skills.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in an agriculture or horticulture or conservation environment or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • weather stations or weather meter relevant to workplace
  • computer or similar technologies to access weather data
• specifications:
  • workplace procedures, instructions or job specifications relevant to assessing the effects of weather conditions
  • weather reports, warnings and climate data relevant to workplace
• relationships:
  • team members for dissemination of weather warning information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to recognise and respond to workplace emergencies.

Workplace emergencies may include such incidents as a small fire that can be controlled using a nearby fire extinguisher; or a chemical spill that can be controlled using personal protective clothing and equipment, and a small spill kit; or other workplace accident where there is no significant injury or damage.

Responding to emergencies may also include application of basic first aid to injured persons. A first aid certificate will be required.

All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures, and accepted safe practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance criteria</th>
</tr>
</thead>
</table>
| **1. Prepare for emergency situations** | 1.1 Identify potential workplace emergency situations and appropriate responses, within the range of current skills and relevant workplace emergency procedures  
1.2 Identify relevant emergency resources and their location in the work area  
1.3 Carry out regular checks of the workplace to minimise potential hazards and report any issues  
1.4 Select, use and maintain personal protective equipment, safety equipment and other aids as required for emergencies and store properly after use  
1.5 Identify problems with the serviceability of the emergency resources and report to relevant people |
| **2. Identify and evaluate the emergency** | 2.1 Recognise and assess the identified or potential emergency situation and evaluate the risks and effectiveness of initial response actions  
2.2 Seek advice in evaluating the emergency with appropriate personnel  
2.3 Determine emergency needs and priority, including any assistance that may be required  
2.4 Evaluate the potential for further development of the emergency and assess any hazards or risks to staff, clients or animals  
2.5 Maintain high standards of hygiene and infection control to reduce the risk of infection or cross infection where necessary |
| **3. Implement fire protection and control procedures** | 3.1 Minimise the risk of fire hazards and any hazardous fuelling procedures in the workplace  
3.2 Use fire extinguishers and equipment appropriate to the fire situation and notify authorities  
3.3 Follow procedures for evacuation to nominated assembly points  
3.4 Carry out safety procedures for the handling and use of industrial gases |
| **4. Safely confine the emergency where possible** | 4.1 Confine emergency to the immediate area using available resources within current skill limits  
4.2 Carry out emergency procedures and operate equipment using safe practices and as trained  
4.3 Coordinate use of equipment with other emergency actions  
4.4 Implement strategies for group control, including removal of staff, clients and animals from danger and monitor ongoing |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate the emergency
- avoid and controlling escalation of the emergency
- develop a plan of action decisively
- implement a plan of action
- render first aid care
- deal with contingencies
- operate emergency equipment according to manufacturer's specifications and training
- use appropriate fire protection and control techniques relevant to the organisation and industry
- apply basic first aid to individuals across a range of incident situations applicable to the job role, organisation or sector
- use industry standard terminology
- apply work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the use of safe working practices
- the emergency network and contacts
- enterprise plan and evacuation procedures
- work health and safety legislative requirements and Codes of Practice
- legal responsibilities and duty of care
- use of communications equipment
- organisational and legal policies and procedures in the event of an accident/incident
- local call out procedures to access emergency services personnel
- practical first aid skills using prepared and improvised materials
- the emergency evacuation procedure and assembly point/s
- techniques to emergency response network and procedures to access relevant emergency personnel
- legal responsibilities and duty of care for persons and animals as appropriate to industry and emergency situation
- the proper use and technique for handling industrial gases
- hazard identification and risk assessment techniques and tools relevant to the organisation and industry
- use of communications equipment and protocols in the event of an emergency
- procedures to minimise infection and cross infection
- procedures for dealing with major injury or death prepare for, evaluate and act appropriately in emergency situations.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate the circumstances and logistics for the emergency
- carry out preparation and move to the rescue site
- assess the situation and establish communication with additional or specialist help
- carry out the required rescue or response to emergency
- implement post incident responses
- use industry standard terminology
- apply workplace health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- local environmental conditions
- search and rescue methods
- operation and characteristics of rescue equipment, tools and vehicles
- environmental, public health and safety issues
- types of hazards and how they should be handled
- enterprise procedures, legislative and work health and safety requirements
- first aid, life preservation.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpreting documentation associated with work site activities
- prepare and planning worksite activities
- calculate material and resource requirements
- schedule activities and allocating tasks and responsibilities
- coordinate a team to achieve optimum performance
- communicate with personnel at all levels
- monitor activities and recording costs and production levels
- document results clearly and concisely
- perform a work health and safety risk assessment
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental awareness associated with undertaking project works to ensure the impact on the environment is minimal
- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for obtaining external agency permits as necessary
- the range, use and availability of materials, equipment and machinery that may be required for the project
- work health and safety issues, legislative requirements and Codes of Practice.
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated the ability to apply quality assurance procedures, including:

- identified elements of quality, food safety hazards and quality standards for an industry sector
- assessed work area for critical control points, safety hazards and risks
- identified and reported issues that impact on product quality
- implemented standard operating procedures for operations and corrective action
- recognised, responded and reported non-conformances and variations of product against quality standards
- completed records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry quality assurance requirements for a specified sector of industry
- work processes for specified field of work
- State and territory food safety requirements
- Hazard Analysis and Critical Control Point (HACCP) approach to quality assurance
- procedures, policies, guidelines and standard operating procedures for field of work
- reporting and record keeping requirements for quality assurance.
Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a primary production or a manufacturing setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - products or services relevant to the specific primary production sector
- specifications:
  - workplace policies and procedures related to quality assurance
  - workplace specifications and/or quality standards relevant to the industry sector
  - access to legislation/codes of practice relevant to quality including HACCP

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to develop and apply fertiliser and soil ameliorant product knowledge.

The unit applies to contractors and employees working in a number of roles within the fertiliser and soil ameliorant industry, including those involved in fertiliser and soil ameliorant spreading or application, warehousing, wholesale and retail sales and transport and the storage of fertilisers and soil ameliorants.

Work is carried out to comply with industry codes of practice, quality assurance requirements, environmental best practices and relevant legislative requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Identify fertiliser and soil ameliorant products and associated work health and safety, food safety and environmental issues | 1.1 Source information about new products and developments continually  
1.2 Provide information about fertiliser and soil ameliorant product to customers  
1.3 Explain work health and safety, food safety and environmental issues relating to particular products to customers, with particular reference to their safe storage, handling and application  
1.4 Identify bulk fertiliser and soil ameliorant products using a combination of visual and physical examination of product characteristics  
1.5 Use correct terminology when distinguishing between different products and services  
1.6 Maintain biosecurity protocols and quarantine procedures at all times |
| 2. Work with fertiliser and soil ameliorant products | 2.1 Identify and apply storage and handling requirements of products consistently  
2.2 Identify work health and safety hazards associated with particular products and take appropriate action to minimise risks to self and others  
2.3 Identify environmental risks associated with particular products and take appropriate action to minimise any likely risks to self and others  
2.4 Select, use and maintain suitable personal protective equipment  
2.5 Use inventory and labelling systems to locate products within the workplace or store |

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK307A Develop and apply fertiliser and soil ameliorant product knowledge.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify fertiliser and soil ameliorant products using information about their characteristics
- provide information to customers about fertiliser and soil ameliorant products
- refer customers to other appropriate sources of information about products
- work safely with products
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics and key label components (including product analysis, impurities and warnings) of the range of fertiliser and soil ameliorants sold or handled in the workplace
- key environmental, work health and safety and food safety risks associated with the use, spreading, storage, handling and transport of fertilisers and soil ameliorants.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can handle bulk materials in storage, including:

- confirmed work instructions for tasks required and bulk materials to be handled according to workplace procedures
- identified work safety hazards and risks, selected and used appropriate personal protective equipment (PPE) and implemented control measures
- prepared and safely used equipment for bulk storage activities
- assessed work implications for the storage environment and determined actions and activity to address possible outcomes
- maintained records for bulk storage, handling and equipment maintenance according to procedures
- identified bulk materials legislative, regulatory and biosecurity implications and implemented appropriate protocols and procedures for compliance
- collected, prepared, labelled and despatched samples of bulk materials for testing according to workplace procedures
- selected appropriate storage type and equipment and moved bulk material in storage area according to required bulk material characteristics
- maintained quality and minimised infestations and contamination of the product
- cleaned, maintained, secured and stored machinery and equipment and related work facilities according to workplace procedures and maintenance requirements
- recognised, reported and rectified operational faults of storage facilities and equipment according to workplace procedures
- applied measures to ensure product flow was maintained.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of materials and their characteristics suitable for bulk storage
- sampling techniques, quality and classification
- common bulk material biological and product contamination and the problems they can cause for storage
- effect of product properties, including contaminants and desiccant dusts, on the flow of the product
- bulk storage legislative requirements, manufacturer’s instructions and workplace procedures
- storage operations and configuration
- work place safety requirements for equipment and facilities in a bulk storage environment
- organisation and industry guidelines for segregation of bulk materials and related quality assurance principles
- bulk storage tools and equipment and their operation including:
  - pre-start checks
  - safety checks
  - maintenance requirements
- cleaning and storage of machinery and equipment
- environmental impact associated with bulk storage operations
- safety hazards, and risks associated with bulk storage
- safety risk controls associated with bulk storage, including PPE
- work place recording and reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a bulk storage facility or an environment that accurately represents workplace conditions for the relevant industry sector
- resources, equipment and materials:
  - access to bulk materials
  - tools, equipment and machinery used to handle bulk materials
  - PPE
- specifications:
  - workplace procedures for bulk storage environment operations
  - operating instructions for required tools, equipment and machinery
  - safety data sheets for cleaning products
  - workplace job specifications or client briefs
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify current procedures and practices related to environmental regulations
- identify current procedures and practices related to minimising impact of resource usage on environment
- make contributions to the review of environmental sustainability procedures and practices through research and development of tools or techniques
- use appropriate techniques and tools to assist in achieving resource efficiencies and environment targets
- use communication skills to:
  - convey proposed improvements
  - provide feedback on improvement processes
  - promote organisational improvement strategies
- apply life cycle management principles in strategies to improve resource usage, reduce waste, employ recycling, re-use, or re-purposing, and to minimise environmental risks and impacts
- use tools and technology to monitor effectiveness of improvement strategies, and incidents that breach sustainability policy and procedures
- record and report on progress against resource efficiency and environmental targets.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic environmental sustainability principles
- environmental legislation, regulations, standards, codes of practices as may be relevant to industry sector and workplace
• relevant internal and external sources of information that can be used to identify sustainability improvements
• common environmental and energy efficiency issues within the industry
• environmental hazards and risks associated with the relevant industry sector
• organisation’s sustainability work policies and procedures
• principles of resources efficiency and life cycle management
• practices for disposal or recycling of waste associated with relevant industry sector
• organisation’s recording and reporting systems.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify a wide range of vegetation common to the region
- recognise plant health problems and defects
- perform hazard identification and risk control procedures
- conduct soil field tests
- estimate dimensions and gradients
- report findings to the client or supervisor
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- plan and map interpretation
- soil pH, texture, structure and type
- plant identification and plant physiology
- measuring and estimating methods
- current land use and environmental threats to site hazards associated with undertaking site inspections
- protocols of accessing and visiting a site
- relevant legislative and regulatory requirements including environmental protection legislation
- local government regulations relating to the proximity of trees to buildings, services and roads
- local tree protection and preservation regulations
• relevant Codes of Practice.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have operated in an isolated and remote environment, including:

- planned and prepared for operating in remote environments in conjunction with supervisor
- conducted a risk assessment for health, safety and environmental hazards for remote location
- prepared and implemented procedures for emergency situations
- sourced and interpreted maps of the remote area
- conducted work activities safely in a remote environment
- implemented workplace communication procedures to notify location, activities and travel to appropriate personnel
- prepared and monitored provisions and resources for essential and emergency needs
- used bushcraft skills to modify the living environment and reduced risks
- maintained records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- planning and preparations required for working in isolated environments
- map reading and navigation skills, including:
  - direction finding; GPS, compass, astronavigation
  - local topography
  - habitation
  - geographic indicator
- basic survival and bushcraft skills to maintain human needs in survival situations, including:
  - making a fire
Assessment Requirements for AHCWRK312 Operate in isolated and remote situations

- cooking
- distress signalling
- basic rope skills and useful knots
- personal protective clothing requirements for adverse weather conditions
- basic first aid procedures for common injuries
- emergency vehicle and mechanical equipment repair
- communication procedures and operation and maintenance of communications equipment, including:
  - field communications by two-way radio
  - satellite telephony
  - HF radio
- work health and safety in the context of work in isolated and remote situations
- environmental impacts of work in isolated and remote situations including weather patterns and indicators.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an isolated environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - provisions and resources required for an isolated worksite
  - tools and equipment for work activities
  - personal protective equipment for use in isolated working environments
- specifications:
  - workplace documents including policies, procedures, processes, instructions and job specifications
  - manufacturers’ operating instructions for specific communications and navigational equipment
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and critical control points in the production of quality product
- assist in planning of quality assurance procedures
- provide induction and in-service staff training
- implement quality assurance procedures
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- market requirements for product
- definition of quality
- quality specifications for product
- enterprise and industry quality assurance systems
- Hazard Analysis and Critical Control Points (HACCP) techniques
- strategies for control of hazards to quality
- workplace training strategies
- delegation and empowerment
- contingency management.

Assessment Conditions

Assessors must satisfy current standards for RTOs

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- process a request for information
- access information to respond to a request
- collate information to deal specifically with the request
- prepare a response using chosen media
- maintain a record of the information provided and file for future reference
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- workplace policies and documentation on local, regional, state and national issues
- relevant workplace documentation on international treaties, agreements and charters
- types of information sources
- methods and means of accessing and extracting the required information
- methods of validating information
- types of reports and their uses.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- assess and evaluate staff capability
- identify and provide training requirements
- plan timesheets and timetables to meet deadlines
- demonstrate safe workplace and environmentally responsible practices
- solve staffing and resourcing problems
- evaluate performance, provide feedback and prepare reports and performance appraisals
- promote and maintain effective relationships between staff
- monitor productivity and maintain staff records as required
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise personnel processes
- enterprise organisational structure and responsibilities
- techniques for building trust and relationships
- principles of team work and negotiation
- leadership for the work team
- performance appraisal systems and procedures
- principles of time management
- conflict management techniques
• enterprise training requirements and processes
• relevant State and Territory legislation, regulations and Codes of Practice with regard to work health and safety, environmental protection and employment
• work health and safety hazard identification, risk assessment and development of risk controls.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify the environmental regulations applicable to the enterprise
- analyse information on environmental and resource efficiency systems and explain it to the work group
- measure and document current resource use
- analyse current work processes to identify areas for improvement
- set targets for improvement
- implement environmental improvement plans for own work group
- develop and use evaluation and monitoring tools
- apply supervisory skills to work effectively with a team
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- relevant compliance requirements in own area of work
- hazards and risks associated with work area
- environmental and energy efficiency issues, systems and procedures specific to industry practice
- external benchmarks and support for particular benchmarks to be used within enterprise, including approaches to improving resource use for work area and expected outcomes
- work health and safety issues and requirements
- organisational structure and reporting channels and procedures
- quality assurance systems relevant to own work area
strategies to maximise opportunities and to minimise impact relevant to own work area
- supply chain procedures
- terms and conditions of employment including policies and procedures, such as daily
tasks, work area responsibilities, employee, supervisor and employer rights, equal
opportunity.

Application

This unit of competency describes the skills and knowledge required to collect, analyse and manage data.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Determine the type and extent of data to be collected | 1.1 Define data requirements and communicate to all staff involved in data collection  
1.2 Identify relevant data sources  
1.3 Define the type and extent of data required  
1.4 Identify work health and safety hazards associated with data collecting  
1.5 Define data collection methods and techniques relative to data requirements |
| 2. Access and collate data | 2.1 Format data collection sheets to assist collection  
2.2 Research or collect data from field source  
2.3 Collate data by appropriate electronic means  
2.4 Monitor appropriateness of data and record during collection  
2.5 Research information using appropriate methods and technologies  
2.6 Review sources of information regularly for usefulness, validity, reliability and cost  
2.7 Use channels and sources of information effectively  
2.8 Take opportunities to establish and maintain contacts with those who may provide useful information  
2.9 Follow appropriate work health and safety requirements and work practices |
| 3. Evaluate data | 3.1 Collect data that is relevant, valid and sufficient  
3.2 Seek clarification and assistance where data is unclear or difficult to interpret  
3.3 Obtain additional data where data is inadequate  
3.4 Analyse information for its validity and reliability |
| 4. Manage and retrieve data | 4.1 Store data by appropriate electronic means  
4.2 Present data using appropriate graphical aids and techniques  
4.3 Assemble data and provide to the manager or client as required  
4.4 Retrieve data as required  
4.5 Suggest and introduce new methods of recording and storing data as needed |
| 5. Analyse and interpret data | 5.1 Analyse data using appropriate statistical and analytical techniques  
5.2 Interpret data to determine its significance, validity and reliability  
5.3 Report findings based on the analysis and interpretation of the data  
5.4 Organise data into a suitable report format to aid decision making |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify data requirements and establish sampling and data collection techniques
- collect and collate data using standardised recording sheets and systems
- review sampling and data collection techniques based on validity and reliability of the data
- manage data to facilitate retrieval and analysis
- analyse data using appropriate statistical and analytical techniques
- draw conclusions based on reasoned argument and appropriate evidence
- produce a report in required format with information and data presented to support decision making
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- data collection techniques and procedures
- data recording and evaluation techniques
- data analysis and interpretive techniques
- data storage and retrieval methods
- data reporting methods.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify the purpose of the report and verify it with the client
- conduct research and compile information
- draw conclusions from research supported by reasoned argument and supporting information
- make recommendations if required and reference to information and conclusions
- produce a correctly formatted report document that uses appropriate language and terminology, is arranged in a logical order, and provides details on information sources and consultation
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- information and research sources
- report structure and presentation
- public presentation techniques and approaches.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- critically evaluate information and research findings of relevance to enterprises and industry sector
- integrate research and development into enterprise planning
- evaluate the potential of research proposals with other producers, associates or colleagues
- document a report on new industry developments
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate avenues to disseminate industry sector information to a range of stakeholders
- correct names and terminology relevant to one's industry sector
- credible sources of information
- key industry development and promotion programs relevant to one's industry sector
- roles and responsibilities of stakeholders and organisation's relevant to own industry sector
- supply chain for industry sector enterprises.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine legislation and legal framework applicable to task
- research, interpret and apply appropriate legislation
- promote compliance with relevant legislation
- assess situations which may potentially present legal problems and issues
- maintain knowledge of legal frameworks and relevant legislation
- develop and implement strategies to manage compliance with appropriate legislation
- provide advice and documentation regarding applicable legislation, regulations, organisational procedures and codes of practice
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the provisions contained in key relevant legislation and other legally binding legal policies and protocols from all levels of government that affect the relevant industry
- relevant Australian Standards
- organisational policies and procedures relating to legislation in organisation's functional area
- penalties for non-compliance with legislative requirements
- auditing requirements
- work health and safety requirements applicable to own work and functional area
- the scope of legal practitioner and support role and own responsibilities and obligations to provide legal advice, complete or sign off on legal work and appear in court as described by relevant jurisdictions
- how to encourage and support own compliance and that of others in the workplace
Assessment Requirements for AHCWRK508 Interpret legislation

- relevant conventions, treaties, agreements, guidelines, declarations, recommendations, laws and rules
- how to apply legal information to the workplace
- techniques to monitor compliance and identify illegal conduct
- where to find appropriate sources of information and specialist personnel when limits of own expertise are reached in determining applicable legislation
- accepted codes of practice relevant to the workplace including those relating to:
  - privacy and confidentiality
  - use of company property
  - duty of care
  - ethical behaviour
  - non-discriminatory practice
  - conflict of interest
  - compliance with reasonable direction
  - relevant general legal terminology.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- develop and maintain industry wide specialist knowledge
- provide a professional service to client enquiries and needs
- show discretion and judgement in stakeholder interaction
- implement professional practice in stakeholder consultation and report documentation
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- products, treatments services of the industry
- environmental sustainability and land use issues relevant to the industry
- enterprise policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- strategies for planning and monitoring activities
- consultation methods, techniques and protocols
- current enterprise, government and local council policy, legislation and regulations
- mechanisms to obtain and analyse customer feedback.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify client or organisation expectations
- determine the scope of items for audit
- specify parameters of audit requirements
- define the audit process
- identify compliance and noncompliance items
- implement an audit
- manage the implementation of audits
- plan for and act on contingencies
- evaluate audit findings
- organise scheduling and meetings
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- audit methodology and techniques
- product or service
- quality principles and techniques
- interview techniques
- workplace documentation and policies
- logistics of operations of organisation
- legal issues and terminology relating to quality auditing
- award and enterprise agreements and relevant industrial instruments
- relevant legislation and regulations from all levels of government
• relevant codes of practice, regulations and Standards.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- participate in planning, development and implementation of organisational policy that complies with legislative requirements
- communicate with stakeholders to discuss approaches to policy development and implementation and contribute to the resolution of disputes that may arise due to different points of view
- develop and monitor policies for analysing data on enterprise resource consumption
- review policies and identify improvements while benchmarking against industry best practice
- implement new approaches as required
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- best practice approaches relevant to own work area
- environmental or sustainability legislation, regulations and codes of practice applicable to industry and organisation
- equal employment opportunity, equity and diversity principles and work health and safety implications of policy being developed
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context
- quality assurance systems relevant to own organisation
- relevant industry competency
• relevant organisational policies, procedures and protocols
• relevant systems and procedures to aid in the achievement of workplace sustainability.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- guide the organisation in the achievement of its aims
- design and implement communication
- establish and maintain effective relationships
- establish and manage professional and business networks
- promote team building
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- leadership styles, roles and responsibilities
- strategic planning
- development and implementation of organisational policy and procedures
- ethics and codes of behaviour
- conflict management
- meeting procedures and protocols
- negotiation and consensus in decision-making.

Assessment Conditions

Assessors must satisfy current standards for RTOs

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establishing sound research parameters that enables achievable results
- conducting research consistent with recognised scientific practice
- calculate the cost and spatial and logistical requirements of components of the trial
- enter, analyse and organise data in a mathematically sound and accurately graphed, charted or tabled representation, consistent with the trial design
- comply with legislative requirements
- use of industry standard terminology
- awareness of workplace health and safety in the context of own work
- appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- growth habits, physiological properties and taxonomic specification of animals and plants involved in the trial
- physical and biochemical properties of products involved in the trial
- properties and current, best practice application of treatments involved in the trial
- scientific and mathematical trialling, data collection, processing and analytical techniques and procedures
- auditing and reporting procedures
- the enterprise business and marketing plans
- enterprise work team management guidelines
- bio-ethics (where animals are involved in the trial).
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit describes the skills and knowledge required to undertake the fundamentals of product/idea commercialisation. It describes the process from conception to launch to full production.

Competency requires developing the skills and knowledge to successfully research, analyse, cost and develop a business opportunity for a product/idea. This unit also describes the skills required to manage commercialisation and evaluate product success.

This unit applies to leaders or managers responsible for developing a commercialisation strategy for an innovative product or technique, which has been developed through research.

Leaders undertaking product commercialisation must investigate and negotiate the legal and partnership implications of commercialisation, undertake market testing and develop commercialisation strategies.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

</thead>
<tbody>
<tr>
<td>1</td>
<td>AMPv1.0</td>
<td>Initial release</td>
</tr>
</tbody>
</table>

Performance Evidence

Candidates must undertake the fundamentals of product/idea commercialisation from conception to launch to full production.

Candidates must demonstrate ability to:

- analyse market trends
- budget, including forecasting, capacity and asset analysis, setting targets and compliance mechanisms
- negotiate licensing IP (in and out), contractual supply chain arrangement and partnerships
- use communication skills to:
  - maintain appropriate relationships with colleagues and others
  - value and be open to the opinions of others
  - work as part of a team
  - model collaborative communication and learning
  - use active listening and negotiation skills
  - present and negotiate proposals
  - seek opinions and feedback from a range of stakeholders
  - develop plain English texts deslining with complex ideas and concepts
- generate and evaluate ideas by analysing information and concepts at an abstract level
- provide strategic leadership during change and negotiation processes
- use problem-solving, initiative and enterprise skills to:
  - direct, motivate, consult and delegate appropriately
  - collect, analyse and interpret data using a range of methods
  - shape strategic thinking and inspire others with a shared vision
  - work with teams with diverse emotional intelligence and cognitive ability
- provide leadership in workplace health and safety practice, ethical standards and legislative requirements
• review own personal and professional competence against personal development objectives
• support and use participative arrangements aimed at establishing trust
• to develop, negotiate and structure an agreed commercialisation strategy
• to apply leadership style and approach appropriate to individuals involved, outcomes being sought and contextual factors

Knowledge Evidence
Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:
• relevant legislation
• business strategies and legal requirements underpinning trademarks, copyright and patents
• legal requirements underpinning partnership arrangements, contracts and taxation
• commercial environmental analysis techniques, including Strengths, Weaknesses, Opportunities, Threats (SWOT)/TOWS
• market testing strategies and techniques
• strategies for analysing and assessing the upstream and downstream implications of an innovation
• risk assessment strategies and techniques
• team selection, management and support strategies
• environmental sustainability principles

Assessment Conditions
Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:
• access to an actual workplace or simulated environment
• assessment over a sufficient timeframe to allow holistic assessment of the candidate’s capacity to lead the development of a commercialisation strategy
• resources normally used in the workplace, including organisational policies and procedures, and relevant legislation
• access to stakeholders, potential partners and clients

Assessors must satisfy current standards for RTOs.

Application

This unit describes the skills and knowledge required to determine and analyse existing and required resources, their effective application and the accountability for their use.

It applies to individuals with a broad knowledge of business resources who contribute well developed skills and knowledge to ensure adequate resources are available to perform the work of the organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

</table>

Performance Evidence

Evidence of the ability to:
- monitor resource usage
- maintain records of resource requirements and usage
- calculate costs and expenditures in relation to use and maintenance of business resources
- acquire and allocate physical resources and services to team members
- consult and communicate with individuals and teams about acquiring and using resources
- monitor, review and report on resource use acquisition, allocation, use and procedures
- follow organisational policies and procedures in relation to business resource acquisition and monitoring.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- describe the functions of business equipment used in an organisation and identify common faults
- identify organisational policies, plans and procedures in relation to business resource acquisition and monitoring.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:
- records relating to business resources
- policies and procedures relating to resources
- case studies, and where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:
- prepare and deliver presentations related to occupation or area of interest which demonstrate the use of:
  - effective presentation strategies and communication principles
  - aids and materials to support the presentation
- select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify information collection methods that will support review and feedback of presentations
- identify regulatory and organisational obligations and requirements relevant to presentations
- describe the principles of effective communication
- describe the range of presentation aids and materials available to support presentations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:
- equipment, materials and business software packages for making a presentation
- business technology
- interaction with others.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to plan, develop and validate compliance requirements.

It applies to individuals who are responsible for the compliance requirements of an organisation. It also applies to individuals in regulatory authorities, licensing authorities, statutory standards authorities, professional associations and institutes, government departments or other organisations who are responsible for establishing compliance requirements to be fulfilled by other organisations and personnel.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Compliance

<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- access and interpret information on relevant Australian and international standards
- collaborate with others to clarify the purpose and scope of the compliance requirements
- plan the compliance requirements using a suitable project methodology
- consult relevant stakeholders about compliance requirements according to the approved plan
- prepare draft recommendations on compliance requirements based on information collected during consultations
- collaborate with others to conduct a validation process on the draft compliance requirements
- document the final compliance requirements according to organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant compliance requirements
- explain methods and techniques suitable for the development and creation of compliance requirements
- outline elements of compliance program/management systems including:
  - documentation of compliance requirements relevant to the organisation
  - specification of compliance management functions, accountabilities and responsibilities within the organisation
  - compliance related management information systems
  - record keeping systems required for compliance management
- liaison procedures with relevant internal and external personnel on compliance related matters
- breach management policies and processes including the identification, classification, investigation, rectification and reporting of breaches in compliance requirements
- compliance reporting procedures
- corporate induction and training processes related to compliance management
- processes for the internal and external sharing and promotion of information on compliance requirements and a compliance program management system
- compliance complaints handling systems
- continuous improvement processes for compliance including monitoring, evaluation and review
- strategies for developing a positive compliance culture within the organisation
- techniques and performance indicators for monitoring the operation of a compliance program/management system
- reporting processes on compliance management including reports on breaches and rectification action.
- explain relevant organisational policies and procedures including compliance plans in various compliance area and organisational standards for operations and ethics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- organisational policies and procedures and documentation relevant to compliance requirements
- Australian and international standards relevant to compliance requirements
- interaction with others
- computer resources and business technology
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

It applies to individuals who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over short or long term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

</table>

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies, and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure, and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs
• explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
  • customer behaviour
  • customer needs research
  • customer relations
  • ongoing product and/or service quality
  • problem identification and resolution
  • quality customer service delivery
  • record keeping and management methods
  • strategies for monitoring, managing and introducing ways to improve customer service relationships
  • strategies to obtain customer feedback.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:
• legislation, regulations and codes of practice related to customer service
• business technology
• workplace documentation and resources
• complex customer complaints
• case studies and, where possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</table>

Application

This unit describes the skills and knowledge required to source information on design history and theory, and to apply that information in the individual’s design work.

It applies to individuals who work in design and need to develop and maintain a general knowledge of design history and theory.

More complex research into design theory and design trends is covered by BSBDES602 Research global design trends and BSBDES801 Research and apply design theory.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

### ELEMENT | PERFORMANCE CRITERIA
--- | ---
cross-referencing

| 2 Apply information to own area of work | 2.1 Evaluate information in the context of current design practice  
2.2 Assess which aspects of information on design history and theory could be used or adapted to inform current practice  
2.3 Use relevant information in a culturally appropriate way to develop an understanding of own area of work |

| 3 Update and maintain knowledge of design trends | 3.1 Identify and use opportunities to update and expand knowledge of design trends and developments  
3.2 Incorporate and integrate knowledge into design activities |

### Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

| Skill | Performance Criteria | Description |
--- | --- | ---
Reading | 1.1, 2.1, 3.1 |  
- Identifies, interprets and evaluates information on historical and current design trends from a range of sources |
Writing | 1.2, 3.1 |  
- Notes findings and sources of information for design knowledge, trends and developments  
- Documents information for colleagues and peers as requested |
Oral Communication | 1.1, 3.1 |  
- Asks questions to clarify information, listens to responses and shares ideas with others |
Navigate the world of work | 2.3 |  
- Understands main tasks, responsibilities and boundaries of own role |
Get the work done | 1.1, 1.2, 2.2, 3.2 |  
- Plans and implements tasks required to achieve required outcomes  
- Contributes to new approaches within immediate work environment  
- Takes responsibility for routine low-impact decisions within familiar situations  
- Follows routine procedures for using digital technology to enter, store and retrieve information |

Performance Evidence

Evidence of the ability to:

- show how the history and theory of design can be adapted and used in own professional practice
- maintain currency of theoretical and design knowledge.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise current design trends
- describe the evolution of design
- identify the organisational information practices and their application
- outline sources of information on design history and theory relevant to own design work.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to information sources on design history and theory.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer.

It applies to individuals who work as a designer, in any industry context, either independently or employed by an organisation.

Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Performance Evidence

Evidence of the ability to:
- use strategies to develop or extend skills, ideas and a unique voice
- adjust work processes as a result of peer feedback and self-evaluation
- research work options, networking and promotional opportunities and incorporate information into own work and career development.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- list current and emerging designers in the relevant design discipline
- discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent
- identify professional development information and resources available to designers
- summarise sources of information relating to work opportunities and career planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.

Assessors must satisfy NVR/AQTF assessor requirements.

<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design. The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.

It applies to individuals who implement concepts and solutions in response to a design challenge in any industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

<table>

| 1 Organise resources for realising the design solution | 1.1 Confirm the nature and scope of the proposed design solution  
1.2 Research resources required for developing the design concept to implementation stage  
1.3 Investigate different factors impacting the selection and use of resources  
1.4 Select and prepare resources based on research and other |
### ELEMENT | PERFORMANCE CRITERIA
---|---
| **legislative or organisational requirements**

#### 2 Test the design solution

2.1 Experiment with a range of different techniques and processes to test the design solution  
2.2 Evaluate, challenge and refine testing processes  
2.3 Gain input and feedback from key stakeholders during testing  
2.4 Accurately document outcomes of testing  
2.5 Select final design solution based on outcomes of testing and input from others

#### 3 Develop prototype or model

3.1 Create prototype or model based on agreed approaches  
3.2 Select and organise materials, tools and equipment, where appropriate, according to chosen design solution  
3.3 Expose model or prototype to quality checks and ongoing analysis, enhancement and refinement  
3.4 Compare completed prototype or model against identified needs and other considerations and make adjustments as required

#### 4 Present prototype or model

4.1 Identify key stakeholders design should be presented to  
4.2 Select appropriate format for presentation based on nature of audience and design  
4.3 Present prototype or model to optimise clarity, conciseness and appeal

### Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Performance Evidence

Evidence of the ability to:

- undertake critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need
- present model to key stakeholders using the most appropriate best practice methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in relevant design context
- describe key features of the wider industry, with the economic, social and historical context for the design solution
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant context
- summarise sources of information that support the development of technical and other knowledge
- describe the technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- other people to reflect the collaborative nature of the design process
• resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Performance Evidence

Evidence of the ability to:
- develop and finalise at least TWO design briefs for a specific industry purpose
- demonstrate highly-developed interpersonal skills, self-evaluation techniques and the ability to seek expert advice when required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- discuss the legal issues that affect negotiations and contracts in the relevant work context
- explain the design process within the specific industry context/design discipline
- compare and contrast the scope, nature and potential variations that occur within design briefs relevant to a specific context
- identify sources of information to assist the development of design concepts within a specific industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:
- appropriate equipment and media to communicate and present ideas and concepts
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling debtors’ and creditors’ systems, preparing and maintaining a general ledger and trial balance and includes activities associated with monitoring cash control for accounting purposes.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts and may exercise discretion and judgement using appropriate theoretical knowledge of financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Performance Evidence

Evidence of the ability to:

- maintain daily transactions and identify and respond to discrepancies and errors
- transfer and record financial data accurately
- reconcile expenditures and revenue in a timely manner.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation, codes of practice and national standards that may affect financial record keeping
- discuss organisational policies and procedures relating to maintaining financial records
- define credits/creditors and debits/debtors
- describe principles of double entry bookkeeping and accrual accounting
- identify methods of presenting financial data.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer equipment and relevant software
- examples of source documents relating to financial record keeping
- case studies and, where possible, real situations.
Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- organise and present financial data to highlight relevant features and meet workplace requirements including:
  - budget variances
  - budgets and forecasts
  - cash flow/profit reports
  - balance sheets
  - financial year reports
  - operating statements
  - expenditure and receipts
  - profit and loss statements
  - use conversion and consolidation procedures such as moving averages, standardised variables, trend analysis and unit costs
  - identify, resolve or refer discrepancies such as:
    - absence of auditable trail
    - expenditure report mismatches
    - incorrect payments and unreconciled cash flows
    - record income and expenditure to meet statutory requirements
    - calculate liabilities for tax including completing Business Activity Statements, where applicable
    - provide financial business recommendations
    - apply knowledge of relevant legislation and regulations
    - perform double entry bookkeeping and accrual accounting.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.
Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key provisions of legislation, regulation and codes of practice relevant to financial operations
- key techniques used for forecasting and analysis
- key features of the options, methods and practices for deductions, benefits and depreciations
- current business taxation requirements for preparing corporate accounting reports
- current financial legislation and statutory requirements relating to taxable transactions and reporting requirements
- ethical requirements associated with preparing financial reports for corporate entities, including conflict of interest, confidentiality, and disclosure requirements
- industry-standard methods and formats used to present financial data.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer with relevant software
- examples of financial data, reports and documents
- workplace financial policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

### Oral Communication

- Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience
- Uses active listening and questioning to clarify information and to confirm understanding

### Numeracy

- Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans

### Navigate the world of work

- Recognises, understands and adheres to organisational requirements in undertaking own work

### Interact with others

- Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge

### Get the work done

- Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines
- Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financial record keeping and auditing
- describe the principles and techniques involved in managing:
  - budgeting
  - cash flows
  - electronic spreadsheets
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to execute tasks associated with the recruitment cycle and apply in-depth knowledge of the work of the organisation, and how recruitment and selection practices fit with other human resources functions.

This unit applies to individuals who support recruitment, selection and induction functions under the direction of a human resource manager.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate’s agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies
• explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

• workplace policies and procedures
• business technology
• position descriptions
• legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to manage all aspects of recruitment selection and induction processes in accordance with organisational policies and procedures.

It applies to individuals or human resource personnel who take responsibility for managing aspects of selecting new staff and orientating those staff in their new positions. It is not assumed that the individual will be directly involved in the selection processes themselves, although this may well be the case.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- develop or critically analyse a policy and procedures framework for recruitment, selection and induction
- identify the need for recruitment
- prepare and oversee appropriate documentation required for recruitment
- select and advise job applicants appropriately
- manage the induction process
- comply with relevant legislation and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe recruitment and selection methods, including assessment centres
- explain the concept of outsourcing
- describe the purpose of employee contracts and industrial relations
- summarise relevant legislation, regulations, standards and codes of practice that may affect recruitment, selection and induction
- explain why terms and conditions of employment are an important aspect of recruitment
- explain the relevance of psychometric and skills testing programs to recruitment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:
Assessment Requirements for BSBHRM506 Manage recruitment selection and induction processes

Date this document was generated: 18 March 2019

- an appropriate range of documentation and resources normally used in the workplace
- relevant organisational policies and procedures
- relevant legislation, regulations and codes of practice
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:
- collect and process workplace information according to organisational policies and procedures and related regulatory requirements
- record and document information accurately within expected timeframes
- store, classify and maintain documents and records correctly.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify key provisions of relevant legislation, regulations, standards and codes of practice that may affect information management
- outline organisational policies and procedures relating to collecting and processing workplace information
- identify and describe organisational recordkeeping/filing systems and security procedures
- describe a range of filing systems including paper-based and software-based.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:
- office equipment and resources
- examples of workplace information systems.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to implement and review the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information which plays a significant part in the organisation’s effectiveness.

It applies to individuals whose work will normally be carried out within routine and non-routine methods and procedures which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Performance Evidence

Evidence of the ability to:

- identify, source and analyse information to determine:
  - information system needs
  - whether it is fit for purpose
  - trends and developments
- implement and review the workplace information system
- review a workplace information system and prepare and present a submission recommending improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the information systems that are, or should be, available in the workplace
- explain the information management systems and technology typically associated with the workplace including:
  - budgets and financial management systems
  - customer information software or records
  - databases
  - personal digital assistant (PDA)
  - product and service information
  - project management software
  - record management systems
  - spreadsheets.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- business technology
- a workplace information system
- workplace policies and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to effectively identify, select and use available methods of digital communication in a workplace context. Such methods may include electronic mail (email), instant messaging and other similar applications/web-based platforms.

It applies to individuals who use digital technology to communicate with business stakeholders (including co-workers and customers). This will be particularly relevant to individuals in teams that work remotely. The individual will use a limited range of practical skills and fundamental knowledge in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Identify methods for digital communication</td>
<td>1.1 Identify purpose for communication, intended audience and content of proposed communication (including whether it is commercially sensitive)</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify available digital communication applications by accessing relevant sources of information and clarify with relevant</td>
</tr>
</tbody>
</table>
### ELEMENT

<table>
<thead>
<tr>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>personnel as required</td>
</tr>
<tr>
<td>1.3 Select most appropriate application for communication in accordance with available resources and relevant organisational policies and procedures</td>
</tr>
</tbody>
</table>

2. Implement procedures to send and receive digital communications

| 2.1 Access application/platform for sending and receiving digital communications in accordance with organisational policies and procedures |
| 2.2 Create outgoing digital communication, checking for accuracy and ensuring that any required attachments are prepared in accordance with organisational and technology provider requirements |
| 2.3 Identify urgent, confidential, personal, suspicious or potentially dangerous email and take appropriate action, clarifying with relevant personnel as required |
| 2.4 Access and determine most appropriate action in response to incoming digital communications, in accordance with organisational policies and procedures |

3. Manage digital communications effectively

| 3.1 Set security levels and/or filters for incoming digital communications in accordance with organisational policies and procedures |
| 3.2 Create plan for monitoring and maintaining digital communications across multiple applications/platforms in accordance with organisational policies and procedures |
| 3.3 Store digital communications and/or attachments in accordance with policies and procedures |
| 3.4 Empty inboxes and archive or permanently delete in accordance with organisational policies and procedures |
| 3.5 Create methods for communicating electronically with targeted groups of stakeholders as relevant to organisation |

### Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 3.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- identify suitable methods for digital communication in the context of the purpose and content of the proposed communication
- follow organisational and technology provider requirements when communicating electronically across multiple digital applications/platforms, including in relation to security of communications
- follow organisational policy and procedures when managing all aspects of digital communication, including by storing, filing and archiving/deleting inbound communications
- communicate electronically with targeted groups of colleagues, clients or similar as relevant to organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of existing and emerging methods of digital communication, including strengths and limitations of each
- Key features of relevant industry practice relating to digital communication etiquette in a workplace setting
- Key features of commercial sensitivities in relation to knowledge management
- Key features of relevant organisational policies and procedures relating to the use of digital communication

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry technology
- relevant organisational policies and procedures
- relevant workplace documentation and resources
- industry applications/platforms for communicating digitally.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- design spreadsheets that address a range of data and organisational requirements
- use software functions, graphics and support materials to create spreadsheets
- apply knowledge of formatting requirements for workplace documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formatting requirements of workplace documents
- identify organisational guidelines on spreadsheet design and use
- explain organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:
- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
  - selecting layout and style
  - opening and generating files
  - producing documents within designated timelines
  - naming and storing documents
  - printing and presenting documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify appropriate technology for production requirements
- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- follow organisational and safe work practices including:
  - ergonomic requirements
  - energy and resource conservation techniques
- adhere to organisational requirements for:
  - producing documents within designated timelines
  - naming and storing documents
- adhere to task requirements when producing complex documents including:
  - using appropriate styles and layout consistently throughout the document
  - using correct formatting and document structure
- resolve issues by referring to user documentation and online help
- use appropriate data storage options
- apply knowledge of complex operation and functions of industry software applications
- communicate with relevant personal.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline various formatting styles and their effect on formatting, readability and appearance of documents
- explain organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- describe purpose and contents of an organisational style guide.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant workplace documentation and resources
- industry software packages and user instructions.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to design and produce complex desktop published documents.

This unit applies to individuals employed in a range of work environments who require well-developed skills in desktop publishing. They may be individuals providing administrative support within an enterprise, or others responsible for production of their own documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Prepare to produce desktop published documents

1.1 Use safe work practices including addressing ergonomic requirements and using work organisation strategies

1.2 Use energy and resource conservation techniques

1.3 Identify document purpose, audience, presentation and final output requirements, and clarify with relevant personnel as required

1.4 Identify organisational and task requirements for desktop
<table>
<thead>
<tr>

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

</thead>
</table>
### Writing

- Criteria: 1.1, 4.2
- Prepares workplace plans that communicate intent and elicits feedback clearly and effectively

### Oral communication

- Criteria: 1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2-4.4
- Engages in discussions or provides information using structure and language appropriate to the audience and situation

### Interact with others

- Criteria: 1.1-1.3, 2.1-2.5, 3.1, 3.3, 4.1
- Selects and uses appropriate conventions and protocols when communicating with team members
- Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others
- Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others

### Get the work done

- Criteria: 1.1-1.3, 3.2
- Develops, implements and monitors plans and processes to ensure team engagement and effectiveness
- Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others as required

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning
• workplace innovation
• workplace productivity.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

• information about the organisation, including organisational structure, goals, objectives and plans
• case studies, and where possible, real situations
• workplace equipment and resources
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:
- make and justify decisions regarding accessioning and de-accessioning collection material to meet collection needs
- apply organisational procedures and guidelines to manage development of collections
- negotiate and document processes and agreements in relation to collection material.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- identify and interpret organisational procedures and guidelines regarding managing specific items and whole collections
- identify and explain the purpose of subject matter expertise, including curatorial and conservation
- locate and interpret sources for accessioning and de-accessioning options
- interpret and explain information regarding comparable collections and their importance
- describe legal, ethical and financial requirements for accessioning and de-accessioning
- locate and interpret cultural protocols for collections development and management that impact accessioning and de-accessioning of cultural material, including those for Aboriginal or Torres Strait Islander material
- explain security issues associated with collection material.
Assessment Requirements for BSB1B502 Manage the development of collections

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Collection Management field of work and include access to:

- an established or proposed collection as basis of decision-making
- organisational objectives, procedures and guidelines
- relevant personnel to reflect necessary communication and negotiation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>1.1-1.3, 1.5, 1.6, 2.2-2.4</td>
<td>- Analyses and interprets a wide range of information for incorporation into organisational practices and procedures</td>
</tr>
</tbody>
</table>
| Writing | 1.3, 1.5, 1.7, 2.4, 3.2 | - Develops and updates detailed procedures which clearly and concisely define organisational systems and practices  
- Develops documents using language understood by target audience |
Oral Communication 1.4, 1.5, 2.4, 3.1
- Elicits views and opinions of others and obtains information by listening and questioning
- Participates in a verbal exchange of ideas/solutions and uses inclusive and collaborative techniques to clarify and present information according to requirements and audience

Numeracy 2.2-2.4
- Interprets and uses budgets to meet required outcomes
- Works effectively with numerical recordkeeping systems to manage and monitor storage collection materials and operations

Navigate the world of work 1.3, 1.5-1.7, 2.1-2.3, 3.1, 3.2
- Works autonomously making high level decisions to achieve and improve organisational goals
- Develops and implements strategies to ensure organisational policies, procedures, timelines and regulatory requirements are met
- Monitors and reviews organisation’s policies, procedures and adherence to legislative requirements to implement and manage change

Interact with others 1.4, 1.5, 2.4, 3.1
- Uses a variety of strategies to build and maintain effective working relationships

Get the work done 1.1-1.7, 2.1-2.4, 3.1, 3.2
- Sequences and schedules complex activities, monitors implementation and manages relevant communication
- Plans, organises, implements and reviews systems and processes to manage compliance within relevant regulations and legislation
- Accepts responsibility for planning, prioritising and sequencing complex tasks and workload
- Gathers and analyses data and seeks feedback to improve plans and processes
- Evaluates effectiveness of systems and processes to inform decisions on how to implement improvements
- Uses problem-solving techniques to identify and analyse issues
- Uses main features and functions of digital tools to complete work tasks

Performance Evidence

Evidence of the ability to:

- develop procedures for moving and storing collection material
- implement and monitor procedures for moving and storing collection material
- integrate into procedures, internal, external and technical issues that impact movement and storage of collection material.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- assess copyright, moral rights and intellectual property legislation and issues that impact moving and storing collection material
- identify and interpret cultural protocols that affect movement and storage of material, including Aboriginal or Torres Strait Islander material
- outline legal and administrative requirements for moving and storing collection material
- interpret procedures and practices for protection, transportation, storage and security of collection material
- explain safety legislation and requirements that impact moving and storing collection material
- describe technical and conservation issues associated with moving and storing collection material.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Collection Management field of work and include access to:

- relevant policies and procedures manuals
- a collection, for which procedures can be planned.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation’s systems and procedures
- manage and support personnel to achieve performance objectives, including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to establish the strategic direction of the organisation, sustain competitive advantage and enhance competitiveness. It covers analysis and interpretation of relevant markets, capability assessment of the organisation and analysis of the organisation’s existing and potential competitors and allies. It also covers implementation of the strategic plan and developing specific actions and initiatives that will be undertaken by people working in various roles.

It applies to individuals working in senior roles in the organisation who have responsibility for ensuring that the organisation is positioned to ensure its long-term viability and success.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- consult and communicate effectively with relevant stakeholders to:
  - confirm or revise the organisation’s mission, vision and values
  - validate findings of research and analysis
  - get input to and endorsement of strategic plans
  - brief relevant parties about the plan
- analyse organisation’s internal and external environment to formulate strategic plans including:
  - background and research relevant to the plan
  - legislation, regulations and codes of practice, including for intellectual property
  - objectives, strategies and priorities
  - roles and responsibilities
  - performance indicators
  - timeframes
  - consideration of co-operative ventures
  - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
• outline the legislation, regulations and codes of practice relevant to the organisation’s strategic plan.
• give examples of risks and risk management strategies relevant to strategic planning including:
  • intellectual property rights and responsibilities
  • other risks
• outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
• identify internal and external sources of information relevant to the organisation’s market, competitors, customer base, vision, values and capabilities
• outline techniques for developing organisational values.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:
• relevant legislation, regulations, standards and codes
• workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements, marketing approaches and strategic, business and operational plans
- write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas
- implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate
- monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce
- consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers
- provide an analysis of the strengths and weaknesses of a business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline processes for developing business plans
- describe performance objectives and measures including key performance indicators
- identify key stakeholders.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- appropriate documentation and resources normally used in the workplace
- strategic, business and operational plans
- business information and data
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:
- develop, implement, monitor and review corporate governance
- access and interpret legislation and regulations to identify corporate governance compliance requirements
- research and analyse information to identify trends in corporate governance practices and reporting
- establish and implement processes for corporate governance adherence including determining corporate governance indicators and establishing a reporting plan
- meet statutory reporting requirements
- monitor compliance and analyse the causes of non-compliances including analysing governance reports, returns, review processes and the information technology system
- identify and implement corrective actions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- outline the legislation, regulations and statutory requirements and standards that relate to corporate governance obligations for the organisation including at least those covering:
  - finances and taxation
  - industrial relations, equal opportunity, employment records and superannuation
  - intellectual property
  - corporate entities
  - competition, ethical practice and consumer rights
  - work health and safety
• outline principles of internal control including statutory requirements
• understand statutory reporting requirements
• state the principles of valuation and apply common methods of depreciation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

• relevant legislation, regulations, standards and codes
• workplace documentation and resources including governance reports and returns
• business information technology systems
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to profile a target market or market segments in accordance with a marketing plan and to develop market positioning strategies.

It applies to individuals working in a variety of marketing communications occupational roles who have responsibility for a range of tasks involving analysis and planning.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Segment market</td>
<td>1.1 Identify criteria for use in segmenting market in accordance with marketing plan</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify and access sources of information for segmenting and profiling markets in accordance with marketing plan</td>
</tr>
<tr>
<td></td>
<td>1.3 Segment market in accordance with identified criteria</td>
</tr>
<tr>
<td></td>
<td>1.4 Review market segments for their usefulness in terms of factors such as their size, potential, distinctive needs, easy identification of members or distinctive media use patterns</td>
</tr>
</tbody>
</table>
### ELEMENT | PERFORMANCE CRITERIA
--- | ---
1.5 Select market segments to meet marketing objectives, and choose and apply new segmentation criteria if required

#### 2. Identify target market
2.1 Evaluate approaches to determining and describing total market for a product or service
2.2 Define target market in terms of consumers to be included as prospective users of a product or service, and selected market segments
2.3 Use segment descriptors to describe target market
2.4 Identify available strategic marketing options and select targeting strategies that best meet requirements of the marketing plan

#### 3. Profile target audience
3.1 Describe total market and selected market segments using a consumer profile
3.2 Identify consumer characteristics in standard statistical terms and/or descriptive terms used in media selection in consumer profile
3.3 Use demographic and/or psychographic descriptions in consumer profile in accordance with requirements of the marketing plan
3.4 Describe consumer attitudes to products or services being offered
3.5 Ensure profile meets organisational requirements of language, format, content and level of detail

#### 4. Develop positioning strategy
4.1 Identify available positioning strategies and choose a strategy to meet marketing requirements and consumer profile
4.2 Write a positioning implementation plan containing several options, in accordance with organisational requirements
4.3 Submit plan to supervisor within specified timelines and make appropriate adjustments based on feedback

### Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skills Impact
Reading
1.1-1.4, 2.1, 2.2, 2.4, 3.2, 3.3, 4.1
• Gathers, interprets and analyses a variety of textual information from a range of sources to identify relevant and key information

Writing
1.3, 2.2, 2.3, 3.1-3.5, 4.2, 4.3
• Prepares strategic business documentation incorporating appropriate vocabulary, grammatical structure and conventions appropriate to text and audience

Numeracy
1.1-1.5, 2.1, 2.2, 2.4, 3.2, 3.3
• Uses mathematical skills to interpret and process data and statistical information

Navigate the world of work
1.1, 1.2, 1.5, 2.4, 3.3, 3.5, 4.1, 4.2
• Adheres to implicit and explicit organisational goals, policies and procedures

Interact with others
4.3
• Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role

Get the work done
1.2-1.5, 2.1, 2.4, 4.1-4.3
• Develops and implements plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to organisational goals
• Makes decisions by systematically analysing information, identifying and evaluating options against set criteria, and choosing most appropriate option

Performance Evidence

Evidence of the ability to:

- develop a market positioning strategy that documents market segmentation, consumer profiling, targeting and strategies relevant to a product or service being offered to the marketplace.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant information relating to the Australian Marketing Institute Code of Professional Conduct
- outline requirements of legislation affecting marketing roles
- explain data collection and analysis techniques
- outline relevant industry knowledge including:
  - components of marketing mix
  - elements of marketing planning
- explain marketing communications concepts and processes
- identify organisational structures, roles, responsibilities, business and marketing plans
- demonstrate knowledge of relevant product and service standards and best practice models
- outline relevant statistical terms used by the Australian Bureau of Statistics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:
- work with others to plan and document a project based on organisational parameters
- complete and update all relevant documentation
- examine impact that project changes could have on final outcomes
- undertake project finalisation activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- explain basic project governance models
- describe project finalisation and evaluation products
- identify and describe project life cycle stages, phases and structures relevant to industry and project
- explain project planning documents and their specific formats relevant to industry and context
- outline key organisational policies and procedures
- describe various types of project initiation documentation
- identify types of project logs and registers in use in this context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:
- project documentation, including information about life cycle processes
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to assist in managing stakeholder relationships during a project. It involves ensuring timely and appropriate involvement of key individuals, organisations and groups throughout the project.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

Performance Evidence

Evidence of the ability to:
- work with others to establish various stakeholders needs and interests
- engage with project stakeholders using effective interpersonal skills and appropriate methods of communication
- select and use communications methods relevant to the project needs and stakeholder expectations
- complete all relevant documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- describe different types of stakeholders
- explain the different levels of stakeholder engagement on projects
- describe techniques and strategies for stakeholder engagement
- explain why the interests and expectations of stakeholders must be considered
- describe common problems leading to variances in stakeholder engagement.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:
- project documentation detailing stakeholder engagement
- examples of stakeholder engagement activities.
Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to undertake a straightforward project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

This unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

The unit does not apply to specialist project managers. For specialist project managers, the other units of competency in the project management field (BSBPMG) will be applicable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Performance Evidence

Evidence of the ability to:

- define the parameters of the project including:
  - project scope
  - project stakeholders, including own responsibilities
  - relationship of project to organisational objectives and other projects
  - reporting requirements
  - resource requirements
- use project management tools to develop and implement a project plan including:
  - deliverables
  - work breakdown
  - budget and allocation of resources
  - timelines
  - risk management
  - recordkeeping and reporting
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project
- finalise the project including documentation, sign-offs and reporting
- review and document the project outcomes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
• give examples of project management tools and how they contribute to a project
• outline types of documents and other sources of information commonly used in defining the parameters of a project
• explain processes for identifying and managing risk in a project
• outline the organisation's mission, goals, objectives and operations and how the project relates to them
• explain the organisation's procedures and processes that are relevant to managing a project including:
  • lines of authority and approvals
  • quality assurance
  • human resources
  • budgets and finance
  • recordkeeping
  • reporting
• outline the legislative and regulatory context of the organisation in relation to project work, including work health and safety (WHS) requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:
- use appropriate sources to document accurate information about the organisation’s products and services
- prepare and provide advice about products and services according to organisational requirements
- evaluate promotional activities including consideration of:
  - whether promotional materials meet organisational requirements
  - actual costs against budget
  - customer feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- list authoritative sources of information about the organisation’s products and services
- outline the organisation’s products and services
- outline the policies and procedures that apply when providing advice or recommendations about products and services
- list and describe organisational promotional activities
- explain methods used to gather verifiable customer feedback about products and services
- explain how and why customer feedback is analysed.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

- relevant organisational policies and procedures
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

**Performance Evidence**

Evidence of the ability to:

- identify clients' preferred communication styles and methods and potential barriers to communications and use appropriate communication styles and strategies
- apply communication techniques to establish rapport and promote two-way communication
- develop and implement client loyalty strategies and service standards based on business objectives and client information
- develop and implement strategies to elicit feedback from clients and use it to improve relationships and customer satisfaction
- maintain contacts and participate in formal and informal networks that support the business and enhance personal knowledge of the market.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

**Knowledge Evidence**

To complete the unit requirements safely and effectively, the individual must:

- give examples of strategies that can build client loyalty including those that focus on:
  - financial incentives and special offers
  - premium services and private/dedicated facilities
  - loyalty programs, rewards and recognition
- outline issues that are commonly addressed in client care/service standards in the industry
- outline typical barriers to communicating with clients and possible strategies to address them
- give examples of strategies for feedback
- describe the principles and techniques for effective communication and networking
- outline networking opportunities relevant to the business with reference to:
• government, industry and professional associations
• trade shows, conferences, briefings and other professional development activities
• existing groups or networks
• businesses and individuals
• outline aspects of organisational policies, procedures and processes that are relevant to communicating with clients and participating in networks.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations - relationship management field of work and include access to:
• relevant workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality of the information, and preparing and producing reports.

It applies to individuals who are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Performance Evidence

Evidence of the ability to:
- identify or confirm research requirements and objectives
- gather, organise and present workplace information and data
- update, modify, maintain and store information
- maintain and handle data and documents systematically and securely
- prepare and produce reports including:
  - recommendations based on the analysis of information
  - clear and justified assumptions and conclusions
  - use of efficient, valid and reliable methods
- use Boolean operators and other search tools
- analyse, evaluate and interpret data to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- explain organisational systems for recordkeeping/filing, including security procedures
- identify organisational policies and procedures and legal and ethical obligations relating to workplace information
- explain concepts related to research and analysis including reliability and validity
- give examples of techniques for data analysis and how they are applied
- explain research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- identify research requirements and objectives
- gather, organise and present research information
- communicate effectively with research stakeholders to clarify requirements
- maintain and handle information and documents systematically and securely
- preparing reports on research findings including:
  - recommendations based on the analysis of research information
  - clear and justified assumptions and conclusions
  - use of efficient and reliable research methods
- analyse, evaluate and interpret research information to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of organisational policies and procedures relating to:
  - the access of digital information
  - the storage/transmission of information
  - legal and ethical obligations relating to workplace information
- key concepts related to research and analysis including reliability and validity
- key features of research processes and strategies to identify new sources (online and print) of information and efficient and effective use.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
  - specific research questions or hypotheses
  - valid population or sample size
  - description of the geographical, cultural, social or institutional context within which the research will be carried out
  - full description of the data collection methods
  - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques
• describe reporting methods
• explain research ethics and codes of conduct
• give examples of applied research tools and methods and how they are applied.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

• business technology
• relevant workplace policies and procedures
• relevant legislation and codes of conduct
• case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

</tr>
</thead>
<tbody>
<tr>
<td>4.1 Regularly review implemented treatment/s against measures of success</td>
</tr>
<tr>
<td>4.2 Use review results to improve the treatment of risks</td>
</tr>
<tr>
<td>4.3 Provide assistance to auditing risk in own area of operation</td>
</tr>
<tr>
<td>4.4 Monitor and review management of risk in own area of operation</td>
</tr>
</tbody>
</table>

### Foundation Skills

_Each section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance._

<table>
<thead>
<tr>
<th>Skill</th>
<th>Performance Criteria</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>1.2</td>
<td>• Comprehends documents and texts of varying complexity to extract and analyse relevant information</td>
</tr>
<tr>
<td>Writing</td>
<td>1.3, 2.1, 2.3, 3.5</td>
<td>• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes</td>
</tr>
</tbody>
</table>
### Oral communication 2.1
- Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding

### Numeracy 1.2, 4.1
- Uses numerical tools to assess risk and uses numerical data to review plans

### Navigate the world of work 1.1, 1.3, 3.3
- Complies with organisational and legislative requirements
- Takes responsibility for identification and management of risk within own work context and refers matters to others as required

### Interact with others 2.1
- Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements

### Get the work done 1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.3, 4.4
- Determines job sequence and works logically and systematically to undertake defined tasks
- Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures
- Evaluates effectiveness of plans and results to inform improvement decisions
- Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk management field of work and include access to:
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Performance Evidence

Evidence of the ability to:
- analyse information from a range of sources to identify the scope and context of the risk management process including:
  - stakeholder analysis
  - political, economic, social, legal, technological and policy context
  - current arrangements
  - objectives and critical success factors for the area included in scope
  - risks that may apply to scope
- consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes
- develop and implement an action plan to treat risks
- monitor and evaluate the action plan and risk management process
- maintain documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- outline organisational policies, procedures and processes for risk management.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

</tr>
</tbody>
</table>
3.5 Refine the system for recording prospect information based on evaluation of system

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

literacy skills to interpret legal requirements, company policies and procedures
research and data analysis skills to determine prospect requirements
technology skills to design and record formats to facilitate information storage and retrieval.

Required knowledge

principles of buyer motives
identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:
anti-discrimination

ethical principles
consumer protection
contract law
privacy laws
Trade Practices Act

benefits and key features of own organisation’s and competitors’ products
information management strategies used to manage prospect data
prospecting methods used in the sales process.

Evidence Guide
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

Evidence of the following is essential:
- demonstration of the use and management of different prospecting methods targeting a present, previous and new client
- research and establishment of criteria used in qualifying leads identified through prospecting methods
- recording, storage and retrieval of prospect information.

**Context of and specific resources for assessment**

Assessment must ensure:
- access to an actual workplace or simulated environment
- access to organisational sales prospect information, databases and records.

**Method of assessment**

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- analysis of responses to case studies and scenarios
- assessment of criteria developed to qualify sales leads
- demonstration of prospecting methods
- direct questioning combined with portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of use of prospecting methods
- oral or written questioning to assess knowledge of principles of buyer motives
- review of research undertaken to establish criteria for qualifying leads
- evaluation of the system developed to record prospect information.
Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:
- customer service units
- other sales units.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Prospecting methods** may include:
- brokers
- cold canvassing
- databases
- direct mail
- internet
- intra organisational leads
- journals
- magazines
- media advertising
- networking
- newspapers
- personal observation
- public records
- referrals
- spotters
- telemarketing

**Products** may include:
- goods
- ideas
- services
**Clients** may include:

- consumers
- customers
- members
- patients
- members of other business units within an organisation
- other work teams within an organisation
- person or organisation who receives or has the potential to receive products, services or ideas supplied by the organisation

**Buyer motives** may include:

- browsing
- buying for unqualified prospect e.g. dependant
- gift
- housekeeping
- replacement item
- self reward
- self-gratification

**Unit Sector(s)**

- empty
- empt

**Competency field**

Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
  - following taxation and industrial relations principles
  - updating and maintaining legal documents
  - investigating areas of non-compliance
  - monitoring provision of products and services
  - taking corrective action where necessary
- negotiate and arrange contracts, including:
  - seeking legal advice
  - investigating procurement rights
  - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including:
  - prioritising risks with highest probability of occurrence and greatest negative impact on the business
  - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.
Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- develop a financial plan which identifies financial requirements of the business, including cash flow projections and a projected profit statement
- follow the financial plan, including:
  - demonstrating an awareness of appropriate legal requirements
  - implementing strategies to monitor financial performance
- identify sources and investigate costs of securing appropriate financial assistance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain break-even analysis
- clarify costing for the business, including margin or mark-up, hourly charge-out rates and unit costs
- summarise financial decision-making relevant to the business
- outline methods and relative costs of obtaining finance
- summarise principles for preparing balance sheets
- provide a detailed explanation of:
  - principles for preparation of cash flow forecasts
  - principles for preparation of profit and loss statements
- purpose of financial reports
- explain relevant accounting terminology
- describe working capital cycles.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- software for financial calculations
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to monitor and improve business performance via a clear marketing strategy integrated into the business plan.

It applies to individuals who operate a small business independently or within a larger organisation. Individuals in this role analyse and interpret market data.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Performance Evidence

Evidence of the ability to:
- determine marketing activity focus in line with objectives of the business plan
- evaluate customer base
- understand what is ethically and culturally appropriate
- determine a marketing mix according to market and business needs, including:
  - ability to optimise sales and profit
  - ability to evaluate costs and benefits
  - determine customer needs and promotional activities
- determine marketing strategies, including briefing appropriate personnel on their responsibilities
- identify marketing opportunities in the digital environment
- develop approaches to engage, respond and monitor customers in the digital space
- monitor and evaluate activities and performance, and correct performance gaps
- consult and communicate effectively with relevant people
- research and monitor ongoing changes and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
• discuss industry market trends
• identify performance evaluation methods
• explain methods of analysing costs and benefits of marketing strategies
• summarise methods of developing marketing objectives and marketing mix
• compare current digital devices, platforms and technologies for effectiveness in achieving marketing objectives
• outline methods of monitoring customer satisfaction
• identify relevant market analysis and research
• provide a detailed explanation of relevant marketing concepts and methods.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:
• business technology
• software for analysis of data
• workplace documents and case studies or where possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Identify elements of the business plan</td>
<td>1.1 Identify purpose of the business plan</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify and review essential components of the business plan</td>
</tr>
<tr>
<td></td>
<td>1.3 Identify and document business goals and objectives as a basis for measuring business performance</td>
</tr>
</tbody>
</table>
## ELEMENT

### PERFORMANCE CRITERIA

2. Develop a business plan

2.1 Research resources, legal and compliance requirements, specifically in relation to work health and safety (WHS), in accordance with business goals and objectives

2.2 Research market needs, and market size and potential

2.3 Identify sources and costs of finance, from financial plan, to provide required liquidity and profitability for the business

2.4 Identify methods, from marketing strategies, to promote market exposure of the business

2.5 Identify methods or means of production or operation from production or operations plan to conform with business goals and objectives

2.6 Identify staffing requirements to effectively produce or deliver products and services

2.7 Identify, assess and prioritise internal and external risks

2.8 Identify specialist services and sources of advice, where required, and cost in accordance with available resources

3. Develop strategies for minimising risks

3.1 Identify specific interests and objectives of relevant people and seek and confirm their support of planned business direction

3.2 Identify and develop risk management strategies according to business goals and objectives, and relevant legal requirements

3.3 Develop a contingency plan to address possible areas of non-conformance with the plan

### Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Performance Evidence

Evidence of the ability to:
- develop a business plan which provides for finance, marketing and provision of products or services to facilitate all business goals and objectives
- identify and plan all work health and safety (WHS) and duty of care responsibilities
- identify and assess internal and external risks to the business
- develop risk management strategies including a contingency plan for non-conformance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- discuss all government legislative requirements relating to business operation, especially in regard to WHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- explain methods of evaluation
- summarise WHS responsibilities and procedures for identifying hazards relevant to the business
- outline planning processes
- describe preparation of a business plan
- identify principles of risk management relevant to small business planning
- outline common risks particular to the small business type or industry
- explain reasons for, and benefits of, business planning
• clarify relevant industry codes of practice
• outline setting goals and objectives
• explain types of business planning – feasibility studies; strategic, operational, financial and marketing planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

• business equipment and resources
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies or where possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an action plan
  - identifying risk management procedures
  - developing a quality system
  - implementing performance measures
  - utilising technologies to optimise business performance
- implement and monitor strategies and procedures developed, including:
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
  - record and research business improvements
  - make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.
Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise relevant industry codes of practice
- explain methods for implementing operation and revenue control systems
- summarise methods for monitoring performance and implementing improvements
- outline work health and safety (WHS) responsibilities and procedures for managing hazards
- identify relevant principles of risk management, including risk assessment
- clarify quality system principles and methods
- summarise relevant performance measures
- discuss role of innovation
- outline systems to manage staff, stock, expenditure, services and customer service
- identify technical or specialist skills relevant to business operations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- operate the business according to the business plan, including:
  - adhering to legal requirements
  - meeting requirements of financial backers
  - defining strategies for debt collection and contingencies for debtors
  - managing cash flow
  - defining key performance indicators
  - communicating with relevant people
  - monitor the business against financial plan and make changes as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss benchmarking
- explain financial decision-making relevant to the business
- summarise significant financial indicators
- outline purposes of financial reports
- clarify preparation and interpretation of budget/actual reports
- identify principles for preparing balance sheets and their interpretation
- outline debt collection procedures or strategies
- characterise principles for preparing profit and loss statements and their interpretation
- discuss stock records and stock control relevant to the business.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

| Release 1 | This version first released with BSB Business Services Training Package Version 1.0. |

Performance Evidence

Evidence of the ability to:

- use the business plan to:
  - determine staffing requirements
  - coordinate skill-gap training where required
  - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation
• explain work health and safety (WHS) responsibilities and procedures for managing hazards
• summarise relevant industry awards or enterprise agreements
• outline staff development pathways
• identify training course options for staff development
• summarise staff counselling, grievance and disciplinary procedures
• identify unfair dismissal legislation and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

• business equipment and resources
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies or where possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- develop strategies and procedures to successfully manage business operations, including:
  - developing an operational plan
  - identifying risk management procedures
  - developing a quality assurance process
  - developing and implementing performance measures
  - utilising existing, new and emerging digital technologies to optimise business performance
- implement and evaluate strategies and procedures developed, including:
  - controlling stock, expenditure, and work health and safety risks
  - identifying and meeting staffing requirements
  - analysing and correcting business problems
  - reviewing and adjusting the business plan
- record and research business improvements, including the potential to implement new and emerging digital technologies
- make appropriate adjustments to business operations as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of relevant legislation and industry codes of practice
- Key features of methods for implementing operation and revenue control systems
• Key features of methods for evaluating performance and implementing improvements
• Key features of work health and safety (WHS) responsibilities and procedures for managing hazards
• Key features of relevant principles of risk management, including risk assessment
• Key features of quality assurance system principles and methods
• Key features of the role of digital technologies and innovation in modern business
• Key features of systems to manage staff, stock, expenditure, services and customer service
• Key features of required technical or specialist skills relevant to business operations.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

• business equipment and resources, including business technology
• relevant legislation, regulations, standards and codes
• relevant workplace documentation and resources
• case studies or possible, real situations
• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

It applies to individuals with responsibility for a specific area of work or who lead a work group or team and addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

<td>Version created to better align unit to AQF level.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
  - measure current resource usage
  - solve problems and generate ideas for improvements
  - evaluate and implement strategies to improve resource usage
  - plan, implement and integrate improvements into operations
  - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements
• explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues

• outline common environmental and energy efficiency issues within the industry

• give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation

• outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
  • supply chain, procurement and purchasing
  • quality assurance
  • making recommendations and seeking approvals

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

• relevant legislation, regulations, standards and codes

• relevant workplace documentation and resources

• case studies or, where possible, real situations

• interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Application

This unit describes the skills and knowledge required to understand and comply with work health and safety (WHS) Acts, regulations and codes of practice in the workplace.

This unit applies to individuals who contribute to actions to achieve compliance with WHS legislation as part of their WHS responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## ELEMENT

### PERFORMANCE CRITERIA

**the workplace**

1.2 Apply knowledge of the relationship between WHS Acts, regulations and codes of practice to assist in identifying WHS legislative requirements in the workplace

1.3 Identify duty holders

1.4 Identify legal obligations and duties for who to consult with regarding training of workers and health and safety representatives

1.5 Identify consequences of non-compliance with WHS Acts, regulations, codes of practice, standards and organisational WHS policies, procedures, processes and systems

**2. Contribute to activity that reflects WHS legislative requirements**

2.1 Contribute to monitoring compliance with legislation

2.2 Contribute to ensuring that workplace complies with legislation

2.3 Identify and take appropriate action on non-compliance with legislation

2.4 Recognise limits of own expertise and legal duties, and access help and advice when required

**3. Keep up-to-date with legislation and relevant publications**

3.1 Use relevant sources to keep up-to-date with legislation and relevant publications

3.2 Communicate information on relevant legislative changes and relevant publications to others

Performance Evidence

Evidence of the ability to:
- identify and apply work health and safety (WHS) legislative requirements applicable to the workplace, occupation and industry, including keeping up to date with legislation and relevant publications
- identify and act on non-compliances with WHS legislation
- identify duty holders
- communicate WHS information to others
- refer issues of non-compliance to responsible persons or authorities and seek advice from appropriate sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- explain the WHS legislative duties of self and others including limits on own expertise
- outline the key organisational WHS policies, procedures, processes and systems
- outline the key requirements in relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- identify obligations and duties for consultation and who must be consulted
- identify people who could be accessed for help
- identify the consequences of non-compliance
- explain ways to get information about compliance with legislation.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans with information on compliance requirements
- relevant Acts, regulations, codes of practice, licensing requirements and standards
- guidance materials and alerts issued by the relevant WHS regulator
- relevant WHS data files
- appropriate office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

<thead>
<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with BSB Business Services Training Package Version 1.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- identify and interpret information and data about work health and safety (WHS) requirements and apply it to the selection and application of techniques, tools and processes for hazard identification, risk assessment and risk control and the development of a risk control plan
- contribute to documenting and evaluating risk management processes
- communicate about WHS requirements and compliance with a range of people
- comply with WHS requirements for hazard identification, risk assessment and risk control activities
- identify WHS duty holders and their duties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the WHS risk management (hazard identification, risk assessment and risk control) requirements specified in:
  - relevant WHS Acts and regulations
  - organisational WHS policies, procedures, processes and systems
- explain the difference between hazards and risks in the work context
- outline a range of common workplace hazards, the harms they may cause and how these harms are caused
- explain how risk assessment and controls can eliminate or minimise risks
- identify internal and external sources of WHS information and data and how to access them.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- relevant legislation, standards and guidelines
- relevant policies, procedures, processes and systems
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- identify, interpret and apply information from a range of sources to contribute to the development, implementation, monitoring and evaluation of a systematic approach to work health and safety (WHS) risk management
- apply WHS Acts, regulations, codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks
- identify duty holders
- explain the differences between a hazard and a risk and identify hazards and risks in the organisation
- prepare an action plan to implement a systematic approach to WHS risk management
- prepare positive performance indicators for evaluation of a systematic approach to WHS risk management
- consult effectively with relevant stakeholders.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formal and informal communication and consultation processes, and key personnel related to communication, including duty holders
- explain how the characteristics and composition of the workforce impact on WHS risk and the management of WHS with reference to:
  - communication skills
  - cultural background/diversity
  - gender
  - labour market changes
Assessment Requirements for BSBWHS503 Contribute to the systematic management of WHS risk

- language, literacy and numeracy
- structure and organisation of the workforce, for example part time, casual and contract workers, shift rosters, geographical location
- workers with specific needs and limitations
- workplace culture towards alcohol and other drug use
- describe internal and external sources of WHS information and data, and explain how to access these sources
- outline the limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- describe the nature of workplace processes including work flow, planning and control and hazards relevant to the workplace
- describe organisational behaviour and culture as it impacts on WHS, change and the work team
- describe the key features of organisational WHS policies, procedures, processes and systems
- identify other functional areas in the organisation that impact on the management of WHS
- outline the key features of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material
- describe the key principles and/or practices of:
  - a systematic approach to managing WHS
  - duty of care including concepts of causation, foreseeability and prevention
  - incident causation and injury processes
- describe risk analysis and assessment techniques and tools, and their application and limitations
- explain risk, as the effect of uncertainty, on objectives
- explain the duty of persons conducting businesses or undertakings (PCBUs) in regard to risk management under WHS legislation
- describe the sources of occupational disease and their prevention
- describe standard industry controls for hazards
- describe techniques, tools and processes for identifying and controlling health and safety hazards and risks including:
  - hazard and risk checklists
  - hazard hunts
  - job safety analysis
  - manifests and registers including dangerous goods, hazardous chemicals and plant
  - safe work method statements
  - surveys using questionnaires, interviews and other survey techniques
  - workplace inspections and walk throughs
- describe the key features of the toxicology of hazardous chemicals and potential health effects in the workplace.
**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant WHS legislation, standards, codes of practice and guidelines
- workplace policies and procedures and documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to effectively manage work health and safety (WHS) hazards and to comply with WHS legislation as it applies to the management or control of plant (not the design, manufacture, supply, installation, construction or commissioning of plant or issuing of licences associated with plant).

It applies to individuals who may provide leadership and guidance to others using managerial and communication skills and who use systematic approaches to identify and resolve issues.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Performance Evidence

Evidence of the ability to:

- manage effective identification of hazards and develop risk control options for the operation of plant as defined in work health and safety (WHS) legislation
- develop, implement, monitor and modify WHS policies and procedures for the operation of plant
- use relevant systems and procedures in the operation and maintenance of plant
- implement general licensing and training requirements associated with plant
- identify, record and report on WHS hazards and assessing risk
- develop and implement risk control options
- communicate in the workplace to:
  - advise people of their rights, obligations and duties
  - consult about policies and procedures
  - identify hazards
  - assess WHS risk
  - advise people about registration, licensing and certification requirements
- use machinery safety control measures to control plant risks, including following registration and licensing requirements
- identify training needs and organise training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the basic principles of incident causation and injury processes
- explain the differences between a hazard and a risk
• identify factors that impact on risk
• explain the hierarchy of control and considerations for choosing between different risk controls
• identify high-risk work licences required for specific plant
• identify internal and external sources of WHS information and data, and explain how to access these sources
• discuss the management of risk associated with plant as a duty of a person conducting a business or undertaking (PCBUs) under WHS legislation
• describe the methods for providing evidence of compliance with WHS legislation
• outline workplace processes (such as work flow, planning and control) and hazards relevant to the workplace
• discuss organisational behaviour and culture as it impacts on WHS, change and work team
• describe the key features of organisational WHS policies, procedures, processes and systems
• identify other functional areas that impact on the management of WHS
• outline key features of plant specific knowledge including:
  • basic physics of fluids under pressure and pressure vessels, and the behaviour of pressurised fluid when pressure is released
  • duties, rights and obligations of individuals and parties specified in WHS legislation
  • hazards associated with plant and systems of work associated with plant
  • industry practices related to permit to work and isolation and tag out systems
  • registration requirements of plant, licensing and certification competencies
• describe the key principles and practices of a systematic approach to managing WHS
• describe the strategies for guarding moving parts in machinery, human factors related to machine guarding, safe design principles, features and limitations
• outline the key features of WHS Acts, regulations, codes of practice and other instruments issued by WHS regulators.

**Assessment Conditions**

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

• manufacturers’ manuals including specifications and operational information and data
• relevant WHS Acts, regulations, codes of practice, standards, guidelines
• sources of information, data and advice
• workplace policies and procedures
• workplace equipment and resources
• case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to select and use computer software and organise electronic information and data.

It applies to individuals who apply a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Performance Evidence

Evidence of the ability to:
- select and use technology safely and according to organisational requirements
- access, retrieve and store required data
- demonstrate basic maintenance on a range of equipment using manuals or help-files
- identify and address faults according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:
- outline the organisation's work health and safety requirements
- outline the organisation's requirements for file naming and storage
- explain why regular back-ups of data are done
- list 'routine maintenance' tasks
- summarise the procedure for addressing equipment faults.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:
- office equipment and resources
- electronic files and data
- workplace documentation and equipment manuals
- case studies and, where possible, real situations
• interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to monitor and obtain feedback on own work performance and access learning opportunities for professional development.

This unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- prepare and communicate own work plan
- schedule work objectives and tasks to support the achievement of the workgroup goals
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from clients and colleagues
- plan and access learning opportunities to extend personal work competencies.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how business technology applications can be used to schedule tasks and plan work
- explain techniques to prepare personal plans and establish priorities
- identify methods to identify and prioritise personal learning needs
- outline a range of professional development options
- explain methods to elicit, analyse and interpret feedback
- provide a detailed explanation of methods that can be used to evaluate own performance.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documentation including policies and procedures, and benchmarks for work group productivity and performance
- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

<td>3.1, 3.2, 3.3, 3.4, 3.5</td>
<td></td>
</tr>
</tbody>
</table>
• Investigates and uses a range of strategies to develop personal competence |
| Reading | 1.2, 3.1, 3.2 |  
• Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning |
| Writing | 3.2 |  
• Uses feedback to prepare reports that summarise ways to improve competence |
| Oral Communication | 3.2 |  
• Uses active listening and questioning to seek and receive feedback |
| Navigate the world of work | 1.2, 2.1 |  
• Understands how own role contributes to broader organisational goals  
• Considers organisational protocols when planning own career development |
Interact with others

- Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders
- Uses interpersonal skills to establish and build positive working relationships with others

Get the work done

- Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare
- Identifies and uses appropriate technology to improve work efficiency

Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
  - performance measurement
  - personal behaviour, self-awareness and personality traits identification
  - a personal development plan
  - personal goal setting
  - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation’s policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.
Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

</tbody>
</table>

Application

This unit describes the skills and knowledge required to develop community programs to ensure maximum participation.

This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

*The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.*

Elements and Performance Criteria

*Elements define the essential outcomes Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Develop program parameters
   1.1 Analyse issues of wide community concern to develop an agency position and to ascertain the priority for new program
   1.2 Undertake appropriate work to ascertain support, capacity for a coordinated effort and factors which will effect provision of services
   1.3 Undertake research to identify key people, priorities to be addressed, possible strategies and options for action
   1.4 Identify measures and evidence of program plan
success and possible risks

1.5 Develop appropriate plans via participation of relevant communities and stakeholders

2. Design programs with the community

2.1 Develop a program plan which reflects identified parameters and incorporates an evaluation of a range of program options within organisation policy

2.2 Engage stakeholder participation to determine preferred program options particularly in areas of high priority or with targeted communities

2.3 Seek help from participating agencies for implementation arrangements

2.4 Develop and implement promotion and marketing strategies

2.5 Develop and maintain systems and resources for administrative support of community programs

2.6 Identify and seek resources

3. Implement programs

3.1 Conduct and evaluate pilots and make adjustments to ensure the program achieves its objectives

3.2 Implement and monitor in accordance to the plan

4. Evaluate programs

4.1 Evaluate program design and outcomes according to criteria and specifications identified in the program plan

4.2 Use results of evaluation for revision and ongoing development

4.3 Involve interested and/or relevant people in program evaluation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

*Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed, implemented and evaluated at least 1 community program

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies
- social, community and youth issues
- contemporary economics and politics and their impact on community development
- traditional community development approaches:
  - needs-based
  - gap-based
- principles and practices of contemporary community development approaches and techniques for mobilisation in relation to:
  - asset-based (ABCD)
  - rights-based
- social movements
- sociology fundamentals, including:
  - commonly accepted social theories
  - social inequality
• sociology of class
• sociology of gender, including impacts of culture on gender dynamics

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed 1 engagement plan
- facilitated at least 3 group discussions, including:
  - used a range of group facilitation strategies to enhance interactions between group members and to gather relevant feedback
  - provided feedback to the group regarding outcomes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- communication styles and techniques
- group facilitation processes and mechanisms for group support
- principles of effective community engagement and participation
- traditional and contemporary models of engagement
- community engagement techniques including online tools and use of social media
- methods of research
- sustainability
- empowerment; community control and hegemony
Assessment Requirements for CHCCDE010 Develop and lead community engagement strategies to enhance participation

- capacity building
- asset based community development
- methods of engagement and participation
- evaluation and review
- building and maintaining partnerships
- social capital
- reporting mechanisms
- reengagement strategies for individuals who are disengaged

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

</table>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned and implemented all aspects of the recruitment of 2 volunteers
- developed and implemented 1 induction program for volunteers, that included:
  - organisation purpose and services
  - role of volunteers in the organisation
  - insurance
  - rights & responsibilities of all parties including work health and safety (WHS)
  - organisation structure and lines of communication and authority
  - expenses and reimbursements processes
  - relevant policies and procedures and codes of conduct
- conducted a performance review for 1 volunteer

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies relating to the employment of unpaid workers
- rights and responsibilities of both organisation and volunteer
- implications of differences in attitudes and values in working in the organisation
• *Universal declaration on volunteering* and current national volunteering codes and standards
• definitions of volunteering
• paid versus unpaid role responsibilities and the delineation of these roles
• structure of volunteer sector including support and recruitment agencies
• role of government and government bodies in volunteering
• motivations of volunteers, what can de-motivate volunteers and how volunteer motivation changes over time
• different models of volunteering taken from an organisation perspective, including the involvement of volunteers as service providers, fundraisers, corporate volunteering, activist and in community development
• range of diverse sectors and roles where volunteers are involved
• screening processes, including police checks, interviews, application forms, referee checks and meetings
• current trends and issues in volunteering
• engagement strategies for volunteering
• performance appraisal methods and techniques
• recognition and rewards for volunteers

**Assessment Conditions**

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CPCCCM2010B Work safely at heights

Modification History
Photovoltaic (solar) panels added to range statement
Equivalent to CPCCCM2010A

Unit Descriptor
This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

Application of the Unit
Construction work is undertaken on domestic and commercial work sites within new construction, renovation or refurbishment, and maintenance.

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

1 Identify work area requirements.

1.1 Site of proposed work at heights is identified from relevant information.

1.2 Method of accessing work area is identified.

1.3 Tasks to be completed are identified from work orders and supervisor instructions.

1.4 Fall protection equipment is identified if required by site job workplace health and safety (WHS) analysis and statutory and regulatory requirements.

1.5 Approved methods of moving tools and equipment to work area are identified to minimise potential of falling objects, removal of scaffold components, inappropriate carrying of materials on ladders, and excessive bending or twisting in pass-up situations.

2 Access work area.

2.1 Fall protection equipment where required is correctly fitted, adjusted and anchored.

2.2 Arrangements are made to appropriately install required equipment taking account of all potential hazards.

2.3 Appropriate methods are used to access work area for self, tools and equipment, and materials.

2.4 Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down.

3 Conduct work tasks.

3.1 Work is conducted following workplace approved procedures.

3.2 Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work.

3.3 Scaffold components and fall barriers are kept in place during work.

3.4 Egress from work area is completed following work site supervisor approved methods for self, tools, materials
and environmental requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - organisational skills, including the ability to plan and set out work
  - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
  - technological skills to:
    - use a range of mobile technology
    - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment
Guidelines for the Training Package.

### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

### Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

### Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning
experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work at heights** includes:
- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

**Information** includes:
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

**Workplace health and safety** is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan:
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - photovoltaic (solar) panels
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
  - AS6001 - 1999 Working platforms for domestic application
  - AS1576 - Scaffolding
  - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Hazards include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials
- light
- manual handling
- moisture
- noise
- photovoltaic (solar) panels
- stationary and moving plant
- work at heights.

**Tools and equipment** include:
- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

**Materials** include:
- materials used on the construction work site.

**Environmental requirements** include:
- clean-up management
- noise and dust
- vibration
- waste management.

**Unit Sector(s)**

**Functional area**

**Unit sector** Construction

**Custom Content Section**

Not applicable.
CPCCCM3001C Operate elevated work platforms

Modification History
Prerequisite unit identifier code updated
Equivalent to CPCCCM3001B

Unit Descriptor

Unit descriptor  This unit of competency specifies the outcomes required to safely and effectively operate some types of elevated work platforms (EWPs) in a variety of different terrains and situations to access isolated work areas. The unit includes locating, setting up, operating and shutting down EWPs.

In addition to achievement of this competency, an EWP operator may need to obtain additional certification of training and experience before being allowed to operate the equipment.

Application of the Unit

Application of the unit  This unit of competency assists in the safe and effective operation of electrical, hydraulic or mechanical EWPs. The unit does not cover powered telescoping devices, hinged devices or articulate devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more. An OHS authority Certificate of Competency may be required to operate boom type EWPs of 11 metres or more in some jurisdictions.

Licensing/Regulatory Information

Not Applicable
Pre-Requisites

CPCCCM2010B  Work safely at heights
CPCCOHS2001A  Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

Employability skills  This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Plan and prepare. | 1.1. *Work planning and preparation* are conducted using plans, specifications, quality requirements and operational details, obtained, confirmed and applied from relevant *information*.  
  1.2. *Safety (OHS)* requirements for the *types of EWP* to be operated are followed in accordance with safety plans and policies.  
  1.3. Signage and barricade requirements are identified and implemented.  
  1.4. Plant, *tools and equipment* and *personal protective equipment* are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement. |
ELEMENT | PERFORMANCE CRITERIA
---|---
1.5. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.
1.6. *Environmental requirements* are identified for the project in accordance with environmental plans and *statutory and regulatory authority* obligations, and are applied.
2. Conduct routine checks of platform.
   2.1. Power source is determined and connected to platform equipment according to manufacturer specifications.
   2.2. Routine pre-operational equipment checks are carried out in accordance with checklist from operator's manual or manufacturer specifications.
   2.3. Equipment is switched on in accordance with start up procedures and controls are checked for correct operation and ease of movement.
   2.4. *Emergency safety devices* are checked to comply with instructions from operator's manual and checked for manual operation.
   2.5. Work location is checked for level ground or floor surface to determine stabilising and safe working area requirements.
3. Locate equipment in place for work application.
   3.1. Platform is positioned for work application and stabilisers are engaged to set equipment base level into place according to *safe operating procedures*.
   3.2. Tools, equipment and materials are placed into bucket or on platform according to job application requirements.
4. Elevate platform to work location.
   4.1. *Harness* is fitted securely and lanyard connected to attachment point.
   4.2. *EWP operation* and controls are operated to manufacturer recommendations and platform is elevated to work position.
   4.3. Power is switched off where specified and locking devices are engaged according to operator's manual.
   4.4. Work is carried out to job specification and safety (OHS) requirements of operator's manual.
5. Lower platform and shut down.
   5.1. Controls are operated to manufacturer recommendations and platform is lowered to down position.
   5.2. Shut down procedures are carried out to operator's manual and equipment is switched off.
ELEMENT  PERFORMANCE CRITERIA

6. Clean up.

6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.

6.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.

6.3. Work completion procedures are applied and relevant personnel notified that work is finished.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
  - written skills to complete inspection log and handover
  - identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
  - numeracy skills to apply measurements and make calculations
  - organisational skills, including the ability to plan and set out work
  - teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
  - technological skills to:
REQUIRED SKILLS AND KNOWLEDGE

- use a range of mobile technology, such as two-way radio and mobile phones
- voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- designs, functions and operational limitations of EWP equipment
- EWP equipment types and OHS authority certification of competency requirements
- EWP techniques
- fault finding and identification
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of load mass requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- safe working at heights
- signalling methods and communications
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment

A person who demonstrates competency in this
EVIDENCE GUIDE

**and evidence required to demonstrate competency in this unit**

Unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- complete set up and operation of a range of EWPs as listed in the range statement, including all functions.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources,
EVIDENCE GUIDE

and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training.
EVIDENCE GUIDE

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work planning and preparation include:

- assessment of conditions and hazards
- consideration that EWPs must not be operated anywhere with overhead powerlines above, or within specified clearance distances set out in documentation such as Electrical Safety - Power line NO GO Zones, unless permission has been obtained from the power authority and a JSA has been developed
- determination of work requirements
- equipment defect identification
- work site inspection.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to EWPs
- relevant Australian standards
- safe work procedures related to operating EWPs, including the safe working load written on the EWP which must be checked to ensure it is not exceeded
- signage
- verbal or written and graphical instructions
- work bulletins
RANGE STATEMENT

**Safety (OHS)** is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- work schedules, plans and specifications.
- procedures related to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements and evacuation.
- handling of materials.
- hazard control.
- hazardous materials and substances.
- organisational first aid.
- personal protective clothing and equipment.
- use of firefighting equipment.
- use of tools and equipment.
- workplace environment and safety.

**Types of EWP:**

- EWPs include scissor lifts, boom and knuckle boom lifts with a boom length under 11 metres.
- EWPs are classified as:
  - trailer mounted boom lift (TL)
  - self-propelled boom lift (BL)
  - vertical lift (VL)
  - scissor lift (SL)
  - truck-mounted boom lift (TM), which is not covered by this unit of competency.

**Tools and equipment include:**

- EWPs, extension leads, logbooks, service manuals, operation manuals, safety harnesses and lanyards.
- special attachments, which may have to be installed if equipment is to be shifted with the EWP, as lifting loads via cables and ropes from an EWP is not permitted.

**Personal protective equipment includes:**

- that prescribed under legislation, regulations, codes of practice and workplace policies and practices.

**Environmental requirements include:**

- clean-up protection.
- noise and dust.
- sedimentation control.
- vibration.
- waste management.

**Statutory and regulatory authorities include:**

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.
RANGE STATEMENT

**Emergency safety devices** include:
- bleed valves
- electronic override
- emergency descent devices
- ground controls
- hydraulic accumulators.

**Safe operating procedures** include:
- conduct of operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
  - working with dangerous materials
  - not using slab terrain EWPs on any surface other than concrete or level asphalt.

**Harnesses** include:
- energy or shock absorbers that must be used with all fall arrest lanyard, harness and inertia reel systems
- full body rescue harness
- lanyards and inertia reels, which should be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is 2 metres.

**EWP operation** includes:
- boom up and down
- operate attachments
- operate outriggers
- slew left and right
- telescope in and out.

2.3. Load mass is calculated and confirmed using load charts and standard calculations.
2.4. Loads in slings and equipment are calculated to suit job requirements.
3. Sling loads. | 3.1. Lifting devices are assembled and erected for the movement of load.
3.2. Using appropriate load slinging method, loads are slung to crane ready for lifting.
4. Shift loads. | 4.1. Loads are shifted ensuring stability and in compliance with work method statement.
4.2. Load is directed to landing position using communications in compliance with Australian standards and recognised work practices.
4.3. Load is landed in required position on packing or bearers.
5. Remove dogging equipment. | 5.1. Load shifting equipment is dismantled and inspected for wear.
5.2. Logbook and site records are completed to company requirements.
6. Clean up. | 6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.
6.2. Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.
6.3. Work completion procedures are applied and relevant personnel notified that work is finished.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:
REQUIRED SKILLS AND KNOWLEDGE

- communication skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - read and interpret:
    - documentation from a variety of sources
    - drawings and specifications
  - report faults
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- evaluating own actions and making judgments about performance and necessary improvements
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- organisational skills, including the ability to plan and set out work
- recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
  - use a range of mobile technology, such as two-way radio and mobile phones
  - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- crane operations and limitations
- designs and functions of lifting equipment
- dogging equipment
- dogging techniques
- elevated work platforms
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- logbooks
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, drawings and specifications
- processes for the calculation of material requirements
REQUIRED SKILLS AND KNOWLEDGE

- quality requirements
- relevant Acts, regulations and codes of practice
- safe working at heights and fall arrest
- safe working load tags
- signalling methods and communications
- types, characteristics, uses and limitations of plant, tools and equipment
- weather and ground considerations
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- safely and effectively operate and use tools, plant and equipment
- communicate and work effectively and safely with others
- as a minimum, read tags, sling, load, direct and land loads in conjunction with a slewing
EVIDENCE GUIDE

mobile crane with a telescopic boom and a winch, out of sight for:
- rigid heavy loads to two thirds capacity of the crane
- luff movements, boom retract and boom extend, slew right and slew left, winch up and down in combination
- a flexible load with a minimum of three lifting points
- using hand signals and whistle from minimum radius to maximum radius.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:
- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:
- satisfy the endorsed Assessment Guidelines of
EVIDENCE GUIDE

the Construction, Plumbing and Services Training Package

- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.
Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Information** includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions, where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to performing dogging
- relevant Australian standards
- safe work procedures relating to performing dogging
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

**Planning and preparation** include:

- assessment of conditions and hazards
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.

**Safety (OHS)** is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the
RANGE STATEMENT

conducted operational risk assessment and treatments associated with:

- earth leakage boxes
- lighting
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- use of firefighting equipment
- use of tools and equipment
- workplace environmental requirements and safety.

**Tools and equipment** include:

- brick cages
- kibbles
- personnel cages
- rescue cages
- rubbish bins
- spreader bars and beams.

**Quality requirements** include:

- internal company quality policy and standards
- manufacturer specifications, where specified
- relevant regulations, including Australian standards
- workplace operations and procedures.

**Environmental requirements** include:

- noise
- vibration
- waste management.

**Calculations** include:

- delivery dockets
- load charts
- load share
- pre-cast compliance charts
- safe working loads
- standard calculations.
RANGE STATEMENT

**Slings** include:
- chain
- flexible steel wire rope
- natural or synthetic fibre.

**Lifting devices**:
- include:
  - eye bolts
  - lifting clutches
  - shackles
  - snatch blocks
  - tags
- may include:
  - collared eye bolts
  - equalizing sheaves
  - lifting lugs
  - rigging screws
  - turn buckles.

**Load slinging methods** include:
- straight sling
- adjustable sling
- reeved sling
- inclined sling.

**Cranes** include:
- fixed cranes
- hydraulic mobile cranes
- lattice boom mobile cranes
- slewing cranes
- tower cranes.

Co-requisite units  Nil

Functional area

Functional area
CPCCOHS1001A Work safely in the construction industry

Modification History
Not Applicable

Unit Descriptor

Unit descriptor
This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit
This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

4.3. Requirements for the selection and use of relevant *personal protective equipment* are identified and demonstrated.
4.4. *Fire safety equipment* is identified and discussed.

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

Required skills for this unit are:

- communication skills to:
  - clarify OHS legislative requirements
  - verbally report construction hazards and risks
  - ask effective questions
  - relay information to others
  - discuss OHS issues and information
- comprehension skills to:
  - explain the basic OHS legislative requirements which will be applicable to own work
  - explain the meaning of safety signs and symbols
  - identify common construction hazards
  - discuss the basic principles of risk management.

**Required knowledge**

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own work.
REQUIRED SKILLS AND KNOWLEDGE

- work, role and responsibilities
- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
  - persons in control of construction work/projects
  - employers and self-employed persons
  - supervisors
  - employees
  - designers
  - inspectors
  - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
  - housekeeping
  - identification of hazards
  - preventing bullying or harassment
  - smoking
  - use of amenities
  - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE
EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

Context of and specific resources for assessment

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a
EVIDENCE GUIDE

manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Method of assessment

Assessment methods may include more than one of the following:

- practical assessment
- oral questioning
- written test
- work-based activities
- simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards
- OHS and welfare Acts and regulations
- safety codes of practice.

Duty of care requirements relate to:

- legal responsibility under duty of care to do everything reasonably practicable to protect others from harm
RANGE STATEMENT

- own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency
- relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.

Safe work practices include:
- access to site amenities, such as drinking water and toilets
- general requirements for safe use of plant and equipment
- general requirements for use of personal protective equipment and clothing
- housekeeping to ensure a clean, tidy and safer work area
- no drugs and alcohol at work
- preventing bullying and harassment
- smoking in designated areas
- storage and removal of debris.

Risk relates to:
- likelihood of a hazard causing injury or harm.

Principles of risk management include:
- assessing the risks involved
- consulting and reporting ensuring the involvement of relevant workers
- controlling the hazard
- identifying hazards
- reviewing to identify change or improvement.

Hazard relates to:
- any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.

Common construction hazards include:
- confined spaces
- electrical safety
- excavations, including trenches
- falling objects
- hazardous substances and dangerous goods
- HIV and other infectious diseases
- hot and cold working environments
- manual handling
- noise
- plant and equipment
RANGE STATEMENT

- traffic and mobile plant
- unplanned collapse
- ultraviolet (UV) radiation
- working at heights.

Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:

- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

OHS communication processes include:

- discussions with OHS representatives
- OHS meetings
- OHS notices, newsletters, bulletins and correspondence
- OHS participative arrangements
- processes for raising OHS issues
- toolbox talks
- workplace consultation relating to OHS issues and changes.

OHS information and documentation includes:

- accident and incident reports
- Acts and regulations
- Australian standards
- codes of practice
- construction documentation and plans
- emergency information contact
- evacuation plans
- guidance notes
- job safety analyses
- labels
- material safety data sheets (MSDS)
- proformas for reporting hazards, incidents and injuries
- reports of near misses and dangerous occurrences
- risk assessments
- safe work method statements
- safety meeting minutes
- site safety inspection reports.

Designated OHS personnel includes:

- first aid officers
- OHS committee members
RANGE STATEMENT

- OHS representatives
- supervisors.

Safety signs and symbols include:
- emergency information signs (e.g. exits, equipment and first aid)
- fire signs (e.g. location of fire alarms and firefighting equipment)
- hazard signs (e.g. danger and warning)
- regulatory signs (e.g. prohibition, mandatory and limitation or restriction)
- safety tags and lockout (e.g. danger tags, out of service tags).

Relevant authorities include:
- emergency services (e.g. police, ambulance, fire brigade and emergency rescue)
- OHS regulatory authority
- supervisor.

Incidents include:
- accidents resulting in personal injury or damage to property
- near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
  - breathing apparatus malfunctioning to the extent that the user's health is in danger
  - collapse of the floor, wall or ceiling of a building being used as a workplace
  - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
  - collapse or partial collapse of a building or structure
  - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
  - damage to or malfunction of any other major plant
  - electric shock.
  - electrical short circuit, malfunction or explosion
  - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
  - any other unintended or uncontrolled incident or event arising from operations carried on at a
## RANGE STATEMENT

**General procedures** for responding to incidents and emergencies include:

- basic emergency response (keep calm, raise alarm, obtain help)
- evacuation
- notification of designated OHS personnel and authorities
- notification of emergency services (e.g. when and how)
- referring to site emergency plans and documentation.

**Emergencies** include:

- chemical spill
- fire
- injury to personnel
- structural collapse
- toxic and/or flammable vapours emission
- vehicle/mobile plant accident.

**Personal protective equipment** includes:

- aprons
- arm guards
- eye protection
- gloves
- hard hat
- hearing protection
- high visibility retro reflective vests
- protective, well fitting clothing
- respiratory protection
- safety footwear
- UV protective clothing and sunscreen.

**Fire safety equipment** includes:

- breathing apparatus
- fire blankets
- firefighting equipment.

Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

Pre-requisite Unit

Nil
Unit Sector

Construction

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify health and safety legislative requirements of construction work.
   1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to jurisdictional health and safety legislative requirements.
   1.2. Duty of care requirements are identified.
   1.3. Construction safe work practices are identified and explained.

2. Identify construction hazards and risk control measures.
   2.1. Basic principles of risk management are identified.
   2.2. Construction hazards are identified and discussed.
   2.3. Purpose and use of PPE are identified and demonstrated.
   2.4. Measures for controlling hazards are identified.

3. Identify health and safety communication and reporting processes.
   3.1. Health and safety documents are identified and discussed.
   3.2. Roles of designated health and safety personnel are identified and explained.
   3.3. Safety signs and symbols are identified and explained.
   3.4. Procedures for reporting hazards, incidents and injuries are identified.

4. Identify incident and emergency response
   4.1. Procedures for responding to incidents and emergencies are identified and explained.
   4.2. Procedures for accessing first aid are identified.
4.3. Types and purpose of fire safety equipment are identified and discussed.

Foundations Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Performance feature</th>
</tr>
</thead>
<tbody>
<tr>
<td>Numeracy skills to:</td>
<td>• locate and recognise numbers commonly used in safety signs.</td>
</tr>
<tr>
<td>Oral communication skills to:</td>

</tr>
<tr>
<td></td>
<td>• listen to instructions to identify key safety information</td>
</tr>
<tr>
<td></td>
<td>• tell another person about a construction problem or hazard.</td>
</tr>
<tr>
<td>Reading skills to:</td>
<td>• follow simple pictorial safety instructions</td>
</tr>
<tr>
<td></td>
<td>• follow simple safety instructions that are written in English.</td>
</tr>
<tr>
<td>Problem-solving skills to:</td>
<td>• select risk control measures.</td>
</tr>
</tbody>
</table>

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Jurisdictional health and safety legislative requirements must include at least one of the following state and territory Acts or their equivalent:

- Australian Capital Territory: Work Health and Safety Act 2011
- New South Wales: Work Health and Safety Act 2011
- South Australia: Work Health and Safety Act 2012
- Victoria: Occupational Health and Safety Act 2004
- Western Australia: Occupational Safety and Health Act 1984.
Unit Mapping Information
Supersedes and is equivalent to CPCCOHS1001A Work safely in the construction industry

Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry

Modification History

Release  Comment
Version  Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- orally explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- orally explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
  - fire blankets
  - fire extinguishers, including water, carbon dioxide, powder and foam
  - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- orally explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- orally explain the roles of the following designated health and safety personnel:
  - first aid officers
  - work health and safety representatives
  - work health and safety committee members
  - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat
- high visibility retro reflective vest.
Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
  - identify hazard
  - assess risk
  - consult and report
  - control hazard
  - review
- basic procedures for accessing first aid
- construction hazards, including those relating to:
  - asbestos
  - confined spaces
  - electrical: power lines, cords and equipment
  - excavations and trenches, including underground services
  - dust
  - falling objects
  - hazardous substances and dangerous goods
  - hot and cold work environments
  - manual handling
  - noise
  - plant and equipment operation
  - traffic and mobile plant
  - unplanned collapse
  - ultraviolet radiation
  - working at heights, including scaffolding
- construction work that requires a high risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and ultraviolet (UV) protective clothing and sunscreen
- construction emergencies, including:
  - chemical spill
  - fire
  - injury to personnel
  - structural collapse
  - toxic or flammable vapour emission
  - vehicle or mobile plant accident
• construction incidents, including:
  • incidents resulting in personal injury or damage to property
  • near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
• safe work practices that should be followed in construction work, including:
  • accessing and using site amenities for drinking water, hand washing and toilets
  • following safety procedures when performing work tasks and using equipment
  • identifying and reporting hazards, incidents and injuries in the workplace
  • keeping the work area clean, tidy and free from debris
  • not using or being affected by drugs and/or alcohol while at work
  • preventing bullying and harassment in the workplace
  • selecting and using required PPE
  • smoking only in designated areas
  • storing and removing waste and debris in designated areas
• meanings and symbols associated with construction safety signs, symbols and tags, including:
  • emergency information signs: exits, emergency equipment and first aid
  • fire signs: location of fire alarms and firefighting equipment
  • hazard signs and symbols: danger and warning
  • regulatory signs and symbols: prohibition, mandatory and limitation or restriction
  • safety and lockout tags: danger and out-of-service tags.

**Assessment Conditions**

The following must be present and available to learners during assessment activities:

• equipment:
  • all of the PPE listed in the performance evidence
• specifications:
  • state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

**Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.
Assessors must hold the unit *CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry*, or its successor.

CPCPCM2040A Read plans and calculate plumbing quantities

Modification History
Changes to performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPCM2004A

Unit Descriptor
This unit of competency specifies the outcomes required to use and interpret plans and specifications associated with construction work, and accurately complete measurements and calculations to establish quantities of materials for the plumbing and services industry.
The unit requires the interpretation of plans, drawings and specifications to interpret requirements, and making measurements and calculations to determine quantities of plumbing materials.

Application of the Unit
This unit of competency supports skills to read and interpret plans for a variety of plumbing and services applications.
Site location for work application may be either domestic or commercial and may be a new work site or an existing structure being renovated, extended, restored or maintained. It may be a customer's premises or employer's workplace, either on or off-site.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised
Elements and Performance Criteria

1 Prepare for work.  1.1 Plans, drawings, specifications and standards are obtained and required calculations are identified.

1.2 Work health and safety (WHS) requirements associated with reading plans, calculating plumbing requirements and the workplace environment are adhered to throughout the work.

1.3 Quality assurance requirements are identified and adhered to according to workplace requirements.

1.4 Work area and materials are prepared to support the efficient reading of plans and the calculation of plumbing requirements.

2 Identify types of plans and drawings and their functions.  2.1 Plans and drawings used in the plumbing industry are identified.

2.2 Key functions of each type of drawing are identified.

2.3 Key users of drawings are identified.

3 Identify commonly used scales, symbols and abbreviations.  3.1 Commonly used scales, symbols and abbreviations are used.

3.2 Function of legend is understood and identified.

4 Locate and identify key features on a services plan.  4.1 Key features and dimensions of sectional details and elevations on a plan are identified and located.

4.2 Location and types of services are identified.

4.3 General and structural features and major horizontal and
vertical measurements are located.

5 Read and interpret job specifications.  
  5.1 Purpose of job specification is identified. 
  5.2 Details in job specification are obtained. 
  5.3 Job specifications are read in conjunction with plans.

6 Obtain measurements and perform calculations 
  6.1 Work measurements are obtained. 
  6.2 Quality assurance requirements associated with calculations are applied. 
  6.3 Measurements and dimensions are obtained from plans. 
  6.4 Simple calculations are carried out.

7 Calculate material quantities.  
  7.1 Material quantities are calculated and recorded from plans and specifications according to workplace procedure. 
  7.2 Information from plans, specifications and work area are obtained from job instructions. 
  7.3 Measurements are identified and recorded.

8 Clean up. 
  8.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice, and job specification. 
  8.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures. 
  8.3 Information is accessed and documentation completed according to workplace requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - request relevant documentation and information
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- literacy skills to:
  - complete relevant workplace documentation
  - read and interpret:
    - documentation from a variety of sources
    - plans and specifications
  - record calculations, measurements and material quantities
- numeracy skills to apply measurements and calculations
- plan-reading skills, including:
  - boundaries
  - easements (sewer, stormwater, etc.)
  - existing services
  - orientation
  - pedestrian and vehicular access
  - preservation orders
  - set backs
  - site features
  - site geography, including levels
  - surrounding buildings and fences
- planning and organising skills to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

Required knowledge

- job safety analysis (JSA) and safe work method statements (SWMS)
- measurements, calculations and quantities
- range of plans and specifications relevant to the plumbing and services industry
- relevant Acts, regulations and codes of practice
- simple industry calculations
• symbols, dimensions, terminology and key features of plans
• tools, equipment and materials relative to plans, drawings and specifications
• work schedules, work plans, charts, work bulletins and memos
• workplace safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

• locating, interpreting and applying relevant information, standards and specifications for reading plans and calculating plumbing quantities
• applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
• given the plans and specifications for a project, completing the following in respect of interpreting the plans and determining quantities:
  • apply sustainability principles and concepts
  • identify type and purpose of the plan and drawing
  • identify its dimensions, symbols, abbreviations, key features, title and reference date (as current version)
• identify material types from the specifications, measurements and calculations, indicating items of plumbing material required, ensuring:
  • correct selection and use of appropriate processes, tools and equipment
  • completion of all work to specification
- compliance with regulations, standards and organisational quality procedures and processes.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and
Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience, the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

### Work health and safety

Work health and safety is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control, including of electrical hazards
- hazardous materials and substances
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
• workplace environment and safety.

**Quality assurance requirements**

may include:

• Australian standards
• environmental policy
• Environment Protection Authority (EPA)
• internal company quality assurance policy and risk management strategy
• International Standards Organisation
• site safety plan
• workplace operations and procedures.

Types of **drawings** may include:

• drainage plans
• elevations and sections
• floor plans
• hydraulic plans
• mechanical services and drainage plans
• sanitary plans
• sewerage plans
• site plans
• specifications.

Key features of detailed **elevations and plans** may include:

• boundaries
• building lines
• cross-sections of construction details
• easements
• layout of rooms
• location of works relative to other buildings
• orientation
• service locations
• shape of building and structure
• type of construction
• type of structure, including structural members
• vertical and horizontal measurements.

**Measurements** may include:

• all dimensions used in plumbing
• laser or similar technology
• SI units of measurement
• the use of:
  • calipers
- dividers
- rulers
- squares
- tape measures.

**Calculations:**
- are to be performed manually or with the aid of a calculator
- require numeracy skills to apply the basic arithmetic calculations of addition, subtraction, multiplication and division in order to estimate simple projects and determine consumables required for a task, and may include:
  - area
  - circumference
  - diameter
  - gradient
  - length
  - mass
  - perimeter
  - pressure
  - ratios (e.g. ingredients, elements and triangulation)
  - scales
  - volume.

**Materials** for reading plans and calculating plumbing quantities may include:
- drawings
- plans
- specifications.

**Information** may include:
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions
- organisation work specifications and requirements
- recognised formulas or tables accepted by the regulatory authority
- regulatory and legislative requirements, particularly those pertaining to:
  - building codes
  - WHS and environmental requirements
  - plumbing and gasfitting authority regulations
- relevant Australian standards
- safe work procedures relating to reading plans and calculating plumbing requirements
- verbal, written and graphical instructions, including:
  - charts and hand drawings
  - plans and sketches
  - job drawings
  - material safety data sheets (MSDS)
  - memos
  - plans and specifications
  - signage
  - work bulletins
  - work schedules.

Key features of *specifications* may include:

- material details
- preferred suppliers
- quality of finishes
- quantities
- specific skill requirements.

*Tools and equipment* may include:

- calculators
- laser measuring devices
- rulers, dividers, tape measures or squares.

CPCPCM2043A Carry out WHS requirements

Modification History
Changes to application, elements and performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPCM2023A

Unit Descriptor
This unit of competency specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in a plumbing and services work environment.
The unit requires the performance of work in a safe manner through awareness of risks, work requirements and the planning and performance of safe work practices with concern for personal safety and the safety of others.
It includes the initial response to workplace emergencies; the safe use of electricity; the identification of hazardous materials, including asbestos; and compliance with legislated work safety practices.

Application of the Unit
This unit of competency supports safe work practices for the plumbing and services industry.
Site location for work application may be either domestic or commercial and may be a new work site or an existing structure or fitting being renovated, extended, restored or maintained.
It could also be conducted in an on or off-site workshop or at a customer's premises.
The unit does not cover the removal of asbestos, which is a licensed activity.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
Nil

Employability Skills Information
This unit contains employability skills.
Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1  Participate in workplace induction.
   1.1  Workplace induction is received.
   1.2  Location of emergency equipment is identified.
   1.3  Current workplace emergency and evacuation procedures are identified.
   1.4  Identify safe working conditions with employer.
   1.5  Identify employee and employer rights and responsibilities regarding safe working conditions.

2  Assess risks.
   2.1  Hazards in the work area are identified, assessed and reported to designated personnel.
   2.2  WHS issues and risks in the work area are identified, assessed and reported to designated personnel.
   2.3  Safe work practices, procedures and instructions are followed.
   2.4  WHS, hazard, accident or incident reports are completed according to workplace procedures and statutory and regulatory authorities and legislation.

3  Identify hazards and hazardous materials on work site.
   3.1  Hazardous materials on a work site are identified, secured and tagged using appropriate signs and symbols; and if appropriate, handled and used according to company and legislated procedures.
   3.2  Measures for controlling risks and construction hazards
are applied effectively and immediately.

3.3 **Asbestos-containing materials (ACM) are identified** on a work site **and reported** to designated personnel.

4 Plan and prepare for safe work practices.

4.1 Quality assurance requirements of company operations and safe work practices are identified and adhered to.

4.2 Personal protective equipment (PPE) is selected, correctly fitted and used according to the requirements of the job.

4.3 Tools and equipment are selected consistent with safe work practice requirements, checked for serviceability, and any faults are reported to supervisor.

4.4 Required barricades, hoardings and signage are determined and erected at job location.

4.5 Material safety data sheets (MSDS) are identified and applied.

4.6 **Sustainability principles and concepts** are observed when preparing for and undertaking work process.

5 Use safe work practices to carry out work.

5.1 Work is carried out safely and according to state or territory statutory requirements and company policy.

5.2 **Safety hazards** and common workplace accidents and incidents are identified in the course of work and reported according to policy.

5.3 Industry, site and personal safety rights and responsibilities are applied.

5.4 Prohibited tools and equipment in areas with identified asbestos are identified and isolated.

5.5 Firefighting equipment is selected and used according to type of fire and correct operating procedures.

5.6 Current site emergency and first aid procedures are followed.

and standard work practices.

9.3 Information is accessed and documentation completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - complete written reports and other relevant documentation
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals

- initiative and enterprise skills to:
  - evaluate safety issues in the workplace and determine appropriate action
  - recognise WHS hazards, including asbestos, and take all opportunities to alleviate safety problems in a variety of construction work sites and environments

- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools or materials

- literacy skills to read and interpret:
  - documentation from a variety of sources
  - MSDS
  - work safety procedures and instructions

- self-management skills to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained

- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

- technology skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology

Required knowledge

- asbestos management code relating to prevention of exposure
- job safety analysis (JSA) and safe work method statements (SWMS)
• manual handling techniques
• MSDS
• relevant legislation, regulations and workplace requirements relating to WHS, including hazard reduction and personal safety
• requirements for working in confined spaces and at height, including on roofs
• tools and equipment prohibited from being used near identified ACM
• risk assessment
• safe work practices in normal working environment
• types, possible location and risks of ACM, including serpentine and amphobile groups and their use in common building materials
• workplace and equipment safety requirements
• workplace hazards and their precautions and reduction
• workplace response to emergencies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:
• locate, interpret and apply relevant information, standards and specifications for applying safe work practices in the workplace
• apply safety requirements throughout the performance of work sequences, including electrical requirements and personal protective clothing and equipment
• apply sustainability principles and concepts
• undertake site and workplace induction
• correctly identify the location of ACM
• understand and apply policies and procedures for reporting presence of ACM to designated personnel
• assess workplace risks and interpret and apply safe work practices
• understand workplace requirements for emergency response, including evacuation procedures
• correctly locate and identify workplace firefighting and other safety equipment and appliances
• correctly select and use appropriate processes, tools and equipment
• safely complete all work to specification
• comply with regulations, standards and workplace instructions, procedures and processes, including reporting and documentation
• communicate and work effectively and safely with others.

**Context of and specific resources for assessment**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

• an induction procedure and requirement
• realistic tasks or simulated tasks covering the minimum task requirements
• relevant specifications and work instructions
• tools and equipment appropriate to applying safe work practices
• support materials appropriate to activity
• workplace instructions relating to safe work practices and addressing hazards and emergencies
• material safety data sheets
• research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

**Method of assessment**

Assessment methods must:

• satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
• include direct observation of tasks in real or
simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Workplace induction** may include:

- first aid officers and kits
• personnel competent and/or licensed in the safe handling of asbestos
• site induction work site locations
• specific site WHS issues
• specific site requirements.

**Safe work practices** are to be according to state and territory legislation and regulations and may include:

• handling of materials
• hazard control procedures and procedures for handling hazardous materials and substances
• PPE prescribed under legislation, regulations and workplace policies and practices
• use of firefighting equipment
• use of first aid equipment
• use of tools and equipment
• workplace environment and safety.

**Statutory and regulatory authorities** include:

• commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

**Identifying and reporting asbestos-containing materials:**

• includes recognising common types of ACM that may be found in construction materials and buildings
• covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, millboard, asbestos flues, sheeting under ceramic or vinyl floor or wall tiles in wet areas
• involves reporting ACM to person in control of the workplace as set out in the relevant Asbestos Management Code.

**Sustainability principles and concepts:**

• cover the social, economic and environmental use of resources to meet current and future needs
• may include:
  • selecting appropriate components and material
  • choosing efficient products
  • using material efficiently
  • storing and disposing of hazardous material to ensure minimal environmental impact.
Safety hazards may include:
- hazards and risks associated with tools and equipment
- inflammable materials and fire hazards
- lifting practices
- lighting, gases, electricity and water
- spillage, waste and debris
- toxic and hazardous substances
- working at heights
- working in confined spaces.

Emergencies may include:
- accidents
- fires
- injuries
- sudden illness.

Emergency response may include:
- common site signs
- equipment tags
- facility or location signs
- safety barricades and warning signs
- site direction
- traffic signs
- workplace evacuation involving staff and customers.

CPCPCM2047A Carry out levelling

Modification History
Prerequisite unit updated
Changes to performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPCM2027A

Unit Descriptor
This unit of competency specifies the outcomes required to plan and use levelling equipment to establish, record and apply those levels to the plumbing and services industry.

Application of the Unit
This unit of competency supports skills to undertake levelling operations for application in the plumbing and services industry.
Site location for work application may be either domestic or commercial and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
CPCPCM2043A Carry out WHS requirements

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of
performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Prepare for work. 1.1 Requirements of the job are determined and various levels are obtained.

1.2 Work health and safety (WHS) and environmental requirements associated with levelling activities are adhered to throughout the work.

1.3 Quality assurance requirements are identified and adhered to according to workplace requirements.

1.4 Tools and equipment, including personal protective equipment, are selected and checked for serviceability.

2 Perform levelling. 2.1 Height to be transferred is identified from drawings, plans or instructions.

2.2 Levelling equipment is set up and operated according to manufacturer instructions, workplace procedures and relevant Australian standards.

2.3 Levels are taken, recorded and marked according to job requirements and workplace procedures within the required tolerance and specifications.

2.4 Sustainability principles and concepts are observed when preparing for and undertaking work process.

3 Clean up. 3.1 Work area is cleared and materials are disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification.

3.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.

3.3 Information is accessed and documentation completed according to workplace requirements.
Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - determine requirements, follow instructions and access information
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - use language and concepts appropriate to cultural differences
  - use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools, equipment or materials
- literacy skills to:
  - complete workplace documentation
  - read and interpret:
    - plans and specifications
    - documentation from a variety of sources
- numeracy skills to apply measurements and calculations
- planning and organising skills to plan and set out work
- technical skills to operate levelling equipment to read, record, establish and check:
  - levels: horizontal, vertical and at gradient used for the placement of plumbing and services
  - recording levels at specific points along a set out
  - recording and checking levels in drainage and sanitary excavations and plumbing services
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology

Required knowledge

- different types of levelling equipment, their applications and their method of operation
- how to access relevant information, including codes and technical standards
- job safety analysis (JSA) and safe work method statements (SWMS)
- process of establishing, recording and checking levels and alignment
• relevant statutory requirements related to establishing, recording and checking levels
• simple calculations relating to carrying out levelling
• SI system of measurements
• workplace and equipment safety requirements

**Evidence Guide**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Overview of assessment**

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

• locating, interpreting and applying relevant information, standards and specifications for the establishment, recording and checking of levels
• applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
• using either a pipe laser, rotary laser or automatic level and either boning rods or string line
• grading a pipe (or equivalent) over 10 metres on a grade to a tolerance of + or - 5mm, ensuring:
  • applying sustainability principles and concepts
  • correctly identifying, recording and checking level
  • correctly selecting and using appropriate processes, tools and equipment
  • completing all work to specification
  • complying with regulations, standards and organisational quality procedures and processes
  • communicating and working effectively and safely with others.

**Context of and specific**

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental
resources for assessment

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has
complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work health and safety** is to be according to commonwealth, state and territory legislation and regulations and may include:
- handling of materials
- hazard control, including of electrical hazards
- hazardous materials and substances
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
- workplace environment and safety.

**Quality assurance requirements** may include:
- environmental policy
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- relevant Australian standards
- site safety plan
- workplace operations and procedures.
**Tools and equipment** may include:
- hand tools
- measuring equipment
- string line.

**Levelling equipment** may include:
- boning rods
- rotating laser level
- pipe laser level
- spirit level
- water level.

**Sustainability principles and concepts:**
- cover the social, economic and environmental use of resources to meet current and future needs
- may include:
  - efficient use and recycling of tools and equipment
  - disposing of waste material to ensure minimal environmental impact
  - energy efficiency
  - water efficiency.

**Information** may include:
- building codes
- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- job drawings
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- WHS and environmental requirements
- organisation work specifications and requirements
- plans and sketches
- regulatory and legislative requirements, particularly those pertaining to plumbing and gasfitting authority regulations
- relevant Australian standards
- safe work procedures relating to handling and storing levelling equipment
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

CPCPIG2021A Design domestic urban irrigation systems

Modification History
Prerequisite unit added to unit
Changes to descriptor, performance criteria, required skills and knowledge, range statement and critical aspects
Not equivalent to CPCPIG2011A

Unit Descriptor
This unit of competency specifies the outcomes required to prepare basic designs and irrigation drawings for domestic irrigation systems.

Application of the Unit
Work is normally undertaken in a drafting office environment. Location for drawing and design application may be either domestic or commercial, and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
CPCPCM2043A Carry out WHS requirements

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
Elements and Performance Criteria

1 Prepare for work. 1.1 Site survey is conducted of proposed irrigation area according to client requirements.

1.2 *Work health and safety* (WHS) and *environmental requirements* associated with design of domestic irrigation systems are adhered to throughout the work.

1.3 *Quality assurance requirements* are identified and adhered to according to workplace requirements.

1.4 Tasks are planned and sequenced in conjunction with others involved in or affected by the work and *statutory and regulatory authorities’ requirements*.

1.5 *Tools and equipment* for preparing basic irrigation designs and drawings are selected and checked for serviceability.

1.6 Work area is prepared to support efficient design of domestic irrigation systems.

2 Identify drawing requirements. 2.1 Areas requiring irrigation and *system design components* are identified.

2.2 *Information* is obtained on the soil type, ground slope, contours and prevailing wind.

2.3 Underground services, buildings, paths and other permanent structures are located and noted.

2.4 Water supply is located and its influence on design requirements is determined.

2.5 Appropriate emitters are selected to suit function and design requirements.

3 Design irrigation system. 3.1 Site plan is drawn to include structures, paths and property boundaries.
3.2 Garden areas are sketched to include locations of lawns, garden beds, trees, vegetable patches or ferneries.

3.3 Pipe runs and water emitters are sketched to design requirements.

3.4 Sizes of pipes are calculated using standard data and information is recorded in required format.

3.5 List of materials is compiled to include number and type of water emitters, control valves, quantities of pipes, fittings and components.

3.6 Sustainability principles and concepts are applied throughout the design process.

3.7 Drawing and design are submitted for approval.

4 Clean up.

4.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification.

4.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.

4.3 Documentation is completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - access information
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools, equipment or materials
- literacy skills to:
  - compile list of materials
  - complete workplace documentation
  - read and interpret:
    - documentation from a variety of sources
    - plans and specifications
  - record information
- technical skills to design and draw a domestic urban irrigation system, including:
  - identifying material requirements
  - selecting and locating components
  - site layout
  - site requirements and structures
- numeracy skills to apply measurements and calculations
- planning and organising skills to:
  - plan and sequence tasks with others
  - plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology

Required knowledge
- job safety analysis (JSA) and safe work method statements (SWMS)
- process and workplace requirements for basic irrigation design
- processes for accessing information and for calculating material requirements
- properties of water, including pressure and flow rates
- relevant statutory and authority requirements related to drawing and installing irrigation systems
- SI system of measurement
- specifications of the range of irrigation products available
- standards applicable to the installation
- technologies for irrigation measurement and drawings
- various types of irrigation systems, including types of materials and components used
- workplace and equipment safety requirements
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, standards and specifications to the design of domestic irrigation systems
- applying safety requirements throughout the work sequence, including electricity safety requirements and the use of personal protective clothing and equipment
- given the site plan and specifications for the irrigation of a 200 square metre garden (of lawn, shrubs, trees and flowers), designing and preparing a drawing of the system, incorporating automatic timers and controls, varying sprinkler heads and zones, and indicating the materials required (by number and type), ensuring:
  - application of sustainability principles and concepts
  - correct identification of location, design and details of proposed system
  - correct selection and use of appropriate processes, tools and equipment
  - completing all work to specification
  - compliance with regulations, standards and organisational quality procedures and processes
  - communicating and working effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and...
environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
• where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

• all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work health and safety is to be according to commonwealth, state and territory legislation and regulations and may include:

• handling of materials, including hazardous materials and substances
• hazard control
• personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
• use of firefighting equipment
• use of first aid equipment
• use of tools and equipment
• workplace environment and safety.

Environmental requirements cover water quality management and may

• clean-up protection
• stormwater protection
• waste management.
Quality assurance requirements may include:
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- site safety plan
- workplace operations and procedures.

Statutory and regulatory authorities may include:
- commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

Tools and equipment may include:
- calculator
- computer design software
- drawing and drafting equipment
- laser measuring devices
- measuring equipment.

System design components may include:
- backflow prevention devices
- controls
- pipework
- valves
- water emitters, which may include:
  - drip emitters
  - gear drive
  - impact
  - in-line turbo drippers
  - mist sprays
  - oscillating
  - pop up
  - pulsating
- selection of water emitters, based on:
  - automatic control systems
  - manufacturer specifications
  - physical site conditions
  - site requirements
  - subsoil systems
  - types of plants requiring irrigated water.
Information may include:
- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- maps
- organisation work specifications and requirements
- regulatory and legislative requirements, particularly those pertaining to:
  - building codes
  - WHS and environmental requirements
  - plumbing regulations
- relevant Australian standards
- safe work procedures relating to the design of domestic irrigation systems
- signage
- sketches and plans, including job plans
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Materials may include:
- drafting and drawing equipment
- plans.

Sustainability principles and concepts:
- cover the current and future social, economic and environmental use of resources
- may include:
  - efficient use of material
  - minimising water wastage
  - considering use of alternative water supply
  - selecting appropriate components and material to ensure minimal environmental impact.

CPCPWT3027A Connect irrigation systems from drinking water supply

Modification History
Prerequisite unit changed
Minor changes throughout the unit
Not equivalent to CPCPWT3017A

Unit Descriptor
This unit of competency specifies the outcomes required to connect irrigation and watering systems from a drinking water supply. It does not include the commissioning of backflow prevention devices or arrangements.

Application of the Unit
Site location for work application may be either domestic or commercial, and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information
In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites
CPCPCM2043A Carry out WHS requirements

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent
with the evidence guide.

Elements and Performance Criteria

1 Prepare for work.

1.1 Plans and specifications are obtained.

1.2 Work health and safety (WHS) and environmental requirements associated with connecting irrigation systems from a drinking water supply are adhered to throughout the work.

1.3 Quality assurance requirements are identified and adhered to according to workplace requirements.

1.4 Tasks are planned and sequenced in conjunction with others involved in or affected by the work and statutory and regulatory authorities’ requirements.

1.5 Tools and equipment for connecting irrigation systems, including personal protective equipment, are selected and checked for serviceability.

1.6 Work area is prepared to support efficient connection of irrigation systems from a drinking water supply.

2 Identify installation requirements.

2.1 Connection size and hazard rating are determined from plans, specification, relevant Australian standards and/or site inspection using relevant information.

2.2 Valve is sized according to plans and specification.

2.3 Back flow prevention devices are confirmed as being according to hazard rating.

2.4 Materials and equipment are identified, ordered and collected according to workplace procedures.

2.5 Materials and equipment are checked for compliance with relevant Australian standards, docket and order form, and for acceptable condition.

2.6 Sustainability principles and concepts are observed when preparing for and undertaking work process.
3 Connect and test system.

3.1 Excavation is set out and made according to plans and specifications and undertaken with consideration given to existing structures and services.

3.2 Service pipe is isolated and cut to accommodate take off branch according to authorities' requirements.

3.3 Back flow prevention device is fitted according to relevant Australian standards and manufacturer specifications.

3.4 System is connected and flushed to required standard.

3.5 Water supply is restored and system tested according to relevant Australian standards.

3.6 Ground surface is restored.

4 Clean up.

4.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification.

4.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.

4.3 Documentation is completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - access information
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - identify requirements
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to identify and accurately report to appropriate personnel any faults in tools, equipment or materials
- literacy skills to:
  - complete workplace documentation
  - read and interpret:
    - documentation from a variety of sources
    - plans and specifications
- numeracy skills to apply measurements and calculations
- planning and organising skills to:
  - plan and sequence tasks with others
  - plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technical skills to cut into a water supply and install a take-off branch and fitting valves and backflow prevention devices for an irrigation or watering system
- technology skills to:
  - access and understand site-specific instructions in a variety of media
  - use mobile communication technology

**Required knowledge**

- characteristics and application of different pipes and fittings, including fixing and joining techniques and methods
- drinking water supplies and protection measures
- implications of cross connections and air gaps
- job safety analysis (JSA) and safe work method statements (SWMS)
- process of connecting irrigation systems from a drinking water supply
- processes for accessing information and for calculating material requirements
- properties of water, including pressure and flow rates
- relevant statutory requirements related to connecting irrigation systems from a drinking water supply
- SI system of measurement
- Australian standards applicable to the connection
- use of test equipment and procedures
- various types of irrigation systems and types of materials used
- workplace and equipment safety requirements
Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, relevant Australian standards and specifications to connect an irrigation system from a drinking water supply
- applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
- given the plans and specifications, connecting an irrigation system to a drinking water supply, ensuring:
  - application of sustainability principles and concepts
  - correct identification of location, design and details of proposed installations
  - correct selection and use of appropriate processes, tools and equipment
  - completing all work to specification
  - compliance with regulations, relevant Australian standards and organisational quality procedures and processes
  - communicating and working effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will
usually be conducted in an off-site context. Assessment is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:
- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:
- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:
- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a
number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge.

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. *Bold italicised* wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work health and safety** is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control
- identifying and testing for electrical hazards
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including recognising and preventing hazards associated with:
  - hazardous materials and substances
  - other machines
  - surrounding structure and facilities
  - trees
  - trip hazards
  - underground services
  - uneven and unstable terrain
- use of tools and equipment
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- use of firefighting equipment
- use of first aid equipment
- workplace environment and safety.

**Environmental requirements** cover water quality management and may include:

- clean-up protection
- waste management.

**Quality assurance requirements** may include:

- environment policy
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- site safety plan
- workplace operations and procedures.

**Statutory and regulatory authorities** include:

- commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

**Tools and equipment** may include:

- chain blocks
- electrical bonding and bridging strap
- elevated work platforms
- forklifts
- hand and power tools
- hand excavation equipment
- hand trolleys
- hoists and jacks
- lifting and load shifting equipment
- measuring equipment
- mechanical excavation equipment
- rollers
- scaffolding
- silver solder and brazing equipment
- trench shoring equipment.
Information may include:
- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- job drawings
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- organisation work specifications and requirements
- plans and sketches
- regulatory and legislative requirements, particularly those pertaining to:
  - building codes
  - WHS and environmental requirements
  - plumbing regulations
- relevant Australian standards
- safe work procedures relating to connecting irrigation systems from a drinking water supply
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Materials may include:
- backflow prevention devices
- copper tube
- fittings and connections
- joints
- polymer pipes
- valves.

Sustainability principles and concepts:
- cover the current and future social, economic and environmental use of resources
- may include:
  - selecting appropriate material to ensure minimal environmental impact
  - efficient energy and water use
  - efficient use and recycling of material
  - disposing of waste material to ensure minimal environmental impact.
Unit Sector(s)

Unit sector

Custom Content Section

Not applicable.
CPPFES2005A Demonstrate first attack firefighting equipment

Modification History
Revised unit
Unit updated and equivalent to PRMPFES05B Use portable fire fighting equipment

Unit Descriptor
This unit of competency specifies the outcomes required to demonstrate the use of portable fire extinguishers, fire hose reels and fire blankets.

Application of the Unit
This unit of competency supports fire protection equipment service technicians responsible for demonstrating to customers how to interpret and follow manufacturers’ instructions on various first attack firefighting equipment in emergency situations.

Licensing/Regulatory Information
Work in this area must be completed according to relevant legislative, industry, customer and organisational requirements, including occupational health and safety (OHS) policies and procedures.
Different states and territories may have regulatory mechanisms that apply to this unit. Candidates are advised to check for regulatory limitations.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of
performance is to be consistent with the evidence guide.

**Elements and Performance Criteria**

1. Demonstrate correct use of portable fire extinguishers to extinguish simulated fires.
   1.1 *Fire type* and *classification* are determined.
   1.2 *Fire extinguishers* are selected to attack different fires.
   1.3 Safe use of fire extinguishers is demonstrated according to manufacturers’ instructions and relevant *OHS and workplace policies and procedures*.

2. Demonstrate correct use of fire hose reels.
   2.1 Safe use of *hose reels* is demonstrated according to manufacturers’ instructions and relevant OHS and workplace policies and procedures.
   2.2 Water is turned off in the approved sequence and hose reel is checked for leaks.
   2.3 Hose reel is rewound correctly after use.

3. Demonstrate correct use of fire blanket.
   3.1 Safe use of fire blankets is demonstrated according to manufacturers’ instructions and relevant OHS and workplace policies and procedures.

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.

**Required skills**

- decision-making skills to select correct first attack firefighting equipment for different types of fires
- effective customer service
- language, literacy and numeracy skills to:
  - communicate with others in a clear and concise manner
  - read and comply with work instructions and specifications
• interpersonal skills to relate to people from a range of social and cultural backgrounds
• skills to work safely when:
  • applying recommended manufacturers’ techniques for operating equipment and fire
    fighting
  • using firefighting equipment

Required knowledge
• basic methods of locating a fire
• correct use of fire extinguishers and hose reels on different classes of fire and implications of
  incorrect use
• how fire can be spread by conduction, convection, radiation and direct burning
• how water pressure influences the discharge distance for hose reels
• key actions in a fire emergency, commonly known by the acronym RACE:
  • rescue
  • activate alarm
  • confine fire
  • evacuate or extinguish
• meaning of secondary damage
• reasons for cooking oil and fat fires requiring special attention
• theory of fire, including the triangle of combustion
• types and operation of fire protection equipment classified as first attack equipment

Evidence Guide
The evidence guide provides advice on assessment and must be read in conjunction with the
performance criteria, required skills and knowledge, range statement and the Assessment
Guidelines for the Training Package.

| Overview of assessment | This unit of competency could be assessed by practical
demonstration, using simulated fire situations. Due to safety and cost
factors, methods of extinguishing class D, E and F fires are confined
to oral explanations and role play or simulations only.

All practical demonstrations involving the use of simulated fires
must adhere to the safety and environmental regulations relevant to
each state or territory. |
|------------------------|-------------------------------------------------------------------------------|

| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to:
• select correct portable firefighting equipment for a particular type of fire |
|----------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
• demonstrate the use of portable firefighting equipment
• use portable firefighting equipment safely and correctly.

**Context of and specific resources for assessment**

Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements.

Resource implications for assessment include:

• actual or simulated work environment
• portable firefighting equipment.

**Method of assessment**

Assessment methods must:

• satisfy the endorsed Assessment Guidelines of the Property Services Training Package
• include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
• reinforce the integration of employability skills with workplace tasks and job roles
• confirm that competency is verified and able to be transferred to other circumstances and environments.

**Guidance information for assessment**

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

This unit could be assessed on its own or in combination with other units relevant to the job function, for example:

• CPPFES2004A Identify types of installed fire safety equipment and systems
• CPPFES2006A Prepare for installation and servicing operations.

**Range Statement**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

CPPSEC4008A Prepare a detailed tender

Modification History
Not Applicable

Unit Descriptor

Unit descriptor
This unit of competency specifies the outcomes required to prepare and process a tender submission. It requires the ability to interpret and assess tender specifications, estimate and cost resource requirements, and prepare and lodge the final tender submission within designated timelines.

This unit may form part of the licensing requirements for persons engaged in security-related tender activities in those states and territories where these are regulated activities.

Application of the Unit

Application of the unit
This unit of competency has application in those work roles involving the management of tender documentation. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1 Assess tender requirements. | 1.1 Tender specifications and other relevant information are obtained and assessed to determine tender requirements.  
1.2 Tender criteria and conditions are identified and reviewed.  
1.3 Viability to provide security requirements is assessed and evaluated in accordance with organisational procedures.  
1.4 Risk assessment is conducted on anticipated outcomes in accordance with organisational and legislative requirements.  
1.5 Occupational Health and Safety (OHS) and other relevant organisational and legislative requirements are identified and allowed for within the parameters of the tender requirements.  
1.6 Appropriate interpersonal techniques are used to facilitate an effective exchange of information with relevant persons. |
| 2 Develop tender content. | 2.1 Project timelines, stages, activities and deliverables are defined and documented to meet tender requirements.  
2.2 Resource and capacity requirements are assessed and documented.  
2.3 Organisational rate schedules are applied to establish costings and estimations are detailed in the required format.  
2.4 All information is thoroughly reviewed to ensure accuracy and a detailed budget is prepared.  
2.5 Factors which may affect fulfilling tender requirements are identified and allowances for contingencies are made. |
ELEMENT | PERFORMANCE CRITERIA
--- | ---
2.6 | Assistance in addressing tender requirements is sought as required from relevant persons.

3 Prepare tender submission. | 3.1 *Business technology* is used to prepare and present *tender submission* in the required style and format.
3.2 | Tender submission addresses tender requirements and specific criteria and conditions using clear and concise language.
3.3 | Tender submission is checked for accuracy and disseminated to relevant persons for review in accordance with organisational procedures.
3.4 | Tender submission is lodged within designated timelines.
3.5 *Feedback* is sought on outcomes of tender submission and process is reviewed to identify areas for improvement to support future tendering procedures and processes.
3.6 | Relevant *documentation* is completed and securely maintained in accordance with organisational procedures.

### Required Skills and Knowledge

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge and their level required for this unit.

**Required skills**

- apply reasoning and logical analysis to make decisions and solve problems
- assess and determine tender requirements
- calculate time, measurements and quantities
- coaching and mentoring to provide support to colleagues
- communicate effectively in both verbal and written modes
- comply with applicable legislative and regulatory requirements
- comply with tender criteria and conditions
- conduct a risk assessment on anticipated project outcomes
- conduct qualitative and quantitative research
- develop a detailed budget
- estimate and cost resources
- evaluate tender requirements to determine project requirements
- evaluate viability to provide security goods and services to undertake the project
- facilitate feedback
- monitor and analyse submission progress and review outcomes
REQUIRED SKILLS AND KNOWLEDGE

- negotiate, mediate and resolve conflicts
- observe protocol and probity policies
- plan and schedule activities
- prepare and process tender submissions
- prepare tender submissions using clear and concise language in required formats
- prioritise tasks and schedules
- provide written reports and documentation
- read and interpret relevant information including plans, designs and specifications
- relate to persons from different social and cultural backgrounds and of varying physical and mental abilities
- use appropriate business technology to research and compile information
- work within agreed timeframes and budgetary constraints
- write reports.

Required knowledge

- access and deployment mechanisms to ensure optimal economy and efficiency in the use of human, physical and financial resources
- client privacy and confidentiality requirements
- conflict resolution techniques
- contingency planning
- cultural protocols and systems
- formal and informal meeting processes
- national competition policy
- operational budget and resource planning processes
- operational principles of security and business technology equipment and systems
- organisational pricing schedules, policies and procedures
- organisational procedures and standards and corporate goals and objectives
- principles of effective communication
- problem-solving strategies
- quality assurance systems
- security and risk assessment techniques
- security issues and classifications
- tender layout, format and presentation methods
- tendering codes of practice.

Evidence Guide

EVIDENCE GUIDE
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

A person who demonstrates competency in this unit must be able to provide evidence of:

- calculating costs and estimating resource requirements for inclusion in a detailed budget
- collaborating with relevant persons to receive and incorporate feedback on tender submission
- complying with applicable legislative and regulatory requirements including codes of practice
- identifying factors through risk analysis that may affect anticipated project outcomes and making appropriate allowances for contingencies
- identifying personal limitations in assessing tender requirements and requesting appropriate assistance
- interpreting tender specifications to accurately identify resource requirements
- locating and assessing information to establish tender requirements
- planning tender activities to match timeframe and budget constraints
- using appropriate communication and interpersonal techniques to clarify and confirm tender requirements
- using appropriate technology to prepare tender documentation.

**Context of and specific resources for assessment**

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to plain English version of relevant statutes and procedures
- access to a registered provider of assessment services
- access to a suitable venue and equipment
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.
Method of assessment

This unit of competency could be assessed using the following methods of assessment:

- observation of processes and procedures
- questioning of underpinning knowledge and skills.

Guidance information for assessment

Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.

Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.

Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tender may be:

- in-house
- negotiated
- open
- selective.

Tender specifications may detail:

- client requirements
- identification of deliverables
- insurance requirements
- legal requirements
- performance standards
- project management
- project scope
- proposed activities to be undertaken
- quality assurance
Relevant information may include:
- resource requirements eg human and physical
- specific requirements
- stakeholder involvement
- time and cost parameters.

Tender requirements may include:
- client details
- contract documentation
- details of security goods and services to be provided
- organisational cost schedules
- tender details.

Tender criteria and conditions may relate to:
- eligibility for submission of tender which may include:
  - interview, meeting or presentation of tender
  - selection criteria and weightings
  - special requirements
  - submission date
  - tender document format.

Viability may include consideration of:
- available resources, equipment and supplies
- client requirements
- competition
- compliance with regulations
- cost of tender preparation and processing
- financial considerations
- geographic constraints
- likely profit
- other projects
- prospect of winning the tender
- skills required for the provision of services
- time constraints.

Security requirements may relate to the provision of:
- security equipment and systems
  - access control systems
  - audible and visual warning devices
  - cameras and monitors
  - commercial and residential alarm systems
  - detection devices
  - electric and mechanical fire safety and fire locking systems
  - electronic locks and locking systems
electronic readers
- electronic screen equipment
- intercoms and control panels
- security doors and door controls
- specialised access control systems eg biometrics
- security services
  - close personal protection
  - crowd control
  - escorting
  - guarding
  - patrolling
  - screening.

Evaluation may relate to:
- capability
- capacity
- previous projects
- risk
- security
- service
- verification of quality accreditation.

Risk relates to:
- the chance of something happening that will have an impact on objectives.

Risk assessment may include:
- identifying risks in isolation or as part of a broader risk management strategy and addressing risks such as
  - damage to property or equipment
  - environmental landscape
  - equipment or system failures
  - financial or economic loss or failure
  - inability to deliver or meet the timelines if selected
  - OHS
  - professional incompetency.

Organisational requirements may relate to:
- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- insurance cover
- OHS policies, procedures and programs
• own role, responsibility and authority
• personal and professional development
• privacy and confidentiality of information
• quality assurance and continuous improvement processes and standards
• resource parameters and procedures
• risk management
• roles, functions and responsibilities of security personnel
• storage and disposal of information.

**Legislative requirements may relate to:**

- Australian standards and quality assurance requirements
- general 'duty of care' responsibilities
- licensing or certification requirements
- privacy and confidentiality
- professional indemnity
- relevant commonwealth, state and territory legislation, codes and national standards for:
  • anti-discrimination
  • cultural and ethnic diversity
  • environmental issues
  • equal employment opportunity
  • industrial relations
  • OHS
- relevant industry codes of practice.

**Interpersonal techniques may involve:**

- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

**Relevant persons may include:**

- clients
- colleagues
- manager
- security goods and services suppliers
- security personnel
- tenderer.

**Resources may include:**
- equipment
- financial
- human
- physical
- time.

**Capacity may relate to:**
- facilities
- other priorities
- personnel expertise
- resource availability
- time.

**Organisational rate schedules may relate to:**
- award and enterprise agreements
- equipment costs
- installation costs
- labour rates
- materials costs
- monitoring costs
- service costs
- unit costs.

**Factors may relate to:**
- access to assistance and resources
- budget constraints
- competing work demands
- compliance
- contractual requirements
- disputes
- insurance
- technology and equipment breakdowns
- time penalties.

**Business technology may include:**
- computers:
  - database software applications
  - email, Internet, intranet
  - graphical presentation software
  - printers
  - project management software
  - word processing software.

**Tender submission may detail:**
- client brief
- company information
- costs
- evaluation criteria
• implementation plan
• recommended security goods or services
• security and risk assessment
• service and maintenance information
• statutory declaration
• terms of trade
• timelines
• warranty and liability terms and conditions.

Feedback may be gained through:
• participation in meetings and briefings
• recorded observations on progress of activities
• regular communication with relevant persons.

Relevant documentation may include:
• client details and records
• contract documentation
• cost schedules
• details of security goods and services
• tender documentation.

Unit Sector(s)

Unit sector Security

Competency field

Competency field Security and risk management
CPPWMT5043A Develop and implement an environmental management strategy

Modification History
Revised unit
Unit updated and equivalent to PRMWM43A Develop an environmental management strategy

Unit Descriptor
This unit of competency specifies the outcomes required to develop and implement an environmental management strategy. It requires the ability to analyse practices and develop environmental management strategies by working effectively with stakeholders.

Application of the Unit
This unit of competency supports individuals with supervisory responsibilities for developing waste management strategies. It includes contributing to the development of strategies, systems and plans, as well as recognising the need for expert advice.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of
performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1 Define scope of environmental management strategy.
   1.1 Needs and expectations for development of environmental management strategy are identified.
   1.2 Constraints under which environmental strategy can be developed are identified.
   1.3 Clear and concise statement of environmental objectives is prepared and feasibility of environmental management options is evaluated.

2 Determine environmental management strategy development process.
   2.1 Process models applicable to scope of environmental management strategy are identified.
   2.2 Process models are assessed and a suitable model for achieving the strategy’s objectives is selected.
   2.3 Principal stakeholders are identified to maximise their participation in development process.
   2.4 Stakeholders are consulted regarding acceptance of proposed strategy development process.

3 Identify resources required for environmental management strategy.
   3.1 Resource requirements of the strategy are determined in an accurate and comprehensive manner.
   3.2 Financial budget required for management strategy is prepared.
   3.3 Human resource and skill requirements for strategy are identified.
   3.4 Facility and equipment needs for strategy are identified to ensure all requirements can be met on time.

4 Identify and prioritise
   4.1 Existing data is collated in a comprehensive manner relevant to the scope and strategy.
environmental assets, problems and opportunities.

4.2 Existing data is evaluated to identify need for further data collection.

4.3 Additional data is obtained to ensure a comprehensive database for effective analysis.

4.4 Available data is assessed against scientifically established criteria and community expectations within applicable legislation and codes.

4.5 Common problems and opportunities are grouped to formulate environmental issues that can be actioned by stakeholders.

4.6 **Criteria to prioritise** environmental issues are established.

5 Prepare environmental management strategy.

5.1 Practical actions that enable a resolution of environmental issues in line with strategy objectives are determined.

5.2 Clear and concise draft documentation is prepared for the strategy to obtain feedback from stakeholders.

5.3 Feedback is evaluated and a response is formed.

5.4 Local approval of the environmental management strategy is obtained.

6 Prepare implementation plan for environmental management strategy.

6.1 Actions are prioritised to provide the most effective resolution of issues within available resources.

6.2 Resources are allocated to match action priorities.

6.3 Processes are monitored and modified as required to ensure the strategy is achieving objectives.

6.4 Responsible parties with the capacity to carry out strategy actions are identified.

6.5 Achievable timelines, schedules and targets that enable strategy objectives to be met within required timeframes are established.

6.6 **Supervisory processes** and checks and measures are implemented to ensure work is completed within time.
Monitor and review effectiveness of environmental management strategy.

**Required Skills and Knowledge**

- This section describes the skills and knowledge required for this unit.

**Required skills**

- analytical skills to:
  - determine appropriate waste management service
  - review operations
  - conduct feasibility tests
- interpersonal skills to:
  - manage consultation processes
  - present strategy
- management skills to:
  - apply change management techniques
  - conduct budgeting
  - organise work practices safely and efficiently
  - conduct strategic problem solving
  - plan work practices
  - identify and minimise hazards and risks
  - organise work methodically
  - monitor performance
  - apply quality assurance practices
  - use information technology to complete tasks
- oral communication skills to:
• ask questions
• listen actively
• consult
• give instructions
• provide strategic information

• reading skills to interpret:
  • plans
  • complex documentation

• written communication skills to:
  • write reports
  • prepare complex strategic documentation

**Required knowledge**

• environmental issues relating to:
  • life cycle of products: re-new, re-use and recycle
  • environmental regulations
  • renewable energy

• features required for an environmental management strategy, including:
  • site contract requirements
  • reclamation
  • training outline
  • waste minimisation
  • waste prevention
  • work procedures
  • environmental education
  • past and future reviews and audits relating to environmental management
  • recycling requirements
  • internal and external audits
  • monitoring personnel performance following training
  • quality control checks relating to environmental management
  • review of effectiveness of new procedures and processes
  • targets, such as:
    • carbon emissions reduction
    • cleaner production
    • lean management
    • recycling rates
    • waste minimisation

• identification and strategic knowledge of:
  • waste types, streams and characteristics
  • waste non-conformances
• unanticipated waste
• waste non-conformance procedures
• waste containment
• waste disposal and recovery routes
• occupational health and safety (OHS) requirements relating to:
  • dangerous goods and hazardous substances
  • OHS hierarchy of control
• resource recovery options relating to:
  • valuable resources within materials
  • potential resources to be recovered
• waste assessment to identify:
  • resource needs
  • hazards and risks
• waste audit, including:
  • analysing waste practices
  • analysing previous audit plans and audit processes
  • outlining possible benefits and outcomes from conducting a waste assessment
  • types of client waste management surveys and their uses
  • sampling techniques
• waste management provision, including:
  • organisational requirements and structure, including workplace communication channels and procedures
  • legislation, regulations and codes of practice applicable to specific waste management functions
  • waste management options
  • nature and significance of waste minimisation hierarchy life cycle assessment
  • organisational pricing schedules
  • duty of care

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Skills Impact
assessment and evidence required to demonstrate competency in this unit

| provide evidence of the required skills and knowledge specified in this unit. |
| In particular the person should demonstrate the ability to: |
| - identify environmental management objectives |
| - consult stakeholders consulted in development strategy |
| - prioritise environmental issues by level of importance and impact |
| - amalgamate issues in order to develop environmental management strategy. |

Context of and specific resources for assessment

| Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements. |
| Resource implications for assessment include: |
| - work plans and approved specifications |
| - forms and procedures manuals. |

Method of assessment

| The process of developing an environmental management strategy must comply with the objectives of the client as well as with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of environmental management strategy. |
| Assessment methods must: |
| - satisfy the endorsed Assessment Guidelines of the Property Services Training Package |
| - include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application |
| - reinforce the integration of employability skills with workplace tasks and job roles |
| - confirm that competency is verified and able to be transferred to other circumstances and environments. |

Guidance information for assessment

| Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support. |
| Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed. |
| This unit could be assessed on its own or in combination with other |
units of competency relevant to the job function, for example:
- CPPCMN4001B Develop workplace policies and procedures for sustainability
- CPPWMT5004A Develop waste management strategies.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

| Environmental management strategy may include: | • air and water pollution  
• biodiversity protection and protection of natural resources  
• carbon emission  
• ecosystem management  
• wildlife and endangered species. |
| Constraints may include: | • budgets  
• knowledge  
• resources  
• time. |
| Feasibility of environmental management options must include: | • commitment to environmental management strategies  
• compliance with legislation  
• cost-benefit analysis  
• costs  
• lead time  
• process constraints  
• resource requirements, including equipment and personnel  
• resources available. |
| Process models may include: | • implementation strategies, including:  
• material safety data sheets (MSDS)  
• measurement and recording  
• OHS procedures  
• personal protective equipment (PPE)  
• legislation and codes  
• site contract requirements  
• work procedures  
• objectives pertaining to:  
• changes to processes and procedures |
- environmental issues
- education and training
- past and future reviews and audits
- recycling requirements
- reduction of waste

**Review strategies, including:**
- internal and external audits
- monitoring statistics
- monitoring personnel performance following training
- undertaking quality control checks
- reviewing effectiveness of new procedures and processes
- formalising review strategies via re-planning
- sampling
- counting waste

**Targets, such as:**
- carbon emissions reduction
- lean management
- recycling rates
- waste minimisation.

Unit Sector(s)
Waste management

Custom Content Section
Not applicable.
CPPWMT5045A Develop site safety plans

Modification History
Revised unit
Unit updated and equivalent to PRMWM45B Develop site safety plan

Unit Descriptor
This unit of competency specifies the outcomes required to develop an on-site safety plan for a waste management environment. It requires the ability to plan activity for safe work practices.

Application of the Unit
This unit of competency supports individuals responsible for developing on-site safety plans. It includes contributing to the development of operational procedures, in addition to safety principles.

Licensing/Regulatory Information
No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites
Not applicable.

Employability Skills Information
This unit contains employability skills.

Elements and Performance Criteria Pre-Content
Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
## Elements and Performance Criteria

|   | Review site safety requirements. | 1.1 Details of site and site requirements are obtained and reviewed to determine specific safety requirements. |
|   |   | 1.2 Organisational requirements, occupational health and safety (OHS) regulations and legislation and codes are identified. |
|   |   | 1.3 Site safety requirements are identified according to organisational requirements. |
|   | Determine site safety requirements. | 2.1 Safety information necessary to ensure safety of personnel and general public is included in the on-site safety plan. |
|   |   | 2.2 Site areas are identified and classified in safety plan. |
|   |   | 2.3 Exact locations of first aid and emergency facilities are identified in on-site safety plan. |
|   |   | 2.4 Wastes on site are clearly identified in on-site safety plan by location and type. |
|   |   | 2.5 Emergency and personal protective equipment (PPE) requirements and potential hazards and risks are identified for specific site areas in on-site safety plan. |
|   |   | 2.6 Emergency response action or procedures are identified according to on-site safety plan. |
|   |   | 2.7 On-site safety plan is reviewed following feedback from stakeholders. |
|   | Communicate on-site safety plan to personnel. | 3.1 On-site safety plan is communicated promptly and clearly to relevant personnel according to organisational requirements, OHS regulations and legislation and codes. |
|   |   | 3.2 Personnel’s understanding of all aspects of on-site safety plan is confirmed through questioning and observation. |
|   |   | 3.3 Feedback from personnel is obtained and integrated into on-site safety plan. |
3.4 On-site safety plan is kept in an accessible place, according to organisational requirements, OHS regulations and legislation and codes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
  - determine site safety options
  - review operations
- basic illustration skills for drawing simple site maps
- interpersonal skills to:
  - manage consultation processes
  - present safety plan
- management skills to:
  - apply change management techniques
  - conduct strategic problem solving
  - plan work practices
  - identify and minimise hazards and risks
  - organise work methodically
  - apply quality assurance practices
  - use information technology to complete tasks
  - use emergency and personal protective equipment
- reading skills to interpret:
  - work or material requirements
  - materials safety data sheets (MSDS)
- written communication skills to:
  - write reports
  - prepare complex strategic documentation
- critical thinking skills to develop on-site safety plan, identifying:
  - resource needs
  - hazards and risks
- oral communication skills to:
  - ask and answer questions
  - explain on-site safety plan to personnel
give instructions
seek feedback
listen actively

**Required knowledge**

- environmental issues relating to:
  - life cycle of products: re-new, re-use and recycle
  - environmental regulations
- features required for on-site safety plan pertaining to:
  - site contract requirements
  - waste disposal methods
  - waste minimisation
  - waste prevention
  - waste segregation
  - work procedures
  - environmental issues
  - education and training outline
  - recycling and recovery requirements
  - monitoring personnel performance following safety training
  - quality control checks
  - review of effectiveness of new procedures and processes
- identification of safety issues pertaining to:
  - waste types, streams and characteristics and level of associated danger
  - waste non-conformances
  - unanticipated waste
  - waste non-conformance procedures
  - waste contaminants
  - hazardous waste
  - waste containment
  - waste disposal and recovery routes
- OHS requirements relating to:
  - dangerous goods and hazardous substances
  - OHS hierarchy of control
- waste audit, including:
  - analysing waste safety practices
  - analysing previous audit plans and audit processes pertaining to safety
- waste management provision, including:
  - organisational requirements in relation to safety
  - organisational structure and reporting requirements
  - legislation, regulations and codes of practice applicable to specific waste management
functions
- waste management safety options

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>This unit of competency could be assessed by demonstration of site safety plans developed.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit. In particular the person should demonstrate the ability to:  
  - identify site safety requirements  
  - specify all necessary PPE required to undertake work safely in each site area  
  - gather necessary information to develop on-site safety plan following consultation with stakeholders  
  - apply OHS requirements and duty of care to provide safe environment for personnel and general public. |
| Context of and specific resources for assessment | Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards’ requirements.  
Resource implications for assessment include:  
  - work plans and approved specifications  
  - forms and procedures manuals. |
| Method of assessment | An on-site safety plan must be developed in line with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of the plan.  
Assessment methods must:  
  - satisfy the endorsed Assessment Guidelines of the Property Services Training Package  
  - include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application |
• reinforce the integration of employability skills with workplace tasks and job roles
• confirm that competency is verified and able to be transferred to other circumstances and environments.

Guidance information for assessment

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

This unit could be assessed on its own or in combination with other units of competency relevant to the job function, for example:
• CPPCMN3001B Participate in environmentally sustainable work practices
• CPPCMN4007A Manage workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Details of site and site requirements may include:
• areas allowing access to general public
• organisational and site OHS requirements
• number of personnel on site
• potential hazards and risks, including level of risk
• waste incoming
• waste present at site.

Organisational requirements may include information found in:
• briefing papers
• job sheets
• letters
• memos
• operations manuals
• quality assurance documents
• tender and contract documents
• verbal or written instructions
• work procedures.

Legislation and codes
• codes, including:
may include:

- Australian Code for the Transport of Dangerous Goods by Road and Rail
- industry
- commonwealth, state and territory legislation, including:
  - anti-discrimination
  - environmental protection
  - equal employment opportunity
  - freedom of information
  - industrial
  - OHS
  - trade practices
  - road laws.

Potential hazards and risks may include:

- broken glass
- broken metal
- compaction equipment
- contamination
- dust
- fire
- gases and fumes
- hazardous waste (e.g. sharps)
- narrow driveways
- other vehicles and equipment
- overhanging signs
- projectiles
- spark-producing equipment
- unguarded conveyor belts

**Emergency and personal protective equipment must include:**

- communications equipment
- eye protection, such as goggles and protective glasses
- eyewash kit
- fire extinguishers
- first aid kit
- footwear
- gloves
- overalls and protective clothing.

**Emergency and personal protective equipment could also include:**

- breathing apparatus
- emergency procedure guides
- face shields or masks
- hard hats
- hearing protection
- MSDS
- spill kit.

**Potential hazards and risks are those identified by the organisation that may lead to:**

- damage to plant, vehicle or property
- harm to the environment
- illness or injury to employees, contractors or the public
- injuries resulting from manual handling and repetitive work.

**Personal protective equipment must be:**

- cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements
- worn when required according to organisational requirements
- stored according to organisational requirements.

**Include:**

- liquid (non-hazardous), e.g. chemical and aqueous
- hazardous – regulated, prescribed, quarantined, medical and clinical
- recoverable resources, e.g. recyclable and green waste.

Application

This unit describes the skills and knowledge required to use a range of computer-aided design and drafting (CADD) program functions to produce drawings. The focus of this unit is on the technical skills required to operate CADD, not on design skills.

It applies to individuals who use computer-aided drawing skills in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – art, craft and design

Elements and Performance Criteria

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
## Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### CADD functions and features must include:

- drawing tools to support methods for drawing:
  - lines
  - arcs
  - polylines
  - texts
  - dimensions
- edit functions
- plotting and printing
- view displays
- working with layers.

Performance Evidence

Evidence of the ability to:

- select computer-aided design and drafting (CADD) hardware and software to suit project requirements
- follow operating instructions and organisational procedures
- use features and functions of a CADD program to produce drawings that meet project objectives
- use feedback from others to refine and produce final drawings within specified timelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevant hardware, software, tools and equipment used for CADD
- describe the ways in which CADD is used within the specific workplace situation
- describe typical features and functions of CADD programs, including drawing tools, view displays, edit functions, working with layers, plotting and printing.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- CADD equipment and software
- project or concept information
- operating instructions and organisational procedures
- relevant people.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Performance Evidence

Evidence of the ability to:

- produce technical drawings which:
  - show a command of selected techniques
  - adhere to technical drawing standards and conventions
  - satisfy specified drawing purposes and concepts
  - follow workplace procedures and safety requirements
  - use feedback from others to refine and produce final drawings
  - meet deadlines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- explain technical drawing techniques and their application to a range of contexts and subject matter
- explain current standards and conventions for technical drawing
- describe work health and safety requirements for preparation of technical drawing materials and equipment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

</table>

Application

This unit describes the skills and knowledge required to work with Aboriginal and Torres Strait Islander cultural material in a culturally appropriate manner. It involves the complex and interrelated elements of Aboriginal and Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities; elements that may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

It applies to individuals who source, handle, interpret and exhibit Aboriginal or Torres Strait Islander cultural material in accordance with specific cultural and consultative requirements. The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander people. This unit also reflects that there is no single Aboriginal or Torres Strait Islander culture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cultural services - Aboriginal and Torres Strait Islander cultural heritage

<tr>
<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with CUA Creative Arts and Culture Training Package version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- source Aboriginal or Torres Strait Islander cultural material for display or exhibition
- consult in a culturally sensitive and effective manner with Aboriginal or Torres Strait Islander community members and custodians about the display of cultural material
- develop agreements for the use of cultural material and record them where required
- undertake activities preparing for the display of Aboriginal or Torres Strait Islander cultural material in a logical and efficient manner, demonstrating knowledge of cultural protocols and practices
- move, store, display, maintain and return cultural material in a manner consistent with established cultural protocols.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain nature and scope of Aboriginal or Torres Strait Islander cultural material appropriate for exhibition or display
- identify appropriate keeping places for cultural material not suitable/forbidden for exhibition or display
- explain issues and protocols relating to the use and return of cultural material to Aboriginal or Torres Strait Islander communities
- identify copyright, moral rights and intellectual property issues with particular reference to Aboriginal or Torres Strait Islander cultural material
- identify sources of support for developing Aboriginal and Torres Strait Islander collections
• describe current conventions of collection management, including appropriate consultations and respect for traditional custodianship when working with Aboriginal or Torres Strait Islander cultural material, including non-western concepts of collecting
• explain cultural protocols and appropriate consultations for identifying, moving, storing, maintaining and displaying cultural material in the relevant community context
• explain current industry policy on acquiring and managing Aboriginal and Torres Strait Islander cultural material.

Assessment Conditions
Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in Aboriginal and Torres Strait Islander cultural heritage environments. The assessment environment must include access to:
• Aboriginal or Torres Strait Islander cultural material or information on material when access is not available
• information about cultural protocols.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Assessment must ensure involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant Aboriginal or Torres Strait Islander community.

</table>

Application

This unit describes the skills and knowledge required to handle, pack and unpack collection material when moving or storing it. It involves using techniques and materials suited to the material in accordance with established guidelines.

It applies to individuals who handle, move and store different types of collection material. Movement and storage may be within the same building of an organisation or to an external location. Storage may be short or long-term.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cultural services - collection management

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
<tr>
<td>1. Determine movement and storage requirements</td>
<td>1.1 Assess documentation to determine scope of work required for movement and storage of collection material</td>
</tr>
<tr>
<td></td>
<td>1.2 Identify organisational procedures and guidelines and specific requirements and confirm with relevant personnel</td>
</tr>
<tr>
<td></td>
<td>1.3 Assess collections to estimate projected current and future storage requirements with relevant personnel</td>
</tr>
</tbody>
</table>
## ELEMENT  PERFORMANCE CRITERIA

1.4 Seek specialist advice or assistance where required

### 2. Pack and unpack collection material

2.1 Select appropriate packing materials, tools and equipment and use safely
2.2 Handle collection material safely and in a manner that maintains integrity of collection material
2.3 Apply conservation and sustainability principles in the use of packaging materials
2.4 Label packaging to facilitate easy identification by others during transportation and within storage facilities
2.5 Recycle and dispose of waste responsibly

### 3. Move collection material

3.1 Select appropriate handling and moving equipment, and use safely
3.2 Handle collection material in a manner that protects individual items and contributes to efficient loading and unloading processes
3.3 Identify hazardous items and load them in a manner that minimises health and safety risk
3.4 Inspect load prior to transportation to ensure that items are loaded and secured appropriately, and make adjustments as required
3.5 Prepare transportation documentation

### 4. Arrange collection material and update records

4.1 Install, position or store collection material as required and within expected timeframes
4.2 Clear and clean work areas according to organisational procedures
4.3 Refer problems to relevant personnel as required
4.4 Update existing movement and storage records and prepare new records as required
4.5 Store records according to organisational policies and procedures

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version first released with CUA Creative Arts and Culture Training Package version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

Evidence of the ability to:

- identify nature and scope of movement or storage work through review of workplace documentation and consultation with relevant personnel
- determine the job-specific requirements, based on the collection material to be moved and stored, and any cultural protocols and stakeholders to be considered
- prepare identified requirements, seeking specialist advice or assistance where required
- handle, move and store collection items using appropriate tools, equipment, techniques and organisational procedures to maintain the integrity of the collection material and meet required timeframe for movement and storage
- use safe and sustainable work practices during movement and storage work to:
  - handle collection material safely
  - use transport equipment and packaging material safely
  - minimise hazards during the work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the key organisational procedures and guidelines relating to:
  - storage and transport documentation and records
  - use of materials, tools and equipment, including labelling
  - manual handling and work health and safety (WHS) procedures and requirements
  - preventive pest management processes
  - waste recycling and disposal
- describe the packing and storage approaches and techniques for:
Assessment Requirements for CUACNM301 Move and store collection material

- culturally sensitive material
- different types of collection material
- internal and external transportation
- short and long-term storage
- explain the record-keeping procedures for collection movement and storage
- identify the security requirements and issues to be considered when moving or storing collection material.
- list sources of specialist advice for moving and storing collection material.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- a collection to be moved and stored
- materials, tools and equipment for packing, moving and storing collection items
- organisational procedures relating to moving and storing collection material
- sources of advice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Companion Volume implementation guides are found in VETNet - https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5
CULMS002B Research and evaluate Aboriginal or Torres Strait Islander cultural material

Modification History
Not applicable.

Unit Descriptor

Unit descriptor  This unit describes the performance outcomes, skills and knowledge required to research the context and interpretation of Aboriginal or Torres Strait cultural material. As such, the unit focuses on the skills to analyse cultural material, including current collections and the impact of post-colonial history. These skills then form the basis for appropriate treatment and interpretation of cultural material. The unit includes a focus on appropriate consultation with the traditional custodians of cultural material.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit  This unit has particular application to Aboriginal or Torres Strait Islander peoples.

The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander peoples. This unit also recognises that there is no single Aboriginal or Torres Strait Islander culture.

The unit deals with complex and interrelated elements of Aboriginal or Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities across the continent and islands of Australia. These may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

Any organisation or individual planning to train or assess this unit would be expected to work in a culturally appropriate manner with the appropriate Aboriginal or
Torres Strait Islander community, for example through the establishment of a local Aboriginal or Torres Strait Islander reference group. In particular, it is vital to ensure respectful integration of any local cultural knowledge or protocols that will inform the implementation of the unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability Skills

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Research the context</td>
<td>1.1 Identify relevant sources of information on cultural</td>
</tr>
</tbody>
</table>
ELEMENT

of Aboriginal or Torres Strait Islander cultural material

PERFORMANCE CRITERIA

1.2 Use formal and informal research techniques in a culturally appropriate manner to access information

1.3 Critically evaluate the validity of the range of interpretations of cultural material and the cultural relevance to its traditional custodians

2 Assess post-colonial interpretation of Aboriginal or Torres Strait Islander cultural material

2.1 Critically evaluate the ways in which different aspects of post-colonisation history have affected the interpretation of Aboriginal or Torres Strait Islander cultural material

2.2 Critically evaluate collections in relation to the context in which materials were collected and interpreted and the respect shown for cultural protocols in sourcing, handling and exhibiting cultural material

2.3 Assess ways in which interpretations by those other than traditional custodians may have impacted on communities and/or individuals

3 Develop approaches to the interpretation of Aboriginal or Torres Strait Islander cultural material

3.1 Identify and explore potential new and appropriate approaches to the interpretation of cultural material based on knowledge and understanding of consultation with traditional custodians and respect for their wishes

3.2 Integrate the concept and practice of community consultation within interpretive approaches

3.3 Develop substantiated positions for interpretive approaches

3.4 Enhance interpretative approaches by challenging and adapting own ideas

4 Communicate new approaches to stakeholders

4.1 Identify key stakeholders in the interpretation and exhibition of cultural material, including traditional custodians
ELEMENT PERFORMANCE CRITERIA

4.2 Consult and negotiate ways with stakeholders in culturally appropriate ways to interpret Aboriginal or Torres Strait Islander cultural material in accordance with wishes of traditional custodians

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- research and critical-thinking skills to analyse, interpret and present complex and varied references for application to cultural material
- literacy skills to critically evaluate and communicate ideas and concepts surrounding cultural material.

Required knowledge

- broad range of sources of information about post-colonial history, theory and cultural practice relating to Aboriginal or Torres Strait Islander cultural material
- key aspects of post-colonial history and its impact on the collection and interpretation of Aboriginal or Torres Strait Islander cultural material
- copyright, moral rights and intellectual property issues and legislation with particular reference to Aboriginal or Torres Strait Islander cultural material
- cultural protocols and appropriate consultations for the movement, storage and maintenance of cultural material in the relevant context/type of display
- cultural protocols for the exhibition of cultural material in the relevant community context.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction
EVIDENCE GUIDE

with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:
- sound knowledge of information sources for Aboriginal or Torres Strait Islander cultural material
- knowledge of cultural protocols and practices as well as appropriate consultative processes in seeking information
- application of research and analytical skills to evaluate Aboriginal or Torres Strait Islander cultural material and its context.

Context of and specific resources for assessment

Assessment must ensure:
- involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant community
- access to sources of information on Aboriginal or Torres Strait Islander cultural material.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- project to research a specific collection of Aboriginal or Torres Strait Islander cultural material
- project to research and document the cultural significance of particular objects
- case studies to assess ability to research and use different types of information in the analysis of cultural material
- oral or written questioning to assess knowledge of cultural material.

Holistic assessment with other units relevant to the industry sector, workplace and job role is
EVIDENCE GUIDE

recommended, for example:

- CULMS001B Work with Aboriginal or Torres Strait Islander cultural material
- other collection and exhibition management units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant sources of information may include:

- community members (family groups, cultural educators, Elders)
- libraries
- museums
- archives
- cultural centres
- community organisations
- Indigenous units within local, state or national bodies

Cultural material may be:

- part of an existing collection (public or private)
- not yet part of a collection
- held by the local Aboriginal or Torres Strait Islander community or broader community
- held by an organisation external to the community
- held by individuals
- in the care of traditional custodians

The context of cultural material may relate to:

- pre-colonisation cultural practices
- post-colonisation collection and interpretive practices
- cultural/spiritual significance of cultural material to community
- the way material was acquired and historical view
RANGE STATEMENT

of Indigenous collections
- treatment of collection materials
- dispersal of skeletal remains and cultural materials within and outside of Australia
- men's or women's business
- secret or non-secret business
- rarity
- locality

Formal and informal research techniques may include:
- discussion
- note taking, listing
- interviews
- questionnaires
- critical discourse
- analysis
- reflection
- comparing information
- summation
- judgement
- observation

Information may relate to:
- philosophy
- Indigenous world views
- effects of colonisation on Indigenous lives and cultures
- dreaming stories
- world histories
- cultural issues
- spiritual beliefs
- aesthetics
- politics
- gender and identity issues
- land and place - traditional custodians of Country
- signs and symbols in cultural practice
- evaluative criticism in relation to interpretations made by post-colonial interpreters
- oral histories
RANGE STATEMENT

Cultural protocols may relate to:
- acquisition of material
- transportation
- storage
- written documentation on cultural materials
- exhibition
- geographic location
- degree of consultation with traditional custodians
- respect for the wishes of traditional custodians

New and appropriate approaches to interpretation may relate to:
- local Aboriginal or Torres Strait Islander community involvement
- different perceptions of both pre and post-colonial history
- interpretation in the context of post-colonial effects and behaviours
- local history
- oral histories
- appropriate consultation with traditional custodians
- respect for the wishes of traditional custodians
- industry/sector debate

Challenging and adapting ideas may include:
- comparing
- contrasting
- reflecting
- critiquing
- judging
- considering merit
- discussing and debating

Key stakeholders may include:
- Indigenous communities, including traditional custodians
- current holders of collections (private and public)
- cultural centres
- Indigenous units within local, state and national bodies
- museum/heritage organisations
Unit Sector(s)

Competency field
Competency field  Aboriginal or Torres Strait Islander Museum Practice
CULMS010B Contribute to the preservation of cultural material

Modification History
Not applicable.

Unit Descriptor
Unit descriptor
This unit describes the performance outcomes, skills and knowledge required to contribute to the preservation of cultural material through a sound knowledge of conservation principles, practices and ethics and the application of basic preservation activities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit
Application of the unit
This unit applies to individuals who have significant knowledge of preservation issues and may be involved in the application of basic preservation techniques with the involvement of a professional conservator.

The content of this unit relates to work that has a significant impact on Australia's cultural heritage and care must be taken to ensure appropriate implementation of the unit.

Any individual or organisation planning to undertake training and/or assessment of this unit must therefore consult with an appropriately qualified conservator or conservation organisation. The Australian Institute for the Conservation of Cultural Material is the recognised professional body in this area.

Licensing/Regulatory Information
Not applicable.
Pre-Requisites

Prerequisite units  Nil

Employability Skills Information

Employability Skills  The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

ELEMENT PERFORMANCE CRITERIA

maintains the integrity of the cultural material

2.3 Record data generated in the course of activities clearly and accurately in the appropriate format

2.4 Follow health, safety and environmental requirements at all times

2.5 Ensure that ethical and cultural protocols are adhered to at all times

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to undertake ongoing professional development and acquisition of knowledge around preservation issues and concepts
- literacy skills to interpret conservation plans, to research conservation information, document and to report on condition of cultural material.

Required knowledge

- distinction between preservation, conservation and restoration
- basic preservation principles and methods
- principles and methods for handling cultural material
- available sources of appropriate expert advice
- AICCM Code of Ethics and Code of Practice
- copyright, moral rights and intellectual property legislation and issues that impact on conservation
- cultural protocols that impact on conservation of cultural material, including those for Aboriginal or Torres Strait Islander material
- role of a conservator and of a person working under the guidance of a conservator, including the scope of work undertaken by each and rationale for this
- requirements for safe work and manual handling
- formats and features of conservation plans, object condition reports.
Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sound general knowledge of preservation techniques relevant to the collection/industry sector
- understanding of conservation ethics and cultural protocols, including limitations on the scope of work to be undertaken
- practical demonstration of competent and safe techniques working on one or more items under the guidance of a conservator.

Context of and specific resources for assessment

Assessment must ensure:

- access to cultural material
- access to equipment, materials and tools used in basic preservation activities.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- assessment of cultural material on which the candidate has worked
- direct observation of the candidate using techniques
- evaluation of candidate's responses to different collection scenarios to assess ability to develop approaches for different preservation needs and articulate different challenges and issues to be considered
- oral or written questioning to assess knowledge of different techniques and procedures.
EVIDENCE GUIDE

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CULMS009B Implement preventive conservation activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Opportunities to develop, update and maintain knowledge of preservation issues and concepts may include:

- research
- attendance at seminars, workshops
- membership of professional organisations
- using conservator as a mentor
- reading current journals, newsletters and electronic discussion lists

Basic preservation activities will vary depending on the type of cultural material, but may include:

- surface cleaning
- designing/making storage enclosures and display supports
- attaching backboards to paintings
- creating hanging systems for paintings
- mounting and framing

Activities must be undertaken in accordance with advice from a specialist conservator to avoid potential damage to cultural material.

Organisational plans and policies vary in structure and may include:

- preservation plans
- conservation plans
RANGE STATEMENT

name but may include:

- collection management policies
- disaster preparedness policies

_Cultural material_ is defined as 'objects, collections, artworks, specimens, structures or sites' and includes:

- archaeological material
- books and manuscripts
- cultural sites/buildings
- ethnographic material
- flora and fauna
- film/audiovisual material
- furniture
- photographs
- technological/industry items
- textiles
- works on paper/canvas

_Health, safety and environmental requirements_ may relate to:

- use of chemicals or other toxic substances
- storage of chemicals
- provision and use of safety equipment
- safe manual handling
- safe use of tools and equipment
- reporting of occupational health and safety issues, including events and near misses
- impact on other parts of the collection
- toxic and hazardous materials in a collection
- condition/stability of item (dirt, mould, dust and pesticides)

_Cultural protocols_ may relate to:

- who can handle the cultural material
- where an item may be handled
- when an item may be handled
- consultation on potential treatments
- storage requirements
- appearance of the item
- relationship between item and other material in the collection
- methods and approaches to display

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively implemented the food safety program and procedures on two separate occasions in a food processing or food packaging environment, including:

- identifying own responsibilities with regard to food safety
- identifying food safety risks in the workplace and the control measures used to manage them
- applying control measures in own work
- monitoring compliance with food safety standards
- identifying and acting on non-compliances, and participating in improving safety
- maintaining required standards of personal hygiene.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of critical control point (CCP)-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and the food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
- Food Standards Code and why it exists
- common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- methods used to monitor that food safety is under control, including the purpose of sampling
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records, and the recording requirements of the food safety program
- methods used in the workplace to isolate or quarantine food that may be unsafe
- product and ingredient traceability procedures, such as product recall where required by work responsibilities
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents a real food processing workplace
- resources, equipment and materials:
  - food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods
  - sampling and test procedures and related equipment
  - appropriate clothing and related apparatus
  - reporting and monitoring systems
- specifications:
  - work instructions and procedures relevant to work task
  - cleaning and sanitation policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has effectively monitored the implementation of quality and food safety programs on two different occasions, including:

- confirming quality and food safety program requirements, risks and control measures of the work area
- confirming that control measures are in place and that personnel in the work area are equipped and informed to implement programs
- identifying, addressing and following up on non-compliances
- identifying causes of non-compliance
- conducting risk assessments and recommending responsive actions
- providing support to others to implement the programs
- completing and maintaining documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- procedures and responsibilities for food safety relevant to the workplace
- principles of a critical control point (CCP) analyses approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control, and confirming that controls are met
- Food Standards Code
- basic concepts of quality assurance, including hazards, risk assessment and control methods
• methods to manage and support quality and food safety in the workplace, including systems for maintaining and updating documents, including operating procedures and specifications
• clothing and footwear requirements for working in and/or moving between food handling areas, including personal clothing maintenance, laundering and storage requirements
• appropriate bandages and dressings to be used when undertaking food handling
• housekeeping requirements and responsibilities relating to own work, including use and storage of housekeeping/cleaning equipment
• procedures to follow in the event of pest sighting or discovery of infestation
• purpose and importance of cleaning and sanitation procedures
• legislative requirements for food safety and quality
• awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
• suitable standard for materials, measuring devices, equipment and utensils used in the work area
• properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
• reasons that food safety/quality hazards occur, including an understanding of common microbiological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes
• procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials
• sampling procedures, test methods and inspections
• options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses, and level of responsibility for decision-making
• methods used in the workplace to isolate or quarantine food that may be unsafe
• waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, including hazardous waste
• traceability and recall procedures within level of responsibility
• documentation system and procedures, including recordkeeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
• internal and external auditing arrangements, roles and responsibilities as they relate to own work responsibilities
• appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
• skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • personal protective clothing and equipment as required
  • reporting and monitoring systems
• specifications:
  • food safety program for the work area that identifies critical control points, control measures and corrective actions
  • quality policy, system and procedures
• relationships:
  • interactions with work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to participate in the development and review of a hazard analysis critical control point (HACCP)-based food safety program.

The unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others, and who participate in the development of a food safety program typically limited to their immediate work area.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has actively participated in a food safety team on a minimum of two occasions, including:

- identifying food safety hazards in the critical control points (CCPs) of production processes
- establishing and validating control standards and methods for a minimum of two potential hazards
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and intent of food safety legislation, including Food Standards Code
- the roles and responsibilities for developing and maintaining the food safety program, including roles of internal and external auditors and authorised officers
- techniques for applying critical control point principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredients and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
• sources of technical expertise on food safety requirements
• the role of consultation in the development, implementation and ongoing maintenance of the food safety program
• documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
• main types of food safety hazards and contamination likely to occur given product type and processing methods used
• conditions required for bacterial food poisoning to occur, such as water activity, pH, composition and time and temperature as relevant to food handled
• acceptable control methods for identified hazards, and required corrective actions when control requirements are not met
• typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability, personal hygiene, and how they can be used as part of a food safety program
• validation and verification processes and techniques and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • workplace food safety program documentation
• specifications:
  • review/audit arrangements
  • advice on quality and food safety legislation
  • procedures for developing or modifying specifications and other advice on food safety requirements
  • reporting/recording system
• relationships (internal and/or external):
  • interactions with team members.

Application

This unit of competency describes the skills and knowledge required to set up, monitor, and adjust a process to produce creamed honey.

This unit applies to individuals who apply basic operating principles to the operation and monitoring of machines and equipment used to cream honey in a production environment within the honey processing industry.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has:

- conducted pre-start checks on machinery used for creaming honey
- started, operated, monitored and adjusted process equipment used for creaming honey to achieve required quality outcomes
- taken corrective action in response to typical faults and inconsistencies
- completed workplace records in required format
- applied safe work practices, and identified work health and safety hazards and controls
- safely shut down equipment
- applied food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic principles of crystallisation, including:
  - an understanding of crystal structure and where appropriate
  - methods used to reduce crystal size
  - the effects of temperature and agitation on crystal formation
  - appropriate ratio of seed to liquid honey
  - factors that influence the crystallisation process, including moisture content and crystal size
- basic operating principles of equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
• purpose and location of sensors and related feedback instrumentation
• services required for creamed honey manufacture and action to take if services are not available
• quality and organoleptic characteristics of different types of honey processed
• quality characteristics to be achieved by the final product, and related test methods used to confirm quality
• quality requirements of seed and liquid honey used, and the effect of variation on the final product
• operating requirements, parameters and corrective action required where the process is outside specified operating parameters (including ambient and processing temperatures, agitation speeds, and holding times and temperatures)
• typical equipment faults and related causes, including:
  • signs and symptoms of faulty equipment
  • early warning signs of potential problems
• methods used to monitor each stage of the production process, including inspecting, measuring and testing as required
• inspection or test points (control points) in the process and the related procedures and recording requirements
• contamination and food safety risks associated with the process and related control measures (this relates specifically to air inclusion and moisture content, and related methods of control)
• common causes of variation and corrective action required
• factors that affect the stability and shelf-life of the finished product and options to extend shelf-life, including storage conditions for packed product
• work health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
• requirements of different shutdowns as appropriate to the process and workplace production requirements, including:
  • emergency and routine shutdowns
  • procedures to follow in the event of a power outage
• isolation, lock out and tag out procedures and responsibilities
• procedures and responsibility for reporting production and performance information
• environmental issues and controls relevant to the process, including waste/ rework collection and handling procedures related to the process
• basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
• routine maintenance procedures for creamed honey manufacture equipment
• cleaning and sanitation procedures for creamed honey manufacture equipment.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
• a workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • process and related equipment and services
  • seed and liquid honey
  • personal protective clothing and equipment
  • sampling schedules, and test procedures and equipment
  • cleaning procedures, materials and equipment
• specifications:
  • work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  • information on equipment capacity and operating parameters
  • production schedule/batch instructions
  • specifications, control points and processing parameters
  • documentation and recording requirements and procedures
• relationships:
  • interactions with team members and supervisors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a packaging process or sub-system.

This unit applies to individuals who operate and monitor a packaging process and associated equipment in a food processing packaging environment. The unit applies in a food processing packaging environment where no other specific packaging unit is available.

A packaging process may relate to primary and secondary packaging activities. It typically requires the operation of a series of related items of equipment to achieve the required outcome.

All work must be carried out to comply with workplace procedures, in accordance with State/Territory work health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has operated a packaging process on at least one occasion, including:

- accessing workplace information to identify packaging requirements
- selecting, fitting and using PPE
- confirming supply of necessary packaging components/consumables, materials and services
- conducting pre-start checks, including:
  - inspecting equipment condition to identify any signs of wear
  - setting coders and printers
  - selecting appropriate equipment settings and/or related parameters
  - cancelling isolation or lock-outs as required
  - confirming that equipment is clean and correctly configured for packaging requirements
  - positioning sensors and controls correctly
  - ensuring any scheduled maintenance has been completed
  - confirming that all safety guards are in place and operational
- starting, operating, monitoring and adjusting packaging equipment to achieve required outcomes, including:
  - packaging components/consumables and/or product
  - monitoring control points (for example, weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity) as required to confirm process remains within specification
  - monitoring supply and flow of materials to and from the process
  - taking corrective action in response to out-of-specification results
  - responding to and/or reporting equipment failure within level of responsibility
  - locating emergency stop functions on equipment
- following isolation and lock-out/tag-out procedures as required to take packaging equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- completing workplace records as required
- maintaining work area to meet housekeeping standards
- using process control systems according to enterprise procedures
- cleaning and sanitising equipment according to enterprise procedures
- following relevant work health and safety procedures.

**Knowledge Evidence**

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the packaging process, including:
  - the purpose and characteristics required of packaging materials used
  - the principles of the packaging process used (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of equipment, including:
  - main equipment components
  - status and purpose of guards
  - equipment operating capacities and applications
  - the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- the flow of processes supplying the packaging process and the effect of outputs on downstream processes
- quality characteristics required of the packaging process, including seal integrity requirements
- effect of variation in inputs, including packaging components/consumables, materials and/or services, on process performance
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam-up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the packaging process, including visual inspecting, and measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks related to stages in the packaging process, and related control measures
- common causes of variation and corrective action required
- work health and safety hazards and controls relevant to the packaging process
- requirements of different shutdowns as appropriate to the packaging process, including:
  - emergency and routine shutdowns and procedures to follow in the event of a power outage
  - conducting basic equipment referencing where required
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitation procedures for packaging equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:
- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - personal protective clothing and equipment
  - packaging and related equipment and services
  - materials to be packaged and packaging components/consumables
  - sampling schedules, test procedures and equipment
- specifications:
  - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
  - information on equipment capacity and operating parameters
  - specifications, control points and operating parameters
  - documentation and recording procedures
  - cleaning procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to interpret sampling plans, and to collect and transfer samples to retain sample integrity.

This unit applies to individuals who would typically be required to follow specific sampling procedures under general supervision.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively taken 10 samples, in line with the sampling plan, including:

- accessing and interpreting sampling plan to identify requirements
- selecting, fitting and using personal protective equipment
- preparing for sampling to ensure required tools, containers and labels are available
- following sampling procedures and the sampling plan to collect samples from the designated points, in the quantities and at the times specified
- identifying atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules
- completing sample records according to workplace requirements, such as labelling samples as required
- transferring samples for testing
- maintaining work area to meet housekeeping standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of personal protective equipment
- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples, and related handling and preparation requirements and responsibilities
• characteristics of materials sampled, and common contaminants and related conditions under which contamination is likely to occur
• sampling techniques relevant to samples collected, such as sterilisation methods and procedures
• the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
• procedures and responsibility for reporting and recording sampling information, including legislative requirements
• procedures for preparing samples.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
• resources, equipment and materials:
  • sampling plan
  • recording and reporting system
  • sampling equipment and containers as required
  • product/source material to be sampled.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to coordinate vineyard operations in a range of day-to-day activities in areas such as harvesting, nursery, pruning or canopy management.

The unit applies to individuals who coordinate operations within a vineyard. They work under broad direction and exercise autonomy and judgement where required.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively coordinated operations in a vineyard involving day-to-day activities in areas of harvesting, nursery, pruning or canopy management at least once, including:

- complying with health and safety requirements in the workplace
- selecting and fitting personal protective equipment (PPE)
- determining activities required of the vineyard processes and individuals in order to meet job targets
- allocating activities and monitoring their implementation
- providing team leadership and instruction for vineyard personnel
- identifying and addressing non-conformances
- completing workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace planning processes:
  - planning and scheduling vineyard activities
- personnel requirements:
  - equipment and materials required
  - location
  - transport
  - timing
  - environmental conditions
  - other vineyard activities
• quality and quantity requirements
• vineyard health and safety hazards and controls in the workplace
• vineyard environmental issues and controls
• team leadership communication principles and strategies
• procedures for monitoring and reporting on individual and team performance
• vineyard activities to be monitored:
  • compliance with workplace, environmental and quality procedures
  • individual and team performance
  • achievement of targets, timelines and performance requirements
  • team members’ learning needs
  • instructing individuals and groups
  • providing feedback to individuals and groups
  • resolving conflicts
• how to recognise, correct and report non-conformances
• how to maintain workplace records.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a vineyard workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • vineyard equipment, services and corresponding information
  • products and materials required for vineyard work
  • system for recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, people management, quality and environmental requirements
  • work instructions and schedules
• relationships (internal and/or external):
  • small work groups or teams to coordinate.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively undertaken activities to maintain a field nursery at least once including planting, maintaining and processing field nursery vines and:

- following health and safety in the workplace procedures
- selecting and fitting personal protective equipment (PPE)
- planting in field nursery according to workplace procedures
- following vine protection procedures
- preparing for, implementing and monitoring nursery activities
- preparing vine rootlings for transport
- monitoring the health of rootlings
- Identify and addressing non-conformances.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- PPE
- preparation of field nursery bed for planting:
  - treatment of weeds
  - soil cultivation and nutrition
  - planning vine planting
  - application of weed matting
  - herbicide and fertiliser treatments
  - positioning irrigation pipes and points
• methods of planting in field nursery
• selection and application of vine protection methods, including:
  • weather conditions
  • vineyard pests
  • orientation of vineyard
  • irrigation or fertilisation schedule
• maintenance of health of growing vines
• common causes and signs of growth disorders and corrective action required:
  • soil moisture
  • signs of disease and pests and nutrient deficiency
  • water stress
  • growth rate
• procedures for lifting vine rootlings from the nursery bed:
  • ensuring minimal plant damage
  • roots undercut
• procedures for transporting rootlings:
  • trimming
  • counting and bundling
  • labelling, grading and packing
• procedures for taking corrective action in response to out-of-specification growth or appearance
• procedures and responsibility for reporting problems
• environmental issues and controls
• reporting and recording requirements.

Assessment Conditions
Assessment of skills must take place under the following conditions:

• physical conditions:
  • a field plant nursery workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • field nursery equipment
  • products and materials required for field nursery work
  • a system for recording information
• specifications:
  • work procedures, including advice on company practices, safe work practices and environmental requirements
  • work instructions and schedules.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</tbody>
</table>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down seed spreading equipment at least once and demonstrated the following, including:

- recognising health and safety hazards and applying controls in the workplace
- selecting and using personal protective equipment (PPE)
- ensuring availability of specified materials and preparing according to workplace requirements
- selecting, attaching, setting up and calibrating equipment to meet job requirements
- starting, operating and shutting down equipment in accordance with workplace procedures
- monitoring spreading or seeding operations to achieve specified result
- shutting down the equipment according to workplace procedures
- taking corrective action in response to non-conformance results
- disposing of waste materials according to workplace and environmental policies
- recording information accurately.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and application of spreading and seeding operations within the vineyard growing system, including:
  - soil ameliorants
  - inter-row cropping species and varieties
  - inter-row cropping practices and techniques
  - inorganic and organic fertilising materials
  - process specifications, procedures and operating parameters
- application parameters for seed or spreading materials:
• correct variety or type of seed and fertiliser
• correct soil ameliorant and treatment
• application rate
• volume
• application depth
• density
• coverage
• required weather conditions for activity
• soil characteristics as they apply to spreading and seeding operations
• purpose and operation of seeding and spreading equipment and instrumentation components:
  • common causes of non-conformance and corrective action required
  • significance and methods of monitoring equipment performance
  • storage procedures for equipment and materials
  • routine maintenance procedures for equipment
  • start up and shutdown sequence
• equipment status and condition:
  • belts and chains
  • lubricants
  • hydraulics
  • air intake
  • tyre pressure and wear
  • wear and tear
• how to select, attach, set up and calibrate equipment to meet job requirements
• how to select, prepare and load materials according to job requirements
• how to start up, operate and monitor equipment
• how to conduct routine maintenance of equipment according to workplace procedures
• local environment and operating conditions
• health and safety hazards and controls in the workplace
• PPE
• procedures and responsibility for reporting non-conformances
• procedures for collecting, sorting, treating, disposing of and recycling waste to meet environmental compliance
• equipment cleaning requirements and procedures
• storage requirements associated with temporary or seasonal breaks in activity
• procedures for maintaining workplace records.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
• an agricultural or horticultural workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • spreading and seeding equipment, services and corresponding information
  • spreading and seeding products and materials
  • cleaning procedures, materials and equipment
  • documentation and recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, equipment calibration and environmental requirements
  • work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively monitored and maintained three different containerised nursery plants and demonstrated the following:

- identifying and following health and safety in the workplace procedures
- selecting and using personal protective equipment (PPE)
- identifying environmental factors and their effect on plant growth and health
- monitoring and controlling irrigation and treatments to meet production outcomes
- identifying and addressing non-conformances
- confirming available stock levels to meet customer requirements
- preparing stock for dispatch
- dispatching nursery plant stock to meet customer requirements
- completing documentation to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic vine physiology, as it applies to:
  - transpiration
  - water intake
  - nutrient uptake
  - photosynthesis
  - respiration
  - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality:
• buds, nodes and tendrils
• cambium, epidermis, phloem and xylem
• leaf blade, bract and petiole
• bunch, berries and flowers
• key grape varieties and their distinguishing features:
  • berry and bunch characteristics
  • frost and disease resistance
  • flavour and style
• annual grapevine growth stages:
  • budburst
  • flowering
  • on set of ripening
  • maturity
• irrigation systems and methods including:
  • methods of calculating daily water needs
  • methods for monitoring water use
  • relationship between water needs of nursery plants and environmental parameters
• maintenance of irrigation systems:
  • fixing blockages
  • servicing irrigation system components
  • identifying and reporting faults in the irrigation system
  • fixing leaking heads and hoses
  • monitoring water requirements
  • using soil moisture devices
• checking plants for physical signs of water stress or waterlogging
• types of potting media, their characteristics and effect on plant growth
• tests to determine quality of potting media:
  • pH, drainage, aeration
  • salinity
  • nitrate levels
  • water repellence
• maintenance of work area to meet workplace hygiene standards:
  • removing weeds
  • removing dead or diseased plant materials
  • washing work area on transfer of plants
  • disinfecting tools, equipment and work areas
  • using foot baths on entry to different work areas
• procedures for applying treatments to vines:
  • fungicides
  • fertilisers
Assessment Requirements for FBPVIT3001 Monitor and maintain nursery plants

- insecticides
- hormones
- pruning
- hardening off
- preparing, mixing and using chemicals
- quality parameters for nursery plants
- treatments required by plants at different growth stages
- health and safety hazards and controls in the workplace:
  - selecting, fitting and using appropriate PPE
  - identifying potential and existing hazards in the work area and implementing safe work procedures to minimise hazards
- procedures for monitoring and preparing stock for dispatch:
  - packing, dispatching and handling techniques of nursery plants
  - labelling containers
  - checking orders against stock prepared
  - hydrating stock
- procedures and responsibility for reporting problems and anomalies
- procedures for liaising with customers
- procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a plant nursery or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - equipment, services and corresponding information
  - nursery stock
  - hygiene procedures, materials and equipment
  - system for recording requirements and procedures
- specifications:
  - work procedures, including advice on company practices, safe work practices, plant quality and environmental requirements
  - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to set up and operate a mechanical harvester to meet harvesting requirements.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with the operation of a mechanical harvester.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has set up and safely operated a mechanical harvester to meet harvesting requirements on at least one occasion including:

- following health and safety in the workplace procedures
- selecting, fitting and using personal protective equipment (PPE)
- preparing, attaching and setting up equipment according to workplace procedures
- starting, operating and shutting down equipment according to workplace procedures
- adjusting operation to suit weather and terrain conditions
- identifying and addressing non-conformances
- managing the disposal of waste according to environmental workplace procedures
- recording information according to procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and environmental controls in the workplace
- PPE
- key grape varieties and their distinguishing features for harvesting:
  - berry and bunch characteristics
  - frost and disease resistance
  - flavour and style as it applies to harvest
  - factors that affect grape ripening
  - effect of fruit quality on wine
- purpose of mechanical harvester components and operation including:
  - crop level
- grape variety
- vine age
- row height, width and trellis design
- slope, angle of row
- visibility
- monitoring mechanical harvester operation:
  - vine damage
  - grape quality and maturity
  - harvesting effectiveness (amount of fruit left in fruiting zone)
  - matter other than grape (MOG) collected
- maintenance procedures for equipment
- procedures and responsibility for non-conformances
- cleaning and storage procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:
- physical conditions:
  - a wine agricultural or horticultural workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - PPE
  - equipment, services and corresponding information
  - cleaning procedures, materials and equipment
  - a system for recording information
- specifications:
  - work procedures, including advice on equipment operations, company practices, safe work practices and environmental requirements
  - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively treated and prepared vine cuttings and freshly dug rootlings on at least two separate occasions including:

- identifying and using personal protective equipment (PPE)
- following health and safety and environmental procedures in the workplace
- conducting cuttings treatment and callusing activities according to workplace procedures
- preparing rootlings for packing and storage
- maintaining nursery environment to optimise plant health
- identifying and addressing non-conformances
- completing documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and environmental controls including selecting, fitting and using PPE
- procedures and responsibilities for reporting problems
- common features of healthy vine cuttings or rootlings:
  - thickness of original cane
  - no evidence of pests and diseases
  - number, strength and distribution of new roots
  - number, maturity and distribution of shoots
  - visually complete and robust graft union
- common features of unhealthy vine cuttings or rootlings:
  - galls on stem and roots
• no shoots or roots
• damaged or destroyed buds
• excessive disease staining or spots on canes
• immature wood
• shoots on incorrect nodes
• faulty or broken graft unions
• too few or unevenly distributed root development
• pre-callusing treatment requirements:
  • purpose and benefit of treatments
  • fungicide treatment
  • re-hydration
  • scoring
  • root promoter treatment
  • cutting just below basal bud
  • assimilation after cool storage
• storage requirements of cuttings prior to callusing:
  • preparation requirements of callusing environment
  • callusing options
  • optimum callusing environment and its effect on the vine cutting
  • common problems that occur during callusing and how they should be resolved
• preparation requirements for rootlings and procedures for sales or transfer to vineyard
• package or storage requirements and procedures for rootlings ready for sale or transfer:
  • handling cuttings or rootlings to minimise damage
  • counting, bundling and labelling cuttings as required
• factors that influence how a cutting should be graded:
  • rootling preparation
  • packing preparation
  • packaging and storage requirements
• how to prepare sand bed or callusing room including:
  • packing sand or vermiculite
  • lining boxes
  • ensuring heaters and ventilators are working correctly to required temperature
• how to plant or place cuttings in callusing environment as required:
  • feeling into ground or sand
  • packing into boxes with vermiculite
  • watering in
  • correct number of cuttings per box
  • spacing (not too tight)
  • correct way up (basal end at bottom)
  • arranging according to variety, clone and source
• labelling and mapping of beds
• adding hormone mixes
• how to monitor callusing environment to maintain optimum conditions:
  • temperature
  • relative humidity
  • moisture levels of growing medium
  • weed and pest prevention
• how to pack rootlings to comply with customer requirements and standards:
  • maintenance of rootling health
  • minimisation of vine damage
  • mode of transport
  • destination time
  • storage time and method
  • prevention of dehydration
• how to trim rootlings (top growth and roots) ready for planting
• how to grade rootlings to comply with customer requirements
• waste disposal requirements and procedures
• hygiene requirements and procedures for work area and equipment, and considerations handling different batches and varieties
• environmental issues and controls:
  • identifying, rectifying and reporting environmental non-compliance
  • collecting, sorting, grading, treating and disposing of waste as required
• reporting and recording requirements
• how to prepare and mix chemicals safely
• how to recognise problems and anomalies with vines, equipment and materials.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

• physical conditions:
  • a shed nursery workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • PPE
  • shed nursery equipment, services and corresponding information
  • cuttings, rootlings, materials and resources required for shed nursery work
  • documentation and recording requirements and procedures
• specifications:
  • work procedures, including advice on company practices, safe work practices, workplace hygiene, plant quality and environmental requirements
  • work instructions and schedules.
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FDFFS1001A Follow work procedures to maintain food safety

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to maintain food safety when carrying out work tasks. Basic food safety practices include personal hygiene and conduct, food handling, housekeeping and waste disposal related to work tasks and responsibilities where work involves routine manual processes and/or operation of simple automated equipment. |

Application of the Unit

| Application of the unit | This unit is based on and equivalent to the guideline food safety unit GFSBFSPA Follow basic food safety practices. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH1001A Follow work procedures to maintain Good Manufacturing Practice. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites

## Employability Skills Information

| Employability skills | This unit contains employability skills. |

## Elements and Performance Criteria Pre-Content

| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>ELEMENT</th>
<th>PERFORMANCE CRITERIA</th>
</tr>
</thead>
</table>
| 1. Handle food safely | 1.1. Food handling requirements are identified  
1.2. Food handling is carried out according to the food safety program  
1.3. The workplace is maintained in a clean and tidy order to meet workplace standards  
1.4. Work is conducted in accordance with workplace environmental guidelines |
| 2. Identify, control and report food safety hazards | 2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements  
2.2. Processes, practices or conditions which are not consistent with the food safety program are identified and corrective action is taken within the level of responsibility |
| 3. Comply with personal hygiene standards | 3.1. Personal hygiene meets the requirements of the food safety program  
3.2. Health conditions and/or illness are reported as required by the food safety program  
3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program  
3.4. Movement around the workplace complies with the food safety program |
## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**

- locate and follow workplace information relating to food safety responsibilities
- monitor own work and implement any controls as required by the food safety program, such as visual inspection and checks
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- identify and correct or report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and/or dispose of out-of-specification or contaminated materials, ingredients and product, waste and recyclable material according to food safety program as required by work responsibilities
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- clean and sanitise equipment according to enterprise procedures
- record food safety information according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

#### Required knowledge

**Knowledge of:**

- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work, as well as an awareness of the possible consequences of
REQUIRED SKILLS AND KNOWLEDGE

- not following these procedures
- common types and sources of contamination that occur in the work area, such as cross contamination
- control methods and procedures used in the, such as reporting non-compliance and following instructions
- storage and handling requirements for ingredients, materials and product used related to work role
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where required
- purpose and importance of cleaning and sanitation procedures
- suitable standard for materials, equipment and utensils used in the work area
- waste collection, recycling and handling procedures relevant to own work responsibilities
- procedures to follow in the event of pest sighting or discovery of infestation
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- cleaning procedures where relevant
- recording requirements and responsibilities where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Evidence of ability to:  
  - identify food safety handling requirements in the workplace  
  - apply and monitor own compliance with food safety standards  
  - maintain required standards of personal hygiene |

© Commonwealth of Australia, 2019

Skills Impact
EVIDENCE GUIDE

- maintain clean and tidy work area
- report non-compliances
- apply safe work practices and identify OHS hazards and controls.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as Good Manufacturing Practice (GMP)
- related work instructions and procedures
- work tasks and responsibilities
- cleaning and sanitation policies and procedures
- appropriate clothing and related apparatus
- reporting and monitoring systems.

Method of assessment

This unit should be assessed together with core and other units of competency relevant to the work role. Examples could be:

- FDFOP2004A Clean and sanitise equipment

Where the company operates a combined quality/food safety system, assessment of this unit should be combined with assessment of:

- FDFOP1009A Follow work procedures to maintain quality.

Guidance information for assessment

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work
## RANGE STATEMENT

Situation, needs of the candidate, accessibility of the item, and local industry and regional contexts may also be included.

### Food safety program

A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures.

### Food safety information

Food safety information may be provided in:
- food safety program
- standard operating procedures (SOPs)
- specifications
- log sheets
- written or verbal instruction

### Food handling

Food handling refers to:
- food receipt and storage
- food preparation, cooking, holding, cooling, chilling and reheating
- packaging
- disposal

### Products/materials handled and stored

Products/materials handled and stored can include:
- raw materials
- ingredients
- consumables
- part-processed product
- finished product
- cleaning materials

### Breach of food safety procedures

Examples of a breach of food safety procedures could include:
- failure to check delivery temperatures of potentially hazardous chilled food
- failure to place temperature-sensitive food in temperature controlled storage conditions
### RANGE STATEMENT

| **Responsibility for monitoring food safety** | Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace |
| **Food safety hazard** | A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect |
| **Personal hygiene requirements** | Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations |
| **Reporting of health conditions and illness requirements** | Reporting of health conditions and illness requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations |
| **Appropriate clothing and footwear** | Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include: |
|  | • purpose designed overalls or uniforms |
|  | • hair-nets |
|  | • beard snoods |
|  | • gloves |
|  | • overshoes |

FDFGR3002A Demonstrate knowledge of animal nutrition principles

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the animal nutrition knowledge required by stockfeed milling operators who are required to liaise with nutritionists, other technical and professional staff and customers. |

Application of the Unit

| Application of the unit | This unit applies to stockfeed operators who are required to have knowledge of animal nutrition principles and the effect of stockfeed on animal performance. This knowledge would be applied in liaison with professional and technical staff on customer requirements and in liaison directly with customers. |

Licensing/Regulatory Information
Not applicable.

</table>
| 1. Identify nutrition purpose of stockfeed product | 1.1. Target species, animal type and phase of animal growth supported by stockfeed product are identified  
1.2. Production purpose of animal raising and range of desired products are identified  
1.3. Particle size, pellet quality and other factors affecting palatability for target animals are identified  
1.4. Impact of stockfeed on animal performance is identified |
| 2. Identify key quality factors affecting stockfeed performance | 2.1. Feed safety requirements for target species and phase of animal production are identified  
2.2. Type and proportion of raw materials in stockfeed and their effect on animal performance are identified  
2.3. The purpose of additives on animal performance and stockfeed quality are identified  
2.4. Effects of processing on stockfeed nutrition quality and animal performance are identified  
2.5. Substitution guidelines, including the effect of substitution on stockfeed performance, are understood |
Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

**Ability to:**

- access and interpret workplace information, including standard operating procedures (SOPs), labels, recipes, customer supplied information and material data safety sheets (MSDS)
- use and application of workplace terminology
- sequence information against production processes
- assess quality standards
- identify resources in the enterprise for further information, including nutritionists, other technical and professional specialist and reference materials

Required knowledge

**Knowledge of:**

- typical nutrition requirements of animals supported by stockfeed, including horses, beef cattle, dairy cattle, pigs, sheep, poultry (both meat and egg production) and marine animals (aquaculture). Knowledge would be restricted to standard daily requirements of main food groups (proteins, carbohydrates etc), typical daily volume of feed required and type of feed (e.g. solid, liquid, plant or animal based)
- how nutritional needs of target animal may vary according to species, gender, health, pregnancy, lactation, age, season, geography, production purpose and form of production and feeding, e.g. feedlot, free range, use of stock feed for supplementary or full feeding
- factors affecting animal acceptance of stockfeed, including palatability and presentation
- range of raw materials typically used in stockfeed, including grains, molasses/liquids, proteins (vegetables and animal), additives (vitamins, minerals and medications) and fibre
- impact of operator controlled factors on stockfeed quality, including temperatures, moisture, sizing, sieving and liquid additions
- impacts of stockfeed on animal performance, including positive effects on animal performance and effects of incorrect feed on animal safety, animal performance and export contamination

Evidence Guide

EVIDENCE GUIDE
## EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Evidence is required of animal nutrition and performance requirements that are affected by stockfeed related factors, such as ingredients, recipe, processing and presentation. Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Critical aspects for assessment and evidence required to demonstrate competency in this unit</td>
<td>Evidence of ability to: • identify and interpret customer requirements from stockfeed • relate stockfeed type to animal nutrition and production requirements • liaise with nutritionist and other professional and technical staff on animal nutrition requirements of stockfeed.</td>
</tr>
<tr>
<td>Context of and specific resources for assessment</td>
<td>The candidate is to be assessed on animal nutrition and production knowledge relevant to the stockfeed products and processes in the workplace.</td>
</tr>
<tr>
<td>Method of assessment</td>
<td>Evidence may include third party report, portfolio, work documentation, response to questions, and so on, that address the performance criteria and critical aspects for assessment.</td>
</tr>
<tr>
<td>Guidance information for assessment</td>
<td>Performance against this standard must be assessed in an industry context. For valid and reliable assessment the activity should closely replicate the work environment, circumstances and equipment likely to be encountered in a workplace.</td>
</tr>
</tbody>
</table>

FDFOP2012A Maintain food safety when loading, unloading and transporting food

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to load and transport temperature-sensitive ingredients and products. |

Application of the Unit

| Application of the unit | This unit describes the food safety aspects of loading and transporting food where the transport operator does not have direct physical contact with food. Where food is directly handled by the transport operator, the relevant food handling unit also applies. This unit does not address competencies related to vehicle inspection and operation. This unit is based on and equivalent to the guideline food safety unit GFSTFA Transport food. |

Licensing/Regulatory Information
Not applicable.

| 1. Prepare to transport food | 1.1. Food storage vehicles and containers/receptacles are appropriate for use  
1.2. Food storage vehicles and containers/receptacles are prepared for use  
1.3. Food is loaded and secured as required to meet transportation and temperature control requirements  
1.4. Hand washing and disinfecting procedures are followed to meet workplace requirements  
1.5. Work is conducted in accordance with workplace environmental guidelines |
| 2. Load, unload and transport food safely | 2.1. Food safety control measures are monitored to ensure that food safety is maintained during transport  
2.2. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken  
2.3. Food is unloaded as required according to transportation and temperature control requirements  
2.4. Food safety information is recorded to meet workplace requirements |
### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

**Ability to:**

- access workplace information to determine food handling and transport requirements
- select, fit and use personal protective clothing and/or equipment
- confirm that the vehicle and associated equipment are appropriate and ready for use, including confirming that vehicle type is capable of maintaining the required temperature range for product
- prepare transport containers (this will vary depending on the type of food and transport method), such as checking cleaning records, and where required, confirming product compatibility to ascertain that appropriate level of cleaning has occurred
- prepare the storage/holding environment as required, including confirming that temperature parameters for the loading and unloading areas are met
- follow procedures to load/unload food to ensure that materials/product is loaded/unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food or non-food items that can cause contamination (osmosis)
- monitor temperature parameters and related food safety control points before, during and after transporting food and record information in the required format
- take appropriate corrective action in response to failure to meet temperature parameters or other food safety requirements as required by workplace procedures
- clean and sanitise food containers according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

#### Required knowledge

**Knowledge of:**

- food safety control points in the loading/unloading and transportation of food materials and product and related methods of control
- characteristics of food transported and related transport environment requirements
- micro-biological, physical and chemical hazards that can occur when loading, transporting and unloading food, appropriate to nature and method of food transported, including the types of hazards likely to occur, the conditions under which they occur, and possible consequences
- methods and procedures used to control food safety hazards (this depends on the
## REQUIRED SKILLS AND KNOWLEDGE

- type of controls and equipment used), including the purpose and operation of equipment, procedures in place to maintain food safety and workplace records, such as temperature control charts and cleaning and sanitation records
- procedures used to confirm that transportation and related food safety equipment is appropriate for use and operational, such as equipment capacity to maintain a given temperature environment appropriate to the food product
- cleaning and sanitation requirements for food containers where relevant
- where contamination by osmosis is a possibility, the potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported

## Evidence Guide

### EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<table>
<thead>
<tr>
<th>Overview of assessment</th>
<th>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</th>
</tr>
</thead>
</table>
| Critical aspects for assessment and evidence required to demonstrate competency in this unit | Evidence of ability to:  
- ensure readiness of transport in accordance with product requirements  
- identify risks associated with transporting food products  
- identify and apply control measures for ensuring safety of food  
- load and unload goods according to requirements  
- identify and act on non-compliances  
- complete workplace records as required  
- apply safe work practices and identify OHS hazards and controls  
- apply food safety procedures. |
| Context of and specific resources for assessment | Assessment must occur in a real or simulated workplace where the assessee has access to:  
- loading/unloading and transport advice/schedules |
**EVIDENCE GUIDE**

- food safety information (this may be included in a food safety plan and/or integrated into work procedures)
- work procedures relevant to loading/unloading and transportation, including advice on required temperature parameters to be maintained
- workplace information, such as temperature charts and cleaning records as appropriate
- food materials and product to be loaded/unloaded and transported
- documentation and recording requirements and procedures.

**Method of assessment**

This unit should be assessed together with core units and other units of competency relevant to the function or work role.

**Guidance information for assessment**

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

**Range Statement**

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Policies and procedures**

Work is carried out according to company policies and procedures, licensing requirements, legislative requirements and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP.

**Workplace information**

Workplace information may include:
### RANGE STATEMENT

<table>
<thead>
<tr>
<th>Transport vehicles</th>
<th>Transport vehicles are appropriate for the transportation of food and capable of maintaining the required environment for the food type transported</th>
</tr>
</thead>
<tbody>
<tr>
<td>Food safety controls</td>
<td>Food safety controls refer to the methods used to control food safety hazards. Control methods, requirements and record keeping are specified in workplace food safety procedures which typically form part of a workplace food safety program</td>
</tr>
<tr>
<td>Safe food transport parameters</td>
<td>Safe food transport parameters depend on the type of food transported. Industry guidelines and codes, such as Cold Chain guidelines should be used as a basis for setting these parameters where available</td>
</tr>
</tbody>
</table>
| Confirming readiness for use of food transport vehicle | Confirming readiness for use of food transport vehicle and containers/receptacles can include:  
- confirming that the vehicle is in good operating order and that containers/receptacles used to store food meet the relevant cleaning and sanitation requirements  
It may also include:  
- bringing the food handling area and storage container/receptacle to within the required temperature range before loading/unloading and confirming that equipment required to maintain temperature is operational |
| Food safety incidents | A food safety incident is a situation where the safe limits or parameters identified by the food safety program are not met |

| 1. Maintain food safety while working in a food handling area | 1.1. Food safety requirements related to work tasks are identified and followed  
1.2. Work responsibilities are carried out so that the safety of food is maintained  
1.3. Procedures or practices which are not consistent with workplace food safety program are identified and reported |
| 2. Maintain food handling area in clean and orderly state | 2.1. Equipment and the food handling area meet the cleaning and sanitation requirements of workplace food safety program  
2.2. Work is conducted in accordance with workplace environmental guidelines  
2.3. Waste is collected and disposed of according to workplace procedures |

Required Skills and Knowledge

| REQUIRED SKILLS AND KNOWLEDGE |
REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:
- access and apply workplace information on food safety policies and procedures relating to own work
- fit and use appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- maintain personal conduct consistent with workplace requirements
- check own work area to identify food safety hazards
- carry out work responsibilities to ensure that food safety is not compromised
- take necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognise and report situations or procedures that could compromise food safety according to workplace procedure, including following procedures in own work and related work area to report to the appropriate personnel, in required detail and in a timely manner
- take corrective or preventative action within level of responsibility
- report health conditions and illness as required by workplace food safety procedures
- sort and dispose of waste as required by work responsibility according to workplace procedure
- maintain housekeeping standards in work area
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:
- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non-food-handling areas
- suitable standard for materials and equipment used in the food handling area, including materials that are unsuitable for use, such as breakable or dirty equipment/materials
- methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised (this will depend on the nature of work responsibilities and food safety requirements as
REQUIRED SKILLS AND KNOWLEDGE

- the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring
- cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area
- waste collection, recycling and handling procedures
- housekeeping standards to be maintained in the work area

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- identify food handling procedures and food safety issues for work
- apply food safety procedures when handling food products
- identify and act on non-conformances
- ensure cleaning standards are met
- follow environmental and waste management procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:
- food safety policies and procedures relevant to work function
- work procedures, including procedures for entering and exiting food handling areas
- work process and related services/resources
- work area and related equipment to undertake work function
EVIDENCE GUIDE

- waste collection, treatment, recycling and/or disposal methods
- monitoring and reporting system.

Method of assessment
This unit should be assessed together with core units and other units of competency relevant to the function or work role.

Guidance information for assessment
To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures
Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements, site licences and industrial awards and agreements.

Workplace information
Workplace information may include:
- standard operating procedures (SOPs)
- advice on food safety requirements related to work function
- standard forms
- written or verbal instructions

Food handling area
Food handling area can refer to any work area where receiving, handling and inspecting, preparing, processing, packaging, storing and/or despatching occur.

Examples of contamination that
Examples of contamination that can result from
## RANGE STATEMENT

<table>
<thead>
<tr>
<th>can result from work activities</th>
<th>work activities include:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>- chemical contamination which could be caused by lubricants, resins and cleaning and sanitation chemicals</td>

Skills Impact
FDFOP2038A Operate a grinding process

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to set up, operate, adjust and shut down processes, such as grinding, rolling and breaking to reduce the particle size of grains and pulses. |

Application of the Unit

| Application of the unit | This unit has application in a food production environment. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of grinding equipment and processes. When batch or product changeover procedures are part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be considered. |

2.7. Work is conducted according to environmental standards
2.8. Workplace records are maintained according to workplace recording requirements

3. Shut down the grinding process
3.1. The appropriate shutdown procedure is identified
3.2. The process is shut down according to workplace procedures
3.3. Maintenance requirements are identified and reported

### Required Skills and Knowledge

#### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

**Required skills**

*Ability to:*
- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services to the grinding process
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- operate stockfeed control panel to transfer and grind product
- monitor and adjust the grinding process and equipment operation to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, and running adjustments to hammer mills and roller mills
- monitor supply and flow of materials to and from the grinding process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

</tr>
</tbody>
</table>
REQUIRED SKILLS AND KNOWLEDGE

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the risk of dust explosion and an understanding of the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- conduct pre-start checks on machinery used for grinding
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards
**EVIDENCE GUIDE**

<table>
<thead>
<tr>
<th>and controls</th>
</tr>
</thead>
<tbody>
<tr>
<td>safely shut down equipment</td>
</tr>
<tr>
<td>apply food safety procedures to work practices.</td>
</tr>
</tbody>
</table>

**Context of and specific resources for assessment**

Assessment must occur in a real or simulated workplace where the assessee has access to:

- personal protective clothing and equipment
- work procedures including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions
- specifications, control points and processing parameters
- production schedule/batch instructions
- information on equipment capacity and operating parameters
- grinding and related equipment and services
- stock required for the grinding process
- sampling schedules and test procedures and equipment as required
- documentation and recording requirements and procedures
- cleaning procedures, materials and equipment as required.

**Method of assessment**

This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:

- FDFOP2004A Clean and sanitise equipment
- FDFOP2011A Conduct routine maintenance
- FDFOP2013A Apply sampling procedures
- FDFOP2030A Operate a process control interface
- MSL973001A Perform basic tests.

**Guidance information for assessment**

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.
Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<table>
<thead>
<tr>
<th>Policies and procedures</th>
<th>Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Legislative requirements</td>
<td>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</td>
</tr>
<tr>
<td></td>
<td>• the Food Standard Code, including the labelling, weights and measures legislation</td>
</tr>
<tr>
<td></td>
<td>• legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity</td>
</tr>
<tr>
<td>Workplace information</td>
<td>Workplace information may include:</td>
</tr>
<tr>
<td></td>
<td>• standard operating procedures (SOPs)</td>
</tr>
<tr>
<td></td>
<td>• specifications</td>
</tr>
<tr>
<td></td>
<td>• production schedules and instructions</td>
</tr>
<tr>
<td></td>
<td>• manufacturers' advice</td>
</tr>
<tr>
<td></td>
<td>• standard forms and reports</td>
</tr>
<tr>
<td>Equipment</td>
<td>Equipment may include:</td>
</tr>
<tr>
<td></td>
<td>• conveyors/elevators</td>
</tr>
<tr>
<td></td>
<td>• augers</td>
</tr>
<tr>
<td></td>
<td>• magnets</td>
</tr>
<tr>
<td></td>
<td>• fans</td>
</tr>
<tr>
<td></td>
<td>• sieves</td>
</tr>
<tr>
<td></td>
<td>• hammer mills</td>
</tr>
<tr>
<td></td>
<td>• roller mills</td>
</tr>
<tr>
<td></td>
<td>• breaker bars</td>
</tr>
<tr>
<td></td>
<td>• cyclones</td>
</tr>
<tr>
<td>Materials</td>
<td>Materials include:</td>
</tr>
<tr>
<td></td>
<td>• grains</td>
</tr>

---
FDFTEC3001A Participate in a HACCP team

Modification History
Not applicable.

Unit Descriptor

| Unit descriptor | This unit of competency covers the skills and knowledge required to participate in the development and/or review of a HACCP-based food safety program under direction. |

Application of the Unit

| Application of the unit | This unit is appropriate where the operator requires a detailed understanding of the steps and techniques used to develop and review a HACCP-based food safety program. |

This unit can be aligned at either AQF 3 or 4. When aligned at AQF 3 the person would typically participate in the development of the food safety program as part of a group. The scope of contribution would typically be limited to their immediate work area. When this unit is applied at AQF 4 the person may take a lead role in facilitating the development of the food safety program and would apply an understanding of food safety across more diverse operations or work areas.

This unit is based on and achieves part of the guideline food safety unit GFSDFSPA Develop food safety programs.

Licensing/Regulatory Information
Not applicable.
### Pre-Requisites

<table>
<thead>
<tr>
<th>Prerequisite units</th>
<th>FDFFS2001A</th>
<th>Implement the food safety program and procedures</th>

</tr>
</thead>
</table>

### Elements and Performance Criteria Pre-Content

- Elements describe the essential outcomes of a unit of competency.
- Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

### Elements and Performance Criteria

**Required Skills and Knowledge**

**REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit.

**Required skills**

*Ability to:*

- identify personal roles and responsibilities for participating in the development or review of a food safety program
- identify processes and steps to be covered
- identify hazards that are reasonably expected to occur and establish appropriate methods of control, such as participating in validating existing control methods and where there is no adequate control method in place, establishing an appropriate method
- establish or review procedures for implementing preventative action, such as revision of materials, processes and/or food handling procedures, and where required, the revision of workplace practices and documentation, such as specifications, operating procedures and approved supplier programs
- describe the appropriate monitoring requirements for each food safety hazard, including the method or procedure to be followed, the frequency and timing, the person responsible, and the information to be recorded (procedures to be followed would typically be specified in the form of a standard operating procedure or work instruction)
- describe corrective action requirements in the event that acceptable limits or
## REQUIRED SKILLS AND KNOWLEDGE

Requirements of support programs are not met

- develop or review documentation relating to the design and maintenance of the food safety program, such as flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- develop or review documentation to communicate food safety responsibilities, such as standard operating procedures (SOPs), processing parameters and recording devices (e.g. log sheets)
- communicate food safety responsibilities within level of responsibility using techniques and presentation styles appropriate to the audience
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

### Required knowledge

**Knowledge of:**

- the purpose and intent of food safety legislation
- purpose and responsibilities for maintaining records as required by legislation and workplace procedures
- roles and responsibilities for development and maintenance of the food safety program, including roles of internal and external auditors and of authorised officers
- techniques for applying HACCP-based principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredient and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards/contamination likely to occur given the type of
REQUIRED SKILLS AND KNOWLEDGE

- product and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition, time and temperature as relevant to food handled
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability and personal hygiene, and how they can be used as part of a food safety program
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- validation and verification processes and techniques and responsibilities

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:
- identify components and parameters of a food safety program
- identify food safety hazards in production processes
- establish and validate control standards and methods for each hazard
- establish procedures for unpredicted hazards
- communicate and document hazards and control procedures
- complete workplace records
- apply safe work practices and identify occupational health and safety (OHS) hazards and controls
- apply food safety procedures.

Context of and specific resources for

Assessment must occur in a real or simulated workplace
### EVIDENCE GUIDE

**assessment**

where the assessee has access to:

- workplace food safety program documentation
- advice on quality and food safety legislation
- procedures for developing or modifying specifications and other advice on food safety requirements
- procedures for developing or modifying documentation, such as work instructions and procedures, log sheets and other recording requirements
- review/audit arrangements
- consultative mechanisms
- communication systems
- training system
- reporting/recording system.

**Method of assessment**

This unit should be assessed together with core units and other units of competency relevant to the function or work role.

**Guidance information for assessment**

To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

### Range Statement

**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Food safety programs**

A food safety program is a written document that specifies how a business will control all food safety hazards that are reasonably expected to occur in the food business. The food safety program must provide for the systematic...
**RANGE STATEMENT**

Monitoring of the controls as well as appropriate corrective action if a hazard is found not to be under control. Records must be kept to demonstrate action in relation to, or in compliance with, the food safety program. A food safety program may be developed as a stand-alone program or may be integrated with the quality program in a workplace.

**Methods used to control hazards**

Methods used to control hazards include:
- both support programs and specific hazard control limits or requirements

Typical examples of support programs include:
- product recall
- cleaning schedules
- pest control programs
- personal hygiene practices
- calibration procedures and related operating procedures

**Food safety hazards**

Food safety hazards include:
- microbiological
- chemical
- physical hazards

**Validation**

Validation refers to:
- the use of objective evidence in order to prove that materials, processes, procedures or equipment used are capable of delivering the intended result

**Verification**

Verification refers to:
- reviewing all aspects of the food safety program and related records to determine compliance with and adequacy of the food safety program

At a minimum, food safety programs must be verified annually.

**Scope of the HACCP based plans**

The scope of the HACCP-based plan depends on workplace requirements and may extend outside the direct area of responsibility of the team participants.

FDFWGG2001A Bench graft vines

Modification History
This unit supersedes and is equivalent to FDFWGGBGVB Bench graft vines.
April 2012: Minor typographical corrections.

Unit Descriptor

| Unit descriptor | This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to select appropriate vine material and bench graft vines. |

Application of the Unit

| Application of the unit | This unit applies to wine grape growing and covers the bench grafting of vines. The unit includes the selection of appropriate vine material, preparation of cuttings, grafting and post-grafting treatment and storage. |

Licensing/Regulatory Information
Not applicable.

Pre-Requisites
Not applicable.

Employability Skills Information

| Employability skills | This unit contains employability skills. |
**Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

**Elements and Performance Criteria**

</tbody>
</table>

**Required Skills and Knowledge**

This section describes the skills and knowledge required for this unit.
Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify grafting requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- confirm supply of necessary materials
- select appropriate vine material for grafting. This may include consideration of:
  - variety and clone
  - matching cambium
  - matching bevels and sizes
  - wood diameters
  - customer or workplace requirements
- prepare vine material for grafting. This may include:
  - removal from cold storage
  - soaking
  - heat treatment
  - disbudding
  - hydration
  - grading
- select, prepare and set equipment as required
- operate equipment
- disbud vines according to instructions
- bench graft vines to match specifications
- treat vines after grafting. This may include:
  - packing into callusing boxes
  - hormonal treatment
  - careful handling
  - following hygiene procedures
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may include monitoring:
  - tightness of graft union
  - progress (e.g. number per day)
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste as required
- maintain work area to meet housekeeping standards. This should include hygiene requirements to prevent cross-infection
• clean equipment as required
• pack, label and store grafted vines. This may include consideration of:
  • cold room layout
  • cold room temperature variations
  • customer requirements
  • storage time requirements
  • care of vine material (e.g. moisture and disease)
• identify, rectify and/or report environmental non-compliance
• conduct routine maintenance of equipment according to enterprise procedures
• use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
• work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:
• purpose of grafting and various methods of budding and grafting
• purpose and methods of disbudding
• criteria for successful grafting
• importance of selection and use of rootstock and Vinifera
• advantages of using clonal and registered vine improvement rootstock material
• criteria for selecting parent vines for scion material
• procedures and optimum conditions for the storage of material until required for grafting
• stages of the grafting procedure and their purpose
• common problems and corrective action required
• hygiene requirements and procedures
• purpose and components of grafting equipment
• operating procedures for grafting equipment
• methods of callusing vine cuttings and the criteria for best callus development
• procedures and responsibility for reporting problems
• environmental issues and controls
• cleaning requirements and procedures for work area and equipment
• reporting and recording requirements and procedures
