- ensured extracted honey was maintained at specified temperature to assist removal of wax, air, pollen and detritus
- tested moisture content of honey and took action to maintain appropriate condition
- monitored conditions conducive to honey fermentation and implemented procedures to reduce risk
- stored honey in containers and obtained a reference sample following to meet quality assurance standards, food health regulations and customer requirements
- identified comb suitable for wax processing, collected, removed residual honey and stored wax cappings following workplace, quarantine and biosecurity procedures
- cleaned and sanitised honey extraction equipment
- maintained appropriate records.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of honey extraction
- recognition of different types of bee comb and maturity, including:
  - brood worker and drones
  - queen cells
  - mature and immature honey comb
  - pollen cells
- biosecurity protocols for honey extraction and transport of supers and hive components to extraction site
- processing of raw honey comb, including:
  - sections
  - cutting/slicing comb from frames
- honey extraction processes, including:
  - pressing
  - centrifugal/spinning
  - gravity draining or drip method
- equipment commonly used to extract honey and the safe operation and maintenance requirements
- hygiene and sanitation procedures and materials used for tools, equipment and storage of extracted honey
- storage requirements of honey, honey comb, extracted frames and supers including bulk storage and pest management
- food safety systems and requirements relevant to honey extraction
- quality assurance tests and standards for extracted honey
- temperature and the effect of heat on the extraction processes and quality of honey
- health and safety in the workplace issues associated with extraction and extraction technologies
- record keeping systems and labelling for extracted honey
- preparation and storage procedures for comb at time of extraction for later wax processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - either a portable honey extraction unit or a permanent extraction facility
- resources, equipment and materials:
  - mature honey comb ready for extraction
• specific tools and equipment for the type of extraction method employed
• PPE
• sanitising chemicals and equipment
• specifications:
  • workplace procedures related to honey extraction
  • manufacturer’s operating instructions for honey extraction equipment
  • safety data sheets for chemical sanitisers
  • access to specific legislation/codes of practice related to honey extraction and food safety.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to inspect a honey bee colony for indicators of disease or evidence of pests, and take appropriate follow-up action.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership, compliance with biosecurity codes of practice and notifiable pests and diseases.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated an ability to manage pests and diseases that affect brood and adult bees including:

- selected and ensured serviceability of tools and equipment for opening and checking hives
- identified health and safety in the workplace hazards and risks and implemented control measures when working around bees
- selected, fitted and used appropriate personal protective equipment (PPE)
- conducted inspections to hive to assess general health and condition of brood and adult honey bees and identified signs and symptoms of disease and pests that affect brood or adult honey bees
- collected samples and conducted field diagnosis following workplace procedures and industry standards
- labelled and secured samples for dispatch to specialist and confirmed diagnosis and reported notifiable diseases
- identified and implemented appropriate treatments and biosecurity measures to control pests and diseases
- monitored, reviewed and recorded outcomes of treatments for future beekeeping operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of disease management within a honey bee colony
- pests and diseases of bees including common and notifiable species, including:
  - mechanism for infection/infestation
  - level of risk to bees and beekeeping industry
• biological processes relevant to infection and control
• hive inspection procedures and recording pests and disease observations
• identification of pests diseases, including:
  • signs and symptoms
  • field diagnosis techniques
  • collecting, labelling and sending samples for specialist diagnosis
  • immune detection kits
• types of samples and procedures, including:
  • adults
  • brood
  • honey
  • comb
• legislative and biosecurity standards for pests and diseases control and notification for Australian apiaries including procedures for reporting
• tools, equipment, materials and safe handling procedures when manipulating hive components and taking samples
• hazards and risks when working with bees and collecting pests and disease samples
• hygiene and sanitation practices for tools and equipment
• biosecurity procedures for pests and diseases of honey bees, including:
  • barrier systems
  • isolation
  • quarantine
  • frame rotation
• treatment of contaminated hive components, including:
  • burning and burial
  • sterilisation and irradiation
  • dipping treatments (e.g. hot wax or caustic dips)
  • scorching
• hive health, pests and disease control
• treatments for specific pest and diseases, including:
  • chemicals, types and application methods
  • antibiotics and prescription treatments
  • environmental treatments
• procedures for monitoring and reviewing treatments
• record keeping for pests and diseases including mandatory and workplace documents.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • an active aviary or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • live bees
  • hive management tools
  • treatments appropriate to pests or diseases
  • equipment and materials required for field diagnosis activities
  • PPE
  • inert samples or representations of bee pests and diseases
• specifications:
  • workplace procedures for managing pests and diseases within a honey bee colony
  • safety data sheets for pest and disease treatments
  • access to specific legislation and codes of practice relevant to biosecurity and mandatory reporting
• relationships:
  • specialists in honey bee pest and disease diagnosis.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to determine suitable method for artificial breeding objectives and develop a program to collect semen from drone honey bees and artificially inseminate a queen bee.

The unit applies to advanced beekeepers who analyse information and exercise judgement to complete specialised bee breeding activities. They work autonomously and have accountability for the work of others. They research, analyse, design and communicate solutions to a range of complex problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated artificial insemination on at least one occasion including:

- reviewed options and developed artificial breeding objectives
- selected and scheduled an artificial breeding option for breeding program
- obtained resources and determined artificial insemination activities
- identified hazards and risks and implemented control measures
- selected, fitted and used appropriate personal protective equipment (PPE)
- obtained and ensured genetic material complied with breeding characteristics and objectives
- received, checked and stored genetic materials to ensure maximum viability
- ensured queen and drone maturity and breeding cycles aligned
- prepared queen and drone honey bees for artificial insemination
- used appropriate techniques to extract semen from drones and inseminate queens
- complied with required hygiene practices
- introduced inseminated queen bees to new hive and monitored progress and success
- reviewed and documented genetic material transfer and management practices
- determined the success of artificial insemination program by calculating success rates
- maintained records in relation to an artificial insemination program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of artificial insemination of queen honey bees
• anatomy and physiology of reproductive organs and reproductive process in queen and drone honey bees
• genetics and inheritance for bee characteristics required in genetic material, including:
  • honey bee health
  • abnormalities
  • productivity
  • habit
• artificial breeding methods and the benefits and limitations
• identification systems for queen and drone honey bees and semen
• physical resource requirements for artificial insemination practices
• safe handling and transportation of bees and genetic material
• artificial insemination policies and recording and reporting requirements
• preparation requirements for artificial insemination
• semen collection and preparation processes
• reviewing and maintaining effective insemination procedures.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a laboratory or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • live queen bees and donor drones
  • tools and equipment for collecting sperm and inseminating queens
  • PPE for hygiene and safety
• specifications:
  • workplace procedures for laboratory operations
  • workplace specifications for bee breeding.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated site selection and establishment of an apiary site including:

- established and prioritised selection criteria for apiary site
- identified suitable localities and appropriate permits and certificates required
- analysed site options and selected site according to selection criteria
- determined apiary capacity, orientation and layout, and prepared an establishment plan
- selected actual site and ensured appropriate permissions and certificates were obtained
- identified health and safety, food safety and biosecurity hazards and risks and implemented control measures
- selected serviceable tools and equipment required for site establishment
- transported hives to site safely, and located hives according to establishment plan and legislative and biosecurity requirements
- observed, monitored and recorded apiary performance and implemented corrective action according to apiary plan
- maintained apiary records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of apiary site selection
- sources of information for selecting potential sites
- site selection criteria for strategic and regulatory purposes, including:
  - legislation, regulations and biosecurity codes of practice relevant to the establishment of apiary sites
• relevant planning and land use regulations and permissions
• proximity to flora, water, general public, animals, gates, stockyards and movement of the sun
• accessibility of the site for beekeeper and security
• nearby land use
• protection from extreme environmental conditions
• fire risk
• site selection criteria for different bee management purposes, including:
  • honey
  • pollen
  • propolis
  • royal jelly
  • queen rearing
  • pollination services
  • over wintering
• nutritional and other requirements of a bee colony
• hazards, risks and controls associated with establishing apiaries, including:
  • personal protective equipment
  • safe handling procedures
  • barriers and distances from sensitive areas and public space
  • hive densities
  • elevated hives
• tools and equipment and their safe use for handling bees and hives when establishing an apiary site
• types of flora for the production of pollen and nectar flow
• apiary records and recording systems
• bee keeping legislation and biosecurity codes of practice for apiary sites, including:
  • weeds
  • diseases
  • pests
  • genetically modified organisms
  • certified organic produce.

Assessment Conditions
 Assessment of skills must take place under the following conditions:
• physical conditions:
  • an active apiary or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • live bees in hives
Assessment Requirements for AHCBEK405 Select and establish an apiary site

- tools and equipment for working with and re-locating hives
- personal protective equipment
- maps showing site access and available resources
- specifications:
  - workplace procedures related to selecting and establishing an apiary site
  - workplace specifications for apiary site layout and orientation
  - access to legislation, permit requirements and biosecurity codes of practice related to establishing an apiary site.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

</table>

**Foundation Skills**

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*
### Skill Description

**Writing**
- Draft and finalise written pollination service agreements for clients
- Accurately complete applications for permits and certificates according to legislative and regulatory requirements

**Numeracy**
- Perform calculations to analyse bee and pollination data, including quantity of hives required, costs and the performance of pollination services

**Oral Communication**
- Determine and confirm client requirements using active listening and questioning and observation of verbal and non-verbal signals to convey and clarify information and to confirm pollination services required

**Get the work done**
- Plan and monitor progress of services and reviews and implements change to meet client and service requirements

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have provided bee pollination services, including:

- discussed and confirmed pollination service requirements with a client
- assessed number, types and hive condition required for pollination outcomes
- assessed the risks of pollination services and provided technical advice to client
- identified resources and calculated costs associated with providing the pollination service and confirmed with client
- prepared and implemented an agreement after confirmation with client
- identified suitable locations within crop or site for hive placement and established, delivered and managed an apiary for pollination services
- liaised with the client to protect apiary from chemical use
- monitored and managed hive activity according to industry practice and agreed service outcomes
- obtained requisite certificates and permits and complied with relevant legislation, regulations and biosecurity codes of practice.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of pollination services
- crop chemicals and alternatives when managing hives
- environmental and climatic factors affecting bee foraging behaviour and pollination
- health and performance of bee colonies, including:
  - pests and diseases
  - swarm management
- hive management strategies, including effects of:
• weather
• nutrition
• water requirements

• basic negotiation skills and essential elements of valid agreements and service contracts

• pollination requirements of major crops targeted, including:
  • hive numbers, strength and densities
  • locality conditions of operation
  • competing crops and plants
  • timing to maximise crop pollination

• measuring and assessing pollination performance and success and readiness to remove
  • site selection and impact of location on colonies to maximise pollination

• calculations and pricing techniques for service industry

• legislation, regulations and biosecurity requirements affecting pollination services.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • an apiary or an environment that accurately represents workplace conditions

• resources, equipment and materials:
  • live bees in hives
  • tools and equipment required to locate and manage hives
  • access to crop requiring pollination

• specifications:
  • client specifications for pollination service
  • access to legislation/codes of practice related to pollination services

• relationships:
  • client with pollination requirement.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to rear queen bees and queen cells through the manipulation of hives.

The unit applies to experienced beekeepers who exercise judgement to complete a range of specialist activities requiring a thorough understanding in honey production. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

All work must be carried out to comply with workplace procedures, state and territory legislation, regulations and local government by laws that apply to the ownership and registration of bee hives and compliance with industry biosecurity codes of practice. The transport and cross border movement of livestock including queen bees must comply with state and territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have reared queen bees including:

- obtained queen bee breeding stock according to breeding program
- assessed safety hazards, risks and implemented controls
- obtained tools, equipment and personal protective equipment (PPE) required for breeding manipulations and ensured serviceable for use
- conducted all bee manipulations and activity according to biosecurity and quarantine protocols
- ensured hives used for queen rearing are clean and healthy
- prepared queen using desired method and assessed, selected and grafted larvae into queen cells according to workplace procedures
- assessed and maintained nurse bee population to support developing queens
- monitored and maintained hive nutrition and health
- transferred ripe queen cells into nucleus
- monitored the queen mating process and provided drones according to workplace procedures
- maintained records according to workplace and industry procedures
- selected queen bee cage type and packaging requirements and ensured adequate food and escort bees for transport
- prepared package for transport according to workplace procedures and transport company requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of rearing queen bees
- basic genetics, breeding and evaluation for selecting queen bee stock
• techniques and timing for queen cell production including queenright and queen less starter and finishers
• grafting techniques including the use of kits
• making, placement and use of nucleus hives (nucs) for queen rearing
• capturing and handling techniques for queen bees
• holding and securing queen bees, including:
  • queen cages
  • queen banks
• transport, postage and handling queen bees
• labelling and identifying queens including international colour codes
• monitoring and recognising brood and adult bee health, diseases, pests and other disorders and required action
• optimum conditions and timing for queen rearing activities
• required number of mature, healthy and genetically suitable drones
• standards and protocols for selecting and manipulating bees and larvae for queen bee production.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in an active apiary
• resources, equipment and materials:
  • live bees and queen bee stock
  • hive manipulation and larvae grafting tools
  • PPE
• specifications:
  • workplace procedures and specifications for rearing queen bees
  • access to legislation and codes of practice for biosecurity and queen bee breeding.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and use information to determine appropriate response, work needs, and information and resources to be accessed from stakeholders
- carry out work activities to conform with national plan
- communicate with stakeholders
- identify hazards and risks
- manage own work load and priorities
- interpret work instructions and seek clarification as needed
- recognise and respond to personal stress
- promote cooperation and respect within work team
- communicate the need for physical and human resources
- comply with biosecurity requirements for personal protective equipment and fomites, reporting biosecurity breaches and completing records
- adapt to and monitor change
- complete biosecurity records.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP) relating to an emergency disease or plant pest incursion response
- organisational procedures for communication in an emergency response
- common physical and human resources needed in an emergency response
- common work health and safety, and biosecurity hazards in an emergency response
• personal protective equipment, and fomites relevant to emergency response
• signs of personal stress and potential impact on response
• techniques for prioritising work activities and time management
• techniques for managing own responses to change, and to personal stress
• communication principles for working effectively in teams, and reporting information
• records required to be kept during an emergency response.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for control activities
- follow infected premises (IP) site supervisor instructions
- identify animal welfare concerns
- select, prepare and use personal protective equipment (PPE)
- apply biosecurity principles and work health and safety practices in implementing, monitoring and reporting on variations to control activities
- implement control activities
- monitor, review and report on control activities within area of own responsibility, for compliance and effectiveness
- undertake remedial action within own scope of authority
- provide reports to IP site supervisor on variations to activities, failure to meet objectives and recommendations for adjustments to work instructions
- communicate effectively with IP site supervisor and when giving and receiving work instructions to others
- maintain log of activities as required.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- common control activities associated with emergency disease and plant pest control procedures at infected premises (IP)
- objectives and work instructions commonly associated with IP control responses
- own work role and responsibilities within an IP control response
• animal welfare guidelines relevant to the species, disease and IP environment if animals are under control procedures
• PPE gear commonly used in IP control response
• biosecurity principles commonly associated with an IP control response
• safe work practices applicable to work role and responsibilities in an IP environment
• reporting templates and requirements for logging control activities
• communication principles used in giving, receiving and clarifying instructions, and reporting on control activities.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Companion Volume implementation guides are found in VETNet -
Performance Evidence

The candidate must undertake movement and security procedures including establishing a traffic check point and monitoring the movement of vehicles and issuing permits.

The candidate must demonstrate that they can:
- determine logistics and required documentation applicable to specific movement and security operations
- obtain and check any resources and personal protective equipment (PPE)
- establish and operate traffic checkpoint
- issue and check permits
- respond to vehicles without valid permit for load being transported as appropriate to standards and protocols
- liaise with external security providers
- use PPE and decontaminate resources as required
- monitor, review and report on application of movement and security procedures within area of own responsibility
- undertake remedial action within own scope of authority
- provide reports on variations to appropriate authorities in consistency, currency and ongoing effectiveness or failure to achieve objectives
- communicate recommendations on adjusting movement and security procedures to supervisor and appropriate authorities.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- movement and security procedures commonly associated with movement and security controls during a disease or plant pest incursion
- AUSVETPLAN or PLANTPLAN, and other relevant standards and protocols to determine:
Assessment Requirements for AHCBER304 Carry out movement and security procedures

- permits and documentation associated with implementing movement and security procedures
- action required for any vehicle without a valid permit
- biosecurity principles associated with movement and security procedures, use of PPE gear, and need for decontamination
- safe work practices
- objectives and work instructions associated with movement and security procedures
- own work role, responsibilities and scope of authority in implementing movement and security procedures
- decontamination procedures for PPE and resources
- reporting templates
- communication principles used in operating a traffic control point, issuing permits and documentation, and reporting to supervisor and appropriate authorities.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to supervise others in the range of activities required on infected premises (IP).

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response. Work is generally carried out under general instructions from the IP operations manager.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

| 1. Plan emergency disease or plant pest control activities on an IP | 1.1 Plan emergency disease or plant pest control activities under direction from IP operations manager and in consultation with property owner or manager and taking into consideration environmental values that need to be protected  
1.2 Confirm all IP procedures with IP operations manager and communicate to property owner or manager  
1.3 Develop a schedule for implementation of emergency disease or plant pest control activities and request resources required for planned activities  
1.4 Establish reporting processes  
1.5 Establish staff rosters to support activities in a cost-effective manner and with minimal stress on personnel |
| 2. Supervise emergency disease or plant pest control activities | 2.1 Assign personnel to team leader and worker positions required by IP operations functions to be performed and give directions for tasks to be performed  
2.2 Conduct emergency disease or plant pest control activities with ongoing consultation with IP operations manager and property owner or manager  
2.3 Supervise emergency disease or plant pest control activities to ensure that they are cost-effective, make effective use of resources and avoid unnecessary property damage and livestock or crop destruction  
2.4 Monitor valuations of materials requiring destruction, use of plant, equipment and materials and all IP service provision to ensure they adhere to relevant standards, national plans, protocols and contract requirements  
2.5 Monitor supplies of materials and resources to ensure that they are adequate to meet needs of control activities  
2.6 Maintain an incident log that includes details of all activities undertaken as well as contractors' hours and performance  
2.7 Supervise and motivate personnel to carry out specific emergency disease or plant pest control activities to the standard required |
| 3. Check effectiveness of emergency disease or plant pest control activities | 3.1 Monitor effectiveness and progress of control activities and compare with planned objectives  
3.2 Carry out inspections of teams on site with sufficient regularity to ensure that standards are applied in line with required standards and protocols  
3.3 Provide progress reports to IP operations manager according to agreed reporting schedule and format  
3.4 Keep records as required by standards and protocols |
<p>| 4.1 Revise site-specific emergency disease or | 4.1 Revise control activities as required to address relevant protocols, maintain cost-effectiveness including appropriate resource |</p>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- consult with infected premises (IP) manager and property owner or manager on planning and implementation matters
- plan control activities for emergency disease or plant pest control response:
- schedule implementation of control activities
- identify IP procedures required, and confirm with IP manager
- request resources required for planned activities
- establish reporting processes
- establish staff rosters
- communicate with property owner or manager on IP procedures
- supervise and motivate personnel to carry out control activities to standards and protocols required, and confirm with on-site inspections of teams
- monitor supplies of materials and resources and maintain to meet needs of control activities
- monitor all IP service provision for adherence to standards, protocols and contractual arrangements
- maintain incident log, and records of control activities
- monitor control activities for value for money, and minimal impact on property, effectiveness and progress against planned objectives
- report on progress of control activities against plan to IP operations manager
- revise control activities as required to address relevant protocols whilst maintaining cost effectiveness and wider impacts
- communicate revisions to control activities to Local Control Centre (LCC).
Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP) that guide development and implementation of IP control plan, contractual arrangements and control procedures
- planning processes
- communication principles used for consultation, providing information, reporting, and in interacting with personnel
- supervisory and monitoring practices used with personnel
- techniques for motivating personnel
- contractual arrangements
- reporting requirements
- processes for planning, scheduling, monitoring progress and costs.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out field surveillance for a specific emergency disease or plant pest.

The unit applies to personnel who have been appointed or engaged as part of a field surveillance team to undertake a role within an emergency disease or plant pest incursion response. Field surveillance teams work under instructions from the control centre.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Element

#### Performance criteria

1. **Look for signs of a specific emergency disease or plant pest**
   - 1.1 Receive and confirm work instructions from surveillance coordinator or other appropriate authority
   - 1.2 Identify signs of an emergency disease or plant pest, collect appropriate samples for testing, and gather evidence to support a diagnosis according to relevant standards and protocols
   - 1.3 Access appropriate available expertise to assist in diagnosis
   - 1.4 Collect, handle, package and dispatch diagnostic samples according to relevant standards and protocols

2. **Respond to an emergency disease or plant pest**
   - 2.1 Alert surveillance coordinator when signs of an emergency disease or plant pest are found
   - 2.2 Take appropriate measures to immediately contain emergency disease or plant pest according to instructions from control centre and relevant guidelines
   - 2.3 Collect information relevant to management of emergency disease or plant pest outbreak and report to surveillance coordinator
   - 2.4 Give directions and warnings to property owners or persons in charge about suspected emergency disease or plant pest
   - 2.5 Conduct personal decontamination and, where appropriate, equipment and vehicle decontamination according to relevant standards and protocols for emergency disease or plant pest

### Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

### Unit Mapping Information

This unit is equivalent to AHCBI0402A Carry out field surveillance for a specific emergency disease or plant pest.

Assessment Requirements for AHCBER402 Carry out field surveillance for a specific emergency disease or plant pest

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake field surveillance for specific disease or plant pest as directed
- report findings of specific disease or plant pest along with samples and evidence to support find
- follow relevant standards and protocols to identify and report findings
- use appropriate available expertise to assist in identification and diagnosis
- follow relevant standards and protocols in collection, handling, packaging and despatch of samples
- contain emergency disease of plant pest as directed by control centre and relevant guidelines
- collect and report information relevant to management of outbreak to surveillance coordinator
- give directions and warnings to property owners or person in charge re the suspected presence of emergency disease or plant pest
- decontaminate self and where appropriate equipment and vehicles.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- standards, guidelines and protocols for the emergency disease or plant pest
- signs of specific disease or plant pest which is the subject to surveillance
- emergency disease or plant pest surveillance procedures for:
  - collecting and handling samples and supporting evidence of diagnosis
  - reporting findings and information that may help in control response
  - containment of outbreak
• personal and general decontamination
• process for locating expertise
• communication principles for providing direction and warnings to property owners and managers, liaising with disease or plant pest experts, and reporting to surveillance coordinator.

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines, protocols and legislation in:
  - planning control procedures
  - resourcing the control plan
  - addressing work health and safety requirements
  - determining criteria for implementing control procedures
  - contracting services
  - monitoring implementation of control procedures for cost effectiveness
  - monitoring, reviewing control operations and revising priorities as part of managing active emergency disease or plant pest sites
- plan and resource control procedures, and contingency plans
- engage with stakeholders and field personnel in planning process
- engage with stakeholders, field staff, property owners/managers and others in control centre throughout the control period
- manage and monitor implementation of control procedures
- monitor personnel against specified objectives
- monitor supply of resources
- review priorities and revise as appropriate after consultation
- review control activities as required and communicate to stakeholders and personnel.

Knowledge Evidence

The candidate must demonstrate knowledge of:
• AUSVETPLAN or PLANTPLAN, and relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP)
• incident control management procedures
• the requirements of relevant commonwealth, state and territory legislation
• relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
• techniques for monitoring and reviewing control procedures, and resource expenditure
• advanced communication principles to consult and communicate with a range of stakeholders and the control centre
• project management principles.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in an emergency disease or plant pest setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines, protocols, and legislation in:
  - planning and amending a control program
  - recording information and disseminating
  - disseminating reports
  - identifying appropriate personnel along lines of communication as part of planning and overseeing an emergency disease or plant pest control program
- plan a control program around identified strategies with input of experts and submit to for approval
- identify declared areas that are within the jurisdiction of the control program
- brief appropriate personnel and organisations/agencies on developments and consequences of emergency disease or plant pest outbreak, and its ongoing management
- implement and monitor control plans utilising information management system and reporting as set out in standards and protocols
- monitor control strategies in use against the intended outcomes, and amend control plans as appropriate
- monitor resource requirements are sufficient to ensure strategies are achieved
- communicate revisions to control strategies and/or plans to appropriate personnel.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, and other Nationally Agreed Standard Operating Procedures (NASOP), relevant standards, guidelines and protocols and associated manuals
- incident management functions
Assessment Requirements for AHCBER601 Plan and oversee an emergency disease or plant pest control program

- phases of a response
- the requirements of relevant commonwealth, state and territory legislation
- strategies for controlling emergency disease or plant pest situations
- support agencies and sources of expertise
- control procedures relevant to the emergency disease or plant pest situation
- project management principles
- consequences and impacts of the outbreak and management controls
- information management system
- processes for monitoring and reviewing control plans, and resource expenditure
- human and physical resources required to implement the control plan
- methods of communicating with stakeholders.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to inspect and clean machinery and vehicles of material that may contribute to the spread of weeds, pests or diseases.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have inspected and cleaned machinery of contaminations, including:

- confirmed work activity with supervisor and identified hazards and risks and applied controls for work practices
- selected cleaning tools, equipment and materials for the cleaning activity
- identified and checked equipment, materials and suitable location for cleaning activity
- made the machinery safe for inspection and exposed contamination according to workplace procedures
- cleaned machinery of contamination according to workplace biosecurity procedures
- reinstated machinery to operational condition and disposed of waste materials according to workplace and environmental procedures
- maintained and presented records of inspection and cleaning according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- biosecurity protocols for contaminants relevant to industry and location
- types of equipment and contamination that can occur
- contaminants and how they are disseminated by machinery and equipment including, weeds, pests and diseases
- cleaning techniques appropriate to machinery, vehicles and types of contaminant including cleaning agents and safety data sheets
- operating features of machinery and equipment relevant to inspection and cleaning
• safe work practices associated with inspecting and cleaning machinery
• safe and environmental methods of disposing of cleaning waste
• records and reporting procedures for biosecurity.

Assessment Conditions
Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • horticultural or agricultural machinery and equipment relevant to workplace context
  • cleaning tools and equipment
  • appropriate cleaning agents
• specifications:
  • workplace documents including policies, procedures and processes relevant to cleaning practices
  • manufacturers' operating instructions for equipment and machinery
  • cleaning agents' safety data sheets
  • specific legislation/codes of practice relevant to biosecurity and environmental waste.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to follow the organisation’s procedures that reduce the likelihood of pathogenic organisms entering a quarantine site.

It applies to any personnel entering and leaving the quarantine area.

This unit applies to individuals who work under general supervision and exercise limited autonomy. They undertake defined activities and work in a structured context.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- meet site security and entry/exit requirements for vehicles, apparel and personal hygiene and safety
- follow procedures and biosecurity protocols for handling and storing chemicals, medications, feed mixes, soils, growing media and other products
- report disease/pest infestation, breaches of quarantine procedures and work health and safety hazards to supervisor
- dispose of waste products, deceased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock and contaminated material as instructed
- record information related to work in quarantine area, including any breach or problem
- maintain security of quarantine site, any site identified as a quarantine breach and any site considered a problem area
- direct visitors in their obligations to follow quarantine procedures
- control site deliveries to ensure quarantine procedures are followed
- follow quarantine procedure and biosecurity protocols in responding to a site quarantine breach or problem
- clean and disinfect any quarantine breach sites
- isolate and monitor livestock, plant stock or other items suspected of being exposed to contaminants.

Knowledge Evidence

The participant must demonstrate knowledge of:

- site quarantine procedures and biosecurity protocols for:
Assessment Requirements for AHCBI0202 Follow site quarantine procedures

- disposal of waste products, diseased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock or contaminated material
- directing visitors at the quarantine site
- reporting diseases and pest infestations problem, work health and safety hazards
- handling and storing chemicals, medications, feed mixes, soil, growing media
- controlling entry of deliveries to a quarantine site
- isolating livestock and monitoring livestock
- cleaning and disinfecting quarantine area
- maintaining security for the quarantine site
- recording information about own work and any quarantine breaches
- personal protective equipment appropriate to site quarantine procedures and biosecurity protocols
- work health and safety hazards
- methods for cleaning and disinfecting quarantine site or area of quarantine breach
- biosecurity protocols and how they apply to the work site, industry and in the context of a work role.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.

The unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.

This unit applied to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

</table>
## Element 1. Identify signs of unusual disease or a plant pest

1.1 Identify signs of disease or a plant pest

1.2 Compare signs of disease or a plant pest with own experience of common endemic disease or a plant pest in the species.

1.3 Assess severity and extent of the problem in the species where signs indicate an unusual disease or a plant pest.

1.4 Seek immediate advice from supervisors, professionals or appropriate authorities when signs indicate an unusual disease or a plant pest.

## Element 2. Report signs of unusual disease or a plant pest

2.1 Report signs of unusual disease or a plant pest to appropriate authorities immediately.

2.2 Implement biosecurity measures according to enterprise biosecurity plans and instructions from appropriate authority.

### Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify unusual disease or pest signs
- assess the severity and extent of problem in the disease or pest species
- seek advice from supervisors or professionals
- notify appropriate authorities
- implement appropriate biosecurity measures.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- signs of common endemic diseases or plant pests in the species
- signs indicating unusual disease or plant pests
- methods for assessing severity and extent of problem
- biosecurity measures associated with enterprise biosecurity plans
- the process of reporting any unusual findings to appropriate authorities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

</tbody>
</table>

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has applied biosecurity measures, including:

- located and interpreted farm biosecurity plans and biosecurity information to inform control measures
- identified biosecurity threats for the property and determined control measures
- determined responsibilities for applying control measures
- incorporated and applied biosecurity control measures into work routines according to the biosecurity plan
- maintained records for traceability of farm inputs and farm outputs, and monitoring and surveillance data
- monitored control measures for effectiveness
- monitored workplace personnel for compliance with biosecurity control measures
- reported biosecurity issues and concerns according to procedures
- maintained currency in biosecurity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of biosecurity on farms
- sources of farm biosecurity information, including:
  - government and industry websites
  - technical and research papers
  - journals
  - training
• farm/enterprise biosecurity plans and their function
• farm biosecurity threats, including:
  • pests animals vertebrate
  • plants
  • diseases
  • invertebrate pests
• control measures to minimise the threats entering or spreading into, or from, the farm production and resources, including:
  • farm inputs
  • farm outputs
  • movement of people
  • movement of animals
  • vehicles and equipment
  • production practices
  • feral and wild animals, pests and weeds
• record keeping for traceability (both trace back and trace forward) of farm inputs and outputs
• record keeping for retention of monitoring and surveillance data
• processes for monitoring effectiveness of control measures
• process for reporting biosecurity concerns and issues.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated on a farm or rural property or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • computers and websites to access current biosecurity information
  • tools and equipment required to implement control measures
  • recording system relevant to biosecurity
• specifications:
  • workplace documents including farm biosecurity plans, procedures, records,
  • workplace instructions, job specifications or work routines
  • regulations, legislation, codes of practice relevant to biosecurity
• relationships:
  • supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to plan and implement a farm or enterprise biosecurity plan which includes a set of measures designed to protect a property from the entry and spread of pests and diseases.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- determine biosecurity threats to farm or enterprise and control measures using standards and protocols
- identify sources of current biosecurity best practice
- identify current access points to property
- establish control measures and procedures for:
  - controlling farm inputs including:
    - new plants or animals
    - the quality of water sources
    - bee hives coming onto the property
    - bedding material
    - records of source, and use of organic and inorganic fertiliser
  - measures to support biosecurity for farm outputs including:
    - harvest bins
    - packaging operations
    - transport and movement of plants, produce, livestock and livestock products, and plant waste
    - intensive rearing of young animals
    - animal breeding facilities
    - animal milking facilities
    - maintaining records
  - movement of people including:
    - controlled access points and production areas
- visitors, their vehicles, and risk profile
- general hygiene

- vehicles and equipment including:
  - equipment hygiene
  - dedicated equipment use
  - storage areas
  - vehicle entry points
  - vehicle movement and parking
  - vehicle hygiene and washes
  - run off from wash areas
  - roads and tracks

- production practices including:
  - water management
  - plant byproducts and waste
  - animal manure and waste effluent
  - feed storage, feed spills and disposal of unwanted feed
  - feed and water troughs
  - product storage
  - resistance to chemicals
  - animal disease control
  - monitoring and surveillance
  - monitoring frequency
  - fencing

- control of feral animals, plant pests and weeds including:
  - wild and feral animals
  - boundary fences
  - property cleanliness
  - weeds
  - volunteer plants
  - straying animals
  - agisted or other visiting animals
  - property and land destruction

- training staff and keeping records including:
  - staff training
  - traceability (both trace back and trace forward)
  - animal health assurance
  - vendor declarations and animal health and product statements
  - monitoring and surveillance data

- seek vendor declarations or animal health statements for:
• quality and disease free assurance status of animals, animal feed and compliance with national, state and territory standards and regulations and industry health assurance programs
• disease and weed free status of organic fertilisers and compliance with Industry Purchasing Code of Practice or equivalent quality controls
• purchased animal bedding material being fit for purpose
• provide and retain supporting documentation for:
  • moving plants, or animals on and off the property
  • appropriate chemical usage and storage in accordance with industry best practice
• develop, document, and induct and train staff in control measures for:
  • controlling farm inputs
  • biosecurity for farm outputs
  • movement of people
  • vehicles and equipment
  • production practices
  • control of feral animals, plant pests and weeds
  • training staff
  • keeping records
• develop a plan for implementing biosecurity
• monitor staff performance
• monitor effectiveness of control measures, and identify improvements
• revise and amend control measures as needed
• review staff training and induction records.

Knowledge Evidence

The candidate must demonstrate knowledge of:

• national industry standards and guidelines relevant to farm or enterprise biosecurity
• Nationally Agreed Standard Operating Procedures (NASOP) relevant to farm or enterprise biosecurity plan
• diseases, pests and weeds that pose a threat and potential causes of spread
• principles of risk management applied to biosecurity
• biosecurity practices for:
  • farm inputs
  • farm outputs
  • people, vehicles and equipment
  • production
  • feral animals, pests and weeds
• training staff, biosecurity planning, and maintaining records
• planning processes for costing, allocating resources and establishing timelines
• processes for improving staff performance.
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to use hand held e-business tools including computers, personal data assistants, (PDAs), radio frequency (RF) scanners, microchip scanners, mobile phone enabled email and SMS, data recording devices, barcoding equipment.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes and in consultation with the management team.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They must use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

## Element | Performance criteria
---|---
### 1. Prepare hand held e-business tools for use
1.1 Select e-business tools
1.2 Complete relevant start-up procedures
1.3 Configure tools with business data
1.4 Test connectivity

### 2. Use hand held e-business tools
2.1 Use e-business tools
2.2 Address equipment faults
2.3 Check data for accuracy and address errors

### 3. Process business data
3.1 Generate and compile business data
3.2 Process business data
3.3 Maintain the integrity of data and data security
3.4 Review performance of hand held e-business tools and make recommendations for improvements to hardware, software or their use in accordance with e-business strategy and budget

### Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- prepare hand held e-business technology
- use relevant technology such as computers, handheld scanners, and barcoding equipment
- enter and process data according to technical and business requirements
- generate data in the format required by the e-business supply chain.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- features and operating procedures of relevant business tools
- relevant protocols for electronic data interchange
- personal identification and password for online access between businesses for access to inventory data and purchasing, payment or supply processes.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect, analyse and present data in the internal and external business environment
- identify the marketable features of the product and potential markets
- assess alternative marketing strategies and techniques to meet business plan objectives
- evaluate performance targets and recommend modifications or improvements
- plan, implement and evaluate a marketing strategy
- plan to manage promotional activities
- develop and manage budgets
- monitor product, pricing and distribution policies to improve market performance.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- financial management and budgeting
- price risk management
- performance evaluation measures
- competitors strengths and weaknesses
- business planning process
- customer relations policies
- market conditions and forces
- enterprise goals, objectives and directions
- markets and market analysis
- communication and promotion skills
- sales and marketing principles and practices
• principles of trend analysis
• legal issues that affect marketing activities (trade practices, Fair Trading Acts, Sales of Goods Acts)
• industry and marketing knowledge including sales networks and distribution systems, and customer trends and preferences
• demographic studies and their application in the development of a marketing plan.

Assessment Conditions
Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research the details of the quoted service and clarify with the client
- identify requirements for estimate, quote or tender including format, specifications and deadline for submission
- identify and cost the resources and services required to fulfil the tender and check for availability
- investigate options for supplies, services, contractors and consultants with current pricing structures and availability
- develop a work schedule with timelines and expenditure
- consider potential problems and risks and develop contingency plans
- develop detailed costing sheets with the final quoted cost, including an estimated margin for risk
- submit the completed tender to the client with supporting information including details of organisations previous work and client feedback
- seek feedback from the client to ensure information supplied is sufficient.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant State and Federal legislation, awards, enterprise agreements and management policies relating to labour hire and employment terms
- current pricing structures and options for supplies, services, contractors and consultants
- enterprise and industry standards and practices for formatting, organising and presenting financial and quantitative information
- business ethics in relation to confidentiality and the tendering process.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research and identify appropriate sources of information
- establish and implement business organisational structure in consultation with members of the business unit
- develop roles and responsibilities within the business unit
- develop and implement stress management strategies
- identify and access rural networks and support groups
- implement strategies to resolve problems.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation
- the organisation’s structure
- organisational policies, plans and procedures
- principles of effective consultation and communication
- principles and techniques to use feedback to achieve positive outcomes
- rural networks and support groups
- stressors in the rural business environment and stress management.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine mechanisms and criteria for reviewing management plans and strategies
- analyse existing management plans and strategies
- modify management plans and strategies
- implement modified management plans and strategies
- support stakeholders and staff to implement modifications.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- ecosystems including the interrelationship of geophysical, hydrological, biological and meteorological factors
- biodiversity
- knowledge of the monitoring parameters and techniques utilised in biological monitoring
- threats, both natural and from human activity, to places of natural significance
- international, national and local standards and codes of practice for land management
- land management assessment and monitoring processes
- land degradation and pollution
- scientific processes for evaluating land management
- general understanding of range of cultural issues
- legislation under which enterprise operates.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- implement strategies for personal development and appropriate self-management
- identify skill requirements and prepare task descriptions
- arrange employment of workforce members
- support career and professional development of workforce members
- implement work health and safety priorities and procedures
- manage administration of staff records
- review labour productivity.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- personal development
- time management
- task descriptions and person specifications
- equal opportunity and Equal Employment Opportunity legislation
- work health and safety legislation
- relevant industrial awards
- employee induction programs
- interviewing strategies and protocols
- works compensation instance and superannuation
- contracts of employment
- unfair dismissal legislation.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to develop a monitoring, evaluation and reporting program.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities. They analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- implement a monitoring and evaluation strategy
- collect and manage data
- analyse complex information
- prepare reports and supply information
- review the evaluation process.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- quantitative and qualitative methods for monitoring and evaluation
- data management processes and systems
- policy and program management processes
- adaptive management and review cycles.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1. **Establish risk context**
   - 1.1 Review organisational processes, procedures and requirements for undertaking risk management
   - 1.2 Determine scope for risk management process
   - 1.3 Identify internal and external stakeholders and their issues
   - 1.4 Review political, economic, social, legal, technological and policy context
   - 1.5 Review strengths and weaknesses of existing arrangements
   - 1.6 Document critical success factors, goals or objectives for area included in scope
   - 1.7 Obtain support for risk management activities
   - 1.8 Communicate with relevant parties about the risk management process and invite participation

2. **Identify risks**
   - 2.1 Invite relevant parties to assist in the identification of risks
   - 2.2 Research risks that may apply to scope
   - 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties

3. **Analyse risks**
   - 3.1 Assess likelihood of risks occurring
   - 3.2 Assess impact or consequence if risks occur
   - 3.3 Evaluate and prioritise risks for treatment

4. **Select and implement treatments**
   - 4.1 Determine and select most appropriate options for treating risks
   - 4.2 Develop an action plan for implementing risk treatment
   - 4.3 Communicate risk management processes to relevant parties
   - 4.4 Ensure all documentation is in order and appropriately stored
   - 4.5 Implement and monitor action plan
   - 4.6 Evaluate risk management process

### Foundation Skills

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the scope for risk management
- identify potential risks associated with climate, resource (natural, physical, financial and human) availability and capacity, enterprise production systems, theft and vandalism of assets, scientific and technological development, marketing, and external political and social factors
- implement strategies to minimise the impact of risk.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the wide range of risks faced by a primary production business
- legislation, codes of practice and national standards, including:
  - duty of care
  - company law
  - contract law
  - environmental law
  - freedom of information
  - industrial relations law
  - privacy and confidentiality
  - legislation relevant to organisation's operations
  - legislation relevant to equal opportunity
  - legislation relevant to operation as a business entity
  - organisational policies and procedures, including:
  - risk management strategy
  - policies and procedures for risk management
- overall operations of organisation
- risk insurance and insurance providers.

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify sponsorship opportunities with companies that have common values to the program
- identify the mutual benefits the sponsorship arrangement could provide to both organisations
- develop and present a sponsorship pitch that creates a professional and honest image
- negotiate an appropriate sponsorship arrangement to support a project
- document a sponsorship arrangement, detailing all agreements and responsibilities
- meet legal, financial, cultural, ethical, equity and other requirements for the duration of the sponsorship arrangement
- review a sponsorship arrangement and plan its renegotiation.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- strategy, goals, ethics, program and activities of community group or agency
- effective marketing techniques
- acts, policies and guidelines governing programs and activities
- sources of legal and financial advice
- operation of contracts and agreements.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- develop community networks
- investigate equity requirements and cultural protocols for dealing with community groups
- establish networks of common interests through individual contacts and contacts with other groups
- promote program goals and issues to community groups through networking
- make presentations to diverse groups of people
- communicate with people using appropriate language and style.

Knowledge Evidence
The candidate must demonstrate knowledge of:
- community structures, organisations and cultures
- relevant government community action programs
- process of delivery of programs
- current social and environmental affairs for local community and wider region
- need for the establishment of a community group
- group goals.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the resource management change and its potential impact on individuals and affected families and businesses
- predict issues that are likely to arise from change, based on community feedback and statistical information
- provide information and support to individuals facing resource management changes in a sensitive manner
- review the methodology and effectiveness of support to improve support services for resource management change.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- local natural resource management issues
- relevant approaches to different cultures
- change management principles and practices
- networks of assistance.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop evaluation approach and criteria
- develop review panel and review processes
- evaluate submissions against criteria
- communicate panel decisions to project applicants, including feedback on the reasons for decisions
- prepare reports to agency, project or program requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- facilitation and mediation techniques
- legislation and regulations appropriate to projects being submitted
- basic budgeting skills
- reporting and publishing requirements
- data collection and analysis techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to facilitate development of group goals and projects.

This unit applies to those dealing with groups and communities involved in a Landcare or similar program and covers the facilitation role to assist a group to develop its direction and role in terms of goals, action plans and projects, and to prepare submissions for funding on relevant projects. These individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- facilitate development of group goals and projects
- identify and discuss land management issues with local groups
- work with groups to identify local actions that they can become involved in to promote improved land management outcomes
- provide support to a group in developing project plans and preparing project proposals and submissions
- facilitate group to reach consensus in planning decisions
- facilitate group to allow all group members the opportunity to contribute to discussions

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the range of group facilitation styles
- previous group history
- local, regional and national environmental issues
- regional community, groups and cultures
- strategic planning principles
- national, State and regional funding priorities
- community and sector perspectives on land management and environmental issues
- project planning, budgeting and costing techniques
- mediation and facilitation strategies
Assessment Conditions

Assessors must satisfy current standards for RTOs.

</table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review existing planning documents and sources of information to inform the plan
- identify land management issues and potential solutions
- identify stakeholders to form discussion groups and seek individual input to planning
- organise for the collection and analysis of data to inform planning and monitor progress
- work with stakeholders and technical advisers to develop goals and performance criteria
- develop a draft plan for widespread consultation and feedback
- finalise the regional resource management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- broad geographic indicators with particular emphasis on the region
- regional and rural planning concepts from town planning, rural industry planning, and natural resource planning perspectives
- impact of government processes and industry activities in social and economic terms
- consultative techniques
- National, State and Local policies, procedures and legislation that applies to regional planning
- natural resource management and issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to follow instructions and direction for safe handling, storage and use of chemicals.

The unit applies to individuals who undertake a range of defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well-known parameters and identify and seek help for simple problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have followed basic rules relevant to chemical safety, including:

- confirmed work requirements and equipment for chemical use with supervisor
- located and followed information on chemical labels and relevant safety data sheets according to supervisors’ instructions
- recognised the use of chemicals and complied with chemical safety signs and symbols in the workplace
- recognised chemical hazards and risks and reported to supervisor and applied risk controls
- used, maintained and stored personal protective equipment (PPE)
- maintained and stored chemical application equipment according to supervisors’ instructions
- located chemical store, handled, transported, stored and worked with chemicals according to supervisors’ instructions
- followed emergency procedures for accidents or chemical spillage and reported to supervisor
- maintained records according to supervisor instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- rules and instructions for working with and around chemicals
- common types of chemicals used in the workplace
- common types of chemical application equipment to be maintained and stored
- the structure and purpose of chemical labels and safety data sheets
basics of hazards and risks of chemical use
- safety signage and symbols for chemical use in the workplace
- level of hazard and risks associated with common chemicals used in the workplace and methods of control
- PPE, when and how it should be worn, stored and maintained
- methods of reporting to supervisors' chemical hazards and risks
- safe methods of transporting, handling and storage of chemicals
- types of emergencies and the procedures for accidents and spills of chemicals
- records commonly kept for chemical use.

Assessment Conditions
Assessment of skills must take place under the following conditions:
- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to chemicals and chemical store
- resources, equipment and materials:
  - PPE
- specifications:
  - workplace instructions and procedures
  - chemical safety data sheets
  - common chemical labels
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated that chemicals have been applied under supervision, ensuring they have:

- identified hazards and risks and adopted safe work practices and used appropriate personal protective equipment (PPE) according to supervisors' instructions
- confirmed activity with supervisor and identified and selected tools and equipment necessary for the application of chemical treatment
- carried out pre-operational checks of application equipment and made it ready for operation
- handled and transported chemicals to be used according to chemical labels and supervisors' instructions
- followed directions on chemical labels and relevant safety data sheets to safely mix and prepare chemicals
- selected appropriate measuring equipment and measured, mixed and loaded application equipment with chemicals safely and correctly
- ensured chemical spills were cleared according to chemical label instruction and supervisor instructions
- checked the application equipment for output against plan and applied chemical safely complying with weather conditions
- monitored and recorded weather and applied chemical appropriate to prevailing conditions
- maintained a healthy and safe condition for the environment and others while applying and following chemical application
- cleaned application equipment and PPE and disposed of waste according to equipment manufacturer instructions, chemical label and supervisor instructions
- complied with equipment manufacturer instructions, chemical label and supervisor instructions
- maintained chemical application records and incident reports according to workplace procedures
- stored protection equipment, application equipment and unused chemicals according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- various handling and transport techniques and requirements for chemicals
- structure and content of chemical labels and safety data sheets and their use and purpose for safe chemical application
- principles and methods of measuring, mixing and applying chemicals
- features and functions of a range of application equipment relevant to the workplace their operations, and maintenance requirements
- risk factors to be taken into account for human and animal health, spillage and environmental impact relevant to chemical use before, during and following chemical application
- basic chemical groupings and types used in the workplace, including:
  - the of mode of action
  - the impact on chemical safety
  - application methods
- paths of entry of poisons into the body and the methods of limiting exposure through practices and personal protective clothing
- maintenance practices for chemical application related equipment and PPE and disposal procedures for chemical contaminants and containers
- assessing weather conditions and the impact on safe application of chemicals
- components of a workplace chemical application plan
- chemical related records and reports and their purpose.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to chemical store
- resources, equipment and materials:
  - common chemicals
  - PPE
  - chemical application equipment
  - chemical measuring and mixing equipment
- specifications:
• workplace documents, including work instructions and procedures
• chemical labels and safety data sheets
• chemical application plan and relevant chemical application rates
• manufacturers’ operation and maintenance instructions for chemical measuring and application equipment
• relationships:
  • supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare and apply chemicals for the control of pests across a range of industry sectors.

This unit covers the use of general application equipment used across a variety of industries including; boom sprays, orchard air-blast sprayers, handheld spray equipment, wipers, dry chemical applicators, dips, pour-on, spot-on, vaccination and drenching equipment.

All work must be carried out to comply with workplace procedures, work hand safety and pesticide legislation and codes.

All work must be carried out to comply with chemical label instructions, Safety Data Sheets (SDS’s), the organisation’s application plan and relevant legislation.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.
This unit may be deemed to have a time limit when used as part of an accreditation or licence process.

1. Determine the need for chemical use and prepare an application plan

- 1.1 Identify the nature and level of the pest, weed infestation or disease, assess the need for control
- 1.2 Assess the requirement for chemical use as an option within an integrated pest management strategy
- 1.3 Undertake a hazard and risk analysis of different chemical options
- 1.4 Confirm requirement for chemical application
- 1.5 Assess the spray drift risk of various application options
- 1.6 Assess the risk to sensitive areas and environmentally sensitive organisms
- 1.7 Prepare application/spray plan where required

2. Prepare chemical mixes

- 2.1 Access the workplace application or spray plan to determine chemical and target, application rate or dose, type of application equipment, set-up requirements and amount to be applied as per the label instructions
- 2.2 Identify potential hazards, assess risks and implement control measures
- 2.3 Interpret and apply requirements from chemical labels
- 2.4 Select appropriate personal protective equipment (PPE) for each stage of work and ensure correct fit
- 2.5 Select appropriate mixing equipment and a suitable location for mixing and loading
- 2.6 Mix chemicals in accordance with registered use and clean
<table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the need for chemical application
- develop an application/spray plan
- identify hazards and implement risk control procedures to ensure a safe workplace
- interpret and apply chemical label requirements included in the application or spray plan
- identify weather conditions that impact on spray drift risk and implement control measures
- conduct pre-operational checks of application equipment
- calibrate handheld and/or powered application equipment relevant to the industry sector
- mix and load chemicals in accordance with label requirements
- measure and record weather conditions before and during and after application
- apply chemicals safely in compliance with labels, legislation and codes of practice
- dispose of surplus chemicals and empty containers
- record relevant information including amount of chemical applied
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage.
Knowledge Evidence

The candidate must demonstrate knowledge of:

- options for pest control based on the Integrated Pest and Resistance Management Plan
- pest and/or disease resistance management
- various chemical labels and SDS formats
- impact of meteorological factors on the safe and effective application of chemicals
- factors that determine spray drift risk including droplet size, wind speed, temperature and temperature inversions and approaches to controlling spray drift risk
- risk factors including human and animal health, weather prior to, during and after application, spillage, residues in plants and animals consumed as food and environmental
- how to mix chemicals including mixing order, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- how to select, operate and use a variety of application equipment including boom sprays
- features, functions and calibration techniques for a range of powered and hand held application equipment relevant to the industry sector
- spray nozzle identification, selection, operation and use
- pests, weeds and/or diseases relevant to the industry sector
- legislation, regulations and licensing requirements in relation to chemical use
- APVMA policy on spray drift management.

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

The candidate must be assessed at least once calibrating application equipment.

Assessors must satisfy current standards for RTOs.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have safely transported and stored chemicals, including:

- identified health and safety hazards, assessed risks and implemented controls
- ensured emergency services contact details are available
- ensured transport vehicle meets regulations and that chemicals were loaded, secured and protected according to regulations and procedures
- ensured emergency equipment and procedures were available
- handled, transported and stored chemicals safely
- carried out emergency procedures safely and according to procedures
- maintained a chemical storage manifest and safety data sheets (SDS) according to legislative and regulatory requirements
- complied with chemical label instructions and SDS for transporting and storage of chemicals and legislative and regulatory requirements
- maintained inventory and records according to workplace procedures and legislative and regulatory requirements
- monitored chemical expiration and disposed of chemicals and waste according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- chemical labels and SDS their purpose, use and terminology, including:
- chemical signs, symbols and coding
- basic chemical properties and reactivity related to SDS and labels
- legislation and regulations that apply to transporting and storing chemicals, including:
  - transport vehicle requirements
  - information and documentation
  - dangerous and hazardous chemicals
  - placarding requirements
- risk factors including human and animal health and environmental
- processes and procedures for the disposal of excess, unwanted, expired chemicals and chemical waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- emergency procedures for spills and accidents
- recording and monitoring of chemical stores including, expiration and disposal procedures.

**Assessment Conditions**

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to storage facility for chemicals
  - access to vehicle for transporting chemicals
- resources, equipment and materials:
  - chemicals
  - PPE
  - materials and equipment to handle, secure and protect chemical loads
- specifications:
  - specific workplace documents, including work instructions and procedures for chemical handling, storage and transport
  - chemical labels and safety data
  - legislation and regulations about handling, storage and transport of chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare a basic application plan, prepare chemicals and equipment and apply chemicals for the control of identified pests, weeds or diseases using hand held application equipment.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have prepared and applied chemicals using hand held application equipment, including:

- determined the need for chemical application by assessing the specific infestation
- developed an application plan according to workplace procedures
- identified health and safety hazards, risk and implemented control procedures and used personal protective equipment (PPE) according to workplace procedures
- notified stakeholders of planned chemical application
- interpreted chemical labels and applied chemical according to manufacturer requirements, safety data sheets (SDS) and application plan
- determined the chemical application parameters according to workplace and
- complied with manufacturer requirements, regulations and environmental factors
- monitored and assessed weather conditions for application
- selected and conducted pre-operational checks of equipment according to operator instructions
- completed at least one calibration activity for hand held application equipment
- mixed and loaded chemicals in accordance with label and application plan
- cleaned equipment, spills and disposed of waste according to procedures
- maintained records and reported incidents according to workplace procedures and regulations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
• control options when selecting chemicals for pest, disease and weed control, including:
  • chemical
  • cultural
  • biological
  • Integrated Pest Management
• parameters affecting the selection of chemical and equipment for application, including:
  • common pests, weeds and diseases
  • rate of application
  • type of application equipment
  • set-up requirements
  • pest and disease resistance
• chemical labels, SDS reading and interpretation
• impact of weather factors on the safe and effective application of chemicals
• factors that determine off target contamination, including:
  • physical movement of chemicals (e.g. animals moving baits or soil movement)
  • chemical formulation
  • droplet size
  • wind speed
  • temperature
  • temperature inversions
  • controlling spray drift and air concentrations
• risk factors of chemical application, including:
  • human and animal health
  • spillage
  • residues in environment, plants and animals
  • withholding periods
• preparing chemicals including mixing order, compatibility, adjuvants and water quality
• requirements for disposal of excess chemicals, clearing spillages and equipment clean up
• selecting and operating suitable held application equipment, including:
  • operation and use
  • features, functions
  • calibration techniques
  • nozzle identification and selection
• legislation, regulations and licensing requirements in relation to chemical use
• stakeholders and required notifications including, neighbours, staff and statutory notifications
• health and safety in the workplace hazards, risks and controls including PPE
• regulatory and industry policies on off target management.
Assessment Conditions

Assessment of skills must take place under the following conditions:

- **physical conditions:**
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions

- **resources, equipment and materials:**
  - chemicals
  - PPE
  - application equipment
  - chemical measuring and mixing equipment

- **specifications:**
  - specific workplace documents, including work instructions and procedures for chemical application
  - chemical labels and SDS
  - legislation and regulations about use of chemicals
  - manufacturers’ operation and maintenance instructions for equipment
  - access to weather reports.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely prepare and apply chemicals ensuring they have:

- determined and confirmed the need for chemical application by assessing the infestation, off target risk, and environmental risks
- developed an application plan for chemical application
- identified health and safety hazards, risk and implemented control procedures according to chemical label
- notified stakeholders of planned chemical application
- used personal protective equipment (PPE) according to workplace procedures
- interpreted chemical labels and applied chemical according to safety data sheets (SDS) and application plan
- identified and selected the chemical required for the target and calculated the amount and rates required according to chemical label
- identified and selected application equipment and suitable location, and determined the set up parameters according to application plan and operator instructions
- monitored and assessed weather conditions and equipment performance to ensure effective chemical application
- selected, conducted pre-operational checks according to operator and maintenance manual
- completed at least one calibration activity for application equipment
- prepared and loaded chemicals and returned unused chemicals to store in accordance with label, application plan and workplace procedures
- applied chemicals safely according to chemical labels, regulations and workplace procedures
- complied with chemical labels, SDS, regulations, maintenance manual, environmental procedures, operator instructions and application plan
- cleaned equipment and spills, and disposed of waste according to workplace and environmental procedures
• maintained records and reported incidents according to workplace procedures and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

• control options when selecting chemicals for pests, diseases and weeds infestations, including:
  • chemical
  • mechanical
  • cultural
  • biological
  • integrated pest management including resistance management principles
• types of pest, diseases and weed their treatment and resistance
• legal implications and requirements of chemical labels and SDS
• stakeholders and required notifications including, neighbours, staff and statutory notifications
• impact of weather factors on the safe and effective application of chemicals
• characteristics of chemicals, their mode of action and relevance to chemical selection and use, including:
  • translocated/systemic
  • contact
  • ingested poison
  • protectant
  • eradicant
  • knock-down
  • residual
  • selective/non selective
• factors that contribute to off target damage, including:
  • physical movement of chemicals (e.g. animals moving baits or soil movement)
  • chemical formulation
  • wind speed and direction
  • temperature and relative humidity
  • temperature inversions
  • controlling off target damage
  • rainfall
  • buffer zones and barriers
• hazards of chemical application, including:
  • human and animal health
  • environmental contamination
• residues in environment, plants and animals
• withholding/re-entry periods
• safety requirements when applying chemicals, including:
  • procedures
  • PPE
  • signage
• safe handling, transporting and storage of chemicals
• preparing chemicals including preparation, compatibility, adjuvants and water quality
• requirements for disposal of excess chemicals, clearing spillages and equipment clean up
• selecting and operating suitable application equipment
• features, functions and calibration techniques for powered and hand held application equipment, including:
  • pressure and volume of chemical
  • travel speed
  • nozzle identification, selection, operation
• legislation, regulations and licensing requirements in relation to chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • chemicals
  • PPE
  • application equipment
  • chemical measuring and mixing equipment
• specifications:
  • specific workplace documents, including work instructions and procedures for chemical application
  • chemical labels and SDS
  • regulations about use of chemicals
  • manufacturers' operation and maintenance instructions for equipment
  • access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCHM308 Use application equipment to apply fumigant in confined spaces

Performance Evidence
An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely apply a fumigant on materials housed in an enclosure, ensuring they have:

- determined need, appropriateness and method for fumigating a storage facility
- determined hazards and risks and established safety and security resources and control measures required
- prepared facility for safe fumigation
- determined fumigant requirements and prepared the fumigant and equipment for treatment according to chemical label instructions and safety data sheets (SDS)
- ensured personal safety by using appropriate personal protective equipment (PPE)
- applied fumigant and monitored the safety and integrity of the fumigation process, responding appropriately to emergencies
- rendered the storage facility safe through ventilation, conducted tests to establish safe air quality notifying personnel of residual risks
- removed fumigation materials, waste and temporary resources from storage facility and disposed of waste according to workplace and environmental procedures
- complied with workplace and environmental procedures and chemical label instructions and SDS
- checked, decontaminated, cleaned and stored equipment used in the fumigation process according to workplace procedures
- maintained records of fumigation activities and incidents and reported according to workplace procedures.

Knowledge Evidence
An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
• pests relevant to materials to be treated and factors and considerations in relation to the use of fumigation
• pest management strategies and relation to the use and selection of fumigation methods, including:
  • chemical
  • mechanical
  • biological
  • cultural
  • integrated pest management including resistance management principles
• types of fumigant used for treating storage facilities, their mode of action, methods of application, transport, storage and handling
• fumigant labels and SDS and how to interpret and apply label requirements for specific crops and facilities
• equipment used in fumigation, their setup, calibration, operation, shutdown, care and maintenance
• storage facilities and their suitability for fumigation, techniques used to seal a facility, and methods and calculations required to determine fumigant rates of application
• monitoring procedures during a fumigation process and methods of assessing leakage
• safety requirements including signage, equipment, PPE for use when handling fumigants and conducting fumigation activities
• legislation, regulations, licensing and codes of practice relevant to fumigant use
• risks associated with working near confined spaces including signage, gas detection and relevant entry and exit procedures
• chemical hazards and risk factors including human and animal health, leakage, spillage, environment damage and control measures required to mitigate risk
• methods for ventilating storage facilities and the equipment required
• how to assess for residual gas and safe re-entry periods including the consequence of fumigant residues and maximum residue limits
• requirements for disposal of excess fumigants, clearing spillages and equipment clean up
• procedures and processes for rendering a storage facility safe and operational after fumigation
• records required when conducting fumigation activities and related safety reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  • access to storage facility and materials for fumigation
• resources, equipment and materials:
  • fumigants
• PPE
• fumigation and ventilation equipment
• fumigation measuring and mixing equipment
• gas testing equipment
• materials required to seal facilities for fumigation

specifications:
• workplace documents, including work instructions and procedures for fumigation
• fumigant labels and SDS
• legislation, regulations, codes of practice relevant to handling, storage, transport and use of fumigants
• manufacturers’ operation and maintenance instructions for fumigation equipment
• relevant standards for air quality for test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to select and use application equipment to fumigate soil or growing media for the control of pathogens and pests.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely apply a fumigant to soil ensuring they have:

- determined need, appropriateness and method for fumigating a soil
- determined hazards and risks and established safety and security resources and control measures required
- prepared soil for safe fumigation
- determined fumigant requirements and prepared the fumigant and equipment for treatment according to fumigant label instructions and safety data sheets (SDS)
- transported, handled and stored fumigants according to safety procedures, label and legislative requirements
- ensured personal safety by selecting, fitting and using appropriate personal protective equipment (PPE)
- applied fumigant and monitored the safety and integrity of the fumigation process, responding appropriately to emergencies
- rendered the soil and surrounding area safe through aeration and conducted tests to establish safe soil and air quality notifying personnel of residual risks
- removed fumigation materials, waste and temporary resources from treatment area and disposed of waste according to workplace and environmental procedures
- complied with fumigant label instructions and SDS
- checked, decontaminated, cleaned and stored equipment used in the fumigation process according to workplace procedures
- maintained records of fumigation activities and incidents and reported according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
Assessment Requirements for AHCCHM309 Fumigate soil

- primary and secondary soil pests, diseases and weeds to be treated and factors and considerations in relation to the use of fumigation including threshold pest levels and cost benefit
- pest management strategies and relation to the use and selection of fumigation methods, including:
  - chemical
  - mechanical
  - biological
  - cultural
  - integrated pest management including resistance management principles
- soil, media type, moisture and temperature factors relative to fumigation and methods employed to "seal" soils during fumigation
- types of fumigant used for treating soils, their mode of action, methods of application, transport, storage and handling
- fumigant labels and SDS and how to interpret and apply label requirements for specific soil and media situations
- equipment used in fumigation, their setup, calibration, operation, shutdown, care and maintenance
- calculations required to determine fumigant rates of application
- monitoring procedures during a fumigation process and methods of assessing escape
- safety requirements including signage, equipment, PPE for use when handling fumigants and conducting fumigation activities
- legislation, regulations, codes of practice and licensing requirements relevant to fumigant use, transport, storage and handling
- chemical hazards and risks factors including human and animal health, leakage, spillage, environment damage and control measures required to mitigate risk
- methods for aerating treated soils and assessment of residual fumigants including testing fumigant residues and maximum residue limits
- requirements for disposal of excess fumigants, clearing spillages and equipment clean up
- records required when conducting fumigation activities and related safety reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:
- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - soil requiring fumigation
  - fumigants
  - PPE
  - fumigation and soil aeration equipment
- fumigant measuring and mixing equipment
- fumigant testing equipment
- materials required to seal soil for fumigation
- specifications:
  - specific workplace documents, including work instructions and procedures for fumigation
  - fumigant labels and SDS
  - legislation, regulations, codes of practice relevant to handling, storage, transport and use of fumigants
  - manufacturers' operation and maintenance instructions for fumigation equipment
  - relevant standards for fumigation test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have fumigated vertebrate and invertebrate pests manually, including:

- selected the appropriate fumigant option for the pest characteristics and infestation
- determined fumigation parameters according to manufacturer instructions and safety data sheets (SDS)
- prepared fumigant according to chemical manufacturers instructions
- identified health and safety hazards, risks and implemented controls for fumigation activities
- transported, handled and stored fumigants according to safety procedures, fumigant label and legislative requirements
- maintained the fumigant inventory and disposed of waste fumigant and materials according to workplace and environmental procedures
- implemented emergency response procedures to maintain a safe site
- prepared site for fumigation and erected exclusion barriers and signage
- checked weather conditions and forecasts to decide on fumigation progression
- sealed treatment area, applied the fumigant, monitored fumigation activity and ventilated sites
- checked for residual fumigant according to workplace procedures
- restored the treatment area, cleaned and decontaminated the equipment
- complied with chemical manufacturers' instructions, workplace and legislative and regulatory requirements, safety procedures, fumigant label and legislative requirements, and environmental procedures
- maintained records, stock inventories and reported on work activities and incidents, according to workplace and legislative and regulatory requirements.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pests and their characteristics for fumigation control
- primary vertebrate and invertebrate pests that can be controlled by manual fumigation methods
- pest control strategies and the role of fumigation, including:
  - chemical
  - cultural
  - biological
  - mechanical
  - Integrated Pest Management
- fumigants their use and action
- fumigant selection criteria to consider, including:
  - size of area
  - weather conditions
  - type of material concentration
  - safety implications
- interpretation and use of labels and SDS
- techniques to seal fumigation treatment sites
- site characteristics and conditions for suitable for fumigation
- relevant legislation and regulatory requirements for fumigant use
- risk factors including human and animal health, weather, leakage, spillage and environment
- safety and environmental requirements for disposal of fumigant, spills and waste materials
- clean-up procedures and decontamination
- pre and post fumigation safety procedures
- transporting and storage requirements of fumigants, including:
  - legislation and regulations that apply to transporting and storing chemicals including:
    - transport vehicle requirements
    - dangerous and hazardous chemicals
    - placarding requirements
- processes and procedures for the disposal of excess, unwanted, expired fumigants and waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- record keeping procedures and practices for workplaces and regulations
- tests and testing for residual fumigants
- inventory and stock records and procedures for fumigants.
Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
  - access to storage facilities for fumigants
- resources, equipment and materials:
  - site requiring fumigation
  - fumigants
  - PPE
  - fumigation aeration equipment
  - fumigant measuring and mixing equipment
  - fumigant testing equipment
  - materials required to seal treatment area
- specifications:
  - specific workplace documents, including work instructions and procedures for fumigation
  - chemical labels and SDS
  - legislation and regulations relevant to handling, storage, transport and use of fumigants
  - manufacturers' and maintenance instructions for hand fumigation equipment
  - relevant standards for residual fumigation test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to prepare workplace procedures for the calibration of equipment used in the application of pest, weed and disease control chemicals and bio-agents.

The unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have prepared safe operating procedures for calibration of equipment, including:

- identified and analysed the need for equipment calibration
- analysed and confirmed equipment calibration requirements and operator capability
- performed a risk assessment of the calibration activity and incorporated risk controls into the calibration procedure
- documented procedures for calibration according to intended use and workplace protocols.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, codes of practice and enterprise procedures relevant to pesticides, the environment and health and safety in the workplace
- sources of chemical safety information, including:
  - codes of practice
  - legislation and regulations
  - chemical manufacturer labels
  - safety data sheets
- chemical handling and application
- mechanical and electronic controls on application equipment
- calibration techniques
- hazards, risks and controls including use of personal protective equipment (PPE).
Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - chemical application equipment
  - specific tools for calibration and adjustments
  - PPE
- specifications:
  - workplace documents including policies, procedures and processes
  - manufacturers' operating instructions for equipment to be calibrated
  - workplace instructions and specifications for calibration
- relationships:
  - access to supervisors and operators.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to assess hazards and risks and determine controls and develop procedures to mitigate risks when using chemicals.

The unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

### 2. Assess risks associated with chemical use and develop control procedures

2.1 Assess risks associated with using chemicals in the workplace

2.2 Develop control measures and emergency action plans to mitigate risk according to workplace procedures and industry best practice

2.3 Develop procedures for risk control for operational activities using chemicals according to industry best practice

2.4 Develop a continuous improvement strategy to address identified deficiencies in risk control procedures

### 3. Monitor and assess adherence to chemical risk procedures

3.1 Provide personnel with chemical use procedures, instruction and safety equipment, including personal protective equipment, for using chemical control strategies

3.2 Monitor and assess personnel performance against procedures for selecting equipment for chemical use

3.3 Monitor and assess personnel performance against procedures for operational activities of chemical use

3.4 Measure the performance of personnel for following risk control procedures according to industry practice

### 4. Evaluate risk control measures and maintain records

4.1 Develop procedures for evaluating the effectiveness of risk control measures

4.2 Identify shortfalls in procedures and document changes required

4.3 Update procedures to reflect required changes according to industry best practice

4.4 Develop and maintain record systems for risk assessment according to industry best practice and legislative and regulatory requirements

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed procedures to minimise risks in the use of chemicals, including:

- sourced information and analysed its content for safe chemical use
- identified steps in the chemical use process and identified hazards and risks
- assessed the risks and developed risk control procedures to mitigate the risk for chemical use
- implemented procedures, monitored and evaluated personnel using procedures
- developed a continuous improvement strategy for risk control procedures
- implemented, monitored and evaluated a chemical risk control procedure
- developed and maintained records for risk assessment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of chemical safety information, including:
  - codes of practice
  - legislation and regulations
  - chemical manufacturer labels
  - safety data sheets (SDS)
- industry best practice requirements relating to chemical use
- strategies for identifying hazards, risks and controls
- risk factors, including:
  - human
  - animal health
  - product integrity
• weather
• residues and maximum residue levels
• spray drift, spillage and environment
• requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
• chemical application equipment capabilities and limitations
• principles and practices of chemical handling, transporting and storage of chemicals and fumigants
• principles and practices of chemical application strategies and equipment including integrated pest management
• operational factors to consider in procedures, including:
  • transport, handling and storage
  • application methods, equipment and personal protective equipment (PPE)
  • cleaning and decontamination
  • disposal of waste
• strategies for instructing personnel, and monitoring and assessing personnel performance
• mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:
• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • tools and equipment required to implement the chemical use procedure
  • PPE
• specifications:
  • specific workplace documents including policies and processes
  • manufacturers' operating instructions for equipment and machinery
  • SDS
  • workplace instructions and job specifications
  • chemical information including legislation, codes of practice, manufacturer instructions
• relationships:
  • team member(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to assess and control the risks associated with chemical use and to plan and implement a program for chemical use.

The unit applies to individuals who take responsibility for their own work and provide direction to others. All work must be carried out to comply with workplace procedures, in accordance with applicable state/territory health and safety in the workplace, pesticide and environmental legislation and codes of practice.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have planned and implemented a chemical use program, including:

- sourced information and analysed its content for chemical application
- assessed the need for chemical use and ensured personnel are adequately trained in chemical use according to workplace procedures
- identified hazards, risks and provided controls, including personal protective equipment (PPE) for chemical application and off target impact
- assessed weather conditions and environmental sensitivity of the site
- documented chemical application and maintenance procedures according to workplace protocols
- determined chemicals required and mixing requirements according to workplace procedures and chemical label instructions
- develop a continuous improvement strategy to minimise risk
- communicated chemical application plan to personnel
- implemented procedures and monitored and evaluated personnel according to chemical application plan
- developed a continuous improvement strategy for chemical application plan
- implemented, monitored and evaluated a chemical application plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- source of information for developing plans, including:
  - legislation and regulations
  - codes of practice
  - chemical labels
- safety data sheets (SDS)
- industry requirements relating to chemical use
- strategies for identifying hazard, risks and controls
- risk factors, including:
  - human
  - animal health
  - product integrity
  - weather
  - residues and maximum residue levels
  - off target damage, spillage and environment
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities, limitations and calibration
- mixing chemicals, including:
  - rates
  - mixing order if more than one chemical
  - adjuvants
  - water quality
- life cycle of a variety of pests and the target stages
- implications of pest resistance to chemicals
- principles and practices of chemical application strategies and equipment including, integrated pest management and animal health strategies
- preparation and documentation of strategic plans and procedures
- signs of pest damage and signs of beneficial organisms
- operational factors to consider in a procedures, including:
  - transport, handling and storage
  - application methods, equipment and PPE
  - cleaning and decontamination
  - disposal of waste
- emergency procedures including first aid
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

**Assessment Conditions**

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessment of skills must take place under the following conditions:

- physical conditions:
• skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions

• resources, equipment and materials:
  • tools and equipment required to implement the chemical application program
  • PPE
  • chemicals and relevant weighing and mixing equipment

• specifications:
  • specific workplace documents including policies and processes
  • manufacturers’ operating instructions for chemicals, equipment and machinery
  • SDS
  • workplace instructions and job specifications
  • chemical information including legislation, codes of practice, chemical label instructions

• relationships:
  • team member(s) or work crew

• timeframes:
  • schedules and planned completion dates for a chemical application plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to develop and manage a chemical use strategy, including assessment of the risk of chemical transport, storage and handling.

The unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate a deep understanding in a specific technical area.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed and managed a chemical use strategy, including:

- evaluated pest control strategies for workplace requirements
- identified, assessed and incorporated external factors, legislation, codes of practice and industry requirements into chemical use strategy
- reviewed available chemicals and their method of application and assessed their relevance to the workplace
- identified and assessed hazards and risks and developed control measures for a risk management strategy according to legislation and workplace guidelines
- researched and documented insurance cover for chemical use in the workplace
- developed procedures for management and use of chemicals according to workplace guidelines, including:
  - risk control measures
  - communication strategy to inform stakeholders of the chemical use strategy
- developed procedures that comply with legislation and workplace guidelines
- distributed information on procedures for chemical management to stakeholders
- developed and implemented a strategy for upskilling and supervising personnel for chemical use
- monitored the implementation of the chemical use strategy and evaluated and rectified underperformances, according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
principles of a chemical control strategies, including:
- relevant legislation, codes of practice and industry requirements covering health and safety in the workplace, hazardous substances, environment and food safety
- workplace and regulatory requirements and options for the keeping of records and documentation
- hazards to human health, agricultural produce, and all aspects of the environment and non-target species of flora and fauna associated with the transport, storage, handling, application and disposal of chemicals, including:
  - routes of entry of chemicals into the body and the implications of this on chemical use management strategies
  - safety procedures including the maintenance, use, fit and decontamination of personal protective equipment (PPE)
  - monitoring of staff health exposed to chemicals according to regulatory requirements
  - emergency procedures for safety incidents involving chemicals
- purpose and role of chemical labels and safety data sheets (SDS) in determining chemical transport, storage, handling, application and disposal procedures and practices to all staff
- external factors that affect chemical use, including:
  - influence of meteorological factors (wind, temperature, humidity, rain) on quality of chemical application, drift potential, effectiveness and efficacy of use
  - elements of a spray drift management strategy including measures to assess the potential for spray drift and prevent or control its occurrence
- pest control strategies and their benefits in terms of risk management and evaluation, including:
  - chemical
  - biological
  - cultural
  - Integrated Pest Management
  - Integrated Resistance Management
  - Integrated Animal Health Management
  - off-label chemical application and procedures
- equipment required, calibration and operation
- principles of residue effects and their management, including:
  - persistence in soil and water
  - accumulation in agricultural produce
  - rate of breakdown of residues in produce and in the environment
  - withholding periods
  - ways in which residues can occur
  - maximum residue levels
  - movement of and persistence and degradation of different types of chemicals
  - industry waste agreements
- source and purpose of insurance for use, transportation and storage of chemicals
Assessment Requirements for AHCCHM501 Develop and manage a chemical use strategy

- communication and negotiation strategies with stakeholders including community, workers and management, including informing on:
  - staff responsibilities
  - how to act in an emergency
  - neighbours when chemical spraying is planned
  - make agencies aware when accidents occur
- types of training needs including internal and external
- monitoring methods and procedures including periodical reviews of procedures, workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in a workplace with pest control requirements personnel and physical resources to implement and monitor chemical use strategy or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - chemicals and spray equipment appropriate to control strategy
  - PPE
- specifications:
  - workplace documents including policies, procedures and processes to help formulate the chemical use strategy
  - manufacturers' operating and calibration instructions for equipment used in implementation to inform the procedures within the strategy
  - SDS
  - workplace instructions and procedures for implementing chemical use strategy
- specific legislation, regulations and codes of practice
- relationships:
  - work team tasked with chemical control activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify learning opportunities which support personal goals or vision
- recognise and take advantage of learning opportunities in the workplace
- adapt to and apply workplace procedures and practices
- complete work tasks according to workplace requirements, standards and applicable regulations
- identify and interpret information on sectors in the targeted industry
- identify and interpret information on the range of products and services produced by the targeted industry
- recognise and adapt to cultural differences in the workplace
- discuss work concerns and questions with supervisor or key personnel
- complete work with required attention to detail without damage to goods, equipment or personnel
- follow industry and enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- current events, activities, products and services of the targeted industry
- workplace policies, procedures and guidelines
- time-management strategies
- appropriate workplace protocols
- workplace equipment, tools and other technologies used in the targeted industry, and where and how to obtain information and instructions on their safe use and basic care and servicing
- sources of information on the industry sector and skills development activities

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- interpret responsibilities and plan own work activities
- follow work health and safety policies
- apply relevant ethical practices and codes of practice in the course of work activities
- recognise simple numerical information relating to work activity
- communicate effectively in the course of work activities
- complete work activities in collaboration with others according to instructions, procedures and applicable regulations
- identify, report and address problems according to workplace procedures
- complete work activities with required attention to detail and without damage to goods, equipment or personnel
- use a range of workplace technologies
- use industry standard terminology

Knowledge Evidence

The candidate must demonstrate knowledge of:
- procedures for identifying and using relevant workplace technology
- systems and equipment used in the workplace and instructions, processes and precautions for their use
- typical problems in the workplace and appropriate action and solutions
- workplace procedures, policies and instructions
- workplace structures and roles and responsibilities of individuals, and team and group members
- basic principles of teamwork in the workplace
- verbal and non verbal communication techniques appropriate to receive and convey workplace information
- basic concepts of time management to meet daily planning and scheduled timelines
- industry and enterprise work health and safety policies

Application

This unit of competency describes the skills and knowledge required to identify what ‘animal care’ means in a workplace and how one's own individual responsibilities contribute to animal care as a whole within a specific workplace or industry.

It may or may not include hands-on animal care but more importantly includes being part of a whole system that supports and contributes to animal care.

The unit also includes contributing to animal care through the use of an appropriate mix of technical skills, handling unexpected contingencies in relation to animal care, and reflecting on animal care procedures in order to make improvements to one's own work. All activities are carried out under supervision.

This unit is designed for use in a Pathway qualification or skills set. It should not be used in a qualification that has a direct job outcome.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply basic principles of animal ethics and welfare
- adapt and modify activities depending on differing workplace contexts and environment
- apply animal-observation skills
- apply relevant industrial or legislative requirements
- identify and use equipment, tools and other technology required to complete workplace tasks
- follow relevant work health and safety and environmental protection procedures and requirements
- identify species using common names
- interpret and follow a designated work plan or set of instructions for a job
- keep required records of workplace activities
- plan a daily routine to complete required workplace tasks
- applying technical skills in animal care including:
  - preparing and providing food and water
  - grooming
  - counting stock
  - recognising common animal behaviours and determining required response
  - recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interaction with staff and others
  - recognise limitations, ask for help and seek clarification or information about work requirements and procedures
  - demonstrate appropriate initiative to deal with problems or refer them where appropriate to relevant person, and complete tasks
  - apply time-management skills
- use basic interpersonal and communication skills, including listening, questioning and receiving feedback
- use routine capture and restraint procedures
- work cooperatively and collaboratively with others to complete tasks

Knowledge Evidence
The candidate must demonstrate knowledge of:
- basic principles of animal ethics and welfare
- codes of practice relating to work requirements
- diseases and pests, disease prevention and routine health care
- feeding and watering procedures
- hazards in the workplace
- health and safety requirements relating to care of animals
- capture and restraint procedures
- techniques for grooming animals
- common animal behaviours and appropriate responses
- quarantine requirements
- terminology relevant to animal care

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit covers the skills and knowledge needed to contribute to work activities that help to produce food. Food in this context refers to product from animal, seafood and plant sources. Producing food may involve hands-on activities, such as seeding, weeding, hoeing and feeding stock (fish or animals), as well as post-harvest activities. It includes being part of a whole system that supports and contributes to producing food.

This unit is designed for use in a Pathway qualification or skills set. It should not be used in a qualification that has a direct job outcome.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- adapt and modify activities depending on differing workplace contexts and environments
- apply relevant industrial or legislative requirements
- apply technical skills to support food production, including one or more of:
  - seeding
  - weeding
  - hoeing
  - feeding stock (fish or animals)
  - packing produce
- handle produce safely and according to workplace requirements
- follow enterprise requirements for market specification of products
- follow relevant food safety, work health and safety and environmental protection procedures and requirements
- grade, label and treat produce according to enterprise and customer specifications
- identify and use equipment, tools and other technology required to complete workplace tasks
- interpret and follow a designated work plan or set of instructions for a job
- maintain required records of workplace activities
- maintain work area housekeeping standards
- monitor environment of storage facility
- plan a daily routine to complete required workplace tasks
- recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interaction with staff and others
• recognise limitations, ask for help and seek clarification or information about work requirements and procedures
• demonstrate appropriate initiative to deal with problems or refer them where appropriate to relevant person
• use appropriate techniques to solve or report problems identified when completing work tasks
• use basic interpersonal and communication skills, such as listening, questioning and receiving feedback
• use required machinery and equipment appropriately
• work cooperatively and collaboratively with others to complete tasks

Knowledge Evidence
The candidate must demonstrate knowledge of:
• handling requirements for produce
• enterprise storage facilities and their maintenance
• enterprise quality procedures
• food safety regulations
• humidity levels and their effect on quality of produce
• hygiene issues in handling and storing horticultural, agricultural and seafood products intended for human consumption
• industry standards for grading and labelling
• post-harvest treatments for various horticultural, agricultural and seafood products
• temperature settings within storage facilities
• relevant storage methods
• correct storage temperatures for a range of produce
• safe work practices relevant to work activities
• housekeeping standards and practices
• procedures for one or more of:
  • seeding
  • weeding
  • hoeing
  • feeding stock (fish or animals)
  • packing produce
• operating and cleaning procedures for required machinery, equipment and tools

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to receive green waste for processing at a compost facility, including measuring quantity for billing and assessing material quality for acceptability against specified enterprise requirements.

It applies to an employee of an enterprise engaged in commercial-scale composting operations.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

| 1. Organise for work | 1.1 Confirm specifications for raw materials  
1.2 Select hand tools and check for serviceability  
1.3 Identify, assess and report existing and potential hazards to health and safety  
1.4 Use, maintain and store suitable personal protective equipment |
| 2. Receive raw materials | 2.1 Recognise and assess raw materials against acceptance criteria  
2.2 Reject non-conforming materials  
2.3 Note and report non-conformances  
2.4 Estimate and record raw materials quantity  
2.5 Calculate fee and charge to customer based on raw material type and quantity  
2.6 Record fee payment and provide receipt |
| 3. Unload raw materials | 3.1 Give drivers directions for unloading at a specific location  
3.2 Provide unloading assistance as required  
3.3 Inspect and assess raw materials against specified acceptance criteria  
3.4 Reject unacceptable materials  
3.5 Note and report unacceptable materials  
3.6 Identify and monitor designated unloading areas to ensure compliance with unloading instructions, containment and segregation of materials and availability of storage capacity |
| 4. Remove contaminants and stockpile acceptable raw material | 4.1 Remove physical unacceptable materials from raw materials  
4.2 Segregate, stockpile and contain or otherwise manage raw materials in appropriate areas  
4.3 Monitor raw material stockpiles to ensure adequate available storage capacity and containment |

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

**Unit Mapping Information**

This unit is equivalent to AHCCOM201A Assess and receive raw materials for composting.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- inspect raw materials for contamination and acceptability against established criteria
- measure quantity for billing
- operate a weighbridge
- provide clear directions to drivers entering site
- receive raw material for processing at a compost facility
- record raw material quantity and calculate fee

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of composting raw material assessment
- characteristics of a range of raw green waste
- enterprise policies and procedures including workplace health and safety procedures
- safety risks to self and product posed by contaminants in raw materials and products
- standard risk control measures used in the industry to minimise risk associated with handling raw materials and products

Assessment Conditions

Assessors must satisfy current standards for RTOs.
Assessment Requirements for AHCCOM201 Assess and receive raw materials for composting

Application

This unit of competency describes the skills and knowledge required to prevent, recognise and provide first response to fire in material or compost piles.

This unit applies to a yard or general hand under supervision of an operations team leader or site foreman and fire brigade personnel.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

</table>
| 1. Recognise a fire risk and undertake preventative actions | 1.1 Obtain and clarify procedures for first response to fire  
1.2 Identify location of firefighting equipment and check to ensure all equipment is available and ready for use  
1.3 Recognise and report conditions that lead to fire and signs of fire  
1.4 Observe enterprise procedures for emergencies  
1.5 Implement temperature and moisture management procedures |
| 2. Recognise and initiate response to fire | 2.1 Identify nature and extent of fire  
2.2 Report fire details and raise alarm  
2.3 Implement preparations for water availability for fire brigade attendance  
2.4 Identify hazards associated with fire emergency and take action to minimise risks to self, others and property  
2.5 Secure immediate area of the emergency  
2.6 Remove machinery and equipment from area where safe to do so  
2.7 Select and set up firefighting equipment as directed by fire brigade personnel |
| 3. Attack fire under direction of fire brigade | 3.1 Apply appropriate firefighting and containment media in a safe and coordinated manner  
3.2 Use firefighting methods and tactics as directed  
3.3 Report and act upon potential for change in fire behaviour to fire brigade and supervisor  
3.4 Identify and maintain clear line of retreat at all times  
3.5 Observe conditions at fire and report their effects on fire development  
3.6 Report significant changes to status of fire to supervisor and fire brigade |
| 4. Carry out post-fire activities | 4.1 Identify and control smouldering fire residuals according to fire brigade directions  
4.2 Undertake break-up of windrows, buildings or structures  
4.3 Remove spent fuel or burnt compost and debris  
4.4 Undertake activities to complement post-fire operations and prevent further damage  
4.5 Clear and clean site and equipment  
4.6 Provide assistance to fire brigade to complete and record appropriate incident information  
4.7 Report effectiveness of tactics employed  
4.8 Seek feedback on performance and note improvements for future action |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow emergency procedures
- operate pumps and set up water delivery system
- read and interpret site operation plans or maps
- recognise and report fire risks and incidents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recognising fire emergencies
- characteristics and operation of joints, hoses, valves and sprinkler components
- work health and safety and emergency management plans as part of enterprise operating procedures
- fire behaviour, extinguishing media and operating firefighting equipment
- fire control tactics and techniques, fire hazards and safety techniques
- operation of pumps
- pile size, moisture and porosity as causes of combustion
- procedures for safely using power and hand tools
- standard risk control measures used in the industry to minimise risk associated with fire response

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify, confirm, locate, handle and maintain raw materials, products and physical contaminants on site
- implement site machinery and traffic management plans
- maintain site machinery security requirements
- maintain site arrangement and segregation of materials and products to avoid contamination
- read and follow batch numbers and codes, and site operating plan
- recognise and locate key process control stages of production cycle and associated machinery on site

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for raw material recognition
- characteristics of a range of raw materials
- company policies and procedures, including workplace health and safety requirements
- key process control stages critical to consistent quality in compost production
- overview of systems and technologies used in compost production, particularly as relevant to workplace
- range and characteristics of products
- safety risks associated with vehicles and machinery movement on site
- safety risks to self and product posed by contaminants in raw materials and products
- standard operating procedures to minimise risk associated with handling raw materials and products
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out routine maintenance on plant and equipment
- organise bagging operations
- prepare, start, operate and shut down a bagging plant
- monitor compost inputs
- monitor compost production against compost specifications
- monitor the temperature of bagged compost
- select and use various features and controls of a range of bagging plant
- ensure product readiness for distribution

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for operating a bagging process
- characteristics of product that is fit for bagging
- effect of variation in inputs which may include ingredient quality and condition, packaging components and consumables, and/or services on process performance
- emergency and routine shutdowns and procedures to follow in the event of a power outage
- environmental legislative and enterprise requirements
- equipment cleaning requirements
- flow of this process and effect on downstream processes
- hazards and controls
- inspection or test points in the process and related procedures and recording requirements
- lock-out and tag-out procedures and responsibilities
• methods used to monitor the process
• operating principles of the equipment which may include:
  • operational understanding of main equipment components, status and purpose of guards,
    equipment operating capacities and applications
• packaging quality and seal integrity
• principles of the bagging process
• product and batch changeover procedures
• product quality and hygiene
• purpose and location of sensors and related feedback instrumentation
• purpose of packaging, coding requirements and related legal requirements, including
  product weight

Application

This unit of competency describes the skills and knowledge required to prepare and mix raw materials of known characteristics in specified proportions for composting.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate a compost recipe that is consistent with the technology and method available from combinations of raw materials
- document compost production plan consistent with plant capabilities and site constraints
- produce a compost recipe that will achieve defined product specifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of compost recipes
- control of hazards in handling raw materials and composting materials
- processing duration required for various raw materials
- range of commercial compost-based products
- raw materials and their characteristics
- relationship between key compost recipe variables and compost production
- systems, technologies and methods in compost production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess characteristics of different raw materials as relevant to manufacture of particular products according to compliance requirements
- define raw material specifications and acceptance criteria
- identify raw materials and product specifications to incorporate into business and marketing plans and strategies
- develop criteria and identify raw material requirements from corporate documents
- draft a supply contract with inclusions as negotiated
- support reliable and secure supply of consistent quality raw materials
- review processes, plant and site capabilities against requirements for receiving and processing raw materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for securing raw materials
- capabilities and limitations of site and plant
- environmental and site licenses and associated risks and restrictions
- potential risks and hazards related to various raw materials
- raw material assessment and characterisation
- raw materials used in compost production
- regulations and standards governing raw materials
- standard forms of supply contracts
- technical and industry literacy to source and interpret test data
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- apply the NVAS to own enterprise
- establish and maintain a bona fide client-veterinarian relationship
- apply relevant state and territory legislation and industry codes of practice as they relate to own enterprise
- demonstrate knowledge of legal aspects of possession and use of approved drugs
- establish systems to satisfy the Deer Industry Association of Australia’s (DIAA’s) quality assurance program
- implement enterprise work health and safety, biosecurity and animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- animal welfare issues and legislation relating to velvet antler harvesting
- basic and applied principles of anatomy, physiology, pain control and pharmacology relevant to velvet harvesting
- DIAA’s NVAS and quality assurance program
- definitions and requirements with respect to veterinary supervision and legal responsibilities of deer producers and veterinarians
- drug withholding periods and tissue residues
- management of deer before and after velveting
- nature of a bona fide legal relationship
- principles and process of velveting, including potential complications
- relevant action of drugs used for velveting on body function, and detrimental results of drug administration
• relevant legislation relating to restricted drugs
• work health and safety legislation, codes of practice and enterprise requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- safely handle and restrain deer including dealing with aggressive or difficult animals
- administer drugs to deer under supervision of a registered veterinarian
- velvet unassisted a minimum of three deer under supervision of a registered veterinarian
- comply with the National Velvet Accreditation Scheme (NVAS) and quality assurance program of the Deer Industry Association of Australia (DIAA)
- manage deer effectively before, during and after velveting
- implement emergency response procedures when required
- develop and maintain effective working relationships with a range of organisations operating in the deer industry
- communicate with work team using industry standard terminology
- implement enterprise work health and safety, biosecurity and animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- animal welfare legislation and issues
- definitions of, and requirements with respect to, veterinary supervision and legal responsibilities of deer producers and veterinarians
- drug legislation relating to deer velvet harvesting
- food safety requirements relating to drug residues and withholding periods, and the hygienic handling of velvet
- management of deer before and after velveting
- surgical velveting procedures
- NVAS and quality assurance program of the Deer Industry Association of Australia (DIAA)
• enterprise work health and safety, biosecurity and animal welfare policies

| for sustainable land use | 1.2 Research and identify legislative and regulatory requirements and document in the improvement plan  
1.3 Identify specific requirements for sustainability from the brief, business plan, management plan or policy documentation  
1.4 Assess the land area for its biophysical factors, biodiversity, historical and cultural attributes, services, site modifications and threats to sustainability  
1.5 Identify environmental implications of the planned works and, if necessary, report to relevant personnel for further research and recommendations |
| 2. Prepare an integrated design to improve land use | 2.1 Develop a concept plan for improvement that reflects client preferences and requirements and takes into account heritage issues, site factors and any identified environmental requirements  
2.2 Present concept plan to the client or land owner for discussion and approval  
2.3 Consult other professionals to assist in research and planning of works in areas of specific technical expertise, energy efficiency and use, current and developing technologies and legislative and enterprise requirements  
2.4 Consider design of products, materials and finishes that are efficient, low risk and cyclic and confirm availability from a local source  
2.5 Evaluate resources, materials, equipment and machinery required for the works for their impact on the sustainable use of the site  
2.6 Select plants and soils for their integrated roles for the designed outcomes in the specific site conditions, system of irrigation and environmental parameters  
2.7 Review environmental conditions for a functional analysis of the site and the planned design  
2.8 Prepare a detailed plan or design  
2.9 Present plan or design to the client or land owner for acceptance |
| 3. Plan the implementation into the design | 3.1 Outline staged implementation and development with appropriate access for future works  
3.2 Incorporate timelines for development, taking into account the needs of the implementation plan and principles of sustainability  
3.3 Determine schedules for planting and post-planting care in accordance with the requirements of the plant species, site conditions and any other planning requirements  
3.4 Integrate protection of water resources, riparian zones, specified trees and existing vegetation into the design plan  
3.5 Review chemical, non-chemical, ameliorant application and waste disposal procedures and processes to select designs of minimal |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess a land area for sustainable use
- conduct soil and water quality tests
- design for the health and sustainability of soils and plants
- implement sustainable practices
- interpret specifications and plans
- outline an integrated approach to land and water management
- prepare a detailed plan or design, specifications and where appropriate a proposal or quotation for sustainable land improvement
- consult with clients
- protect water resources, riparian zones and vegetation in a development area
- research, interpret and apply appropriate legislation and regulations
- select plants and soils for their integrated functional roles
- use a range of graphic techniques for illustrating landscape design components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of designing sustainable landscapes
  - assessment techniques
  - environmental controls and codes of practice applicable to the business and to the improvement works
  - botany, plant physiology, taxonomy and nomenclature
  - identification and selection of soils, growing media, plants, shrubs and trees
- irrigation practices
- legislation and regulations relating to soil and water degradation issues and construction
- specific legislation and regulations for landscape design and development
- specific requirements for sustainability
- surface hydrology
- sustainable land and water use principles and practices applicable in the region
- types, properties and characteristics of a wide range of soils and growing media
- workplace health and safety legislation and regulations

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to prepare a landscape design for a large project on residential, commercial or public open spaces.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess landscape sites
- consult with clients
- design scaled concept drawing and construction plans
- determine survey levels and site grading
- identify and select plants, shrubs and trees
- identify dimensions and qualities of materials
- implement professional practices
- interpret architectural designs and details
- operate Computer-Aided Design (CAD) software and/or draft plans by hand
- specify hard landscaping requirements
- use graphic techniques to industry standards for illustrating landscape design components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of preparing a landscape project design
  - establishment of site levels
  - landscape construction and engineering principles
  - drafting techniques
  - environmental implications of landscape project works
  - botany, plant physiology, taxonomy and nomenclature
  - how to identify and treat soils
  - plant identification, selection and culture
• work health and safety risk in office and outdoor environments

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and collate information on site features
- consult with and advise clients
- document assessment and recommendations in a site plan and assessment report
- identify vegetation and soils
- interpret and produce plans
- maintain assessment data records
- sample soils and growing media
- verify existing site details

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of assessing landscape sites
  - current land use and environmental threats to and problems with site
  - interpretation of results from assessment and testing
  - local, state and federal regulations
  - measurement and surveying techniques
  - plant nutrition
  - protocols of site access
  - soil and growing media types, structure, texture and soil pH
  - soil chemical and physical properties
  - soil field tests and soil sampling techniques
  - techniques to ameliorate soil properties
• vegetation common within the region, using botanical and regionally accepted common names, age, health and conditions of vegetation

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- calculate project costs
- develop a final design and project report
- draw plans to construction standards
- identify and document project timelines
- interpret detail architectural and landscape design drawings
- liaise with stakeholders, staff and contractors
- select appropriate materials and plants
- specify dimensions, footings and qualities of materials

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices of designing for construction of landscape features
  - construction standards
  - drainage issues and the available resources to resolve problems
  - how to select appropriate plants and materials
  - materials available in the marketplace
  - plant specifications for a range of plants appropriate to the design
  - principles of surveying
  - site services, including electrical and water provision
  - stone walling, including gabions
  - the essentials of retaining walls
• the paving process

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- install drainage system works
- interpret drainage system plans and drawings
- interpret site specifications, soil types and drainage system plans
- level and align earthworks
- measure materials required to install drainage systems
- prepare for installation activities
- set out drainage system works
- set out, survey, test and excavate the installation site
- test the drainage system
- use equipment, tools and machinery appropriate to the scope of works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of drainage installation
- drain types, components and installation techniques
- soil characteristics and their impact on drainage systems
- purposes of drainage systems and the application of drainage system plans to the physical situation
- work health and safety
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to measure, record and report on soil moisture, salinity and water table depth to determine system performance and efficiency.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify adverse environmental impacts of drainage systems
- identify and apply appropriate remedial action
- identify and correct system problems
- identify hazards and implement safe work procedures
- use technology to record and report drainage system data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to measure a water table and salinity
- measuring and monitoring procedures for factors contributing to drainage system performance
- positive and negative environmental impacts of drainage systems
- soil moisture measurement procedures
- the environmental role of drainage systems
- water quality monitoring methods and techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- complete a range of rectification works
- identify a range of drainage system issues relevant to their industry, including surface and sub-surface issues
- inspect the site to determine access to drainage system
- plan and prepare for the work
- test the system and clean up after rectifying the identified issues

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices of drainage system troubleshooting
  - components used in drainage systems
  - environmental impacts of drainage systems
  - isolation processes and procedures
  - types and operational parameters of drainage systems
  - types of drainage systems common to their industry and their possible issues
  - work plans and processes

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply soil moisture testing techniques
- calculate water volumes from rate and depth
- clear and refill drainage lines
- clear blockages from drainage systems
- identify hazards and implement safe work procedures
- isolate drainage lines
- measure water table depth, soil moisture and salinity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for monitoring irrigation drainage systems
  - components used in drainage systems
  - environmental impacts of drainage systems
  - isolation processes and procedures
  - levelling and alignment processes
  - measuring and monitoring procedures for factors contributing to drainage system performance
  - soil moisture measurement procedures
  - types and operational parameters of drains
  - water quality monitoring methods and techniques
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the requirements for pumping capacity in a drainage system and power requirements
- complete hydrological calculations
- develop budgets
- develop specifications for water transfer, recharge, reuse and harvesting systems
- identify adverse environmental impacts of drainage and appropriate remedial action
- identify design requirements
- identify performance indicators for the drainage system
- predict volumes and rates of surface run-off and system leakage

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of drainage design
  - budgeting, contractual development and obligations
  - developments in drainage technology
  - cost/benefit analysis
  - leachate interception and dewatering systems
  - leaching fractions and salt movements prediction
  - monitoring systems
  - the design processes
  - water transfer, recharge, reuse and harvesting systems
  - workplace health and safety and environmental protection legislation
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to milk livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare dairy facilities and equipment to industry safety and hygiene standards
- operate milking equipment to carry out milking in an effective and efficient manner
- complete milking operation and return livestock to paddocks
- clean dairy facilities and equipment to industry standards
- recognise and isolate unsuitable milk
- identify sickness or abnormal behaviour in livestock
- communicate with supervisor and staff
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning and maintenance of milking facilities, machinery and equipment such as sheds, yards, milking machines and teat sprays
- anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
- relevant work health and safety requirements
- relevant animal welfare practices and requirements such as handling and moving livestock
- work routines, procedures and impacts of bad practices for milking operations
- criteria and methods for determining milk quality
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species
- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- determine requirements for milking operations
- schedule, coordinate and monitor milking operations
- implement livestock health treatment program
- conduct milk sampling and testing
- implement drying off programs according to livestock health strategy
- recognise and rectify machinery malfunctions
- participate in livestock recording programs
- clean work areas and milking equipment.
- apply enterprise work health and safety policies
- apply enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking facilities, machinery and equipment
- enterprise and industry requirements for milking operations such as production targets, finances, required resources, manpower and equipment
- criteria, methods and industry standards for determining milk quality
- factors affecting milk quality, and their effects and impacts on enterprise production targets and enterprise viability
- work routines, procedures and impacts of bad practices for milking operations
- anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
- relevant hygiene and biosecurity practices and requirements for milking operations
- relevant animal welfare practices and requirements for milking operations
- relevant livestock testing, health treatment and preventive medicine applicable to milking operations
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species
- types and maintenance of required documentation and records
- types, handling, use and disposal of detergents and cleaning agents, Work Health and Safety and environmental practices for these agents
- relevant requirements, methods and methods for waste and debris storage and disposal
- relevant work health and safety legislation, regulations and codes of practice

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations for dairy waste disposal operations
- maintain and operate a dairy waste storage and disposal system in accordance with work health and safety and environmental legislation, regulations and codes of practice
- monitor dairy waste disposal system
- carry out irrigation from dairy waste storages.
- observe, identify and react appropriately to environmental implications and work health and safety hazards associated with the dairy recycling system
- conduct hygiene and administration activities
- apply enterprise work health and safety policies
- apply enterprise environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise work program and program requirements for dairy waste disposal operations
- relevant work health and safety requirements
- tools, equipment and systems used for dairy waste disposal operations (dairy waste handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for dairy waste disposal operations
- environmental impacts of dairy waste disposal operations and dairy waste irrigation, and strategies to mitigate such impacts
- irrigation techniques for dairy waste
- functions, maintenance and service of effluent pits
• methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
• documentation and type of records that need to be completed for effluent operations
• relevant biosecurity requirements and environmental sustainability practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- oversee the routine maintenance and service of milking equipment and replacement of consumables
- oversee the conduct of milking operations
- identify possible causes of decline in milk quality including animal infection and teat damage and faults in milking equipment and rectify
- oversee cleaning and disinfection of milk area and equipment after milking
- maintain records of the milking operation
- manage unsuitable milk from at risk cows
- maintain enterprise practices for milk quality in co-operation with dairy factory personnel
- implement enterprise work health and safety policies
- implement enterprise animal welfare and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- types, functions, cleaning, monitoring and maintenance of milking facilities, machinery, equipment and consumables
- enterprise and industry requirements for milking operations such as production targets, finances, required resources, manpower and equipment
- work routines, procedures and impacts of bad practices for milking operations
- relevant industry standards, guidelines, codes of practice and programmes for milking operations, milk quality assurance and milking shed routines
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species and their impact on milking operations and milk quality
• criteria, methods and industry standards for determining milk quality
• factors affecting milk quality, and their effects and impacts on enterprise production
targets and enterprise viability
• anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species
applicable to milking operations
• relevant hygiene and biosecurity practices and requirements for milking operations
• relevant livestock testing, health treatment and preventive medicine applicable to milking
operations
• types, handling, use and disposal of detergents and cleaning agents, work health and
safety and environmental practices for these agents
• environmental impacts of milking operations and strategies to mitigate such impacts
• relevant work health and safety requirements
• relevant animal welfare practices and requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately
reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

<td>1.2 Check for damaged or defective explosives and take action according to workplace procedures</td>
</tr>
</tbody>
</table>
AHCEXP301 Handle and store explosives

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Prepare and display signage and placarding on vehicles or storage facilities for explosives as directed by legislative and regulatory requirements

1.4 Identify and implement emergency procedures for the transportation, handling and storage of explosives

1.5 Establish monitoring and recording systems for authorisation to handle, store and transport explosives that comply with the codes of practice and legislative and regulatory requirements

2. Transport explosives

2.1 Establish arrangements to maintain the integrity and security of transported explosives according to workplace procedures

2.2 Institute security procedures to ensure explosives arrive at the destination intact and within specified times

2.3 Implement workplace strategies to carry out emergency procedures according to legislative and regulatory requirements

2.4 Load and transport explosives safely according to workplace procedures and legislative and regulatory requirements

3. Store explosives

3.1 Define and action the requirements for the safe and secure storage of explosives according to legislative and regulatory requirements

3.2 Define requirements for personnel authorised to gain access to explosives

3.3 Assess storage conditions to ensure they meet requirements for safe storage of explosives

3.4 Monitor and maintain security according to legislative and regulatory requirements

3.5 Accurately implement and maintain recording systems for the handling and storage of explosives according to legislative and regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill | Description

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have handled and stored explosives, including:

- checked explosives for damage or defects and implemented corrective action
- conducted risk assessment and implemented safe work procedures
- prepared and displayed placards on vehicles transporting explosives
- loaded and transported components of explosives safely in accordance with legislative and regulatory requirements and workplace procedures
- established and implemented monitoring and recording systems for handling, storing and transporting explosives according to legislative and regulatory requirements
- defined requirements and authorisations for the safe handling and storage of explosives
- implemented security procedures for explosives
- identified and implemented emergency procedures for transporting and storing explosives.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- local conditions and factors in the handling, transporting and storage of explosives
- care and preventive measures required to eliminate risk of fire and deterioration of stored explosive materials
- procedures for buying commercial explosives and blasting agents
- explosive materials and their identification
- defective or damaged explosives and emergency procedures
- explosives code of practice, regulations and legislation
- environmental conditions required for safe storage of explosive materials
• loading and storing practices for explosives
• security procedures and best practice
• materials handling procedures
• mandatory and workplace records when handling, storing and transporting explosives.

Assessment Conditions

Assessment of skills must take place under the following conditions:

• physical conditions:
  • skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • explosives or realistic representations of explosives
  • tools and equipment required to handle and transport explosives
  • personal protective equipment
• specifications:
  • workplace instructions, procedures and processes for handling explosives
  • explosive safety data sheets
  • explosives related legislation and codes of practice
• relationships:
  • team member(s) or supervisor to gain approvals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to identify and select explosive products and suitable mixtures that can be used for blasting for agricultural or land management purposes.

This unit applies to individuals who work under broad direction and take responsibility for their own work. This includes using discretion and judgement in the selection and use of available resources.

Licensing conditions apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can identify and select appropriate explosive products for the task.

The candidate must provide evidence that they can that they can:

- establish the need to use explosives
- identify the risks and environmental implications of using explosives
- select explosives and initiator devices to match the application, site and identified hazards at the blasting site
- utilise safety fuses as required
- identify various components of explosive products
- estimate the likely effect of explosives on structures, personnel and livestock in the site vicinity
- apply work health and safety policies and procedures when working with explosives
- apply policies and procedures to ensure the safety of the public

Knowledge Evidence

The candidate must demonstrate knowledge of:

- uses of various explosive products
- performance of each explosive product used by the enterprise
- the behaviour of the substrate material when subject to blasting
- jobs that require the use of explosives in the context of own conservation and land management work
• particular properties of explosives/blasting agents and their suitability for particular purposes
• features that identify defective or damaged explosives
• key concepts of the Australian standards relating to the storage, transportation and use of explosives as they apply to own work role
• relevant State and Territory legislation

Assessment Conditions
Assessors must satisfy current standards for RTOs.

</table>

Application

This unit of competency describes the skills and knowledge required to recognise and record fauna that are commonly encountered when undertaking agricultural, horticultural and land management activities.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have recognised fauna in the field, including:

- accessed a natural area in a manner suitable to observe fauna causing minimal disruption and damage to the environment
- identified and selected processes, situations, equipment and resources for observation of fauna
- observed and record the details of observations according to enterprise requirements
- recognise fauna according to characteristics
- followed workplace procedures and supervisor instructions for identifying, recognising and recording fauna
- applied work health and safety policies and procedures to fauna observation activities
- applied animal welfare practices when observing fauna
- prepared documentation relevant to fauna observations and identification.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for identifying fauna, including:
  - identification techniques and resources
  - fauna behaviour
  - fauna habitats
  - tracks, scats and traces
  - typical characteristics of fauna
  - nomenclature and naming conventions
  - techniques for observing, identifying and reporting fauna
Assessment Requirements for AHCFAU201 Recognise fauna

- purposes for observing and monitoring fauna
- workplace health and safety procedures when conducting observations
- procedures for reporting rare, uncommon or notifiable fauna
- animal welfare and environmental codes of practice relevant to the observation of fauna.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated where target fauna species inhabit or an environment that accurately represents these conditions
- resources, equipment and materials:
  - target fauna
  - tools and equipment required for fauna observations
  - personal protective equipment required while conducting observations
- specifications:
  - workplace policies, procedures, processes and instructions
  - specifications for fauna recognition activity
  - legislation/codes of practice relevant to fauna and environment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to evaluate and coordinate a response to natural resource emergencies involving fauna.

This unit applies to working within own area of responsibility in a response to a wildlife emergency. These individuals are required to take responsibility for their own work and take limited responsibility for other workers and possibly volunteers.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- evaluate natural resource emergency
- implement and coordinate response to emergency in accordance with enterprise procedures and health and safety requirements
- follow enterprise procedures to ensure the safety of self, other personnel, the general public and the wildlife
- determine management options including returning animal to wild or temporary captive management, according to authority and enterprise policies and procedures
- follow instructions from veterinarians or authorities to care for animal
- remove and dispose of animal carcasses in accordance with authority instructions
- complete debrief and prepare reports to enterprise standards
- apply workplace health and safety policies and procedures when implementing emergency plans
- apply appropriate animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- health risks associated with animals
- public relations and media management
- incident management systems
- State/Territory and local wildlife emergency authorities and organisations
- local authorities for wildlife emergencies
- potential biosecurity risks associated with wildlife rescue operations
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess fauna populations and their habitat
- assess the impact of fauna population on the environment
- determine the stability and importance of fauna populations for their species
- plan intervention measures to improve species distribution, habitat and survivability
- prepare a fauna management plan in accordance with legislative requirements and enterprise procedures, including informing staff and stakeholders
- implement plan to control or maintain fauna populations
- develop workplace health and safety procedures within the management plan
- incorporate biosecurity procedures in the management plan
- apply animal welfare practices when managing fauna populations
- apply appropriate sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- legislative and enterprise requirements
- ecology of species, habitats, predators, competitors
- survey and assessment techniques
- key anatomical and behavioural characteristics and reproduction patterns of species
- signs and symptoms of health issues in the species
- management planning
- requirements of licences for scientific, educational and conservation activities
• requirements for ensuring the welfare of animals described in the relevant Codes of Practice

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- prepare machinery and equipment to enterprise requirements before burning
- continually monitor weather conditions throughout the burn
- use personal protective equipment as required and check, clean and store on completion of the burn
- identify appropriate safe escape routes throughout the burn
- maintain communication with supervisor and other staff at all times throughout the burn
- carry out clean up operations according to supervisor instructions to enterprise standards
- apply work health and safety procedures throughout the burn.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- fire behaviour
- extinguishing media and equipment
- communication equipment and procedures
- burning tactics and techniques
- assets that need protecting throughout the burn
- fire hazards, safety techniques
- organisation’s operating procedures for prescribed burn
- contingency plans and emergency procedures for the burn
• purpose and use of personal protective equipment
• work health and safety policies and procedures relevant to prescribed burning
• key concepts of work health and safety and environmental legislative and enterprise requirements.

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to manage wildfire hazard reduction programs.

This unit applies to those whose job role includes managing wildfire hazard reduction programs through planning, advising and monitoring the performance of operational personnel undertaking fire prevention activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

</tr>
</tbody>
</table>
### Element: Manage wildfire hazard reduction programs

#### Performance criteria

- According to adjacent fuel loads, climate, location, accessibility and organisational priorities

1.3 Ensure wildfire hazard reduction strategies take into account the local fire history, fuel loads, climate, location, accessibility, geophysical systems, ecology, environmental sustainability practices, biosecurity, organisational procedures and priorities, work health and safety, local fire agencies and legislative requirements.

1.4 Gain local community support for proposed wildfire hazard reduction strategy.

1.5 Develop strategies for proposed wildfire hazard reduction in accordance with organisational priorities, local fire agencies and legislative requirements.

1.6 Ensure strategies comply with work health and safety, public health and safety and animal welfare regulatory requirements and enterprise guidelines.

<table>
<thead>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and manage wildfire hazard reduction programs in accordance with enterprise procedures, local fire agencies, work health and safety policies and legislative requirements
- rate wildfire risks to the environment, buildings, structures and cultural sites according to fuel loads, climate, location, accessibility and ecology
- develop effective strategies for wildfire hazard reduction that comply with local fire agency and regulatory requirements
- plan wildfire hazard reduction programs that take into account local fire history, climate fuel loads, location and accessibility
- review hazard reduction plans, strategies and operational procedures with other agencies to enterprise and regulatory requirements
- maintain records of pesticides and chemical agents used, hazard reduction and fire incidents according to enterprise procedures
- manage consultation with local community to ensure their support for program
- use industry standard terminology
- apply work health and safety policies and procedures in the planning and implementation of wildfire hazard reduction strategies
- apply biosecurity measures to wildfire hazard reduction planning
- incorporate appropriate sustainability practices in wildfire hazard reduction planning

Knowledge Evidence

The candidate must demonstrate knowledge of:

- wildfire prevention strategies
- contact details for local fire agencies in the case of an emergency
- local authorities, agencies and other land users
- hazards associated with wildfire prevention strategies
- fire behaviour in a rural/bush environment in known climatic conditions of the specified area
- range of equipment applicable to wildfire hazard reduction
- approved, safe use of equipment
- environmental, public health and safety issues
- types of chemical and biological hazards and how they should be handled
- the local fire history, fuel loads, climate, location, accessibility
- geophysical systems and ecology of the area
- organisational procedures and priorities for wildfire hazard reduction programs
- work health and safety, local fire agencies and legislative requirements that apply to prescribed burns

**Assessment Conditions**

Assessment must take place in a simulated environment.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to plan and monitor plans for prescribed burning in areas associated with fuel management and for the conservation of ecological and cultural assets.

The unit includes the identification of advantages and risks in burning for fuel management, identification of ecological and cultural assets and values and the conducting, monitoring and evaluation of a prescribed burn.

This unit applies to individuals whose job roles include preparing and monitoring plans for prescribed burning for fuel management taking into consideration the ecological and cultural assets and values of the target area. Work is undertaken without supervision. They may also have responsibility for the work of others involved in the program.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan, monitor, evaluate and report prescribed burning according to organisational procedures and legislative requirements
- identify wildfire hazards and risks of wildfire impacts
- identify ecological and cultural assets that may be affected by burning and preparation for burning activities
- develop and meet objectives for prescribed burn strategies, tactics and outcomes
- minimise environmental impact
- minimise impact on cultural assets
- recognise and consult with stakeholders
- research and apply lessons of history of burns in the area or site
- apply work health and safety legislative requirements to prescribed burn plans

Knowledge Evidence

The candidate must demonstrate knowledge of:

- wildfire hazards and risk management strategies
- prescribed burning strategies
- basic wildfire behaviour
- legislation relevant to wildfire hazard reduction, cultural heritage and protection of flora and fauna
- effects of fire on vegetation, fauna and fuel accumulation
- effects of fire on areas and places of cultural significance
- resource requirements to conduct burning activities
• risks in burning for fuel management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- monitor and assess plant health
- administer nutrients to a hydroponic system as instructed
- assist in performing nutrient measurement tests
- read nutrient analysis information
- undertake hydroponic system maintenance and repairs
- monitor hydroponic maintenance programs

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for implementing a hydroponic maintenance program
- characteristics of healthy and unhealthy plants
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- equipment used in hydroponic systems
- plant growing media choices and their properties
- potential problems associated with a range of crops grown in a hydroponic environment
- properties of a nutrient solution
- recirculated and non-recirculated systems
- testing methods for a hydroponic nutrient solution
- testing methods for the gauging of environmental parameters
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- assess the level of work required to maintain the cultural place
- prepare for and carry out maintenance activities in accordance with organisational, cultural and environmental requirements
- report deterioration or damage to place to supervisor
- report incidents of breaches of legislation including vandalism
- apply work health and safety practices in the context of own work

Knowledge Evidence
The candidate must demonstrate knowledge of:
- potential threats to area
- techniques of site maintenance and protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents

Assessment Conditions
Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to observe, record and report on the presence of plants or animals against criteria provided by a supervisor or as required under legislation or regulations.

All work is performed according to Community guidelines and cultural protocols.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. This includes undertaking defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and accurately identify species of animals or plants in a natural area
- record and report observations in required format
- carry out a survey of plants and animals in a natural area in a manner that minimises disruption or degradation to the environment
- apply work health and safety practices in the context of own work
- use maps or GPS to accurately plot or describe locations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria used to group species
- common, Indigenous and scientific names of plants or animals
- biological species occurring in the study area
- undesirable plants (weeds) and animals
- the basic requirements for ensuring the welfare of animals included in the observation activity described in the relevant Codes of Practice, if animals are being observed

Assessment Conditions

Assessment must comply with community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for assessment.

Application

This unit of competency describes the skills and knowledge required to develop awareness of, and apply the protocols of Aboriginal culture, including the need to identify the appropriate persons when approaching a Community and the cultural and social protocols associated with that task.

This unit applies to following cultural protocols and details the specific cultural, gender and kinship sensitivities of working in Aboriginal Communities and on Country with diverse cultural requirements.

The unit applies to individuals working with lore/law men and women either autonomously or under the supervision and cultural authority of Traditional Owners or Elders for specific Country. They work under broad direction and use discretion and judgement in the selection and use of available resources.

This unit is also applicable to the work of repatriation workers and anthropologists. However, cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and consult with appropriate cultural authorities for a Community, place or site
- identify cultural information, material and cultural expression that is appropriate to be shared
- identify groups to be consulted in relation to owners or custodians of cultural and Community knowledge, information and/or material
- follow cultural protocols for consultation, research and recording information about particular Communities
- show respect and cultural sensitivity towards Aboriginal people, their beliefs, customs, values, lore/law, ceremonies and history

Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural diversity within Aboriginal Communities
- the cultural rights and responsibilities when using Community knowledge, information and material
- Aboriginal cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- customs, history, protocols of the Community with which they are working
Assessment Conditions

Assessment of this unit must be conducted by recognised and appropriate Community Elders and/or Custodians with appropriate assessor qualifications or co-assessed by a qualified assessor in cooperation and discussion with an appropriate with Community Elders and/or Custodians.

Assessors must satisfy the current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to use traditional Aboriginal controlled burning practices on Country to manage natural and cultural resources.

This unit applies to Aboriginal sites workers and Land Managers who carry out burns on Country as part of their job role. They work under broad direction and use discretion and judgement in the selection and use of available resources.

The unit involves and requires a high level of awareness and experience with Aboriginal culture and communities and the need to observe Aboriginal cultural protocols. It is expected that this work will be undertaken as part of a team working under supervision in most cases.

Cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Indigenous Land Management (ILM)

| 1. Plan burn activities | 1.1 Develop working relationships that will assist in the planning and implementation of traditional Aboriginal cultural burning on Country with stakeholders  
1.2 Identify and consult appropriate cultural authorities and obtain approval to be on Country  
1.3 Obtain cultural knowledge through the appropriate knowledge holder or Cultural Manager  
1.4 Identify ceremonial requirements for fire practices necessary for inclusion in burn plan  
1.5 Develop a burning plan and schedule for the target area based on traditional cultural knowledge of seasonal conditions, historical information on burns, Aboriginal ceremonial requirements, legislative requirements, environmental sustainability, biosecurity and work health and safety considerations and safety concerns  
1.6 Advise local fire services and agencies of proposed burn plan |
| 2. Protect life, property and conserve fauna and flora species in burn area | 2.1 Implement burn according to Aboriginal cultural burning techniques and consistent with the burn plan and schedule  
2.2 Exclude visitors from target areas, entertainment areas and areas possibly affected by smoke or risk from escaping fire  
2.3 Advise neighbours and agencies of the intention to burn to ensure safety and maintain client relations  
2.4 Protect Aboriginal sites, assets and entertainment areas according to Aboriginal cultural protocols and fire industry practices  
2.5 Apply fire breaks to the area to maintain control of the fire and burn intensity  
2.6 Remove animals in danger in the burn area before starting the controlled cultural burn, where possible  
2.7 Assess flora for impact on fire-sensitive communities and species |
| 3. Burn defined areas | 3.1 Maintain radio communication with other workers in the area throughout the burn  
3.2 Use appropriate personal protective equipment and follow work health and safety policies and procedures during the burn  
3.3 Assess weather forecasts and current weather conditions to determine appropriate conditions and timing for burn  
3.4 Use appropriate ignition techniques, patterns, fire control and safety procedures to conduct the burn |
Element | Performance criteria
--- | ---
3.5 | Apply fire to targeted areas according to Aboriginal cultural burning techniques, traditional frequency and organisation requirements
3.6 | Identify targeted areas defined by burn specification or limiting factors
3.7 | Check area to ensure all sections have received required burn in accordance with the burning plan
3.8 | Complete and record assessment of burn
3.9 | Complete and record assessment of burn
3.10 | Monitor burning area to avoid wildfire outbreaks
3.10 | Assess seasonal conditions and life cycles of flora and fauna for the end of fire practices

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

**Unit Mapping Information**

This unit is equivalent to AHCILM307A Implement Aboriginal cultural burning practices.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or for a site
- develop working relationships with Aboriginal and non-Aboriginal stakeholders
- apply traditional Aboriginal cultural burning techniques
- follow burn plans and control burning operations according to enterprise procedures to:
  - protect Aboriginal sites, assets and entertainment areas to Community protocols and requirements
  - protect life, property and conserve fauna and flora species during burning
  - achieve the correct intensity of burn
  - maintain biosecurity
  - meet environmental sustainability requirements
  - adhere to organisational safety and environmental protection policies and procedures
  - select existing, and construct additional fire breaks according to enterprise requirements to maintain control of fire
  - ignite fires according to burn plan and enterprise procedures
  - use radio communication according to enterprise procedures
  - apply appropriate animal welfare practices when handling and moving animals in preparation for the burn
  - follow work health and safety policies and procedures throughout the burn process to protect self and others
Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural Authorities within the Community
- traditional Aboriginal rationale and techniques for cultural burning
- the life cycles of flora and fauna of forests/plantations and effect of burning operations
- required intensity and appropriate frequency of fire
- sequence, location and pattern of recent and historical fire burns
- Aboriginal ceremonial requirements for fire practices
- seasonal cycle of weather patterns
- work health and safety policies and procedures
- emergency procedures
- ignition techniques and patterns
- fire control techniques
- emergency fire services
- organisational and enterprise policies and procedures for conservation of places of cultural significance
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to own prescribed burns
- sustainable environmental practices
- safety procedures for conducting fire operations
- enterprise work health and safety policies and procedures for carrying out controlled burning
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the role of traditional customs in Indigenous Communities
- outline impact of native title rights and interests recognised under non-indigenous law
- propose appropriate applications of traditional customs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural customs and heritage for the Community
- sources for legal advice on native title rights and interests
- outline of process required to apply for native title rights
- traditional customs for decision making
- gender roles of Community for land management practices

The candidate must demonstrate a basic understanding of relevant state land and resources acts/legislation.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop working relationships with stakeholders in cultural sites
- canvass views in a culturally sensitive way to determine the heritage value and preservation issues of a cultural site
- observe cultural protocols in dealing with stakeholders and land managers
- develop action and emergency plans to mitigate and manage the risk of damaging incidents or loss of heritage value
- document the submissions to implement conservation and restoration activities and support the incident management activities
- supervise staff in performing restoration and conservation activities
- include work health and safety procedures in operational plans and training to manage incidents
- ensure plans include environmentally sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise policies and procedures for conservation of places of cultural significance
- operational activities engaged for conservation, restoration and risk management
- Indigenous protocols, consultation processes and networks
- budgetary and financial approval processes
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- survey an area for landforms and sites that may hold cultural significance
- assess any physical signs, and source local information on human activity in the area, to indicate culturally significant sites
- ensure cultural protocols are followed
- maintain field notes on the location and details of sites in accordance with enterprise procedures or guidelines
- implement protection measures pending further investigation
- develop and document an assessment report for places of cultural significance according to enterprise and legislative standards
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of cultural places in land based, coastal zones and marine parks or reserves
- threats to cultural places from both natural causes and human activity
- application of State or Territory and Commonwealth legislation relevant to Indigenous land management
- enterprise procedures for reporting places of potential significance
- relevant protection measures for significant sites
- methods of locating position of site
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record and document Community history in accordance with Community protocols and permissions
- prepare for interviews by identifying topics, people to be interviewed, questions and interview processes and checking equipment
- identify appropriate individuals or groups for interviews and obtain necessary permissions
- use communication skills and language appropriate to the interviewee
- set up all recording equipment according to enterprise procedures and needs of interview processes
- conduct either individual or group interviews to elicit a wide range of information
- take detailed notes of conversations for further reference and to help source supporting information
- transcribe and edit information, using supporting documentation where possible
- store recorded media and transcripts to maintain recording quality and accuracy and security and privacy requirements according to enterprise procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- background and context of subject areas covered in the interviews/sessions
- objectives of the natural and/or cultural resource research
- range of communication approaches
- relevant cultural protocols
- enterprise procedures relating to the recording, management and storage of oral and community information
• recording techniques and media
• set-up and use of microphones and video cameras
• use of still cameras
• Community protocols, customs and Cultural Authorities for recording cultural knowledge and history

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current Standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- outline effects of current work related issues for Indigenous Communities and individuals
- determine the impacts of competing factors on self-esteem and identity
- design work practices to accommodate cultural identity
- incorporate elements to boost self-esteem of Indigenous workers
- respond to workplace issues where work practices are poorly aligned to cultural identity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Indigenous Communities with whom the organisation works, and their protocols
- cultural customs and heritage
- connections between self-esteem, identity, Community and work
- Indigenous history of particular Communities
- legislation and policies impacting on Indigenous Communities and organisations
- strategies to support development of workers’ self-esteem and identity

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use a range of electronic and manual recording systems to support research
- identify stakeholders including current tenure, Indigenous history and community interest
- review existing knowledge of national and cultural resources and sites using literature reviews, site inspections, consultation and expert advice
- develop research objectives and research design
- coordinate staff and resources for research project
- conduct field investigations to investigate impacts on fauna, flora and natural resources of the site
- facilitate a consultation and decision-making process
- report on the field investigation to enterprise and legislative requirements
- apply work health and safety practices in field investigations
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of conservation legislation, charters, Codes of Practice relating to natural and cultural resource areas
- systems and processes for assessing significance
- ecology and biological diversity of the area under assessment, including aspects of living organisms, habitats and communities, and interactions between species
- geological diversity including aspects of stratigraphy, palaeontology, paedology, and soil classification of the area under assessment
Assessment Requirements for AHC1LM501 Conduct field research into natural and cultural resources

- microbiology including entomology for the area under assessment
- accepted scientific processes, including conservation processes and charters
- major impacts on natural resources, such as geological settings, ecological processes, and interaction between natural and cultural processes
- monitoring requirements including fabric deterioration, damage and likely causes of deterioration and damage
- relevant legislation and agreements that apply to area, including a good understanding of the concepts and potential operation of the Burra Charter
- legislation under which enterprise operates and research is commissioned

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to develop conservation strategies for cultural resources.

This unit applies to those who develop conservation strategies and management policies for cultural resources as part of the overall park management and planning process. These individuals take responsibility for their own work and who provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- review the cultural resources in the area and level of deterioration
- assess the compatibility of current utilisation with cultural and heritage values
- investigate feasible land uses that maintain the cultural integrity of the site
- carry out a risk assessment for damage/deterioration to cultural sites
- consult with stakeholders according to cultural protocols
- develop strategies for management of cultural resources that take into account cultural and environmental requirements
- apply cultural protocols to investigation and development of policies
- apply enterprise policies and procedures to undertake assessment of resources, consultation with stakeholders and development of new policies
- apply appropriate sustainability practices to management strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the range of conservation strategies for cultural areas
- policies from all levels of government and within the specific region, including those under catchment plans that apply to land management practices
- the application and interpretation of Australian Natural Heritage Charter and the Burra Charter and the interpretation of the charters as they apply to use of cultural resources
- enterprise policies and procedures for carrying out investigations, consultations and development of policies
- design and implementation of consultation processes
- policy analysis and impact statements
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- incorporate the prior assessment of significance into an operational plan
- research traditional building techniques to carry out repairs and maintenance
- seek expert advice to meet special building and conservation requirements from the plan of management
- maintain the cultural and environmental integrity of the site and surrounds during and on completion of building
- supervise the work of others to ensure compliance with restoration plan and requirements
- apply work health and safety practices in the context of own work and the work of others
- apply environmentally sustainable practices in maintenance and restoration works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant concepts of the Burra Charter, heritage and building acts, and other relevant legislation
- conservation architecture techniques applicable to the restoration of cultural places
- interpretation of archaeological reports or assessments of Aboriginal cultural sites and artefacts
- traditional and current building practices
- project management processes
- building or maintenance requirements and specifications
- work health and safety requirements and risk management practices
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate a Community’s culture
- identify the roles of Cultural Authorities, Elders, Custodians and other members of the Community
- follow Community protocols for consultation, promotion and use of information
- research the background and goals of Community, and their perspectives on natural resource management issues
- promote Community programs, plans and history according to permissions given by Cultural Authority, Elders or Custodians
- plan for consultation within the Community by working with their culture and goals and applying Community protocols

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Community structure or hierarchy
- research methods for investigating Community history
- current social and environment affairs for Community and wider region

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- propose a negotiated outcome for a given area of Country according to Community guidelines
- identify implications for an area of Country for government, agency and Community perspectives and issues
- gather and analyse information on a given area to develop an analytical framework for land use
- formulate and communicate proposals for given area of Country according to Community and government requirements
- document and seek endorsement for a proposal that seeks to negotiate an outcome for a given area of Country
- prepare documentation to Community, government and organisational requirements
- follow Community customs, protocols, heritage, Country and culture relevant to proposal

Knowledge Evidence

The candidate must demonstrate knowledge of:

- consultation approaches
- cultural customs and heritage of Country
- application of State land and resources acts and legislation relevant to Country
- relevant international and national conventions and agreements
- management and use of the resources of the specific area
- processes and proposals for resolving issues regarding access and use of land according to consultation outcomes and organisational procedures
Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define and apply cultural processes within an Indigenous organisation according to Community and organisational guidelines and best practice procedures
- recognise differences between Indigenous and non-Indigenous management processes
- identify the accommodation required to meet non-Indigenous business requirements through Indigenous management processes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- contemporary management practices and styles
- Indigenous management practices and styles
- business planning and strategic planning practices
- Candidates must demonstrate an in depth knowledge of legislation and regulations that apply to management of an organisation.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.
Assessment Requirements for AHCILM601 Manage cultural processes in an Indigenous organisation

Application

This unit of competency describes the skills and knowledge required to install and maintain basic electric fences.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have carried out basic electric fencing operations, including:

- identified health and safety hazards and risks and reported to supervisor
- interpreted work plans and confirmed with supervisor
- selected electric fencing tools and equipment and carried out pre-operational checks and replaced or repaired identified faulty equipment
- selected, checked and correctly fitted personal protection equipment (PPE)
- calculated and measured electric fencing wire requirements
- identified and recovered useful electric fencing materials
- erected and repaired electric fencing according to instructions
- minimised environmental impact
- cleaned and tidied up work area, stored tools and equipment and disposed of waste according to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- uses and structures of electric fence types
- uses and types of standard fencing tools, materials and their maintenance and storage
- common electric fencing hazards and safety
- portable and mains power electric fences
assessment requirements for AHC INF201 Carry out basic electric fencing operations

- installation, construction and repair techniques for electric fences
- estimating and calculating electric fencing requirements
- relevant work health and safety and environmental code of practice for electric fencing
- health and safety in the workplace, including:
  - PPE required for working on electric fences
  - environmental considerations when disposing of waste materials.

assessments conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an outdoor environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - electric fencing materials, tools and equipment
  - PPE
- specifications:
  - workplace documents, including procedures, processes, instructions and job specifications
  - manufacturers' operating instructions for fencing equipment
  - legislation/codes of practice for fencing
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have installed and maintained farm fencing, including:

- identified health and safety hazards and risks and reported to supervisor
- selected, checked and correctly fitted personal protective equipment (PPE)
- selected materials, tools and equipment and arranged for availability on site
- conducted pre-operational checks and repaired or replaced tools and equipment identified with faults
- assessed and confirmed farm fencing requirements and confirmed with supervisor
- dismantled and recovered usable materials from existing fence
- installed and repaired fence posts and stays, erected fences, installed and tensioned fencing wire and netting, installed and checked gates and components
- recorded work activities according to work instructions
- cleaned up the fencing site and removed and disposed of, or recycled, waste according to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- designs and purpose of a range of conventional fencing
- wire types, knots, tensions applications and limitations
- common hazards involved in fencing installation, maintenance and repair
Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing. Date this document was generated: 18 March 2019

- tools and equipment used for fencing and their safe operation, storage and maintenance
- fencing materials manufacturers specifications and guidelines
- health and safety in the workplace, including:
  - PPE required for working on farm fences
- environmental considerations when disposing of waste materials.

Assessment Conditions
Assessment of skills must take place under the following conditions:

- physical conditions:
  - skills must be demonstrated in an outdoor environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
  - fences, fencing tools, materials and equipment
  - PPE
- specifications:
  - workplace documents including procedures, instructions and wire specifications
  - manufacturers’ operating instructions for fencing equipment
  - legislation/codes of practice for fencing
- relationships:
  - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be observed and repairing properties and structures, in a situation that does not require the specialist skills of another trade.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- interpret and apply task instructions
- communicate with work team and supervisor
- select, prepare and safely use of a broad range of tools
- carry out routine maintenance to infrastructure, structures and facilities
- store or dispose of unused or waste materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics, capabilities and limitations of materials, equipment and tools
- operation of water taps and reticulation systems
- types of building cladding and finishes, purpose and use
- identification of defects and appropriate repair methods
- appropriate selection of repair materials
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice and procedures with regard to protection of the environment
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- identify and report hazards and use safe work practices
- confirm work plan and priorities with enterprise supervisor or manager
- assess the nature of required repairs and maintenance
- read and interpret maps, plans, site drawings and simple technical drawings
- carry out building or construction work efficiently and safely
- confirm that the completed or repaired structure meets the standard specified
- operate a broad range of tools and equipment
- complete minor earthworks to specifications
- minimise environmental impacts and dispose of waste appropriately
- estimate and calculate volumes, usage and measurements
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- machinery and equipment required to carry out property improvements, construction and repairs
- types of building materials required to carry out property improvements, construction and repairs
- concreting procedures and techniques
- wood and steel fabrication procedures
- drainage requirements around structures, tracks and roads
- legislative requirements with regard to construction and structural improvements
Assessment Requirements for AHCINF301 Implement property improvement, construction and repair Date this document was generated: 18 March 2019

- types of building cladding and finishes, purpose and use
- relevant Codes of Practice with regard to protection of the environment
- work health and safety and environmental legislative and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to plan, construct and maintain an electric fence.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer’s specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop an electric fencing plan for the enterprise
- identify hazards and implement safe operating procedures
- calculate and measure fencing requirements and calculate costings off the fencing plan
- read and interpret plans and site maps and mark out fence lines
- construct an electric fence that meets specifications and the needs of the enterprise
- operate fencing tools and construction equipment
- test and monitor the electric fence for earthing and current flow, resistance and leakage
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic operation of electric fences including earthing and current flow, resistance and leakage
- differences between portable and mains power
- issues affecting electric fencing in relation to the whole property plan
- range of electric fencing designs, construction methods and materials
- dangers posed by electricity to personnel and livestock
- conditions under which electric fences may cause fire
- safe methods for diagnosing routine faults
- common electric fencing hazards and safety precautions
- relevant State/Territory legislation and regulations regarding electric fences
- work health and safety legislative requirements
• relevant codes of practice with regard to protection of the environment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- site the fence line according to property or land management plan
- estimate, cost and source fencing materials and arrange delivery
- identify hazards and implement safe work practices
- carry out fencing operations safely and efficiently
- construct a fence that meets specifications in plan or contract and is within tolerances for materials
- construct gate assemblies and swing gates
- string and strain wires to manufacturer’s recommended tension
- use and maintain fencing machinery and equipment
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues affecting property fence planning and construction
- procedures for planning fencing in relation to the whole property plan
- range of fencing designs, construction methods and materials
- types of fencing construction tools and equipment
- fencing materials and costings
- common fencing hazards and safety precautions
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice with regard to the protection of the environment
- hazard identification, assessment and control

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe systems of work
- read labels and signage to differentiate between extra low voltage and other electrical systems
- read and follow manufacturers manuals and enterprise procedures for extra low voltage wiring
- size cables and wires to suit calculated load
- install wiring systems
- check and notify completed installation activities
- follow enterprise work health and safety procedures and safely work with extra low voltage systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic electricity and electrical principles relating to extra low voltage wiring
- applications, materials and techniques relevant to the industry sector
- isolation and tagging procedures
- computerised controller systems
- enterprise policies and procedures
- testing equipment and procedures
- relevant legislation and guidelines for installing extra low voltage wiring.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assemble and join irrigation system components
- carry out basic maintenance tasks
- carry out low volume irrigation operating tasks
- complete installation work
- fix identified faults
- follow directions to operate pumps, filters and valves
- install irrigation components
- look for leaks and faulty emitters
- prepare materials, tools and equipment
- recognise and report faults
- undertake site preparation tasks as directed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practice of low volume irrigation operation
- characteristics and operation of joints, valves and emitter components
- components in low volume irrigation systems
- emitter spacing, coverage and pressure
- indicators of over and under watering
- installation techniques and procedures
- irrigation controllers
- irrigation pipes, types and sizes
Assessment Requirements for AHCIRG215 Assist with low volume irrigation operations

- irrigation times to deliver sufficient volume without over watering
- methods and techniques of low volume irrigation installation
- operation of low volume irrigation system
- set out procedures
- system malfunctions and their likely causes
- use of recycled water and colour coding of pipes
- water requirements of relevant plants

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out surface irrigation operating tasks as directed
- check siphons for even water flow
- look for uneven water distribution or drainage
- monitor required head and water levels in head ditch
- open and close check valves
- record and report maintenance activities and faults
- start and pull siphons
- use mechanical equipment to build and repair banks and for weed removal

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of surface irrigation
- channels, furrows, borders, fittings and outlets
- damage and problems that occur with gravity-fed irrigation systems
- environmental impacts of irrigation using water from any ground or underground source
- identification, characteristics and operation of surface irrigation structures and components
- signs of stress in plants as well as the signs of over and under-watering
- system cleaning procedures
- system malfunctions and their likely causes
- purpose and principles of surface irrigation
- weed types encountered in gravity fed irrigation systems and their control
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency covers the skills and knowledge required to assist installing, operating and maintaining pressurised irrigation systems. These systems use sprinklers and generally use glued PVC pipe.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assemble and join irrigation system components
- carry out basic maintenance tasks
- carry out irrigation operating tasks
- complete installation work
- fix identified faults
- follow directions to operate pumps, filters and valves
- look for leaks and faulty sprinklers
- prepare materials, tools and equipment
- recognise and report faults
- undertake site preparation tasks as directed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of pressurised irrigation systems
- characteristics and operation of replaceable components of sprinkler irrigation systems
- environmental impacts of irrigation from ground or underground source
- installation techniques and procedures
- irrigation controllers
- irrigation pipes, types and sizes
- irrigation times to deliver sufficient volume without over watering
- operation of pressurised irrigation system
- set out procedures
• signs of stress in plants as well as the signs of over and under watering
• sprinkler irrigation components and their function
• sprinkler spacing, coverage and pressure
• system malfunctions and their likely causes
• types of sprinklers

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret plans, charts and instructions
- perform work-related calculations
- organise equipment and materials for installation work
- use power tools and hand tools
- handle materials safely
- identify and respond to predictable operational problems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of pump and control flow devices
- basic principles of hydraulics and the operation of flows
- capacity and limitations of equipment used on the site
- flow measurement principles and procedures
- function of control systems
- layout and performance of pipes and fittings
- lock-out procedures for mechanical and electrical installations
- types of flow control devices and their purpose
- types of pumps and their function and use

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and prepare data records for both print-based and computer-based data
- apply measuring and testing techniques
- calculate pressure differentials, flow rates, crop yields, estimated water usage and actual water usage
- identify adverse environmental impacts of irrigation activities and take appropriate remedial action
- use computers to record and report data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental impacts of irrigation, using water from any ground or underground source
- measuring and monitoring procedures for factors contributing to irrigation system delivery
- soil water retention testing techniques
- water authority standards and procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- adjust watering practices to meet plant needs
- apply the results of soil testing to assessing soil properties
- assess the erosion potential of an irrigated soil
- assess the health of an irrigated soil
- calculate moisture holding capacity of plants, including RAW
- conduct soil structure and texture assessment
- use soil moisture monitoring equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- adverse environmental impacts of irrigated plant production
- calculations for readily available water
- critical measures for moisture availability
- effect of dispersible soils under irrigation
- field capacity
- interpreting salinity, sodicity and pH tests
- signs moisture stress & nutrient deficiency in plants
- soil biology
- soil moisture definitions and calculations
- soil moisture monitoring procedures
- soil structure and texture
- types of erosion
- wilting point
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:
- follow plans, charts and instructions
- handle materials safely
- identify and respond to operational problems
- match pump output and flow rate to pipe diameter
- monitor the performance of valves
- open and close valves
- organise equipment and materials for installation work
- perform work-related calculations
- position pumps and valves
- prime and operate pumps
- set out and prepare the site
- use power tools and hand tools
- weld in both poly and steel

Knowledge Evidence

The candidate must explain:
- advantages and disadvantages of each pump type
- automatic pump switches including timers, pressure switches, irrigation controllers and flow switches
- basic principles of hydraulics (flow vs. pressure), energy loss due to friction
- characteristics and application of different valves, pipes and fittings including fixing and joining techniques and methods
- discharge and flow rates
Assessment Requirements for AHCIRG309 Install irrigation pumps

- impellers, rotors, stators
- installation procedures for irrigation pumps
- properties of water including pressure and flow rates
- pump components and their principles of operation
- pump gauges and controls
- pump performance and pressure testing
- servicing requirements for pumps
- types of pumps and their application in irrigation, such as centrifugal, vertical turbine, submersible and propeller
- types of valves
- types suitable as booster and floating pumps

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- adjust pump settings
- check and clear or replace filters
- check and top-up fluids, including coolants, lubricants and hydraulic oils
- check oil quality and levels
- clear blockages
- inspect and clean pumps
- lubricate pumps
- monitor pressures and flows
- prime a pump
- replace belts
- replace worn components, including pump seals, liners and impellers
- set valves and check for wear and leakages
- tension fasteners and y-belts
- use amperage testing equipment

Knowledge Evidence

The candidate must explain:

- advantages and disadvantages of each pump type
- automatic pump switches including timers, pressure switches, irrigation controllers and flow switches
- basic principles of hydraulics (flow vs. pressure)
- discharge and flow rates
- impellers, rotors and stators
• properties of water including pressure and flow rates
• pump components and their principles of operation
• pump performance and fault finding
• pumps and their application in irrigation, such as centrifugal, vertical turbine, submersible and propeller
• pumps that are suitable as booster and floating pumps
• reading pump gauges and controls
• service requirements of pumps
• valves and their uses
• workplace and equipment safety requirements

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- interpret scale and specifications from plans and drawings
- interpret symbols and abbreviations used on plans
- mark out boundaries and infrastructure position from a plan
- recognise and mark out features on a site from a plan
- translate documented requirements into on-site activities and site and structural features from two-dimensional to three-dimensional formats
- use basic industry calculations

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices of plan and drawing interpretation
- commonly used scales, symbols and abbreviations
- drawings and specifications relevant to the irrigation industry
- measurements, calculations and quantities
- tools, equipment and materials required from the drawings and specifications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- check accuracy of and calibrate equipment
- maintain and check irrigation equipment for accuracy
- operate irrigation controllers and sensors
- operate pressure testing equipment
- operate soil moisture testing equipment
- operate technology to measure and monitor the irrigation system or the growing environment
- operate water metering equipment
- operate water testing equipment
- record observations and data
- record the results of testing
- take representative samples for measurement
- take samples for testing

Knowledge Evidence

The candidate must demonstrate knowledge of:

- data recording procedures
- environmental procedures for use, storage and recycling of electronic equipment and batteries
- equipment maintenance and operation
- irrigation controllers and sensors
- measurement procedures
- operational procedures
- pressure testing equipment
- safe work practices including working with low voltage wiring
- sampling techniques
- soil moisture testing equipment
- water metering equipment
- water testing equipment

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- complete relevant calculations such as dilution rates
- handle hazardous chemicals safely
- identify injection requirements
- implement routine maintenance and minor repairs of the system
- implement routine system cleaning requirements
- monitor usage and dilution rates
- report and record corrective action
- select and prepare injection materials
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- take corrective action in response to out-of-specification results or non-compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- backflow prevention
- basic operating principles and process control systems where relevant
- chemicals, cleaning agents and fertilisers used for injection and their purpose
- cleaning procedures
- cleaning requirements of system
- common causes of variation and corrective action required
- control points and significance and methods of monitoring
- correct chemical handling techniques
- environmental issues and controls
- label Material Data Safety (MDS) information for substances to be injected
- lock-out and tag-out procedures
- maintenance requirements of system
- procedures for prevention of backflow
- process specifications, procedures and operating parameters
- purpose and operation of equipment and instrumentation components
- recording requirements and procedures
- services required
- shutdown sequence

### Element | Performance criteria
--- | ---
1. | 1.5 Interpret moisture requirement throughout the growing season  
1.6 Read the predicted seasonal moisture deficit and watering requirements and check with management  
1.7 Record parameters for the irrigation system

2. | 2.1 Subdivide the irrigated area into the smallest units capable of individual irrigation and note area and irrigation equipment characteristics for each  
2.2 Define each unit for its soil irrigation capability  
2.3 Define the crop and plant water requirement for each unit  
2.4 Combine units requiring similar irrigation to form a shift that does not exceed the water delivery capacity of the property irrigation infrastructure  
2.5 Determine the water volume required to meet irrigation needs over specified period

3. | 3.1 Coordinate resources and brief personnel to deliver requirements  
3.2 Implement watering program

4. | 4.1 Inspect plants and crops for growth rate and signs of stress  
4.2 Record frequency of irrigation  
4.3 Measure and record water usage and confirm water allocation is not exceeded for a given period  
4.4 Calculate the differences between estimated water use and actual water used  
4.5 Measure water quality  
4.6 Assess plant and crop growth and water use efficiency  
4.7 Measure soil for readily available water  
4.8 Record climate and weather conditions  
4.9 Adjust watering program in response to rainfall events and changes to evapotranspiration rates

5. | 5.1 Record plant or crop environment data  
5.2 Record water usage  
5.3 Record irrigation shifts  
5.4 Record system process data

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and interpret the information in an irrigation schedule
- apply sampling techniques
- compare plant health and growth to benchmark requirements
- conduct soil moisture tests
- consult with appropriate senior personnel or consultants
- identify irrigation requirements throughout the growing season by monitoring:
  - climatic conditions
  - crop stage and requirements if applicable
  - effective root depth
  - frost risk
  - plant varietal characteristics and requirements
  - signs of plant nutrient deficiencies
  - soil moisture levels
  - soil type and depth
  - symptoms of water stress
  - water quality
  - water table level
  - identify, rectify and report environmental non-compliance
  - instruct irrigation system operators
  - implement the irrigation schedule including consideration of:
    - application rates
    - interaction between different irrigation employees or shifts
    - maintenance programs and supplies
• materials, chemicals, services
• resources, including operators with appropriate skills
• timing and length
• liaise with other work areas
• monitor irrigation activities including:
  • environmental impact of irrigation activities
  • identifying emitter output consistency
  • identifying soil moisture content and depth to which water will reach
• report and record problems and corrective action taken
• take corrective action in response to out-of-specification results or non-compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:
• consultation requirements and procedures
• effect of irrigation techniques on plant growth
• environmental impacts, hazards and controls for irrigation
• interpretation of routine soil moisture tests
• irrigation strategies
• principles of soil moisture monitoring including volumetric soil moisture content, percentage compared to soil moisture tension
• procedures and responsibility for reporting problems
• recording requirements and procedures
• resource requirements and availability
• sampling techniques and procedures
• testing techniques and procedures
• visual symptoms of plant nutrient deficiencies, water stress and frost
• water budgeting tools
• workplace hazards and controls

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calibrate testing and monitoring equipment
- commission irrigation system
- complete installation work
- organise resources for installation work
- set out and prepare the site.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the behaviour of water on varying terrain and soil types
- calculations for installing irrigation systems
- characteristics and operation of joints, valves and sprinkler components
- components of an irrigation system
- methods and techniques of installing irrigation
- operation of pumps and water flow rates
- soil characteristics
- soil water retention testing techniques
- water quality and water filtration techniques.
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess soil moisture levels
- carry out measurements for output and distribution
- measure and interpret flow rates and pressures
- monitor system effectiveness including:
  - application rates
  - depth of irrigation
  - emitter output
  - irrigation times
  - pressure variations and blockages
  - salinity levels and water quality
  - perform shut down procedures
  - read and follow operations manual and procedures
  - record data
  - start up the system and carrying out operational checks

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of pressurised irrigation system operation
- critical measures for moisture availability including:
  - evapotranspiration
  - field capacity
  - infiltration rates
• readily available water
• water holding capacity
• wilting point
• electrical hazards including:
  • contact with pumps, motors, other live components
  • short circuits
  • standing laterals to remove blockages
• water spray onto power lines
• energy efficiency indicators and benchmarks for low volume irrigation
• environmental impacts of irrigation using water from any ground or underground source
• general irrigation methods for low volume systems
• main components of low volume and sprinkler irrigation systems
• principles of irrigation and the water cycle
• pump types used in irrigation systems and their operation
• shutdown sequence and flushing procedures
• soil characteristics
• soil, plant and water relationships
• water requirements of plants and crops consistent with sound environmental management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check connections and controllers
- check sprinkler/emitter output and function
- confirm operational pressures
- ensure proper operation of automatic flush valves
- interpret and apply maintenance procedures
- remove, service and replace valves and filters
- test irrigation equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system maintenance
- characteristics and operation of pipes, joints, valves, emitters
- common operational and maintenance problems
- components of an irrigation system
- operation of pumps and water flow rates
- sprinkler/low volume irrigation system components

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- adjust and monitor check valves
- build and maintain irrigation structures, channels and beds
- carry out running repairs on irrigation delivery and drainage systems
- carry out shut down procedures, clean equipment and dispose of waste
- check pressure at the head works and control valves
- check the serviceability of siphons
- identify variations in water flow and distribution
- inspect irrigation systems
- install pumps and pipelines
- measure water usage
- perform system commissioning tasks
- prepare irrigation beds
- remove and replace gates, slides and doors
- remove and replace valves and filters
- start and move siphons and spiles and check flow
- start up the system
- undertake minor repairs of equipment
- use roto-buck for bed preparation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of surface irrigation
Assessment Requirements for AHCIRG334 Operate and maintain gravity fed irrigation systems

- behaviour of water on varying terrain and soil types
- calculations for installing surface irrigation systems
- characteristics and operation of components
- components of a surface irrigation system
- environmental impacts of surface irrigation installation
- soil characteristics
- soil water retention testing techniques
- water quality and water filtration techniques
- common operational and maintenance problems
- common operational problems
- environmental impacts of irrigation maintenance
- maintenance requirements – routine and end of season
- surface irrigation system components
- weed control methods

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- change engine oil and filter
- check all bolts for correct torques
- check for malfunctioning sprinklers
- check injection pump and safety equipment operation
- complete regular and end of season maintenance tasks
- fit control panel and wheels
- grease drive shafts on pump and motor
- inspect lift base and arms for any stress marks or cracks
- measure and interpret flow rates and pressures
- monitor system effectiveness
- operate pressure and flow testing equipment
- read and follow operations manuals and irrigation schedules
- shut down, clean equipment and dispose of waste
- start-up system and carry out operational checks
- take and record measurements of output and efficiency
- tension span pipes with V-jack trusses
- use control systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of moving irrigation system installation, operation and maintenance
- behaviour of water on varying terrain and soil types
- calculations used when installing irrigation systems
- common operational and maintenance problems
- components of a moving sprinkler irrigation system and their maintenance requirements
- installing a moving sprinkler irrigation
- irrigation methods for moving sprinkler systems
- maintenance requirements for moving sprinkler systems
- monitoring soil compaction and drainage
- moving sprinkler irrigation maintenance
- pump used in moving sprinkler irrigation systems and their operation
- shutdown sequence
- soil water retention testing techniques
- soil, plant and water relationships
- water quality and water filtration techniques
- water requirements of plants and crops consistent with sound environmental management

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:
- apply hydraulic principles to manual and computerised irrigation systems
- calculate pressures, flows, velocities and friction losses
- determine efficiency of the system with varying system components
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- read contour maps and interpret elevations and distances

Knowledge Evidence

The candidate must demonstrate knowledge of:
- calculate pressure loss due to irrigation components
- calculate pumping requirements
- hydraulic principles such as static and dynamic pressure, pressure loss, friction loss, flow rate and velocity, effect of gradient on flow rate, contact time and drainage
- irrigation system components
- types and pressure ratings for pipes, fittings and outlets

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply and comply with environmental requirements
- calculate stormwater control requirements
- explain and demonstrate the organisation’s environmental record systems and procedures
- identify adverse environmental impacts of irrigation activities and taking appropriate remedial action
- provide and explain information on the irrigation and drainage environmental plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental impacts of irrigation, using water from any ground or underground source
- environmental legislation, regulations and guidelines
- work health and safety procedures relating to investigation of irrigation-related hazards and implementation of an environmental protection program

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to determine the timing and amount of each irrigation to meet crop or plant needs and environmental requirements.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply a measured amount of water
- assess the efficacy of irrigation and repeat cycles of irrigation
- incorporate data from in-field equipment and remote monitoring sources into scheduling systems that compute irrigation requirement
- monitor crop and plant water use
- plan for extremes of weather
- record irrigation and scheduling parameters
- use and maintain in-field equipment that monitors the plant environment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- in-field irrigation reticulation performance and its capacity limits
- inter-relationship between plant, soil and the aerial environments in the determination of water budgets
- physical soil characteristics such as infiltration rate, water holding capacity and wetted volume in the root zone
- plant and crop response to moisture stress at different stages of growth
- possible adverse impacts on the crop and environment from inefficient scheduling or unpredictable weather effects
- recognition of moisture stress effects (sometimes desired) on plants
- relevant environmental policies and procedures
- water authority standards and procedures
- water quality monitoring methods and acceptable quality limits
• weather forecasting of extreme weather events such as heat waves, frosts and storms, and appropriate contingency tactics to minimise impacts

Assessment Conditions
Assessors must satisfy current standards for RTOs.

### AHCIRG410 Select and manage pumping systems for irrigation

**Element** | **Performance criteria**
--- | ---
system requirements from the irrigation design | 1.2 Determine the water source and height of pull for water into the system  
1.3 Determine the water output for irrigation  
1.4 Calculate the total friction loss of irrigation components

2. Select pump according to type, installation, range of flow rates, operating head and delivery distance | 2.1 Select the basic type of pump based on the pump task and placement and the power source  
2.2 Calculate the total operating head required  
2.3 Calculate the required discharge for the pump based on the irrigation output required and friction losses in the system  
2.4 Determine the speed and power requirements of the pump motor  
2.5 Determine the limiting suction lift of the pump  
2.6 Interpret pump performance curves when selecting an efficient irrigation pump  
2.7 Determine the size of the impeller from the pump curve

3. Supervise installation of pumps | 3.1 Ensure pump is sited as close as possible to water source and is level  
3.2 Verify pump is properly anchored and connections are airtight  
3.3 Confirm pump and motor connection are correctly aligned and motor is ventilated  
3.4 Verify filters and valves are correctly fitted and orientated  
3.5 Check pump is connected to the irrigation controller if required

4. Oversee commissioning and testing of pumping system | 4.1 Develop pre-start and start up procedures  
4.2 Check delivery performance and verify power usage and water output against requirements and pump specifications  
4.3 Ensure pumping system is checked for leakages and cavitation  
4.4 Determine that pumping system is operating effectively

5. Develop maintenance procedures for the pumping system | 5.1 Develop routine maintenance procedures to rectify the effects of normal wear  
5.2 Develop periodic inspection checklists to assist in maintenance scheduling  
5.3 Carry out pump overhaul or repairs  
5.4 Keep pump maintenance records, including details of the pump and all pumping system components for ordering

6. Carry out troubleshooting on pumping systems | 6.1 Investigate lack of discharge or pressure and change settings or components  
6.2 Investigate loss of water suction and make alterations to placement or fix leakages  
6.3 Investigate cavitation in pumps and change settings or components

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- identify irrigation system requirements from the irrigation design
- select pump according to type, installation, range of flow rates, operating head and delivery distance
- supervise installation of pumps
- develop maintenance procedures for the pumping system
- monitor the performance of pumps, valves and filters
- carry out troubleshooting on pumping systems
- calculate pumping requirements and pressure loss due to irrigation components
- identify adverse environmental impacts of irrigation pumping activities and take appropriate remedial action

Knowledge Evidence

The candidate must demonstrate knowledge of:

- advantages and disadvantages of each pump type
- application of mechanical, hydraulic and electrical principles
- automatic pump switches including:
  - flow switches
  - irrigation controllers
  - pressure switches
  - timers
  - cavitation - cause and effect
  - discharge and flow rates
- environmental procedures for installing and maintaining irrigation pumping systems
Assessment Requirements for AHCIRG410 Select and manage pumping systems for irrigation

March 2019

- installation factors including:
  - adequate space, head room, ventilation and lighting
  - correct alignment procedures of pump and motor shafts with direct coupled units
  - provision for adjustment and ease of dismantling
  - levelling and alignment processes
  - overhaul or repair operations
  - properties of water including pressure and flow rates
  - pump components and their principles of operation
  - pump efficiency, performance and pressure testing
  - pump positioning (driver alignment and suction length)
  - routine preventative maintenance
  - selection factors for pumps including:
    - source of water and lift
    - the required pumping flow rate and pressure
    - the total dynamic head
    - the total suction head
  - sources of information and the processes for the calculation of material requirements and flow rates
  - statutory and authority requirements related to the installation of commissioning of irrigation pumping systems
  - types of impellers and their use
  - types of pumps and application in irrigation including:
    - centrifugal
    - propeller
    - submersible
    - vertical turbine
  - types of pumps suitable as booster and floating pumps
  - types of valves
  - work health and safety legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read contour maps and interpret elevations and distances
- mark out procedures
- interpret technical drawings and site plans
- calculate pressures, flows, velocities and friction losses
- determine efficiency of the system with varying system components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation design interpretation
- erosion control and design principles
- how to interpret plans and general and technical specifications
- hydraulic calculations
- levels and levelling
- principles of native topsoil conservation and protection
- pumps and pumping system components
- relevant work health and safety and environmental requirements
- selection of water pumping and distribution components delivery based on specifications and requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and supervise procedures for starting up, carrying out operational checks and shutting down
- measure, interpret and adjust flow rates and pressures
- measure output and efficiency of an irrigation system
- monitor system effectiveness:
  - application rates
  - depth of irrigation
  - infiltration and runoff
  - irrigation times
  - pressure variations and blockages
  - salinity levels and water quality
  - soil moisture levels
  - sprinkler coverage and output
  - use records to review an irrigation system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- best practices for reducing environmental impacts of irrigation
- component specifications
- critical measures for moisture availability:
  - field capacity
  - readily available water
• wilting point
• energy efficiency indicators/ benchmarks for moving sprinkler irrigation:
  • Application Efficiency
  • Average Application Rate
  • Instantaneous Application Rate
• environmental hazards of runoff and compaction
• environmental impacts of irrigation using water from any ground or underground source
• general irrigation methods for moving sprinkler systems
• irrigation schedules
• main components of moving sprinkler irrigation systems
• monitoring soil compaction and drainage
• moving sprinkler irrigation technologies
• physical soil characteristics such as infiltration rate, water holding capacity and wetted volume in the root zone
• pump types used in moving sprinkler irrigation systems and their output and efficiency ratings
• pump types used in moving sprinkler irrigation systems and their operation
• servicing and maintenance of travelling mechanism
• soil moisture testing techniques
• soil, plant and water relationships
• water requirements of plants/crops consistent with sound environmental management

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse results for electrical conductivity and ionic composition of irrigation water
- apply principles of hydraulics to the selection of irrigation systems, legal access and structures
- calculate capital and operating expenditure for a water supply system
- calculate water losses in an irrigation system
- compare costs for different water sources
- estimate the irrigation requirements of plants
- take water samples

Knowledge Evidence

The candidate must demonstrate knowledge of:

- capital and operating expenditure calculations to source water
- climatic factors in irrigation development, rainfall, evaporation, evapotranspiration and hydrology
- conveyance and disposal of drained effluent
- cost benefit analysis
- efficiency of irrigation systems and long-term viability
- environmental and energy-use implications of resource utilisation and development
- irrigation drainage, seepage, surface and subsurface drainage systems
- irrigation scheduling, soil moisture measurement
- management planning and operation of water allocations
- operations and maintenance requirements
• plant physiology and plant water use, transpiration crop water requirements in terms of water quality and quantity
• plant water requirements in terms of water quality and frequency of supply
• re-use systems, management of irrigation systems
• salinity and ionic composition impacts on soil structure and plant growth
• selection of irrigation systems
• soils and water, soil moisture retention and movement, plant root zones and development, infiltration and leaching
• types of irrigation systems
• water legislation
• water supply potential for the development of irrigation systems

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency covers the skills and knowledge required to coordinate and supervise the construction and installation of a range of irrigation systems.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct work health and safety risk assessment
- develop operational procedures
- implement employment procedures
- interpret irrigation designs
- supervise installation tasks such as:
  - assembling sprinklers, pressure regulators and hose directors
  - checking operating specifications for pressures and flow rates
- completing installation work and testing components
- installing irrigation components
- installing power and pumping plant
- laying and joining sprinkler lateral pipelines
- laying and joining supply and distribution pipeline
- pressure testing the system
- setting out and preparing site
- setting up irrigation controllers
- undertaking start-up procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system installation supervision
- behaviour of water on varying terrain and soil types
- calculations for installing low volume irrigation systems
Assessment Requirements for AHCIRG431 Supervise irrigation system installation

- characteristics and operation of joints, valves and sprinkler components
- commissioning procedures
- design interpretation
- distribution uniformity
- employment procedures
- licensing requirements for electrical work
- operating specifications for pressures and flow rates
- project management principles
- pump capacity
- safe work practices for construction
- setting up fertigation equipment
- setting up irrigation controllers
- soil water retention testing techniques
- start-up procedures
- types of pumps and water flow rates
- volume and pressure requirements
- water quality and water filtration techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out visual checks for blockages or signs of wear in components
- check connections and controllers
- check sprinkler output and function
- confirm operational pressures
- develop enterprise procedures for maintenance
- ensure proper operation of automatic flush valves
- inspect irrigation systems
- maintain testing equipment
- pressure testing systems
- service irrigation equipment
- test emitter output and function
- test irrigation equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system maintenance supervision
- develop enterprise procedures for pre-season, irrigation and post-season maintenance
- drainage systems
- environmental impacts of irrigation maintenance
- equipment testing
- system components
- system inspection
• operating pressures and output
• operational and maintenance requirements
• pre and post-season maintenance covering
• pressure testing as per procedures
• pumping and distribution systems
• distribution uniformity
• visual checks for blockages or signs of wear in components
• work health and safety hazards and safe work procedures

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and prepare data records for both print-based and computer-based data
- apply measuring and testing techniques
- calculate pressure differentials, flow rates, crop yields, estimated water usage/actual water usage
- develop and supervise procedures for starting up, carrying out operational checks and shutting down
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- measure output and efficiency of an irrigation system
- measure, interpret and adjust flow rates and pressures
- monitor system effectiveness

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system management
- best practices for reducing environmental impacts of irrigation
- component specifications
- environmental impacts of irrigation using water from any ground or underground source
- irrigation schedules
- pump types used in irrigation systems and their output and efficiency ratings
- soil moisture testing techniques
- irrigation technologies
- using records to review an irrigation system
- water in soils and plants
- water requirements of plants/crops consistent with sound environmental management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop procedures and providing training to staff to:
- carry out running repairs on irrigation delivery and drainage systems
- carry out shut down procedures
- check pressure at the head works and control valves
- set up pipes, system equipment and outlets
- use siphons
- develop procedures for starting up, carrying out operational checks and shutting down
- identify and record variations in water flow and distribution
- identify adverse environmental impacts of irrigation activities and take appropriate remedial action
- implement and follow workplace health and safety and environmental requirements
- measure and recording water flow rates
- provide supervision and training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of surface irrigation management
- calculating irrigation efficiency using records to review an irrigation system
- critical measures for moisture availability:
- evapotranspiration
- field capacity
- infiltration rates
• readily available water
• water holding capacity
• wilting point
• environmental impacts of irrigation using water from any ground or underground source
• main components of surface irrigation systems
• physical soil characteristics such as infiltration rate, water holding capacity and wetted volume in the root zone
• pump types used in surface irrigation systems and their operating requirements
• pump types used in surface irrigation systems and their operation
• set up of headwater, tail water, channels and beds
• soil moisture testing techniques
• water in soils and plants
• water requirements of plants and crops consistent with sound environmental management

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse and organise data
- identify adverse environmental impacts of irrigation system activities and recommend appropriate remedial action
- recommend relevant work health and safety and environmental procedures
- solve performance problems and recommend solutions
- use computer software for irrigation auditing

Knowledge Evidence
The candidate must demonstrate knowledge of:

- environmental impacts of irrigation systems using water from any ground or underground source
- evaluation procedures
- irrigation system performance indicators
- relevant workplace health and safety legislation, codes of practice and enterprise requirements
- statistical data analysis procedures or software

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to design irrigation system maintenance and monitoring programs.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse and organising information
- design scheduling and recording procedures
- develop and include relevant work health and safety and environmental procedures
- identify adverse environmental impacts of irrigation, drainage and water treatment activities and taking appropriate remedial action
- identify and scheduling activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- drainage and water treatment using water from any ground or underground source
- environmental impacts of irrigation
- irrigation, drainage and water treatment maintenance activities
- maintenance and monitoring design requirements
- water quality guidelines for fresh and marine water including but not limited to ANZECC 1999
- water supply authority constraints
- work health and safety and environmental protection legislation, codes of practice and enterprise requirements for monitoring and maintenance programs

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- compile and analyse complex information
- develop and implement relevant work health and safety and environmental procedures
- develop plans and reports
- identify adverse environmental impacts of irrigation system activities and recommend appropriate remedial action
- interpret statistical data and measurements
- use a range of irrigation and information management software

Knowledge Evidence

The candidate must demonstrate knowledge of:

- computerised irrigation systems
- enterprise policies and procedures
- environmental impacts of irrigation systems using water from any ground or underground source
- irrigation system options
- measuring and monitoring procedures
- methods and techniques of irrigation
- readily available water
- soil, plant and water relationships
- water table and salinity
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to construct access tracks and clear vegetation on rural land.

This unit applies to workers in land management who are required to implement erosion control principles and apply specialised earthmoving techniques to fine tolerances. Work is often carried out in varied conditions and landscapes that require operators to develop skills that are unique to this sector.

All work is undertaken in accordance with relevant national, State, and local legislation and/or regulations.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Licenses for vehicles and machinery may be required for this unit. Specific determination should be sought through the relevant State or Territory.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and prepare equipment
- determine control points, required grades and water crossing points and structures from field observations
- confirm that plans comply with legislative requirements by checking with a supervisor or authorised person
- construct tracks to organisational standards
- excavate, transport, dump and compact road material according to job sequence and endorsed industry practices
- finish track surface
- clean worksite to organisational standards
- operate machinery according to manufacturer and safe operating procedures
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- erosion and sediment control standards, principles and issues that apply to the construction of the access track, including:
  - soils and soil formation
  - earthmoving principles
  - total catchment issues
  - how to manage peak water flows
• subsurface and surface drainage principles and systems
• key concepts of the relevant wildlife, environmental, planning, ground water legislation
• biosecurity in the context of own work
• permits and licenses required for the construction of access tracks

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out an inspection of a designated area.

All work is undertaken in accordance with statutory and local authority requirements.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Vehicle licenses apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define the scope and criteria on which to base inspection
- define the hazards and risks to work health and safety and the environment associated with the inspection
- conduct inspections, complying with statutory requirements and enterprise protocols for entry to private property
- conduct inspections in a manner that minimises environmental impacts
- operate equipment and vehicles according to organisation procedures
- establish environmental impacts caused by the presence of the target
- document the inspection findings and recommend follow up actions
- apply work health and safety practices in the context of own work
- take precautions to minimise environmental risks during inspection

Knowledge Evidence

The candidate must demonstrate knowledge of:

- risk management processes
- characteristics of inspection targets
- inspection procedures and techniques
- monitoring techniques
- reporting protocols
- relevant legislative and regulatory requirements including environmental protection legislation
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan to carry out a dive
- prepare to dive
- carry out pre-dive checks and safety risk assessments
- monitor dive conditions, respond to incidents and amend dive procedures if necessary
- debrief dive team
- store diving equipment
- dive safely and according to organisational policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- interpretation of no-decompression limit tables to determine maximum length and number of dives allowed
- the physics of diving
- dive equipment
- safety risks associated with scientific dives
- dive planning
- Australian Standards for occupational diving
- rescue procedures
- oxygen administration procedures
- agency standing orders for notification
- emergency service procedures
- dive communication procedures and equipment
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish client intentions and requirements
- communicate the process, policies and relevant legislation to the applicant
- discuss the scope and application of the submission in light of preliminary discussion
- present findings and feedback to the applicant
- provide further information and explain the appeal process if application is rejected
- explain provisions within Federal and State legislation or relevant land use to landholder
- interpret aerial photographs, maps and geographical information systems to identify particular landmarks and areas
- undertake investigations to determine scope and impact of request

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevance and impact of Federal and State legislation and regulations related to land use
- catchment characteristics of land in question
- vegetation types native to area
- signs and landmarks in aerial photographs, maps and geographic information system (GIS)
- agency policies and procedures
- formats for presenting information to clients
- process for applying for changes in land use and process for appeals if application is rejected
Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish the cultural value and significance of the place
- prepare or source checklists for inspection
- inspect the place to establish a schedule of maintenance and monitor site management
- prepare reports to enterprise standards
- submit report and recommendations based on requirements of contract including a review of existing management systems
- monitor surroundings to establish restoration, reclamation, modification and protection required in the immediate area
- conduct safety hazard analysis and risk assessments according to organisational policies and procedures
- monitor stakeholder views for impact on cultural significance, approach to maintenance, restoration and modification, and current and proposed uses of the place or area
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant aspects of Australian Heritage Commission legislation and requirements, State or Territory Heritage requirements and World Heritage requirements
- relevant environmental standards and best practice guidelines
- application of national and International Charters of the International Council on Monuments and Sites (ICOMOS), including the Burra Charter to monitoring of cultural places
- environmental legislation and codes of practice
• processes of environmental and artefact deterioration and damage
• maintenance, restoration and modifications that could be applied to place or area
• threats to place or area, including visitor impacts

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- source data sets that provide the required information
- validate the data for currency and compare to ground observations
- present data to workplace requirements
- incorporate data onto a map
- use drafting and editing processes to ensure accuracy of data and maps and to ensure reports and maps meet organisational standards
- provide a map key and any supporting information required
- evaluate maps for suitability for purpose and value in making land management decisions

Knowledge Evidence

The candidate must demonstrate knowledge of:
- land management processes relevant to map being prepared
- mapping principles and conventions including layout, legends, scale, media, printing and presentation styles
- use of software and hardware such as GIS, computer-aided design (CAD), desktop publishing, desktop mapping, multimedia, graphic animation, plotters and printers

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- use monitoring techniques suitable for the environment and species
- install and use monitoring equipment
- develop systems to capture, maintain and analyse data
- make observations and record data on species diversity and abundance
- analyse data
- ensure the monitoring process is correctly targeted and implemented

Knowledge Evidence

The candidate must demonstrate knowledge of:
- ecosystems
- plant and animal classification
- monitoring systems for flora, fauna and microorganism populations
- accepted scientific processes for monitoring biodiversity
- set up and use of monitoring equipment
- data recording and analysis techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- discuss management plan objectives, deliverables and timeline with client
- prepare a site plan detailing landscape values, physical features and characteristics, past and present land uses, physical condition and biological characteristics
- assess land capability and identify conservation issues on and surrounding the site
- analyse site information and description to assess feasibility of management objectives
- develop and cost recommended actions in line with client requirements
- present a draft management plan to client for discussion
- consult with stakeholders and incorporate feedback into the final management plan
- prepare documentation to enterprise standards and to meet client needs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- civil design concepts
- management planning principles and issues
- environmental assessment, survey and analysis techniques and practical application to a range of habitats and landscapes
- native fauna or flora physiology, habitat requirements, and seasonal and nutritional influences on life cycle
- wildlife habitats associated with the designated area and local geographic region
- pest plant and animal and disease identification, physiology, control techniques, and equipment, pesticides and habitat requirements
- land management strategies including:
- pest management or control techniques
Assessment Requirements for AIHLPW501 Develop a management plan for a designated area

- techniques and strategies for use in the management, rehabilitation and enterprise use of native Australian habitats, species and landscapes
- Indigenous flora regeneration and revegetation techniques, equipment and methods of application in relation to a range of landscape characteristics
- management and rehabilitation techniques for the wildlife and habitat relevant to the designated area
- soil, plant and water testing processes and procedures, interpretation and application of results

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine priorities based on areas of high significance, the level of risk to sensitive areas, and the potential for revenue generation
- identify projects from the agreed priorities
- develop budgets for projects and apply for funding
- brief and train staff to carry out tasks and projects safely and in accordance with organisation policies, procedures and the management plan
- apply work health and safety policies and procedures to plans and strategies
- apply biosecurity measures to plans and strategies
- apply appropriate sustainability practices to plans and strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- park or reserve management approaches
- human resource and financial management
- works and project management practices
- policies applying across all levels of government and within the specific region, including those under catchment plans
- Australian Natural Heritage Charter and the Burra Charter and the interpretation of the charters
- good planning practice and enterprise planning procedures and timelines
Assessment Conditions

Any assessment undertaken on Aboriginal Country must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to engage stakeholders and coordinate the development of regional natural resource management plans. This unit applies to individuals who coordinate the preparation of a regional resource management plan at a strategic level with the capacity to devolve responsibilities and tasks to specialist planners and others.

All work is undertaken according to legislative, program, enterprise and contract requirements.

This unit applies to individuals who demonstrate judgement and defined responsibility in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review existing planning documents and sources of information to inform the plan
- identify land management issues and potential solutions
- identify stakeholders to form discussion groups and seek individual input to planning
- organise for the collection and analysis of data to inform planning and monitor progress
- work with stakeholders and technical advisers to develop goals and performance criteria
- develop a draft plan for widespread consultation and feedback
- finalise the regional resource management plan
- complete all documentation to enterprise standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- regional and rural planning concepts from town planning, rural industry planning, and natural resource planning perspectives
- impact of government processes and industry activities in social and economic terms
- consultative techniques that take into consideration cross-cultural and cultural factors relevant to social structures
- local government operations that affect the regional resource management plan
- natural resource management and issues
- sources of technical advice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- apply safe work practices in landscape construction and maintenance
- clean up on completion of landscaping work
- prepare materials, tools and equipment for landscaping work
- undertake landscape work as directed

Knowledge Evidence

The candidate must demonstrate knowledge of:
- principles and practices for supporting landscape work
- safe work practices
- preparing for landscape work and cleaning up on project completion
- basic construction techniques
- landscaping tools and equipment
- maintenance practices for planted areas
- repair and maintenance of landscape features
- workplace health and safety and safe work practices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can
- read and interpret site and construction plans
- identify work health and safety hazards
- calculate materials required and mark out the area to be retained
- mark out the site and assemble materials
- construct footings and place reinforcing
- construct retaining walls as specified
- clear up the site and dispose of waste

Knowledge Evidence
The candidate must demonstrate knowledge of:
- the principles and practices of low profile retaining walls
- construction approaches and methods
- construction materials for retaining walls
- safe lifting practices for large and heavy components
- methods of disposing soil and waste materials in order to minimise damage to the environment
- the environmental effects of altering water flow when installing retaining walls with or without drainage media
- the environmental impact of soil disturbance when excavating an area to be retained

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to protect trees during construction work by installing protective devices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- read and interpret site and tree protection plans
- select and operate tools and equipment for protecting trees, constructing and assembling tree protection devices and for traffic control
- measure materials used in constructing and assembling tree protection devices
- assemble and build protection devices
- clean up materials and maintain worksite

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the principles and practices of installing tree protection devices
- how to care and maintain trees during protection operations
- techniques for assembling or constructing a range of tree protection devices
- the application of a range of tree protection devices suitable to the requirements of the tree species
- the damage that can occur to trees during construction work
- principles and techniques relating to the choice of tools and equipment for installing tree protection devices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to set out a site for construction works in accordance with site plans and specifications. This may be done in advance of proposed works or in conjunction with construction works already being carried out.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and specifications
- use mathematical and geometrical principles to mark out a site for construction work
- use a range of surveying instruments
- establish datum points and survey benchmarks on site
- take and verify site levels

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of site set out for landscape works
- how other plans may be referred to in assisting setting out a site
- how to determine if other plans may be referred when setting out a site

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- mark out a site for timber structures and features according to design drawings and specifications
- apply a variety of surface finishes
- establish levels and prepare footings where required
- estimate quantities
- use levelling equipment
- excavate footings
- fix, join or assemble timbers using a variety of recognised methods
- use a power tools efficiently and safely

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for erecting timber structures
- common timber joins
- levelling principles and techniques
- footings for timber structures and their construction methods
- timber fixing methods and products
- timber properties and characteristics

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine project requirements from plans
- calculate material and resource requirements
- organise work and use tools and equipment
- use tools and equipment to construct paving
- clean up, store and maintain tools, machinery and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of paving
- landscape paving materials
- methods and practices for maintaining and repairing paved areas
- methods of work schedule programming
- set-out techniques
- the range and use of required materials, equipment and machinery

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to install and construct a retaining wall.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpret documentation associated with retaining wall projects
- calculate material and resource requirements
- establish survey benchmarks
- excavate and profile soil levels
- use tools and equipment to construct retaining wall projects

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of retaining walls
- environmental impacts of landscape works
- landscape retaining wall materials and construction techniques
- legislative requirements and codes of practice affected by landscape works
- local council permit requirements for landscape works
- materials, equipment and machinery that may be required for the project
- methods and practices for maintaining and repairing retaining walls
- set out techniques
- work health and safety issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- plan and prepare metal structures and features using plans and specifications
- mark out sites for metal structures and features using design drawings and specifications
- use surveying instruments
- establish levels and prepare footings
- excavate footings
- estimate quantities
- use power tools efficiently and safely
- measure and mark lengths of metal components
- fix, join or assemble metal components using a variety of recognised methods
- apply a variety of surface finishes.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- the principles and practices of installing metal structures and features
- levelling principles and techniques
- footings for metal structures and their construction methods.
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- locate existing services and utilities, local by-laws and regulations
- determine tree transplanting requirements from specifications
- prepare tools and equipment, tree and new site for tree transplanting
- calculate tree mass and size for safe removal
- bind and wrap root balls and crowns
- lift, reinstall and stabilise a tree

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of tree transplanting
- causes of stress in trees resulting from transplanting, storage and transportation
- environmental impact of tree removal and transplantation
- principles and methods of operating tree moving equipment
- problems and methods relating to the aftercare of trees during their establishment period
- requirements for securing and signage when transporting trees on road vehicles
- safety procedures and potential hazards of removing and transplanting trees
- the relevant Australian Standards and codes of practice
- tree anatomy and physiology as it relates to transplanting trees
- tree transplanting techniques
Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read maps and plans
- record levels of survey items and site features
- orientate a landscape site
- use survey equipment
- analyse surveying and levelling results
- map orientation and levels and issues of levels on a scale plan
- book and log results
- produce scale drawings for designs and costings
- Liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of establishing site levels
- techniques to deal with different garden shapes
- surveying tools and equipment used in landscape projects

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to manage landscape projects.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare landscape project documentation
- develop and cost a bill of quantities
- develop a schedule of works
- organise and manage the works program and works team
- identify sub-contracted work and program
- manage sub-contractors
- identify, negotiate and implement variations to the contract
- identify and rectify non-conforming elements to the contract
- liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of managing landscape projects
- project management principles
- public liability and legal responsibilities
- regulations having possible bearing on landscape projects
- the environmental implications of a landscape project
- types of landscape machinery and equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess tree viability for transplantation
- liaise with authorities and information services regarding transplanting and transporting trees
- calculate project resources and costs
- calculate root ball and tree mass and size
- assess crown and root reduction requirements
- determine transplant and transportation requirements and removal methods
- develop transport plan
- develop a budget
- document and communicate transplanting program, contingency planning and after-care plan
- assess and control risks

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of tree transplanting management
- aftercare management
- causes of stress in trees resulting from resulting from transplanting, storage and transportation
- current practices and techniques in tree preparation, lifting, transportation and replanting
- local government tree protection and preservation regulations
- methods of managing tree moving operations
- planning considerations and environmental implications of transplanting activities
Assessment Requirements for AHCLSC503 Manage a tree transplanting program

- requirements for securing and signing trees for road transportation
- the relevant Australian Standards and Codes of Practice
- tree anatomy, physiology and biochemistry
- tree transplanting techniques appropriate to the specific requirements of the species

Assessment Conditions
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels and work health and safety symbols
- use safe animal handling techniques
- use livestock handling tools and equipment
- assist in monitoring livestock health and welfare
- provide assistance to repair and maintain facilities
- follow work health and safety policies
- follow enterprise animal welfare and sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- safe work practices
- animal handling techniques including animal welfare requirements
- tools and equipment
- repair and maintenance of facilities
- work health and safety and environmental protection legislation and enterprise procedures.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

| 1. Prepare to work | 1.1 Discuss work requirements with supervisor and seek clarification where necessary  
1.2 Identify work health and safety risks and inform supervisor  
1.3 Prepare and use suitable personal protective equipment  
1.4 Select and prepare appropriate tools and equipment |
| 2. Monitor and assess livestock health and welfare | 2.1 Check livestock regularly to assess health and welfare  
2.2 Recognise and report symptoms of injuries, ill health or abnormal behaviour  
2.3 Handle livestock in line with enterprise animal welfare policies |
| 3. Implement livestock health and welfare procedures | 3.1 Follow quarantine and biosecurity procedures as instructed to minimise the risk of disease  
3.2 Maintain thorough personal hygiene practices in all activities associated with handling livestock to reduce risks from diseases that are transmissible to humans  
3.3 Treat sick and injured livestock or make arrangements to humanely destroy livestock if necessary  
3.4 Recognise environmental implications associated with livestock husbandry practices and follow relevant procedures  
3.5 Follow the regulations and codes of practice appropriate for the industry  
3.6 Follow enterprise animal welfare emergency procedures where required |
| 4. Administer drenches, vaccines and prescribed treatments to livestock | 4.1 Prepare livestock treatment site and facilities  
4.2 Prepare livestock treatments  
4.3 Move, yard and control livestock and inspect for treatment requirements  
4.4 Use safe work practices with regard to livestock handling  
4.5 Administer treatment if required as instructed or under supervision |
| 5. Monitor treated livestock and maintain records | 5.1 Monitor livestock post-treatment for signs of treatment effectiveness  
5.2 Recognise and report livestock health and condition abnormalities  
5.3 Record disease incidence, livestock losses, and treatments  
5.4 Report post-treatment information to the supervisor so that prevention strategies can be planned and implemented |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle livestock safely and humanely
- monitor and assess livestock health and welfare
- select, use and maintain specialised animal health equipment
- prepare treatment site, facilities and equipment
- administer treatments to livestock
- monitor the effectiveness of treatments and report issues
- keep and maintain records
- dispose of unused treatments safely and in an environmentally correct manner
- recognise ill health and abnormal behaviour in livestock
- recognise fear and aggressive behaviour in livestock
- recognise heat stress
- follow enterprise animal welfare emergency procedures
- follow enterprise work health and safety policies
- follow enterprise biosecurity, animal welfare and sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water quality and animal requirements
- feed requirements and quality
- workplace biosecurity and euthanasia procedures
- safe handling of sick and dead livestock
- livestock handling principles and livestock behaviour
• signs of heat stress
• symptoms of ill-health in livestock
• the range of common diseases affecting livestock
• vaccination programs
• relevant legislation and regulations relating to waste and environment management, livestock health, stock medicines and animal welfare
• relevant work health and safety legislation, regulations and codes of practice

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to assist animals and their newborn at birthing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

</thead>
<tbody>
<tr>
<td>Elements describe the essential outcomes.</td>
<td>Performance criteria describe the performance needed to demonstrate achievement of the element.</td>
</tr>
</tbody>
</table>

### 1. Prepare for birthing
1.1 Check animal records and confirm anticipated birthing date where possible
1.2 Check condition and health status of pregnant animal and monitor prior to imminent birthing
1.3 Check birthing equipment, resources and materials and prepare for use
1.4 Give females access to shelter to give birth in during severe weather conditions
1.5 Identify hazards and report to supervisor
1.6 Use safe work practices

### 2. Assist at the birthing process
2.1 Monitor environment and animals to ensure birth progresses normally
2.2 Check for presence of predators and implement control measures where necessary and report to supervisor
2.3 Handle animals calmly with minimal disruption to the birthing process and in line with enterprise animal welfare policies
2.4 Identify animals experiencing birthing difficulties and intervene as appropriate
2.5 Seek supervisor or veterinary advice if birth complications cannot be resolved

### 3. Provide post-birthing assistance
3.1 Monitor post-birthing health and bonding of female and newborn
3.2 Maintain birthing environment, facilities and equipment in a safe, hygienic and operational state and report or fix faults
3.3 Keep records of birth

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement predator control strategies
- prepare birthing environment, materials and resources to industry standards
- recognise signs of imminent birthing of animals
- apply contingency measures for birthing in the event of adverse weather conditions
- monitor birthing and provide assistance if required or refer on if birthing difficulties require veterinary assistance
- recognise abnormalities in newborn animals
- provide a non threatening environment and access to adequate feed and water immediately post birthing.
- carry out animal husbandry procedures associated with birthing
- monitor animal condition and recognise abnormal behaviour
- provide due care and handle animals humanely in line with enterprise animal welfare policies
- maintain a safe and secure post-birthing environment
- select birthing equipment and materials and check for operation
- demonstrate safe and environmentally responsible workplace practices
- identify hazards and use safe work practices in the birthing environment
- communicate abnormalities, equipment faults and workplace hazards and report and maintain animal records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal behaviour, basic health and nutritional requirements
• birthing environment requirements for animals
• birthing equipment and materials, their components and functions
• birthing intervention and non-intervention strategies
• effects of adverse weather conditions on birthing process and newborn animals
• effects of inadequate nutrition on animals and newborn
• enterprise policies with regard to treating animals, recording and reporting routines
• environmental impacts and minimisation measures associated with animal production
• hazards associated with handling animals
• relevant livestock gestation and appropriate birthing and husbandry procedures
• personal protective clothing and equipment and when and how it should be used
• problems associated with birthing and remedial treatment
• procedures for cleaning and maintaining treatment equipment and materials
• predator behaviour and control procedures
• relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety and animal welfare.

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare handling areas, gates and access routes for livestock movement
- monitor and anticipate livestock behaviour
- recognise enterprise livestock identification systems
- identify and draft livestock during handling operations
- move and control livestock using low stress livestock handling techniques
- minimise undue stress and risk to livestock and handlers
- recognise livestock abnormalities
- assess, calculate and record livestock numbers
- control the environmental impacts associated with livestock production within the limitations of own responsibility
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production
- regulatory controls with regard to handling livestock on public roads where required
- common livestock breeds
- basic nutritional and welfare requirements
- range of common livestock abnormalities, illnesses and injuries and associated signs
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

**Assessment Conditions**

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check loading facilities for correct operation and hazards to animals and workers
- sort livestock as required and separate unsuitable animals for transport
- load and unload livestock
- anticipate animal behaviour
- provide and maintain appropriate animal feed and water
- complete relevant documentation and affix individual tags if required
- monitor animal health and welfare
- read and interpret mustering, work and loading plans and maps
- calculate animal numbers to assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity policies as required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal handling and movement methods and techniques
- basic animal health and nutritional requirements
- animal herding and flocking behaviour
- techniques and uses of working dogs where appropriate
- types of animal health treatments that may be required
- common diseases and injuries in livestock
- common abnormal livestock behaviours
• causes of livestock being unfit for transport
• legislative documentation requirements for livestock transport
• relevant work health and safety, biosecurity and animal welfare requirements

Assessment Conditions
Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to monitor animal health, wellbeing and welfare to parturition.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Check health status of animals | 1.1 Check condition and health status of animals and confirm against enterprise health strategies and records  
1.2 Recognise signs of poor health and condition or abnormal behaviour and report to the supervisor for remedial action  
1.3 Arrange preventative health treatments and administer as instructed  
1.4 Identify hazards and report to supervisor  
1.5 Identify environmental implications associated with production and report to the supervisor |
| 2. Identify pregnant animals | 2.1 Identify animals and separate on basis of pregnancy status  
2.2 Identify dry animals and implement appropriate procedures  
2.3 Report additional assistance required for assessing pregnancy status to the supervisor for remedial action |
| 3. Feed pregnant animal | 3.1 Identify nutritional needs of pregnant animals and confirm against the feeding plan  
3.2 Identify animals with special feeding needs and give them preferential feeding and record  
3.3 Implement supplementary feeding as required and record accordingly  
3.4 Maintain a safe and secure environment for pregnant animals  
3.5 Handle animals with minimum stress and discomfort to the animals without excessive yarding or shedding in line with enterprise animal welfare policies |

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- observe livestock health and wellbeing from joining
- maintain appropriate nutritional and environmental requirements
- recognise and report abnormalities for remedial action
- provide a safe and secure environment for the promotion of the welfare and wellbeing of pregnant animals through to birthing.
- administer preventative health treatments
- calculate animal numbers, measure feed, assess rate and frequency of feeding, and calculate animal gestation
- communicate orally and in writing, animal behaviour and identified abnormalities
- control environmental impacts associated with animal production
- handle pregnant animals with due care
- observe and accurately report animal behaviour
- observe local climatic conditions
- follow relevant work health and safety requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of adverse weather conditions and inadequate nutrition on pregnant animals and their newborn
- effect of local climatic conditions on the timing of shearing, separating and transporting pregnant animals
- environment codes of practice with regard to animal production
- correct livestock handling techniques for dry and pregnant animals
- health and nutritional requirements for pregnant animals
- housing requirements for intensively produced animals
- livestock identification methods
- pregnant animals behaviour and abnormalities
- pregnancy checking and confirmation procedures (including scanning)
- health treatments, procedures and methods to livestock when required
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety procedures
- record and report water supply information, activities and system performance
- read and follow manufacturers procedures
- problem solve to identify potential as well as actual blockages
- undertake basic poly pipe repairs
- check outflow rates
- clear blockages using safe working procedures
- check flow rates
- inspect and report on water supplies with only routine supervision
- follow work health and safety requirements.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water delivery systems and components and their operation
- common water quality problems
- enterprise procedures for carrying out inspections, recording and reporting water information and system performance
- environmental impacts and procedures for water supplies
- relevant work health and safety requirements.
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- read and interpret muster plans and maps
- prepare equipment and working dogs (when used) for handling livestock
- implement directions for mustering
- monitor livestock behaviour and recognise abnormalities
- muster and move livestock along prepared routes in a calm and controlled manner
- handle livestock safely and humanely, monitor welfare of mustered stock
- monitor and minimise impacts to the environment
- communicate effectively with the muster team
- calculate livestock numbers and assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements where required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mustering and movement methods and techniques
- livestock basic health and nutritional requirements
- livestock herding/flocking behaviour
- environmental codes of practice with regard to livestock production
- working dogs uses and techniques (where appropriate)
- legislative requirements for stock movement along public roads
Assessment Requirements for AHCLS K210 Muster and move livestock

- environmental impacts and procedures for livestock movements and musters
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- monitor and record livestock condition
- provide feed and feed supplements in accordance with feeding plan
- monitor livestock health and condition, and recognise abnormalities
- employ safe and environmentally responsible systems and procedures with regard to the handling of livestock and feed
- read and interpret feeding plan, work plan and supervisors’ instructions
- communicate and report livestock feeding abnormalities and workplace hazards, and maintain livestock records
- assess and calculate herd/flock numbers, measure feed and rate and frequency of feeding
- safely handle livestock in line with enterprise animal welfare policies
- report feeding abnormalities and maintain records
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional requirements for livestock (including water)
- types of feed and feed supplements (including pastures and grazing)
- types of noxious and toxic plants relevant to feeding areas
- livestock health and behaviour
- livestock scoring and weighing methods
• environmental impact of livestock
• safe livestock handling techniques and procedures
• hazards associated with handling livestock and control measures
• personal protective clothing and equipment
• relevant work health and safety requirements
• relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Application

This unit of competency describes the skills and knowledge required to move and control alpacas using basic handling methods and procedures.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- assess and calculate alpaca numbers
- prepare handling areas, gates and access routes for alpaca movement
- monitor and anticipate alpaca behaviour in handling operations
- identify, sort, move and control alpacas for handling and husbandry operations
- use correct equipment, and calming and humane methods to minimise undue stress and risk to alpacas or handlers
- carry out typical basic alpaca husbandry tasks
- recognise and report signs of unusual behaviour, unhealthy animals or abnormal conditions
- control environmental impacts associated with alpaca handling and husbandry
- feed and provide adequate clean water to alpacas
- identify a range of plants poisonous to alpacas
- provide due care in the handling of alpacas
- read and comprehend oral and written information and instructions and maintaining alpaca handling records
- use enterprise alpaca identification systems
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
• alpaca behavioural characteristics and movement in handling areas
• classes of alpacas and their basic nutritional and welfare requirements
• components and functions of handling equipment
• enterprise identification systems for alpacas
• environmental codes of practice with regard to alpaca production
• correct handling techniques and restraint methods
• alpaca husbandry procedures and why they are carried out
• regulatory controls relating to the transport of animals on public roads
• relevant work health and safety requirements
• relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, follow safe work practices and use personal protective equipment appropriately
- make appropriate preparations for cleaning livestock pens
- clean and maintain pens
- complete cleaning and maintenance operation
- follow relevant environmental and biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements and methods of cleaning livestock pens
- environmental and biosecurity impacts of pen cleaning operation and measures to mitigate these impacts
- types and use of tools, equipment and machinery for pen cleaning operation and the maintenance, servicing and storage of such tools, equipment and machinery
- environmental and biosecurity impacts and methods of disposal of effluent, bio-waste and waste generated by the cleaning operation
- cleaning and maintenance of feeding and watering troughs or similar equipment
- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety, biosecurity and environmental management policies
Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 2</td>
<td>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to handle and ride calm horses educated to muster and move livestock. It addresses the potential risks associated with working with and around horses and livestock.

The unit applies to individuals who have experience in riding horses assessed as calm, consistent and obedient. They work under general supervision, with some accountability for their own work, identifying and providing solutions to a limited range of predictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite units of competency for this unit are:
- ACMEQU202 Handle horses safely
- ACMEQU206 Perform horse riding skills at walk, trot and canter.

Note the following chain of prerequisites that also applies to this unit.
Unit of competency | Prerequisite requirement
---|---
ACMEQU202 Handle horses safely | ACMEQU205 Apply knowledge of horse behaviour
ACMEQU206 Perform horse riding skills at walk, trot and canter | ACMEQU202 Handle horses safely

Unit Sector

### 3. Ride horses for stock work

3.1 Select and use equipment (PPE) for riding

3.2 Lunge horse safely and humanely to check gear fit and horse behaviour

3.3 Mount horse safely

3.4 Safely control the horse at walk, trot, and canter prior to beginning stock work

3.5 Practise appropriate safety drills and safely perform emergency manoeuvres including one-rein stops

3.6 Using safe riding techniques, ride quiet, consistent and obedient horses to carry out basic stock work duties

3.7 Work and safely control horse at a walk, trot, and canter as part of stock husbandry routines

3.8 Safely dismount horse

3.9 Report and record stock work activities

### 4. Provide post ride care

4.1 Remove gear and groom, wash, or clean horse, according to workplace policy

4.2 Water and feed horse in line with workplace policy

4.3 Release horse safely to appropriate enclosure, paddock, or yard

4.4 Check, clean, maintain, and store working gear and PPE

4.5 Report damaged or repair working gear as instructed

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

<table>

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has safely ridden at least two different calm, consistent and obedient horses educated for stock work to carry out at least three assigned jobs involving riding horses for basic stock work duties. For each job there must be evidence that the individual has:

- prepared for the job by:
  - recognising hazards and implementing required risk control measures
  - identifying relevant work health and safety requirements
  - selecting and using suitable personal protective equipment (PPE)
  - selecting suitable saddlery and equipment
  - identifying the assigned horse by gender, colour markings, and brands
  - catching assigned horse and assessing for health and soundness
  - communicating with supervisor to discuss concerns and suitability of horse for the assigned job

- handled horse safely and humanely during job including:
  - safely and correctly fitting, then checking and adjusting working gear to suit individual horse
  - mounting horse safely
  - riding and controlling horse, at a walk, trot, and canter, to perform basic stock work duties
  - adhering to animal welfare policies when working around horses and livestock
  - minimising stress of livestock when checking, mustering, and moving livestock
  - dismounting horse safely

- completed post-ride activities including:
Assessment Requirements for AHCLS12108 Ride educated horses to carry out basic stock work

- cleaning, feeding and watering horse
- checking, cleaning and maintaining tack
- completing records as required by workplace.

In addition, there must be evidence that the individual has monitored the condition of at least one horse (which may be one of the above-mentioned three horses), including:

- identifying signs of ill health, injury, or poor condition, and reporting to supervisor
- safely and humanely administering basic treatments under supervision
- carrying out basic hoof care and cleaning safely and humanely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key features of work health and safety, animal welfare codes of practice, biosecurity requirements, and sustainability practices in the context of own job role
- basic pre-activity risk assessment for basic stock work
- common horse gender, colours, markings, and other identifying features
- common basic features of horse behaviour and psychology
- the features of livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant workplace procedures, industry standards, and guidelines for horse riding and riding safety, including lungeing or riding in a yard before outside and one-rein stops
- basic care and husbandry, and procedures for horses
- the common signs of disease or injury in horses, basic anatomy and physiology of the horse
- the use of horses for workplace operations
- care and maintenance of working gear.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions, including livestock handling yards and paddocks
- resources, equipment and materials:
  - various live, calm, consistent and obedient horses educated for stock work and assessed as suitable for the experience and skill of the individual
  - livestock to muster, move, and check
  - appropriate tack for individual, horse and activity
  - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
• specifications:
  • work instructions and procedures for carrying out basic stock work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to apply preventative health treatments and other medications to livestock under professional supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- prepare, clean and maintain treatment site, facilities and equipment to industry standards
- select and utilise equipment and materials appropriate for treating requirements and match to work tasks
- muster, move and handle livestock for health treatments
- administer preventative health treatments in accordance with work plan
- monitor effectiveness of treatments and provide follow up if required
- maintain records of treatments
- assess and calculate herd/flock numbers, measure dosage and quantities
- monitor livestock behaviour and recognise abnormalities
- apply contingency measures for administering treatments in the event of adverse weather conditions
- carry out animal husbandry procedures
- provide due care and handle livestock humanely
- communicate abnormalities, equipment faults and workplace hazards
- read and interpret manufacturers specifications, work and maintenance plans, veterinary chemical labels and Safety Data Sheets (SDS’s)
- apply relevant work health and safety requirements
- apply relevant biosecurity requirements
- apply relevant animal welfare practices
- apply relevant environmental sustainability practices
Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment and materials for treating livestock, their components and functions
- livestock health treatments, procedures and methods
- livestock identification methods
- mustering and moving techniques
- withholding periods for residues in meat, milk or wool
- technique of disposing of livestock residues and waste appropriately
- hazards associated with handling livestock and veterinarian medicines and chemicals
- implications and management of veterinary medicine and/or chemical resistance
- personal protective clothing and equipment and when and how it should be used and maintained
- procedures for cleaning and maintaining treatment equipment and materials
- enterprise policies with regard to treating livestock, recording and reporting routines
- relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, biosecurity and the use and control of hazardous substances

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to mate and monitor the reproduction of alpacas.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Prepare animals for mating  | 1.1 Select male and female animals to be mated from the stud’s mating plan  
1.2 Determine condition of animals selected for mating and record body scores are recorded to comply with recognised industry practices  
1.3 Adjust nutritional program where required and monitor to produce optimum condition for mating  
1.4 Make preparations where females are over-fleeced to ensure that tail and vulva area are clean and free of fleece  
1.5 Check animals for signs of infection or other reason not to proceed with the planned mating and take remedial action as appropriate |
| 2. Facilitate mating           | 2.1 Identify receptive females  
2.2 Ensure paddock or pen mating areas are secure and provide access for handlers during joining  
2.3 Use mating procedures and handling techniques that minimise stress and discomfort to animals and meet work health and safety and animal welfare requirements  
2.4 Supervise pen mating and intervene when required to maximise conception rates |
| 3. Complete mating procedures  | 3.1 Undertake or commission pregnancy at earliest opportunity to identify pregnancy status of animals and take suitable action as required  
3.2 Record of mating details |

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

**Range of Conditions**

**Unit Mapping Information**

This unit is equivalent to AHCLSK302A Mate and monitor reproduction of alpacas.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implementing safe operating procedures
- accurately score alpaca condition
- assist with ultrasonography and blood collection if requested by professional service providers
- clean up work site and safely dispose of waste
- monitor the condition of female and male alpacas
- recognise ovulation and detect oestrus in females
- supervise alpaca mating and assisting as appropriate
- conduct a spit off
- conduct and commission pregnancy tests
- identify and implement action required as a result of pregnancy tests
- communicate effectively with other team members and veterinarians
- apply relevant work health and safety requirements
- apply relevant biosecurity policies requirements
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alpaca handling and assisted joining techniques
- alpaca health and abnormalities
- alpaca movement and behavioural characteristics
- enterprise and industry identification system for alpaca
enterprise and industry policies regarding recording and reporting routines for matings
management of female and male body conditions core through nutrition programs
Johne's disease status mating procedures
mobile mating procedures
relevant Personal Protective Equipment (PPE) and when and how it should be used
pregnancy testing techniques, including detection of ovulation
state and territory animal welfare legislation and codes of practice
relevant state and territory legislation, regulations and codes of practice with regard to
work health and safety and biosecurity

Assessment Conditions
Competency is to be assessed in the work place or workplace and simulated environments that
accurately reflect performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

| 1. Prepare to work with livestock feed | 1.1 Check work to be undertaken from work program and confirm with supervisor where necessary.  
1.2 Identify work health and safety hazards, assess risks and apply suitable control measures  
1.3 Select, use and maintain suitable personal protective equipment  
1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken  
1.5 Identify environmental impacts of undertaking work, assess likely outcomes and, if necessary, take responsible action |
| 2. Mix feed | 2.1 Calibrate scales and containers to be used for measurements  
2.2 Identify ingredients from instructions and obtain from storage locations  
2.3 Measure ingredients in the specified ratios and quantities  
2.4 Blend ingredients adequately and hygienically in the manner specified using appropriate equipment  
2.5 Carry out grinding, where required, in the manner specified and using appropriate equipment |
| 3. Feed livestock | 3.1 Store feed appropriately  
3.2 Check the physical quality, quantity and type of feed on their arrival to the shed  
3.3 Feed livestock at scheduled time, rate and frequency  
3.4 Maintain quality and hygiene of feed throughout the feeding process |
| 4. Apply and maintain feedlot hygiene and biosecurity procedures | 4.1 Examine livestock entering feedlot, check their documentation and quarantine them for specified period  
4.2 Maintain cleanliness and hygiene by selecting and using appropriate cleaning methods  
4.3 Maintain thorough personal hygiene practices in all activities associated with handling livestock, including reducing risks from diseases transmissible to humans (zoonotic diseases)  
4.4 Dismantle and clean equipment and fittings and replace correctly  
4.5 Place and dispose of waste and debris in allocated areas, and ensure run-off is managed according to the Feedlot Code of Practice, environmental legislation and public health standards  
4.6 Check and sign in visitors to feedlot according to enterprise and industry procedures |
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures
- prepare equipment and machinery mixing feed
- identify a range of grain and feed types and qualities
- mix livestock feed
- feed livestock
- follow relevant procedures for the safe and environmentally responsible disposal of waste
- apply and maintain relevant feedlot hygiene and biosecurity procedures
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant biosecurity requirements
- relevant animal welfare practices
- tools and equipment used for working with livestock feed, their functions and maintenance
- environmental impacts of working with livestock feed and mitigation methods
- measurement systems for livestock feed, and calibration and maintenance of measuring equipment
- types of grains and feed ingredients (grains, meals, vitamins, minerals and premix formulations) used for feeding livestock, their functions, characteristics and quality assessment methods
• methods and equipment for blending and grinding of feed
• methods of storage and handling of livestock feed and impact of feed quality changes on livestock
• livestock feeding programs and impact of program changes or variations on livestock
• impact of biosecurity practices on livestock in a feedlot
• cleaning methods, cleaning agents, their proper use and disposal, and relevant Work Health and Safety practices
• common zoonoses and their impacts on human and livestock health
• management and disposal of waste, debris and run-offs according to relevant biosecurity and environmental regulations, codes of practice, industry and enterprise standards
• management of and biosecurity requirements for visitors to the feedlot

**Assessment Conditions**

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for post mortem, ensuring appropriate handling and use of equipment, personal protective equipment and disinfectants
- identify work health and safety and biosecurity hazards and implement risk controls
- handle carcasses safely and appropriately
- perform external examination and post mortem examination of carcass
- dispose of carcass appropriately
- carry out post necropsy procedures of cleaning and disinfection of equipment, post mortem site and personal protective equipment
- prepare biological samples for sending to the laboratory where appropriate
- carry out procedures for personal hygiene
- apply relevant work health safety environmental and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sequence of actions in conducting a post mortem examination
- appropriate handling and use of post mortem equipment, personal protective equipment and disinfectants
- requirements for correct preparation, labelling and packaging of biological samples
- anatomy and physical features of the species being examined
- common causes of death for the species being examined
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species
• relevant work health and safety environmental and biosecurity requirements, and carcass disposal regulations

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a livestock carcass:
• carry out post mortem examination

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- estimate water requirements based on average and peak demand for water
- test and monitor machinery and equipment for correct operation and recognise minor faults and report major faults
- identify the components of a range of water supply systems
- arrange water supply system components and materials
- use hand and power tools safely
- carry out routine servicing and minor repairs on a range of water supply systems and equipment
- work as part of a contract team as required
- demonstrate safe and positive environmental working practices
- test water quality as directed
- read and interpret a water supply plan
- measure and calculate lubrication requirements
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock requirements and average and peak demand for water
- operational principles of various pumps and pumping systems
- functions and components of a range of water supply systems
- operation and maintenance of diesel and petrol engines
• factors which affect water quality, various water contaminants and remedial action
• advantages and disadvantages of different types of water supply systems
• State and Territory work health and safety legislative requirements relevant to the job role
• relevant legislative requirements with regard to property water supply systems
• environmental code of practices associated with maintenance activities.

Assessment Conditions
Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain biosecurity procedures and report concerns immediately
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- read and interpret production and other information in a manner that is readily accessible for both management and operators
- monitor shed temperature and adjust as required
- read and interpret spreadsheet information using a software package
- discuss production performance, risk and hazard potential, quality of output, and methods of production with both management and operators
- read and interpret the activities contained in livestock production plans
- observe, identify and react appropriately to work health and safety hazards and environment risks
- recognise when performance standards are not met and investigate and report findings in written form
- provide supervision of staff including allocating duties and feedback on performance
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- prepare and present production and other information in a manner that is readily accessible for both management and operators
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

Application

This unit of competency describes the skills and knowledge required to euthanase livestock without distress or suffering prior to cessation of their vital life functions.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Individuals must hold firearms licenses if they are using firearms to euthanase livestock.

Individuals must comply with national and local regulations for disposal of the carcass.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- apply relevant animal welfare requirements
- implement relevant work health and safety practices
- implement relevant biosecurity requirements
- prepare for euthanasia
- carry out euthanasia
- confirm signs of death in a euthanased animal
- handle, prepare or dispose of carcass in line with workplace procedures, national and local regulations
- clean and store equipment and materials
- record details of the euthanasia.

Knowledge Evidence

The candidate must demonstrate knowledge of:
- their responsibilities with regard to animal welfare as outlined in the relevant animal welfare codes of practice
- relevant work health and safety and biosecurity requirements, explain the requirements of statutory legislation and codes of practice related to euthanasing livestock
- workplace procedures for euthanasia of livestock as required, describe animal handling, restraint and behaviour for carrying out euthanasia
- signs of death in an animal
- anatomy and physical features of the relevant livestock species
• methods of euthanasia suitable for the livestock species as outlined in the relevant codes of practice.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to identify and draft or sort animals for sale, breeding or other enterprise requirements.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- handle and draft livestock in line enterprise animal welfare practices
- identify criteria for animal selection
- control and sort livestock
- select animals according to selection criteria
- safely and humanely apply identification devices
- appraise and grade animals
- recognise livestock abnormalities
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- handling techniques and restraint methods
- animal movement and drafting
- animal welfare principles
- livestock behaviour relevant to drafting
- selection criteria for breeding stock
- livestock identification systems and devices
- enterprise animal identification procedures
- State and Territory work health and safety and animal welfare legislative and enterprise requirements.
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices for animal health treatment
- identify the symptoms of parasite infestation and other diseases
- monitor animal health status and refer to the production plan for intervention strategies
- select livestock prone to infection for culling
- accurately diagnose the type and severity of infection or parasite infestation
- arrange and co-ordinate equipment and resources
- read and interpret chemical and veterinary health labels, manufacturer’s specifications and Safety Data Sheets (SDSs)
- calculate animal numbers and measure treatment dosage and rates
- select and administer treatments appropriate to treat infections and infestations and observe withholding periods
- drench and vaccinate livestock
- provide due care and humanely handle animals
- return animals to prepared and clean environments
- monitor animals for treatment effectiveness
- apply relevant work health and safety requirements
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of parasite infestation and their symptoms
- parasite resistance of different classes of livestock
• application procedures and effects of veterinary chemicals
• types of health preparation treatments
• enterprise vaccination program and procedures
• identification of and prescribed treatments for infections and infestations
• grazing management strategies used in internal parasite control
• drenching equipment, drenches and their efficiency
• relevant codes of practice with regard to the safe use and handling of hazardous substances
• withholding periods for treated animals
• animal handling and restraint techniques
• animal welfare principles
• relevant work health and safety and animal welfare legislative and enterprise requirements

**Assessment Conditions**

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures and suitable risk controls
- assess livestock according to enterprise requirements
- prepare for feeding livestock
- carry out feeding and watering
- clean feeding equipment
- complete records and documentation
- follow relevant biosecurity requirements and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant animal welfare practices and biosecurity requirements
- environmental impacts of intensive livestock feeding
- methods of assessing livestock condition
- systems and stages of intensive livestock production
- feed distribution systems and feeders, their functions, maintenance and servicing
- methods of storage and handling of intensive livestock feed and impact of feed quality changes on livestock
- intensive livestock feeding programs and impact of program changes or variations on livestock
- watering systems and equipment, their functions, maintenance, servicing and impact of changes or variations on livestock
• methods of cleaning feed equipment, cleaning agents, their proper use and disposal, and relevant work health and safety practices
• type of information to be gathered, documentation and records which must be maintained

**Assessment Conditions**

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor pasture health and condition
- assess herd/flock health and condition and live weight
- identify livestock nutritional requirements
- order feed if requested in line with feeding plan
- identify feeding problems and animals that require individual treatment
- handle livestock humanely and monitor animal welfare
- respond to or report negative environmental impacts of feeding
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutrient and feeding requirements of a range of livestock
- different types of agricultural feeds
- factors that affect feed supply and demand for a grazing operation
- grazing practices which maximise pasture growth and quality to best match herd/flock feed requirements
- purpose of feed conservation in relation to enterprise feed supply and livestock requirements
- different types of pasture grazing systems, including rotation, strip and set stocked grazing
- ways of determining a feed surplus
- role of spelling subdivision in effective pasture and animal management
- different supplementary feeding options for livestock
• environmental controls and codes of practice applicable to the enterprise
• nutrient values of pasture and supplementary feedstuffs
• codes of practice with regard to animal welfare and environmental protection

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to coordinate artificial insemination and fertility management of livestock.

This unit can be delivered in the context of the following industries: beef cattle, dairy cattle, alpacas, sheep and goats.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Operators performing artificial insemination may require accreditation and certification, such as National Herd Improvement Association of Australia Inc. accreditation for cattle AI technicians.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare females for insemination
- detect females in oestrus
- sterilise equipment and prepare hygienic worksite prior to insemination procedures
- coordinate the artificial insemination of animals
- monitor livestock post insemination
- coordinate and record the results of pregnancy testing
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices relevant to work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- body condition scoring
- relevant husbandry and management practices for pregnant and non-pregnant female livestock
- relevant anatomy and physiology of female livestock
- reproductive physiology and pregnancy development of female livestock
- requirements and procedures of artificial insemination
- reproductive diseases and complications in female livestock
- pregnancy testing methods
- relevant work health and safety, animal welfare and biosecurity requirements, and sustainability practices
Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- facilitate artificial insemination

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- monitor livestock health and welfare
- monitor the production environment
- monitor feed systems and water supplies
- perform routine maintenance checks
- complete monitoring activities
- follow relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- production parameters and production assessment systems of the livestock industry
- signs of health and methods of assessing livestock health
- relevant animal welfare requirements of the livestock industry and their impact on the enterprise
- housing, production and management systems of the livestock industry and equipment used in these systems
- relevant hygiene and biosecurity requirements of the livestock industry and their impact on the enterprise
- relevant waste disposal requirements of the livestock industry and their impact on the enterprise
- feed management and feeding programs of the livestock industry and their impact on the enterprise
• monitoring, maintenance and servicing of housing structures, production structures, environmental control equipment, watering equipment and feed delivery equipment
• type of information to be gathered, documentation and records which must be maintained
• relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to feed and care for animals through the latter stages of pregnancy to birthing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Identify and provide animal nutritional needs | 1.1 Identify nutritional needs of pregnant animals and confirmed against the feeding plan  
1.2 Determine and provide feed supplements as required  
1.3 Implement procedures to minimise feed wastage and spillage, and dispose and recycle feed waste  
1.4 Identify hazards, assess risks and implement control measures |
| 2. Monitor feeding process | 2.1 Monitor grazing and supplementary feeding to ensure animals are maintained in the required condition  
2.2 Record and report feeding abnormalities  
2.3 Identify and assess environmental implications associated with animal production and implement relevant measures |
| 3. Maintain a secure environment for animals | 3.1 Monitor and maintain condition and security of paddocks, shelter and housing  
3.2 Carry out basic repair work and report  
3.3 Assess risk of predators to newborn animals and report in line with workplace procedures  
3.4 Implement environmentally responsible measures to eradicate or control identified predators |
| 4. Carry out animal husbandry procedures | 4.1 Prepare animals for birthing  
4.2 Determine and administer preventative health treatments  
4.3 Prepare and administer contingency measures as required  
4.4 Provide protection from weather for newborn animals  
4.5 Apply enterprise animal welfare policies to all livestock husbandry and handling activities |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- match supply of grazing or predetermined rations to nutritional requirements for pregnant animals
- monitor animal health and condition and recognise abnormalities
- carry out animal husbandry procedures, and provide due care and handle animals humanely in line with enterprise animal welfare policies
- maintain animal shelter and housing where applicable
- administer preventative health treatments
- implement contingency measures in the event of adverse weather or birthing difficulties
- employ safe and environmentally responsible systems and procedures with regard to the handling of animals, feed, hazardous substances and predator control strategies
- read and interpret manufacturers specifications, work and feeding plans, and Safety Data Sheets
- assess and calculate herd/flock numbers, measure feed, assess rate and frequency of feeding, and calculate animal gestation
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- physiological and behavioural signs of impending birth
- animal behaviour and nutritional requirements of pregnant animals
- pasture and animal grazing management
• feed and feed supplements for pregnant animals and when to provide them
• effects of weather conditions, and inadequate nutrition on pregnant animals and their newborn
• preventative health treatments, procedures and methods
• animal husbandry procedures
• environmental impact of animals on ground cover and minimisation measures
• hazards associated with handling animals and veterinarian medicines and chemicals
• State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare and poisons
• predators and behaviour patterns and control and eradication measures
• relevant licensing and permit requirements (firearms)
• enterprise policies with regard to birthing animals, recording and reporting routines.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

| 1. Prepare paddocks or yards | 1.1 Confirm particular livestock mating plan with supervisor  
1.2 Select paddocks or yards and stock to appropriate levels  
1.3 Plan predator control program and implement where appropriate  
1.4 Identify hazards, assess risks, implement controls and report safety concerns to the supervisor  
1.5 Select and use safety and personal protective equipment |
| 2. Prepare dams for joining | 2.1 Monitor live weight of dams through weighing and condition scoring  
2.2 Adjust nutrition levels to achieve targeted joining weights in line with feeding strategy  
2.3 Implement dam health and husbandry operations  
2.4 Draft mobs for joining |
| 3. Prepare sires for joining | 3.1 Carry out physical examination of sires prior to joining  
3.2 Seek veterinary advice where appropriate  
3.3 Determine mating ratios  
3.4 Select replacement sires in time to allow adjustment to new environment  
3.5 Carry out sire health, handling and husbandry operations in line with individual requirements and enterprise animal welfare policies  
3.6 Test mate sires to assess libido and serving capability if required  
3.7 Monitor sires environment for optimum mating performance |
| 4. Join sires to dam mobs | 4.1 Select dates for joining where appropriate according to the mating plan  
4.2 Organise test joinings for new sires if appropriate  
4.3 Introduce sires to herds or individual dams to ensure good contact  
4.4 Remove sires from herds at the scheduled time |
| 5. Monitor mating activity | 5.1 Observe and record mating activity  
5.2 Observe distribution of sires within each mob  
5.3 Take remedial action if required |
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and implement safe work practices
- prepare dams and sires for joining
- manage dams and sires during joining
- appraise breeding soundness in animals
- estimate live weights
- monitor joining activity
- prepare joining paddocks
- assess the serving capacity and fertility of males pre joining
- ensure females are above minimum body weights to exhibit oestrus
- use sufficient males for the number of females to be mated in the group
- use back up sires where single sire mating is practised
- record mating details
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- mating behaviour of sires and dams
- optimum live weights and condition for mating
- physical abnormalities and mating problems in males and females
- environmental influences on joining
• work health and safety and animal welfare legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- plan for and provide livestock feed and water requirements
- maintain livestock facilities and handling equipment
- restrain, handle and groom livestock using safe and humane methods and procedures
- train livestock for showing
- comply with animal welfare requirements
- prepare livestock to competition standards
- parade and present livestock for show
- read and interpret written information, receive, comprehend and communicate oral information, write basic statements and maintain livestock records
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- competition requirements for grooming, handling and presentation
- components and functions of handling equipment
- handling techniques, restraint methods and when to use them
- livestock grooming and training techniques (to lead and stand correctly)
- livestock health and nutritional requirements
- preparation and maintenance requirements for livestock facilities and equipment
- livestock movement and behavioural characteristics in handling and confined areas
• work health and safety, animal welfare and livestock movement legislative requirements

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select livestock for exhibition
- prepare animals for exhibition
- present livestock to best advantage
- promote the product to clients and pursue sales opportunities
- communicate with staff during preparations, exhibit officials and potential customers
- identify potential exhibits against selection criteria to accurately select livestock/fleeces
- train animals to be led and presented in competition
- organise entries, resources and facilities for showing
- arrange and prepare for transport
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria for competition judging
- preparation procedures
- requirements for entry of competitors
- transportation requirements
- feeding and nutrition requirements
- communication and supervision techniques
- observation methods
• relevant legislative work health and safety requirements, especially as they relate to livestock and fleece exhibitions, and animal transportation, animal welfare and safe livestock handling techniques
• enterprise and industry policies and codes of practice with regard to livestock exhibitions, sales, livestock transportation, and recording and reporting requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

### 1. Prepare for care of newborn and young

1.1 Identify, select and prepare facilities, equipment and supplies needed to provide care
1.2 Assess and prepare for the needs of newborn and young animals
1.3 Implement and observe feeding routines
1.4 Identify and maintain hygiene, health and environmental requirements
1.5 Handle newborn and young animals humanely in line with enterprise animal welfare policies

### 2. Provide care for newborn and young

2.1 Provide feed and feed supplements as required
2.2 Monitor relationship between mother and young and implement strategies to address any problems where appropriate
2.3 Maintain and monitor feeding, water and shelter areas for correct operation, cleanliness and hygiene
2.4 Treat routine health and feeding problems, including digestive upsets and infections

### 3. Monitor health of newborn and young

3.1 Monitor newborn and young against benchmarks for growth, health and development
3.2 Take appropriate action for sick, weak, orphaned and injured, newborn and young
3.3 Seek assistance for more complex health and feeding problems
3.4 Separate newborn and young requiring routine husbandry and health procedures treat and return
3.5 Carry out treatments and checks appropriately

### 4. Meet ongoing requirements

4.1 Identify young animals ready for weaning and wean according to weaning programs
4.2 Identify and meet feeding requirements
4.3 Handle animals regularly as required
4.4 Keep and maintain records
4.5 Ensure all work is conducted safely and in accordance with enterprise requirements, work health and safety and animal welfare legislation and regulations

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- weigh and assess condition of newborn and young animals
- work within animal welfare legislative requirements and enterprise and industry guidelines
- identify abnormal conditions and report or react promptly
- safely and humanely handle and care for newborn and young animals
- recognise signs of stress or ill health in newborn and young animals
- communicate with other personnel
- provide support as needed to veterinarians attending to sick newborn and young animals
- collect samples
- identify the young and their parent
- use feed, shelter and ventilation equipment
- calculate feed and dose rates
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- newborn and young animals development and growth
- newborn and young animals feed, shelter and environmental requirements
- common deformities
- infection controls and treatment programs
• significance of colostrum to livestock
• feeding systems and weaning strategies
• husbandry procedures
• hygiene and cleanliness requirements
• enterprise requirements for rearing of newborn and young animals and recording and reporting requirements
• relevant legislative animal welfare health and work health and safety requirements especially as they relate to safe animal handling techniques, feeding, animal treatments, and rearing and caring for newborn and young animals

Assessment Conditions
Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare site, equipment and livestock for slaughter safely and appropriately
- conduct the slaughter of livestock in compliance with relevant requirements and regulations
- complete slaughter operations
- dispose of, or destroy offal and waste products in an environmentally responsible manner and according to State/Territory and local authority health standards
- comply with all relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements
- preparation, selection and use of the site, equipment and livestock for the slaughter
- methods and procedures for the humane slaughter of livestock
- preparation, processing and disposal of the carcass and its parts after slaughter
- post-slaughter procedures for the site and equipment
- anatomy and physical features of the species being slaughtered
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species
- codes of practice for the welfare and husbandry of relevant livestock species
Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a live animal:

- prepare for slaughter
- slaughter animal
- complete slaughter operations

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to safely and efficiently transport livestock to a destination within specified timeframes.

Animal welfare and low stress stock handling principles and practices are to be observed at all times.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- interpret transport plan requirements
- coordinate the transport of livestock
- safely, load livestock while maintaining load within specifications
- distribute animals on transport to prevent overcrowding and minimise risk of injury
- obtain relevant permits and comply with movement restrictions
- ensure documentation and livestock identification is in place
- ensure appropriate recording including use of technology where applicable
- safely unload livestock
- review health and condition of livestock after transit
- demonstrate safe and humane handling of livestock according to animal welfare codes of practice
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and legislative requirements for the transport of livestock
- model codes of practice for the welfare of animals Land transport (various species)
- animal welfare, biosecurity and work health and safety legislative requirements
- environmental codes of practice with regard to vehicle operation and livestock transport
- market requirements in relation to the quality and condition of livestock
- process of sourcing and costing transportation alternatives
- livestock transport recording and documentation requirements
- enterprise policies with regard to the use of vehicles and equipment
- relevant documentation requirements and procedures

**Assessment Conditions**

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to service and repair bores and windmills. This includes activities such as replacing parts, checking equipment for wear and tear, determining lime deposits, stripping, dismantling or reassembling bores and windmills.

These activities carry risk of falls due to working at heights, injury due to working with moving parts and machinery.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes of practice and manufacturer’s specifications.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards, assess risks and implement safe work procedures
- apply basic diagnostic techniques
- recognise faults and deterioration of components and carry out repairs to bore, mill heads and pumps to ensure the full function and flow of water supplies
- select and match tools and equipment with work requirements
- apply safe workplace and positive environmental procedures
- read and interpret enterprise policy, maintenance plans, manufacturer specifications and Safety Data Sheets (SDSs)
- effectively communicate with contractors and supervisor, record and report maintenance details and outcomes
- calculate volumes, and measure speed, flow rates and distance
- maintain all components of bores and windmills
- carry out testing procedures to determine correct operation
- refer to bore histories for troubleshooting
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:
- construction of bores and windmills and maintenance requirements
- diesel engine components, maintenance requirements and repair procedures
- working principles of diesel engines
- drive systems and components
- types and uses of lubricants and other servicing materials
- servicing characteristics of bores and windmills
- types, characteristics, uses and limitations of hand and power tools
- basic diagnostic processes and techniques
- environmental codes of practice with regard to maintenance activities
- work health and safety legislative requirements

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards and implement safe work procedures
- manoeuvre transport machinery or truck in difficult sites and conditions
- drive truck safely using all available controls
- clean and store vehicles and equipment
- identify operational faults
- complete time sheets and other maintenance records as required
- use communication methods to advise and anticipate conditions
- interpret plans, reports, maps, specifications
- maintain and store records, reports, and log books
- select, fit, and use personal and protective equipment
- operate and load a truck in accordance with Road Traffic Regulations
- plan, load, unload and move a range of loads over a full range of road conditions in accordance with Road Traffic Regulations
- conduct pre-start and post-operational checks
- maintain the quality and integrity of transported produce
- apply relevant work health and safety requirements
- apply relevant biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- manufacturers and work site requirements including property conditions, and hazards on the property and on the open road
- road traffic laws and licensing requirements
- organisational procedures for use of vehicles and equipment
- relevant work health and safety requirements for storage of materials and equipment
- work health and safety legislation, codes of practice, procedures, and principles, including manual handling
- emergency procedures
- site safety requirements
- equipment safety requirements
- operational, start up, and shutdown procedures and checks
- hauling and towing procedures
- receipt and document requirements at both ends of the transport operation
- differences in handling and operation with bagged and bulk loads
- relevant biosecurity requirements

**Assessment Conditions**

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs to the Assessment Conditions.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the workplace need for working dogs
- select working dog to meet workplace requirements
- develop working dog training programs and apply effective training methods
- maintain health and welfare of the working dog
- follow relevant work health and safety and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- working dog breeds and behaviour
- use of working dogs in the workplace
- effective working dog training systems and procedures
- livestock handling methods and techniques
- care, husbandry and management procedures for working dogs
- signs of health, anatomy and physiology of working dogs
- common illnesses of working dogs and preventative health strategies
- relevant State/Territory legislative and regulatory requirements with regard to work health and safety, animal welfare, biosecurity and the registration and care of domestic dogs

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.
Assessments for the following performance evidence must be conducted on live animals:

- develop and implement training program for working dog

Assessors must satisfy current standards for RTOs.

This unit of competency describes the skills and knowledge required to castrate young animals.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

| **1. Prepare for animal castration** | 1.1 Interpret work to be undertaken from work program where necessary, and confirm with management  
1.2 Hold discussions with other workers who may be affected by the activities to ensure continued smooth operation of the production process  
1.3 Identify work health and safety hazards, assess risks, and implement suitable controls  
1.4 Select, use and maintain suitable personal protective equipment  
1.5 Hygienically clean castration area to minimise the risk of infection  
1.6 Select and assemble equipment, instruments and resources needed for castration operations, ensuring adequate supplies of consumables  
1.7 Separate male animals as required to facilitate ease of handling and to minimise stress and in compliance with animal welfare codes |
| **2. Castrate animals** | 2.1 Select, catch and restrain individual animals using industry standard techniques  
2.2 Check animals for health and soundness according to organisation guidelines  
2.3 Castrate restrained animals in a humane and hygienic manner according to organisational guidelines, industry standards, and the relevant of animal welfare codes of practice  
2.4 Complete records as instructed by organisational guidelines |
| **3. Complete hygiene and administration activities** | 3.1 Remove all debris, waste material and animal residues from the site and dispose of in an environmentally aware and safe manner according to organisation work procedures  
3.2 Hygienically clean, maintain and store instruments and equipment according to organisation work procedures  
3.3 Maintain a clean and safe area throughout and on completion of work  
3.4 Document work outcomes and report to the supervisor where appropriate according to organisation work procedures |
| **4. Monitor castrates** | 4.1 Move animals from yard to pasture as soon as practical with minimal stress to reduce risk of infection  
4.2 Monitor animals to identify post-castration complications  
4.3 Identify and treat animals exhibiting signs of ill health or infection |
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards, assess risks and implement safe operating procedures
- handle animals humanely and with minimal stress in line with animal welfare legislation codes of practice
- perform a recommended method of castration with attention to hygiene
- administer pre or post operative treatments
- monitor castrated animals
- carry out animal husbandry tasks in hygienic manner
- record the number and health of animals post castration
- work effectively as a part of a team and communicate with supervisors
- apply relevant work health and safety requirements
- apply relevant animal welfare and environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- male anatomy as it relates to castration
- castration methods for various species of livestock
- organisation castration, hygiene and animal welfare procedures and policies
- industry standards for the care and husbandry of animals
- industry and enterprise requirements for debris, waste material and animal residues disposal
- relevant work health and safety legislation, codes of practice and industry and enterprise requirements
- relevant animal welfare legislation, codes of practice and industry and enterprise requirements
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable control measures
- follow enterprise mill and mix stockfeed work program
- order and store feeds and ingredients
- identify feed ingredients and obtain from storage locations
- measure ingredients in the specified ratios and quantities
- mix feeds and ingredients in line with industry quality standards and requirements
- recognise and rectify minor operational faults and perform routine maintenance
- complete records and documentation of feed use and volumes for the shed
- conduct post-procedural hygiene and administration activities
- implement relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise requirements for mixing and milling feeds
- relevant work health and safety requirements
- tools and equipment machinery used for mixing and milling feeds, and the cleaning, maintenance, servicing and storage of such tools and equipment
- environmental impacts of mixing and milling feeds and strategies to mitigate such impacts
- type of feed ingredients and procedures for ordering, handling and storage of feed ingredients
• the impact of seed, chemical, insect and fungal contamination of grain. This includes an awareness of the industry process in place to monitor these contaminants - the National Residue Survey (NRS), the National Antibiotic Residue Minimisation (NARM) and programmed basket surveys
• measurement equipment for feed ingredients, and their calibration and maintenance
• procedures for mixing, blending and milling feed ingredients and feeds
• documentation and record keeping requirements for mixing and milling feed
• relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

1. Obtain colostrum
   - 1.1 Obtain, check and sterilise required equipment
   - 1.2 Select suitable donor animals and collect colostrum
   - 1.3 Check frozen colostrum stored and select suitable ones for use
   - 1.4 Select, use and maintain appropriate Personal Protective Equipment (PPE)

2. Administer colostrum to newborn animals
   - 2.1 Identify newborn animals requiring supplementary colostrum
   - 2.2 Obtain and prepare feeding equipment
   - 2.3 Thaw frozen colostrum at room temperature
   - 2.4 Warm thawed colostrum to body temperature
   - 2.5 Administer warmed colostrum to newborn animals according to individual animal requirements and workplace procedures
   - 2.6 Check newborn animals regularly after administration of colostrum and repeat colostrum feeds as required
   - 2.7 Follow enterprise animal welfare policies

3. Store colostrum
   - 3.1 Filter colostrum according to workplace procedures and place in appropriate container
   - 3.2 Freeze surplus colostrum for future use and label container with details of donor animal and date of collection

**Foundation Skills**

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

</table>

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain colostrum from suitable donor animals and select suitable frozen colostrum
- handle and feed new born animals appropriately
- handle frozen colostrum according to enterprise and health and safety procedures
- store colostrum for future use
- follow relevant work health and safety and animal welfare requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional needs of newborn animals and the need for feeding colostrum to newborn animals
- selection of suitable donor animals
- methods and equipment used to collect colostrum
- care, husbandry and management of newborn animals
- handling of frozen colostrum
- administration of colostrum to newborn animals and their post-administration care
- storage procedures of colostrum
- relevant work health and safety and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.
Assessments for the following performance evidence must be conducted on live animals:

- obtain colostrum
- administer colostrum to newborn animals

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable controls
- make preparations to work with effluent disposal equipment
- maintain and operate effluent storage and disposal system in compliance with approval granted by local government and state environment protection authority
- monitor effluent disposal system
- conduct cleaning and hygiene practices associated with effluent operations
- implement relevant environmental practices
- complete organisational records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- an enterprise work program and program requirements for effluent operations
- relevant work health and safety requirements
- tools, equipment and systems used for effluent operations (effluent handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for effluent operations
- environmental impacts of effluent operations and liquid effluent irrigation, and strategies to mitigate such impacts
- irrigation techniques for liquid effluent
- functions, maintenance and service of effluent pits
- methods and maintenance of effluent composting
• methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
• documentation and type of records that need to be completed for effluent operations
• relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

## Elements and Performance Criteria

<table>
<thead>
<tr>
<th>Element</th>
<th>Performance criteria</th>
</tr>
</thead>
</table>
| 1. Prepare for calving | 1. Assess and monitor condition and health status of cow prior to calving  
1.2 Check calving equipment, resources and materials and prepare for use  
1.3 Graze cows at risk of calving difficulty (especially first calf heifers) in an area where intervention can be carried out with as little disruption as possible  
1.4 Identify hazards in assisting with calving and follow safe work practices  
1.5 Check mating records and confirm anticipated calving date |
| 2. Observe the calving | 2.1 Monitor cows for signs of approaching parturition and throughout calving  
2.2 Note signs of calf malpresentation or dystocia from the rate of progress in giving birth and the initial orientation of the feet and head |
| 3. Support calving | 3.1 Handle calving cows calmly and put in a secure environment  
3.2 Implement hygiene procedures to ensure that any calving equipment entering the birth canal is clean  
3.3 Estimate the orientation and size of the foetus relative to the pelvis through manual palpation  
3.4 Check the possibility of twins and adjust position of the lead foetus where required  
3.5 Manipulate a malpresentation physically into the correct position where required  
3.6 Apply calving ropes/chains are placed on the calf above the front fetlocks and appropriate calf pulling equipment in the case of dystocia, without causing undue harm to the female  
3.7 Bring in specialist support in if normal assistance procedures are not adequate to assist the calving  
3.8 Apply enterprise animal welfare policies to livestock handling procedures |
| 4. Carry out monitoring after calf has been born | 4.1 Allow cow to rest and encourage cow to lick the calf as an initial bonding  
4.2 Check calves that have been assisted for clear airways  
4.3 Leave the placenta for the cow to ingest after calving  
4.4 Treat and record cows with retained placentas or other abnormalities |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and use safe work practices in the calving environment
- carry out cow husbandry procedures and recognise signs of imminent calving
- apply contingency measures for calving in the event of difficulties
- prepare calving environment, materials and resources to industry standards
- ability to correctly apply calving ropes/chains and use suitable calf pulling equipment
- monitor cow condition and recognise abnormal behaviour/presentations
- ability to manual palpate and recognise simple malpresentations
- recognise abnormalities in calving behaviour, expulsion of foetus and placenta, and progress of calf immediately after birth
- recognise when normal assistance procedures are not adequate to assist the calving and specialist veterinary support is required
- maintain a safe and secure post-calving environment
- demonstrate safe and environmentally responsible workplace practices
- apply relevant work health and safety requirements
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- calving behaviour and basic health and nutritional requirements as directed
- calving equipment and materials, their components and functions
- calving intervention and non-intervention strategies
- normal calf presentation v abnormal that may need assistance
• problems associated with calving and intervention and follow up treatment
• enterprise policies with regard to calving down, recording and reporting routines
• health and injury hazards associated with handling cattle
• personal protective clothing and equipment, and when and how it should be used
• procedures for cleaning and maintaining treatment equipment and materials
• relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety and animal welfare.

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine and identify animal welfare requirements of relevant legislations, regulations, codes of practice and industry and workplace procedures
- comply with animal welfare requirements by carrying out workplace procedures, reporting non-conformance, taking appropriate corrective actions and completing record keeping
- participate in workplace animal welfare processes by reporting animal welfare issues and taking part in animal welfare induction, training and programs
- participate in workplace and/or industry animal emergency training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations and codes of practice
- basic requirements for ensuring the welfare of livestock described in the relevant Codes of Practice
- workplace and/or industry animal welfare procedures and animal emergency procedures
- workplace and/or industry procedures for reporting and recording animal welfare concerns, non-conformance and malpractice in the workplace

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.
Assessors must satisfy current standards for RTOs

Application

This unit of competency describes the skills and knowledge required to monitor livestock in an intensive production system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes or practice and sustainability practices.

This unit applies to beef cattle, dairy cattle, sheep, goats and pigs.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor animal health status
- identify animals requiring treatment
- determine the type and scope of treatment
- identify work health and safety hazards, assess risks and implement control measures associated with administering treatments to animals
- handle, restrain and treat animals without compromising animal welfare
- monitor animals post treatment and complete workplace recording requirements
- implement relevant animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information to be gathered from livestock production plans, animal health plans and individual animal records
- signs of health, signs of ill health and methods of assessing livestock health
- biosecurity requirements, husbandry and management strategies and procedures for ill or injured animals
- methods for humane and safe handling and restrain of animals
- common diseases of the livestock species, and strategies for treatment and management of such diseases
- typical and common medications, vaccines, the routes of administration in animals and keeping/storage of such medications
- work health and safety requirements associated with administering treatments to animals
• principles and regulations for veterinary medicines treatment and Withholding Periods in animals
• environmental impacts of administering treatments to animals and strategies to mitigate these impacts
• enterprise heat load management plans
• types of and disposal methods for organic and non-organic waste
• documentation and type of records that need to be completed for animal treatments

Assessment Conditions
Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor ration and water levels and respond to issues as required
- inspect pen status and condition and respond to issues as required
- assess manure condition and respond as required
- check pen hygiene and respond to issues as required
- report and record incidents
- communicate with work team and supervisors
- implement relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information on rations, water, housing infrastructure and feeding infrastructure that can be gathered from livestock production and feeding plans
- principles and elements of nutrition and the impact of nutrition on livestock production
- nutritional requirements of different livestock species, classes and life stages
- impacts of poor nutrition and unsuitable rations on livestock production, and strategies to mitigate these impacts
- how rations can be adjusted or modified to benefit sick animals
- housing requirements and housing management of different livestock species, classes and life stages
- feeding and water requirements, and feeding and water management of different livestock species, classes and life stages
• impacts of unsuitable housing, feeding and watering infrastructure on livestock and strategies to mitigate these impacts
• effects of weather on housing and feeding infrastructure and strategies to mitigate such effects
• methods for using manure as assessment of livestock health
• methods for maintaining, cleaning and removing waste from housing and feeding infrastructure
• documentation, record keeping and methods for monitoring effectiveness of adopted strategies
• relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to conduct the most efficient and humane mulesing procedure in circumstances where all alternative methods of breech flystrike prevention have been evaluated and mulesing is considered the most appropriate of these for the long-term welfare of the sheep.

This unit applies to sheep farmers and contractors in the livestock industry who normally operate under limited supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

</tr>
</tbody>
</table>
| **1. Conduct pre-mulesing evaluations** | 1.1 Identify and comply with relevant State/Territory legislation, regulations and animal welfare standards and guidelines  
1.2 Identify industry standards and guidelines  
1.3 Seek expert advice and discuss alternative strategies to manage flystrike susceptibility prior to undertaking mulesing procedures  
1.4 Confirm workplace requirements for use of mulesing  
1.5 Conduct pre-operative evaluation of sheep  
1.6 Assess risks associated with mulesing procedure and implement measures to control the risks such as using appropriate Personal Protective Equipment |
| **2. Prepare for mulesing operations** | 2.1 Identify and order all required supplies and equipment in advance  
2.2 Monitor weather conditions to determine optimal conditions for operation and recovery of sheep from the procedure  
2.3 Select suitable time of day for operation to minimise the separation time of lambs and ewes  
2.4 Engage adequate number of skilled workers  
2.5 Select appropriate yards, paddocks and pastures for each mob and each day to allow adequate time for mothering up of lambs after separation from the ewes  
2.6 Use appropriate procedures for mustering, movement and handling so that stress to sheep is kept to a minimum  
2.7 Allow lambs to settle and cool after yarding |
| **3. Select, maintain and use appropriate equipment** | 3.1 Maintain all equipment in clean, hygienic and working conditions to reduce the risk of infection and cross-infection in sheep  
3.2 Maintain cradles to be used for mulesing in good working condition and can be operated to ensure minimal risk to the operator or lamb, especially when loading and unloading  
3.3 Set, grind and sharpen mulesing shears to working standards  
3.4 Disinfect mulesing shears after sharpening, before use and between each animal  
3.5 Prepare wash-down, soaking and disinfecting containers for use  
3.6 Prepare and test chemical application equipment to check for operational efficiency  
3.7 Clean and disinfect all equipment at the end of operation and store appropriately to minimise contamination |
<table>
<thead>
<tr>
<th>Element</th>
<th>Performance criteria</th>
</tr>
</thead>
</table>
| 4. Conduct mulesing procedures | 4.1 Conduct all procedures in accordance with work health and safety, animal welfare and biosecurity requirements  
4.2 Maintain a high standard of hygiene throughout the operation in relation to facilities, operators’ hands, handling and equipment  
4.3 Handle lambs calmly and use appropriate restraints such as cradles  
4.4 Perform mulesing procedure in accordance with model code of practice and industry standards  
4.5 Apply pain relief to the wound immediately after the procedure in accordance with industry standards and legislative requirements, and following label and Safety Data Sheet (SDS) instructions  
4.6 Apply insecticide dressing to the surrounding intact wool bearing skin (not the wound) immediately after the procedure in accordance with industry standards and following label and SDS instructions  
4.7 Continually evaluate wound symmetry, size and position, and breaks in selvage (muscle fascia)  
4.8 Remove lambs from cradles so they land gently on all four feet |
| 5. Conduct post-mulesing management procedures | 5.1 Allow lambs, following release, to 'mother-up' to ewes as soon as possible  
5.2 Provide immediate treatment for lambs that are abandoned or unable to stand or walk  
5.3 Monitor lambs for abnormal signs such as infection and sepsicaemia  
5.4 Maintain and update required documentation and records |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of mulesing
- identify optimal conditions for carrying out mulesing procedures
- conduct pre-operative evaluation of lambs submitted for mulesing procedures and risk assessment in consultation with sheep manager
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with industry best standards and legislative requirements
- follow low stress stock mustering, movement and handling procedures
- carry out mulesing operations in accordance with industry recognised best practice mulesing techniques and hygiene standards
- follow appropriate procedures and label directions to provide pain relief plus insecticide dressing as required
- monitor animals' behaviour post-mulesing for health and well-being including the ability to recognise signs of post-mulesing complications
- communicate post-mulesing management requirements to sheep manager
- accurately document and maintain appropriate records
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare and biosecurity requirements
- relevant codes of practice and industry standards for mulesing
Assessment Requirements for AHCSK334 Plan, prepare and conduct mulesing procedures

Date this document was generated: 18 March 2019

- reasons and requirements for mulesing in sheep
- body condition scoring (BCS), breech wrinkle scoring (BRWR) and breech cover scoring (BCOV) in lambs and adult sheep
- methods and strategies of flystrike control
- effects of weather, environmental, facility, flock, individual animal and human factors on mulesing operations
- use and maintenance of materials and equipment for mulesing
- principles and maintenance of hygiene in mulesing operations
- methods and techniques for handling and restraint of adult sheep and lambs
- use of pain relief and insecticide treatment in mulesing procedures
- anatomy and external features of sheep
- health and animal welfare implications of post mulesing complications in sheep
- signs of ill health and related management strategies in sheep
- use of and regulatory considerations for the use of disinfectants
- relevant care, husbandry and management strategies for sheep flocks
- relevant legislation, regulations and codes of practice, including those relating to work health and safety, animal welfare, veterinary practitioner/surgeons’ Acts, stock diseases and waste disposal, agricultural and veterinary chemical use

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- conduct mulesing procedures

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to plan, prepare and conduct Dropped Ovary Technique (DOT) procedures for controlling fertility in females in extensive beef herds, where alternative options for the management of cull heifers and cows, other than spaying, have been evaluated but deemed unsuitable or unavailable.

This unit applies to cattle producers and contractors in the livestock industry who normally operate under limited supervision. It is essential that candidates who undertake this unit have at least one year’s prior experience working with cattle.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes or practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit. Regulations in some States and Territories restrict the conduct of the DOT procedure to registered veterinarians. There is a direct link between this unit of competency and approval for lay operators to perform the DOT procedure in some State/Territory jurisdictions.

</table>
| 1. Conduct pre-DOT evaluations | 1.1 Identify and comply with relevant State/Territory legislation, regulations, codes of practice and animal welfare standards and guidelines  
1.2 Discuss alternatives to ovariecotomy (spaying) with cattle manager and carefully consider them prior to undertaking DOT procedure  
1.3 Confirm pre-operative evaluation of cattle submitted for ovary dropping with cattle manager  
1.4 Identify and discuss risks associated with DOT procedure with cattle manager |
| 2. Prepare for DOT operations | 2.1 Monitor weather conditions to determine optimal conditions for operation  
2.2 Select time of day for operation to minimise animal stress  
2.3 Engage adequate numbers of skilled workers  
2.4 Select appropriate holding yards, forcing yards, race and settling yards  
2.5 Follow low-stress stock mustering, movement and handling procedures  
2.6 Allow cattle to settle and cool after yarding |
| 3. Select, maintain and use appropriate equipment | 3.1 Ensure all equipment is well-maintained and in a clean and hygienic condition to reduce the risk of infection and cross-infection  
3.2 Ensure cattle crush used for procedure is maintained in good working order and operated to ensure minimal risk to the operator and animal, especially when loading and unloading  
3.3 Prepare wash-down, soaking and disinfecting containers and position ready for use  
3.4 Prepare disinfectant solution in accordance with the label and Safety Data Sheet (SDS) directions  
3.5 Sharpen ovariotome regularly and disinfect before use and between each procedure  
3.6 Clean and disinfect all equipment at the end of operations and store appropriately to minimise contamination |
| 4. Conduct DOT | 4.1 Conduct all procedures in accordance with animal welfare |
## Element | Performance criteria
--- | ---
Procedures | Requirements, biosecurity requirements and work health and safety standards
4.2 Maintain a high standard of hygiene throughout the procedures in relation to facilities, hands, handling and equipment
4.3 Handle cattle quietly in the holding yards, forcing yards and race so that they are relatively calm when they reach the crush
4.4 Identify common DOT procedural impediments and plan remedial actions
4.5 Provide pain management in accordance with legislative requirements
4.6 Perform DOT procedures in accordance with industry best practice standards and processing rates
4.7 Apply identification earmarks or ear tags to cattle upon completion of procedures, in accordance with relevant State/Territory legislative requirements
4.8 Release and allow ovariectomised animals to settle on to feed and water in the settling yards for several hours, before moving them quietly to pasture

5. Carry out post DOT procedures | 5.1 Record the identity of the cattle and date of the procedure, with details of significant observations where required
5.2 Inspect cattle regularly and with minimal disturbance for signs of post-operative complications during the healing process and take appropriate action where required

### Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

### Range of Conditions

### Unit Mapping Information
This unit is equivalent to AHCLSK335A Conduct dropped ovary technique procedures for spaying cattle.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of DOT procedures in consultation with cattle manager
- identify optimal conditions for carrying out DOT procedures
- conduct pre-operative evaluation of cattle submitted for ovary dropping and risk assessment in consultation with cattle manager
- comply with animal welfare legislation, animal welfare standards and guidelines, State and Territory veterinary surgeons’ or practitioners’ legislation and regulations and relevant codes of conduct
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with legislative requirements
- follow low-stress stock mustering, movement and handling procedures
- carry out DOT procedures in accordance with industry recognised best practice DOT procedure and processing rates, implement remedial actions and hygiene standards
- communicate post-spay management requirements to cattle manager
- accurately document and maintain appropriate records
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alternative options available to control fertility in cattle
- animal welfare and biosecurity requirements for the use of DOT in cattle
- anatomy and reproductive features of cattle
• body condition scoring of cattle
• relevant cattle nutrition and husbandry requirements for the specific cattle management system
• industry recognised best practice DOT procedure and processing rates
• use of, and regulatory considerations for the use of disinfectants
• health and animal welfare implications of post-operative complications of the use of DOT in cattle
• animal welfare legislation, animal welfare standards and guidelines, State and Territory veterinary surgeons’ or practitioners’ legislation and regulations and relevant codes of conduct as they apply to DOT
• relevant work health and safety requirements

Assessment Conditions
Competency is to be assessed in the workplace OR the workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for performance evidence must be conducted in an on-farm workplace situation with access to appropriate female cattle, facilities and equipment.

Assessment for the following performance evidence must be conducted on live animals:
• conduct DOT procedures
Assessors must satisfy current standards for RTOs.

<th>Release</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to handle, ride and train horses to muster, move and separate livestock. It covers caring for horses and equipment, and addresses the potential risks associated with working with and around horses and livestock.

This unit applies to individuals who have experience working in the livestock industry and in riding educated, compliant and manageable horses to muster and check stock on grazing properties. Work is normally carried out independently, under broad direction according to workplace procedures.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- AHCLSK218 Ride educated horses to carry out basic stock work

Note the following chain of prerequisites that also applies to this unit.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has cared for, ridden and trained at least two different horses for stock work. The following points must be demonstrated for each horse:

- identifying work health and safety hazards and implementing safe work procedures
- selecting and maintaining saddlery and equipment
- handling and preparing horses for riding and livestock work
- using calm and humane handling methods to minimise undue stress and risk to horses, handlers, and livestock according to animal welfare requirements
- developing a working relationship with the horse or horses in own care
- monitoring health and condition of horses, including carrying out basic hoof care and cleaning
- identifying signs of ill health, injury, or poor condition and administering basic treatments
- training horses to:
  - calmly carry out required movements for working stock, including safety movements, stops, turns and rollbacks
  - work and control a mob of livestock as a whole
- riding, controlling and stopping the horse to carry out checking, mustering and moving livestock as part of property operations
- assessing and monitoring horse behaviour during riding activities and taking corrective action if required
- completing post-ride activities including:
  - cleaning, feeding and watering horse
  - checking and maintaining tack
  - completing records as required by workplace.
Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common horse colours and markings, gender and other identifying features
- horse movement and behavioural characteristics, and learning theories relevant to stock work
- livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant industry standards and practices, and workplace procedures and guidelines for horse riding and riding safety, including lungeing, riding in a yard before riding outside, and one-rein stops
- approaches to horse education for stock work and associated learning theories
- basic care husbandry and management procedures for horses
- common signs of unsoundness, including injury, disease, work stress or other disorders in horses
- basic anatomy and physiology of the horse
- use of horses for workplace operations
- care and maintenance of working gear
- horse conformation and work readiness or level of education
- horse handling and riding techniques
- key requirements of work health and safety and animal welfare regulations, and codes of practice relevant to working and interacting with horses.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
  - a workplace or an environment that accurately represents workplace conditions containing livestock handling facilities
- resources, equipment and materials:
  - various live, suitably educated, compliant and manageable horses to be trained for stock work and assessed as suitable for the experience and skill of the individual
  - livestock to use in training horses
  - appropriate tack for individual, horse and stock work activity
  - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
- specifications:
  - work instructions and workplace procedures for training, caring for and riding horses for stock work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to develop feeding plans for a production system.

This unit applies to supervisors and unit managers who are responsible for nutrition and feeding in an intensive livestock production facility.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

--- | ---
**Elements describe the essential outcomes.** | **Performance criteria describe the performance needed to demonstrate achievement of the element.**

3.8 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls for feed preparation and feeding operations
3.9 Comply with enterprise biosecurity policies

4. Supervise feeding
4.1 Supply rations to the livestock according to the production program and schedules devised
4.2 Make potable water available continuously to the livestock
4.3 Monitor the health and wellbeing of the livestock in line with enterprise requirements and animal welfare policies
4.4 Monitor and report any change in production levels as a direct result of changes to feed types, ingredients or schedules
4.5 Give advice to operational staff during the feeding operation when requested, or when the need is observed
4.6 Remove all waste materials and substances from the site and store, or disposed of, according to legislation, environmental policies and enterprise procedures
4.7 Collate and store documentation according to the requirements of the organisation

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- discuss feed and nutritional content with nutritionist and managers
- identify a range of raw ingredients
- operate a range of feeding equipment
- perform basic trouble shooting of the feeding operation
- monitor animal intake and performance
- read and interpret manufacturers' specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- interpret and apply task instructions, communicate with work team and supervisor, and record and report faults, workplace hazards and accidents
- accurately measure and calculate volumes, consumption and storage requirements
- complete the required records of feed use and livestock performance
- comply with enterprise biosecurity, environmental and animal welfare procedures and policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- control of common livestock diseases and preventative measures including the placement of medications in feed
- growth and development in livestock
- milling systems
- dietary needs and analysis of feed samples
- organisations sampling requirements and techniques
- where to access appropriate legislative requirements, manufacturer’s instructions and enterprise procedures/instructions
- silo operations and configuration, machinery and operating practices
- codes of practice and enterprise policies with regard to work health and safety, biosecurity, environment and animal welfare
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures.

**Assessment Conditions**

Competency is to be assessed in the workplace, OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research predicted seasonal pasture production for the area
- estimate the feed value of a standing pasture at different times of the year
- calculate the feed demand for different types of livestock and production phases
- match feed supply and demand
- assess feeding plan alternatives
- develop and document a feeding plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional and daily energy requirements of livestock
- water quality and livestock tolerances
- nutritional value of different feedstuffs
- assessment procedures to ascertain livestock condition
- methods of assessing pastures quality and quantity
- pasture livestock carrying capacity
- supplementary feeding strategies
- change in nutritional requirements during late pregnancy and lactation

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine measurable indicators, specifications and targets for the intensive enterprise
- assess the resources required for unit operations
- establish processes/strategies, procedure and controls to meet quality assurance requirements and production targets
- communicate production program to relevant personnel and complete administration activities
- manage livestock and the production environment
- implement quarantine procedures and monitor disease status of stock
- manage effluent and waste generated by production operations
- monitor and adjust production system for output, QA compliance, costs and profitability.
- prepare recommendations for future production programs based on the conduct of the operations, the data collected and the discussions with enterprise staff and contractors
- implement relevant work health and safety, biosecurity, animal welfare and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type and use of information that can be gathered from enterprise programs, documents and records
- types of resources required, types of products, methods for assessing and calculating resources and products by using information from enterprise programs, documents and records
Assessment Requirements for AHCSI405 Implement intensive production systems

- type of measurable indicators, specifications and targets for the production system using information from enterprise programs, documents and records
- functions, parameters and scope of enterprise production programs and production plans
- relevant regulatory, industry and enterprise approvals, licences, authorities, documentation, records and reporting requirements for enterprise production operations
- manpower, materials and equipment requirements for carrying out effective and efficient enterprise production operations
- relevant work health and safety requirements
- signs of health, signs of ill health and methods of assessing livestock health
- types and functions of housing and feeding infrastructure relevant to the enterprise production operations and methods for assessing damage, wear and tear to infrastructure
- techniques, procedures and requirements for post-mortem examination of livestock carcasses
- common diseases of livestock, and methods for assessing and evaluating disease status
- relevant biosecurity requirements, quarantine requirements, functions, components and facilities required of an enterprise quarantine system
- regulatory and industry requirements for effluent storage and disposal, types and functions of effluent storage and disposal systems, and methods for assessing and calculating effluent production
- regulatory and industry requirements, methods and systems for waste and debris storage and disposal
- relevant environment requirements and sustainability practices
- functions and aspects of production environment maintenance programs
- relevant animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to oversee animal marking operations.

This unit applies to livestock producers and those with supervisory responsibilities within livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

| 1. Prepare marking plan | 1.1 Obtain and clarify information and instructions with regard to marking operations  
1.2 Ensure timing of marking and calendar of operations fit so that growth checks are minimised  
1.3 Determine animal groupings, marking operations and sequencing  
1.4 Assess and determine resource requirements within enterprise budgetary constraints  
1.5 Prepare marking plan and ensure sufficient flexibility to adapt to changes during marking operations |
| 2. Co-ordinate and arrange resources | 2.1 Locate and arrange suitable locations for undertaking marking operations and facilities to meet requirements of marking schedules  
2.2 Arrange and provide appropriate and adequate equipment, materials and health treatments on site  
2.3 Confirm staff and provide them with safety, task and operational briefings  
2.4 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls in line with enterprise polices  
2.5 Time and supervise marking operations to ensure mismothering is minimised and animal welfare requirements are met |
| 3. Monitor marking operation | 3.1 Monitor implementation of marking plan for efficiency and effectiveness in terms of achieving enterprise objectives  
3.2 Monitor condition and health status of animals, take appropriate action to rectify risks to animal welfare, and report abnormalities where necessary  
3.3 Maintain effective worksite communication to ensure efficient workflow and address immediate problems  
3.4 Document data with regard to operational processes and outcomes for continual assessment and management planning |

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify hazards, assess risks and implement and monitor of safe operating procedures
- plan, cost and schedule resource requirements
- prepare and implement a work plan for marking
- prioritise and schedule marking operations
- determine and allocate staff roles and responsibilities
- monitor the health and well-being of animals during and after marking
- manage staff and operations and establish and monitor performance targets
- document and prepare plans and reports for the understanding of staff and management
- implement and monitor relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- management processes and procedures
- cost analysis techniques
- procedures for planning and developing marking plans
- marking and production plans
- codes of practice with regard to animal marking and animal health and welfare
- use of veterinary medicines and their administration
- animal marking methods and procedures
- work health and safety and animal welfare legislation, codes of practice and enterprise requirements
- animal behaviour and nutritional requirements
Assessment Conditions

Competency is to be assessed in the workplace or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- analyse key production data, herd/flock information and market requirements
- set production targets and identify resources needed to achieve them
- plan accommodation that meets animal welfare and production requirements
- develop feeding plans and evaluate alternatives for feed purchasing, milling and distribution
- determine work responsibilities and staffing requirements
- handle waste and effluent in line with environmental requirements and legislation
- monitor, review and adjust intensive production plans
- implement relevant work health and safety requirements
- implement relevant biosecurity, animal welfare and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- functions, parameters and scope of production plans
- type and use of information from enterprise production plans and enterprise production data that can be used to formulate production system planning and production unit performance targets
- type and use of information on herd/flock characteristics; regulatory, industry and enterprise requirements; industry and enterprise standards and benchmarks; market specifications for product qualities, product standards and market trends; production unit’s history and data, for the formulation of the production system plan and performance targets
Assessment Requirements for AHC1SK407 Plan and monitor intensive production systems

Date this document was generated: 18 March 2019

- types, quantities, assessment and calculation, procurement and selection of manpower, material, equipment and other resources required for the production plan
- types and functions of, and methods for assessing and calculating requirements of, housing, effluent management and environmental management infrastructure
- efficiency and cost benefit ratios of different types of housing, effluent management and environmental effluent infrastructure and systems, taking into account animal welfare requirements and enterprise production targets
- types, functions and cost benefit ratios of livestock feeds
- relevant aspects and impacts of production cycles and staff job roles on production planning
- relevant regulatory, industry and enterprise documentation, records and reporting requirements for implementation of production plans
- methods for assessing and evaluating production plans
- relevant work health and safety requirements
- relevant environmental requirements and sustainability practices
- relevant biosecurity requirements
- relevant animal welfare practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to carry out pregnancy testing in livestock.

This unit can be delivered in the context of the following industries: cattle and horses.

This unit does not cover ultrasound scanning for pregnancy diagnosis.

This unit applies to those whose job role includes testing animals for pregnancy using manual diagnosis procedures. Veterinary advice may need to be sought in some cases where pregnancy symptoms are difficult to detect, or animals are to be identified as pregnant for sale.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for pregnancy testing
- coordinate and arrange support for pregnancy testing
- arrange support for pregnancy testing
- draft animals and source information on joining to assist in pregnancy testing
- restrain animals for pregnancy testing using humane methods and facilities
- carry out manual pregnancy diagnosis procedures in adherence with animal welfare codes
- monitor animals after pregnancy testing
- maintain records of pregnancy testing
- apply relevant animal welfare requirements
- implement relevant work health and safety animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant anatomy and physiology of the animal species
- reproductive physiology and pregnancy development of the animal species
- husbandry and management strategies for pregnant and non-pregnant animals
- pregnancy testing methods
- reproductive diseases and complications in the animal species
- relevant work health and safety, animal welfare and biosecurity legislation, codes of practice and industry and enterprise policies
- recording and reporting systems used in conjunction with pregnancy diagnosis and animal breeding programs.
Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- carry out pregnancy diagnosis procedures

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor safe work practices and appropriate hygiene procedures
- monitor the health and wellbeing of animals
- detect possibility of disease through parameters such as loss of bodyweight behaviour or length of time required to eat food
- recognise clinical symptoms (normal vs. abnormal)
- recognise abnormal physiological and behavioural signs in livestock
- collect samples for testing for internal parasites and diseases
- implement preventative health strategies
- administer vaccines and medications to animals
- maintain records associated with animal health programs
- implement relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- symptoms of common livestock diseases and parasite infestations
- storage conditions for a range of chemicals, including veterinary chemicals
- types of vaccines and how they work
- zoonotic diseases and their mode of transmission
- animal anatomy and physiology relevant to the collection of tissue, organ, blood and other biological samples in live and dead animals and the conduct of post-mortems
- relevant biosecurity requirements
• management practices and processes to minimise noise, odours, and debris from the livestock operations
• relevant legislation, regulations and codes of practice relating to the use of veterinary medicines, animal diseases, animal welfare and waste and environmental management,
• relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select, purchase and induct livestock for feedlotting according to enterprise requirements
- source advice on feed and feeding regime with nutritionist and managers
- oversee the preparation of rations for feedlot livestock
- supervise feeding of feedlot livestock and provide advice to staff where required
- monitor livestock performance on weight gains and meeting carcass criteria and diagnose feeding problems and remove animals for treatment
- review procedures in response to feedback from slaughter point and customers
- complete the required records of feed use and livestock performance
- implement relevant work health and safety, animal welfare, biosecurity and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types and use of information to be gathered from enterprise plans and management for the determination of suitable feedlot livestock to be procured
- breeds, classes and characteristics of feedlot livestock
- criteria for assessment and selection of feedlot livestock
- regulatory, industry and enterprise requirements and procedures for purchase, delivery and movement of feedlot livestock
- principles of nutrition, feeding strategies and feeding management of feedlot livestock
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of feedlot livestock
- types, forms and characteristics of livestock feeds
Assessment Requirements for AHC1SK410  Supervise feedlot operations

- process and requirements of a cost benefit analysis
- procedures and resource requirements for mixing, blending and milling feed ingredients and feeds
- relevant work health and safety requirements
- signs of health, ill health, good condition and poor condition in livestock, and methods for assessing livestock health and condition in relation to nutrition and feeding
- possible production changes in relation to changes in nutrition, feeds and feeding strategies
- types of and disposal methods for organic and non-organic waste
- relevant environmental requirements and sustainability practices
- regulatory, industry and enterprise requirements for selection, movement and dispatch of livestock for slaughter
- types and use of information that can be gathered from slaughter facilities and downstream customers to formulate, improve or adjust nutritional and feeding strategies for feedlot livestock
- relevant animal welfare and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to supervise the natural mating of livestock.

This unit applies to livestock producers and those with supervisory responsibilities within pastoral production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor of safe operating procedures
- carry out physical examination of sires and females for health and breeding soundness
- prepare animals for joining
- monitor joining activity and returns to oestrus
- access, interpret and record data associated with mating program
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mating behaviour
- anatomy and physiology of the reproductive organs and reproductive process in animals
- required live weights and conditions for mating
- environmental influences and their effects on joining
- ovulation stimulation and synchronisation
- enterprise’s breeding programs and selection criteria (EBV & ASBV)
- pregnancy testing/ scanning procedures
- animal health and abnormalities
- relevant State/Territory legislation, regulations and Codes of Practice with regard to work health and safety and animal welfare
- enterprise and industry policies with regard to recording and reporting requirements
- identification of veterinary and non-veterinary procedures
Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research livestock price trends and budgeted returns
- organise transport
- negotiate on price and terms
- assess livestock and condition
- arrange transport and insurance
- check on health status and condition of livestock
- complete records associated with livestock transport
- implement relevant quarantine/biosecurity practices where required
- implement relevant work health and safety requirements
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock assessment for relevant features / traits
- livestock selling procedures
- matching livestock to feed available
- livestock transportation
- animal health procedures
- livestock insurance
- relevant legislative work health and safety requirements especially as they relate to livestock sales, livestock products, animal welfare, animal transportation for local and export markets, and safe livestock handling techniques
• enterprise and industry policies and codes of practice with regard to livestock sales, livestock transportation, and recording and reporting requirements (NLIS)

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop selection criteria for a breeding program
- select animals that have defects in conformation and/or productivity
- select animals that display characteristics associated with desirable genetic traits
- select animals according to a breeding program’s selection criteria
- assess and record performance information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of genetic selection for multi traits
- structural abnormalities and their potential impact on production
- correlated traits
- market requirements and related physical and measurable traits
- enterprise animal selection criteria
- strategies for animal selection - including individual traits, measured performance, Estimated Breeding Value (EBVs & ASBVs), and indexes
- use of breeding value percentile tables

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.
Assessors must satisfy current standards for RTOs.

</table>

Application

This unit of competency describes the skills and knowledge required to escort livestock during export.

This unit applies to animal attendants who escort livestock on sea voyages.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They may provide direction to others, and use discretion and judgement in the selection, allocation and use of available resources. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCLSK331 Comply with industry animal welfare requirements
AHCLSK307 Euthanase livestock

Unit Sector

Livestock (LSK)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out pre-shipping and consignment administration procedures
- make preparations for loading of livestock
- load livestock onto the carrier
- handle, treat and feed livestock in accordance with relevant animal welfare, biosecurity, health and environmental legislation and codes of practice and in consideration of customer requirements
- identify signs of ill health and injury, or signs of abnormal or depressed appetite
- handle and restrain livestock for observation and treatment as required
- oversee the care of livestock in transit
- communicate effectively with exporting agents and related agencies, as well as the Master/Captain, officers and seamen on board
- complete export documentation including daily records of animal observations and conditions
- communicate effectively with exporting agents and related agencies, as well as transportation officers and staff
- implement relevant work health and safety, animal welfare, biosecurity and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare, biosecurity and quarantine, and environmental legislation and codes of practice
- regulatory requirements and industry standards for the transport of livestock using sea carriers
- typical exporter and shipping company requirements, policies and procedures
- how conflicts should be handled between regulatory requirements and requirements of exporters or shipping companies
- working culture and specifications for imported livestock of common importing countries
- care, husbandry and management procedures for health and welfare of all classes of livestock - including pregnant livestock - in transit
- methods and techniques for handling and restraint of all classes of livestock
- methods and techniques for loading and unloading of livestock
- signs of health, anatomy and physiology of the livestock species
- zoonoses of livestock and preventative health strategies for humans and livestock
- common diseases of the livestock species and preventative health strategies
- signs of ill health and related management strategies in the livestock species
- methods and techniques of euthanasia
- disposal of animal carcasses on-board sea carriers
- on-board procedures and responsibilities
- use and maintenance of personal protective equipment, veterinary, euthanasia and disinfectant materials and equipment
- invoice, receipt and document requirements at both ends of the transport operation
- strategies for effective communication between all parties to the consignment, relevant organisations and agencies, and on-board carrier personnel

**Assessment Conditions**

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- load and transport livestock

Competency for the unit can be determined in a single species.

Assessors must satisfy current standards for RTOs

</thead>
<tbody>
<tr>
<td>Release 1</td>
<td>This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0</td>
</tr>
</tbody>
</table>

Application

This unit of competency describes the skills and knowledge required to manage horses for stock work, including coordinating specialist services from veterinarians and farriers.

The unit applies to individuals, experienced in riding horses for stock work, who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources, and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

<table>
<thead>
<tr>

### Elements

**Elements describe the essential outcomes.**

<table>
<thead>
<tr>
<th>Elements</th>
<th>Performance Criteria</th>
</tr>
</thead>
</table>
| **1. Manage horse condition and health** | 1. Develop and implement workplace procedures for maintaining health and welfare of horses in consultation with workplace staff  
1.2 Assess, report and document soundness and working condition of horses in the workplace  
1.3 Ensure proper selection, use and maintenance of appropriate personal protective equipment (PPE)  
1.4 Identify unsound or unhealthy horses and diagnose or establish reasons for their condition, such as seeking veterinary advice where required  
1.5 Administer treatment and implement management plan for unsound or unhealthy horses under supervisor or veterinary supervision, according to plan  
1.6 Keep accurate records of horse identification, treatments administered and management plans |
| **2. Manage nutritional requirements of horses** | 2.1 Develop and implement feeding plans for horses in the workplace, taking into account daily and seasonal factors affecting nutritional requirements  
2.2 Provide supplementary feeding programs to workplace horses to ensure they are in optimum physical condition and health for stock work  
2.3 Identify potential nutritional problems and take preventative or corrective action through the use or withdrawal of supplementary feeding  
2.4 Develop and implement work programs for horses according to their condition and nutritional status |
| **3. Supervise activities and tasks requiring the use of horses for workplace personnel** | 3.1 Conduct risk assessments for activities and tasks requiring the use of horses, and implement and monitor the measures to control these risks  
3.2 Match horses in workplace to personnel by rider ability and suitability for tasks  
3.3 Schedule tasks requiring the use of horses, and communicate details to appropriate staff  
3.4 Coordinate tasks requiring the use of horses, and provide supervision to ensure that horses and personnel work within industry and workplace requirements |
Elements describe the essential outcomes.

Performance Criteria

3.5 Coordinate breaking-in of horses by contractors or staff, and provide supervision to ensure that horses and personnel work within industry and workplace requirements.

3.6 Provide inexperienced horses with stock training by experienced riders.

3.7 Maintain regular communication with workplace staff and contractors to ensure smooth operation.

3.8 Monitor outcomes of activities and tasks requiring the use of horses, and record in line with workplace requirements.

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

<table>
<thead>

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has demonstrated management of at least two horses and two workers undertaking stock work on a property, including:

- developing and implementing management plans for the condition and health of horses in the workplace
- monitoring and managing the health and welfare of horses and developing feeding plans for horses in the workplace
- developing work programs for horses in the workplace
- matching horse type and experience to rider and task
- supervising and coordinating activities and tasks requiring the use of horses in the workplace, and monitoring the outcomes
- managing the provision of training for inexperienced horses
- identifying and treating ill or injured horses and consulting with veterinarians
- coordinating the horse work of other property personnel such as horse breakers, veterinarians, farriers and other farm staff
- communicating task requirements to staff and arrangements for breaking-in of horses to staff and contractors
- observing, identifying and reacting appropriately to environmental implications and work health and safety hazards
- applying relevant animal welfare and biosecurity requirements to managing horses.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of work health and safety and animal welfare regulations and codes of practice relevant to working and interacting with horses
• key requirements of biosecurity and environment sustainability requirements relevant to working and managing horses
• industry and workplace policies, procedures and guidelines relevant to the job role
• feeding plan and work program for individual horses in the workplace
• care, husbandry and management procedures for horses
• signs of health, anatomy, physiology and behaviour of the horse
• signs of ill health in horses and management strategies for common illnesses
• strategies for and management of breaking in of horses and training inexperienced horses
• use of horses for workplace operations
• strategies for effective communication in the workplace
• strategies for effective supervision and management of staff in the workplace.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions
• resources, equipment and materials:
  • various horses used in livestock work assessed as suitable for the experience and skill of the individual
  • appropriate tack for individual, horse and stock work activity
  • personal protective equipment (PPE) correctly fitted and applicable to activity for individual
• specifications:
  • work instructions and workplace procedures relating to managing horses
  • access to legislation and industry information related to managing horses
• relationships with others:
  • management and specialists to interact with regarding the management of horses
  • staff to coordinate and match to horse suitability.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Application

This unit of competency describes the skills and knowledge required to plan for livestock production and manage the implementation of such a plan.

This unit applies to farm managers with extensive or intensive livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop livestock production plans
- manage all resources for a grazing enterprise
- implement grazing strategies that match livestock needs and optimise pasture growth
- maintain the farm natural resource base through sustainable practice
- plan and monitor the finances of the production unit
- observe, identify and react appropriately to animal welfare, biosecurity and environmental implications and work health and safety hazards
- monitor and manage animal health, welfare and nutrition
- supervise livestock husbandry operations
- analyse and assess the economic impact of specific situations
- establish processes/strategies, procedures and controls for livestock production
- assess land capability
- comply with legal and taxation requirements
- maintain records of production
- assess, and then adopt profitable innovations
- implement and monitor relevant work health and safety, animal welfare, biosecurity and environmental requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock nutrition
- health and welfare of animals within the production system.
Assessment Requirements for AHCLS1501 Manage livestock production

- key considerations in a livestock breeding operation
- livestock husbandry and management practices
- land capability and its relevance to planning livestock production in the context of the whole farm
- sustainable land use principles and practices applicable in the region
- environmental controls and codes of practice applicable to the enterprise
- budgeting and financing for an enterprise
- cost benefit analysis,
- management practices and processes to minimise noise, odours and debris from the livestock operations
- relevant legislation and regulations relating to soil and water degradation issues, animal health and welfare, biosecurity and chemical use
- relevant work health and safety legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence
The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify appropriate markets and sales opportunities
- calculate cost of production and target sale price
- select sales outlets
- select selling method and negotiate with brokers, sellers and agents
- prepare and implement marketing plan
- ensure that the product meets legislative and industry requirements for fitness for sale
- coordinate sales and transport logistics for livestock products
- analyse sales data and trends to maximise future profit margins

Knowledge Evidence
The candidate must demonstrate knowledge of:
- market specifications for the products produced
- quality assurance procedures and their implementation
- sales outlets
- current and alternate sale methods
- preparation of livestock and transportation systems
- price risk and sales strategies
- sales analysis
- enterprise and industry policies and codes of practice with regard to livestock sales transportation, recording and reporting requirements
- market access requirements - Minimum Residue Levels (MRLs) and the variance between countries, withholding periods after treatment
Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency describes the skills and knowledge required to assess breeding requirements, select livestock for breeding, and monitor and evaluate the breeding program.

The unit applies to managers of livestock properties who are responsible for breeding programs and use of resources appropriate to meet property breeding aims. They take responsibility and exercise autonomy in undertaking complex work analysing, designing and communicating solutions to sometimes complex problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

| 1. Plan breeding program | 1.1 Assess and clarify breeding requirements to meet property or organisational aims  
1.2 Identify and arrange resources to support breeding requirements  
1.3 Select breeding options to optimise results and consistency  
1.4 Undertake economic assessments to establish the feasibility of the breeding objectives  
1.5 Formulate breeding program to meet organisation objectives, and ensure sufficient flexibility to accommodate contingencies |
| 2. Select livestock for breeding | 2.1 Determine selection criteria for the visual and objective methods of selecting livestock based on heritability and economic returns for the property  
2.2 Establish culling and replacement practices to maintain or improve appropriate herd size, animal ratios and grade of livestock  
2.3 Assess genetic gain potential to determine and justify herd or flock structure  
2.4 Source genetic material to optimise genetic gain within the herd or flock from suitable sources  
2.5 Check and monitor selected livestock to ensure condition and welfare status meets breeding program requirements  
2.6 Carry out measurements of production and genetic characteristics, and evaluate results within appropriate breeding program requirements |
| 3. Monitor breeding program | 3.1 Supervise implementation of the breeding program for efficiency and effectiveness  
3.2 Prioritise and implement changes necessary to achieve breeding aims according to breeding program requirements  
3.3 Examine and control allocated resources within organisation budgetary constraints  
3.4 Maintain safe workplace and environmentally responsible practices in line with industry and organisation work health and safety and environment sustainability requirements  
3.5 Observe and comply with relevant legislative requirements associated with livestock production, such as animal welfare and biosecurity requirements |

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has developed and implemented a minimum of one breeding strategy for an operation or property, including:

- identifying genetic information for existing and potential livestock through breed data
- using industry programs to benchmark and identify sources of genetic material
- developing a breeding objective
- implementing selection strategies for livestock
- implementing animal welfare strategies to handle livestock safely and humanely
- monitoring progress in a breeding program and undertaking reviews
- evaluating breeding program
- documenting and reviewing data derived from the breeding strategy
- maintaining a safe and hazard-free workplace environment
- monitoring and minimising impacts to the environment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- difference between genotype and phenotype, the heritability of genetic traits and the basic genetic theory related to genetic correlation of traits
- relevance of generation interval in relation to commercial improvement
- relevance of estimated breeding values in the development of a multi-trait selection strategy
- economic impact of production characteristics
• features of and measurement of production and genetic characteristics used in breeding programs
• relevant work health and safety and biosecurity requirements, and animal welfare and environment sustainability practices
• key requirements of regulations and codes of practice relevant to developing and implementing a breeding strategy, including:
  • work health and safety
  • animal welfare
  • biosecurity
  • sustainability practices.

Assessment Conditions
Assessment of skills must take place under the following conditions:
• physical conditions:
  • a workplace or an environment that accurately represents workplace conditions
• specifications:
  • work instructions and workplace procedures relevant to developing and implementing a breeding strategy
  • organisational documentation relating to breeding information and financial arrangements required to develop a breeding strategy.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify livestock diseases relevant to the workplace and local environment
- develop prevention and treatment strategies for diseases
- implement a proactive risk management approach to managing animal health and welfare
- implement health and welfare strategies appropriate to the livestock species
- calculate dose rates and schedule treatments
- implement and monitor relevant work health and safety requirements
- implement and monitor relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock health and abnormalities
- preventative health strategies
- principles of genetic resistance and immunity
- contingency and operational planning
- relevant animal welfare legislation, regulations and codes of practice
- relevant environmental protection legislation and codes of practice
- treatment applications, handling and consequences of their use
- relevant quarantine, biosecurity and emergency legislation, codes of practices and procedures
- relevant work health and safety legislative requirements
Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1. **Determine the feasibility of an effluent management system**

   1.1 Assess and determine planning parameters that affect the design of effluent management systems
   1.2 Assess and determine statutory, local government and environment authority requirements for effluent disposal
   1.3 Assess and determine the environmental impacts of livestock effluent disposal
   1.4 Evaluate effluent recycling options in conjunction with the enterprise plan
   1.5 Analyse effluent processing options on the basis of their merits and suitability for the environment
   1.6 Obtain information from effluent management specialists on all relevant aspects of effluent management
   1.7 Assess and determine an effluent management system on the basis of a cost benefit analysis

2. **Design an effluent management system**

   2.1 Calculate the volume of livestock effluent using information collected from enterprise plans, industry and enterprise production data and other sources
   2.2 Calculate the volume of water flowing into the effluent management system
   2.3 Calculate storage requirements
   2.4 Obtain professional advice appropriate to the complexity of the task and the financial risk involved
   2.5 Ensure plan and layout include provision of access, availability and the incorporation of technological innovations
   2.6 Assess and evaluate work health and safety hazards and risks, establish safe systems, and maintain records
   2.7 Ensure effluent management system design reflects the requirements of the enterprise business plan, production plan and management plan

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the effectiveness of a range of effluent management systems to meet the requirements of statutory, local government and environment authorities for effluent disposal
- conduct cost benefit analysis of livestock effluent management systems to select a suitable effluent management system
- design and plan the layout of an effluent system that meets environmental standards and enterprise requirements
- design an effluent management system
- incorporate the enterprise work health and safety and environmental management policies into the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, characteristics, disadvantages and advantages of effluent management systems (including storage, recycling, processing and disposal)
- regulatory requirements, including environmental, sustainability work health and safety and biosecurity requirements, industry standards, industry and enterprise production parameters, data and information for the design and planning of effluent management systems
- uses and processes for cost benefit analyses, and their applications in relation to livestock production and effluent management
- types and use of information required, and methods for the assessment and determination of effluent production, output and volume for livestock enterprises
Assessment Requirements for AHCLS1K506 Design livestock effluent systems

- effects and impacts of different livestock production systems on the design and planning of effluent management systems
- types and use of information and advice from other professions or industry sectors that are relevant to livestock enterprises in the design of effluent management systems, including engineering and financial professions

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Application

This unit of competency covers the planning required to determine the genetic selection of a pure breed or cross breeding program to suit the farm environment. The plan will aim to increase production and financial return by using genetic improvement of the livestock for meat production, dairy production and fibre production and the evaluation of the current breeding program. Data is collected and analysed in order to select sires and dams to improve the livestock to meet the product specifications chosen for the enterprise. Evaluation of the breeding program is carried out on completion.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit is applicable to a person who has a role in managing a breeding enterprise. This unit is likely to require consultation with breed societies, importers and distributors of genetic material, local livestock agents, processors and marketers of the product.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- analyse profit for the breeding enterprise
- select suitable market specifications for the enterprise
- develop selection criteria for a breeding program
- select livestock for a breeding program on phenotype and genotype
- assess farm facilities to carry out a breeding program
- use Breed Object index
- arrange Artificial Insemination (AI) and Embryo Transfer (ET) programs
- implement the breeding program
- feed livestock to ensure success of a breeding program
- organise drugs, animal identification and all equipment in clean working order in preparation for the program
- keep breeding and production records
- submit records and information for statistical analysis and registration of livestock
- handle livestock safely and humanely
- interpret feedback information

Knowledge Evidence

The candidate must demonstrate knowledge of:
- theory of cell division and the structure of DNA
- heritability estimates for the selected characteristics
- recording and understanding breed pedigrees
- dominant genetic traits and marker genes
• accuracy of the genetic potential of the selected breeding trait for the program
• genetic defects
• value of heterosis in a breeding program
• ethics and codes of practice for the welfare of livestock on the breeding program
• phenotype selection criteria
• market specifications targeted by the breeding program
• long term breeding aims
• pregnancy testing procedure
• veterinary and non-veterinary standard operating procedures
• sources for genetic information, up to date program design and implementation procedures

**Assessment Conditions**

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply organisational or industry procedures for customer complaints
- investigate the details of and background to the complaint and refer to other parties if required
- negotiate an outcome with the customer if appropriate
- process the complaint according to enterprise policy
- recommend appropriate action arising from the complaint

Knowledge Evidence

The candidate must demonstrate knowledge of:

- State/Territory/Commonwealth legislation, regulations, industry codes of practice, standards and guidelines
- organisational policy and procedures for dealing with complaints
- strategies for dealing with customer complaints
- negotiation and communication strategies
- the individual's role in processing customer complaints

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1. **Contribute to quality customer standards**
   1.1 Access, interpret, apply and monitor customer service standards in the workplace
   1.2 Make contributions to the development, refinement and improvement of service policies, standards and processes
   1.3 Ensure customer interactions are consistent with legislation, codes of practice and enterprise policies

2. **Implement customer service systems**
   2.1 Encourage personnel to consistently implement customer service systems
   2.2 Review customer feedback in consultation with appropriate personnel and analyse when improving work practices
   2.3 Identify customer service complaints and make adjustments to ensure continued service quality
   2.4 Communicate adjustments to all those involved in service delivery within appropriate time frames
   2.5 Coordinate and manage delivery of services or products to ensure they effectively and efficiently meet agreed quality standards

3. **Manage networks to ensure customer needs are addressed**
   3.1 Establish effective regular communication with customers
   3.2 Establish, maintain and expand networks to ensure referral of customers to products or services
   3.3 Establish procedures to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products/services available
   3.4 Establish procedures to ensure that referrals are based on the matching of the assessment of customer needs and availability of products/services
   3.5 Maintain records of customer interaction in accordance with organisational guidelines

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.
Range of Conditions

- research supplier information
- supply Safety Data Sheets (SDSs) with all registered chemicals
- encourage add on sales and represent the enterprise in a professional manner
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential environmental impact of chemicals
- enterprises business values, structure, products and services
- chemical formulations, available proprietary products and their applications
- the content and legal status of registered chemical labels
- relevant HAZCHEM, AGSAFE, Australian Dangerous Goods, work
- health and safety, industry, fair trading, trade practices, and sales of goods legislation
- enterprise policies and procedures relating to customer service
- relevant licences/accreditation regarding the sale and handling of farm chemicals
- work health and safety, pesticides and environmental legislation, codes of practice and enterprise procedures
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to provide advice on agronomic products.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to rural products merchandisers whose job role includes providing advice on agronomic products including fertilisers.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- research sources of agronomic information to retain technical currency in all aspects of agronomy relevant to local district requirements
- engage with and give advice to customers
- ensure that the advice and product type are applicable and suitable for the purpose and growing environment of the client
- encourage add on sales
- represent the enterprise in a professional manner when dealing with customers
- follow enterprise of work health and safety polices

Knowledge Evidence

The candidate must demonstrate knowledge of:
- customer service techniques
- systems and procedures for the safe handling of products
- enterprises business values, structure, products and services
- industry terminology for products
- requirements of local or specific customers
- relevant requirements of work health and safety, industry, fair trading, trade practices, sales of goods, environment and public liability legislation
- agronomic products including fertilizers and crop seeds and their uses
- relevant components of State/Territory Acts relating to fertilisers and certified seeds
Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

**Performance Evidence**

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- take soil, plant tissue and water samples
- use and explain use of nutrient management tools
- provide information on the relationship between soil types, water, crops, fertiliser and soil ameliorant use
- follow enterprise work health and safety policies
- follow enterprise biosecurity and sustainability policies

**Knowledge Evidence**

The candidate must demonstrate knowledge of:

- crop nutrient requirements - both macro and micro nutrients
- effect of soil ameliorants in dispersion and adjustment for acidity or alkalinity (pH)
- fertiliser and soil ameliorant application methods, including timing and frequency of fertiliser and soil ameliorant application to minimise losses
- fertiliser and soil ameliorants availability and relative costs
- industry production regimes and fertiliser practices
- sources of technical information
- major nutrient management risks of leach, run-off, load, blow, mine and how these impact on the environment
- nutrient management advisory tools and processes used by advisers in making a crop nutrition recommendation
- organisational work health and safety and environmental procedures, practices and policies in operating sampling equipment
- packaging and dispatch procedures for samples
• physical, chemical and biological properties related to a healthy soil and environment,
• sampling tools and methods, including soil, plant tissue and water tests; yield monitoring; and electrical conductivity survey
• impact of climate on soil productivity
• environmental impacts including soil structural decline, fertility decline, acidification and salinity, erosion, loss of organic matter, water quality, fertiliser and soil ameliorant impurities, and greenhouse gas emissions
• work health and safety legislation
• use, transport, handling and storage requirements of fertiliser and soil ameliorants in terms of legislation, codes of practice, environmental stewardship and human safety

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate pressure loss due to irrigation components
- calculate pumping requirements
- conduct research of products
- estimate requirements for materials and components from a plan
- identify adverse environmental impacts of irrigation pumping activities and take appropriate remedial action
- implement and follow work health and safety and environmental requirements
- interpret irrigation plans
- interpret pump curves
- monitor performance of pumps and irrigation components
- pressure testing pumps
- provide customer service
- select irrigation components for a system
- use pressure testing equipment
- use recorded information to review energy and water efficiency for an irrigation system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation sales and service
- basic irrigation system diagnostic techniques
- demonstration and assembly of irrigation products and components
- determination of pump capacities in relation to proposed application
• interpretation of manufacturers specifications
• irrigation components technical specifications and suitability
• price negotiation and payment options
• pump and irrigation equipment characteristics, technical capabilities and limitations
• pump and irrigation equipment components, controls, features and functions
• store irrigation products and pump range
• store product and service and repair policy

**Assessment Conditions**

Assessors must satisfy current standards for RTOs.

1.5 Check and clean regulators for performance and replace defective parts |
| 2. Service pulsators and electronic systems | 2.1 Assess pulsator performance during milking and as a part of mechanical testing  
2.2 Remove and repair or replace electronic or pneumatic pulsators in mechanical testing  
2.3 Test and replace extra low voltage segments of the pulsation and wash systems controllers |
| 3. Service and repair milk pumps and the milk releasing system | 3.1 Check pumping performance of milk pumps  
3.2 Disassemble and repair milk pumps, drives and couplings  
3.3 Inspect milk releaser and replace rubber seals and flaps |
| 4. Repair and maintain the milk transport system | 4.1 Inspect rubberware for correct specification including liner/teat cup matching and replace or adjust  
4.2 Inspect claws and claw bowls for cleanliness and correct connection to suit the specific pulsation system  
4.3 Assess the operation of automatic vacuum cut-off in the claw and clean air admission holes  
4.4 Inspect milk lines and air lines and check joins for compliance with industry standards  
4.5 Check cans and vessels for dents and damage and shut off valves for correct operation  
4.6 Disassemble, clean and re-assemble plate cooler, and clean and replace filters |
| 5. Service and repair non-milking systems | 5.1 Inspect jetters and cleaning system to ensure adequate air admission during cleaning and correct water volumes are circulating  
5.2 Repair or replace cleaning system components  
5.3 Check automatic cup removers to ensure that detectors are clean and effective and that the pistons operate effectively  
5.4 Repair or replace automatic cup removers  
5.5 Inspect herd recording equipment and valves and replace rubberware  
5.6 Inspect and repair or maintain feed systems |
Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH303A Service and repair milking equipment.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- service and repair vacuum pumps and the vacuum regulator
- service pulsators and electronic systems
- service and repair milk pumps and the milk releasing system
- repair and maintain the milk transport system
- service and repair non-milking systems
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- types, functions, cleaning, monitoring and maintenance of milking machines and all components
- criteria and methods for assessing optimal performance of milking machines and their components
- requirements, procedures and assessment criteria for mechanical testing of milking machines and all components
- possible faults, problems and poor performance with milking machines and their components, impacts on milking operations and corrective actions for these faults and problems
- types, functions, cleaning, monitoring and maintenance of feed systems and their components
- relevant work health and safety requirements
Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Application

This unit of competency describes the skills and knowledge required to monitor and provide advice on cleaning milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:
- identify cleaning problems
- carry out cleaning routines
- determine chemicals and cleaning routines
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:
- types, functions, cleaning, monitoring and maintenance of milking machines, milking machine components and milking facility equipment
- requirements, criteria and assessment methods for optimal performance of milking machines and their components
- possible faults, problems and poor performance with milking machines and their components, impacts on milking operations and corrective actions for these faults and problems
- requirements, criteria, procedures, routines and assessment methods for optimal cleaning and hygiene of milking machines and their components
- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
- relevant work health and safety requirements
Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

<td>1.1 Establish herd details and health status 1.2 Determine expected performance from machine specifications</td>
</tr>
</tbody>
</table>
## Element | Performance criteria
--- | ---
1.3 | Assess and record condition of components
1.4 | Identify work health and safety hazards, assess risks implement controls, record and report to supervisor

2. | Calculate required milking machine performance
2.1 | Calculate effective reserve based on facility specifications
2.2 | Calculate vacuum pump capacity from effective reserve
2.3 | Record manufacturer’s recommended component specification and matching

3. | Measure milking machine performance
3.1 | Measure working vacuum levels in line with required performance
3.2 | Adjust vacuum to optimise milking facility performance
3.3 | Determine and report air consumption and component leakage.
3.4 | Test pulsators in line with manufacturer’s recommendations
3.5 | Establish and match working air consumption to manufacturer’s recommendations

4. | Make recommendations to optimise machine performance
4.1 | Interpret test results in line with desired performance and herd details
4.2 | Provide recommendations and a written report on safety considerations for the specific installation tested
4.3 | Provide recommendations on milking facility performance
4.4 | Complete report on component condition in line with manufacturer’s requirements

### Foundation Skills
Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record milking machine specifications
- calculate required milking machine performance
- measure milking machine performance
- make recommendations to optimise machine performance
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- information required, criteria and methods for assessing herd health status
- types, functions, cleaning, monitoring and maintenance of milking machines, milking machine components and milking facility equipment
- requirements, criteria and assessment methods for optimal performance of milking machines and their components
- requirements and methods for determining the performance targets of a milking enterprise from the herd status and milking installations
- possible faults, problems and poor performance with milking machines and their components, impacts on milking operations and corrective actions for these faults and problems
- relevant work health and safety requirements
- key aspects and components of reports and recommendations to a milking enterprise
Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.
